General Explanation and Instructions for the Completion of **"Mandated Meetings - Reasonable Reimbursement Methodology Unit Cost Survey"**

These instructions are provided to assist Stormwater Copermittees in completing the survey of regional and watershed meeting costs included as Worksheet B of this Workbook. To minimize the need for follow-up, clarifications, and corrections, respondents are requested to read the instructions in their entirety before completing the survey.

Part 1: General Information

1. **Please return the completed survey by January 19, 2011**: Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.

3. **Note A: Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.

Part 2: Meeting Information

4. **All meeting information has been completed for you**. You will not be able to modify any information in this section. Average meeting lengths are based on the times typically scheduled for each meeting type, based on a review of past agendas. In most cases, this is 2 hours. Travel time is calculated as the ***average of all Copermittees*** , based on an assumption of 45 minutes for those traveling the farthest, and 15 for those closest to the meeting location. This 30-minute average is doubled to allow for travel in both directions.

Part 3: FY 2007-08 Salary Information

5. **Note 1 (Person Most Frequently Attending Meetings)**: Indicate, by name if possible, and by job classification, the person from your organization who most frequently attended each working body over the 3-year survey period. It's understood that different people may have represented a jurisdiction at different times. However, to simplify calculations, please indicate ***only the individual who in your judgment most typically attended the meetings*** . If a consultant attended on behalf of your jurisdiction, please include the name of the consultant, and "N/A" in the Job Classification field.

6. **Note 2 (Annual Salary)**: Please report the annual salary earned by an employee during FY 2007-08. If the person was employed for only a portion of a fiscal year, the annualized salary should be reported. If a consultant represented your jurisdiction at meetings, please include the charge for 1,800 hours under salaries. For example $120/hour times 1800 hours = $216,000. Also enter zeros under the benefit and indirect cost columns for consultants since these costs are already built into the consulting rates.

7. **Note 3 (Benefit Rate)**: Please indicate the percentage of salary provided by your employer as an employee benefit rate for FY 2007-08.

8. **Note 4 (Indirect Cost Rate)**: Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

9. **Note 5 (Auto-calculation of Costs)**: Based on the information you input, the spreadsheet will auto-calculate two figures for each applicable working body. The first is the "Salaries, Benefits, Indirect Totals," which is simply the salary adjusted for the Benefit and Indirect Cost Rates. The second is the Productive Hourly Rate, which is the sum of the employee's "Salaries, Benefits, Indirect Totals," divided by 1,800 hours, the State's default rate. The Productive Hourly Rate will be used in combination with the Meeting Information to calculate the average cost of attending each working body in each fiscal year.

Part 4: FY 2007-08 through 2009-10 Meeting Costs

10. **Note 6 (Meeting Attendances)**. The only information you are required to complete is the number of meetings you attended for each working body in each of the three fiscal years. If no meetings were attended, please enter a zero. Your total meetings for each fiscal year are summed at the bottom of the sheet.

11. **Note 7 (Average Meeting Costs)**. The "average meeting cost" is the product of the hourly "allowance per meeting" times the productive hourly rate for 2007-08. Based on your meeting attendances and the additional information described above, the spreadsheet will auto-calculate your unit meeting costs for each fiscal year, as well as an average of the three. This information will then be used to calculate an average unit meeting cost for all Copermittees across all working bodies.

12. **Note 8 (Total Meeting Costs)**. Total meeting costs are the product of the number of attendances times the average meeting cost. These are summed for each fiscal year at the bottom of the sheet.

13. **Do not claim more than the number of meetings actually held for any working body**. Even if your jurisdiction had multiple representatives at some meetings, ***only one person per meeting should be counted*** . The purpose of this survey is only to calculate typical meeting costs based on the typical attendees. This will not preclude Copermittees from counting multiple attendees when actual claims are made. Note: To assist Copermittees in completing these sections, meeting dates and descriptions are being provided separately.

Notes

See Worksheet A (Instructions and Notes) for explanations of notes and aditional instructions on completing the survey.

General Explanation and Instructions for the Completion of **"Conveyance System Inspection and Cleaning - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.

3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.

4. **Costs Not Included**. This RRM survey does not include the following costs: (1) reimbursable costs for parking signage and enforcement, which will be claimed as actual costs, (2) vehicle and equpiment costs, which will be claimed as actual costs, and (3) costs of materials disposal, which are not reimbursable because they were required under the 2001 permit.

5. **Exclusion of Open Channels**. This RRM survey addresses only "catch basins and inlets"; it does not include costs associated with include the inspection or maintenance of open channels, which will be claimed as actual costs. Results for any facilities considered to be within the category of "catch basins and inlets" should be included in your response.

6. **Inclusion of "First" Inspections and Cleanings**. Although actual claims may not include the "first" annual inspection and cleaning of each catch basin and inlet (these were required in the 2001 permit), your survey results should count these activities. The purpose of the survey is to quantify the typical cost of these activities on a unit basis. It is therefore simpler to include all inspections and cleanings in the survey, and ensures a larger sample size.

7. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

8. Based on the information you input in Worksheet C (in-house inspection costs), Worksheet D (In-house cleaning costs), and Worksheet E (Contractor Costs), the Tab B. 2.A. (Cost Summary) spreadsheet will auto-calculate.
9. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Inspection Costs

10. **Note 1 (Conveyance System Inspection and Related Costs).** Please report only the portion of costs allocated to conveyance system inspection or related functions. If these costs are intermingled with cleaning-related costs, please estimate the proportion allocated to inspection functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

11. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

12. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

13. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

14. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

15. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

16. **Note 7 (Source of Inspection Results)**. Please indicate the documents and assumptions used for reported costs.

17. **Note 8 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.D. of the Copermittees' revised Parameters and Guidelines (11/15/10).

18. **Note 9 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

19. **Note 10 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement conveyance system inspection and cleaning and related functions during the life of the Permit.

20. **Note 11 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.

21. **Note 12 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheets C and D, contract management costs should only include those necessary to carry out the Copermittees' in-house conveyance system inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor inspection and cleaning activities are included in Worksheet E (See Note 19).

22. **Note 14 (Vehicle and Equipment Maintenance)**. Annual maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain vehicles, equipment, and supplies.

23. **Note 15 (Fuel)**. The actual cost of fuel necessary to run the conveyance system inspection and cleaning equipment and equipment used to transport collected materials.

Tab D. In-house Cleaning Costs

24. **Note 16 (Conveyance System Cleaning Operations and Related Costs)**. Please report only the portion of costs allocated to conveyance system cleaning or related functions. If these costs are intermingled with inspection-related costs, please estimate the proportion allocated to cleaning functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

25. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

26. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

27. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

28. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

29. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

30. **Note 7 (Source of Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

Tab E. Contractor Costs

31. **Note 17 (Contractor Costs)**. Please allocate a portion of the cost associated with conveyance system inspections and a portion with conveyance system cleaning functions. If these costs are intermingled, please estimate the proportion allocated to each, and describe the assumptions used to derive these estimates under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader categories of "Conveyance System Inspection" and "Conveyance System Cleaning." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figures in the "Source of Contract Cost Information" box .

32. **Note 18 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house inspections and cleaning. Worksheet E should describe only those supplemental activities related to contract inspection and cleaning.

33. **Note 10 (Contract Management Costs)**. Costs of managing conveyance system inspection and cleaning contracts.

34. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

35. **Note 7 (Source of Inspection and Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

36. **Note 19 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet E, contract management costs should only include those necessary to carry out the contracted conveyance system inspection and cleaning activities . Contract costs associated with in-house inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheets C and D (See Note 12).

								TOTALS	$8,435		$8,688		$8,949	

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Part 2: Other Personnel Costs Related to Conveyance System Inspections (Note 1)

	Annualized FY 2007-08 Salary Information							FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2008-09 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	Source of Information (Note 6)
	a. Reporting (Note 8)													
	Use lines 1-5 to auto-calculate annual reporting costs for each year													**Source of Reporting Cost Information**
1	Clayton Dobbs	Street/Storm Drain Maintenance Worker III	1	$65,940	51	10	$106,164	0.5	$531	0.5	$547	0.5	$563	Salary Information is from IFAS. Due to reclassifications, etc. Dobbs position is currently a Storm Drain Maintenance Supervisor which has a higher rate of pay and a benefit rate of 46%.
2	Enter Name	Enter Job Classification	1	$0	51	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 to insert total reporting costs for each year								$0		$0		$0	
								Reporting Totals	**$531**		**$547**		**$563**	
	b. Supervision and Management (Note 9)													
	Use lines 1-5 if auto-calculating annual supervision and management costs for each year													**Source of Supervision & Management Cost Information**
1	Clayton Dobbs	Storm Drain Maintenance Supervisor	1	$0	0	10	$0	0.0005	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total supervision and management costs for each year								$0		$0		$0	
								Supervision and Management Totals	**$0**		**$0**		**$0**	
	c. Employee and Vendor Training (Note 10)													
	Use lines 1-5 if auto-calculating annual training costs for each year													**Source of Training Cost Information**
1	Enter Name	Supervisor (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
								Training Totals	**$0**		**$0**		**$0**	
	d. Vehicle and Equipment Maintenance (Note 11)													
	Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year													**Source of Equipment Maintenance Cost Information**
1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0	
								Equipment Maintenance Totals	**$0**		**$0**		**$0**	
	e. Contract Management (Note 12)													
	Use lines 1-5 if auto-calculating annual contract management costs for each year													**Source of Contract Management Cost Information**
1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0	
								Contract Management Totals	**$0**		**$0**		**$0**	

Part 3: Non-Personnel Costs Related to Conveyance System Inspections (Note 1)

		FY 2007-08	FY 2008-09	FY 2009-10	Source of Non-personnel Cost Information
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0	Describe source of non-personnel cost information. Also use this space to document any assumptions used to determine non-personnel costs.
2	Fuel (Note 15)	$0	$0	$0	
3	Training Materials and Supplies (Note 10)	$0	$0	$0	
	Total	$0	$0	$0	

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$8,966	**$9,235**	**$9,512**

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Part 5: Inspection Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Inspection Results (Note 7)
Number of Inspections	200	200	2	Identify the source of inspection results. Also use this space to document any assumptions used to calculate inspection results.
Unit Cost per Inspection	$ 44.83	$ 46.17	$ 4,755.96	

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

	Annualized FY 2007-08 Salary Information							Personnel Cost Calculations						
								FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2009-10 Personnel Costs

4	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0
								Contract Management Totals	**$0**		**$0**		**$0**

Source of Contract Management Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

Part 3: Non-Personnel Costs Related to Conveyance Cleaning

		FY 2007-08	FY 2008-09	FY 2009-10
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0
2	Fuel (Note 15)	$0	$0	$0
3	Training Materials and Supplies (Note 10)	$0	$0	$0
	Total	$0	$0	$0

Source of Non-personnel Cost Information

Describe source of non-personnel cost information. Also use this space to document any assumptions used to determine non-personnel costs.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$0	**$0**	**$0**

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 5: Cleaning Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Cleaning Results (Note 17)
Number of Cleanings	1	1	1	Identify the source of inspection results. Also use this space to document any assumptions used to calculate cleaning results.
Unit Cost per Cleaning	$ -	$ -	$ -	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet E: Contractor Costs and Results

Part 1: Contract Costs

		FY 2007-08		FY 2008-09		FY 2009-10	
		Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
	Contractor Costs (Note 17)						
1	Conveyance System Inspection (Note 1)	$0		$0		$0	
2	Conveyance System Cleaning (Note 16)		$600		$600		$600
	Supplemental In-house Costs (Note 18)						
	Personnel Costs						
1	Reporting (Note 8)	$0	$0	$0	$0	$0	$0
2	Contract Management (Note 19)	$0	$2,654	$0	$2,654	$0	$2,654
3	Employee and Vendor Training (Note 10)	$0	$0	$0	$0	$0	$0
4	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0	$0	$0	$0
	Non-personnel Costs						
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0	$0	$0	$0
2	Fuel (Note 15)	$0	$0	$0	$0	$0	$0
3	Training Materials and Supplies (Note 10)	$0	$0	$0	$0	$0	$0
	Total Contract Costs	**$0**	**$3,254**	**$0**	**$3,254**	**$0**	**$3,254**

Source of Contract Cost Information (Note 6)

$600 for cleaning represents 10 new catch basins and inlets and cleaning costs of $60/each. In addition, the city has a contract with Affordable Pipeline Services for cleaning of D-25/D-27's (under sidewalk drain services) in the amount of $55,000, and a conract with Urban Corps in the amount of $42,000 for outfall cleaning. The in-house cost to manage these contracts is approximately $6,000.

Part 2: Inspection and Cleaning Results

	FY 2007-08		FY 2008-09		FY 2009-10	
Inspections	Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
Number of Inspections	0		0		0	
Unit Cost per Inspection	#DIV/0!		#DIV/0!		#DIV/0!	
Cleanings						
Number of Cleanings		10		10		10
Unit Cost per Cleaning		$ 325.40		$ 325.40		$ 325.40

Source of Inspection and Cleaning Results (Note 7)

The contract management cost is based on 2.5% of a Sr. Storm Drain Maintenance Workers time.

Note: Only report statistics for catch basins and inlets. Do not include inspections or cleaning of open channels.

Specific Questions for Carlsbad

Inspection and Cleaning Results Verfication

1) You reported 200 inspections for FY 2007-08, 2008-09 and 2 inspections for FY 2009-10. Is FY 2009-10 suppose to be 200?
2) You reported 10 cleanings for each year, is this correct?
3) Do these results exclude open channels? If yes, how did you exclude them? Can you provide documentation? If no, please revise and provide documentation of process.
4) Why did you report only the inspections of new inlets and catch basins?
5) Please define what catch basins and inlets were included in the results
6) What did you report in your JURMP for all three years?

What does the number of cleanings represent? Are these cleanings of the new inlets and catch
Contract Management Costs (Tab E) is greater than the cost for cleanings. Is this correct?

Inspection and Cleaning - Reasonable Reimbursement Methodology Unit Cost Survey"

2. **Please name the completed file as follows**. The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.

3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.

signage and enforcement, which will be claimed as actual costs, (2) vehicle and equpiment costs, which will be claimed as actual costs, and (3) costs of materials disposal, which are not reimbursable because they were required under the 2001 permit.

costs associated with include the inspection or maintenance of open channels, which will be claimed as actual costs. Results for any facilities considered to be within the category of "catch basins and inlets" should be included in your response.

inspection and cleaning of each catch basin and inlet (these were required in the 2001 permit), your survey results should count these activities. The purpose of the survey is to quantify the typical cost of these activities on a unit basis. It is therefore simpler to include all inspections and cleanings in the survey, and ensures a larger

7. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

cleaning costs), and Worksheet E (Contractor Costs), the Tab B. 2.A. (Cost Summary) spreadsheet will auto-calculate.

Information).

Tab C. In-house Inspection Costs

to conveyance system inspection or related functions. If these costs are intermingled with cleaning-related costs, please estimate the proportion allocated to inspection functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

11. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

12. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

benefit rate during 2007-08.

14. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

15. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

16. **Note 7 (Source of Inspection Results)**. Please indicate the documents and assumptions used for reported costs.

17. **Note 8 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.D. of the Copermittees' revised Parameters and Guidelines (11/15/10).

18. **Note 9 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement conveyance system inspection and cleaning and related functions during the life of the Permit.

water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.

negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheets C and D, contract management costs should only include those necessary to carry out the Copermittees' in-house conveyance system inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor inspection and cleaning activities are included in Worksheet E (See Note 19).

water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain vehicles, equipment, and supplies.

23. **Note 15 (Fuel)**. The actual cost of fuel necessary to run the conveyance system inspection and cleaning equipment and equipment used to transport collected materials.

Tab D. In-house Cleaning Costs

costs allocated to conveyance system cleaning or related functions. If these costs are intermingled with inspection-related costs, please estimate the proportion allocated to cleaning functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

25. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

26. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

benefit rate during 2007-08.

28. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

29. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

reported values.

Tab E. Contractor Costs

inspections and a portion with conveyance system cleaning functions. If these costs are intermingled, please estimate the proportion allocated to each, and describe the assumptions used to derive these estimates under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader categories of "Conveyance System Inspection" and "Conveyance System Cleaning." If such itemization is part of your contract activities, please indicate which items incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house inspections and cleaning. Worksheet E should describe only those supplemental activities related to contract inspection and cleaning.

33. **Note 5 (Contract Management Costs)**. Costs of managing conveyance system inspection and cleaning contracts.

34. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

35. **Note 7 (Source of Inspection and Cleaning Results)**. Please indicate the documents and assumptions used to negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet E, contract management costs should only include those necessary to carry out the contracted conveyance system inspection and cleaning activities . Contract costs associated with in-house inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.) are

							Training Totals		**$0**		**$0**		**$0**	
	d. Vehicle and Equipment Maintenance (Note 11)													
	Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year													**Source of Equipment Maintenance Cost Information**
1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	From IFAS reports. Includes fleet maint.

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	charges, equipment replacement charges, rental equipment, and small tools. Assumed 25% of total maint. charges are for inspections and 75% for maintenance.
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total equipment maintenance costs for each year								$11,895		$16,262		$13,704	
								Equipment Maintenance Totals	**$11,895**		**$16,262**		**$13,704**	

e. Contract Management (Note 12)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	**Source of Contract Management Cost Information**: All inspection activities are in-house. No contracts were awarded for this task.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0	
								Contract Management Totals	**$0**		**$0**		**$0**	

Part 3: Non-Personnel Costs Related to Conveyance System Inspections (Note 1)

		FY 2007-08	FY 2008-09	FY 2009-10
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0
2	Fuel (Note 15)	$0	$0	$0
3	Training Materials and Supplies (Note 10)	$0	$0	$0
	Total	$0	$0	$0

Source of Non-personnel Cost Information: All vehicle and equipment maintenance, fuel, and training materials and supplies are covered under the above listed items. There are no additional costs to be added here.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$205,491	**$188,798**	**$366,525**

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Part 5: Inspection Results

	FY 2007-08	FY 2008-09	FY 2009-10
Number of Inspections	7908	7343	8480
Unit Cost per Inspection	$ 25.99	$ 25.71	$ 43.22

Source of Inspection Results (Note 7)

Numbers indicated in Part 5 are the number of storm drain catch basins and inlets that were inspected during the fiscal year. Information is originally from GBA, which were also used for JURMP Annual Reports.

43

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 1: Conveyance System Cleaning Operations Costs (Note 16)

Use lines 1-20 if auto-calculating annual inspection costs for each year

	Annualized FY 2007-08 Salary Information							Personnel Cost Calculations: FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2009-10 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to inspections	Annual cost for cleaning	% of time dedicated to inspections	Annual cost for cleaning	% of time dedicated to inspections	Annual cost for cleaning	Source of Information (Note 6)

5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total equipment maintenance costs for each year								$35,686		$48,788		$41,113
								Equipment Maintenance Totals	**$35,686**		**$48,788**		**$41,113**

Source of Equipment Maintenance Cost Information

From IFAS reports. Includes fleet maint. charges, equipment replacement charges, rental equipment, and small tools. Assumed 25% of total maint. charges are for inspections and 75% for maintenance.

e. Contract Management (Note 12)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0
								Contract Management Totals	**$0**		**$0**		**$0**

Source of Contract Management Cost Information

All storm drain maintenance activities are in-house. No contracts were awarded for this task.

Part 3: Non-Personnel Costs Related to Conveyance Cleaning

		FY 2007-08	FY 2008-09	FY 2009-10
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0
2	Fuel (Note 15)	$0	$0	$0
3	Training Materials and Supplies (Note 10)	$0	$0	$0
	Total	$0	$0	$0

Source of Non-personnel Cost Information

All vehicle and equipment maintenance, fuel, and training materials and supplies are covered under the above listed items. There are no additional costs to be added here.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$507,988	**$780,609**	**$674,078**

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 5: Cleaning Results

	FY 2007-08	FY 2008-09	FY 2009-10
Number of Cleanings	3601	5183	4444
Unit Cost per Cleaning	$ 141.07	$ 150.61	$ 151.68

Source of Cleaning Results (Note 17)

Numbers indicated in Part 5 are the number of storm drain catch basins and inlets that were cleaned during the fiscal year. Information is originally from GBA, which were also used for JURMP Annual Reports.

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet E: Contractor Costs and Results

Part 1: Contract Costs

		FY 2007-08		FY 2008-09		FY 2009-10	
		Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
	Contractor Costs (Note 17)						
1	Conveyance System Inspection (Note 1)	$0		$0		$0	
2	Conveyance System Cleaning (Note 16)		$0		$0		$0
	Supplemental In-house Costs (Note 18)						
	Personnel Costs						
1	Reporting (Note 8)	$0	$0	$0	$0	$0	$0
2	Contract Management (Note 19)	$0	$0	$0	$0	$0	$0
3	Employee and Vendor Training (Note 10)	$0	$0	$0	$0	$0	$0
4	14)	$0	$0	$0	$0	$0	$0
	Non-personnel Costs						
1	14)	$0	$0	$0	$0	$0	$0
2	Fuel (Note 15)	$0	$0	$0	$0	$0	$0
3	Training Materials and Supplies (Note 10)	$0	$0	$0	$0	$0	$0
	Total Contract Costs	**$0**	**$0**	**$0**	**$0**	**$0**	**$0**

Source of Contract Cost Information (Note 6)

Describe source of contract cost information. Also use this space to document any assumptions used to calculate costs.

Part 2: Inspection and Cleaning Results

	FY 2007-08		FY 2008-09		FY 2009-10	
	Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
Inspections						
Number of Inspections	1		1		1	
Unit Cost per Inspection	$ -		$ -		$ -	
Cleanings						
Number of Cleanings		1		1		1
Unit Cost per Cleaning		$ -		$ -		$ -

Source of Inspection and Cleaning Results (Note 7)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate inspection and cleaning results.

Note: Only report statistics for catch basins and inlets. Do not include inspections or cleaning of open channels.

Activity	Comment	
In-house Personnel Conveyance System	Schedule C - salary information not filled in	Needs to have annual salary, benefit rate, and in-direct cost rates
In-house Personnel Conveyance System	Schedule D - salary information not filled in	Needs to have annual salary, benefit rate, and in-direct cost rates
In-house Personnel Reporting	Schedule C and D - salary information not filled in	Needs to have annual salary, benefit rate, and in-direct cost rates
In-house Personnel Employee Supervisio	Schedule C and D - salary information not filled in	Needs to have annual salary, benefit rate, and in-direct cost rates
In-house Personnel Equipment Maintenar	Schedule D - salary information not filled in and Equipment, tool related charges should be reported in Part 3.	
In-house non-personnel fuel	Schedule C and D - Equipment, tool related charges should be reported in Part 3	
In-house non-personnel Equipment Maint	Schedule C and D - fuel charges should be reported in Part 3	
Contract # of inspections	Schedule E - Number of contract inspections should be zero as cost is zero.	
Contract # of cleanings	Schedule E - Number of contract cleanings should be zero as cost is zero.	
	Why is FY 09-10 almost double the per inspection cost?	

Specific Questions

General Explanation and Instructions for the Completion of **"Conveyance System Inspection and Cleaning - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.

3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.

4. **Costs Not Included**. This RRM survey does not include the following costs: (1) reimbursable costs for parking signage and enforcement, which will be claimed as actual costs, (2) vehicle and equpiment costs, which will be claimed as actual costs, and (3) costs of materials disposal, which are not reimbursable because they were required under the 2001 permit.

5. **Exclusion of Open Channels**. This RRM survey addresses only "catch basins and inlets"; it does not include costs associated with include the inspection or maintenance of open channels, which will be claimed as actual costs. Results for any facilities considered to be within the category of "catch basins and inlets" should be included in your response.

6. **Inclusion of "First" Inspections and Cleanings**. Although actual claims may not include the "first" annual inspection and cleaning of each catch basin and inlet (these were required in the 2001 permit), your survey results should count these activities. The purpose of the survey is to quantify the typical cost of these activities on a unit basis. It is therefore simpler to include all inspections and cleanings in the survey, and ensures a larger sample size.

7. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

8. Based on the information you input in Worksheet C (in-house inspection costs), Worksheet D (In-house cleaning costs), and Worksheet E (Contractor Costs), the Tab B. 2.A. (Cost Summary) spreadsheet will auto-calculate.
9. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Inspection Costs

10. **Note 1 (Conveyance System Inspection and Related Costs).** Please report only the portion of costs allocated to conveyance system inspection or related functions. If these costs are intermingled with cleaning-related costs, please estimate the proportion allocated to inspection functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

11. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

12. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

13. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

14. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

15. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

16. **Note 7 (Source of Inspection Results)**. Please indicate the documents and assumptions used for reported costs.

17. **Note 8 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.D. of the Copermittees' revised Parameters and Guidelines (11/15/10).

18. **Note 9 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

19. **Note 10 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement conveyance system inspection and cleaning and related functions during the life of the Permit.

20. **Note 11 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.

21. **Note 12 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheets C and D, contract management costs should only include those necessary to carry out the Copermittees' in-house conveyance system inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor inspection and cleaning activities are included in Worksheet E (See Note 19).

22. **Note 14 (Vehicle and Equipment Maintenance)**. Annual maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain vehicles, equipment, and supplies.

23. **Note 15 (Fuel)**. The actual cost of fuel necessary to run the conveyance system inspection and cleaning equipment and equipment used to transport collected materials.

Tab D. In-house Cleaning Costs

24. **Note 16 (Conveyance System Cleaning Operations and Related Costs)**. Please report only the portion of costs allocated to conveyance system cleaning or related functions. If these costs are intermingled with inspection-related costs, please estimate the proportion allocated to cleaning functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

25. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

26. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

27. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

28. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

29. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

30. **Note 7 (Source of Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

Tab E. Contractor Costs

31. **Note 17 (Contractor Costs)**. Please allocate a portion of the cost associated with conveyance system inspections and a portion with conveyance system cleaning functions. If these costs are intermingled, please estimate the proportion allocated to each, and describe the assumptions used to derive these estimates under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader categories of "Conveyance System Inspection" and "Conveyance System Cleaning." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figures in the "Source of Contract Cost Information" box .

32. **Note 18 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house inspections and cleaning. Worksheet E should describe only those supplemental activities related to contract inspection and cleaning.

33. **Note 10 (Contract Management Costs)**. Costs of managing conveyance system inspection and cleaning contracts.

34. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

35. **Note 7 (Source of Inspection and Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

36. **Note 19 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet E, contract management costs should only include those necessary to carry out the contracted conveyance system inspection and cleaning activities . Contract costs associated with in-house inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheets C and D (See Note 12).

Part 3: Non-Personnel Costs Related to Conveyance System Inspections (Note 1)

		FY 2007-08	FY 2008-09	FY 2009-10	Source of Non-personnel Cost Information
1	Vehicle and Equipment Maintenance (Note 14)	$7,986	$7,986	$7,986	Vehicle and Equipment Mainenance costs are estimated from an operating cost of $41.38/hour per truck. This estimate includes non-personnel costs such as maintenance and fueling of equipment and vehicles. Approximately
2	Fuel (Note 15)	$0	$0	$0	
3	Training Materials and Supplies (Note 10)	$0	$0	$0	
	Total	$7,986	$7,986	$7,986	

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$36,682	**$37,543**	**$38,429**

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Part 5: Inspection Results

	FY 2007-08	FY 2008-09	FY 2009-10
Number of Inspections	480	486	490
Unit Cost per Inspection	$ 76.42	$ 77.25	$ 78.43

Source of Inspection Results (Note 7)

The source of the inspection results come from the City maintenance crews. It is important to note that City crews inspect a larger number of inlets and catch basins but only the ones that need cleaning are counted in this survey.

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 2: Other Personnel Costs Related to Conveyance System Cleaning (Note 16)

	Annualized FY 2007-08 Salary Information							Costs		Costs		Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	Source of Information (Note 6)
	a. Reporting (Note 8)													
	Use lines 1-5 to auto-calculate annual reporting costs for each year													**Source of Reporting Cost Information**
1	Robert Griswold	Senior Engineering Technician	1	$62,514	46.21	**6251**	**$3,999,152**	**0.4**	**$15,997**	**0.4**	**$16,477**	**0.4**	**$16,971**	Approxitamely 8 hours per year in a year composed of approximately 1,992 hours.
2	Multiple	Enter Job Classification	4	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 to insert total reporting costs for each year								$0		$0		$0	
							Reporting Totals		**$15,997**		**$16,477**		**$16,971**	
	b. Supervision and Management (Note 9)													
	Use lines 1-5 if auto-calculating annual supervision and management costs for each year													**Source of Supervision & Management Cost Information**
1	Enter Name	Program Mgr (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total supervision and management costs for each year								$0		$0		$0	
							Supervision and Management Totals		**$0**		**$0**		**$0**	
	c. Employee and Vendor Training (Note 10)													
	Use lines 1-5 if auto-calculating annual training costs for each year													**Source of Training Cost Information**
1	Enter Name	Supervisor (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
							Training Totals		**$0**		**$0**		**$0**	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

d. Vehicle and Equipment Maintenance (Note 11)

Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year

1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0	
								Equipment Maintenance Totals	**$0**		**$0**		**$0**	

Source of Equipment Maintenance Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

e. Contract Management (Note 12)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0	
								Contract Management Totals	**$0**		**$0**		**$0**	

Source of Contract Management Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

Part 3: Non-Personnel Costs Related to Conveyance Cleaning

		FY 2007-08	FY 2008-09	FY 2009-10
1	Vehicle and Equipment Maintenance (Note 14)	$16,304	$16,304	$16,304
2	Fuel (Note 15)	$0	$0	$0
3	Training Materials and Supplies (Note 10)	$0	$0	$0
	Total	$16,304	$16,304	$16,304

Source of Non-personnel Cost Information

Vehicle and Equipment Mainenance costs are estimated from an operating cost of $41.38/hour per truck. This estimate includes non-personnel costs such as maintenance and fueling of equipment and vehicles. Approximately 394

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$58,222	**$59,479**	**$60,774**

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 5: Cleaning Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Cleaning Results (Note 17)
Number of Cleanings	480	486	490	The source of the inspection results come from the City maintenance crews.
Unit Cost per Cleaning	$ 121.29	$ 122.38	$ 124.03	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet E: Contractor Costs and Results

Part 1: Contract Costs

		FY 2007-08		FY 2008-09		FY 2009-10	
		Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
	Contractor Costs (Note 17)						
1	Conveyance System Inspection (Note 1)	$0		$0		$0	
2	Conveyance System Cleaning (Note 16)		$0		$0		$0
	Supplemental In-house Costs (Note 18)						
	Personnel Costs						
1	Reporting (Note 8)	$0	$0	$0	$0	$0	$0
2	Contract Management (Note 19)	$0	$0	$0	$0	$0	$0
3	Employee and Vendor Training (Note 10)	$0	$0	$0	$0	$0	$0
4	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0	$0	$0	$0
	Non-personnel Costs						
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0	$0	$0	$0
2	Fuel (Note 15)	$0	$0	$0	$0	$0	$0
3	Training Materials and Supplies (Note 10)	$0	$0	$0	$0	$0	$0
	Total Contract Costs	**$0**	**$0**	**$0**	**$0**	**$0**	**$0**

Source of Contract Cost Information (Note 6)

Describe source of contract cost information. Also use this space to document any assumptions used to calculate costs.

Part 2: Inspection and Cleaning Results

	FY 2007-08		FY 2008-09		FY 2009-10	
	Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
Inspections						
Number of Inspections	0		0		0	
Unit Cost per Inspection	#DIV/0!		#DIV/0!		#DIV/0!	
Cleanings						
Number of Cleanings		0		0		0
Unit Cost per Cleaning		#DIV/0!		#DIV/0!		#DIV/0!

Source of Inspection and Cleaning Results (Note 7)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate inspection and cleaning results.

Note: Only report statistics for catch basins and inlets. Do not include inspections or cleaning of open channels.

Activity	Comment
In-house Personnel Conveyance System	Schedule C- Default indirect cost rate is 10%, higher than indirect cost rates used.
In-house Personnel Conveyance System	Schedule D- Default indirect cost rate is 10%, higher than indirect cost rates used.
In-house Personnel Reporting	Schedule C - Indirect cost rate used is 6,251 %. Assuming a 10% indirect cost rate, the total for (column H) would be $97,653. % of time should be 8/1992 or .4%. Assuming $97,653 total (above), the reporting costs would be $391.
In-house Personnel Reporting	Appears to be duplicate cost. Same amount recorded for cleaning as is reported for inspection

General Explanation and Instructions for the Completion of **"Conveyance System Inspection and Cleaning - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.

3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.

4. **Costs Not Included**. This RRM survey does not include the following costs: (1) reimbursable costs for parking signage and enforcement, which will be claimed as actual costs, (2) vehicle and equpiment costs, which will be claimed as actual costs, and (3) costs of materials disposal, which are not reimbursable because they were required under the 2001 permit.

5. **Exclusion of Open Channels**. This RRM survey addresses only "catch basins and inlets"; it does not include costs associated with include the inspection or maintenance of open channels, which will be claimed as actual costs. Results for any facilities considered to be within the category of "catch basins and inlets" should be included in your response.

6. **Inclusion of "First" Inspections and Cleanings**. Although actual claims may not include the "first" annual inspection and cleaning of each catch basin and inlet (these were required in the 2001 permit), your survey results should count these activities. The purpose of the survey is to quantify the typical cost of these activities on a unit basis. It is therefore simpler to include all inspections and cleanings in the survey, and ensures a larger sample size.

7. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

8. Based on the information you input in Worksheet C (in-house inspection costs), Worksheet D (In-house cleaning costs), and Worksheet E (Contractor Costs), the Tab B. 2.A. (Cost Summary) spreadsheet will auto-calculate.
9. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Inspection Costs

10. **Note 1 (Conveyance System Inspection and Related Costs).** Please report only the portion of costs allocated to conveyance system inspection or related functions. If these costs are intermingled with cleaning-related costs, please estimate the proportion allocated to inspection functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

11. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

12. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

13. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

14. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

15. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

16. **Note 7 (Source of Inspection Results)**. Please indicate the documents and assumptions used for reported costs.

17. **Note 8 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.D. of the Copermittees' revised Parameters and Guidelines (11/15/10).

18. **Note 9 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

19. **Note 10 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement conveyance system inspection and cleaning and related functions during the life of the Permit.

20. **Note 11 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.

21. **Note 12 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheets C and D, contract management costs should only include those necessary to carry out the Copermittees' in-house conveyance system inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor inspection and cleaning activities are included in Worksheet E (See Note 19).

22. **Note 14 (Vehicle and Equipment Maintenance)**. Annual maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain vehicles, equipment, and supplies.

23. **Note 15 (Fuel)**. The actual cost of fuel necessary to run the conveyance system inspection and cleaning equipment and equipment used to transport collected materials.

Tab D. In-house Cleaning Costs

24. **Note 16 (Conveyance System Cleaning Operations and Related Costs)**. Please report only the portion of costs allocated to conveyance system cleaning or related functions. If these costs are intermingled with inspection-related costs, please estimate the proportion allocated to cleaning functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

25. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

26. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

27. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

28. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

29. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

30. **Note 7 (Source of Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

Tab E. Contractor Costs

31. **Note 17 (Contractor Costs)**. Please allocate a portion of the cost associated with conveyance system inspections and a portion with conveyance system cleaning functions. If these costs are intermingled, please estimate the proportion allocated to each, and describe the assumptions used to derive these estimates under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader categories of "Conveyance System Inspection" and "Conveyance System Cleaning." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figures in the "Source of Contract Cost Information" box .

32. **Note 18 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house inspections and cleaning. Worksheet E should describe only those supplemental activities related to contract inspection and cleaning.

33. **Note 10 (Contract Management Costs)**. Costs of managing conveyance system inspection and cleaning contracts.

34. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

35. **Note 7 (Source of Inspection and Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

36. **Note 19 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet E, contract management costs should only include those necessary to carry out the contracted conveyance system inspection and cleaning activities . Contract costs associated with in-house inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheets C and D (See Note 12).

Source of Inspection Cost Information

In 2007-2008, Each Employee's annual salary without benefits was $50,460, 08-09 was $52,229 and 09-10 was $54,226. We estimate 20% of each employees time is related to conveyance system inspection.

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Part 2: Other Personnel Costs Related to Conveyance System Inspections (Note 1)

	Annualized FY 2007-08 Salary Information							FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2008-09 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	Source of Information (Note 6)
	a. Reporting (Note 8)													
	Use lines 1-5 to auto-calculate annual reporting costs for each year													**Source of Reporting Cost Information**
1	Enter Name	Analyst (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	4	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 to insert total reporting costs for each year								$0		$0		$0	
							Reporting Totals		**$0**		**$0**		**$0**	
	b. Supervision and Management (Note 9)													
	Use lines 1-5 if auto-calculating annual supervision and management costs for each year													**Source of Supervision & Management Cost Information**
1	Ben Taylor	Field Supervisor	1	$70,800	45	50	$138,060	10	$13,806	10	$14,220	10	$14,647	City of Encinitas Salary Schedule for 2008, 2009 and 2010.
2	Shawn Atherton	Utility Superintendent	1	$96,456	45	50	$188,089	10	$18,809	10	$19,373	10	$19,954	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total supervision and management costs for each year								$0		$0		$0	
							Supervision and Management Totals		**$32,615**		**$33,593**		**$34,601**	
	c. Employee and Vendor Training (Note 10)													
	Use lines 1-5 if auto-calculating annual training costs for each year													**Source of Training Cost Information**
1	Enter Name	Supervisor (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
							Training Totals		**$0**		**$0**		**$0**	
	d. Vehicle and Equipment Maintenance (Note 11)													
	Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year													**Source of Equipment Maintenance Cost Information**
1	Vac-Con FM # 255	Equip. Operator (example)	1	$11,000	0	0	$11,000	10	$1,100	10	$1,133	10	$1,167	Budgeted amounts for Vac-Con

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	maintenance for 2008 was $11,000, $12,000 in 2009 and $14,000 in 2010.
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0	
								Equipment Maintenance Totals	**$1,100**		**$1,133**		**$1,167**	

e. Contract Management (Note 12)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Downstream Services	Storm Drain Filter Insert Maintenance	1	$12,960	0	0	$12,960	100	$12,960	100	$13,349	100	$13,749	Annual Contract for 2008, 2009 and 2010; $12,960.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0	
								Contract Management Totals	**$12,960**		**$13,349**		**$13,749**	

Source of Contract Management Cost Information

Part 3: Non-Personnel Costs Related to Conveyance System Inspections (Note 1)

		FY 2007-08	FY 2008-09	FY 2009-10
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0
2	Fuel (Note 15)	$0	$0	$0
3	Training Materials and Supplies (Note 10)	$0	$0	$0
	Total	$0	$0	$0

Source of Non-personnel Cost Information

Describe source of non-personnel cost information. Also use this space to document any assumptions used to determine non-personnel costs.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$86,034	**$88,615**	**$91,273**

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Part 5: Inspection Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Inspection Results (Note 7)
Number of Inspections	2	2	2	Identify the source of inspection results. Also use this space to document any assumptions used to calculate inspection results.
Unit Cost per Inspection	$ 43,016.86	$ 44,307.37	$ 45,636.59	

71

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

	Annualized FY 2007-08 Salary Information							Personnel Cost Calculations						
								FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2009-10 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to inspections	Annual cost for cleaning	% of time dedicated to inspections	Annual cost for cleaning	% of time dedicated to inspections	Annual cost for cleaning	Source of Information (Note 6)

Part 1: Conveyance System Cleaning Operations Costs (Note 16)

Use lines 1-20 if auto-calculating annual inspection costs for each year

1	Louie Trantalis	Utility Wrkr II	1	$50,460	45	50	$98,397	70	$68,878	70	$70,944	70	$73,073	
2	David Soto	Utility Wrkr II	1	$50,460	45	50	$98,397	70	$68,878	70	$70,944	70	$73,073	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
7	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
8	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
9	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
10	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
11	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
12	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
13	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
14	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0

4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
							Training Totals		**$0**		**$0**		**$0**	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

d. Vehicle and Equipment Maintenance (Note 11)

Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year

1	Vac-Con FM#255	Combination Sewer and Storm Drain cleaning Truck	1	$11,000	0	0	$11,000	70	$7,700	70	$7,931	70	$8,169
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0
								Equipment Maintenance Totals	**$7,700**		**$7,931**		**$8,169**

Source of Equipment Maintenance Cost Information

Annual Budget for Vac-Con Maintenance was $11,000 in 2008, $12,000 in 2009 and $14,000 in 2010

e. Contract Management (Note 12)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0
								Contract Management Totals	**$0**		**$0**		**$0**

Source of Contract Management Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

Part 3: Non-Personnel Costs Related to Conveyance Cleaning

		FY 2007-08	FY 2008-09	FY 2009-10
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0
2	Fuel (Note 15)	$0	$0	$0
3	Training Materials and Supplies (Note 10)	$0	$0	$0
	Total	$0	$0	$0

Source of Non-personnel Cost Information

Describe source of non-personnel cost information. Also use this space to document any assumptions used to determine non-personnel costs.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$159,262	**$164,040**	**$168,961**

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 5: Cleaning Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Cleaning Results (Note 17)
Number of Cleanings	1	1	1	Identify the source of inspection results. Also use this space to document any assumptions used to calculate cleaning results.
Unit Cost per Cleaning	##########	##########	##########	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet E: Contractor Costs and Results

Part 1: Contract Costs

		FY 2007-08		FY 2008-09		FY 2009-10	
		Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
	Contractor Costs (Note 17)						
1	Conveyance System Inspection (Note 1)	$0		$2		$2	
2	Conveyance System Cleaning (Note 16)		$0		$0		$0

General Explanation and Instructions for the Completion of **"Conveyance System Inspection and Cleaning - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.

3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.

4. **Costs Not Included**. This RRM survey does not include the following costs: (1) reimbursable costs for parking signage and enforcement, which will be claimed as actual costs, (2) vehicle and equpiment costs, which will be claimed as actual costs, and (3) costs of materials disposal, which are not reimbursable because they were required under the 2001 permit.

inspection or maintenance of open channels, which will be claimed as actual costs. Results for any facilities considered to be within the category of

6. **Inclusion of "First" Inspections and Cleanings**. Although actual claims may not include the "first" annual inspection and cleaning of each catch basin and inlet (these were required in the 2001 permit), your survey results should count these activities. The purpose of the survey is to quantify the typical cost of these activities on a unit basis. It is therefore simpler to include all inspections and cleanings in the survey, and ensures a larger sample size.

7. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

8. Based on the information you input in Worksheet C (in-house inspection costs), Worksheet D (In-house cleaning costs), and Worksheet E (Contractor Costs), the Tab B. 2.A. (Cost Summary) spreadsheet will auto-calculate.
9. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Inspection Costs

10. **Note 1 (Conveyance System Inspection and Related Costs).** Please report only the portion of costs allocated to conveyance system inspection or related functions. If these costs are intermingled with cleaning-related costs, please estimate the proportion allocated to inspection functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)
inspection functions.

12. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
13. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
14. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
15. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
16. **Note 7 (Source of Inspection Results)**. Please indicate the documents and assumptions used for reported costs.
17. **Note 8 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.D. of the Copermittees' revised Parameters and Guidelines (11/15/10).
18. **Note 9 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.
19. **Note 10 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement conveyance system inspection and cleaning and related functions during the life of the Permit.
20. **Note 11 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
21. **Note 12 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheets C and D, contract management costs should only include those necessary to carry out the Copermittees' in-house conveyance system inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor inspection and cleaning activities are included in Worksheet E (See Note 19).
22. **Note 14 (Vehicle and Equipment Maintenance)**. Annual maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain vehicles, equipment, and supplies.
23. **Note 15 (Fuel)**. The actual cost of fuel necessary to run the conveyance system inspection and cleaning equipment and equipment used to transport collected materials.

Tab D. In-house Cleaning Costs

24. **Note 16 (Conveyance System Cleaning Operations and Related Costs)**. Please report only the portion of costs allocated to conveyance system cleaning or related functions. If these costs are intermingled with inspection-related costs, please estimate the proportion allocated to cleaning functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)
25. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

26. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

27. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

28. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

29. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

30. **Note 7 (Source of Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

Tab E. Contractor Costs

31. **Note 17 (Contractor Costs)**. Please allocate a portion of the cost associated with conveyance system inspections and a portion with conveyance system cleaning functions. If these costs are intermingled, please estimate the proportion allocated to each, and describe the assumptions used to derive these estimates under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader categories of "Conveyance System Inspection" and "Conveyance System Cleaning." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figures in the "Source of Contract Cost Information" box .

32. **Note 18 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house inspections and cleaning. Worksheet E should describe only those supplemental activities related to contract inspection and cleaning.

33. **Note 10 (Contract Management Costs)**. Costs of managing conveyance system inspection and cleaning contracts.

34. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

Unit Cost per Inspection	$ 107.39		$ 553.95		$ 89.91	
Cleanings						
Number of Cleanings		250		225		200
Unit Cost per Cleaning		$ 219.62		$ 202.98		$ 230.95

Source of Inspection and Cleaning Results (Note 7)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate inspection and cleaning results.

Note: Only report statistics for catch basins and inlets. Do not include inspections or cleaning of open channels.

Activity	Comment
Contractor Conveyance System Inspection Contrac	What was this annual contect for?
Suppl/ In-house Reporting Schedule E	Why reporting cost just for 2007-08?
Suppl/ In-house contract management	Why cost when no contract to manage?
Suppl/ In-house Vehicle and Equipment Maintenan	Why no nopersonnel costs?
Suppl/ In-house fuel	Why no nopersonnel costs?
In-house # of inspections	Why did not cost reflect the number of inspections? For example, in 2008-09 ?
Contract # of inspections	appears numbers not added, looks like default from template
Contract # of cleanings	appears numbers not added, looks like default from template. Why is the number of inspections the same, when costs increased five-fold?
In-house # of cleanings	Why did number double in 2009-2010 ,, but not cost ?

General Explanation and Instructions for the Completion of **"Conveyance System Inspection and Cleaning - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.

3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.

4. **Costs Not Included**. This RRM survey does not include the following costs: (1) reimbursable costs for parking signage and enforcement, which will be claimed as actual costs, (2) vehicle and equpiment costs, which will be claimed as actual costs, and (3) costs of materials disposal, which are not reimbursable because they were required under the 2001 permit.

5. **Exclusion of Open Channels**. This RRM survey addresses only "catch basins and inlets"; it does not include costs associated with include the inspection or maintenance of open channels, which will be claimed as actual costs. Results for any facilities considered to be within the category of "catch basins and inlets" should be included in your response.

6. **Inclusion of "First" Inspections and Cleanings**. Although actual claims may not include the "first" annual inspection and cleaning of each catch basin and inlet (these were required in the 2001 permit), your survey results should count these activities. The purpose of the survey is to quantify the typical cost of these activities on a unit basis. It is therefore simpler to include all inspections and cleanings in the survey, and ensures a larger sample size.

7. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

8. Based on the information you input in Worksheet C (in-house inspection costs), Worksheet D (In-house cleaning costs), and Worksheet E (Contractor Costs), the Tab B. 2.A. (Cost Summary) spreadsheet will auto-calculate.
9. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Inspection Costs

10. **Note 1 (Conveyance System Inspection and Related Costs).** Please report only the portion of costs allocated to conveyance system inspection or related functions. If these costs are intermingled with cleaning-related costs, please estimate the proportion allocated to inspection functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

11. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

12. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

13. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

14. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

15. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

16. **Note 7 (Source of Inspection Results)**. Please indicate the documents and assumptions used for reported costs.

17. **Note 8 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.D. of the Copermittees' revised Parameters and Guidelines (11/15/10).

18. **Note 9 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

19. **Note 10 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement conveyance system inspection and cleaning and related functions during the life of the Permit.

20. **Note 11 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.

21. **Note 12 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheets C and D, contract management costs should only include those necessary to carry out the Copermittees' in-house conveyance system inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor inspection and cleaning activities are included in Worksheet E (See Note 19).

22. **Note 14 (Vehicle and Equipment Maintenance)**. Annual maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain vehicles, equipment, and supplies.

23. **Note 15 (Fuel)**. The actual cost of fuel necessary to run the conveyance system inspection and cleaning equipment and equipment used to transport collected materials.

Tab D. In-house Cleaning Costs

24. **Note 16 (Conveyance System Cleaning Operations and Related Costs)**. Please report only the portion of costs allocated to conveyance system cleaning or related functions. If these costs are intermingled with inspection-related costs, please estimate the proportion allocated to cleaning functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

25. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

26. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

27. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

28. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

29. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

30. **Note 7 (Source of Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

Tab E. Contractor Costs

31. **Note 17 (Contractor Costs)**. Please allocate a portion of the cost associated with conveyance system inspections and a portion with conveyance system cleaning functions. If these costs are intermingled, please estimate the proportion allocated to each, and describe the assumptions used to derive these estimates under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader categories of "Conveyance System Inspection" and "Conveyance System Cleaning." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figures in the "Source of Contract Cost Information" box .

32. **Note 18 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house inspections and cleaning. Worksheet E should describe only those supplemental activities related to contract inspection and cleaning.

33. **Note 10 (Contract Management Costs)**. Costs of managing conveyance system inspection and cleaning contracts.

34. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

35. **Note 7 (Source of Inspection and Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

36. **Note 19 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet E, contract management costs should only include those necessary to carry out the contracted conveyance system inspection and cleaning activities . Contract costs associated with in-house inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheets C and D (See Note 12).

Source of Inspection Cost Information

Information comes from our work order accounting system. All public works employees must account for every hour worked including time to clean the storm drain. Wage changes and benefit percentages are adjusted for the fiscal year. Benefit percent was averaged to

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Part 2: Other Personnel Costs Related to Conveyance System Inspections (Note 1)

	Annualized FY 2007-08 Salary Information							FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2008-09 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	Source of Information (Note 6)
	a. Reporting (Note 8)													
	Use lines 1-5 to auto-calculate annual reporting costs for each year													**Source of Reporting Cost Information**
1	Multiple	Environmental Program Manager	2	$55,265	40.4	62	$111,856	0	$0	0	$0	0	$0	Costs of reporting were calculated by using the percentage of the JURMP program dedicated to reporting conveyance system cleaning. Work order hours charged to reporting were multiplied by this factor to arrive at the final numbers.
2	Multiple	Environmental Program Specialist	2	$45,630	40.4	62	$92,355	0	$0	0	$0	0	$0	
3	Levien, Hank	Public Works Director	1	$131,803	40.4	62	$266,769	0	$0	0	$0	0	$0	
4	Galaviz, Sonia	Customer Service Specialist	1	$19,730	40.4	62	$39,934	0	$0	0	$0	0	$0	
5							$0		$0		$0		$0	
6	Use line 6 to insert total reporting costs for each year								$394		$160		$180	
							Reporting Totals		**$394**		**$160**		**$180**	
	b. Supervision and Management (Note 9)													
	Use lines 1-5 if auto-calculating annual supervision and management costs for each year													**Source of Supervision & Management Cost Information**
1							$0	0	$0	0	$0	0	$0	Due to the size of Imperial Beach, this category is included in other sections. Managers do not often only supervize to the extent that the data could be meaningfully extrapolated.
2							$0	0	$0	0	$0	0	$0	
3							$0	0	$0	0	$0	0	$0	
4							$0	0	$0	0	$0	0	$0	
5							$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total supervision and management costs for each year								$0		$0		$0	
							Supervision and Management Totals		**$0**		**$0**		**$0**	
	c. Employee and Vendor Training (Note 10)													
	Use lines 1-5 if auto-calculating annual training costs for each year													**Source of Training Cost Information**
1							$0	0	$0	0	$0	0	$0	Inspection training is done on the job and is therefore absorbed into the cost of conducting inspections.
2							$0	0	$0	0	$0	0	$0	
3							$0	0	$0	0	$0	0	$0	
4							$0	0	$0	0	$0	0	$0	
5							$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
							Training Totals		**$0**		**$0**		**$0**	

d. Vehicle and Equipment Maintenance (Note 11)

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year

1	Aguirre, Jose	Maintenance Worker	1	$30,834	40.4	62	$62,408	0	$0	0	$0	0	$0
2	Levien Henry	Public Works Director	1	$131,803	40.4	62	$266,769	0	$0	0	$0	0	$0
3	Multiple	Maintenance Worker I	1	$36,455	40.4	62	$73,785	0	$0	0	$0	0	$0
4	King, Michael	Fleet Supervisor	1	$61,202	40.4	62	$123,873	0	$0	0	$0	0	$0
5	Murphy, Michael	Mechanic II	1	$49,613	40.4	62	$100,417	0	$0	0	$0	0	$0
6	Use line 6 if inserting total equipment maintenance costs for each year								$2,320		$4,353		$2,029
							Equipment Maintenance Totals		**$2,320**		**$4,353**		**$2,029**

Source of Equipment Maintenance Cost Information

Employees charge time to maintaining storm drain inspection equipment including vehicles. We assumed that the equipment being maintained related to the amount of personnel hours where that equipment was likely used. Time which did not include storm drain

e. Contract Management (Note 12)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1							$0	0	$0	0	$0	0	$0
2							$0	0	$0	0	$0	0	$0
3							$0	0	$0	0	$0	0	$0
4							$0	0	$0	0	$0	0	$0
5							$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0
							Contract Management Totals		**$0**		**$0**		**$0**

Source of Contract Management Cost Information

No contracts were used to manage inspections.

Part 3: Non-Personnel Costs Related to Conveyance System Inspections (Note 1)

		FY 2007-08	FY 2008-09	FY 2009-10
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0
2	Fuel (Note 15)	$6,937	$7,327	$7,358
3	Training Materials and Supplies (Note 10)	$0	$0	$0
	Total	$6,937	$7,327	$7,358

Source of Non-personnel Cost Information

Price assumed to be $3 per gallon. Amount discounted by percent of time assumed for storm drain inspections.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$62,987	**$68,954**	**$75,109**

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Part 5: Inspection Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Inspection Results (Note 7)
Number of Inspections	29	29	29	Inspections in Imperial Beach are documented by location rather than a specific purpose. i.e. a neighborhood inspection likely includes inspection of the sewer, storm drain, streets, and other facilities. This is the number of types of inspections included rather than the
Unit Cost per Inspection	$ 2,171.97	$ 2,377.72	$ 2,589.95	

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

	Annualized FY 2007-08 Salary Information							Personnel Cost Calculations						
								FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2009-10 Personnel Costs

16							$0	0	$0	0	$0	0	$0	
17							$0	0	$0	0	$0	0	$0	
18							$0	0	$0	0	$0	0	$0	
19							$0	0	$0	0	$0	0	$0	
20							$0	0	$0	0	$0	0	$0	
21	Use line 21 if inserting total inspection costs for each year								$21,496		$16,375		$19,167	
								TOTALS	$21,496		$16,375		$19,167	

Source of Cleaning Cost Information

Information comes from our work order accounting system. All public works employees must account for every hour worked including time to clean the storm drain. Wage changes and benefit percentages are adjusted for the fiscal year. Benefit percent was averaged to 42% for

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 2: Other Personnel Costs Related to Conveyance System Cleaning (Note 16)

	Annualized FY 2007-08 Salary Information							Costs		Costs		Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	Source of Information (Note 6)
	a. Reporting (Note 8)													
	Use lines 1-5 to auto-calculate annual reporting costs for each year													
1	Multiple	Environmental Program Manager	2	$55,265	40.4	62	$111,856	0	$0	0	$0	0	$0	
2	Multiple	Environmental Program Specialist	2	$45,630	40.4	62	$92,355	0	$0	0	$0	0	$0	
3	Levien, Hank	Public Works Director	1	$131,803	40.4	62	$266,769	0	$0	0	$0	0	$0	
4	Galaviz, Sonia	Customer Service Specialist	1	$19,730	40.4	62	$39,934	0	$0	0	$0	0	$0	
5							$0	0	$0	0	$0	0	$0	
6	Use line 6 to insert total reporting costs for each year								$197		$80		$90	
							Reporting Totals		**$197**		**$80**		**$90**	
	b. Supervision and Management (Note 9)													
	Use lines 1-5 if auto-calculating annual supervision and management costs for each year													
1							$0	0	$0	0	$0	0	$0	
2							$0	0	$0	0	$0	0	$0	
3							$0	0	$0	0	$0	0	$0	
4							$0	0	$0	0	$0	0	$0	
5							$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total supervision and management costs for each year								$0		$0		$0	
							Supervision and Management Totals		**$0**		**$0**		**$0**	
	c. Employee and Vendor Training (Note 10)													
	Use lines 1-5 if auto-calculating annual training costs for each year													
1	Multiple	Too many to list	1	$0	0	10	$0	0	$0	0	$0	0	$0	
2	Multiple		1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name		1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name		1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name		1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$2,359		$1,163		$611	
							Training Totals		**$2,359**		**$1,163**		**$611**	

Source of Reporting Cost Information

Costs of reporting were calculated by using the percentage of the JURMP program dedicated to reporting conveyance system cleaning. Work order hours charged to reporting were multiplied by this factor to arrive at the final numbers.

Source of Supervision & Management Cost Information

Due to the size of Imperial Beach, this category is included in other sections. Managers do not often only supervize to the extent that the data could be meaningfully extrapolated.

Source of Training Cost Information

Hours were charged by employees for training to use our Vactor truck. This is the training required for cleaning the storm drain.

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

d. Vehicle and Equipment Maintenance (Note 11)

Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year

1	Multiple	Maintenance Worker	4	$30,834	40.4	62	$62,408	0	$0	0	$0	0	$0
2	Multiple	Maintenance Worker I	2	$36,455	40.4	62	$73,785	0	$0	0	$0	0	$0
3	King, Michael	Fleet Supervisor	1	$61,202	40.4	62	$123,873	0	$0	0	$0	0	$0
4	Moeller, Alan	Sewer Supervisor	1	$57,341	40.4	62	$116,058	0	$0	0	$0	0	$0
5	Murphy, Michael	Mechanic II	1	$49,613	40.4	62	$100,417	0	$0	0	$0	0	$0
6	Use line 6 if inserting total equipment maintenance costs for each year								$7,576		$6,099		$6,236
							Equipment Maintenance Totals		**$7,576**		**$6,099**		**$6,236**

Source of Equipment Maintenance Cost Information

Employees charge time to maintaining storm drain cleaning equipment including the vactor truck. We assumed that the equipment being maintained related to the amount of personnel hours where that equipment was likely used. Time which did not include storm drain cleaning was

e. Contract Management (Note 12)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1							$0	0	$0	0	$0	0	$0
2							$0	0	$0	0	$0	0	$0
3							$0	0	$0	0	$0	0	$0
4							$0	0	$0	0	$0	0	$0
5							$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0
							Contract Management Totals		**$0**		**$0**		**$0**

Source of Contract Management Cost Information

No contracts were used to clean the storm drain in these periods.

Part 3: Non-Personnel Costs Related to Conveyance Cleaning

		FY 2007-08	FY 2008-09	FY 2009-10
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0
2	Fuel (Note 15)	$2,535	$1,105	$1,195
3	Training Materials and Supplies (Note 10)	$0	$0	$0
	Total	$2,535	$1,105	$1,195

Source of Non-personnel Cost Information

Our large Vactor truck is primarily used for storm drain cleaning. The cost of fuel for this equipment was discounted by the percent of time the equipment was probably used for storm drain cleaning.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$34,163	**$24,822**	**$27,299**

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 5: Cleaning Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Cleaning Results (Note 17)
Number of Cleanings	36	31	56	Used the number of cleaning sessions/locations.
Unit Cost per Cleaning	$ 948.97	$ 800.71	$ 487.48	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet E: Contractor Costs and Results

In-house Personnel Equipment Maintenan	Please provide work order accounting system summary sheet of costs charged to this code.

General Explanation and Instructions for the Completion of **"Conveyance System Inspection and Cleaning - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.

3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.

4. **Costs Not Included**. This RRM survey does not include the following costs: (1) reimbursable costs for parking signage and enforcement, which will be claimed as actual costs, (2) vehicle and equpiment costs, which will be claimed as actual costs, and (3) costs of materials disposal, which are not reimbursable because they were required under the 2001 permit.

5. **Exclusion of Open Channels**. This RRM survey addresses only "catch basins and inlets"; it does not include costs associated with include the inspection or maintenance of open channels, which will be claimed as actual costs. Results for any facilities considered to be within the category of "catch basins and inlets" should be included in your response.

6. **Inclusion of "First" Inspections and Cleanings**. Although actual claims may not include the "first" annual inspection and cleaning of each catch basin and inlet (these were required in the 2001 permit), your survey results should count these activities. The purpose of the survey is to quantify the typical cost of these activities on a unit basis. It is therefore simpler to include all inspections and cleanings in the survey, and ensures a larger sample size.

7. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

8. Based on the information you input in Worksheet C (in-house inspection costs), Worksheet D (In-house cleaning costs), and Worksheet E (Contractor Costs), the Tab B. 2.A. (Cost Summary) spreadsheet will auto-calculate.
9. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Inspection Costs

10. **Note 1 (Conveyance System Inspection and Related Costs).** Please report only the portion of costs allocated to conveyance system inspection or related functions. If these costs are intermingled with cleaning-related costs, please estimate the proportion allocated to inspection functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

11. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

12. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

13. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

14. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

15. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

16. **Note 7 (Source of Inspection Results)**. Please indicate the documents and assumptions used for reported costs.

17. **Note 8 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.D. of the Copermittees' revised Parameters and Guidelines (11/15/10).

18. **Note 9 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

19. **Note 10 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement conveyance system inspection and cleaning and related functions during the life of the Permit.

20. **Note 11 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.

21. **Note 12 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheets C and D, contract management costs should only include those necessary to carry out the Copermittees' in-house conveyance system inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor inspection and cleaning activities are included in Worksheet E (See Note 19).

22. **Note 14 (Vehicle and Equipment Maintenance)**. Annual maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain vehicles, equipment, and supplies.

23. **Note 15 (Fuel)**. The actual cost of fuel necessary to run the conveyance system inspection and cleaning equipment and equipment used to transport collected materials.

Tab D. In-house Cleaning Costs

24. **Note 16 (Conveyance System Cleaning Operations and Related Costs)**. Please report only the portion of costs allocated to conveyance system cleaning or related functions. If these costs are intermingled with inspection-related costs, please estimate the proportion allocated to cleaning functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

25. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

26. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

27. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

28. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

29. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

30. **Note 7 (Source of Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

Tab E. Contractor Costs

31. **Note 17 (Contractor Costs)**. Please allocate a portion of the cost associated with conveyance system inspections and a portion with conveyance system cleaning functions. If these costs are intermingled, please estimate the proportion allocated to each, and describe the assumptions used to derive these estimates under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader categories of "Conveyance System Inspection" and "Conveyance System Cleaning." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figures in the "Source of Contract Cost Information" box .

32. **Note 18 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house inspections and cleaning. Worksheet E should describe only those supplemental activities related to contract inspection and cleaning.

33. **Note 10 (Contract Management Costs)**. Costs of managing conveyance system inspection and cleaning contracts.

34. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

35. **Note 7 (Source of Inspection and Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

36. **Note 19 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet E, contract management costs should only include those necessary to carry out the contracted conveyance system inspection and cleaning activities . Contract costs associated with in-house inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheets C and D (See Note 12).

Worksheet B: Unit Cost Summary Sheet

Source of Contract Management Cost Information

Part 3: Non-Personnel Costs Related to Conveyance Cleaning

		FY 2007-08	FY 2008-09	FY 2009-10
1	Vehicle and Equipment Maintenance (Note 14)	$19,880	$19,880	$19,880
2	Fuel (Note 15)	$2,943	$2,943	$2,355
3	Training Materials and Supplies (Note 10)	$0	$0	$0
	Total	$22,823	$22,823	$22,235

Source of Non-personnel Cost Information

Information collected from City Public Works Budget. Storm Drain vactor maintenance ($3200), SD rodding supplies ($5150), storm drain related traffic control ($520), storm drain related hardware and supplies ($4000), water for SD cleaning

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$65,526	**$60,516**	**$80,558**

Part 5: Cleaning Results

	FY 2007-08	FY 2008-09	FY 2009-10
Number of Cleanings	800	800	800
Unit Cost per Cleaning	$ 81.91	$ 75.65	$ 100.70

Source of Cleaning Results (Note 17)

The City has approximaely 400 inlets and catch basins which are cleaned 2x per year

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet E: Contractor Costs and Results

Part 1: Contract Costs

		FY 2007-08		FY 2008-09		FY 2009-10	
		Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
	Contractor Costs (Note 17)

Unit Cost per Inspection	#DIV/0!		#DIV/0!		#DIV/0!	
Cleanings						
Number of Cleanings		0		0		0
Unit Cost per Cleaning		#DIV/0!		#DIV/0!		#DIV/0!

Source of Inspection and Cleaning Results (Note 7)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate inspection and cleaning results.

Note: Only report statistics for catch basins and inlets. Do not include inspections or cleaning of open channels.

Activity	Comment
In-house Personnel Equipment Maintenance	Why no maintence costs?
In-house non-personnel Equipment Maintenance	Why no maintence costs?
# of in-house inspections and cleanings	Confirm that all inlets and catch basins are inspected and cleaned twice a year.

General Explanation and Instructions for the Completion of **"Conveyance System Inspection and Cleaning - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.

3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.

4. **Costs Not Included**. This RRM survey does not include the following costs: (1) reimbursable costs for parking signage and enforcement, which will be claimed as actual costs, (2) vehicle and equpiment costs, which will be claimed as actual costs, and (3) costs of materials disposal, which are not reimbursable because they were required under the 2001 permit.

5. **Exclusion of Open Channels**. This RRM survey addresses only "catch basins and inlets"; it does not include costs associated with include the inspection or maintenance of open channels, which will be claimed as actual costs. Results for any facilities considered to be within the category of "catch basins and inlets" should be included in your response.

6. **Inclusion of "First" Inspections and Cleanings**. Although actual claims may not include the "first" annual inspection and cleaning of each catch basin and inlet (these were required in the 2001 permit), your survey results should count these activities. The purpose of the survey is to quantify the typical cost of these activities on a unit basis. It is therefore simpler to include all inspections and cleanings in the survey, and ensures a larger sample size.

7. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

8. Based on the information you input in Worksheet C (in-house inspection costs), Worksheet D (In-house cleaning costs), and Worksheet E (Contractor Costs), the Tab B. 2.A. (Cost Summary) spreadsheet will auto-calculate.
9. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Inspection Costs

10. **Note 1 (Conveyance System Inspection and Related Costs).** Please report only the portion of costs allocated to conveyance system inspection or related functions. If these costs are intermingled with cleaning-related costs, please estimate the proportion allocated to inspection functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

11. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

12. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

13. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

14. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

15. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

16. **Note 7 (Source of Inspection Results)**. Please indicate the documents and assumptions used for reported costs.

17. **Note 8 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.D. of the Copermittees' revised Parameters and Guidelines (11/15/10).

18. **Note 9 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

19. **Note 10 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement conveyance system inspection and cleaning and related functions during the life of the Permit.

20. **Note 11 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.

21. **Note 12 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheets C and D, contract management costs should only include those necessary to carry out the Copermittees' in-house conveyance system inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor inspection and cleaning activities are included in Worksheet E (See Note 19).

22. **Note 14 (Vehicle and Equipment Maintenance)**. Annual maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain vehicles, equipment, and supplies.

23. **Note 15 (Fuel)**. The actual cost of fuel necessary to run the conveyance system inspection and cleaning equipment and equipment used to transport collected materials.

Tab D. In-house Cleaning Costs

24. **Note 16 (Conveyance System Cleaning Operations and Related Costs)**. Please report only the portion of costs allocated to conveyance system cleaning or related functions. If these costs are intermingled with inspection-related costs, please estimate the proportion allocated to cleaning functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

25. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

26. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

27. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

28. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

29. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

30. **Note 7 (Source of Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

Tab E. Contractor Costs

31. **Note 17 (Contractor Costs)**. Please allocate a portion of the cost associated with conveyance system inspections and a portion with conveyance system cleaning functions. If these costs are intermingled, please estimate the proportion allocated to each, and describe the assumptions used to derive these estimates under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader categories of "Conveyance System Inspection" and "Conveyance System Cleaning." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figures in the "Source of Contract Cost Information" box .

32. **Note 18 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house inspections and cleaning. Worksheet E should describe only those supplemental activities related to contract inspection and cleaning.

33. **Note 10 (Contract Management Costs)**. Costs of managing conveyance system inspection and cleaning contracts.

34. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

35. **Note 7 (Source of Inspection and Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

36. **Note 19 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet E, contract management costs should only include those necessary to carry out the contracted conveyance system inspection and cleaning activities . Contract costs associated with in-house inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheets C and D (See Note 12).

	d. Vehicle and Equipment Maintenance (Note 11)													
	Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year													**Source of Equipment Maintenance Cost Information**
1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0	
							Equipment Maintenance Totals		**$0**		**$0**		**$0**	
	e. Contract Management (Note 12)													
	Use lines 1-5 if auto-calculating annual contract management costs for each year													**Source of Contract Management Cost Information**
1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0	
							Contract Management Totals		**$0**		**$0**		**$0**	

Part 3: Non-Personnel Costs Related to Conveyance System Inspections (Note 1)

		FY 2007-08	FY 2008-09	FY 2009-10	Source of Non-personnel Cost Information
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0	Describe source of non-personnel cost information. Also use this space to document any assumptions used to determine non-personnel costs.
2	Fuel (Note 15)	$0	$0	$0	
3	Training Materials and Supplies (Note 10)	$0	$0	$0	
	Total	$0	$0	$0	

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$117,098	**$120,611**	**$124,229**

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Part 5: Inspection Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Inspection Results (Note 7)
Number of Inspections	2	2	2	Identify the source of inspection results. Also use this space to document any assumptions used to calculate inspection results.
Unit Cost per Inspection	$ 58,548.82	$ 60,305.28	$ 62,114.44	

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 1: Conveyance System Cleaning Operations Costs (Note 16)

Use lines 1-20 if auto-calculating annual inspection costs for each year

	Annualized FY 2007-08 Salary Information							Personnel Cost Calculations: FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2009-10 Personnel Costs		Source of Information (Note 6)
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to inspections	Annual cost for cleaning	% of time dedicated to inspections	Annual cost for cleaning	% of time dedicated to inspections	Annual cost for cleaning	
1	Ricardo Mendoza	Streets Supervisor	1	$73,792	0	10	$81,171	30	$24,351	30	$25,082	30	$25,834	
2	Calvin Hunt	Streets Tech II	1	$57,204	0	10	$62,924	30	$18,877	30	$19,444	30	$20,027

19	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
20	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
21	Use line 21 if inserting total inspection costs for each year								$0		$0		$0	
								TOTALS	$93,520		$96,325		$99,215	

Source of Cleaning Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 2: Other Personnel Costs Related to Conveyance System Cleaning (Note 16)

	Annualized FY 2007-08 Salary Information							Costs		Costs		Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	Source of Information (Note 6)
	a. Reporting (Note 8)													
	Use lines 1-5 to auto-calculate annual reporting costs for each year													**Source of Reporting Cost Information**
1	Cora Long	Analyst	1	$91,792	0	10	$100,972	15	$15,146	15	$15,600	15	$16,068	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 to insert total reporting costs for each year								$0		$0		$0	
							Reporting Totals		**$15,146**		**$15,600**		**$16,068**	
	b. Supervision and Management (Note 9)													
	Use lines 1-5 if auto-calculating annual supervision and management costs for each year													**Source of Supervision & Management Cost Information**
1	Pat Lund	Director	1	$139,349	0	10	$153,284	10	$15,328	10	$15,788	10	$16,262	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Tom Bell	Departmenal Supervisor	1	$110,350	0	10	$121,385	30	$36,415	30	$37,508	30	$38,633	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total supervision and management costs for each year								$0		$0		$0	
							Supervision and Management Totals		**$51,744**		**$53,296**		**$54,895**	
	c. Employee and Vendor Training (Note 10)													
	Use lines 1-5 if auto-calculating annual training costs for each year													**Source of Training Cost Information**
1	Enter Name	Supervisor (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
							Training Totals		**$0**		**$0**		**$0**	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

d. Vehicle and Equipment Maintenance (Note 11)

Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year

1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0
								Equipment Maintenance Totals	**$0**		**$0**		**$0**

Source of Equipment Maintenance Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

e. Contract Management (Note 12)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0
								Contract Management Totals	**$0**		**$0**		**$0**

Source of Contract Management Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

Part 3: Non-Personnel Costs Related to Conveyance Cleaning

		FY 2007-08	FY 2008-09	FY 2009-10
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0
2	Fuel (Note 15)	$0	$0	$0
3	Training Materials and Supplies (Note 10)	$0	$0	$0
	Total	$0	$0	$0

Source of Non-personnel Cost Information

Describe source of non-personnel cost information. Also use this space to document any assumptions used to determine non-personnel costs.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$160,409	**$165,222**	**$170,178**

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 5: Cleaning Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Cleaning Results (Note 17)
Number of Cleanings	1	1	1	Identify the source of inspection results. Also use this space to document any assumptions used to calculate cleaning results.
Unit Cost per Cleaning	##########	##########	##########	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet E: Contractor Costs and Results

Part 1: Contract Costs

		FY 2007-08		FY 2008-09		FY 2009-10	
		Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
	Contractor Costs (Note 17)						
1	Conveyance System Inspection (Note 1)	$0		**$2**		**$2**	
2	Conveyance System Cleaning (Note 16)		$0		$0		$0
	Supplemental In-house Costs (Note 18)						
	Personnel Costs						
1	Reporting (Note 8)	**$15,146**	$0	**$2**	$0	**$2**	$0
2	Contract Management (Note 19)	**$39,605**	**$0**	**$40,794**	$3	**$42,017**	**$0**
3	Employee and Vendor Training (Note 10)	$0	**$1**	$0	$0	$0	$0
4	14)	$0	**$2**	**$2**	**$2**	**$2**	**$2**
	Non-personnel Costs						
1	14)	$0	$0	$0	$0	$0	$0
2	Fuel (Note 15)	$0	$0	$1	$0	$0	**$1**
3	Training Materials and Supplies (Note 10)	**$1**	**$1**	**$0**	**$1**	**$1**	**$0**
	Total Contract Costs	**$54,752**	**$4**	**$40,801**	**$6**	**$42,024**	**$3**

Source of Contract Cost Information (Note 6)

Describe source of contract cost information. Also use this space to document any assumptions used to calculate costs.

Part 2: Inspection and Cleaning Results

	FY 2007-08		FY 2008-09		FY 2009-10	
Inspections	Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
Number of Inspections	**450**		**450**		**450**	
Unit Cost per Inspection	$ 121.67		$ 90.67		$ 93.39	
Cleanings						
Number of Cleanings		**250**		**225**		**200**
Unit Cost per Cleaning		$ 0.02		$ 0.03		$ 0.02

Source of Inspection and Cleaning Results (Note 7)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate inspection and cleaning results.

Note: Only report statistics for catch basins and inlets. Do not include inspections or cleaning of open channels.

General Explanation and Instructions for the Completion of **"Conveyance System Inspection and Cleaning - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.

3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.

4. **Costs Not Included**. This RRM survey does not include the following costs: (1) reimbursable costs for parking signage and enforcement, which will be claimed as actual costs, (2) vehicle and equpiment costs, which will be claimed as actual costs, and (3) costs of materials disposal, which are not reimbursable because they were required under the 2001 permit.

5. **Exclusion of Open Channels**. This RRM survey addresses only "catch basins and inlets"; it does not include costs associated with include the inspection or maintenance of open channels, which will be claimed as actual costs. Results for any facilities considered to be within the category of "catch basins and inlets" should be included in your response.

6. **Inclusion of "First" Inspections and Cleanings**. Although actual claims may not include the "first" annual inspection and cleaning of each catch basin and inlet (these were required in the 2001 permit), your survey results should count these activities. The purpose of the survey is to quantify the typical cost of these activities on a unit basis. It is therefore simpler to include all inspections and cleanings in the survey, and ensures a larger sample size.

7. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

8. Based on the information you input in Worksheet C (in-house inspection costs), Worksheet D (In-house cleaning costs), and Worksheet E (Contractor Costs), the Tab B. 2.A. (Cost Summary) spreadsheet will auto-calculate.
9. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Inspection Costs

10. **Note 1 (Conveyance System Inspection and Related Costs).** Please report only the portion of costs allocated to conveyance system inspection or related functions. If these costs are intermingled with cleaning-related costs, please estimate the proportion allocated to inspection functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

11. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

12. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

13. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

14. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

15. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

16. **Note 7 (Source of Inspection Results)**. Please indicate the documents and assumptions used for reported costs.

17. **Note 8 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.D. of the Copermittees' revised Parameters and Guidelines (11/15/10).

18. **Note 9 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

19. **Note 10 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement conveyance system inspection and cleaning and related functions during the life of the Permit.

20. **Note 11 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.

21. **Note 12 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheets C and D, contract management costs should only include those necessary to carry out the Copermittees' in-house conveyance system inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor inspection and cleaning activities are included in Worksheet E (See Note 19).

22. **Note 14 (Vehicle and Equipment Maintenance)**. Annual maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain vehicles, equipment, and supplies.

23. **Note 15 (Fuel)**. The actual cost of fuel necessary to run the conveyance system inspection and cleaning equipment and equipment used to transport collected materials.

Tab D. In-house Cleaning Costs

24. **Note 16 (Conveyance System Cleaning Operations and Related Costs)**. Please report only the portion of costs allocated to conveyance system cleaning or related functions. If these costs are intermingled with inspection-related costs, please estimate the proportion allocated to cleaning functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

25. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

26. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

27. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

28. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

29. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

30. **Note 7 (Source of Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

Tab E. Contractor Costs

31. **Note 17 (Contractor Costs)**. Please allocate a portion of the cost associated with conveyance system inspections and a portion with conveyance system cleaning functions. If these costs are intermingled, please estimate the proportion allocated to each, and describe the assumptions used to derive these estimates under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader categories of "Conveyance System Inspection" and "Conveyance System Cleaning." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figures in the "Source of Contract Cost Information" box .

32. **Note 18 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house inspections and cleaning. Worksheet E should describe only those supplemental activities related to contract inspection and cleaning.

33. **Note 10 (Contract Management Costs)**. Costs of managing conveyance system inspection and cleaning contracts.

34. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

35. **Note 7 (Source of Inspection and Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

36. **Note 19 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet E, contract management costs should only include those necessary to carry out the contracted conveyance system inspection and cleaning activities . Contract costs associated with in-house inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheets C and D (See Note 12).

Total Costs (In-house + Contractor)	**$233,759**	**$274,055**	**$238,745**	**$280,250**	**$243,880**	**$286,630**

Part 3: Inspection and Cleaning Totals (Note 3)

Inspection Results						
a. In-house Results						
Number of Inspections	1000		1000		1000	
Unit Cost per Inspection	**$166.18**		**$171.16**		**$176.30**	
b. Contract Results						
Number of Inspections	3500		3500		3500	
Unit Cost per Inspection	**$19.31**		**$19.31**		**$19.31**	
c. Combined Results						
Number of Inspections	4500		4500		4500	
Unit Cost per Inspection	**$51.95**		**$53.05**		**$54.20**	
Cleaning Results						
a. In-house Results						
Number of Cleanings		1000		1000		1000
Unit Cost per Cleaning		**$206.48**		**$212.67**		**$219.05**
b. Contract Results						
Number of Cleanings		3500		3500		3500
Unit Cost per Cleaning		**$19.31**		**$19.31**		**$19.31**
c. Combined Results						
Number of Cleanings		4500		4500		4500
Unit Cost per Cleaning		**$60.90**		**$62.28**		**$63.70**

Worksheet C: In-house Conveyance System Inspection Costs and Results

	Annualized FY 2007-08 Salary Information							Personnel Cost Calculations						
								FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2009-10 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to inspections	Annual cost for inspections	% of time dedicated to inspections	Annual cost for inspections	% of time dedicated to inspections	Annual cost for inspections	Source of Information (Note 6)
Part 1: Conveyance System Inspection Costs (Note 1)														
	Use lines 1-20 if auto-calculating annual inspection costs for each year													**Information**
1	Larry Boston	Supervisor	1	$76,606	43	10	$117,207	5	$5,860	5	$6,036	5	$6,217	Finance Department
2	Mark Sabelis	Specialist	1	$61,401	45	10	$95,172	50	$47,586	50	$49,013	50	$50,484

20	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
21	Use line 21 if inserting total inspection costs for each year								$0		$0		$0	
								TOTALS	$141,682		$145,932		$150,310	

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Part 2: Other Personnel Costs Related to Conveyance System Inspections (Note 1)

	Annualized FY 2007-08 Salary Information							FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2008-09 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	Source of Information (Note 6)
	a. Reporting (Note 8)													
	Use lines 1-5 to auto-calculate annual reporting costs for each year													**Information**
1	Enter Name	Analyst (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 to insert total reporting costs for each year								$0		$0		$0	
							Reporting Totals		**$0**		**$0**		**$0**	
	b. Supervision and Management (Note 9)													
	Use lines 1-5 if auto-calculating annual supervision and management costs for each year													**Source of Supervision & Management Cost Information**
1	Enter Name	Program Mgr (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total supervision and management costs for each year								$0		$0		$0	
							Supervision and Management Totals		**$0**		**$0**		**$0**	
	c. Employee and Vendor Training (Note 10)													
	Use lines 1-5 if auto-calculating annual training costs for each year													**Source of Training Cost Information**
1	Enter Name	Supervisor (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
							Training Totals		**$0**		**$0**		**$0**	
	d. Vehicle and Equipment Maintenance (Note 11)													
	Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year													**Source of Equipment Maintenance Cost Information**
1	Fleet	Yellow Gear (13 pieces of Equipment)	1	$208,628	0	10	$229,491	10	$22,949	10	$23,638	10	$24,347	Fleet
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0	
							Equipment Maintenance Totals		**$22,949**		**$23,638**		**$24,347**	
	e. Contract Management (Note 12)													
	Use lines 1-5 if auto-calculating annual contract management costs for each year													**Source of Contract Management Cost Information**
1	Kiel Koger	Maintenance Manager	1	$113,048	27	10	$154,876	1	$1,549	1	$1,595	1	$1,643	Finance
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0	
							Contract Management Totals		**$1,549**		**$1,595**		**$1,643**	

Part 3: Non-Personnel Costs Related to Conveyance System Inspections (Note 1)

		FY 2007-08	FY 2008-09	FY 2009-10	Source of Non-personnel Cost Information
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0	Describe source of non-personnel cost information. Also use this space to document any assumptions used to determine non-personnel costs.
2	Fuel (Note 15)	$0	$0	$0	
3	Training Materials and Supplies (Note 10)	$0	$0	$0	
	Total	$0	$0	$0	

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$166,179	**$171,165**	**$176,300**

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Part 5: Inspection Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Inspection Results (Note 7)
Number of Inspections	1000	1000	1000	Identify the source of inspection results. Also use this space to document any assumptions used to calculate inspection results.
Unit Cost per Inspection	$ 166.18	$ 171.16	$ 176.30	

137

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 1: Conveyance System Cleaning Operations Costs (Note 16)

Use lines 1-20 if auto-calculating annual inspection costs for each year

	Annualized FY 2007-08 Salary Information							Personnel Cost Calculations: FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2009-10 Personnel Costs		Source of Information (Note 6)
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to inspections	Annual cost for cleaning	% of time dedicated to inspections	Annual cost for cleaning	% of time dedicated to inspections	Annual cost for cleaning

4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0
								Equipment Maintenance Totals	**$91,796**		**$94,550**		**$97,387**

Source of Equipment Maintenance Cost Information

Fleet

e. Contract Management (Note 12)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Kiel Koger	Maintenance Manager	1	$113,048	27	10	$154,876	1	$1,549	1	$1,595	1	$1,643
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0
								Contract Management Totals	**$1,549**		**$1,595**		**$1,643**

Source of Contract Management Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

Part 3: Non-Personnel Costs Related to Conveyance Cleaning

		FY 2007-08	FY 2008-09	FY 2009-10
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0
2	Fuel (Note 15)	$0	$0	$0
3	Training Materials and Supplies (Note 10)	$0	$0	$0
	Total	$0	$0	$0

Source of Non-personnel Cost Information

Describe source of non-personnel cost information. Also use this space to document any assumptions used to determine non-personnel costs.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$206,475	**$212,670**	**$219,050**

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 5: Cleaning Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Cleaning Results (Note 17)
Number of Cleanings	1000	1000	1000	Identify the source of inspection results. Also use this space to document any assumptions used to calculate cleaning results.
Unit Cost per Cleaning	$ 206.48	$ 212.67	$ 219.05	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet E: Contractor Costs and Results

Part 1: Contract Costs

		FY 2007-08		FY 2008-09		FY 2009-10	
		Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
	Contractor Costs (Note 17)						
1	Conveyance System Inspection (Note 1)	$67,580		$67,580		$67,580	
2	Conveyance System Cleaning (Note 16)		$67,580		$67,580		$67,580
	Supplemental In-house Costs (Note 18)						
	Personnel Costs						
1	Reporting (Note 8)	$0	$0	$0	$0	$0	$0
2	Contract Management (Note 19)	$0	$0	$0	$0	$0	$0
3	Employee and Vendor Training (Note 10)	$0	$0	$0	$0	$0	$0
4	14)	$0	$0	$0	$0	$0	$0
	Non-personnel Costs						
1	14)	$0	$0	$0	$0	$0	$0

3	Training Materials and Supplies (Note 10)	$0	$0	$0	$0	$0	$0
	Total Contract Costs	**$67,580**	**$67,580**	**$67,580**	**$67,580**	**$67,580**	**$67,580**

Source of Contract Cost Information (Note 6)

Public Works Department

Part 2: Inspection and Cleaning Results

	FY 2007-08		FY 2008-09		FY 2009-10	
Inspections	Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
Number of Inspections	3500		3500		3500	
Unit Cost per Inspection	$ 19.31		$ 19.31		$ 19.31	
Cleanings						
Number of Cleanings		3500		3500		3500
Unit Cost per Cleaning		$ 19.31		$ 19.31		$ 19.31

Source of Inspection and Cleaning Results (Note 7)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate inspection and cleaning results.

Note: Only report statistics for catch basins and inlets. Do not include inspections or cleaning of open channels.

Activity	Comment
In-house Personnel Reporting	Why no reporting costs?
In-house non-personnel Equipment Maintenan	Why no maintenance, fuel costs ?
In-house non-personnel fuel	Why no maintenance, fuel costs ?
In-house # of inspections	Are these inspections different from contract inspections?
Contract # of inspections	Is there a cleanng each time there is an inspection?
In-house # of cleanings	How are these cleanings different than contract cleanings?
Contract # of cleanings	Is there a cleanng each time there is an inspection?

General Explanation and Instructions for the Completion of **"Conveyance System Inspection and Cleaning - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.

3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.

4. **Costs Not Included**. This RRM survey does not include the following costs: (1) reimbursable costs for parking signage and enforcement, which will be claimed as actual costs, (2) vehicle and equpiment costs, which will be claimed as actual costs, and (3) costs of materials disposal, which are not reimbursable because they were required under the 2001 permit.

5. **Exclusion of Open Channels**. This RRM survey addresses only "catch basins and inlets"; it does not include costs associated with include the inspection or maintenance of open channels, which will be claimed as actual costs. Results for any facilities considered to be within the category of "catch basins and inlets" should be included in your response.

6. **Inclusion of "First" Inspections and Cleanings**. Although actual claims may not include the "first" annual inspection and cleaning of each catch basin and inlet (these were required in the 2001 permit), your survey results should count these activities. The purpose of the survey is to quantify the typical cost of these activities on a unit basis. It is therefore simpler to include all inspections and cleanings in the survey, and ensures a larger sample size.

7. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

8. Based on the information you input in Worksheet C (in-house inspection costs), Worksheet D (In-house cleaning costs), and Worksheet E (Contractor Costs), the Tab B. 2.A. (Cost Summary) spreadsheet will auto-calculate.
9. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Inspection Costs

10. **Note 1 (Conveyance System Inspection and Related Costs).** Please report only the portion of costs allocated to conveyance system inspection or related functions. If these costs are intermingled with cleaning-related costs, please estimate the proportion allocated to inspection functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

11. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

12. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

13. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

14. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

15. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

16. **Note 7 (Source of Inspection Results)**. Please indicate the documents and assumptions used for reported costs.

17. **Note 8 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.D. of the Copermittees' revised Parameters and Guidelines (11/15/10).

18. **Note 9 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

19. **Note 10 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement conveyance system inspection and cleaning and related functions during the life of the Permit.

20. **Note 11 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.

21. **Note 12 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheets C and D, contract management costs should only include those necessary to carry out the Copermittees' in-house conveyance system inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor inspection and cleaning activities are included in Worksheet E (See Note 19).

22. **Note 14 (Vehicle and Equipment Maintenance)**. Annual maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain vehicles, equipment, and supplies.

23. **Note 15 (Fuel)**. The actual cost of fuel necessary to run the conveyance system inspection and cleaning equipment and equipment used to transport collected materials.

Tab D. In-house Cleaning Costs

24. **Note 16 (Conveyance System Cleaning Operations and Related Costs)**. Please report only the portion of costs allocated to conveyance system cleaning or related functions. If these costs are intermingled with inspection-related costs, please estimate the proportion allocated to cleaning functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

25. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

26. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

27. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

28. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

29. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

30. **Note 7 (Source of Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

Tab E. Contractor Costs

31. **Note 17 (Contractor Costs)**. Please allocate a portion of the cost associated with conveyance system inspections and a portion with conveyance system cleaning functions. If these costs are intermingled, please estimate the proportion allocated to each, and describe the assumptions used to derive these estimates under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader categories of "Conveyance System Inspection" and "Conveyance System Cleaning." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figures in the "Source of Contract Cost Information" box .

32. **Note 18 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house inspections and cleaning. Worksheet E should describe only those supplemental activities related to contract inspection and cleaning.

33. **Note 10 (Contract Management Costs)**. Costs of managing conveyance system inspection and cleaning contracts.

34. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

35. **Note 7 (Source of Inspection and Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

36. **Note 19 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet E, contract management costs should only include those necessary to carry out the contracted conveyance system inspection and cleaning activities . Contract costs associated with in-house inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheets C and D (See Note 12).

Unit Cost per Inspection	#DIV/0!		#DIV/0!		#DIV/0!	
Cleanings						
Number of Cleanings		0		0		0
Unit Cost per Cleaning		#DIV/0!		#DIV/0!		#DIV/0!

Source of Inspection and Cleaning Results (Note 7)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate inspection and cleaning results.

Note: Only report statistics for catch basins and inlets. Do not include inspections or cleaning of open channels.

Activity	Comment
In-house Personnel Employee Supervision and Management	Error: Based on 8 hours/2080, should be .4% charge.

General Explanation and Instructions for the Completion of **"Conveyance System Inspection and Cleaning - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.

3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.

4. **Costs Not Included**. This RRM survey does not include the following costs: (1) reimbursable costs for parking signage and enforcement, which will be claimed as actual costs, (2) vehicle and equpiment costs, which will be claimed as actual costs, and (3) costs of materials disposal, which are not reimbursable because they were required under the 2001 permit.

inspection or maintenance of open channels, which will be claimed as actual costs. Results for any facilities considered to be within the category of

6. **Inclusion of "First" Inspections and Cleanings**. Although actual claims may not include the "first" annual inspection and cleaning of each catch basin and inlet (these were required in the 2001 permit), your survey results should count these activities. The purpose of the survey is to quantify the typical cost of these activities on a unit basis. It is therefore simpler to include all inspections and cleanings in the survey, and ensures a larger sample size.

7. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

8. Based on the information you input in Worksheet C (in-house inspection costs), Worksheet D (In-house cleaning costs), and Worksheet E (Contractor Costs), the Tab B. 2.A. (Cost Summary) spreadsheet will auto-calculate.
9. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Inspection Costs

10. **Note 1 (Conveyance System Inspection and Related Costs).** Please report only the portion of costs allocated to conveyance system inspection or related functions. If these costs are intermingled with cleaning-related costs, please estimate the proportion allocated to inspection functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)
inspection functions.

12. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
13. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
14. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
15. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
16. **Note 7 (Source of Inspection Results)**. Please indicate the documents and assumptions used for reported costs.
17. **Note 8 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.D. of the Copermittees' revised Parameters and Guidelines (11/15/10).
18. **Note 9 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.
19. **Note 10 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement conveyance system inspection and cleaning and related functions during the life of the Permit.
20. **Note 11 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
21. **Note 12 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheets C and D, contract management costs should only include those necessary to carry out the Copermittees' in-house conveyance system inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor inspection and cleaning activities are included in Worksheet E (See Note 19).
22. **Note 14 (Vehicle and Equipment Maintenance)**. Annual maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain vehicles, equipment, and supplies.
23. **Note 15 (Fuel)**. The actual cost of fuel necessary to run the conveyance system inspection and cleaning equipment and equipment used to transport collected materials.

Tab D. In-house Cleaning Costs

24. **Note 16 (Conveyance System Cleaning Operations and Related Costs)**. Please report only the portion of costs allocated to conveyance system cleaning or related functions. If these costs are intermingled with inspection-related costs, please estimate the proportion allocated to cleaning functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)
25. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

26. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

27. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

28. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

29. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

30. **Note 7 (Source of Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

Tab E. Contractor Costs

31. **Note 17 (Contractor Costs)**. Please allocate a portion of the cost associated with conveyance system inspections and a portion with conveyance system cleaning functions. If these costs are intermingled, please estimate the proportion allocated to each, and describe the assumptions used to derive these estimates under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader categories of "Conveyance System Inspection" and "Conveyance System Cleaning." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figures in the "Source of Contract Cost Information" box .

32. **Note 18 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house inspections and cleaning. Worksheet E should describe only those supplemental activities related to contract inspection and cleaning.

33. **Note 10 (Contract Management Costs)**. Costs of managing conveyance system inspection and cleaning contracts.

34. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

Part 1: Conveyance System Inspection Costs (Note 1)

Use lines 1-20 if auto-calculating annual inspection costs for each year

1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	
2	Multiple	Enter Job Classification	4	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
7	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
8	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
9	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
10	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
11	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
12	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
13	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
14	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
15	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
16	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
17	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
18	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
19	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
20	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
21	Use line 21 if inserting total inspection costs for each year								$0		$0		$0	
								TOTALS	$0		$0		$0	

Source of Inspection Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

Part 2: Other Personnel Costs Related to Conveyance System Inspections (Note 1)

	Annualized FY 2007-08 Salary Information							FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2008-09 Personnel Costs		
	Staff Person (Note 1)	Job Classification	Number in Class	Annual Salary (Note 2)	Benefit rate (%) (Note 3)	Indirect cost rate %) (Note 4)	Salaries, Benefits, Indirect Totals	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	Source of Information (Note 6)

a. Reporting (Note 8)

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

	Use lines 1-5 to auto-calculate annual reporting costs for each year													**Source of Reporting Cost Information**
1	Enter Name	Analyst (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	4	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 to insert total reporting costs for each year								$0		$0		$0	
								Reporting Totals	**$0**		**$0**		**$0**	

b. Supervision and Management (Note 9)

	Use lines 1-5 if auto-calculating annual supervision and management costs for each year													**Source of Supervision & Management Cost Information**
1	Enter Name	Program Mgr (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total supervision and management costs for each year								$0		$0		$0	
								Supervision and Management Totals	**$0**		**$0**		**$0**	

c. Employee and Vendor Training (Note 10)

	Use lines 1-5 if auto-calculating annual training costs for each year													**Source of Training Cost Information**
1	Enter Name	Supervisor (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
								Training Totals	**$0**		**$0**		**$0**	

d. Vehicle and Equipment Maintenance (Note 11)

	Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year													**Source of Equipment Maintenance Cost Information**
1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0	
								Equipment Maintenance Totals	**$0**		**$0**		**$0**	

e. Contract Management (Note 12)

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0	
								Contract Management Totals	**$0**		**$0**		**$0**	

Source of Contract Management Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

Part 3: Non-Personnel Costs Related to Conveyance System Inspections (Note 1)

		FY 2007-08	FY 2008-09	FY 2009-10
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0
2	Fuel (Note 15)	$0	$0	$0
3	Training Materials and Supplies (Note 10)	$0	$0	$0
	Total	$0	$0	$0

Source of Non-personnel Cost Information

Describe source of non-personnel cost information. Also use this space to document any assumptions used to determine non-personnel costs.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$0	**$0**	**$0**

Part 5: Inspection Results

	FY 2007-08	FY 2008-09	FY 2009-10
Number of Inspections	2	2	2
Unit Cost per Inspection	$ -	$ -	$ -

Source of Inspection Results (Note 7)

Identify the source of inspection results. Also use this space to document any assumptions used to calculate inspection results.

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

	Annualized FY 2007-08 Salary Information							Personnel Cost Calculations						
								FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2009-10 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to inspections	Annual cost for inspections	% of time dedicated to inspections	Annual cost for inspections	% of time dedicated to inspections	Annual cost for inspections	Source of Information (Note 6)
Part 1: Conveyance System Cleaning Operations Costs (Note 16)														
	Use lines 1-20 if auto-calculating annual inspection costs for each year													
1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	
2	Multiple	Enter Job Classification	4	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
7	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
8	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
9	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
10	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
11	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
12	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
13	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
14	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
15	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
16	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
17	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
18	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
19	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
20	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
21	Use line 21 if inserting total inspection costs for each year								$0		$0		$0	
								TOTALS	$0		$0		$0	

Source of Cleaning Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

Part 2: Other Personnel Costs Related to Conveyance System Cleaning (Note 16)

a. Reporting (Note 8)

	Use lines 1-5 to auto-calculate annual reporting costs for each year													
1	Enter Name	Analyst (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	
2	Multiple	Enter Job Classification	4	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	

Source of Reporting Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

	Annualized FY 2007-08 Salary Information							Personnel Cost Calculations: FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2009-10 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to inspections	Annual cost for inspections	% of time dedicated to inspections	Annual cost for inspections	% of time dedicated to inspections	Annual cost for inspections	Source of Information (Note 6)
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 to insert total reporting costs for each year								$0		$0		$0	
							Reporting Totals		**$0**		**$0**		**$0**	

b. Supervision and Management (Note 9)

	Use lines 1-5 if auto-calculating annual supervision and management costs for each year													**Source of Supervision & Management Cost Information**
1	Enter Name	Program Mgr (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total supervision and management costs for each year								$0		$0		$0	
							Supervision and Management Totals		**$0**		**$0**		**$0**	

c. Employee and Vendor Training (Note 10)

	Use lines 1-5 if auto-calculating annual training costs for each year													**Source of Training Cost Information**
1	Enter Name	Supervisor (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
							Training Totals		**$0**		**$0**		**$0**	

d. Vehicle and Equipment Maintenance (Note 11)

	Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year													**Source of Equipment Maintenance Cost Information**
1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0	
							Equipment Maintenance Totals		**$0**		**$0**		**$0**	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

	Annualized FY 2007-08 Salary Information							Personnel Cost Calculations: FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2009-10 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to inspections	Annual cost for inspections	% of time dedicated to inspections	Annual cost for inspections	% of time dedicated to inspections	Annual cost for inspections	Source of Information (Note 6)
	e. Contract Management (Note 12)													
	Use lines 1-5 if auto-calculating annual contract management costs for each year													
1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0	
							Equipment Maintenance Totals		**$0**		**$0**		**$0**	

Source of Contract Management Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

Contract Management Totals

		FY 2007-08	FY 2008-09	FY 2009-10
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0
2	Fuel (Note 15)	$0	$0	$0
3	Training Materials and Supplies (Note 10)	$0	$0	$0
	Total	$0	$0	$0

Source of Non-personnel Cost Information

Describe source of non-personnel cost information. Also use this space to document any assumptions used to determine non-personnel costs.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$0	**$0**	**$0**

Part 5: Cleaning Results

	FY 2007-08	FY 2008-09	FY 2009-10
Number of Cleanings	1	1	1
Unit Cost per Cleaning	$ -	$ -	$ -

Source of Cleaning Results (Note 17)

Identify the source of inspection results. Also use this space to document any assumptions used to calculate cleaning results.

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Annualized FY 2007-08 Salary Information							Personnel Cost Calculations						
							FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2009-10 Personnel Costs		
Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to inspections	Annual cost for inspections	% of time dedicated to inspections	Annual cost for inspections	% of time dedicated to inspections	Annual cost for inspections	Source of Information (Note 6)

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet E: Contractor Costs and Results

Part 1: Contract Costs

		FY 2007-08		FY 2008-09		FY 2009-10	
		Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
	Contractor Costs (Note 17)						
1	Conveyance System Inspection (Note 1)	$0		$2		$2	
2	Conveyance System Cleaning (Note 16)		$0		$0		$0
	Supplemental In-house Costs (Note 18)						
	Personnel Costs						
1	Reporting (Note 8)	$0	$0	$2	$0	$2	$0
2	Contract Management (Note 19)	$0	$0	$0	$3	$0	$0
3	Employee and Vendor Training (Note 10)	$0	$1	$0	$0	$0	$0
4	14)	$0	$2	$2	$2	$2	$2
	Non-personnel Costs						
1	14)	$0	$0	$0	$0	$0	$0
2	Fuel (Note 15)	$0	$0	$1	$0	$0	$1
3	Training Materials and Supplies (Note 10)	$1	$1	$0	$1	$1	$0
	Total Contract Costs	**$1**	**$4**	**$7**	**$6**	**$7**	**$3**

Source of Contract Cost Information (Note 6)

Describe source of contract cost information. Also use this space to document any assumptions used to calculate costs.

Part 2: Inspection and Cleaning Results

	FY 2007-08		FY 2008-09		FY 2009-10	
Inspections	Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
Number of Inspections	450		450		450	
Unit Cost per Inspection	$ 0.00		$ 0.02		$ 0.02	
Cleanings						
Number of Cleanings		250		225		200
Unit Cost per Cleaning		$ 0.02		$ 0.03		$ 0.02

Source of Inspection and Cleaning Results (Note 7)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate inspection and cleaning results.

Note: Only report statistics for catch basins and inlets. Do not include inspections or cleaning of open channels.

General Explanation and Instructions for the Completion of **"Conveyance System Inspection and Cleaning - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.

3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.

4. **Costs Not Included**. This RRM survey does not include the following costs: (1) reimbursable costs for parking signage and enforcement, which will be claimed as actual costs, (2) vehicle and equpiment costs, which will be claimed as actual costs, and (3) costs of materials disposal, which are not reimbursable because they were required under the 2001 permit.

5. **Exclusion of Open Channels**. This RRM survey addresses only "catch basins and inlets"; it does not include costs associated with include the inspection or maintenance of open channels, which will be claimed as actual costs. Results for any facilities considered to be within the category of "catch basins and inlets" should be included in your response.

6. **Inclusion of "First" Inspections and Cleanings**. Although actual claims may not include the "first" annual inspection and cleaning of each catch basin and inlet (these were required in the 2001 permit), your survey results should count these activities. The purpose of the survey is to quantify the typical cost of these activities on a unit basis. It is therefore simpler to include all inspections and cleanings in the survey, and ensures a larger sample size.

7. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

8. Based on the information you input in Worksheet C (in-house inspection costs), Worksheet D (In-house cleaning costs), and Worksheet E (Contractor Costs), the Tab B. 2.A. (Cost Summary) spreadsheet will auto-calculate.
9. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Inspection Costs

10. **Note 1 (Conveyance System Inspection and Related Costs).** Please report only the portion of costs allocated to conveyance system inspection or related functions. If these costs are intermingled with cleaning-related costs, please estimate the proportion allocated to inspection functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

11. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

12. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

13. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

14. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

15. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

16. **Note 7 (Source of Inspection Results)**. Please indicate the documents and assumptions used for reported costs.

17. **Note 8 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.D. of the Copermittees' revised Parameters and Guidelines (11/15/10).

18. **Note 9 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

19. **Note 10 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement conveyance system inspection and cleaning and related functions during the life of the Permit.

20. **Note 11 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.

21. **Note 12 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheets C and D, contract management costs should only include those necessary to carry out the Copermittees' in-house conveyance system inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor inspection and cleaning activities are included in Worksheet E (See Note 19).

22. **Note 14 (Vehicle and Equipment Maintenance)**. Annual maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain vehicles, equipment, and supplies.

23. **Note 15 (Fuel)**. The actual cost of fuel necessary to run the conveyance system inspection and cleaning equipment and equipment used to transport collected materials.

Tab D. In-house Cleaning Costs

24. **Note 16 (Conveyance System Cleaning Operations and Related Costs)**. Please report only the portion of costs allocated to conveyance system cleaning or related functions. If these costs are intermingled with inspection-related costs, please estimate the proportion allocated to cleaning functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

25. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

26. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

27. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

28. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

29. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

30. **Note 7 (Source of Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

Tab E. Contractor Costs

31. **Note 17 (Contractor Costs)**. Please allocate a portion of the cost associated with conveyance system inspections and a portion with conveyance system cleaning functions. If these costs are intermingled, please estimate the proportion allocated to each, and describe the assumptions used to derive these estimates under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader categories of "Conveyance System Inspection" and "Conveyance System Cleaning." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figures in the "Source of Contract Cost Information" box .

32. **Note 18 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house inspections and cleaning. Worksheet E should describe only those supplemental activities related to contract inspection and cleaning.

33. **Note 10 (Contract Management Costs)**. Costs of managing conveyance system inspection and cleaning contracts.

34. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

35. **Note 7 (Source of Inspection and Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

36. **Note 19 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet E, contract management costs should only include those necessary to carry out the contracted conveyance system inspection and cleaning activities . Contract costs associated with in-house inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheets C and D (See Note 12).

Worksheet B: Unit Cost Summary Sheet

Part 1: General Information

Jurisdiction :	City of San Diego		
Contact Person :	Amanda Leos	Alternate:	Tracy Mangum
Phone :	858-541-4353	Phone:	(858) 541-4307
E-Mail :	avleos@sandiego.gov	E-Mail:	tmangum@sandiego.gov

	FY 2007-08		FY 2008-09		FY 2009-10	
	Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
Part 2: Cost Information						
A. In-house Costs (complete Worksheets C and D)						
Personnel Costs						
Conveyance System Inspection	$135,838		$139,913		$144,110	
Conveyance System Cleaning Operations		$950,863		$979,389		$1,008,770
Reporting	$0	$0	$0	$0	$0	$0
Employee Supervision and Management	$0	$0	$0	$0	$0	$0
Employee and Vendor Training	$0	$0	$0	$0	$0	$0
Equipment Maintenance	$0	$0	$0	$0	$0	$0
Contract Management	$0	$0	$0	$0	$0	$0
Non-personnel Costs						
Equipment Maintenance	$0	$703,154	$0	$1,246,621	$0	$517,627
Fuel	$0	$10,905	$0	$0	$0	$0
Training Materials and Supplies	$0	$213,059	$0	$40,954	$0	$282,112
Total In-house Costs	**$135,838**	**$1,877,980**	**$139,913**	**$2,266,964**	**$144,110**	**$1,808,509**
B. Contractor Costs (complete Worksheet E)						
Conveyance System Inspection Contract	$672,466		$672,466		$619,416	
Conveyance System Cleaning Operations Contract		$0		$0		$0
Reporting	$0	$0	$0	$0	$0	$0

Employee and Vendor Training	$0	$0	$0	$0	$0	$0
Vehicle and Equipment Maintenance	$0	$0	$0	$0	$0	$0
Non-personnel Costs						
Vehicle and Equipment Maintenance	$0	$0	$0	$0	$0	$0
Fuel	$0	$0	$0	$0	$0	$0
Training Equipment and Supplies	$0	$0	$0	$0	$0	$0
Total Contract Costs	**$672,466**	**$0**	**$672,466**	**$0**	**$619,416**	**$0**
Total Costs (In-house + Contractor)	**$808,304**	**$1,877,980**	**$812,379**	**$2,266,964**	**$763,526**	**$1,808,509**

Part 3: Inspection and Cleaning Totals (Note 3)

Inspection Results						
a. In-house Results						
Number of Inspections	10986		10986		10986	
Unit Cost per Inspection	**$12.36**		**$12.74**		**$13.12**	
b. Contract Results						
Number of Inspections	24020		24020		22122	
Unit Cost per Inspection	**$28.00**		**$28.00**		**$28.00**	
c. Combined Results						
Number of Inspections	35006		35006		33108	
Unit Cost per Inspection	**$23.09**		**$23.21**		**$23.06**	
Cleaning Results						
a. In-house Results						
Number of Cleanings		5536		5536		5536
Unit Cost per Cleaning		**$339.23**		**$409.49**		**$326.68**
b. Contract Results						
Number of Cleanings		10377		10377		9556
Unit Cost per Cleaning		**$0.00**		**$0.00**		**$0.00**
c. Combined Results						
Number of Cleanings		15913		15913		15092
Unit Cost per Cleaning		**$118.02**		**$142.46**		**$119.83**

Worksheet C: In-house Conveyance System Inspection Costs and Results

Part 1: Conveyance System Inspection Costs (Note 1)

Use lines 1-20 if auto-calculating annual inspection costs for each year

	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	FY 2007-08 Personnel Costs: % of time dedicated to inspections	FY 2007-08 Personnel Costs: Annual cost for inspections	FY 2008-09 Personnel Costs: % of time dedicated to inspections	FY 2008-09 Personnel Costs: Annual cost for inspections	FY 2009-10 Personnel Costs: % of time dedicated to inspections	FY 2009-10 Personnel Costs: Annual cost for inspections
1	D. Moreno	Equipment Operator I	1	$45,115	56	96.1	$113,735	10	$11,374	10	$11,715	10	$12,066

13	A. Snelling	Public Works Supervisor	1	$59,966	56	96.1	$151,175	10	$15,118	10	$15,571	10	$16,038
14				$0	0	10	$0	0	$0	0	$0	0	$0
15				$0	0	10	$0	0	$0	0	$0	0	$0
16				$0	0	10	$0	0	$0	0	$0	0	$0
17				$0	0	10	$0	0	$0	0	$0	0	$0
18				$0	0	10	$0	0	$0	0	$0	0	$0
19				$0	0	10	$0	0	$0	0	$0	0	$0
20				$0	0	10	$0	0	$0	0	$0	0	$0
21	Use line 21 if inserting total inspection costs for each year								$0		$0		$0
								TOTALS	$135,838		$139,913		$144,110

Source of Information (Note 6)

Source of Inspection Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Part 2: Other Personnel Costs Related to Conveyance System Inspections (Note 1)

	Annualized FY 2007-08 Salary Information							FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2008-09 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	Source of Information (Note 6)
	a. Reporting (Note 8)													
	Use lines 1-5 to auto-calculate annual reporting costs for each year													**Source of Reporting Cost Information**
1	Enter Name	Analyst (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	4	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 to insert total reporting costs for each year								$0		$0		$0	
							Reporting Totals		**$0**		**$0**		**$0**	
	b. Supervision and Management (Note 9)													
	Use lines 1-5 if auto-calculating annual supervision and management costs for each year													**Source of Supervision & Management Cost Information**
1	Enter Name	Program Mgr (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total supervision and management costs for each year								$0		$0		$0	
							Supervision and Management Totals		**$0**		**$0**		**$0**	
	c. Employee and Vendor Training (Note 10)													
	Use lines 1-5 if auto-calculating annual training costs for each year													**Source of Training Cost Information**
1	Enter Name	Supervisor (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
							Training Totals		**$0**		**$0**		**$0**	
	d. Vehicle and Equipment Maintenance (Note 11)													
	Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year													**Source of Equipment Maintenance Cost Information**
1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Total Vehicle and Equipment

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	Maintenance captured
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0	
								Equipment Maintenance Totals	**$0**		**$0**		**$0**	

e. Contract Management (Note 12)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0	
								Contract Management Totals	**$0**		**$0**		**$0**	

Source of Contract Management Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

Part 3: Non-Personnel Costs Related to Conveyance System Inspections (Note 1)

		FY 2007-08	FY 2008-09	FY 2009-10
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0
2	Fuel (Note 15)	$0	$0	$0
3	Training Materials and Supplies (Note 10)	$0	$0	$0
	Total	$0	$0	$0

Source of Non-personnel Cost Information

Because the Non-personnel costs are minimal for inspections, all Non-Personnel costs are captured in the In-house inpsections reports.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$135,838	**$139,913**	**$144,110**

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Part 5: Inspection Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Inspection Results (Note 7)
Number of Inspections	10986	10986	10986	Only FY 2010 information was available for number of cleanings, so the same number was used for all fiscal years.
Unit Cost per Inspection	$ 12.36	$ 12.74	$ 13.12	

176

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 1: Conveyance System Cleaning Operations Costs (Note 16)

Use lines 1-20 if auto-calculating annual inspection costs for each year

	Annualized FY 2007-08 Salary Information							Personnel Cost Calculations: FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2009-10 Personnel Costs		Source of Information (Note 6)
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to inspections	Annual cost for cleaning	% of time dedicated to inspections	Annual cost for cleaning	% of time dedicated to inspections	Annual cost for cleaning

							Training Totals		**$0**		**$0**		**$0**	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

d. Vehicle and Equipment Maintenance (Note 11)

Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year

1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0
								Equipment Maintenance Totals	**$0**		**$0**		**$0**

Source of Equipment Maintenance Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

e. Contract Management (Note 12)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0
								Contract Management Totals	**$0**		**$0**		**$0**

Source of Contract Management Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

Part 3: Non-Personnel Costs Related to Conveyance Cleaning

		FY 2007-08	FY 2008-09	FY 2009-10
1	Vehicle and Equipment Maintenance (Note 14)	$703,154	$1,246,621	$517,627
2	Fuel (Note 15)	$10,905	$0	$0
3	Training Materials and Supplies (Note 10)	$213,059	$40,954	$282,112
	Total	$927,118	$1,287,575	$799,739

Source of Non-personnel Cost Information

Source: City of San Diego Comptroller reports. Fuel is already captured in the maintenance charges as part of the Storm Water's agreement with the City of San Diego's General Services Dept. - Equipment Division. Special fuel is

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$1,877,980	**$2,266,964**	**$1,808,509**

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 5: Cleaning Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Cleaning Results (Note 17)
Number of Cleanings	5536	5536	5536	Only FY 2010 information was available for number of cleanings, so the same number was used for all fiscal years.
Unit Cost per Cleaning	$ 339.23	$ 409.49	$ 326.68	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet E: Contractor Costs and Results

Part 1: Contract Costs

		FY 2007-08		FY 2008-09		FY 2009-10	
		Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
	Contractor Costs (Note 17)						
1	Conveyance System Inspection (Note 1)	$672,466		$672,466		$619,416	
2	Conveyance System Cleaning (Note 16)		$0				
	Supplemental In-house Costs (Note 18)						
	Personnel Costs						
1	Reporting (Note 8)	$0	$0	$0	$0	$0	$0
2	Contract Management (Note 19)	$0	$0	$0	$0	$0	$0
3	Employee and Vendor Training (Note 10)	$0	$0	$0	$0	$0	$0
4	14)	$0	$0	$0	$0	$0	$0
	Non-personnel Costs						
1	14)	$0	$0	$0	$0	$0	$0
2	Fuel (Note 15)	$0	$0	$0	$0	$0	$0
3	Training Materials and Supplies (Note 10)	$0	$0	$0	$0	$0	$0
	Total Contract Costs	**$672,466**	**$0**	**$672,466**	**$0**	**$619,416**	**$0**

Source of Contract Cost Information (Note 6)

Purchase order/invoice reports and contractor information provided on a monthly basis.

Part 2: Inspection and Cleaning Results

	FY 2007-08		FY 2008-09		FY 2009-10	
Inspections	Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
Number of Inspections	24020		24020		22122	
Unit Cost per Inspection	$ 28.00		$ 28.00		$ 28.00	
Cleanings						
Number of Cleanings		**10377**		**10377**		**9556**
Unit Cost per Cleaning		$ -		$ -		$ -

Source of Inspection and Cleaning Results (Note 7)

The Contract for Cleaninng Catch Basins is a $28 per unit all inclusive (inspections and cleaning) The actual amounts of Catch Basins cleaned were not available for FY 2008 and 2009, so the number of cleanings were calculated by using the % of catch basins cleaned in FY 2010.

Note: Only report statistics for catch basins and inlets. Do not include inspections or cleaning of open channels.

Activity	Comment
In-house Personnel Equipment Maintenan	Costs appear high versus other year(s). Plesae explain.
In-house Training Materials and Supplies	Costs appear high versus other year(s). Plesae explain.
Total Contract Costs	Per disclosure below, the number of inspections and cleanings should be the same and costs allocated between the two functions.
Contract # of cleanings	As is -- no cost for cleanings and the number of cleanings should be zero. But see above note.

General Explanation and Instructions for the Completion of **"Conveyance System Inspection and Cleaning - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.

3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.

4. **Costs Not Included**. This RRM survey does not include the following costs: (1) reimbursable costs for parking signage and enforcement, which will be claimed as actual costs, (2) vehicle and equpiment costs, which will be claimed as actual costs, and (3) costs of materials disposal, which are not reimbursable because they were required under the 2001 permit.

5. **Exclusion of Open Channels**. This RRM survey addresses only "catch basins and inlets"; it does not include costs associated with include the inspection or maintenance of open channels, which will be claimed as actual costs. Results for any facilities considered to be within the category of "catch basins and inlets" should be included in your response.

6. **Inclusion of "First" Inspections and Cleanings**. Although actual claims may not include the "first" annual inspection and cleaning of each catch basin and inlet (these were required in the 2001 permit), your survey results should count these activities. The purpose of the survey is to quantify the typical cost of these activities on a unit basis. It is therefore simpler to include all inspections and cleanings in the survey, and ensures a larger sample size.

7. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

8. Based on the information you input in Worksheet C (in-house inspection costs), Worksheet D (In-house cleaning costs), and Worksheet E (Contractor Costs), the Tab B. 2.A. (Cost Summary) spreadsheet will auto-calculate.
9. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Inspection Costs

10. **Note 1 (Conveyance System Inspection and Related Costs).** Please report only the portion of costs allocated to conveyance system inspection or related functions. If these costs are intermingled with cleaning-related costs, please estimate the proportion allocated to inspection functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

11. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

12. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

13. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

14. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

15. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

16. **Note 7 (Source of Inspection Results)**. Please indicate the documents and assumptions used for reported costs.

17. **Note 8 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.D. of the Copermittees' revised Parameters and Guidelines (11/15/10).

18. **Note 9 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

19. **Note 10 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement conveyance system inspection and cleaning and related functions during the life of the Permit.

20. **Note 11 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.

21. **Note 12 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheets C and D, contract management costs should only include those necessary to carry out the Copermittees' in-house conveyance system inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor inspection and cleaning activities are included in Worksheet E (See Note 19).

22. **Note 14 (Vehicle and Equipment Maintenance)**. Annual maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain vehicles, equipment, and supplies.

23. **Note 15 (Fuel)**. The actual cost of fuel necessary to run the conveyance system inspection and cleaning equipment and equipment used to transport collected materials.

Tab D. In-house Cleaning Costs

24. **Note 16 (Conveyance System Cleaning Operations and Related Costs)**. Please report only the portion of costs allocated to conveyance system cleaning or related functions. If these costs are intermingled with inspection-related costs, please estimate the proportion allocated to cleaning functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

25. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

26. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

27. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

28. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

29. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

30. **Note 7 (Source of Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

Tab E. Contractor Costs

31. **Note 17 (Contractor Costs)**. Please allocate a portion of the cost associated with conveyance system inspections and a portion with conveyance system cleaning functions. If these costs are intermingled, please estimate the proportion allocated to each, and describe the assumptions used to derive these estimates under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader categories of "Conveyance System Inspection" and "Conveyance System Cleaning." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figures in the "Source of Contract Cost Information" box .

32. **Note 18 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house inspections and cleaning. Worksheet E should describe only those supplemental activities related to contract inspection and cleaning.

33. **Note 10 (Contract Management Costs)**. Costs of managing conveyance system inspection and cleaning contracts.

34. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

35. **Note 7 (Source of Inspection and Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

36. **Note 19 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet E, contract management costs should only include those necessary to carry out the contracted conveyance system inspection and cleaning activities . Contract costs associated with in-house inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheets C and D (See Note 12).

Source of Inspection Cost Information

Used work order management system for structure inspections only, and work load % based on what was cleaned for prior years. Total cost include a 75% benefit overhead rate = $19,241

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Part 2: Other Personnel Costs Related to Conveyance System Inspections (Note 1)

	Annualized FY 2007-08 Salary Information							FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2008-09 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	Source of Information (Note 6)
	a. Reporting (Note 8)													
	Use lines 1-5 to auto-calculate annual reporting costs for each year													**Source of Reporting Cost Information**
1	n/a		1	$0		10	$0	0	$0	0	$0	0	$0	Work management system implementation to track cost detail began in FY 09-10 for Storm. Did not include any analyst time for developing reports, etc. Included all costs in Cleaning
2	n/a		4	$0	0	10	$0	0	$0	0	$0	0	$0	
3	n/a			$0		10	$0	0	$0	0	$0	0	$0	
4	n/a		1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	n/a		1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 to insert total reporting costs for each year								$0		$0		$0	
							Reporting Totals		**$0**		**$0**		**$0**	
	b. Supervision and Management (Note 9)													
	Use lines 1-5 if auto-calculating annual supervision and management costs for each year													**Source of Supervision & Management Cost Information**
1	Paul Buckley	Street Maintenance Superint	1	$78,888	75	10	$145,943	1	$1,459	2	$3,006		$0	Used payroll information; estimated time allocation. Time increased with change in requirements and more tools to track
2	Paul Buckley	PW Mgr / Streets & Storm	1	$94,000	75	10	$173,900	0	$0	0	$0	2	$3,690	
3	Jeff Bushnell	Street Maintenance Superv.	1	$91,548	75	10	$169,364	2	$3,387	4	$6,978	6	$10,781	
4	n/a		1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	n/a		1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total supervision and management costs for each year								$0		$0		$0	
							Supervision and Management Totals		**$4,847**		**$9,984**		**$14,470**	

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

c. Employee and Vendor Training (Note 10)

Use lines 1-5 if auto-calculating annual training costs for each year

1	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total training costs for each year							$0		$0		$0
							Training Totals	**$0**		**$0**		**$0**

Source of Training Cost Information
Did not use

d. Vehicle and Equipment Maintenance (Note 11)

Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year

1	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total equipment maintenance costs for each year							$1,005		$2,924		$9,325
							Equipment Maintenance Totals	**$1,005**		**$2,924**		**$9,325**
								11%		32%		

Source of Equipment Maintenance Cost Information
Used usage rates in work management system and applied them for prior years, discounting each prior year by 2% & by different work load (based on tracking for actual cleaned).

e. Contract Management (Note 12)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total contract management costs for each year							$0		$0		$0
							Contract Management Totals	**$0**		**$0**		**$0**

Source of Contract Management Cost Information
Included in Supervision / management.

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Part 3: Non-Personnel Costs Related to Conveyance System Inspections (Note 1)

		FY 2007-08	FY 2008-09	FY 2009-10	Source of Non-personnel Cost Information
1	Vehicle and Equipment Maintenance (Note 14)				See (d) for vehicle / equipment maintenance.
2	Fuel (Note 15)	$0	$0	$0	
3	Training Materials and Supplies (Note 10)	$0	$0	$0	
	Total	$0	$0	$0	

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$7,913	**$19,090**	**$43,711**

Part 5: Inspection Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Inspection Results (Note 7)
Number of Inspections	263	765	2390	work management system - assets attached to work orders & inspection records. Used 2010 information as representative of prior years.
Unit Cost per Inspection	$ 30.10	$ 24.96	$ 18.29	
	11%	32%		

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

	Annualized FY 2007-08 Salary Information							Personnel Cost Calculations						
								FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2009-10 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to inspections	Annual cost for cleaning	% of time dedicated to inspections	Annual cost for cleaning	% of time dedicated to inspections	Annual cost for cleaning	Source of Information (Note 6)
Part 1: Conveyance System Cleaning Operations Costs (Note 16)														
	Use lines 1-20 if auto-calculating annual inspection costs for each year													
1	N/A		1				$0		$0	0	$0	0	$0	
2	n/a		1				$0		$0	0	$0	0	$0	
3	n/a		1				$0		$0	0	$0	0	$0	
4	n/a		1				$0		$0	0	$0	0	$0	
5	n/a		1				$0		$0	0	$0	0	$0	
6	n/a		1				$0		$0	0	$0	0	$0	
7	n/a		1				$0		$0	0	$0	0	$0	
8	n/a		1				$0		$0	0	$0	0	$0	
9	n/a		1				$0		$0	0	$0	0	$0	
10	n/a		1				$0		$0	0	$0	0	$0	
11	n/a		1				$0		$0	0	$0	0	$0	
12	n/a		1				$0		$0	0	$0	0	$0	
13	n/a		1				$0		$0	0	$0	0	$0	
14	n/a		1				$0		$0	0	$0	0	$0	
15	n/a		1				$0		$0	0	$0	0	$0	
16	n/a		1				$0		$0	0	$0	0	$0	
17	n/a		1				$0		$0	0	$0	0	$0	
18	n/a		1				$0		$0	0	$0	0	$0	
19	n/a		1				$0		$0	0	$0	0	$0	
20	n/a		1				$0		$0	0	$0	0	$0	
21	Use line 21 if inserting total inspection costs for each year								$0		$0		$0	
								TOTALS	$3,500		$10,507		$33,849	
									11%		32%		100%	

Source of Cleaning Cost Information

Work Management reporting available for 09/10 - annualized. Used those costs for basis & the number of cleaned structures from prior tracking to estimate costs for what was performed.

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 2: Other Personnel Costs Related to Conveyance System Cleaning (Note 16)

	Annualized FY 2007-08 Salary Information							Costs		Costs		Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	Source of Information (Note 6)
	a. Reporting (Note 8)													
	Use lines 1-5 to auto-calculate annual reporting costs for each year													**Source of Reporting Cost Information**
1	Kathleen Trepa	Public Works Manager	1	$95,000	75	10	$175,750	0	$0	0	$0	25	$46,613	Configured asset / work management system & reporting (GBA). Storm implemented Spring 2010. time included verifying inventory, and training - program set up. Salaries actual for 1 - 2 & estimated for 3
2	Pete Ventura	Lead Maintenance Worker	1	$51,312	75	10	$94,927	0	$0	20	$19,555	50	$50,354	
3	Mettja Kuna	GIS Analyst	1	$80,000	75	10	$148,000	0	$0	0	$0	10	$15,701	
4	n/a		1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	n/a		1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 to insert total reporting costs for each year								$0		$0		$0	
							Reporting Totals		**$0**		**$19,555**		**$112,669**	
	b. Supervision and Management (Note 9)													
	Use lines 1-5 if auto-calculating annual supervision and management costs for each year													**Source of Supervision & Management Cost Information**
1	Paul Buckley	Street Maintenance Superint	1	$78,888	75	10	$145,943	1	$1,459	2	$3,006	0	$0	Used payroll information.
2	Paul Buckley	PW Mgr / Streets & Storm	1	$94,000	75	10	$173,900	0	$0	0	$0	5	$9,225	
3	Jeff Bushnell / Greg Motas	Street Maintenance Superv. Staff change	1	$91,548	75	10	$169,364	5	$8,468	5	$8,722	10	$17,968	
4	n/a						$0	0	$0	0	$0	0	$0	
5	n/a						$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total supervision and management costs for each year								$0		$0		$0	
							Supervision and Management Totals		**$9,928**		**$11,729**		**$27,192**	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

c. Employee and Vendor Training (Note 10)

Use lines 1-5 if auto-calculating annual training costs for each year

1	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total training costs for each year							$1,485		$1,531		$1,578
							Training Totals	**$1,485**		**$1,531**		**$1,578**

Source of Training Cost Information

Dept wide annual NPDES training, from training records in work management system.

d. Vehicle and Equipment Maintenance (Note 11)

Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year

1	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total equipment maintenance costs for each year							$20,477		$20,895		$21,322
							Equipment Maintenance Totals	**$2,252**		**$6,686**		**$21,322**
								11%		32%		100%

Source of Equipment Maintenance Cost Information

Using usage rates in work management system and applied them for prior years, discounting each prior year by 2% & for amount of work performed in prior years.

e. Contract Management (Note 12)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	Pete Ventura	1	$0	0	10	$0	0	$852	0	$878		$905
3	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	n/a	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total contract management costs for each year							$0		$0		$0
							Contract Management Totals	**$852**		**$878**		**$905**

Source of Contract Management Cost Information

From work management system - FY 09-10, discounted 3% for prior years

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 3: Non-Personnel Costs Related to Conveyance Cleaning

		FY 2007-08	FY 2008-09	FY 2009-10	Source of Non-personnel Cost Information
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0	See (d) for vehicle / equipment maintenance. Training materials = hardware, software, costs to implement asset / work management system, including computer upgrades to support software
2	Fuel (Note 15)	$0	$0	$0	
3	Training Materials and Supplies (Note 10)	$0	$0	$16,050	
	Total	$0	$0	$16,050	

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$18,017	**$50,886**	**$213,565**

Part 5: Cleaning Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Cleaning Results (Note 17)
Number of Cleanings	100	300	941	work management system - implemented FY 09-10. implementation costs captured in 09/10.
Unit Cost per Cleaning	$ 180.17	$ 169.62	$ 226.96	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet E: Contractor Costs and Results

Part 1: Contract Costs

		FY 2007-08		FY 2008-09		FY 2009-10	
		Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
	Contractor Costs (Note 17)						
1	Conveyance System Inspection (Note 1)	$0		$0		$0	
2	Conveyance System Cleaning (Note 16)		$2,000		$2,000		$2,000
	Supplemental In-house Costs (Note 18)						
	Personnel Costs						
1	Reporting (Note 8)	$0	$0		$0		$0
2	Contract Management (Note 19)	$0	$852	$0	$878	$0	$905
3	Employee and Vendor Training (Note 10)	$0		$0	$0	$0	$0
4	14)	$0					
	Non-personnel Costs						
1	14)	$0	$0	$0	$0	$0	$0
2	Fuel (Note 15)	$0	$0		$0	$0	
3	Training Materials and Supplies (Note 10)			$0			$0
	Total Contract Costs	**$0**	**$2,852**	**$0**	**$2,878**	**$0**	**$2,905**

Source of Contract Cost Information (Note 6)

Contractor costs are captured in the city's work management system, which includes employee & vehicle time to manage / inspect work. So, this is actual documented cost. System implemented spring '09. Assumed same level for prior years. HYPERLINKS POINTED TO INCORRECT CELLS. FIXED REFERENCES - KST.

Part 2: Inspection and Cleaning Results

	FY 2007-08		FY 2008-09		FY 2009-10	
Inspections	Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
Number of Inspections	0		0			
Unit Cost per Inspection	#DIV/0!		#DIV/0!		#DIV/0!	
Cleanings						
Number of Cleanings		18		18		18
Unit Cost per Cleaning		$ 158.42		$ 159.88		$ 161.39

Source of Inspection and Cleaning Results (Note 7)

Contract inspection time on In-house cleaning costs - wasn't sure where to put that here since the cells were linked to that sheet.

Note: Only report statistics for catch basins and inlets. Do not include inspections or cleaning of open channels.

GBA IMPLEMENTATION COSTS

Licensing	1	11,875
Training	1.00	2,675
computer upgrades	4	1,500
		16,050

Activity	Comment
In-house Personnel Conveyance System Inspection	75% benefit rate is high.
In-house Personnel Conveyance System Cleaning Operations	75% benefit rate is high.
In-house non-personnel Equipment Maintenance	No fuel, maintenance costs.
In-house non-personnel fuel	No fuel, maintenance costs.
In-house Personnel Employee Supervision and Management	75% benefit rate is high.

General Explanation and Instructions for the Completion of **"Conveyance System Inspection and Cleaning - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.

3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.

4. **Costs Not Included**. This RRM survey does not include the following costs: (1) reimbursable costs for parking signage and enforcement, which will be claimed as actual costs, (2) vehicle and equpiment costs, which will be claimed as actual costs, and (3) costs of materials disposal, which are not reimbursable because they were required under the 2001 permit.

5. **Exclusion of Open Channels**. This RRM survey addresses only "catch basins and inlets"; it does not include costs associated with include the inspection or maintenance of open channels, which will be claimed as actual costs. Results for any facilities considered to be within the category of "catch basins and inlets" should be included in your response.

6. **Inclusion of "First" Inspections and Cleanings**. Although actual claims may not include the "first" annual inspection and cleaning of each catch basin and inlet (these were required in the 2001 permit), your survey results should count these activities. The purpose of the survey is to quantify the typical cost of these activities on a unit basis. It is therefore simpler to include all inspections and cleanings in the survey, and ensures a larger sample size.

7. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

8. Based on the information you input in Worksheet C (in-house inspection costs), Worksheet D (In-house cleaning costs), and Worksheet E (Contractor Costs), the Tab B. 2.A. (Cost Summary) spreadsheet will auto-calculate.
9. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Inspection Costs

10. **Note 1 (Conveyance System Inspection and Related Costs).** Please report only the portion of costs allocated to conveyance system inspection or related functions. If these costs are intermingled with cleaning-related costs, please estimate the proportion allocated to inspection functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

11. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

12. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

13. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

14. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

15. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

16. **Note 7 (Source of Inspection Results)**. Please indicate the documents and assumptions used for reported costs.

17. **Note 8 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.D. of the Copermittees' revised Parameters and Guidelines (11/15/10).

18. **Note 9 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

19. **Note 10 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement conveyance system inspection and cleaning and related functions during the life of the Permit.

20. **Note 11 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.

21. **Note 12 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheets C and D, contract management costs should only include those necessary to carry out the Copermittees' in-house conveyance system inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor inspection and cleaning activities are included in Worksheet E (See Note 19).

22. **Note 14 (Vehicle and Equipment Maintenance)**. Annual maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain vehicles, equipment, and supplies.

23. **Note 15 (Fuel)**. The actual cost of fuel necessary to run the conveyance system inspection and cleaning equipment and equipment used to transport collected materials.

Tab D. In-house Cleaning Costs

24. **Note 16 (Conveyance System Cleaning Operations and Related Costs)**. Please report only the portion of costs allocated to conveyance system cleaning or related functions. If these costs are intermingled with inspection-related costs, please estimate the proportion allocated to cleaning functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

25. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

26. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

27. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

28. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

29. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

30. **Note 7 (Source of Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

Tab E. Contractor Costs

31. **Note 17 (Contractor Costs)**. Please allocate a portion of the cost associated with conveyance system inspections and a portion with conveyance system cleaning functions. If these costs are intermingled, please estimate the proportion allocated to each, and describe the assumptions used to derive these estimates under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader categories of "Conveyance System Inspection" and "Conveyance System Cleaning." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figures in the "Source of Contract Cost Information" box .

32. **Note 18 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house inspections and cleaning. Worksheet E should describe only those supplemental activities related to contract inspection and cleaning.

33. **Note 10 (Contract Management Costs)**. Costs of managing conveyance system inspection and cleaning contracts.

34. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

35. **Note 7 (Source of Inspection and Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

36. **Note 19 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet E, contract management costs should only include those necessary to carry out the contracted conveyance system inspection and cleaning activities . Contract costs associated with in-house inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheets C and D (See Note 12).

4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
							Training Totals		**$24,679**		**$25,419**		**$26,182**	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

d. Vehicle and Equipment Maintenance (Note 11)

Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year

1	Sam Rensberry	P.W. Supervisor	1	$59,650	41.13	39.24	$107,591	1	$1,076	1	$1,108	1	$1,141
2	Multiple	Equip. Operator	5	$51,406	43.71	39.95	$94,411	5	$23,603	5	$24,311	5	$25,040
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0
							Equipment Maintenance Totals		**$24,679**		**$25,419**		**$26,182**

Source of Equipment Maintenance Cost Information

Salary and personnel costs are taken from the actual salaries paid along with the costs for Health, Dental, Life, AD & D and PERS costs. Includes time spent on daily equipment and vehicle maintenance.

e. Contract Management (Note 12)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Bob Stein	P. S. Manager	1	$0	0	0	$0	1	$0	1	$0	1	$0
2	Christine Edwards	Admin. Secretary	1	$0	0	0	$0	1	$0	1	$0	1	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0
							Contract Management Totals		**$0**		**$0**		**$0**

Source of Contract Management Cost Information

N/A

Part 3: Non-Personnel Costs Related to Conveyance Cleaning

		FY 2007-08	FY 2008-09	FY 2009-10
1	Vehicle and Equipment Maintenance (Note 14)	$5,000	$6,000	$6,500
2	Fuel (Note 15)	$3,120	$3,500	$4,200
3	Training Materials and Supplies (Note 10)	$50	$50	$50
	Total	$8,170	$9,550	$10,750

Source of Non-personnel Cost Information

Describe source of non-personnel cost information. Also use this space to document any assumptions used to determine non-personnel costs.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$95,972	**$99,987**	**$103,900**

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 5: Cleaning Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Cleaning Results (Note 17)
Number of Cleanings	27	43	40	Identify the source of inspection results. Also use this space to document any assumptions used to calculate cleaning results.
Unit Cost per Cleaning	$ 3,554.54	$ 2,325.27	$ 2,597.49	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet E: Contractor Costs and Results

Part 1: Contract Costs

		FY 2007-08		FY 2008-09		FY 2009-10	
		Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
	Contractor Costs (Note 17)						
1	Conveyance System Inspection (Note 1)	$0		$0		$0

Number of Inspections	450		450		450	
Unit Cost per Inspection	$ -		$ -		$ -	
Cleanings						
Number of Cleanings		250		225		200
Unit Cost per Cleaning		$ -		$ -		$ -

Source of Inspection and Cleaning Results (Note 7)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate inspection and cleaning results.

Note: Only report statistics for catch basins and inlets. Do not include inspections or cleaning of open channels.

Activity	Comment
Contract # of inspections	appears numbers not added or non contract work occurred, looks like default from template
Contract # of cleanings	appears numbers not added or non contract work occurred, looks like default from template

General Explanation and Instructions for the Completion of **"Conveyance System Inspection and Cleaning - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.

3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.

4. **Costs Not Included**. This RRM survey does not include the following costs: (1) reimbursable costs for parking signage and enforcement, which will be claimed as actual costs, (2) vehicle and equpiment costs, which will be claimed as actual costs, and (3) costs of materials disposal, which are not reimbursable because they were required under the 2001 permit.

5. **Exclusion of Open Channels**. This RRM survey addresses only "catch basins and inlets"; it does not include costs associated with include the inspection or maintenance of open channels, which will be claimed as actual costs. Results for any facilities considered to be within the category of "catch basins and inlets" should be included in your response.

6. **Inclusion of "First" Inspections and Cleanings**. Although actual claims may not include the "first" annual inspection and cleaning of each catch basin and inlet (these were required in the 2001 permit), your survey results should count these activities. The purpose of the survey is to quantify the typical cost of these activities on a unit basis. It is therefore simpler to include all inspections and cleanings in the survey, and ensures a larger sample size.

7. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

8. Based on the information you input in Worksheet C (in-house inspection costs), Worksheet D (In-house cleaning costs), and Worksheet E (Contractor Costs), the Tab B. 2.A. (Cost Summary) spreadsheet will auto-calculate.
9. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Inspection Costs

10. **Note 1 (Conveyance System Inspection and Related Costs).** Please report only the portion of costs allocated to conveyance system inspection or related functions. If these costs are intermingled with cleaning-related costs, please estimate the proportion allocated to inspection functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

11. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

12. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

13. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

14. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

15. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

16. **Note 7 (Source of Inspection Results)**. Please indicate the documents and assumptions used for reported costs.

17. **Note 8 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.D. of the Copermittees' revised Parameters and Guidelines (11/15/10).

18. **Note 9 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

19. **Note 10 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement conveyance system inspection and cleaning and related functions during the life of the Permit.

20. **Note 11 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.

21. **Note 12 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheets C and D, contract management costs should only include those necessary to carry out the Copermittees' in-house conveyance system inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor inspection and cleaning activities are included in Worksheet E (See Note 19).

22. **Note 14 (Vehicle and Equipment Maintenance)**. Annual maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain vehicles, equipment, and supplies.

23. **Note 15 (Fuel)**. The actual cost of fuel necessary to run the conveyance system inspection and cleaning equipment and equipment used to transport collected materials.

Tab D. In-house Cleaning Costs

24. **Note 16 (Conveyance System Cleaning Operations and Related Costs)**. Please report only the portion of costs allocated to conveyance system cleaning or related functions. If these costs are intermingled with inspection-related costs, please estimate the proportion allocated to cleaning functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

25. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

26. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

27. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

28. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

29. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

30. **Note 7 (Source of Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

Tab E. Contractor Costs

31. **Note 17 (Contractor Costs)**. Please allocate a portion of the cost associated with conveyance system inspections and a portion with conveyance system cleaning functions. If these costs are intermingled, please estimate the proportion allocated to each, and describe the assumptions used to derive these estimates under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader categories of "Conveyance System Inspection" and "Conveyance System Cleaning." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figures in the "Source of Contract Cost Information" box .

32. **Note 18 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house inspections and cleaning. Worksheet E should describe only those supplemental activities related to contract inspection and cleaning.

33. **Note 10 (Contract Management Costs)**. Costs of managing conveyance system inspection and cleaning contracts.

34. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

35. **Note 7 (Source of Inspection and Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

36. **Note 19 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet E, contract management costs should only include those necessary to carry out the contracted conveyance system inspection and cleaning activities . Contract costs associated with in-house inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheets C and D (See Note 12).

5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
							Training Totals		**$0**		**$0**		**$0**	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

d. Vehicle and Equipment Maintenance (Note 11)

Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year

														Source of Equipment Maintenance Cost Information
1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0	
								Equipment Maintenance Totals	**$0**		**$0**		**$0**	

e. Contract Management (Note 12)

Use lines 1-5 if auto-calculating annual contract management costs for each year

														Source of Contract Management Cost Information
1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0	
								Contract Management Totals	**$0**		**$0**		**$0**	

Part 3: Non-Personnel Costs Related to Conveyance Cleaning

		FY 2007-08	FY 2008-09	FY 2009-10	Source of Non-personnel Cost Information
1	Vehicle and Equipment Maintenance (Note 14)	$0	$0	$0	
2	Fuel (Note 15)	$0	$0	$0	
3	Training Materials and Supplies (Note 10)	$0	$0	$0	
	Total	$0	$0	$0	

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$1,479	**$1,523**	**$1,569**

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 5: Cleaning Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Cleaning Results (Note 17)
Number of Cleanings	17	13	26	This time (e.g. # of inspections) is related to the same cleanings performed by the contractor. The final numbers need to be adjuste to account for this.
Unit Cost per Cleaning	$ 87.01	$ 117.19	$ 60.35	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet E: Contractor Costs and Results

Part 1: Contract Costs

		FY 2007-08		FY 2008-09		FY 2009-10	
		Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
	Contractor Costs (Note 17)						
1	Conveyance System Inspection (Note 1)	$0					
2	Conveyance System Cleaning (Note 16)		$0		$1,370		$4,690
	Supplemental In-house Costs (Note 18)						
	Personnel Costs						
1	Reporting (Note 8)	$0	$0		$0		$0
2	Contract Management (Note 19)	$0	$0	$0		$0	$0
3	Employee and Vendor Training (Note 10)	$0		$0	$0	$0	$0
4	14)	$0					
	Non-personnel Costs						
1	14)	$0	$0	$0	$0	$0	$0
2	Fuel (Note 15)	$0	$0	$0	$0	$0	$0
3	Training Materials and Supplies (Note 10)	$0	$0	$0	$0	$0	$0
	Total Contract Costs	**$0**	**$0**	**$0**	**$1,370**	**$0**	**$4,690**

Source of Contract Cost Information (Note 6)

Invoices were used to develop the contractor's costs. Invoices for FY 07-08 could not be located - this essentially nullifies 07-08 cleaning costs for the survey.

Part 2: Inspection and Cleaning Results

	FY 2007-08		FY 2008-09		FY 2009-10	
Inspections	Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
Number of Inspections						
Unit Cost per Inspection	#DIV/0!		#DIV/0!		#DIV/0!	
Cleanings						
Number of Cleanings		17		13		26
Unit Cost per Cleaning		$ -		$ 105.38		$ 180.38

Source of Inspection and Cleaning Results (Note 7)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate inspection and cleaning results.

Note: Only report statistics for catch basins and inlets. Do not include inspections or cleaning of open channels.

Activity	Comment
In-house non-personnel fuel	No fuel, maintenance costs.
Contract # of cleanings	# of contract cleaning the same as in-house. Is this correct? For FY 07/08 there are no contract costs.

General Explanation and Instructions for the Completion of **"Conveyance System Inspection and Cleaning - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.

3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.

4. **Costs Not Included**. This RRM survey does not include the following costs: (1) reimbursable costs for parking signage and enforcement, which will be claimed as actual costs, (2) vehicle and equpiment costs, which will be claimed as actual costs, and (3) costs of materials disposal, which are not reimbursable because they were required under the 2001 permit.

5. **Exclusion of Open Channels**. This RRM survey addresses only "catch basins and inlets"; it does not include costs associated with include the inspection or maintenance of open channels, which will be claimed as actual costs. Results for any facilities considered to be within the category of "catch basins and inlets" should be included in your response.

6. **Inclusion of "First" Inspections and Cleanings**. Although actual claims may not include the "first" annual inspection and cleaning of each catch basin and inlet (these were required in the 2001 permit), your survey results should count these activities. The purpose of the survey is to quantify the typical cost of these activities on a unit basis. It is therefore simpler to include all inspections and cleanings in the survey, and ensures a larger sample size.

7. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

8. Based on the information you input in Worksheet C (in-house inspection costs), Worksheet D (In-house cleaning costs), and Worksheet E (Contractor Costs), the Tab B. 2.A. (Cost Summary) spreadsheet will auto-calculate.
9. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Inspection Costs

10. **Note 1 (Conveyance System Inspection and Related Costs).** Please report only the portion of costs allocated to conveyance system inspection or related functions. If these costs are intermingled with cleaning-related costs, please estimate the proportion allocated to inspection functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

11. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

12. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

13. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

14. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

15. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

16. **Note 7 (Source of Inspection Results)**. Please indicate the documents and assumptions used for reported costs.

17. **Note 8 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.D. of the Copermittees' revised Parameters and Guidelines (11/15/10).

18. **Note 9 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

19. **Note 10 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement conveyance system inspection and cleaning and related functions during the life of the Permit.

20. **Note 11 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.

21. **Note 12 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheets C and D, contract management costs should only include those necessary to carry out the Copermittees' in-house conveyance system inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor inspection and cleaning activities are included in Worksheet E (See Note 19).

22. **Note 14 (Vehicle and Equipment Maintenance)**. Annual maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain vehicles, equipment, and supplies.

23. **Note 15 (Fuel)**. The actual cost of fuel necessary to run the conveyance system inspection and cleaning equipment and equipment used to transport collected materials.

Tab D. In-house Cleaning Costs

24. **Note 16 (Conveyance System Cleaning Operations and Related Costs)**. Please report only the portion of costs allocated to conveyance system cleaning or related functions. If these costs are intermingled with inspection-related costs, please estimate the proportion allocated to cleaning functions, and describe the assumptions used to derive this estimate under "Source of Information" (see Note 6)

25. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated inspection functions.

26. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.

27. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.

28. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.

29. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

30. **Note 7 (Source of Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

Tab E. Contractor Costs

31. **Note 17 (Contractor Costs)**. Please allocate a portion of the cost associated with conveyance system inspections and a portion with conveyance system cleaning functions. If these costs are intermingled, please estimate the proportion allocated to each, and describe the assumptions used to derive these estimates under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader categories of "Conveyance System Inspection" and "Conveyance System Cleaning." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figures in the "Source of Contract Cost Information" box .

32. **Note 18 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house inspections and cleaning. Worksheet E should describe only those supplemental activities related to contract inspection and cleaning.

33. **Note 10 (Contract Management Costs)**. Costs of managing conveyance system inspection and cleaning contracts.

34. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.

35. **Note 7 (Source of Inspection and Cleaning Results)**. Please indicate the documents and assumptions used to derive the reported values.

36. **Note 19 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet E, contract management costs should only include those necessary to carry out the contracted conveyance system inspection and cleaning activities . Contract costs associated with in-house inspection and cleaning activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheets C and D (See Note 12).

Inspection Results						
a. In-house Results						
Number of Inspections	82		269		424	
Unit Cost per Inspection	**$29.77**		**$52.10**		**$41.75**	
b. Contract Results						
Number of Inspections	**450**		**450**		**450**	
Unit Cost per Inspection	**$0.00**		**$0.02**		**$0.02**	
c. Combined Results						
Number of Inspections	**532**		**719**		**874**	
Unit Cost per Inspection	**$4.59**		**$19.50**		**$20.26**	
Cleaning Results						
a. In-house Results						
Number of Cleanings		263		969		55
Unit Cost per Cleaning		**$124.46**		**$120.49**		**$1,561.56**
b. Contract Results						
Number of Cleanings		**250**		**225**		**200**
Unit Cost per Cleaning		**$0.02**		**$0.03**		**$0.02**
c. Combined Results						
Number of Cleanings		**513**		**1194**		**255**
Unit Cost per Cleaning		**$63.82**		**$97.79**		**$336.82**

Worksheet C: In-house Conveyance System Inspection Costs and Results

	Annualized FY 2007-08 Salary Information							Personnel Cost Calculations						
								FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2009-10 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to inspections	Annual cost for inspections	% of time dedicated to inspections	Annual cost for inspections	% of time dedicated to inspections	Annual cost for inspections	Source of Information (Note 6)
Part 1: Conveyance System Inspection Costs (Note 1)														
	Use lines 1-20 if auto-calculating annual inspection costs for each year													
1	Enter Name	Maintenance Worker III	1	$53,235	30.4	10	$74,742	0.817	$611	4.38	$3,372	5.38	$4,266	
2	Multiple	Maintenance Worker II	1	$45,986	31.8	10	$65,208	0.817	$533	4.38	$2,942	5.38	$3,722	
3	Multiple	Maintenance Worker I	1	$39,725	33.3	10	$56,926	0.817	$465	4.38	$2,568	5.38	$3,249	
4	Multiple	Public Works Supervisor	1	$70,386	28.1	10	$97,203	0.817	$794	4.38	$4,385	5.38	$5,548	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
7	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
8	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
9	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
10	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
11	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
12	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
13	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
14	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
15	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
16	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
17	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
18	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
19	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
20	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
21	Use line 21 if inserting total inspection costs for each year								$0		$0		$0	
								TOTALS	$2,403		$13,267		$16,785	

Source of Inspection Cost Information
Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Part 2: Other Personnel Costs Related to Conveyance System Inspections (Note 1)

	Annualized FY 2007-08 Salary Information							FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2008-09 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	Source of Information (Note 6)
	a. Reporting (Note 8)													
	Use lines 1-5 to auto-calculate annual reporting costs for each year													**Source of Reporting Cost Information**
1	Enter Name	Public Works Supervisor	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Maintenance Worker III	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Maintenance Worker II	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Maintenance Worker I	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 to insert total reporting costs for each year								$0		$0		$0	
							Reporting Totals		**$0**		**$0**		**$0**	
	b. Supervision and Management (Note 9)													
	Use lines 1-5 if auto-calculating annual supervision and management costs for each year													**Source of Supervision & Management Cost Information**
1	Enter Name	Public Works Supervisor	1	$0	0	10	$0	10	$0	10	$0	10	$0	Total supervisory time with Storm Drain Maintenance Crew is 25% of PW Supervisor's Time, estimated that 10% total related to inspections.
2	Multiple	Maintenance Worker III	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total supervision and management costs for each year								$0		$0		$0	
							Supervision and Management Totals		**$0**		**$0**		**$0**	
	c. Employee and Vendor Training (Note 10)													
	Use lines 1-5 if auto-calculating annual training costs for each year													**Source of Training Cost Information**
1	Enter Name	Maintenance Worker III	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Maintenance Worker II	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Maintenance Worker II	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Maintenance Worker II	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Public Works Supervisor	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
							Training Totals		**$0**		**$0**		**$0**	
	d. Vehicle and Equipment Maintenance (Note 11)													
	Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year													**Source of Equipment Maintenance Cost Information**
1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	cost information. Also use this space to document any assumptions used to calculate costs.
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0	
								Equipment Maintenance Totals	**$0**		**$0**		**$0**	

e. Contract Management (Note 12)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	**Source of Contract Management Cost Information** Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0	
								Contract Management Totals	**$0**		**$0**		**$0**	

Part 3: Non-Personnel Costs Related to Conveyance System Inspections (Note 1)

		FY 2007-08	FY 2008-09	FY 2009-10
1	Vehicle and Equipment Maintenance (Note 14)	$8	$254	$312
2	Fuel (Note 15)	$29	$484	$596
3	Training Materials and Supplies (Note 10)	$2	$9	$11
	Total	$39	$747	$919

Source of Non-personnel Cost Information

Describe source of non-personnel cost information. Also use this space to document any assumptions used to determine non-personnel costs.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$2,441	**$14,014**	**$17,704**

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet C: In-house Conveyance System Inspection Costs and Results

Part 5: Inspection Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Inspection Results (Note 7)
Number of Inspections	82	269	424	Identify the source of inspection results. Also use this space to document any assumptions used to calculate inspection results.
Unit Cost per Inspection	$ 29.77	$ 52.10	$ 41.75	

234

Note: Only report statistics for catch basins and inlets. Do not include inspections of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

	Annualized FY 2007-08 Salary Information							Personnel Cost Calculations						
								FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2009-10 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to inspections	Annual cost for cleaning	% of time dedicated to inspections	Annual cost for cleaning	% of time dedicated to inspections	Annual cost for cleaning	Source of Information (Note 6)

Part 1: Conveyance System Cleaning Operations Costs (Note 16)

Use lines 1-20 if auto-calculating annual inspection costs for each year

1	Enter Name	Maintenance Worker III	1	$53,235	30.4	10	$74,742	10.52	$7,863	36.49	$28,092	26.1	$20,696	
2	Multiple	Maintenance Worker II	1	$45,986	31.8	10	$65,208	10.52	$6,860	36.49	$24,508	26.1	$18,056	
3	Enter Name	Maintenance Worker I	1	$39,725	33.3	10	$56,926	10.52	$5,989	36.49	$21,395	26.1	$15,762	
4	Enter Name	Public Works Supervisor	1	$70,386	28.1	10	$97,203	10.52	$10,226	36.49	$36,533	26.1	$26,915	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
7	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
8	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
9	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
10	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
11	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
12	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
13	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
14	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
15	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
16	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
17	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
18	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
19	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
20	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
21	Use line 21 if inserting total inspection costs for each year								$0		$0		$0	
								TOTALS	$30,937		$110,529		$81,429	

Source of Cleaning Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 2: Other Personnel Costs Related to Conveyance System Cleaning (Note 16)

	Annualized FY 2007-08 Salary Information							Costs		Costs		Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	Source of Information (Note 6)
	a. Reporting (Note 8)													
	Use lines 1-5 to auto-calculate annual reporting costs for each year													**Source of Reporting Cost Information**
1	Enter Name	Public Works Supervisor	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Maintenance Worker III	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 to insert total reporting costs for each year								$0		$0		$0	
							Reporting Totals		**$0**		**$0**		**$0**	
	b. Supervision and Management (Note 9)													
	Use lines 1-5 if auto-calculating annual supervision and management costs for each year													**Source of Supervision & Management Cost Information**
1	Enter Name	Public Works Supervisor	1	$0	0	10	$0	10	$0	10	$0	10	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Maintenance Worker III	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total supervision and management costs for each year								$0		$0		$0	
							Supervision and Management Totals		**$0**		**$0**		**$0**	
	c. Employee and Vendor Training (Note 10)													
	Use lines 1-5 if auto-calculating annual training costs for each year													**Source of Training Cost Information**
1	Enter Name	Public Works Supervisor	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.
2	Multiple	Maintenance Worker III	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Maintenance Worker II	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Maintenance Worker II	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Maintenance Worker II	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
							Training Totals		**$0**		**$0**		**$0**	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

d. Vehicle and Equipment Maintenance (Note 11)

Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year

1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0
								Equipment Maintenance Totals	**$0**		**$0**		**$0**

Source of Equipment Maintenance Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

e. Contract Management (Note 12)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0
								Contract Management Totals	**$0**		**$0**		**$0**

Source of Contract Management Cost Information

Describe source of salary and personnel cost information. Also use this space to document any assumptions used to calculate costs.

Part 3: Non-Personnel Costs Related to Conveyance Cleaning

		FY 2007-08	FY 2008-09	FY 2009-10
1	Vehicle and Equipment Maintenance (Note 14)	$610	$2,117	$1,514
2	Fuel (Note 15)	$1,165	$4,041	$2,890
3	Training Materials and Supplies (Note 10)	$21	$73	$52
	Total	$1,796	$6,231	$4,457

Source of Non-personnel Cost Information

Describe source of non-personnel cost information. Also use this space to document any assumptions used to determine non-personnel costs.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$32,733	**$116,760**	**$85,886**

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet D: In-house Conveyance System Cleaning Costs and Results

Part 5: Cleaning Results

	FY 2007-08	FY 2008-09	FY 2009-10	Source of Cleaning Results (Note 17)
Number of Cleanings	263	969	55	Identify the source of inspection results. Also use this space to document any assumptions used to calculate cleaning results.
Unit Cost per Cleaning	$ 124.46	$ 120.49	$ 1,561.56	

Note: Only report statistics for catch basins and inlets. Do not include cleaning of open channels.

Worksheet E: Contractor Costs and Results

Part 1: Contract Costs

		FY 2007-08		FY 2008-09		FY 2009-10	
		Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
	Contractor Costs (Note 17)						
1	Conveyance System Inspection (Note 1)	$0		$2		$2	
2	Conveyance System Cleaning (Note 16)		$0		$0		$0
	Supplemental In-house Costs (Note 18)						
	Personnel Costs						
1	Reporting (Note 8)	$0	$0	$2	$0	$2	$0
2	Contract Management (Note 19)	$0	$0	$0	$3	$0	$0
3	Employee and Vendor Training (Note 10)	$0	$1	$0	$0	$0	$0
4	14)	$0	$2	$2	$2	$2	$2
	Non-personnel Costs						
1	14)	$0	$0	$0	$0	$0	$0
2	Fuel (Note 15)	$0	$0	$1	$0	$0	$1
3	Training Materials and Supplies (Note 10)	$1	$1	$0	$1	$1	$0
	Total Contract Costs	$1	$4	$7	$6	$7	$3

Source of Contract Cost Information (Note 6)

Describe source of contract cost information. Also use this space to document any assumptions used to calculate costs.

Part 2: Inspection and Cleaning Results

	FY 2007-08		FY 2008-09		FY 2009-10	
	Inspections	Cleanings	Inspections	Cleanings	Inspections	Cleanings
Inspections						
Number of Inspections	450		450		450	
Unit Cost per Inspection	$ 0.00		$ 0.02		$ 0.02	
Cleanings						
Number of Cleanings		250		225		200
Unit Cost per Cleaning		$ 0.02		$ 0.03		$ 0.02

Source of Inspection and Cleaning Results (Note 7)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate inspection and cleaning results.

Note: Only report statistics for catch basins and inlets. Do not include inspections or cleaning of open channels.

Activity	Comment
General Information	No contact information
In-house Personnel Reporting	Please indicate reporting cost, if any.
B. Contractor Costs	Errors: All contract costs should be removed here and below. See Schedule E.
Contract # of inspections	appears numbers not added, looks like default from template
Contract # of cleanings	appears numbers not added, looks like default from template
In-house # of cleanings	Please explain the large drop in the number of cleanings without a large decrease in costs for FY 09/10

General Explanation and Instructions for the Completion of **"Street Sweeping - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.
3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.
4. **Costs Not Included**. This RRM survey does not include the costs of program development, parking enforcement and street sweeping equipment which may be claimed as actual costs.
5. **Exclusion of Unimproved Streets and Roads**. This RRM survey addresses only costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. Costs asociated with any facilities that are not curbed or guttered should not be included in your response.

6. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., materials disposal, fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

7. Based on the information you input in Worksheet C (In-house sweeping costs) and Worksheet D (Contractor Sweeping Costs), all required cost and sweeping data will autofill in Worksheet B (Cost Summary).
8. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Sweeping Costs

9. **Note 1 (Street Sweeping Operations Costs).** Please report the only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Information" (see Note 6).

10. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated sweeping functions.
11. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
12. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
13. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
14. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
15. **Note 7 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.B. of the Copermittees' revised Parameters and Guidelines (11/15/10).
16. **Note 8 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

17. **Note 9 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement street sweeping and related functions during the life of the Permit.
18. **Note 10 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
19. **Note 11 (Contract Management)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet C, contract management costs should only include those necessary to carry out the Copermittees' in-house street sweeping activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor sweeping activities are included in Worksheet D (See Note 16).

20. **Note 12 (Materials Disposal)**. Costs to dispose of material collected from street sweeping, including the removal of materials from street sweeping vehicles, and the transport, storage, and disposal of these materials and the cost of operating, renting, leasing, or contracting for facilities to store or dispose of collected materials, and all applicable disposal fees or charges.
21. **Note 13 (Fuel)**. The actual cost of fuel necessary to run the street sweeping equipment and equipment used to transport and dispose of collected materials.

Tab D. Contractor Sweeping Costs

22. **Note 14 (Contractor Costs)**. Please report only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader category of "Street Sweeping Operations Costs." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figure in the "Source of Contract Cost Information" box .

23. **Note 15 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house sweeping. Worksheet D should describe only those supplemental activities related to contract sweeping. Notes 7-9 and 10-13 are the same as those found in Tab C. (above).

24. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs and results. Also document any assumptions used to derive the reported values.

25. **Note 16 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet D, contract management costs should only include those necessary to carry out the contracted street sweeping activities. Contract costs associated with in-house sweeping activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheet D (See Note 11).

12	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0	
13	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0	
14	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0	
15	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0	
16	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0	
17	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0	
18	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0	
19	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0	
20	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0	
21	Use line 21 if inserting total inspection costs for each year								$0		$0		$0	
								TOTALS	$0		$0		$0	

Source of Sweeping Cost Information

Describe source of salary and personnel cost information.

Worksheet C: In-house Sweeping Costs and Results

Part 2: Other Personnel Costs Related to Street Sweeping

	Annualized FY 2007-08 Salary Information							FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2008-09 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	Source of Information (Note 6)
	a. Reporting (Note 7)													
	Use lines 1-5 to auto-calculate annual reporting costs for each year													**Source of Reporting Cost Information**
1	Enter Name	Analyst (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information.
2	Multiple	Enter Job Classification	4	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 to insert total reporting costs for each year								$0		$0		$0	
							Reporting Totals		**$0**		**$0**		**$0**	
	b. Supervision and Management (Note 8)													
	Use lines 1-5 if auto-calculating annual supervision and management costs for each year													**Source of Supervision & Management Cost Information**
1	Enter Name	Program Mgr (example)	1	$0	0	0	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information.
2	Multiple	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total supervision and management costs for each year								$0		$0		$0	
							Supervision and Management Totals		**$0**		**$0**		**$0**	
	c. Employee and Vendor Training (Note 9)													
	Use lines 1-5 if auto-calculating annual training costs for each year													**Source of Training Cost Information**
1	Enter Name	Supervisor (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
							Training Totals		**$0**		**$0**		**$0**	

Worksheet C: In-house Sweeping Costs and Results

d. Equipment Maintenance (Note 10)

Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year

1	Enter Name	Equip. Operator (example)	1	$0	0	0	$0	0	$0	0	$0	0	$0
2	Multiple	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0
								Equipment Maintenance Totals	**$0**		**$0**		**$0**

Source of Equipment Maintenance Cost Information

Describe source of salary and personnel cost information.

e. Contract Management (Note 11)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Enter Name	Analyst II (example)	1	$0	0	0	$0	0	$0	0	$0	0	$0
2	Multiple	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	0	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0
								Contract Management Totals	**$0**		**$0**		**$0**

Information

Describe source of salary and personnel cost information.

Part 3: Non-Personnel Costs Related to Street Sweeping

		FY 2007-08	FY 2008-09	FY 2009-10
1	Equipment Maintenance (Note 10)	$0	$0	$0
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total	$0	$0	$0

Source of Non-personnel Cost Information

Describe source of non-personnel cost information.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$0	**$0**	**$0**

Part 5: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	0	0	0
Unit Cost per Mile Swept	#DIV/0!	#DIV/0!	#DIV/0!

Source of Sweeping Results

Identify the source of sweeping results.

Worksheet D: Contractor Street Sweeping Costs and Results

Part 1: Contract Costs

		FY 2007-08	FY 2008-09	FY 2009-10
	Contractor Costs (Note 14)			
	Street Sweeping Operations Costs	$5,760	$5,760	$5,760
	Supplemental In-house Costs (Note 15)			
	Personnel Costs			
1	Reporting (Note 7)	$0	$0	$0
2	Contract Management (Note 16)	$0	$0	$0
3	Employee and Vendor Training (Note 9)	$0	$0	$0
4	Equipment Maintenance (Note 10)	$0	$0	$0
	Non-personnel Costs			
1	Equipment Maintenance (Note 10)	$0	$0	$0
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total Contract Costs	**$5,760**	**$5,760**	**$5,760**

Source of Contract Cost Information (Note 6)

The contractor costs are based on the additional 40 miles that were added to the City's inventory between 2008 and 2010. The rate per mile is $12.

Note -- The cost seems low. Was the contract charge for street sweeping apporximated ? If so, how.

Part 2: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	480	480	480
Unit Cost per Mile Swept	$ 12.00	$ 12.00	$ 12.00

Source of Street Sweeping Results (Note 6)

The contractor costs are based on the additional 40 miles that were added to the City's inventory between 2008 and 2010. The rate per mile is $12.

Note -- Based on the source comment should the milage for 2007-08 reflect the ful addition of 40 miles?

General Explanation and Instructions for the Completion of **"Street Sweeping - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.
3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.
4. **Costs Not Included**. This RRM survey does not include the costs of program development, parking enforcement and street sweeping equipment which may be claimed as actual costs.
5. **Exclusion of Unimproved Streets and Roads**. This RRM survey addresses only costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. Costs asociated with any facilities that are not curbed or guttered should not be included in your response.

6. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., materials disposal, fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

7. Based on the information you input in Worksheet C (In-house sweeping costs) and Worksheet D (Contractor Sweeping Costs), all required cost and sweeping data will autofill in Worksheet B (Cost Summary).
8. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Sweeping Costs

9. **Note 1 (Street Sweeping Operations Costs).** Please report the only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Information" (see Note 6).

10. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated sweeping functions.
11. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
12. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
13. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
14. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
15. **Note 7 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.B. of the Copermittees' revised Parameters and Guidelines (11/15/10).
16. **Note 8 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

17. **Note 9 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement street sweeping and related functions during the life of the Permit.
18. **Note 10 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
19. **Note 11 (Contract Management)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet C, contract management costs should only include those necessary to carry out the Copermittees' in-house street sweeping activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor sweeping activities are included in Worksheet D (See Note 16).

20. **Note 12 (Materials Disposal)**. Costs to dispose of material collected from street sweeping, including the removal of materials from street sweeping vehicles, and the transport, storage, and disposal of these materials and the cost of operating, renting, leasing, or contracting for facilities to store or dispose of collected materials, and all applicable disposal fees or charges.
21. **Note 13 (Fuel)**. The actual cost of fuel necessary to run the street sweeping equipment and equipment used to transport and dispose of collected materials.

Tab D. Contractor Sweeping Costs

22. **Note 14 (Contractor Costs)**. Please report only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader category of "Street Sweeping Operations Costs." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figure in the "Source of Contract Cost Information" box .

23. **Note 15 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house sweeping. Worksheet D should describe only those supplemental activities related to contract sweeping. Notes 7-9 and 10-13 are the same as those found in Tab C. (above).

24. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs and results. Also document any assumptions used to derive the reported values.

25. **Note 16 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet D, contract management costs should only include those necessary to carry out the contracted street sweeping activities. Contract costs associated with in-house sweeping activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheet D (See Note 11).

Worksheet B: Unit Cost Summary Sheet

19	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
20	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
21	Use line 21 if inserting total inspection costs for each year								$0		$0		$0	
								TOTALS	$0		$0		$0	

Source of Sweeping Cost Information

Describe source of salary and personnel cost information.

Worksheet C: In-house Sweeping Costs and Results

Part 2: Other Personnel Costs Related to Street Sweeping

	Annualized FY 2007-08 Salary Information							FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2008-09 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	Source of Information (Note 6)
	a. Reporting (Note 7)													
	Use lines 1-5 to auto-calculate annual reporting costs for each year													**Source of Reporting Cost Information**
1	Enter Name	Analyst (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information.
2	Multiple	Enter Job Classification	4	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 to insert total reporting costs for each year								$0		$0		$0	
							Reporting Totals		**$0**		**$0**		**$0**	
	b. Supervision and Management (Note 8)													
	Use lines 1-5 if auto-calculating annual supervision and management costs for each year													**Source of Supervision & Management Cost Information**
1	Enter Name	Program Mgr (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total supervision and management costs for each year								$0		$0		$0	
							Supervision and Management Totals		**$0**		**$0**		**$0**	
	c. Employee and Vendor Training (Note 9)													
	Use lines 1-5 if auto-calculating annual training costs for each year													**Source of Training Cost Information**
1	Enter Name	Supervisor (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
							Training Totals		**$0**		**$0**		**$0**	

Worksheet C: In-house Sweeping Costs and Results

d. Equipment Maintenance (Note 10)

Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year

1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0	
								Equipment Maintenance Totals	**$0**		**$0**		**$0**	

Source of Equipment Maintenance Cost Information

Describe source of salary and personnel cost information.

e. Contract Management (Note 11)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0	
								Contract Management Totals	**$0**		**$0**		**$0**	

Information

Describe source of salary and personnel cost information.

Part 3: Non-Personnel Costs Related to Street Sweeping

		FY 2007-08	FY 2008-09	FY 2009-10
1	Equipment Maintenance (Note 10)	$0	$0	$0
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total	$0	$0	$0

Source of Non-personnel Cost Information

Describe source of non-personnel cost information.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$0	**$0**	**$0**

Part 5: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	1	1	1
Unit Cost per Mile Swept	$ -	$ -	$ -

Source of Sweeping Results

Identify the source of sweeping results.

Worksheet D: Contractor Street Sweeping Costs and Results

Part 1: Contract Costs

		FY 2007-08	FY 2008-09	FY 2009-10
	Contractor Costs (Note 14)			
	Street Sweeping Operations Costs	$292,737	$244,824	$257,381
	Supplemental In-house Costs (Note 15)			
	Personnel Costs			
1	Reporting (Note 7)	$16,097	$16,097	$16,097
2	Contract Management (Note 16)	$36,515	$36,515	$36,515
3	Employee and Vendor Training (Note 9)	$0	$0	$0
4	Equipment Maintenance (Note 10)	$0	$0	$0
	Non-personnel Costs			
1	Equipment Maintenance (Note 10)	$0	$0	$0
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total Contract Costs	**$345,349**	**$297,436**	**$309,993**

Note -- Why did contract costs drop 16.4% from 2007-08 to 2008-09 ?

Note -- % FTE personnel and annual salary to be obtained

Note -- % FTE personnel and annual salary to be obtained

Source of Contract Cost Information (Note 6)

JURMP Annual Report Fiscal Section, personnel data from City of Chula Vista Public Works Manager

Part 2: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	18,000	17,040	18,179
Unit Cost per Mile Swept	$ 19.19	$ 17.46	$ 17.05

Source of Street Sweeping Results (Note 6)

Data from JURMP annual reports and contractor reports

General Explanation and Instructions for the Completion of **"Street Sweeping - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.
3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.
4. **Costs Not Included**. This RRM survey does not include the costs of program development, parking enforcement and street sweeping equipment which may be claimed as actual costs.
5. **Exclusion of Unimproved Streets and Roads**. This RRM survey addresses only costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. Costs asociated with any facilities that are not curbed or guttered should not be included in your response.

6. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., materials disposal, fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

7. Based on the information you input in Worksheet C (In-house sweeping costs) and Worksheet D (Contractor Sweeping Costs), all required cost and sweeping data will autofill in Worksheet B (Cost Summary).
8. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Sweeping Costs

9. **Note 1 (Street Sweeping Operations Costs).** Please report the only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Information" (see Note 6).

10. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated sweeping functions.
11. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
12. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
13. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
14. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
15. **Note 7 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.B. of the Copermittees' revised Parameters and Guidelines (11/15/10).
16. **Note 8 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

17. **Note 9 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement street sweeping and related functions during the life of the Permit.
18. **Note 10 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
19. **Note 11 (Contract Management)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet C, contract management costs should only include those necessary to carry out the Copermittees' in-house street sweeping activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor sweeping activities are included in Worksheet D (See Note 16).

20. **Note 12 (Materials Disposal)**. Costs to dispose of material collected from street sweeping, including the removal of materials from street sweeping vehicles, and the transport, storage, and disposal of these materials and the cost of operating, renting, leasing, or contracting for facilities to store or dispose of collected materials, and all applicable disposal fees or charges.
21. **Note 13 (Fuel)**. The actual cost of fuel necessary to run the street sweeping equipment and equipment used to transport and dispose of collected materials.

Tab D. Contractor Sweeping Costs

22. **Note 14 (Contractor Costs)**. Please report only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader category of "Street Sweeping Operations Costs." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figure in the "Source of Contract Cost Information" box .

23. **Note 15 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house sweeping. Worksheet D should describe only those supplemental activities related to contract sweeping. Notes 7-9 and 10-13 are the same as those found in Tab C. (above).

24. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs and results. Also document any assumptions used to derive the reported values.

25. **Note 16 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet D, contract management costs should only include those necessary to carry out the contracted street sweeping activities. Contract costs associated with in-house sweeping activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheet D (See Note 11).

5											$0		$0
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0
								Equipment Maintenance Totals	**$10,108**		**$11,121**		**$15,067**

Source of Equipment Maintenance Cost Information

Describe source of salary and personnel cost information.

e. Contract Management (Note 11)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Kim Godby	Services Supervisor	1	$84,328	63	10	$145,887	0	$0	0	$0	2	$3,095
2	Manny Gonzales	Master Mechanic	1	$60,003	67	10	$106,205	0	$0	0	$0	2	$2,253
3							$0	0	$0	0	$0	1	$0
4							$0	0	$0	0	$0	1	$0
5				$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0
								Contract Management Totals	**$0**		**$0**		**$5,349**

Information

Only contract management costs were associated with time used to procure a replacement sweeper in the 2009-2010 period. % of time dedicated to function were determined based on employee estimates of time required for activity

Part 3: Non-Personnel Costs Related to Street Sweeping

		FY 2007-08	FY 2008-09	FY 2009-10
1	Equipment Maintenance (Note 10)	$18,028	$25,838	$20,173
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$10,653	$7,875	$7,479
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total	$28,681	$33,713	$27,652

Source of Non-personnel Cost Information

Information came from the City of Coronado Fuel Tracking System for fuel, the streets division vehicle maintance account (only sweeper items were included). City does not incure any non-personnel cost for material disposal or trainning

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$124,214	**$132,822**	**$138,695**

Part 5: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	8,095	7,851	7,572
Unit Cost per Mile Swept	$ 15.34	$ 16.92	$ 18.32

Source of Sweeping Results

Information obtained from City of Coronado's Daily Sweeper Logs

Worksheet D: Contractor Street Sweeping Costs and Results

Part 1: Contract Costs

		FY 2007-08	FY 2008-09	FY 2009-10
	Contractor Costs (Note 14)			
	Street Sweeping Operations Costs	$0	$0	$0

3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total Contract Costs	**$0**	**$0**	**$0**

Source of Contract Cost Information (Note 6)

All street sweeping is done in-house

Part 2: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	**8,095**	**7,851**	**7,572**
Unit Cost per Mile Swept	$ -	$ -	$ -

Error: Should be zero as there is zero cost reported…

Source of Street Sweeping Results (Note 6)

All street sweeping is done in-house

General Explanation and Instructions for the Completion of **"Street Sweeping - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.
3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.
4. **Costs Not Included**. This RRM survey does not include the costs of program development, parking enforcement and street sweeping equipment which may be claimed as actual costs.
5. **Exclusion of Unimproved Streets and Roads**. This RRM survey addresses only costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. Costs asociated with any facilities that are not curbed or guttered should not be included in your response.

6. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., materials disposal, fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

7. Based on the information you input in Worksheet C (In-house sweeping costs) and Worksheet D (Contractor Sweeping Costs), all required cost and sweeping data will autofill in Worksheet B (Cost Summary).
8. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Sweeping Costs

9. **Note 1 (Street Sweeping Operations Costs).** Please report the only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Information" (see Note 6).

10. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated sweeping functions.
11. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
12. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
13. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
14. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
15. **Note 7 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.B. of the Copermittees' revised Parameters and Guidelines (11/15/10).
16. **Note 8 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

17. **Note 9 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement street sweeping and related functions during the life of the Permit.
18. **Note 10 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
19. **Note 11 (Contract Management)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet C, contract management costs should only include those necessary to carry out the Copermittees' in-house street sweeping activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor sweeping activities are included in Worksheet D (See Note 16).

20. **Note 12 (Materials Disposal)**. Costs to dispose of material collected from street sweeping, including the removal of materials from street sweeping vehicles, and the transport, storage, and disposal of these materials and the cost of operating, renting, leasing, or contracting for facilities to store or dispose of collected materials, and all applicable disposal fees or charges.
21. **Note 13 (Fuel)**. The actual cost of fuel necessary to run the street sweeping equipment and equipment used to transport and dispose of collected materials.

Tab D. Contractor Sweeping Costs

22. **Note 14 (Contractor Costs)**. Please report only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader category of "Street Sweeping Operations Costs." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figure in the "Source of Contract Cost Information" box .

23. **Note 15 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house sweeping. Worksheet D should describe only those supplemental activities related to contract sweeping. Notes 7-9 and 10-13 are the same as those found in Tab C. (above).

24. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs and results. Also document any assumptions used to derive the reported values.

25. **Note 16 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet D, contract management costs should only include those necessary to carry out the contracted street sweeping activities. Contract costs associated with in-house sweeping activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheet D (See Note 11).

Information

Part 3: Non-Personnel Costs Related to Street Sweeping

		FY 2007-08	FY 2008-09	FY 2009-10
1	Equipment Maintenance (Note 10)	$11,452	$6,535	$12,994
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$2,142	$1,914	$1,611
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total	$13,594	$8,449	$14,605

Source of Non-personnel Cost Information

The City has entered into a franchise agreement with its waste hauler - the disposal of the street sweepings material is incorporated into the franchise agreement and therefore there are no identifiable costs for disposal available at this time. Please consider this when analyzing the survey form.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$25,912	**$22,600**	**$27,840**

Part 5: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	1,168	1,310	1,156
Unit Cost per Mile Swept	$ 22.19	$ 17.25	$ 24.08

Source of Sweeping Results

Identify the source of sweeping results.

Worksheet D: Contractor Street Sweeping Costs and Results

Part 1: Contract Costs

		FY 2007-08	FY 2008-09	FY 2009-10
	Contractor Costs (Note 14)			
	Street Sweeping Operations Costs	$0	$0	$0
	Supplemental In-house Costs (Note 15)			
	Personnel Costs			
1	Reporting (Note 7)	$0	$0	$0
2	Contract Management (Note 16)	$0	$0	$0
3	Employee and Vendor Training (Note 9)	$0	$0	$0
4	Equipment Maintenance (Note 10)	$0	$0	$0
	Non-personnel Costs			
1	Equipment Maintenance (Note 10)	$0	$0	$0
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total Contract Costs	**$0**	**$0**	**$0**

Source of Contract Cost Information (Note 6)

Describe source of contract cost information.

Part 2: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	2	2	2
Unit Cost per Mile Swept	$ -	$ -	$ -

Error: Should be zero miles as there is zero costs

Source of Street Sweeping Results (Note 6)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate street sweeping results.

General Explanation and Instructions for the Completion of **"Street Sweeping - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.
3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.
4. **Costs Not Included**. This RRM survey does not include the costs of program development, parking enforcement and street sweeping equipment which may be claimed as actual costs.
5. **Exclusion of Unimproved Streets and Roads**. This RRM survey addresses only costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. Costs asociated with any facilities that are not curbed or guttered should not be included in your response.

6. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., materials disposal, fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

7. Based on the information you input in Worksheet C (In-house sweeping costs) and Worksheet D (Contractor Sweeping Costs), all required cost and sweeping data will autofill in Worksheet B (Cost Summary).
8. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Sweeping Costs

9. **Note 1 (Street Sweeping Operations Costs).** Please report the only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Information" (see Note 6).

10. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated sweeping functions.
11. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
12. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
13. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
14. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
15. **Note 7 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.B. of the Copermittees' revised Parameters and Guidelines (11/15/10).
16. **Note 8 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

17. **Note 9 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement street sweeping and related functions during the life of the Permit.
18. **Note 10 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
19. **Note 11 (Contract Management)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet C, contract management costs should only include those necessary to carry out the Copermittees' in-house street sweeping activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor sweeping activities are included in Worksheet D (See Note 16).

20. **Note 12 (Materials Disposal)**. Costs to dispose of material collected from street sweeping, including the removal of materials from street sweeping vehicles, and the transport, storage, and disposal of these materials and the cost of operating, renting, leasing, or contracting for facilities to store or dispose of collected materials, and all applicable disposal fees or charges.
21. **Note 13 (Fuel)**. The actual cost of fuel necessary to run the street sweeping equipment and equipment used to transport and dispose of collected materials.

Tab D. Contractor Sweeping Costs

22. **Note 14 (Contractor Costs)**. Please report only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader category of "Street Sweeping Operations Costs." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figure in the "Source of Contract Cost Information" box .

23. **Note 15 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house sweeping. Worksheet D should describe only those supplemental activities related to contract sweeping. Notes 7-9 and 10-13 are the same as those found in Tab C. (above).

24. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs and results. Also document any assumptions used to derive the reported values.

25. **Note 16 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet D, contract management costs should only include those necessary to carry out the contracted street sweeping activities. Contract costs associated with in-house sweeping activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheet D (See Note 11).

6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0
								Contract Management Totals	**$0**		**$0**		**$0**

Information

Describe source of salary and personnel cost information.

Part 3: Non-Personnel Costs Related to Street Sweeping

		FY 2007-08	FY 2008-09	FY 2009-10
1	Equipment Maintenance (Note 10)	$13,142	$13,142	$13,142
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total	$13,142	$13,142	$13,142

Source of Non-personnel Cost Information

Vehicle and Equipment Maintenance costs are estimated from an operating cost of $126.37/hour per Street Sweeper. This estimate includes non-personnel costs such as maintenance (i.e. cleaning and lubricating) as well as fueling costs of equipment and vehicle. Approximately 104 operating hours were used to calculate this figure.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$57,335	**$58,660**	**$60,026**

Part 5: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	29	29	33
Unit Cost per Mile Swept	$ 1,977.06	$ 2,022.78	$ 1,818.97

Source of Sweeping Results

The numbers of miles in this Part of the survey was derived from the number of "special sweeps" only. Each special sweep has an average length of 0.5 miles

Worksheet D: Contractor Street Sweeping Costs and Results

Part 1: Contract Costs

Miles Swept	-	-	-
Unit Cost per Mile Swept	#DIV/0!	#DIV/0!	#DIV/0!

Source of Street Sweeping Results (Note 6)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate street sweeping results.

General Explanation and Instructions for the Completion of **"Street Sweeping - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.
3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.
4. **Costs Not Included**. This RRM survey does not include the costs of program development, parking enforcement and street sweeping equipment which may be claimed as actual costs.
5. **Exclusion of Unimproved Streets and Roads**. This RRM survey addresses only costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. Costs asociated with any facilities that are not curbed or guttered should not be included in your response.

6. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., materials disposal, fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

7. Based on the information you input in Worksheet C (In-house sweeping costs) and Worksheet D (Contractor Sweeping Costs), all required cost and sweeping data will autofill in Worksheet B (Cost Summary).
8. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Sweeping Costs

9. **Note 1 (Street Sweeping Operations Costs).** Please report the only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Information" (see Note 6).

10. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated sweeping functions.
11. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
12. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
13. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
14. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
15. **Note 7 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.B. of the Copermittees' revised Parameters and Guidelines (11/15/10).
16. **Note 8 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

17. **Note 9 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement street sweeping and related functions during the life of the Permit.
18. **Note 10 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
19. **Note 11 (Contract Management)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet C, contract management costs should only include those necessary to carry out the Copermittees' in-house street sweeping activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor sweeping activities are included in Worksheet D (See Note 16).

20. **Note 12 (Materials Disposal)**. Costs to dispose of material collected from street sweeping, including the removal of materials from street sweeping vehicles, and the transport, storage, and disposal of these materials and the cost of operating, renting, leasing, or contracting for facilities to store or dispose of collected materials, and all applicable disposal fees or charges.
21. **Note 13 (Fuel)**. The actual cost of fuel necessary to run the street sweeping equipment and equipment used to transport and dispose of collected materials.

Tab D. Contractor Sweeping Costs

22. **Note 14 (Contractor Costs)**. Please report only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader category of "Street Sweeping Operations Costs." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figure in the "Source of Contract Cost Information" box .

23. **Note 15 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house sweeping. Worksheet D should describe only those supplemental activities related to contract sweeping. Notes 7-9 and 10-13 are the same as those found in Tab C. (above).

24. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs and results. Also document any assumptions used to derive the reported values.

25. **Note 16 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet D, contract management costs should only include those necessary to carry out the contracted street sweeping activities. Contract costs associated with in-house sweeping activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheet D (See Note 11).

4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
							Training Totals		**$0**		**$0**		**$0**	

Worksheet C: In-house Sweeping Costs and Results

d. Equipment Maintenance (Note 10)

Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year

1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0
								Equipment Maintenance Totals	**$0**		**$0**		**$0**

Source of Equipment Maintenance Cost Information

Describe source of salary and personnel cost information.

e. Contract Management (Note 11)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0
								Contract Management Totals	**$0**		**$0**		**$0**

Information

Describe source of salary and personnel cost information.

Part 3: Non-Personnel Costs Related to Street Sweeping

		FY 2007-08	FY 2008-09	FY 2009-10
1	Equipment Maintenance (Note 10)	$0	$0	$0
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total	$0	$0	$0

Source of Non-personnel Cost Information

Describe source of non-personnel cost information.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$0	**$0**	**$0**

Part 5: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	**1**	**1**	**1**
Unit Cost per Mile Swept	$ -	$ -	$ -

Source of Sweeping Results

Identify the source of sweeping results.

Worksheet D: Contractor Street Sweeping Costs and Results

Part 1: Contract Costs

		FY 2007-08	FY 2008-09	FY 2009-10
	Contractor Costs (Note 14)			
	Street Sweeping Operations Costs	$47,691	$46,515	$44,581
	Supplemental In-house Costs (Note 15)			
	Personnel Costs			
1	Reporting (Note 7)	$4,000	$4,000	$4,000
2	Contract Management (Note 16)	$9,470	$9,780	$9,780
3	Employee and Vendor Training (Note 9)	$0	$0	$0
4	Equipment Maintenance (Note 10)	$0	$0	$0
	Non-personnel Costs			
1	Equipment Maintenance (Note 10)	$0	$0	$0
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total Contract Costs	**$61,161**	**$60,295**	**$58,361**

Source of Contract Cost Information (Note 6)

H.T.E. expenditure report.

Part 2: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	4,252	4,252	4,252
Unit Cost per Mile Swept	$ 14.38	$ 14.18	$ 13.73

Source of Street Sweeping Results (Note 6)

Contract curb mile quantities.

General Explanation and Instructions for the Completion of **"Street Sweeping - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.
3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.
4. **Costs Not Included**. This RRM survey does not include the costs of program development, parking enforcement and street sweeping equipment which may be claimed as actual costs.
5. **Exclusion of Unimproved Streets and Roads**. This RRM survey addresses only costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. Costs asociated with any facilities that are not curbed or guttered should not be included in your response.

6. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., materials disposal, fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

7. Based on the information you input in Worksheet C (In-house sweeping costs) and Worksheet D (Contractor Sweeping Costs), all required cost and sweeping data will autofill in Worksheet B (Cost Summary).
8. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Sweeping Costs

9. **Note 1 (Street Sweeping Operations Costs).** Please report the only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Information" (see Note 6).

10. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated sweeping functions.
11. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
12. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
13. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
14. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
15. **Note 7 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.B. of the Copermittees' revised Parameters and Guidelines (11/15/10).
16. **Note 8 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

17. **Note 9 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement street sweeping and related functions during the life of the Permit.
18. **Note 10 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
19. **Note 11 (Contract Management)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet C, contract management costs should only include those necessary to carry out the Copermittees' in-house street sweeping activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor sweeping activities are included in Worksheet D (See Note 16).

20. **Note 12 (Materials Disposal)**. Costs to dispose of material collected from street sweeping, including the removal of materials from street sweeping vehicles, and the transport, storage, and disposal of these materials and the cost of operating, renting, leasing, or contracting for facilities to store or dispose of collected materials, and all applicable disposal fees or charges.
21. **Note 13 (Fuel)**. The actual cost of fuel necessary to run the street sweeping equipment and equipment used to transport and dispose of collected materials.

Tab D. Contractor Sweeping Costs

22. **Note 14 (Contractor Costs)**. Please report only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader category of "Street Sweeping Operations Costs." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figure in the "Source of Contract Cost Information" box .

23. **Note 15 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house sweeping. Worksheet D should describe only those supplemental activities related to contract sweeping. Notes 7-9 and 10-13 are the same as those found in Tab C. (above).

24. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs and results. Also document any assumptions used to derive the reported values.

25. **Note 16 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet D, contract management costs should only include those necessary to carry out the contracted street sweeping activities. Contract costs associated with in-house sweeping activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheet D (See Note 11).

3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0	
								Contract Management Totals	**$1,228**		**$1,265**		**$1,303**	

Information

Part 3: Non-Personnel Costs Related to Street Sweeping

		FY 2007-08	FY 2008-09	FY 2009-10
1	Equipment Maintenance (Note 10)	$0	$0	$0
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total	$0	$0	$0

Source of Non-personnel Cost Information

Describe source of non-personnel cost information.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$270,192	**$167,136**	**$172,150**

Part 5: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	2,500	2,500	7,408
Unit Cost per Mile Swept	$ 108.08	$ 66.85	$ 23.24

Source of Sweeping Results

Identify the source of sweeping results.

Worksheet D: Contractor Street Sweeping Costs and Results

Part 1: Contract Costs

		FY 2007-08	FY 2008-09	FY 2009-10
	Contractor Costs (Note 14)			
	Street Sweeping Operations Costs	$54,900	$45,665	$46,187
	Supplemental In-house Costs (Note 15)			
	Personnel Costs			
1	Reporting (Note 7)	$9,515	$9,801	$10,095
2	Contract Management (Note 16)	$678	$698	$719
3	Employee and Vendor Training (Note 9)	$3,379	$3,481	$3,585
4	Equipment Maintenance (Note 10)	$7,842	$8,077	$8,317
	Non-personnel Costs			
1	Equipment Maintenance (Note 10)	$7,842	$8,077	$8,317
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$1,568	$1,615	$1,664
	Total Contract Costs	**$85,724**	**$77,414**	**$78,884**

Note: Subtantial costs were reported for in-house cleaning, is this a supplemental contract process?

Note: Are fuel costs included elsewhere?

Source of Contract Cost Information (Note 6)

From Copies of Contracts

Part 2: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	2,500	2,500	7,408
Unit Cost per Mile Swept	$ 34.29	$ 30.97	$ 10.65

Note: This same mileage was reported for in-house cleaning, is this a supplemental process?

Source of Street Sweeping Results (Note 6)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate street sweeping results.

General Explanation and Instructions for the Completion of **"Street Sweeping - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.
3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.
4. **Costs Not Included**. This RRM survey does not include the costs of program development, parking enforcement and street sweeping equipment which may be claimed as actual costs.
5. **Exclusion of Unimproved Streets and Roads**. This RRM survey addresses only costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. Costs asociated with any facilities that are not curbed or guttered should not be included in your response.

6. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., materials disposal, fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

7. Based on the information you input in Worksheet C (In-house sweeping costs) and Worksheet D (Contractor Sweeping Costs), all required cost and sweeping data will autofill in Worksheet B (Cost Summary).
8. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Sweeping Costs

9. **Note 1 (Street Sweeping Operations Costs).** Please report the only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Information" (see Note 6).

10. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated sweeping functions.
11. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
12. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
13. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
14. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
15. **Note 7 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.B. of the Copermittees' revised Parameters and Guidelines (11/15/10).
16. **Note 8 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

17. **Note 9 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement street sweeping and related functions during the life of the Permit.
18. **Note 10 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
19. **Note 11 (Contract Management)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet C, contract management costs should only include those necessary to carry out the Copermittees' in-house street sweeping activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor sweeping activities are included in Worksheet D (See Note 16).

20. **Note 12 (Materials Disposal)**. Costs to dispose of material collected from street sweeping, including the removal of materials from street sweeping vehicles, and the transport, storage, and disposal of these materials and the cost of operating, renting, leasing, or contracting for facilities to store or dispose of collected materials, and all applicable disposal fees or charges.
21. **Note 13 (Fuel)**. The actual cost of fuel necessary to run the street sweeping equipment and equipment used to transport and dispose of collected materials.

Tab D. Contractor Sweeping Costs

22. **Note 14 (Contractor Costs)**. Please report only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader category of "Street Sweeping Operations Costs." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figure in the "Source of Contract Cost Information" box .

23. **Note 15 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house sweeping. Worksheet D should describe only those supplemental activities related to contract sweeping. Notes 7-9 and 10-13 are the same as those found in Tab C. (above).

24. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs and results. Also document any assumptions used to derive the reported values.

25. **Note 16 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet D, contract management costs should only include those necessary to carry out the contracted street sweeping activities. Contract costs associated with in-house sweeping activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheet D (See Note 11).

21	Use line 21 if inserting total inspection costs for each year								$0		$0		$0	
								TOTALS	$0		$0		$0	

Source of Sweeping Cost Information

Describe source of salary and personnel cost information.

Worksheet C: In-house Sweeping Costs and Results

Part 2: Other Personnel Costs Related to Street Sweeping

	Annualized FY 2007-08 Salary Information							FY 2007-08 Personnel Costs		FY 2008-09 Personnel Costs		FY 2008-09 Personnel Costs		
	Staff Person (Note 2)	Job Classification	Number in Class	Annual Salary (Note 3)	Benefit rate (%) (Note 4)	Indirect cost rate %) (Note 5)	Salaries, Benefits, Indirect Totals	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	% of time dedicated to function	Annual cost of function	Source of Information (Note 6)
	a. Reporting (Note 7)													
	Use lines 1-5 to auto-calculate annual reporting costs for each year													**Source of Reporting Cost Information**
1	Enter Name	Enter Job Classification	1	$0	0	10	$0	8	$0	8	$0	8	$0	Describe source of salary and personnel cost information.
2	Multiple	Enter Job Classification	4	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 to insert total reporting costs for each year								$0		$0		$0	
								Reporting Totals	**$0**		**$0**		**$0**	
	b. Supervision and Management (Note 8)													
	Use lines 1-5 if auto-calculating annual supervision and management costs for each year													**Source of Supervision & Management Cost Information**
1	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
2	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total supervision and management costs for each year								$0		$0		$0	
								Supervision and Management Totals	**$0**		**$0**		**$0**	
	c. Employee and Vendor Training (Note 9)													
	Use lines 1-5 if auto-calculating annual training costs for each year													**Source of Training Cost Information**
1	Enter Name	Supervisor (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	Describe source of salary and personnel cost information.
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
								Training Totals	**$0**		**$0**		**$0**	

Worksheet C: In-house Sweeping Costs and Results

d. Equipment Maintenance (Note 10)

Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year

1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0	
								Equipment Maintenance Totals	**$0**		**$0**		**$0**	

Source of Equipment Maintenance Cost Information

Describe source of salary and personnel cost information.

e. Contract Management (Note 11)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0	
								Contract Management Totals	**$0**		**$0**		**$0**	

Information

Describe source of salary and personnel cost information.

Part 3: Non-Personnel Costs Related to Street Sweeping

		FY 2007-08	FY 2008-09	FY 2009-10
1	Equipment Maintenance (Note 10)	$0	$0	$0
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total	$0	$0	$0

Source of Non-personnel Cost Information

Describe source of non-personnel cost information.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$0	**$0**	**$0**

Part 5: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	1	1	1
Unit Cost per Mile Swept	$ -	$ -	$ -

Source of Sweeping Results

Identify the source of sweeping results.

Worksheet D: Contractor Street Sweeping Costs and Results

Part 1: Contract Costs

		FY 2007-08	FY 2008-09	FY 2009-10
	Contractor Costs (Note 14)			
	Street Sweeping Operations Costs	$124,214	$124,897	$127,398
	Supplemental In-house Costs (Note 15)			
	Personnel Costs			
1	Reporting (Note 7)	$1,564	$1,564	$1,564
2	Contract Management (Note 16)	$8,342	$8,242	$8,342
3	Employee and Vendor Training (Note 9)	$1,042	$1,042	$1,042
4	Equipment Maintenance (Note 10)	$0	$0	$0
	Non-personnel Costs			
1	Equipment Maintenance (Note 10)	$0	$0	$0
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total Contract Costs	**$135,162**	**$135,745**	**$138,346**

Source of Contract Cost Information (Note 6)

Streets Division Supervisor. Personnel Costs based on 54.05% overhead rate, and 10% indirect cost rate. 1.5% of time for Reporting, 8% for Contact Management, and 0.5% Training.

Part 2: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	8,285	8,285	8,285
Unit Cost per Mile Swept	$ 16.31	$ 16.38	$ 16.70

Source of Street Sweeping Results (Note 6)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate street sweeping results.

General Explanation and Instructions for the Completion of **"Street Sweeping - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.
3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.
4. **Costs Not Included**. This RRM survey does not include the costs of program development, parking enforcement and street sweeping equipment which may be claimed as actual costs.
5. **Exclusion of Unimproved Streets and Roads**. This RRM survey addresses only costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. Costs asociated with any facilities that are not curbed or guttered should not be included in your response.

6. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., materials disposal, fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

7. Based on the information you input in Worksheet C (In-house sweeping costs) and Worksheet D (Contractor Sweeping Costs), all required cost and sweeping data will autofill in Worksheet B (Cost Summary).
8. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Sweeping Costs

9. **Note 1 (Street Sweeping Operations Costs).** Please report the only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Information" (see Note 6).

10. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated sweeping functions.
11. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
12. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
13. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
14. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
15. **Note 7 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.B. of the Copermittees' revised Parameters and Guidelines (11/15/10).
16. **Note 8 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

17. **Note 9 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement street sweeping and related functions during the life of the Permit.
18. **Note 10 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
19. **Note 11 (Contract Management)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet C, contract management costs should only include those necessary to carry out the Copermittees' in-house street sweeping activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor sweeping activities are included in Worksheet D (See Note 16).

20. **Note 12 (Materials Disposal)**. Costs to dispose of material collected from street sweeping, including the removal of materials from street sweeping vehicles, and the transport, storage, and disposal of these materials and the cost of operating, renting, leasing, or contracting for facilities to store or dispose of collected materials, and all applicable disposal fees or charges.
21. **Note 13 (Fuel)**. The actual cost of fuel necessary to run the street sweeping equipment and equipment used to transport and dispose of collected materials.

Tab D. Contractor Sweeping Costs

22. **Note 14 (Contractor Costs)**. Please report only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader category of "Street Sweeping Operations Costs." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figure in the "Source of Contract Cost Information" box .

23. **Note 15 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house sweeping. Worksheet D should describe only those supplemental activities related to contract sweeping. Notes 7-9 and 10-13 are the same as those found in Tab C. (above).

24. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs and results. Also document any assumptions used to derive the reported values.

25. **Note 16 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet D, contract management costs should only include those necessary to carry out the contracted street sweeping activities. Contract costs associated with in-house sweeping activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheet D (See Note 11).

Worksheet B: Unit Cost Summary Sheet

Part 1: General Information

Jurisdiction :	City of Cities	Alternate
Contact Person :	John Smith	Susan Jones
Phone :	619-123-1234	619-123-1237

Information

Describe source of salary and personnel cost information.

Part 3: Non-Personnel Costs Related to Street Sweeping

		FY 2007-08	FY 2008-09	FY 2009-10
1	Equipment Maintenance (Note 10)	$0	$0	$0
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total	$0	$0	$0

Source of Non-personnel Cost Information

Describe source of non-personnel cost information.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$0	**$0**	**$0**

Part 5: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	1	1	1
Unit Cost per Mile Swept	$ -	$ -	$ -

Source of Sweeping Results

Identify the source of sweeping results.

Worksheet D: Contractor Street Sweeping Costs and Results

Part 1: Contract Costs

		FY 2007-08	FY 2008-09	FY 2009-10	
	Contractor Costs (Note 14)				
	Street Sweeping Operations Costs	$33,181	$32,181	$86,210	Note: It appears that costs should be pro-rated to reflect low mileage
	Supplemental In-house Costs (Note 15)				
	Personnel Costs				
1	Reporting (Note 7)	$138	$138	$138	Note: It appears that costs should be pro-rated to reflect low mileage
2	Contract Management (Note 16)	$1,561	$1,561	$1,561	Note: It appears that costs should be pro-rated to reflect low mileage
3	Employee and Vendor Training (Note 9)	$0	$0	$0	
4	Equipment Maintenance (Note 10)	$0	$0	$0	
	Non-personnel Costs				
1	Equipment Maintenance (Note 10)	$0	$0	$0	
2	Materials Disposal (Note 12)	$0	$0	$0	
3	Fuel (Note 13)	$0	$0	$0	
4	Training Materials and Supplies (Note 9)	$0	$0	$0	
	Total Contract Costs	**$34,881**	**$33,881**	**$87,909**	

Source of Contract Cost Information (Note 6)

Contractor information is from Cannon Pacific. In house information is from in house staff.

Part 2: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10	
Miles Swept	88	1,327	2,556	Note: It appears that costs should be pro-rated to reflect low mileage
Unit Cost per Mile Swept	$ 394.62	$ 25.53	$ 34.39	Note: It appears that costs should be pro-rated to reflect low mileage

Source of Street Sweeping Results (Note 6)

Information is from Cannon Pacific, the street sweeping contractor. Cost per mile is not simply equal to operatiing cost divided by miles swept. Bus stops and square footage sweeping are included in the operating costs. The City can provide the Contractor's cost per mile information if needed.

General Explanation and Instructions for the Completion of **"Street Sweeping - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.
3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.
4. **Costs Not Included**. This RRM survey does not include the costs of program development, parking enforcement and street sweeping equipment which may be claimed as actual costs.
5. **Exclusion of Unimproved Streets and Roads**. This RRM survey addresses only costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. Costs asociated with any facilities that are not curbed or guttered should not be included in your response.

6. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., materials disposal, fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

7. Based on the information you input in Worksheet C (In-house sweeping costs) and Worksheet D (Contractor Sweeping Costs), all required cost and sweeping data will autofill in Worksheet B (Cost Summary).
8. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Sweeping Costs

9. **Note 1 (Street Sweeping Operations Costs).** Please report the only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Information" (see Note 6).

10. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated sweeping functions.
11. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
12. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
13. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
14. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
15. **Note 7 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.B. of the Copermittees' revised Parameters and Guidelines (11/15/10).
16. **Note 8 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

17. **Note 9 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement street sweeping and related functions during the life of the Permit.
18. **Note 10 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
19. **Note 11 (Contract Management)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet C, contract management costs should only include those necessary to carry out the Copermittees' in-house street sweeping activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor sweeping activities are included in Worksheet D (See Note 16).

20. **Note 12 (Materials Disposal)**. Costs to dispose of material collected from street sweeping, including the removal of materials from street sweeping vehicles, and the transport, storage, and disposal of these materials and the cost of operating, renting, leasing, or contracting for facilities to store or dispose of collected materials, and all applicable disposal fees or charges.
21. **Note 13 (Fuel)**. The actual cost of fuel necessary to run the street sweeping equipment and equipment used to transport and dispose of collected materials.

Tab D. Contractor Sweeping Costs

22. **Note 14 (Contractor Costs)**. Please report only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader category of "Street Sweeping Operations Costs." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figure in the "Source of Contract Cost Information" box .

23. **Note 15 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house sweeping. Worksheet D should describe only those supplemental activities related to contract sweeping. Notes 7-9 and 10-13 are the same as those found in Tab C. (above).

24. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs and results. Also document any assumptions used to derive the reported values.

25. **Note 16 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet D, contract management costs should only include those necessary to carry out the contracted street sweeping activities. Contract costs associated with in-house sweeping activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheet D (See Note 11).

Unit Cost per Mile Swept	#DIV/0!	#DIV/0!	#DIV/0!

Source of Street Sweeping Results (Note 6)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate street sweeping results.

General Explanation and Instructions for the Completion of **"Street Sweeping - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.
3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.
4. **Costs Not Included**. This RRM survey does not include the costs of program development, parking enforcement and street sweeping equipment which may be claimed as actual costs.
5. **Exclusion of Unimproved Streets and Roads**. This RRM survey addresses only costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. Costs asociated with any facilities that are not curbed or guttered should not be included in your response.

6. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., materials disposal, fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

7. Based on the information you input in Worksheet C (In-house sweeping costs) and Worksheet D (Contractor Sweeping Costs), all required cost and sweeping data will autofill in Worksheet B (Cost Summary).
8. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Sweeping Costs

9. **Note 1 (Street Sweeping Operations Costs).** Please report the only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Information" (see Note 6).

10. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated sweeping functions.
11. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
12. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
13. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
14. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
15. **Note 7 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.B. of the Copermittees' revised Parameters and Guidelines (11/15/10).
16. **Note 8 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

17. **Note 9 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement street sweeping and related functions during the life of the Permit.
18. **Note 10 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
19. **Note 11 (Contract Management)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet C, contract management costs should only include those necessary to carry out the Copermittees' in-house street sweeping activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor sweeping activities are included in Worksheet D (See Note 16).

20. **Note 12 (Materials Disposal)**. Costs to dispose of material collected from street sweeping, including the removal of materials from street sweeping vehicles, and the transport, storage, and disposal of these materials and the cost of operating, renting, leasing, or contracting for facilities to store or dispose of collected materials, and all applicable disposal fees or charges.
21. **Note 13 (Fuel)**. The actual cost of fuel necessary to run the street sweeping equipment and equipment used to transport and dispose of collected materials.

Tab D. Contractor Sweeping Costs

22. **Note 14 (Contractor Costs)**. Please report only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader category of "Street Sweeping Operations Costs." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figure in the "Source of Contract Cost Information" box .

23. **Note 15 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house sweeping. Worksheet D should describe only those supplemental activities related to contract sweeping. Notes 7-9 and 10-13 are the same as those found in Tab C. (above).

24. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs and results. Also document any assumptions used to derive the reported values.

25. **Note 16 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet D, contract management costs should only include those necessary to carry out the contracted street sweeping activities. Contract costs associated with in-house sweeping activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheet D (See Note 11).

4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total Contract Costs	**$0**	**$0**	**$0**

Source of Contract Cost Information (Note 6)

Describe source of contract cost information.

Part 2: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	-	-	-
Unit Cost per Mile Swept	#DIV/0!	#DIV/0!	#DIV/0!

Source of Street Sweeping Results (Note 6)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate street sweeping results.

General Explanation and Instructions for the Completion of **"Street Sweeping - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.
3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.
4. **Costs Not Included**. This RRM survey does not include the costs of program development, parking enforcement and street sweeping equipment which may be claimed as actual costs.
5. **Exclusion of Unimproved Streets and Roads**. This RRM survey addresses only costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. Costs asociated with any facilities that are not curbed or guttered should not be included in your response.

6. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., materials disposal, fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

7. Based on the information you input in Worksheet C (In-house sweeping costs) and Worksheet D (Contractor Sweeping Costs), all required cost and sweeping data will autofill in Worksheet B (Cost Summary).
8. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Sweeping Costs

9. **Note 1 (Street Sweeping Operations Costs).** Please report the only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Information" (see Note 6).

10. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated sweeping functions.
11. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
12. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
13. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
14. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
15. **Note 7 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.B. of the Copermittees' revised Parameters and Guidelines (11/15/10).
16. **Note 8 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

17. **Note 9 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement street sweeping and related functions during the life of the Permit.
18. **Note 10 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
19. **Note 11 (Contract Management)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet C, contract management costs should only include those necessary to carry out the Copermittees' in-house street sweeping activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor sweeping activities are included in Worksheet D (See Note 16).

20. **Note 12 (Materials Disposal)**. Costs to dispose of material collected from street sweeping, including the removal of materials from street sweeping vehicles, and the transport, storage, and disposal of these materials and the cost of operating, renting, leasing, or contracting for facilities to store or dispose of collected materials, and all applicable disposal fees or charges.
21. **Note 13 (Fuel)**. The actual cost of fuel necessary to run the street sweeping equipment and equipment used to transport and dispose of collected materials.

Tab D. Contractor Sweeping Costs

22. **Note 14 (Contractor Costs)**. Please report only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader category of "Street Sweeping Operations Costs." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figure in the "Source of Contract Cost Information" box .

23. **Note 15 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house sweeping. Worksheet D should describe only those supplemental activities related to contract sweeping. Notes 7-9 and 10-13 are the same as those found in Tab C. (above).

24. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs and results. Also document any assumptions used to derive the reported values.

25. **Note 16 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet D, contract management costs should only include those necessary to carry out the contracted street sweeping activities. Contract costs associated with in-house sweeping activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheet D (See Note 11).

6	Use line 6 if inserting total training costs for each year								$0		$0		$0	
							Training Totals		**$0**		**$0**		**$0**	

Worksheet C: In-house Sweeping Costs and Results

d. Equipment Maintenance (Note 10)

Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year

1	NA	NA	0	$0	0	10	$0	0	$0	0	$0	0	$0
2	NA	NA	0	$0	0	10	$0	0	$0	0	$0	0	$0
3	NA	NA	0	$0	0	10	$0	0	$0	0	$0	0	$0
4	NA	NA	0	$0	0	10	$0	0	$0	0	$0	0	$0
5	NA	NA	0	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0
								Equipment Maintenance Totals	**$0**		**$0**		**$0**

Source of Equipment Maintenance Cost Information

Describe source of salary and personnel cost information.

e. Contract Management (Note 11)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	NA	NA	0	$0	0	10	$0	0	$0	0	$0	0	$0
2	NA	NA	0	$0	0	10	$0	0	$0	0	$0	0	$0
3	NA	NA	0	$0	0	10	$0	0	$0	0	$0	0	$0
4	NA	NA	0	$0	0	10	$0	0	$0	0	$0	0	$0
5	NA	NA	0	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0
								Contract Management Totals	**$0**		**$0**		**$0**

Information

Referenced accounting reports for salary and benefit information.

Part 3: Non-Personnel Costs Related to Street Sweeping

		FY 2007-08	FY 2008-09	FY 2009-10
1	Equipment Maintenance (Note 10)	$0	$0	$0
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total	$0	$0	$0

Source of Non-personnel Cost Information

Describe source of non-personnel cost information.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$0	**$0**	**$0**

Part 5: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	0	0	0
Unit Cost per Mile Swept	#DIV/0!	#DIV/0!	#DIV/0!

Source of Sweeping Results

Identify the source of sweeping results.

Worksheet D: Contractor Street Sweeping Costs and Results

Part 1: Contract Costs

		FY 2007-08	FY 2008-09	FY 2009-10
	Contractor Costs (Note 14)			
	Street Sweeping Operations Costs	$219,730	$224,871	$226,041
	Supplemental In-house Costs (Note 15)			
	Personnel Costs			
1	Reporting (Note 7)	$0	$0	$0
2	Contract Management (Note 16)	$4,000	$4,000	$4,000
3	Employee and Vendor Training (Note 9)	$0	$0	$0
4	Equipment Maintenance (Note 10)	$0	$0	$0
	Non-personnel Costs			
1	Equipment Maintenance (Note 10)	$0	$0	$0
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total Contract Costs	**$223,730**	**$228,871**	**$230,041**

Note: Was the reporting cost included elsewhere ?

Source of Contract Cost Information (Note 6)

Utilized invoice documents to aquire street sweeping costs. Referenced accounting documents for Construction Maintenance Supervisor salary and benefit information. City owned facility parking areas included. Contract Management Calculated, Construction Maintenance Supervisor Streets FY11 approximatly 78 hours

Part 2: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	12,000	12,000	12,000
Unit Cost per Mile Swept	$ 18.64	$ 19.07	$ 19.17

Note: Source of data should be stated below.

Source of Street Sweeping Results (Note 6)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate street sweeping results.

General Explanation and Instructions for the Completion of **"Street Sweeping - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.
3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.
4. **Costs Not Included**. This RRM survey does not include the costs of program development, parking enforcement and street sweeping equipment which may be claimed as actual costs.
5. **Exclusion of Unimproved Streets and Roads**. This RRM survey addresses only costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. Costs asociated with any facilities that are not curbed or guttered should not be included in your response.

6. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., materials disposal, fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

7. Based on the information you input in Worksheet C (In-house sweeping costs) and Worksheet D (Contractor Sweeping Costs), all required cost and sweeping data will autofill in Worksheet B (Cost Summary).
8. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Sweeping Costs

9. **Note 1 (Street Sweeping Operations Costs).** Please report the only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Information" (see Note 6).

10. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated sweeping functions.
11. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
12. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
13. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
14. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
15. **Note 7 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.B. of the Copermittees' revised Parameters and Guidelines (11/15/10).
16. **Note 8 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

17. **Note 9 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement street sweeping and related functions during the life of the Permit.
18. **Note 10 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
19. **Note 11 (Contract Management)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet C, contract management costs should only include those necessary to carry out the Copermittees' in-house street sweeping activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor sweeping activities are included in Worksheet D (See Note 16).

20. **Note 12 (Materials Disposal)**. Costs to dispose of material collected from street sweeping, including the removal of materials from street sweeping vehicles, and the transport, storage, and disposal of these materials and the cost of operating, renting, leasing, or contracting for facilities to store or dispose of collected materials, and all applicable disposal fees or charges.
21. **Note 13 (Fuel)**. The actual cost of fuel necessary to run the street sweeping equipment and equipment used to transport and dispose of collected materials.

Tab D. Contractor Sweeping Costs

22. **Note 14 (Contractor Costs)**. Please report only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader category of "Street Sweeping Operations Costs." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figure in the "Source of Contract Cost Information" box .

23. **Note 15 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house sweeping. Worksheet D should describe only those supplemental activities related to contract sweeping. Notes 7-9 and 10-13 are the same as those found in Tab C. (above).

24. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs and results. Also document any assumptions used to derive the reported values.

25. **Note 16 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet D, contract management costs should only include those necessary to carry out the contracted street sweeping activities. Contract costs associated with in-house sweeping activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheet D (See Note 11).

								Reporting Totals	**$3,079**		**$3,171**		**$3,266**	

Source of Reporting Cost Information

Based on the FY 07-08 Blended Labor Rates. $59/hour for 1751 productive hours.

Worksheet C: In-house Sweeping Costs and Results

b. Supervision and Management (Note 8)

Use lines 1-5 if auto-calculating annual supervision and management costs for each year

1	Thomas Herzberger	LUEG Program Manager	1	$140,080	0	49	$208,719	5	$10,436	5	$10,749	5	$11,072
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total supervision and management costs for each year								$0		$0		$0
								Supervision and Management Totals	**$10,436**		**$10,749**		**$11,072**

Source of Supervision & Management Cost Information

Based on the FY 07-08 Blended Labor Rates. $80/hour for 1751 productive hours.

c. Employee and Vendor Training (Note 9)

Use lines 1-5 if auto-calculating annual training costs for each year

1	Enter Name	Supervisor (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total training costs for each year								$0		$0		$0
								Training Totals	**$0**		**$0**		**$0**

Source of Training Cost Information

Describe source of salary and personnel cost information.

d. Equipment Maintenance (Note 10)

Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year

1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0
								Equipment Maintenance Totals	**$0**		**$0**		**$0**

Source of Equipment Maintenance Cost Information

Describe source of salary and personnel cost information.

e. Contract Management (Note 11)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total contract management costs for each year								$35,699		$0		$0
								Contract Management Totals	**$35,699**		**$0**		**$0**

Information

Describe source of salary and personnel cost information.

Worksheet C: In-house Sweeping Costs and Results

Part 3: Non-Personnel Costs Related to Street Sweeping

		FY 2007-08	FY 2008-09	FY 2009-10
1	Equipment Maintenance (Note 10)	$613,710	$692,738	$638,806
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total	$613,710	$692,738	$638,806

Source of Non-personnel Cost Information

A percentage of Oracle's total equipment charges for vehicles and equipment for the 12 Road Stations above. (23.5% dedicated to Sweeping for each year)

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$1,142,978	**$1,225,836**	**$1,213,362**

Part 5: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	13,270	21,799	17,262
Unit Cost per Mile Swept	$ 86.13	$ 56.23	$ 70.29

Source of Sweeping Results

Stormwater and Road Station crew sweeping logs.

Worksheet D: Contractor Street Sweeping Costs and Results

Part 1: Contract Costs

		FY 2007-08	FY 2008-09	FY 2009-10
	Contractor Costs (Note 14)			
	Street Sweeping Operations Costs	$0	$0	$0
	Supplemental In-house Costs (Note 15)			
	Personnel Costs			
1	Reporting (Note 7)	$0	$0	$0
2	Contract Management (Note 16)	$0	$0	$0
3	Employee and Vendor Training (Note 9)	$0	$0	$0
4	Equipment Maintenance (Note 10)	$0	$0	$0
	Non-personnel Costs			
1	Equipment Maintenance (Note 10)	$0	$0	$0
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total Contract Costs	**$0**	**$0**	**$0**

Source of Contract Cost Information (Note 6)

Describe source of contract cost information.

Part 2: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	2	2	2
Unit Cost per Mile Swept	$ -	$ -	$ -

Error: As zero costs, there should be zero miles reported.

Source of Street Sweeping Results (Note 6)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate street sweeping results.

General Explanation and Instructions for the Completion of **"Street Sweeping - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.
3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.
4. **Costs Not Included**. This RRM survey does not include the costs of program development, parking enforcement and street sweeping equipment which may be claimed as actual costs.
5. **Exclusion of Unimproved Streets and Roads**. This RRM survey addresses only costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. Costs asociated with any facilities that are not curbed or guttered should not be included in your response.

6. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., materials disposal, fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

7. Based on the information you input in Worksheet C (In-house sweeping costs) and Worksheet D (Contractor Sweeping Costs), all required cost and sweeping data will autofill in Worksheet B (Cost Summary).
8. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Sweeping Costs

9. **Note 1 (Street Sweeping Operations Costs).** Please report the only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Information" (see Note 6).

10. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated sweeping functions.
11. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
12. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
13. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
14. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
15. **Note 7 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.B. of the Copermittees' revised Parameters and Guidelines (11/15/10).
16. **Note 8 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

17. **Note 9 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement street sweeping and related functions during the life of the Permit.
18. **Note 10 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
19. **Note 11 (Contract Management)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet C, contract management costs should only include those necessary to carry out the Copermittees' in-house street sweeping activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor sweeping activities are included in Worksheet D (See Note 16).

20. **Note 12 (Materials Disposal)**. Costs to dispose of material collected from street sweeping, including the removal of materials from street sweeping vehicles, and the transport, storage, and disposal of these materials and the cost of operating, renting, leasing, or contracting for facilities to store or dispose of collected materials, and all applicable disposal fees or charges.
21. **Note 13 (Fuel)**. The actual cost of fuel necessary to run the street sweeping equipment and equipment used to transport and dispose of collected materials.

Tab D. Contractor Sweeping Costs

22. **Note 14 (Contractor Costs)**. Please report only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader category of "Street Sweeping Operations Costs." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figure in the "Source of Contract Cost Information" box .

23. **Note 15 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house sweeping. Worksheet D should describe only those supplemental activities related to contract sweeping. Notes 7-9 and 10-13 are the same as those found in Tab C. (above).

24. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs and results. Also document any assumptions used to derive the reported values.

25. **Note 16 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet D, contract management costs should only include those necessary to carry out the contracted street sweeping activities. Contract costs associated with in-house sweeping activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheet D (See Note 11).

								Training Totals	**$0**		**$0**		**$0**	

Source of Reporting Cost Information

Expense related to contract management is captured in the indirect costs, therefore, no iadministrative positions are reported in this area. The field representative is responsible for reporting statistical analysis that is used in the reports for Street Sweeping that are related to the permit.

Source of Supervision & Management Cost Information

Personnel Pay Schedule; Indirect Cost Rate provided by City of SD., Comptroller's Office; Fringe Benefit Rate was obtained by actual expense data in FY 2008

Source of Training Cost Information

Describe source of salary and personnel cost information.

Worksheet C: In-house Sweeping Costs and Results

d. Equipment Maintenance (Note 10)

Use lines 1-5 if auto-calculating annual equipment maintenance costs for each year

1	Enter Name	Equip. Operator (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total equipment maintenance costs for each year								$0		$0		$0
								Equipment Maintenance Totals	**$0**		**$0**		**$0**

Source of Equipment Maintenance Cost Information

Only total costs are available (see Equipment Maintenance Expense below)

e. Contract Management (Note 11)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0
								Contract Management Totals	**$0**		**$0**		**$0**

Information

Describe source of salary and personnel cost information.

Part 3: Non-Personnel Costs Related to Street Sweeping

		FY 2007-08	FY 2008-09	FY 2009-10
1	Equipment Maintenance (Note 10)	$1,530,264	$2,283,358	$2,085,979
2	Materials Disposal (Note 12)	$143,225	$262,091	$202,658
3	Fuel (Note 13)	$21,904	$10,457	$14,227
4	Training Materials and Supplies (Note 9)	$237,691	$355,035	$29,909
	Total	$1,933,084	$2,910,941	$2,332,773

Source of Non-personnel Cost Information

Source: City of San Diego Comptroller reports. Fuel is already captured in the maintenance charges as part of the Storm Water's agreement with the City of San Diego's General Services Dept. - Equipment Division. Special fuel is captured in the fuel area (line item 3). Cost for special sweeps inclusive.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$5,036,728	**$6,107,694**	**$5,625,428**

Part 5: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	78,000	95,000	101,000
Unit Cost per Mile Swept	$ 64.57	$ 64.29	$ 55.70

Source of Sweeping Results

Mileage obtained by Department Performance measures.

Worksheet D: Contractor Street Sweeping Costs and Results

Part 1: Contract Costs

		FY 2007-08	FY 2008-09	FY 2009-10
	Contractor Costs (Note 14)			
	Street Sweeping Operations Costs	$0	$0	$0
	Supplemental In-house Costs (Note 15)			
	Personnel Costs			
1	Reporting (Note 7)	$0	$0	$0
2	Contract Management (Note 16)	$0	$0	$0
3	Employee and Vendor Training (Note 9)	$0	$0	$0
4	Equipment Maintenance (Note 10)	$0	$0	$0
	Non-personnel Costs			
1	Equipment Maintenance (Note 10)	$0	$0	$0
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total Contract Costs	**$0**	**$0**	**$0**

Source of Contract Cost Information (Note 6)

Describe source of contract cost information.

Part 2: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	-	-	-
Unit Cost per Mile Swept	#DIV/0!	#DIV/0!	#DIV/0!

Source of Street Sweeping Results (Note 6)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate street sweeping results.

General Explanation and Instructions for the Completion of **"Street Sweeping - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.
3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.
4. **Costs Not Included**. This RRM survey does not include the costs of program development, parking enforcement and street sweeping equipment which may be claimed as actual costs.
5. **Exclusion of Unimproved Streets and Roads**. This RRM survey addresses only costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. Costs asociated with any facilities that are not curbed or guttered should not be included in your response.

6. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., materials disposal, fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

7. Based on the information you input in Worksheet C (In-house sweeping costs) and Worksheet D (Contractor Sweeping Costs), all required cost and sweeping data will autofill in Worksheet B (Cost Summary).
8. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Sweeping Costs

9. **Note 1 (Street Sweeping Operations Costs).** Please report the only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Information" (see Note 6).

10. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated sweeping functions.
11. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
12. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
13. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
14. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
15. **Note 7 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.B. of the Copermittees' revised Parameters and Guidelines (11/15/10).
16. **Note 8 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

17. **Note 9 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement street sweeping and related functions during the life of the Permit.
18. **Note 10 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
19. **Note 11 (Contract Management)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet C, contract management costs should only include those necessary to carry out the Copermittees' in-house street sweeping activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor sweeping activities are included in Worksheet D (See Note 16).

20. **Note 12 (Materials Disposal)**. Costs to dispose of material collected from street sweeping, including the removal of materials from street sweeping vehicles, and the transport, storage, and disposal of these materials and the cost of operating, renting, leasing, or contracting for facilities to store or dispose of collected materials, and all applicable disposal fees or charges.
21. **Note 13 (Fuel)**. The actual cost of fuel necessary to run the street sweeping equipment and equipment used to transport and dispose of collected materials.

Tab D. Contractor Sweeping Costs

22. **Note 14 (Contractor Costs)**. Please report only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader category of "Street Sweeping Operations Costs." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figure in the "Source of Contract Cost Information" box .

23. **Note 15 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house sweeping. Worksheet D should describe only those supplemental activities related to contract sweeping. Notes 7-9 and 10-13 are the same as those found in Tab C. (above).

24. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs and results. Also document any assumptions used to derive the reported values.

25. **Note 16 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet D, contract management costs should only include those necessary to carry out the contracted street sweeping activities. Contract costs associated with in-house sweeping activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheet D (See Note 11).

2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total Contract Costs	**$127,643**	**$251,763**	**$258,036**

Source of Contract Cost Information (Note 6)

Contracts with Cannon Pacific, Inc., FY 0708 includes parking lot sweeping. But not for 08-09 & 09-10.

Part 2: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	7,392	14,612	14,975
Unit Cost per Mile Swept	$ 17.27	$ 17.23	$ 17.23

Source of Street Sweeping Results (Note 6)

miles swept from contract calculations & invoicing.

General Explanation and Instructions for the Completion of **"Street Sweeping - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.
3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.
4. **Costs Not Included**. This RRM survey does not include the costs of program development, parking enforcement and street sweeping equipment which may be claimed as actual costs.
5. **Exclusion of Unimproved Streets and Roads**. This RRM survey addresses only costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. Costs asociated with any facilities that are not curbed or guttered should not be included in your response.

6. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., materials disposal, fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

7. Based on the information you input in Worksheet C (In-house sweeping costs) and Worksheet D (Contractor Sweeping Costs), all required cost and sweeping data will autofill in Worksheet B (Cost Summary).
8. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Sweeping Costs

9. **Note 1 (Street Sweeping Operations Costs).** Please report the only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Information" (see Note 6).

10. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated sweeping functions.
11. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
12. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
13. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
14. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
15. **Note 7 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.B. of the Copermittees' revised Parameters and Guidelines (11/15/10).
16. **Note 8 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

17. **Note 9 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement street sweeping and related functions during the life of the Permit.
18. **Note 10 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
19. **Note 11 (Contract Management)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet C, contract management costs should only include those necessary to carry out the Copermittees' in-house street sweeping activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor sweeping activities are included in Worksheet D (See Note 16).

20. **Note 12 (Materials Disposal)**. Costs to dispose of material collected from street sweeping, including the removal of materials from street sweeping vehicles, and the transport, storage, and disposal of these materials and the cost of operating, renting, leasing, or contracting for facilities to store or dispose of collected materials, and all applicable disposal fees or charges.
21. **Note 13 (Fuel)**. The actual cost of fuel necessary to run the street sweeping equipment and equipment used to transport and dispose of collected materials.

Tab D. Contractor Sweeping Costs

22. **Note 14 (Contractor Costs)**. Please report only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader category of "Street Sweeping Operations Costs." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figure in the "Source of Contract Cost Information" box .

23. **Note 15 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house sweeping. Worksheet D should describe only those supplemental activities related to contract sweeping. Notes 7-9 and 10-13 are the same as those found in Tab C. (above).

24. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs and results. Also document any assumptions used to derive the reported values.

25. **Note 16 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet D, contract management costs should only include those necessary to carry out the contracted street sweeping activities. Contract costs associated with in-house sweeping activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheet D (See Note 11).

Worksheet B: Unit Cost Summary Sheet

Part 1: General Information

Jurisdiction :	City of Santee	Alternate
Contact Person :	Helen Perry	
Phone :	619-258-4100 ext. 177	
E-Mail :	hperry@ci.santee.ca.us	

	FY 2007-08	FY 2008-09	FY 2009-10

								Equipment Maintenance Totals	**$0**		**$0**		**$0**	

Source of Equipment Maintenance Cost Information

Describe source of salary and personnel cost information.

e. Contract Management (Note 11)

Use lines 1-5 if auto-calculating annual contract management costs for each year

1	Enter Name	Analyst II (example)	1	$0	0	10	$0	0	$0	0	$0	0	$0	
2	Multiple	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
3	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
4	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
5	Enter Name	Enter Job Classification	1	$0	0	10	$0	0	$0	0	$0	0	$0	
6	Use line 6 if inserting total contract management costs for each year								$0		$0		$0	
								Contract Management Totals	**$0**		**$0**		**$0**	

Information

Describe source of salary and personnel cost information.

Part 3: Non-Personnel Costs Related to Street Sweeping

		FY 2007-08	FY 2008-09	FY 2009-10
1	Equipment Maintenance (Note 10)	$0	$0	$0
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total	$0	$0	$0

Source of Non-personnel Cost Information

Describe source of non-personnel cost information.

Part 4: Total Costs (Personnel + Non-personnel)

FY 2007-08	FY 2008-09	FY 2009-10
$0	**$0**	**$0**

Part 5: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	1	1	1
Unit Cost per Mile Swept	$ -	$ -	$ -

Source of Sweeping Results

Identify the source of sweeping results.

Worksheet D: Contractor Street Sweeping Costs and Results

Part 1: Contract Costs

		FY 2007-08	FY 2008-09	FY 2009-10
	Contractor Costs (Note 14)			
	Street Sweeping Operations Costs	$77,967	$62,938	$63,538
	Supplemental In-house Costs (Note 15)			
	Personnel Costs			
1	Reporting (Note 7)	$0	$0	$0
2	Contract Management (Note 16)	$1,434	$1,511	$1,463
3	Employee and Vendor Training (Note 9)	$0	$0	$0
4	Equipment Maintenance (Note 10)	$0	$0	$0
	Non-personnel Costs			
1	Equipment Maintenance (Note 10)	$0	$0	$0
2	Materials Disposal (Note 12)	$0	$0	$0
3	Fuel (Note 13)	$0	$0	$0
4	Training Materials and Supplies (Note 9)	$0	$0	$0
	Total Contract Costs	**$79,401**	**$64,448**	**$65,001**

Source of Contract Cost Information (Note 6)

Contractor costs based on 50% of actual contract costs for each fiscal year. Contract management costs based on 50% of the number of estimated hours to manage the street sweeping contract.

Part 2: Street Sweeping Results

	FY 2007-08	FY 2008-09	FY 2009-10
Miles Swept	10,212	10,212	10,212
Unit Cost per Mile Swept	$ 7.78	$ 6.31	$ 6.37

Note: Please disclose the source of data.

Source of Street Sweeping Results (Note 6)

Mileage data is not available for the swept area of parking facilities associated with municipal facilities. Mileage accrued while sweeping these facilities is included in the total mileage.

General Explanation and Instructions for the Completion of **"Street Sweeping - Reasonable Reimbursement Methodology Unit Cost Survey"**

Tab A. Instructions and Notes

1. **Please return the completed survey by January 19, 2011**. Once completed, the file should be returned via email to Jon Van Rhyn (Jon.vanrhyn@sdcounty.ca.gov) with a cc to Leonard Kaye (Lkaye14765@aol.com) no later than 5:00 p.m., Wednesday January 19, 2011. If you have questions or need assistance please contact Jon by email or at 858-495-5133.

2. **Please name the completed file as follows**: The file provided to you contains the word JURISDICTION in its name. Please substitute your individual jurisdiction name for JURISDICTION; there is no need to make any additional changes.
3. **Fill in only the blue highlighted cells**. All other cells have been protected to prevent any inadvertent loss of data. Each of the blue cells should be completed regardless of whether or not it applies. For any that do not, fill in either a "zero" or "N/A" as applicable.
4. **Costs Not Included**. This RRM survey does not include the costs of program development, parking enforcement and street sweeping equipment which may be claimed as actual costs.
5. **Exclusion of Unimproved Streets and Roads**. This RRM survey addresses only costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. Costs asociated with any facilities that are not curbed or guttered should not be included in your response.

6. **Claiming of Costs Applicable to the Mandate**. In some instances (i.e., materials disposal, fuel, or equipment maintenance), Copermittee costs may apply to activities other than those subject to the mandate. In such cases, only the proportion of the cost that applies to the mandate should be claimed.

Tab B. Cost Summary Sheet

7. Based on the information you input in Worksheet C (In-house sweeping costs) and Worksheet D (Contractor Sweeping Costs), all required cost and sweeping data will autofill in Worksheet B (Cost Summary).
8. The only information that needs to be input in Worksheet B is the contact information in Part 1 (General Information).

Tab C. In-house Sweeping Costs

9. **Note 1 (Street Sweeping Operations Costs).** Please report the only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Information" (see Note 6).

10. **Note 2 (Staff Person)**. Indicate, by names if possible, and by job classifications, the numbers of your staff persons who perform the indicated sweeping functions.
11. **Note 3 (Annual Salary)**. Please report the salary earned by an employee during 2007-08.
12. **Note 4 (Benefit Rate)**. Please indicate the percentage of salary provided by your employer as an employee benefit rate during 2007-08.
13. **Note 5 (Indirect Cost Rate)**. Please use the annual indirect cost or overhead rate as a percentage of salary for FY 2007-08. If none is available use 10%, the State's default rate.
14. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs. Also document any assumptions used to derive the reported values.
15. **Note 7 (Reporting)**. Generally includes (1) Reporting and tracking policies and procedures, (2) data tracking and analysis, (3) report writing, and (4) associated supervision and management. For additional explanation, see Section IV.B. of the Copermittees' revised Parameters and Guidelines (11/15/10).
16. **Note 8 (Supervision and Management)**. Time spent by supervisory and management personnel supervising personnel directly responsible for performing the mandated activities.

17. **Note 9 (Employee and Vendor Training)**. The claimant's costs to develop, update, and conduct training on street sweeping policies, procedures, to develop and produce documentation (manuals, forms, etc.), and the training costs of all claimant and vendor employees who perform tasks necessary to implement street sweeping and related functions during the life of the Permit.
18. **Note 10 (Equipment Maintenance)**. Annual equipment maintenance costs, including parts, supplies (e.g., water), and personnel costs. This also includes the cost of operating, renting, leasing, or contracting for facilities to store and maintain equipment and supplies.
19. **Note 11 (Contract Management)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet C, contract management costs should only include those necessary to carry out the Copermittees' in-house street sweeping activities (e.g., contracted equipment use, waste disposal, etc.). Contract costs associated with contractor sweeping activities are included in Worksheet D (See Note 16).

20. **Note 12 (Materials Disposal)**. Costs to dispose of material collected from street sweeping, including the removal of materials from street sweeping vehicles, and the transport, storage, and disposal of these materials and the cost of operating, renting, leasing, or contracting for facilities to store or dispose of collected materials, and all applicable disposal fees or charges.
21. **Note 13 (Fuel)**. The actual cost of fuel necessary to run the street sweeping equipment and equipment used to transport and dispose of collected materials.

Tab D. Contractor Sweeping Costs

22. **Note 14 (Contractor Costs)**. Please report only those costs associated with sweeping improved (i.e., curbed and guttered") streets, roads, and highways. If parking lots are included as part of sweeping runs, and these costs are intermingled with the those of streets, roads, and highways, the Copermittee may choose to either include or exclude them. If included, this should be noted under "Source of Contract Cost Information" (see Note 6). Also please note that contract costs do not allow for itemization of specific costs (e.g., fuel, equipment maintenance, etc.). For the purposes of this survey, it is assumed that such costs are included within the broader category of "Street Sweeping Operations Costs." If such itemization is part of your contract activities, please indicate which items have been absorbed into the larger figure in the "Source of Contract Cost Information" box .

23. **Note 15 (Supplemental In-house Costs)**. This section includes in-house personnel and non-personnel costs incurred in supporting contractors' mandated services. Note: It is not intended to replace Worksheets C and D, which correspond to all activities related to in-house sweeping. Worksheet D should describe only those supplemental activities related to contract sweeping. Notes 7-9 and 10-13 are the same as those found in Tab C. (above).

24. **Note 6 (Source of Information)**. Please indicate the documents and assumptions used for reported costs and results. Also document any assumptions used to derive the reported values.

25. **Note 16 (Contract Management Costs)**. The costs of preparing requests for proposals or requests for bids, negotiating or drafting third party contracts, and subsequently administering service contracts for the time they are performing these tasks. For Worksheet D, contract management costs should only include those necessary to carry out the contracted street sweeping activities. Contract costs associated with in-house sweeping activities (e.g., contracted equipment use, waste disposal, etc.) are included in Worksheet D (See Note 11).

Worksheet B: Unit Cost Summary Sheet

Source of Street Sweeping Results (Note 6)

Describe source of inspection and cleaning results. Also use this space to document any assumptions used to calculate street sweeping results.

EXHIBIT 6 "A" - DECLARATION OF JON VANRHYN FOR COUNTY OF SAN DIEGO.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

DECLARATION OF JON VAN RHYN ON BEHALF OF THE COUNTY OF SAN DIEGO IN SUPPORT OF TEST CLAIM

I, Jon Van Rhyn, declare as follows:

1. I make this declaration based upon my own personal knowledge, except for matters set forth herein on information and belief, and as to those matters I believe them to be true, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. I have received the following degrees and certifications: Bachelor of Science in Geological Sciences; Master of Public Health, Environmental Health Emphasis; and EPA Water Quality Academy certification.

3. I am employed by the County of San Diego as a Water Quality Program Manager.

4. I have held my current position for approximately six years. My duties include operational oversight of fifteen program staff in several key program areas including science and monitoring, education, regulatory reporting, and program assessment. I also oversee regional coordination of the County's stormwater compliance efforts with the 20 other municipal stormwater co-permittees.

5. I have reviewed the California Regional Water Quality Control Board ("RWQCB"), San Diego Region, Order No. R9-2007-0001 (NPDES No. CAS 0108758) (the "2007 Permit") and I know and understand the requirements of the Permit.

6. I have also reviewed and I know and understand the requirements of Order No. 2001-01 (NPDES CAS0108758) issued by the San Diego RWQCB on February 21, 2001 (the "2001 Permit").

Document received by the CA 3rd District Court of Appeal.

7. Based on my understanding of the requirements of the 2001 Permit and the requirements of the 2007 Permit, I believe the 2007 Permit requires the co-permittees to perform new activities that are unique to local governmental entities that are not required by the 2001 Permit.

8. These new activities include the following:

a. Working Body

1.) Support: Sections F and L of the 2007 Permit require all co-permittees to collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding ("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,000 in support costs and an additional 5% ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The County's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2.) Participation: Section L.1 of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban runoff

Document received by the CA 3rd District Court of Appeal.

programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU establishes minimum levels of representation and participation in working body meetings required to meet these directives. The County's participation costs were determined by multiplying the hourly rate of each staff person involved in these activities by anticipated minimum number of meetings for each working body for each fiscal year and assumed that on average each staff member would spend three hours preparing for and attending each meeting. The cost to the County to comply with this mandated activity for FY 2007-08 is $25,989. Costs for FY 08-09 and beyond are projected based on minimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. The County's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

b. Regional Residential Education Program Development and Implementation: Section F.1 of the 2007 Permit requires the co-permittees to collaboratively develop and implement a Regional Residential Education Program. This is in addition to Section D.5.a, which requires each co-permittee to develop and implement an education program that measurably increases the knowledge of, and measurably changes the behavior of, residential communities within their jurisdictions. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and the development of marketing and research tools, including regional surveys to be conducted in FY 2008-09 and again in FY 2011-12. The co-permittees retained a consultant to perform these mandated activities in Fiscal Year 2007-08. The total cost of the

Document received by the CA 3rd District Court of Appeal.

contract is $131,250 which includes 5% ($6,250) for contract administration by the County. The budgeted cost of these mandated activities increased in FY 2008-09 to $262,500 and is expected to again double in FY 2009-10 to $525,000. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The County's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

c. Development of New/Revised Programs and Standards

1. Hydromodification Management Plan ("HMP") Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000 which includes 5% ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The County's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Sections D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County.

Document received by the CA 3rd District Court of Appeal.

This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The County's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

d. Long-Term Effectiveness Assessment ("LTEA"): In addition to annual assessments of the regional, jurisdictional and watershed programs, Section I.5 of the 2007 Permit requires the co-permittees to collaboratively develop a LTEA. Because of the complexity of the assessment requirements, the consultant costs to perform this assessment, which is expected to be completed in FY 2010-11, are expected to be $210,000, which includes 5% ($10,000) for contract administration by the County. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The County's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

e. Street Sweeping

1.) Equipment Costs: Section D.3.a.(5) of the 2007 Permit mandates specific street sweeping frequencies for improved roads, streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept monthly. Areas with low volumes of trash and/or debris must be swept at least annually. The County used average daily traffic ("ADT") statistics to determine the volume of trash and/or debris that could reasonably be expected to be generated. Improved roads, streets and highways that have more than 20,000 vehicles per day are in the "High" volume of trash and/or debris category. Improved roads, streets and highways that have 15,000 to 20,000 vehicles per day are in the "Medium" volume of trash

Document received by the CA 3rd District Court of Appeal.

and/or debris category. Improved roads, streets and highways that have less than 15,000 vehicles per day are in the "Low" volume of trash and/or debris category. The County has 1,057 miles of improved roads, streets and highways. Based on these standards, 7% of the improved roads, streets and highways are in the "High" category, 6% in the "Medium" category and 87% in the "Low" category. Based on this analysis it was determined that there will be an 8 % increase in the street sweeping activities as a result of the 2007 Permit. To accommodate the required increase, the County has been required to purchase two new mechanical sweeper brooms. The cost of each vehicle is $240,000 ($200,000 purchase price plus $40,000 year amortization over an expected useful life of five years). The annual maintenance and fuel costs are expected to be $30,000 for each vehicle. The County's actual and estimated equipment costs for complying with this mandated activity for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Staffing Costs: In response to Section D.3.a.(5) the County has increased its staffing by 0.36 staff years for FY 2007-08, and is expected to increase by 1.0 staff years in FY 2008-09. The County's cost in FY 2007-08 for an Equipment Operator is $51 per hour. The increase in the County's staffing cost to comply with this mandated activity in FY 2007-08 is $32,399, and is expected to increase to $127,291 in FY 2008-09 and by 4% in each year thereafter. The County's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Contract Costs: The County of San Diego has not incurred additional costs for contracting street sweeping services.

f. Conveyance System Cleaning: Section D.3.a.(3) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be

Document received by the CA 3rd District Court of Appeal.

inspected annually, with high priority facilities being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, the County has increased staffing of its MS4 operations and maintenance program for FY 2007-08 by 2.64 staff years. The County's cost in FY 2007-08 for an Equipment Operator is $51 per hour. The increase in the County's staffing cost to comply with this mandated activity in FY 2007-08 is $237,592 and is expected to increase 4% in FY 2008-09 and each year thereafter. The County's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

g. Educational Surveys and Tests: Section D.5 of the 2007 Permit requires each co-permittee to implement an educational program to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff or receiving waters, and potential Best Management Practices ("BMPs") for the target audiences; and (2) measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Sections I.1 and I.2 further require that the effectiveness of educational activities in meeting these standards be assessed annually where applicable and feasible. Compliance with these mandated activities requires the routine incorporation of testing and surveying methods into the program elements to ensure that implementation is resulting in the targeted outcomes. To comply with this mandate, the County expects to expend 288 hours of staff time in FY 2008-09, and each year thereafter, to develop, administer and analyze surveys and tests. The County's cost in FY 2008-09 for an Environmental Health Specialist III to perform this work is $80 per hour. The increase in the County's staffing cost to comply with these mandated activities in FY 2008-09 is $22,980 and is expected to increase 4% in FY 2009-10 and each year thereafter. The County's actual and

Document received by the CA 3rd District Court of Appeal.

estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

h. Annual JURMP Assessment and Reporting Requirements: Section I.1 of the 2007 Permit specifies prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. Co-permittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a new emerging discipline and is expected to evolve over the term of the Permit. Annual costs are expected to include developing and updating standards and methods, database development and modification, and data tracking, analysis and report writing. To comply with Section I.1 the County will expend 975 hours of staff time in FY 2008-09, and each year thereafter. The County's cost in FY 2008-09 for an Environmental Health Specialist III to perform these mandated activities will be $80 per hour. The increase in the County's staffing cost to comply with these mandated activities in FY 2008-09 is $77,794 and is expected to increase 4% in FY 2009-10 and each year thereafter. The County's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

1. Watershed URMP

1.) Staffing for Development and Implementation: Section E of the 2007 Permit establishes extensive requirements for co-permittees

Document received by the CA 3rd District Court of Appeal.

to collaborative in the development and implementation of activities and programs at the watershed scale. Section E.2.f specifically requires that watershed co-permittees collaborate within their Watershed Management Areas (WMAs) to develop and implement an updated Watershed Urban Runoff Management Program (WURMP) for each watershed in which they are a participant. Lead responsibility for watershed program implementation resides with the County's Department of Planning and Land Use Watershed Planning Division. This program consists of five staff (one Planning manager, two Planner IIIs and two Planner I/IIs). The FY 2007-08 costs are based on annualized projections for year-to-date expenditures. For FY 2008-09 and beyond, it is estimated that staff will spend 70% of their time on WURMP development and implementation. Calculations are based on the following hourly rates for FY 2007-08: Planning Manager - $115; Planner III - $97; and Planner I/II - $81. The increase in the County's staffing cost to comply with these mandated activities in FY 2007-08 is $436,394 and is expected to increase to $713,207 in FY 2008-09 and by 4% each year thereafter. The County's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Cost-Sharing Agreements:

The County has entered into four cost sharing agreements to pay for consultant support relating to the Carlsbad, San Diego River, San Dieguito River, and Penasquitos WURMPs. The consultant costs for FY 2007-08 are estimated to be $15,000. Additional consultant services will be necessary in future years based on the development of cost sharing agreements for other WURMPs and an increasing need for coordination within each WURMP over the Permit cycle. The County's budgeted cost for this mandated activity for FY 2008-09 is $25,000, and is expected to increase by 5% in FY 2009-10 and each year thereafter. The County's

Document received by the CA 3rd District Court of Appeal.

actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Implementation of Watershed Activities: Section E.2.f of the 2007 Permit requires Watershed co-permittees to implement at least two watershed quality activities and two watershed education activities for each permit year. The cost of implementing this mandate for FY 2007-08 is expected to be $40,000. Because of the wide range of potential costs for these activities, we anticipate that these costs will increase on average 20% per year. The County's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

9. The actual increased costs incurred by the County in FY 2007-08 to comply with the mandated activities required by the 2007 Permit will be $1,485,274, and are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

10. The estimated increased costs that the County expects to incur in FY 2008-09, are expected to be $1,835,181, and are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

11. The estimated increased costs that the County expects to incur during each year of the remaining term of the 2007 Permit are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

12. I am not aware of any dedicated state or federal funds that are or will be available to pay for these increased costs.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

Document received by the CA 3rd District Court of Appeal.

14. I am not aware of any authority to assess a fee to offset these increased costs.

15. I believe that the only available source to pay these increased costs are and will be the County's general purpose funds.

Executed this 12th day of June at San Diego, California.

I declare under penalty of perjury that the foregoing is true and correct.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

Co-Permitee - Unincorporated

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
Working Body Support	$0.00	$161,599.73	$169,679.79	$178,163.72	$187,071.74	Permit section L.1 requires that all Copermittees collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs and Watershed Urban Runoff Management Programs, and to plan and coordinate activities required under the Permit. Ten regional working bodies were established per the Copermittee's Jan. 2008 MOU to support the regional coordination of programs and activities required under the Permit. Working body costs represent consultant and/or Copermittee staff support for the Copermittee's Program Planning subcommittee and nine Regional Workgroups or Sub-workgroups. FY 08-09 costs were established in the amount of $543,375 which includes $517,500 in support costs and an additional 5% ($25,875) for contract administration. FY 2008-09 costs were calculated at $125 per hour. A 5% total cost increase is also factored in each subsequent year.
Working Body Participation	$25,989.00	$32,862.00	$28,342.00	$29,475.00	$30,654.00	Copermittees must also maintain representation in, and participate in meetings of, each of the working bodies established under the MOU. The estimates presented here are County costs only. County participation costs are determined by multiplying the hourly rate of each staff person by the number of meetings each fiscal year, and assuming an average meeting length of three hours. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs for FY 08-09 and beyond are projected based on minimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. Detailed calculations can be found in Worksheet B.

d by the CA 3rd District Court of Appeal.

Regional Residential Education Program Development and Implementation	$39,033.75	$78,067.50	$156,135.00	$163,941.75	$172,138.99	Permit section F.1 requires that the Copermittees collaboratively develop and implement a Regional Residential Education Program. This is in addition to section D.5.a, which requires that each Copermittee provide education to, measurably increase the knowledge of, and measurably change the behavior of, residential communities within their jurisdiction. An FY 2007-08 budget for consultant support was initially established for this program in the amount of $131,250 ($125,000 for contract costs and $6,250 for contract administration). This figure was increased to $262,500 in FY 2008-09, and is expected to double again in FY 2009-10. Each subsequent year assumes a 5% increase. Regional program activities to be funded include: materials development / branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and marketing and research tools including the regional surveys to be conducted in FY 2008-09 and FY 2011-12.
Hydromodification Management Plan (HMP) Development	$243,253.67	$162,169.12	$0.00	$0.00	$0.00	Order R9-2007-0001 mandates the collaborative development of a Hydromodification Management Plan (HMP). This task was initiated by the Copermittees' consultant during FY 2007-08 and will be completed in FY 2008-09. The total cost of plan development is $1,050,000, $50,000 of which is for contract administration.
Low Impact Development (LID) and Standard Urban Stormwater Mitigation Plan (SUSMP)	$15,613.50	$0.00	$0.00	$0.00	$0.00	Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU.
Long-term Effectiveness Assessment (LTEA)	$0.00	$0.00	$0.00	$62,454.00	$0.00	In addition to requirements for Copermittees to annually assess their regional, jurisdictional and watershed programs, Permit section I.1 requires the collaboratative development of a Long-term Effectiveness Assessment (LTEA) that builds on the results of the August 2005 Baseline LTEA. The cost of the 2005 LTEA was $125,000. Because of the increased complexity of new assessment requirements, this consultant cost is expected to increase to $200,000, with an additional 5% ($10,000) for contract administration.
JURISDICTIONAL URMP ACTIVITIES						
4.0 Development Planning						Reimbursable costs are not projected for this component.
5.0 Construction						Reimbursable costs are not projected for this component.

Document received by the CA 3rd District Court of Appeal.

6.0 Municipal						
Street Sweeping (equipment costs)	$400,000.00	$140,000.00	$140,000.00	$140,000.00	$140,000.00	Permit Section D.3.(5) requires street sweeping frequencies for improved roads (possessing curbs and gutters), streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept at two times per month. Areas with medium volumes of trash and/or debris must be swept monthly and areas with low volumes of trash and/or debris at least annually. The County uses average daily traffic (ADT) as a proxy for determining the level of trash and debris generated. The categories are as follows: High is defined ADT greater than 20,000 vehicles per day (vpd), medium is defined as ADT between 15,000 and 20,000 vpd, and low is defined as ADT less than 15,000 vpd. The County has approximately 1,057 miles of roads with curbs/berms, with 7% identified as high, 6% as medium and 87% as low. Applying the permit-required sweeping frequencies results in an ~8% increase in overall street sweeping activities over existing levels. To accommodate the required increase, the County has purchased two additional mechanical sweeper brooms. The cost of each vehicle is $240,000 ($200,000 purchase price plus $40,000 year amortization over an expected useful life of five years). The annual maintenance and fuel costs are expected to be $30,000 for each vehicle
Street Sweeping (staffing costs)	$32,398.85	$127,291.47	$132,383.13	$137,678.46	$143,185.60	In response to Section D.3.(5) the County has increased its staffing by 0.36 staff years for FY 2007-08, and is expected to increase by 1.0 staff years in FY 2008-09. The County's cost in FY 2007-08 for an Equipment Operator is $51 per hour. The increase in the County's staffing cost to comply with this mandated activity in FY 2007-08 is $32,399, and is expected to increase to $127,291 in FY 2008-09 and by 4% in each year thereafter.
Street Sweeping (contract costs)	$0.00	$0.00	$0.00	$0.00	$0.00	The County of San Diego has not incurred additional costs for contracting street sweeping services.
Conveyance System Cleaning	$237,591.55	$247,095.21	$256,979.02	$267,258.18	$277,948.51	Permit section D.3.(3).(b) mandates that all MS4 facilities be inspected annually, with high priority facilitates being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, additional staffing impacts are projected. The County has increased its MS4 operations and maintenance program by 2.64 staff years in Fy 2007-08. Costs are calculated at $50.56 per hour for Operations Engineers and increased by 4% in each subsequent year.
7.0 Industrial and Commercial						Reimbursable costs are not projected for this component because new costs can be passed through to regulated parties.
9.0 Illicit Discharge Detection & Elimination Component (IDDEC)						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
10.0 Education						
Educational Surveys and Tests	$0.00	$22,095.36	$22,979.17	$23,898.34	$24,854.28	The Permit mandates an educational component that requires the implementation of educational programs to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff on receiving waters, and potential BMP solutions for the target audience; and (2) to measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Compliance with this standard requires the routine incorporation of testing and surveying methods into program elements to ensure that implementation is resulting in targeted outcomes. FY 07-08 staffing impacts are estimated at three days per month (288 hours per year) to develop, administer, and analyze surveys and tests. Costs are calculated at the EHS III level ($76.72 per hour), and increased by 4% each year after FY 2008-09.
11.0 Public Participation						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
12.0 Fiscal Assessment						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.

l by the CA 3rd District Court of Appeal.

13.0 Effectiveness Assessment						
Annual JURMP Assessment and Reporting	$0.00	$77,794.08	$80,905.84	$84,142.08	$87,507.76	Permit section I.1 lays out prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. To the extent applicable and feasible, Copermittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a newly emerging discipline, and will continue to evolve over the entire Permit cycle. Annual costs typically include developing and updating standards and methods, database development and modification, and data tracking, analysis, and report writing. Although these responsibilities may be incurred across a number of program areas and staff, annual costs are calculated as 975 hours of time (~0.5 staff years) at the EHS III level ($76.72 per hour).
[redacted]						
Staffing for Watershed URMP development and implementation	$436,394.00	$713,207.00	$741,735.28	$771,404.69	$802,260.88	Lead responsibility for watershed program implementation resides with the DPLU Watershed Planning Division. This program consists of five staff (one Planning Manager, two Planner IIIs, and two Planner I/IIs). FY 07-08 cost estimates are based on annualized projections from YTD expenditures. These totals are lower than those projected for the following years because the program has been short staffed for the majority of the year. For FY 2008-09 and beyond, an estimated 70% of total staff time for these positions is spent on WURMP development and implementation. Calculations assume the following hourly rates for FY 2007-08; Planning Manager ~ $115, Planner III ~ $97, and Planner I/II ~ $81). These rates are increased by 4% in each subsequent year.
WURMP Cost-Share Agreements	$15,000.00	$25,000.00	$26,250.00	$27,563.00	$28,940.00	Cost share agreements are used to pay for WURMP consultant support. The FY 07-08 total is based on actual County contributions to the WURMP Cost Share Agreements in which it participates. Increases are estimated for future years based on requirements for increased coordination on WURMP issues in the new Permit. A 5% increase is also assumed for each year after FY 2008-09.
Implementation of Watershed Activities	$40,000.00	$48,000.00	$57,600.00	$69,120.00	$82,944.00	Permit section E.2.f requires Watershed Copermittees to implement at least two watershed water quality activities and two watershed education activities for each permit year. The County budgeted $40,000 for implementing WURMP activities in FY 07-08. Because of the wide range of potential costs for these activities, a 20% increase is assumed in each subsequent year.
TOTALS	$1,485,274.32	$1,835,181.48	$1,812,989.24	$1,955,099.22	$1,977,505.75	

d by the CA 3rd District Court of Appeal.

d by the CA 3rd District Court of Appeal.

EXHIBIT 6 "B" - DECLARATION OF GLENN PRUIM FOR CITY OF CARLSBAD.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

DECLARATION OF GLENN PRUIM ON BEHALF OF THE CITY OF CARLSBAD IN SUPPORT OF TEST CLAIM

I, Glenn Pruim, declare as follows:

1. I make this declaration based upon my own personal knowledge, except for matters set forth herein on information and belief, and as to those matters I believe them to be true, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. I have earned a Bachelor of Science and a Master of Sciences Degree in Civil Engineering. I attended several classes in Storm Water training.

3. I am employed by the City of Carlsbad as the Public Works Director.

4. I have held my current position for approximately 2 years. My duties include direction and oversight of the Public Works Department, including the City's Storm Water Program.

5. I have reviewed the California Regional Water Quality Control Board ("RWQCB"), San Diego Region, Order No. R9-2007-0001 (NPDES No. CAS 0108758) (the "2007 Permit") and I am familiar with the requirements of the Permit.

6. I have also reviewed and I am familiar with the requirements of Order No. 2001-01 (NPDES CAS0108758) issued by the San Diego RWQCB on February 21, 2001 (the "2001 Permit").

7. Based on my understanding of the requirements of the 2001 Permit and the requirements of the 2007 Permit, I believe the 2007 Permit requires the co-permittees to perform new activities that are unique to local governmental entities that are not required by the 2001 Permit.

Document received by the CA 3rd District Court of Appeal.

8. These new activities include the following:

a. Working Body

1.) Support: Sections F and L.1 of the 2007 Permit require all co-permittees to collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding ("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,000 in support costs and an additional 5% ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Carlsbad's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2.) Participation: Section L.1 of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban runoff programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU establishes minimum levels of representation and participation in working body meetings required to meet these directives. The City of Carlsbad's participation costs were determined by multiplying the hourly rate of each staff person involved in these activities by anticipated minimum number of meetings for

Document received by the CA 3rd District Court of Appeal.

each working body for each fiscal year and assumed that on average each staff member would spend 10 hours per month preparing for and attending meetings. The cost to the City of Carlsbad to comply with this mandated activity for FY 2007-08 is $45,793. Costs for FY 08-09 and beyond are projected based on minimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. The City of Carlsbad's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

b. Regional Residential Education Program Development and Implementation: Section F.1 of the 2007 Permit requires the co-permittees to collaboratively develop and implement a Regional Residential Education Program. This is in addition to Section D.5.a, which requires each co-permittee to develop and implement an education program that measurably increases the knowledge of, and measurably changes the behavior of, residential communities within their jurisdictions. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and the development of marketing and research tools, including regional surveys to be conducted in FY 2008-09 and again in FY 2011-12. The co-permittees retained a consultant to perform these mandated activities in Fiscal Year 2007-08. The total cost of the contract is $131,250 which includes 5% ($6,250) for contract administration by the County. The budgeted cost of these mandated activities increased in FY 2008-09 to $262,500 and is expected to again double in FY 2009-10 to $525,000. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Carlsbad's proportional share of the budgeted costs for complying

Document received by the CA 3rd District Court of Appeal.

with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

c. Development of New/Revised Programs and Standards

1. Hydromodification Management Plan ("HMP") Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000 which includes 5% ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Carlsbad's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Sections D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Carlsbad's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

d. Long-Term Effectiveness Assessment ("LTEA"): In addition to annual assessments of the regional, jurisdictional and watershed programs, Section I.5 of the 2007 Permit requires the co-permittees to collaboratively develop a LTEA. Because of the complexity of the assessment requirements, the consultant costs to perform this assessment, which is expected to be completed in FY 2010-11, are expected to be $210,000, which includes 5% ($10,000) for contract administration by the County. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Carlsbad's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

e. Street Sweeping: The City of Carlsbad implemented a street sweeping prigram that meets or exceeds the 2007 Permit requirements after the issuance of the 2001 Permit. The City of Carlsbad is therefore unable to now quantify the additional costs mandated by the 2007 Permit and is not now claiming an amount for Street Sweeping.

f. Conveyance System Cleaning: Section D.3.(a)(3) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be inspected annually, with high priority facilities being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, the City of Carlsbad has encumbered $53,000 to pay for a contractor to provide these services for FY 2007-08. An additional $3,000 is allocated for staff time to oversee these activities. These costs are expected to increase 4% in FY 2008-09 and each year thereafter. The City of Carlsbad's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are

Document received by the CA 3rd District Court of Appeal.

detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

g. Educational Surveys and Tests: Section D.5 of the 2007 Permit requires each co-permittee to implement an educational program to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff or receiving waters, and potential Best Management Practices ("BMPs") for the target audiences; and (2) measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Sections I.1 and I.2 further require that the effectiveness of educational activities in meeting these standards be assessed annually where applicable and feasible. Compliance with these mandated activities requires the routine incorporation of testing and surveying methods into the program elements to ensure that implementation is resulting in the targeted outcomes. To comply with these mandates the City of Carlsbad has hired a consultant to measure the effectiveness of education programs for city staff. The City of Carlsbad's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

h. Annual JURMP Assessment and Reporting Requirements: Section I.1 of the 2007 Permit specifies prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. Co-permittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a new emerging discipline and is expected to evolve over the term of the Permit. Annual costs are expected to include developing and

Document received by the CA 3rd District Court of Appeal.

updating standards and methods, database development and modification, and data tracking, analysis and report writing. To comply with these mandates the City of Carlsbad will expend 164 hours of staff time in FY 2008-09, and each year thereafter. The City of Carlsbad's cost in FY 2008-09 for a Senior Environmental Specialist to perform these mandated activities will be $78.70 per hour. The increase in the City of Carlsbad's staffing cost to comply with these mandated activities in FY 2007-08 is $42,867 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Carlsbad's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

1. Watershed URMP

1.) Staffing for Development and Implementation: The Permit requires implementation of Watershed Urban Runoff Management Program. Lead responsibility for the Carlsbad watershed program implementation resides with the Carlsbad Storm Water Protection Division. This program consists of a contracted Watershed Coordinator and staff time. Staff consists of a Storm Water Manager - $106.36 for 5 hours per month, Senior Environmental Specialist - $78.70 for 1 hour per month and an Environmental Specialist I/II - $67.03 for 1 hour per month. The City of Carlsbad's contract and staffing costs to comply with these mandated activities in FY 2007-08 is $34,740 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Carlsbad's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Implementation of Watershed Activities: Section E.2.f of the 2007 Permit requires Watershed co-permittees to implement at least two watershed

Document received by the CA 3rd District Court of Appeal.

quality activities and two watershed education activities for each permit year. The cost of implementing this mandate for FY 2007-08 is expected to be $10,000. Because of the wide range of potential costs for these activities, we anticipate that these costs will increase on average 20% per year. The City of Carlsbad's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

9. The actual increased costs incurred by the City of Carlsbad in FY 2007-08 to comply with the mandated activities required by the 2007 Permit will be $205,016 and are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

10. The estimated increased costs that the City of Carlsbad expects to incur in FY 2008-09, are expected to be $216,313 and are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

11. The estimated increased costs that the City of Carlsbad expects to incur during each year of the remaining term of the 2007 Permit are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

12. I am not aware of any dedicated state or federal funds that are or will be available to pay for these increased costs.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

14. I am not aware of any authority to assess a fee to offset these increased costs.

Document received by the CA 3rd District Court of Appeal.

15. I believe that the only available source to pay these increased costs are and will be the city's general purpose funds.

Executed this 10TH day of JUNE at CARLSBAT, California.

I declare under penalty of perjury that the foregoing is true and correct.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

Co-Permittee City of

Carlsbad

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
Working Body Support	$0.00	$17,333.66	$18,200.35	$19,110.36	$20,065.87	Permit section L.1 requires that all Copermittees collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs and Watershed Urban Runoff Management Programs, and to plan and coordinate activities required under the Permit. Ten regional working bodies were established per the Copermittee's Jan. 2008 MOU to support the regional coordination of programs and activities required under the Permit. Working body costs represent consultant and/or Copermittee staff support for the Copermittee's Program Planning subcommittee and nine Regional Workgroups or Sub-workgroups. FY 08-09 costs were established in the amount of $543,375 which includes $517,500 in support costs and an additional 5% ($25,875) for contract administration. FY 2008-09 costs were calculated at $125 per hour. A 5% total cost increase is also factored in each subsequent year.
Working Body Participation	$45,973.20	$47,720.18	$32,593.54	$33,832.10	$35,117.72	Copermittees must also maintain representation in, and participate in meetings of, each of the working bodies established under the MOU. The estimates presented here are estimated City costs only. Assumes 10 hrs / mo of Environmental Specialist II & Sr. ES time, 10 hours / mo of Storm Water Manager time. Multiply by Fully burdened Rate (Storm Water Manager - $106.36, Sr. Env. Specialist - $78.70, Env. Specialist I/II $67.03). Factor 3.8% increase in rates annually. Estimate 10 hours/mo for Deputy City Engineer ($131.02/hr) (Channel Mtce & HMP Workgroups only) for FY08 and FY09, 0 hours after that.
Regional Residential Education Program Development and Implementation	$4,186.88	$8,373.75	$16,747.50	$17,584.88	$18,464.13	Permit section F.1 requires that the Copermittees collaboratively develop and implement a Regional Residential Education Program. This is in addition to section D.5.a, which requires that each Copermittee provide education to, measurably increase the knowledge of, and measurably change the behavior of, residential communities within their jurisdiction. An FY 2007-08 budget for consultant support was initially established for this program in the amount of $131,250 ($125,000 for contract costs and $6,250 for contract administration). This figure was increased to $262,500 in FY 2008-09, and is expected to double again in FY 2009-10. Each subsequent year assumes a 5% increase. Regional program activities to be funded include: materials development / branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and marketing and research tools including the regional surveys to be conducted in FY 2008-09 and FY 2011-12.

d by the CA 3rd District Court of Appeal.

Hydromodification Management Plan (HMP) Development	$36,989.70	$24,659.80	$0.00	$0.00	$0.00	Order R9-2007-0001 mandates the collaborative development of a Hydromodification Management Plan (HMP). This task was initiated by the Copermittees' consultant during FY 2007-08 and will be completed in FY 2008-09. The total cost of plan development is $1,050,000, $50,000 of which is for contract administration.
Low Impact Development (LID) and Standard Urban Stormwater Mitigation Plan (SUSMP)	$1,674.75	$0.00	$0.00	$0.00	$0.00	Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU.
Long-term Effectiveness Assessment (LTEA)	$0.00	$0.00	$0.00	$6,699.00	$0.00	In addition to requirements for Copermittees to annually assess their regional, jurisdictional and watershed programs, Permit section 1.1 requires the collaboratative development of a Long-term Effectiveness Assessment (LTEA) that builds on the results of the August 2005 Baseline LTEA. The cost of the 2005 LTEA was $125,000. Because of the increased complexity of new assessment requirements, this consultant cost is expected to increase to $200,000, with an additional 5% ($10,000) for contract administration.
4.0 Development Planning						
HMP, LID, and SUSMP (Design)						Advised that this was not going to be included in unfunded mandate claim.
HMP, LID, and SUSMP (Implementation)						Advised that this was not going to be included in unfunded mandate claim.
5.0 Construction						
Advanced Treatment (Design, Review, & Implementation)						Advised that this was not going to be included in unfunded mandate claim.
6.0 Municipal						
Street Sweeping (equipment costs)	$0.00	$0.00	$0.00	$0.00	$0.00	Carlsbad contracts Street Sweeping, and the contract calls for a higher level of service than is required by permit. No incremental increase as a result of new permit. Old permit did not explicitly call for Street Sweeping, however, it did require BMPs on High Priority Facilities (i.e., Streets), so the City used Street Sweeping to meet this requirement.
Street Sweeping (staffing and /or contract costs)	$0.00	$0.00	$0.00	$0.00	$0.00	See above, no incremental increase in costs.

d by the CA 3rd District Court of Appeal.

Conveyance System Cleaning	$56,000.00	$58,128.00	$60,336.86	$62,629.66	$65,009.59	Storm Drain program has encumbered $53,000 for contract cleaning, and anticipates about $3,000 in staff time this FY. Increased these amounts by 3.8% annually for next 5 years. Actual costs this year are estimated to be $30,000 for cleaning/inspection and $3,000 staff time and materials.
7.0 Industrial and Commercial						Reimbursable costs are not projected for this component because new costs can be passed through to regulated parties.
9.0 Illicit Discharge Detection & Elimination Component (IDDEC)						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
10.0 Education						
Educational Surveys and Tests	$4,850.00	$0.00	$0.00	$0.00	$0.00	Costs of consultant ($4,850) for measuring effectiveness of education programs for City Staff. Future years' costs are unknown, therefore we did not list any.
11.0 Public Participation						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
12.0 Fiscal Assessment						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
13.0 Effectiveness Assessment						
Annual JURMP Assessments	$12,867.45	$13,356.41	$13,863.96	$14,390.79	$14,937.64	Estimate 30% of time spent on JURMP AR. Used FY06-07 as baseline-545 total hours, 163.5 is 30%. Used Sr. ES ($78.70/hr) as average level for cost basis, and 3.8% increase per year.
[redacted]						
Staffing for Watershed URMP development and implementation	$26,962.00	$27,281.10	$28,645.10	$30,077.41	$39,923.36	Lead responsibility for Carlsbad watershed program resides with the Storm Water Protection Division. This program consists of a contracted Watershed Coordinator, and staff time. Staff increased by 3.8% annually. Contract dollars are actual for term of contract, Calculations assume the following hourly rates for FY 2007-08; Storm Water Manager - $106.36 5 hrs/mo, Sr. Env. Specialist - $78.70, Env. Specialist I/II $67.03 1 hr/mo (from fully burdened rate listing)).
WURMP Cost-Share Agreements						Costs included above. Carlsbad is Watershed Lead and doesn't contribute to another watershed.
Implementation of Watershed Activities	$10,000.00	$12,000.00	$14,400.00	$17,280.00	$20,736.00	Permit section E.2.f requires Watershed Copermittees to implement at least two watershed water quality activities and two watershed education activities for each permit year. The City budgeted $10,000 for WURMP activities cost share in FY 07-08, and recurring. Using County's 20% number for consistency in outlying years.
TOTALS	**$199,503.98**	**$208,852.90**	**$184,787.31**	**$201,604.20**	**$214,254.30**

Document received by the CA 3rd District Court of Appeal.

EXHIBIT 6 "C" - DECLARATION OF KHOSRO AMINPOUR
FOR CITY OF CHULA VISTA

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

DECLARATION OF KHOSRO AMINPOUR ON BEHALF OF THE CITY OF CHULA VISTA IN SUPPORT OF TEST CLAIM

I, Khosro Aminpour, declare as follows:

1. I make this declaration based upon my own personal knowledge, except for matters set forth herein on information and belief, and as to those matters I believe them to be true, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. My qualifications are as follows:

- Bachelors Degree in Civil Engineering
- Licensed Professional Civil Engineer in the State of California
- Over nine years experience in the field of storm water management
- Participated in numerous workshops, training courses, and seminars in the field of storm water management and received certificates when available

3. I am employed by the City of Chula Vista as a Senior Civil Engineer.

4. I have held my current position for approximately nine and one-half years. My duties include:

- Supervising the City's Storm Water Management Section
- Reviewing project submittals for compliance with storm water management requirements
- Reviewing and providing comments on storm water related legislation and permits during public comment period
- Participating in regional and watershed workgroup activities and meetings
- Providing training to City staff on storm water regulations
- Administration of contracts for storm water public education and monitoring
- Responding to enquiries from developers, consultants, and the general public on storm water related issues

Document received by the CA 3rd District Court of Appeal.

5. I have read the California Regional Water Quality Control Board ("RWQCB"), San Diego Region, Order No. R9-2007-0001 (NPDES No. CAS 0108758) (the "2007 Permit") and I am familiar with the requirements of the Permit.

6. I have also reviewed and am familiar with the requirements of Order No. 2001-01 (NPDES No. CAS 0108758) issued by the San Diego RWQCB on February 21, 2001 (the "2001 Permit").

7. Based on my understanding of the requirements of the 2001 Permit and the requirements of the 2007 Permit, I believe the 2007 Permit requires the co-permittees to perform new activities that are unique to local governmental entities that are not required by the 2001 Permit.

8. These new activities include the following:

a. Working Body

1. Support: Sections F and L.1 of the 2007 Permit require all co-permittees to collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding ("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,500 in support costs and an additional 5 percent ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5 percent in FY 2009-10 and each year thereafter. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Chula Vista's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and

Document received by the CA 3rd District Court of Appeal.

each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Participation: Section L.1.a of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban runoff programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU establishes minimum levels of representation and participation in working body meetings required to meet these directives. The City of Chula Vista's participation costs were determined by multiplying the hourly rate of each staff person involved in these activities by anticipated minimum number of meetings for each working body for each fiscal year and assumed that on average each staff member would spend three hours preparing for and attending each meeting. The cost to the City of Chula Vista to comply with this mandated activity for FY 2007-08 is $9,648. Costs for FY 2008-09 and beyond are projected based on minimum mandated meeting frequencies for each working body. Hourly rates are increased by 4 percent each year after FY 2007-08. The City of Chula Vista's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

b. Regional Residential Education Program Development and Implementation: Section F.1 of the 2007 Permit requires the co-permittees to collaboratively develop and implement a Regional Residential Education Program. This is in addition to Section D.5.a, which requires each co-permittee to develop and implement an education program that measurably increases the knowledge of, and measurably changes the behavior of, residential communities within their jurisdictions. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and the development of marketing and research tools, including regional surveys to be conducted

Document received by the CA 3rd District Court of Appeal.

in FY 2008-09 and again in FY 2011-12. The co-permittees retained a consultant to perform these mandated activities in Fiscal Year 2007-08. The total cost of the contract is $131,250 which includes 5 percent ($6,250) for contract administration by the County. The budgeted cost of these mandated activities increased in FY 2008-09 to $262,500 and is expected to again double in FY 2009-10 to $525,000. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Chula Vista's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

c. Development of New/Revised Programs and Standards

1. Hydromodification Management Plan ("HMP") Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000, which includes 5 percent ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Chula Vista's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Sections D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500, which includes 5 percent ($2,500) for

Document received by the CA 3rd District Court of Appeal.

contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Chula Vista's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

d. Long-Term Effectiveness Assessment ("LTEA"): In addition to annual assessments of the regional, jurisdictional and watershed programs, Section I.5 of the 2007 Permit requires the co-permittees to collaboratively develop a LTEA. Because of the complexity of the assessment requirements, the consultant costs to perform this assessment, which is expected to be completed in FY 2010-11, are expected to be $210,000, which includes 5 percent ($10,000) for contract administration by the County. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Chula Vista's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

e. Street Sweeping

1. Equipment Costs: Section D.3.(5) of the 2007 Permit mandates specific street sweeping frequencies for improved roads, streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept monthly. Areas with low volumes of trash and/or debris must be swept at least annually. The City of Chula Vista contracts with a private company to provide street sweeping services. The cost of the FY 2008-09 street sweeping contract is $264,709. Prior to the 2007 Permit being issued, the City of Chula Vista implemented a sweeping program that meets or exceeds the 2007 Permit requirements. Therefore, the City is now unable to quantify the costs of 2007 Permit mandates.

2. Staffing Costs: In response to Section D.3.(5), all staffing is provided by a private contractor under a street sweeping agreement.

Document received by the CA 3rd District Court of Appeal.

3. Contract Costs: The City of Chula Vista contracts with a private company to provide street sweeping services. The total cost of this contract is $264,709. The City of Chula Vista street sweeping program was already performing at the level of the Permit requirements prior to adoption of the 2007 Permit. The contract costs for FY 2007-08 and estimated increased contract costs for future years are detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

f. Conveyance System Cleaning: Section D.3.(a)(3) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be inspected annually, with high priority facilities being inspected between May and September. Any catch basin or storm drain inlet that has accumulated trash and debris greater than 33 percent of design capacity is to be cleaned in a timely manner. Because inspected facilities must be cleaned in accordance with specific Permit requirements, the City of Chula Vista has increased staffing of its MS4 operations and maintenance program for FY 2007-08 by 1.25 staff years and will need to increase staffing by another 8.75 staff years in FY 2008-09. The City of Chula Vista has procured two additional vacuum trucks and plans to purchase various other equipment necessary to meet the 2007 Permit's conveyance system cleaning requirements in FY 2008-2009. City of Chula Vista's additional conveyance system inspection and cleaning costs in FY 2007-08 for staff and equipment is $824,196. The City of Chula Vista's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

g. Educational Surveys and Tests: Section D.5 of the 2007 Permit requires each co-permittee to implement an educational program to: (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff on receiving waters, and potential Best Management Practices ("BMPs") for the target audiences; and (2) measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Sections I.1 and I.2 further

Document received by the CA 3rd District Court of Appeal.

require that the effectiveness of educational activities in meeting these standards be assessed annually where applicable and feasible. Compliance with these mandated activities requires the routine incorporation of testing and surveying methods into the program elements to ensure that implementation is resulting in the targeted outcomes. To comply with Sections I.1 and I.2, the City of Chula Vista has added an Engineering Technician to the Storm Water Management Section to perform educational surveys and tests in addition to other data management work required for annual JURMP assessment. The City of Chula Vista's cost to develop, administer and analyze surveys and tests is not readily separable from the costs for annual JURMP assessment and reporting requirements, and this cost has been included in Item (h.) below. The City of Chula Vista's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are, therefore, shown as zero in Exhibit A to this declaration and Exhibit 1 to the Test Claim.

h. Annual JURMP Assessment and Reporting Requirements: Section I.1 of the 2007 Permit specifies prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. Co-permittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a new emerging discipline and is expected to evolve over the term of the Permit. Annual costs are expected to include developing and updating standards and methods, database development and modification, and data tracking, analysis and report writing. To comply with Section I.1, the City of Chula Vista has expended 738 hours of staff time in FY 2007-08, and will expend 1477 hours of staff time each year thereafter. The City of Chula Vista's cost in FY 2007-08 for an

Document received by the CA 3rd District Court of Appeal.

Engineering Technician to perform these mandated activities is $99 per hour. The increase in the City of Chula Vista's staffing cost to comply with these mandated activities in FY 2007-08 is $73,112 and in FY 2008-2009 will be $152,072 and is expected to increase 4 percent in FY 2009-10 and each year thereafter. The City of Chula Vista's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

i. Watershed URMP

1. Staffing for Development and Implementation: Section E.2 of the 2007 Permit requires each co-permittee to develop and implement an updated Watershed Urban Runoff Management Program. The City of Chula Vista has determined that the level of staff time contribution to this effort is not significantly higher than the level of staff time contribution required by the 2001 Permit and, therefore, the City of Chula Vista will not incur additional costs as a result of this 2007 Permit requirement. The main responsibility for this item falls to the County of San Diego as the Principal Permittee and the Port of San Diego as the Watershed Lead Permittee. Therefore, the City of Chula Vista's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are shown as zero in Exhibit A to this declaration and Exhibit 1 to the Test Claim.

2. Cost-Sharing Agreements: To date, the City of Chula Vista has not entered into a cost sharing agreement with other co-permittees of the San Diego Bay Watershed to pay for consultant support relating to the San Diego Bay WURMPs. At this time it is not possible to predict if consultant services will be necessary in future years for WURMP activities. Should an increasing need for coordination within the San Diego Bay Watershed become necessary over the Permit cycle due to an increased need for coordination within each WURMP over the Permit cycle, costs will be assessed at that time. However, at this time it is difficult to quantify a cost for those services. The City of

Document received by the CA 3rd District Court of Appeal.

Chula Vista's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are, therefore, shown as zero in Exhibit A to this declaration and Exhibit 1 to the Test Claim.

3. Implementation of Watershed Activities: Section E.2.f of the 2007 Permit requires Watershed co-permittees to implement at least two watershed quality activities and two watershed education activities for each Permit year. The City of Chula Vista's cost of implementing this mandate for FY 2007-08 is expected to be $35,000. Estimated costs are approximate considering the wide range of potential watershed activities. We anticipate that these costs will increase on average by 4 percent per year. The City of Chula Vista's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

9. The actual increased costs incurred by the City of Chula Vista in FY 2007-08 to comply with the mandated activities required by the 2007 Permit will be $1,013,871.41, and are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

10. The estimated increased costs that the City of Chula Vista expects to incur in FY 2008-09, are expected to be $2,236,213.23, and are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

11. The estimated increased costs that the City of Chula Vista expects to incur during each year of the remaining term of the 2007 Permit are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

12. I am not aware of any dedicated state or federal funds that are or will be available to pay for these increased costs.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

14. I am not aware of any authority to assess a fee to offset these increased costs.

Document received by the CA 3rd District Court of Appeal.

15.I believe that the only available source to pay these increased costs are and will be the City of Chula Vista's general purpose funds.

Executed this 12 day of June 2008 at Chula Vista, California.

I declare under penalty of perjury that the foregoing is true and correct.

K. Aminpour

d by the CA 3rd District Court of Appeal.

Element		FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
13.0 Effectiveness Assessment						
Annual JURMP Assessment and Reporting	$73,112.00	$152,072.00	$158,155.00	$164,481.00	$171,060.00	Permit section I.1 lays out prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. To the extent applicable and feasible, Copermittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a newly emerging discipline, and will continue to evolve over the entire Permit cycle. Annual costs typically include developing and updating standards and methods, database development and modification, and data tracking, analysis, and report writing. Although these responsibilities may be incurred across a number of program areas and staff, one Engineering Technician was hired in January 2008 in order to address data mangement, tracking, analysis, and reporting (includes a 4% increas each FY for staff time).
[redacted]						
Staffing for Watershed URMP development and implementation	$0.00	$0.00	$0.00	$0.00	$0.00	Staff time spent is the same as in the previous permit. No additional costs are incurred.
WURMP Cost-Share Agreements	$0.00	$0.00	$0.00	$0.00	$0.00	This does not apply to Chula Vista because cost-sharing is each watershed lead's responsibility.
Implementation of Watershed Activities	$35,000.00	$36,500.00	$38,000.00	$39,500.00	$41,000.00	Permit section E.2.f requires Watershed Copermittees to implement at least two watershed water quality activities and two watershed education activities for each permit year. Estimated costs are approximate considering the wide range of potential watershed activities.
TOTALS	$1,013,871.41	$2,236,213.23	$1,998,331.92	$2,082,497.66	$2,146,437.04	

628

Filed by the CA 3rd District Court of Appeal

Element		FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
Low Impact Development (LID) and Standard Urban Stormwater Mitigation Plan (SUSMP)	$2,887.50	$0.00	$0.00	$0.00	$0.00	Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU.
Long-term Effectiveness Assessment (LTEA)	0	0	0	$11,550.00	0	In addition to requirements for Copermittees to annually assess their regional, jurisdictional and watershed programs, Permit section 1.1 requires the collaboratative development of a Long-term Effectiveness Assessment (LTEA) that builds on the results of the August 2005 Baseline LTEA. The cost of the 2005 LTEA was $125,000. Because of the increased complexity of new assessment requirements, this consultant cost is expected to increase to $200,000, with an additional 5% ($10,000) for contract administration.
4.0 Development Planning						Reimbursable costs are not projected for this component.
5.0 Construction						Reimbursable costs are not projected for this component.
6.0 Municipal						
Street Sweeping (equipment s)	$0.00	$0.00	$0.00	$0.00	$0.00	There are no additional street sweeping costs to the City because the current street sweeping program meets and exceeds Permit requirements.
et Sweeping (staffing costs)	$0.00	$0.00	$0.00	$0.00	$0.00	There are no additional street sweeping costs to the City because the current street sweeping program meets and exceeds Permit requirements.
Street Sweeping (contract costs)	$0.00	$0.00	$0.00	$0.00	$0.00	There is no additional street sweeping costs to the City because the current street sweeping program meets and exceeds Permit requirements.
Conveyance System Cleaning	$824,196.00	$1,950,755.00	$1,734,316.00	$1,795,789.00	$1,859,720.00	Cost for FY07-08 includes the purchase of two new storm drain vactor trucks ($620,000 ordered in FY06-07). Calculation of cost for each fiscal year are based on additional costs from Exhibit B for all five years of the Permit cycle. A 4% increase for staff time was factored for each subsequent year of the permit cycle.
7.0 Industrial and Commercial						Reimbursable costs are not projected for this component because new costs can be passed through to regulated parties.
9.0 Illicit Discharge Detection & Elimination Component (IDDEC)						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
10.0 Education						
Educational Surveys and Tests	$0.00	$0.00	$0.00	$0.00	$0.00	Public awareness survey costs are included in the effectiveness assessment section.
11.0 Public Participation						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
12.0 Fiscal Assessment						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.

City of Chula Vista Cost Estimates for Unfunded Mandate Test Claim - Version 3

Revised 6/10/2008

Co-Permittee -
Chula Vista

Element		FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
Working Body Support	$0.00	$29,885.83	$31,379.92	$32,948.91	$34,596.32	Permit section L.1 requires that all Copermittees collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs and Watershed Urban Runoff Management Programs, and to plan and coordinate activities required under the Permit. Ten regional working bodies were established per the Copermittee's Jan. 2008 MOU to support the regional coordination of programs and activities required under the Permit. Working body costs represent consultant and/or Copermittee staff support for the Copermittee's Program Planning subcommittee and nine Regional Workgroups or Sub-workgroups. FY 08-09 costs were established in the amount of $543,375 which includes $517,500 in support costs and an additional 5% ($25,875) for contract administration. FY 2008-09 costs were calculated at $125 per hour. A 5% total cost increase is also factored in each subsequent year.
Working Body Participation	$9,648.00	$11,357.00	$7,606.00	$7,910.00	$8,226.00	Copermittees must participate in a minimum number of working body meetings as established under the MOU. The estimates presented here are City of Chula Vista costs only. City participation costs are determined by multiplying the fully allocated hourly rate of each staff person by the number of meetings each fiscal year, and assuming an average meeting length of three hours. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs for FY 08-09 and beyond are projected based on mimimum mandated meeting frequencies for each working body. Hourly rates are increased by 4% each year after FY 07-08. Detailed calculations can be found in Exhibit A.
Regional Residential Education Program Development and Implementation	$7,218.75	$14,437.50	$28,875.00	$30,318.75	$31,834.72	Permit section F.1 requires that the Copermittees collaboratively develop and implement a Regional Residential Education Program. This is in addition to section D.5.a, which requires that each Copermittee provide education to, measurably increase the knowledge of, and measurably change the behavior of, residential communities within their jurisdiction. An FY 2007-08 budget for consultant support was initially established for this program in the amount of $131,250 ($125,000 for contract costs and $6,250 for contract administration). This figure was increased to $262,500 in FY 2008-09, and is expected to double again in FY 2009-10. Each subsequent year assumes a 5% increase. Regional program activities to be funded include: materials development / branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and marketing and research tools including the regional surveys to be conducted in FY 2008-09 and FY 2011-12.
Hydromodification Management Plan (HMP) Development	$61,809.16	$11,206.10	$0.00	$0.00	$0.00	Order R9-2007-0001 mandates the collaborative development of a Hydromodification Management Plan (HMP). This task was initiated by the Copermittees' consultant during FY 2007-08 and will be completed in FY 2008-09. The total cost of plan development is $1,050,000, $50,000 of which is for contract administration.

d by the CA 3rd District Court of Appeal

Exhibit B - Additional Funding Needs, FY06-07 through FY11-12

UPDATED 6/25/2007		2007				2008				2009				2010
PERMIT ADOPTION DATE: 01/24/07		FY06-07 Q3	FY06-07 Q4	FY07-08 Q1	FY07-08 Q2	FY07-08 Q3	FY07-08 Q4	FY08-09 Q1	FY08-09 Q2	FY08-09 Q3	FY08-09 Q4	FY09-10 Q1	FY09-10 Q2	FY09-10 Q3	FY09-10 Q4	FY10-11
1 - PROGRAM IMPLEMENTATION STAFF																
TITLE	TASK	* Staff Salaries Include Office & Equipment Purchase and Replacement Costs **Annual Salaries Include 5% Escalation Factor														
A) Environmental Health Specialist	SUSMP Update & WURMP Management	Authorize Staff Position	Recruitment	$82,000	Annual Staff Salary & Benefits			$86,000	Annual Staff Salary & Benefits			$91,000	Annual Staff Salary & Benefits			$96,000
B) Engineering Technician	Data Tracking	Authorize Staff Position		Recruitment		$22,000	$16,000	$66,000	Annual Staff Salary & Benefits			$70,000	Annual Staff Salary & Benefits			$73,000

EXHIBIT 6 "D" - DECLARATION OF SCOTT W. HUTH FOR CITY OF CORONADO.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

DECLARATION OF SCOTT W. HUTH ON BEHALF OF THE CITY OF CORONADO IN SUPPORT OF TEST CLAIM

I, Scott W. Huth, declare as follows:

1. I make this declaration based upon my own personal knowledge, except for matters set forth herein on information and belief, and as to those matters I believe them to be true, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. I have a BA in Resources and Environmental Geography and a Masters in Business Administration. I have attended numerous training sessions in water quality, storm water pollution prevention, and storm water program management in the course of my job responsibilities.

3. I am employed by the City of Coronado as the Director of Public Services.

4. I have held my current position for approximately 14 years. My duties include managing the Public Services Department, and I oversee divisional supervisors in Wastewater, Storm Water, Streets, Parks, Beach, Fleet, and Facilities.

5. I have read the California Regional Water Quality Control Board ("RWQCB"), San Diego Region, Order No. R9-2007-0001 (NPDES No. CAS 0108758) (the "2007 Permit") and I am familiar with the requirements of the Permit.

6. I have also read and I am familiar with the requirements of Order No. 2001-01 (NPDES CAS0108758) issued by the San Diego RWQCB on February 21, 2001 (the "2001 Permit").

7. Based on my understanding of the requirements of the 2001 Permit and the requirements of the 2007 Permit, I believe the 2007 Permit requires the co-

Document received by the CA 3rd District Court of Appeal.

permittees to perform new activities that are not required by the 2001 permit and are unique to local governmental entities.

8. These new activities include the following:

a. Working Body

1.) Support: Sections F and L.1 of the 2007 Permit require all co-permittees to collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding ("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,000 in support costs and an additional 5% ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Coronado's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2.) Participation: Section L.1 of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban runoff programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU

Document received by the CA 3rd District Court of Appeal.

establishes minimum levels of representation and participation in working body meetings required to meet these directives. The City of Coronado's participation costs were determined by multiplying the hourly rate of each staff person and consultant involved in these activities by the anticipated minimum number of meetings for each working body for each fiscal year and assumed that on average each staff member would spend three hours preparing for and attending each meeting. The cost to the City of Coronado to comply with this mandated activity for FY 2007-08 is $10,186. Costs for FY 08-09 and beyond are projected based on minimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. The City of Coronado's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

b. Regional Residential Education Program Development and Implementation: Section F.1 of the 2007 Permit requires the co-permittees to collaboratively develop and implement a Regional Residential Education Program. This is in addition to Section D.5.a, which requires each co-permittee to develop and implement an education program that measurably increases the knowledge of, and measurably changes the behavior of, residential communities within their jurisdictions. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and the development of marketing and research tools, including regional surveys to be conducted in FY 2008-09 and again in FY 2011-12. The co-permittees retained a consultant to perform these mandated activities in Fiscal Year 2007-08. The total cost of the contract is $131,250 which includes 5% ($6,250) for contract administration by

Document received by the CA 3rd District Court of Appeal.

the County. The budgeted cost of these mandated activities increased in FY 2008-09 to $262,500 and is expected to again double in FY 2009-10 to $525,000. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Coronado's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

c. Development of New/Revised Programs and Standards

1. Hydromodification Management Plan ("HMP") Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000 which includes 5% ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Coronado's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Sections D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County.

Document received by the CA 3rd District Court of Appeal.

This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Coronado's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

d. Long-Term Effectiveness Assessment ("LTEA"): In addition to annual assessments of the regional, jurisdictional and watershed programs, Section I.5 of the 2007 Permit requires the co-permittees to collaboratively develop a LTEA. Because of the complexity of the assessment requirements, the consultant costs to perform this assessment, which is expected to be completed in FY 2010-11, are expected to be $210,000, which includes 5% ($10,000) for contract administration by the County. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Coronado's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

e. Street Sweeping

1.) Equipment Costs: Section D.3.(5) of the 2007 Permit mandates specific street sweeping frequencies for improved roads, streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept twice monthly and areas with moderate volumes of trash and/or debris must be swept monthly. Areas with low volumes of trash and/or debris must be swept at least annually. The City of Coronado performed a visual survey of all improved roads to determine the volume of trash and/or debris generated. Based on this survey of actual conditions, 5% of the City of Coronado's improved roads, streets and highways are in the "High" category, 35% in the "Medium" category and 60% in the "Low"

Document received by the CA 3rd District Court of Appeal.

category. While the City of Coronado currently sweeps all of its improved roads one time per week, this is on a voluntary basis. The City of Coronado has estimated the staffing cost of mandated street sweeping to be $4,011 for FY 2007-2008, with a 4% increase per year subsequently. In addition the expected replacement cost of the vehicle has been amortized over the eight year expected life of the vehicle. The City of Coronado's actual and estimated equipment costs for complying with this mandated activity for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

f. Conveyance System Cleaning: Section D.3.(a)(3) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be inspected annually, with high priority facilities being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, the increase in the City of Coronado's staffing cost to comply with this mandated activity in FY 2007-08 is $12,000 and is expected to increase 4% in FY 2008-09 and each year thereafter. Additionally, the City of Coronado will be contracting out a portion of its line cleaning beginning in FY 2008-09; that contract cleaning cost is $30,000 per year with an anticipated 4% increase each subsequent year. The City of Coronado's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

g. Educational Surveys and Tests: Section D.5 of the 2007 Permit requires each co-permittee to implement an educational program to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff or receiving waters, and potential Best Management Practices ("BMPs") for the target audiences; and (2) measurably change the

Document received by the CA 3rd District Court of Appeal.

behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Sections I.1 and I.2 further require that the effectiveness of educational activities in meeting these standards be assessed annually where applicable and feasible. Compliance with these mandated activities requires the routine incorporation of testing and surveying methods into the program elements to ensure that implementation is resulting in the targeted outcomes. To comply with Section D.5 the City of Coronado expects to expend 48 hours of staff time in FY 2007-08, and 96 hours each year thereafter, to develop, administer and analyze surveys and tests. The City of Coronado's cost in FY 2007-08 for the Management Analyst to perform this work is $60 per hour. The increase in the City of Coronado's staffing cost to comply with these mandated activities in FY 2007-08 is $2,887 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Coronado's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

h. Annual JURMP Assessment and Reporting Requirements: Section I.1 of the 2007 Permit specifies prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. Co-permittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a new emerging discipline and is expected to evolve over the term of the Permit. Annual costs are expected to include developing and updating standards and methods, database development and modification, and data

Document received by the CA 3rd District Court of Appeal.

tracking, analysis and report writing. To comply with Section J.3.a.(3) the City of Coronado will expend 340 hours of staff and consultant time in FY 2008-09, and each year thereafter. The increase in the City of Coronado's staffing cost to comply with these mandated activities in FY 2007-08 is $75,000 (including the cost of revising the JURMP). The increase in the City of Coronado's staffing cost to comply with these mandated activities in FY 2008-09 is $18,210, and is expected to increase 4% in FY 2009-10 and each year thereafter. The City of Coronado's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

I. Watershed URMP

1.) Staffing for Development and Implementation: Section E of the 2007 Permit requires each of the co-permittees to collaborate with the other co-permittees within its Watershed Management Area to, at a minimum, implement its Watershed URMP document, as the document was developed and amended to comply with the requirements of Order No. 2001-01. The increase in the City of Coronado's staffing cost to comply with these mandated activities in FY 2008-09 is $2,484 and is expected to increase 4% in FY 2009-10 and each year thereafter. The City of Coronado's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Cost-Sharing Agreements: The City of Coronado has entered into a cost sharing agreement to pay for consultant support relating to the San Diego Bay WURMP. The consultant costs for FY 2007-08 are expected to be $26,000. Additional consultant services will be necessary in future years based on the development of cost sharing agreements for other WURMPs and an increasing need for coordination within each WURMP over the Permit cycle. The City of

Document received by the CA 3rd District Court of Appeal.

Coronado's budgeted cost for this mandated activity for FY 2008-09 is $27,000. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. The City of Coronado's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Implementation of Watershed Activities: Section E.2.f of the 2007 Permit requires Watershed co-permittees to implement at least two watershed quality activities and two watershed education activities for each permit year. The cost of implementing this mandate for FY 2007-08 is expected to be $40,000. Because of the wide range of potential costs for these activities, we anticipate that these costs will increase on average 20% per year. The City of Coronado's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

9. The actual increased costs incurred by the City of Coronado in FY 2007-08 to comply with the mandated activities required by the 2007 Permit will be $176,979, and are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

10. The estimated increased costs that the City of Coronado expects to incur in FY 2008-09, are expected to be $167,451, and are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

11. The estimated increased costs that the City of Coronado expects to incur during each year of the remaining term of the 2007 Permit are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

12. I am not aware of any dedicated state or federal funds that are or will be available to pay for these increased costs.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

14. I believe that the only available source to pay these increased costs are and will be the City of Coronado's General Fund.

Executed this 11th day of June, 2008 at Coronado, California.

I declare under penalty of perjury that the foregoing is true and correct.

Scott W. Huth
Director of Public Services

Document received by the CA 3rd District Court of Appeal.

Co-Permittee City of Coronado

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
Working Body Support	$0.00	$5,651.10	$5,933.66	$6,320.34	$6,541.85	Permit section L.1 requires that all Copermittees collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs and Watershed Urban Runoff Management Programs, and to plan and coordinate activities required under the Permit. Ten regional working bodies were established per the Copermittee's Jan. 2008 MOU to support the regional coordination of programs and activities required under the Permit. Working body costs represent consultant and/or Copermittee staff support for the Copermittee's Program Planning subcommittee and nine Regional Workgroups or Sub-workgroups. FY 08-09 costs were established in the amount of $543,375 which includes $517,500 in support costs and an additional 5% ($25,875) for contract administration. FY 2008-09 costs were calculated at $125 per hour. A 5% total cost increase is also factored in each subsequent year.
Working Body Participation	$10,186.00	$11,678.00	$11,755.00	$12,225.00	$12,714.00	Copermittees must also maintain representation in, and participate in meetings of, each of the working bodies established under the MOU. The estimates presented here are City of Coronado costs only. City participation costs are determined by multiplying the hourly rate of each staff person by the number of meetings each fiscal year, and assuming an average meeting length of three hours. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs for FY 08-09 and beyond are projected based on mimimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. Detailed calculations can be found in Worksheet B
Regional Residential Education Program Development and Implementation	$1,365.00	$2,730.00	$5,460.00	$5,733.00	$6,019.66	Permit section L.1 requires that the Copermittees collaboratively develop and implement a Regional Residential Education Program. This is in addition to section D.5.a, which requires that each Copermittee provide education to, measurably increase the knowledge of, and measurably change the behavior of, residential communities within their jurisdiction. An FY 2007-08 budget for consultant support was initially established for this program in the amount of $131,250 ($125,000 for contract costs and $6,250 for contract administration). This figure was increased to $262,500 in FY 2008-09, and is expected to double again in FY 2009-10. Each subsequent year assumes a 5% increase. Regional program activities to be funded include: materials development / branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and marketing and research tools including the regional surveys to be conducted in FY 2008-09 and FY 2011-12.
Hydromodification Management Plan (HMP) Development	$3,352.19	$2,234.79	$0.00	$0.00	$0.00	Order R9-2007-0001 mandates the collaborative development of a Hydromodification Management Plan (HMP). This task was initiated by the Copermittees' consultant during FY 2007-08 and will be completed in FY 2008-09. The total cost of plan development is $1,050,000, $50,000 of which is for contract administration.
Low Impact Development (LID) and Standard Urban Stormwater Mitigation Plan (SUSMP)	$546.00	$0.00	$0.00	$0.00	$0.00	Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU.

d by the CA 3rd District Court of Appeal.

City of Coronado
Unfunded Mandate Costs

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
Long-term Effectiveness Assessment (LTEA)	$0.00	$0.00	$0.00		$0.00	In addition to requirements for Copermittees to annually assess their regional, jurisdictional and watershed programs, Permit section 1.1 requires the collaboratative development of a Long-term Effectiveness Assessment (LTEA) that builds on the results of the August 2005 Baseline LTEA. The cost of the 2005 LTEA was $125,000. Because of the increased complexity of new assessment requirements, this consultant cost is expected to increase to $200,000, with an additional 5% ($10,000) for contract administration.
[redacted]						
4.0 Development Planning						Reimbursable costs are not projected for this component.
5.0 Construction						Reimbursable costs are not projected for this component.
6.0 Municipal						
Street Sweeping (equipment costs)	$27,500.00	$27,500.00	$27,500.00	$27,500.00	$27,500.00	Permit Section D.3.(5) requires street sweeping frequencies for Improved roads (possessing curbs and gutters), streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept at two times per month. Areas with medium volumes of trash and/or debris must be swept monthly and areas with low volumes of trash and/or debris at least annually. The City of Coronado estimates, by physical survey, that 5% of its improved roads have a high volume of trash and/or debris, 35% have a moderate volume of trash and/or debris, and 60% have a low volume of trash and/or debris.
Street Sweeping (staffing costs)	$4,011.00	$4,171.00	$4,338.00	$4,512.00	$4,692.00	While the City currently sweeps every improved road one time per week, this is on a voluntary basis. The Permit's mandate requires that we sweep moderate and high-volume debris bearing improved roads a minimum of one time per month.
Conveyance System Cleaning	$12,000.00	$42,480.00	$44,179.00	$45,946.00	$47,784.00	Permit section D.3.(3).(b) mandates that all MS4 facilities be inspected annually, with high priority facilitates being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, additional staffing Impacts are projected. The City utilizes Storm Water and Wastewater Division staff for the MS4 operations and maintenance program. Costs are calculated at $50.00 per hour for staff time * 2 personnel * 120 hours, and are increased by 4% in each subsequent year. This hourly cost includes equipment maintenance, etc. Additionally, due to other impacts on staff time, the City has requested approval to contract out some line cleaning. This contract cost is estimated to be $30,000 for FY 08-09, increased 4% each subsequent year.

d by the CA 3rd District Court of Appeal.

City of Coronado
Unfunded Mandate Costs

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
7.0 Industrial and Commercial						Permit section D.3.b.(3)(b) requires that 50% of high threat priority commercial sites be inspected the first year, and 100% be inspected the second year. These costs are associated with the additional staff time for these mandated inspections.
9.0 Illicit Discharge Detection & Elimination Component (IDDEC)						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
10.0 Education						
Educational Surveys and Tests	$2,887.00	$6,005.00	$6,245.00	$6,495.00	$6,755.00	The Permit mandates an educational component that requires the implementation of educational programs to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff on receiving waters, and potential BMP solutions for the target audience; and (2) to measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Compliance with this standard requires the routine incorporation of testing and surveying methods into program elements to ensure that implementation is resulting in targeted outcomes. FY 07-08 staffing impacts are estimated at one day per month (96 hours per FY) to develop, administer, and analyze surveys and tests. Costs are calculated at the Management Analyst level ($60/hr), and increased by 4% each year after FY 2008-09.
11.0 Public Participation						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
12.0 Fiscal Assessment						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.

d by the CA 3rd District Court of Appeal.

City of Coronado
Unfunded Mandate Costs

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
13.0 Effectiveness Assessment						
Annual JURMP Assessment and Reporting	$75,000.00	$18,210.00	$18,939.00	$19,696.00	$20,484.00	Permit section I.1 lays out prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. To the extent applicable and feasible, Copermittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a newly emerging discipline, and will continue to evolve over the entire Permit cycle. Annual costs typically include developing and updating standards and methods, database development and modification, and data tracking, analysis, and report writing. Annual costs are calculated as 340 hours of time total for various staff members, and increased by 4% each year after FY 2008-09.
[illegible] Activities						
Staffing for Watershed URMP development and implementation	$396.00	$2,484.00	$2,583.00	$2,687.00	$2,794.00	Lead responsibility for watershed program implementation resides with the County of San Diego DPLU Watershed Planning Division. The City of Imperial Beach participates in meetings to support Watershed URMP development and implementation. Copermittees must maintain representation in, and participate in meetings of, each of the watershed groups in which the City is located. The estimates presented here are City of Imperial Beach costs only for participation in two watershed groups. City participation costs are determined by multiplying the hourly rate of each staff person by the number of meetings each fiscal year, and assuming an average meeting length of three hours. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs are calculated at the Supervisor level ($66/hr), and increased by 4% each year after FY 2008-09.
WURMP Cost-Share Agreements	$26,000.00	$27,000.00	$28,350.00	$29,768.00	$31,256.00	Cost share agreements are used to pay for WURMP consultant support. The FY 07-08 total is based on actual City contributions to the WURMP Cost Share Agreements in which it participates. Increases are estimated for future years based on requirements for increased coordination on WURMP issues in the new Permit. A 5% increase is also assumed for each year after FY 2008-09.
Implementation of Watershed Activities	$3,000.00	$3,600.00	$4,320.00	$5,184.00	$6,221.00	Permit section E.2.f requires Watershed Copermittees to implement at least two watershed water quality activities and two watershed education activities for each permit year. The City budgeted $3,000 for implementing two WURMP activities in FY 07-08. Because of the wide range of potential costs for these activities, a 20% increase is assumed in each subsequent year.
TOTALS	$166,243.19	$148,092.79	$153,669.00	$159,746.00	$166,219.66

EXHIBIT 6 "E" - DECLARATION OF JOSEPH M. DE STEFANO II FOR CITY OF DEL MAR.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

DECLARATION OF JOSEPH M. DE STEFANO II ON BEHALF OF THE CITY OF DEL MAR IN SUPPORT OF TEST CLAIM

I, Joseph M. DeStefano II, declare as follows:

1. I make this declaration based upon my own personal knowledge, except for matters set forth herein on information and belief, and as to those matters I believe them to be true, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. I hold a Master of Science Degree in Environmental Science and Civil Engineering (emphasis in Water Quality) and a Bachelor of Arts Degree in Political Science (Public Policy) from Loyola Marymount University. Further, I have received additional formal and informal training in stormwater management from various agencies and organizations over the past eight (8) years that I have been involved in water quality.

3. I am employed by the City of Del Mar as the Clean Water Manager.

4. I have held my current position for approximately five months. My duties include management and implementation of the City of Del Mar Clean Water Program, including implementation of the specific requirements of the California Regional Water Quality Control Board ("RWQCB"), San Diego Region, Order No. R9-2007-0001 (NPDES No. CAS 0108758) (the "2007 Permit").

5. Prior to my employment by the City of Del Mar, I was employed as the Land Use/Environmental Planning Manager and Land Use / Environmental Planner with the County of San Diego Watershed Planning Program, a position I held for eight (8) years. My duties included day-to-day operation of the County of San Diego Watershed Planning Program, providing oversight of staff and projects, as well as technical guidance and training on issues related to watershed planning

Document received by the CA 3rd District Court of Appeal.

principals including implementation of the land use development portions of Order No. 2001-01 (NPDES CAS0108758) issued by the San Diego RWQCB on February 21, 2001 (the "2001 Permit").

6. Prior to my employment with the County of San Diego, I served as an environmental regulatory specialist in the private sectors for approximately seven (7) years. My responsibilities included regulatory compliance activities for development addressing Federal, state (California, Oregon, Arizona, Nevada, Hawaii, and Utah), and regional multimedia regulations, with particular emphasis in planning and assessment under the California Environmental Quality Act (CEQA); the National Environmental Policy Act (NEPA); the Clean Air Act and Amendments (CAA); and the Clean Water Act (CWA).

5. I have read the RWQCB 2007 Permit and I know and understand the requirements of the Permit.

6. I have also read and I know and understand the requirements of the 2001 Permit.

7. Based on my understanding of the requirements of the 2001 Permit and the requirements of the 2007 Permit, I believe the 2007 Permit requires the co-permittees to perform new activities that are unique to local governmental entities that are not required by the 2001 Permit.

8. These new activities include the following:

a. Working Body

1.) Support: Sections F and L.1 of the 2007 Permit require all co-permittees to collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding

Document received by the CA 3rd District Court of Appeal.

("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,000 in support costs and an additional 5% ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Del Mar's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2.) Participation: Section L.1.a of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban runoff programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU establishes minimum levels of representation and participation in working body meetings required to meet these directives.

The City of Del Mar's participation costs are determined by multiplying the hourly rate of each staff person (or subconsultant staff person) by the number of meetings each fiscal year, and assuming each staff member would spend three (3) hours preparing and attending each meeting. The cost to the City of Del Mar to comply with this mandated activity for FY 2007-08 is $14,640. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs for FY 08-09 and beyond are projected based on minimum mandated meeting frequencies for each working body, but in some cases are increased to

Document received by the CA 3rd District Court of Appeal.

reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. The City of Del Mar's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

b. Regional Residential Education Program Development and Implementation: Section F.1 of the 2007 Permit requires the co-permittees to collaboratively develop and implement a Regional Residential Education Program. This is in addition to Section D.5.a, which requires each co-permittee to develop and implement an education program that measurably increases the knowledge of, and measurably changes the behavior of, residential communities within their jurisdictions. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and the development of marketing and research tools, including regional surveys to be conducted in FY 2008-09 and again in FY 2011-12. The co-permittees retained a consultant to perform these mandated activities in Fiscal Year 2007-08. The total cost of the contract is $131,250 which includes 5% ($6,250) for contract administration by the County. The budgeted cost of these mandated activities increased in FY 2008-09 to $262,500 and is expected to again double in FY 2009-10 to $525,000. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Del Mar's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

c. Development of New/Revised Programs and Standards

Document received by the CA 3rd District Court of Appeal.

1. Hydromodification Management Plan ("HMP") Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000 which includes 5% ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Del Mar's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Sections D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Del Mar's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

d. Long-Term Effectiveness Assessment ("LTEA"): In addition to annual assessments of the regional, jurisdictional and watershed programs, Section I.5 of the 2007 Permit requires the co-permittees to collaboratively

Document received by the CA 3rd District Court of Appeal.

develop a LTEA. Because of the complexity of the assessment requirements, the consultant costs to perform this assessment, which is expected to be completed in FY 2010-11, are expected to be $210,000, which includes 5% ($10,000) for contract administration by the County. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Del Mar's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

e. Street Sweeping

1.) Equipment Costs: Section D.3.(5) of the 2007 Permit mandates specific street sweeping frequencies for improved roads, streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept a minimum of twice monthly. Areas with low volumes of trash and/or debris must be swept at least annually. The City of Del Mar used average daily traffic ("ADT") statistics to determine the volume of trash and/or debris that could reasonably be expected to be generated. Improved roads, streets and highways that have more than 20,000 vehicles per day are in the "High" volume of trash and/or debris category. Improved roads, streets and highways that have 15,000 to 20,000 vehicles per day are in the "Medium" volume of trash and/or debris category. Improved roads, streets and highways that have less than 15,000 vehicles per day are in the "Low" volume of trash and/or debris category. The City of Del Mar has approximately 22 miles of improved roads and streets. Based on these standards, less than 1% of the City of Del Mar improved roads and streets are in the "High" category, less than 1% in the "Medium" category and 99% in the "Low" category. Historic sweeping schedules used by the City of Del Mar have exceeded the mandated permit requirements. Based on this analysis it was determined that there will be no increase in the street

Document received by the CA 3rd District Court of Appeal.

sweeping activities as a result of the 2007 Permit, and as such, the purchase of additional street sweeping equipment or employment of additional employees was not required at this time.

2.) Staffing Costs: The existing street sweeping schedule used by the City of Del Mar under Order 2001-01 was over and above the minimum requirements listed under Permit section D.3.(5). As such, there was no anticipated increase in staffing levels expected due to R9-2007-001. However, the San Diego RWQCB Fact Sheet/Technical Report for Order No. R9-2007-0001 (January 24, 2007), Pages 10 – 11, states that based on their research approximately 20 - 38% of street sweeping costs are directly attributable to the MS4 Permit. Costs are calculated based on 2006 Actual Costs for labor, maintenance, and equipment supplies ($56,845), and increased by 4% each year after FY 2008-09, with a 25% Factor based on the San Diego RWQCB assumption. The City of Del Mar's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Contract Costs: The City of Del Mar does not currently contract with a private company to provide street sweeping services.

f. Conveyance System Cleaning: Section D.3.(a)(3) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be inspected annually, with high priority facilities being inspected between May and September. Permit section D.3.(a)(3) mandates that all MS4 facilities be inspected annually, with high priority facilitates being inspected between May and September. Existing maintenance and inspection schedules are anticipated to address the updated Permit requirements. As such, no additional staffing impacts are claimed at this time.

Document received by the CA 3rd District Court of Appeal.

g. Educational Surveys and Tests: Section D.5 of the 2007 Permit requires each co-permittee to implement an educational program to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff or receiving waters, and potential Best Management Practices ("BMPs") for the target audiences; and (2) measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Sections I.1 and I.2 further require that the effectiveness of educational activities in meeting these standards be assessed annually where applicable and feasible. Compliance with these mandated activities requires the routine incorporation of testing and surveying methods into the program elements to ensure that implementation is resulting in the targeted outcomes. To comply with Section D.5 the City of Del Mar expects to expend 159 hours of staff time beginning in FY 2008-09, and each year thereafter, to develop, administer and analyze surveys and tests. The City of Del Mar's cost beginning in FY 2008-09 for the Clean Water Manger to perform this work is approximately $67 per hour. The increase in the City of Del Mar's staffing cost to comply with these mandated activities is expected to increase 4% in FY 2009-10 and each year thereafter. The City of Del Mar's estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

h. Annual JURMP Assessment and Reporting Requirements: Section I.1 of the 2007 Permit specifies prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. Co-permittees must also determine source load reductions resulting from program implementation, and

Document received by the CA 3rd District Court of Appeal.

utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a new emerging discipline and is expected to evolve over the term of the Permit. Annual costs are expected to include developing and updating standards and methods, database development and modification, and data tracking, analysis and report writing. To comply with Section I.1. the City of Del Mar will expend 693 hours of staff time in FY 2008-09, and each year thereafter. Although these responsibilities may be incurred across a number of program areas and staff, annual costs are calculated as 693 hours of time at the Program Manager level ($65 in FY07-08), and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Del Mar's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

l. Watershed URMP

1.) Staffing for Development and Implementation:

Section E of the 2007 Permit requires that each Copermittee collaborate with the other Copermittees within its Watershed Management Area(s) (WMA) to at a minimum implement its Watershed URMP document, and develop collaborative inter-jurisdictional programs to reduce the discharge of pollutants from the MS4 to the MEP, and prevent urban runoff discharges from the MS4 from causing or contributing to a violation of water quality standards. As part of this requirement, the 2007 Permit specifically requires the Copermittees to develop a watershed-specific, water quality assessment; to develop, implement, and modify, as necessary, a program for encouraging collaborative, watershed-based, land use planning in their jurisdictional planning departments; to develop and implement a collective watershed strategy to abate the sources and reduce the discharge of

Document received by the CA 3rd District Court of Appeal.

pollutants causing the high priority water quality problems of the WMA; and outlines specific requirements for "Watershed Activities" under these collaborative programs. Since the majority of these activities cross traditional/legal jurisdictional boundaries, additional funds to develop and implement these mandated activities must be set aside by each jurisdiction. Responsibility for the watershed program implementation in the City of Del Mar resides with the Clean Water Manager. As required under the 2007 Permit, the City of Del Mar is an active co-permittee in two (2) WMAs. The Clean Water Manager is responsible for participation in WURMP development and activities, with support from City of Del Mar subcontractors. Estimated costs for FY 07-08 cost estimates are based on actual YTD expenditures. These totals are slightly higher than those projected for the following years because the program was out-sourced for the majority of the year. For FY 2008-09 and beyond, an estimated 30% of total staff time for these positions is spent on WURMP development and implementation. Costs for staff time for FY 08-09 and beyond are projected based on estimated 12 meetings per year for each watershed at 3 hours per meeting, plus 2 Hours of prep time (total of 5 hrs per meeting). Hourly rates are increased by 4% each year after FY 07-08. All rates include anticipate mileage expenditures based on 2008 Federal IRS Mileage Rates. The City of Del Mar's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Cost-Sharing Agreements:

The City of Del Mar has entered into two (2) cost sharing agreement(s) to pay for consultant support relating to the San Dieguito River and Los Peñasquitos WURMPs. The consultant costs for FY 2007-08 are expected to be $3,000. Additional consultant services will be necessary in future years based on the

Document received by the CA 3rd District Court of Appeal.

development of cost sharing agreements for other WURMPs and an increasing need for coordination within each WURMP over the Permit cycle. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. The City of Del Mar's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Implementation of Watershed Activities: Section E.2.f of the 2007 Permit requires Watershed co-permittees to implement at least two watershed quality activities and two watershed education activities for each permit year. The City of Del Mar's cost of implementing this mandate for FY 2007-08 is expected to be $7,500. Because of the wide range of potential costs for these activities, we anticipate that these costs will increase on average 20% per year. The City of Del Mar's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

9. The actual increased costs incurred by the City of Del Mar in FY 2007-08 to comply with the mandated activities required by the 2007 Permit will be approximately $49,810, and are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

10. The estimated increased costs that the City of Del Mar expects to incur in FY 2008-09, are expected to be $124,413, and are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

11. The estimated increased costs that the City of Del Mar expects to incur during each year of the remaining term of the 2007 Permit are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

12. I am not aware of any dedicated state or federal funds that are or will be available to pay for these increased costs.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

14. The City of Del Mar presently utilizes a "Clean Water Fee" to offset a portion of the costs associated with the implementation of the Clean Water Program. This Fee is presently being considered for ratification by the residents of the City of Del Mar under the requirements of Proposition 218. The current fee covers only a portion of the existing costs, and I am not aware of any additional authority to assess a fee to offset these increased costs.

15. I believe that the only available source to pay these increased costs are and will be the city's general purpose funds.

Executed this 10th day of June at Del Mar, California.

I declare under penalty of perjury that the foregoing is true and correct.

Joseph M. DeStefano II

Document received by the CA 3rd District Court of Appeal.

Annual JURMP Assessment and Reporting	$0.00	$46,431.00	$48,288.24	$50,219.77	$52,228.56	Permit section I.1 lays out prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. To the extent applicable and feasible, Copermittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a newly emerging discipline, and will continue to evolve over the entire Permit cycle. Annual costs typically include developing and updating standards and methods, database development and modification, and data tracking, analysis, and report writing. Although these responsibilities may be incurred across a number of program areas and staff, annual costs are calculated as 693 hours of time (~0.333 staff years) at the Program Manager level ($65 in FY07-08), increased by 4% each year.
Staffing for Watershed URMP development and implementation	$9,897.50	$8,917.00	$9,254.79	$9,606.09	$9,971.45	The City of Del Mar is an active co-permittee in two (2) specific watersheds. The Clean Water Manager is responsible for participation in WURMP development and activities, with support from City of Del Mar subcontractors. Estimated costs for FY 07-08 cost estimates are based on actual YTD expenditures. These totals are slightly higher than those projected for the following years because the program was out-sourced for the majority of the year. For FY 2008-09 and beyond, an estimated 30% of total staff time for these positions is spent on WURMP development and implementation. Costs for staff time for FY 08-09 and beyond are projected based on estimated 12 meetings per year for each watershed at 3 hours per meeting, plus 2 Hours of prep time (total of 5 hrs per meeting). Hourly rates are increased by 4% each year after FY 07-08. All rates include anticipate mileage expenditures based on 2008 Federal IRS Mileage Rates.
WURMP Cost-Share Agreements	$3,000.00	$3,150.00	$3,307.50	$3,472.88	$3,646.52	Cost share agreements are used to pay for WURMP consultant support. The FY 07 08 total is based on actual City of Del Mar contributions to the WURMP Cost Share Agreements in which it participates (San Dieguito and Los Penasquitos). Increases are estimated for future years based on requirements for increased coordination on WURMP issues in the new Permit. A 5% increase is also assumed for each year after FY 2008-09.
Implementation of Watershed Activities	$7,500.00	$9,500.00	$10,450.00	$11,495.00	$12,644.50	Permit section E.2.f requires Watershed Copermittees to implement at least two watershed water quality activities and two watershed education activities for each permit year. The City of Del Mar budgeted $7,500. for implementing WURMP activities in FY 07-08, and has budgeted $9,500 for FY08-09. Because of the wide range of potential costs for these activities, a 10% increase is assumed in each subsequent year.
TOTALS	$54,449.97	$119,190.17	$123,603.48	$130,464.14	$135,053.69	

d by the CA 3rd District Court of Appeal.

Co-Permittee
City of Del Mar

	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
Working Body Support	$0.00	$3,314.59	$3,480.32	$3,654.33	$3,837.05	Permit section F.1 requires that all Copermittees collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs and Watershed Urban Runoff Management Programs, and to plan and coordinate activities required under the Permit. Ten regional working bodies were established per the Copermittee's Jan. 2008 MOU to support the regional coordination of programs and activities required under the Permit. Working body costs represent consultant and/or Copermittee staff support for the Copermittee's Program Planning subcommittee and nine Regional Workgroups or Sub-workgroups. FY 08-09 costs were established in the amount of $543,375 which includes $517,500 in support costs and an additional 5% ($25,875) for contract administration. FY 2008-09 costs were calculated at $125 per hour. A 5% total cost increase is also factored in each subsequent year.
Working Body Participation	$14,640.12	$16,084.22	$16,655.10	$17,248.81	$17,866.27	Copermittees must also maintain representation in, and participate in meetings of, each of the working bodies established under the MOU. The estimates presented here are the City of Del Mar's costs only. The City of Del Mar's participation costs are determined by multiplying the hourly rate of each staff person (or subconsultant staff) by the number of meetings each fiscal year, and assuming an average meeting length of three hours. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs for FY 08-09 and beyond are projected based on mimimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. Detailed calculations can be found in Worksheet B.
Regional Residential Education Program Development and Implementation	$800.63	$1,601.25	$3,202.50	$3,362.63	$3,530.76	Permit section F.1 requires that the Copermittees collaboratively develop and implement a Regional Residential Education Program. This is in addition to section D.5.a, which requires that each Copermittee provide education to, measurably increase the knowledge of, and measurably change the behavior of, residential communities within their jurisdiction. An FY 2007-08 budget for consultant support was initially established for this program in the amount of $131,250 ($125,000 for contract costs and $6,250 for contract administration). This figure was increased to $262,500 in FY 2008-09, and is expected to double again in FY 2009-10. Each subsequent year assumes a 5% increase. Regional program activities to be funded include: materials development / branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and marketing and research tools including the regional surveys to be conducted in FY 2008-09 and FY 2011-12.

d by the CA 3rd District Court of Appeal.

Hydromodification Management Plan (HMP) Development	$3,511.67	$2,341.12	$0.00	$0.00	$0.00	Order R9-2007-0001 mandates the collaborative development of a Hydromodification Management Plan (HMP). This task was initiated by the Copermittees' consultant during FY 2007-08 and will be completed in FY 2008-09. The total cost of plan development is $1,050,000, $50,000 of which is for contract administration.
Low Impact Development (LID) and Standard Urban Stormwater Mitigation Plan (SUSMP)	$320.25	$0.00	$0.00	$0.00	$0.00	Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU.
Long-term Effectiveness Assessment (LTEA)	$0.00	$0.00	$0.00	$1,281.00	$0.00	In addition to requirements for Copermittees to annually assess their regional, jurisdictional and watershed programs, Permit section I.1 requires the collaboratative development of a Long-term Effectiveness Assessment (LTEA) that builds on the results of the August 2005 Baseline LTEA. The cost of the 2005 LTEA was $125,000. Because of the increased complexity of new assessment requirements, this consultant cost is expected to increase to $200,000, with an additional 5% ($10,000) for contract administration.
[illegible]						
4.0 Development Planning						Reimbursable costs are not projected for this component.
5.0 Construction						Reimbursable costs are not projected for this component.
6.0 Municipal						
Street Sweeping (equipment costs)	$0.00	$0.00	$0.00	$0.00	$0.00	Permit Section D.3.(5) requires street sweeping frequencies for improved roads (possessing curbs and gutters), streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept at two times per month. The City of Del Mar maintains one (1) sweeper. No additional equipment has been purchased or is anticipated at this time.
Street Sweeping (staffing costs)	$14,779.80	$15,370.99	$15,985.83	$16,625.27	$17,290.28	The existing street sweeping schedule used by the City of Del Mar under Order 2001-01 was over and above the minimum requirements listed under Permit section D.3.(5). As such, there was no anticipated increase in staffing levels expected due to R9-2007-001. However, the SDRWQCB Fact Sheet/Technical Report for Order No. R9-2007-0001 (January 24, 2007), Pg. 10 – 11, states that based on their research approximately 20 - 38% of street sweeping costs are directly attributable to the MS4 Permit. Costs are calculated based on 2006 Actual Costs for labor, maintenance, and equipment supplies ($56,845), and increased by 4% each year after FY 2008-09, with a 25% Factor based on the SDRWQCB assumption.
Street Sweeping (contract costs)	$0.00	$0.00	$0.00	$0.00	$0.00	The City of Del Mar does not contract out for street sweeping.

d by the CA 3rd District Court of Appeal.

Conveyance System Cleaning	$0.00	$0.00	$0.00	$0.00	$0.00	Permit section D.3.(3).(b) mandates that all MS4 facilities be inspected annually, with high priority facilitates being inspected between May and September. Existing maintenence and inspection schedules are anticipated to address the updated Permit requirements. As such, no additional staffing impacts are projected at this time.
7.0 Industrial and Commercial						Reimbursable costs are not projected for this component because new costs can be passed through to regulated parties.
9.0 Illicit Discharge Detection & Elimination Component (IDDEC)						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
10.0 Education						
Educational Surveys and Tests	$0.00	$12,480.00	$12,979.20	$13,498.37	$14,038.30	The Permit mandates an educational component that requires the implementation of educational programs to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff on receiving waters, and potential BMP solutions for the target audience; and (2) to measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Compliance with this standard requires the routine incorporation of testing and surveying methods into program elements to ensure that implementation is resulting in targeted outcomes. FY 08-09 staffing impacts are estimated at approximately two days per month (up to 192 hours per year) to develop, administer, and analyze surveys and tests. Costs are calculated based on the hourly rate for the Clean Water Manager ($65 per hour), and increased by 4% each year after FY 2008-09.
11.0 Public Participation						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
12.0 Fiscal Assessment						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
13.0 Effectiveness Assessment						

d by the CA 3rd District Court of Appeal.

EXHIBIT 6 "F" - DECLARATION OF ROB TURNER FOR CITY OF EL CAJON.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

DECLARATION OF ROB TURNER IN SUPPORT OF TEST CLAIM

I, Rob Turner, declare as follows:

1. I make this declaration based upon my own personal knowledge, except for matters set forth herein on information and belief, and as to those matters I believe them to be true, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. I have a Bachelor's degree in civil engineering from the United States Coast Guard Academy; I also have a Master's degree in civil engineering from the University of Illinois. I have been employed as the Director of Public Works for two (2) cities in California for nearly 13 years, including my present employment with the City of El Cajon. In both of my jobs as a Director of Public Works for California cities my responsibilities included supervising personnel who were responsible for the design, construction, and maintenance of storm water facilities owned and operated by the city.

3. I am currently employed by the City of El Cajon as the Director of Public Works.

4. I have held my current position for approximately two and one-half (2½) years. My duties include managing the operations of the City's Public Works Department, which includes the design and construction of public works, and the review and approval of private development in the City of El Cajon, both of which involve the design, construction, operation and maintenance of the City's storm water facilities, and enforcement of the City's storm water ordinances through the storm water program of the Public Works Department.

5. I have read the California Regional Water Quality Control Board ("RWQCB"), San Diego Region, Order No. R9-2007-0001 (NPDES No. CAS 0108758) (the "2007 Permit") and I am generally familiar with the requirements of the Permit.

Document received by the CA 3rd District Court of Appeal.

6. I have also read and I am generally familiar with the requirements of Order No. 2001-01 (NPDES CAS0108758) issued by the San Diego RWQCB on February 21, 2001 (the "2001 Permit").

7. Based on my understanding of the requirements of the 2001 Permit and the requirements of the 2007 Permit, and information provided to me by my staff, I believe the 2007 Permit requires the co-permittees to perform new activities that are unique to local governmental entities that are not required by the 2001 Permit.

8. These new activities include the following, all of which I am informed is true and, based on such information I believe it to be true:

a. Working Body

1.) Support: Section L.1 of the 2007 Permit requires all co-permittees to collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding ("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,000 in support costs and an additional 5% ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of El Cajon's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

2.) Participation: Section L.1.a of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban runoff programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU establishes minimum levels of representation and participation in working body meetings required to meet these directives. The City of El Cajon's participation costs were determined by multiplying the hourly rate of each staff person involved in these activities by anticipated minimum number of meetings for each working body for each fiscal year and assumed that on average each staff member would spend 3 hours preparing for and attending each meeting. The cost to the City of El Cajon to comply with this mandated activity for FY 2007-08 is $14,959. Costs for FY 08-09 and beyond are projected based on minimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. It is anticipated that the hourly rates for staff involved in these tasks could increase by 4% each year after FY 07-08. The City of El Cajon's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

b. Regional Residential Education Program Development and Implementation: Section F.1 of the 2007 Permit requires the co-permittees to collaboratively develop and implement a Regional Residential Education Program. This is in addition to Section D.5.a, which requires each co-permittee to develop and implement an education program that measurably increases the knowledge of, and measurably changes the behavior of, residential communities within their jurisdictions. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and the development of marketing and research tools, including

Document received by the CA 3rd District Court of Appeal.

regional surveys to be conducted in FY 2008-09 and again in FY 2011-12. The co-permittees retained a consultant to perform these mandated activities in Fiscal Year 2007-08. The total cost of the contract is $131,250, which includes 5% ($6,250) for contract administration by the County. The budgeted cost of these mandated activities increased in FY 2008-09 to $262,500 and is expected to again double in FY 2009-10 to $525,000. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of El Cajon's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

c. Development of New/Revised Programs and Standards

1. Hydromodification Management Plan ("HMP") Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000 which includes 5% ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of El Cajon's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-

Document received by the CA 3rd District Court of Appeal.

09. The total cost of the contract is $52,500, which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of El Cajon's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

d. Long-Term Effectiveness Assessment ("LTEA"): In addition to annual assessments of the regional, jurisdictional and watershed programs, Section I.1 of the 2007 Permit requires the co-permittees to collaboratively develop a LTEA. Because of the complexity of the assessment requirements, the consultant costs to perform this assessment, which is expected to be completed in FY 2010-11, are expected to be $210,000, which includes 5% ($10,000) for contract administration by the County. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of El Cajon's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

e. Street Sweeping

1.) Equipment Costs: Section D.3.(5) of the 2007 Permit mandates specific street sweeping frequencies for improved roads, streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept monthly. Areas with low volumes of trash and/or debris must be swept at least annually. The City of El Cajon's actual and estimated increased equipment costs for complying with this mandated activity for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

f. Conveyance System Cleaning: Section D.3.(3).(b) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be

Document received by the CA 3rd District Court of Appeal.

inspected annually, with high priority facilities being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, the City will have to increase staffing of its MS4 operations and maintenance program for FY 2008-09 by 2 staff. The City of El Cajon's cost in FY 2007-08 for an Operator is $74.25 per hour and for a Worker II is $54.68 per hour. The increase in the City of El Cajon's staffing cost to comply with this mandated activity in FY 2008-09 is $269,424 and is expected to increase 4% in FY 2009-10 and each year thereafter. The City of El Cajon's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

g. Educational Surveys and Tests: Section D.5 of the 2007 Permit requires each co-permittee to implement an educational program to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff or receiving waters, and potential Best Management Practices ("BMPs") for the target audiences; and (2) measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Sections I.1 and I.2 further require that the effectiveness of educational activities in meeting these standards be assessed annually where applicable and feasible. Compliance with these mandated activities requires the routine incorporation of testing and surveying methods into the program elements to ensure that implementation is resulting in the targeted outcomes. To comply with Section D.5 the City expects to expend 288 hours of staff time in FY 2008-09, and each year thereafter, to develop, administer and analyze surveys and tests. The City of El Cajon's cost in FY 2007-08 for a Senior Engineering Technician (to perform this work is $82.60 per hour. The increase in the City of El Cajon's staffing cost to comply with these mandated activities in FY 2007-08 is $23,760 and is expected to increase 4% in FY 2009-010 and each year thereafter. The City of El Cajon's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each

Document received by the CA 3rd District Court of Appeal.

year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

h. Annual JURMP Assessment and Reporting Requirements: Section I.1 of the 2007 Permit specifies prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. Co-permittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a new emerging discipline and is expected to evolve over the term of the Permit. Annual costs are expected to include developing and updating standards and methods, database development and modification, and data tracking, analysis and report writing. To comply with Section I.1 the City will expend 960 hours of staff time in FY 2008-09, and each year thereafter. The City's cost in FY 2008-09 for an Associate Civil Engineer to perform these mandated activities will be $103.13 per hour. The increase in the City's staffing cost to comply with these mandated activities in FY 2007-08 is $86,729 and it is anticipated that such rates could increase 4% in FY 2008-09 and each year thereafter. The City of El Cajon's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

i. Watershed URMP

1.) Staffing for Development and Implementation: Section E of the 2007 Permit requires the development and implementation of a WURMP program. Lead responsibility for watershed program implementation resides with the County's Department of Planning and Land Use Watershed Planning Division. This program

Document received by the CA 3rd District Court of Appeal.

consists of five staff (one Planning manager, two Planner IIIs and two Planner I/IIs). The FY 2007-08 costs are based on annualized projections for year-to-date expenditures. For FY 2008-09 and beyond, it is estimated that staff will spend 70% of their time on WURMP development and implementation. Calculations are based on the following hourly rates for FY 2007-08: Planning Manager - $115; Planner III - $97; and Planner I/II - $81. The increase in the City of El Cajon's staffing cost to comply with these mandated activities in FY 2007-08 is $34,107 and it is anticipated that these rates could increase 4% in FY 2008-09 and each year thereafter. The City of El Cajon's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Cost-Sharing Agreements:

The City of El Cajon has entered into one cost sharing agreement to pay for consultant support relating to San Diego River WURMPs. The consultant costs for FY 2007-08 are expected to be $21,500. Additional consultant services will be necessary in future years based on the development of cost sharing agreements for other WURMPs and an increasing need for coordination within each WURMP over the Permit cycle. The City of El Cajon's budgeted cost for this mandated activity for FY 2008-09 is $55,000. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. The City of El Cajon's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Implementation of Watershed Activities: Section E.2.f of the 2007 Permit requires Watershed co-permittees to implement at least two watershed quality activities and two watershed education activities for each permit year. The cost of implementing this mandate for FY 2007-08 is expected to be $40,000. Because of the wide range of potential costs for these activities, we anticipate that these costs will

Document received by the CA 3rd District Court of Appeal.

increase on average 20% per year. The City of El Cajon's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

9. I am informed and believe that the actual increased costs incurred by the City of El Cajon in FY 2007-08 to comply with the mandated activities required by the 2007 Permit will be $917,816, and are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

10. I am informed and believe that the estimated increased costs that the City of El Cajon expects to incur in FY 2008-09, are expected to be $1,717,691, and are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

11. The estimated increased costs that the City of El Cajon expects to incur during each year of the remaining term of the 2007 Permit are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

12. I am not aware of any dedicated state or federal funds that are or will be available to pay for these increased costs.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

14. I am not aware of any authority to assess a fee to offset these increased costs without voter approval of the electors in the City of El Cajon.

15. I believe that the only available source to pay these increased costs are and will be the city's waste water funds.

Executed this 12th day of June, 2008, at the City of El Cajon, California.

I declare under penalty of perjury that the foregoing is true and correct.

Rob Turner

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

Co-Permitee - City of El Cajon

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
Working Body Support	$0.00	$13,638.71	$14,320.65	$15,036.68	$15,788.50	Permit section L.1 requires that all Copermittees collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs and Watershed Urban Runoff Management Programs, and to plan and coordinate activities required under the Permit. Ten regional working bodies were established per the Copermittee's Jan. 2008 MOU to support the regional coordination of programs and activities required under the Permit. Working body costs represent consultant and/or Copermittee staff support for the Copermittee's Program Planning subcommittee and nine Regional Workgroups or Sub-workgroups. FY 08-09 costs were established in the amount of $543,375 which includes $517,500 in support costs and an additional 5% ($25,875) for contract administration. FY 2008-09 costs were calculated at $125 per hour. A 5% total cost increase is also factored in each subsequent year.
Working Body Participation	$14,958.57	$21,430.97	$19,364.64	$20,139.23	$20,944.80	Copermittees must also maintain representation in, and participate in meetings of, each of the working bodies established under the MOU. The estimates presented here are County costs only. County participation costs are determined by multiplying the hourly rate of each staff person by the number of meetings each fiscal year, and assuming an average meeting length of three hours. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs for FY 08-09 and beyond are projected based on mimimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. Detailed calculations can be found in Worksheet B.
Regional Residential Education Program Development and Implementation	$3,294.38	$6,588.75	$13,177.50	$13,836.38	$14,528.21	Permit section F.1 requires that the Copermittees collaboratively develop and implement a Regional Residential Education Program. This is in addition to section D.5.a, which requires that each Copermittee provide education to measurably increase the knowledge of, and measurably change the behavior of, residential communities within their jurisdiction. An FY 2007-08 budget for consultant support was initially established for this program in the amount of $131,250 ($125,000 for contract costs and $6,250 for contract administration). This figure was increased to $262,500 in FY 2008-09, and is expected to double again in FY 2009-10. Each subsequent year assumes a 5% increase. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and marketing and research tools including the regional surveys to be conducted in FY 2008-09 and FY 2011-12.

d by the CA 3rd District Court of Appeal.

Hydromodification Management Plan (HMP) Development	$5,026.76	$3,351.17	$0.00	$0.00	$0.00	Order R9-2007-0001 mandates the collaborative development of a Hydromodification Management Plan (HMP). This task was initiated by the Copermittees' consultant during FY 2007-08 and will be completed in FY 2008-09. The total cost of plan development is $1,050,000, $50,000 of which is for contract administration.
Low Impact Development (LID) and Standard Urban Stormwater Mitigation Plan (SUSMP)	$1,317.75	$0.00	$0.00	$0.00	$0.00	Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU.
Long-term Effectiveness Assessment (LTEA)	$0.00	$0.00	$0.00	$5,271.00	$0.00	In addition to requirements for Copermittees to annually assess their regional, jurisdictional and watershed programs, Permit section I.1 requires the collaboratative development of a Long-term Effectiveness Assessment (LTEA) that builds on the results of the August 2005 Baseline LTEA. The cost of the 2005 LTEA was $125,000. Because of the increased complexity of new assessment requirements, this consultant cost is expected to increase to $200,000, with an additional 5% ($10,000) for contract administration.
[illegible]						
4.0 Development Planning						Reimbursable costs are not projected for this component
5.0 Construction						Reimbursable costs are not projected for this component

546

d by the CA 3rd District Court of Appeal.

6.0 Municipal						
Street Sweeping (equipment costs)	$0.00	$0.00	$0.00	$0.00	$0.00	Permit Section D.3.(5) requires street sweeping frequencies for improved roads (possessing curbs and gutters), streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept at two times per month. Areas with medium volumes of trash and/or debris must be swept monthly and areas with low volumes of trash and/or debris at least annually. The County uses average daily traffic (ADT) as a proxy for determining the level of trash and debris generated. The categories are as follows: High is defined ADT greater than 20,000 vehicles per day (vpd), medium is defined as ADT between 15,000 and 20,000 vpd, and low is defined as ADT less than 15,000 vpd. The County has approximately 1,057 miles of roads with curbs/berms, with 7% identified as high, 6% as medium and 87% as low. Applying the permit-required sweeping frequencies results in an ~8% increase in overall street sweeping activities over existing levels. To accommodate the required increase, the County is purchasing two additional sweepers at $100,000 each (with an estimated lifetime of 10 years). Annual operation and maintenance, including fuel, is $50,000 per vehicle plus an additional $20,000 for amortization of the sweepers.
Street Sweeping (staffing costs)	$0.00	$0.00	$0.00	$0.00	$0.00	In response to Permit section D.3.(5).
Street Sweeping (contract costs)	$0.00	$0.00	$0.00	$0.00	$0.00	In response to Permit section D.3.(5), contracted sweeping costs increased by $$$ for FY 07-08 and will increase by an additional $$$ in FY 08-09.
Conveyance System Cleaning	$0.00	$269,424.00	$280,151.00	$291,307.00	$302,909.00	Permit section D.3.(3).(b) mandates that all MS4 facilities be inspected annually, with high priority facilitates being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, additional staffing impacts are projected. The City will need to increase its MS4 operations and maintenance program by 2 staff years in Fy 2008-09. Costs are calculated at $74.25 per hour for Operator and $54.68 for a Worker II - increased by 4% in each subsequent year.
7.0 Industrial and Commercial						Reimbursable costs are not projected for this component because new costs can be passed through to regulated parties.
9.0 Illicit Discharge Detection & Elimination Component (IDDEC)						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.

d by the CA 3rd District Court of Appeal.

10.0 Education						
Educational Surveys and Tests	$0.00	$23,760.00	$24,710.00	$25,699.00	$26,727.00	The Permit mandates an educational component that requires the implementation of educational programs to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff on receiving waters, and potential BMP solutions for the target audience; and (2) to measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Compliance with this standard requires the routine incorporation of testing and surveying methods into program elements to ensure that implementation is resulting in targeted outcomes. FY 07-08 staffing impacts are estimated at three days per month (288 hours per year) to develop, administer, and analyze surveys and tests. Costs are calculated at the Senior Engineering Technician ($82.50 per hour), and increased by 4% each year after FY 2008-09.
11.0 Public Participation						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
12.0 Fiscal Assessment						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
13.0 Effectiveness Assessment						
Annual JURMP Assessment and Reporting	$0.00	$86,729.00	$90,199.00	$93,807.00	$97,559.00	Permit section I.1 lays out prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. To the extent applicable and feasible, Copermittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a newly emerging discipline, and will continue to evolve over the entire Permit cycle. Annual costs typically include developing and updating standards and methods, database development and modification, and data tracking, analysis, and report writing. Although these responsibilities may be incurred across a number of program areas and staff, annual costs are calculated as 480 hours of time for an Associate Engineer at $103.13 per hour, 320 hours for a Senior Engineering Tech at $82.60, 80 hours for a Code Compliance Office at $62.50, and 80 hours for a Junior Engineer at $72.44.
WATERSHED WIDE ACTIVITIES						

548

d by the CA 3rd District Court of Appeal.

Staffing for Watershed URMP development and implementation	$34,107.00	$35,472.00	$36,890.00	$38,366.00	$39,900.00	Lead responsibility for watershed program implementation resides with the DPLU Watershed Planning Division. This program consists of five staff (one Planning Manager, two Planner IIIs, and two Planner I/IIs). FY 07-08 cost estimates are based on annualized projections from YTD expenditures. These totals are lower than those projected for the following years because the program has been short-staffed for the majority of the year. For FY 2008-09 and beyond, an estimated 10% of total staff time for Associate Engineer and 5% for Deputy Director is spent on WURMP development and implementation. Calculations assume the following hourly rates for FY 2007-08; Associate Engineer - $103.13, Deputy Director - $121.69). These rates are increased by 4% in each subsequent year.
WURMP Cost-Share Agreements	$2,998.00	$16,152.00	$16,960.00	$17,808.00	$18,698.00	Cost share agreements are used to pay for WURMP consultant support. The FY 07-08 total is based on actual County contributions to the WURMP Cost Share Agreements in which it participates. Increases are estimated for future years based on requirements for increased coordination on WURMP issues in the new Permit. A 5% increase is also assumed for each year after FY 2008-09.
Implementation of Watershed Activities	$52,002.00	$38,848.00	$49,040.00	$74,592.00	$92,182.00	Permit section E.2.f requires Watershed Copermittees to implement at least two watershed water quality activities and two watershed education activities for each permit year. The County budgeted $55,000 for implementing WURMP requirements, including activities, in FY 07-08 ($2,998 was used to share cost in WURMP efforts). Because of the wide range of potential costs for these activities, a 20% increase is assumed in each subsequent year and deducting the value for the WURMP Cost-Chare Agreements.
TOTALS	$113,704.46	$515,394.60	$544,812.79	$595,862.29	$629,236.51

EXHIBIT 6 "G" - DECLARATION OF ERIK STEENBLOCK FOR CITY OF ENCINITAS.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

DECLARATION OF ERIK STEENBLOCK ON BEHALF OF THE CITY OF ENCINITAS IN SUPPORT OF TEST CLAIM

I, Erik Steenblock, declare as follows:

1. I make this declaration based upon my own personal knowledge, except for matters set forth herein on information and belief, and as to those matters I believe them to be true, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. I hold a Bachelor of Arts Degree in Ocean Studies, from the University of San Diego, 1997.

3. I am employed by the City of Encinitas as a Program Administrator.

4. I have held my current position for approximately 10 months. My duties include the development, implementation, administration and overall management of the City of Encinitas Clean Water Program.

5. I have reviewed the California Regional Water Quality Control Board ("RWQCB"), San Diego Region, Order No. R9-2007-0001 (NPDES No. CAS 0108758) (the "2007 Permit") and I am familiar with the requirements of the Permit.

6. I have also read and I am familiar with the requirements of Order No. 2001-01 (NPDES CAS0108758) issued by the San Diego RWQCB on February 21, 2001 (the "2001 Permit").

7. Based on my understanding of the requirements of the 2001 Permit and the requirements of the 2007 Permit, I am informed and believe and thereon allege that the 2007 Permit requires the co-permittees to perform new activities

Document received by the CA 3rd District Court of Appeal.

that are unique to local governmental entities that are not required by the 2001 Permit.

8. These new activities include the following:

a. Working Body

1.) Support: Sections F and L.1 of the 2007 Permit require all co-permittees to collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding ("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,000 in support costs and an additional 5% ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Encinitas's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2.) Participation: Section L.1 of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban

Document received by the CA 3rd District Court of Appeal.

runoff programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU establishes minimum levels of representation and participation in working body meetings required to meet these directives. The City of Encinitas's participation costs were determined by multiplying the hourly rate of each staff person involved in these activities by anticipated minimum number of meetings for each working body for each fiscal year and assumed that on average each staff member would spend 3 hours preparing for, traveling to, and attending each meeting. The cost to the City of Encinitas to comply with this mandated activity for FY 2007-08 is $13,806. Costs for FY 08-09 and beyond are projected based on minimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. The City of Encinitas's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

b. Regional Residential Education Program Development and Implementation: Section F.1 of the 2007 Permit requires the co-permittees to collaboratively develop and implement a Regional Residential Education Program. This is in addition to Section D.5.a, which requires each co-permittee to develop and implement an education program that measurably increases the knowledge of, and measurably changes the behavior of, residential communities within their jurisdictions. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and the development of

Document received by the CA 3rd District Court of Appeal.

marketing and research tools, including regional surveys to be conducted in FY 2008-09 and again in FY 2011-12. The co-permittees retained a consultant to perform these mandated activities in Fiscal Year 2007-08. The total cost of the contract is $131,250 which includes 5% ($6,250) for contract administration by the County. The budgeted cost of these mandated activities increased in FY 2008-09 to $262,500 and is expected to again double in FY 2009-10 to $525,000. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Encinitas's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

c. Development of New/Revised Programs and Standards

1. Hydromodification Management Plan ("HMP") Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000 which includes 5% ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Encinitas's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Sections D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the

Document received by the CA 3rd District Court of Appeal.

requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Encinitas's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

d. Long-Term Effectiveness Assessment ("LTEA"): In addition to annual assessments of the regional, jurisdictional and watershed programs, Section I.5 of the 2007 Permit requires the co-permittees to collaboratively develop a LTEA. Because of the complexity of the assessment requirements, the consultant costs to perform this assessment, which is expected to be completed in FY 2010-11, are expected to be $210,000, which includes 5% ($10,000) for contract administration by the County. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Encinitas's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

e. Street Sweeping

1.) Equipment Costs: Prior to the 2001 Permit, the City of Encinitas implemented a street sweeping program that exceeds the standards now required for the 2007 permit and cannot now quantify the expenses.

Document received by the CA 3rd District Court of Appeal.

2.) Staffing Costs: Prior to the 2001 Permit, the City of Encinitas implemented a street sweeping program that exceeds the standards now required for the 2007 permit and cannot now quantify the expenses.

3.) Contract Costs: Prior to the 2001 Permit, the City of Encinitas implemented a street sweeping program that exceeds the standards now required for the 2007 permit and cannot now quantify the expenses.

f. Conveyance System Cleaning: Section D.3.(a)(3) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be inspected annually, with high priority facilities being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, the City of Encinitas has re-allocated staffing of its Public Works Department MS4 operations and maintenance program for FY 2007-08 by .25 staff years for a Utility & Field Maintenance Crew Supervisor, and .1 staff years for a Program Coordinator. The City of Encinitas's cost in FY 2007-08 for a Utility & Field Maintenance Crew Supervisor is $70.73 per hour, and the City of Encinitas's cost in FY 2007-08 for a Program Coordinator is $56.70. The City of Encinitas's staffing cost to comply with this mandated activity in FY 2007-08 is $48,573 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Encinitas's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

g. Educational Surveys and Tests: Section D.5 of the 2007 Permit requires each co-permittee to implement an educational program to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff or receiving waters, and potential Best Management Practices ("BMPs") for the target audiences; and (2) measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Sections I.1 and I.2 further require that the effectiveness of educational activities in meeting these standards be assessed annually where applicable and feasible. Compliance with these mandated activities requires the routine incorporation of testing and surveying methods into the program elements to ensure that implementation is resulting in the targeted outcomes. To comply with Section D.5 the City of Encinitas expects to expend 175 hours of staff time in FY 2007-08, and each year thereafter, to develop, administer and analyze surveys and tests. The City of Encinitas's cost in FY 2007-08 for a Program Assistant to perform this work is $38.25 per hour. The increase in the City of Encinitas's staffing cost to comply with these mandated activities in FY 2007-08 is $6,694 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Encinitas's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

h. Annual JURMP Assessment and Reporting Requirements: Section I.1 of the 2007 Permit specifies prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each

Document received by the CA 3rd District Court of Appeal.

jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. Co-permittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a new emerging discipline and is expected to evolve over the term of the Permit. Annual costs are expected to include developing and updating standards and methods, database development and modification, and data tracking, analysis and report writing. To comply with Section I.1 of the 2007 Permit the City of Encinitas will expend 520 hours of staff time in FY 2008-09, and each year thereafter. The City of Encinitas's cost in FY 2008-09 for an Environmental Specialist II to perform these mandated activities will be $62.00 per hour. The increase in the City of Encinitas's staffing cost to comply with these mandated activities in FY 2007-08 is $32,240 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Encinitas's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

I. Watershed URMP

1.) In the 2007 Permit, The City of Encinitas does not hold lead responsibility for Carlsbad watershed program implementation, and therefore the City of Encinitas cannot quantify expenses.

2.) Cost-Sharing Agreements:

The City of Encinitas has entered into a cost sharing agreement(s) to pay for consultant support relating to Carlsbad Watershed WURMP. The consultant costs for FY 2007-08 are expected to be $2,774 for the City of Encinitas.

Document received by the CA 3rd District Court of Appeal.

Additional consultant services will be necessary in future years based on the development of cost sharing agreements for other WURMPs and an increasing need for coordination within each WURMP over the Permit cycle. The City of Encinitas's's budgeted cost for this mandated activity for FY 2008-09 is $3500. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. The City of Encinitas's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Implementation of Watershed Activities: Section E.2.f of the 2007 Permit requires Watershed co-permittees to implement at least two watershed quality activities and two watershed education activities for each permit year. The cost of implementing this mandate for FY 2007-08 is expected to be $40,000. Because of the wide range of potential costs for these activities, we anticipate that these costs will increase on average 20% per year. The City of Encinitas's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

9. The actual increased costs incurred by the City of Encinitas in FY 2007-08 to comply with the mandated activities required by the 2007 Permit will be $91,357.44, and are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

10. The estimated increased costs that the City of Encinitas expects to incur in FY 2008-09, are expected to be $139,331.50, and are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

11. The estimated increased costs that the City of Encinitas expects to incur during each year of the remaining term of the 2007 Permit are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

12. I am not aware of any dedicated state or federal funds that are or will be available to pay for these increased costs.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

14. I am not aware of any authority to assess a fee to offset these increased costs.

15. I believe that the only available source to pay these increased costs are and will be the (county's/city's) general purpose funds.

Executed this 11th day of June, 2008 at Encinitas, California.

I declare under penalty of perjury under the Laws of the State of California that the foregoing is true and correct.

ERIK STEENBLOCK

Document received by the CA 3rd District Court of Appeal.

Co-Permittee

City of Encinitas

	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
Working Body Support	$0.00	$11,410.88	$11,981.42	$12,580.49	$13,209.50	Permit section L.1 requires that all Copermittees collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs and Watershed Urban Runoff Management Programs, and to plan and coordinate activities required under the Permit. Ten regional working bodies were established per the Copermittee's Jan. 2008 MOU to support the regional coordination of programs and activities required under the Permit. Working body costs represent consultant and/or Copermittee staff support for the Copermittee's Program Planning subcommittee and nine Regional Workgroups or Sub-workgroups. FY 08-09 costs were established in the amount of $543,375 which includes $517,500 in support costs and an additional 5% ($25,875) for contract administration. FY 2008-09 costs were calculated at $125 per hour. A 5% total cost increase is also factored in each subsequent year.
Working Body Participation	$13,806.00	$16,339.00	$14,060.00	$14,622.00	$15,207.00	Copermittees must also maintain representation in, and participate in meetings of, each of the working bodies established under the MOU. The estimates presented here are for the City of Encinitas only. City participation costs are determined by multiplying the hourly rate of each staff person by the number of meetings each fiscal year, and assuming an average meeting length of three hours. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs for FY 08-09 and beyond are projected based on mimimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. Detailed calculations can be found in Worksheet B.
Regional Residential Education Program Development and Implementation	$2,756.25	$5,512.50	$11,025.00	$11,576.25	$12,155.07	Permit section F.1 requires that the Copermittees collaboratively develop and implement a Regional Residential Education Program. This is in addition to section D.5.a, which requires that each Copermittee provide education to, measurably increase the knowledge of, and measurably change the behavior of, residential communities within their jurisdiction. An FY 2007-08 budget for consultant support was initially established for this program in the amount of $131,250 ($125,000 for contract costs and $6,250 for contract administration). This figure was increased to $262,500 in FY 2008-09, and is expected to double again in FY 2009-10. Each subsequent year assumes a 5% increase. Regional program activities to be funded include: materials development / branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and marketing and research tools including the regional surveys to be conducted in FY 2008-09 and FY 2011-12.

d by the CA 3rd District Court of Appeal.

Hydromodification Management Plan (HMP) Development	$9,319.49	$6,212.99	$0.00	$0.00	$0.00	Order R9-2007-0001 mandates the collaborative development of a Hydromodification Management Plan (HMP). This task was initiated by the Copermittees' consultant during FY 2007-08 and will be completed in FY 2008-09. The total cost of plan development is $1,050,000, $50,000 of which is for contract administration.
Low Impact Development (LID) and Standard Urban Stormwater Mitigation Plan (SUSMP)	$1,102.50	$0.00	$0.00	$0.00	$0.00	Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU.
Long-term Effectiveness Assessment (LTEA)	$0.00	$0.00	$0.00	$4,410.00	$0.00	In addition to requirements for Copermittees to annually assess their regional, jurisdictional and watershed programs, Permit section 1.1 requires the collaboratative development of a Long-term Effectiveness Assessment (LTEA) that builds on the results of the August 2005 Baseline LTEA. The cost of the 2005 LTEA was $125,000. Because of the increased complexity of new assessment requirements, this consultant cost is expected to increase to $200,000, with an additional 5% ($10,000) for contract administration.
[redacted]						
4.0 Development Planning						
5.0 Construction						
6.0 Municipal						
Street Sweeping (equipment costs)	$0.00	$0.00	$0.00	$0.00	$0.00	There is no additional street sweeping costs to the City of Encinitas because the current street sweeping program meets Permit requirements.
Street Sweeping (staffing and /or contract costs)	$0.00	$0.00	$0.00	$0.00	$0.00	There is no additional street sweeping costs to the City of Encinitas because the current street sweeping program meets Permit requirements.
Conveyance System Cleaning	$48,573.20	$50,516.13	$52,536.77	$54,638.24	$56,824.00	Additional cost burden to the City of Encinitas to meet the provisions of Permit Sectioin D.3.(3)(b) have been calculated based upon the re-allocation of existing staff time required to meet associated data management, operations, maintenance, program development and report preparation standards. Annual costs have been calcuated at 520 hours (25% Staff Year) for a Utility & Field Maintenance Crew Supervisor ($70.73 / Hour) and 208 Hours (10% Staff Year) for a Program Coordinator ($56.70 / Hour) with an estimted 4% increase per fiscal year.
7.0 Industrial and Commercial						Reimbursable costs are not projected for this component because new costs can be passed through to regulated parties.

710

566

d by the CA 3rd District Court of Appeal.

9.0 Illicit Discharge Detection & Elimination Component (IDDEC)						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
10.0 Education						
Educational Surveys and Tests	$0.00	$0.00	$0.00	$0.00	$0.00	Public awareness survey costs are included in the effectiveness assessment section.
11.0 Public Participation						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
12.0 Fiscal Assessment						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
13.0 Effectiveness Assessment						
Annual JURMP Assessment & Reporting	$0.00	$32,240.00	$33,530.00	$34,871.00	$36,266.00	Permit section L1 lays out prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented each major JURMP component, and the JURMP as a whole. To the extent applicable and feasible, Copermittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a newly emerging discipline, and will continue to evolve over the entire Permit cycle. Annual costs typically include developing and updating standards and methods, database development and modification, and data tracking, analysis, and report writing. Although these responsibilities may be incurred across a number of program areas and staff, annual costs are calculated as 520 hours of time (25% staff year) for a Stormwater Environmental Speciailst II ($62.00 / hour), and a 4% increase per fiscal year.

d by the CA 3rd District Court of Appeal.

Staffing for Watershed URMP development and implementation	$0.00	$0.00	$0.00	$0.00	$0.00	The City of Encinitas does not have lead resonsibility for the Carlsbad Watershed. Watershed Urban Runoff Management (WURMP) development and implementation costs are shared through a cost agreement accounted for below.
WURMP Cost-Share Agreements	$2,800.00	$3,500.00	$4,000.00	$4,500.00	$5,000.00	Cost share agreements are used to pay for WURMP consultant support. The FY 07-08 total is based on actual City of Encinitas contributions to the WURMP Cost Share Agreement with the Carlsbad Watershed Copermittees. Incremental increases are estimated for future years based on requirements for increased coordination on WURMP issues in the new Permit.
Implementation of Watershed Activities	$3,000.00	$3,600.00	$4,320.00	$5,184.00	$6,222.00	Permit section E.2.f requires Watershed Copermittees to implement at least two watershed water quality activities and two watershed education activities for each permit year. The City budgeted $3,000 for implementing WURMP activities in FY 07-08. Because of the wide range of potential costs for these activities, a 20% increase is assumed in each subsequent year. Notably, such activities may be part of a shared costs for a program implemented watershed-wide, or costs incurred locally for a watershed water qualtiy or education activity.

EXHIBIT 6 "H" – DECLARATION OF CHERYL FILAR FOR CITY OF ESCONDIDO.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

DECLARATION OF CHERYL FILAR (CITY OF ESCONDIDO)
IN SUPPORT OF TEST CLAIM

I, Cheryl Filar, declare as follows:

1. I make this declaration based upon my own personal knowledge, except for matters set forth herein on information and belief, and as to those matters I believe them to be true, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. I have a Bachelor of Arts degree, with 22 Years of Public Administration experience, 7 years in stormwater administration.

3. I am employed by the City of Escondido as an Environmental Programs Manager.

4. I have held my current position for approximately three years. My duties include facilitating the City's stormwater program amongst the various departments and/or divisions that develop and implement it.

5. I have read and reviewed the California Regional Water Quality Control Board ("RWQCB"), San Diego Region, Order No. R9-2007-0001 (NPDES No. CAS 0108758) (the "2007 Permit") and I am familiar with the requirements of the Permit.

6. I have also read and reviewed and I am familiar with the requirements of Order No. 2001-01 (NPDES CAS0108758) issued by the San Diego RWQCB on February 21, 2001 (the "2001 Permit").

7. Based on my understanding of the requirements of the 2001 Permit and the requirements of the 2007 Permit, I believe the 2007 Permit requires the co-permittees to perform new activities that are unique to local governmental entities that are not required by the 2001 Permit.

Document received by the CA 3rd District Court of Appeal.

8. These new activities include the following:

a. Working Body

1.) Support: Section L.1 of the 2007 Permit requires all co-permittees to collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding ("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,000 in support costs and an additional 5% ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Escondido's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2.) Participation: Section L.1.a of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban runoff programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU establishes minimum levels of representation and participation in working body meetings required to meet these directives. The City of Escondido's participation costs were determined by multiplying the hourly rate of each staff person involved in these activities by anticipated minimum number of meetings for

Document received by the CA 3rd District Court of Appeal.

each working body for each fiscal year and assumed that on average each staff member would spend approximately three hours preparing for and attending each meeting. The cost to the City of Escondido to comply with this mandated activity for FY 2007-08 is estimated at $1,710, because the current fiscal year does not end until June 30, 2008. Costs for FY 2008-09 and beyond are projected based on minimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 3 % each year after FY 07-08. The City of Escondido's estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

b. Regional Residential Education Program Development and Implementation: Section F.1 of the 2007 Permit requires the co-permittees to collaboratively develop and implement a Regional Residential Education Program. This is in addition to Section D.5.a, which requires each co-permittee to develop and implement an education program that measurably increases the knowledge of, and measurably changes the behavior of, residential communities within their jurisdictions. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and the development of marketing and research tools, including regional surveys to be conducted in FY 2008-09 and again in FY 2011-12. The co-permittees retained a consultant to perform these mandated activities in FY 2007-08. The total cost of the contract is $131,250 which includes 5% ($6,250) for contract administration by the County. The budgeted cost of these mandated activities increased in FY 2008-09 to $262,500 and is expected to again double in FY 2009-10 to $525,000. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Escondido's proportional share of the budgeted costs for complying

Document received by the CA 3rd District Court of Appeal.

with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

c. Development of New/Revised Programs and Standards

1. Hydromodification Management Plan ("HMP") Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000 which includes 5% ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Escondido's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Escondido's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

d. Long-Term Effectiveness Assessment ("LTEA"): In addition to annual assessments of the regional, jurisdictional and watershed programs, Section I.1 of the 2007 Permit requires the co-permittees to collaboratively develop a LTEA. Because of the complexity of the assessment requirements, the consultant costs to perform this assessment, which is expected to be completed in FY 2010-11, are expected to be $210,000, which includes 5% ($10,000) for contract administration by the County. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Escondido's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

e. Street Sweeping

1.) Equipment Costs: Section D.3.(5) of the 2007 Permit mandates specific street sweeping frequencies for improved roads, streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept twice monthly. Areas that consistently generate moderate volumes of trash must be swept at least once monthly, and areas identified as generating low volumes of trash must be swept as necessary, but no less than once per year. Because the City was already meeting the minimum requirements of the 2007 permit during the five-year cycle of the 2001 Permit with two operational street sweepers, no additional costs are anticipated for the next five years. However, had the City been meeting only the minimum requirements of the 2001 permit, funding for one additional street sweeper along with resources for associated maintenance and fueling costs would have been necessary to meet the minimum requirements of the 2007 Permit. The additional vehicle would cost approximately $166,000 and maintenance and fueling costs would total $26,000 for an estimated total of $192,000 in FY 2007-08, with an estimated 5% increase for each subsequent fiscal year. These estimated costs are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

2.) Staffing Costs: In response to Section D.3.(5) the City of Escondido will increase its program resources based on the estimated cost for one full-time equivalent (FTE) staff person in FY 2008-09 at $43.26 per hour. The increase in the City of Escondido's program costs to comply with this mandated activity in FY 2008-09 is $90,000 and is expected to increase 3% in FY 2009-10 and each year thereafter. The City of Escondido's estimated costs for complying with these mandated activities are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

f. Conveyance System Cleaning: Section D.3.(3).(b) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be inspected annually, with high priority facilities being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, the City of Escondido will increase its program resources based on the estimated cost for two full-time equivalent (FTE) staff person at $42 per hour each in FY 2008-09 plus two new trucks at $47,200. The total estimated increase in the City of Escondido's cost in FY 2008-09 is $221,900 and is expected to increase 4% in FY 2009-10 and 3% each year thereafter. These costs are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

g. Educational Surveys and Tests: Section D.5 of the 2007 Permit requires each co-permittee to implement an educational program to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff or receiving waters, and potential Best Management Practices ("BMPs") for the target audiences; and (2) measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Sections I.1 and I.2 further require that the effectiveness of educational activities in meeting these standards be assessed annually where applicable and feasible. Compliance with these mandated activities requires the routine incorporation of testing and surveying methods into the

Document received by the CA 3rd District Court of Appeal.

program elements to ensure that implementation is resulting in the targeted outcomes. To comply with this Section, the City of Escondido will utilize the surveys developed by the Regional Education Program and therefore does not anticipate additional costs other than those already reflected in the City's share for its participation in regional activities, which are detailed in Exhibit A to this declaration under "Regional Residential Education Program Development and Implementation" and are incorporated into Exhibit 1 to the Test Claim.

h. Annual JURMP Assessment and Reporting Requirements: Section I.1 of the 2007 Permit specifies prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. Co-permittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a new emerging discipline and is expected to evolve over the term of the Permit. Annual costs are expected to include developing and updating standards and methods, database development and modification, and data tracking, analysis and report writing. To comply with Section I.1 the City of Escondido will expend approximately 54 hours of staff time in FY 2007-08, and each year thereafter. The City of Escondido's total aggregated staff cost (one Environmental Programs Manager and outside consultant support) in FY 2007-08 to perform these mandated activities will be approximately $7,638. After the initial compliance effort in FY 2007-08, the costs are expected to drop to an estimated $6,830 annually but then are anticipated to increase by approximately 14% for each subsequent year after that due to anticipated increases in contract and staff support in terms of salary and time. The City of Escondido's estimated costs for complying with these mandated activities for FY

Document received by the CA 3rd District Court of Appeal.

2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

1. Watershed URMP

1.) Staffing for Development and Implementation: Section E.2 of the 2007 Permit requires each co-permittee to collaborate with other co-permittees within its Watershed Management Area (WMA) to develop and implement an updated Watershed Urban Runoff Management Program for each watershed. Lead responsibility for the City of Escondido's watershed program implementation resides with the Utilities Department's Environmental Programs Manager. For FY 2007-08 and beyond, it is estimated that staff will spend 30% of its time on WURMP development and implementation. The City of Escondido's estimated costs for complying with these requirements in FY 2007-08 is $59,280 and is expected to increase by an estimated 3% in FY 2008-09 and each year thereafter. The City of Escondido's estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Cost-Sharing Agreements:

The City of Escondido has entered into two cost sharing agreement(s) to pay for consultant support relating to the Carlsbad and San Dieguito WURMPs. The consultant costs for FY 2007-08 are expected to be $6,125. Additional consultant services will be necessary in future years based on the development of cost sharing agreements for other WURMP and an increasing need for coordination within each WURMP over the Permit cycle. The City of Escondido's budgeted cost for this mandated activity for FY 2008-09 is $10,250. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. The City of Escondido's estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

3.) Implementation of Watershed Activities: Section E.2.f of the 2007 Permit requires Watershed co-permittees to implement at least two watershed quality activities and two watershed education activities for each permit year. The cost of implementing this mandate for FY 2007-08 is expected to be $20,000. Because of the wide range of potential costs for these activities, we anticipate that these costs will increase on average 20% per year. The City of Escondido's estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

9. The estimated increased costs incurred by the City of Escondido in FY 2007-08 to comply with the mandated activities required by the 2007 Permit are estimated at $286,753, and are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

10. The estimated increased costs that the City of Escondido expects to incur in FY 2008-09, are expected to be $701,220, and are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

11. The estimated increased costs that the City of Escondido expects to incur during each year of the remaining term of the 2007 Permit are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

12. I am not aware of any dedicated state or federal funds that are or will be available to pay for these increased costs.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

14. I believe that the only available source to pay these increased costs are and will be the City's general purpose and Utilities/Wastewater funds.

Document received by the CA 3rd District Court of Appeal.

Executed this 12th day of June 2008 at Escondido, California.

I declare under penalty of perjury that the foregoing is true and correct.

Cheryl Filar, Environmental Program Manager

Document received by the CA 3rd District Court of Appeal.

Co-Permittee -

City of Escondido

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
[illegible]						
Working Body Support	$0.00	$20,430.90	$21,452.45	$22,525.07	$23,651.30	Permit section L.1 requires that all Copermittees collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs and Watershed Urban Runoff Management Programs, and to plan and coordinate activities required under the Permit. Ten regional working bodies were established per the Copermittee's Jan. 2008 MOU to support the regional coordination of programs and activities required under the Permit. Working body costs represent consultant and/or Copermittee staff support for the Copermittee's Program Planning subcommittee and nine Regional Workgroups or Sub-workgroups. FY 08-09 costs were established in the amount of $543,375 which includes $517,500 in support costs and an additional 5% ($25,875) for contract administration. FY 2008-09 costs were calculated at $125 per hour. A 5% total cost increase is also factored in each subsequent year.
Working Body Participation	$1,710.00	$4,560.00	$4,700.00	$4,840.00	$4,980.00	Copermittees must also maintain representation in and participate in meetings of, each of the working bodies established under the MOU. The estimates presented here are City costs only. City participation costs are determined by multiplying the hourly rate of the Programs Manager ($95) by the number of meetings each fiscal year, and assuming an average meeting length of three hours. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs for FY 08-09 and beyond are projected based on mimimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 3% each year after FY 08-09.

l by the CA 3rd District Court of Appeal.

Regional Residential Education Program Development and Implementation	$4,935.00	$9,870.00	$19,740.00	$20,727.00	$21,763.37	Permit section F.1 requires that the Copermittees collaboratively develop and implement a Regional Residential Education Program. This is in addition to section D.5.a, which requires that each Copermittee provide education to, measurably increase the knowledge of, and measurably change the behavior of residential communities within their jurisdiction. An FY 2007-08 budget for consultant support was initially established for this program in the amount of $131,250 ($125,000 for contract costs and $6,250 for contract administration). This figure was increased to $262,500 in FY 2008-09, and is expected to double again in FY 2009-10. Each subsequent year assumes a 5% increase. Regional program activities to be funded include: materials development / branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and marketing and research tools including the regional surveys to be conducted in FY 2008-09 and FY 2011-12.
Hydromodification Management Plan (HMP) Development	$17,898.32	$11,932.21	$0.00	$0.00	$0.00	Order R9-2007-0001 mandates the collaborative development of a Hydromodification Management Plan (HMP). This task was initiated by the Copermittees' consultant during FY 2007-08 and will be completed in FY 2008-09. The total cost of plan development is $1,050,000, $50,000 of which is for contract administration.
Low Impact Development (LID) and Standard Urban Stormwater Mitigation Plan (SUSMP)	$1,974.00	$0.00	$0.00	$0.00	$0.00	Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU.
Long-term Effectiveness Assessment (LTEA)	$0.00	$0.00	$0.00	$7,896.00	$0.00	In addition to requirements for Copermittees to annually assess their regional, jurisdictional and watershed programs, Permit section I.1 requires the collaboratative development of a Long-term Effectiveness Assessment (LTEA) that builds on the results of the August 2005 Baseline LTEA. The cost of the 2005 LTEA was $125,000. Because of the increased complexity of new assessment requirements, this consultant cost is expected to increase to $200,000, with an additional 5% ($10,000) for contract administration.
[illegible]						
4.0 Development Planning						Reimbursable costs are not projected for this component.
5.0 Construction						Reimbursable costs are not projected for this component.
6.0 Municipal						

588

d by the CA 3rd District Court of Appeal.

Street Sweeping (equipment costs)	$0.00	$0.00	$0.00	$0.00	$0.00	Permit Section D.3.(5) requires street sweeping frequencies for improved roads (possessing curbs and gutters), streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept at two times per month. Areas with medium volumes of trash and/or debris must be swept monthly and areas with low volumes of trash and/or debris at least annually. The City has four sweepers to conduct its program and doesn't anticiapte addtional costs in the upcoming fiscal years to meet the new Permit sweeping frequency requirements.
Street Sweeping (staffing costs)	$90,000.00	$92,700.00	$95,500.00	$98,300.00	$101,000.00	In response to Permit section D.3.(5), City costs will increase increase by the equivalent of one full-time staff person at a rate of $43.26/hour beginning in FY 07/08, with a 3% increase factored in for each subsequent fiscal year.
Street Sweeping (contract costs)	$0.00	$0.00	$0.00	$0.00	$0.00	In response to Permit section D.3.(5), contracted sweeping costs increased by $$$ for FY 07-08 and will increase by an additional $$$ in FY 08-09.
Conveyance System Cleaning	$221,900.00	$188,200.00	$194,300.00	$200,200.00	$206,300.00	Permit section D.3.(3).(b) mandates that all MS4 facilities be inspected annually. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, additional staffing and equpment impacts are required: 2 FTE staff at a rate of $41,88/hour for 07/08 with a 3% cost increase for each subsequent fiscal year; two new trucks at an initial cost of $40,000 in addition to ongoing maintenance costs for each subsequent fiscal year.
7.0 Industrial and Commercial						Reimbursable costs are not projected for this component because new costs can be passed through to regulated parties.
9.0 Illicit Discharge Detection & Elimination Component (IDDEC)						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
10.0 Education						
Educational Surveys and Tests	$0.00	$0.00	$0.00	$0.00	$0.00	The Permit mandates an educational component that requires the implementation of educational programs to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff on receiving waters, and potential BMP solutions for the target audience; and (2) to measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Compliance with this standard requires the routine incorporation of testing and surveying methods into program elements to ensure that implementation is resulting in targeted outcomes. The City of Escondido will utilize the surveys developed by the Regional Eduction Program to comply with this measure.
11.0 Public Participation						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.

l by the CA 3rd District Court of Appeal.

12.0 Fiscal Assessment						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
13.0 Effectiveness Assessment						
Annual JURMP Assessment and Reporting	$7,638.00	$6,830.00	$7,814.00	$8,939.00	$10,226.00	Permit section L1 requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of activity/BMP implemented, each major JURMP component, and the JURMP as a whole. To the extent applicable and feasible, Copermittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Annual costs typically include developing and updating standards and methods, database development and modification, and data tracking, analysis, and report writing. Although these responsibilities may be incurred across a number of program areas and staff, annual costs include the Prorgram Manager's $95 loaded rate for 8 hours and consultant rates for $165--Senior Scientist; $110--Consultant Scientist; $95--Consultant Analyst; and $90--Consultant, GIS, WP, etc for an average of 50 hours with a 10 percent inflationary increase for each year beginning in FY 09-10.
WATERSHED ACTIVITIES						
Staffing for Watershed URMP development and implementation	$59,280.00	$59,280.00	$61,585.00	$62,890.00	$64,775.00	Lead responsibility for watershed program implementation resides with the Environmental Programs Manager. FY 07-08 cost estimates are based on annualized projections from YTD expenditures. For FY 2007-08 and beyond, an estimated 30% of total staff time for these positions is spent on WURMP development and implementation. Calculations assume an hourly $95 rate for the Programs Manager for FY 2007-08. This rate is increased by 3% in each subsequent year after 2008-09.
WURMP Cost-Share Agreements	$6,125.00	$10,250.00	$10,760.00	$11,300.00	$11,865.00	Cost share agreements are used to pay for WURMP consultant support. The FY 07-08 total is based on actual City contributions to the WURMP Cost Share Agreements in which it participates. Increases are estimated for future years based on requirements for increased coordination on WURMP issues in the new Permit. A 5% increase is also assumed for each year after FY 2008-09.
Implementation of Watershed Activities	$20,000.00	$24,000.00	$28,800.00	$34,560.00	$41,470.00	Permit section E.2.f requires Watershed Copermittees to implement at least two watershed water quality activities and two watershed education activities for each permit year. The City budgeted $20,000 for implementing WURMP activities in FY 07-08. Because of the wide range of potential costs for these activities, a 20% increase is assumed in each subsequent year.
TOTALS	**$431,460.32**	**$428,053.11**	**$444,651.45**	**$472,177.07**	**$486,030.67**

EXHIBIT 6 “I” - DECLARATION OF JUDITH KEIR FOR CITY OF IMPERIAL BEACH.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

DECLARATION OF JUDITH KEIR IN SUPPORT OF TEST CLAIM

I, Judith Keir, declare as follows:

1. I make this declaration based upon my own personal knowledge, except for matters set forth herein on information and belief, and as to those matters I believe them to be true, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. I have a Bachelors Degree in Environmental Studies, and was previously employed by the Regional Water Quality Control Board, Lahontan Region, as an Environmental Scientist. My duties included regulating waste discharges, writing discharge permits, and ensuring compliance. I prepared investigation reports and enforcement related documents, and analyzed and evaluated available data on the effects of water pollutants, waste management, water diversions, and water use on human health, vegetation, fish, wildlife, water supplies, potential land uses, and other aspects of the environment. I have also worked on a restoration project in the Las Vegas Wash, which drains the Las Vegas Valley into Lake Mead, and includes the components of storm water, urban runoff, shallow groundwater, and treated effluent. I participated with federal, state and local agencies to revitalize the wetlands and restore their capability to filter harmful contaminants from the water.

3. I am employed by the City of Imperial Beach as the Environmental Program Manager.

4. I have held my current position for approximately 1 year. My duties include:

- Planning, organizing, and administering the permitting, monitoring, inspection, enforcement, pollution prevention, and data management activities of the Storm Water Program in accordance with federal, state and local laws and the Permit

Document received by the CA 3rd District Court of Appeal.

8. These new activities include the following:

a. Working Body

1.) Support: Section L.1 of the 2007 Permit requires all co-permittees to collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding ("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,500 in support costs and an additional 5 percent ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5 percent in FY 2009-10 and each year thereafter. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Imperial Beach's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2.) Participation: Section L.1.a of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban runoff programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU establishes minimum levels of representation and participation in working body meetings required to meet these directives. The City of Imperial Beach's participation costs were determined by multiplying the hourly rate of each staff person involved in these activities by anticipated minimum number of meetings

Document received by the CA 3rd District Court of Appeal.

detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

c. Development of New/Revised Programs and Standards

1.) Hydromodification Management Plan ("HMP") Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000, which includes 5 percent ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Imperial Beach's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2.) Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500, which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Imperial Beach's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

approximately $48,000. The City of Imperial Beach's street sweeping program was already performing at the level of the Permit requirements prior to adoption of the 2007 Permit. The contract costs for FY 2007-08 and estimated increased contract costs for future years are detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

f. Conveyance System Cleaning: Section D.3.(3).(b) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be inspected annually, with high priority facilities being inspected between May and September. Any catch basin or storm drain inlet that has accumulated trash and debris greater than 33 percent of design capacity is to be cleaned in a timely manner. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, the City of Imperial Beach has increased staffing of its MS4 operations and maintenance program for FY 2007-08 by 1.0 staff years. The City of Imperial Beach's cost in FY 2007-08 for two Sewer Division Personnel required to perform the extra cleaning duties is $107 per hour. The increase in the City of Imperial Beach's staffing cost to comply with this mandated activity in FY 2007-08 is $171,200 and is expected to increase 4 percent in FY 2008-09 and each year thereafter. The City of Imperial Beach's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

g. Educational Surveys and Tests: Section D.5 of the 2007 Permit requires each co-permittee to implement an educational program to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff or receiving waters, and potential Best Management Practices ("BMPs") for the target audiences; and (2) measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Sections I.1 and I.2 further require that the effectiveness of educational activities in meeting these standards

Document received by the CA 3rd District Court of Appeal.

Imperial Beach's staffing cost to comply with these mandated activities in FY 2008-09 is $42,900 and is expected to increase 4 percent in FY 2009-10 and each year thereafter. The City of Imperial's actual and estimated costs for complying with these mandated activities for FY 2008-09 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

i. Watershed URMP

1.) Staffing for Development and Implementation: Section E.2 of the 2007 Permit requires each co-permittee to develop and implement an updated Watershed Urban Runoff Management Program. The City of Imperial Beach has determined that the level of staff time contribution to this effort is not significantly higher than the level of staff time contribution required by the 2001 Permit and, therefore, the City of Imperial Beach will not incur additional costs as a result of this 2007 Permit requirement. The main responsibility for this item falls to the County of San Diego as the Principal Permittee for the Region and as Lead Permittee for the Tijuana River Watershed, and to the Port of San Diego as the San Diego Bay Watershed Lead Permittee. Therefore, the City of Imperial Beach's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are shown as zero in Exhibit A to this declaration and Exhibit 1 to the Test Claim.

2.) Cost-Sharing Agreements: To date, the City of Imperial Beach has not entered into any cost sharing agreement(s) with other co-permittees of either the San Diego Bay or the Tijuana River Watersheds to pay for consultant support relating to the San Diego Bay WURMPs or to the Tijuana River WURMPs. At this time it is not possible to predict if consultant services will be necessary in future years for WURMP activities. Should an increasing need for coordination within the San Diego Bay Watershed or the Tijuana River Watershed become necessary over the Permit cycle due to an increased need for coordination within each WURMP over the Permit cycle, costs will be assessed at that time. However, at this time it is difficult to quantify a cost for

Document received by the CA 3rd District Court of Appeal.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

14. The City has a pollution fee that is used to offset a portion of the costs charged to residents and businesses. The Howard Jarvis Taxpayer's Association is currently questioning the legality of this fee.

15. I believe that the only certain available source to pay these increased costs are and will be the city's general purpose funds.

Executed this 13th day of June at Imperial Beach, California.

I declare under penalty of perjury that the foregoing is true and correct.

Judith Keir

Judith Keir

Document received by the CA 3rd District Court of Appeal.

Co-Permittee - City of Imperial Beach

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
[illegible]						
Working Body Support	$0.00	$5,270.74	$5,534.28	$5,810.99	$6,101.53	Permit section L.1 requires that all Copermittees collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs and Watershed Urban Runoff Management Programs, and to plan and coordinate activities required under the Permit. Ten regional working bodies were established per the Copermittee's Jan. 2008 MOU to support the regional coordination of programs and activities required under the Permit. Working body costs represent consultant and/or Copermittee staff support for the Copermittee's Program Planning subcommittee and nine Regional Workgroups or Sub-workgroups. FY 08-09 costs were established in the amount of $543,375 which includes $517,500 in support costs and an additional 5% ($25,875) for contract administration. FY 2008-09 costs were calculated at $125 per hour. A 5% total cost increase is also factored in each subsequent year.
Working Body Participation	$4,536.00	$4,980.00	$4,968.00	$5,167.00	$5,373.00	Copermittees must also maintain representation in, and participate in meetings of, each of the working bodies established under the MOU. The estimates presented here are City of Imperial Beach costs only. City participation costs are determined by multiplying the hourly rate of each staff person by the number of meetings each fiscal year, and assuming an average meeting length of three hours. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs for FY 08-09 and beyond are projected based on mimimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. Detailed calculations can be found in Worksheet B.
Regional Residential Education Program Development and Implementation	$1,273.13	$2,546.25	$5,092.50	$5,347.13	$5,614.49	Permit section F.1 requires that the Copermittees collaboratively develop and implement a Regional Residential Education Program. This is in addition to section D.5.a, which requires that each Copermittee provide education to, measurably increase the knowledge of, and measurably change the behavior of, residential communities within their jurisdiction. An FY 2007-08 budget for consultant support was initially established for this program in the amount of $131,250 ($125,000 for contract costs and $6,250 for contract administration). This figure was increased to $262,500 in FY 2008-09, and is expected to double again in FY 2009-10. Each subsequent year assumes a 5% increase. Regional program activities to be funded include: materials development / branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and marketing and research tools including the regional surveys to be conducted in FY 2008-09 and FY 2011-12.
Hydromodification Management Plan (HMP) Development	$3,418.64	$2,279.09	$0.00	$0.00	$0.00	Order R9-2007-0001 mandates the collaborative development of a Hydromodification Management Plan (HMP). This task was initiated by the Copermittees' consultant during FY 2007-08 and will be completed in FY 2008-09. The total cost of plan development is $1,050,000, $50,000 of which is for contract administration.

d by the CA 3rd District Court of Appeal.

City of Imperial Beach
Unfunded Mandate Costs

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
Low Impact Development (LID) and Standard Urban Stormwater Mitigation Plan (SUSMP)	$509.25	$0.00	$0.00	$0.00	$0.00	Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU.
Long-term Effectiveness Assessment (LTEA)	$0.00	$0.00	$0.00	$2,037.00	$0.00	In addition to requirements for Copermittees to annually assess their regional, jurisdictional and watershed programs, Permit section 11 requires the collaborative development of a Long-term Effectiveness Assessment (LTEA) that builds on the results of the August 2005 Baseline LTEA. The cost of the 2005 LTEA was $125,000. Because of the increased complexity of new assessment requirements, this consultant cost is expected to increase to $200,000, with an additional 5% ($10,000) for contract administration.
[illegible]						
4.0 Development Planning						Reimbursable costs are not projected for this component.
5.0 Construction						Reimbursable costs are not projected for this component.
6.0 Municipal						
Street Sweeping (equipment costs)	$0.00	$0.00	$0.00	$0.00	$0.00	Permit Section D.3.(5) requires street sweeping frequencies for improved roads (possessing curbs and gutters), streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept at two times per month. Areas with medium volumes of trash and/or debris must be swept monthly and areas with low volumes of trash and/or debris at least annually. The City contracts the street sweeping, and has approximately 127.9 miles of roads with curbs/berms, with 7.5% identified as high and 92.5% as medium. The categories are determined as follows: High is defined average daily traffic (ADT) greater than 20,000 vehicles per day (vpd), medium is defined as ADT between 15,000 and 20,000 vpd, and low is defined as ADT less than 15,000 vpd.
Street Sweeping (staffing costs)	$0.00	$0.00	$0.00	$0.00	$0.00	The City contracts the street sweeping.
Street Sweeping (contract costs)	$48,000.00	$49,920.00	$51,917.00	$56,070.00	$58,313.00	Contract costs are estimated to increase by approximately 4% annually.
Conveyance System Cleaning	$171,200.00	$178,048.00	$185,169.92	$192,576.72	$200,279.79	Permit section D.3.(3).(b) mandates that all MS4 facilities be inspected annually, with high priority facilitates being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, additional staffing impacts are projected. The City utilizes Sewer Division staff for the MS4 operations and maintenance program. Costs are calculated at $107.00 per hour for Sewer Division personnel * 2 personnel * 800 hours, and are increased by 4% in each subsequent year. This hourly cost includes equipment maintenance, etc.
7.0 Industrial and Commercial						Reimbursable costs are not projected for this component because new costs can be passed through to regulated parties.
9.0 Illicit Discharge Detection & Elimination Component (IDDEC)						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.

d by the CA 3rd District Court of Appeal.

City of Imperial Beach
Unfunded Mandate Costs

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
10.0 Education						
Educational Surveys and Tests	$0.00	$12,672.00	$13,248.00	$13,824.00	$14,400.00	The Permit mandates an educational component that requires the implementation of educational programs to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff on receiving waters, and potential BMP solutions for the target audience; and (2) to measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Compliance with this standard requires the routine incorporation of testing and surveying methods into program elements to ensure that implementation is resulting in targeted outcomes. FY 07-08 staffing impacts are estimated at three days per month (288 hours per year) to develop, administer, and analyze surveys and tests. Costs are calculated at the Environmental Program Manager level ($42/hr), and increased by 4% each year after FY 2008-09.
11.0 Public Participation						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
12.0 Fiscal Assessment						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
13.0 Effectiveness Assessment						
Annual JURMP Assessment and Reporting	$0.00	$42,900.00	$44,850.00	$46,800.00	$48,750.00	Permit section I.1 lays out prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. To the extent applicable and feasible, Copermittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a newly emerging discipline, and will continue to evolve over the entire Permit cycle. Annual costs typically include developing and updating standards and methods, database development and modification, and data tracking, analysis, and report writing. Annual costs are calculated as 975 hours of time (~0.5 staff years) at the Environmental Program Manager level ($42.00 per hour), and increased by 4% each year after FY 2008-09.

d by the CA 3rd District Court of Appeal.

City of Imperial Beach
Unfunded Mandate Costs

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
Staffing for Watershed URMP development and implementation	$452.00	$1,584.00	$1,656.00	$1,728.00	$1,800.00	Lead responsibility for watershed program implementation resides with the County of San Diego DPLU Watershed Planning Division. The City of Imperial Beach participates in meetings to support Watershed URMP development and implementation. Copermittees must maintain representation in, and participate in meetings of, each of the watershed groups in which the City is located. The estimates presented here are City of Imperial Beach costs only for participation in two watershed groups. City participation costs are determined by multiplying the hourly rate of each staff person by the number of meetings each fiscal year, and assuming an average meeting length of three hours. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs are calculated at the Environmental Program Manager level ($42/hr), and increased by 4% each year after FY 2008-09. Costs for FY 08-09 and beyond are projected based on mimimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload.
WURMP Cost-Share Agreements	$28,000.00	$29,400.00	$30,870.00	$32,414.00	$34,035.00	Cost share agreements are used to pay for WURMP consultant support. The FY 07-08 total is based on actual City contributions to the WURMP Cost Share Agreements in which it participates. Increases are estimated for future years based on requirements for increased coordination on WURMP issues in the new Permit. A 5% increase is also assumed for each year after FY 2008-09.
Implementation of Watershed Activities	$3,000.00	$3,600.00	$4,320.00	$5,184.00	$6,221.00	Permit section E.2.f requires Watershed Copermittees to implement at least two watershed water quality activities and two watershed education activities for each permit year. The City budgeted $3,000 for implementing two WURMP activities in FY 07-08. Because of the wide range of potential costs for these activities, a 20% increase is assumed in each subsequent year.
TOTALS	$260,389.02	$327,929.34	$342,091.42	$361,147.85	$374,786.28

EXHIBIT 6 "J" - DECLARATION OF MALIK TAMIMI FOR CITY OF LA MESA.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

DECLARATION OF MALIK TAMIMI ON BEHALF OF THE CITY OF LA MESA IN SUPPORT OF TEST CLAIM

I, Malik Tamimi, declare as follows:

1. I make this declaration based upon my own personal knowledge, except for matters set forth herein on information and belief, and as to those matters I believe them to be true, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. I have a Bachelor's of Science Degree in Aquatic Biology.

3. I am employed by the City of La Mesa as an Environmental Specialist.

4. I have held my current position for approximately three years. My duties include the development and implementation of the City's NPDES Storm Water Program.

5. I have read and reviewed the California Regional Water Quality Control Board ("RWQCB"), San Diego Region, Order No. R9-2007-0001 (NPDES No. CAS 0108758) (the "2007 Permit") and I know and understand the requirements of the Permit.

6. I have also read and reviewed and I know and understand the requirements of Order No. 2001-01 (NPDES CAS0108758) issued by the San Diego RWQCB on February 21, 2001 (the "2001 Permit").

7. Based on my understanding of the requirements of the 2001 Permit and the requirements of the 2007 Permit, I believe the 2007 Permit requires the co-permittees to perform new activities that are unique to local governmental entities that are not required by the 2001 Permit.

Document received by the CA 3rd District Court of Appeal.

8. These new activities include the following:

a. Working Body

1.) Support: Sections F and L.1 of the 2007 Permit require all co-permittees to collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding ("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,000 in support costs and an additional 5% ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of La Mesa's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2.) Participation: Section L.1.a of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban runoff programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU establishes minimum levels of representation and participation in working body meetings required to meet these directives. The City of La Mesa's participation costs were determined by multiplying the hourly rate of each staff person involved in these activities by anticipated minimum number of meetings for each

Document received by the CA 3rd District Court of Appeal.

working body for each fiscal year and assumed that on average each staff member would spend three hours preparing for and attending each meeting. The cost to the City to comply with this mandated activity for FY 2007-08 is $3,304. Costs for FY 08-09 and beyond are projected based on minimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. The City of La Mesa's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

b. Regional Residential Education Program Development and Implementation: Section F.1 of the 2007 Permit requires the co-permittees to collaboratively develop and implement a Regional Residential Education Program. This is in addition to Section D.5.a, which requires each co-permittee to develop and implement an education program that measurably increases the knowledge of, and measurably changes the behavior of, residential communities within their jurisdictions. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and the development of marketing and research tools, including regional surveys to be conducted in FY 2008-09 and again in FY 2011-12. The co-permittees retained a consultant to perform these mandated activities in Fiscal Year 2007-08. The total cost of the contract is $131,250 which includes 5% ($6,250) for contract administration by the County. The budgeted cost of these mandated activities increased in FY 2008-09 to $262,500 and is expected to again double in FY 2009-10 to $525,000. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of La Mesa's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

c. Development of New/Revised Programs and Standards

1. Hydromodification Management Plan ("HMP") Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000 which includes 5% ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of La Mesa's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Sections D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of La Mesa's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

d. Long-Term Effectiveness Assessment ("LTEA"): In addition to annual assessments of the regional, jurisdictional and watershed programs, Section I.1 of the 2007 Permit requires the co-permittees to collaboratively develop a LTEA. Because

Document received by the CA 3rd District Court of Appeal.

of the complexity of the assessment requirements, the consultant costs to perform this assessment, which is expected to be completed in FY 2010-11, are expected to be $210,000, which includes 5% ($10,000) for contract administration by the County. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of La Mesa's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

e. Street Sweeping

1.) Equipment Costs: Section D.3.(5) of the 2007 Permit mandates specific street sweeping frequencies for improved roads, streets, highways, and parking facilities. Prior to the 2001 permit, the City of La Mesa implemented a street sweeping program that exceeds the standards now required for the 2007 permit, therefore the City cannot quantify the additional expenses from the 2001 permit to the 2007 permit.

2.) Staffing Costs: In response to Section D.3.(5) the City of La Mesa implemented a street sweeping program prior to the 2001 permit cycle that exceeds the standards now required for the 2007 permit, therefore the City cannot quantify the additional expenses from the 2001 permit to the 2007 permit

3.) Contract Costs: The City of La Mesa contracts with a private company to provide street sweeping services. Prior to the 2001 permit, the City of La Mesa implemented a street sweeping program that exceeds the standards now required for the 2007 permit, therefore the City cannot quantify the additional expenses from the 2001 permit to the 2007 permit.

f. Conveyance System Cleaning: Section D.3.(a).(3) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be inspected annually, with high priority facilities being inspected between May and September. Prior to the 2001 permit, the City of La Mesa implemented an MS4 inspection and cleaning program that exceeds the standards now required for the 2007

Document received by the CA 3rd District Court of Appeal.

permit, therefore the City cannot quantify the additional expenses from the 2001 permit to the 2007 permit

g. Educational Surveys and Tests: Section D.5 of the 2007 Permit requires each co-permittee to implement an educational program to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff or receiving waters, and potential Best Management Practices ("BMPs") for the target audiences; and (2) measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Sections I.1 and I.2 further require that the effectiveness of educational activities in meeting these standards be assessed annually where applicable and feasible. Compliance with these mandated activities requires the routine incorporation of testing and surveying methods into the program elements to ensure that implementation is resulting in the targeted outcomes. To comply with Section D.5 the City expects to expend 108 hours of staff time in FY 2008-09, and each year thereafter, to develop, administer and analyze surveys and tests. The City of La Mesa's cost in FY 2007-08 for an Environmental Specialist to perform this work is $106.82 per hour. The increase in the City of La Mesa's staffing cost to comply with these mandated activities in FY 2008-09 is $11,536 and is expected to increase 4% in FY 2009-10 and each year thereafter. The City of La Mesa's actual and estimated costs for complying with these mandated activities for FY 2008-09 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

h. Annual JURMP Assessment and Reporting Requirements: Section I.1 of the 2007 Permit specifies prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. Co-permittees must also determine source load reductions resulting

Document received by the CA 3rd District Court of Appeal.

from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a new emerging discipline and is expected to evolve over the term of the Permit. Annual costs are expected to include developing and updating standards and methods, database development and modification, and data tracking, analysis and report writing. To comply with Section I.1 the City will expend 324 hours of staff time and $45,000 in consultant fees in FY 2008-09, and each year thereafter. The City of La Mesa's cost in FY 2008-09 for an Environmental Specialist to perform these mandated activities will be $106.82 per hour. The increase in the City of La Mesa's staffing cost and consultant fees to comply with these mandated activities in FY 2007-08 is $79,609 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

l. Watershed URMP

1.) Staffing for Development and Implementation: Section E of the 2007 Permit requires implementation of a Watershed Urban Runoff Management Program. Lead responsibility for watershed program implementation resides with the County's Department of Planning and Land Use Watershed Planning Division. However, the City of La Mesa is required to develop and implement two watershed programs. This program consists of one staff (Environmental Specialist). The FY 2007-08 costs are based on annualized estimated year-to-date expenditures. For FY 2008-09 and beyond, it is estimated that staff will spend 416 hours of their time on WURMP development and implementation. Calculations are based on the following hourly rates for FY 2007-08: Environmental Specialist $106.82. The increase in the City's staffing cost to comply with these mandated activities in FY 2007-08 is $44,437 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City's actual and estimated costs for

Document received by the CA 3rd District Court of Appeal.

complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Cost-Sharing Agreements:

The City of La Mesa has entered into a cost sharing agreement to pay for consultant support relating to San Diego River WURMPs. La Mesa's share of the consultant costs for FY 2007-08 are expected to be $1,305. Additional consultant services will be necessary in future years based on the development of cost sharing agreements for other WURMPs and an increasing need for coordination within each WURMP over the Permit cycle. The City's budgeted cost for this mandated activity for FY 2008-09 is $2,000. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. The City's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Implementation of Watershed Activities: Section E.2.f of the 2007 Permit requires Watershed co-permittees to implement at least two watershed quality activities and two watershed education activities for each permit year. The cost of implementing this mandate for FY 2007-08 is expected to be $30,000. Because of the wide range of potential costs for these activities, we anticipate that these costs will increase on average 20% per year. The City's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

9. The actual increased costs incurred by the City of La Mesa in FY 2007-08 to comply with the mandated activities required by the 2007 Permit will be $168,357, and are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

10. The estimated increased costs that the City of La Mesa expects to incur in FY 2008-09, are expected to be $197,078, and are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

11. The estimated increased costs that the City expects to incur during each year of the remaining term of the 2007 Permit are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

12. I am not aware of any dedicated state or federal funds that are or will be available to pay for these increased costs.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

14. I am not aware of any authority to assess a fee to offset these increased costs.

15. I believe that the only available source to pay these increased costs are and will be the City's general purpose funds.

Executed this 11th day of June 2008 at La Mesa, California.

I declare under penalty of perjury that the foregoing is true and correct.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

Co-Permittee -

City of La Mesa

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
Working Body Support	$0.00	$9,128.70	$9,585.14	$10,064.39	$10,567.60	Permit section L.1 requires that all Copermittees collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs and Watershed Urban Runoff Management Programs, and to plan and coordinate activities required under the Permit. Ten regional working bodies were established per the Copermittees Jan. 2008 MOU to support the regional coordination of programs and activities required under the Permit. Working body costs represent consultant and/or Copermittee staff support for the Copermittee's Program Planning subcommittee and nine Regional Workgroups or Sub-workgroups. FY 08-09 costs were established in the amount of $543,375 which includes $517,500 in support costs and an additional 5% ($25,875) for contract administration. FY 2008-09 costs were calculated at $125 per hour. A 5% total cost increase is also factored in each subsequent year.
Working Body Participation	$3,304.00	$4,769.00	$4,960.00	$5,158.00	$5,364.00	Copermittees must also maintain representation in, and participate in meetings of, each of the working bodies established under the MOU. The estimates presented here are City of La Mesa costs only. City's participation costs are determined by multiplying the hourly rate of each staff person by the number of meetings each fiscal year, and assuming an average meeting length of three hours. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs for FY 08-09 and beyond are projected based on mimimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. Detailed calculations can be found in Worksheet B.
Regional Residential Education Program Development and Implementation	$2,205.00	$4,410.00	$8,820.00	$9,261.00	$9,724.06	Permit section F.1 requires that the Copermittees collaboratively develop and implement a Regional Residential Education Program. This is in addition to section D.5.a, which requires that each Copermittee provide education to, measurably increase the knowledge of, and measurably change the behavior of, residential communities within their jurisdiction. An FY 2007-08 budget for consultant support was initially established for this program in the amount of $131,250 ($125,000 for contract costs and $6,250 for contract administration). This figure was increased to $262,500 in FY 2008-09, and is expected to double again in FY 2009-10. Each subsequent year assumes a 5% increase. Regional program activities to be funded include: materials development / branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and marketing and research tools including the regional surveys to be conducted in FY 2008-09 and FY 2011-12.

621

[illegible] by the CA 3rd District Court of Appeal.

Hydromodification Management Plan (HMP) Development	$6,614.94	$4,409.96	$0.00	$0.00	$0.00	Order R9-2007-0001 mandates the collaborative development of a Hydromodification Management Plan (HMP). This task was initiated by the Copermittees' consultant during FY 2007-08 and will be completed in FY 2008-09. The total cost of plan development is $1,050,000, $50,000 of which is for contract administration.
Low Impact Development (LID) and Standard Urban Stormwater Mitigation Plan (SUSMP)	$882.00	$0.00	$0.00	$0.00	$0.00	Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU.
Long-term Effectiveness Assessment (LTEA)	$0.00	$0.00	$0.00	$3,528.00	$0.00	In addition to requirements for Copermittees to annually assess their regional, jurisdictional and watershed programs, Permit section I.1 requires the collaboratative development of a Long-term Effectiveness Assessment (LTEA) that builds on the results of the August 2005 Baseline LTEA. The cost of the 2005 LTEA was $125,000. Because of the increased complexity of new assessment requirements, this consultant cost is expected to increase to $200,000, with an additional 5% ($10,000) for contract administration.
3.0 Structural BMP Activities						
4.0 Development Planning						Reimbursable costs are not projected for this component.
5.0 Construction						Reimbursable costs are not projected for this component.
6.0 Municipal						
Street Sweeping (equipment costs)	$0.00	$0.00	$0.00	$0.00	$0.00	Permit Section D.3.(5) requires street sweeping frequencies for improved roads (possessing curbs and gutters), streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept at twice per month. Areas with medium volumes of trash and/or debris must be swept monthly and areas with low volumes of trash and/or debris at least annually. Prior to the 2001 Permit, the City implemented a street sweeping program that exceeds the standards now required for the 2007 permit, therefore the city cannot quantify the expenses.
Street Sweeping (staffing costs)	$0.00	$0.00	$0.00	$0.00	$0.00	In response to Permit section D.3.(5), prior to the 2001 Permit, the City implemented a street sweeping program that exceeds the standards now required for the 2007 permit, therefore the city cannot quantify the expenses.
Street Sweeping (contract costs)	$0.00	$0.00	$0.00	$0.00	$0.00	Prior to the 2001 Permit, the City implemented a street sweeping program that exceeds the standards now required for the 2007 permit, therefore the city cannot quantify the expenses.

766

622

d by the CA 3rd District Court of Appeal.

Conveyance System Cleaning	$0.00	$0.00	$0.00	$0.00	$0.00	Permit section D.3.(3).(b) mandates that all MS4 facilities be inspected annually, with high priority facilitates being inspected between May and September. Prior to the 2001 Permit, the City implemented a MS4 inspection and cleaning program that exceeds the standards now required for the 2007 permit, therefore the city cannot quantify the expenses.
7.0 Industrial and Commercial						Reimbursable costs are not projected for this component because new costs can be passed through to regulated parties.
9.0 Illicit Discharge Detection & Elimination Component (IDDEC)						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
10.0 Education						
Educational Surveys and Tests	$0.00	$11,536.00	$11,997.72	$12,477.64	$12,976.32	The Permit mandates an educational component that requires the implementation of educational programs to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff on receiving waters, and potential BMP solutions for the target audience; and (2) to measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Compliance with this standard requires the routine incorporation of testing and surveying methods into program elements to ensure that implementation is resulting in targeted outcomes. FY 08-09 staffing impacts are estimated at one days per month (108 hours per year) to develop, administer, and analyze surveys and tests. Costs are calculated at the Environmental Specialist level ($106.82 per hour), and increased by 4% each year after FY 2008-09.
11.0 Public Participation						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
12.0 Fiscal Assessment						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
13.0 Effectiveness Assessment						

d by the CA 3rd District Court of Appeal.

Annual JURMP Assessment and Reporting	$79,609.00	$84,609.68	$90,993.16	$97,431.72	$103,928.60	Permit section I.1 lays out prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. To the extent applicable and feasible, Copermittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a newly emerging discipline, and will continue to evolve over the entire Permit cycle. Annual costs typically include developing and updating standards and methods, database development and modification, and data tracking, analysis, and report writing. Although these responsibilities may be incurred across a number of program areas and staff, annual costs are calculated as lump sum for consultant services $45,000 (with incremental increase of $5,000 of 324 hours of time at the Environmental Specialistlevel ($106.82 per hour). Staffing rates are increased by 4% each year.
WATERSHED LEVEL ACTIVITIES						
Staffing for Watershed URMP development and implementation	$44,437.12	$46,215.00	$48,064.00	$49,987.00	$51,986.00	Staffing time for WURMP development and implementation for San Diego Bay and River watersheds is estimated at 416 hours per year. Calculations assume the following hourly rates for FY 2007-08; Environmental Specialist- $106.82). These rates are increased by 4% in each subsequent year.
WURMP Cost-Share Agreements	$1,305.00	$2,000.00	$2,100.00	$2,205.00	$2,315.00	Cost share agreements are used to pay for WURMP consultant support for San Diego River Watershed. The FY 07-08 total is based on actual City of La Mesa contributions to the WURMP Cost Share Agreements in which it participates. Increases are estimated for future years based on requirements for increased coordination on WURMP issues in the new Permit. A 5% increase is also assumed for each year after FY 2008-09.
Implementation of Watershed Activities	$30,000.00	$30,000.00	$36,000.00	$43,200.00	$51,840.00	Permit section E.2.f requires Watershed Copermittees to implement at least two watershed water quality activities and two watershed education activities for each permit year. The City of La Mesa budgeted $30,000 for implementing WURMP activities in FY 07-08 for both San Diego River and Bay Watersheds. Because of the wide range of potential costs for these activities, a 20% increase is assumed in each subsequent year.
TOTALS	$168,357.06	$197,078.34	$212,520.02	$233,312.75	$248,701.58

EXHIBIT 6 "K" – DECLARATION OF CORA LONG FOR CITY OF LEMON GROVE.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

DECLARATION OF CORA LONG ON BEHALF OF

THE CITY OF LEMON GROVE IN SUPPORT OF TEST CLAIM

I, Cora Long, declare as follows:

1. I make this declaration based upon my own personal knowledge, except for matters set forth herein on information and belief, and as to those matters I believe them to be true, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. Masters of Public Administration

3. I am employed by the City of Lemon Grove as an Environmental Program manager.

4. I have held my current position for approximately four years. My duties include managing the City of Lemon Grove's Stormwater program, which encompasses internal and external outreach and education; regional workgroup meeting attendance; serving as a workgroup leader; managing the dry weather monitoring program; managing the industrial and commercial inspection program; performing inspections on construction projects; performing inspections on existing best management practices including residential, commercial and industrial; review and approval of incoming development plans and water quality documents; performing inspections of all municipal facilities for compliance; writing all responses and reports to the Regional Water Quality Control Board; compliance with all applicable local TMDLs and their working bodies; management of watershed activies within the City boundaries; and attendance at applicable watershed specific meetings.

5. I have reviewed the California Regional Water Quality Control Board ("RWQCB"), San Diego Region, Order No. R9-2007-0001 (NPDES No.

Document received by the CA 3rd District Court of Appeal.

CAS 0108758) (the "2007 Permit") and I am familiar with the requirements of the Permit.

6. I have also read and I know and understand the requirements of Order No. 2001-01 (NPDES CAS0108758) issued by the San Diego RWQCB on February 21, 2001 (the "2001 Permit").

7. Based on my understanding of the requirements of the 2001 Permit and the requirements of the 2007 Permit, I believe the 2007 Permit requires the co-permittees to perform new activities that are unique to local governmental entities that are not required by the 2001 Permit.

8. These new activities include the following:

a. Working Body

1.) Support: Sections F and L.1 of the 2007 Permit require all co-permittees to collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding ("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,000 in support costs and an additional 5% ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Lemon Grove's proportional share of the budgeted costs for complying

Document received by the CA 3rd District Court of Appeal.

with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2.) Participation: Section L.1.a of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban runoff programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU establishes minimum levels of representation and participation in working body meetings required to meet these directives. The City of Lemon Grove's participation costs were determined by multiplying the hourly rate of each staff person involved in these activities by anticipated minimum number of meetings for each working body for each fiscal year and assumed that on average each staff member would spend three hours preparing for and attending each meeting. The cost to the City of Lemon Grove to comply with this mandated activity for FY 2007-08 is $4,428. Costs for FY 08-09 and beyond are projected based on minimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. The City of Lemon Grove's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

b. Regional Residential Education Program Development and Implementation: Section F.1 of the 2007 Permit requires the co-permittees to collaboratively develop and implement a Regional Residential Education Program. This is in addition to Section D.5.a, which requires each co-permittee to develop and implement an education program that measurably increases the knowledge of,

Document received by the CA 3rd District Court of Appeal.

and measurably changes the behavior of, residential communities within their jurisdictions. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and the development of marketing and research tools, including regional surveys to be conducted in FY 2008-09 and again in FY 2011-12. The co-permittees retained a consultant to perform these mandated activities in Fiscal Year 2007-08. The total cost of the contract is $131,250 which includes 5% ($6,250) for contract administration by the County. The budgeted cost of these mandated activities increased in FY 2008-09 to $262,500 and is expected to again double in FY 2009-10 to $525,000. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Lemon Grove's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

c. Development of New/Revised Programs and Standards

1. Hydromodification Management Plan ("HMP")

Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000 which includes 5% ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Lemon Grove's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed

Document received by the CA 3rd District Court of Appeal.

in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Lemon Grove's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

d. Long-Term Effectiveness Assessment ("LTEA"): In addition to annual assessments of the regional, jurisdictional and watershed programs, Section I.1 of the 2007 Permit requires the co-permittees to collaboratively develop a LTEA. Because of the complexity of the assessment requirements, the consultant costs to perform this assessment, which is expected to be completed in FY 2010-11, are expected to be $210,000, which includes 5% ($10,000) for contract administration by the County. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Lemon Grove's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

e. Street Sweeping

Document received by the CA 3rd District Court of Appeal.

1.) Equipment Costs: Section D.3.(5) of the 2007 Permit mandates specific street sweeping frequencies for improved roads, streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept monthly. Areas with low volumes of trash and/or debris must be swept at least annually. The City of Lemon Grove used average daily traffic ("ADT") statistics to determine the volume of trash and/or debris that could reasonably be expected to be generated. Improved roads, streets and highways that have more than 20,000 vehicles per day are in the "High" volume of trash and/or debris category. Improved roads, streets and highways that have 15,000 to 20,000 vehicles per day are in the "Medium" volume of trash and/or debris category. Improved roads, streets and highways that have less than 15,000 vehicles per day are in the "Low" volume of trash and/or debris category. The City of Lemon Grove has 65.5 miles of City maintained improved roads, streets and highways. Based on these standards, 10.91% of the City of Lemon Grove's improved roads, streets and highways are in the "High" category, 89.09% in the "Medium" category and 0% in the "Low" category. Based on this analysis it was determined that there will be zero increase in the street sweeping activities as a result of the 2007 Permit. To accommodate the required increase, the City of Lemon Grove has been required to purchase 0 new street sweeping vehicles and employ 0 additional employees. Each vehicle cost $0 to purchase and has an expected useful life of ten years. The annual maintenance and fuel costs are expected to be $0 for each vehicle. In addition the expected replacement cost of each vehicle has been amortized over the ten year expected life of each vehicle.) The City of Lemon Grove's actual and estimated equipment costs for complying with this mandated activity for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

2.) Staffing Costs: In response to Section D.3.(5) the City of Lemon Grove has increased its staffing by 0 staff years for FY 2007-08 and will increase staffing by another 0 staff years beginning in FY 2008-09. The City of Lemon Grove's staffing cost in FY 2007-08 is $0 per hour. The increase in the Lemon Grove's staffing cost to comply with this mandated activity in FY 2007-08 is $0 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Lemon Grove's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Contract Costs: The City of City of Lemon Grove contracts with a private company to provide street sweeping services. The total cost of this contract to the City is $33,565. The amount of street sweeping required by the 2007 Permit increased the cost of this contract to the city by approximately $0 per year. The increased contract costs for FY 2007-08 and estimated increased contract costs for future years are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

f. Conveyance System Cleaning: Section D.3.(a).(3) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be inspected annually, with high priority facilities being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, the City of Lemon Grove has increased staffing of its MS4 operations and maintenance program for FY 2007-08 by 565 staff hours and will need to increase staffing by another 4% in FY 2008-09. The City of Lemon Grove's cost in FY 2007-08 for workers in the Public Works Street Division is $ 26 per hour. The increase in the City of Lemon Grove's staffing cost to comply with this mandated activity in FY 2007-08 is $14,924 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Lemon Grove's

Document received by the CA 3rd District Court of Appeal.

actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

g. Educational Surveys and Tests: Section D.5 of the 2007 Permit requires each co-permittee to implement an educational program to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff or receiving waters, and potential Best Management Practices ("BMPs") for the target audiences; and (2) measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Sections I.1 and I.2 further require that the effectiveness of educational activities in meeting these standards be assessed annually where applicable and feasible. Compliance with these mandated activities requires the routine incorporation of testing and surveying methods into the program elements to ensure that implementation is resulting in the targeted outcomes. To comply with Section 10 the City of Lemon Grove expects to expend 288 hours of staff time in FY 2008-09, and each year thereafter, to develop, administer and analyze surveys and tests. The City of Lemon Grove's cost in FY 2008-09 for an Environmental Program Manager to perform this work is $41 per hour. The increase in the City of Lemon Grove's staffing cost to comply with these mandated activities in FY 2007-08 is $11,808 and is expected to increase 4% in FY 2009-10 and each year thereafter. The City of Lemon Grove's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

h. Annual JURMP Assessment and Reporting Requirements: Section I.1 of the 2007 Permit specifies prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable

Document received by the CA 3rd District Court of Appeal.

targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. Co-permittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a new emerging discipline and is expected to evolve over the term of the Permit. Annual costs are expected to include developing and updating standards and methods, database development and modification, and data tracking, analysis and report writing. To comply with Section I, the City of Lemon Grove will expend 975 hours of staff time in FY 2008-09, and each year thereafter. The City of Lemon Grove's cost in FY 2008-09 for an Environmental Program Manager to perform these mandated activities would be $41 per hour. The increase in the City of Lemon Grove's staffing cost to comply with these mandated activities in FY 2008-09 is $39,975 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Lemon Grove's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

1. Watershed URMP

1.) Staffing for Development and Implementation:

Section E of the 2007 Permit requires the development and implementation of a WURMP program. Lead responsibility for watershed program implementation resides with the County's Department of Planning and Land Use Watershed Planning Division. This program consists of five staff (one Planning manager, two Planner IIIs and two Planner I/IIs). The FY 2007-08 costs are based on annualized projections for year-to-date expenditures. For FY 2008-09 and

Document received by the CA 3rd District Court of Appeal.

beyond, it is estimated that staff will spend 70% of their time on WURMP development and implementation. Calculations are based on the following hourly rates for FY 2007-08: Planning Manager - $115; Planner III - $97; and Planner I/II - $81. The increase in the City of Lemon Grove's staffing cost to comply with these mandated activities in FY 2007-08 is $1,968 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Lemon Grove's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Cost-Sharing Agreements:

The City of Lemon Grove has not entered into any cost sharing agreement to pay for consultant support relating to San Diego Bay WURMP. Therefore at the present there are no consultant costs for FY 2007-08.

3.) Implementation of Watershed Activities: Section E.2.f of the 2007 Permit requires Watershed co-permittees to implement at least two watershed quality activities and two watershed education activities for each permit year. The cost of implementing this mandate for FY 2007-08 cannot be determined separate and apart from on-going activities. However if the City of Lemon Grove were to encounter a severe budget crisis, maintaining these mandated activities, which would otherwise be eliminated at the City's discretion in order to achieve a balanced budget, would have an adverse financial impact on the City of Lemon Grove which is difficult to estimate at this time.

9. The actual increased costs incurred by the City of Lemon Grove in FY 2007-08 to comply with the mandated activities required by the 2007 Permit will be $58,483, and are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

10. The estimated increased costs that the City of Lemon Grove expects to incur in FY 2008-09, are expected to be $112,862, and are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

11. The estimated increased costs that the City of Lemon Grove expects to incur during each year of the remaining term of the 2007 Permit are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

12. I am not aware of any dedicated state or federal funds that are or will be available to pay for these increased costs.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

14. The City has a fee that partially offsets existing costs to the program, but I am not aware of any authority to assess a fee to offset these increased costs.

15. I believe that the only available source to pay these increased costs are and will be the /City of Lemon Grove's general purpose funds.

Executed this 12th day of June at Lemon Grove, California.

I declare under penalty of perjury that the foregoing is true and correct.

Cora Long

Cora Long

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

Co-Permittee -
Lemon Grove

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
REGIONAL URMP ACTIVITIES						
Working Body Support	$0.00	$5,542.43	$5,819.55	$6,110.52	$6,416.04	Permit section L.1 requires that all Copermittees collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs and Watershed Urban Runoff Management Programs, and to plan and coordinate activities required under the Permit. Ten regional working bodies were established per the Copermittee's Jan. 2008 MOU to support the regional coordination of programs and activities required under the Permit. Working body costs represent consultant and/or Copermittee staff support for the Copermittee's Program Planning subcommittee and nine Regional Workgroups or Sub-workgroups. FY 08-09 costs were established in the amount of $543,375 which includes $517,500 in support costs and an additional 5% ($25,875) for contract administration. FY 2008-09 costs were calculated at $125 per hour. A 5% total cost increase is also factored in each subsequent year.
Working Body Participation	$4,428.00	$4,861.00	$4,968.00	$5,167.00	$5,373.00	Copermittees must also maintain representation in, and participate in meetings of, each of the working bodies established under the MOU. The estimates presented here are City of Lemon Grove costs only. City participation costs are determined by multiplying the hourly rate of each staff person by the number of meetings each fiscal year, and assuming an average meeting length of three hours. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs for FY 08-09 and beyond are projected based on mimimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. Detailed calculations can be found in Worksheet B.
Regional Residential Education Program Development and Implementation	$1,338.75	$2,677.50	$5,355.00	$5,622.75	$5,903.89	Permit section F.1 requires that the Copermittees collaboratively develop and implement a Regional Residential Education Program. This is in addition to section D.5.a, which requires that each Copermittee provide education to, measurably increase the knowledge of, and measurably change the behavior of, residential communities within their jurisdiction. An FY 2007-08 budget for consultant support was initially established for this program in the amount of $131,250 ($125,000 for contract costs and $6,250 for contract administration). This figure was increased to $262,500 in FY 2008-09, and is expected to double again in FY 2009-10. Each subsequent year assumes a 5% increase. Regional program activities to be funded include: materials development / branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and marketing and research tools including the regional surveys to be conducted in FY 2008-09 and FY 2011-12.
Hydromodification Management Plan (HMP) Development	$3,578.12	$2,385.42	$0.00	$0.00	$0.00	Order R9-2007-0001 mandates the collaborative development of a Hydromodification Management Plan (HMP). This task was initiated by the Copermittees' consultant during FY 2007-08 and will be completed in FY 2008-09. The total cost of plan development is $1,050,000, $50,000 of which is for contract administration.
Low Impact Development (LID) and Standard Urban Stormwater Mitigation Plan (SUSMP)	$535.50	$0.00	$0.00	$0.00	$0.00	Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU.

City of Lemon Grove Unfunded Mandate Costs

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
Long-term Effectiveness Assessment (LTEA)	$0.00	$0.00	$0.00	$2,142.00	$0.00	In addition to requirements for Copermittees to annually assess their regional, jurisdictional and watershed programs, Permit section 1.1 requires the collaboratative development of a Long-term Effectiveness Assessment (LTEA) that builds on the results of the August 2005 Baseline LTEA. The cost of the 2005 LTEA was $125,000. Because of the increased complexity of new assessment requirements, this consultant cost is expected to increase to $200,000, with an additional 5% ($10,000) for contract administration.
[illegible] Activities						
4.0 Development Planning						Reimbursable costs are not projected for this component.
5.0 Construction						Reimbursable costs are not projected for this component.
6.0 Municipal						
Street Sweeping (equipment costs)	$0.00	$0.00	$0.00	$0.00	$0.00	Permit Section D.3.(5) requires street sweeping frequencies for improved roads (possessing curbs and gutters), streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept at two times per month. Areas with medium volumes of trash and/or debris must be swept monthly and areas with low volumes of trash and/or debris at least annually.
Street Sweeping (staffing costs)	$0.00	$0.00	$0.00	$0.00	$0.00	The City contracts the street sweeping.
Street Sweeping (contract costs)	$33,565.00	$34,907.60	$36,303.90	$37,756.06	$39,266.30	Contract costs are estimated to increase by approximately 4% annually.
Conveyance System Cleaning	$14,924.00	$15,520.96	$16,141.80	$16,787.47	$17,458.97	Permit section D.3.(3).(b) mandates that all MS4 facilities be inspected annually, with high priority facilitates being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, additional staffing impacts are projected. The City utilizes the Public Works Street Division for the MS4 operations and maintenance program. Costs are calculated at $26.65 per hour for average personnel at 560 hours, and are increased by 4% in each subsequent year. This hourly cost includes equipment maintenance, etc.

d by the CA 3rd District Court of Appeal.

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
7.0 Industrial and Commercial						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation
9.0 Illicit Discharge Detection & Elimination Component (IDDEC)						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
10.0 Education						
Educational Surveys and Tests	$0.00	$11,808.00	$12,280.00	$12,772.00	$13,282.00	The Permit mandates an educational component that requires the implementation of educational programs to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff on receiving waters, and potential BMP solutions for the target audience; and (2) to measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Compliance with this standard requires the routine incorporation of testing and surveying methods into program elements to ensure that implementation is resulting in targeted outcomes. FY 07-08 staffing impacts are estimated at three days per month (288 hours per year) to develop, administer, and analyze surveys and tests. Costs are calculated at the Environmental Program Manager level ($41/hr), and increased by 4% each year after FY 2008-09.
11.0 Public Participation						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
12.0 Fiscal Assessment						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.

City of Lemon Grove Unfunded Mandate Costs

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
13.0 Effectiveness Assessment						
Annual JURMP Assessment and Reporting	$0.00	$39,975.00	$41,574.00	$43,237.00	$44,966.00	Permit section I.1 lays out prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. To the extent applicable and feasible, Copermittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a newly emerging discipline, and will continue to evolve over the entire Permit cycle. Annual costs typically include developing and updating standards and methods, database development and modification, and data tracking, analysis, and report writing. Annual costs are calculated as 975 hours of time (~0.5 staff years) at the Environmental Program Manager level ($41/ hour), and increased by 4% each year after FY 2008-09.
WATERSHED WQ ACTIVITIES						
Staffing for Watershed URMP development and implementation	$1,968.00	$2,047.00	$2,129.00	$2,214.00	$2,302.00	Lead responsibility for watershed program implementation resides with the County of San Diego DPLU Watershed Planning Division. The City of Lemon Grove participates in meetings to support Watershed URMP development and Implementation. Copermittees must maintain representation in, and participate in meetings of, each of the watershed groups in which the City is located. The estimates presented here are City of Lemon Grove's costs only for participation in two watershed groups. City participation costs are determined by multiplying the hourly rate of each staff person by the number of meetings each fiscal year, and assuming an average meeting length of three hours. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs are calculated at the Environmental Program Manager level ($41/hr), and increased by 4% each year after FY 2008-09. Costs for FY 08-09 and beyond are projected based on mimimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload.
WURMP Cost-Share Agreements	$0.00	$0.00	$0.00	$0.00	$0.00	No cost share agreements currently exist for the City of Lemon Grove's watershed groups.
Implementation of Watershed Activities	$0.00	$0.00	$0.00	$0.00	$0.00	Permit section E.2.f requires Watershed Copermittees to implement at least two watershed water quality activities and two watershed education activities for each permit year. The City does not budget seperately for these activities.
TOTALS	$60,537.37	$114,182.48	$118,751.70	$125,698.28	$128,552.16

EXHIBIT 6 "L" – DECLARATION OF BARBARA A. TIPTON FOR CITY OF NATIONAL CITY.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

DECLARATION OF BARBARA A. TIPTON IN SUPPORT OF TEST CLAIM.

I, Barbara A. Tipton, declare as follows:

1. I make this declaration based upon my own personal knowledge, except for matters set forth herein on information and belief, and as to those matters I believe them to be true, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. I have the following training/certifications: Certified Storm Water Inspector (National Storm Water Center) Certified Environmental Compliance Manager (Southern Columbia University), Cal/EPA Basic Inspector Academy, California Compliance School Certification (Modules I, II, III & IV)

3. I am employed by the City of National City as a Storm Water Compliance Inspector.

4. I have held my current position for approximately 5 years. My duties include reviewing plans and conducting inspections of new and redevelopment projects for compliance with storm water laws, erosion control, construction BMPs and post-construction pollution prevention measures (Standard Urban Storm Water MITIGATION Plan (SUSMP) implementation) coordinating and serving as a liaison for NPDES program with consultants, engineers, developers, contractors, the public, government agencies, other departments, other organizations department staff and committees, performing inspections of construction sites and industrial and commercial businesses for storm water compliance. Reviewing and performing appropriate follow-up to the Dry Weather Monitoring Program reports prepared for the city, receiving, recording and investigating complaints from the public and staff regarding violations of NPDES regulations. Assisting with the development of Best Management Practices (BMPs), training staff on NPDES program; Serving on NPDES related committees, create related public relations materials such as calendars, flyers and pamphlets, conducting workshops

Document received by the CA 3rd District Court of Appeal.

to educate city employees, citizens, business owners and developers regarding NPDES prohibitions.

5. I have read the California Regional Water Quality Control Board ("RWQCB"), San Diego Region, Order No. R9-2007-0001 (NPDES No. CAS 0108758) (the "2007 Permit") and I know and understand the requirements of the Permit.

6. I have also read and I understand the requirements of Order No. 2001-01 (NPDES CAS0108758) issued by the San Diego RWQCB on February 21, 2001 (the "2001 Permit").

7. Based on my understanding of the requirements of the 2001 Permit and the requirements of the 2007 Permit, I believe the 2007 Permit requires the co-permittees to perform new activities that are unique to local governmental entities that are not required by the 2001 Permit.

8. These new activities include the following:

a. Working Body

1.) Support: Section L.1 of the 2007 Permit requires all co-permittees to collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding ("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,000 in support costs and an additional 5% ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. Each co-permittee's share of these

Document received by the CA 3rd District Court of Appeal.

mandated costs is based on a formula set forth in the MOU. The City of National City's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2.) Participation: Section L.1.a of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban runoff programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU establishes minimum levels of representation and participation in working body meetings required to meet these directives. The City of National City's participation costs were determined by multiplying the hourly rate of each staff person involved in these activities by the anticipated minimum number of meetings for each working body for each fiscal year and assumed that on average each staff member would spend 3 hours attending each meeting and 20 miles of round trip travel would be required for each meeting. The City of National City must also provide a chair, co-chair, or secretary to one workgroup; it is estimated that fulfilling this responsibility will take 36 hours per year. The cost to the City of National City to comply with this mandated activity for FY 2007-08 is $ 14,345. Costs for FY 08-09 and beyond are projected based on minimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. The City of National City's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

b. Regional Residential Education Program Development and Implementation: Section F.1 of the 2007 Permit requires the co-permittees to collaboratively develop and implement a Regional Residential Education Program. This

Document received by the CA 3rd District Court of Appeal.

is in addition to Section D.5.a, which requires each co-permittee to develop and implement an education program that measurably increases the knowledge of, and measurably changes the behavior of, residential communities within their jurisdictions. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and the development of marketing and research tools, including regional surveys to be conducted in FY 2008-09 and again in FY 2011-12. The co-permittees retained a consultant to perform these mandated activities in Fiscal Year 2007-08. The total cost of the contract is $131,250 which includes 5% ($6,250) for contract administration by the County. The budgeted cost of these mandated activities increased in FY 2008-09 to $262,500 and is expected to again double in FY 2009-10 to $525,000. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of National City's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

c. Development of New/Revised Programs and Standards

1. Hydromodification Management Plan ("HMP")

Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000 which includes 5% ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of National City's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each

Document received by the CA 3rd District Court of Appeal.

year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of National City's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

d. Long-Term Effectiveness Assessment ("LTEA"): In addition to annual assessments of the regional, jurisdictional and watershed programs, Section I.1 of the 2007 Permit requires the co-permittees to collaboratively develop a LTEA. Because of the complexity of the assessment requirements, the consultant costs to perform this assessment, which is expected to be completed in FY 2010-11, are expected to be $210,000, which includes 5% ($10,000) for contract administration by the County. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of National City's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

e. Street Sweeping

1.) Equipment Costs: Section D.3.(5) of the 2007 Permit mandates specific street sweeping frequencies for improved roads, streets, highways, and

Document received by the CA 3rd District Court of Appeal.

parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept monthly. Areas with low volumes of trash and/or debris must be swept at least annually. The City of National City has 110 miles of improved roads, streets and highways. Based on these standards, 10% of the City of National City's improved roads, streets and highways are in the "High" category, 90% in the "Medium" category. Based on this analysis it was determined that there will be a 10% increase in the street sweeping activities as a result of the 2007 Permit. To accommodate the required increase, annual maintenance and fuel costs are expected to be $745 for FY 2007-08. The City's street sweeping vehicle has already been fully depreciated, so no depreciation or amortization costs are included in the cost. The City of National City's actual and estimated equipment costs for complying with this mandated activity for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Staffing Costs: In response to Section D.3.(5) the City of National City will need an additional 0.02 staff years for FY 2007-08 and will increase staffing by another 0.02 staff years beginning in FY 2008-09. The City of National City's cost in FY 2007-08 for a Street Sweeper Operator is $74,000 per year. The increase in the City of National City's staffing cost to comply with this mandated activity in FY 2007-08 is $1,379 and $2,869 in FY 2008-09 and is expected to increase 4% in FY 2009-2010 and each year thereafter. The City of National City's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Contract Costs: The City of National City does not contract with a private company to provide street sweeping services.

f. Conveyance System Cleaning: Section D.3.(3).(b) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be

Document received by the CA 3rd District Court of Appeal.

inspected annually, with high priority facilities being inspected between May and September. The City of National City's MS4 Cleaning program established under the 2001 Permit included annual inspections of all MS$ facilities in the City of National City. Based on conversations with the City of National City Public Works Staff, inspecting high priority facilities between Man and September and cleaning out facilities are at least 33 percent full is not anticipated to add any substantial costs to the City of National City's MS4 cleaning program. There fore, no cost increase is listed for this item.

g. Educational Surveys and Tests: Section D.5 of the 2007 Permit requires each co-permittee to implement an educational program to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff or receiving waters, and potential Best Management Practices ("BMPs") for the target audiences; and (2) measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Sections I.1 and I.2 further require that the effectiveness of educational activities in meeting these standards be assessed annually where applicable and feasible. Compliance with these mandated activities requires the routine incorporation of testing and surveying methods into the program elements to ensure that implementation is resulting in the targeted outcomes. To comply with Section D.5, the City of National City expects to expend 5 hours of staff time and 16 hour of consultant time in FY 2007-08, and 15 hours of staff time and 48 hours of consultant time in FY2008-09 and each year thereafter This time includes planning and preparing for, presenting and analyzing the results from on workshop in FY 2007-08 and three workshops in FY 2008-09. The City of National City's cost in FY 2007-08 to perform this work is $33.96 per hour for a Storm Water Compliance Inspector and an average of $100.00 per hour for a consultant. The increase in the City of National City's staffing and consultant cost to comply with these mandated activities in FY 2007-08 is $1,770, $5,522 for FY 2008-09 and is expected to increase 4% in FY 2009-10 and each year thereafter. The City of National City's actual and estimated costs for

Document received by the CA 3rd District Court of Appeal.

complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

h. Annual JURMP Assessment and Reporting Requirements: Section I.1 of the 2007 Permit specifies prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. Co-permittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a new emerging discipline and is expected to evolve over the term of the Permit. Annual costs are expected to include developing and updating standards and methods, database development and modification, and data tracking, analysis, additional elements of the industrial/commercial inspections (BMP score, knowledge score and pollutant discharge assessment) conducted solely for the effectiveness assessment reasons and report writing. To comply with Section I.1 the City of National City's consultants cost in FY 2007-08 have been $16,716. On average consultant rates for these functions are approximately $75 per hour. In FY 2008-09 and each year thereafter the City of National City anticipates consultant costs of $22,042 which are expected to increase 4% in FY 2009-10 and each year thereafter. The City of National City's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

l. Watershed URMP

1.) Staffing for Development and Implementation: Section E of the 2007 Permit requires the co-permittee to develop and implement updated

Document received by the CA 3rd District Court of Appeal.

watershed URMPs. The City of National City's consultant costs to comply with these mandated activities in FY 2007-08 is $14,588 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of National City's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Cost-Sharing Agreements:

The City of National City has not presently entered into any cost sharing agreement(s) to pay for consultant support relating to San Diego Bay, so no WURMP cost sharing expenses for FY 2007-08 are anticipated. It is unknown whether a cost-sharing agreement will be implemented for the San Diego Bay WURMP in the future. At this time point, no costs have been budgeted for this item in FY 2008-09 or for future years.

3.) Implementation of Watershed Activities: Section E.2.f of the 2007 Permit requires Watershed co-permittees to implement at least two watershed quality activities and two watershed education activities for each permit year. The cost of implementing this mandate for FY 2007-08 is expected to be $199,470. This cost mainly consists of additional street sweeping performed above the level required by the 2007 Permit, which is performed as a watershed water quality activity. The City of National City's cost for watershed activities are expected to increase by 4% each year, beginning in FY 2008-09. The City of National City's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

9. The actual increased costs incurred by the City of National City in FY 2007-08 to comply with the mandated activities required by the 2007 Permit will be $258,420, and are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

10. The estimated increased costs that the City of National City expects to incur in FY 2008-09, are expected to be $282,729 and are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

11. The estimated increased costs that the City of National City expects to incur during each year of the remaining term of the 2007 Permit are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

12. I am not aware of any dedicated state or federal funds that are or will be available to pay for these increased costs.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

14. I am not aware of any authority to assess a fee to offset these increased costs.

Executed this 5th day of June, 2008, at National City, California.

I declare under penalty of perjury that the foregoing is true and correct.

Barbara A. Tipton

Document received by the CA 3rd District Court of Appeal.

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
[illegible] Activities						
Working Body Support	$0.00	$9,237.38	$9,699.25	$10,184.21	$10,693.41	Permit section L.1 requires that all Copermittees collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs and Watershed Urban Runoff Management Programs, and to plan and coordinate activities required under the Permit. Ten regional working bodies were established per the Copermittee's Jan. 2008 MOU to support the regional coordination of programs and activities required under the Permit. Working body costs represent consultant and/or Copermittee staff support for the Copermittee's Program Planning subcommittee and nine Regional Workgroups or Sub-workgroups. FY 08-09 costs have been established for all Copermittees as a group. The City of National City's share, based on the MOU cost sharing formula, is presented in this spreadsheet.
Working Body Participation	$14,345.40	$10,208.64	$10,616.99	$11,041.67	$11,483.33	Copermittees must also maintain representation in, and participate in meetings of, each of the working bodies established under the MOU. Cost for 2007-08 is based on consultant costs for attending meetings (July 1, 2007 through May 24, 2008). The 2007-08 fiscal year includes a large number of meetings associated with developing new programs in response to new Permit requirements; it is anticipated that in future years the amount of time spent in meetings will decrease. Cost for future years is based on attending 16 meetings per year (each meeting: 3 hours + 20 miles). Cost also includes workgroup chair or secretary responsibilities of 3 hours per month (36 hours/year). All costs are based on consultant costs to the City (average labor rate of $110/hr and $0.60/mile) and assume 4% annual increases, with 2007-08 as the base year.
Regional Residential Education Program Development and Implementation	$2,231.25	$4,462.50	$8,925.00	$9,371.25	$9,839.82	Permit section F.1 requires that the Copermittees collaboratively develop and implement a Regional Residential Education Program. This is in addition to section D.5.a, which requires that each Copermittee provide education to measurably increase the knowledge of, and measurably change the behavior of, residential communities with in their jurisdiction. The City of National City's share of regional costs for this program, based on the MOU cost sharing formula, is presented in this spreadsheet.
Hydromodification Management Plan (HMP) Development	$6,282.68	$4,188.45	$0.00	$0.00	$0.00	Order R9-2007-0001 mandates the collaborative development of a Hydromodification Management Plan (HMP). This task was initiated by the Copermittees' consultant during FY 2007-08 and will be completed in FY 2008-09. The City of National City's share of regional costs for this program, based on the specially developed cost sharing formula, is presented in this spreadsheet.

d by the CA 3rd District Court of Appeal.

City of National City Copermittee Cost Estimates for Unfunded Mandate Test Claim

Low Impact Development (LID) and Standard Urban Stormwater Mitigation Plan (SUSMP)	$892.50	$0.00	$0.00	$0.00	$0.00	Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The Copermittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The City of National City's share of the regional costs for this update, based on the standard MOU cost sharing formula, is presented in this spreadsheet.
Long-term Effectiveness Assessment (LTEA)	$0.00	$0.00	$0.00	$3,570.00	$0.00	In addition to requirements for Copermittees to annually assess their regional, jurisdictional and watershed programs, Permit section J.1 requires the collaborative development of a Long-term Effectiveness Assessment (LTEA) that builds on the results of the August 2005 Baseline LTEA. The City of National City's share of regional costs for this program, based on the MOU cost sharing formula, is presented in this spreadsheet.
[illegible]						
4.0 Development Planning						Reimbursable costs are not projected for this component
5.0 Construction						Reimbursable costs are not projected for this component
6.0 Municipal						
Street Sweeping (equipment costs)	$745.46	$1,580.36	$1,643.58	$1,709.32	$1,777.70	Permit Section D.3.(5) lists required street sweeping frequencies. Based on past experience, the City has identified Plaza Blvd, Sweetwater Rd, Highland Ave, 8th St, and National City Blvd as high priority street, and all other streets have been designated medium priority. Of the City's approximately 110 miles of streets and alleys, 10% are high priority, 90% are medium priority, and 0% are low priority. Assuming that previously the City's street sweeping program would complete approximately the equivalent of sweeping all streets in the City once per month, meeting the new requirements is an increase of about 10%. Maintaining a street sweeper utilized at 100% requires an annual cost of $40,000. To meet the above requirements, the City would need to increase utilization from 37% to 41%. These costs assumes 6% annual increases; a slightly higher annual increase is used here to account for rising costs of fuel. The 2007-08 cost is based on implementing the increased requirements for half a year, while the increases are applied to the entire fiscal year in following years.
Street Sweeping (staffing costs)	$1,379.09	$2,868.51	$2,983.25	$3,102.58	$3,226.68	To meet the Permit required sweeping frequencies, staffing will need to increase by about 10%. FY 07-08 costs are calculated at an annual cost of $74,000 for Street Sweepers and increased by 4% in each subsequent year. The 2007-08 cost is based on implementing the staff increase for half a year, and future years assume the staff increase applies for the entire year.
Street Sweeping (contract costs)	$0.00	$0.00	$0.00	$0.00	$0.00	The City of National City does not contract out street sweeping services.
Conveyance System Cleaning	$0.00	$0.00	$0.00	$0.00	$0.00	Permit section D.3.(3).(b) mandates that all MS4 facilities be inspected annually, with high priority facilitates being inspected between May and September. The City's previous JURMP included annual inspection of MS4 facilities. Based on conversations with Public Works staff, inspecting high priority facilities during the dry season and cleaning out facilities that are at least 33% full is not anticipated to add any substantial costs to the City's existing program. Therefore, not cost increase is listed for this line item.

d by the CA 3rd District Court of Appeal.

7.0 Industrial and Commercial						Reimbursable costs are not projected for this component because new costs can be passed through to regulated parties.
9.0 Illicit Discharge Detection & Elimination Component (IDDEC)						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
10.0 Education						
Educational Surveys and Tests	$1,769.78	$5,521.71	$5,742.58	$5,972.28	$6,211.17	The Permit mandates an educational component that requires the implementation of educational programs to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff on receiving waters, and potential BMP solutions for the target audience; and (2) to measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Includes the cost of administering assessment tests at training seminars and conducting additional workshops per year for new requirements (per workshop: 16 hrs of consultant at average of $100/hr and 5 hrs of City storm water inspector at $33.96/hr. Hours include preparation, presenting at the workshop, and analyzing results). The 2007-08 cost includes one workshop, and future years include three workshops per year. Costs are increased by 4% each year.
11.0 Public Participation						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
12.0 Fiscal Assessment						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
13.0 Effectiveness Assessment						
Annual JURMP Assessment and Reporting	$16,716.25	$22,041.75	$22,923.42	$23,840.36	$24,793.97	Permit section I.1 lays out prescriptive requirements for annually reporting on JURMP effectiveness. Annual costs typically include developing and updating standards and methods, database development and modification, and data tracking, analysis, and report writing. The additional elements of the industrial/commercial inspections (BMP score, knowledge score, and pollutant discharge assessment) conducted solely for effectiveness assessment reasons are also included in the cost. Additional costs are included for 2007-08 based on consultant costs, as some of the efforts listed above have been started in 2007-08. Beginning in 2008-09, the cost is based off completing additional assessment measures at 205 industrial/commercial sites (0.25 hrs/site at average rate of $88.40/hr); data entry for 275 industrial, commercial, and wet season construction inspections (0.25 hrs/site at average rate of $57.20/hr); and projected consultant data management, database development, and reporting costs totaling $13,730. A 4% annual increase is assumed.
WATERSHED URMP ACTIVITIES						
Staffing for Watershed URMP development and implementation	$16,716.25	$22,041.75	$22,923.42	$23,840.36	$24,793.97	FY 07-08 cost estimates are based on 8 hours of City staff time (4 hrs City Engineer at $80.77/hr and 4 hrs Principal Engineer at $64.42/hr) and actual consultant costs for WURMP support, which mainly includes attending meetings, developing reports, and developing strategy for implementing the WURMP within the City of National City. This cost is increased by 4% in each subsequent year.

d by the CA 3rd District Court of Appeal.

WURMP Cost-Share Agreements	$0.00	$0.00	$0.00	$0.00	$0.00	No cost share agreement has been enacted to date for the San Diego Bay WURMP. There is some possibility that one will be implemented in the future, but there are no known set plans for a cost-sharing agreement at this point. Therefore, no cost has been entered for this line item.
Implementation of Watershed Activities	$199,470.00	$207,448.80	$215,746.75	$224,376.62	$233,351.69	Permit section E.2.f requires Watershed Copermittees to implement at least two watershed water quality activities and two watershed education activities for each permit year. 2007-08 cost is based on City staff and consultant cost for conducting additional dry season construction inspections and managing the data from those inspections (23 inspections at average of $150/inspection), financially supporting I Love a Clean San Diego for the Creek to Bay Cleanup ($1,000 per year), consultant and staff support for the City's Clean Community Program (consultant: 20 hrs at average rate of $100/hr; staff: creek cleanup worker for 980 hrs/yr at $12/hr), and conducting additional street sweeping beyond the 2007 Permit requirements (this includes the cost of an additional 1.59 staff years at $74,000 per year and additional equipment maintenance costs of 1.59 times the annual maintenance for one sweeper due to upping the usage of the first sweeper to 100% utilization and 100% of the maintenance costs of a second sweeper unit. The annual sweeper unit maintenance cost is estimated at $40,000 per year). 4% increases are applied in future years.
TOTALS	$260,548.65	$289,599.85	$301,204.25	$317,008.64	$326,171.74	

Filed by the CA 3rd District Court of Appeal.

EXHIBIT 6 "M" – DECLARATION OF MO LAHSAIE FOR CITY OF OCEANSIDE.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

I, Mo Lahsaie, declare as follows:

1. I make this declaration based upon my own personal knowledge, except for matters set forth herein on information and belief, and as to those matters I believe them to be true, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. BS in Agricultural Science 1976; MS in Plant Sciences 1979 University of CA Riverside; PhD in Plant Physiology, 1983 University of CA Riverside; Site Assessment and Remediation Certificate, University of CA San Diego; Hazardous Materials Management Certificate, University of CA San Diego; Environmental Scientist with Regional Water Quality Control Board, 2 years; Registered Environmental Health Specialist Certificate.

3. I am employed by the Water Utilities Department of the City of Oceanside as the Clean Water Program Coordinator

4. I have held my current position for approximately five years. My duties include managing the planning and implementation of the Municipal Stormwater National Pollutant Discharge Elimination System Permit mandated by the Regional Water Quality Control Board in San Diego.

5. I have read the California Regional Water Quality Control Board ("RWQCB"), San Diego Region, Order No. R9-2007-0001 (NPDES No. CAS 0108758) (the "2007 Permit") and I know and understand the requirements of the Permit.

6. I have also read and I know and understand the requirements of Order No. 2001-01 (NPDES CAS0108758) issued by the San Diego RWQCB on February 21, 2001 (the "2001 Permit").

7. Based on my understanding of the requirements of the 2001 Permit and the requirements of the 2007 Permit, I believe the 2007 Permit requires the co-permittees to perform new activities that are unique to local governmental entities that are not required by the 2001 Permit.

8. These new activities include the following:

a. <u>Working Body</u>

Document received by the CA 3rd District Court of Appeal.

1.) Support: Section L.1 of the 2007 Permit requires all co-permittees to collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding ("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,000 in support costs and an additional 5% ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Oceanside's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2.) Participation: Section L.1.a of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban runoff programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU establishes minimum levels of representation and participation in working body meetings required to meet these directives. The City of Oceanside's participation costs were determined by multiplying the hourly rate of each staff person involved in these activities by anticipated minimum number of meetings for each working body for each fiscal year and assumed that on average each staff member would spend four (4) hours preparing for and attending each meeting. The cost to the City of Oceanside to comply with this mandated activity for FY 2007-08 is $10,620. Costs for FY 08-09 and beyond are projected based on minimum mandated meeting frequencies for each working body, but in some cases are

Document received by the CA 3rd District Court of Appeal.

increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. The City of Oceanside's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

b. Regional Residential Education Program Development and Implementation: Section F.1 of the 2007 Permit requires the co-permittees to collaboratively develop and implement a Regional Residential Education Program. This is in addition to Section D.5.a, which requires each co-permittee to develop and implement an education program that measurably increases the knowledge of, and measurably changes the behavior of, residential communities within their jurisdictions. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and the development of marketing and research tools, including regional surveys to be conducted in FY 2008-09 and again in FY 2011-12. The co-permittees retained a consultant to perform these mandated activities in Fiscal Year 2007-08. The total cost of the contract is $131,250 which includes 5% ($6,250) for contract administration by the County. The budgeted cost of these mandated activities increased in FY 2008-09 to $262,500 and is expected to again double in FY 2009-10 to $525,000. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Oceanside's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

c. Development of New/Revised Programs and Standards

1. Hydromodification Management Plan ("HMP") Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000 which includes 5% ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's

Document received by the CA 3rd District Court of Appeal.

share of these mandated costs is based on a formula set forth in the MOU. The City of Oceanside's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Oceanside's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

d. Long-Term Effectiveness Assessment ("LTEA"): In addition to annual assessments of the regional, jurisdictional and watershed programs, Section I.1 of the 2007 Permit requires the co-permittees to collaboratively develop a LTEA. Because of the complexity of the assessment requirements, the consultant costs to perform this assessment, which is expected to be completed in FY 2010-11, are expected to be $210,000, which includes 5% ($10,000) for contract administration by the County. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Oceanside's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

e. Street Sweeping

1.) Equipment Costs: Section D.3.(5) of the 2007 Permit mandates specific street sweeping frequencies for improved roads, streets, highways, and parking

Document received by the CA 3rd District Court of Appeal.

facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept monthly. Areas with low volumes of trash and/or debris must be swept at least annually. The City of Oceanside Public Works Department used average daily trip (ADT) statistics to determine the volume of trash and/or debris that could reasonably be expected to be generated. Improved roads, streets and highways that have more than 20,000 vehicles per day are in the "High" volume of trash and/or debris category. Improved roads, streets and highways that have 15,000 to 20,000 vehicles per day are in the "Medium" volume of trash and/or debris category. Improved roads, streets and highways that have less than 15,000 vehicles per day are in the "Low" volume of trash and/or debris category. The City of Oceanside has 397 miles of improved roads, streets and highways. Based on these standards, 20 % of the City of Oceanside improved roads, streets and highways are in the "High" category, 0 % in the "Medium" category and 80 % in the "Low" category. Based on this analysis it was determined that there will be a 209 % increase in the street sweeping activities as a result of the 2007 Permit. To accommodate the required increase, the City of Oceanside Public Works Department has been required to purchase four (4) new street sweeping vehicles and employ four (4) additional employees. Each vehicle costs $150,000 to purchase and has an expected useful life of six years. The annual maintenance and fuel costs are expected to be $30,000 for each vehicle. In addition the expected replacement cost of each vehicle has been amortized over the six year expected life of each vehicle. The City of Oceanside Public Works Department's actual and estimated equipment costs for complying with this mandated activity for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Staffing Costs: In response to Section D.3.(5) the City of Oceanside Public Works Department has increased its staffing by seven (7) staff years for FY 2007-08 and will increase staffing by 4 % in FY 2008-09 and each year thereafter. The increase in the City of Oceanside Public Works Department's staffing cost to comply with this mandated activity in FY 2007-08 is $465,000 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Oceanside Public Works Department's actual and estimated costs for complying

Document received by the CA 3rd District Court of Appeal.

with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Contract Costs: The City of Oceanside conducts all street sweeping service through the Public Works Department and does not contract out any of these services.

f. Conveyance System Cleaning: Section D.3.(3).(b) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be inspected annually, with high priority facilities being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, the City of Oceanside Public Works Department has increased staffing of its MS4 operations and maintenance program for FY 2007-08 by two (2) staff years and will increase staffing by 4% in FY 2008-09. The increase in the City of Oceanside Public Works Department's staffing and equipment costs to comply with this mandated activity in FY 2007-08 is $ $216,750 and is expected to increase 4% in FY 2008-09 and each year thereafter. In addition, The City of Oceanside contracts citywide storm drain inlet cleaning on an annual basis at a cost of $135,160 per year. The City of Oceanside Public Works Department's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

g. Educational Surveys and Tests: Section D.5 of the 2007 Permit requires each co-permittee to implement an educational program to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff or receiving waters, and potential Best Management Practices ("BMPs") for the target audiences; and (2) measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Sections I.1 and I.2 further require that the effectiveness of educational activities in meeting these standards be assessed annually where applicable and feasible. Compliance with these mandated activities requires the routine incorporation of testing and surveying methods into the program elements to ensure that implementation is resulting in the targeted outcomes. To comply with Section D.5 of the 2007 Permit the City of Oceanside expects to expend 288 hours of staff time in FY 2007-08, and each year thereafter, to

Document received by the CA 3rd District Court of Appeal.

develop, administer and analyze surveys and tests. The City of Oceanside's cost in FY 2007-08 for an Environmental Specialist II to perform this work is $10,656 at $37 per hour. The increase in the City of Oceanside's staffing cost to comply with these mandated activities is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Oceanside's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

h. Annual JURMP Assessment and Reporting Requirements: Section I.1 of the 2007 Permit specifies prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. Co-permittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a new emerging discipline and is expected to evolve over the term of the Permit. Annual costs are expected to include developing and updating standards and methods, database development and modification, and data tracking, analysis and report writing. To comply with Section I.1 the City of Oceanside will expend 88 hours of staff time in FY 2007-08, with increasing commitment in subsequent years. The City of Oceanside's cost in FY 2007-08 for an Environmental Health Specialist II to perform these mandated activities will be $3,256 at $37 per hour. The increase in the City of Oceanside's staffing cost to comply with these mandated activities in FY 2008-09 is $3,515 and is expected to increase each year thereafter as additional projects and programs are implemented. The City of Oceanside's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

1. Watershed URMP

1.) Staffing for Development and Implementation: Section E.2.a of the 2007 Permit requires the lead watershed permittee in each watershed be responsible for implementing watershed programs. Lead responsibility for the San Luis Rey watershed program implementation resides with the City of Oceanside's Water Utilities Department Clean Water Program (CWP). This program consists of three staff (one CWP Program Coordinator, and two Environmental Specialists). The FY 2007-08 costs are based on annualized projections for year-to-date expenditures. Calculations are based on the following hourly rates for FY 2007-08: CWP Coordinator - $57; Environmental Specialist II - $37. The increase in the City of Oceanside's staffing cost to comply with these mandated activities in FY 2007-08 is $13,172 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Oceanside's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Cost-Sharing Agreements:

The City of Oceanside has entered into one cost sharing agreement to pay for consultant support relating to the Carlsbad WURMP. The consultant costs for FY 2007-08 are $3,349. Additional consultant services will be necessary in future years based on the development of cost sharing agreements for other WURMPs and an increasing need for coordination within each WURMP over the Permit cycle. The City of Oceanside's budgeted cost for this mandated activity for FY 2008-09 is $3,482. The City of Oceanside's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Implementation of Watershed Activities: Section E.2.f of the 2007 Permit requires Watershed co-permittees to implement at least two watershed quality activities and two watershed education activities for each permit year. The cost of implementing this mandate for FY 2007-08 is expected to be $25,000. Because of the wide range of potential costs for these activities, we anticipate that these costs will increase on average 20% per year.

Document received by the CA 3rd District Court of Appeal.

The City of Oceanside's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

9. The actual increased costs incurred by the City of Oceanside in FY 2007-08 to comply with the mandated activities required by the 2007 Permit will be $1,353,668, and are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

10. The estimated increased costs that the City of Oceanside expects to incur in FY 2008-09, are expected to be $1,432,978, and are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

11. The estimated increased costs that the City of Oceanside expects to incur during each year of the remaining term of the 2007 Permit are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

12. I am not aware of any dedicated state or federal funds that are or will be available to pay for these increased costs.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

14. I am not aware of any authority to assess a fee to offset these increased costs.

15. I believe that the only available source to pay these increased costs are and will be the City's general purpose funds.

I declare under penalty of perjury that the foregoing is true and correct.

Executed this 29th day of May at Oceanside, California.

M. A. Lahsaiezadeh

Mo Lahsaie

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

Co-Permittee
City of
Oceanside

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
[illegible]						
Working Body Support	$0.00	$25,647.30	$26,929.68	$28,276.15	$29,689.95	Permit section L.1 requires that all Copermittees collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs and Watershed Urban Runoff Management Programs, and to plan and coordinate activities required under the Permit. Ten regional working bodies were established per the Copermittee's Jan. 2008 MOU to support the regional coordination of programs and activities required under the Permit. Working body costs represent consultant and/or Copermittee staff support for the Copermittee's Program Planning subcommittee and ten working bodies. FY 08-09 costs were established in the amount of $543,375 which includes $517,500 in support costs and an additional 5% ($25,875) for contract administration. The City of Oceanside's cost-share for this element is reflected in this table.
Working Body Participation	$10,620.00	$13,578.00	$11,798.00	$12,270.00	$12,761.00	Copermittees must maintain representation in, and participate in meetings of, each of the working bodies established under the MOU. The estimates presented here are Oceanside costs only. Oceanside participation costs are determined by multiplying the hourly rate of each staff person by the number of meetings each fiscal year, and assuming an average meeting length of four hours, including travel time. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs for FY 08-09 and beyond are projected based on mimimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. Detailed calculations can be found in Worksheet B.
Regional Residential Education Program Development and Implementation	$6,195.00	$12,390.00	$24,780.00	$26,019.00	$27,319.97	Permit section F.1 requires that the Copermittees collaboratively develop and implement a Regional Residential Education Program. This is in addition to section D.5.a, which requires that each Copermittee provide education to, measurably increase the knowledge of, and measurably change the behavior of, residential communities within their jurisdiction. The City of Oceanside's cost-share for this element is reflected in this table.
Hydromodification Management Plan (HMP) Development	$22,510.02	$15,006.68	$0.00	$0.00	$0.00	Order R9-2007-0001 mandates the collaborative development of a Hydromodification Management Plan (HMP). This task was initiated by the Copermittees' consultant during FY 2007-08 and will be completed in FY 2008-09. The total cost of plan development is $1,050,000, $50,000 of which is for contract administration. The City of Oceanside's cost-share for this element is reflected in this table.

d by the CA 3rd District Court of Appeal.

Low Impact Development (LID) and Standard Urban Stormwater Mitigation Plan (SUSMP)	$2,478.00	$0.00	$0.00	$0.00	$0.00	Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU.
Long-term Effectiveness Assessment (LTEA)	$0.00	$0.00	$0.00	$9,912.00	$0.00	In addition to requirements for Copermittees to annually assess their regional, jurisdictional and watershed programs, Permit section I.1 requires the collaboratative development of a Long-term Effectiveness Assessment (LTEA) that builds on the results of the August 2005 Baseline LTEA. The cost of the 2005 LTEA was $125,000. Because of the increased complexity of new assessment requirements, this consultant cost is expected to increase to $200,000, with an additional 5% ($10,000) for contract administration. The City of Oceanside's cost-share for this element is reflected in this table.
[illegible]						
4.0 Development Planning						
5.0 Construction						

d by the CA 3rd District Court of Appeal.

6.0 Municipal						
Street Sweeping (equipment costs)	$442,000.00	$460,000.00	$478,000.00	$497,000.00	$517,000.00	Section D.3.(5) of the 2007 Permit mandates specific street sweeping frequencies for improved roads, streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept monthly. Areas with low volumes of trash and/or debris must be swept at least annually. The City of Oceanside Public Works Department used average daily trip (ADT) statistics to determine the volume of trash and/or debris that could reasonably be expected to be generated. Improved roads, streets and highways that have more than 20,000 vehicles per day are in the "High" volume of trash and/or debris category. Improved roads, streets and highways that have 15,000 to 20,000 vehicles per day are in the "Medium" volume of trash and/or debris category. Improved roads, streets and highways that have less than 15,000 vehicles per day are in the "Low" volume of trash and/or debris category. The City of Oceanside has 397 miles of improved roads, streets and highways. Based on these standards, 20 % of the City of Oceanside improved roads, streets and highways are in the "High" category, 0 % in the "Medium" category and 80 % in the "Low" category. Based on this analysis it was determined that there will be a 209 % increase in the street sweeping activities as a result of the 2007 Permit. To accommodate the required increase, the City of Oceanside Public Works Department has been required to purchase four (4) new street sweeping vehicles and employ four (4) additional employees. Each vehicle cost $ 150,000 to purchase and has an expected useful life of six years. The annual maintenance and fuel costs are expected to be $ 30,000 for each vehicle. In addition the expected replacement cost of each vehicle has been amortized over the six year expected life of each vehicle.
Street Sweeping (staffing and /or contract costs)	$465,000.00	$484,000.00	$503,000.00	$523,000.00	$544,000.00	In response to Section D.3.(5) the City of Oceanside Public Works Department has increased its staffing by seven (7) staff years for FY 2007-08 and will increase staffing by 4 % in FY 2008-09 and each year thereafter. The increase in the City of Oceanside Public Works Department's staffing cost to comply with this mandated activity in FY 2007-08 is $465,000 and is expected to increase 4% in FY 2008-09 and each year thereafter.
Conveyance System Cleaning (Contracted Work and City Staff	$351,910.00	$360,580.00	$369,597.00	$523,000.00	$544,000.00	Permit section D.3.(3).(b) mandates that all MS4 facilities be inspected annually, with high priority facilitates being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, additional staffing impacts are projected. The County has increased its MS4 operations and maintenance program by 2.64 staff years in Fy 2007-08. Costs are calculated at $50.56 per hour for Operations Engineers and increased by 4% in each subsequent year.
7.0 Industrial and Commercial						Reimbursable costs are not projected for this component because new costs can be passed through to regulated parties.
9.0 Illicit Discharge Detection & Elimination Component						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.

d by the CA 3rd District Court of Appeal.

10.0 Education						
Educational Programs	$10,656.00	$11,082.00	$11,525.00	$11,986.00	$12,465.00	The Permit mandates an educational component that requires the implementation of educational programs to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff on receiving waters, and potential BMP solutions for the target audience; and (2) to measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Compliance with this standard requires the routine incorporation of testing and surveying methods into program elements to ensure that implementation is resulting in targeted outcomes. FY 07-08 staffing impacts are estimated at three days per month (288 hours per year) to develop, administer, and analyze surveys and tests. Costs are calculated at the Environmental specialist level ($37 per hour), and increased by 4% each year after FY 2008-09.
11.0 Public Participation						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
12.0 Fiscal Assessment						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
13.0 Effectiveness Assessment						
Annual JURMP Assessment and Reporting	$3,256.00	$3,515.00	$4,255.00	$4,995.00	$5,624.00	Permit section I.1 lays out prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. To the extent applicable and feasible, Copermittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a newly emerging discipline, and will continue to evolve over the entire Permit cycle. Annual costs typically include developing and updating standards and methods, database development and modification, and data tracking, analysis, and report writing. These responsibilities will be incurred across a number of program areas and staff. Additional monitoring programs and development and expansion of education programs in future years will add additional assessment time. Annual costs are calculated at the EHS II level ($37 per hour).
WATERSHED URMP ACTIVITIES						
Staffing for Watershed URMP development and implementation	$13,172.00	$13,698.00	$14,245.00	$14,814.00	$15,406.00	Lead responsibility for the San Luis Rey watershed program implementation resides with the City of Oceanside Water Utilities Department, Clean Water Program. This program consists of three staff (one Program Coordinator and Environmental Specialists). FY 07-08 cost estimates are based on annualized projections from YTD expenditures. Calculations assume the following hourly rates for FY 2007-08 for Environmental Specialists at $37. These rates are increased by 4% in each subsequent year.

d by the CA 3rd District Court of Appeal.

WURMP Cost-Share Agreements	$3,349.00	$3,482.00	$3,621.00	$3,765.00	$3,915.00	Cost share agreements are used to pay for WURMP consultant support. The FY 07-08 total is based on the only cost-share that the City of Oceanside has with Carlsbad in which it participates. A 5% increase is assumed for each year after FY 2007-08.
Implementation of Watershed Activities	$25,000.00	$30,000.00	$36,000.00	$43,200.00	$51,840.00	Permit section E.2.f requires Watershed Copermittees to implement at least two watershed water quality activities and two watershed education activities for each permit year. The City of Oceanside budgeted $25,000 for implementing WURMP activities in FY 07-08. Because of the wide range of potential costs for these activities, a 20% increase is assumed in each subsequent year.
TOTAL	$1,356,146.01	$1,432,978.98	$1,488,750.68	$1,698,237.15	$1,764,020.90

d by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

EXHIBIT 6 "N" –DECLARATION OF CHARLES A. HEINRICHS FOR CITY OF SAN DIEGO.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

DECLARATION OF CHARLES A. HEINRICHS IN SUPPORT OF TEST CLAIM

I, Charles A. Heinrichs, declare as follows:

1. I make this declaration based upon my own personal knowledge, except for matters set forth herein on information and belief, and as to those matters I believe them to be true, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. Masters Degree, Civil Engineering, Registered Professional Engineer, California.

3. I am employed by the City of San Diego as Assistant Director, General Services Department.

4. I have held my current position for approximately 2 months. My duties include, directing and controlling activities to protect and improve the water quality of rivers, creeks and bays and the ocean in compliance with the updated Municipal Storm Water Permit.

5. I have read the California Regional Water Quality Control Board ("RWQCB"), San Diego Region, Order No. R9-2007-0001 (NPDES No. CAS 0108758) (the "2007 Permit") and I am familiar with the requirements of the Permit.

6. I have also reviewed and I am familiar with the requirements of Order No. 2001-01 (NPDES CAS0108758) issued by the San Diego RWQCB on February 21, 2001 (the "2001 Permit").

7. Based on my understanding of the requirements of the 2001 Permit and the requirements of the 2007 Permit, I believe the 2007 Permit requires the co-permittees to perform new activities that are unique to local governmental entities that are not required by the 2001 Permit.

Document received by the CA 3rd District Court of Appeal.

8. These new activities include the following:

a. Working Body

1.) Support: Section L.1 of the 2007 Permit requires all co-permittees to collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding ("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,000 in support costs and an additional 5% ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of San Diego's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2.) Participation: Section L.1.a of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban runoff programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU establishes minimum levels of representation and participation in working body meetings required to meet these directives. The City of San Diego's participation costs were determined by multiplying the hourly rate of each staff person involved in these activities by anticipated minimum number of meetings for

Document received by the CA 3rd District Court of Appeal.

each working body for each fiscal year and assumed that on average each staff member would spend three hours preparing for and attending each meeting. The cost to the City of San Diego to comply with this mandated activity for FY 2007-08 is $26,391. Costs for FY 08-09 and beyond are projected based on minimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. The City of San Diego's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

b. Regional Residential Education Program Development and Implementation: Section F.1 of the 2007 Permit requires the co-permittees to collaboratively develop and implement a Regional Residential Education Program. This is in addition to Section D.5.a, which requires each co-permittee to develop and implement an education program that measurably increases the knowledge of, and measurably changes the behavior of, residential communities within their jurisdictions. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and the development of marketing and research tools, including regional surveys to be conducted in FY 2008-09 and again in FY 2011-12. The co-permittees retained a consultant to perform these mandated activities in Fiscal Year 2007-08. The total cost of the contract is $131,250 which includes 5% ($6,250) for contract administration by the County. The budgeted cost of these mandated activities increased in FY 2008-09 to $262,500 and is expected to again double in FY 2009-10 to $525,000. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of San Diego's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

c. Development of New/Revised Programs and Standards

1. Hydromodification Management Plan ("HMP") Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000 which includes 5% ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of San Diego's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of San Diego's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

d. Long-Term Effectiveness Assessment ("LTEA"): In addition to annual assessments of the regional, jurisdictional and watershed programs, Section I.1 of the 2007 Permit requires the co-permittees to collaboratively develop a LTEA. Because

Document received by the CA 3rd District Court of Appeal.

of the complexity of the assessment requirements, the consultant costs to perform this assessment, which is expected to be completed in FY 2010-11, are expected to be $210,000, which includes 5% ($10,000) for contract administration by the County. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of San Diego's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

e. Street Sweeping

1.) Equipment Costs: Section D.3.(5) of the 2007 Permit mandates specific street sweeping frequencies for improved roads, streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept monthly. Areas with low volumes of trash and/or debris must be swept at least annually. The City of San Diego has been sweeping its streets and roadways at or near the required frequencies. However, over the past several years the sweeping levels have been impacted due to budget constraints. The City determined that the volume of trash and/or debris that could reasonably be based on street use. Roads, streets and highways that are classified as commercial are in the "High" volume of trash and/or debris category. Residential improved roads, streets and highways that have parking restrictions related to street sweeping are in the "Medium" volume of trash and/or debris category. Residential improved roads, streets and highways that are non-posted with parking restrictions are in the "Low" volume of trash and/or debris category. The City of San Diego has approximately 2,600 miles of improved roads, streets and highways. Based on these standards, 27% of the roads, streets and highways are in the "High" category, 3.5% in the "Medium" category and 69.5% in the "Low" category. Based on this analysis it was determined that there will be a 20 % increase in the street sweeping activities as a result of the 2007 Permit. To accommodate the required increase, the City of San Diego has purchased five new street sweeping vehicles and

Document received by the CA 3rd District Court of Appeal.

hired five additional employees. Each vehicle cost $200,000 to purchase and has an expected useful life of seven years. The annual maintenance and fuel costs are expected to be $42,000 for each vehicle. In addition the expected replacement cost of each vehicle has been amortized over the seven year expected life of each vehicle. The City of San Diego's actual and estimated equipment costs for complying with this mandated activity for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Staffing Costs: In response to Section D.3.(5) the City of San Diego will be increasing its staffing by five staff for FY 2008-09. The increase in the City of San Diego's staffing cost to comply with this mandated activity in FY 2008-09 is $400,000 and is expected to increase 4% in FY 2009-10 and each year thereafter. The City of San Diego's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

f. Conveyance System Cleaning: Section D.3.(3).(b) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be inspected annually, with high priority facilities being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, the City of San Diego has increased/contracted out much of its MS4 operations and maintenance program for FY 2007-08. The contract management element is handled by an Associate Engineer ($89.19 per hour) who spends approximately 80 - 100 hours per year writing and managing the contract. In addition, the City is utilizing a contractor to remove trash and debris from the storm drain channels. The City of San Diego's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

g. Educational Surveys and Tests: Section D.5 of the 2007 Permit requires each co-permittee to implement an educational program to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff or receiving waters, and potential Best Management Practices ("BMPs") for the target audiences; and (2) measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Sections I.1 and I.2 further require that the effectiveness of educational activities in meeting these standards be assessed annually where applicable and feasible. Compliance with these mandated activities requires the routine incorporation of testing and surveying methods into the program elements to ensure that implementation is resulting in the targeted outcomes. To comply with Section D.5 the City of San Diego expects to expend 312 hours of staff time (208 hours from a Senior Public Information Officer, 104 hours from a Public Information Officer) in FY 2007-08, and each year thereafter, to develop, administer and analyze surveys and tests. The City of San Diego's cost in FY 2007-08 for a Sr. Public Information Officer and Public Information Officer to perform this work is $47, and $41 per hour, respectively. The increase in the City of San Diego's staffing cost to comply with these mandated activities in FY 2007-08 is $14,505 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of San Diego's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

h. Annual JURMP Assessment and Reporting Requirements: Section I.1 of the 2007 Permit specifies prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented each major JURMP component, and the JURMP as a whole. Co-permittees must also determine source load reductions resulting

Document received by the CA 3rd District Court of Appeal.

from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a new emerging discipline and is expected to evolve over the term of the Permit. Annual costs are expected to include developing and updating standards and methods, database development and modification, and data tracking, analysis and report writing. To comply with Section I.1 the City of San Diego will expend 728 hours of staff time in FY 2007-08, and 1,560 hours of staff time in FY 2008-09, and each year thereafter. The City of San Diego's cost in FY 2007-08 for a Storm Water Specialist and Associate Planner to perform these mandated activities will be $53 and $48 per hour, respectively. The increase in the City of San Diego's staffing cost to comply with these mandated activities in FY 2007-08 is $35,820, $77,127 in FY 2008-09, and is expected to increase 4% in FY 2010-11 and each year thereafter. The City of San Diego's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

1. Watershed URMP

1.) Staffing for Development and Implementation: Section E.1 of the 2007 Permit requires the City of San Diego to perform lead responsibility for implementation of the Mission Bay and La Jolla Watershed Urban Runoff Management Program (WURMP) and participate in the implementation of five other WURMPs. This program consists of 2.5 staff (0.5 Storm Water Specialist, two Associate Planners) that spend 100% of their time on the WURMP program. Calculations are based on the following hourly rates for FY 2007-08: Storm Water Specialist - $53; Associate Planner - $48. The increase in the City of San Diego's staffing cost to comply with these mandated activities in FY 2007-08 is $253,652 and is expected to increase to $308,505 in FY 2008-09 (1.0 Storm Water Specialist, 2.0 Associate Planners), and is expected to increase 4% each year thereafter. The City of San Diego's actual and estimated costs for

Document received by the CA 3rd District Court of Appeal.

complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Cost-Sharing Agreements:

The City of San Diego has entered into one cost sharing agreement to pay for consultant support relating to San Diego River WURMP. The consultant costs for FY 2007-08 was $7,698. In addition, the City of San Diego has or anticipates entering into additional consultant services agreements totaling $449,648 in value. Additional consultant services will be necessary in future years based on the development of cost sharing agreements for other WURMPs and an increasing need for coordination within each WURMP over the Permit cycle. The co-permittees expect budgeted costs to increase 5% in FY 2008-09 and each year thereafter. The City of San Diego's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Implementation of Watershed Activities: Section E.2.f of the 2007 Permit requires Watershed co-permittees to implement at least two watershed quality activities and two watershed education activities for each permit year. The cost of implementing this mandate for FY 2007-08 is expected to be $600,000. Because of the wide range of potential costs for these activities, we anticipate that these costs will increase on average 10% per year. The City of San Diego's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

9. The actual increased costs incurred by the City of San Diego in FY 2007-08 to comply with the mandated activities required by the 2007 Permit will be

Document received by the CA 3rd District Court of Appeal.

$4,790,664, and are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

10. The estimated increased costs that the City of San Diego expects to incur in FY 2008-09, are expected to be $4,457,710, and are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

11. The estimated increased costs that the City of San Diego expects to incur during each year of the remaining term of the 2007 Permit are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

12. I am not aware of any dedicated state or federal funds that are or will be available to pay for these increased costs.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

14. I am not aware of any authority to assess a fee to offset these increased costs.

15. I believe that the only available source to pay these increased costs are and will be the (county's/city's) general purpose funds.

Executed this 17th day of June at San Diego, California.

I declare under penalty of perjury that the foregoing is true and correct.

Charles R. Hinrichs

Document received by the CA 3rd District Court of Appeal.

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
REGIONAL URMP / ACTIVITIES						
Working Body Support	$0	$543,375	$570,544	$599,071	$629,024	Permit section L.1 requires that all Copermittees collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs and Watershed Urban Runoff Management Programs, and to plan and coordinate activities required under the Permit. Ten regional working bodies were established per the Copermittee's Jan. 2008 MOU to support the regional coordination of programs and activities required under the Permit. Working body costs represent consultant and/or Copermittee staff support for the Copermittee's Program Planning subcommittee and nine Regional Workgroups or Sub-workgroups. FY 08-09 costs were established in the amount of $543,375 which includes $517,500 in support costs and an additional 5% ($25,875) for contract administration. FY 2008-09 costs were calculated at $125 per hour. A 5% total cost increase is also factored in each subsequent year.
Working Body Participation	$26,391	$37,637	$39,142	$40,708	$42,336	Copermittees must also maintain representation in, and participate in meetings of, each of the working bodies established under the MOU. City participation costs are determined by multiplying the hourly rate of each staff person by the number of meetings each fiscal year, and assuming an average meeting length of three hours. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs for FY 08-09 and beyond are projected based on having one City representative for each working body meeting on a monthly basis. Hourly rates are increased by 4% each year after FY 07-08. Detailed calculations can be found in Worksheet B.
Regional Residential Education Program Development and Implementation	$131,250	$262,500	$525,000	$551,250	$578,813	Permit section L.1 requires that the Copermittees collaboratively develop and implement a Regional Residential Education Program. This is in addition to section D.5.a, which requires that each Copermittee provide education to, measurably increase the knowledge of, and measurably change the behavior of, residential communities within their jurisdiction. An FY 2007-08 budget for consultant support was initially established for this program in the amount of $131,250 ($125,000 for contract costs and $6,250 for contract administration). This figure was increased to $262,500 in FY 2008-09, and is expected to double again in FY 2009-10. Each subsequent year assumes a 5% increase. Regional program activities to be funded include: materials development / branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and marketing and research tools including the regional surveys to be conducted in FY 2008-09 and FY 2011-12.

d by the CA 3rd District Court of Appeal.

Hydromodification Management Plan (HMP) Development	$630,000	$420,000	$0	$0	$0	Order R9-2007-0001 mandates the collaborative development of a Hydromodification Management Plan (HMP). This task was initiated by the Copermittees' consultant during FY 2007-08 and will be completed in FY 2008-09. The total cost of plan development is $1,050,000, $50,000 of which is for contract administration.
Low Impact Development (LID) and Standard Urban Stormwater Mitigation Plan (SUSMP)	$52,500	$0	$0	$0	$0	Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU.
Long-term Effectiveness Assessment (LTEA)	0	0	0	$210,000	0	In addition to requirements for Copermittees to annually assess their regional, jurisdictional and watershed programs, Permit section L1 requires the collaboratative development of a Long-term Effectiveness Assessment (LTEA) that builds on the results of the August 2005 Baseline LTEA. The cost of the 2005 LTEA was $125,000. Because of the increased complexity of new assessment requirements, this consultant cost is expected to increase to $200,000, with an additional 5% ($10,000) for contract administration.

Street Sweeping (equipment costs)	$1,210,000	$218,400	$227,136	$236,221	$245,670	frequencies for improved roads, streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept monthly. Areas with low volumes of trash and/or debris must be swept at least annually. The City of San Diego has been sweeping its streets and roadways at or near the required frequencies. However, over the past several years the sweeping levels have been impacted due to budget constraints. The City determined that the volume of trash and/or debris that could reasonably be based on street use. Roads, streets and highways that are classified as commercial are in the "High" volume of trash and/or debris category. Residential improved roads, streets and highways that have parking restrictions related to street sweeping are in the "Medium" volume of trash and/or debris category. Residential improved roads, streets and highways that are non-posted with parking restrictions are in
Street Sweeping (staffing costs)	$400,000	$416,000	$432,640	$449,946	$467,943	In response to Section D.3.(5) the City of San Diego will be increasing its staffing by five staff for FY 2008-09. The increase in the City of San Diego's staffing cost to comply with this mandated activity in FY 2008-09 is $400,000 and is expected to increase 4% in FY 2009-10 and
Street Sweeping (contract costs)	$0	$0	$0	$0	$0	
Conveyance System Cleaning	$929,200	$966,368	$1,005,023	$1,045,224	$1,087,033	Section D.3.(5).(b) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be inspected annually, with high priority facilities being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, the City of San Diego has increased/contracted out much of its MS4 operations and maintenance program for FY 2007-08. The contract management element is handled by an Associate Engineer ($89.19 per hour) who spends approximately 80 -100 hours per year writing and managing the contract. In addition, the City is utilizing a contractor to remove trash and debris from the
7.0 Industrial and Commercial						Reimbursable costs are not projected for this component because new costs can be passed through to regulated parties.

d by the CA 3rd District Court of Appeal.

Educational Surveys and Tests	$14,505	$15,085	$15,688	$16,316	$16,969	The Permit mandates an educational component that requires the implementation of educational programs to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff on receiving waters, and potential BMP solutions for the target audience; and (2) to measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Compliance with this standard requires the routine incorporation of testing and surveying methods into program elements to ensure that implementation is resulting in targeted outcomes. Costs are calculated at 10% of a Sr PIO (208 hrs/year) and 5% of a PIO level (104 hrs/year), and increased by 4% each year after FY 2008-09.
11.0 Public Participation						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
12.0 Fiscal Assessment						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
13.0 Effectiveness Assessment						
Annual JURMP Assessment and Reporting	$35,820	$77,127	$80,212	$83,420	$86,757	Permit section I.1 lays out prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. To the extent applicable and feasible, Copermittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a newly emerging discipline, and will continue to evolve over the entire Permit cycle. Annual costs typically include developing and updating standards and methods, database development and modification, and data tracking, analysis, and report writing. Although these responsibilities may be incurred across a number of program areas and staff, annual costs are calculated as 0.1 Storm Water Specialist and 0.25 Associate Planner in FY08. For FY09, costs
WATERSHED URMP ACTIVITIES

d by the CA 3rd District Court of Appeal.

EXHIBIT 6 “O” - DECLARATION OF KENNETH E. ST. CLAIR FOR CITY OF SAN MARCOS.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

DECLARATION OF KENNETH E. ST. CLAIR ON BEHALF OF THE CITY OF SAN MARCOS IN SUPPORT OF TEST CLAIM

I, Kenneth E. St.Clair, declare as follows:

1. I make this declaration based upon my own personal knowledge, except for matters set forth herein on information and belief, and as to those matters I believe them to be true, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. I have had no formal education in stormwater issues.

3. I am employed by the City of San Marcos as an Administrative Analyst in the Public Works Department.

4. I have held my current position for approximately 8 years. My duties include acting as the City's representative for the co-permittee working groups, and coordinating the Stormwater program requirements between the various city departments for the past 2 years.

5. I have reviewed the California Regional Water Quality Control Board ("RWQCB"), San Diego Region, Order No. R9-2007-0001 (NPDES No. CAS 0108758) (the "2007 Permit") and I am familiar with the requirements of the Permit.

6. I have also reviewed and I am familiar with the requirements of Order No. 2001-01 (NPDES CAS0108758) issued by the San Diego RWQCB on February 21, 2001 (the "2001 Permit").

7. Based on my understanding of the requirements of the 2001 Permit and the requirements of the 2007 Permit, I am informed and believe and thereon allege that the 2007 Permit requires the co-permittees to perform new activities that are unique to local governmental entities that are not required by the 2001 Permit.

Document received by the CA 3rd District Court of Appeal.

8. These new activities include the following:

a. Working Body

1.) Support: Sections F and L.1 of the 2007 Permit require all co-permittees to collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding ("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,000 in support costs and an additional 5% ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of San Marcos's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2.) Participation: Section L.1.a of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban runoff programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU establishes minimum levels of representation and participation in working body meetings required to meet these directives. The City of San Marcos's participation costs were determined by multiplying the hourly rate of each staff person involved in these activities by anticipated minimum number of meetings for

Document received by the CA 3rd District Court of Appeal.

each working body for each fiscal year and assumed that on average each staff member would spend 3 hours preparing for and attending each meeting. The cost to the City of San Marcos to comply with this mandated activity for FY 2007-08 is $23,094. Costs for FY 08-09 and beyond are projected based on minimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. The City of San Marcos's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

b. Regional Residential Education Program Development and Implementation: Section F.1 of the 2007 Permit requires the co-permittees to collaboratively develop and implement a Regional Residential Education Program. This is in addition to Section D.5.a, which requires each co-permittee to develop and implement an education program that measurably increases the knowledge of, and measurably changes the behavior of, residential communities within their jurisdictions. Regional program activities to be funded include; materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and the development of marketing and research tools, including regional surveys to be conducted in FY 2008-09 and again in FY 2011-12. The co-permittees retained a consultant to perform these mandated activities in Fiscal Year 2007-08. The total cost of the contract is $131,250, which includes 5% ($6,250) for contract administration by the County. The budgeted cost of these mandated activities increased in FY 2008-09 to $262,500 and is expected to again double in FY 2009-10 to $525,000. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of San Marcos's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

c. Development of New/Revised Programs and Standards

1. Hydromodification Management Plan ("HMP") Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000, which includes 5% ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of San Marcos's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Sections D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500, which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of San Marcos's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

d. Long-Term Effectiveness Assessment ("LTEA"): In addition to annual assessments of the regional, jurisdictional and watershed programs, Section I.1 of the 2007 Permit requires the co-permittees to collaboratively develop a LTEA. Because

Document received by the CA 3rd District Court of Appeal.

of the complexity of the assessment requirements, the consultant costs to perform this assessment, which is expected to be completed in FY 2010-11, are expected to be $210,000, which includes 5% ($10,000) for contract administration by the County. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of San Marcos's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

e. Street Sweeping Costs: Section D.3.(5) of the 2007 Permit mandates specific street sweeping frequencies for improved roads, streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept monthly. Areas with low volumes of trash and/or debris must be swept at least annually. Prior to the 2001 permit, the City of San Marcos implemented a street sweeping program that exceeds the standards now required for the 2007 permit, therefore the City of San Marcos cannot quantify the expenses.

f. Conveyance System Cleaning: Section D.3.(a)(3) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be inspected annually, with high priority facilities being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, the City of San Marcos has increased staffing of its MS4 operations and maintenance program for FY 2007-08 by 1 staff year and will not need to increase staffing in FY 2008-09. The City of San Marcos's cost in FY 2007-08 for a Streets Maintenance Worker 1 is $50.00 per hour. The increase in the City of San Marcos's staffing cost to comply with this mandated activity in FY 2007-08 is $104,000.00 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of San Marcos's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

g. Educational Surveys and Tests: Section D.5 of the 2007 Permit requires each co-permittee to implement an educational program to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff or receiving waters, and potential Best Management Practices ("BMPs") for the target audiences; and (2) measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Sections I.1 and I.2 further require that the effectiveness of educational activities in meeting these standards be assessed annually where applicable and feasible. Compliance with these mandated activities requires the routine incorporation of testing and surveying methods into the program elements to ensure that implementation is resulting in the targeted outcomes. To comply with Section I-1 of the 2007 Permit, the City of San Marcos expects to expend 100 hours of staff time in FY 2007-08, and each year thereafter, to develop, administer and analyze surveys and tests. The City of San Marcos's cost in FY 2007-08 for coordinating with the North County Stormwater Coalition to jointly develop, administer, and analyze surveys and tests to comply with these mandated activities in FY 2007-08 is $2,700.00 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of San Marcos's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

h. Annual JURMP Assessment and Reporting Requirements: Section I.1 of the 2007 Permit specifies prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. Co-permittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality.

Document received by the CA 3rd District Court of Appeal.

Programmatic effectiveness assessment is a new emerging discipline and is expected to evolve over the term of the Permit. Annual costs are expected to include developing and updating standards and methods, database development and modification, and data tracking, analysis and report writing. To comply with Section I-1 the City of San Marcos will expend 125 hours of a Consulting Engineer's time in FY 2008-09, and each year thereafter. The City of San Marcos's cost in FY 2008-09 for a Stormwater Consulting Engineer to perform these mandated activities would be $130.00 per hour. The increase in the City of San Marcos's staffing cost to comply with these mandated activities in FY 2007-08 is $16,250.00 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of San Marcos's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

i. Watershed URMP

1.) Staffing for Development and Implementation: Section E.2.f. of the 2007 Permit requires watershed co-permittees to collaborate with other co-permittees within its watershed management areas to develop and implement an updated Watershed Urban Runoff Management Program for each watershed. It also requires watershed co-permittees to identify and implement watershed activities, and to implement at least two watershed quality activities and two watershed education activities for each permit year. Lead responsibility for watershed program implementation resides with the City's Stormwater Program Manager. This program consists of three part time staff (one Stormwater Program Manager, one Public Services Specialist and one Principal Planner) and one Stormwater Consulting Engineer. The FY 2007-08 costs are based on annualized projections for year-to-date expenditures. For FY 2008-09 and beyond, it is estimated that staff will spend 5% of their time on WURMP development and implementation. Calculations assume the following hourly rates for FY 2007-08; Stormwater Consulting Engineer - $130.00, Stormwater Program Manager -

Document received by the CA 3rd District Court of Appeal.

$68.00, Public Services Specialist - $71.00 and Principal Planner - $89.00. The increase in the City of San Marcos's staffing cost to comply with these mandated activities in FY 2007-08 is $37,232.00 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of San Marcos's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Cost-Sharing Agreements:

The City of San Marcos has entered into a cost sharing agreement to pay for consultant support relating to the Carlsbad WURMP. The consultant costs for FY 2007-08 are expected to be $3,314.00. Additional consultant services will be necessary in future years based on the development of cost sharing agreements for other WURMPs and an increasing need for coordination within each WURMP over the Permit cycle. The City of San Marcos's budgeted cost for this mandated activity for FY 2008-09 is $3,480.00. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. The City of San Marcos's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Implementation of Watershed Activities: Section E.2.f of the 2007 Permit requires Watershed co-permittees to implement at least two watershed quality activities and two watershed education activities for each permit year. The cost of implementing this mandate for FY 2007-08 is expected to be $10,000.00. Because of the wide range of potential costs for these activities, we anticipate that these costs will increase on average 20% per year. The City of San Marcos's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

9. The actual increased costs incurred by the City of San Marcos in FY 2007-08 to comply with the mandated activities required by the 2007 Permit will be $234,255.96 and are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

10. The estimated increased costs that the City of San Marcos expects to incur in FY 2008-09, are expected to be $249,386.82 and are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

11. The estimated increased costs that the City of San Marcos expects to incur during each year of the remaining term of the 2007 Permit are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

12. I am not aware of any dedicated state or federal funds that are or will be available to pay for these increased costs.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

14. I am not aware of any authority to assess a fee to offset these increased costs.

15. I believe that the only available source to pay these increased costs are and will be the city's general purpose funds.

Executed this 11th day of June 2008 at San Marcos, California.

I declare under penalty of perjury that the foregoing is true and correct.

Kenneth E. St. Clair, Declarant

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

Co-Permittee -

San Marcos

	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
Working Body Support	$0.00	$13,475.70	$13,139.49	$14,856.96	$15,599.80	Permit section L.1 requires that all Copermittees collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs and Watershed Urban Runoff Management Programs, and to plan and coordinate activities required under the Permit. Ten regional working bodies were established per the Copermittee's Jan. 2008 MOU to support the regional coordination of programs and activities required under the Permit. Working body costs represent consultant and/or Copermittee staff support for the Copermittee's Program Planning subcommittee and nine Regional Workgroups or Sub-Workgroups. FY 08-09 costs were established in the amount of $543,375 which includes $517,500 in support costs and an additional 5% ($25,875) for contract administration. FY 2008-09 costs were calculated at $125 per hour. A 5% total cost increase is also factored in each subsequent year.
Working Body Participation	$23,094.00	$25,097.00	$26,101.00	$27,145.00	$28,231.00	Copermittees must also maintain representation in, and participate in meetings of, each of the working bodies established under the MOU. The estimates presented here are County costs only. County participation costs are determined by multiplying the hourly rate of each staff person by the number of meetings each fiscal year, and assuming an average meeting length of three hours. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs for FY 08-09 and beyond are projected based on mimimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. Detailed calculations can be found in Worksheet B.

d by the CA 3rd District Court of Appeal.

Regional Residential Education Program Development and Implementation	$3,255.00	$6,510.00	$13,020.00	$13,671.00	$14,354.56	Permit section F.1 requires that the copermittees collaboratively develop and implement a Regional Residential Education Program. This is in addition to section D.5.a, which requires that each Copermittee provide education to measurably increase the knowledge of, and measurably change the behavior of residential communities within their jurisdiction. An FY 2007-08 budget for consultant support was initially established for this program in the amount of $131,250 ($125,000 for contract costs and $6,250 for contract administration). This figure was increased to $262,500 in FY 2008-09, and is expected to double again in FY 2009-10. Each subsequent year assumes a 5% increase. Regional program activities to be funded include: materials development / branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and marketing and research tools including the regional surveys to be conducted in FY 2008-09 and FY 2011-12.
Hydromodification Management Plan (HMP) Development	$33,108.96	$22,072.64	$0.00	$0.00	$0.00	Order R9-2007-0001 mandates the collaborative development of a Hydromodification Management Plan (HMP). This task was initiated by the Copermittees' consultant during FY 2007-08 and will be completed in FY 2008-09. The total cost of plan development is $1,050,000, $50,000 of which is for contract administration.
Low Impact Development (LID) and Standard Urban Stormwater Mitigation Plan (SUSMP)	$1,302.00	$0.00	$0.00	$0.00	$0.00	Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU.
Long-term Effectiveness Assessment (LTEA)	$0.00	$0.00	$0.00	$5,208.00	$0.00	In addition to requirements for Copermittees to annually assess their regional, jurisdictional and watershed programs, Permit section J.1 requires the collaborataive development of a Long-term Effectiveness Assessment (LTEA) that builds on the results of the August 2005 Baseline LTEA. The cost of the 2005 LTEA was $125,000. Because of the increased complexity of new assessment requirements, this consultant cost is expected to increase to $200,000, with an additional 5% ($10,000) for contract administration.
[illegible]						
4.0 Development Planning						Reimbursable costs are not projected for this component.
5.0 Construction						Reimbursable costs are not projected for this component.

d by the CA 3rd District Court of Appeal.

6.0 Municipal						
Street Sweeping (equipment costs)	$0.00	$0.00	$0.00	$0.00	$0.00	Permit Section D.3.(5) requires street sweeping frequencies for improved roads (possessing curbs and gutters), streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept at two times per month. Areas with medium volumes of trash and/or debris must be swept monthly and areas with low volumes of trash and/or debris at least annually. The COSM street sweeping program currently exceeds the requirements of both the old and the new permit by sweeping commercial areas weekly and residential areas every two weeks.
Street Sweeping (staffing costs)	$0.00	$0.00	$0.00	$0.00	$0.00	In response to Permit section D.3.(5), COSM staffing did not increase.
Street Sweeping (contract costs)	$0.00	$0.00	$0.00	$0.00	$0.00	In response to Permit section D.3.(5), COSM contracting costs did not increase.
Conveyance System Cleaning	$104,000.00	$108,160.00	$112,486.40	$116,985.86	$121,665.29	Permit section D.3.(3).(b) mandates that all MS4 facilities be inspected annually, with high priority facilitates being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, additional staffing impacts are projected. The COSM has increased its MS4 operations and maintenance program by diverting time out of its streets maintenance program by 1 staff year in Fy 2007-08. Costs are calculated at $50.00 per hour for a Maintenance Worker 1 and increased by 4% in each subsequent year.
7.0 Industrial and Commercial						Reimbursable costs are not projected for this component because new costs can be passed through to regulated parties.
9.0 Illicit Discharge Detection & Elimination Component (IDDEC)						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
10.0 Education						
Educational Surveys and Tests	$2,700.00	$2,808.00	$2,920.32	$3,037.13	$3,158.62	The Permit mandates an educational component that requires the implementation of educational programs to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff on receiving waters, and potential BMP solutions for the target audience; and (2) to measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Compliance with this standard requires the routine incorporation of testing and surveying methods into program elements to ensure that implementation is resulting in targeted outcomes. FY 07-08 COSM worked with the North County Stormwater Coalition to jointly develop, administer, and analyze surveys and tests. Costs are calculated at $2,700 and increased by 4% each year after FY 2007-08.
11.0 Public Participation						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.

d by the CA 3rd District Court of Appeal.

12.0 Fiscal Assessment						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
13.0 Effectiveness Assessment						
Annual JURMP Assessment and Reporting	$16,250.00	$17,062.50	$17,915.63	$18,811.41	$19,751.98	Permit section I.1 lays out prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. To the extent applicable and feasible, Copermittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a newly emerging discipline, and will continue to evolve over the entire Permit cycle. Annual costs typically include developing and updating standards and methods, database development and modification, and data tracking, analysis, and report writing. These responsibilities may be incurred across a number of program areas and staff, annual costs are calculated as 125 hours of time at the Stormwater Consulting Engineer ($130 per hour). These rates are increased by 5% in each subsequent year.
WURMP ACTIVITIES						
Staffing for Watershed URMP development and implementation	$37,232.00	$38,721.28	$40,270.13	$41,880.94	$43,556.17	This program consists of one consultant and three staff. FY 07-08 cost estimates are based on annualized projections from YTD expenditures. For FY 2008-09 and beyond, an estimated 5% of total staff time for these positions is spent on WURMP development and implementation. Calculations assume the following hourly rates for FY 2007-08; Stormwater Consulting Engineer - $130, Stormwater Program Manager - $68, Public Services Specilaist - $71 and Principal Planner - $89). These rates are increased by 4% in each subsequent year.
WURMP Cost-Share Agreements	$3,314.00	$3,479.70	$3,653.69	$3,836.37	$4,028.19	Cost share agreements are used to pay for WURMP consultant support. The FY 07-08 total is based on actual COSM contributions to the WURMP Cost Share Agreements in which it participates. Increases are estimated for future years based on requirements for increased coordination on WURMP issues in the new Permit. A 5% increase is also assumed for each year after FY 2008-09.
Implementation of Watershed Activities	$10,000.00	$12,000.00	$14,400.00	$17,280.00	$20,736.00	Permit section E.2.f requires Watershed Copermittees to implement at least two watershed water quality activities and two watershed education activities for each permit year. The COSM budgeted $10,000 for implementing WURMP activities in FY 07-08. Because of the wide range of potential costs for these activities, a 20% increase is assumed in each subsequent year.
TOTALS	**$234,255.96**	**$249,386.82**	**$244,916.65**	**$262,712.66**	**$271,081.61**

l by the CA 3rd District Court of Appeal.

EXHIBIT 6 "P" - DECLARATION OF GARY HALBERT FOR CITY OF SANTEE.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

DECLARATION OF GARY HALBERT IN SUPPORT OF TEST CLAIM

I, Gary Halbert, declare as follows:

1. I make this declaration based upon my own personal knowledge, except for matters set forth herein on information and belief, and as to those matters I believe them to be true, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. I have received some training in Storm Water Quality Best Management Practices and Low Impact Development design.

3. I am employed by the City of Santee as a Deputy City Manager/ Development Services Director.

4. I have held my current position for approximately two years. My duties include management of development services, planning and engineering. The Department of Development Services provides all development review, long range planning, traffic engineering, and CIP engineering and administration.

5. I have reviewed the California Regional Water Quality Control Board ("RWQCB"), San Diego Region, Order No. R9-2007-0001 (NPDES No. CAS 0108758) (the "2007 Permit") and I am familiar with the requirements of the Permit.

6. I have also reviewed and I am familiar with the requirements of Order No. 2001-01 (NPDES CAS0108758) issued by the San Diego RWQCB on February 21, 2001 (the "2001 Permit").

7. Based on my understanding of the requirements of the 2001 Permit and the requirements of the 2007 Permit, I believe the 2007 Permit requires the co-permittees to perform new activities that are unique to local governmental entities that are not required by the 2001 Permit.

Document received by the CA 3rd District Court of Appeal.

8. These new activities include the following:

a. Working Body

1.) Support: Section L.1 of the 2007 Permit requires all co-permittees to collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding ("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,000 in support costs and an additional 5% ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Santee's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2.) Participation: Section L.1.a of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban runoff programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU establishes minimum levels of representation and participation in working body meetings required to meet these directives. The City of Santee's participation costs were determined by multiplying the hourly rate of each staff person involved in these activities by anticipated minimum number of meetings for each

Document received by the CA 3rd District Court of Appeal.

working body for each fiscal year and assumed that on average each staff member would spend three hours preparing for and attending each meeting. The cost to the City of Santee to comply with this mandated activity for FY 2007-08 is $17,701. Costs for FY 08-09 and beyond are projected based on minimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. The City of Santee's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

b. Regional Residential Education Program Development and Implementation: Section F.1 of the 2007 Permit requires the co-permittees to collaboratively develop and implement a Regional Residential Education Program. This is in addition to Section D.5.a, which requires each co-permittee to develop and implement an education program that measurably increases the knowledge of, and measurably changes the behavior of, residential communities within their jurisdictions. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and the development of marketing and research tools, including regional surveys to be conducted in FY 2008-09 and again in FY 2011-12. The co-permittees retained a consultant to perform these mandated activities in Fiscal Year 2007-08. The total cost of the contract is $131,250 which includes 5% ($6,250) for contract administration by the County. The budgeted cost of these mandated activities increased in FY 2008-09 to $262,500 and is expected to again double in FY 2009-10 to $525,000. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Santee's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

c. Development of New/Revised Programs and Standards

1. Hydromodification Management Plan ("HMP") Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000 which includes 5% ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Santee's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Santee's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

d. Long-Term Effectiveness Assessment ("LTEA"): In addition to annual assessments of the regional, jurisdictional and watershed programs, Section I.1 of the 2007 Permit requires the co-permittees to collaboratively develop a LTEA. Because

Document received by the CA 3rd District Court of Appeal.

of the complexity of the assessment requirements, the consultant costs to perform this assessment, which is expected to be completed in FY 2010-11, are expected to be $210,000, which includes 5% ($10,000) for contract administration by the County. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Santee's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

e. Street Sweeping: Section D3(5) of the 2007 Permit mandates specific street sweeping frequencies for improved roads, streets, highways, and parking facilities. The cost impact to the City of Santee cannot be quantified at this time.

f. Conveyance System Cleaning: Section D.3.(3).(b) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be inspected annually, with high priority facilities being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, the City of Santee has increased staffing of its MS4 operations and maintenance program for FY 2007-08 by 0.42 staff years and will need to increase contractual services in FY 2008-09. The City of Santee's cost in FY 2007-08 for an Equipment Operator is $52.40 per hour. The increase in the City of Santee's staffing and equipment operations cost to comply with this mandated activity in FY 2007-08 is $98,360 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Santee's additional increase in contractual services and related costs in FY 08-09 is estimated to be $185,770 and is expected to increase 4% in FY 2009-10 and each year thereafter. The City of Santee's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

g. Educational Surveys and Tests: Section D.5 of the 2007 Permit requires each co-permittee to implement an educational program to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff or receiving waters, and potential Best Management Practices ("BMPs") for the target audiences; and (2) measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Sections I.1 and I.2 further require that the effectiveness of educational activities in meeting these standards be assessed annually where applicable and feasible. Compliance with these mandated activities requires the routine incorporation of testing and surveying methods into the program elements to ensure that implementation is resulting in the targeted outcomes. To comply with Section D.5 the City of Santee expects to expend 288 hours of staff time in FY 2008-09, and each year thereafter, to develop, administer and analyze surveys and tests. The City of Santee's cost in FY 2008-09 for a Stormwater Program Manager to perform this work is $91.37 per hour. The increase in the City of Santee's staffing cost to comply with these mandated activities in FY 2008-09 is $26,259 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Santee's actual and estimated costs for complying with these mandated activities for FY 2008-09 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

h. Annual JURMP Assessment and Reporting Requirements: Section I.1 of the 2007 Permit specifies prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. Co-permittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality.

Document received by the CA 3rd District Court of Appeal.

Programmatic effectiveness assessment is a new emerging discipline and is expected to evolve over the term of the Permit. Annual costs are expected to include developing and updating standards and methods, database development and modification, and data tracking, analysis and report writing. To comply with Section I.1 the City of Santee will expend 584 hours of staff time in FY 2008-09, and each year thereafter. The City of Santee's cost in FY 2008-09 for a Stormwater Program Manager to perform these mandated activities will be $87.67 per hour. The increase in the City of Santee's staffing cost to comply with these mandated activities in FY 2007-08 is $51,220 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Santee's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

l. Watershed URMP

1.) Staffing for Development and Implementation: Section E.2 of the 2007 Permit requires Copermittees to update their Watershed Urban Runoff Management Program. The City of Santee is located in the San Diego River Watershed. Lead responsibility for the San Diego River watershed program implementation resides with the City of El Cajon. The increase in the City of Santee's staffing cost to comply with these mandated activities in FY 2007-08 is $4408 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Santee's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Cost-Sharing Agreements:

The City of Santee has entered into one cost sharing agreement to pay for consultant support relating to the **San Diego River** WURMP. The consultant costs for FY 2007-08 are expected to be $2,437. Additional consultant services will be necessary in future

Document received by the CA 3rd District Court of Appeal.

years based on the development of cost sharing agreements for other WURMPs and an increasing need for coordination within each WURMP over the Permit cycle. The City of Santee's budgeted cost for this mandated activity for FY 2008-09 is $4,874. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. The City of Santee's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Implementation of Watershed Activities: Section E.2.f of the 2007 Permit requires Watershed co-permittees to implement at least two watershed quality activities and two watershed education activities for each permit year. The cost of implementing this mandate for FY 2007-08 is expected to be $4,408. Because of the wide range of potential costs for these activities, we anticipate that these costs will double during FY2008-09 and increase on average 5% per year thereafter. The City of Santee's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

9. The actual increased costs incurred by the City of Santee in FY 2007-08 to comply with the mandated activities required by the 2007 Permit will be $146,380, and are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

10. The estimated costs that the City of Santee expects to incur in FY 2008-09, are expected to be $139,564, and are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

11. The estimated costs that the City of Santee expects to incur during each year of the remaining term of the 2007 Permit are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

12. I am not aware of any dedicated state or federal funds that are or will be available to pay for these increased costs.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

14. I am not aware of any authority to assess a fee to offset these increased costs.

15. I believe that the only available source to pay these increased costs are and will be the City of Santee's general purpose funds.

Executed this 12TH day of June 2008 at Santee, California.

I declare under penalty of perjury that the foregoing is true and correct.

Gary Halbert

d by the CA 3rd District Court of Appeal.

EXHIBIT 6 "Q" - DECLARATION OF DENNIS M. COLEMAN FOR CITY OF SOLANA BEACH.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

DECLARATION OF DENNIS M. COLEMAN ON BEHALF OF THE CITY OF SOLANA BEACH IN SUPPORT OF TEST CLAIM

I, Dennis M. Coleman, declare as follows:

1. I make this declaration based upon my own personal knowledge, except for matters set forth herein on information and belief, and as to those matters I believe them to be true, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. I am a municipal finance professional of 26 years with a B.S. in Business Administration.

3. I am employed by the City of Solana Beach as the Finance Director/Treasurer.

4. I have held my current position for approximately 3 years. My duties include Finance, Accounting, and Risk Management.

5. I have reviewed the California Regional Water Quality Control Board ("RWQCB"), San Diego Region, Order No. R9-2007-0001 (NPDES No. CAS 0108758) (the "2007 Permit") and I am familiar with the requirements of the Permit.

6. I have also reviewed and I am familiar with the requirements of Order No. 2001-01 (NPDES CAS0108758) issued by the San Diego RWQCB on February 21, 2001 (the "2001 Permit").

7. Based on my understanding of the requirements of the 2001 Permit and the requirements of the 2007 Permit, I believe the 2007 Permit requires the co-permittees to perform new activities that are unique to local governmental entities that are not required by the 2001 Permit.

Document received by the CA 3rd District Court of Appeal.

8. These new activities include the following:

a. Working Body

1.) Support: Sections F and L.1 of the 2007 Permit requires all co-permittees to collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding ("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,000 in support costs and an additional 5% ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2.) Participation: Section L.1 of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban runoff programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU establishes minimum levels of representation and participation in working body meetings required to meet these directives. The City's participation costs were

Document received by the CA 3rd District Court of Appeal.

determined by multiplying the hourly rate of each staff person involved in these activities by anticipated minimum number of meetings for each working body for each fiscal year and assumed that on average each staff member would spend 4 hours preparing for and attending each meeting. The cost to the City to comply with this mandated activity for FY 2007-08 is $5,786. Costs for FY 08-09 and beyond are projected based on minimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. The City's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

b. Regional Residential Education Program Development and Implementation: Section F.1 of the 2007 Permit requires the co-permittees to collaboratively develop and implement a Regional Residential Education Program. This is in addition to Section D.5.a, which requires each co-permittee to develop and implement an education program that measurably increases the knowledge of, and measurably changes the behavior of, residential communities within their jurisdictions. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and the development of marketing and research tools, including regional surveys to be conducted in FY 2008-09 and again in FY 2011-12. The co-permittees retained a consultant to perform these mandated activities in Fiscal Year 2007-08. The total cost of the contract is $131,250 which includes 5% ($6,250) for contract administration by the County. The budgeted cost of these mandated activities increased in FY 2008-09 to $262,500 and is expected to again double in FY 2009-10 to $525,000. Each co-permittee's share of these mandated costs is based on a formula set forth in the

Document received by the CA 3rd District Court of Appeal.

MOU. The City's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

c. Development of New/Revised Programs and Standards

1. Hydromodification Management Plan ("HMP") Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000 which includes 5% ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Sections D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City's proportional share of the budgeted costs for complying with these mandated

Document received by the CA 3rd District Court of Appeal.

activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

d. Long-Term Effectiveness Assessment ("LTEA"): In addition to annual assessments of the regional, jurisdictional and watershed programs, Section I.1 of the 2007 Permit requires the co-permittees to collaboratively develop a LTEA. Because of the complexity of the assessment requirements, the consultant costs to perform this assessment, which is expected to be completed in FY 2010-11, are expected to be $210,000, which includes 5% ($10,000) for contract administration by the County. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

e. Street Sweeping

1.) Equipment Costs: Section D.3.(5) of the 2007 Permit mandates specific street sweeping frequencies for improved roads, streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept monthly. Areas with low volumes of trash and/or debris must be swept at least annually. The City used average daily traffic ("ADT") statistics to determine the volume of trash and/or debris that could reasonably be expected to be generated. Improved roads, streets and highways that have more than 20,000 vehicles per day are in the "High" volume of trash and/or debris category. Improved roads, streets and highways that have 15,000 to 20,000 vehicles per day are in the "Medium" volume of trash and/or debris category. Improved roads, streets and highways that have less than 15,000 vehicles per day are in the "Low" volume of trash and/or debris category. The City has 46 miles of improved roads, streets and highways. Based on these

Document received by the CA 3rd District Court of Appeal.

standards, 7% of the City's improved roads, streets and highways are in the "High" category, 6% in the "Medium" category and 87% in the "Low" category. Based on this analysis it was determined that there will be an 8% increase in the street sweeping activities as a result of the 2007 Permit. To accommodate the required increase, the City has not been required to purchase new street sweeping vehicles and will not have to employ additional employees. The City's actual and estimated equipment costs for complying with this mandated activity for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Staffing Costs: In response to Section D.3.(5) the City has not increased its staffing for FY 2007-08 and will not increase staffing in FY 2008-09. The City's cost in FY 2007-08 for an Environmental Programs Manager is $48.22 per hour. The increase in the City's staffing cost to comply with this mandated activity in FY 2007-08 is $2,315 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City's actual and estimated equipment costs for complying with this mandated activity for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Contract Costs: The City of Solana Beach contracts with a private company to provide street sweeping services. The total cost of this contract to the City is $40,800. The amount of street sweeping required by the 2007 Permit has not increased the cost of this contract to the city. The increased contract costs for FY 2007-08 and estimated increased contract costs for future years are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

f. Conveyance System Cleaning: Section D.3.(a)(3) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be

Document received by the CA 3rd District Court of Appeal.

inspected annually, with high priority facilities being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, the City has increased staffing of its MS4 operations and maintenance program for FY 2007-08 by .023 staff years and will not need to increase staffing in FY 2008-09. City's cost in FY 2007-08 for a Lead Maintenance Worker is $36.81 per hour. The increase in the City's staffing cost to comply with this mandated activity in FY 2007-08 is $1,767 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

g. Educational Surveys and Tests: Section D.5 of the 2007 Permit requires each co-permittee to implement an educational program to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff or receiving waters, and potential Best Management Practices ("BMPs") for the target audiences; and (2) measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Sections I.1 and I.2 further require that the effectiveness of educational activities in meeting these standards be assessed annually where applicable and feasible. Compliance with these mandated activities requires the routine incorporation of testing and surveying methods into the program elements to ensure that implementation is resulting in the targeted outcomes. To comply with this Section, the City expects to expend 108 hours of staff time in FY 2008-09, and each year thereafter, to develop, administer and analyze surveys and tests. The City's cost in FY 2008-09 for an Environmental Programs Manager to perform this work is $48.22 per hour. The increase in the City's staffing cost to comply with these mandated activities in FY 2008-09 is $5,208 and is expected to

Document received by the CA 3rd District Court of Appeal.

increase 4% in FY 2008-09 and each year thereafter. The City's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

h. Annual JURMP Assessment and Reporting Requirements: Section I.1 of the 2007 Permit specifies prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented each major JURMP component, and the JURMP as a whole. Co-permittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a new emerging discipline and is expected to evolve over the term of the Permit. Annual costs are expected to include developing and updating standards and methods, database development and modification, and data tracking, analysis and report writing. To comply with this Section, the City will expend 160 hours of staff time in FY 2008-09, and each year thereafter. The City's cost in FY 2008-09 for an Environmental Programs Manager to perform these mandated activities will be $48.22 per hour. The increase in the City's staffing cost to comply with these mandated activities in FY 2008-09 is $7,715 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City's actual and estimated costs for complying with these mandated activities for FY 2008-09 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

1. Watershed URMP

1.) Staffing for Development and Implementation:

Section E of the 2007 Permit requires that each co-permittee shall collaborate with other co-permittees to develop and implement an updated Watershed URMP for each watershed. Lead responsibility for watershed program implementation resides with the County's Department of Planning and Land Use Watershed Planning Division. This program consists of five staff (one Planning manager, two Planner IIIs and two Planner I/IIs). The FY 2007-08 costs are based on annualized projections for year-to-date expenditures. For FY 2008-09 and beyond, it is estimated that staff will spend 70% of their time on WURMP development and implementation. Calculations are based on the following hourly rates for FY 2007-08: Planning Manager - $115; Planner III - $97; and Planner I/II - $81. The increase in the City's staffing cost to comply with these mandated activities in FY 2007-08 is $10,416 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Cost-Sharing Agreements:

The City has entered into a cost sharing agreement(s) to pay for consultant support relating to the Carlsbad, San Diego River, San Dieguito River, Penasquitos, San Luis Rey, San Diego Bay, and Tijuana WURMPs. The consultant costs for FY 2007-08 are expected to be $12,000. Additional consultant services will be necessary in future years based on the development of cost sharing agreements for other WURMPs and an increasing need for coordination within each WURMP over the Permit cycle. The City's budgeted cost for this mandated activity for FY 2008-09 is $12,600. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. The City's actual and estimated costs for

Document received by the CA 3rd District Court of Appeal.

complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Implementation of Watershed Activities: Section E.2.f of the 2007 Permit requires Watershed co-permittees to implement at least two watershed quality activities and two watershed education activities for each permit year. The cost of implementing this mandate for FY 2007-08 is expected to be $40,000. Because of the wide range of potential costs for these activities, we anticipate that these costs will increase on average 20% per year. The City's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

9. The actual increased costs incurred by the City in FY 2007-08 to comply with the mandated activities required by the 2007 Permit will be $38,474.16, and are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

10. The estimated increased costs that the City expects to incur in FY 2008-09, are expected to be $52,426.04, and are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

11. The estimated increased costs that the City expects to incur during each year of the remaining term of the 2007 Permit are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

12. I am not aware of any dedicated state or federal funds that are or will be available to pay for these increased costs.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

Document received by the CA 3rd District Court of Appeal.

14. The City has a stormwater fee to offset a portion of the costs of the program.

15. I believe that the only other available source to pay these increased costs are and will be the city's general purpose funds.

Executed this 11th day of June, 2008 at Solana Beach, California.

I declare under penalty of perjury that the foregoing is true and correct.

Dennis M. Coleman
Finance Director

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
Working Body Support	$0.00	$4,455.68	$4,678.46	$4,912.38	$5,158.00	Permit section L.1 requires that all Copermittees collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs and Watershed Urban Runoff Management Programs, and to plan and coordinate activities required under the Permit. Ten regional working bodies were established per the Copermittee's Jan. 2008 MOU to support the regional coordination of programs and activities required under the Permit. Working body costs represent consultant and/or Copermittee staff support for the Copermittee's Program Planning subcommittee and nine Regional Workgroups or Sub-workgroups. FY 08-09 costs were established in the amount of $543,375 which includes $517,500 in support costs and an additional 5% ($25,875) for contract administration. FY 2008-09 costs were calculated at $125 per hour. A 5% total cost increase is also factored in each subsequent year.
Working Body Participation	$5,786.00	$6,017.44	$6,258.14	$6,508.46	$6,768.80	Copermittees must also maintain representation in, and participate in meetings of, each of the working bodies established under the MOU. The estimates presented here are City of Solana Beach costs only. City participation costs are determined by multiplying the hourly rate of each staff person by the number of meetings each fiscal year, and assuming an average meeting length of three hours. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs for FY 08-09 and beyond are projected based on mimimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. Detailed calculations can be found in Worksheet B.
Regional Residential Education Program Development and Implementation	$1,076.25	$2,152.50	$4,305.00	$4,520.25	$4,746.27	Permit section F.1 requires that the Copermittees collaboratively develop and implement a Regional Residential Education Program. This is in addition to section D.5.a, which requires that each Copermittee provide education to, measurably increase the knowledge of, and measurably change the behavior of, residential communities within their jurisdiction. An FY 2007-08 budget for consultant support was initially established for this program in the amount of $131,250 ($125,000 for contract costs and $6,250 for contract administration). This figure was increased to $262,500 in FY 2008-09, and is expected to double again in FY 2009-10. Each subsequent year assumes a 5% increase. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and marketing and research tools including the regional surveys to be conducted in FY 2008-09 and FY 2011-12.
Hydromodification Management Plan (HMP) Development	$3,684.45	$2,456.30	$0.00	$0.00	$0.00	Order R9-2007-0001 mandates the collaborative development of a Hydromodification Management Plan (HMP). This task was initiated by the Copermittees' consultant during FY 2007-08 and will be completed in FY 2008-09. The total cost of plan development is $1,050,000, $50,000 of which is for contract administration.
Low Impact Development (LID) and Standard Urban Stormwater Mitigation Plan (SUSMP)	$430.50	$0.00	$0.00	$0.00	$0.00	Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU.
Long Term Effectiveness Assessment (LTEA)	$0.00	$0.00	$0.00	$1,722.00	$0.00	In addition to requirements for Copermittees to annually assess their regional, jurisdictional and watershed programs, Permit section L.1 requires the collaborative development of a Long-term Effectiveness Assessment (LTEA) that builds on the results of the August 2005 Baseline LTEA. The cost of the 2005 LTEA was $125,000. Because of the increased complexity of new assessment requirements, this consultant cost is expected to increase to $200,000, with an additional 5% ($10,000) for contract administration.

Filed by the CA 3rd District Court of Appeal.

City of Solana Beach Unfunded Mandate Costs

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
[redacted]						
4.0 Development Planning						Reimbursable costs are not projected for this component.
5.0 Construction						Reimbursable costs are not projected for this component.
6.0 Municipal						
Street Sweeping (equipment costs)	$0.00	$0.00	$0.00	$0.00	$0.00	Permit Section D.3.(5) requires street sweeping frequencies for improved roads (possessing curbs and gutters), streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept at two times per month. Areas with medium volumes of trash and/or debris must be swept monthly and areas with low volumes of trash and/or debris at least annually.
Street Sweeping (staffing costs)	$2,314.56	$2,407.14	$2,503.43	$2,603.57	$2,707.71	The City contracts the street sweeping but there are administration costs for the City, which include reviewing the GPS forms ensuring sweeping was in fact done in the appropriate areas and monitoring the debris removal and proper disposal (including volume). Costs are calculated at $48.22 per hour for Environmental Programs Manager (48 total hrs)
Street Sweeping (contract costs)	$0.00	$0.00	$0.00	$0.00	$0.00	Contract costs are estimated to increase by approximately 4% annually.
Conveyance System Cleaning	$1,766.88	$1,837.56	$1,911.06	$1,987.50	$2,067.00	Permit section D.3.(3).(b) mandates that all MS4 facilities be inspected annually, with high priority facilitates being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, additional staffing impacts are projected. The City utilizes the Public Department for the MS4 operations and maintenance program. Costs are calculated at $36.81 per hour for Lead Maintenance Worker at 48 hours, and are increased by 4% in each subsequent year.
7.0 Industrial and Commercial						
Industrial and Commercial Inspections	$0.00	$0.00	$0.00	$0.00	$0.00	Permit section D.3.b(3) madates that each Copermittee conduct industrial and commercial site inspections for compliance with ordinances, permits and the Order. The cost is based on the average number of facilities inspected annually (110), personnel time ($32.71), average hours per inspection (1 hour), and are increased by 4% in each subsequent year. The City does not recoup any of this cost utilizing inspection fees
9.0 Illicit Discharge Detection & Elimination Component (IDDEC)						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.

Filed by the CA 3rd District Court of Appeal.

City of Solana Beach ''`funded Mandate Costs

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
10.0 Education						
Educational Surveys and Tests	$0.00	$5,207.76	$5,416.07	$5,632.71	$5,858.02	The Permit mandates an educational component that requires the implementation of educational programs to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff on receiving waters, and potential BMP solutions for the target audience; and (2) to measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Compliance with this standard requires the routine incorporation of testing and surveying methods into program elements to ensure that implementation is resulting in targeted outcomes. FY 07-08 staffing impacts are estimated at one day per month (108 hours per year) to develop, administer, and analyze surveys and tests. Costs are calculated at the Environmental Program Manager level ($48.22/hr), and increased by 4% each year after FY 2008-09.
11.0 Public Participation						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
12.0 Fiscal Assessment						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
13.0 Effectiveness Assessment						
Annual JURMP Assessment and Reporting	$0.00	$7,715.20	$8,023.81	$8,344.76		Permit section I.1 lays out prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. To the extent applicable and feasible, Copermittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a newly emerging discipline, and will continue to evolve over the entire Permit cycle. Annual costs typically include developing and updating standards and methods, database development and modification, and data tracking, analysis, and report writing. Annual costs are calculated as 160 hours of time per year at the Environmental Program Manager level ($48.22/ hour), and increased by 4% each year after FY 2008-09.
WATERSHED ACTIVITIES						
Staffing for Watershed URMP development and implementation	$10,415.52	$10,832.14	$11,265.43	$11,716.04	$12,184.69	Lead responsibility for watershed program implementation resides with the County of San Diego DPLU Watershed Planning Division. The City of Solana Beach participates in meetings to support Watershed URMP development and implementation for two separate watersheds. Development and implementation costs are estimated at 216 hours of the Environmental Programs Manager. These rates are increased by 4% in each subsequent year.
WURMP Cost-Share Agreements	$12,000.00	$12,600.00	$13,230.00	$13,891.50	$14,586.08	The City of Solana Beach is currently involved in two watershed groups cost share agreements. The total cost is $12,000 per year total. A 5% increase is also assumed for each year after FY 2008-09.
Implementation of Watershed Activities	$1,000.00	$1,200.00	$1,440.00	$1,728.00	$2,073.60	Permit section E.2.f requires Watershed Copermittees to implement at least two watershed water quality activities and two watershed education activities for each permit year. The City budgeted $1,000 the first year and assumed a 20% increase in each subsequent year.
TOTALS	$38,474.16	$52,426.04	$59,031.39	$58,654.80	$50,992.16

Document received by the CA 3rd District Court of Appeal.

DECLARATION OF DANIS BECHTER ON BEHALF OF THE CITY OF POWAY IN SUPPORT OF TEST CLAIM

I, Danis Bechter, declare as follows:

1. I make this declaration based upon information and belief, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. I have expertise in storm water pollution prevention obtained through attendance at a variety of storm water seminars and educational programs.

3. I am employed by the City of Poway as an Engineering Inspection Supervisor/NPDES Coordinator.

4. I have held the position of NPDES Coordinator for approximately 6 years. My duties include coordination of the City's storm water pollution prevention program, as well as direct oversight of the Engineering Inspectors.

5. I have read the California Regional Water Quality Control Board ("RWQCB"), San Diego Region, Order No. R9-2007-0001 (NPDES No. CAS 0108758) (the "2007 Permit") and I am familiar with the requirements of the Permit.

6. I have also read and I am familiar with the requirements of Order No. 2001-01 (NPDES CAS0108758) issued by the San Diego RWQCB on February 21, 2001 (the "2001 Permit").

7. Based on my understanding of the requirements of the 2001 Permit and the requirements of the 2007 Permit, I believe the 2007 Permit requires the co-permittees to perform new activities that are unique to local governmental entities that are not required by the 2001 Permit.

8. These new activities include the following:

a. Working Body

1.) Support: Sections F and L.1 of the 2007 Permit require all co-permittees to collaborate to address common issues, promote consistency among

Document received by the CA 3rd District Court of Appeal.

Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding ("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,000 in support costs and an additional 5% ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Poway's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2.) Participation: Section L.1.a of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban runoff programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU establishes minimum levels of representation and participation in working body meetings required to meet these directives. The City's participation costs were determined by multiplying the hourly rate of each staff person involved in these activities by anticipated minimum number of meetings for each working body for each fiscal year and assumed that on average each staff member would spend 3 hours preparing for and attending each meeting. The cost to the City to comply with this mandated activity for FY 2007-08 is $8,097. Costs for FY 08-09 and beyond are projected based on minimum mandated meeting frequencies for each working body,

Document received by the CA 3rd District Court of Appeal.

but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. The City's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

b. Regional Residential Education Program Development and Implementation: Section F.1 of the 2007 Permit requires the co-permittees to collaboratively develop and implement a Regional Residential Education Program. This is in addition to Section D.5.a, which requires each co-permittee to develop and implement an education program that measurably increases the knowledge of, and measurably changes the behavior of, residential communities within their jurisdictions. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and the development of marketing and research tools, including regional surveys to be conducted in FY 2008-09 and again in FY 2011-12. The co-permittees retained a consultant to perform these mandated activities in Fiscal Year 2007-08. The total cost of the contract is $131,250 which includes 5% ($6,250) for contract administration by the County. The budgeted cost of these mandated activities increased in FY 2008-09 to $262,500 and is expected to again double in FY 2009-10 to $525,000. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

c. Development of New/Revised Programs and Standards

1. Hydromodification Management Plan ("HMP") Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was

Document received by the CA 3rd District Court of Appeal.

initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000 which includes 5% ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Sections D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

d. Long-Term Effectiveness Assessment ("LTEA"): In addition to annual assessments of the regional, jurisdictional and watershed programs, Section I.1 of the 2007 Permit requires the co-permittees to collaboratively develop a LTEA. Because of the complexity of the assessment requirements, the consultant costs to perform this assessment, which is expected to be completed in FY 2010-11, are expected to be $210,000, which includes 5% ($10,500) for contract administration by the County. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU.

Document received by the CA 3rd District Court of Appeal.

The City's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

e. Street Sweeping

1.) Equipment Costs: Section D.3.(5) of the 2007 Permit mandates specific street sweeping frequencies for improved roads, streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept monthly. Areas with low volumes of trash and/or debris must be swept at least annually. The City of Poway has a street sweeping agreement with a private contractor that has been performing at the level of permit requirements prior to adoption. Equipment and fuel costs have been incorporated into the agreement costs.

2.) Staffing Costs: In response to Section D.3.(5) all staffing is provided by private contractor under a street sweeping agreement.

3.) Contract Costs: The City of Poway contracts with a private company to provide street sweeping services. The total cost of this contract to the City is $ 221,092. The City of Poway street sweeping program already was performing at a level of permit requirements prior to adoption. No additional costs related to the new Permit requirements are anticipated.

f. Conveyance System Cleaning: Section D.3.(a).(3) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be inspected annually, with high priority facilities being inspected between May and September. The City has been cleaning inspected facilities in accordance with specific Permit requirements prior to adoption. No additional costs related to the new Permit requirements are anticipated.

g. Educational Surveys and Tests: No additional costs are estimated for this program element.

Document received by the CA 3rd District Court of Appeal.

h. Annual JURMP Assessment and Reporting Requirements: Section I.1 of the 2007 Permit specifies prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. Co-permittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a new emerging discipline and is expected to evolve over the term of the Permit. Annual costs are expected to include developing and updating standards and methods, database development and modification, and data tracking, analysis and report writing. To comply with this Section, the City will expend 520 hours of staff time in FY 2008-09, and each year thereafter, as well as approximately $10,000 in consultant costs. The City's cost in FY 2008-09 for staff to perform these mandated activities will be $37,303, and is expected to increase 4% in FY 2008-09 and each year thereafter. The City's estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

i. Watershed URMP

1.) Staffing for Development and Implementation: Section E.2 of the 2007 Permit requires each co-permittee to develop and implement an updated Watershed Urban Runoff Management Program. This program consists of two staff (Operations Manager and one Management Analyst). The FY 2007-08 costs are based on annualized projections for year-to-date expenditures. For FY 2008-09 and beyond, it is estimated that staff will spend 25% of their time on WURMP development and implementation. Calculations are based on the following hourly rates for FY 2007-08:

Document received by the CA 3rd District Court of Appeal.

Operations Manager - $70; Management Analyst - $57. This is expected to increase 3% in FY 2008-09 and each year thereafter.

2.) Cost-Sharing Agreements: The City of Poway has entered into 2 cost-sharing agreements to pay for consultant support relating to the Los Penasquitos and San Dieguito WURMPs. The total consultant costs in both the Cost-Sharing Agreements for FY 2007-08 are expected to be $57,900. Additional consultant services will be necessary in future years based on the development of cost-sharing agreements for other WURMPs and an increasing need for coordination within each WURMP over the Permit cycle. The City of Poway's budgeted cost for this mandated activity for FY 2008-09 is $4,900. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. The City of Poway's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Implementation of Watershed Activities: Section E.2.f of the 2007 Permit requires Watershed co-permittees to implement at least two watershed quality activities and two watershed education activities for each permit year. The cost of implementing this mandate for FY 2007-08 is expected to be $40,000. Because of the wide range of potential costs for these activities, we anticipate that these costs will increase on average 20% per year. The City's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

9. The estimated increased costs incurred by the City in FY 2007-08 to comply with the mandated activities required by the 2007 Permit will be $94,868, as detailed in Exhibit A to this declaration and incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

10. The estimated increased costs that the City expects to incur in FY 2008-09 are $157,945 and are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

11. The estimated increased costs that the City expects to incur during each year of the remaining term of the 2007 Permit are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

12. I am not aware of any dedicated state or federal funds that are or will be available to pay for these increased costs.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

14. The City has a storm water fee to offset a portion of the costs of the program.

15. I believe that the only other available source to pay these increased costs is and will be the City's general purpose funds.

Executed this 18th day of June, 2008, at Poway, California.

I declare under penalty of perjury that the foregoing is true and correct.

Danis R Bechter

Danis Bechter

Engineering Inspection Supervisor/NPDES Coordinator

Document received by the CA 3rd District Court of Appeal.

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
[illegible]						
Working Body Support	$0.00	$13,964.74	$14,662.98	$15,396.12	$16,165.92	Permit section L.1 requires that all Copermittees collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs and Watershed Urban Runoff Management Programs, and to plan and coordinate activities required under the Permit. Ten regional working bodies were established per the Copermittee's Jan. 2008 MOU to support the regional coordination of programs and activities required under the Permit. Working body costs represent consultant and/or Copermittee staff support for the Copermittee's Program Planning subcommittee and nine Regional Workgroups or Sub-workgroups. FY 08-09 costs were established in the amount of $543,375 which includes $517,500 in support costs and an additional 5% ($25,875) for contract administration. FY 2008-09 costs were calculated at $125 per hour. A 5% total cost increase is also factored in each subsequent year.
Working Body Participation	$8,097.00	$14,650.00	$13,128.00	$13,653.00	$14,199.00	Copermittees must also maintain representation in, and participate in meetings of, each of the working bodies established under the MOU. The estimates presented here are County costs only. County participation costs are determined by multiplying the hourly rate of each staff person by the number of meetings each fiscal year, and assuming an average meeting length of three hours. FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs for FY 08-09 and beyond are projected based on mimimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07 08. Detailed calculations can be found in Worksheet B.

d by the CA 3rd District Court of Appeal.

Regional Residential Education Program Development and Implementation	$3,373.13	$6,746.25	$13,492.50	$14,167.13	$14,875.49	Permit section F.1 requires that the Copermittees collaboratively develop and implement a Regional Residential Education Program. This is in addition to section D.5.a, which requires that each Copermittee provide education to, measurably increase the knowledge of, and measurably change the behavior of, residential communities within their jurisdiction. An FY 2007-08 budget for consultant support was initially established for this program in the amount of $131,250 ($125,000 for contract costs and $6,250 for contract administration). This figure was increased to $262,500 in FY 2008-09, and is expected to double again in FY 2009-10. Each subsequent year assumes a 5% increase. Regional program activities to be funded include: materials development / branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and marketing and research tools including the regional surveys to be conducted in FY 2008-09 and FY 2011-12.
Hydromodification Management Plan (HMP) Development	$9,498.91	$6,332.61	$0.00	$0.00	$0.00	Order R9-2007-0001 mandates the collaborative development of a Hydromodification Management Plan (HMP). This task was initiated by the Copermittees' consultant during FY 2007-08 and will be completed in FY 2008-09. The total cost of plan development is $1,050,000, $50,000 of which is for contract administration.
Low Impact Development (LID) and Standard Urban Stormwater Mitigation Plan (SUSMP)	$1,349.25	$0.00	$0.00	$0.00	$0.00	Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU.
Long-term Effectiveness Assessment (LTEA)	$0.00	$0.00	$0.00	$5,397.00	$0.00	In addition to requirements for Copermittees to annually assess their regional, jurisdictional and watershed programs, Permit section J.1 requires the collaborative development of a Long-term Effectiveness Assessment (LTEA) that builds on the results of the August 2005 Baseline LTEA. The cost of the 2005 LTEA was $125,000. Because of the increased complexity of new assessment requirements, this consultant cost is expected to increase to $200,000, with an additional 5% ($10,000) for contract administration.
JURISDICTIONAL GRAD / ACTIVITIES						
4.0 Development Planning						Reimbursable costs are not projected for this component.
5.0 Construction						Reimbursable costs are not projected for this component.

d by the CA 3rd District Court of Appeal.

6.0 Municipal						
Street Sweeping (equipment costs)	$0.00	$0.00	$0.00	$0.00	$0.00	The City has an agreement with a private company to provide street sweeping services. The service level already met the requirements of the Permit prior to adoption. Equipment and fuel costs are included in the agreement.
Street Sweeping (staffing costs)	$0.00	$0.00	$0.00	$0.00	$0.00	The City has an agreement with a private company to provide street sweeping services. The service level already met the requirements of the Permit prior to adoption. Staffing costs are included in the agreement.
Street Sweeping (contract costs)	$0.00	$0.00	$0.00	$0.00	$0.00	The City has an agreement with a private company to provide street sweeping services. The service level already met the requirements of the Permit prior to adoption. The total cost of the contract in FY 2007-08 is $221,092. The cost is estimated to increase 3% annually.
Conveyance System Cleaning	$0.00	$0.00	$0.00	$0.00	$0.00	The City has been cleaning inspected facilities in accordance with specific Permit requirements prior to adoption. Staffing costs in FY 2007-08 were $365,214, and are estimated to increase 3% per year.
7.0 Industrial and Commercial	$3,150.00	$3,276.00	$3,407.04	$3,543.32	$3,685.05	New permit requirements necessitate approximately 60 additional inspections per year. Annual additional costs are calculated as 30 hours of time at the
9.0 Illicit Discharge Detection & Elimination						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
10.0 Education						
Educational Surveys and Tests	$0.00	$0.00	$0.00	$0.00	$0.00	The City of Poway has already incorporated educational surveys into its industrial/commercial inspection program, and residential surveying is expected to be performed within the regional education program. Educational surveying or testing of other groups is not anticipated to be a significant activity and would be conducted incidental to the educational efforts.
11.0 Public Participation						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
12.0 Fiscal Assessment						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.

d by the CA 3rd District Court of Appeal.

13.0 Effectiveness Assessment						
Annual JURMP Assessment and Reporting	$0.00	$37,303.00	$38,795.12	$40,346.92	$41,960.80	Permit section L1 lays out prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. To the extent applicable and feasible, Copermittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a newly emerging discipline, and will continue to evolve over the entire Permit cycle. Annual costs typically include developing and updating standards and methods, database development and modification, and data tracking, analysis, and report writing. Although these responsibilities may be incurred across a number of program areas and staff, annual costs are calculated as 260 hours of time at the Management Analyst level ($56.67 per hour), 260 hours of time at the Engineering Technician II level ($48.34 per hour), and $10,000 in consultant services.
WATERSHED URMP ACTIVITIES						
Staffing for Watershed URMP development and implementation	$60,900.00	$65,772.00	$71,034.00	$76,716.00	$82,854.00	Lead responsibility for watershed program implementation resides with the Public Works Department. This program consists of two staff (one Operations Manager and one Management Analyst). FY 07-08 cost estimates are based on annualized projections from YTD expenditures. For FY 2008-09 and beyond, an estimated 25% of total staff time for these positions is spent on WURMP development and implementation. Calculations assume the following hourly rates for FY 2007-08; (Operations Manager - $70, Management Analyst - $57). These rates are increased by 3% in each subsequent year.
WURMP Cost-Share Agreements	$8,000.00	$4,900.00	$5,100.00	$5,300.00	$5,511.00	Cost share agreements are used to pay for WURMP consultant support. The FY 07-08 total is based on actual City of Poway contributions to the WURMP Cost Share Agreements in which it participates. Costs went down for FY 08/09 and beyond due to the MOU cost share agreement formula. Increases are estimated for future years based on requirements for increased coordination on WURMP issues in the new Permit. A 5% increase is also assumed for each year after FY 2008-09.

d by the CA 3rd District Court of Appeal.

Implementation of Watershed Activities	$500.00	$5,000.00	$6,000.00	$7,200.00	$8,640.00	Watershed activities have been implemented in Poway, however developers have paid for several of them. The standing watershed activity in Poway is $500 annually for clean up events. Future items include over-irrigation studies and purchasing additional trash recepticles and dogi-pot stations. A line item of at least $5,000 will be budgeted in future years for watershed activities. Because of the wide range of potential costs for these activities, a 20% increase is assumed in each subsequent year.
TOTALS	$94,868.29	$157,944.60	$165,619.64	$181,719.50	$187,891.27	

d by the CA 3rd District Court of Appeal.

EXHIBIT 6 "S" - DECLARATION OF LAWRENCE D. PIERCE FOR CITY OF VISTA.

Document received by the CA 3rd District Court of Appeal.

Document received by the CA 3rd District Court of Appeal.

DECLARATION OF LAWRENCE D. PIERCE ON BEHALF OF THE CITY OF VISTA IN SUPPORT OF TEST CLAIM

I, Lawrence D. Pierce, declare as follows:

1. I make this declaration based upon my own personal knowledge, except for matters set forth herein on information and belief, and as to those matters I believe them to be true, and if called upon to testify, I could and would competently testify to the matters set forth herein.

2. I am a Professional Engineer in Civil Engineering.

3. I am employed by the City of Vista as the Director of Engineering.

4. I have held my current position for approximately 4 years.

5. I have reviewed the California Regional Water Quality Control Board ("RWQCB"), San Diego Region, Order No. R9-2007-0001 (NPDES No. CAS 0108758) (the "2007 Permit") and I am familiar with the requirements of the Permit.

6. I have also reviewed and I am familiar with the requirements of Order No. 2001-01 (NPDES CAS0108758) issued by the San Diego RWQCB on February 21, 2001 (the "2001 Permit").

7. Based on my understanding of the requirements of the 2001 Permit and the requirements of the 2007 Permit, I believe the 2007 Permit requires the co-permittees to perform new activities that are unique to local governmental entities that are not required by the 2001 Permit.

Document received by the CA 3rd District Court of Appeal.

8. These new activities include the following:

a. Working Body

1.) Support: Sections F and L.1 of the 2007 Permit require all co-permittees to collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs ("JURMP") and Watershed Urban Runoff Management Programs ("WURMP"), and to plan and coordinate activities required under the Permit. Ten new regional working bodies were established pursuant to a Memorandum of Understanding ("MOU") effective January 2008 to support the regional coordination programs and activities required under the Permit. Working Body costs represent consultant and/or co-permittee staff support for the co-permittees' program planning subcommittee and the nine regional workgroups or sub-workgroups. The co-permittees' budgeted cost for these mandated activities for Fiscal Year ("FY") 2008-09 is $543,375, which includes $517,000 in support costs and an additional 5% ($25,875) for contract administration. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Vista's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2.) Participation: Section L.1.a of the 2007 Permit requires the co-permittees to enter into a formal agreement that establishes a management structure to promote consistency and develop and implement urban runoff programs, and that also defines the individual and joint responsibilities of co-permittees within that structure. The co-permittees' January 2008 MOU establishes minimum levels of representation and participation in working body meetings required to meet these directives. The City of Vista's participation costs were determined by multiplying the hourly rate of each staff person involved in these activities by anticipated minimum number of meetings for each

Document received by the CA 3rd District Court of Appeal.

working body for each fiscal year and assumed that on average each staff member would spend 3 hours preparing for and attending each meeting. The cost to the City of Vista to comply with this mandated activity for FY 2007-08 is $4,818.00. Costs for FY 08-09 and beyond are projected based on minimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. The City of Vista's estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

b. Regional Residential Education Program Development and Implementation: Section F.1 of the 2007 Permit requires the co-permittees to collaboratively develop and implement a Regional Residential Education Program. This is in addition to Section D.5.a, which requires each co-permittee to develop and implement an education program that measurably increases the knowledge of, and measurably changes the behavior of, residential communities within their jurisdictions. Regional program activities to be funded include: materials development/branding, a regional website, regional outreach events, regional advertising and mass media, partnership development, and the development of marketing and research tools, including regional surveys to be conducted in FY 2008-09 and again in FY 2011-12. The co-permittees retained a consultant to perform these mandated activities in Fiscal Year 2007-08. The total cost of the contract is $131,250 which includes 5% ($6,250) for contract administration by the County. The budgeted cost of these mandated activities increased in FY 2008-09 to $262,500 and is expected to again double in FY 2009-10 to $525,000. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Vista's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

c. Development of New/Revised Programs and Standards

1. Hydromodification Management Plan ("HMP") Development: Section D.1.g of the 2007 Permit mandates the collaborative development of a HMP. The co-permittees retained a consultant to develop a HMP. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $1,050,000 which includes 5% ($50,000) for contract administration by the County. $630,000 will be expended in FY 2007-08 with the remaining $420,000 to be expended in FY 2008-09. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Vista's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

2. Low Impact Development ("LID") and Standard Urban Storm Water Mitigation Plan ("SUSMP"): Sections D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the County. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Vista's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

d. Long-Term Effectiveness Assessment ("LTEA"): In addition to annual assessments of the regional, jurisdictional and watershed programs, Section I.1 of the 2007 Permit requires the co-permittees to collaboratively develop a LTEA. Because

Document received by the CA 3rd District Court of Appeal.

of the complexity of the assessment requirements, the consultant costs to perform this assessment, which is expected to be completed in FY 2010-11, are expected to be $210,000, which includes 5% ($10,000) for contract administration by the County. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU. The City of Vista's proportional share of the budgeted costs for complying with these mandated activities for FY 2007-08 and each year thereafter is detailed in Exhibit A to this declaration and is incorporated into Exhibit 1 to the Test Claim.

e. Street Sweeping

1.) Equipment Costs: Section D.3.(5) of the 2007 Permit mandates specific street sweeping frequencies for improved roads, streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept monthly. Areas with low volumes of trash and/or debris must be swept at least annually. The City of Vista contracts out the street sweeping service. Staff and contract costs are addressed in items e.2) and e.3) below.

2.) Staffing Costs: In response to Section D.3.(5) the City of Vista has staff who administer the street sweeping contract and who will conduct additional tracking and reporting to comply with the 2007 Permit. This is anticipated to be 5% of supervisor staff time for FY 2007-08. The City of Vista's cost in FY 2007-08 for a Street Supervisor is $45.52 per hour. The increase in the City of Vista's staffing cost to comply with this mandated activity in FY 2007-08 is $4,438.20 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Vista's estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

3.) Contract Costs: The City of Vista contracts with a private company to provide street sweeping services. The total cost of this contract to the City is $159,935.03. The amount of street sweeping required by the 2007 Permit is

Document received by the CA 3rd District Court of Appeal.

approximately half of the current contract or $79,967.52 per year. The increased contract costs for FY 2007-08 and estimated increased contract costs for future years are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

f. Conveyance System Cleaning: Section D.3.(3).(b) of the 2007 Permit requires all municipal separate storm sewer system ("MS4") facilities to be inspected annually, with high priority facilities being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, the City of Vista has increased staffing of its MS4 operations and maintenance program for FY 2007-08 by 1 staff. The City of Vista's cost in FY 2007-08 for a (Lead Maintenance Worker) is $36.88 per hour. The increase in the City of Vista's staffing cost to comply with this mandated activity in FY 2007-08 is approximately $117,611.85 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Vista's estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

g. Educational Surveys and Tests: Section D.5 of the 2007 Permit requires each co-permittee to implement an educational program to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff or receiving waters, and potential Best Management Practices ("BMPs") for the target audiences; and (2) measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Sections I.1 and I.2 further require that the effectiveness of educational activities in meeting these standards be assessed annually where applicable and feasible. Compliance with these mandated activities requires the routine incorporation of testing and surveying methods into the program elements to ensure that implementation is resulting in the targeted outcomes. To comply with Section D.5 the City of Vista has budgeted approximately $5,000 for FY 2007-08 to develop, administer and analyze surveys and tests and is expected to increase

Document received by the CA 3rd District Court of Appeal.

4% in FY 2008-09 and each year thereafter. The City of Vista's estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

h. Annual JURMP Assessment and Reporting Requirements: Section I.1 of the 2007 Permit specifies prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. Co-permittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a new emerging discipline and is expected to evolve over the term of the Permit. Annual costs are expected to include developing and updating standards and methods, database development and modification, and data tracking, analysis and report writing. To comply with Section I.1 the City of Vista will expend an estimated 975 hours of staff time in FY 2008-09, and each year thereafter. The City of Vista's cost in FY 2008-09 for a Sr. Environmental Specialist to perform these mandated activities will be $42.82 per hour. The increase in the City of Vista's staffing cost to comply with these mandated activities in FY 2007-08 is $20,874.75 and is expected to increase 4% in FY 2008-09 and each year thereafter. The City of Vista's estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

l. Watershed URMP

1.) Staffing for Development and Implementation: Section E.2.f of the 2007 Permit requires watershed co-permittees to collaborate with other co-

Document received by the CA 3rd District Court of Appeal.

permittees within its watershed management areas to develop and implement an updated Watershed Urban Runoff Management Program for each watershed. Lead responsibility for watershed program implementation resides with the City of Vista's Water Quality Protection Program. Program staff primarily involved in watershed program implementation include the Program Manager and Sr. Environmental Specialist. The FY 2007-08 costs are based on annualized projections for year-to-date expenditures. For FY 2008-09 and beyond, it is estimated that staff will spend 20% of their time on WURMP development and implementation. Calculations are based on the following hourly rates for FY 2007-08: Program Manager - $58.52; and Sr. Environmental Specialist - $42.82. The City of Vista's estimated staffing cost to comply with these mandated activities in FY 2007-08 is $22,822.80 and is expected to increase in FY 2008-09 once fully staffed with a 4% increase each year thereafter. The City of Vista's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

2.) Cost-Sharing Agreements:

The City of Vista has entered into 2 cost sharing agreement(s) to pay for consultant support relating to the Carlsbad and San Luis Rey WURMPs. The consultant costs for FY 2007-08 are expected to be $4,000. Additional consultant services will be necessary in future years based on the development of cost sharing agreements for other WURMPs and an increasing need for coordination within each WURMP over the Permit cycle. The City of Vista's budgeted cost for this mandated activity for FY 2008-09 is $5,600. The co-permittees expect budgeted costs to increase 5% in FY 2009-10 and each year thereafter. The City of Vista's estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

Document received by the CA 3rd District Court of Appeal.

3.) Implementation of Watershed Activities: Section E.2.f of the 2007 Permit requires Watershed co-permittees to implement at least two watershed quality activities and two watershed education activities for each permit year. The cost of implementing this mandate for FY 2007-08 is expected to be $10,000. Because of the wide range of potential costs for these activities, we anticipate that these costs will increase on average 20% per year. The City of Vista's actual and estimated costs for complying with these mandated activities for FY 2007-08 and each year thereafter are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

9. The actual increased costs incurred by the City of Vista in FY 2007-08 to comply with the mandated activities required by the 2007 Permit will be $280,959.42 and are detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

10. The estimated increased costs that the City of Vista expects to incur in FY 2008-09, are expected to be $364,128.55, and are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

11. The estimated increased costs that the City of Vista expects to incur during each year of the remaining term of the 2007 Permit are also detailed in Exhibit A to this declaration and are incorporated into Exhibit 1 to the Test Claim.

12. I am not aware of any dedicated state or federal funds that are or will be available to pay for these increased costs.

13. I am not aware of any non-local agency funds that are or will be available to pay for these increased costs.

Document received by the CA 3rd District Court of Appeal.

14. I am not aware of any authority to assess a fee to offset these increased costs.

15. I believe that the only available source to pay these increased costs are and will be the City's sewer funds.

Executed this 12th day of JUNE at VISTA, California.

I declare under penalty of perjury that the foregoing is true and correct.

Document received by the CA 3rd District Court of Appeal.

Co-Permittee -

City of Vista

Element	FY 07-08	FY 08-09	FY 09-10	FY 10-11	FY 11-12	Explanation
Working Body Support	$0.00	$14,236.43	$14,948.25	$15,695.66	$16,480.43	Permit section L1 requires that all Copermittees collaborate to address common issues, promote consistency among Jurisdictional Urban Runoff Management Programs and Watershed Urban Runoff Management Programs, and to plan and coordinate activities required under the Permit. Ten regional working bodies were established per the Copermittee's Jan. 2008 MOU to support the regional coordination of programs and activities required under the Permit. Working body costs represent consultant and/or Copermittee staff support for the Copermittee's Program Planning subcommittee and nine Regional Workgroups or Sub-workgroups. FY 08-09 costs were established in the amount of $543,375 which includes $517,500 in support costs and an additional 5% ($25,875) for contract administration. FY 2008-09 costs were calculated at $125 per hour. A 5% total cost increase is also factored in each subsequent year.
Working Body Participation	$4,818.00	$10,309.85	$7,872.01	$11,264.25	$8,514.37	Copermittees must also maintain representation in, and participate in meetings of, each of the working bodies established under the MOU. The estimates presented here are City of Vista costs. Vista participation costs are determined by multiplying the hourly rate of each staff person by the number of meetings each fiscal year, and assuming an average meeting length of three hours: FY 07-08 costs reflect the actual number of meetings projected through the remainder of the year. Costs for FY 08-09 and beyond are projected based on mimimum mandated meeting frequencies for each working body, but in some cases are increased to reflect experience or anticipated workload. Hourly rates are increased by 4% each year after FY 07-08. Detailed calculations can be found in Worksheet B.
Regional Residential Education Program Development and Implementation	$3,438.75	$6,877.50	$13,755.00	$14,442.75	$15,164.90	Permit section F.1 requires that the Copermittees collaboratively develop and implement a Regional Residential Education Program. This is in addition to section D.5.a, which requires that each Copermittee provide education to measurably increase the knowledge of, and measurably change the behavior of, residential communities within their jurisdiction. An FY 2007-08 budget for consultant support was initially established for this program in the amount of $131,250 ($125,000 for contract costs and $6,250 for contract administration). This figure was increased to $262,500 in FY 2008-09, and is expected to double again in FY 2009-10. Each subsequent year assumes a 5% increase. Regional program activities to be funded include: materials development / branding; a regional website; regional outreach events; regional advertising and mass media; partnership development; and marketing and research tools including the regional surveys to be conducted in FY 2008-09 and FY 2011-12.
Hydromodification Management Plan (HMP) Development	$11,612.05	$7,741.37	$0.00	$0.00	$0.00	Order R9-2007-0001 mandates the collaborative development of a Hydromodification Management Plan (HMP). This task was initiated by the Copermittees' consultant during FY 2007-08 and will be completed in FY 2008-09. The total cost of plan development is $1,050,000, $50,000 of which is for contract administration.

...d by the CA 3rd District Court of Appeal.

Low Impact Development (LID) and Standard Urban Stormwater Mitigation Plan (SUSMP)	$1,375.50	$0.00	$0.00	$0.00	$0.00	Section D.1.d.(7) and (8) of the 2007 Permit require the co-permittees to collectively review and update the requirements of their SUSMPs to define minimum LID and other BMP requirements for application to Priority Development Projects. The co-permittees retained a consultant to develop these requirements. This task was initiated in FY 2007-08 and will be completed in FY 2008-09. The total cost of the contract is $52,500 which includes 5% ($2,500) for contract administration by the county. This entire amount will be expended in FY 2007-08. Each co-permittee's share of these mandated costs is based on a formula set forth in the MOU.
Long-term Effectiveness Assessment (LTEA)	$0.00	$0.00	$0.00	$5,502.00	$0.00	In addition to requirements for Copermittees to annually assess their regional, jurisdictional and watershed programs, Permit section D.1 requires the collaboratative development of a Long-term Effectiveness Assessment (LTEA) that builds on the results of the August 2005 Baseline LTEA. The cost of the 2005 LTEA was $125,000. Because of the increased complexity of new assessment requirements, this consultant cost is expected to increase to $200,000, with an additional 5% ($10,000) for contract administration.
[redacted]						
4.0 Development Planning						Reimbursable costs are not projected for this component.
5.0 Construction						Reimbursable costs are not projected for this component.
6.0 Municipal						
Street Sweeping (equipment costs)	$0.00	$0.00	$0.00	$0.00	$0.00	The City contracts out sweeping, so equipment and labor costs are in the rows below.
Street Sweeping (staffing costs)	$4,438.20	$4,615.73	$4,800.36	$4,992.37	$5,192.07	This includes 5% of the supervisor's time to oversee the street sweeping contract and track and report required information, with a 4% annual increase (07/08 rate is $45.52 per hour).

d by the CA 3rd District Court of Appeal.

Street Sweeping (contract costs)	$79,967.52	$83,166.22	$86,492.87	$89,952.58	$93,550.69	Permit Section D.3.(5) sets minimum street sweeping frequencies for improved roads (possessing curbs and gutters), streets, highways, and parking facilities. Those areas that consistently generate the highest volume of trash and/or debris must be swept at two times per month. Areas with medium volumes of trash and/or debris must be swept monthly and areas with low volumes of trash and/or debris at least annually. The City currently has a contractor sweeping 8000 curb miles per year. The current sweeping frequency is approximately twice that required by the Permit. Therefore, the numbers presented here are the City's approximate contract costs to sweep at the required Permit frequency (which is half of the current contract value), with a 4% increase each year thereafter.
Conveyance System Cleaning	$117,611.85	$130,062.60	$135,265.10	$140,675.71	$146,302.74	Permit section D.3.(3).(b) mandates that all MS4 facilities be inspected annually, with high priority facilitates being inspected between May and September. Because all inspected facilities must be cleaned in accordance with specific Permit requirements, additional staffing impacts are projected. The City added one new maintenance worker 2007-08. Overall, all staff efforts have increased (here estimated at 20%) to meet new Permit requirements for cleaning and tracking/reporting. Costs are calculated at $37 per hour for one lead worker, plus 20% of total budget, with a 4% increase in each subsequent year after 08/09.
7.0 Industrial and Commercial						Reimbursable costs are not projected for this component because new costs can be passed through to regulated parties.
9.0 Illicit Discharge Detection & Elimination						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
10.0 Education						
Educational Surveys and Tests	$0.00	$5,000.00	$5,200.00	$5,408.00	$5,624.00	The Permit mandates an educational component that requires the implementation of educational programs to (1) measurably increase the knowledge of the target communities regarding MS4s, impacts of urban runoff on receiving waters, and potential BMP solutions for the target audience; and (2) to measurably change the behavior of target communities and thereby reduce pollutant releases to the MS4s and the environment. Compliance with this standard requires the routine incorporation of testing and surveying methods into program elements to ensure that implementation is resulting in targeted outcomes. Approximately $5000 was budgeted for this purpose. Costs are increased by 4% each year after FY 2008-09.
11.0 Public Participation						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
12.0 Fiscal Assessment						Reimbursable costs are not projected for this component because these requirements are considered to be supported by federal regulation.
13.0 Effectiveness Assessment						

Filed by the CA 3rd District Court of Appeal.

[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]	[illegible]
Staffing for Watershed URMP development and implementation	$22,822.80	$41,102.10	$42,746.18	$44,456.03	$46,234.27	Lead responsibility for watershed program implementation resides with the City of Vista Water Quality Protection Program. This program consists of five staff (one Program Manager, one Sr. Environmental Specialist (currently being added) and two Code Enforcement Officers). Program representation is primarily the Program Manager and Sr. Environmental Specialist. FY 07-08 cost estimates are based on annualized projections from YTD expenditures. These totals are lower than those projected for the following years because the program has been short-staffed for the majority of the year. For FY 2008-09 and beyond, an estimated 20% of staff time for these positions is spent on WURMP development and implementation. Calculations assume the following hourly rates for FY 2007-08, Program Manager - $58, Sr. Envt. Specialist - $43). These rates are increased by 4% in each subsequent year.
WURMP Cost-Share Agreements	$4,000.00	$5,600.00	$6,048.00	$6,350.00	$6,668.00	Cost share agreements are used to pay for WURMP consultant support. The FY 07-08 total is based on Vista contributions to the WURMP Cost Share Agreements in which it participates. Increases are estimated for future years based on requirements for increased coordination on WURMP issues in the new Permit. A 5% increase is also assumed for each year after FY 2008-09.
Implementation of Watershed Activities	$10,000.00	$12,000.00	$14,400.00	$17,280.00	$20,736.00	Permit section E.2.f requires Watershed Copermittees to implement at least two watershed water quality activities and two watershed education activities for each permit year. The City of Vista budgeted approximately $10,000 for implementing WURMP activities in FY 07-08. Because of the wide range of potential costs for these activities, a 20% increase is assumed in each subsequent year.
TOTALS	$280,959.42	$364,128.55	$376,681.19	$402,978.91	$413,305.40

d by the CA 3rd District Court of Appeal.

Annual JURMP Assessment and Reporting	$20,874.75	$43,416.75	$45,153.42	$46,959.56	$48,837.94	Permit section I.1 lays out prescriptive requirements for annually reporting on JURMP effectiveness. This requires the establishment of measurable targeted outcomes, assessment measures, and assessment methods for each jurisdictional activity/BMP or type of jurisdictional activity/BMP implemented, each major JURMP component, and the JURMP as a whole. To the extent applicable and feasible, Copermittees must also determine source load reductions resulting from program implementation, and utilize water quality monitoring results and data to determine whether implementation is resulting in changes to water quality. Programmatic effectiveness assessment is a newly emerging discipline, and will continue to evolve over the entire Permit cycle. Annual costs typically include developing and updating standards and methods, database development and modification, and data tracking, analysis, and report writing. Although these responsibilities may be incurred across a number of program areas and staff, annual costs are calculated as 975 hours of time (~0.5 staff years) at the Sr. Environmental Specialist level ($43 per hour) with 4% annual increases. The 07/08 costs are for 0.25 staff years at the Sr. Envt. Specialist level.

d by the CA 3rd District Court of Appeal.

l by the CA 3rd District Court of Appeal.

DECLARATION OF SERVICE BY EMAIL

I, the undersigned, declare as follows:

I am a resident of the County of Sacramento and I am over the age of 18 years, and not a party to the within action. My place of employment is 980 Ninth Street, Suite 300, Sacramento, California 95814.

On March 29, 2024, I served the:

- **Current Mailing List dated March 28, 2024**
- **Notice of Waiver of Procedural Requirements, Extension Request Approval, and Postponement of Hearing issued March 29, 2024**
- **Claimants' Comments on the Draft Proposed Decision and Parameters and Guidelines (Volumes 1-14) filed February 20, 2024**

  San Diego Regional Water Quality Control Board Order No. R9-2007-0001, Permit CAS0108758, Parts D.3.a.(3)(b)(iii), D.5.a.(1), D.5.a.(2), D.5.b.(1)(a), D.5.b.(1)(b)(iii-vi), D.5.b.(1)(c), D.5.b.(1)(d), D.5.b.(2), D.5.b.(3), E.2.f., E.2.g., F.1., F.2., F.3., I.1., I.2., I.5., J.3.a.(3)(c)(iv)-(viii), (x)-(xv), the first sentence of L.1. as it applies to the newly mandated activities, and L.1.a.(3)-(6), 07-TC-09-R County of San Diego, Cites of Carlsbad, Del Mar, Imperial Beach, Lemon Grove, Poway, San Marcos, Santee, Solana Beach, Chula Vista, Coronado, Del Mar, El Cajon, Encinitas, Escondido, Imperial Beach, La Mesa, Lemon Grove, National City, Oceanside, San Diego, and Vista, Claimants

by making it available on the Commission's website and providing notice of how to locate it to the email addresses provided on the attached mailing list.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct, and that this declaration was executed on March 29, 2024 at Sacramento, California.

Signed Certification Statement

City of Carlsbad
Jurisdictional Urban Runoff Management Plan
Annual Report for July 1, 2006 – June 30, 2007

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Executive Summary

Overview

The City of Carlsbad's (City) Jurisdictional Urban Runoff Management Plan (JURMP) Annual Report addresses the implementation of the Municipal Storm Water Permit - Order 2001-01, NPDES No. CAS018758 (Permit) issued February 21, 2001. This Annual Report covers the period from July 1, 2006 through June 30, 2007, which corresponds to the City's Fiscal Year 2006-2007 (FY 06-07).

FY 06-07 represented Carlsbad's sixth annual report, and 5th year implementing the JURMP. Since the last Annual Report submission, many procedures have been streamlined to efficiently manage data, monitor sites, track inspections and investigations, and manage other storm water related activities. Planning, construction, and maintenance operations have implemented improved processes to further incorporate storm water pollution prevention practices into internal activities as well as activities enforced by City departments. Highlights of each major component of the JURMP are listed below.

During FY 06-07, the City continued to promote a comprehensive pollution prevention program for the Carlsbad community, combining the activities of storm water, solid waste and water conservation. These three programs were brought under the umbrella of Environmental Programs in FY 03-04 in order to create a unified message, better educate the public, and allow easy access for the public. During FY 06-07 the City continued to promote the use of the Environmental Programs phone number (760-602-4646), as well as a web page (www.carlsbadconserves.org).

Section 2: Municipal

The City's municipal facilities include administration buildings, recreational areas, maintenance and storage yards, water reservoirs, water pump stations, sewer lift stations, a road system, parking facilities, the storm drain system, pressure regulator vaults, and fire stations. Municipal facilities maintain the City's infrastructure that supports Carlsbad's quality of life. These municipal facilities and their activities have the potential to contribute to water pollution if Best Management Practices (BMPs) are not properly implemented.

During FY 06-07, the Storm Water Committee continued to meet monthly to discuss municipal storm water BMPs and pollution prevention issues. The Committee is comprised of approximately 14 members representing various City departments including Public Works, Fire Department, Planning, Recreation, and the Building Department. The intent is to communicate problems and solutions among the group in order to share knowledge, discuss training opportunities, enhance compliance with the Permit, and to pass along any new information from the Regional Water Quality Control Board (Regional Board).

In addition, the City continued implementing the *Maintenance Assessment Program* to measure the level of care provided at various City facilities. While this is a large program developed separate from the Permit or JURMP, there were some measures that overlapped or were related to storm water pollution prevention and BMP implementation. These related measures are reported in Section 11 of this report.

In FY 06-07, the City of Carlsbad's City Manager initiated the Storm Water Leadership Team (SWLT). Monthly meetings of the SWLT were conducted and attendees included Senior Management of the City's major service areas and Directors. Agenda items covered all areas of the City's compliance with Order No. 2001-001, as well as review of the new Order No. R9-2007-0001.

Also during FY 06-07, D-Max Engineering Inc. (D-Max) conducted unannounced inspections of all "High" priority municipal facilities. This provided "*another set of eyes*" to make observations at municipal facilities and recommend corrective actions, when necessary. With the annual inspections by the State Department of Pesticide Regulations (DPR for Parks activities), municipal inspections by D-Max,, and staff training on storm water BMPs, personnel are more aware of the required maintenance practices in preventing storm water pollution.

The City continued to implement a computerized asset management/work order system that allowed the Storm Drain Maintenance Crew to track the Municipal Separate Storm Sewer System (MS4) inventory, inspections, and maintenance activities conducted throughout the system. The Storm Drain Maintenance Crew used the system to manage preventive maintenance schedules for any facilities that needed to be inspected annually or for those requiring more frequent cleaning. This system allows better management of the inspection and cleaning schedule and improved tracking of the amounts and types of debris removed from the MS4.

Comments from the Regional Board on the FY 05-06 JURMP Annual Report related to the Municipal program are addressed in this report as follows:

Review Letter Comment #	Section Addressed
1	2.1 and App. 2-2
2	2.3
3	2.3

Section 3: Industrial

The City currently tracks over 400 industrial facilities within its jurisdiction. Major industry types include airport services, refuse and sewage management, pharmaceutical research and development, high technology and electronics, golf apparel and equipment manufacturers, and several light industry parks. Industrial activities have the potential to contribute to water pollution if BMPs are not implemented properly.

During FY 06-07, the City updated the prioritized industrial inventory, mapped all industries, inspected 294 industries (including all high priority industries), conducted education and outreach to industries, and used enforcement actions to obtain compliance when necessary. The City also worked closely with the Industrial Compliance Unit of the Regional Board by submitting copies of inspection reports and correspondence with high and medium priority industries. The City took 14 enforcement actions against industries to achieve compliance in FY 06-07.

The City will continue to inspect all high priority industrial facilities annually, inspect medium and low priority facilities on a complaint basis and/or as resources are available, and continue to review industrial monitoring data and compare results to benchmark values and previous years' results.

The Regional Board is currently revising the language and procedures outlined in the State General Industrial Permit. When the permit is reissued, the City would like to host a workshop in conjunction with Regional Board staff for all industries in Carlsbad to discuss the new permit guidelines, compliance issues and address any concerns business might have about the new permit.

The Storm Water Protection Program developed and continues to use *Knowledge and BMP Effectiveness Assessment* measures for industries. These assessments continued to be conducted by inspectors during onsite facility inspections. Please refer to Section 3 of this report for more information.

Comments from the Regional Board on the FY 05-06 JURMP Annual Report related to the Industrial Inspection program (#4) are addressed in Section 3.4 of this report.

Section 4: Commercial

The City currently tracks over 600 high priority commercial facilities. Commercial facilities can generate a variety of pollutants depending on the types and locations of activities performed. Major commercial types include automobile maintenance, restaurants, pressure washing, masonry and concrete work, carpet cleaning, and landscaping activities. The City continued to implement a comprehensive program to reduce urban runoff originating from existing commercial sites and sources.

During FY 06-07, the City updated the commercial inventory, mapped all "high" priority commercial facilities, provided education and outreach on BMPs, inspected 385 commercial sites, and conducted enforcement activities to ensure compliance. The City took a total of 43 enforcement actions against commercial businesses during FY 06-07 in order to achieve compliance.

Over 200 "BMPs for Businesses, Commercial and Industrial" brochures were distributed through in-person inspections or mail.

Section 5: Residential

The City encompasses approximately 42 square miles and has an estimated population of 98,607 residents. At build out, sometime beyond year 2010, there will be nearly 54,599 residential units, housing approximately 135,000 residents. The residential community has a significant potential to contribute to water quality degradation. The focus of the City's pollution prevention strategy is a proactive information and education program that utilizes public presentations, fact sheets, direct mailers, brochures, website, and other media to increase knowledge and awareness of storm water pollution prevention efforts.

Targeted activities for residential areas include vehicle washing, storage and maintenance, lawn and garden care, home improvement projects, pet waste disposal, swimming pool maintenance, household hazardous waste (HHW) disposal, and trash and debris cleanup and disposal. The Storm Water Protection Program continued to distribute information addressing these residential BMPs and required several minimum BMPs to be implemented.

The City continued to distribute a new brochure developed in FY 05-06 for the mobile service providers including carpet cleaners, plumbers, pressure washers, mechanics, porta-potty services, and any other mobile business that provide services at various off-site locations. Mobile service materials and residuals such as cleaners, grease, soapy water, dirt, debris, and other pollutants often find their way to our streets and storm drains. This brochure was designed for mobile service providers, their employees and anyone that hires a mobile service provider.

During FY 06-07, the City distributed storm water educational information for residential activities, continued an advertising campaign, hosted or participated in 25 residential outreach events, offered five oil recycling drop-off sites and two HHW collection sites for residential use, initiated a door-to-door residential HHW pick up program, hosted a HHW drop-off disposal day for Carlsbad residents, responded to 154 reports of illegal discharge, and issued 37 enforcement actions to achieve compliance.

In FY 06-07, the Storm Water Protection Program continued to work closely with other City programs and departments to address such issues as water conservation, code enforcement, outreach, and pollution

prevention. The City also continued to advertise Environmental Programs and continued to seek the most efficient and effective ways to educate the public.

The Storm Water Protection Program received several complaints directly related to or caused by poor water conservation practices (over irrigation etc.). The Storm Water Protection Program continues to work closely with the City's Water Conservation Specialist to address these issues with residents.

Section 6: Land-Use Planning

The Permit requires the City to evaluate land use planning policies and principles, revise the environmental review processes, and develop an approval process to minimize the impacts of development activities on receiving water quality. Land-use planning gives the community an opportunity to comment on and shape policies that guide community development and interests. The City has developed goals that balance environmental protection with smart, long-term economic growth. By laying out a vision for local growth and coastal development, projects are consistent with the state and federal regulatory requirements and the City's land-use planning efforts.

The City continued to implement the Standard Urban Stormwater Mitigation Plan (SUSMP), and all applicable projects were subject to a thorough discretionary and plan check review process to ensure compliance. In FY 06-07, there were 55 discretionary projects that were reviewed and required to submit applicable storm water pollution prevention plans (SWPPP).

For FY 07-08, the City will continue to work on updating a comprehensive database of existing and proposed permanent storm water BMPs and other pollution control devices to facilitate Permit compliance and reporting. Additional training will also be made available for planners.

Comments from the Regional Board on the FY 05-06 JURMP Annual Report related to the Land Use Planning program (#5) are addressed in Section 6.2 and Appendix 6.3 in this report.

Section 7: Construction

The Permit requires the City to implement activities that address and minimize short and long-term impacts on receiving water quality related to runoff from new construction sites. The City requires, prior to approval of a construction or grading permit, that project proponents implement measures to ensure that pollutants will be reduced to the maximum extent practicable and will not cause or contribute to an exceedance of water quality objectives. The City met these requirements by amending or conditioning existing permits, procedures and ordinances.

During FY 06-07, the City updated the construction inventory, inspected all high priority sites, conducted outreach and education to developers, engineers, contractors, and City staff, and used enforcement actions to obtain compliance when necessary. All active grading permits were ranked as high priority and inspected weekly. All required inspections were completed. There were 6026 required inspections and 6147 inspections were completed in FY 06-07. Inspectors used enforcement actions as necessary to achieve compliance, including issuing 68 field memos, 45 correction notices, and 15 stop work notices.
The City continued to implement the procedures developed in both the ministerial permit report developed in June 2004, and the minimum BMPs report developed in May 2004, and to train inspectors on these procedures.

The City continued to distribute the "*Pollution Prevention Guide to the Construction Industry*" brochure. The City also continued to work with the North County Outreach group to develop new brochures for the construction industry.

Section 8: Illicit Discharge Detection and Elimination

The City continued to conduct a comprehensive and proactive program for detecting and eliminating illegal discharges to the storm drain system. The City's program actively seeks to identify and eliminate illicit discharges and connections by conducting investigations, responding to spills and sewage overflows, conducting monitoring, and performing routine cleaning and maintenance activities on the sewer and MS4.

The public continued to use the storm water hotline and e-mail address to report illegal discharges to the storm drain system. The Storm Water Protection Program responded to reports of illegal discharges and has been trained in water quality sampling techniques. Complaints of illegal discharges were documented and tracked in the City's "*Suite Response* - Request for Action" (RFA) system. The RFA system was used each time there was a complaint through the hotline, email, in-person, or during field discovery related to an actual or potential illegal discharge.

The Storm Water Protection Program is committed to responding in a timely manner to all illegal discharge reports. During FY 06-07, staff responded to 96% of reports of discharges "*happening now*" within 30 minutes. The Storm Water Protection Program responded to 154 reports of illegal discharges to the storm drain system. In addition, 434 complaints or requests for action related to storm water quality, the sewer system, or storm drain system maintenance were conducted by Engineering Inspections, Code Enforcement, Maintenance and Operations, Utility Operations, Construction Maintenance, and Streets Department.

The City continued to implement the *Dry Weather Field Screening and Analytical Program*, analyzing conditions and samples from 60 sites in the storm drain system. The City also continued to implement the Coastal Outfall Program. There were 22 outfall sites routinely monitored by the storm water program.

The City also continued to implement the Sewer Overflow Prevention Plan/Response Plan. The City responded to 12 sewage spills or overflow reports, with a total of 18,000 gallons recovered and approximately 635 gallons entering the environment.

A *Performance Measurement System* has been implemented to monitor annual sewage overflow spills and responses, and assess whether preventive maintenance or other improvements can be made to reduce spills to the environment. For FY 07-08, the City plans to continue to collect data for the *Performance Measures and Maintenance Assessment* program and to analyze alternative work methods to improve the balance of scheduled versus unscheduled maintenance. This will include, but not be limited to, the use of contract services, temporary help, and/or consolidation of services with other Public Works departments.

Comments from the Regional Board on the FY 05-06 JURMP Annual Report related to Illicit Discharges Detection and Elimination Program (#7) are addressed in Section 8.1 of this report.

Section 9: Outreach and Education

The Storm Water Protection Program collaborated locally and regionally to ensure outreach efforts and messages for storm water pollution prevention were consistent, though these messages often took varied forms. During FY 06-07, the City continued to be actively involved in outreach and education at the local level, the watershed level with the North County Storm Water Program (NCSWP), and at the regional level with the Project Clean Water Outreach Workgroup.

The City sent storm water educational information to all city employees distributed via paychecks in FY 06-07, participated in EPA webcasts as training opportunities, collaborated with local non-governmental organizations, hosted or participated in 25 outreach events, presented urban runoff and watershed concepts to 770 school-aged children, and distributed information through various media. The City also distributed promotional items such as notepads, pens and key chains with pollution prevention messages.

Section 10: Public Participation

The City led and/or contributed to several public participation opportunities this reporting period including the development, implementation, and review of storm water management programs, BMPs, new requirements, and other JURMP and storm water related issues. During the reporting period, citizens, business owners and representatives, and other interested parties were invited to attend public meetings, outreach events, workshops, City Council meetings, and other events related to storm water pollution prevention at the local and watershed levels. During FY 06-07, the City also conducted a Public Opinion Survey of 1,000 residents that included questions about storm water pollution.

During FY 06-07, the City's Community Volunteer Coordinator continued to find volunteers to assist the Storm Water Protection Program with various activities, including cleanup and outreach events. The City continued to recruit students from the University of California, San Diego to participate in an internship program with the Storm Water Protection Program. Interns worked on a variety of activities including commercial and industrial inspections, data management, and outreach and education.

Section 11: Effectiveness Assessment

Information collected in surveys, public comments, inspections, investigations, monitoring and other activities during the year were assessed to identify any trends and determine new or modified courses of action. During FY 06-07, the City continued participating in a Copermittee workgroup to draft common elements for effectiveness assessment.

The City made progress with effectiveness assessment measures during FY 06-07, using the Watershed Treatment Model to assess the effectiveness of storm water programs (Deb Caraco, Center for Watershed Protection).

Section 12: Fiscal Analysis

The total operating costs to fund the Storm Water Protection Program activities for FY 06-07 related to existing development was $1,355,240. This includes actual expenditures for personnel and operating costs from the Storm Water Protection Program budget, along with costs for street sweeping and litter pick-up, but does not include the *Storm Water Capital Improvement Program* costs.

Section 13: Special Investigations

Water quality data collected for two projects in FY 06-07 is summarized in this section. One is referred to as the Receiving Water Dry Weather Monitoring program. The second was related to monitoring required by the California Coastal Commission as part of the City's municipal golf course construction.

Section 14: Conclusion

During FY 06-07, the City successfully implemented the Permit requirements and the program activities described in the JURMP. Identified program strengths as well as improvement areas for FY 07-08 are outlined in each report section. As more programs and activities are implemented as part of Order no. R9-2007-0001, there is a clear need for better databases for tracking and reporting all of these activities and the BMPs being implemented. Tying all of these activities to changes in water quality still presents a considerable challenge. This is part of the long-term assessment strategy to develop trends and to determine cause and effect relationships of pollution prevention and water quality management. The City will continue to work with the Copermittees to develop additional effectiveness measures, in addition to implementing the identified measures on program effectiveness within the City.

Information from JURMP activities, WURMP activities, as well as the 303(d) List indicated that bacteria and sediment are high priority pollutants in the Carlsbad Watershed. The City proposes to continue addressing these pollutants through a number of existing or new activities, which include education, inspections, monitoring and maintenance through Order No. R9-2007-0001 implementation.

TABLE OF CONTENTS

Executive Summary _____ i

Section 1
Introduction

1.0 Overview

The City of Carlsbad's (City) Jurisdictional Urban Runoff Management Plan (JURMP) Annual Report addresses the continued implementation of the Regional Water Quality Control Board (Regional Board) Order No. 2001-01 (NPDES Permit #CAS0108758), commonly known as the Municipal Storm Water Permit (Permit). The Permit was issued February 21, 2001, and replaced the City's first municipal storm water permit issued in 1990 (Order 90-42). The Regional Board issued this Permit to prevent and control polluted urban runoff from Municipal Separate Storm Sewer Systems (MS4s) to downstream water bodies. As runoff flows through urban areas, it can carry harmful pollutants such as pathogens, sediments, fertilizers, pesticides, heavy metals, and petroleum products. Pollutants entering a receiving water body through the MS4 may harm aquatic life through toxicity and habitat degradation.

Each of the Copermittees listed in the Permit was required to develop a JURMP outlining their approach to protecting water quality and preventing harmful impacts from polluted urban runoff. The Permit requires the submittal of an Annual Report to the Regional Board to document the progress and implementation of the JURMP. This sixth Annual Report details the activities conducted during the reporting period of July 1, 2006 through June 30, 2007, which corresponds to the City's Fiscal Year 2006-2007 (FY 06-07).

The Permit also requires each Copermittee to protect water quality during the three major phases of urban development: (1) land use planning for new development; (2) construction; and (3) the "use" or existing development phase.

The City is a municipal corporation, following the Council-Manager form of government. City Departments fall under one of five major service areas (MSA's): Public Safety, Administrative Services, Public Works, Community Development, and Community Services. While the City created the Storm Water Protection Program to help implement the Permit, program implementation is carried out by several departments within different MSA's. This allows for program implementation and new requirements to be incorporated into daily activities of City employees, instead of being viewed as completely new requirements without a connection to on-going services.

The City encompasses just over 42 square miles and borders 6 miles of coastline. Carlsbad also contains or borders three coastal lagoons (Buena Vista, Agua Hedionda and Batiquitos lagoons). The City is part of the Carlsbad Hydrologic Unit (Watershed), which includes four separate sub-watersheds that run through Carlsbad. These include each of the three lagoons and their respective drainage areas, in addition to a fourth watershed commonly known as Encinas Creek. Portions of Agua Hedionda Lagoon and Buena Vista Lagoon are listed as impaired for bacterial indicators and sedimentation/siltation on the Federal Clean Water Act Section 303(d) Impaired Water Bodies list. Buena Vista Lagoon is also impaired for nutrients. While this report focuses on the City's implementation of the JURMP and not the Watershed program, the two are becoming more intertwined as waterbodies and implementation strategies cross programmatic and jurisdictional boundaries.

1.1 Report Organization

This Annual Report was prepared in accordance with the requirements of the Permit. It contains a comprehensive description of the activities conducted by the City of Carlsbad to meet the requirements of section F of the Permit; an accounting of all illicit discharges reported, all inspections conducted, all enforcement actions taken, all education efforts conducted; a description of the public participation mechanisms utilized during the JURMP implementation process; a summary of all urban runoff related data not included in the annual monitoring report; identification of management measures proven to be effective in reducing urban runoff pollutants and flow; identification of water quality improvements or degradation; and a budget for the upcoming year. A list of acronyms is provided in Appendix 1-1.

The organization of this report follows the table of contents agreed to and submitted by the Copermittees to the Regional Board. The Annual Report is divided into sections matching major sections in the Permit and the JURMP. As with the JURMP, many of the activities described in separate JURMP sections overlap with one another, so an activity may be referenced in more than one report section. The Annual Report is organized as follows:

Section 1 - Introduction
Section 2 - Municipal Component
Section 3 - Industrial Component
Section 4 - Commercial Component
Section 5 - Residential Component
Section 6 - Land-Use Planning Component
Section 7 - Construction Component
Section 8 - Illicit Discharges Detection and Elimination Component
Section 9 - Education Component
Section 10 - Public Participation Component
Section 11 - Assessment of JURMP Effectiveness Component
Section 12 - Fiscal Analysis Component
Section 13 - Special Investigations
Section 14 - Conclusions and Recommendations

Section 2
Municipal Component

2.0 Overview

The City's municipal facilities are composed of administration buildings, recreational areas, buildings, maintenance yards, reservoirs, water pump stations, sewer lift stations, road systems, parking facilities, the storm drain system, pressure regulator vaults, and fire stations. These are areas where municipal staff work or provide public services. The City has developed a municipal infrastructure to maintain the quality of life enjoyed by residents, visitors, and employees of Carlsbad. The activities supported by the City's infrastructure have the potential to contribute to urban runoff if Best Management Practices (BMPs) are not properly implemented, maintained, and assessed.

The City has implemented a program to prevent or reduce pollutants in urban runoff from municipal sources or activities. In addition, the Permit requires that high priority municipal facilities and activities be identified and inspected, that minimum BMPs be established for each priority, and that a process for ensuring the application of these BMPs be implemented and enforced by the City.

2.1 Source Identification and Threat to Water Quality Prioritization

The municipal facility inventory is reviewed and updated each year, as new City facilities are developed and brought on-line. The inventory applicable for FY 06-07 is in Appendix 2-1. Prioritization of municipal facilities was determined by type of activities conducted onsite, proximity to an Environmentally Sensitive Area (ESA), compliance inspections, wastes generated, and pollutant discharge potential (see criteria in Section 2 of the JURMP). As pollutant sources are abated and discharge potential decreases, the municipal facilities priority ranking may change. During FY 06-07, 13 facilities were designated and inspected as "high" priority municipal facilities.

In response to the Regional Board's September 18, 2007 FY 05-06 JURMP Annual Report review comment #1: the City has reprioritized the Municipal Inventory and will inspect 63 high priority Municipal facilities in FY 07-08. Please refer to Appendix 2-2 for an updated inventory. Because this reprioritization occurred after the end of FY 06-07, the remainder of this section and this Annual Report refers to the 13 High Priority sites as designated during FY 06-07.

Municipal facility locations were mapped by first geocoding each location's address against the City parcel base map and then the remaining unmatched sites were geocoded to the City's street centerline layer. Locations matched to the parcel base were mapped to the parcel centroid, locations matched to the street center lines were mapped to the estimated location within the address range of the street center line segment, and all were mapped to include proximity to the ESA. A copy of the mapped High Priority municipal facilities is found in Appendix 2-3.

2.2 Pollution Prevention Practices and Best Management Practices Implementation

The City's approach is to promote pollution prevention as an activity for all municipal employees and locations. Since 1991, the City has implemented a procurement policy that directs the purchase and use of recycled products. Purchasing staff are encouraged to use "*Green Purchasing*" principles. This refers to buying products and services with reduced effects on human health and the environment (also called "*Environmental Purchasing*"). While some of these products are office and janitorial supplies, the policy

also applies to construction supplies, landscape materials and equipment, automotive, road and highway supplies.

Specific pollution prevention measures may vary from one site to another, so they are evaluated separately at each facility. All high priority municipal facilities implemented site specific Storm Water Pollution Prevention Plans (SWPPP) and associated training programs. **Furthermore, the pollution prevention BMPs identified in the JURMP were implemented at all municipal facilities.** These pollution prevention BMPs include:

- Affirmative Procurement – Use alternative, safer, or recycled products.
- Reduce the amount of hazardous materials by implementing natural controls.
- Redirect storm water flows away from areas of concern.
- Reduce use of water.
- Reduce storm water flow across facility site.
- Recycle and reuse waste products and waste flows.
- Move or cover potential pollution from storm water contact.

In addition, the City required the following minimum pollution prevention practices (detailed in SWPPPs or inspection reports) at all municipal facilities where appropriate:

- Reduce use of water or use dry cleanup methods: Employees use dry cleanup methods when possible (sweeping, etc.). Any washing activities require containment and recovery, with no discharge to the storm drain system. These activities are also required for City contractors.
- Redirect storm water flows and conduct storm drain maintenance: Employees perform regular visual inspections of the storm drains to identify unauthorized discharges and clean as needed.
- Recycle: City departments must recycle appropriate items and implement the City procurement policy to purchase and use recycled products.
- Move or cover potential pollution sources from storm water contact: Corporate yards protect materials and products that could potentially contribute to storm water pollution by storing them indoors, or covering them, and providing them with secondary containment as needed.

In FY 06-07, the City of Carlsbad's City Manager initiated the Storm Water Leadership Team (SWLT). Monthly meetings of the SWLT were conducted and attendees included senior management of the City's major service areas and Directors. Agenda items covered all areas of the City's compliance with Order No. 2001-001, as well as review of the new Order No. R9-2007-0001.

In the fall of 2006, the City formed an Environmental Resources Management Team (ERMT). The team consists of members drawn from many City departments, creating a diverse group of professionals striving to move the City forward towards environmental, economic, and social sustainability. To date, the team has produced a list of guiding principles which was adopted by the City Council and is pursuing several initiatives which will benefit the City in the future. These activities include increased attention to storm water compliance, improved management of open space, tracking progress on the desalination plant, researching the use of solar power, and examining the City's carbon footprint in an effort to reduce carbon emissions.

In June 2007, the City implemented a new waste reduction strategy as a pilot program. This included the purchase and distribution of larger single stream recycling containers for employee work stations accompanied by a small trash can. There were also several new larger recycling containers placed in public meeting areas throughout the City. Seen as an effective pilot program, the City will implement the waste reduction strategy at all City facilities in FY 07-08.

In July 2006, the City passed a new Special Events Ordinance modeled after similar special event ordinances from other jurisdictions and includes: new application and approval time lines, notification requirements for areas affected by events, updated sign regulations, cost recovery requirements, environmental consideration, and enhanced penalties for violations. Specifically the Special Events Ordinance includes requirements for event sponsors to include "run-off containment features" in event planning, recycling and trash management, and all events must be covered by a site and event specific "plan to control water run-off and other contaminants that" have the potential to enter the City's storm drain system. The adoption of the ordinance will help the City better manage resources and ensure compliance with the Permit. A copy of the new Special Events Ordinance can be found in Appendix 2-4

In January 2007, all City employees received a storm water training fact sheet with their paychecks. The training fact sheet included information about NPDES requirements, pollutants of concern, BMPs, and how to report illegal discharges to the storm drain system. A copy of the training fact sheet can be found in Appendix 2-5.

The Storm Water Committee continues to meet monthly to discuss municipal storm water BMPs and pollution prevention issues. The committee is comprised of City employees representing various divisions of Public Works, the Fire Department, the Building Department, the Planning Department and Recreation. The intent is to communicate problems and solutions, share knowledge, enhance conformance with the Permit, and to pass along updates from the Regional Board. Agendas were distributed in advance and meeting summaries were sent to members and appropriate managers after each meeting. A summary of agenda items and meeting dates is found in Appendix 2-6.

During the spring of 2007, the Water Conservation Specialist and Storm Drain Maintenance Division leader completed the 24-hour "*Hazardous Waste Operations and Emergency Response Training*" in San Diego. The Environmental Specialist I continued training in Hazardous Materials Response with an eight hour refresher class. This course is required for anyone who is expected to identify emergency situations involving hazardous materials. Staff was trained to recognize, report, and assist in emergency response. This course fulfills the requirements under OSHA 29 CFR 1910.120.

Municipal facilities are required to implement the minimum BMPs identified and described in the JURMP (good housekeeping, preventive maintenance, material handling and storage, employee training, solid waste handling, record keeping, self inspection, and spill response), as applicable. Specific BMPs are identified in SWPPPs and/or inspection reports. Specific pollution prevention measures may vary from one site to another and are evaluated separately at each facility. The City implements and assesses the effectiveness of BMPs through regular staff training, self-inspections, third party inspections by a contractor, and SWPPP implementation. The following includes a description of specific pollution prevention activities and storm water BMPs implemented during FY 06-07 by various City departments and facilities.

Maintenance and Operations

The Maintenance and Operations, Water and Wastewater Division, is responsible for maintaining the drinking water, sewer, and recycled water infrastructure for the City. This division carries out the preventive maintenance programs as well as emergency response for line breaks and spills. Those involved with Maintenance and Operations (M&O) activities received training on waste minimization techniques for hazardous and solid waste, spill prevention, response and cleanup practices. Following are some of the new and ongoing BMPs implemented for FY 06-07:

- M&O staff training see Appendix 2-7.

- Native soils are used whenever possible to backfill trenches.
- Staff has minimized the amount of dirt and soil stockpiled onsite.
- Gravel bags are used as check dams to reduce the sediment and debris entering the storm drain.
- RapidFlow® replaced the Gutter Buddy BMP used as inlet protection in the past. The Gutter Buddy was found to obstruct flow and caused some flooding in and around the yard. The Rapid Flow filter lets increased volumes of water run through while continuing to filter pollutants such as larger debris, leaves, sand, and trash.
- A permanent structure was built over Coldmix and Sand stockpiles in M&O yard.
- Standardized BMPs for "Potable Water Discharges" are implemented where applicable. These include BMPs such as diffusers and dechlorinators, sweeping prior to discharging water, installing gravel bags as check dams, and implementing inlet protection.
- Approximately 250 tons of Recycled - Class II - Base Material was used to backfill trenches.
- Approximately 85 tons of asphalt and cement waste was hauled to Hanson Aggregates for recycling into Class II base.
- A stabilized construction entrance consisting of 6" minus rock was installed at the driveway entrance to the storage yard to prevent dirt or mud tracking onto the parking areas. The driveway ramp going from the parking lot to the pipe yard was replaced and the rock driveway was also rebuilt.
- A covered metal recycling bin is used in the M&O yard.
- Gravel bags, sand bags, silt fences, hay rolls were purchased for the outdoor storage yard. Approximately $1000 was spent to purchase these additional BMPs. These BMPs are stockpiled in the M&O yard.
- Oil and fuel storage was relocated to a designated area with 290 gallon catch containment area.
- A concrete spillway was constructed where offsite flow enters the property in order to reduce erosion of the slope.
- The M&O SWPPP was revised along with Spill Response Plan for M&O yard. The site map was revised to detail all equipment and materials storage within the facility and provide the amounts of material stored for construction purposes.
- Storm Water protection staff training was conducted in the All Hands safety meetings held on a monthly basis.

Fleet Maintenance

As part of the storm water compliance program, a clean up was conducted by the Streets and Parks Department of the storage yard at Fleet in the spring of 2007. Many of the items removed included discarded, unusable, and broken equipment. In addition, several of the items were a result of illegal dumping from the surrounding residential communities. Approximately four 10 yard dumpsters full of materials were removed.

The City's Fleet Department historically served as a location where the community could dispose of used motor oil. Since 2002, the City no longer offers disposal at that location. Signs were placed to remind residents of this change. However, the signs had not been updated since 2002 and did not reflect the Environmental Programs logo, phone number, website, or appropriate disposal locations. As a result residents continued to illegally drop off used motor oil and other household hazardous waste at the Fleet gate. The Environmental Programs Division worked with the Fleet Department to develop more appropriate and accurate signs that were installed at the end of FY 06-07. Photos of the new signs can be found in Appendix 2-8.

Fleet Maintenance Division (Fleet) provides routine preventive maintenance and repairs for all City vehicles and equipment. Fleet also performs smog inspections, responds to roadside service calls for City

vehicles, and supplies the fuel and maintenance service for City vehicles and fuel services for the Encina Wastewater Authority. The following are pollution prevention and BMP implementation efforts for FY 06-07:

- A designated pressure washer area continues to be used to wash vehicles, engines, and undercarriages. The pressure washer drain discharges to a separator then to sanitary sewer.
- A floor scrubber and mop were used to clean the repair shop floor. Wash water is disposed of inside the shop to the sanitary sewer.
- Oil, fuel, antifreeze, or other liquids spills were cleaned with absorbent and put into marked drums, which were removed by a contracted hazardous waste hauler.
- Used batteries were stored in plastic containers and picked up weekly.
- Brake shoe cores were stored in plastic containers until returned to the vendor for recycling.
- The public waste oil disposal site has been closed and the citizen waste & oil disposal tanks have been removed from the yard by the Hazardous Waste Removal Contractor.
- Drip pans were used to capture leaks from vehicles stored outdoors. Spills are cleaned up using absorbent, which is then stored in marked containers and removed by the hazardous waste hauler.
- Recycled oil is purchased for use in fleet vehicles, and used oil is recovered for recycling.
- Recycled antifreeze is used and waste was stored in poly drums inside the shop. Fleet recycled 300 gallons of antifreeze during FY 06-07.
- All scrap metal was recycled at a local scrap metal supply shop.
- Training was conducted on BMPs, inspection intervals, and basic house keeping.
- Fleet BMPs were amended to include inspection of the outside area including the dumpsters and the hazardous waste bunker.
- A revised site map was been developed and included in the SWPPP.
- Hydro carbon filters have been installed on the southern storm drain inlets and the storm drain inlets located in the center of the Fleet yard.
- An “all maintenance division” clean up was performed in February 2007. All debris and stored materials were removed from the Fleet yard.
- Chain link fencing was installed around the vacant unimproved lot at the southeast corner of the Fleet yard to prohibit unauthorized dumping of materials and waste.
- Tarps were purchased and are utilized to cover wrecked and damaged vehicles pending disposal at auction.
- Canopies were purchased and installed over outside material storage areas.
- Storage containment for all liquid drums was purchased and installed. All outdoor bulk liquid drum storage at the facility has containment provided.
- A metal storage container was procured for storing oversize items including tires and off road motorcycles.

Oak Maintenance Yard

The Streets Department operates out of the Oak Maintenance yard and is responsible for maintaining approximately 582.4 lane miles of roadway, 6,683 streetlights, 149 signalized intersections, 3,671 storm drains and inlets, and all sidewalks in the public right-of-way. The following are pollution prevention and BMP implementation efforts for FY06-07.

1. All materials and machinery are enclosed or covered by canopies. These canopies are inspected quarterly and replaced as needed.
2. Maintenance yard cleaning and sweeping is on a documented schedule.
3. One hundred fifty (150) sign blanks were used to install/replace street signs.
4. The following amounts and types of materials were recycled during this reporting period:
    a. 1,552.5 tons of asphalt used for repair of streets and rights-of-way
    b. 861.81 cubic yards of cement used for repair of streets and rights-of-way
    c. 1,270 pounds of aluminum signs were recycled or reused.
    d. 1,870 gallons of paint were recycled or reused
    e. 56 steel drums (55 gallon) for storing paint
5. Installed 2 large cigarette butt collection points in the Oak yard
6. Installed 11' x 11' x 6" (121 sq ft) asphalt berm around paint storage area creating a containment barrier in case of spill
7. Implemented storm water and BMP training in annual training for all employees

Fire Department

The Carlsbad Fire Department is a dedicated team of professionals whose mission is to enhance the quality of life in our community by delivering exceptional services in safeguarding lives, property and the environment.

During FY 06-07 the Fire Department developed a storm water manual specific to each fire station to serve as a central location for all storm water documents, training, and BMP descriptions, as well as departmental policies related to storm water. The BMPs developed and implemented in FY 06-07 are listed below.

- The manuals include facility specific site maps, storm water inspection reports, facility specific spill response procedures, training records, department policies, and other related storm water compliance information.
- A written department policy on outside water use was formalized on February 14, 2007, covering vehicle, hose, and equipment washing.
- Spill response equipment and materials are clearly identified and staged in accessible locations.
- Sweeping and removal of organic material from parking lots and walkways is completed on a weekly or as needed basis at all fire stations.
- A new location has been identified for fire engineer training and testing. The location is the city's reclaimed water facility at 6220 Avenida Encinas. A training trailer was developed to facilitate engineer operations, pump testing, and other wet training opportunities. All logistics have been worked out and the facility has proven to be a successful alternative.
- A suitable location was established to provide "wet" training opportunities. The fire department will continue to provide acceptable wet training opportunities for personnel, while ensuring that appropriate BMPs are in place to protect storm drains and eliminate discharges to the MS4.
- Awareness was heightened at fire scenes to minimize the potential for excessive water flow.
- Awareness was heightened at incident scenes to contain potential discharges (once the scene had been stabilized) to prevent pollutants from entering the storm drain system.
- The Fire Department continued to implement the City's spill response procedure for incidents that occur on City streets.

The Fire Department continues to communicate with other City departments to improve coordination and education with regards to storm water. Additionally, the Department established a Storm Water Committee in December of 2006, consisting of four personnel. This group meets quarterly to address

new and ongoing storm water topics and how they relate to the responsibilities of the Fire Department, and includes personnel from each Fire Department rank. Other activities include:

- attending the City's Storm Water Committee meetings on a regular basis.
- working closely with the Storm Water Protection Program to conduct a series of meetings to review BMP implementation and perform one-on-one training.
- providing a member to the City's Storm Water Permit Review Goal Team.
- exploring CIP opportunities for potential funding for sewer connections at the fire stations to serve wash areas.
- working extensively with the design and construction committee for Fire Station 6 to ensure that storm water requirements are addressed early in the process and met during and after construction.

The Fire Department has implemented increased training opportunities to ensure that all fire department personnel are versed in storm water as it relates to fire station and fire fighting activities.

- Annual storm water training was conducted for all three shifts on March 28, 2007, March 31, 2007 and April 2, 2007.
- Annual storm water training has been moved to the department's training calendar for the month of October.
- The roll out of the storm water manual was preceded with training on the manual's contents.
- Upon formalizing the department policy on vehicle and equipment washing, training on the appropriate actions and alternatives followed.

Parks Maintenance Division

The Parks Maintenance Division is responsible for maintaining, preserving, and enhancing approximately 348 acres of parks, athletic fields, streetscapes, beach accesses, and landscapes at various civic facilities. This includes the maintenance of 16 neighborhood or community parks, 14 special use areas, and over 625 acres of open space/undeveloped areas. During this reporting period, staff addressed the improvements recommended by the Storm Water Protection Program, D-Max Engineering, and in-house quarterly inspections. The following pollution prevention BMPs were implemented in FY 06-07:

Parks Maintenance Yard:

- Increased frequency of yard clean-ups (inorganic and organic material). (ongoing)
- Trimming of trees and vegetation surrounding the discharge area. (ongoing)
- Landscaped bare pervious areas to prevent erosion runoff. (ongoing)
- Decreased frequency of irrigation by utilizing multiple starts with fewer days. (ongoing)
- Performance of annual yard clean-up. (ongoing)
- Raising of all metal storage bins by constructing wood bases to prevent rust.
- Purchased canopies for covering of all equipment and materials.
- Purchase gutter buddies for placement around storm drain outlets.

Park Maintenance:

- All organic debris from landscaping is blown away from curbs and gutters and parking areas and recycled during mowing process. (ongoing)
- Implementation of all BMPs in our park sites. (ongoing)

- Minimizing organic material in turf by double cutting areas to reduce accumulation of thatch**.** (ongoing)
- Use of sweeping equipment to pick up leaves and debris in turf areas. (ongoing)
- Use of contract sweeping for all parking areas of all park sites.
- Installation of gravel bags around drain inlets and outlets.

Poinsettia Park Maintenance Facility:

- Quarterly documented inspections of maintenance yard. (ongoing)
- Frequent irrigation inspections and repairs to prevent runoff. (ongoing)
- Cleaning of equipment on dirt pervious areas to prevent runoff. (ongoing)
- Weekly yard clean-ups. (ongoing)
- Cleaning of dumpster areas. (ongoing)
- New gravel bags installed at discharge inlets.

Stagecoach Park Maintenance Facility:

- Removal of all dirt in maintenance yard and installation of new asphalt and asphalt curb to prevent runoff.
- Purchased new canopies to cover equipment and materials.

Training:

- Consolidated all pertinent BMP'S into personalized folders (individual use). (ongoing)
- Performed documented monthly Storm Water Training for all maintenance sites. (ongoing)
- Completed of master manual for all maintenance sites for Storm Water related material (Training/ Inspection/ BMPs, etc).

Inspections:

- Developed a documented weekly clean-up and quarterly inspection program for all maintenance yards. (ongoing)
- Perform extensive (annual) yard clean-ups.

Irrigation:

- All irrigation systems are inspected weekly and repaired as necessary to prevent excess runoff. (ongoing)

Recycled Material:

- Use of mulch material generated from tree trimming in bare landscape areas. (ongoing)

The Parks Maintenance Division continues to utilize chips generated from tree trimming activities for erosion control and weed abatement on banks, slopes, and bare ground. The Parks Maintenance Division continues to utilize all current BMPs throughout the parks, trails, beaches, open spaces, medians, facility, and school site landscapes. In addition, the Parks Maintenance Division purchased ornamental chips and bark for use around buildings and high profile landscape areas.

2.3 Maintenance of Municipal Separate Storm Sewer System (MS4)

The Storm Drain Maintenance Division is responsible for inspecting, cleaning, and performing routine maintenance of the City's MS4. The City implements BMPs for maintenance activities with an emphasis on preventing and reducing the quantity of pollutants entering the MS4. In addition, the Streets Department generally performs minor repairs and limited construction activities on certain MS4

structures. The General Services Department and M&O also collect and properly dispose of all waste resulting from storm drain maintenance. The maintenance of the MS4 involved multiple activities, which are summarized below.

Catch Basin/Inlet Cleaning

There are currently 3,671 catch basins and inlets in the City and approximately 3,000 of these inlets are stenciled with storm water protection messages. Set criteria were used to prioritize the inspection process with an emphasis placed on those catch basins in high traffic areas. If during inspection, a basin or inlet was observed to have any obstruction, debris was removed with an inlet plucker from ground level. Further cleaning by a vactor truck occurred as necessary. In FY 06-07, staff inspected and cleaned all 3,671 basins and inlets and removed 45 tons of material.

In response to the Regional Board's September 18, 2007 FY 05-06 JURMP Annual Report review comment #2:

At the end of FY 2005-06, the city reassigned resources and utilized an improved database system in order to ensure that inspections and cleaning of anthropogenic trash occurs on a routine, scheduled basis. With these improvements to the program, the city reached 100% inspection and cleaning of anthropogenic trash of the catch basins within the city for FY 06-07.

In FY 04-05, the City approved the purchase of a trailer mounted vacuum system to be used solely for storm drain maintenance activities. During FY 05-06, this dedicated equipment increased efficiency for the storm drain maintenance program as well as reduced the need to share vacuum equipment with M&O. In FY 06-07, efficiency continued to improve as shown by the increase in the numbers of catch basins inspected and cleaned.

Curbed Streets and Uncurbed Roads

Street sweeping is conducted by subcontractors who collect, manage, and dispose of swept materials as well as maintain sweeping equipment. During FY 06-07, 13,000 miles of roadway and all public parking areas were swept annually. All sediment and debris was removed and transferred to an approved disposal site. A detailed description of the street sweeping activities is provided below for FY 05-06 and remained unchanged for FY 06-07. In addition, the litter removal program transitioned from a year-round program consisting of two temporary persons to a year round contract crew with the Urban Corps. The crews removed approximately 1,200 cubic yards of litter and debris.

In response to the Regional Board's September 18, 2007 FY 05-06 JURMP Annual Report review comment #3:

The street sweeping contractor in FY 05-06 swept approximately 13,000 miles of roadway and medians within the city of Carlsbad. The downtown redevelopment area including Grand Avenue, Beech Street, State Street, Carlsbad Village Drive and Roosevelt Street were swept three times per week adding up to approximately 1,000 miles per year. All arterials are swept weekly including El Camino Real, Palomar Airport Road, La Costa Avenue and sections of Marron Road. These arterials are swept between 2 a.m. and 6 a.m. when traffic is minimally impacted, and total approximately 6,500 miles annually. Residential roads are swept twice a month totaling approximately 5,000 miles annually. The city also sweeps 30 public parking lots twice monthly totaling approximately 500 miles annually.

In FY 04-05, the Streets department reported that parked vehicles were interfering with the street sweeping program. It appeared that residents were not removing their vehicles from the street during regular street sweeping schedules. The vehicles made it difficult for the street sweeper to access all areas of the street. In March 2006, the City developed a new street sweeping notification door hanger. The

door hanger was developed to help notify residents of street sweeping schedules so that they can move their cars and allow the street sweeper better access to clean the curb face and gutter. The door hangers continued to be used in FY 06-07 to increase the effectiveness of the street sweeping program.

Open Drainage Facilities

In accordance with the JURMP, all identified open drainage facilities were inspected and cleaned during FY 06-07. The City has established an ongoing regular voluntary program for the collection of debris and trash in natural stream and storm drain channels. Storm drain channels were inspected and cleaned as necessary. Maintenance of the MS4 is a shared responsibility between residents and the City. All storm drain channels located on private property are the responsibility of private property owners. The City does however maintain those portions of private storm drain structures that are within 10 feet of the curb face or City right-of-way. During FY 06-07, the Storm Drain Maintenance Division inspected and cleaned those channels that required maintenance. The City will work with the Copermittees to address storm channel maintenance activities and to pursue permitting to conduct future maintenance.

Currently, there is an estimated 18,500 lineal feet of public brow ditches in Carlsbad. In FY 06-07, the City again reviewed the 23,500 lineal feet of brow ditches previously reported and determined that approximately 18,500 feet were publicly owned. Maintenance of the MS4 is a shared responsibility between residents and the City. All brow ditches located on private property are the responsibility of private property owners. The City does however maintain those portions of private brow ditches that are within 10 feet of the curb face or City right-of-way. During FY 06-07, the Storm Drain Maintenance Division inspected and removed 6.5 tons of sediment and debris from those brow ditches that required maintenance. As required by the JURMP, the following storm drain channels were inspected and 300 pounds of trash was removed prior to the wet season:

- Buena Vista Channel
- Kelly Drive Channel
- Park and Kelly Outfall
- Park and Andrea Outfall
- Park and Valencia Outfall
- Park and Neblina Outfall

Desiltation Basins

During FY 06-07, all three publicly owned desiltation basins were inspected and 100 pounds of trash was removed. The three desiltation basins that are the responsibility of the City include:

- Desiltation Basin #13 (23,000 square feet) - SW end of Faraday Ave., south of Lot 102 of CRC
- Desiltation Basin #43 (50,000 square feet) - Camino Hills and Faraday, NE corner
- Desiltation Basin # 30 (1,500 square feet) - SW corner of Marron and Monroe

In addition, during FY 06-07 the City conducted more than 100 inspections and photographed privately owned desiltation basins in an effort to rate the quality, location, and maintenance needs of each basin. This information was documented and may be used to further develop and implement an outreach program for private property owners.

Storm Patrol

During storms, street crews were dispatched to handle storm related emergencies in a timely manner. Each crew was assigned to a pre-determined zone to respond to emergencies and to check inlets and

outfalls for blockages. After the storm event, street crews primarily handled emergencies, maintained proper water flow, protected the natural waterways from contamination, and ensured public safety. Major debris removal and storm clean up was performed after emergencies were resolved. In FY 06-07, staff spent 110 staff hours at various locations throughout the City.

2.4 Management of Pesticides, Herbicides, and Fertilizers Actions

Parks Maintenance Division

In conjunction with the Integrated Pest Management (IPM) program, the Parks Maintenance Division continued to utilize slow release fertilizers in an effort to reduce the frequency of applications while minimizing the potential of fertilizer runoff. In some cases, staff reduced the recommended amount of fertilizer per 1,000 square feet by 50% to minimize flush of growth on turf which in turn reduced the amount of clippings. To help monitor fertilizer applications, the Parks Maintenance Division began using fertilizer reports to track material applied, rates, and locations. In accordance with the new IPM practices, weed control applications were withheld at several school sites maintained by the City. Staff is continuously searching for alternative methods of pest control that are proven to be safe and effective.

As required by the Department of Pesticide Regulation, all chemical applications are reported to the County Agriculture Department on a monthly basis. As identified in the JURMP, all BMPs were implemented to address pesticide, herbicide, and fertilizers sources of pollution. Specifically, BMPs implemented during FY 06-07 include:

- **Education:** A training program for identifying and defining chemicals, proper handling, applying, storing, disposing, irrigating, and using non-synthetic alternatives has been implemented. At many of the training seminars, new IPM methods are often presented for consideration by the department. All training information including BMPs were provided to personnel to keep in personalized folders for individual use. In addition, a master application manual that includes all storm water BMPs, training, and inspections was also prepared.
- **Non-chemical applications:** Some pest problems can be eliminated or controlled by handpicking, pruning, or spraying with water. Many pest problems can be reduced or eliminated by removing affected leaves or plant parts. During FY 06-07, efforts have been made to improve upon our IPM system in the City's parks and Downtown Village areas. The release of Lady-Bird beetles at Pine Park and the Downtown Fountain areas to combat infestations of aphids have proven successful in eradicating the bugs. Other methods used to decrease the departments dependency on chemical sprays during FY 06-07 include:
    - Increased mulching of planter beds to smother weed germination
    - Increased tilling of planter beds to kill young weed sprouts
    - The use of organic plant derivative sprays such as Safer products
    - The use of water to spray plants infested with Giant Whitefly
    - The removal of dying or diseased plant material to decrease the presence of harmful organisms.
- Insecticide application is performed on an as needed basis and is usually contracted out to a pest control operator after diagnosis.
- **Native Vegetation:** The Parks Maintenance Division continues to explore opportunities to use native vegetation to control pests, reduce chemical application, and maintain the aesthetic values of the Parks and medians.
- **Schedules for Irrigation and Application** – Irrigation systems are monitored and inspected on a weekly basis in an effort to minimize water loss due. In addition, the use of evapo-transpiration (ET) gauges for controlling the irrigation system helped to reduce watering times based on evaporation and transpiration of plants and turf. ET gauges are installed at

Poinsettia, Stagecoach, and Calavera Park. These gauges also helped staff to adjust watering times at other locations that were not connected to the gauge. During FY 06-07, all irrigation systems were inspected weekly and repaired as necessary to prevent excess runoff. At Poinsettia and Pine Parks synthetic turf is used on the soccer field, which requires minimal maintenance and no watering. The synthetic turf has proven to be successful in eliminating the use of water for irrigation.

Maintenance and Operations (M&O)

M&O has developed a pesticide program and general pesticide training is conducted on an annual basis. Although M&O staff only use *Roundup*, *employees* are trained on pesticide application, the requirements of the pesticide program, MSDS, pesticide labeling, pesticide safety information leaflets-N series, and emergency medical care. This pesticide program complies with the County of San Diego Department of Agriculture, Weights and Measures requirements. *Roundup* is used for minor weed control six to eight times per year. After usage, quantities applied are reported to the County of San Diego Department of Agriculture. Other mechanical control methods (i.e. shovels, hoes) are used whenever possible.

2.5 Inspection of Municipal Areas and Activities

The Storm Water Protection Program conducted pre-inspection assessments at all "high" priority municipal facilities. The purpose of the pre-inspection assessments was to assist with program improvement areas and record-keeping. These pre-inspection assessments were also an excellent opportunity to facilitate coordination and interdepartmental communication. D-Max Engineering (D-Max) was contracted to conduct formal storm water compliance inspections for all of the high priority municipal facilities during FY 06-07. During each inspection, the D-Max inspectors reviewed the municipal facility's SWPPP, BMP implementation plans, and facility self-inspection records. In addition, recommended BMPs or corrective actions were discussed. A comprehensive site evaluation was conducted and the facility operator was verbally notified of any deficiencies or violations.

After the inspection, an inspection report that included corrective actions, recommended BMPs, and other relevant information was provided to the facility manager. Copies of the inspection reports are on file at the facility and with the Storm Water Protection Program. The facility manager then addressed any recommendations or requirements. Documentation of self-inspections and corrective actions are maintained in files at the appropriate facility. The summary of all inspection report recommendations and facility corrective actions are listed in Appendix 2-9.

2.6 Enforcement of Municipal Areas and Activities Actions

Runoff from municipal facilities may pose a threat to water quality if BMPs are not adequately implemented or maintained. BMP implementation and assessment occurs through facility self-inspections, third party inspections, and through on-going employee training. All inspection report recommendations for the municipal facilities were implemented to the maximum extent practicable. During FY 06-07 the Public Works Director sent each high priority municipal facility a letter requesting that all corrective actions be implemented in a timely manner.

2.7 Self-Assessment

Program Strengths

In FY 06-07, the City of Carlsbad's City Manager initiated the Storm Water Leadership Team (SWLT). Monthly meetings of the SWLT were conducted and attendees included senior management of the City's major service areas and Directors. Agenda items covered all areas of the City's compliance with Order No. 2001-001, as well as review of the new Order No. R9-2007-0001.

Best Management Practices

Toward the end of FY 05-06 the City's Catch Basin Inspection Program was evaluated and improved. The City has reassigned resources and improved a work order system so that inspections and cleaning of catch basins occur on a routine and scheduled basis. As a result of this improved program, in FY 06-07 100% of catch basins were inspected and cleaned as necessary.

In June 2007, the City implemented a new waste reduction strategy as a pilot program. This included the purchase and distribution of larger single stream recycling containers for employee work stations accompanied by a small trash can. There were also several new larger recycling containers placed in public meeting areas throughout the City. Seen as an effective pilot program, the City will implement the waste reduction strategy at all facilities in FY 07-08.

Inspections

The City continued to contract out high priority municipal inspections in order to provide an outside set of eyes for inspecting and determining compliance. These inspections were unannounced in order to best assess compliance. With the annual inspections by the State DPR, municipal inspections by D-Max, in-house quarterly inspections, and staff training on storm water BMPs, staff were more aware of the required BMPs for preventing storm water pollution.

During FY 06-07 the City conducted 108 inspections of privately owned desiltation basins in an effort to rate the quality, location, and maintenance needs of each basin. This information was documented and may be used to further develop and implement an outreach program for private property owners. During FY 06-07, the City updated and mapped all desiltation basins within the City. This information will be used to assess the status of each basin and work with private property owners to develop more proactive maintenance schedules.

Policy

In July 2006, the City passed a new Special Events Ordinance modeled after similar special event ordinances from other jurisdictions and includes: new application and approval time lines, notification requirements for areas affected by events, updated sign regulations, cost recovery requirements, environmental consideration, and enhanced penalties for violations. Specifically the Special Events Ordinance includes requirements for event sponsors to include "run-off containment features" in event planning, recycling and trash management, and all events must be covered by a site and event specific "plan to control water run-off and other contaminants that" have the potential to enter the City's storm drain system. The adoption of the ordinance will help the City better manage resources and ensure compliance with the Permit.

The SWPPP and Spill Response Plan for the M&O facility was updated and all staff were trained in storm water compliance and BMP implementation related to their job duties.

A comprehensive storm water manual was created specific to each Fire Station. This manual includes an updated facility-specific SWPPP, spill response procedure, training records, inspection records, and related materials.

The Storm Water Protection Program staff began working with the City Attorney's office to revise the City's ordinance to reflect current enforcement levels and mechanisms. Revision and Council approval occurred in early FY07-08.

Education

During FY 06-07 every edition of the Public Works departmental newsletter featured updates on the Storm Water Protection Program and Environmental Programs. Employees were notified by e-mail when these newsletters were published and posted on the City's intranet, and hard copies were provided for employees who did not have access to computers.

During FY 06-07, the City's Storm Drain Maintenance Division continued to use a new street sweeping notification door hanger. The door hanger was developed to help notify residents of street sweeping schedules so that they can move their cars and allow the street sweeper better access to clean the curb face and gutter. This door hanger helped improve the effectiveness of the street sweeping program.

Storm Water Protection Program and Environmental Programs Division worked with the Information Technology Department to revise the City's webpage and provide updated information about storm water BMPs.

The City's Fleet Department historically served as a location where the community could dispose of used motor oil. Since 2002, the City no longer offers disposal at that location. Signs were placed to remind residents of this change. However, the signs had not been updated since 2002 and do not reflect the Environmental Programs logo, phone number, website, or appropriate disposal locations. As a result residents continued to illegally drop off used motor oil and other household hazardous waste at the Fleet gate. The Environmental Programs Division worked with the Fleet Department to develop more appropriate and accurate signs that were installed at the end of FY 06-07.

Training

The Storm Water Protection Program worked with municipal High Priority facilities to improve SWPPPs, spill response plans, and training programs.

During the spring of 2007, the Environmental Specialist I, the Water Conservation Specialist, and the Storm Drain Maintenance Division completed the twenty four hour "Hazardous Waste Operations and Emergency Response Training" in San Diego. This course is designed for employees that are expected to identify and respond to emergency situations involving hazardous materials. Staff was trained to recognize, report, and assist in emergency response. This course fulfills the requirements under OSHA 29 CFR 1910.120.

The City continued the monthly meetings of the Storm Water Committee, with representatives from Public Works, Public Safety, the Building Department, the Planning Department and Recreation. This committee allows the sharing of ideas and issues with storm water pollution prevention, BMPs and training.

A storm water committee specific to the Fire Department consisting of Fire Department staff was created in FY 06-07.

During FY 06-07, the Storm Drain Maintenance Division continued attending the weekly Storm Water Protection Program staff meetings. Their attendance at these coordination meetings has facilitated information sharing and problem solving within the program.

Maintenance and Operations has implemented a "positive reinforcement" program. This program sheds light on staff that are found doing something right, going the extra mile for the team.

Program Improvement Areas

The City will continue to work with Copermittees to address storm channel maintenance activities and to pursue permitting to conduct future maintenance.

Staff at the M&O Facility continues to evaluate and improve BMPs and their effectiveness in order to prevent pollutants from entering the storm drain system.

All affected city departments are working on revising programs and procedures to address new permit requirements applicable in 2008.

Fire facility self inspections are conducted prior to the rainy season (October). In the future, the inspections will be conducted as a two person team consisting of someone from the storm water department and a member of the Fire Department's Storm Water Committee.

Section 3
Industrial Component

3.0 Overview

The City continues to track, inspect, and monitor all industrial facilities within its jurisdiction. Major industry types in Carlsbad include airport services, refuse and sewage management, a power plant, pharmaceutical research and development, golf equipment manufacturers, and several light industry parks. The City has implemented a program to inspect industrial facilities, ensure compliance, and reduce pollutant runoff. During FY 06-07, the City maintained an inventory of 435 industrial facilities.

During FY 06-07, the City updated the industrial inventory, mapped all industries, and inspected **all** high priority industries, 95 medium industries, and 155 low priority industries. There were 44 "High" priority industries on the inventory at the end of FY 06-07. **Of those 44, 42 inspections were required to be conducted and all 42 High Priority industrial sites were inspected in FY 06-07.** The change between 44 inventoried High Priority industrial sites and the 42 inspections conducted was due to one facility going out of business and one facility relocating industrial activities outside the US. The remaining 42 "High" priority industrial sites were inspected in FY 06-07 and represented 36 individual businesses on the Storm Water Inventory.

The total high, medium and low priority inspections conducted in FY 06-07 equaled 294. These 294 inspections not only included physical inspections, but also reviews, phone contacts, and drive by surveillance to determine business status, provide education and outreach materials, and require BMP implementation in accordance with the City ordinance, Permit, and/or General Industrial Storm Water Permit (General Permit). These activities are described in the following subsections.

3.1 Source Identification and Threat to Water Quality Prioritization

Storm water inspectors identify pollution sources, assess their threat to water quality, and require the implementation of BMPs to eliminate sources at industrial facilities. The Storm Water Protection Program works closely with the Finance Department to obtain accurate information about new business activities, types (home based or commercial locations), contacts, and other related data. Each quarter, the Storm Water Protection Program downloads, sorts, maps, and prioritizes these new businesses.

These new businesses are then added to the inventory list and scheduled for inspection. In some cases information provided on business license applications is not correct and other information must be gathered before an inspection can be scheduled. These pre-inspection evaluations help the City determine if a business' activities are subject to the Storm Water Protection Program's inspection requirements. The two types of pre-inspection evaluations the Storm Water Protection Program uses are:

1. Reviews: Business license and other relevant information reviewed to determine whether the businesses should be inspected by the Storm Water Protection Program.
2. Telephone Contacts: If the review fails to provide enough information about the business, the business is contacted by phone to determine their status and schedule an inspection if necessary.

After physical inspections, reviews, or telephone contacts any changes to a business' priority or status were recorded on the Storm Water Inventory List and in the Permits Plus database. The FY 06-07 year-end inventory is in Appendix 3-1. Data related to industrial businesses is managed on a continual basis as per departmental procedures and JURMP requirements. All documents related to industrial businesses

were filed according to priority and status (active, inactive, excluded, or out of business). Appendix 3-2 contains a map of all prioritized industries on the current inventory.

During FY 06-07, the SIC code identification and assignment procedure was again revised to include additional SICs not previously covered by staff review. In addition to adding several SICs, staff found that some businesses had not been prioritized correctly. As a result several businesses previously identified as industrial "low" were moved to the commercial "high" category. At the end of FY 06-07, the inventory included 44 high priority, 173 medium priority, and 218 low priority industries. Table 3.1 provides a summary of industrial facilities by source type. A total of 12 SIC code groupings related to industrial high facilities were identified.

Table 3.1: SIC Groupings by Type, High Priority

Industrial Sector	Ind High
2675: Die-Cut Paper, Paperboard, and Cardboard	1
28XX: Drugs	3
28XX: Chemical and Allied Products	2
2951: Asphalt Paving Mixtures and Blocks	1
3231: Glass Products Made of Purchased Glass	1
36XX: Electronic and Other Electrical Equipment and Components	1
39XX: Miscellaneous Manufacturing	4
4119: Local Passenger Transportation, NEC	2
42XX: Motor Freight Transportation and Warehousing	2
42XX: Public Warehousing and Storage	1
45XX: Transportation By Air	19
49XX: Electric, Gas, and Sanitary Services	7
TOTAL	44

3.2 Pollution Prevention

Pollution prevention activities are proactive approaches industries can take to identify and reduce sources of pollution. Proactive pollution prevention when framed in the context of appropriate BMP identification, use, and maintenance is a key component to improving regional water quality. Pollution prevention measures are specific to industrial types and activities. Industries were informed of pollution prevention opportunities during site inspections, in outreach materials, and through correspondences. City inspectors required the following minimum best management practices (detailed in individual facility inspection reports and/or brochures) for all industrial facilities.

- Move or cover potential pollution sources from storm water contact. Protect materials and products that could potentially pollute storm water from rain, run-on, runoff, and wind dispersal by storing them indoors or covering them, and providing them with secondary containment as needed. For industries with conditional SIC codes, moving stored materials indoors may allow an exemption from the General Permit requirements.
- Use dry cleanup methods. Washing or cleaning activities that involve the use of a water hose or pressure washing system require the use dry clean up methods (mops, brooms, rags or wire brushes to clean pavement, buildings and equipment as much as possible).
- Redirect storm water flows and conduct storm drain maintenance. Perform regular visual inspections of the storm drain to identify unauthorized discharges or pollutants and clean as needed. Industries may be required to modify downspout locations in order to redirect storm water flows away from potential pollutant sources.

- Trash Management. Sweep up around dumpsters and other areas to prevent trash and debris from accumulating. Dumpsters must be kept closed when not in use. All trash must be kept in appropriate sized containers until it can be hauled away.
- Recycle, Reduce and Reuse. Recycle cans, bottles, newspaper, office paper, and cardboard whenever possible. When inspecting solid waste collection areas, inspectors noted if recyclable materials (cardboard, green waste, etc.) were placed in dumpsters.

All high priority industries were required to develop and implement a Storm Water Pollution Prevention Plan (SWPPP). In addition, some medium and low priority facilities were also required to develop and implement SWPPPs if their activities had the potential to contribute to storm water pollution. These businesses were usually given 60-90 days to develop and submit the SWPPP to the Storm Water Protection Program for review and approval. During follow up compliance inspections, businesses were required to show documentation that the SWPPPs had been implemented as required. If the inspector found deficiencies, the facility operator was required to revise the SWPPP and ensure compliance procedures and BMPs were implemented as outlined in the plan.

The City continued to provide a sample SWPPP template to industries as a guide for preparing site specific plans. The sample SWPPP was also provided upon request when the current SWPPP was found to be deficient.

In July 2006, the City passed a new Special Events Ordinance modeled after similar special event ordinances from other jurisdictions and includes: new application and approval time lines, notification requirements for areas affected by events, updated sign regulations, cost recovery requirements, environmental consideration, and enhanced penalties for violations. Specifically the Special Events Ordinance includes requirements for industrial business that sponsor events to include "run-off containment features" in event planning, recycling and trash management, and all events must be covered by a site and event specific "plan to control water run-off and other contaminants that" have the potential to enter the City's storm drain system. The adoption of the ordinance will help the City better manage resources and ensure compliance with the Permit**.**

3.3 Best Management Practices Implementation

The City required all industries to implement the minimum BMPs and specific BMPs applicable to specific industrial activities. BMP information was made available during inspections, in printed materials and direct mailings, at workshops, on the storm water website and hotline, during presentations, and at outreach events. A complete listing of all education and outreach events held during FY 06-07 can be found in Section 9 of this report.

Printed Material and Direct Mailings
During FY 06-07, the City continued to distribute the "*Best Management Practices for Businesses – Commercial and Industrial*" brochure containing the list and description of the required minimum BMPs. Over 300 of these brochures were distributed during FY 06-07.

Inspections and Site Visits
Industrial operators select and implement appropriate source and treatment control BMPs as directed by the Storm Water Protection Program, City Planning Department, and/or City Engineering Department. BMPs are considered effective if they address the pollutants of concern and are specific enough to prevent or reduce the likelihood of an illegal discharge. The City may require BMP implementation based on problems identified during site inspections. All industrial facilities were required to implement minimum BMPs, those identified for specific industrial activities, or as directed by the City.

Website and Hotline

Information about water conservation, trash management, and storm water are combined on centralized hotline and web page accessed at www.carlsbadconserves.org. The hotline is answered by Storm Water Protection Program staff during business hours and provides a detailed voice message after hours. In addition, outreach materials continue to be revised to include the Environmental Program's hotline number, storm water hotline number, and web page address. Industries can call the hotline to request BMP information or download the information from the Environmental Programs and the Storm Water Protection Program web pages. During FY 06-07, there were 40,805 hits on the Environmental Programs web page.

The Storm Water Protection Program and Environmental Programs Division worked with the Information Technology Department to revise the Environmental Programs web page and provide updated information about storm water BMPs during FY 06-07. The webpage now includes all fact sheets and BMP brochures produced by the Storm Water Protection Program, new links to related web pages, and additional information about storm water pollution prevention.

BMP and Knowledge Assessment Tools

In FY 06-07, the Storm Water Protection Program continued to use the *BMP and Knowledge Assessment* tool to measure an individual industrial operator's knowledge of storm water issues and assess the implementation of BMPs onsite. The assessment tool is used by inspectors during site visits where industrial operators are rated using the following criteria:

Overall Knowledge Assessment

For Knowledge Assessment, inspectors rank personnel from 1-5 per the following scale:

Level 1: Individual has never heard of the storm water program, requirements, or BMPs. This individual does not know what BMPs are or understand how to implement them.

Level 2: Individual has a general awareness of water quality issues, but does not understand the requirements of the storm water program, BMPs, or pollution prevention.

Level 3: Individual has a general understanding of storm water issues ("*I've heard something about that*"), but not specific storm water requirements or BMPs required for the facility.

Level 4: Individual has a clear understanding of BMPs but may not have a clear awareness of the connection between pollution prevention and water quality.

Level 5: Individual demonstrated an in-depth knowledge of the storm water program and BMPs consistent with the facility's activities and operations.

Overall BMP Assessment

For BMP Assessment, inspectors rank the facility from 1-5 per the following scale:

Level 1: An illegal discharge was noted during the inspection. Enforcement actions such as a NOV and/or citation are required.

Level 2: BMPs have not been implemented. Several violations were noted during the inspection, however an illegal discharge was not observed. A detailed inspection report and/or written warning was issued.

Level 3: BMPs have been implemented throughout the site, but not properly or adequately maintained. Violations were noted during the inspection and a verbal warning was issued. A detailed inspection report or written Warning Notice may follow.

Level 4: BMPs implemented effectively, however minor violations associated with communal areas or good housekeeping practices (i.e., dumpsters open, leaves in the parking lot, etc.) were noted during the inspection.

Level 5: All BMPs implemented effectively. No violations noted during the inspection.

Table 3.2: Industrial Businesses Rated for Each Score

Rating	Knowledge Assessment (raw score)	Knowledge Assessment (%)	BMP Implementation (raw score)	BMP Implementation (%)
1	2	0%	1	.5%
2	12	2%	3	2%
3	14	10%	40	24%
4	24	18%	65	38%
5	95	70%	60	35.5%
Total	135	100%	169	100%

Table 3.2 shows the number of instances in raw score and percentage that industrial businesses rated for each score, with 5 being the highest score possible. There were a total of 135 businesses assessed for Knowledge and 169 assessed for BMP implementation. The number of BMP Assessments collected is usually higher than the number of Knowledge Assessments collected, because on at least 34 occasions, a company representative was not available to complete the Knowledge Assessment. According to the results of the Knowledge Assessment, 98% of the businesses surveyed had at least a general understanding (score above Level 3) of storm water issues, which is greater than the 85% reached in FY 05-06. This assessment shows that the City's efforts to educate industrial business about storm water issues have been successful. As far as BMP implementation, the results show that the City continues to be successful in ensuring that the businesses have implemented BMPs throughout the sites at least 97.5% of the time. This is also an improvement over FY 05-06 which showed that industrial businesses had implemented BMPs throughout the site 86% of the time. The City will continue to work with businesses to not only educate them about storm water issues, but also ensure BMPs are implemented and maintained.

3.4 Industrial Monitoring Program

The Regional Board requires regulated industries to conduct monitoring as outlined in the General Permit. The Carlsbad Municipal Code also allows the City to require non-permitted facilities to conduct monitoring. Permitted facilities are required by the State to maintain self-audit reports, SWPPPs, monitoring reports, and annual reports onsite.

In response to the Regional Board's September 18, 2007 FY 05-06 JURMP Annual Report review comment #4:

The City ensures that annual water quality monitoring is conducted at each high priority industrial facility by reviewing monitoring results during annual inspections to verify that monitoring was conducted as required. If and when monitoring was not completed as required the City issued NOVs and notified the Regional Board of non-compliance issues. Specifically, in FY 05-06 one NOV was issued to a High

Priority industrial facility for lack of sampling results, and it was referred to the Regional Board for followup. A description of corrective actions and follow up enforcement actions for FY 05-06 can be found in Table 3.3 of the FY 05-06 City of Carlsbad Annual report.

City inspectors reviewed monitoring results during inspections to verify that monitoring was conducted as required. The monitoring results, when available, were entered into a database so that annual comparisons could be made. A spreadsheet has been developed to track monitoring results received from regulated industrial facilities. The spreadsheet was revised during FY 06-07 and contains enough results to provide feedback to industries. During FY 06-07, the City analyzed monitoring results, made comparisons, and provided recommendation to those industrial facilities that exceeded benchmark values. These recommendations included, but were not limited to, SWPPP revisions, implementation of new BMPs, reinforcement of implemented BMPs, and increased employee training. In addition, one high priority industrial facility was issued an NOV and referred to the Regional Board for follow up for not conducting sampling.

The City will continue to annually inspect the high priority industries, collect monitoring data, and provide feedback to industries on the effectiveness of the monitoring program and BMPs. If benchmark values routinely exceed the established parameters, the City will follow up with written notification to the facility and Regional Board and require corrective actions and/or additional BMPs to prevent or reduce the identified pollutant at its source.

3.5 Inspection of Industrial Sites

All high priority industrial sites were inspected by the City during FY 06-07. In addition, the City conducted industrial inspections at approximately 67.6% of all the prioritized facilities in accordance with the program described in the JURMP. Medium and low priority industries were inspected in response to a complaint or as needed. More frequent inspections or follow-ups were conducted for sites found to be non-compliant or placed on a compliance schedule.

Each month, several businesses were selected from the master inventory list for inspection and/or review. The City usually conducted unscheduled, follow-up, and compliance inspections at businesses that had been previously inspected. If a new business could not be excluded by review or telephone survey, then a site visit was scheduled and a comprehensive inspection conducted. Inspections were scheduled within two weeks of contacting the business.

Telephone surveys continue to determine status of home-based businesses listed as low priority industries on the inventory. Twenty-eight businesses initially identified as high, medium, or low industries were surveyed by phone. In most cases, this screening procedure determined that the wrong SIC code had been assigned during the business license application process. Home-based businesses are not typically true manufacturing facilities. In addition, City code prohibits home-based business from conducting activities outdoors or storing materials outdoors. If a business was excluded from additional inspection or regulation, the City followed up with correspondence that included a listing of the minimum BMPs required for all businesses as well as any specific industrial activity related BMPs.

In addition to physical inspections and telephone surveys, the City also reviewed (including home based businesses) 97 industries during FY 06-07. During the review process, the inspector evaluated the industry using relevant information from other City departments, databases, or licensing programs. A business could be excluded during the review process if it was found that their activities were not regulated by the City or General Permit. The most common reason businesses were excluded was because of an incorrect SIC code designation. Of the 97 businesses reviewed in FY 06-07, 3 had moved, 8 were found to be out of business, 69 were found to be active, 7 were duplicate entries, 10 were excluded

or did not require additional inspection. If the business was found to be active and not a home-based location, a physical inspection was conducted to assess potential threat to water quality. Appendix 3-1 includes the name, location, SIC, priority, and types of industrial inspections conducted in FY 06-07.

3.6 Enforcement of Industrial Sites

The City conducted follow-up inspections to determine compliance with the corrective actions outlined in the inspection report or enforcement notices. The City continued to use the Notice to Clean form and NOV form developed in FY 05-06 to facilitate prompt and proactive response from businesses.

During FY 06-07, the City responded to 2 complaints of illegal discharges originating from industrial sites or activities. When a storm water complaint was received about an industrial site or source, or an illegal discharge was observed or suspected, the City conducted a storm water inspection or investigation. If a significant and/or immediate threat to water quality was observed, appropriate actions were taken to require the responsible party to immediately cease the discharge and/or implement corrective actions. In judging the degree of severity, City inspectors also took into account any history of similar incidents or discharges. Table 3.3 includes a summary of corrective actions required by the City after inspections at high priority industrial facilities. This table also includes 36 independent businesses which represent 42 different high priority locations inspected as required during FY 06-07.

Table 3.3: Summary of Inspections, Corrective and Enforcement Actions Required at High Priority Industrial Facilities in FY 06-07.

Business Name	Insp. Date	Corrective Actions If Required FY 06-07	Enforcement Action
1. Randall International	08/29/06	Revise and update SWPPP. Provide records of employee training. Ensure samples are collected using established protocols. Identify sources of nitrates and zinc in collected samples.	NOV, Referred to RWQCB
2. Acushnet Company	08/29/06	Regularly sweep outdoor areas. Clean in and around storm drains. Replace filters as needed.	None
3. Legoland	08/31/06	No violations noted during the inspection.	None
4. NRG Cabrillo Power Operations	08/30/06	Protect materials stored outdoors.	None
5. Hawthorne Rent-It Service	09/12/06	Discard unusable equipment and materials. Protect materials stored outdoors. Ensure all employees are trained on storm water. Provide documentation of employee training for FY 05-06.	None
6. Isis Pharmaceuticals	09/16/06	No violations noted during the inspection.	None
7. Hanson Aggregates	09/21/06	No violations noted during the inspection.	None
8. Graphic Converting, Inc.	10/16/06	Clean in and around storm drains. Ensure all employees are trained on storm water. Regularly sweep outdoor areas.	None
9. Olivenhain Municipal Water District	10/17/06	A SWPPP must be developed and retained onsite. Regularly inspect and sweep outdoor areas. Protect materials stored outdoors. Clean in and around storm drains. Discard unusable materials and equipment. Use lead-acid batteries must be stored in sealed containers. Properly store hazardous materials. Keep dumpsters closed when not in use. Ensure all employees are trained on storm water.	None
10. Melles Griot Laser Division	11/28/06	Regularly sweep outdoor areas. Protect materials stored outdoors. Clean storm drain in the loading bay. Ensure all employees are training on storm water.	None

Business Name	Insp. Date	Corrective Actions If Required FY 06-07	Enforcement Action
11. Beckman Coulter	10/23/06	No violations noted during the inspection.	None
12. Callaway Golf Ball[1] Company	12/11/06	Regularly inspect outdoor areas and sweep up debris.	None
13. Schumacher Company	12/06/06	Properly store hazardous materials. Regularly sweep outdoor areas. Discard unusable equipment and materials Clean in and around storm drains. Update SWPPP as appropriate Label hazardous materials as required by law.	Verbal Warning
14. La Costa Limousine	01/31/07	Regularly inspect outdoor areas. Keep dumpsters closed when not in use.	None
15. Meadowlark Water Reclamation Facility	12/13/06	No violations noted during the inspection.	None
16. Allied Waste Company	12/12/06	No violations noted during the inspection.	None
17. Waste Management	12/12/06	No violations noted during the inspection.	None
18. Mercy Air	03/08/07	No violations noted during the inspection.	None
19. McClellan-Palomar Airport	03/08/07	Ensure tenants are trained on storm water requirements. Protect materials stored outdoors.	None
20. Express Air Aviation	03/08/07	No violations noted during the inspection.	None
21. Leading Edge Aviation	03/08/07	No violations noted during the inspection.	None
22. A&P Aircraft Detailing	03/08/07	No violations noted during the inspection.	None
23. Aero Pacific	03/08/07	No violations noted during the inspection.	None
24. Civic Helicopters	03/08/07	No violations noted during the inspection.	None
25. Barnstorming Adventures	03/08/07	No violations noted during the inspection.	None
26. Hanger One Inc.	03/08/07	No violations noted during the inspection.	None
27. Jet Source Inc.[2]	03/08/07	No violations noted during the inspection.	None
28. Palomar Airport Center	03/08/07	No violations noted during the inspection	None
29. Quality Aircraft Care	03/08/07	No violations noted during the inspection.	None
30. West Coast Jet Services	03/08/07	No violations noted during the inspection.	None
31. Western Flight[3]	03/08/07	No violations noted during the inspection.	None
32. Federal Express Corporation	04/25/07	No violations noted during the inspection.	None
33. Encina Waste Water Facility	04/11/07	No violations noted during the inspection.	None
34. Leucadia Waste Water District	05-17-07	No violations noted during the inspection.	None
35 North Coastal (Palomar) Landfill	06/22/07	No violations noted during the inspection.	None
36. Aalto Scientific Ltd	06-06-07	Sweep up trash and debris in outdoor areas Store metal products/parts in covered areas only.	NOV

The Enforcement Response Plan continued to be used by City inspectors to identify, document, and respond to storm water violations. See the City's *Enforcement Response Plan* (FY 01-02 JURMP Annual Report) for a detailed description of the typical escalating enforcement procedures.

[1] Includes three Callaway Golf high priority facilities.
[2] Jet Source represents 4 high priority industrial locations.
[3] Western Flight represents two high priority industrial locations.

The Storm Water Protection Program had three full-time environmental specialists and one part-time intern to conduct inspections in FY 06-07. In addition to completing the Peace Officer Orientation II Laws of Arrest Course (40 hours of a POST certified course pursuant to Section 832(a) of the California Penal Code), the Environmental Specialists are continually trained on code enforcement, inspection procedures, laws and regulations, and investigation techniques. Storm Water Protection Program staff attended the following training during FY 06-07:

- July 2006 Storm Com, Denver, Co
- September 2006 Incident Command System, Carlsbad, Ca
- September 2006 CASQA Conference, Sacramento, Ca
- January 2007 Hazardous Waste Operations and Emergency Response, San Diego, Ca
- May 2007 24 Hour HAZWOPER, San Diego, Ca.
- June 2007 Storm Com, Woodland Hills, Ca

These training courses, in addition to the Enforcement Response Plan, helped the Storm Water Protection Program appropriately identify and respond to storm water violations. The City took a total of 14 enforcement actions against industrial facilities during FY 06-07. These are listed in Table 3.4.

Table 3.4. Number of Industrial Enforcement Actions in FY 06-07

Industrial Priority	Verbal Warning	Written Warning	Notice of Violation	Notice to Clean	Administrative Citation
High	2	0	2	0	0
Medium	2	4	3	0	0
Low	0	0	0	1	0
Totals	4	4	5	1	0

Escalated enforcement actions were taken when necessary to achieve compliance. In some cases, an informational letter or written warning was escalated to a NOV if compliance was not achieved with the first action. More detailed information on complaint response and illegal discharge investigations is found in Section 8. The following is a discussion of the NOVs issued to high priority industrial facilities during FY 06-07.

Aalto Scientific

Aalto Scientific has been covered under the General Permit since 2004 (WID 9-37I019035). The SIC code currently assigned to Aalto Scientific is 2835 (In Vitro and In Vivo Diagnostic Substances). Aalto Scientific staff had previously implemented a number of BMPs throughout the facility to prevent the discharge of pollutants to the storm drain conveyance system. However, during the FY 05-06 inspection City staff found that BMPs had not been maintained. In addition, Aalto Scientific was not able to provide documentation of key components of the SWPPP.

On July 7, 2006, the City issued a NOV to Aalto Scientific requiring immediate corrective action to address the storm water violations observed during the inspection. On August 8, 2006, the City received correspondence from Aalto Scientific documenting the implementation of corrective actions. Follow-up inspections to verify compliance are regularly conducted at this facility.

Randall International

As a mandatory industry Randall International is required to comply with the requirements of the General Industrial Permit. However, because of several organizational changes they have not been able to maintain compliance with the General Industrial Permit. On August 29, 2006, the City conducted an annual compliance inspection of Randall International and found that staff could not provide

documentation that the storm water program had been implemented as required by the General Industrial Permit.

On August 31, 2006, a NOV was sent to Randall International requesting documentation of the SWPPP, Monitoring Plan, storm water sampling results, and employee training program. The inspection report required a response by September 11, 2006. On September 12, 2006, Randall International responded to the NOV stating that the requested documents had been developed and will be continuously maintained.

3.7 Non-Compliance Notification Action Plan

All industrial facilities were required to maintain compliance with the Carlsbad Municipal Code and the JURMP, as applicable to their operations. The City forwarded copies of all correspondences and actions pertaining to high priority industries to the Regional Board. Actions related to medium priority sites were also forwarded to the Regional Board if the facility was considered non-compliant or if the filing status needed to be documented (i.e. recommended NOI filer or NONA certification required). If an incident or practice of non-compliance occurred at an industrial facility, City inspectors determined if it posed a threat to human or environmental health by considering the following criteria:

- Characteristics, quantity, and toxicity of substances/materials involved;
- Proximity of site to a sensitive water body;
- Proximity of site to an impaired water body;
- Proximity of site to a sensitive habitat/endangered species;
- Estimated volume of actual and/or potential discharge; and
- If discharges to storm drain, condition of storm drain (clog, etc.).

If an incident of non-compliance was determined to pose a threat to human or environmental health (in conjunction with the Carlsbad Fire Dept.) the City provided verbal notification to the Regional Board within 24 hours, followed by a written report within 5 days. There was one incident of this nature that occurred during FY 06-07 that is described next.

On November 14, 2006, the City received a complaint investigation request from the RWQCB (ID Number - 176) regarding an illicit discharge from the NRG Cabrillo Power Station (NRG). The complaint investigation request was sent directly to the Storm Water Manager, who sent a preliminary response to the RWQCB notifying them that a case had been opened and that the investigation had begun. The City contacted the NRG Cabrillo Power Station and was informed that on November 13, 2006 at approximately 5:30pm, NRG staff observed a white foamy material discharging from the 96 inch storm drain outfall located on the north side of the property. Although the discharge appeared to be small in quantity it spread to several areas within 150 feet of the outfall. The substance dissipated before reaching the ocean outfall. NRG staff conducted an upstream investigation and could not find the source of the discharge. On the morning of November 14, 2006, the discharge was not observed in or around the outfall. NRG staff conducted another upstream investigation and again did not observe the substance.

The City conducted a follow up site visit and investigation of the discharge on November 15, 2006. NRG representatives escorted City inspectors through the site, starting at the outfall and upstream through the NRG property boundaries. No illicit discharges were observed by the City inspectors. The City inspectors also checked the storm drain boxes upstream and outside the property line, located on the south side of NRG. Three storm drains were checked and no discharges were observed. In addition, Cannon Lake was checked and no unusual observations were made. The RWQCB was notified of the results of the investigation on November 17, 2006, and since no evidence of the discharge was observed, no follow up actions took place.

3.8 Self-Assessment

Program Strengths

The City added a new Environmental Specialist I position to the department in FY 06-07. In addition, an existing vacant position for a Senior Environmental Specialist was also filled.

Storm Water Protection Program procedures were reviewed and revised during FY 06-07 to include detailed information about work activities, project documentation, filing, SIC Code assignments, inventory management, and complaint response. All Storm Water Protection Program staff were trained on the revised procedures. The procedures will continue to be reviewed annually to ensure they are the most effective and efficient means of program management and compliance. As a result of the procedure reviews, the City found that several "low" priority industrial businesses had been incorrectly prioritized. During the year corrections were made and several of these businesses were moved to the correct designation of commercial "high."

The Storm Water Protection Program and Environmental Programs Division worked with the Information Technology Department to revise the Environmental Programs web page and provide updated information about storm water BMPs. The webpage now includes all fact sheets and BMP brochures, links to related webpages, and additional information about storm water pollution prevention.

The revised streamlined inspection report created in FY 05-06 continued to be used throughout FY 06-07 and was an effective and prompt means to have industries implement corrective actions. The revised streamlined inspection form now includes spaces to report previous enforcement actions, new storm water contacts, and a detailed list of necessary corrective actions.

The Storm Water Protection Program continues to use the effectiveness assessment measures for industrial businesses. This includes both knowledge and BMP implementation assessment conducted by the inspector. According to the results of the *Knowledge Assessment* in FY 06-07, 98% of the industrial businesses surveyed had at least a general understanding of storm water issues that is an increase of 13% over FY 05-06. This assessment shows that the City's efforts to educate industrial businesses about storm water issues have been successful. The *BMP Assessment* results for FY 06-07 show that the City has been successful in ensuring that BMPs had been implemented at least 97.5% of the time. This is also an improvement over 05-06 which showed that industrial businesses had implemented BMPs throughout the site 86% of the time.

The City continued to maintain regular communications with the Industrial Compliance Unit of the Regional Board. In addition to forwarding copies of inspection reports and other correspondence with high and medium industries, the City regularly coordinated compliance issues with the Regional Board over the phone and through emails. On several occasions, the Regional Board expressed their appreciation of the City's professionalism, responsiveness, and implementation of the storm water program.

In July 2006, the City passed a new Special Events Ordinance modeled after similar special event ordinances from other jurisdictions and includes: new application and approval time lines, notification requirements for areas affected by events, updated sign regulations, cost recovery requirements, environmental consideration, and enhanced penalties for violations. Specifically, the Special Events Ordinance includes requirements for industrial business that sponsor events to include "run-off containment features" in event planning, recycling and trash management, and all events must be covered by a site and event specific "plan to control water run-off and other contaminants that" have the potential

to enter the City's storm drain system. The adoption of the ordinance will help the City better manage resources and ensure compliance with the Permit**.**

The City continued to distribute the "*Best Management Practices for Mobile Service Providers*" brochure to all applicable businesses and residents. The brochure was specifically designed to provide BMP guidance to residents, industrial businesses that use mobile service providers, and mobile business that provide services at off-site locations.

The City continued to recruit interns from local universities to work with storm water staff. During FY 06-07, the Storm Water Protection Program had one intern working on various projects, including industrial inspections, data management, water quality monitoring, and outreach and education. Their assistance with inspections, monitoring data entry, and investigations increased productivity and helped the program achieve inspection goals.

During FY 06-07, Waste Management continued to identify problem trash and recycling areas and forward information quarterly to the City for additional enforcement. When trash violations are noted at industrial facilities, City inspectors followed up either during the next scheduled inspection or immediately, depending on the severity of the complaint. This program has been beneficial in tracking businesses with continuous trash problems and initiating enforcement actions for those egregious violators.

The Storm Water Protection Program staff continued to work with the City Attorney's office to revise the ordinance to reflect current enforcement levels and mechanisms. Revision and Council approval occurred in early FY 07-08.

Program Improvement Areas

In late FY 05-06, the Storm Water Protection Program began drafting a "*Best Management Practices Manual*" that includes the minimum and required BMPs for activities and pollutant sources. The manual was worked on during FY 06-07 and should be completed in FY 07-08.

During FY 06-07, staff continued to revise the brochures and fact sheets and update them to reflect changes in the program.

The Regional Board is currently revising the language and procedures outlined in the General Industrial Permit. When the General Industrial Permit is reissued, the City intends to host a workshop in conjunction with Regional Board staff for all industries in Carlsbad to discuss the new General Industrial permit guidelines, compliance issues and address any concerns businesses might have about the new permit.

All affected city departments are working on revising programs and procedures to address new permit requirements applicable in January of 2008.

Section 4
Commercial Component

4.0 Overview

The City continues to track, inspect, and monitor high priority commercial businesses within its jurisdiction. Major commercial types in Carlsbad are automobile maintenance, restaurants, shopping centers, pressure washing, masonry and concrete work, carpet cleaning, and landscape services. These high priority activities have the potential to generate significant amounts of pollutants, if performed with disregard to the environment. The City has implemented a program to inspect high priority facilities, ensure compliance with applicable regulations, and reduce pollutant runoff from commercial sites and sources. During FY 06-07, the City maintained an inventory of 628 commercial businesses.

During FY 06-07, the City updated and prioritized the commercial inventory, mapped all high priority commercial facilities, and inspected 385 high priority commercial businesses. Inspections not only included physical inspections, but also reviews, phone contacts, and drive bys all in an effort to conduct education and outreach, obtain compliance, ensure BMP implementation, and use escalated enforcement actions, when necessary. These activities are further described in the following subsections.

4.1 Source Identification and Threat to Water Quality Prioritization

Storm water inspectors identify pollution sources, assess the potential threat to water quality, and require BMP implementation to eliminate pollution sources from commercial businesses. Each year hundreds of new businesses are established in Carlsbad. The Storm Water Protection Program works closely with the Finance Department to obtain information about new businesses, including activities, SIC codes and descriptions, business types, and contact names and numbers. Each quarter the Storm Water Protection Program downloaded, sorted, mapped, and prioritized new businesses by SIC and business type.

These new businesses were then added to the inventory list and scheduled for inspection. In some cases information provided on business license applications was not correct and a pre-inspection evaluation was necessary. Pre-inspection evaluations helped determine if a business' activities were subject to storm water requirements. Two types of pre-inspection evaluations were used:

1. Reviews: Business license information and other relevant data was+ reviewed to determine whether the business should be inspected and tracked by the Storm Water Protection Program.
2. Telephone Contacts: If the review fails to provide enough information, the inspector will contact the business by phone to determine their status and schedule an inspection if necessary.

After physical inspections, reviews, or telephone contacts, any changes to a business' priority or status was recorded on the Storm Water Inventory List and/or in the Permits Plus database. New businesses were also found by referral from other agencies, field discovery, or business directories. The updated FY 06-07 year end commercial inventory can be found in Appendix 4-1.

Data related to commercial businesses is managed on a continual basis per departmental procedures and JURMP requirements. All documents related to commercial businesses were filed according to status (active, inactive, excluded, or out of business). Appendix 4-2 contains a map of all high priority commercial facilities on the FY 06-07 inventory. Because restaurants and automotive facilities represent the largest commercial groups, the map contains separate symbols for the locations of these facilities.

At the end of FY 06-07, the inventory included 628 high, commercial businesses. This compares to 499 high priority commercial businesses identified at the beginning of the reporting year. The high priority commercial businesses on the inventory continue to be reviewed in response to complaints and as resources become available. As a part of the City's watershed activities, staff conducted inspections at 88% of all restaurant facilities during FY 06-07.

During FY 06-07, the SIC code identification and assignment procedure was again revised to include additional SICs not previously covered by staff review. In addition to adding several SICs, staff found that some businesses had not been prioritized correctly. As a result several business previously identified as industrial "low" were moved to the commercial "high" category. Table 4.1 provides a summary of commercial business by sources type. A total of 24 SIC code groupings related to high priority commercial activities were identified.

Table 4.1 - Summary of Commercial Businesses for Source Types

Commercial Activity	# On Inventory
01XX: Agricultural Production Crops	**13**
02XX: Agricultural Production Livestock and Animal Specialties	**1**
07XX: Agricultural Services	**47**
1521: General Contractors	**30**
1531: Operative Builders	**2**
17XX: Construction Special Trade Contractors	**80**
5032 – Tile Cutting	**1**
51XX: Wholesale Trade Non-Durable Goods	**7**
5211: Lumber Services	**1**
5231: Wholesale Paint, Glass, and Wallpaper	**1**
5261: Retail Nurseries	**3**
53XX: General Merchandise Stores	**4**
54XX: Food Stores	**20**
55XX: Automotive Dealers and Gasoline Service Stations	**49**
58XX: Eating and Drinking Places	**176**
5912: Drug Stores and Proprietary Stores	**3**
5943: Stationary Store	**1**
5963: Direct Selling Establishments	**1**
65XX: Real Estate	**14**
7011: Hotels and Motels	**6**
72XX: Dry Cleaning Plants and Laundry Services	**5**
7217: Carpet and Upholstery Cleaning	**13**
73XX: Business Services	**74**
75XX: Automotive Services Repair and Parking	**60**
76XX: Repair Shops	**4**
79XX: Amusement and Recreation Services	**11**
8059: Nursing Homes	**1**
TOTAL	**628**

Table 4.1 shows that the greatest number of commercial sources of pollution may be from restaurants. Restaurants contribute to storm water pollution through improper housekeeping practices that allow grease, trash, and cleaning products to discharge to streets and the storm drain system. Because restaurants have been identified as a significant pollutant source, the Storm Water Protection Program has intensified efforts to provide BMP information, conduct unscheduled inspections, and escalate

enforcement actions, when necessary. Of the 176 active restaurants on the end of year inventory, 155 were physically inspected by the Storm Water Protection Program in FY 06-07.

4.2 Pollution Prevention

Pollution prevention activities are proactive approaches commercial businesses can use to identify and reduce pollution sources. Proactive pollution prevention, when framed in the context of appropriate and specific BMP identification and maintenance, is key to improving regional water quality. The City's approach is to promote pollution prevention and BMP implementation to the maximum extent practicable. The City encouraged the use of BMPs during inspections, public events, in outreach materials, through direct mailings, and at workshops. City inspectors required the following minimum BMPs for all commercial businesses:

- Move or cover potential pollution sources from storm water contact. Protect materials and products that could potentially contribute to storm water pollution by storing them indoors or covering them, and providing them with secondary containment as needed.
- Use dry cleanup methods. Washing or cleaning activities that involve the use of a water hose or pressure washing system were required to use dry clean up methods (mops, brooms, rags or wire brushes to clean pavement, buildings and equipment as much as possible).
- Redirect storm water flows and conduct storm drain maintenance. Perform regular visual inspections of the storm drain to identify unauthorized discharges or pollutants and clean as needed. An commercial facility may be required to modify downspout locations in order to redirect storm water flows away from potential pollutant sources.
- Trash Management. Sweep up around dumpsters and other areas to prevent trash and debris from accumulating. Dumpsters must be kept closed when not in use. All trash must be kept in appropriate sized containers until it can be hauled away.
- Recycle, Reduce and Reuse. Recycle cans, bottles, newspaper, office paper and cardboard whenever possible. When inspecting solid waste collection areas, inspectors noted if recyclable materials (cardboard, green waste, etc.) were placed in dumpsters and recycled.

SWPPPs were encouraged and/or required for commercial businesses based on inspection findings and potential threat to water quality. Commercial businesses were usually given 60-90 days to develop and submit the SWPPP to the Storm Water Protection Program for review and approval. During follow up compliance inspections, businesses were expected to provide documentation that the SWPPP had been implemented as required. If the inspector found deficiencies, the business was required to revise the SWPPP and ensure procedures and BMPs were implemented as outlined in the plan. The City continued to provide the sample SWPPP to commercial businesses as a guide for preparing site specific plans. The sample SWPPP was also provided upon request or when the current SWPPP was found to be deficient.

In July 2006, the City passed a new Special Events Ordinance modeled after similar ordinances from other jurisdictions. The new Special Event Ordinance includes new application and approval time lines, notification requirements for areas affected by events, updated sign regulations, cost recovery requirements, environmental considerations, and enhanced penalties for violations. Specifically, the Special Events ordinance requires 3commercial businesses that sponsor events to include "run-off containment features" in event planning, recycling and trash management, and site and event specific "plans to control water run-off and other contaminates that" have the potential to enter the City's storm drain system. The adoption of the ordinance will help the City better manage resources and ensure compliance with the Permit.

4.3 Best Management Practices Implementation

The City required high priority commercial businesses to implement the minimum BMPs and specific BMPs applicable to each activity and pollutant source. BMP information was made available during inspections, in printed materials, at workshops, on the website and hotline, and at outreach events. A complete listing of all outreach and education events held during FY 06-07 is in Section 9.4 of this report.

Printed Materials and Direct Mailings

During FY 06-07, the City continued to distribute the "*Best Management Practices for Businesses – Commercial and Industrial*" brochure containing the list and description of the minimum BMPs. This brochure was distributed to all commercial businesses during inspections and by direct mail to businesses that the City verified from the inventory. Over 200 of these brochures were distributed during FY 06-07.

The City continued to distribute the "Best Management Practices for Mobile Service Providers" brochure developed in FY 05-06. The brochure was designed for mobile service provides such as carpet cleaners, plumbers, pressure washers, mechanics, porta-potty services, their employees, and anyone that hires a mobile service provider. During FY 06-07, the "*Best Management Practices for Mobile Service Providers*" brochure was mailed to every applicable commercial business on the storm water inventory.

The City also continued to distribute the "*Pollution Prevention Guide for the Construction Industry*." This brochure was developed to provide BMP and pollution prevention information related to materials storage, perimeter controls, building and staging areas, dumpsters and port-a-potty services, concrete trucks and pumpers, washout areas, and storm drain protection. The brochure was distributed to commercial businesses that conduct small remodeling or home improvement projects.

Inspections and Site Visits

Commercial businesses select and implement source and treatment control BMPs as directed by the Storm Water Protection Program, Planning Department and/or the Engineering Department. BMPs are considered effective if they address the pollutants of concern and are specific enough to prevent or reduce the likelihood of an illegal discharge. The City may require BMPs based on problems identified during site inspections. All commercial businesses were required to implement the minimum BMPs, those identified for specific commercial activities, or as directed by the City.

During FY 06-07, the City continued to use the streamlined inspection report to facilitate prompt correction of violations. The streamlined inspection form includes space to report previous enforcement actions, new storm water contacts, and a detailed list of necessary corrective actions. Detailed inspection reports also continue to be used for businesses that have not been previously inspected or if the facility requires a more complex inspection (i.e. high priority facilities, egregious violators). If corrective actions were required, follow-up inspections were conducted to verify compliance.

Website and Hotline

Information about water conservation, trash management, and storm water are combined on one centralized hotline and web page accessed at www.carlsbadconserves.org. The hotline is answered by the Storm Water Protection Program during business hours and provides a detailed voice message after hours. In addition, outreach materials continue to be revised to include the Environmental Program's web page address and hotline number. During FY 06-07, there were 40,805 hits on the Environmental Programs web page.

The Storm Water Protection Program and Environmental Programs Division worked with the Information Technology Department to revise the Environmental Programs web page and provide updated

information about storm water BMPs. The webpage now includes all fact sheets and BMP brochures, links to related web pages, and additional information about storm water pollution prevention.

Workshops

The City sponsored a four-week training opportunity for residents and lawn and garden professionals. The "*Master Composter Training Course,*" was held on consecutive Saturdays between February 24 and March 17, 2007. The Storm Water Protection Program distributed a flyer, information letter, and lawn and garden BMPs to all landscape and garden care businesses in Carlsbad.

BMP and Knowledge Assessment Tools

The Storm Water Protection Program continued to use the *BMP and Knowledge Assessment* to measure knowledge of storm water issues and assess the implementation of BMPs onsite. The assessment tool rated a commercial operator and site using the following criteria:

Overall Knowledge Assessment:

Inspectors rank personnel from 1-5 per the following *Knowledge Assessment* scale:

Level 1: Individual has never heard of the storm water program, requirements, or BMPs. This individual does not know what BMPs are or understand how to implement them.

Level 2: Individual has a general awareness of water quality issues, but does not understand the requirements of the storm water program, BMPs, or pollution prevention.

Level 3: Individual has a general understanding of storm water issues ("*I've heard something about that*"), but not specific storm water requirements or BMPs required for the facility.

Level 4: Individual has a clear understanding of BMPs but may not have a clear awareness of the connection between pollution prevention and water quality.

Level 5: Individual demonstrated an in-depth knowledge of the storm water program and BMPs consistent with the facility's activities and operations.

Overall BMP Assessment

Inspectors rank the facility per the following 1-5 *BMP Assessment* scale:

Level 1: An illegal discharge was noted during the inspection. Enforcement actions such as a NOV and/or citation are required.

Level 2: BMPs have not been implemented. Several violations were noted during the inspection, however an illegal discharge was not observed. A detailed inspection report and/or written warning was issued.

Level 3: BMPs have been implemented throughout the site, but not properly or adequately maintained. Violations were noted during the inspection and a verbal warning was issued. A detailed inspection report or written Warning Notice may follow.

Level 4: BMPs implemented effectively, however minor violations associated with communal areas or good housekeeping practices (i.e., dumpsters open, leaves in the parking lot, etc.) were noted during the inspection.

Level 5: All BMPs implemented effectively. No violations noted during the inspection.

Table 4.2: Commercial High Businesses Rated for Each Score.

Rating	Knowledge Assessment (raw score)	Knowledge Assessment (%)	BMP Implementation (raw score)	BMP Implementation (%)
1	2	1	9	4
2	10	6	24	11
3	52	33	33	14
4	55	35	70	31
5	40	25	88	40
TOTAL	159	100%	224	100%

Table 4.2 shows the number of instances in raw score and percentage that commercial high businesses rated for each score, with 5 being the highest score possible. There were a total of 159 businesses assessed for Knowledge, and 224 assessed for BMP implementation. The number of *BMP Assessments* collected is usually higher than the number of *Knowledge Assessments* collected, because on at least 64 occasions, a company representative was not available to complete the *Knowledge Assessment*. According to the results of the Knowledge Assessment, 93% of the businesses surveyed had at least a general understanding of storm water issues that is an increase of 11% over FY 05-06. BMP implementation results show that the City has been successful in ensuring that businesses implement BMPs throughout the sites at least 85% of the time. The City will continue to work with businesses to not only educate them about storm water issues, but also ensure BMPs are implemented and maintained.

4.4 Inspection of Commercial Sites

The City conducted high priority commercial inspections at approximately 62% of all prioritized commercial businesses in accordance with the program guidelines described in the JURMP. Site visits, reviews, and telephone contacts were the primary methods used to educate and ensure storm water compliance at commercial businesses. The City conducted inspections of commercial businesses on a complaint basis and as time and resources became available.

The City physically (excludes reviews, phone surveys, and drive bys) inspected 222 commercial businesses in FY 06-07. Storm water staff also reviewed, phoned, or conducted investigations at an additional 163 commercial facilities for a total of 385 businesses inspected during FY 06-07. At the end of the fiscal year there were 628 commercial businesses on the storm water inventory. Of these, 33 were found to be out of business, 10 had moved out of the City, 12 were duplicate entries, 5 were excluded (based on several qualifying factors including SIC Code, location, business type, and probability to contribute to storm water pollution), 440 were active, and 128 had not been reviewed.

A large percentage of businesses on the inventory list were home-based businesses. Many commercial home-based businesses are involved in the mobile trade industry (carpet cleaning, power washing, etc.), which are considered high priority commercial activities. These home-based, mobile businesses were identified, contacted and mailed appropriate BMP information. Because site inspections are not required for home-based businesses, many were reviewed by City inspectors. During the review process the inspector evaluated a commercial business using any relevant information available in other City departments, databases, or licensing programs. A business could be excluded during a review if it was found that their activities were not regulated by the City or Permit. The most common reason businesses were excluded during the review process was because of an incorrect SIC code designation.

Telephone surveys continue to be used to determine the status of certain types of home-based businesses on the commercial inventory. Thirty-seven home-based commercial businesses were surveyed by phone. In most cases, this screening procedure determined that the wrong SIC code had been applied during the business license application process. The Carlsbad Municipal Code prohibits home-based businesses from conducting activities or storing materials outdoors. Once confirmed, home-based businesses were mailed specific BMP information.

Each month several businesses were selected from the master inventory list for inspection. The City usually conducted unscheduled, follow-up and compliance inspections at businesses that had been previously inspected. If a new business could not be excluded by review or telephone survey, then a site visit was scheduled and a comprehensive inspection conducted.

Restaurants have been identified as a significant source of pollutants in the City. Restaurants contribute to storm water pollution through improper cleaning practices that allow grease, food particles, and trash to be either exposed to storm water or discharges into the street or storm drain. The City has identified 176 active restaurants within this jurisdiction. Restaurants represent over 28% of all commercial businesses tracked by the Storm Water Protection Program. In addition to conducting a restaurant workshop, the City also established an internal goal to conduct 80% of restaurant inspections during FY 06-07. The City was successful in this effort and was able to inspect 88% of all restaurants in Carlsbad. This effort resulted in 24 NOVs issued to restaurants for violations of the Carlsbad Municipal Code in FY 06-07.

4.5 Enforcement of Commercial Sites and Sources

The City conducted follow-up inspections to determine compliance with corrective actions outlined in the inspection report or enforcement notices. When a storm water complaint was received about a commercial source or an illegal discharge was observed or suspected, the City conducted a storm water compliance inspection or investigation. If a significant and/or immediate threat to water quality was observed, appropriate actions were taken to require the responsible party to immediately cease the discharge and/or correct the situation. In judging the degree of severity, City inspectors also took into account any history of similar incidents or discharges. Table 4.3 includes a summary of commercial businesses that received NOVs in FY 06-07.

Table 4.3: Summary of NOVs Issued to Commercial Businesses in FY 06-07

Commercial Business	SIC	Date of NOV	CMC Violations	
			Storm Water	Trash
Carlsbad Premium Outlets	6512	8/22/06	15.12.050 15.12.080 15.12.090	6.08.040

La Costa Resort and Spa	7997	5/9/07	15.12.050 15.12.080	6.08.040 6.08.050

Commercial sites or sources were also selected for inspection based on results of *Dry Weather Program* field screening indicating a potential problem. As more water quality data are collected, it is expected that commercial sites may be chosen for inspection in future years based on their potential to discharge a constituent of concern to a specific water body. During FY 06-07, the City responded to 66 complaints of illegal discharges originating from commercial locations or activities.

The Enforcement Response Plan continued to be used by inspectors to identify, document, and respond to storm water violations. See the City's *Enforcement Response Plan* (FY 01-02 JURMP Annual Report) for a detailed description of typical escalating enforcement procedures.

For FY 06-07, the Storm Water Protection Program had two full-time Environmental Specialists and one part-time intern to conduct inspections. Environmental Specialists are continually trained on code enforcement, inspection procedures, laws and regulations, and investigation techniques. Staff attended the following training during FY 06-07:

- July 2006 Storm Com, Denver, Co
- September 2006 Incident Command System, Carlsbad, Ca
- September 2006 CASQA Conference, Sacramento, Ca
- January 2007 Hazardous Waste Operations and Emergency Response, San Diego, Ca
- May 2007 24 Hour HAZWOPER, San Diego, Ca.
- June 2007 Storm Com, Woodland Hills, Ca

These training courses, in addition to the Enforcement Response Plan, helped the Storm Water Protection Program appropriately identify and respond to storm water violations. The City took a total of 43 enforcement actions against commercial businesses during FY 06-07. The types and numbers of enforcement actions are listed in Table 4.4.

Table 4.4. Enforcement Actions at High Priority Commercial Businesses in FY 06-07

Action	Total FY 06-07
Verbal Warning	5
Written Warning	13
Notice of Violation	24
Notice to Clean	1
Cease and Desist Order	0
Administrative Citation	0
TOTAL	43

During inspections and investigations the City required abatement of 33 illegal discharges. Most of these incidents involved construction and landscaping contractors, pool maintenance companies, mobile detailers, pressure washers, and carpet cleaning companies. Mobile service providers were added to the inventory and required to apply for business licenses. More detailed information on complaint response and illegal discharge investigations is found in Section 8 of this report. Escalated enforcement actions were taken when necessary to achieve compliance.

4.6 Self-Assessment

Program Strengths

The City added a new Environmental Specialist I to the department in FY 06-07. In addition, an existing vacant position for a Senior Environmental Specialist was also filled.

Storm Water Protection Program procedures were reviewed and revised during FY 06-07 to include detailed information about work activities, project documentation, filing, SIC Code assignments, inventory management, and complaint response. All Storm Water Protection Program staff were trained on the revised procedures. The procedures will continue to be reviewed annually to ensure they are the most effective and efficient means of program management and compliance. As a result of the procedure reviews, the City found that several “low” priority industrial businesses had been incorrectly prioritized. During the year corrections were made and several of these businesses were moved to the correct designation of commercial “high.”

The revised streamlined inspection report created in FY 05-06 continued to be used throughout FY 06-07 and was an effective and prompt means to have industries implement corrective actions. The revised streamlined inspection form now includes spaces to report previous enforcement actions, new storm water contacts, and a detailed list of necessary corrective actions.

The city continued to distribute the "*Best Management Practices for Mobile Service Providers*" brochure to all applicable businesses and residents. The brochure was specifically designed to provide BMP guidance to residents, businesses that use mobile service providers, and mobile business that provide services at off-site locations.

The Storm Water Protection Program and Environmental Programs Division worked with the Information Technology Department to revise the Environmental Programs web page and provide updated information about storm water BMPs. The webpage now includes all fact sheets and BMP brochures, links to related web pages, and additional information about storm water pollution prevention.

The Storm Water Protection Program continues to use the effectiveness assessment measures for commercial businesses. This includes both knowledge and BMP implementation assessment conducted by the inspector. According to the results of the *Knowledge Assessment*, 93% of the businesses surveyed had at least a general understanding of storm water issues that is an increase of 11% over FY 05-06. The *BMP Assessment* results show that the City has been successful in ensuring that BMPs had been implemented at least 85% of the time.

During FY 06-07, Waste Management continued to identify problem trash and recycling areas and forward information quarterly to the City for additional enforcement. When trash violations are noted at commercial businesses, City inspectors followed up either during the next scheduled inspection or immediately, depending on the severity of the complaint. This program has been beneficial in tracking businesses with continuous trash problems and initiating enforcement actions for those egregious violators.

In July 2006, the City passed a new Special Events Ordinance modeled after similar special event ordinances from other jurisdictions and includes: new application and approval time lines, notification requirements for areas affected by events, updated sign regulations, cost recovery requirements, environmental consideration, and enhanced penalties for violations. Specifically the Special Events Ordinance requires commercial businesses that sponsor events to include "run-off containment features" in event planning, recycling and trash management, and all events must be covered by a site and event specific "plan to control water run-off and other contaminants that" have the potential to enter the City's storm drain system. The adoption of the ordinance will help the City better manage resources and ensure compliance with the Permit.

The City continues to recruit interns from local universities to work with storm water staff. During FY 06-07, the Storm Water Protection Program had one intern working on various projects, including commercial inspections, data management, and outreach and education. Their assistance with inspections, water quality studies and monitoring, data entry, and investigations increased productivity and helped the program achieve inspection and investigation goals.

The City's goal was to respond to complaints "happening right now" within 30 minutes. This goal was met over 90% of the time during FY 06-07. There were several complaints filed for commercial businesses (primarily mobile commercial businesses) in Carlsbad during the reporting year and in most cases prompt enforcement action followed.

In FY 06-07, the Storm Water Protection Program staff continued to work with the City Attorney's office to revise the ordinance to reflect current enforcement levels and mechanisms. Revision and Council approval occurred in early FY 07-08.

Program Improvement Areas

In FY 05-06 the Storm Water Protection Program began drafting a "*Best Management Practices Manual*" that includes the minimum and required BMPs for activities and pollutant types. The manual continued to be worked on during FY 06-07 and should be completed in FY 07-08.

During FY 06-07, staff continued to revise brochures and fact sheets to reflect changes in the program. It is expected that this project will be completed by late FY 07-08.

Dry weather monitoring results continue to show elevated nitrate concentrations downstream from the area of Car Country Carlsbad, Carlsbad Premium Outlets, and Carlsbad Flower Fields. The City has conducted extensive inspections upstream of the sites with elevated results. To date, the Storm Water Protection Program has not been able to identify a source of the nitrates but will continue to monitor dry weather results, conduct frequent inspections, and require the implementation of pollution prevention BMPs that reduce or eliminate nitrates.

All affected city departments are working on revising programs and procedures to address new permit requirements applicable in January of 2008.

Section 5
Residential Component

5.0 Overview

The City encompasses approximately 42 square miles, with an estimated population of 101,337 residents (January 1, 2007, California Department of Finance). The residential community has a significant potential to contribute to water quality degradation. The focus of the City's pollution prevention strategy is a proactive outreach and education program that utilizes public presentations, fact sheets, direct mailers, brochures, complaint response, and the media to increase knowledge and awareness of pollution prevention and storm water BMPs.

During FY 06-07, the City continued to develop and distribute storm water BMP information to residents, host and participate in outreach events, respond to illegal discharge reports, and conduct enforcement actions to achieve compliance. The Permit requires the City to develop and implement a program to ensure residents are aware of and comply with applicable storm water regulations. In order to comply with these requirements, a comprehensive program to reduce polluted urban runoff originating from residences has been implemented. These activities are further described in the following subsections.

5.1 Threat to Water Quality Prioritization

One of the most important tasks is to identify pollution sources, assess the threat to water quality, and require the implementation of appropriate BMPs to eliminate those sources of pollution from residential locations. Each year, hundreds of new residents move into Carlsbad. The City borders over 6 miles of coastline and has three coastal lagoons partially or completely within jurisdictional limits. Because of these water bodies and their tributaries, residential activities have the potential to impact water quality. Table 5.1 identifies the constituents of concern in Carlsbad and examples of residential sources.

Table 5.1: Constituents of Concern and Examples of Residential Sources.

Constituents of Concern	Examples of contributing activities
Primary	
• Bacteria	Pet waste, sanitary sewer overflows, etc.
• Sediment	Landscaping, un-permitted grading activities, etc.
Secondary	
• Nutrients	Garden-care activities, materials storage, etc.
• TDS	Fertilizers, construction, agriculture
• Pesticides	Garden-care activities, residential pest control, etc.
• Trash	Storage of solid waste, green waste, etc.

Residents are required to use BMPs when conducting high priority activities. Residents are provided information about how their activities can adversely impact water quality and what they can do to prevent pollution. The City continues to address residential activities through outreach efforts at the local, watershed, and regional levels using the most efficient and cost-effective methods available. In addition, high priority activities were also addressed during investigations of illicit connections, illegal discharges, or other public complaints. Specific education efforts are further detailed in Section 9 of this report.

5.2 Pollution Prevention

Pollution prevention includes proactive approaches residents can take to identify and reduce pollution sources. Proactive pollution prevention, when framed in the context of appropriate BMP identification, use, and maintenance is a key component to improving regional water quality. Education is the focus of the City's residential pollution prevention efforts and is the best approach to increasing awareness, changing behavior, and providing timely enforcement of storm water violations. A comprehensive outreach and education program that increases knowledge and awareness of pollution prevention measures is continuously being implemented. Residential pollution prevention opportunities were typically incorporated into the BMP brochures and handouts specifically developed for residents. Pollution prevention messages typically contained in the City's outreach materials included:

- Use alternative, safer, or recycled products.
- Recycle and properly dispose of solid waste and hazardous waste.
- Reduce use of water.
- Use dry cleanup methods.
- Reduce the amount of hazardous materials used by implementing natural controls.
- Redirect storm water flows away from areas of concern.

The City has also successfully implemented a Household Hazardous Waste (HHW) program and continues to promote used oil recycling for all residents. During FY 06-07, the City collected and disposed of (including recycled or diverted) approximately 141 tons of HHW. More information about the HHW program can be found in Section 8.5 of this report.

The City continued to implement the HHW door-to-door pick up program approved and adopted by the Carlsbad City Council in FY 05-06. The door-to-door collection program is contracted through Clean Harbors Environmental Services Inc. and offers residents a toll-free phone number (1-800-444-4244) to call for a disposal appointment. The program provides a means for Carlsbad residents to have HHW picked up from their homes and hauled away for a nominal fee. The service costs residents a $10 co-payment (the City share is $80 per collection) for pick-up and the maximum weight allowable is 15 gallons or 125 pounds. Appointments are typically made a week from the collection date and collections occur on Wednesday or Thursdays. In addition, residents can also dispose of HHW for free at three permanent facilities in Vista, Oceanside, and Poway. The process for door-to-door collection is:

- Residents collect HHW material at home.
- Call Clean Harbors Environmental Services and schedules an appointment.
- On the day of the appointment, residents place HHW material on their porch, in front of their garage, or in a safe location and in a sealed container.
- Clean Harbors Environmental Services comes by and collects the materials.

In April 2007, the City sponsored a free HHW disposal day where Carlsbad residents could dispose of up to 15 gallons or 125 pounds of HHW materials. The event attracted 514 households, and everyone was offered the Environmental Programs brochure as well as the Door-to-Door HHW brochure. The City collected and disposed of 34.577 tons (69,155 pounds) of HHW during this event. Table 5.2 shows the types and quantities of HHW collected at the event.

Table 5.2: Items Collected During April 21, 2007 HHW Event.

Material	TOTAL Pounds
Compresses Gas Cylinders	367
Universal Waste	1,330
Electronic Waste	16,646
Reclaimable Materials (paint, motor oil, antifreeze, etc.)	15,200
Flammable Liquids and Poison	31,540
Acids, Base, and Oxidizers	1,122
PCBs	150
Aerosols	700
Other HHW	1,800
Asbestos	300
WEIGHT OF ALL HHW MATERIALS	69,155
Per Household	134.5

The public continued to use the Environmental Programs hotline and e-mail address to request information about the HHW program, trash, and recycling. In addition, the City's RFA system was used to track calls about Environmental Programs comments and questions from residents. During FY 06-07, the Environmental Programs Division responded to 30 complaints related to HHW, recycling, and solid waste. Table 5.3 includes a summary of these complaints.

Table 5.3: Summary of Environmental Programs Division Complaints

Issue Type/SubType	Total #
Recycling: Complaint	5
Solid Waste: Complaint	17
Solid Waste: Missed Collection	8
TOTAL	30

The City's Fleet Department historically served as a location where the community could dispose of used motor oil. Since 2002, the City no longer offers disposal at that location. Signs were placed to remind residents of this change. However, the signs had not been updated since 2002 and do not reflect the Environmental Programs logo, phone number, website, or appropriate disposal locations. As a result residents continued to illegally drop off used motor oil and other household hazardous waste at the Fleet gate. The Environmental Programs Division worked with the Fleet Department to develop more appropriate and accurate signs that were installed at the end of FY 06-07.

The City worked with Waste Management to add an additional day and items to the bulky item pickup schedule. Bulky item pick days for FY 06-07 were as follows:

- July 22, 2006
- October 21, 2006
- January 27, 2007
- March 24, 2007
- June 23, 2007

Water Conservation Program

The City's Water Conservation Specialist works with the Storm Water Protection Program to help address and reduce the discharge of irrigation and the pollutants it can carry. The Water Conservation Specialist responded to 353 related complaints during FY 06-07, including over-irrigation, leaks, and sprinkler line breaks in residential areas. The Water Conservation Specialist also works occasionally with home owner's associations and commercial property management companies to reduce water consumption and over irrigation.

5.3 Best Management Practices Implementation

The City continues to implement a program to reduce contaminants in urban runoff originating from existing residential areas. BMP information was made available to residents during investigations, in printed materials and direct mailings, at workshops, on the storm water website and hotline, during presentations, and at outreach events. A listing of all education and outreach events for residential audiences is in Section 9 of this report. The City has identified minimum BMPs for high priority residential activities and worked to ensure that BMPs were implemented. City inspectors required the following minimum BMPs (detailed in various fact sheets and brochures) for all residential sources:

- Move or cover potential pollution sources from storm water contact. Protect materials that could potentially contribute to storm water pollution by storing them indoors or covering them.
- Use dry cleanup methods. Washing or cleaning activities that involve the use of a water hose or pressure washing system were required to use dry clean up methods (mops, brooms, rags or wire brushes to clean pavement, buildings and equipment as much as possible).
- Residential car washing. Use soap sparingly, divert wash water to landscaped areas and pour buckets of soapy water down the sink. Never wash cars in the street or public right of way.
- Pet Waste. Clean up after pets. Use a bag to pick up waste when walking pets. Flush pet waste down the toilet or dispose of in a sealed plastic bag and deposit in the trash.
- Trash Management. All trash must be kept in appropriate sized containers until it can be hauled away. Frequently dispose of grass, debris, leaves, and other waste materials.
- Recycle, Reduce and Reuse. Recycle cans, bottles, paper and cardboard whenever possible.
- Reduce the Use of Landscape Chemicals: Decrease the use of lawn and garden care products such as pesticides, weed killers and chemical fertilizers. Consider using non-toxic pest control methods. Avoid over irrigation which washes these chemicals into the storm drain system.

Printed Materials

Since the Spring 2006, the City of Carlsbad has been offering door-to-door Household Hazardous Waste collection program. Residents gather their HHW, then call for an appointment to have these items collected and disposed of. To further educate residents about the program, the City created a new "*Household Hazardous Waste Collection*" brochure in January 2007. The new brochure includes information about the types of HHW that can be disposed of, information about why residents should participate in the program, phone numbers, addresses, Environmental Programs logo, and web address (Figure 5.1 and 5.2). During FY 06-07, the new brochure was distributed by mail and at outreach events. A copy of the revised brochure can be found in Appendix 5-1.

Figure 5.1: Front of New HHW Brochure

Dear Carlsbad Resident:

Since Spring 2006, the City of Carlsbad has been offering door-to-door Household Hazardous Waste collection. Gather your Household Hazardous Waste, then call for an appointment to have these items collected and disposed of. This service requires you pay a $10 copayment per pick-up; the City pays $80 per pick-up. Your participation will ensure that all of us are safe and that our City and its natural beauty stay clean.

To reduce the amount of Household Hazardous Waste you generate, please buy only what you need and use it up. Choose less toxic alternatives and recyclable products.

Remember, Household Hazardous Waste cannot be thrown in the trash!

Thank you for your participation.

Figure 5.2: Back of New HHW Brochure

City of Carlsbad Door-to-Door Household Hazardous Waste Collection

What is Household Hazardous Waste?

Household Hazardous Waste (HHW) includes items used every day in most homes. Items like paint, motor oil, batteries, household cleaners, lawn chemicals, fluorescent light bulbs, televisions and computer monitors contain unsafe materials and need to be disposed of in different ways than household garbage.

Why Participate?

The State of California requires by law that residents not mix HHW with their normal trash because HHW cannot be put into landfills.

How Do You Use This Service?

The City of Carlsbad recognizes that residents need an option for HHW disposal within the City's borders. Carlsbad has contracted with Clean Harbors, Inc., for the door-to-door collection of HHW. This service means that you call the toll-free number, schedule an appointment, and have your HHW picked up at your home.

Now Carlsbad residents have two options for disposal of Household Hazardous Waste:

1. You can still take your HHW to Vista, Poway or Oceanside and dispose of it for free with an appointment; or,
2. You can take advantage of this new door-to-door collection service and, with a $10 copayment, have Clean Harbors come to your home and dispose of the HHW for you.

To Take Advantage of HHW Door-to-Door Collection

- **Collect HHW items from around your home.** Please place your HHW in sealed, non-leaking containers. If possible, leave products in the original container. Products labeled *Dangerous*, *Caution*, *Flammable*, *Poison*, *Toxic* or *Corrosive* are considered Household Hazardous Waste and should be disposed of properly. It is dangerous, and illegal, to discard HHW into the trash, into a storm drain, or down the sewer drain. If you think you have some HHW but are not sure, please call Clean Harbors to check!
- **Call Clean Harbors at 1-800-444-4244 and schedule an appointment.**

On Your Appointment Date

- **Place the HHW in a safe place outside your home** – either on your porch or on your driveway close to your home.
- **Place your $10 copayment check made out to Clean Harbors, Inc., with the HHW.** Clean Harbors, Inc., will collect the HHW materials and dispose of them for you.
- The total weight that is considered per collection is up to 15 gallons or 125 lbs. of waste per pickup. If there is more, it is considered two pickups and you will need to leave a $20 copayment check.

How Often Can You Call?

You may call Clean Harbors as often as you need to. The service simply requires an appointment and a $10 copayment.

If you think you have HHW but are not sure, please call Clean Harbors.

Household Hazardous Waste includes:

- Aerosols
- Asbestos (3-foot sections)
- All Purpose Cleaners
- Antifreeze
- Auto Batteries
- Auto Fluids
- Computer Monitors
- Disinfectants
- Drain Opener
- Fertilizers
- Fluorescent Light Bulbs
- Furniture Polishes and Stains
- Gasoline
- Glue
- Household Batteries
- Household Cleaners
- Insecticides
- Kerosene
- Lighter Fluid
- Mercury Thermostats

to schedule an appointment or for additional information.

The City continued to distribute the "*Best Management Practices for Mobile Service Providers*" brochure to all applicable businesses and residents. The brochure was specifically designed to provide BMP guidance to residents, businesses that use mobile service providers, and mobile business that provide services at off-site locations.

The City also continued to distribute the "*Pollution Prevention Guide for the Construction Industry*" developed by the North County Outreach Group. This brochure was developed to provide BMP and pollution prevention information related to materials storage, perimeter controls, building and staging areas, dumpsters and port-a-potty services, tracking controls, concrete trucks and pumpers, washout areas, dirt and grading, earthmoving equipments, and storm drain protection. The brochure was distributed to residents who conduct small remodeling or home improvement projects.

In April of 2007, the City developed and distributed a new "Put Toxic Waste In It's Place" brochure designed to provide residents with information about used oil, HHW, and electronic waste disposal and recycling. The brochure includes used oil recycling locations in Carlsbad, the new HHW collection sites, phone numbers, addresses, logo, web address, and map of disposal locations, and information about electronic waster recycling and disposal (Figure 5.3 and 5.4). The brochure was distributed to residents by mail and at outreach events. A copy of the new brochure can be found in Appendix 5-2.

Figure 5.3: Front of the "Put Toxic Waste in its Place" brochure.

Reduce

... by purchasing only the amount you need.

Reuse

... the products by donating unused portions to friends or community organizations.

Recycle

... leftover household hazardous products that are recyclable and dispose of the others safely by participating in a household hazardous waste collection program.

Used Oil

- **Oil does not wear out.** The same processes that refine crude oil into lubricating oil can re-refine your used oil into certified lubricating oil using one-third the energy.
- **Do not dump your oil. It is illegal.** Please do not contaminate your oil by placing it in old containers. Take your used oil to one of these convenient centers, and close the loop by purchasing re-refined lubricating oil.

Household Hazardous Waste

What is Household Hazardous Waste?

Household Hazardous Waste includes:

Aerosols	Furniture Polishes	Oven Cleaner
Asbestos (3" sections)	Furniture Stains	Latex Paint
All Purpose Cleaners	Gasoline	Oil Based Paint
Antifreeze	Glue	Pesticides and Herbicides
Auto Batteries	Household Batteries	Pool Chemicals
Auto Fluids	Household Cleaners	Solvents
Computer Monitors	Insecticides	Televisions
Disinfectants	Kerosene	Thinners
Drain Opener	Lighter Fluid	Varnishes
Fertilizers	Mercury Thermostats	
Fluorescent Light Bulbs	Motor Oil	
	Oil Filters

Electronic Waste

Computer monitors and televisions containing cathode ray tubes (CRTs) cannot go in the trash. Discarded CRTs are considered hazardous because of the amount of lead they contain and must be handled appropriately. All electronic equipment should be reused or recycled to recover useful materials and reduce disposal.

Electronic Waste also includes:
- Large household appliances (ovens, refrigerators, etc.)
- Small household appliances (toasters, vacuum cleaners, etc.)
- Office and communication (PCs, printers, phones, faxes, etc.)
- Entertainment electronics (TVs, HiFis, portable CD players, etc.)
- Fluorescent light tubes
- Sports and leisure equipment (electronic toys, training machines, etc.)

Direct Mailers

In the fall of 2006 the Environmental Programs Division launched a new residential newsletter entitled "*Carlsbad Conserves*." The purpose of the newsletter is to inform residents of environmental issues facing Carlsbad, services provided by the City, tips of how to protect the environmental, including storm water BMPs, and calendar of important environmental dates (clean up recycling, bulky item pick up, etc.). The newsletter is distributed quarterly to all Carlsbad residents. A copy of the FY 06-07 editions of the newsletters can be found in Appendix 5-3 and 5-4.

Figure 5.5: Spring and Winter editions of the "Carlsbad Conserves" newsletter

The Carlsbad Community Services Guide is mailed three times a year to all Carlsbad households (approx. 40,000). The fall 2006 and summer 2007 editions included residential storm water BMPs and the Environmental Programs information.

Environmental Programs included information on storm water pollution prevention and BMPs in the City's Annual Drinking Water Quality Report, which was sent with water bills to approximately 36,000 Carlsbad Municipal Water District customers in June 2007 (Appendix 5-5). The purpose of the report is to provide all Carlsbad Municipal Water District customers with an overview of how potable water is delivered and how the City works to ensure that the highest quality service is provided. In addition to information on potable water, the report also included information on water conservation and how to help to protect and maintain clean water ways.

The City of Carlsbad and Coast Waste Management partnered in the creation of a revised Environmental Programs Guide that was sent to residents in January 2007. This publication was designed to offer information about how to dispose of all sorts of waste from trash and recycling to household hazardous waste (HHW). There was also information included on ways to conserve water and how to protect Carlsbad water quality by preventing storm water pollution. A copy of the revised brochure can be found in Appendix 5-6.

Website and Hotline

Information about water conservation, trash management, and storm water has been combined to one centralized web page accessed at www.carlsbadconserves.org. The Environmental Programs hotline provides information about storm water, trash, and water conservation for the public. The hotline is answered by the Storm Water Protection Program during business hours and provides a detailed voice message after hours. In addition, outreach materials continue to be revised to include the Environmental Program's web page address and hotline number. During FY 06-07, there were over 40,805 visits to the Environmental Programs web page.

The Storm Water Protection Program and Environmental Programs Division worked with the Information Technology Department to revise the Environmental Programs web page and provide updated information about storm water BMPs. The webpage now includes all fact sheets and BMP brochures, links to related web pages, and additional information about storm water pollution prevention.

Workshops

The City sponsored three workshops geared at educating residents about the benefits of composting. The workshops were held on September 30, October 28, and November 11, 2006. At the workshops, residents received information on water conservation, mulching, plant selection, vegetable peels and turning leaves, and the basic techniques necessary for successful composting. These educational workshops also clearly demonstrated the relationship between water conservation, solid waste, and storm water. Residents were also provided with information on alternative chemical products, including integrated pest management, and were given information on the City's HHW collection facilities.

Presentations

Twice a year, the City hosts a program called "*Citizen's Academy*." This seven week course (one night per week) educates Carlsbad residents about City government and public services. A *PowerPoint* presentation, which included an overview of the Storm Water Protection Program, related Permit, regulations, and program activities, was presented at the academy. Approximately 60 residents attended two academies held on October 12, 2006 and March 29, 2007.

Events

On March 17, 2007, the City's Recreation Department sponsored a community-wide clean up and tree planting event at Hosp Grove in Carlsbad. Residents from various Carlsbad neighborhoods joined together to plant trees, prune bushes, and remove trash from Carlsbad historic Hosp Grove area.

The Storm water Protection Program participated in the first annual "Water Festival" with the Agua Hedionda Lagoon Foundation. The event was held on March 25, 2007, and attracted a diverse group of residents and community leaders all interested in celebrating and supporting the importance of World Water Day.

In September 2006, the City sponsored its annual "*Buena Vista Creek Clean Up*" event. Over 55 volunteers, several of them Carlsbad residents, collected over 3 tons of trash and recyclables along Buena Vista Creek. The clean up effort was a part of the annual California Coastal Cleanup Day. Common items found included fast food containers, recyclable glass and plastic beverage containers, and cigarette butts. Larger items included tires, bed frames, carpets, and wood pallets.

On April 28, 2007, the City sponsored a clean up site for the annual Regional Creek to Bay Clean Up event. Statewide, the Creek to Bay Clean up has the highest turnout with over 2,500 volunteers helping out at 41 cleanup sites. Those hard-working volunteers picked up an estimated 102,000 pounds of debris. For the Carlsbad event, the City selected a site near Batiquitos Lagoon where a significant amount of

debris and litter had accumulated. This was the first year volunteers had cleaned the site and they were successful in removing 1.8 tons of trash and debris from the area.

One September 10, 2006, the City held its annual "*Fiesta Del Barrio*" event in downtown Carlsbad. The event was designed to celebrate Carlsbad residents raise awareness of the Barrio's presence and historical significance. The Storm Water Protection Program was onsite to distribute BMP information in Spanish and English.

Promotional Items

The Storm Water Protection Program continued to distribute pollution prevention message pens to municipal employees and the Carlsbad community. Items such as water bottles, notepads, mouse pads, and cups with the storm water hotline and other pollution prevention messages continued to be distributed to residents.

In April 2007, the City produced and distributed a new HHW magnet that includes information about HHW disposal location for Carlsbad residents (Figure 5.6). The new magnets will continually be distributed during presentations and other outreach events.

Figure 5.6: New HHW Magnet

During FY 06-07, the City purchased and distributed recycling bags to residents at various events. The recycling bags include the Environmental Programs logo and phone number, and were designed to encourage residents to recycle aluminum, glass, paper, and other materials.

Neighborhood Outreach Campaign

As a result of the *Dry Weather Monitoring Program*, several neighborhoods were identified as contributing to storm water pollution through various residential activities. Follow-up investigations to water quality exceedances in the *2007 Dry Weather Monitoring Program* prompted the City to educate residents in five specific neighborhoods. In response, the Storm Water Protection Program conducted a targeted outreach campaign to those identified neighborhoods. The identified neighborhoods were delineated using the City's interactive GIS. Layers were turned on to show the streets, parcels, and storm drain system in the identified neighborhoods. Subsequent to Dry Weather Monitoring in 2007, the City sent an informational letter and BMPs to residential areas that were identified as potential contributors to storm water pollution (e.g., pet waste, car washing, and landscaping activities). Table 5.4 includes a summary of the number of homes targeted and the information they received mailed in FY 07-08.

Table 5.4 Targeted Neighborhood Education.

Neighborhood Site	Number of Homes	Brochures Distributed
AH-65	264	Over-watering, landscape maintenance
BA-06	100	Over-watering, landscape maintenance, pet waste
BV Creek (Calavera Hills)	142	Landscape waste and over-watering, pet waste
BA-36	70	Pet Waste
BA-40	251	Over-watering
Total	**827**	

5.4 Enforcement of Residential Areas and Activities

The public can report illegal discharges or any activities that may impact water quality to the Storm Water Protection Program through the storm water hotline, email address, or to other City departments. All reports and referrals were promptly investigated and resolved to the fullest extent. When a storm water complaint was received about a residential site or source, or an illegal discharge was observed or suspected, the City conducted a complete storm water investigation. If a significant and/or immediate threat to water quality was observed, appropriate actions were taken to require the responsible party to immediately cease the discharge and/or correct the situation. Specific information on the effects of storm water pollution and how to prevent future impacts to water quality through the use of BMPs was provided to residents during investigations. This information was designed to increase the public's awareness and understanding of storm water pollution prevention efforts and water quality enhancement.

When enforcement actions were necessary, City inspectors utilized the appropriate enforcement mechanisms as allowed by the Carlsbad Municipal Code, described in Section 5.4 of the JURMP, and the Enforcement Response Plan. The Enforcement Response Plan continued to be used by inspectors to identify, document, and respond to storm water violations. While the City emphasized education as the primary method for changing behavior, City inspectors and staff with enforcement authority could initiate enforcement actions against residents who discharged pollutants to the storm water conveyance system, or who failed to implement BMPs as required.

Escalating enforcement procedures provided flexibility in establishing appropriate compliance time frames. In judging the degree of severity, City inspectors also took into account any history of similar incidents or discharges and the impact to the environment. The inspectors, in accordance with the City's existing procedures and Enforcement Response Plan, documented each observed violation. Depending on the severity of the violation, enforcement ranged from a warning to monetary fines.

The City added a new Environmental Specialist I position to the Storm Water Protection Program in FY 06-07. In addition, a vacant Senior Environmental Specialist position was also filled.

During FY 06-07, the Storm Water Protection Program received 154 complaints of potential illegal discharges. Approximately half, 83 complaints, were residential in nature. Many of the complaints occurred in residential areas and involved commercial contractors or mobile businesses, however because these could be tracked to a specific business, they were counted as commercial complaints. Of the residential complaints, there were 6 where no violation was found (either because it was an exempt discharge or a source was not found as reported). A summary of all residential enforcement actions is found in Table 5.5.

Table 5.5 – Summary of Residential Enforcement Actions in FY 06-07.

Action	Total
Verbal Warning	17
Informational letter	15
Written Warning	3
Notice of Violation	2
Notice to Clean	0
Cease and Desist Order	0
Administrative Citation	0
TOTAL	37

During FY 06-07, the City continued to use the Notice to Clean form and streamlined NOV form to help facilitate prompt and proactive response from businesses. In addition to completing the Peace Officer Orientation II Laws of Arrest Course (40 hours of a POST certified course pursuant to Section 832(a) of the California Penal Code), Environmental Specialists are continually trained on code enforcement, inspection procedures, laws and regulations, and investigation techniques.

5.5 Self-Assessment

Program Strengths

The City added a new Environmental Specialist I position to the Storm Water Protection Program in FY 06-07. In addition, a vacant Senior Environmental Specialist position was also filled.

The Storm Water Protection Program and Environmental Programs Division worked with the Information Technology Department to revise the Environmental Programs web page and provide updated information about storm water BMPs. The webpage now includes all fact sheets and BMP brochures, links to related webpages, and additional information about storm water pollution prevention.

To further educate residents about the program, the City created a new "*Household Hazardous Waste Collection*" brochure in January 2007. The new brochure includes information about the types of HHW that can be disposed of, why residents should participate in the program, phone numbers, addresses, Environmental Programs logo, and web address. During FY 06-07, the new brochure was distributed by mail and at outreach events.

The City continued to distribute the "*Best Management Practices for Mobile Service Providers*" brochure to all applicable businesses and residents. The brochure was specifically designed to provide BMP guidance to residents and businesses that use mobile service providers, and mobile businesses that provide services at off-site locations.

In April 2007, the City sponsored a free HHW disposal day where 514 Carlsbad households disposed of 69,155 pounds of HHW.

The Storm Water Protection Program occasionally depends on other City departments to assist with investigations and remediation during field reviews. The City's Storm Drain Maintenance Crew was key to prompt, effective responses to residential complaints involving clean ups. Regular meetings and discussions about compliance issues and consistent contacts facilitate this coordination with departmental representatives.

The City continued to utilize university students as part of the internship program with the Storm Water Protection Program. Interns worked on a variety of activities including commercial and industrial inspections, data management, and outreach and education. Their assistance with inspections, business reviews, outreach, data entry, monitoring and investigations increased productivity.

The Storm Water Protection Program once again met the goal of responding to complaints "happening right now" within 30 minutes. This goal was met over 90% of the time during FY 06-07.

In FY 03-04, the City worked with Waste Management to develop an Environmental Programs booklet that included storm water residential BMPs, as well as detailed information on available solid waste services, including oil recycling and HHW disposal sites. The booklet was revised in FY 06-07 to reflect the most current HHW, trash, recycling, storm water, and water conservation information.

The Storm Water Protection Program staff began working with the City Attorney's office to revise the storm water ordinance to reflect current enforcement levels and mechanisms. Revision and Council approval was completed in early FY 07-08.

Program Improvement Areas

In late FY 05-06, the Storm Water Protection Program began drafting a "*Best Management Practices Manual"* that includes the minimum and required BMPs for activities and pollutant types. The manual will be continually worked on during FY 06-07 and should be completed in FY 07-08.

During FY 04-05, staff began revising brochures and fact sheets and updating them to reflect changes in the program. It is expected that this project will be completed by late FY 07-08.

Runoff from residential irrigation continues to be an issue based on complaints received and the results of the *Dry Weather Monitoring Program*. The Environmental Programs Division will continue to investigate the best ways to promote water conservation and to reduce irrigation runoff. The water conservation staff anticipates updating the water conservation ordinance in FY 07-08 to help address over- irrigation in residential and commercial areas.

The City will continue to advertise Environmental Programs and to seek the most cost-effective way to educate the public. In additional, the City will continue to work with the watershed stakeholders to address the residential community and outreach programs on a watershed basis.

Section 6
Land-Use Planning Component

6.0 Overview

The City continues to evaluate land use planning policies and principles, revise the environmental review procedures, and develop approval processes that minimize the impacts of development activities on receiving water quality. This section outlines Land-Use Planning actions implemented since the Permit was issued and during FY 06-07. It also describes the specific actions completed, in progress, or projected to meet or exceed the Permit requirements.

6.1 Assessment of General Plan

In September, 1994 the City adopted a Comprehensive Update of its General Plan. The General Plan includes goals that balance environmental protection with smart, long-term economic growth. By laying out a clear vision for environmentally sensitive development within this coastal community, development projects are required to be consistent with various City ordinances (i.e.; Grading and Erosion Control, Storm Water Management, Hillside Development, Coastal Resource Protection) and other regulatory requirements.

In July 1986, the City adopted a *Growth Management Plan* into its General Plan to guide development and anticipate the types and numbers of facilities needed to accommodate the Carlsbad community at build out. Those facilities include sewer plant capacity, sewage pipelines, reclaimed water system, and storm drain system with flood and pollution control basins.

The General Plan is reviewed annually and revised as necessary to ensure that the public interest is considered and City goals are met. On February 19, 2002 the City Council adopted General Plan Amendment GPA 01-15. This General Plan Amendment revised/supplemented various policies regarding water quality protection in the Open Space and Conservation Element. The new policies reflect water quality and watershed protection principles found in the Permit pertaining to water pollution, and were all implemented in FY 06-07. The General Plan was reviewed for Storm Water Management in FY 06-07 and no revisions were necessary. The revised policies and programs from 2002 are listed below:

a) Develop and implement a JURMP consistent with the Permit and any amendments thereof.

b) Adopt and implement a Master Drainage Plan and Standard Urban Storm Water Mitigation Plan (SUSMP) consistent with the Permit and any amendments thereof.

c) Prior to making land use decisions, utilize methods available to estimate increases in pollutant loads and flows resulting from projected future development. The City requires developments to incorporate structural and non-structural BMPs to mitigate any increases in pollutant loads.

d) Implement storm water pollution prevention methods to the maximum extent practicable, supplemented by pollutant source controls and treatment. Use small collection strategies located at, or as close as possible to, the source (i.e., the point where water initially meets the ground) to minimize the transport of urban runoff and pollutants offsite and into the MS4.

e) Post-development runoff from a site shall not contain pollutant loads which cause or contribute to an exceedance of receiving water quality objectives or which have not been reduced to the maximum extent practicable.

f) Developments shall implement appropriate recommendations to protect water quality found in the San Diego Association of Government's (SANDAG's) Water Quality Element of its Regional Growth Management Strategy.

g) Development projects should be designed to comply with the following site design principles:

- Protect slopes and channels to decrease the potential for slopes and/or channels from eroding and impacting storm water runoff.
- To the extent practicable, cluster development on the least environmentally sensitive portions of a site while leaving the remaining land in a natural undisturbed condition.
- Preserve, and where possible, create or restore areas that provide important water quality benefits, such as riparian corridors, wetlands and buffer zones. Encourage land acquisition of such areas.
- Provide buffer zones for natural water bodies.
- Minimize the amount of impervious surfaces and directly connected impervious surfaces in areas of new development and redevelopment.
- Where feasible implement site design/landscape features to slow runoff and maximize on-site infiltration of runoff.
- Properly design outdoor material storage areas (including the use of roof or awning covers) to minimize the opportunity for toxic compounds, oil and grease, heavy metals, nutrients, suspended solids and other pollutants from entering the storm water conveyance system.
- Incorporate roof or awning covers over trash storage areas to prevent off-site transport of trash and other pollutants from entering the storm water conveyance system.
- Limit disturbances of natural water bodies and natural drainage systems caused by development including roads, highways and bridges.
- Design streets and circulation systems to reduce pollutants associated with vehicles and traffic resulting from development.

The City has adopted a Local Coastal Program covering that part of the City within the Coastal Zone. Under the California Natural Community Conservation Program (NCCP), the City and six other cities in north San Diego County participated in the preparation of the Multiple Habitat Conservation Program (MHCP). The MHCP is a comprehensive planning program designed to develop an extensive ecological preserve in northwestern San Diego County. The City has prepared a subarea plan, called the Carlsbad Habitat Management Plan (HMP) that was adopted in November 2004. The Carlsbad HMP contains the specific conservation, management, facility planning, land use, and other actions the City will take to implement the goals, guidelines, and standards of the MHCP plan. This HMP prohibits development in or near natural habitat areas including creeks and lagoons. Those areas act as a buffer between urban development pollutants and receiving waters. They also protect a significant percentage of pervious surface necessary to absorb run off.

The Carlsbad City Council adopted a Zone Code Amendment (ZCA 01-08), Local Coastal Program Amendment (LCPA 01-15) and Municipal Code Amendments (MCA 01-05, 01-06, and 02-01) to revise/add new policies, standards, procedures and requirements regarding water quality and watershed protection to the Local Coastal Program Land Use Plans, Chapters 21.203 (Coastal Resource Protection Overlay Zone) and 21.205 (Coastal Resource Overlay Zone Mello I LCP Segment Local Coastal Program) of the Zoning Ordinance and Chapters 15.12 (Storm Water Management and Discharge Control) and 15-16 (Grading and Erosion Control) of Carlsbad's Municipal Code. On November 1, 2002,

the revised Zoning Ordinance, Municipal Code, and Local Coastal Plan Amendments were submitted to the California Coastal Commission. In August, 2006, the California Coastal Commission approved these municipal code amendments. All requirements of these documents were implemented in FY 06-07 and previous years while the City waited for Coastal Commission approval. Carlsbad is one of the first coastal cities in San Diego County to have amended NPDES /storm-water regulations approved by the Coastal Commission.

6.2 Modification of Development Project Approval Process Actions

The City requires proposed development projects to implement measures to ensure that pollution and runoff from the development will be reduced to the maximum extent practicable and will not cause or contribute to an exceedance of receiving water quality objectives. All project applicants are required to submit a Storm Water Requirements Applicability Checklist (Checklist) concurrent with submittal of an application for a discretionary or administrative approval in accordance with the requirements of the City's SUSMP (approved by the Regional Board on June 12, 2002). The Checklist is used by City staff to determine those projects which meet the priority development project category and are subject to the SUSMP requirements. Developments that are determined to be "priority development projects" are subjected to both the "Priority Permanent Storm Water BMP Requirements" and the "Standard Permanent Storm Water BMP Requirements" consistent with the SUSMP. A copy of the Storm Water Requirements Applicability Checklist is provided in Appendix 6-1.

Priority development projects are required to submit a *Water Quality Technical Report* consistent with the SUSMP standards before the project application is deemed complete. Additionally, applicants for priority development projects must incorporate the standard site design and source control BMPs as well as the BMPs for "Individual Priority Project Categories and Treatment Control BMPs" consistent with the SUSMP requirements. All non-exempt development projects are required to incorporate standard site design and source control BMPs consistent with the SUSMP prior to project approval. The City includes several standard conditions of approval to each discretionary and administrative approval including conditions requiring the developer to:

1. Comply with the City's Permit.
2. Submit a SWPPP prior to construction permit issuance (for projects that are subject to the *General NPDES Permit for Storm Water Discharges Associated with Construction Activities*).
3. Submit a "*Storm Water Management Plan*" (SWMP) prior to issuance of construction permits for the project (for projects that require permanent BMPs).
4. Exercise special care during the construction phase of the project to prevent offsite siltation and to comply with City planting and erosion control standards.
5. Provide proof of NOI submittal to the State Water Resources Control Board prior to start of grading work, if applicable.
6. For Priority Projects, submit a City standard BMP Maintenance Agreement prior to approval of final maps or issuance of construction permits whichever occurs first.

Additionally, special conditions are applied to projects requiring developer construction of all project related and master-planned drainage improvements in accordance with City Standards and the requirements of the Permit. There are no standard project conditions of approval applied to ministerial permits; however, each ministerial permit is required to comply with the referenced standard conditions prior to issuance of the respective ministerial permits.

In FY 06-07, the City approved fifty-five (55) development applications that were determined to be projects subject to the *Priority Permanent Storm Water BMP Requirements* as defined in the City SUSMP. A list of the fifty-five (55) "priority development projects" can be found in Appendix 6-2.

In response to the Regional Board's September 18, 2007 FY 05-06 JURMP Annual Report review comment #5:

The City requires that each treatment control BMP be incorporated within one or more of the projects construction drawings. In addition, City Standards require highlighting of each treatment control BMP within a separate information box shown on the title sheet as well as the individual construction sheet. The title sheet box lists each separate treatment control BMP included within the plans, by type, sheet number where the BMP is detailed, CASQA reference number ownership and maintenance requirements. A separate box is included on each construction sheet where individual BMPs are detailed showing BMP type and the number of separate units shown on that sheet. The BMP information boxes help to ensure construction of the required BMPs and also make it easier for City staff to locate BMPs on construction drawings so they may be entered into the City's GIS BMP inventory database.

The City ensures that all site design, source control or treatment control BMP's are not deleted from a project through strict adherence to the City's "Site Plan Substantial Conformance Policy" and "Construction Plan Revision Procedures". The Substantial Conformance Policy is used to ensure that all project design features, including treatment control BMPs, are incorporated into the final design of a project. All changes in design must be reviewed and approved by City staff. The City's Plan Revision Procedure ensures that all proposed changes in the field during construction are reviewed and approved by appropriate City staff before the change is permitted.

The City confirms the construction of each treatment control BMP with the 'as-builting' of each construction drawing. During the past year, the construction drawings for sixty-two (62) projects were "as built". Twenty-four (24) of the projects were 'high priority projects" requiring installation of structural treatment control BMPs. Through the City's construction inspection and construction drawing 'as-builting' process, the City verified installation of the required treatment control BMPs. A list of the construction drawings for the sixty-two (62) projects 'as-built' during FY 06-07 is included in Appendix 6-3.

6.3 Revisions to Environmental Review Process Actions

Consistent with the Permit, the City's Initial Study Environmental Review Checklist Form was updated in March 2001 to incorporate additional focused hydrology and water quality questions to be considered by Community Development staff during the Initial Study process under CEQA. The review of all discretionary projects is consistent with CEQA requirements. Project proposals are reviewed to ensure that all development will be in compliance with the new/revised Grading, Storm Water, and Coastal ordinances, the Permit, local permits, and all other applicable ordinances and requirements. In FY 06-07, prior to project approval and issuance of local permits, the City required each proposed project to implement measures that prevent and reduce pollutants associated with the development, to the maximum extent practicable, from impacting receiving water quality.

6.4 Education on New Development and Redevelopment

Weekly staff meetings include a review of new discretionary permits, discussions about specific/general topics about pollution control, new projects and of proper source and/or treatment control BMPs, past experiences, design alternatives, effectiveness, long-term maintenance, and other issues related to water quality. A list of all training and topics can be found in Appendix 6-4.

The City also continued to distribute the "*Pollution Prevention Guide for the Construction Industry*." This brochure was developed to provide BMP and pollution prevention information related to materials storage, perimeter controls, building and staging areas, dumpsters and port-a-potty services, concrete trucks and pumpers, washout areas, and storm drain protection.

6.5 Self Assessment

Program Strengths

City personnel continue to build upon the storm water BMP database. Procedures have been put into place to link the BMP database to the City GIS maps. The database will assist the City in monitoring locations and types of permanent BMP measures and to track maintenance inspections.

City engineering staff began a business process review of the various development processes in the City including the process for taking in and reviewing the Priority Project Checklist for ministerial and discretionary permits. Procedures to ensure that all ministerial projects were properly reviewed and records retained in compliance with the Permit and SUSMP requirements were strengthened.

The City also adopted new storm water BMP maintenance agreements in FY 06-07 and incorporated them into its standard operating procedure. The new BMP Maintenance Agreements will ensure compliance with storm water BMP maintenance requirements. The new agreements provide the City with legal authority to access, inspect, and if necessary maintain onsite BMPs. In addition, the agreements allow the City to place a lien on a property if BMPs are not maintained as required by the agreements.

In FY 06-07 the City assigned an Associate Engineer in the Development Services Division to work on storm water compliance issues related to the development review and permit approval process. The assignment has helped to advance compliance with the proposed NPDES Permit Order No. R-9-2006-0011 and to enhance implementation of BMP strategies into new and development plans. The assignment has also helped to assist in the provision of more targeted and extensive training and education of Development Services staff, private land developers, and their professional consultants with specific emphasis on incorporating source control BMPs into land development projects.

Other accomplishments brought about by the City's business process review and reassigned Associate Engineer include the development of a new BMP standard for stabilizing rough graded pads, updating of the City's Storm Water Applicability Checklist and development of a Standard Project Owner's Certificate for post construction BMPs on stand alone building permit construction projects (projects which don't require City discretionary approval).

Program Improvement Areas

The City will continue to conduct a business process review of the development project approval process in FY 07-08. In addition to other things, the business process review will address development of automated record keeping of projects for compliance with Permit and SUSMP requirements. This will help to ensure compliance with storm water regulations and to assist staff in preparing additional useful numeric data for the JURMP annual reports.

The City will develop and incorporate all new Land Use Planning Component requirements as required by the new Municipal NPDES Permit, Order 2007-01.

Section 7
Construction Component

7.0 Overview

The City has implemented activities that address and minimize impacts on receiving water quality related to run off from new construction sites. Performance goals are used to assess the completeness of this component and the effectiveness of action plans. These performance goals include construction site inspections, BMP implementation reviews, corrective actions, enforcement, and reporting requirements. During FY 06-07, the City updated the construction inventory weekly, inspected all construction sites, responded to construction related inquiries and complaints, provided outreach and education to developers, engineers, contractors and City staff, and used enforcement actions to obtain compliance when necessary. These activities are described in the following subsections.

7.1 Source Identification and Threat to Water Quality Prioritization

To assist in the prioritization and identification of threats to water quality, the City uses the Permits Plus database during the construction permitting process to develop and update a watershed based inventory of all construction sites that require grading permits regardless of site size or ownership. Construction sites with grading permits may include sites where activities such as grading, excavation, clearing, road construction, structure construction, or demolition results in the disturbance of soil. Construction permits that do not require a grading permit may include sites where activities such as single family residence, remodels, or additions, home demolitions, tenant improvements, or commercial / industrial buildings that are constructed resulting in the need for water quality protection. The City prioritized all sites with active grading permits for FY 06-07 as high priority for the purposes of conducting site inspections. The City will begin to change from all sites being categorized as a high priority to either a high, medium, or low priority according to the criteria in Order No. 2001-01 in fall of 2007. All construction sites will be appropriately prioritized in accordance with Order 2007-0001 by January 24, 2008. The inventory is maintained throughout the year and updated weekly.

7.2 Pollution Prevention

Pollution prevention consists of procedures and practices that eliminate or reduce the pollutants at the source. The City has identified and required implementation of the following pollution prevention controls for all applicable construction sites:

- SWPPPs and erosion control plans are required for grading permits and appropriate construction projects. These plans are checked by the City to ensure they adequately address the provisions of the General Construction Permit.
- Construction Management and Inspection (CMI) and contracted Construction Storm Water inspectors enforce the implementation and effectiveness of BMP's described in approved erosion control plans and SWPPP's.

The City has adopted the pollution prevention measures contained in the *Storm Water Best Management Practice Handbooks*, published by the California Storm Water Quality Association (CASQA), Caltrans Storm Water Quality Handbooks, and *Standards for Design & Construction of Public Works Improvements in the City of Carlsbad*.

7.3 Construction and Grading Approval Process

During FY 06-07, the City continued verifying the Notice of Intent (NOI) validity prior to issuance of a grading permit or Notice to Proceed for CIP projects. Prior to having a pre-construction meeting and issuing a grading permit, CMI verifies a valid NOI is in place for projects as required by the State. The Construction Manager reviews the State's online database to ensure a NOI has been issued prior to assigning the project to an inspector for grading permit issuance.

The City updated the Construction and Grading approval process during FY 03-04 and continued implementing this process in FY 06-07. The City ensures that all construction sites with a grading permit implement measures to reduce pollutants to the maximum extent practicable. Prior to approval of a grading permit, the project proponent is required to implement measures to ensure that pollutants from the site will be reduced to the maximum extent practicable and will not cause or contribute to an exceedance of water quality objectives. The City is meeting this obligation by amending or conditioning existing permits, procedures and ordinances that are already in place. The general project review process for obtaining a grading permit is as follows:

- Identify the project's BMP requirements.
- Determine adequacy of project's proposed storm water BMPs.
- Include BMP requirements in permit conditions, and/or plans and specifications.
- Review previously approved discretionary permits during the construction permit process for post-construction BMPs identified in discretionary approvals, or equivalent (where applicable).
- Review proposed revisions to approved projects for additional storm water requirements (where applicable).

In previous years, the City modified its requirements to be consistent with the General Construction Permit, requiring projects one acre or larger to prepare a SWPPP, and continued implementing this requirement in FY 06-07. The City has also defined a process to outline how BMPs and other pollution prevention measures will be required and implemented. The process has been in place for several years and is described as follows:

<u>Construction Permit Application</u>
A fact sheet (checklist used to define applicability of requirements) has been developed in accordance with the Permit that identifies and prioritizes construction activities. The fact sheet is completed by the construction permit applicant and reviewed by Development Services staff who also assist the applicant in determining the appropriate BMPs and documentation required (SWPPP, SWMP, erosion control plan, minimum BMPs, etc.) to complete the permit application.

Previously only the construction sites that required a grading permit would be required to use the fact sheet. However, during FY 06-07 all construction permit applications, including the ministerial permits, are required to use the fact sheet during the application process. It should be noted that the City's grading ordinance is very strict and captures the majority of all construction sites. The ministerial permits process now includes minimum BMP's; this captures construction sites that may not have a grading permit. An example of these ministerial permits would be one single residential home construction with minimal grading, home remodeling, and commercial site tenant improvements.

<u>Construction Permit Processing</u>
Based on the initial project information and assessment contained in the permit application, staff reviews applications to determine the adequacy and accuracy of the information. During the permitting process, the appropriate BMPs, pollution prevention methods, and documents necessary (SWPPP, SWMP, and minimum BMPs) are reviewed and incorporated into the permit requirements.

The City implemented the construction and grading requirements of Order 2001-01 into local construction and grading permits. A grading permits checklist was developed to ensure construction and grading requirements are incorporated into the construction/building permits and the City continued to use this checklist in FY 06-07. The following construction and grading requirements are incorporated into the construction and building permits through the use of a checklist:

The project proponent must:

- Develop and implement a plan to manage storm water and non-storm water discharges from the site;
- Minimize grading during the wet season and coincide grading with seasonal dry weather periods to the extent feasible. If grading does occur during the wet season, the project proponent is required to implement additional rainy season BMPs, as necessary for compliance with the Permit;
- Emphasize erosion prevention as the most important measure for keeping sediment on site during construction;
- Utilize sediment controls as a supplement to erosion prevention for keeping sediment on-site during construction, and never as the single or primary method;
- Minimize areas that are cleared and graded to only the portion of the site that is necessary for construction;
- Minimize exposure time of disturbed soil areas;
- Temporarily stabilize and reseed disturbed soil areas as rapidly as possible;
- Permanently re-vegetate or landscape as early as feasible; and
- Stabilize all slopes.

7.4 Best Management Practice Implementation

CMI continues to train all inspectors on the appropriate application of construction site BMPs. In addition to using the previously adopted and modified CASQA and Caltrans BMPs, the City also introduced new and improved BMPs during FY 06-07. The City continues to review new and varying site BMPs proposed for use on private development sites.

This year, CMI reviewed several new BMP's and technologies. CMI reviewed the installation and use of The Soaker Wheel Wash® on a grading project that required several thousand yards of import. The device is a self-contained unit that uses pressured nozzles to spray water on the tires and undercarriage of passing trucks to remove any dirt prior to leaving the sight. The product demonstrated some level of effectiveness. However, even though it was used in conjunction with a stabilized construction entrance, some tracking was experienced. Unfortunately, the product did not remove all dirt and it did not appear effective as a sole BMP. Additional BMP's must be used in order to complete an overall effective means of preventing tracking.

CMI, as well as the Maintenance and Operations Division, reviewed RapidFlow®, an inlet protection BMP. The product is similar to other inlet opening protection devices in that it blocks potential pollutants from entering the MS4, but does allow water to filter through. This device is very effective in removing trash and larger debris and allows runoff to filter through in a very efficient manner. This product is not effective, however, in removing sediment, non-visible pollutants, or fine particulates. Due to the ineffective qualities of these products neither of theses products will be used without additional or supplemental BMP's.

During FY 06-07, the City's standard for stabilizing rough graded residential lots was clarified to include the CASQA and Caltrans standard drawing numbers as reference materials (Appendix 7-1). The detailed drawing was incorporated into the City of Carlsbad Engineering Standards as drawing GS-13.

SWPPP's and erosion control plans are reviewed prior to commencement of construction activities to ensure that the required minimum BMPs are implemented. The seven required minimum BMPs, as identified in the JURMP, are:

1. Erosion control methods for graded slopes:
2. Erosion control method for graded flat areas (slope <5%):
3. Sediment control for perimeter boundaries;
4. Offsite tracking control of sediment;
5. Materials management control;
6. Waste management control; and
7. Non-storm water management control.

To address each of the required BMPs, the City ensures the SWPPPs and/or erosion control plans include implementation of the following types of BMPs as applicable, depending on site-specific requirements. The list below corresponds to the numbered BMPs above:

1. Hydroseed applications, bonded fiber matrix application, Geotextiles and Mats, straw waddles, silt fences, and fiber rolls are incorporated into the City approved erosion control plans and project SWPPP's as applicable.
2. Irrigated and non-irrigated hydro-seed mixes', gravel bag and/or sandbag barriers, silt fence, and fiber rolls are incorporated into approved erosion control plans and SWPPPs as applicable.
3. Silt fences, earthen berms, velocity dissipaters, gravel bag and/or sandbag barriers, and drainage swales are incorporated into approved erosion control plans and project SWPPPs as applicable.
4. Construction entrances and tire washing stations are incorporated into approved erosion control plans and project SWPPP's as applicable.
5. Vehicle and equipment maintenance, fueling and cleaning stations, material storage and delivery yards are protected and concrete washout basins are incorporated into approved erosion control plans and project SWPPPs as applicable.
6. Covered receptacles are incorporated into all projects at strategic locations, litter removal programs are incorporated into the project schedules, ensuring material storage is isolated from drainage facilities and watercourses, and other source control BMPs are incorporated into City approved erosion control plans and project SWPPPs as applicable. Additionally, all temporary construction relief stations are required to have, at a minimum, secondary containment units directly beneath them.
7. Non-storm water management generally includes source control BMPs such as paving and grinding operations, dewatering operations, water practices, etc. These BMPs are incorporated into City approved erosion control plans and project SWPPPs as applicable.

7.5 Inspection of Construction Sites

In FY 06-07, the City took the opportunity to review and restructure the current storm water pollution prevention program, as it relates to construction activities, to further ensure compliance with Order No. 2001-01. In January 2007 the City expanded its storm water compliance inspection program by diversifying the construction components into two areas: ministerial construction permits and grading construction permits. CMI oversees the inspections of grading permitted sites while storm water inspectors ensure ministerial permitted sites (construction sites without a grading permit) are compliant, with two inspectors designated with 100% responsibility for storm water compliance.

The City continues to prioritize all construction sites with active grading permits as high priority. These sites are inspected on a weekly basis during the wet season and once a month during the dry season, at a minimum, to ensure proper installation and maintenance of pollution prevention BMPs. For the purposes of this report, a report was generated which illustrates the active grading permits and priority of each for

FY 06-07. Appendix 7-2 is an inventory of active grading permit construction sites. The City performed 6,294 site inspections during FY 06-07.

Engineering inspectors are responsible for inspections on all active grading sites. Storm water issues (compliance with the grading ordinances and Order No. 2001-01) have become one of their main focuses, especially during the rainy season. Engineering inspectors were onsite inspecting grading sites on a regular basis and monitoring changing site conditions and the status and effectiveness of BMP's installed. During the wet season all grading sites were inspected on a weekly basis at a minimum. The high priority inspections are documented weekly. The inspectors are onsite daily on most sites verifying proper BMP implementation in addition to the formal weekly inspection that is documented. The construction site storm water checklist for FY 06-07 is included in Appendix 7-3. Table 7.1 demonstrates the grading permit inspections conducted in FY 06-07:

Table 7.1 Grading Permit Site Compliance Inspections

Required Inspections	Inspections Conducted
4851	4851

Contracted storm water inspectors were onsite inspecting all locations as required by the priority of the site. During the wet season (Oct. 01 through April 30) high priority sites were inspected weekly while medium and low priority sites were inspected once every two weeks.

Ministerial permits were subject to further inspection from the building department during regularly scheduled technical inspections. As a result, more inspections were conducted than actually required. All required inspections were documented. Table 7.2 describes the ministerial permit inspections conducted from February 01, 2007 to June 30, 2007:

Table 7.2 Ministerial Permit Site Compliance Inspections

Required Inspections	Inspections Conducted
1175	1296

Appendix 7-4 shows the current Capital Improvement Projects (CIP) sites. Inspectors are out on CIP projects daily covering a number of issues including storm water issues. It is important to note that not all sites on the inventory were active during the entire rainy season. The City currently has a system of tracking required inspections, which is monitored on a weekly basis to ensure compliance. Information from completed inspections is entered into a database and annual reports are processed from this database for reporting purposes. Table 7.3 describes the CIP project inspections conducted in FY 06-07:

Table 7.3 CIP Site Compliance Inspections

Required Inspections	Inspections Conducted
147	147

7.6 Enforcement of Construction Sites

There have been no changes in the enforcement escalation procedures described in the City's JURMP during this FY 06-07. Table 7.4 is a summary of enforcement actions taken by the City during FY 06-07. A detailed report is available upon request. The City will review current procedures for management of CIP sites and improve as necessary.

Table 7.4 Summary of Enforcement Actions at Construction Sites in FY 06-07

Actions Taken	Number of Actions
Field Memo (written warning)	68
Correction Notice	45
Stop Work Notice	15
Total Actions	**128**

7.7 Reporting of Noncompliant Sites

There were no changes to the reporting procedures as described in the JURMP. The Public Works Director or designated representative provides verbal notification, within 24 hours, to the Regional Board of non-compliant sites that may pose a threat to human or environmental health. Written follow-up notification within 5 days of the discovery of the noncompliant site is sent via certified mail to the Regional Board. Non-compliant construction sites considered a potential threat to water quality criteria are outlined in Section 7.8.1 of the JURMP. The Carlsbad Municipal Code is also used to appropriately respond to and evaluate each individual situation. Other regulations are applied, as appropriate, for impacts to human health and the environment that would not necessarily affect storm water or receiving water. Non-compliant sites that are determined to pose a threat to water quality will continue to be reported to the Regional Board.

During FY 06-07 the City reported two discharges to the Regional Board. Both events occurred at the same project, CT 02-18, WDID # 937C331725, The Bluffs. On October 11, 2006 a construction vehicle backed into a fire hydrant, removing it and causing a potable water discharge. BMP's were in place prior to the event. All sediment and debris were removed and BMP's maintained and/or replaced on the same day. On November 10, 2006 a skip loader also backed into a different fire hydrant, removing it and causing a potable water discharge. BMP's were in place prior to the event. All sediment and debris were removed, as well as, BMP's maintained and/or replaced the same day. After the second event occurred, the CMI division requested that bollards be placed at all fire hydrants at this project. However, the Carlsbad Fire Department requested they not be installed due to access concerns. The developer was required to place delineators and caution tape around all fire hydrants on the site

7.8 Education on Construction Activities

The City continues to conduct and participate in workshops to educate external parties, which includes project applicants, developers, contractors, and property owners on the implementation of the storm water program and requirements for construction sites.

The City of Carlsbad is committed to working with developers and contractors to ensure that BMPs are implemented at all construction sites. A new fact sheet was developed and distributed to all active construction sites in January 2007. The fact sheet includes information about the required minimum BMPs, site specific SWPPP's, and erosion control plans. A copy of the fact sheet can be found in Appendix 7-5.

Incorporating storm water training into regular staff meeting continues to be highly effective. The regular education of BMPs and their effectiveness spawns open dialogue among inspectors to share ideas and field experiences. The information from the manuals and the discussion allows a constant update of how the City will enforce the storm water pollution prevention standards.

The City has continued to use a BMP training program for CMI that is conducted throughout the year. Staff is trained on the installation of specific BMPs pursuant to the CASQA handbook. A list of these internal training topics is in Appendix 7-6 and a list of external training is located in Appendix 7-7.

On May 10 and May 16, 2007, all City inspections staff attended a two part training seminar conducted by Mikhail Ogawa Engineering. The first session consisted of classroom training that covered the evolution of storm water pollution prevention, site analysis, SWPPP's, inspection documentation, effective BMP selection and installation, and an overview of changes in the recently adopted permit. The second session was conducted in the field. Several sites were visited demonstrating a vast array of BMP's.

7.9 Self Assessments

Program Strengths

The City distributes the '*Pollution Prevention Guide to the Construction Industry*' brochure with each construction-related permit application.

The City classified all grading permit applications as high priority projects for the purposes of implementing minimum construction site BMPs and construction BMP inspections.

The City implemented the inspection of BMP requirements on all construction permit projects. These inspections continue throughout the year. Each inspection is documented and a copy of the field inspection report is filed in the project file.

The City has posted the links to the CASQA BMP handbook on the City's website for access by the public, permit applicants, developers, and property owners.

The City will continue to research and observe various types of BMP's and evaluate their performance.

Program Improvement Areas

The City will review and update the database management currently used to track and report construction sites, inspections, and enforcement actions. A centralized and standard tracking system will be considered.

The City will review the current procedures for management of all CIP projects and make improvements where necessary.

The City will consider revising the standard operating procedures for construction site inspections, data collection, and enforcement actions.

Section 8
Illicit Discharges Detection and Elimination Component

8.0 Overview

The City continued to conduct a proactive program for detecting and eliminating illegal discharges and illicit connections to the storm drain system. The City's program actively seeks to identify and eliminate illicit discharges and connections by conducting illegal discharge investigations, responding to spills and sewage overflows, conducting monitoring, and performing routine cleaning and maintenance activities on the sewer and storm drain systems.

8.1 Monitoring Programs

Dry Weather Analytical and Field Screening Monitoring

The City has conducted an annual Dry Weather Analytical and Field Screening Monitoring program since 1995. The purpose of the monitoring program is to detect and eliminate illicit connections and illegal discharges to the storm drain system. This program consists of field observations, field screening, visual monitoring, and analytical monitoring at selected sites throughout the City's storm drain system. During FY 06-07, this monitoring was performed at 60 sites.

The City continues to contract out the Dry Weather Monitoring Program to D-Max. Follow-up investigations were conducted by D-Max and City staff, in combination with the action levels and confidence intervals established by the Monitoring Workgroup. The Dry Weather Monitoring Program report for FY 06-07 is under separate cover and summaries of follow-up activities for 2007 dry weather monitoring are found in Appendix 8-1.

Comments from the Regional Board's Sept. 18, 2007 FY 05-06 JURMP Annual Report review letter related to the Illicit Discharges, Detection, and Elimination program comment #7 are addressed below.

Section F.5.c. of Order 2001-01 requires the City to "investigate and inspect any portion of the MS4 that, based on dry weather analytical monitoring results or other appropriate information, indicates a reasonable potential for illicit discharges, illicit connections, or other sources of non-storm water (including non-prohibited discharge(s) identified in Section B. of this Order). Each Copermittee shall establish criteria to identify portions of the system where such follow-up investigations are appropriate."

Criteria to identify portions of the system where follow-up investigations are appropriate have been established by the Copermittee Dry Weather Monitoring Workgroup. The group, a working subgroup of the Copermittee Regional Monitoring Workgroup, has determined appropriate action levels that will trigger upstream investigations. These action levels are the basis for the dry weather program and are referenced in the Dry Weather Monitoring Program Annual Report under separate cover accompanying this report.

The routine sample collected on 8-9-06 at BA-13 contained elevated concentrations of bacteria, exceeding dry weather action levels for all three indicators. However, the ammonia concentration accompanying this sample was below the action level, indicating that the source of bacteria was NOT sewage related.

The first step of the investigation process is to collect a confirmation sample to show that the source of contamination continues to be present. A confirmation sample was collected upon receipt of the routine analytical results on 9-12-06. The confirmation sample indicated that the bacteria concentrations had decreased at the site, indicating that a transient source of bacteria may be the cause of the routine exceedances. Two additional samples were collected upstream (concurrent with the confirmation sample on 9-12-06) and were also well below action levels.

Even though confirmation samples were within action levels and an investigation was not required, an aggressive investigation was initiated upstream. Potential sources in the area include the Plaza Paseo Real commercial complex, the Carlsbad City Library, residential areas, and an open space area at the top of the drainage basin. During the following week, an additional 15 bacteria samples were collected upstream of the site in an effort to determine the source of bacteria on 9-14, 9-18, and 9-19, 06. All upstream sample results were well within action levels.

Although all bacteria concentrations in the investigation were well below action levels, results indicated that the source was not from the commercial complex or the City library, but may be originating from the residential or open space areas to the north. At the time of the investigation, there was no flow present from the residential area. The Dry Weather Report concludes that: "This source could not be identified with certainty, but it is possible that it could be a small sewer leak or perhaps animal waste in the conveyance." Because initial ammonia results were low and follow-up bacteria results were also low, the possibility of a small sewer leak was not likely. The conjecture that animal waste may be present in the conveyance as a possible source was conjecture only, and was not observed in any investigations upstream. With data indicating water quality well below established action levels in the storm drain system, further action was not warranted and no cleaning was performed within FY 05-06.

In summary, the City maintained full compliance with the Permit requirements through an extensive investigation into the source of the bacteria detected in routine monitoring at BA-13 per the Dry Weather Monitoring Program protocol. Although a definitive source was not identified, as is often the case with bacteria exceedances, bacteria samples over four subsequent sampling days indicated that concentrations were below established action levels. Because of the results of the investigation, no further action was deemed necessary. To further investigate the possibility of illicit connections to the system, all storm drains in the suspected area were televised in February 2007 with no illicit connections found.

Coastal Outfall Monitoring

As required, the City continues to conduct a Coastal Outfall Monitoring Program to detect and mitigate urban runoff discharges to coastal storm drain outfalls. This program monitors ocean and lagoon outfalls and receiving waters for Total Coliform, Fecal Coliform and Enterococci. While this program was primarily designed after the *AB411 Recreational Water Monitoring Program*, this effort can also help identify illegal discharges, illicit connections, or other sewage contamination sources. Sampling is conducted year-round, however samples are not collected within 72 hours of a rainfall event so that discharges sampled will represent dry weather flows only. If bacteria results from the outfall exceed standards established by the program, the site is re-sampled and upstream investigations are initiated as described in the Adaptive Program. The coastal and lagoon outfall results are detailed in Attachment G of the Copermittees Annual Unified Report covering the receiving waters monitoring program.

8.2 Public Reporting of Illicit Discharges and Connections

The public continued to use the storm water hotline and e-mail address to report illegal discharges to the storm drain system. Sources for illegal discharge reports to the City included 46% from the public, 51% from City employees, and 2% from outside agencies. The Storm Water Protection Program also tracked the origins of all received reports and found that during FY 06-07, 38% of the reports came through the hotline, 40% though other phone numbers and email addresses, in addition to 22% which were observed in the field by City employees.

During regular office hours, Storm Water Protection Program staff answered the hotline, checked emails, and forwarded reported information to the appropriate personnel. When calls were received after office hours, the hotline provided a voice mail message (in English and Spanish) directing complainants to leave a message for follow-up or be directed to police dispatch for emergency response (i.e., dumping of hazardous materials into the storm water system).

When an illegal discharge was reported during regular office hours as "happening right now", an inspector was immediately dispatched to the site. The City tracked this response as a way to measure customer service and because an immediate response minimized the potential for harmful discharges to enter waterways. Being able to respond rapidly also provided a better opportunity for proactive education or prompt enforcement. During FY 06-07, there were 44 reports of washing or dumping to the storm drain system that met the high priority complaint criteria. Inspectors were dispatched to all but one of these incidents within 30-minutes, thus exceeding the benchmark of 90%.

The public continued to use the Environmental Programs hotline and e-mail address to request information about the HHW, trash, and recycling programs. In addition, the City tracked calls, comments, and questions about Environmental Programs. During FY 06-07, Environmental Programs responded to 30 complaints related to HHW, recycling, and solid waste (Table 5.3).

8.3 Illicit Connection/Illegal Discharge (IC/ID) Investigation and Follow-up

During FY 06-07, the Storm Water Protection Program responded to 154 storm water related complaints. In addition, 434 complaints or requests for action related to storm water quality, the sewer system, or storm drain system maintenance were conducted by Storm Water, Engineering Inspections, Code Enforcement, and M&O, and the Streets Department. Table 8.1 includes an issue summary by complaint type.

Table 8.1 Total Numbers of Issues for FY 06-07 by Department Responding

Issue Type Sub-Type	Department	Total
Erosion - Erosion from New Construction	Engineering Inspections	1
Sprinklers - Parks / City Facilities	General Services - Parks	1
Water System - Water Leak	Meter Services	1
Recycling Complaint	Solid Waste	5
Solid Waste Complaint	Solid Waste	17
Solid Waste - Missed Collection/Pick-up	Solid Waste	8
Construction - General Complaint	Storm Water Protection	1
Sprinklers - Private Property	Storm Water Protection	1
Storm Drain - Dirt/Debris Piles	Storm Water Protection	9
Storm Drain - Dumping to Storm Drain	Storm Water Protection	41
Storm Drain - Erosion from Existing Development	Storm Water Protection	10
Storm Drain - Needs Cleaning Public Property	Storm Water Protection	1

Issue Type Sub-Type	Department	Total
Storm Drain - Vehicles Leaking Oil/Fluids	Storm Water Protection	16
Storm Drain - Washing to Storm Drain	Storm Water Protection	90
Storm Water - General Information/Questions	Storm Water Protection	11
Water Conservation - Private Property	Storm Water Protection	18
Drainage - Runoff from Street	Streets Maintenance	1
Drainage - Water Ponding/Pooling	Streets Maintenance	3
Litter/Debris - Clean Up Request	Streets Maintenance	3
Storm Drain - Damaged/Needs Repair	Streets Maintenance	5
Storm Drain - Needs Cleaning Public Property	Streets Maintenance	9
Street Sweeping - Request for Sweeping	Streets Maintenance	1
Water System - Water Facilities	Water Operations	1
Water Conservation - Audits (Harris)	Storm Water Protection	334
	Grand Total	**588**

A complete summary of the above Storm Water Protection Program investigations and responses is found in Appendix 8-2.

The City conducted five high priority illicit discharge investigations during FY 06-07. High priority illicit discharge investigations include those that involve hazardous and/or toxic substances and those investigations resulting from complaints to or from the Regional Board.

Diesel Fuel Spill in Oct/Nov 2006

On October 11, 2006, the City received a call via the storm water hotline regarding a diesel fuel discharge on El Camino Real. Multiple City departments responded to the incident including Streets, Storm Water, Fire, and Police. Upon arriving on scene, Streets crews and the Fire Department constructed a dirt berm upstream of the storm drain and were able to contain all fuel on site. There was no discharge of fuel to the storm drain system. Upon investigation, it was found that the saddle tanks on a large truck had been ruptured by a rock causing approximately 50-100 gallons of diesel fuel to be released onto the road way. Thanks to a quick response from the City, all fuel was contained. NRC Environmental was contracted to perform the clean up and did so using absorbent material and a pressure washer, while recovering all materials into a pump truck. All materials were disposed of properly and the trucking company was billed for the clean up efforts of the contractor and the City. Because of the accidental nature of the incident, no enforcement actions were required by the storm water program.

NRG/Cabrillo Investigation

On November 14, 2006, the City received a complaint investigation request from the RWQCB (ID Number - 176) regarding an illicit discharge from the NRG Cabrillo Power Station (NRG). The complaint investigation request was sent directly to the Storm Water Manager, who sent a preliminary response to the RWQCB notifying them that a case had been opened and that the investigation had begun. The City contacted the NRG Cabrillo Power Station and was informed that on November 13, 2006 at approximately 5:30pm, NRG staff observed a white foamy material discharging from the 96 inch storm drain outfall located on the north side of the property. Although the discharge appeared to be small in quantity it spread to several areas within 150 feet of the outfall. The substance dissipated before reaching the ocean outfall. NRG staff conducted an upstream investigation and could not find the source of the discharge. On the morning of November 14, 2006, the discharge was not observed in or around the outfall. NRG staff conducted another upstream investigation and again did not observe the substance.

The City conducted a follow up site visit and investigation of the discharge. NRG representatives escorted City inspectors through the site, starting at the outfall and upstream through the NRG property boundaries. No illicit discharges were observed by the City inspectors. The City inspectors also checked the storm drain boxes outside the property line, located on the south side of NRG. Three storm drains were checked and no discharges were observed. In addition, Cannon Lake was checked and no unusual observations were made. The RWQCB was notified of the results of the investigation on November 17, 2006, and since no evidence of the discharge was observed no follow actions took place.

Nozomi Restaurant

Storm water maintenance staff responded to a report of a person dumping paint and construction materials into the storm drain on the evening of January 3, 2007 at the Nozomi Restaurant. Although the discharge had entered the storm drain system, staff was able to contain the discharge downstream prior to any release to receiving waters. The responsible party was required to discontinue the discharge.

On the 4th, the City contracted with a company to clean the discharge and the affected storm drains. Upon investigation by storm water personnel that morning, an illegal connection was located from the kitchen sink and floor drains to the exterior wall of the building. Additionally, a second drain servicing a wash area, which was properly connected to sanitary sewer, was found to be obstructed to the point of overflowing, causing wash water to flow to the storm drain as well. Since a remodel was in progress, the building inspector was notified and required the owner of the restaurant to immediately repair both connections. The owner of the restaurant was issued a Notice of Violation for a prohibited discharge, failure to implement proper BMPs, and for an illicit connection.

Buena Vista Force Main Sanitary Sewer Overflow

On **A**pril 1, 2007 the 24" ductile iron force main pumping sewage in the Vista/Carlsbad Interceptor line failed. The force main runs from the Buena Vista Lift Station to the Jefferson Street Bridge over Interstate 5. A citizen reported the spill in the evening of April 1st. A Carlsbad Duty person responded within minutes and called in supervisors. Carlsbad, along with representatives from Encina Wastewater Authority and the City of Vista responded immediately. Carlsbad was given permission by the City of Oceanside to divert 800-1,000 gallons per minute of sewage to the Oceanside conveyance system to lessen the volume of the spill. Contractors were called in to make repairs. Sheet pilings were installed and the trench was excavated. Sewage spilled from the site of the break as well as from the Buena Vista Lift Station.

Several measures were taken to lower the impacts to the environment. Aeration pumps were set up to mitigate the decreased oxygen levels in the lagoon water. Several pumps were also installed to "pump back" contaminated lagoon water into the lift station and send it to Encina Wastewater Authority to be treated. Through successful coordination of many agencies and a prompt response from all involved, the impacts to the lagoon were mitigated as much as possible.

Buena Vista Lagoon Paint Spill June 2007

On June 27, 2007, staff was informed of a discharge to Buena Vista Lagoon. Upon investigation, storm drain maintenance staff located a white discharge near the mouth of the lagoon that appeared to have originated from the nearby storm drain outfall. Storm water staff was notified and investigation and cleanup was initiated. Because the substance was unidentified initially, the Carlsbad Fire Department was notified and arrived on scene. After consultation with San Diego County Hazmat, the substance was determined to most likely be paint and a hazmat response was determined to be unnecessary.

City staff deployed an absorbent boom in an effort to contain the discharge. A contractor was then contacted to clean up the discharge. Using a pumper truck and small boats, the contractor was able to remove all of the white material from the water.

Storm water staff immediately initiated an upstream investigation into the source of the material. The storm drain was found to serve only a small private community near the lagoon. Upon investigation, an obvious source was not located, although the possibilities were limited to the few houses in the gated community. There was some evidence that paint waste had been discharged to an area drain leading to the storm drain, potentially after the completion of home improvements. Although a definitive source was not located, the Homeowner's Association was contacted and interviewed. The City proceeded to televise the storm drains in an attempt to locate the source of the discharge; however a single responsible party could not be determined. The HOA proceeded to clean the storm drain system to prevent any further residual discharges to the lagoon.

Storm water staff distributed educational literature to all homeowners in the community in an attempt to prevent future discharges to the lagoon. Appropriate agencies were notified of the release including the Regional Water Quality Control Board and California Department of Fish and Game.

8.4 Elimination of Illicit Connections and Discharges

The IC/ID elimination process is an ongoing endeavor, involving a combination of education, inspections, complaint response, and enforcement. The City used one or any combination of these efforts as necessary to achieve compliance. The ultimate goal is to eliminate the discharge or connection and to prevent future occurrences. Enforcement actions are further discussed in Subsection 8.6.

During FY 06-07, the Storm Water Protection Program received 154 complaints of potential illegal discharges. Thirty of these complaints were referred to other agencies for follow-up and remediation. These other agencies include San Diego County Hazmat and Department of Environmental Health, Waste Management, Regional Water Quality Control Board, and other municipalities. All complaints were investigated, however 55 resulted in either a source not being found as described or the source was not an illegal discharge (i.e. groundwater seepage). Table 8.2 lists the total number of illegal discharges and connections identified. During this reporting period, one illicit connection was identified and eliminated, as described above in Section 8.3.

Table 8.2. Total Numbers of Illegal Discharges and Illicit Connections Reported from Residential, Commercial and Industrial Sources via Storm Water Hotline

Discharge Eliminated	Residential	Commercial	Industrial
Illegal discharge	34	8	2
Illicit connection	0	1	0

8.5 HHW and Oil Recycling Programs

The City continued to promote a used oil-recycling program where the public can recycle up to 10 quarts of used motor oil and/or 15 quarts of diesel fuel at five locations. Used motor oil was only accepted if it was not mixed with other liquids including water, antifreeze, gasoline, or parts cleaners. Table 8.3 shows the five locations that accept used motor oil for recycling.

Table 8.3: Locations in the Carlsbad that Accept Used Motor Oil For Recycling

Location	Address	Phone Number
Firestone Store #2252	2545 El Camino Real, Carlsbad, 92008	760-434-8392
Jiffy Lube # 1621	6021 Paseo Del Norte, Carlsbad, 92009	760-431-9875
Big O Tires	2615 State Street, Carlsbad, 92008	760-720-5212
Vista HHW Collection Facility	1165 East Taylor Street Vista, 92084	800-444-4244
Oceanside Permanent Facility	2880 Industry Street, Oceanside, 92056	760-929-9400

The City also promoted the Used Oil Collection Program through various outreach and education efforts. The Environmental Programs web page offered residents information on how and where to properly dispose of used oil. There were over 40,805 hits on this web page during this reporting year.

The used oil recycling program was also promoted at various public events such as the Public Works Fair, Earth Day, and the Citizen's Academy. The City provided information about disposal locations as well as specific phone numbers to request general information about HHW disposal.

Household Hazardous Waste Program

The HHW program promoted responsible HHW disposal for the protection of Carlsbad's environment and community through various outreach and education efforts, which are further detailed in Section 9 of this report. The same outreach methods and tools used for the oil program were employed for the HHW program.

The City contracted with Clean Harbors and Waste Management to allow residents to dispose of HHW at the Vista HHW Collection Facility and the Oceanside Permanent Facility. More than 1,500 residents used these facilities to collect and dispose of 57 tons of HHW. Residents can also use the Environmental Programs hotline or web site to request additional information about HHW collection and disposal. During FY 06-07, Carlsbad residents disposed of the following types of HHW at permanent facilities as shown in Table 8.4. Updated data is also presented for FY 05-06.

Table 8.4 HHW Amounts Collected at Permanent Facilities

Activity	Tons FY 05-06	Tons FY 06-07
Flammable solid/liquid	10.22	8.92
Oil-base Paint	5.16	6.52
Poison (non-aerosol)	2.29	3.17
Reactive/Explosive	0.00	0.00
Organic/Inorganic Acid	0.50	0.64
Organic/Inorganic Base	0.38	0.50
PCB Waste	0.00	0.03
Oxidizers	0.13	0.24
Antifreeze	0.73	0.64
Car Batteries	2.27	0.00
Flourescent Bulbs	0.00	0.00
Latex Paint	15.42	16.36
Motor Oil	3.25	3.23
Oil Filters	0.15	0.24
Mercury (metallic)	0.00	0.01

Activity	Tons FY 05-06	Tons FY 06-07
Household Batteries	0.31	0.47
Electronic Waste	9.72	11.43
Aerosols	1.32	1.10
Other Universal Waste	0.42	1.23
Other HHW	3.36	2.14
Asbestos	0.21	0.07
Totals	55.85	56.96

In February 2006, the Carlsbad City Council approved a new HHW pick up program that provides a means for residents to have HHW (up to 15 gallons or 125 pounds) picked up from their homes and hauled away. In the first year of that program approximately 100 tons of HHW was collected from homes in Carlsbad. Approximately 49 tons of HHW was collected and disposed using the door-to-door program in this reporting year. Approximately 930 Carlsbad residents took advantage of this program this year. Table 8.5 shows the number and types of HHW collected by the door-door program.

Table 8.5. HHW Amounts Collected by the Door-to-Door Program in FY 06-07

Type of Waste	Quantity in Tons
Flammable & Poison	**8.32**
Acid	**0.42**
Base	**0.42**
Oxidizer	**0.00**
PCB-containing	**0.00**
Latex Paint	**33.29**
Asbestos	**0.00**
Universal Waste (UW)	**0.00**
Electronic Waste (UW)	**0.00**
Aerosol Containers (UW)	**2.08**
Other HHW	**4.16**
Total	**48.68**

The process for door-to-door collection is:

- Residents collect HHW material at home.
- Call for an appointment using the toll-free number (1-800-444-4244).
- On the day of the appointment, place HHW material on the porch or in front of the garage in a safe location and in a sealed container.
- Clean Harbors comes by and collects the materials.

In April 2007, the City sponsored a free HHW disposal day where Carlsbad residents could dispose of up to 15 gallons or 125 pounds of HHW materials. During FY 06-07, 514 residents took advantage of the special HHW collection event and were offered the Environmental Programs and Door-to-Door HHW brochures. The City collected and disposed of 69,155 pounds (34.6 tons) of HHW during this event.

8.6 Ordinance Enforcement

An intensive information and education effort was the first step the City took to eliminate discharges, prevent repeat occurrences, and ensure corrective actions were adequately and promptly implemented. Voluntary elimination of illegal discharges is strongly encouraged. However, when compliance was not achieved, the City initiated enforcement actions. Enforcement was based on the intensity, frequency, duration, and intent of the violation. Enforcement actions can range from a verbal warning to administrative fines. Table 8.6 lists the types and numbers of enforcement actions taken during this reporting period.

Table 8.6. Total Number of Enforcement Actions Taken for Residential, Commercial and Industrial Sources for FY 06-07

Type of Action	Residential	Commercial	Industrial	Total
Verbal warning	17	5	4	26
Information letter	15	0	0	15
Written Warning	3	13	4	20
Notice of Violation	2	24	5	29
Cease and Desist	0	0	0	0
Notice to Clean	0	1	1	2
Admin. Citation	0	0	0	0
TOTAL	37	43	14	92

Verbal Warning: In most cases, a verbal warning was sufficient to stop the discharge or correct the violation. Whenever appropriate, these verbal warnings were combined with distribution of educational information. Violations noted at an industrial or commercial site were written in the inspection report. There were a total of 26 verbal warnings given in FY 06-07.

Information Letter: Informational letters were typically used to provide educational materials for violations reported at residential locations, especially when the violation was not considered a serious threat to water quality. Any potential or illegal discharges observed during an industrial or commercial inspection were addressed on-site, noted in the inspection report, and followed up with enforcement actions as appropriate. There were 15 information letters sent in FY 06-07.

Written Warning: Written warnings provide documentation of an incident, compliance requirements, and constitute the initiation of escalating enforcement actions. There were 20 written warnings issued in FY 06-07.

Notice of Violation, Administrative Citation and Cease and Desist Orders: A NOV is a formal enforcement action that details specific code violations, corrective actions, and a compliance schedule. If the responsible party does not comply as required, the City could follow up with an administrative citation, starting at $100 per violation. During FY 05-06, a new Notice to Clean form and streamlined NOV form were created to help facilitate prompt response from businesses. There were 29 NOVs issued in FY 06-07.

8.7 Spill Response and Sanitary Sewer System Maintenance

The City continued to actively prevent and respond to sewage spills and other spills, and to limit discharges from the sanitary sewer system to the MS4. This occurred through public education and

outreach, inspections, preventive maintenance, complaint response, and spill response (containment and remediation). The City operates and maintains 262 miles of sewer lines and 14 sewer pump stations. The following inspection and preventive maintenance activities were conducted during this reporting period.

Inspection

From Monday through Friday, all sewer pump stations were inspected daily. The ten largest pump stations were also inspected on Saturdays and Sundays. The operator inspected the electrical systems quarterly and the pumps and shafts were serviced annually. In addition, outside services were contracted to inspect the electrical services annually. The wet wells were cleaned every six weeks or more frequently if necessary.

Eleven pump stations are equipped with telemetry which were inspected daily. This included checking the 24-hour history records, pump gallons per minute, wet well on-off cycles and pump alternating cycles. The City conducted most pump repair work, although any needed machine work was performed by outside services. In the case of emergencies, the City has a 24-hour duty person, and cell phones were issued to each member of the Wastewater Operations staff, and Supervisor. In the case of power failures, ten of the stations have onsite generators and three stations can be powered by the City's two trailer mounted generators.

Preventive Maintenance

During FY 06-07, the City performed routine preventative maintenance and inspections of the sanitary sewer system, which included video inspections, access hole inspections, semi-annual inspections of three major trunk lines, and routine cleaning of sewer mains. The City performed approximately 2,300 manhole inspections. Regular monitoring of the sewer system was achieved with routine cleaning and manhole inspections. Sewer system surveillance was conducted on a regular basis. Flow monitoring was performed to compare the flows in dry and wet seasons. Anything unusual was reported and followed up on.

Approximately 158 miles of sewer lines were cleaned last year. The maintenance schedule is designed to provide more frequent cleaning for identified trouble areas, with siphons being cleaned annually, low flow and flat lines cleaned semi-annually, and grease problem areas cleaned quarterly. Tables 8.7 and 8.8 detail the percentage of maintenance and cleaning achieved since 2003.

Table 8.7 Station Facility Maintenance Since FY 02-03

		Percent Maintenance Achieved[1]				
Activity		**FY 02-03**	**FY 03-04**	**FY 04-05**	**FY 05-06**	**FY 06-07**

1 Achievement levels as reported in the "Maintenance Assessment Program" Report

Spill Response

City employees are trained to follow the City's Sewer Overflow Prevention Plan/Response Plan. Staff training was conducted semi-annually, and tailgate meetings were held quarterly. All spill response incidents were tracked in the Hanson system or spill reports. Sanitary sewage overflow responses were documented as required on the Sanitary Sewer Overflow Report Form, which was sent via fax to the Regional Board, County Health Department, and the Storm Water Protection Program. During FY 06-07 the City responded to 27 sewage overflow or spills. A total of 18,000 gallons were recovered with approximately 635 gallons entering the environment. The overflow reports are found in Appendix 8-3. These calculations do not include the large overflow at the Buena Vista Force Main which occurred in April 2007. This incident is described in detail below.

On **A**pril 1, 2007 the 24" ductile iron force main pumping sewage in the Vista/Carlsbad Interceptor line failed. The force main runs from the Buena Vista Lift Station to the Jefferson Street Bridge over Interstate 5. A citizen reported the spill in the evening of April 1st. A Carlsbad Duty person responded within minutes and called in supervisors. Carlsbad, along with representatives from Encina Wastewater Authority and the City of Vista responded immediately. Carlsbad was given permission by the City of Oceanside to divert 800-1,000 gallons per minute of sewage to the Oceanside conveyance system to lessen the volume of the spill. Contractors were called in to make repairs. Sheet pilings were installed and the trench was excavated. Sewage spilled from the site of the break as well as from the Buena Vista Lift Station.

Several measures were taken to lower the impacts to the environment. Aeration pumps were set up to mitigate the decreased oxygen levels in the lagoon water. Several pumps were also installed to "pump back" contaminated lagoon water into the lift station and send it to Encina Wastewater Authority to be treated. Through successful coordination of many agencies and a prompt response from all involved, the impacts to the lagoon were mitigated as much as possible.

M&O continued to respond and coordinate sewage spill response with the Leucadia Waste Water District (LWWD) and Vallecitos Water District for spills that occur outside the M&O jurisdiction. During normal business hours, calls were dispatched by M&O to field units for immediate response and evaluation. After working hours, phone numbers were routed through police dispatch to M&O standby personnel.

A portion of the LWWD collection system is located within the City limits. They are responsible for operating and maintaining their system, including responding to overflows and spills. However, M&O responds or provides assistance when requested. During FY 06-07, LWWD responded to one sewage

overflow in Carlsbad, resulting in the release of 2750 gallons of sewage released into the environment. Response details are found in Appendix 8-4.

A portion of the Vallecitos Water District sewage collection system is also located within the City limits. They are responsible for operating and maintaining their system, including responding to overflows and spills. However, M&O responds or provides assistance when requested. During FY 06-07, Vallecitos Water District reported zero sewage overflows in the City of Carlsbad.

Volume of Spills: This component of the sewer system delivery measure includes reportable spills due specifically to system failure. In past reports, the volume measure included only those spills of 50 gallons or more per incident. All spills are now used in this measure, because M&O reports spills regardless of the volume. Also, because our benchmark partners do not have responsibility for sewer laterals and in order to maintain comparability of data, this measure does not include spills from sewer laterals even though the City reports those types of spills when they occur.

The number of gallons spilled per mile of sewer main as a result of system failure was 5.4. This is a decrease from the previous year and represents the results of our ongoing proactive sewer main cleaning preventative maintenance program. M&O gave particular attention to the sewer main system in the older downtown area of Carlsbad which historically has experienced blockages caused by grease and/or root intrusion. Sewer mains in these older areas are categorized as "high priority." These areas were inspected and cleaned every three months as a proactive measure to mitigate possibility of blockages and/or spills. When staff identifies areas that have continued blockage problems, these areas are included on the high priority maintenance list.

Table 8.9 shows the reportable gallons spilled per mile of sewer infrastructure by fiscal year for the portion of the collection system maintained by the City of Carlsbad. This information is published in the City's annual State of Effectiveness report.

Table 8.9. Volume of Spills and Spills Recaptured

Fiscal Year	Number of Reportable Spills[1]	Reportable Gallons Spilled	Total Miles of Sewer Mains	Reportable Gallons Spilled per Mile
Benchmark				0
2000-2001	9	1,125	212	5.3
2001-2002	14	7,835	212	36.9
2002-2003	7	7,550	232	32.5
2003-2004	6	209	235	0.89
2004-2005	11	3,030	254	11.9
2005-2006	7	1,509	255	5.4
2006-2007	12	4,900	262	18.7

1 Includes all spills caused by a failure in the sewer system (excludes recycled water spills and/or spills from sewer laterals)

Volume of Spills Recaptured: This measure is included to represent the effectiveness of the City's "Sewer Response Plan." The number of gallons recaptured in FY 06-07 was 87% of total reportable gallons spilled due to system failure. Staff responds to all spills upon notification; however, in some

cases notification did not come in time to allow for the total recapture or contain the spill. The number and volume of spills increased from last year; however, the percentage spilled volume recovered was significantly greater than last year. However, this data does not include volume calculations from the Buena Vista Force Main rupture. Table 8.10 illustrates the volume of sewage spilled and the volume recovered by City response efforts.

Table 8.10. Volume of Spills Recaptured

Fiscal Year	Reportable Gallons Spilled [1.]	Reportable Gallons Recaptured [2.]	Percentage of Gallons Recaptured
Benchmark			100%
2000-2001	1,125 [3.]	2,640 [4.]	235%
2001-2002	7,835	6,845	87%
2002-2003	7,550	2,200	29%
2003-2004	209	164	76%
2004-2005	3,030	1,025	34%
2005-2006	1,509	98	6.50%
2006-2007	4,900	4,265	87%

[1.] This column includes all spills that were caused by a failure in the City's sewer system (excludes recycled water spills and/or spills from sewer laterals). Figures are adjusted from previous years' reports.
[2.] Data is based on total reportable gallons recaptured from the City's public sewer system.
[3.] Of note, two significant spills occurred to the recycled water system and are not included above.
[4.] Residual and/ or any other water from other areas during recapture was reported.

Complaint Response

M&O personnel responded to 46 sewer stoppage complaints and 12 sewer repair requests. These requests and the City's response were tracked electronically in the RFA and Hansen systems.

Education

Educating the public on the proper disposal of fats, oils and grease is one of the BMPs used to prevent sewage spills. The City continued to distribute the Water Environment Federation brochure entitled "*Fat-Free Sewers.*" These brochures were distributed at various public events and during field visits.

The Storm Water Protection Program occasionally depends on other City departments to assist with investigations and remediation during field reviews. M&O and the Storm Drain Maintenance Division were key to prompt, effective responses to investigations involving spills and clean ups. Regular meetings and discussions about compliance issues facilitated this interdepartmental coordination effort.

Other Spills

The City's Emergency Services (Fire/Police Departments) responded to reports of hazardous materials spills and discharges in Carlsbad. Fire Department personnel were trained in hazardous material emergency response and identification of hazardous materials and other City departments relied on the Fire Department to assume command during hazardous materials incidents. Emergency services may request assistance from the Streets Department to contain discharges that have the potential to endanger life, property, and/or the City right-of-way, control traffic, and provide secondary perimeter boundaries as directed Emergency Services' staff.

During FY 06-07, the *Spill Response Plan* continued to be used to detail the roles and responsibilities of Emergency Services, Streets Department, M&O, and the Storm Water Protection Program. If Emergency Services was first on the scene of an unidentified spill, the incident commander decided whether to

provide emergency containment measures or wait until the emergency response agency identified the substance. If the incident commander suspected the substance to be of a hazardous nature, emergency response procedures were implemented. All incident commanders retained a copy of the Department of Transportations "*Emergency Response Guidebook*" which lists classifications of hazardous materials and recommendations for handling materials.

The San Diego County DEH HIRT, through a Joint Powers Agreement, was involved in any significant spills of a hazardous nature. The County maintains these records, as does the State OES. Minor petroleum or other small spills on City streets were handled by the Streets Department using absorbents, sweeping, and proper waste disposal. These cleanup requests were documented in the City's RFA or work order systems. During FY 06-07, there were 10 other spills (non-sewage related) in Carlsbad as referenced in Appendix 8-5.

8.8 Self-Assessment

Program Strengths

In April 2007, the City sponsored a free HHW disposal day where Carlsbad residents could dispose of up to 15 gallons or 125 pounds of HHW materials. The event attracted 514 residents.

The City's goal was to respond to complaints "happening right now" within 30 minutes for 90% of incidents. This goal was met over 90% of the time during FY 06-07.

The City continues to use the Performance Measurement System to monitor annual sewage overflow spills and responses, and assess whether preventive maintenance or other improvements can be made to reduce spills to the environment. The City also has a Maintenance Assessment Program to evaluate the condition of public facilities. This program establishes and documents the frequency of recommended preventive maintenance and/or responsiveness to repair needs, then measures the level of accomplishment each year by comparing percent of completed work to scheduled maintenance.

The City continues to recruit interns from local universities to work with storm water staff. During FY 06-07, the Storm Water Protection Program had one intern working on various projects, including commercial and industrial inspections, data management, and outreach and education.

The City continues to use the *Spill Response and Cost Recovery Plan Procedure* to define the process for protecting the storm drain system from potentially hazardous releases. This procedure applies to the City personnel who may be involved in spill prevention, containment and response activities.

In late FY 05-06, the Storm Water Protection Program began drafting a *Best Management Practices Manual* that includes the minimum and required BMPs for activities and pollutants types. The manual will be continually worked on during FY 06-07 and should be completed in FY 07-08.

In FY 03-04, the City worked with Waste Management to develop an Environmental Programs booklet that included storm water residential BMPs, as well as detailed information on available solid waste services, including oil recycling and HHW disposal sites. The booklet was revised and updated in FY 06-07 to reflect the most current HHW, trash, recycling, storm water, and water conservation information.

In an effort to discover sewer blockages before they become a spill, M&O staff will be implemented a pilot program using radio-wave signal technology called "SmartCover™." The SmartCover™ system provides continuous real-time monitoring of five access hole locations that staff has determined as critical. Using wireless communications to designated cell phones and/or pagers, the system alerts staff

upon intrusion or surcharge in any of the monitored locations allowing staff to respond in time to clear any blockages, etc., prior to a spill occurring. The Smartcover technology prevented three overflows from occurring in FY 06-07. An additional 5 more Smartcovers will be implemented in 07-08.

In relation to sewer spill volume and spills recaptured M&O staff will continue:

- Preventive maintenance sewer line inspections and monitoring in a proactive attempt to eliminate the volume of spills.
- Inspection of new construction to ensure that any debris ending up in the sewer system is held to a minimum and does not result in a spill or blockage.
- Investigation and implementation of mitigation efforts and enhancements to the *Sewer Response Plan* to increase the percentage of spills recaptured. The measure will include any sewage spill that occurs, whether or not it's the result of system integrity failure or caused by other occurrences (e.g., line damage due to construction and blockages caused by grease disposal into sewer system).

Program Improvement Areas

During FY 06-07, staff continued to revise brochures and fact sheets to reflect changes in the program. A complete revision of all brochures will take time to complete. However it is expected that this project will be completed by late FY 07-08.

Station Facility Maintenance: Upgrades to the wastewater SCADA system will be accomplished in 07-08 with the goal of obtaining more accurate "real time" data acquisition.

Sewer Main Cleaning: Utilizing a second vactor truck (which was rented for approximately half of the year) staff accomplished the established benchmark. A new vactor will be purchased in 07-08 to replace older equipment. Services of a third vactor will also be added to the fleet. Data analysis of sanitary sewer overflow (SSO's) will assist with redirecting preventative maintenance cleaning efforts. The CCTV van will be added for condition assessment of the sanitary sewer collection system.

The Maintenance and Operations program will be expanding in order to comply with new regulations pertaining to new Waste Discharge Requirements.

Section 9
Outreach and Education

9.0 Overview

Public education is integral to the success of Carlsbad's urban runoff management program. The City continues to increase public awareness about pollution prevention and promote behavioral changes and environmental stewardship. The Storm Water Protection Program collaborated locally and regionally to ensure outreach efforts and messages for storm water pollution prevention were consistent. The City continued to be actively involved in outreach and education efforts at the local level, the watershed level (North County Storm Water Program), and the regional level (Project Clean Water – Outreach Workgroup). These efforts are further discussed in the following subsections by target audience.

9.1 Municipal Departments and Personnel

Storm water training for municipal employees included general training and job specific training for designated departments and personnel. The objectives of the employee training programs are as follows:

- Promote a clear understanding of the urban runoff and water quality issues, including activities that can potentially pollute receiving water bodies.
- Identify and implement strategies for BMPs.
- Promote employee ownership of the problems and their ability to apply solutions.
- Integrate employee feedback into training and BMP implementation.

General Employee Training

During this reporting period, City employees received storm water training covering issues such as the causes of storm water pollution, how it affects the environment, and the overall structure of the storm water program. Messages related to general training may include, where applicable, the topics listed in the Permit. During FY 06-07, City staff received information and general storm water training through various communication methods including:

1. Storm Water Webpage: Employees were able to download BMPs and the JURMP directly from the City's website.
2. Intranet: The City's intranet was used to post messages and inform employees of various events and opportunities for participation, such as the Coastal Cleanup Day and Earth Day activities.
3. Public Works Newsletters: During FY 06-07 every edition of Public Works newsletter featured updates on the Storm Water Protection Program and Environmental Programs. Employees were notified by e-mail when these newsletters were published and posted on the City's intranet, and hard copies were given to maintenance personnel.
4. Promotional Items: Items such as water bottles, notepads, mouse pads, cups, and pens with the hotline numbers and other pollution prevention messages continued to be distributed to employees.
5. Hotline Decals and Notepads: Car window decals and notepads with the storm water hotline were distributed for employee use in the field.

Job Specific Training

Several job positions have been identified that require activity or job specific storm water training. A summary of municipal employee training is in Appendix 9-1. Table 9.1 identifies the departments with personnel that should receive job specific training.

Table 9.1. Department and Positions for Job Specific Storm Water Training

MSA	Department	Positions
PW	Engineering, Construction Inspections	Construction Inspectors
PW	Engineering, Engineering Development Services	Associate Engineer, Assistant Engineer
PW	Environmental Programs, Storm Water	Environmental Specialists Interns
PW	Environmental Programs, Water Conservation	Water Conservation Specialist
PW	General Services, Streets Division	Street Maintenance Workers
PW	General Services, Facilities Maintenance	Building Maintenance Workers
PW	General Services, Parks	Maintenance Workers
PW	General Services, Landscape Maintenance	Maintenance Workers
PW	General Services, Vehicle Maintenance	Equipment Technicians, Equipment Service Worker, Shop Assistant
PW	Maintenance and Operations, Utility Operations	Meter Services Workers; Sanitation System Operators; Water System Operators
PW	Maintenance and Operations, Construction/Maintenance	Utility Workers; Maintenance Workers
Com-Dev	Planning, Building, Code Enforcement	Building Inspectors, Planners, Code Enforcement,
Safety	Fire Department	Fire Fighters

The City also participated in EPA sponsored webcasts this fiscal year where possible. Storm Water Protection Program staff received job specific training during FY 06-07 as provided in Appendix 9-1.

Storm Water Committee

The Storm Water Committee continued to meet monthly to discuss and develop a calendar of storm water training activities for staff, coordinate compliance activities and documentation, create and distribute job specific storm water training information, and standardize documentation of training activities. A summary of Storm Water Committee meeting topics during FY 06-07 can be found in Appendix 2-6.

Storm Water Leadership Team

In FY 06-07, the City of Carlsbad's City Manager initiated the Storm Water Leadership Team (SWLT). Monthly meetings of the SWLT were conducted and attendees included Senior Management of the City's major service areas and Directors. Agenda items covered all areas of the City's compliance with Order No. 2001-001, as well as review of the new Order No. R9-2007-0001.

Other Training

In February 2007, the Environmental Specialist II attended the *Community Based Social Marketing* workshop held in the City of San Diego. The workshop focused on developing outreach and education programs that not only increase the knowledge of various environmental issues, but also effect behavioral changes within the community.

During the spring of 2007, the Senior Environmental Specialist, Water Conservation Specialist, and a Storm Drain Maintenance Crew worker completed the 24-hour "*Hazardous Waste Operations and Emergency Response Training*" in San Diego. This course is required for anyone who is expected to identify emergency situations involving hazardous materials. Staff was trained to recognize, report, and assist in emergency response. This course fulfills the requirements under OSHA 29 CFR 1910.120.

In June 2007, the City implemented a new waste reduction strategy as a pilot program. This included the purchase and distribution of larger single stream recycling containers for employee work stations accompanied by a small trash can. There were also several new larger recycling containers placed in public meeting areas throughout the City. Seen as an effective pilot program, the City will implement the waste reduction strategy at all City facilities in September 2007. Roll out of this new program included the development of posters, fact sheets and a presentation to educate and inform employees about the importance and benefits of recycling.

In January 2007, all City employees were sent storm water BMP information as a paycheck stuffer. The training fact sheet includes information about the NPDES requirements, pollutants of concern, BMPS, and how to report illegal discharges to the storm drain system. A copy of the training fact sheet can be found in Appendix 2.5.

In June 2007, City staff from various departments attended a web cast entitled "The Trend to Low-Impact Development and What It Means to You." The purpose of the webcast was to analyze the various definitions of LID and determine how to make the business case for LID concepts and technologies; examine the policy perspectives and implications of LID on local governments and public works agencies. During the webcast experts shared tips for making good decisions, managing risk, choosing technologies, and addressing funding issues. In addition, there was also information on how to evaluate various applications of LID for general capital improvement, storm water, roadway, and right-of-way projects.

Figure 9.1: Minimum BMP Fact Sheet for Construction Projects

9.2 Construction Site Owners and Developers

The City of Carlsbad is committed to working with developers and contractors to ensure that BMPs are implemented at all construction sites. A new fact sheet was developed and distributed to all active construction sites in January 2007. The fact sheet includes information about the required minimum BMPs, site specific SWPPP's, and erosion control plans (Figure 9.1)

Construction and Development Services provided information and education to applicants and developers during one-on-one or small group meetings, inspections, complaint investigations, and during pre-construction meetings. They also provided sample SWPPPs and SWMPs for engineers, developers, and applicants to use as guides when preparing documents for proposed development projects. Copies of theses documents and the SUSMP are available at the City's Permits Counter. The SUSMP is also available through the City's internet site.

The Storm Water Protection Program also continued to distribute the "*Pollution Prevention Guide for the Construction Industry*." This brochure was developed to provide BMP and pollution prevention information related to materials storage, perimeter controls, building and staging areas, dumpsters and port-a-potty services, tracking controls, concrete trucks and pumpers, washout areas, dirt and grading, earthmoving equipment, and storm drain protection. The brochure was distributed to commercial businesses that conduct small remodeling or home improvement projects.

The City continues to conduct and participate in workshops to educate external parties, which include project applicants, developers, contractors, and property owners on the implementation of the storm water program and requirements for construction sites.

9.3 Commercial and Industrial Owners and Operators

The City continued to educate commercial and industrial owners and operators through various methods. This included the distribution of printed materials, participation at workshops, presentations to business community groups, direct mailings, inspections and site visits. Accomplishments are detailed below.

Printed Materials
The City revised brochures and fact sheets during FY 06-07 and continued to distribute existing brochures developed in previous years. These materials were distributed by direct mail, during inspections and complaint investigations, and were available at public events and presentations. These brochures are also available on the City's storm water web page, accessed at www.carlsbadconserves.org.

During FY 06-07, the City continued to distribute the "*Best Management Practices for Businesses – Commercial and Industrial*" brochure containing the list and description of minimum BMPs. This brochure was distributed to businesses during inspections and by direct mail.

Website and Hotline
The storm water hotline was listed on all printed material. Industries and commercial businesses can call the hotline to request BMP information. All brochures were also available through the City website. During FY 06-07, there were 40,805visits to the Environmental Programs web page.
.
Inspections and Site Visits
City storm water inspectors worked with businesses during inspections and complaint investigations to identify storm water compliance issues, detail corrective actions, and assess the appropriateness of BMPs.

9.4 Residential Community, General Public, and School Children

Carlsbad continued its on-going outreach to the residential community, school children, and the general public during FY 06-07. This included the development and distribution of printed materials, public outreach events, presentations, published articles and press releases, videos, website access, and direct interaction with the public. Carlsbad actively pursued a comprehensive environmental education and outreach program, combining the activities of storm water, solid waste and water conservation under the umbrella of Environmental Programs. The purpose was to create a unified message, better educate the public, and allow easy access for the public. These accomplishments are described below.

Printed Material
Since the Spring 2006, the City of Carlsbad has been offering door-to-door Household Hazardous Waste collection program. Residents gather their HHW, then call for an appointment to have these items collected and disposed of properly. To further educate residents about the program, the City created a new "*Household Hazardous Waste Collection*" brochure in January 2007. The new brochure includes information about the types of HHW that can be disposed of, information about why residents should participate in the program, phone numbers, addresses, Environmental Programs logo, and web address (Figure 5.1 and 5.2). During FY 06-07, the new brochure was distributed by mail and at outreach events. A copy of the revised fact sheet can be found in Appendix 5-1.

The Public Works Department continued to distribute the "*Public Works At Your Service*" brochure revised in June 2006. The brochure includes information about Environmental Programs covering storm water, water conservations, and trash management. The brochure was mailed to all Carlsbad residents.

During FY 06-07, the new "*Best Management Practices for Mobile Service Providers*" brochure continued to be provided to residents during complaint investigations related to mobile service provider discharges.

In April of 2007, the City developed and distributed a new "Put Toxic Waste in It's Place" brochure designed to provide residents with information about used oil, HHW, and electronic waste disposal and recycling. The brochure includes used oil recycling locations in Carlsbad, the new HHW collection sites, phone numbers, addresses, logo, web address, and map of disposal locations, and information about electronic waster recycling and disposal (Figure 5.3 and 5.4). The brochure was distributed to residents by mail and at outreach events. A copy of the new brochure can be found in Appendix 5-2.

The City actively participated in the North County Storm Water Program (NCSWP), which is a collaboration of the Carlsbad Watershed Copermittees and the Project Cleanwater Copermittee Outreach Workgroup. The City distributed the printed materials previously developed with these groups.

Direct Mailings

The City of Carlsbad and Coast Waste Management partnered in the creation of a revised Environmental Programs Guide that was sent to residents in January 2007. This publication was designed to offer information about how to dispose of all sorts of waste from trash and recycling to household hazardous waste (HHW). There was also information included on ways to conserve water and how to protect Carlsbad water quality by preventing storm water pollution.

In the Fall of 2006 the Environmental Programs Division launched a new residential newsletter entitled "*Carlsbad Conserves*." The purpose of the newsletter is to inform residents of environmental issues facing Carlsbad, services provided by the City, tips of how to protect the environmental, including storm water BMPs, and calendar of important environmental dates (clean up recycling, bulky item pick up, etc.). The newsletter is distributed quarterly to all Carlsbad residents.

The Carlsbad Community Services Guide (City Scene) is mailed three times a year to all Carlsbad households (approx. 40,000). The Winter 2006 and Spring 2007 editions of the guide included residential storm water BMPs and Environmental Programs information.

Environmental Programs included information on storm water pollution prevention and BMPs in the City's Annual Drinking Water Quality Report, which was sent with water bills to approximately 36,000 Carlsbad Municipal Water District customers in June 2007 (Appendix 5-5). The purpose of the report is to provide all Carlsbad Municipal Water District customers with an overview of how potable water is delivered and how the City works to ensure that the highest quality service is provided. In addition to information on potable water, the report also included information on water conservation and how to help to protect and maintain clean waterways.

Classroom Education

During FY 06-07, the Solana Center for Environmental Innovation (Solana Center) continued to conduct the "*Classroom Watershed Program*" for the City. The Solana Center used the *EnviroScape* interactive model to teach students about watershed stewardship and pollution prevention. Outreach materials and workbooks were provided to the students and teachers. During FY 06-07, storm water fliers announcing the free presentations were distributed to teachers.

Each classroom was given a watershed poster, handouts for ten simple ways to help protect the ocean, guides to HHW alternatives and disposal (English and Spanish), and a recycling guide for students to take home. Students were also given pledge cards to sign and take home. The pledge cards read as follows:

1. I pledge not to dump anything down the storm drain.
2. I pledge to remind my family to properly dispose of toxic materials such as paint, cleaners, and pesticides.
3. I pledge to pick up after my dog (given only to those with dogs).

Table 9.2 lists all of the schools and the number of classrooms and students that attended the watershed classroom presentation during FY 06-07.

Table 9.2. Carlsbad Elementary Schools Watershed Awareness Programs

Date	Elementary School	# of teachers	# of students
09/27/06	Jefferson Elementary	3	110
10/04/06	Carrillo Elementary	1	38

City Stuff is an outreach program which evolved through a partnership between the City of Carlsbad and Junior Achievement program. The program reaches over 50, 3rd grade classrooms in Carlsbad (across district lines) and information filters home to the parents/residents. Students learn how Cities are planned, operated, and what services are offered. They also learn about important businesses in a City. Out of the six lessons taught, three of the lessons are Carlsbad specific, and one lesson is focused on City departmental programs. During FY 06-07, Storm Water Protection Program staff participated in the City Stuff program and educated over 100 students about the importance of storm water pollution prevention.

Advertisements

During FY 06-07, advertisements were published in the Carlsbad Magazine and the Community Services Guide. Table 9.3 lists the published ad and the estimated circulation.

Table 9.3. Dates of Publication of the Environmental Programs Advertisements

Ad	Month	Publication	Circulation
Environmental Programs Ad	Nov-Dec 2006	Carlsbad Magazine	80,000
Environmental Programs Ad	July 2006	North County Times	44,000

Website and Hotline
Most of the printed materials were available for download from the City's website and Environmental Programs website. There were 40,805 hits to the Environmental Programs web pages during FY 06-07.

Information Line/On-hold Messages
A continuous on-hold message provides residents with information about events in the City. During FY 06-07, staff used the information line to inform residents of the Environmental Programs web page, telephone number, upcoming outreach events, City services, Public Works Fair, Bulky Item Collection Day, and HHW collection facilities.

Kiosks/Display Racks
Various Storm Water Protection Program brochures are kept stocked at City kiosks and display racks.

Neighborhood Outreach Campaign
The City's Dry Weather Monitoring Program sample results found that several neighborhoods were contributing to storm water pollution through various residential activities. The Dry Weather Program Monitoring Report included recommendations to educate residents in three specific neighborhoods. In response, the Storm Water Protection Program conducted a targeted outreach campaign to those identified neighborhoods. The identified neighborhoods were delineated using the City's interactive GIS. In the fall of 2007, the City sent an information letter and BMPs to the residential areas identified as potential contributors to storm water pollution (e.g., pet waste, car washing, and landscaping activities). Staff mailed the "*Only Rain in the Storm Drain*" brochure and information letter to each residence in three identified areas in the City.

2007 Calendar and Community Guide
This 122-page bound calendar is mailed once a year to all Carlsbad residents. Several articles related to water quality were included during FY 06-07. Approximately 47,000 were printed for distribution.

Direct Interactions
Residents were educated about pollution prevention and BMPs during complaint investigations. City inspectors met with residents to explain storm water regulations and pollution prevention. When a resident was not available, a door hanger and other outreach materials were left to provide information about the reported discharge. Typically, follow-up informational letters were sent to homeowners and/or contractors after an investigation. These correspondences included brochures and fact sheets about storm water. Additional information on residential complaint investigations is provided in Section 5.4.

Prompts and Promotional items
Environmental Programs created and distributed recycling bags to residents at various events. The recycling bags displayed the Environmental Programs logo and phone number. The bags were also designed to encourage residents to recycle aluminum, glass, paper, and other materials.

The Storm Water Protection Program continued to distribute pollution prevention message pens to Carlsbad residents and City employees. Several existing storm water, solid waste, and water conservation materials were also distributed, including oil funnels and rags, key chains, buttons, notepads, cups, Frisbees, magnets, and a variety of other products.

Workshops
The City sponsored three workshops geared at educating residents about the benefits of composting. The workshops were held on September 30, October 28, and November 11, 2006. At the workshops, residents received information on water conservation, mulching, plant selection, vegetable peels and turning leaves,

and the basic techniques necessary for successful composting. These educational workshops also clearly demonstrated the relationship between water conservation, solid waste, and storm water. Residents were also provided with information on alternative chemical products, including integrated pest management, and were given information on the City's HHW collection facilities. Most residents took with them several of the City's brochures and Environmental Program promotional items publicizing the new phone number and website.

Public Events

The City hosted or participated in several public events, which provided opportunities for residents, school children, and the general public to learn about storm water pollution prevention. During most of these events, a staffed booth was set up and residents and kids have the opportunity to pick up printed materials, view an *Enviroscape* model demonstration, and speak directly with City storm water representatives. Table 9.4 includes a summary of these public events for FY 06-07.

Table 9.4. Outreach Events for Residents, General Public, and School Children

Event	Date	Type	Audience	Attendance
Senior Health Fair	07/08/06	Booth	General public	500
Jazz in the Park	07/21/06	Booth	General public	4,000

SD County Fair	06/20/07	Booth	General public	5750

9.5 Quasi-Government Agencies/Districts (i.e. Educational Institutions, Water Districts, Sanitation Districts, etc.).

Quasi-government agencies and districts typically fall under one of the existing commercial or industrial classification categories of high, medium, or low priority, based on the criteria used to identify facilities and "businesses." Outreach and education for these facilities is identified during compliance inspections.

During FY 06-07, the City inspected seven water and sanitation facilities as part of the industrial inspection program. Educational information was provided during the inspections, as well as in written inspection reports. Most of the water and sewer districts and educational institutions were covered under permits issued by the Regional Board. Therefore, many of these facilities already have knowledge of the storm water requirements and participate in education activities.

In FY 06-07, the City provided the County Animal Shelter located in Carlsbad with 100 "*Bags on Board*" dispensers to be distributed to residents that use shelter services. The shelter has about 4,000 customers per month (from all over North County). The City will be working with the North County Outreach Group to determine if a larger distribution program can be developed.

9.6 Self-Assessment

Program Strengths

In June 2007, the City implemented a new waste reduction strategy as a pilot program. This included the purchase and distribution of larger single stream recycling containers for employee work stations accompanied by a small trash can. There were also several new larger recycling containers placed in public meeting areas throughout the City. Seen as an effective pilot program, the City will implement the waste reduction strategy at all City facilities in September 2007. Roll out of this new program included the development of posters, fact sheets and a presentation to educate and inform employees about the importance and benefits of recycling.

In March 2006, the City developed a new brochure for the mobile service providers. The brochure was designed for mobile service providers, their employees and anyone that hires a mobile service provider. The new brochure was mailed to every applicable business on the storm water inventory.

The Environmental Programs Division sponsored a composting bin sale event on June 17, 2006, in an effort to get more residents to compost organic waste instead of throwing it away. During FY 06-07 over 320 composting bins were sold to Carlsbad residents. The composting bins will be on sale continuously.

The Storm Water Protection Program collaborated locally and regionally to ensure outreach efforts and messages for storm water pollution prevention were consistent. The messages were delivered by various means including presentations, workshops, inspections, investigations, and outreach events, in addition to use of direct mail, the website and newspaper advertisements.

The City continued to actively promote and advertise the Storm Water Protection Program as part of Environmental Programs. This merger of programs allowed the Storm Water Protection Program to work in conjunction with the "*Used Oil Block Grant Funds*" program to conduct related education and outreach. The merger also created a unified City Environmental Programs message to help foster a better understanding of the relationship between residential activities and sources of pollution.

The City conducted the annual (telephone) Public Opinion Survey in FY 06-07, which included questions on storm water pollution prevention. The results from this survey provide important information on the public's awareness and knowledge of storm water pollution prevention issues and activities. This information can help focus future education and outreach messages and events. This survey information is also used on a *Performance Measure* to gauge the effectiveness of the outreach and education program.

In FY 03-04, the City worked with Waste Management to develop an Environmental Programs booklet that included storm water residential BMPs, as well as detailed information on solid waste services, including oil recycling and HHW disposal sites. The booklet was revised and updated during FY 06-07 to reflect the most current HHW, trash, recycling, storm water, and water conservation information.

The Storm Water Protection Program and Environmental Programs worked with the Information Technology Department to revise the web pages and provide updated information about pollution prevention.

Program Improvement Areas

In late FY 06-07, the Storm Water Protection Program began drafting a *Best Management Practices Manual* that includes minimum and required BMPs for activities and pollutants types. The manual will be continually worked on during FY 06-07 and should be completed in FY 07-08.

During FY 06-07, staff begin revising brochures and fact sheets and updating them to reflect changes in the program. A complete revision of all brochures is expected to be completed in FY 08-09.

During FY 06-07, staff developed a new Environmental Programs education campaign entitled "Think-Act" targeting various environmental concerns, including storm water pollution. This program will be further developed in the future and may be implemented as an additional educational tool in the Storm Water Protection Program.

Section 10
Public Participation Component

10.0 Overview

Public participation is crucial to ensuring the effectiveness of the Storm Water Protection Program. Public participation allows the residents, interested parties, and stakeholders to express their concerns and provide creative solutions before final decisions are made. The City led and/or contributed to several public participation opportunities this reporting period including the development, implementation, and review of storm water management programs, BMPs, and other JURMP and related issues. The goal has been to ensure that the Carlsbad community has a vested interest in solving storm water problems and has a general understanding of watershed protection. Citizens, the business community, and other interested parties were invited to attend public meetings, outreach events, workshops, City Council meetings, and other events during this reporting year.

10.1 Public Meetings and Hearings

The public had numerous opportunities to attend meetings, at the watershed and regional levels, to learn about the City's implementation of the Permit and have their concerns addressed. Table 10.1 contains a list of some of the public meetings and dates held during this reporting period.

Table 10.1. FY 06-07 Public Meetings

The Carlsbad City Council meets on the first four Tuesdays of every month at 6:00 PM. These meetings are held in the Council Chambers at Carlsbad City Hall and are open to the public. The Council meetings are also televised live on Tuesday night on Cablevision Channel 3 and replayed Wednesdays at 8 AM and 2 PM. Videotaped copies of the Council meetings are available at the Carlsbad Library.

City Council Agendas are prepared by the City Clerk's office and are available on the Friday prior to the City Council Meeting or through a subscription email service. Agendas are available at the meeting, posted outside Council Chambers, or the public can pick up a copy from the Clerk's office. A subscription service is also available for interested parties to receive the agenda each week in the mail, at the cost of $50.00 per year. Copies of the agenda and public hearing notices are available on the City's web site at www.carlsbadca.gov. Council Agenda Packets are available for review at the City Clerk's office and at the Carlsbad Library on the Friday prior to the City Council Meeting. City Council Minutes are prepared by the City Clerk's office and are the permanent record of proceedings of each City Council Meeting.

The public can also attend the Copermittee Management Committee Meetings and other Copermittee meetings. Notices of these meetings are available from the Project Cleanwater website at www.projectcleanwater.org.

Residents can also become representatives on various City committees. The City Clerk's office maintains a current list of City Boards, Commissions, and Committees, current vacancies, meeting dates and times, and coordinates all appointments to these positions.

The Planning Commission is comprised of seven members appointed by the City Council. This commission makes recommendations to the City Council regarding implementation and updating of the General Plan. When needed, they also provide recommendations to the Council regarding policy issues that affect long-range planning. They review development projects, provide recommendations to the City Council, provide reports to the City Council on the Local Facilities Management Plans, review the annual CIP for consistency with Growth Management Program, identify potential problems and opportunities facing the City, and suggest special studies when appropriate.

10.2 Feedback Mechanisms

In addition to the feedback opportunities available through public meetings and hearings, there are also a number of additional mechanisms available for the public to provide feedback.

Hotline and E-mail Address

The public is encouraged to provide input and feedback on the Storm Water Protection Program implementation. In addition to the public meeting opportunities detailed above, the public can call the storm water hotline to request information, provide comments, or make illegal discharge reports. In addition, the public can send e-mails directly to the Storm Water Protection Program at stormwater@ci.carlsbad.ca.us. There are also several other public contact phone numbers and City e-mail addresses available for public use. Other City departments forward comments and questions to the Storm Water Protection Program as needed. The public can also access a Storm Water Protection Program web page through the City's website which provides information about the storm water requirements and BMPs.

The public continued to use the Environmental Programs hotline and e-mail address to obtain information about HHW, trash, and recycling programs. The City's RFA system was used to track calls about Environmental Programs comments and questions from residents. During FY 06-07, the Environmental Programs Division responded to 30 complaints related to HHW, recycling, and solid waste.

Direct interaction

The City continues to rely on the interactions between City staff and the public to convey messages about storm water and pollution prevention. City staff received targeted training to increase their understanding

of urban runoff issues. Staff interaction with the public also provided additional opportunities for the City to obtain direct feedback about BMPs, ordinances, and pollution prevention efforts.

Public Surveys

The BW Research Partnership, on behalf of the City, conducted an annual *Public Opinion Survey* of Carlsbad residents. The survey entails a random-Digit dial methodology of over 1,000 residents to obtain information about attitudes and knowledge of City services, facilities, and issues, and also includes demographic questions for further analysis and interpretation. There were three questions related to storm water quality on the 2007 survey. The results of these questions are in Section 11 of this report. The entire report is available for download from the City's website. Surveys helped the City understand how the public perceives storm water which can help foster better planning and management programs. The City publishes the results of the *Public Opinion Survey* in the annual *State of Effectiveness Report.*

General Outreach

Efforts through printed ads, newspapers, press releases, media interviews, PSA's, the Community Calendar, City guides, brochures, water bill stuffers, and other publications were used to keep the public informed of storm water requirements, updates, and public participation opportunities.

10.3 Community Events and Volunteer Efforts

The City's Community Volunteer Coordinator administers outreach and involvement programs for Carlsbad residents. This position has continued to find volunteers to assist the Storm Water Protection Program with various activities, including cleanup events. During FY 06-07, volunteers contributed over 450 hours towards improving storm water quality. The City participated in several community events held in Carlsbad and other locations across the County. These events are summarized in the following table.

Table 10.2. Community Events FY 06-07

Date	Event	Location	Number of Participants
07/08/2006	Senior Health Fair	Carlsbad	500
07/21/2006	Jazz in the Park	Carlsbad	4000
07/30/2006	Hot Rods & Cool Treats	Carlsbad	500
08/04/2006	Jazz in the Park	Carlsbad	4000
09/10/2006	Fiesta del Barrio	Carlsbad	8000
09/12/2006	Health & Education Expo	Carlsbad	300
09/16/2006	Buena Vista Lagoon Clean-Up	Carlsbad	56
10/12/2006	Citizen's Academy	Carlsbad	30
11/11/2006	Fall Festival at the Ranch	Carlsbad	500
12/09/2006	Holiday at the Rancho	Carlsbad	200
03/17/2007	Hosp Grove Community-Wide Clean Up	Carlsbad	300
03/25/2007	Water Festival	Carlsbad	300
03/28/2007	Carlsbad HS Career Day	Carlsbad	800
03/29/2007	Citizen's Academy	Carlsbad	30
03/31/2007	Children's Day at the Flower Fields	Carlsbad	5000
04/28/2007	Batiquitos Lagoon Clean Up	Carlsbad	91
05/23/2007	Public Works Fair	Carlsbad	1000
06/02/2007	Trail Blast	Carlsbad	300
06/07/2007	Outreach - Pacific Rim School	Carlsbad	20
06/12/2007	Calendar Contest	Carlsbad	150
06/14/2007	SD County Fair	Del Mar	5750
06/20/2007	SD County Fair	Del Mar	5750

Clean Up Events

In September 2006, the City sponsored its annual "*Buena Vista Creek Clean Up*" event. Over 55 volunteers, several of them Carlsbad residents, collected over 3 tons of trash and recyclables along Buena Vista Creek. The clean up effort was a part of the annual California Coastal Cleanup Day. Common items found included fast food containers, recyclable glass and plastic beverage containers, and cigarette butts. Larger items included tires, bed frames, carpets, and wood pallets.

On March 17, 2007, the City's Recreation Department sponsored a community-wide clean up and tree planting event at Hosp Grove in Carlsbad. Residents from various Carlsbad neighborhoods joined together to plant trees, prune bushes, and remove trash from the historic Hosp Grove area.

On April 28, 2007, the City sponsored a clean up site for the annual Regional Creek to Bay Clean Up event. Statewide, the Creek to Bay Clean up has the highest turnout with just over 2,500 volunteers helping out at 41 cleanup sites. Those hard-working volunteers picked up an estimated 102,000 pounds of debris. For the Carlsbad event, the City selected a site near Batiquitos Lagoon where a significant amount of debris and litter had accumulated. This was the first year volunteers had cleaned the site and they were successful in removing 1.8 tons of trash and debris from the area.

Citizen's Academy

Twice a year, the City hosts a program called "*Citizen's Academy*." This seven-week course (one night per week) teaches residents about City government and how public services are provided. This provides an excellent opportunity for citizen participation in City government. An overview of the Storm Water Protection Program, including Permit requirements, program activities, and residential BMPs was presented at both events this reporting year. Approximately 60 residents attended the two academy sessions held on October 12, 2006 and March 29, 2007. This has been a highly successful and popular event, which typically has a waiting list for new participants.

Storm Drain Stenciling

Stenciling storm drain inlets with "*No Dumping – Drains to Ocean*" messages reminds citizens and businesses not to pollute waterways. Stencils are available upon request to businesses and residents who are interested in stenciling private storm drains. Public inlets are marked by the Streets Department.

Composting Workshops

The City sponsored three workshops geared at educating residents about the benefits of composting. The workshops were held on September 30, 2006. October 28, 2006, and November 11, 2006. At the workshops, residents received information on water conservation, mulching, plant selection, vegetable peels and turning leaves, and the basic techniques necessary for successful composting. These educational workshops also clearly demonstrated the relationship between water conservation, solid waste, and storm water. Residents were also provided with information on alternative chemical products, including integrated pest management, and were given information on the City's HHW collection facilities. Most residents took with them several of the City's brochures and Environmental Program promotional items publicizing the new phone number and website.

10.4 Other Public Participation Opportunities

The City continues to recruit interns from local universities to work with storm water staff. During FY 06-07, the Storm Water Protection Program had one intern working on various projects, including commercial and industrial inspections, data management, outreach and education, and coastal storm drain monitoring. Their assistance with inspections, water quality studies and monitoring, data entry, and investigations increased productivity and helped the program achieve inspection and investigation goals.

10.5 Self-Assessment

Program Strengths

Information about water conservation, trash management, and storm water has been combined to one centralized web page accessed at www.carlsbadconserves.org. The Environmental Programs hotline provides information about storm water, trash, and water conservation for the public. The hotline is primarily answered by the Storm Water Protection Program during business hours and provides a detailed voice message after hours. In addition, outreach materials continue to be revised to include the Environmental Program's web page address, hotline number, and storm water hotline number. Residents can call the hotline to request BMP information or download the information from the Environmental Programs and the Storm Water Protection Program web page. During FY 06-07, there were approximately 40,805 visits to the Environmental Programs web page.

The City actively seeks ways to provide two-way communication with the public. This is shown by some of the current City programs, such as the popular "*Citizen's Academy*" and the annual "*State-of-Effectiveness Report*" which includes a citywide public opinion survey of at least 1,000 residents. The City has internal teams dedicated to finding the most effective ways of communicating with the public and providing opportunities for the public to become more involved.

Program Improvement Areas

The City welcomes participation from the public and will continue to actively educate the community.

The City will also continue to improve its website to provide more information to the public and to publicize hotline numbers, email addresses, public meetings and other events where the public can get involved.

Section 11
Assessment of JURMP Effectiveness

11.0 Overview

The Permit requires each Copermittee to develop a long-term strategy for assessing the effectiveness of their JURMP. The Permit language states:

"*The long-term assessment strategy shall identify specific direct and indirect measures that each Copermittee will use to track the long-term progress of its individual JURMP towards achieving improvements in receiving water quality. Methods used for assessing effectiveness shall include the following or their equivalent: surveys, pollutant loading estimations, and receiving water quality monitoring. The long-term strategy shall also discuss the role of monitoring in substantiating or refining the assessment.*"

During FY 06-07, the City continued to participate in a Copermittee workgroup to draft common elements for this assessment. Previously, the Copermittee workgroup submitted *"A Framework for Assessing the Effectiveness of Jurisdictional Urban Runoff Management Programs"* (Framework) to the Regional Board on October 16, 2003. The City continues to use this document as a guideline for refining the assessment strategy and for developing assessment measures.

11.1 Targeted Outcomes

The Framework document established six levels of outcomes. Beginning with Level 1 and ending with Level 6, each type of outcome represents a gradation from activity-based to water quality-based outcomes. Ultimately, the long-term objective is to establish clear relationships between Levels 1 and 6.

Level 1: Compliance with Activity-Based Permit Requirements.
This level consists of activities either prescribed by or established under the Permit. Examples include the establishment of discharge prohibitions, inventory updates, completion of required inspections, and other general messages distributed through outreach programs. A fundamental feature of the Copermittee efforts is the establishment of specific programs and activities, which are assumed but not proven, to be beneficial to water quality. While many of the assumptions may be correct, there are currently few means of quantifying or establishing causal relationships that will make these efforts more measurable. The City will continue to work with the other Copermittees to investigate the basis for these assumed relationships.

Table 11.1 tracks some of the City's program activity measures, which are discussed in detail in the previous report sections. Tracking of many of these activities was useful in assessing compliance with the program, but is not yet tied to long-term assessment or improved water quality.

Table 11.1: FY 06-07 Program Activity Measures

JURMP Section	Targeted Activities				Target Percentage	Percent Completed
MUNICIPAL	Inventory	# inspected/cleaned		Qty. removed		
MS4 – catch basins	3,671	3,671		45 tons	90%	100%
Brow ditches - public	18,500 feet	18,500' insp, 4,776' cleaned		6.5 tons	As needed	100%
Channels – public (6)	6 channels	6 channels		300 pounds	100%	100%
Desilting Basins	3	3		100 pounds	Not established	100%
Street sweeping (annual)*	13,000 miles	13,000 miles		975 tons		100%
Roadside litter	-	-		1,200 cu.yds.		
High Priority Facilities	13	13		N/A	100%	100%
INDUSTRIAL	Inventory		# inspected			
High Priority	42		42		100%	100%
Medium Priority	173		95		50%	55%
Low Priority	218		155		33%	71%
COMMERCIAL	Inventory		# inspected			
High Priority	628		385		27%	61%
RESIDENTIAL	FY 02-03	FY 03-04	FY 04-05	FY 05-06	FY 06-07	
Hazardous waste (tons)	67.81	53.67	64.87	55.85	56.96	
LAND USE	Discretionary permits rev.		# required SWPPP/SWMP			
	62		62		100%	100%
CONSTRUCTION	# high priority inspections required		# high priority sites inspected			
	4998		4998		100%	100%
IC/ID	# complaints received		# responded to			
Complaints	588		588		100%	100%
	Identified		Eliminated			
Illegal Discharges	84		84		100%	100%
Illicit Connections	1		1		100%	100%
Dry weather sites	60 targeted sites		60 monitored sites		100%	100%
EDUCATION	# events (workshops, etc)		# attendance			
School Presentations	40		810		N/A	N/A
Public Events	25		28,047		N/A	N/A
Municipal job specific	115		1,392		N/A	N/A
Website Hits	40,805				N/A	N/A
PUBLIC PARTIC.	>100 opportunities provided					

*does not include public parking areas which were also swept monthly at a minimum

Performance Measurement Program

In addition to these on-going program activities and measures, the City conducts a citywide *Performance Measurement Program* that results in an annual "*State of Effectiveness Report.*" This effort was initiated in 1999 and the first annual report was published in June 2000. The program is a systematic approach designed to continuously assess service and program effectiveness and efficiency. While performance measurement is a fairly common practice in the private sector, there currently is no standard model for the public sector. The City's goal has been to create and improve a measurement system that identifies key

outcomes that quantify success. The result of this effort is to develop an organization that focuses on continuous improvement.

The *Performance Measurement Program* provides a feedback loop between organizational effort and the ability to achieve and sustain desired outcomes. This annual cycle begins each January when the results of the citywide public opinion survey and "*State-of-Effectiveness Report*" are presented to the Carlsbad City Council. The City Council uses these reports to set priorities and strategic goals. The results are then communicated to staff who use them to develop management goals and department budgets for the next fiscal year. For FY 06-07, the City Council identified ten strategic goals that address:

- Balanced Community Development
- Citizen Connection
- Communication
- Environmental Management
- Financial Health
- Learning, Culture and Arts
- Parks/Open Space/Trails
- Top Quality Service
- Transportation/Circulation
- Water

Individual performance measures were developed by departments to address the strategic goals. The City departments annually collect data about each goal and compare results to benchmark values. The benchmark levels were set high, since they target the level of performance each department strives to achieve. The related performance measure goal defined under the *Environmental Management Strategic Goal* for FY 06-07 is as follows:

> "*Be an environmentally sensitive community by focusing on: conservation, storm water, sewage collection and treatment, solid waste, and cost effective and efficient use of energy including alternative energy sources*."

Sanitary Sewer Performance Measure

A number of items were tracked in the sewer related performance measures. They were designed to measure the integrity of the sewer system, the ability of staff to respond quickly and efficiently to spills, and the effectiveness of preventive maintenance operations. These efforts are summarized below with additional detail found in Section 8.7 of this report.

Volume of Spills: Volume of reportable sewage spills per mile of sewer mains. For the purposes of this report, a "spill" is defined as any untreated sewage flow that escapes from the sewer collection system and has the potential for entering surface waters and/or the MS4.

- Benchmark: Annual volume of reported sewage spills due to system failure will be zero. This benchmark is consistent with the requirements of the Regional Board.
- Results: 18.7 gallons per mile

Volume of Spills Recaptured: This component looks at spills caused by a failure in the City's sewer system. This does not include spills from sewer laterals within the City.

- Benchmark: Recapture 100% of all spills from the maintained sewer system so that sewage never enters surface waters and/or the MS4.
- Results: 87%

Station Facility Maintenance: Percentage of work activities completed during the fiscal year (based on the standards established in the *Maintenance Assessment Program*).

- Benchmark: At least 90% of all pump station electrical moving parts, wet wells, generators, valves and pumps are tested annually and repaired as necessary. This program includes station maintenance, electrical maintenance, wet well maintenance, generator maintenance, station surveillance operations, valve maintenance and pump maintenance/repair.
- Results: 96% overall

Sewer Main Cleaning: Percentage of work activities completed during the fiscal year (based on standards established in the Maintenance Assessment Program).

- Benchmark: At least 90% of all priority sewer main lines will receive high velocity cleaning to ensure proper conveyance of sewage and to prevent sanitary sewer overflows and backups. Priority sewer lines are scheduled for cleaning depending on the location of the lines, flow rates, historical information on the frequency of blockages, and pipe material.
- Results: 97% overall

Level 2: Changes in Knowledge/Awareness

The most immediate, basic outcome of urban runoff programs is a change in the knowledge, awareness, or attitudes of target audiences (learning that storm drains and sanitary sewers are separate systems, that everyday activities contribute to storm water pollution, etc.). Such changes are often targeted through outreach programs and once knowledge changes, it presumably forms the basis of behavioral change and the proactive use of BMPs. The City was involved in a number of surveys and programs to assess knowledge and awareness of various target communities. These are highlighted below.

City of Carlsbad Public Opinion Survey

An annual public telephone survey was conducted this year by a new firm, the BW Research Parntership, as part of the *Performance Measurement Program* and "*State-of-Effectiveness Report.*" Carlsbad households were selected using *Random-Digit-Dial* methodology with a minimum sample size of 1,000. This survey had a margin of error of +/- 3% at the 95% confidence level. Storm water pollution was addressed briefly in this survey. The City survey asked, "*Have you seen or heard any information about how residents can prevent the pollution of creeks, lagoons, and the ocean?*" This question was used to gage the public's perception of ocean water pollution and was asked previously in 2003. The results are presented in Table 11.2 below.

Table 11.2: Results of Environmental Question 1

Answer:	2003 (%)	2006 (%)	2007
1. Yes	58.1	64.6	61.1
2. No	41.9	35.4	38.9

This question illustrates a steady awareness of storm water and urban runoff pollution from 2003 to 2007 among residents.

An additional question was added to the surveys this year to assess the most affective educational methods by asking, "Where do you recall seeing or hearing about ways to prevent pollution?" The top two responses were newspaper and radio, respectively comprising over 50% of the total responses. Newsletters and brochures were the next highest, making up nearly 30% of the responses. Other responses included posters, website, curb signs, word of mouth, and public events.

Industrial/Commercial Assessment

In FY 04-05, a *BMP and Knowledge Assessment* tool was developed to measure an individual operator's knowledge of storm water issues and assess the implementation of BMPs onsite. The assessment tool is

used by inspectors during site visits. Please refer to Section 3 for the *Knowledge and BMP Assessment* rating scale criteria. Table 11.3 shows the number of instances in percentages that Industrial High and Medium businesses rated for each score for FY 04-05,FY 05-06, and FY 06-07, with 5 being the highest score possible.

Table 11.3: Industrial Knowledge Assessment Scores as a Percent of the Total

Knowledge Rating	FY 2004-05	FY 2005-06	FY 2006-07
1	6	3	0
2	8	12	2
3	10	26	10
4	27	21	18
5	49	38	70

The number of industries with average or above average knowledge of storm water issues increased in this fiscal year with 86% reported in FY 04-05,85% in FY 05-06, and 98% in FY 06-07.

Complaints

The Storm Water Protection Program responded to 154 reports of potential illegal discharges. Approximately 88 were found to be valid complaints (i.e., others were either not located or not violations, permitted discharges, etc.) Table 11.4 shows the number of potential issues reported to the storm water program, the number of those that were valid complaints, and the number of washing or dumping complaints. These data were compiled for the past six years under Order 2001-01, however the washing/dumping data was only available for the last four years.

Table 11.4 Summary of Complaints Reports FY 2001-02 through FY 2006-07

Fiscal Year	Potential Violations Reported	Valid Reports	Washing/Dumping
2001-02	121	106	-
2002-03	156	128	-
2003-04	186	115	42
2004-05	119	88	12
2005-06	107	76	15
2006-07	154	88	44

Classroom Education

Elementary school students were given an *Eco-quiz* prior to presentations to gauge their knowledge of the subject. Following each presentation, students were given the same *Eco-quiz* to identify the effectiveness of the presentation. This year, the quizzes reflect that 2% of students had knowledge of watersheds and storm drains before the presentations. After the presentations, 100% of the students had a clear awareness. This is a 98% change in knowledge before and after the *Eco-quiz*.

Level 3: Behavioral Change/BMP Implementation

A key goal of jurisdictional programs is to affect significant and lasting changes in the knowledge and behavior of municipal employees, residents, businesses, and other target audiences. Outcomes may range from compliance with discharge prohibitions, to implementation of BMPs, to active stewardship of watershed resources. Therefore, quantifying BMP implementation through surveys or other means provides an important step toward establishing pollutant reductions.

Surveys

The City asked a behavioral question during the 2006 survey to those who answered affirmatively to the question, "*Have you seen or heard any information about how residents can prevent the pollution of creeks, lagoons, and the ocean?*" The 61.1% who answered question one affirmatively were asked the follow-up question, "*What things are you doing to reduce water pollution?*" Results for this question are presented in Table 11.5.

Table 11.5: Top Responses to "*What things are you doing to reduce water pollution*?"

Answer:	Percent
1. Properly disposing of hazardous waste.	24.0
2. Cleaned up trash at Beach, Roadside, Etc.	14.0
3. Using environmentally friendly soaps, pesticides, etc.	12.6
4. Used a commercial carwash.	14.9
5. Cleaned up animal waste.	6.6
6. Did nothing.	21.4
7. Other (recycling, reduced runoff.	42.8
8. Don't know.	3.6

While these responses can not be guaranteed to be accurate, continued survey data should help to show if long-term behavior change has occurred. Over seventy percent of residents who answered question one affirmatively, consciously chose an environmentally friendly method over others in certain instances.

Industrial/Commercial Assessment

The Storm Water Protection Program also implemented a *BMP Assessment* tool. The inspector assigns a rating of overall BMP implementation based on the criteria outlined in Section 3 of this report. Table 11.6 shows the number of instances in percentages that industrial high and medium businesses combined rated for each score during FY 04-05,FY 05-06, and FY 06-07 with 5 being the highest score possible.

Table 11.6: Industrial BMP Assessment Scores as a Percent of the Total

BMP Implementation Rating	FY 04-05	FY 05-06	FY 06-07
1	3	7	0.5
2	8	7	2
3	13	18	24
4	32	37	38
5	43	31	36

In FY 04-05, over 40% had effective BMP implementation with only 3% failing overall; while in FY 05-06 the number of industries ranking highest declined to 31%. Overall, the percentages of industries ranking average or above were similar from year to year, 88% in FY 04-05,86% in FY 05-06, and 98% in FY 06-07.

Enforcement

When the Permit was issued, the Storm Water Protection Program focused efforts on educating the public and informing residents and businesses how to comply. In most instances, a verbal notice was sufficient for compliance. If repeat violations occurred, enforcement actions were escalated to obtain compliance. As anticipated, the Storm Water Protection Program has moved toward escalated enforcement when necessary to achieve compliance. Table 11.7 summarizes types and rates of enforcement actions taken for the past five years.

Table 11.7: Enforcement Mechanisms by Year

Type of Action	FY 02-03	FY 03-04	FY 04-05	FY 05-06	FY 06-07
Verbal Warning	27%	6%	17%	19%	36%
Informational letter or warning	57%	51%	46%	40%	33%
Notice of Violation	16%	40%	29%	28%	30%
Notice to Clean	-	-	-	4%	2%
Cease and Desist order	<1%	-	-	-	-
Administrative Citation	-	3%	6%	9%	-

Identifying the types of illegal discharges most commonly reported may help indicate problem activities and focus outreach efforts to those areas. Most complaints originated from residential sources. During FY 06-07, washing was the most frequently reported illegal discharge at 40%, followed by illegal dumping at 22%, and home improvement discharges at 21%. Figure 11.1 illustrates the types of discharges in FY 06-07.

Figure 11.1 Types of Discharges

Level 4: Load Reductions

The primary goal of BMP implementation is to reduce pollutant loads in storm water discharges. An important emphasis of annual program assessments is to estimate the load reductions resulting from various program activities. Assuming that such reductions are properly targeted to existing or potential water quality problems, load reductions should in turn result in improvements to discharge and receiving water quality. Quantifying load reductions represents an important intermediate endpoint for assessments. The Regional Board wrote the following in October 2004:

> *Program effectiveness can be assessed by quantifying the pollutant load reductions attributable to various program activities. An effective program will compare pollutant load reductions of various program activities and implement those activities which result in the largest pollutant load reductions. It is expected that by implementing program activities which maximize pollutant load reductions, Copermittees will be implementing effective programs which will improve receiving water quality.*

The City used the Watershed Treatment Model (WTM) as a simple tool for rapid assessment of effectiveness of the storm water programs. The WTM (version 3.1) was prepared by Deb Caraco of the Center for Watershed Protection for the U.S. EPA Region V - Office of Wetlands, Oceans and

Watersheds. Last year's report identified bacteria, sediment, and nutrients as constituents of concern. In response, specific program activities were undertaken to address these constituents. The WTM estimates the pollutant loading reductions for sediment, bacteria and nutrients for various program activities, such as residential education, erosion and sediment control programs, and street sweeping, among others. The results of some of these storm water management programs are discussed below. Complete explanations and assumptions are found in the WTM book.

Public Education

A variety of public education programs may help to reduce the concentration of nutrients, sediment and bacteria in urban streams. The model currently focuses only on a few of these, including programs to address lawn care, septic system maintenance, and pet waste. Several other residential pollution prevention programs improve water quality, but have little effect on nutrients, suspended solids, and bacteria. For example, HHW programs are effective at reducing toxics but do not have a quantifiable impact on pollutants such as suspended solids, nutrients, or bacteria.

Lawn Care: The ideal pollutant removal associated with lawn care would be achieved if all of the additional fertilizer applied to turf were eliminated. The model uses equations to estimate optimal nutrient load reduction from a lawn care program combined with a calculation of the residential lawn area. Table 11.8 shows the spreadsheet information from the WTM. The model calculates the residential lawn area based on the City's input of residential acres taken from GIS. The user inputs the information on how the education campaign was conducted. Default values were given for the fraction of the audience willing to change behavior based on nationwide data. The City conducted lawn care education through brochure distribution, workshops and newspaper ads.

Table 11.8: Lawn Care Education Model Input

Lawn Care Education	
Program? (Y/N)	Y
Lawn Area (acres)	3980
Program Discounts	
Fertilizers (Fraction)	0.78
"Over Fertilizers" (fraction of fertilizers)	0.65
Awareness of Message (fraction of population)	0.15
Fraction willing to change behavior	0.7

The model allows the user to input the media type, which determines the portion of the population that *remember* the message ("Awareness of Message"). This number is largest with television (0.4), followed by newspaper (0.3), radio (0.25), billboard (0.13), brochures (0.08) and workshops (0.07). Because residents have been exposed to five of these mechanisms in FY 06-07, the input value entered was an average for brochures, workshops and newspaper, radio, and television (0.22). This results in an annual nutrient load reduction of 5,826 pounds of nitrogen and 117 pounds of phosphorus (Table 11.9).

Table 11.9: Loading Reduction from Existing Lawn Care Education

Loading Reduction		
	N (lbs/year)	P (lbs/year)
Lawn Care Education	5,826	117

Pet Waste: The Storm Water Protection Program also conducted a *Pet Waste Education Program* during FY 06-07. In the urban watershed, dogs are a significant contributor of bacteria and nutrients. Ideally, a *Pet Waste Education Program* would reduce this source to zero, with all homeowners properly disposing of waste. The model provides estimated values for the fraction of households with a dog, the fraction of owners who walk their dog, the fraction of owners who cleanup after their dog, and the fraction willing to

change their behavior. As with the lawn care education, the portion of the population that remembers the message is based on the media used for the education. This past year, the City delivered this message through brochures and the newspaper. Residents were also exposed to regional education efforts on television and radio. In addition, the City distributed free pet waste bag dispensers at local events and provided animal care facilities with these dispensers. These activities were considered similar to a workshop, so an averaged value of 0.22 was used for this calculation (see Table 11.10).

Table 11.10: Pet Waste Education Program Model Input

Pet Waste Education	
Program? (Y/N)	Y
Program Discounts	
Fraction of Households with a Dog	0.4
Owners who walk their dogs (fraction)	0.5
Owners who Clean Up (fraction)	0.6
Fraction willing to change behavior	0.6
Awareness of Message (fraction of population)	0.15

This results in an annual pollutant loading removal of 3,059 pounds of nitrogen, 399 pounds of phosphorus, and 26,600 billion bacteria per year (Table 11.11).

Table 11.11: Loading Reduction from Existing Pet Waste Education Program

Loading Reduction			
	N (lbs/year)	P (lbs/year)	Bacteria (billion/year)
Pet Waste Education	3,059	399	26,600

The overall assessments of these education programs show that the media significantly affected the associated pollutant removal due to the increased audience that *remembers* the message. For instance, if the City had the ability to use mass media (television and radio), the estimated pollutant reduction would be increased significantly. The City's annual phone survey confirms that most people recall hearing these messages through mass media. However, mass media is significantly more expensive than brochures and workshops. The City has a storm water performance measure that calculates the cost per capita for education activities. Proposed cost changes to the education campaigns can be calculated and compared in order to select the most efficient options. With these loading reduction estimations, costs can also be calculated on a per pound basis in order to justify the use of one option over another. Such calculations may show that it is not cost efficient to conduct a mass media campaign due to these costs and the associated reductions achieved. Large campaigns for mass media may be best conducted on a regional basis with Copermittees sharing the expense or pursuing grant funds for these expensive activities. Due to an increase in mass media educational tools used at the Regional level this year, it is expected that many of the residents in Carlsbad were affected by these campaigns, accounting for the increase in load reductions associated with lawn care and pet waste.

Erosion and Sediment Control Program

The efficiency of the erosion and sediment control program is based on a best case scenario: a sediment control program that emphasizes erosion control measures, including practices that limit clearing and grading or use of phased construction methods (Brown and Caraco, 1997), and requires advanced sediment control measures to reduce sediment runoff from leaving the site. The WTM default efficiency for erosion and sediment control is 70%.

The user assigns the discount factors related to the fraction of the erosion practices installed and the fraction installed/maintained properly. There is a range of discount factors based on the level of program

implementation and oversight. For example, if there were few inspectors, with no pre-construction meetings and poor practices allowed by codes and regulations, the input value would be 0.4. If inspectors visit sites weekly and if there are education programs for inspectors and contractors, the input value is 0.9 (the highest discount value in the WTM). City inspectors treat each grading site as high priority with weekly inspections and education. This allows for high discount input values. Significant improvements were made to the program in FY 06-07 as described in detail in Section 7 of this report. With these considerations, a discount value of 0.8 was used.

A discount factor is also calculated based on the fraction of practices installed and maintained properly. Based on input from CMI with weekly inspections, education programs, and guidance on BMP selection, a high discount value of 0.8 was used (Table 11.12).

Table 11.12: Erosion and Sediment Control Model Input

Erosion and Sediment Control	
Program Efficiency	70%
Fraction of Building Permits Regulated	75%
Compliance Discount	0.8
Installation/Maintenance Discount	0.8

Based on the estimated acres under construction and the discount factors applied, this results in an annual loading reduction of 80,826 pounds of nitrogen, 242,477 pounds of phosphorus, and 80,825,549 pounds of Total Suspended Solids per year (Table 11.13).

Table 11.13: Loading Reduction from Existing Erosion and Sediment Control Programs

Loading Reduction			
	N (lbs/year)	P (lbs/year)	TSS (lbs/year)
Erosion and Sediment Control	80,826	242,477	80,825,549

Street Sweeping

The WTM accounts for street sweeping by reducing the concentration value of TSS, nitrogen, and phosphorus from road runoff. The user inputs the acres of roadway swept for four types of streets: roadways, residential streets, commercial streets, and industrial streets. For each street type, the load reduction is calculated by multiplying the load by the efficiency of street sweeping. The "best case" estimate of street sweeping efficiencies assumes weekly sweeping. Sediment removals are derived from a modeling study conducted in Portland, Oregon (Claytor, 1999a). Other research suggests that the performance of street sweeping for phosphorus is roughly 80% of the performance for suspended solids (Kurahashi and Associates, 1997). The WTM assumes that the removal for nitrogen is the same as for phosphorus. These are simplifications because the performance for different constituents will vary depending on the sweeper performance when picking up various sized particulate (mechanical vs. regenerative air vs. vacuum assisted). Table 11.14 shows the potential pollutant removal efficiencies for different types of sweepers and streets (from the WTM).

Table 11.14: Washoff Reductions for Weekly Street Sweeping Percentages[1]

Street Type/Sweeper Type	TSS Removal	N/P Removal
Residential Street		
• Mechanical	30%	24%
• Regenerative Air	64%	51%
• Vacuum Assisted	78%	62%
Major Road (not residential)		
• Mechanical	5%	4%
• Regenerative Air	22%	18%
• Vacuum Assisted	79%	63%

Discount factors for street sweeping reflect the frequency of sweeping and "technique" (i.e., the amount of the street surface that is swept). The "*frequency factor*" reduces effectiveness if sweeping is less frequent than once per week. Reducing sweeping frequency to monthly can reduce the efficiency to approximately 60% of the efficiency for weekly sweeping (Claytor, 1999a). The "*technique factor*" accounts for reductions in efficiency caused when sweeper operators do not sweep the entire road surface. This typically happens when cars are parked on the streets, or when operators are improperly trained. Table 11.15 shows some rough estimates (acreage) for the existing street sweeping program.

Table 11.15: Street Sweeping Model Input

	Streets Swept (Acres)		
Sweeper Type	Residential	Other Streets	Parking Lots
Mechanical	0	957	500
Regenerative Air	0	0	0
Vacuum Assisted	1,324	0	0
Sweeping Frequency (M=monthly, W = Weekly)	0.8	0.6	0.6
Total Street Area (acres)	498	2870	1784
Technique Discount	0.5		

This existing program resulted in the pollutant loading reductions shown in Table 11.16.

Table 11.16: Loading Reductions from Existing Street Sweeping Activities

Loading Reduction			
	N (lbs/year)	P (lbs/year)	TSS (lbs/year)
Street Sweeping	2,463	285	212,779

Parking restrictions are in effect in 12 locations throughout the City and have not been modified recently. The City improved the street sweeping contract in FY 05-06, adding vacuum assisted sweeping in residential areas, and maintained the contract in FY 06-07 to improve load reductions.

Illicit Connection Removal

Optimistically, an illicit connection removal program would remove the entire illicit connection load as calculated in the WTM. This reduction is then multiplied by two discount factors: a survey factor which represents the fraction of the sewer system where the illicit connection survey is conducted and an implementation factor which represents the fraction of illicit connections found that will be removed. Since 1995, the City has conducted a Dry Weather Monitoring Program designed to identify illegal discharges and illicit connections to the storm drain system. When an illicit connection is found, the City

[1] Claytor, 1999a; Sutherland and Jelen, 1997; Kurahashi and Associates, 1997.

requires the owner/responsible party to immediately disconnect. Table 11.17 shows the model input using conservative figures (number of illicit connections) and Table 11.18 shows the loading reductions if 75% of the MS4 is surveyed in a year and all identified illicit connections are eliminated.

Table 11.17: Illicit Connection Model Input

Illicit Connections	
Fraction of WS Population Illicitly Connected	0.0001
# of Illicit Connections	4.3133
Number of Businesses	4520
Fraction of Businesses with Illicit Connections	0.05
Fraction of Business Connections that are Wash Water Only	0.9
Wash Water Flow (gpd)	50
Total Flow/Business (gpd)	150

Table 11.18: Loading Reductions from Illicit Connection Removal

	N (lbs/year)	P (lbs/year)	TSS (lbs/year)	Bacteria (bil./yr)
ICID removal	691	328	5958	200,111

Illicit connections can be a huge contributor of pollutants to the MS4. Because the City has had an active identification and elimination program for almost a decade, this potential source has been successfully reduced. As new businesses and homes continue to be built, it is important that inspection programs continue to ensure no new illicit connections are added.

Sanitary Sewer Overflow Repair/Abatement

Reduction of sanitary sewer overflow (SSO) loads is difficult to predict and may include practices such as repairing existing blockages, increasing the volume of the sanitary sewer, or lining pipes to prevent infiltration from adjacent soils. In the WTM, the user must input a target reduction as a percentage of the existing SSO load. This load reduction is multiplied by an implementation factor, which represents the fraction of the repairs implemented. Storm loading estimated at 21% of SSOs based on previous year's overflows within 72 hours of rainfall. Table 11.19 shows the calculated loading reductions if the City inputs a value of 75% as the target reduction and can complete 75% of the necessary repairs.

Table 11.19: Loading Reductions from SSO Repair/Abatement at 75% Target

	N (lbs/year)	P (lbs/year)	TSS (lbs/year)	Bacteria (bil./yr)
SSO Repair/Abatement	1.38	0.23	9.17	1,041

The City has an active SSO response program and maintenance program to prevent overflows. The actual annual number and volume of SSO's was entered into the model to calculate secondary loadings (based on performance measure results). (The City's numbers were significantly lower than the EPA Model's national average default values. Data from the large spill in April, as described in Section 8, was excluded from these calculations as the volume represents an outlier in the data set.

Level 5: Changes in Discharge Quality

In many respects, changes in discharge quality are the most direct expression of successful program implementation, since receiving water quality reflects much more than discharges from the MS4. Improving the quality of discharges into and from the MS4 is an important and targeted outcome.

Dry Weather Field Screening and Analytical Monitoring Program

The City has conducted an annual *Dry Weather Field Screeing and Analytical Monitoring Program* since 1995. The purpose of the monitoring program is to detect and eliminate illicit connections and illegal discharges to the storm drain system. For the past eight years, the City has contracted this work out to D-

Max Engineering, Inc. The Dry Weather Monitoring Program report for FY 06-07 and follow-up activities are provided under separate cover with this report. The following charts and discussions summarize current and past dry weather results in order to assess changes in MS4 water quality.

Figure 11.2 reviews the geometric mean for total coliform, fecal coliform and enterococcus over the past five years. There were 19 dry weather samples collected each year, across various points covering the MS4. Fecal coliform concentrations are generally lower over the past four years than in 2003, while enterococcus concentrations are slightly higher in recent years. In comparison to dry weather action levels, fecal coliform and enterococcus mean values are well below the established action levels across all years of data. With only 5 years of data and many variable factors unaccounted for, it is unclear if the recent results are due to improvements and BMP implementation or to the variable nature of bacteria concentrations.

The City has conducted field testing of detergents since 1995. Figure 11.3 appears to show a downward trend in detergent levels found in the MS4 with results less than established action levels for MBAS. Currently, detergents are rarely detected in the dry weather program (at current lab MDLs). This is possibly due to the efforts of the City's Storm Water Protection Program to educate the public and to prevent illegal washing into the MS4.

The average pH levels, as shown in Figure 11.4, have also shown a downward trend since 1995. This may be a result of the decreased detergents in the MS4, which are typically basic having pH values >7.

Dry weather samples are analyzed in the field for many parameters including nutrients such as ammonia-nitrogen, nitrate-nitrogen, and ortho-phosphate. Ammonia concentrations, as illustrated in Figure 11.5, show that concentrations have been decreasing since the inception of the Permit. With the exception of 2002, all recent years have averaged well below the established action level for ammonia-nitrogen.

Figure 11.6 illustrates average nitrate-nitrogen concentrations over the past six years. Nitrate concentrations appear to be decreasing at dry weather sites over the past three years, with the lowest average in the past six occurring this year. Many of the higher concentrations of nitrate-nitrogen may be attributable to groundwater in the region.

Data for ortho-phoshate is presented in Figure 11.7. Lower in recent years than in 2002, all averages are well below established dry weather action levels.

Over the course of the six years of dry weather programs, water quality parameters have been repeatedly analyzed at the same sites allowing for a comparison of data. In general, water quality within the MS4 is good, with evidence of decreasing concentrations of fecal coliform, MBAS, pH, ammonia, and nitrate-nitrogen. Efforts continue to focus on bacteria concentrations in the MS4 and their sources. In the future, increased efforts to understand bacteria concentrations and sources will be made through various TMDL activities. With an enhanced understanding of bacteria, the City will be better prepared to address and abate sources within the watershed.

Coastal Outfall Monitoring Program

As mentioned in Subsection 8.1, the City collected samples from various storm drain outfalls as part of the *Coastal Outfall Monitoring Program*. If water was flowing from a storm drain outfall, samples were collected and analyzed for total coliform, fecal coliform and enterococci. Storm drain sample results were compared to the 95th percentile criteria established in the *Adaptive Monitoring Plan*. Where possible, a paired receiving water sample was collected to assess the impacts of the storm drains on the receiving waters. The receiving water samples were compared to Rec-1 standards to determine exceedances. Where storm drain bacteria concentrations exceeded 95th percentile criteria or receiving water samples exceeded Rec-1 objectives, follow-up sampling and/or investigations were performed. The monitoring and follow-up protocols are detailed in the *Adaptive Monitoring Plan*.

Figure 11.8 shows the number of storm drain outfall samples that had an exceedance of the 95th percentile criteria for the bacterial indicators. Recent years indicate a decrease in storm drain exceedances for all three bacterial indicators, showing improvements in water quality. Exceedances of the 95th percentile did not correlate with any corresponding exceedances in the receiving water. In all cases, the flow from outfalls was intermittent and low volume. In many cases, the flow did not actually reach the receiving waters, but dissipated into the sand or sediment. The City will continue to conduct the Coastal Outfall Monitoring Program and to conduct follow-up investigations as detailed in the Adaptive Plan.

Level 6: Changes in Receiving Water Quality

The ultimate objective of the Permit is to protect and improve water bodies from receiving polluted discharges from the MS4. Targeted changes to receiving water quality can include a variety of outcomes such as compliance with regulatory benchmarks, biological integrity, beneficial use attainment, and protection. Regardless of the outcomes, it is important to note that receiving water quality reflects considerably more than the quality of the City's MS4 discharges. In addition, receiving water quality can be adversely impacted by other events that are not under the control of the City, such as other permitted NPDES discharges, wildlife (impacting bacteria levels), atmospheric deposition, and other events and activities.

At the end of FY 04-05, the City purchased a continuous water quality monitoring probe (Datasonde) to be installed in Agua Hedionda Creek near the Mass Loading Station. The Datasonde was installed during FY 05-06. The probe is tied into a continuous stream flow gauge that was installed during the year as part of a State Proposition 13 Grant for the removal of invasive plant species in the Carlsbad Watershed. Stream flow gauges were installed on Buena Vista Creek, San Marcos Creek, and Agua Hedionda Creek. It is anticipated that this multi-parameter probe will provide useful data in the future development of

TMDLs, specifically to be used to implement the Lagoon Investigative Order, 2006-0076. Although the probe is gathering some data, it has been removed and re-installed a few times, and the data has not been compiled, quality controlled, or assessed at this time.

Expansion of Dry Weather Program

The *Dry Weather Field Screening Program* is aimed at identifying illegal discharges to the MS4. This year the City continued to have four receiving water samples collected in order to provide additional baseline data of surface water quality. This is the fifth year of data collected under the expanded program. The program includes monitoring sites on Buena Vista Creek, Agua Hedionda Creek (at the Mass Loading Station site), Encinas Creek, and San Marcos Creek. Each of these tributaries is representative of the four separate Carlsbad sub-watersheds. The results for FY 06-07 are found in Appendix 13-1. A full discussion of this special study can be found in Section 13 of this report.

Coastal Monitoring Data

The City collected three routine samples of the ocean water during FY 06-07. There were no exceedances of the REC-1 standards in the Ocean for total coliform, fecal coliform or enterococci during the last five reporting periods. There were 48 routine paired samples collected from outfalls to lagoons during FY 06-07. Figure 11.9 shows the number of samples that exceeded a bacterial indicator during the last five reporting periods. A general decline in receiving water exceedances in the lagoons is evident across all bacterial indicators, showing improvements in water quality.

Of the 48 receiving water samples collected in lagoons, there were only a few exceedances of benchmarks: zero for total coliform, three for fecal coliform, and four enterococci. There was wide variability between outfalls, monitoring events, and dry and wet seasons, and there was no correlation between a high receiving water result and a high storm drain result. For the paired receiving water samples exceeding the REC-1 standards, all of the corresponding storm drain results were below the 95th percentile indicating that the storm drain discharge did not negatively impact the receiving water. The City will continue to implement this program and to conduct follow-up investigations in accordance with the *Adaptive Plan*.

11.2 Self Assessment

Program Strengths

The City has continued using effectiveness assessment measures during FY 06-07. This included the continued use of surveys, pollutant loading estimations, and MS4 and water quality monitoring. As more data is collected, assessments will be more representative of actual conditions.

Compliance based (Level 1) assessment is effective in showing that the City is meeting or exceeding Permit requirements. Dedicated resources for litter abatement and MS4 cleaning contribute to better overall water quality. Industrial and commercial inspections were completed as required and have been effective in reducing pollution from these sources. Construction sites with grading permits were all prioritized as high threats to water quality and are inspected frequently. Because the performance measure system has been incorporated into the City's storm water programs, Permit requirements were often exceeded.

Changes in knowledge and awareness in storm water issues (Level 2) is addressed through education and outreach programs and in the industrial and commercial inspection programs. A public phone survey is completed annually and includes questions designed to assess changes in awareness from year to year. An "Eco-quiz" is also given to children in the City through in class school programs. This quiz assesses knowledge before and after the presentations. The City also includes an assessment question on the industrial and commercial inspection forms. This question is designed to assess knowledge and awareness on-site and changes can be tracked year to year. Changes in awareness are evident in the public survey results from 2003 to 2006 and in the results of the "eco-quiz".

Behavioral changes (Level 3) are assessed in the same manner as described above. Questions on the public opinion surveys and on the inspection forms allow for changes in behavior to be tracked and assessed year to year. These questions are slightly different from Level 2 questions in that they are designed to assess what actions the target audience is actually taking to improve water quality. Public surveys help the program to determine which BMPs are implemented in the residential sector. Although this question has not been tracked year to year, the overview of common environmentally conscious behavior is evidence of positive impacts of the program.

Estimated load reductions necessary for the Level 4 assessment are calculated using EPA modeling software. Reductions are calculated for nitrogen and phosphorus associated with improved lawn care, pet waste disposal, erosion and sediment control, street sweeping, removal of illicit connections, and reduction in sanitary sewer overflows. TSS reductions are calculated for improvements in erosion and sediment control, street sweeping, removal of illicit connections, and reductions in sanitary sewer overflows. Bacteria loading reductions are calculated for improvements in pet waste disposal, removal of illicit connections, and reductions in sanitary sewer overflows. Land use information collected from GIS analyses is necessary for generating these estimations. Significant loading reductions to the storm drain system are evident for total nitrogen, phosphorous, bacteria, and total suspended solids through BMP implementation as prescribed by the program.

Tracking changes in MS4 water quality (Level 5) assessment is possible via the Dry Weather Monitoring Program. With five years of dry weather data, ranging from nutrient and physical measurements to bio-available metals and pesticides, collected at 60 sites covering the entire MS4, a picture of water quality within the system is becoming clear. While data is only collected once annually, improvements can be seen for nutrient concentrations, pH, and surfactants within the MS4. Exceedances of bacteria 95th

percentile criteria in the Coastal Storm Drain Monitoring Program have declined in recent years of monitoring.

The ultimate goal of the program is to demonstrate improvements of water quality in receiving waters, Level 6 assessment. Receiving water quality is monitored via several programs including: supplemental Dry Weather Monitoring Program receiving water sites, coastal storm drain monitoring, and mass loading station monitoring.

The Dry Weather Monitoring Program expanded to include four sample locations to assess receiving water quality downstream of the MS4. In 2007 monitoring, nearly all constituents were not detected in the water samples including: MBAS, oil and grease, dissolved cadmium, dissolved copper, dissolved lead, diazinon, and chlorpyrifos. Water quality at the four locations was relatively good.

The Coastal Monitoring Program requires bacteria sampling of the receiving waters, ocean and lagoon, where storm drains are flowing into the water bodies during dry weather. This program attempts to assess the impacts of the storm drain flows on water quality in the receiving water. FY 06-07 data indicates no water quality exceedances for bacteria in the ocean and only a few in the enclosed lagoons. The exceedances in the lagoons have been declining in recent monitoring seasons as water quality appears to be improving. Samples where objectives were exceeded in the lagoon did not positively correlate with high bacteria in the storm drains and were likely influenced by other bacteria sources.

The Regional Monitoring Program includes a monitoring station at Agua Hedionda Creek and monitors a number of water quality constituents during storm events. In the future, this data may be used for long term water quality assessments and for TMDL monitoring information.

Program Improvements

Level 2, assessment of change in knowledge and awareness, is working well. Changes in awareness in the industrial and commercial sector are not evident through the inspection questions as awareness remains consistently high for both. This question could be included on the municipal inspection forms as well.

Level 3 assesses changes in behaviors through questions evaluated during inspections. The implementation of BMPs in the industrial and commercial sectors remains consistently high for both. The questions could be included on the municipal inspection forms as well for further assessement.

Level 4, assessments of load reductions, will be compared to loading estimates from other jurisdictions to determine the quality of the data. For example, total loads per land use have been estimated in studies in the Los Angeles Region. These loads could be compared to the reductions calculated by the EPA model to determine the usefulness of either method. Estimates and load reductions will be calculated for future TMDL development as well.

Level 5 and 6, assessing improvements in MS4 discharge and receiving water quality, will be improved as new permit programs add information useful for these levels of assessment.

Section 12
Fiscal Analysis Component

12.0 Overview

The Permit requires the City to secure the resources necessary to meet the requirements of the Permit and the JURMP, and to conduct an annual fiscal analysis. The analysis must evaluate the expenditures necessary to accomplish the activities identified in the JURMP and describe the sources of the funds used to meet the expenditures. The Storm Water Protection Program is comprised of numerous program activities funded from a variety of sources. Table 12.1 summarizes the storm water protection program activities and identifies the current funding source:

Table 12.1. Summary of Program Activities and Current Funding Sources

Program/Activity	Funding Source(s)
Storm Water Facility Capital Improvement Program	Developer Impact Fees, Developer Exactions, General Fund, Gas Tax, TransNet Sales Tax, Federal and State Grants
Storm Water Facility Maintenance and Operation Program including Street Sweeping, Litter Removal and Storm Event Readiness and Patrolling	Solid Waste Service Fees, General Fund
Storm Water Program Administration	Solid Waste Service Fees
Illicit Detection and Illegal Discharge Enforcement Program	Solid Waste Service Fees, General Fund, Fines
Commercial/Industrial SWPPP Inspection Program	Solid Waste Service Fees (charged to commercial service customers only)
Construction Related SWPPP Review and Inspection Program	Developer Fees

In FY 02-03 and 03-04, the City conducted a fee study to evaluate possible financing mechanisms for the Storm Water Protection Program. The new financing mechanism was detailed in the "*City of Carlsbad Storm Water Pollution Protection Program Regulatory Fee Study Report*", dated September 12, 2003. The report recommended funding the storm water program through an increase in the City's Solid Waste Service fees and new development processing fees. Nearly all of the pollutants discharged into the MS4 are classified as solid waste under state and local codes. Based on this information and other findings, the City implemented a *Solid Waste Service* fee increase for residential and commercial service users to fund certain Storm Water Protection Program activities. The amount of the fee increase is calculated based upon the apportioned costs to the business and residential service users and their contribution to the pollutant loading. This fee was reviewed in June 2007, and updated to reflect current workloads. The current fee is $3.46 per month for residential customers, and 23.09% of the base trash rate for commercial customers.

The total operating costs to fund the storm water program activities related to existing development for FY 06-07 were $1,355,240. This does not include the *Storm Water Capital Improvement Program* costs discussed in Section 12.1. It does, however, include actual expenditures for personnel, operating costs and capital outlay from the Storm Water Protection Program budget, including costs for street sweeping. Since the 2003 fee study and new Storm Water Fees, most of the activities related to Storm Water Protection Program and storm drain maintenance have been funded out of the "Storm Water" account. A few other items, such as a portion of street sweeping not directly involving the City's right-of-ways are

paid for from other sources. A spreadsheet detailing the FY 06-07 expenditures for storm water activities along with the planned FY 07-08 budget is in Appendix 12-1.

The September 2003 study and proposal also recommended the establishment of development processing fees to pay for costs to review and inspect construction related SWPPPs. At the current rate of development, the SWPPP review and inspection fees are expected to generate over $130,000 annually in revenues.

12.1 Storm Water Facility Capital Improvement Program

Capital expenditures for new or upgraded storm water facilities are generally funded from developer revenues generated by the City's adopted Local Drainage Area Fee program, developer exactions, or the General Fund. Occasionally, new drainage facilities or repairs and/or rehabilitation of existing drainage facilities are funded from other road-related funding resources such as the Gas Tax, TransNet Sales Tax, or Federal and State Grants. The adopted CIP budget includes funding for nearly $29 million dollars in storm water facility costs to build-out of the City. Funding for additional drainage facilities are included within the funding for various other City road improvement and civic projects. The exact amount of funding for drainage improvements included within the funding of other projects is not identified in the CIP budget.

Through the end of FY 06-07, the City had active drainage facility projects totaling $7.6 million in the adopted CIP budget. New projects initiated in FY 07-08 appropriated an additional $1.4 million. To date, approximately $3 million has been spent on active drainage projects. The City is committed to funding the construction of new and upgraded storm water facilities from its *Development Impact Fee Program*, the General Fund, and/or other revenue sources. The City will continue to investigate formation of a "*Storm Water Utility*" as a possible alternative source of funding to replace General Fund contributions.

12.2 Storm Water Facility Maintenance and Operation Program

For the purpose of this financial analysis, the formal *Storm Drain Maintenance Program* includes cleaning and minor repairs to the MS4, street sweeping, litter removal, storm event preparations, and patrolling. Historically, the cost to provide these services was funded by the General Fund. However, the adoption of the solid waste funding mechanism has provided a funding source for many of the *Storm Drain Maintenance Program* costs that had previously been funded in the General Fund. Street sweeping expenses totaled $191,244 during FY 06-07, additionally $108,838[1] was spent for litter removal. When all Storm Water Protection Program expenditures were combined, it was estimated that the total costs for storm drain maintenance activities was approximately $521,000. To better track these expenses in the future, the City has established a mechanism to track expenses directly related to Storm Water Facility Maintenance and Operations.

12.3 Storm Water Protection Program Administration

The administrative cost of the Storm Water Protection Program includes expenditures for annual JURMP reporting, GIS updates, records maintenance, wet weather monitoring, NPDES fee payments, education and outreach, and general program administration. The total annual cost for administration for FY 06-07 was estimated at $780,000. Prior to approval of the new storm water funding mechanisms, the full cost for administration of the program was funded from the General Fund. With the approval of the new

[1] In FY 2006-07, the litter removal program transitioned from an in-house service provided by temporary employees to a contracted service. Costs shown here are a hybrid of the 2 programs in 2006-07.

funding mechanisms, the full cost for administration of the Storm Water Protection Program is paid from the revenues generated from the *Solid Waste Service* fee increase.

12.4 Illicit Discharges Detection and Elimination

The *Illicit Discharge Detection and Elimination Program* includes activities to detect and investigate the discharge of non-permitted pollutants into the MS4. This also includes any activities required to eliminate discharges and/or otherwise enforce compliance with the storm water regulations. The primary expenditures for the *Illicit Detection and Illegal Discharge Enforcement Program* for FY 06-07 is included in the administrative costs listed above in Section 12.3. This figure does not include any cost for legal actions taken to enforce compliance with the *Illicit Detection and Illegal Discharge Enforcement Program* when enforcement is elevated beyond an administrative citation. The cost for any legal action taken against an illegal/illicit discharger above an administrative citation will be paid from the General Fund or fines levied against the respective illegal/illicit discharger.

12.5 Commercial/Industrial SWPPP Inspection Program

The City's *Commercial/Industrial SWPPP Inspection Program* includes the review of business related SWPPPs together with periodic site inspections to ensure compliance with requirements of the JURMP and the Carlsbad Municipal Code. The total budget allocated for the *Commercial/Industrial SWPPP Inspection Program* for FY 06-07 was estimated at $115,715. These costs were partially paid for out of the Storm Water Protection Program and the General Fund. Prior to approval of the new storm water funding mechanisms, the full cost for administration of the program was funded from the General Fund.

12.6 Construction Related SWPPP Review and Inspection Program

The *Construction Related SWPPP Review and Inspection Program* also includes regular site inspections during project construction to ensure project proponents comply with the requirements of the Permit, JURMP, and Carlsbad Municipal Code. The annual cost for the *Construction Related SWPPP Review and Inspection Program* varies from year to year depending upon the level of development within the City. The developer processing fees will ensure that adequate revenues are generated to fund all construction related SWPPP reviews and inspections.

Based upon current development activity levels, the City anticipates the annual program costs in the range of $56,500. Prior to the approval of the new storm water funding mechanisms, the full cost for the *Construction Related SWPPP Review and Inspection Program* was funded from the General Fund. With the approval of the new funding mechanisms, the full cost for the program will be paid from the revenues generated from the collection of development processing fees.

12.7 Self-Assessment

Program Strengths

The City has had a steady revenue source to fund the Storm Water Protection Program over the past year. Adjustments to the Solid Waste Fee funding mechanism for Storm Water-related programs have been made to ensure adequate funding for anticipated programs over the next fiscal year.

Program Improvements

The City will be working over the next Fiscal Year to ensure that Storm Drain Maintenance Activities are following the funding conventions outlined in the 2003 Fee Study, and 2007 update to same.

To better track Storm Drain Maintenance expenditures, versus Storm Water Protection Program Expenses, we have created a new account for Storm Drain Maintenance. This will allow City Staff to better track expenses for storm drain maintenance activities which are funded by both the General Fund and Storm Water Fee.

For FY2007-08 we are reviewing our developer fee structure to recover costs incurred to comply with the NPDES permit.

Section 13
Special Investigations

13.0 Overview

This section contains water quality data related to two projects conducted in FY 06-07. The first is described in Section 13.1 and reflects samples collected in four of the City's creeks, representing receiving waters in each sub-watershed. The second special investigation is described in Section 13.2. This monitoring was conducted to fulfill the monitoring requirement of the California Coastal Commission for construction of the new municipal golf course.

13.1 Receiving Waters Monitoring during Dry Weather

Study Design

This monitoring program was first initiated in the summer of 2003, concurrent with the City's Dry Weather Monitoring program described in Section 8, and has continued for the past five years. These sites were selected to be representative of the four major inland receiving waters in each of the sub-watersheds in the City. A site was monitored on Buena Vista Creek, Agua Hedionda Creek, Encinas Creek, and San Marcos Creek. Each location was monitored for the constituents listed under the Dry Weather Program as required under Order 2001-01. This additional effort was in support of the Carlsbad Watershed Group's desire to better understand the condition of the receiving waters within the Carlsbad Hydrologic Unit. The receiving water results are compared to *Water Quality Objectives* (WQO) listed in the 1994 Water Quality Control Plan for the San Diego Basin (Basin Plan), which are set by the State of California to be protective of beneficial uses.

Grab samples were collected during dry weather for all constituents, providing a snapshot of the water quality in the creek at that particular time. Temperature, pH, conductivity, and turbidity measurements were obtained using a recently calibrated hand held meter. Other parameters including detergents, ammonia-N, nitrate-N, and ortho-phosphates were tested using Chemetrics field test kits. While these kits provide enough information to initiate investigations in the dry weather program, they often do not have accuracy or detection levels low enough to compare these data to water quality objectives. This is especially true for the nutrients analyzed. Analyses for other constituents including surfactants (MBAS), oil and grease, dissolved metals, diazinon, chlorpyrifos, and bacteria were performed by certified laboratories using approved methods. As a result, this data is of higher quality and may be compared to water quality objectives (WQO) with more confidence. Because of the differences in analytical procedures, the discussion that follows will be divided into three sections: those constituents measured by reliable calibrated meters, those constituents measure by Chemetrics field test kits, and those analyzed by a certified lab.

Physical Measurements Data

Physical measurements such as temperature, pH, and turbidity were collected using calibrated field instruments and were within Basin Plan water quality objectives at all times for all four creeks.

Temperature is guided by the Thermal Plan, which addressed only discharges to receiving waters. Using Best Professional Judgment, there were no temperature variations causing concern during the monitoring.

The Basin Plan establishes a range for pH of 6.5-8.5 as the WQO. All pH measurements in the four creeks across the five years were within this range.

The turbidity WQO in the Basin Plan is 20 NTU; all measurements were well below the WQO for all five years.

There is currently no WQO established for conductivity, however all measurements were within the recommended action levels used in the Dry Weather Monitoring Program indicative of illicit discharges.

Field Test Kit Data

Measurements using the field test kits include: detergents, ammonia-N, nitrate-N, and orthophosphate. Nearly all measurements were below applicable WQO for each constituent.
