Pine Valley	2.50	Dec 2012	911.41	410-120-39
TOTAL	**40.74**			

TMDL APPLICABILITY

While it may be supportive of TMDL goals, this activity is not specifically implemented as part of a TMDL compliance program.

TIME SCHEDULE FOR IMPLEMENTATION

The County of San Diego acquires land on an ongoing basis from willing sellers.

LEAD WATERSHED COPERMITTEE

- County of San Diego

OTHER PARTICIPATING ENTITIES

- U.S. Fish and Wildlife Service
- California Department of Fish and Game
- Private land owners
- Conservation groups
- Community planning groups
- Developers

HIGH PRIORITY WATER QUALITY PROBLEM(S) ADDRESSED

- Bacteria/Pathogens
- Conditions
- Dissolved Minerals
- Gross Pollutants
- Metals
- Nutrients
- Oil & Grease
- Organics
- Pesticides
- Sediment
- Trash

CONSISTENCY WITH THE COLLECTIVE WATERSHED STRATEGY

Land acquisition is consistent with the collective watershed strategy in that it averts development, thereby eliminating the possibility of future sources in need of abatement or future pollutant loads in need of reduction.

EFFECTIVENESS MEASUREMENTS

Activity effectiveness will be measured by tracking the number and total acreage of land acquisitions within the watershed on an annual basis. It may also be possible to estimate pollutant loadings avoided as a result of these acquisitions. The County will consider presenting load reduction estimations in WURMP Annual Reports if it determines that they are helpful for the purposes of assessing overall program effectiveness.

This page intentionally left blank.

TITLE: I LOVE A CLEAN SAN DIEGO TRASH SPONSORSHIP
ID #: TJ-003

ACTIVITY DESCRIPTION

Each spring, I Love A Clean San Diego (ILACSD) conducts its Creek to Bay Cleanup event to target various inland and coastal sites in San Diego County in need of trash and debris removal. ILACSD recruits and organizes site captains and groups of volunteers for each site. A media center is also designated, which promotes environmental stewardship, including the importance of keeping litter and debris from spoiling the region's watersheds. The whole event is marketed throughout San Diego County through a variety of media, including television, radio public service announcements, newspapers, newsletters, electronic mail, bulletin boards, community outreach activities, calendar listings, and word of mouth.

The ILACSD Creek to Bay Cleanup occurred on April 28, 2012. The City of San Diego (City) sponsored the San Ysidro – Beyer Blvd. Trolley Station site in the Tijuana River Watershed Management Area (WMA). Approximately 175 volunteers removed 4,000 pounds of trash and debris in a 4.5-mile area.

TMDL APPLICABILITY

None

TIME SCHEDULE FOR IMPLEMENTATION

The Creek to Bay Cleanup has historically been held in April of each year. Prior to that month, the City will coordinate with ILACSD staff to ensure that sites within the Tijuana River WMA are included in the list for cleanups and that proper sponsorship arrangements are made.

LEAD WATERSHED COPERMITTEE

- City of San Diego

OTHER PARTICIPATING COPERMITTEES

- Not Applicable

OTHER PARTICIPATING ENTITIES

- I Love A Clean San Diego
- Volunteers from the general public

HIGH PRIORITY WATER QUALITY PROBLEM(S) ADDRESSED

- Bacteria/Pathogens
- Trash

CONSISTENCY WITH THE COLLECTIVE WATERSHED STRATEGY

Both the City's Strategic Plan for Watershed Activity Implementation and the Collective Watershed Strategy for the Tijuana River WMA identify trash and bacteria as high priority water quality problems throughout the WMA, and recommend implementing load reduction/source abatement activities to address it.

EFFECTIVENESS MEASUREMENTS

Management Questions

1) What is the load reduction associated with sponsorship?
2) What is the efficiency of the trash cleanup? ($/pound collected)

Targeted Measurable Outcome(s)

1) Achieve load reduction due to reduction of trash (any amount) due to trash cleanup sponsorship

Assessment Method(s)

1) Tabulation (e.g., number of participants)
2) Quantification (e.g., pounds of trash collected)

Data Recorded

- Pounds of trash removed (Outcome Level 4): 4,000 lbs
- Pounds of trash recycled (Outcome Level 4): 0 lbs
- Total pounds of trash removed and recycled (Outcome Level 4): 4,000 lbs
- Number of participants (Outcome Level 1): 175
- Amount of money spent on cleanups for all six watersheds (Outcome Level 1): $15,000
- Estimated amount of money spent on cleanups for the Tijuana River watershed (Outcome Level 1): $2,500
- Efficiency (Total Cost/Total Pounds Removed): $0.63/lb

Expected Benefits

Sponsorship of the Creek to Bay Cleanup will result in load reduction of trash and debris directly and of bacteria indirectly.

Analysis Results

At the event, 175 participants removed 4,000 pounds of trash and debris. The average estimated sponsorship cost was $2,500 per watershed; thus, there was a 4,000 pound load reduction and an efficiency of $0.63 per pound collected. The efficiency was calculated by dividing the sponsorship cost for the Tijuana River WMA by the total pounds of trash removed and recycled

Conclusions

This trash cleanup activity fulfills a watershed water quality activity for FY2012 because this activity resulted in a measurable pollutant load reduction (Outcome Level 4) of 4,000 pounds of trash removed and recycled during the reporting period. Implementation and assessment of load reduction and efficiency for the cleanup sponsorship will occur again in FY 2013.

TITLE: COASTAL CLEANUP DAY SPONSORSHIP
ID #: TJ-004

ACTIVITY DESCRIPTION

Each fall, San Diego Coastkeeper (SDCK) and I Love A Clean San Diego (ILACSD) conduct the Coastal Cleanup Day event to target various inland and coastal sites in San Diego County in need of trash and debris removal. They recruited and organized site captains and groups of volunteers for each site. A media center is also designated, which promotes environmental stewardship, including the importance of keeping litter and debris from spoiling the region's watersheds. The whole event is marketed throughout San Diego County through a variety of media, including television, radio public service announcements, newspapers, newsletters, electronic mail, bulletin boards, community outreach activities, calendar listings, and word of mouth.

TMDL APPLICABILITY

None

TIME SCHEDULE FOR IMPLEMENTATION

Coastal Cleanup Day has historically been held in September of each year. Prior to that month, the City will coordinate with SDCK and ILACSD staff to ensure that sites within the Tijuana River WMA are included in the list of cleanups.

TITLE: CITYWIDE CLEAN-UP EVENTS
ID #: TJ-010

ACTIVITY DESCRIPTION

Imperial Beach participates in a number of citywide sponsored cleanup events including ILACSD Creek to Bay Cleanup, local community group sponsored events, and the annual Homefront Cleanup event. The largest event in terms of participation is the annual Homefront Cleanup, which the City has been implementing since the 2001-01 municipal permit. These annual citywide activities serve both as an encouragement and a means for residents to eliminate waste that could otherwise contribute the release of contaminates into the storm water conveyance system.

TMDL APPLICABILITY

This activity is not specifically targeted for TMDLs in the Tijuana WMA.

TIME SCHEDULE FOR IMPLEMENTATION

As funding permits.

LEAD WATERSHED COPERMITTEE

- City of Imperial Beach

OTHER PARTICIPATING COPERMITTEES

- N/A

OTHER PARTICIPATING ENTITIES

- N/A

HIGH PRIORITY WATER QUALITY PROBLEM(S) ADDRESSED

- Bacteria & Pathogens
- Metals
- Trash

CONSISTENCY WITH THE COLLECTIVE WATERSHED STRATEGY

Bacteria is identified as a priority water quality problem in the Tijuana WMA. The accumulation of waste by residents such as trash, green waste, and large bulky items are potential sources of bacteria. Since this activity addresses a priority water quality problem and a priority source, it is consistent with the collective watershed strategy.

EFFECTIVENESS MEASUREMENTS

The effectiveness of this project meets the requirements of Outcome Level 1, Level 2, and Level 4 compliance with activity based permit requirements. Community wide cleanup events raise awareness of the connectivity of trash, urban runoff, storm drain systems, and receiving waters. During the year Imperial Beach sponsored I Love a Clean San Diego for its Annual Creek to-Bay clean up event. The annual Creek to Bay cleanup engages the community through public participation and increases awareness on the connectivity of the receiving waters to the urban environment. Assessments are also made across the region on the level of participation and characteristics of the waste collected.

The City and EDCO also held the annual Homefront clean up event, which allows residents to dispose large trash items, recyclables, and other items that can not be disposed in the trash.

Effectiveness for both events can be measured in part by calculating the amount of trash and other pollutants removed.

TITLE: LARGE SPECIAL EVENT INSPECTION AND CLEAN-UP
ID #: TJ-011

ACTIVITY DESCRIPTION

The City hosts the annual U.S Open Sandcastle Competition that draws close to one million visitors to Imperial Beach in the month of July. The City also hosts additional special events during the year that draw a large number of visitors to the City. Along with the visitors are a number of mobile businesses, food venders, and increased volume of trash that can potentially contribute to the problem of urban runoff. Starting in 2008 the City enhanced its special event application process to further target urban runoff and recycling during the planning and implementation stages for the special event. Program enhancements include providing storm water education for street vendors, providing education for the general public whenever possible, and inspections of street venders for storm water violations. The City also enhanced its recycling and trash collection service for the Annual U.S. Open Sandcastle Competition and July 4th fireworks.

TMDL APPLICABILITY

This activity is not specifically targeted for TMDLs in the Tijuana WMA.

TIME SCHEDULE FOR IMPLEMENTATION

N/A

HIGH PRIORITY WATER QUALITY PROBLEM(S) ADDRESSED

- Bacteria & Pathogens
- Trash

CONSISTENCY WITH THE COLLECTIVE WATERSHED STRATEGY

Bacteria are identified as a priority water quality problem in the Tijuana WMA. The increased number of visitors, larger volumes of waste, and water quality threat from mobile food vendors during large special events are potential sources of bacteria and urban runoff pollution. Since this activity addresses a priority water quality problem and a priority source, it is consistent with the collective watershed strategy.

EFFECTIVENESS MEASUREMENTS

During FY 2012, the City required the proper disposal of recycled waste at all special events and the implementation of storm water BMPs when appropriate. The City held 12 special events requiring conditions for storm water BMPs and recycling from the Public Works Department. The largest of these events was the annual U.S. Open Sandcastle Competition.

The U.S. Open Sandcastle Competition was held during the weekend of July 21st-24th and drew an estimated crowd of 300,000 visitors to the beach. In preparation for the U.S. Open Sandcastle event the City provided additional storm water BMP information to all street vendors before the event and then followed up with storm water inspections during the event to ensure the implementation of the BMPs. Most street venders were aware of the storm water requirements and were implementing proper storm water BMPs. Vendors not implementing proper BMPs were cited and provided further information to correct behavior.

The City also enhanced its recycling efforts at the Sand Castle Competition by sponsoring a local Baptist Church group who worked with the City to enhance its recycling program implementation during the event. The recycling efforts resulted in the collection of 2.13 tons of mixed recyclables, 950 pounds of cardboard, and 6.39 tons of trash.

TITLE: SMUGGLER'S GULCH SEDIMENT AND DEBRIS REMOVAL
ID #: TJ-012

ACTIVITY DESCRIPTION

The County performs routine flood control maintenance activities on improved and unimproved channels pursuant to its Regional General Permit (RGP) 53. This activity is traditionally performed every two to four years depending on annual rainfall. The extent of the project includes the channel from the Mexican border, north approximately 5,400 feet to the confluence of the Tijuana River. Historically as much as 80,000 cubic yards of sediment can be removed from the channel. Trash is separated on site and recycled accordingly.

The sediment removal project is necessary to return the drainage facility to historic conditions and to convey flow properly, which will eliminate the potential for sediment and debris to build up causing future flooding events.

ACTIVITY IMPLEMENTATION 2007-08

There were no sediment and debris removal during the FY2007-08.

ACTIVITY IMPLEMENTATION 2008-09

There were no sediment and debris removal during the FY2008-09.

ACTIVITY IMPLEMENTATION 2009-10

During FY09-10 County Parks removed 18,000 cubic yards of sediment, 40 cubic yards of trash, and 200 tires from Smuggler's Gulch. The dredging occurred from Monument Road south to the boundary of Federal property. All sediment was recycled as construction aggregate, while the trash and tires were disposed of as appropriate.

ACTIVITY IMPLEMENTATION 2010-11

During FY10-11County Parks removed 12,000 cubic yards of sediment, 40 cubic yards of trash, and 250 tires from Smuggler's Gulch. The dredging occurred from Monument Road south to the boundary of Federal property. All sediment was recycled as construction aggregate, while the trash and tires were disposed of as appropriate.

ACTIVITY IMPLEMENTATION 2011-12

During FY11-12 County Parks removed 7,000 cubic yards of sediment, 40 cubic yards of trash, and 220 tires from Smuggler's Gulch. The dredging occurred from Monument Road south to the boundary of Federal property. All sediment was recycled as construction aggregate, while the trash and tires were disposed of as appropriate.

TMDL APPLICABILITY

N/A.

TIME SCHEDULE FOR IMPLEMENTATION

Typically removal takes place every other year but is dependent on precipitation patterns, intensity of precipitation, and funding.

FY10-11: Removal occurred during the period of December 2010 and February 2011
FY11-12: Removal occurred from September 15, 2011 through March 15, 2012
FY12-13: Currently no funding is available beyond the current FY.

LEAD WATERSHED COPERMITTEE

- California State Parks

HIGH PRIORITY WATER QUALITY PROBLEM(S) ADDRESSED

- Bacteria & Pathogens
- Sediment

CONSISTENCY WITH THE COLLECTIVE WATERSHED STRATEGY

Sediment and trash have been identified as high priority water quality problems in the Tijuana River WMA. This activity results in a direct load reduction of these pollutants, and is therefore consistent with the collective watershed strategy.

EFFECTIVENESS MEASUREMENTS

This activity is considered a load reduction that can be measured. As reported above, 7,000 cubic yards of sediment, 40 cubic yards of trash, and 220 tires were removed from Smuggler's Gulch during FY 2011-12.

TITLE: TIJUANA RIVER WATERSHED BACTERIAL SOURCE IDENTIFICATION STUDY

ID #: TJ-013

ACTIVITY DESCRIPTION

The City of Imperial Beach initiated a Bacteria Source Identification study in November 2007 to identify and quantify sources of bacterial contamination in the U.S. portion of the Tijuana River Watershed. The project was put on hold between December 15, 2008 and February 1, 2010 due to budgetary constraints in the State of California. Funding for the project was reinstated and the study was completed in the summer of 2012. The goals of the study include the following:

1) Identify anthropogenic sources of bacteria;
2) Identify non-anthropogenic sources of bacteria;
3) Assess annual bacteria loads into the Tijuana River;
4) Identify point sources (PSs) and non-point sources (NPSs) of bacterial pollutants; and
5) Better understand mitigation strategies aimed at the reduction of bacteria loads and impacts on receiving waters.

The project uses standard culturing of fecal indicator bacteria and molecular tests (including the presence of Bacteroides as an indicator of recent human fecal pollution) to assess the presence of fecal indicator bacteria within the watershed during both dry weather and wet weather to identify point source and nonpoint sources of elevated bacteria concentrations, which may lead to beach postings at adjacent recreational beaches. Specific assessments focus on areas such as residential, commercial, agricultural and ranches, and groundwater transport as well as sewage flows from Mexico.

TMDL APPLICABILITY

While it may be supportive of TMDL goals, this activity is not specifically part of a TMDL compliance program. The Tijuana River and Estuary is listed for bacteria and may eventually have a TMDL.

TIME SCHEDULE FOR IMPLEMENTATION

Work on the project completed this reporting period and the final report was submitted to the State Water Board in September 2012. The Executive Summary is included as an attachment to this report (Appendix 1).

HIGH PRIORITY WATER QUALITY PROBLEM(S) ADDRESSED

- Bacteria/Pathogens

CONSISTENCY WITH THE COLLECTIVE WATERSHED STRATEGY

Bacteria are identified as a priority water quality problem in the Tijuana River Watershed. Trash, parks, and pet waste are potential sources of bacteria. Since this activity addresses a priority water quality problem and a priority source, it is consistent with the collective watershed strategy.

EFFECTIVENESS MEASUREMENTS

The effectiveness of this project meets the requirements of Outcome Level 1 compliance with activity based permit requirements. Information gained from this study will help in developing other programs or specific BMPs that will further address changes in knowledge and behavior, load reductions, and improvements to water quality.

Appendix 1

Tijuana River Bacterial Source Identification Study

Executive Summary

This page intentionally left blank.

EXECUTIVE SUMMARY

In April 2008, the City of Imperial Beach (City) was awarded a Clean Beach Initiative (CBI) grant by the State Water Resources Control Board (SWRCB) (Grant Program Agreement No. 07-584-550-0) to assess the potential sources of indicator bacteria on the United States (U.S.) side of the Tijuana River Watershed that may be impacting the Tijuana River Estuary and adjacent beaches. The resultant project was named the *Tijuana River Bacterial Source Identification Study*. The contract timeline for the work identified for the study was as follows:

- The SWRCB Contract for the City of Imperial Beach was awarded in February 28, 2008.
- The Contract was closed by the SWRCB due to the State-wide funding crisis on December 17, 2008.
- The Project was reopened on May 6, 2010.
- The Project end date is October 1, 2012.

Study Objectives

The overall goal of the study was to identify sources of indicator bacteria in the Tijuana River Watershed within the U.S. side of the U.S./Mexico border that have the potential to impact the Tijuana River Estuary and adjacent beaches. Within this larger framework, the study had several specific objectives:

1. Identify anthropogenic sources of bacteria,
2. Identify non-anthropogenic sources of bacteria,
3. Assess annual bacteria loads into the Tijuana River,
4. Identify point and non-point sources (NPSs) of bacterial pollutants, and
5. Develop best management practices (BMPs) to reduce bacterial loads originating in from the U.S. side of the border.

To address these objectives, the project had several elements:

- Sanitary and Dry Weather Surveys,
- Wet Weather Assessments,
- A Series of Special Studies, and
- BMP Concept Designs and Prioritization.

Each of these elements is discussed below.

Sanitary and Dry Weather Surveys

The primary objectives of the sanitary surveys were to identify anthropogenic and non-anthropogenic sources of indicator bacteria that could impact receiving waters in the estuary. Three two-week sanitary surveys were conducted over the course of the study, targeting approximately 100 sampling locations per survey, covering the entire urbanized area on the western portion of the U.S. side of the Tijuana River Watershed. Follow-up dry weather surveys were conducted if high bacterial concentrations were found, if the sample tested positive for human-specific Bacteroides (a genetic marker that is specific to human fecal contamination), or if visual observations suggested follow up was necessary.

- The results of the first two sanitary surveys identified several sites where indicator bacterial concentrations were high or tested positive for human-specific Bacteroides. In all cases, follow up dry weather surveys indicated that water at the site was either ponded, had very low trickle flows, and/or the flow could not be traced upstream to any source.
- These results of these extensive surveys suggest that with few exceptions, elevated levels of indicator bacteria or the potential presence of human fecal contamination at numerous sites assessed in the watershed were ephemeral and did not represent a consistent source of bacteria to the estuary.
- Sanitary Survey 3 was a dry weather survey that focused primarily on sites within the estuary itself. Thorough visual observations on all sides of the watershed adjacent to the estuary revealed that with one exception there was no apparent hydrologic connection between surface waters in the watershed and those in the estuary. That is, during dry weather, the vast majority of the flows in the sub-drainages on the U.S. side of the border never reach the estuary.

Further assessments conducted in January, 2012 confirmed that the substantial majority of dry weather from the U.S. side of the border never reaches the estuary because the majority of the sub-drainages discharge to a soft-bottom creek or other semi-natural feature (e.g., ponds) where dry weather flows infiltrate rapidly. The one area of direct, but very small flow to the estuary was the outfalls of the E and F Lines in Imperial Beach that discharge directly to the estuary. Dry weather flows from these outfalls were very low. Thus, one of the major findings of this study was that potential impacts to the estuary from dry weather flows are limited to these small sub-drainages and episodic and infrequent rogue flows from the Mexico side of the border when the diversion structures are bypassed.

E-line storm drain outfalls showing minimal dry weather flow directly to the Tijuana River Estuary. The majority of dry weather flow from other sub-drainages on the U.S. side of the border never

Wet Weather Assessments

The objective of the wet weather monitoring was determine the concentrations and loads of indicator bacteria and other constituents that impact the estuary from the mainstem of the Tijuana River (Dairy Mart Bridge and Hollister Bridge), Smuggler's Gulch (a tributary to the mainstem originating in Mexico), and Veterans Park (a tributary to the estuary originating in the City of Imperial Beach).

- The results of the wet weather assessments were similar among the three storms monitored. Indicator bacteria concentrations were in the 1,000,000 to 10,000,000 MPN/100 mL range over the course of the storm from all three sites originating from Mexico. However, indicator bacteria concentrations from the Veterans Park site (which

originates in the City of Imperial Beach) were one to two orders of magnitude lower than those from sites originating from Mexico.

- When these concentrations were combined with flow data collected during the storm events, it was determined that approximately 90% of the annual bacterial load that enters the Tijuana River Estuary (and has the potential to impact area beaches) originates from the Tijuana River mainstem.
- Smuggler's Gulch, which also originates in Mexico, accounts for approximately 11 and 8% of the enterococci and fecal coliform loads, respectively.
- The contribution from the entire U.S. urbanized portion of the watershed that flows directly to the estuary accounts for less than 1 % of the enterococci and fecal coliform loads entering the estuary.
- In addition, nearly all of the samples originating from Mexico were positive for the human-specific Bacteroides marker (indicating human fecal matter), while none of those from the U.S. drainage were positive for the marker.

Annual Loads of Fecal Coliforms (A) and Enterococci (B) showing that approximately 90% of the bacterial load that enters the Tijuana River Estuary originates from the Tijuana River mainstem (blue), approximately 10% originates from Smuggler's Gulch in Mexico (red), and less than 1% originates from the entire urbanized portion on the U.S. side of the border (green).

Seacoast Drive Special Study

During the first sanitary survey conducted in July, 2010, human-specific Bacteroides (indicator of the presence of human fecal contamination) and elevated bacterial levels were found in the northern arm of the Tijuana River Estuary adjacent to Seacoast Drive in Imperial Beach. As a result, the Seacoast Drive Special Study was initiated to identify the source or sources of bacteria and the potential for human sewage in this portion of the estuary. Prior to the initiation of the study, leaking sewer infrastructure had been identified by the City as a potential problem along Seacoast Drive in a length of sewer pipe approximately ½ mile long that ended in a pump station on the northern end of Seacoast Drive. As a result, the City took proactive steps and re-sealed the

pump station to eliminate any potential leakage from the sewage infrastructure to the adjacent estuary.

The goal of the Seacoast Drive Special Study was to assess the effectiveness of sewage infrastructure repairs and to determine if there was evidence of human sewage impacting the estuary after the repairs had been made. In February, 2011 rhodamine dye was placed in the sewer pipe on the southern end of Seacoast Drive where it flowed north to the newly sealed pump station. Samples were collected from several sites in the northern arms of the estuary (adjacent to Seacoast Drive) and from the pump station. All samples were analyzed for indicator bacteria and human-specific Bacteroides on the day the dye was injected and for two subsequent days. In addition, filter packs containing absorbent media were anchored in the estuary for the same three day period, then analyzed for the presence of the rhodamine dye.

- The results of the study suggest that sealing the pump station had prevented any potential leakage of sewer water from the Seacoast Drive sewer line and pump station that may have been entering the estuary.
- Over the course of the three day sampling event, none of the more than 60 samples collected were positive for the human-specific Bacteroides marker.
- In addition, none of the absorbent media filter bags anchored in the estuary had even trace amounts of the rhodamine dye.

The results suggest that sealing the sewage infrastructure along Seacoast Drive was effective in preventing sewage from entering the Tijuana River Estuary. These results were confirmed in subsequent monitoring conducted in the estuary in the summer of 2011 as part of a dry weather survey. During this follow-up investigation, all samples collected from the estuary (including several sites in the estuary's northern arm adjacent to Seacoast Drive) were negative for the human-specific Bacteroides marker.

Seacoast Drive Special Study showing insertion of rhodamine dye and collection of dye and bacterial samples in the Tijuana River Estuary adjacent to Seacoast Drive. Evidence of bacteria from human origin was not observed in the estuary after the Seacoast Drive pump station was sealed by the City of Imperial Beach.

Groundwater Special Study

This project element was designed and implemented in order to assess the presence of indicator bacteria as well as human-specific Bacteroides and enterovirus (a marker of potential human pathogens) in groundwater within the western portion of the Tijuana River Watershed and to assess the extent to which groundwater may impact surface waters within the estuary. The objective was to determine if groundwater is a source of microbes to the estuary and to assess the spatial distribution of microbes in groundwater in the western portion of the watershed.

In order to address these objectives, five previously existing groundwater monitoring wells were sampled over a period of 16 months and analyzed for indicator bacteria, human-specific Bacteroides, enterovirus, and a suite of chemical constituents.

- In general, indicator bacteria concentrations were low in most groundwater samples and all samples were negative for the human-specific Bacteroides marker.
- There appeared to be a spatial gradient in bacterial and nutrient concentrations among the groundwater wells monitored, with relatively high concentrations in groundwater closest to the U.S. / Mexico Border and lower concentrations found in groundwater closest to the Tijuana River Estuary.
- The one exception to this pattern was that observed for enterovirus. Among the 35 samples collected over the course of the study, three were identified as positive for enterovirus, all of which were found at sites closest to the estuary (sites b-15 and b-6).

Mean total coliform concentrations in groundwater wells showing higher concentrations at sites closest to the U.S./Mexico Border (Sites b-10 and b-11) compared to sites closest to the Tijuana River Estuary (Sites b-15 and b-6).

The low concentrations of indicator bacteria and nutrients in groundwater closest to the estuary and the absence of human-specific Bacteroides throughout the study suggest that groundwater may not be a likely source of fecal contamination to the receiving waters of the estuary. However, positive results for the enterovirus assay at the two sites closest to the estuary indicate the potential for groundwater contamination and suggest that further investigations may be necessary to determine the potential impact to the estuary from groundwater sources.

Goat Canyon Dredged Sediment Special Study

Goat Canyon is located at the southern end of the Tijuana River National Estuarine Research Reserve in the western portion of the Tijuana River Watershed and spans the U.S. / Mexico Border. Ninety percent of the Canyon's sub-watershed lies in Mexico. In recent decades, human-induced disturbance originating primarily upstream in Mexico has resulted in increased sedimentation in Goat Canyon, which increases sediment loads to the Tijuana River Estuary. Sediment basins have been installed on the U.S. side of the border to trap Goat Canyon sediment before reaching the estuary. The goal of the Goat Canyon Dredged Sediment Special Study was to determine if dredged material removed from the basins is a reservoir for indicator bacteria and to assess the potential for the dredged material to impact surface waters if the sediment were used for beach replenishment purposes.

To address these goals, sediment samples were collected in November, 2010 from sediment that had been dredged from the Goat Canyon sediment basins and stockpiled adjacent to the site. The sediment was suspended in sterile solutions of water of varying salinities (fresh, brackish, and marine). Sub-samples were then drawn from each of the solutions over a period of five days and quantified for indicator bacteria.

- The results indicated that the relatively fine-grained, high nutrient sediment in the Goat Canyon sediment basins do serve as a reservoir for both fecal coliforms and enterococci.
- The inoculation test results suggest that the Goat Canyon dredged sediments can contribute elevated bacterial concentrations to the water columns in fresh, brackish and marine systems, and that the indicator bacteria can survive in these solutions for at least several days.

Results of Goat Canyon Sediment Study showing elevated enterococcus concentrations over time in salt water. The results suggest that bacteria (especially enterococci) in basin sediments may persist in seawater if sediments were used for beach replenishment.

The persistence of enterococci, compared to fecal coliforms, in each of the three water treatments is similar to results observed in other studies which have shown that enterococci tend to survive better in the environment than fecal coliforms. It also supports the findings of other studies that suggest that sediments play an important role in the survival of bacteria by providing a favorable, environment for microbes. When taking into account the complex environment of the Pacific Ocean, the results of this special study suggest that if Goat Canyon dredged material was used for beach replenishment, it could cause an initial increase in both enterococcus and fecal coliform concentrations in the receiving waters. However, that increase is most likely to be transitory in nature when sea temperatures, hydrologic flow patterns, and UV radiation are taken into account.

BMP Concept Designs and Prioritization

The purpose of this part of the study was to conduct a hydrologic and water quality analysis to assess and prioritize concept designs to reduce bacterial loads to the Tijuana River Estuary. The best BMPs proposed in the selected concept designs were based on low impact development (LID) features at selected sites with the Tijuana River Watershed. The study was performed to determine and document the water quality flows and volumes (storm water runoff) from the tributary area for each concept design site. The BMPs are proposed to provide water quality improvement of storm water runoff with some attenuation of peak flows, which in itself also provides water quality benefits (less downstream flow equates to less potential for downstream sediment transport). Locations for the BMPs were determined based on the findings of the wet and dry weather studies conducted as part of this project.

Based on the criteria listed above, six concept designs were produced as part of this study using established BMPs to reduce bacterial loading, such as bioretention basins at Imperial Beach Boulevard Parkway and Mar Vista Church, porous concrete on Thorn Street Cul de Sac and Donax Avenue, an eco bike lane and green street BMP on Imperial Beach Boulevard, and bioretention basins on East San Ysidro Boulevard. The tributary drainage areas for these BMPs ranged from 0.46 to 5.3 acres with estimated bacterial load reductions ranging from 62 to 100% removal. Estimated project capital costs to achieve these load reductions ranged from $50,250 to $1,110,750. Based on these costs and the estimated annual load removal, a priority ranking of the BMPs was conducted based on a cost / benefit analysis. Among the six projects for which concept designs were produced, the Donax Avenue project had the lowest cost per annual load removed and the Imperial Beach Boulevard Eco-Bike Lane had the highest cost per annual load removed. Watershed managers may use this cost / benefit analysis as one of many tools to facilitate decisions about future implementation of BMPs to reduce bacterial loading to the Tijuana River Estuary. Other factors should be taken into consideration, such as existing conditions, public perception, and multiple benefits provided by projects.

BMP Concept Designs were produced as part of the project to decrease bacterial loads to the Tijuana River Estuary.

Summary of Major Findings

There were numerous findings from this multi-year, multi-faceted study. The major conclusions drawn from the results of the monitoring and special studies are summarized below.

- The pollution sources and their impact on the Tijuana River Estuary vary dramatically by season. During dry weather, the estuary is relatively un-impacted from the watershed, and the estuary is a healthy, vibrant and vital ecosystem. During storm events, flows from Mexico transform the estuary into a severely impacted, polluted and hazardous waterbody with extremely elevated bacterial concentrations and elevated potential health risk to the environment and the public.
- Extensive dry weather and sanitary surveys revealed several locations in the watershed where indicator bacterial concentrations were high, or there was evidence of human fecal contamination, but the contamination was determined to be ephemeral and not related to a consistent source (such as leaking infrastructure).

- Dry weather surveys also revealed that there is very little hydrologic connection between watershed surface waters and the estuary (with the exception of some small drainages).
- Semi-natural BMPs such as soft-bottom sediments and ponds at the base of the major sub-drainages prevent the large majority of dry weather flows from entering the estuary.
- During wet weather, approximately 99% of the indicator bacterial loads entering the Tijuana River Estuary and Pacific Ocean originates from un-diverted flows from the Tijuana River mainstem and tributary channels from Mexico.
- Proactive steps to reline the sewage system along Seacoast Drive by the City of Imperial Beach appear to have eliminated a suspected source of human fecal contamination from entering the northern arm of the estuary.
- Groundwater associated with the mainstem of the Tijuana River at the U.S. Mexico Border may have elevated bacterial and nutrient levels compared to relatively clean sites closest to the estuary, suggesting the groundwater may not be a likely source of bacterial contamination to the estuary. However, the presence of enterovirus at sites closest to the estuary suggest that further studies may be needed to better understand surface groundwater interactions and the potential risk to estuary surface waters from groundwater resources.
- Sediments within the Goat Canyon Sediment Basins appear to act as a reservoir for indicator bacteria that has the potential to impact receiving waters for several days if the sediment were used for beach replenishment. Further studies are needed to clarify potential impacts indicated by this initial, small-scale study.
- Based on the findings of these studies, BMPs were designed and prioritized on their ability to reduce bacterial loads and will serve as a tool for managers to reduce potential impacts to the Tijuana River Estuary.

Recommendations

Based on the major findings of the study, the following recommendations may be considered:

- One of the major goals of this study was to identify sources of indicator bacteria on the U.S. side of the border and produce designs for BMPs that can reduce those loads. The designs for low impact development BMPs produced as part of this study are focused on providing the most efficient and cost-effective means of reducing bacterial loads in areas that flow directly to the Tijuana River Estuary. They should be considered for implementation based on the prioritization assessment provided in the report and additional priorities and constraints of the City of Imperial Beach.
- During the sanitary and dry weather surveys, positive results for human-specific Bacteroides suggested the presence of human fecal matter at some sites. Although specific sources were never identified, the cities of Imperial Beach and San Diego may wish to consider prioritizing and implementing sewer system upgrades to minimize the potential for sewage in the sanitary sewer from contaminating the storm drain system and potentially impacting the estuary.
- The Goat Canyon Special Study demonstrated that elevated bacterial levels exist in sediment dredged from the basins. Understanding the role of beneficial reuse of the dredged sediment is a critical component of effective management of the basins. Further

studies to understand the potential risk factors and fate and transport variables associated with the sediment under various management scenarios (e.g., beach replenishment) should be considered to enhance potential management options.

- This study was focused on understanding the sources of indicator bacteria in the Tijuana River Watershed and the potential impacts it may have on the estuary. However, further study is needed to understand how bacteria (and potential pathogens) associated with the river and the estuary may affect water quality at adjacent beaches. Studies designed to use rapid indicators of fecal contamination combined with an understanding of environmental variables that affect beach water quality (e.g., storm events or rogue flows from Mexico) could provide a more precise assessment of potential human health risks from the river and potentially reduce beach closures in the area.

The Special Study on Groundwater suggested that groundwater quality at sites close to the U.S. / Mexico Border may be impacted by indicator bacteria, but sites closer to the estuary appeared to have better water quality. These results conflicted with the enterovirus results, which showed the presence of enterovirus at sites closest to the estuary. To better understand the fate and transport of bacterial and viral pathogens in groundwater and the potential risk associated with groundwater / surface water interactions, groundwater modeling may be considered to enhance the small scale study conducted as part of this project.

TITLE: INVASIVE SPECIES REMOVAL PROJECT IN THE TIJUANA RIVER PARK

ID #: TJ-017

ACTIVITY DESCRIPTION

The SANDAG Transnet Environmental Mitigation Program (EMP) funded a grant to the Southwest Wetlands Interpretive Association (SWIA) to continue the Tijuana River Valley Invasive Plant Control Program (Phase IV) begun in 2002 in the extreme southwest part of San Diego County within a few miles from the mouth of the river. The program includes work in the County of San Diego's Tijuana River Valley Regional Park (TRVRP), California State Parks' Border Field State Park, and the U.S. Fish and Wildlife Services' Tijuana Estuary. Three invasive plant species are targeted within the Tijuana River Valley: giant reed (Arundo donax), castor bean (Ricinus communis) and salt cedar (Tamarix ramosissima). These species degrade the habitats they invade by displacing native vegetation, lowering insect food supply for birds, reducing groundwater, and increasing flood and fire hazards. The invasive removal program includes replanting with native species, a project that, coupled with natives returning naturally, will serve to filter pollutants and decrease sedimentation in the long term. The County cooperated with the SWIA in seeking grants, by writing letters of support and serving on a technical advisory group (TAG) for the program. In the implementation of the program, the County continues to serve on the TAG and provides SWIA with right-of-entry permits to County property. SWIA is committed to seeking grants for the on-going funding of this project and the County plans to continue its long-term cooperation with the association.

ACTIVITY IMPLEMENTATION FY2007-08

The following tasks were implemented as part of invasive plant removal program in the Tijuana River Valley Regional Park:

1) Treated arundo and castor bean on 100 acres;
2) Performed follow-up treatment of arundo and castor bean on old 511 acres;
3) Treat tamarisk on 61 acres around Dairy Mart ponds;
4) Maintained and planted native cuttings.
5) Attended TAG meeting and provided right of entry letters to SWIA.

ACTIVITY IMPLEMENTATION FY2008-09

The following tasks were implemented as part of invasive plant removal program in the Tijuana River Valley Regional Park:

1) 07/20/08 TAG Meeting.
2) Development and adoption of a "Declaration of Intent".

ACTIVITY IMPLEMENTATION FY2009-10

During FY09-10 the following tasks were implemented as part of invasive plant removal program in the Tijuana River Valley Regional Park:

1) Treated giant reed, castor bean and tamarisk within 86 acres in the Dairy Mart Ponds area;
2) Restored 1.5 acres in the Hollister Bridge area;

3) County representatives attended the annual TAG meeting; and
4) County provided right of entry letters to SWIA.

ACTIVITY IMPLEMENTATION FY2010-11

During FY10-11 the following tasks were implemented as part of invasive plant removal program in the TRVRP:

1) County representatives attended the annual TAG meeting (09/15/10);
2) SWIA treated giant reed, castor bean and tamarisk within 40 acres in the Hollister Bridge area
3) SWIA was able to cover a larger area than had been expected (27 acres); and
4) County provided right of entry letters to SWIA.

In addition County Parks Staff in response to a citizen's complaint removed approximately six dumpsters (40 yard roll-off) of Arundo Donax along the western edge of International Road.

ACTIVITY IMPLEMENTATION FY2011-12

During FY11-12 the following tasks were implemented as part of invasive plant removal program in the TRVRP:

1) County representatives attended the annual TAG meeting (09/15/11);
2) County provided funding totaling $5000.00 to remove invasive species in the river valley
3) County staff removed 55 tons of Arundo and some castor bean from approximately 5 acres along the International Road east of the Am Sod Farm.

TMDL APPLICABILITY

None

TIME SCHEDULE FOR IMPLEMENTATION

FY10-11: Funding from the US Fish and Wildlife Service's Coastal Programs was acquired by SWIA to fund invasive plant treatments. These funds are expected to be used in the TRVRP near Hollister Bridge. The following tasks are planned to be implemented:

1) Treat giant reed, castor bean and tamarisk within 27 acres in the Hollister Bridge area;
2) County representatives attended the annual TAG meeting; and
3) County provided right of entry letters to SWIA.

FY11-12: SWIA did not receive any grants for FY11-12. County staff funded project.
FY12-13: Future implementation of this activity is dependent on funding.

LEAD WATERSHED COPERMITTEE

- County of San Diego

OTHER PARTICIPATING ENTITIES

- Southwest Wetlands Interpretive Association,
- U.S. Fish & Wildlife Service,
- California State Parks

HIGH PRIORITY WATER QUALITY PROBLEM(S) ADDRESSED

- Bacteria/Pathogens
- Pesticides
- Sediment

CONSISTENCY WITH THE COLLECTIVE WATERSHED STRATEGY

Sediment, pesticides, and bacteria are high priority water quality problems in the Tijuana River WMA. Therefore, this activity is consistent with the collective watershed strategy.

EFFECTIVENESS MEASUREMENTS

Activity effectiveness will be measured by ensuring completion of all project elements (Level 1). Each invasive plant area will be monitored to determine which control methods would be most effective in the TJRV. Although no water quality monitoring is proposed for this project, water quality improvements may be able to be assessed qualitatively based on results from similar projects.

This page intentionally left blank.

TITLE: TIJUANA WATERSHED BROCHURE
ID #: TJ-023

ACTIVITY DESCRIPTION

The City of San Diego (City) and Think Blue will implement a new brochure program for the six (6) watershed management areas (WMAs) assigned to the City. These brochures will be used to inform San Diego residents on the benefits of taking steps to reclaim an environmentally and economically healthy watershed. The education pieces will help address high priority water quality problems in each WMA. It will also be used to make citizens aware of specific pollutants and ways individual action can be used to protect each water source as a way to promote a watershed stewardship (all individual actions within each watershed adds up in a cumulative way to influence the health of the water resource).

The main goals of the brochures are to capture the audience's attention, enhance the public's understanding of basic watershed principals, address the high priority water quality problems in each WMA, educate best management practices (BMPs) for future use, and encourage citizens to take positive steps in preventing pollution from entering the storm drain system.

The following WMAs will have a watershed specific brochure created:

1) Tijuana River
2) San Diego River
3) San Diego Bay
4) Mission Bay
5) San Dieguito River
6) Los Peñasquitos

TMDL APPLICABILITY

Brochures will target pollutants associated with TMDLs as applicable.

TIME SCHEDULE FOR IMPLEMENTATION

Project planning began in FY 2009 and continued through FY 2012. Implementation and distribution occurred in FY 2012 and will continue through FY 2015. Assessment is proposed in FY 2015.

LEAD WATERSHED COPERMITTEE

- City of San Diego

OTHER PARTICIPATING COPERMITTEES

- Not Applicable

OTHER PARTICIPATING ENTITIES

- None

HIGH PRIORITY WATER QUALITY PROBLEM(S) ADDRESSED

- Bacteria/Pathogens
- Conditions
- Dissolved Minerals
- Metals
- Nutrients
- Oil & Grease
- Organics
- Pesticides
- Sediment
- Trash

CONSISTENCY WITH THE COLLECTIVE WATERSHED STRATEGY

This activity will address the high priority water quality problems identified in both the City's Strategic Plan for Watershed Activity Implementation and the Collective Watershed Strategy for each of the Watershed Management Areas.

EFFECTIVENESS MEASUREMENTS

Management Questions

1) Can we create watershed brochures that increase the public's understanding of basic watershed principals and storm water best management practices (BMPs) and create awareness of the high priority water quality problems in each WMA?
2) Can we create watershed brochures that encourage citizens to take positive steps in preventing pollution from entering the storm drain system?

Targeted Measurable Outcome(s)

1) Increased knowledge of basic watershed principles and storm water BMPs after reading the watershed brochure.
2) Increased awareness of the high priority water quality problems in each WMA after reading the watershed brochure.
3) Increased intent to act to prevent storm water pollution after reading the watershed brochure.

Assessment Method(s)

Assessment is still being developed for this activity. Potential assessment methods could include a focused evaluation with two target audiences in combination with various event booths (or workshops). Event attendees would be randomly selected to either receive or not receive the brochure, then asked to complete a response card. At a later point, those who provided contact information will be contacted and asked a series of follow-up questions about awareness, knowledge, and behavior to determine if the brochure had an impact.

Data Recorded

N/A

Expected Benefits

The goal of this assessment is to determine the effectiveness of the watershed brochure in increasing knowledge and awareness in each watershed to create positive behavioral changes that will reduce bacteria and gross pollutants. This activity will address the high priority water quality problems identified for each of the Watershed Management Areas.

Analysis Results

An effectiveness assessment of this activity is not possible at this time because the watershed brochures have not been distributed to enough residents within the Watershed Management Area. Data will be collected throughout FY 2012 - FY 2015.

This page intentionally left blank.

TITLE: SMUGGLER'S GULCH, PILOT CHANNEL & NORTHERN CHANNEL SEDIMENT AND DEBRIS REMOVAL

ID #: TJ-025

ACTIVITY DESCRIPTION

On September 23, 2009, the City of San Diego Council declared a State of Emergency in the Tijuana River Valley due to the potential for severe flooding pursuant to Resolution Number R-30526. Re-establishment of the channel profiles to reduce the risk of flooding in these flood control facilities was deemed necessary because of the additional sediment deposition from the Tactical Infrastructure Border project, and because of the flood which occurred in late November 2008. In FY 2011, the City excavated and removed sediment and trash, including tires, within two flood control facilities known as Smuggler's Gulch and the Tijuana River Pilot Channel pursuant to Emergency Coastal Development Permit No. 784887, County of San Diego's Regional General Permit 53, US Army Corp of Engineers Permit SPL 2009-00719-TCD, and Regional Water Quality Control Board 401 Water Quality Certification 09C-077.

This sediment removal project is required to 1) to return the drainage facility to a condition where adjacent property is not threatened by flooding, 2) storm water flows convey properly to the main channel, and 3) channel profiles and conditions are restored to reduce the potential for sediment and debris to accumulate and thereby increase the potential of flooding.

In FY11, the City excavated and removed 13,000 cubic yards from these flood control facilities. Due to the potential for litigation and legal challenges to applicability and validity of grounds under which the permits listed above, and the CEQA Mitigated Negative Declaration under which the work was to be performed, no excavation was performed in FY 12.

TMDL APPLICABILITY

- Not applicable

TIME SCHEDULE FOR IMPLEMENTATION

It is anticipated that this work will resume in FY 14 under the City's Master Storm Water Maintenance program currently under review.

LEAD WATERSHED COPERMITTEE

- City of San Diego

OTHER PARTICIPATING COPERMITTEES

TITLE: WILDCOAST SPRING CLEAN-UP EVENT - JUNE 2012
ID #: TJ-026

ACTIVITY DESCRIPTION

The County of San Diego's Department of Public Works Recycling Section and Watershed Protection Program sponsored two clean-up events coordinated by WILDCOAST in the Tijuana River Valley. The events were held in conjunction with the County of San Diego Parks and Recreation Department Trails Day Activities and included picking up trash and debris along the Effie May Trail. Trash and debris were weighed to determine total amounts removed. Trash removal services were donated by Allied Waste Services.

FY 10-11 ACTIVITY DESCRIPTION

The Recycling Section also hired work crews to remove tires from the Tijuana River Valley on June 24 and 28.

FY 11-12 ACTIVITY DESCRIPTION

WiLDCOAST and I Love a Clean San Diego (ILACSD) partnered to conduct two cleanups in June 2012 in the Tijuana River Valley (TRV) for the County of San Diego Department of Public Works Recycling Section. The cleanups mobilized 205 volunteers to remove 27,740 pounds of trash and 139 waste tires from the Tijuana River Valley. Cleanups were conducted in accordance with the most recent trash data from the TRV, specifically URS's Trash and Sediment Characterization Study (URS 2010). FY11-12 activities included Community Outreach and an Educational Component in addition to the Clean-ups.

FY 10-11 ACTIVITY IMPLEMENTATION

The events occurred on May 14, 2011 at Dairy Mart Road and June 4, 2011at Effie May Trail. Thirty-five people attended the May event and collected 1.59 tons of trash and removed 38 tires from the river valley. The June event included 103 people and collected 1.14 tons of Trash and removed 63 Tires (See Table 1 below).

In addition, the County's Recycling section identified areas with large amounts of tires and hired work crews to manually carry the tires out of the main channel at Dairy Mart Road and the sediment basin at Goat Canyon. Two work days were completed in June 2011 resulting in the removal of 912 tires.

FY 11-12 ACTIVITY IMPLEMENTATION

The events occurred on June 2, 2012 along the Cathedral Trail and June 23, 2011at east side of Dairy Mart Road. Trail. Forty-five people attended the June 2 event and collected 6,000lbs of trash and removed 2 tires from the river valley. The Tijuana River Valley Equestrian Association provided an addition clean-up on June 9, 2012 which collected 17,740lbs and 7 additional tires. The June 23, 2012 event included 160 people and collected 6,000lbs of Trash and removed 130 Tires (See Table 1 below).

Table 1: Trash and Tire Clean-up Data

Date	Number of People	Pounds of Trash*	Number of Tires
June 2, and 9, 2012 at Cathedral Trail	45	23,740	9
June 23, 2012 East Side of Dairy Mart Road	160	6,000	130

*Does not include weight of tires.

Both events included an outreach component and Education and safety discussions.

Cleanup Volunteer Outreach

Outreach was promoted through the use of social media including Facebook and Twitter. Several of the volunteer groups including WildCoast, I Love a Clean San Diego, Tijuana River Valley Equestrian Association, Ocean Minded and SDGE also provided link via their websites. Additionally email was used to periodically recruit volunteers prior to the scheduled events. The County of San Diego also promoted the events on their Facebook page. WildCoast also developed and distributed an event poster for the cleanup events. These posters included logos of the participating sponsors and volunteers.

Safety and Educational Component

All cleanup events included safety and educational discussions. Volunteers were strongly encouraged to wear appropriate clothing such as long pants, closed-toe shoes and to use sunscreen during the cleanups. Talking points included the importance of using caution when picking up trash; staying in pairs or groups, not over exerting oneself and making sure that heavy duty equipment were handled by adults only and with extreme caution. WiLDCOAST and I Love a Clean San Diego provided volunteers with cleanup supplies such as shovels, gloves, wheelbarrows, trash buckets and provided water, snacks and shade areas.

The educational component included an overview of the Tijuana River Watershed and the need to protect and restore it. Recruitment presentations were made at the Job Corps and the Chula Vista Learning Center. These presentations included a ten-minute WiLDCOAST documentary that stresses the importance of community involvement in the cleanup and restoration efforts in the Tijuana River. Additionally a PowerPoint presentation was provided that highlighted the geographical context of the watershed, sources of pollution, and the bi-national nature of the watershed (U.S. and Mexico).

TMDL APPLICABILITY

N/A

TIME SCHEDULE FOR IMPLEMENTATION

FY10-11: Two Clean-ups were planned and completed.
FY11-12: Funding was approved for two events.
FY12-13: Future events are dependent on funding.

TITLE: TIJUANA RIVER ACTION MONTH
ID #: TJ-027

ACTIVITY DESCRIPTION

The Tijuana River Copermittees including the Cities of San Diego and Imperial Beach and the County of San Diego collaborated on a series of clean-up and education events in the Tijuana River Valley during the months of September and October. The September 25th clean-up will be included as one of many events included as part of the International Coastal Clean-up Event hosted by I love a Clean San Diego. The October events are being coordinated by WiLDCOAST and will consist of four clean-ups at different locations within the river valley and one clean-up in an adjacent canyon in Mexico that drains to the Valley. Each cleanup will be co-hosted by a different organization along with WiLDCOAST. Trash and debris will be weighed to determine total amounts removed. Trash removal services will be donated by Allied Waste Services and Tire Removal Activities will be funded by the County and City of San Diego through grants awarded through CalRecycle. In addition, the County's Recycling section identified existing tire piles in the area from previous cleanups and arranged for removal.

FY 2009-10 ACTIVITY IMPLEMENTATION

The County's Recycling Section applied for the CalRecycle grant funding for this project in December, 2009. CalRecycle informed the County that grant would be funded in April. On June 11, 2010 County staff from the Recycling section and Watershed program met with WildCoast staff to discuss the project. The grant was funded for the full amount of $35,868 in June, 2010 with the grant term beginning July 1, 2010. All grant activities must be completed by June 30, 2011.

FY 2010-11 ACTIVITY IMPLEMENTATION

In August, 2010 the Recycling section finalized the agreement with WildCoast for four cleanups in the Tijuana River Valley. The Recycling section also issued a Request for Quotation for a state certified waste tire hauler to transport the tires collected at the cleanups to a state certified tire recycling facility. The low cost bidder was awarded the contract on September 1, 2010. The Watershed Protection Program supplemented the grant funding and contributed $2,500 toward the clean-up events. Several clean-up events were planned and implemented during the FY10-11.

FY 2011-12 ACTIVITY IMPLEMENTATION

The Copermittees collaborated on the planning and implementation of the 2nd annual Tijuana River Action Month, which took place between September 11th and October 16th during this past reporting period. This year, local NGOs took the primary lead on multiple cleanups and restoration activities that occurred on both sides of the border. Copermittees did not provide any direct financial support for cleanup activities this reporting period but provided significant in kind support.

County of San Diego:

County of San Diego Recycling Section coordinated with WildCoast and sought funding for the FY12-13 River Month Activity. Provided public presentation at a community workshop on water quality. Participated in clean-ups.

City of Imperial Beach:
Provide a public presentation at a community workshop on Water Quality. Provided a Mayor's Proclamation memorializing the event(s). Participated in several clean-ups.

City of San Diego:
The City of San Diego and Think Blue hosted a booth at the Fiesta del Rio event. Participated in clean-ups

TMDL APPLICABILITY

This activity is not specifically implemented in compliance with a TMDL.

TIME SCHEDULE FOR IMPLEMENTATION

FY09-10: Grant application and Planning
FY10-11: Implementation of Clean-ups and other events.
FY11-12: Site Sponsor, No implementation, and Planning for future events.
FY12-13: Planning and Implementation of Clean-ups

TITLE: FIESTA DEL RIO EVENT
ID #: TJ-029

ACTIVITY DESCRIPTION

In FY 2009, the City of San Diego (City) and *Think Blue* became a sponsor of the annual Fiesta Del Rio event in the Tijuana River Watershed Management Area (WMA). The Fiesta del Río event is designed to raise awareness about the environment of the San Diego/Northern Baja region surrounding the Tijuana River Estuary, and steps the public (especially families with children) can take to help protect this fragile ecosystem and the surrounding area.

The Think Blue sponsorship included staffing a booth to provide the opportunity to educate the public about preserving the local environment, promote stewardship the Tijuana River Estuary, and encourage proactive steps in preventing pollution from entering the storm drain system. Think Blue staff offered free BMP related giveaway items to the public in exchange for their participation in a survey designed to assess their knowledge and attitudes towards storm water pollution and steps they would be willing to take to help reduce pollution of local waterways in the future.

TMDL APPLICABILITY

Event attendance will target pollutants associated with TMDLs as applicable.

TIME SCHEDULE FOR IMPLEMENTATION

Planning was completed in FY 2009. Implementation was conducted in FY 2012 and assessment is anticipated to be completed in FY 2013.

LEAD WATERSHED COPERMITTEE

- City of San Diego

OTHER PARTICIPATING COPERMITTEES

- Not Applicable

OTHER PARTICIPATING ENTITIES

- None

HIGH PRIORITY WATER QUALITY PROBLEM(S) ADDRESSED

- Bacteria/Pathogens
- Metals
- Oil & Grease
- Pesticides
- Trash

CONSISTENCY WITH THE COLLECTIVE WATERSHED STRATEGY

This activity will address the high priority water quality problems identified in both the City's *Strategic Plan for Watershed Activity Implementation* and the Collective Watershed Strategy for the Tijuana River Watershed Management Area.

EFFECTIVENESS MEASUREMENTS

Management Questions

1) What change in awareness /attitude regarding bacteria was achieved after implementation?
    a. How efficient is this education activity based on total cost versus number of people (targeted audience) reached?

Targeted Measurable Outcome(s)

1) Reach pre-set percentage of residents within target watershed
    a. Increased level of knowledge/attitude based on post-activity surveys

Assessment Method(s)

1) Survey (e.g., administer survey to assess knowledge, attitude and willingness to prevent pollution of participants)
    a. Quantification (e.g., number of residents/ visitors reached and number of materials distributed)

Data Recorded

- Estimated total visitors exposed to the Think Blue Booth at the Fiesta del Rio in FY 2012 (Outcome Level 1): 5,000
- Number of Surveys administered in FY 2011 (Outcome Level 1): 84
- Percentage of individuals surveyed that knew storm water is not treated (Outcome Level 2): 48%
- Percentage of individuals surveyed who feel that litter contributes to pollution at least a moderate amount (Outcome Level 2): 94%
- Percentage of individuals surveyed who reported that they feel a very strong or strong obligation to not litter (Outcome Level 2): 96%
- Percentage of individuals surveyed who reported that they pick up litter they see in their community and throw it away at least sometimes (Outcome Level 3): 91%

Expected Benefits

The goal of this activity is increasing knowledge and awareness in the residents and visitors in the Tijuana River Watershed in order create positive behavioral change that will reduce the presence of bacteria and gross pollutants in nearby waterbodies. Effectiveness Assessment will be ongoing as Think Blue gathers more data from the event.

Analysis Results

Effectiveness assessment results of this activity will be in FY 13 in order to have a statistically significant sample size and provide an opportunity to note any behavioral changes over a longer period of time.

Conclusions

Based on attendance size and demographics of the Fiesta Del Rio, the City plans to continue to sponsor and staff the Fiesta Del Rio. This activity will be used as a watershed education activity as required by the Municipal Permit for education activities.

TITLE: BEYER BOULEVARD TRASH SEGREGATION BEST MANAGEMENT PRACTICE

ID #: TJ-030

ACTIVITY DESCRIPTION

Stormwater Drain Insert Pilot Study involves the installation of two curb inlet inserts in the Tijuana River Watershed Management Area (WMA) to prevent trash and debris from entering the MS4. The inserts were installed directly in the existing curb inlets along Beyer Blvd. The Beyer Blvd site includes the installation of 2 storm drain curb inlet inserts as retrofits within the existing storm drain system. The curb inlet inserts will be used to reduce the amount of trash, leaves, sediment, and oils and grease that make its way into the storm drain system.

This project was originally identified as "Trash Segregation Device Installation" in the 2008 Tijuana River WURMP. In June 2008, the site along Beyer Blvd was selected and the conceptual design was released for this project.

TMDL APPLICABILITY

Indicator Bacteria - Beaches and Creeks SD Region

TIME SCHEDULE FOR IMPLEMENTATION

This project is part of a Storm Drain Inlet Inserts Pilot Project that initiated planning in FY2008. The City of San Diego issued a Request for Proposals (RFP) from interested vendors and advertised the project as a pilot at no cost to the City. Interested vendors submitted their proposals in July 2010 and the City conducted a selection process to evaluate the submitted proposal. Based on the selection panel recommendation, vendor product(s) that met the performance standards and requirements of the RFP have been awarded. The catch basin inlets have been retrofitted with the selected drainage inserts during the month of March in 2011 and the first phase of monitoring started during the month of September in 2011.

LEAD WATERSHED COPERMITTEE

- City of San Diego

OTHER PARTICIPATING COPERMITTEES

- Not Applicable

OTHER PARTICIPATING ENTITIES

- None

HIGH PRIORITY WATER QUALITY PROBLEM(S) ADDRESSED

- Bacteria/Pathogens
- Oil & Grease
- Sediment
- Trash

CONSISTENCY WITH THE COLLECTIVE WATERSHED STRATEGY

Both the City's *Strategic Plan for Watershed Activity Implementation* and the Collective Watershed Strategy for the Tijuana River WMA identify trash and bacteria as a high priority water quality problem throughout the watershed, and recommend implementing load

reduction/source abatement activities to address it. Implementation of this activity will address bacteria via the facilitation of trash and debris removal.

EFFECTIVENESS MEASUREMENTS

Management Questions

1) What is the load reduction efficiency of the catch basin inserts?
2) How effective are these catch basin inserts at reducing priority pollutant loads?

Targeted Measurable Outcome(s)

1) Reduction in priority pollutant loads

Assessment Method(s)

1) Inspections (e.g., ensure the catch basin inserts are working as designed)
2) Quantification (e.g., use drainage area and rainfall information to calculate estimated load reduction)
3) Monitoring (e.g., collect special study information to collect concentrations and flows to estimate load reduction)
4) Tabulation (e.g., amount of money spent on implementation and maintenance)
5) Reporting (e.g., estimates of load reduction from 3rd party data)

Data Recorded

- How much money spent on inspections and maintenance: NA
- Trash Capacity: 100 lbs
- Flooding Issues: No
- Functionality during storm event: Significant Flow Bypass, Resuspension of material from filter into basin.
- % Trash Bypass: Unknown

Expected Benefits

Drain inserts are moderately effective at reducing discharge of trash to receiving waters when loadings are compatible with the maintenance frequency. Excessive flow bypasses is the main cause of reduced performance.

Analysis Results

Results showed that these BMP's lack the capacity needed to quantify the level of maintenance desired by city O&M. Due to large drainage areas, typical of street drainage, the pilot showed maintenance required in excess of 4 times per year.

Conclusions

Effectiveness and efficiency, determined by comparing future load reductions to the cost of installation, maintenance and monitoring efforts are deemed insufficient to meet city goals.

Recommendations

Research BMP's with greater trash retention capacity to ensure less maintenance intervals.

TITLE: RESIDENTIAL RAIN BARREL SUBSIDIES & DISTRIBUTIONS
ID #: TJ-032

ACTIVITY DESCRIPTION

The County of San Diego will implement a rain barrel subsidy and distribution program targeting residents throughout the County. Rain barrel use will be encouraged through a subsidy eligible to residents of unincorporated areas, but residents of incorporated cities will also be able to purchase rain barrels at an affordable price. In addition to distribution of rain barrels, the program will promote outdoor water conservation and runoff reduction through public outreach before and during rain barrel distribution events.

Use of rain barrels can provide many benefits including reduced reliance on potable water through the storage and use of rain water for irrigation. For example, one inch of rain falling on a 1,000 square foot roof can harvest 600 gallons of rainwater. Retention and use of rain water onsite reduces the overall loading of pollutants leaving properties and entering the stormwater system. By implementing a rain barrel system, residents can:

- Reduce water pollution as a result of rainwater runoff, which carries pesticides, fertilizers, sediment, oil, and trash into local rivers and lakes.
- Reduce soil erosion and improve the ability of water to infiltrate the soil at a reduced intensity.
- Reduce dependency on imported water supplies and realize cost savings as a result of reduced water use.
- Help save energy by reducing demand on our drinking water supply.

In addition to the provision of rain barrels, County staff or contractors will be present at distribution events to provide educational materials and responses to any questions raised by participants. Residents from multiple watersheds are expected to participate in this activity and will be asked to sign a maintenance agreement as a condition of receiving a rain barrel at the subsidized rate.

Follow up surveys will be conducted with participating residents to ensure that rain barrels have been installed and to encourage proper maintenance.

ACTIVITY IMPLEMENTATION FY09-10

Activity during FY09-10 included conducting research to identify desired rain barrel features, including: size, ease of installation, cost, and features to discourage mosquito breeding. The County solicited bids through a formal procurement process in order to obtain the best quotes for provision of rain barrels and for one-year of customer service assistance following distribution. A vendor was selected, a contract awarded, and planning was initiated for two distribution events to be held during FY 10-11. In addition, the County used an existing website to provide more information to the public (www.rethinkwateruse.org).

ACTIVITY IMPLEMENTATION FY10-11

The Rancho San Diego Sales event took place at Cuyamaca College on August 28, 2010, from 8 a.m. until noon. Seventy-eight (78) residents participated and purchased a total of 102 rain barrels. The County of San Diego subsidized the purchase of 69 rain barrels at the rate of $30

plus tax, and additional 33 rain barrels were sold at the full price of $60 plus tax. The Fallbrook event took place on September 26, 2010 at the Fallbrook Village Square. During this event 138 barrels were purchased by105 residents. The County of San Diego subsidized 103 of the barrels which were sold to unincorporated residents. A total of 185 residents participated in these events and a total of 240 rain barrels were sold. Participating residents came from a variety of watersheds throughout the County (Table 1).

Table 1 Residents by Watershed

Watershed	Anza Borrego	Santa Margarita	San Luis Rey	Carlsbad	San Dieguito	Peñasquitos	San Diego River	San Diego Bay	Tijuana	Unk
Total Residents	2	24	61	6	8	4	27	50	2	1

ACTIVITY IMPLEMENTATION FY 2011-12

During FY11-12, 50 customers who purchased rain barrels in 2010 were surveyed for customer satisfaction and to check to be sure the rain barrels had been installed and maintained. Survey results will be summarized in FY12-13. Results of the survey will help to determine how to proceed with a rainwater harvesting program.

TMDL APPLICABILITY

This activity was not specifically implemented in compliance with a TMDL.

TIME SCHEDULE FOR IMPLEMENTATION

FY2009-10: Planning for this activity occurred.

FY2010-11: Two events were scheduled: August 28, 2010 (Cuyamaca College) and September 26, 2010 (Fallbrook Village).

FY2011-12: County of San Diego conducted a customer survey of 50 residents who purchased rain barrels.

FY2012-13: Results of the survey will be provided and additional events are being considered.

TITLE: TARGETED CATCH BASIN CLEANING PILOT STUDY PHASE I
ID #: TJ-034

ACTIVITY DESCRIPTION

The City of San Diego Storm Water Division began the planning of a catch basin cleaning pilot study in FY2011, implementation of Phase I occurred in FY2012. The purpose of the project is to understand the potential water quality improvements and load reduction associated with catch basin cleaning by evaluating the quantity and quality of materials removed from the storm drains from four pilot areas. The areas were selected to be representative of different land uses within the City limits. Additionally two cleaning methods will be evaluated - manual and using vactor equipment. One of the pilot areas is within the Tijuana River WMA in a residential area in San Ysidro. Composite samples collected from the material removed from the targeted catch basins will be analyzed for metals, nutrients, organics, and bacteria.

The City's literature review and draft work plan development project in 2011 (Tetra Tech 2011) highlighted some of the nuances of catch basin cleaning methods and frequencies that can affect pollutant removal and municipal costs. There is evidence from the literature survey that optimizing catch basin cleaning, both by using the most effective and efficient cleaning techniques and by tailoring frequencies to different drainage areas, can maximize the return on investment in terms of both pollutant reduction, and municipal labor and funds. Data collection and GIS analysis, which the City improved substantially in 2011 on a city-wide basis by establishing a unique identifier for each inlet, are vital to this type of optimization.

With the diversity of land use types, neighborhoods, and drainage system ages and conditions found throughout the City of San Diego, developing a more specific or tailored plan for catch basin cleaning frequency and techniques requires some understanding of how accumulation rates and pollutant concentrations in catch basin materials differ among land use types and settings. Identifying land use settings or areas with rapid rates of pollutant accumulation - and potential mobilization - as well as areas with high concentrations of pollutants of concern, may be used to suggest the most efficient and effective timing, frequency, and method of catch basin cleaning. Land use settings or areas where pollutants accumulate slowly, with minimal mobilization, or low concentrations of pollutants of concern for a particular watershed, would suggest different maintenance schedules to achieve the same water quality results.

Catch basin cleaning in San Diego also must be addressed in light of the region's weather pattern, typified by a long dry season from roughly May through October during which catch basin materials are expected to accumulate without mobilization into the MS4, followed by a wet weather season with sporadic but occasionally very significant rain events (i.e. greater than one inch of precipitation in a 24-hour period). While this Pilot Study Phase I did not begin until December 2011, which was after substantial precipitation had fallen, the information base nonetheless will be useful, particularly if and when the City is able to complete an end of season cleaning before rain events begin. Sampling prior to intensive rainfall may have yielded different results, possibly greater concentrations of analytes that accumulate over time and are not easily re-suspended (such as metals). Microbiology samples might also be different during the dry season, especially if incubation is dependent on wet sumps.

TMDL APPLICABILITY

None

TIME SCHEDULE FOR IMPLEMENTATION

Implementation and assessment for Phase I was conducted in FY2012. It was determined a Phase II would be implemented and assessed in FY2013.

LEAD WATERSHED COPERMITTEE

- City of San Diego

OTHER PARTICIPATING COPERMITTEES

- N/A

OTHER PARTICIPATING ENTITIES

- N/A

HIGH PRIORITY WATER QUALITY PROBLEM(S) ADDRESSED

- Bacteria/Pathogens
- Metals
- Nutrients
- Sediment

CONSISTENCY WITH THE COLLECTIVE WATERSHED STRATEGY

Both the City's *Strategic Plan for Watershed Activity Implementation* and the Collective Watershed Strategy for the Tijuana River WMA identify bacteria, metals, organics, nutrients, and sediment as high priority water quality problems in the WMA, and recommend implementing load reduction/source abatement activities to address these constituents. This project will result in a quantifiable load reduction of sediment and will evaluate the amount of bacteria, metals, organics, and nutrients reduced as part of catch basin cleaning.

EFFECTIVENESS MEASUREMENTS

Management Questions

1) To what extent do changes in catch basin cleaning frequency affect the amount of pollutants collected?
2) What is the annual calculated load reduction based on pilot scale data collection with catch basin cleaning?
3) Which cleaning method, manual versus mechanical is the most cost effective method for removing sediment from catch basins?

Targeted Measurable Outcome(s)

1) Reduction in bacteria exported from the catch basin.
2) Reduction in sediment exported from the catch basin.
3) Reduction in nutrients associated with the catch basin.

Assessment Method(s)

1) Evaluate the volume of material currently removed from each catch basin.
2) Evaluate the correction in cleaning results with land use category, impervious area, watershed size, and surface water impairments.

Data Recorded

- Volume Removed: Debris – 894 lbs. The total amounts of nutrients and metals removed during the clean-out process were calculated by multiplying analyte concentrations by the weight of the material removed. The estimates for each analyte in each clean-out event were standardized to a 30-day accumulation period and 10 acre drainage area:
  - Nitrogen – 220g,
  - Phosphorus – 22g,
  - Copper – 1.51g,
  - Lead - .50g,
  - Zinc – 5.83g
- Location: San Ysidro
- Sediment sample analysis: Sediment – 50% of material removed

Expected Benefits

The objectives of the project were to:

- Provide baseline information on the amounts and characteristics of materials removed from catch basins in four study areas.
- Determine patterns in quantity and quality of materials removed, especially in relation to prevalent land uses, sampling methods, clean-out timing, and frequency.
- Recommend potential strategies to optimize efficiency of clean-outs for specific land use categories, pollutants, and catch basin configurations.
- Propose ongoing monitoring protocols to improve on the baseline information and refine clean-out strategies.

Analysis Results

Results of the monitoring efforts for catch basin cleaning in four areas with different land use patterns, catch basin configurations, and cleaning methods show variations in amounts of materials and concentrations of analytes collected in each area and over time. The observations suggest overarching patterns and provide baseline information for ongoing monitoring and analysis. Because the samples were not sufficiently replicated, it is not possible to attribute statistical significance to any of the observed differences among treatments (area, timing, and frequency, method, or catch basin configuration).

Nutrients accumulated quickly between clean-outs and concentrations generally reached a plateau. That suggests that nutrients are commonly available in the contributing storm water runoff (hence the rapid accumulation) and may be easily washed though the drainage system (hence the plateau). Nitrogen was more concentrated in the later sampling periods in the primarily residential San Ysidro study area, which consists of single family homes, parks, and residential streets, suggesting applied fertilizer as a source there. The lowest concentrations of metals (copper, lead, and zinc) overall were consistently in the San Ysidro residential area.

Comparison of vactor and manual clean-out methods.

The vactor method was used in the Downtown and Scripps Poway Parkway areas and the manual method was used in the San Ysidro and Tecolote areas. To the extent an inference about the difference in methods can be drawn from this study, the results from the two mixed-use land use

areas – Scripps Poway Parkway and Tecolote Creek – can be compared. The vactor method produced greater amounts of materials in the Scripps Poway Parkway area than did manual cleaning in the Tecolote area. Because the amounts retrieved by vactor from the Downtown area were not much greater than the amounts retrieved using manual methods, it is suspected that differences in amounts of materials removed are due to factors other than the clean-out method, particularly the capacities of the catch basin sumps. Moreover, observation in the Scripps Poway Parkway area, which has significant topography, suggests that physical and soil conditions may be playing a role in the volume of material observed.

Conclusions

This pilot study demonstrates that there are differences in amounts of materials and pollutants that can be removed from catch basin inlets. Attributing those differences to factors such as removal methods, categorical land uses, timing in relation to rain events, frequency of cleaning, or a number of unmeasured factors is difficult given the small sample size and confounding factors. The costs and benefits associated with methods, schedules, or targeted locations in relation to sediment and pollutant removal would be better quantified with ongoing monitoring. Within the catch basin clean-out program that is ongoing in San Diego, there may be opportunities to collect valuable information with only a little extra effort. Other data collection for specific analyses will require a targeted monitoring program.

Recommendations

A major limitation of the pilot study is that we did not sample before the first significant rain event. Additional data should be collected after a dry season accumulation, clean-out, and sampling. The additional data should then be re-processed to determine clean-out procedures relative to dry season accumulation.

It is assumed that accumulation of sediments and pollutants is greatest during the wet season. The wet season is therefore the time to focus on frequent clean-outs. However, until dry season monitoring and analysis is complete, we cannot discount the importance of also scheduling clean-outs before the first wet season rains wash accumulated materials out of the systems. This may be especially important for metals. In residential areas or areas expected to have applied fertilizers, the middle of the growing season may be a critical time for clean-outs to maximize removal of nutrients.

In FY2013 Dry Weather Clean-Out and Monitoring will be identical to the protocols observed in the FY2012 Pilot Study Phase I so that the City has the benefit of a full year's profile of catch basin materials, characteristics and pollutants removed in each of the four study areas.

TITLE: RAINWATER HARVESTING REBATE PILOT PROGRAM
ID #: TJ-035

ACTIVITY DESCRIPTION

The City of San Diego Transportation & Storm Water Department, Storm Water Division in FY11 collaborated with the Public Utilities Department in the planning of a Rainwater Harvesting Rebate Pilot Program (Rebate Pilot Program). Staff from both departments met to discuss the application process, funding, administration, promotion, and other items related to the Rebate Pilot Program.

This Rebate Pilot Program was implemented in FY12 and was open to the residents of the City of San Diego on a first come first serve basis and provided a rebate of .50c per gallon, up to $200 per address, for water capture devices up to 400 gallons that are purchased and installed. The Public Utilities Department administered the Rebate Pilot Program in conjunction with its ongoing Prop 50 Outdoor Water Conservation Rebate Program.

In addition to Rain Barrels Rebate Program an Outdoor Water Conservation Rebate Program was also offered to the residents of the City of San Diego. The Outdoor Water Conservation Rebate Program involved a rebate program to assist residents and businesses conserve water by reducing the volume of irrigation and landscape runoff by incentivizing three irrigation modifications: the installation of irrigation smart controllers, micro-irrigation and turf conversion to low water use plants. Rebates are offered through a State of California grant and are available on a first come first served basis until funds are exhausted.

TMDL APPLICABILITY

N/A

TIME SCHEDULE FOR IMPLEMENTATION

Planning started in FY 11, implementation occurred in FY12.

LEAD WATERSHED COPERMITTEE

- City of San Diego

OTHER PARTICIPATING COPERMITTEES

OTHER PARTICIPATING ENTITIES

- City of San Diego Public Utilities Department

HIGH PRIORITY WATER QUALITY PROBLEM(S) ADDRESSED

- Bacteria/Pathogens
- Conditions
- Dissolved Minerals
- Gross Pollutants
- Metals
- Nutrients
- Oil & Grease
- Organics
- Pesticides
- Sediment
- Trash

CONSISTENCY WITH THE COLLECTIVE WATERSHED STRATEGY

Both the City's *Strategic Plan for Watershed Activity Implementation* and the Collective Watershed Strategy for the Tijuana River Watershed Management Area (WMA) identifies several water quality problems throughout the watershed. Rainwater harvesting reduces the overall amount of wet weather runoff and the demand for portable water for irrigation.

EFFECTIVENESS MEASUREMENTS

Data to be recorded

- Amount of Rain Barrels rebated: 98 rain barrels
- Average size of Rain Barrels installed: 60 gallons
- Total Rain Barrel gallons rebated: 17,400 gallons
- Number of Outdoor Water Conservation items rebated:
    - 297 rebates,
        - Smart Controllers -106,
        - Micro Irrigation - 93,
        - Turf Conversion – 98

Expected Benefits

The use of water capture devices (e.g., rain barrels) reduces wet weather runoff to the MS4, and collected water also reduces the demand for portable water to irrigate landscaping. Reduction in runoff can be achieved with the installation of irrigation smart controllers, micro-irrigation and turf conversion to low water use plants.

TITLE: 2011 TRASH ASSESSMENT OF THE UPPER TIJUANA RIVER WATERSHED

ID #: TJ-036

ACTIVITY DESCRIPTION

On January 20, 2010, the San Diego County Regional Water Quality Control Board hosted a public workshop and CEQA scoping meeting for the Tijuana River and Estuary Sedimentation and Trash Total Maximum Daily Load (TMDL) Project. In response to this notice, the County of San Diego will conduct a baseline trash assessment of the upper portions of the Tijuana River Watershed. The purpose of the study is to assess the levels of trash at different sampling locations draining portions of the watershed located in the United States. The assessment will be based on "The Rapid Trash Assessment Method Applied to Waters of the San Francisco Bay Region: Trash Measurement in Streams" (SWAMP 2007).

This method generates site-specific scores from 0 to 120, with higher values indicating cleaner sites. The method also documents the number of pieces of trash per one hundred feet of stream, and the rate of return of trash under different hydrologic conditions. Trash assessment includes a visual survey of the water body (e.g., streambed and banks) and adjacent areas and is designed to represent the range of effects that trash has on the physical, biological, and chemical integrity of water bodies.

ACTIVITY IMPLEMENTATION FY10-11

From January 27 through April 29, 2011, a pilot trash assessment was carried out by the County of San Diego at ten locations within the Tijuana River Watershed. County staff visited each of the sites after two notable rain events between January and April in 2011. Complete methodology and information regarding the assessment can be found in the attached Final Report.

ACTIVITY IMPLEMENTATION FY11-12

From February 1, 2012 through March 14, 2012, an additional round of trash assessment for the pilot trash assessment was carried out by the County of San Diego at ten locations within the Tijuana River Watershed. County staff visited each of the sites to assess the trash accumulation after the period that included the 2011 dry season and a number of rain events between October 2011 and January 2012. Complete methodology and information regarding the assessment can be found in the attached Final Report.

TMDL APPLICABILITY

This activity was not specifically implemented in compliance with a TMDL.

TIME SCHEDULE FOR IMPLEMENTATION

FY10-11: Trash assessments occurred between January and April 2011.

FY11-12: Additional trash assessments were conducted between February and March 2012. The Final Report will be updated to include this data (attached). Currently, no further action is planned on this activity.

EFFECTIVENESS MEASUREMENTS

Completion of trash assessments at the ten locations is considered a Level 1 Outcome.

Appendix 1

2011 TRASH ASSESSMENT OF THE UPPER TIJUANA RIVER WATERSHED

This page intentionally left blank.

Pilot Trash Assessment Study at the Tijuana River Watershed

From January 27, 2011 through March 14, 2012 a pilot trash assessment study modeled on the "*The Rapid Trash Assessment Method Applied to Waters of the San Francisco Bay Region: Trash Measurement in Streams*" (SWAMP 2007) was carried out by the County of San Diego at ten locations within the Tijuana River Watershed. The study was conducted to support the development of the Tijuana River and Estuary Sediment and Trash TMDLs (SDRWQCB, 2011). The purpose of the study was to assess the levels of trash at different sampling locations draining portions of the watershed located in the United States.

This pilot study aimed to assess the trash levels found on the US side of the watershed through the utilization of the trash assessment method developed for the San Francisco Bay Region (SWAMP 2007). This method generates site-specific scores from 0 to 120, with higher values indicating cleaner sites. The method also documents the number of pieces of trash per one hundred feet of stream, and the rate of return of trash under different hydrologic conditions. Trash assessment includes a visual survey of the water body (e.g., streambed and banks) and adjacent areas and is designed to represent the range of effects that trash has on the physical, biological, and chemical integrity of water bodies.

Methods

The study was conducted at ten sampling locations (Table 1).

Table 1. Sampling Location Designations and GIS Coordinates.

Site ID	Description	Latitude	Longitude
TIJ01	Cottonwood Creek at Old Highway 80 (bridge crossing)	32.78844 ° N	-116.49732 ° W

TIJ04	Campo Creek at Highway 94	32.60939 ° N	-116.47421 ° W
TIJ06	Marron Valley Creek at Marron Valley Road	32.57300 ° N	-116.75824 ° W
TIJ07	Cottonwood Creek at Marron Valley Road	32.57288 ° N	-116.75798 ° W
TIJ08	Potrero Creek at Barrett Smith Road	32.60841 ° N	-116.69587 ° W
TIJ09	Tecate Creek at Mexican Border Fence (panel #304)	32.57737 ° N	-116.61643 ° W
TIJ10	Bell Creek at Highway 94	32.59742 ° N	-116.55625 ° W
TIJ11	La Posta Creek at Old Highway 80	32.71824 ° N	-116.45693 ° W
TIJ12	Kitchen Creek at Old Highway 80	32.73349 ° N	-116.48309 ° W

According to the SWAMP (2007) San Francisco Bay trash assessment protocol, all trash items found within the defined boundaries of a site were picked up and tallied and rapid trash assessments data sheets were filled out upon each sampling occasion (a sample sheet is provided in Appendix A). Each location was assessed three times. Each of the three assessments was conducted after at least one major storm event with precipitation greater than 0.5 inches0.

All surveys were initiated at the downstream end of the selected reach. One team member walked along the bank at the edge of the stream, picking up and tallying trash items on the bank up to the upper bank boundary, above and below the high water line recording the items on the trash assessment worksheet as either above or below the high water line. The other person walked along the streambed and up and down the opposite bank, picking up and calling out trash items found in the water body and on the opposite bank, both above and below the high water line, for the tally person to mark down on the trash assessment sheet.

If it was evident that items have been littered, dumped, or accumulated via downstream transport, notes were made in the designated area of the tally sheet. All worksheets were completed before leaving the site.
The rapid trash assessment included six condition categories as outlined below:

1. *Level of Trash*. - the qualitative "first impression" of the site after observing the entire length of the reach. "Poor" sites were those where trash was foremost noticeable; no trash was obviously visible at "optimal" sites.

2. *Actual Number of Trash Items Found*. Overall number of trash items below and above high water line based on the tally of the 100-foot stream reach. Where more than 100 items have were found, following scores were assigned: 5: 101-200 items; 4: 201-300 items; 3: 301-400 items; 2: 401-500 items; 1: 501-600 items; 0: over 600 items. Similar guidelines were used to assign scores in optimal, sub-optimal and marginal categories.

3. *Threat to Aquatic Life*. Trash items that are persistent in the environment, buoyant, and relatively small that may be transported long distances and mistaken by wildlife as food items. Larger items can cause entanglement.

4. *Threat to Human Health*. Items that are dangerous to people who wade or swim in the water, and with pollutants that could accumulate in fish. The worst conditions have the potential for presence of dangerous bacteria or viruses.

5. *Illegal Dumping and Littering*. Trash items that appear to be a result of dumping or littering based on adjacent land use practices or site accessibility.

6. *Accumulation of Trash*. Trash that accumulates from upstream locations based on age and transport.

Upon each site visit, a rapid trash assessment (RTA) score ranging from 0 to 20 was assigned to each site within each of the six condition categories. For each category, a score of 16-20 reflected optimal condition, 11-15 was sub optimal, 6-10 was marginal, and 0-5 was poor. The overall rapid trash assessment (RTA) score ranging from 0 to 120 was also calculated for each sampling location upon each visit by adding together all condition category scores. According to the SWAMP (2007) protocol, "*sites with scores of 60 +/- 15% can be distinguished in threat to beneficial uses from sites with scores of 80 +/- 15%*." No categorization of the total scores as optimal, sub-optimal, marginal or poor was provided in the protocol.

Results

A total of 30 site visits were conducted at the 10 sampling locations (Table 1, Figure 1) in the Tijuana River Watershed as the visits were carried out over three rounds: one in late January/ early February 2011, the second in late March/ early April 2011, and the third in February and March of 2012. A summary table of all data collected is provided in Appendix B. Copies of completed field sheets are included in Appendix C. Total RTA scores for each sampling date and location and by condition category are provided in Table 2. Overall RTA score ranges are also color coded for each sampling location in Figure 2 below.

Figure 1. Sampling locations utilized in the pilot study from January through March 2012. Sites are color coded to reflect average Rapid Trash Assessment (RTA) Score ranges (higher scores indicate less impact from trash). The green dot corresponding to TIJ06 is not visible as the site was located very close to TIJ07.

On average, over all sites and sampling rounds, 45 pieces of trash were collected per 100 foot reach of stream. Over 64% of this total, or about 28 pieces per 100 foot reach of stream, was composed of plastic items. Metals (14%), biodegradables (6%), glass (5%), fabric (5%), miscellaneous other items (4%) and a small amount of toxic (1%), construction (1%), and biohazard (< 1%) trash materials were also found (Figure 2). Most sites contained less than 100 pieces of trash; three locations, TIJ04, TIJ09 and TIJ10, exceeded that number during one of the three visits. The sites with most pieces of trash included Tecate Creek (TIJ09), Campo Creek (TIJ04), and Bell Creek (TIJ10). Overall, 58% of all trash items were found below the high-water line, while 42% of items were found above. The average total Rapid Trash Assessment (RTA) score was 81, with a range from 57 to 116 (out of a possible 120). Total RTA scores were strongly related to the number of plastic pieces found at sites (Figure 3); as lower RTA scores reflect higher trash levels, sites with low RTA scores contained higher total numbers of plastic pieces.

Figure 2. Average percentage of total pieces of trash, by category, per 100 foot reach

Figure 3. The relationship between the rapid trash assessment score (RTA) and the total number of plastic pieces found per 100 feet reach of stream.

Table 2. Rapid Trash Assessment (RTA) Scores for Each Sampling Location by Condition Category. RTA Scores of 16-20 (green) indicate optimal sites; 11-15 (yellow) = sub-optimal; 6-10 (orange) = marginal; 0-5 (red) = poor.

Based on the three site visits, Marron Valley Creek at Marron Valley Road (TIJ06) had the highest RTA scores that reached the optimum value of 120 for two of the three visits. Campo Creek at Highway 94 (TIJ04) and Tecate Creek at Mexican Border Fence (TIJ09) had the lowest overall RTA scores and, according to the SWAMP (2007) trash assessment protocol, could be considered in threat to beneficial uses. The remaining sites fell within the overall RTA score range (RTA > 69) that is not considered a threat to beneficial uses. For most sites, the RTA

scores did not differ greatly between site visits. As trash was picked up upon each visit, more trash was found upon the subsequent visits due both to deposition of new trash (direct littering and dumping) as well as the appearance of older trash (older trash resurfacing from under the sediment or drifting from upstream locations - downstream transport and accumulation). For TIJ09, TIJ04 and TIJ10, the re-surfacing trash accounted for the majority of the trash pieces found upon the second visit. However, the same was not true for the third visit; most trash found during the third visit most likely was new to the site or drifted from upstream and the banks. Although the SWAMP (2007) protocol allows for removing trash from the sites so that only "new" trash is counted upon subsequent visits, the protocol does not contain the "embedded historical trash" category and, in the field sheets, the "embedded historical trash" was recorded as part of the "littered" category.

Discussion

The purpose of this pilot study was to assess the levels of trash at different sampling locations draining portions of the Tijuana River Watershed located in the United States. The trash assessment method developed for the San Francisco Bay Region (SWAMP 2007) was employed that involves removal of trash upon each site visit so that, upon subsequent visits, only "new" trash that has been dumped, littered and/or has drifted from other locations is enumerated. The study has been carried out at 10 sampling locations over three rounds following storm events in 2011 and 2012.

An average of 45 pieces of trash were collected per 100 foot reach of stream with 64% consisting of plastic items. The sites with most pieces of trash included Tecate Creek (TIJ09), Campo Creek (TIJ04), and Bell Creek (TIJ10). With the exception of two locations, Campo Creek (TIJ04) and Tecate Creek (TIJ09), trash levels in the evaluated portions of the Tijuana River Watershed whose drainage areas are located within the United States, were not considered a threat to beneficial uses. At Campo Creek, Tecate Creek, and Bell Creek, elevated trash levels found upon the second visit were mostly due to the unearthed historical trash as was evident by levels of degradation and imbeddedness of the trash pieces within the creeks' bottoms. This however was not true for the third visit when most of the trash was most likely new and/or has drifted from locations upstream.

Overall, the results of the trash assessment indicate that 8 of the 10 sites could not be considered in threat to beneficial uses. The remaining 2 sites had overall RTA scores of less than 69 (considered in threat to beneficial uses).

WATERSHED/STREAM: _____ DATE/TIME: _____
MONITORING GROUP, STAFF: _____ SAMPLE ID: _____
SITE DESCRIPTION (Station Name, Number, etc.): _____

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
1. Level of Trash	On first glance, no trash visible. Little or no trash (<10 pieces) evident when streambed and stream banks are closely examined for litter and debris, for instance by looking under leaves.	On first glance, little or no trash visible. After close inspection small levels of trash (10-50 pieces) evident in stream bank and streambed.	Trash is evident in low to medium levels (51-100 pieces) on first glance. Stream, bank surfaces, and riparian zone contain litter and debris. Evidence of site being used by people: scattered cans, bottles, food wrappers, blankets, clothing.	Trash distracts the eye on first glance. Stream, bank surfaces, and immediate riparian zone contain substantial levels of litter and debris (>100 pieces). Evidence of site being used frequently by people: many cans, bottles, and food wrappers, blankets, clothing.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
2. Actual Number of Trash Items Found	0 to 10 trash items found based on a trash assessment of a 100-foot stream reach.	11 to 50 trash items found based on a trash assessment of a 100-foot stream reach.	51 to 100 trash items found based on a trash assessment of a 100-foot stream reach.	Over 100 trash items found based on a trash assessment of a 100-foot stream reach.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
3. Threat to Aquatic Life	Trash, if any, is mostly paper or wood products or other biodegradable materials. Note: A large amount of rapidly biodegradable material like food waste creates high oxygen demand, and should not be scored as optimal.	Little or no (<10 pieces) transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts. Presence of settleable, degradable, and non-toxic debris such as glass or metal.	Medium prevalence (10-50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts Larger deposits (< 50 pieces) of settleable debris such as glass or metal. Any evidence of clumps of deposited yard waste or leaf litter.	Large amount (>50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, balloons, Styrofoam, cigarette butts; toxic items such as batteries, lighters, or spray cans; large clumps of yard waste or dumped leaf litter; or large amount (>50 pieces) of settleable glass or metal.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
4. Threat to Human Health	Trash contains no evidence of bacteria or virus hazards such as medical waste, diapers, pet or human waste. No evidence of toxic substances such as chemical containers or batteries. No ponded water for mosquito production. No evidence of puncture and laceration hazards such as broken glass or metal debris.	No bacteria or virus hazards or sources of toxic substances, but small presence (<10 pieces) of puncture and laceration hazards such as broken glass and metal debris. No presence of ponded water in trash items such as tires or containers that could facilitate mosquito production.	Presence of **any one** of the following: hypodermic needles or other medical waste; used diaper, pet waste, or human feces; any toxic substance such as chemical containers, batteries, or fluorescent light bulbs (mercury). Medium prevalence (10-50 pieces) of puncture hazards.	Presence of **more than one** of the items described in the marginal condition category, or high prevalence of any one item (e.g. greater than 50 puncture or laceration hazards).
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0

Rapid Trash Assessment Worksheet

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
5. Illegal Dumping	D: No evidence of illegal dumping. No bags of trash, no yard waste, no household items placed at site to avoid proper disposal, no shopping carts.	D: Some evidence of illegal dumping. Limited vehicular access limits the amount of potential dumping, or material dumped is diffuse paper-based debris.	D: Presence of **one** of the following: furniture, appliances, shopping carts, bags of garbage or yard waste, coupled with vehicular access that facilitates in-and-out dumping of materials to avoid landfill costs.	D: Evidence of chronic dumping, with **more than one** of the following items: furniture, appliances, shopping carts, bags of garbage, or yard waste. Easy vehicular access for in-and-out dumping of materials to avoid landfill costs.
Illegal Littering	L: Any trash is incidental litter (< 5 pieces) or carried downstream from another location.	L: Some evidence of litter within creek and banks originating from adjacent land uses (<10 pieces).	L: Prevalent (10-50 pieces) in-stream or shoreline littering that appears to originate from adjacent land uses.	L: Large amount (>50 pieces) of litter within creek and on banks that appears to originate from adjacent land uses.
D-SCORE	10 9	8 7 6	5 4 3	2 1 0
L-SCORE	10 9	8 7 6	5 4 3	2 1 0
6. Accum-ulation of Trash	There does not appear to be a problem with trash accumulation from downstream transport. Trash, if any, appears to have been directly deposited at the stream location.	Some evidence (<10 pieces) that litter and debris have been transported from upstream areas to the location, based on evidence such as silt marks, faded colors or location near high water line.	Evidence that (10 to 50 pieces) trash is carried to the location from upstream, as evidenced by its location near high water line, siltation marks on the debris, or faded colors.	Trash appears to have accumulated in substantial quantities at the location based on delivery from upstream areas, and is in various states of degradation based on its persistence in the waterbody. Over 50 items of trash have been carried to the location from upstream.

K2 — 12/7/11

Rapid Trash Assessment Worksheet

Surface Water Ambient Monitoring Program, San Francisco Bay Regional Water Quality Control Board

WATERSHED/STREAM: TIJ- Pine Valley Creek DATE/TIME: 1/27/11 10:00
MONITORING GROUP, STAFF: S.D. / K.L. SAMPLE ID: 3752
SITE DESCRIPTION (Station Name, Number, etc.): TIJ02

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
1. Level of Trash	On first glance, no trash visible. Little or no trash (<10 pieces) evident when streambed and stream banks are closely examined for litter and debris, for instance by looking under leaves.	On first glance, little or no trash visible. After close inspection small levels of trash (10-50 pieces) evident in stream bank and streambed.	Trash is evident in low to medium levels (51-100 pieces) on first glance. Stream, bank surfaces, and riparian zone contain litter and debris. Evidence of site being used by people: scattered cans, bottles, food wrappers, blankets, clothing.	Trash distracts the eye on first glance. Stream, bank surfaces, and immediate riparian zone contain substantial levels of litter and debris (>100 pieces). Evidence of site being used frequently by people: many cans, bottles, and food wrappers, blankets, clothing.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
2. Actual Number of Trash Items Found	0 to 10 trash items found based on a trash assessment of a 100-foot stream reach.	11 to 50 trash items found based on a trash assessment of a 100-foot stream reach.	51 to 100 trash items found based on a trash assessment of a 100-foot stream reach.	Over 100 trash items found based on a trash assessment of a 100-foot stream reach.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
3. Threat to Aquatic Life	Trash, if any, is mostly paper or wood products or other biodegradable materials. Note: A large amount of rapidly biodegradable material like food waste creates high oxygen demand, and should not be scored as optimal.	Little or no (<10 pieces) transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts. Presence of settleable, degradable, and non-toxic debris such as glass or metal.	Medium prevalence (10-50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts Larger deposits (< 50 pieces) of settleable debris such as glass or metal. Any evidence of clumps of deposited yard waste or leaf litter.	Large amount (>50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, balloons, Styrofoam, cigarette butts; toxic items such as batteries, lighters, or spray cans; large clumps of yard waste or dumped leaf litter; or large amount (>50 pieces) of settleable glass or metal.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
4. Threat to Human Health	Trash contains no evidence of bacteria or virus hazards such as medical waste, diapers, pet or human waste. No evidence of toxic substances such as chemical containers or batteries. No ponded water for mosquito production. No evidence of puncture and laceration hazards such as broken glass or metal debris.	No bacteria or virus hazards or sources of toxic substances, but small presence (<10 pieces) of puncture and laceration hazards such as broken glass and metal debris. No presence of ponded water in trash items such as tires or containers that could facilitate mosquito production.	Presence of **any one** of the following: hypodermic needles or other medical waste; used diaper, pet waste, or human feces; any toxic substance such as chemical containers, batteries, or fluorescent light bulbs (mercury). Medium prevalence (10-50 pieces) of puncture hazards.	Presence of **more than one** of the items described in the marginal condition category, or high prevalence of any one item (e.g. greater than 50 puncture or laceration hazards).
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0

Rapid Trash Assessment Worksheet

Surface Water Ambient Monitoring Program, San Francisco Bay Regional Water Quality Control Board

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
5. Illegal Dumping	D: No evidence of illegal dumping. No bags of trash, no yard waste, no household items placed at site to avoid proper disposal, no shopping carts.	D: Some evidence of illegal dumping. Limited vehicular access limits the amount of potential dumping, or material dumped is diffuse paper-based debris.	D: Presence of **one** of the following: furniture, appliances, shopping carts, bags of garbage or yard waste, coupled with vehicular access that facilitates in-and-out dumping of materials to avoid landfill costs.	D: Evidence of chronic dumping, with **more than one** of the following items: furniture, appliances, shopping carts, bags of garbage, or yard waste. Easy vehicular access for in-and-out dumping of materials to avoid landfill costs.
Illegal Littering	L: Any trash is incidental litter (< 5 pieces) or carried downstream from another location.	L: Some evidence of litter within creek and banks originating from adjacent land uses (<10 pieces).	L: Prevalent (10-50 pieces) in-stream or shoreline littering that appears to originate from adjacent land uses.	L: Large amount (>50 pieces) of litter within creek and on banks that appears to originate from adjacent land uses.
D-SCORE	10 9	8 7 6	5 4 3	2 1 0
L-SCORE	10 9	8 7 6	5 4 3	2 1 0
6. Accumulation of Trash	There does not appear to be a problem with trash accumulation from downstream transport. Trash, if any, appears to have been directly deposited at the stream location.	Some evidence (<10 pieces) that litter and debris have been transported from upstream areas to the location, based on evidence such as silt marks, faded colors or location near high water line.	Evidence that (10 to 50 pieces) trash is carried to the location from upstream, as evidenced by its location near high water line, siltation marks on the debris, or faded colors.	Trash appears to have accumulated in substantial quantities at the location based on delivery from upstream areas, and is in various states of degradation based on its persistence in the waterbody. Over 50 items of trash have been carried to the location from upstream.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0

Total Score 76

SITE DEFINITION:

UPPER/LOWER BOUNDARIES OF REACH: Lower: upstream face of middle bridge abutment of Old Hwy 80

HIGH WATER LINE: debris line

UPPER EXTENT OF BANKS OR SHORE: dirt path/base of rocks

NOTES: Upper: 100' upstream of lower boundary marked with a wood stake + pile of stones.

Rapid Trash Assessment Worksheet

Surface Water Ambient Monitoring Program, San Francisco Bay Regional Water Quality Control Board

WATERSHED/STREAM: TIJ12/Kitchen Creek DATE/TIME: 1/28/11/12:00
MONITORING GROUP, STAFF: SD/KL SAMPLE ID: ~~TIJ12~~ 3755 (SD)
SITE DESCRIPTION (Station Name, Number, etc.): TIJ12

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
1. Level of Trash	On first glance, no trash visible. Little or no trash (<10 pieces) evident when streambed and stream banks are closely examined for litter and debris, for instance by looking under leaves.	On first glance, little or no trash visible. After close inspection small levels of trash (10-50 pieces) evident in stream bank and streambed.	Trash is evident in low to medium levels (51-100 pieces) on first glance. Stream, bank surfaces, and riparian zone contain litter and debris. Evidence of site being used by people: scattered cans, bottles, food wrappers, blankets, clothing.	Trash distracts the eye on first glance. Stream, bank surfaces, and immediate riparian zone contain substantial levels of litter and debris (>100 pieces). Evidence of site being used frequently by people: many cans, bottles, and food wrappers, blankets, clothing.
SCORE	20 19 (18) 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
2. Actual Number of Trash Items Found	0 to 10 trash items found based on a trash assessment of a 100-foot stream reach.	11 to 50 trash items found based on a trash assessment of a 100-foot stream reach.	51 to 100 trash items found based on a trash assessment of a 100-foot stream reach.	Over 100 trash items found based on a trash assessment of a 100-foot stream reach.
SCORE	20 19 18 17 16	15 14 13 12 11	(10) 9 8 7 6	5 4 3 2 1 0
3. Threat to Aquatic Life	Trash, if any, is mostly paper or wood products or other biodegradable materials. Note: A large amount of rapidly biodegradable material like food waste creates high oxygen demand, and should not be scored as optimal.	Little or no (<10 pieces) transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts. Presence of settleable, degradable, and non-toxic debris such as glass or metal.	Medium prevalence (10-50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts Larger deposits (< 50 pieces) of settleable debris such as glass or metal. Any evidence of clumps of deposited yard waste or leaf litter.	Large amount (>50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, balloons, Styrofoam, cigarette butts; toxic items such as batteries, lighters, or spray cans; large clumps of yard waste or dumped leaf litter; or large amount (>50 pieces) of settleable glass or metal.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 (8) 7 6	5 4 3 2 1 0
4. Threat to Human Health	Trash contains no evidence of bacteria or virus hazards such as medical waste, diapers, pet or human waste. No evidence of toxic substances such as chemical containers or batteries. No ponded water for mosquito production. No evidence of puncture and laceration hazards such as broken glass or metal debris.	No bacteria or virus hazards or sources of toxic substances, but small presence (<10 pieces) of puncture and laceration hazards such as broken glass and metal debris. No presence of ponded water in trash items such as tires or containers that could facilitate mosquito production.	Presence of **any one** of the following: hypodermic needles or other medical waste; used diaper, pet waste, or human feces; any toxic substance such as chemical containers, batteries, or fluorescent light bulbs (mercury). Medium prevalence (10-50 pieces) of puncture hazards.	Presence of **more than one** of the items described in the marginal condition category, or high prevalence of any one item (e.g. greater than 50 puncture or laceration hazards).
SCORE	20 19 18 17 16	(15) 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0

Rapid Trash Assessment Worksheet

Surface Water Ambient Monitoring Program, San Francisco Bay Regional Water Quality Control Board

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
5. Illegal Dumping	D: No evidence of illegal dumping. No bags of trash, no yard waste, no household items placed at site to avoid proper disposal, no shopping carts.	D: Some evidence of illegal dumping. Limited vehicular access limits the amount of potential dumping, or material dumped is diffuse paper-based debris.	D: Presence of **one** of the following: furniture, appliances, shopping carts, bags of garbage or yard waste, coupled with vehicular access that facilitates in-and-out dumping of materials to avoid landfill costs.	D: Evidence of chronic dumping, with **more than one** of the following items: furniture, appliances, shopping carts, bags of garbage, or yard waste. Easy vehicular access for in-and-out dumping of materials to avoid landfill costs.
Illegal Littering	L: Any trash is incidental litter (< 5 pieces) or carried downstream from another location.	L: Some evidence of litter within creek and banks originating from adjacent land uses (<10 pieces).	L: Prevalent (10-50 pieces) in-stream or shoreline littering that appears to originate from adjacent land uses.	L: Large amount (>50 pieces) of litter within creek and on banks that appears to originate from adjacent land uses.
D-SCORE	10 9	8 7 6	5 4 3	2 1 0
L-SCORE	10 9	8 7 6	5 4 3 SD	~~2~~ SD 1 0
6. Accumulation of Trash	There does not appear to be a problem with trash accumulation from downstream transport. Trash, if any, appears to have been directly deposited at the stream location.	Some evidence (<10 pieces) that litter and debris have been transported from upstream areas to the location, based on evidence such as silt marks, faded colors or location near high water line.	Evidence that (10 to 50 pieces) trash is carried to the location from upstream, as evidenced by its location near high water line, siltation marks on the debris, or faded colors.	Trash appears to have accumulated in substantial quantities at the location based on delivery from upstream areas, and is in various states of degradation based on its persistence in the waterbody. Over 50 items of trash have been carried to the location from upstream.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0

3. Threat to Aquatic Life	Trash, if any, is mostly paper or wood products or other biodegradable materials. Note: A large amount of rapidly biodegradable material like food waste creates high oxygen demand, and should not be scored as optimal.	Little or no (<10 pieces) transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts. Presence of settleable, degradable, and non-toxic debris such as glass or metal.	Medium prevalence (10-50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts Larger deposits (< 50 pieces) of settleable debris such as glass or metal. Any evidence of clumps of deposited yard waste or leaf litter.	Large amount (>50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, balloons, Styrofoam, cigarette butts; toxic items such as batteries, lighters, or spray cans; large clumps of yard waste or dumped leaf litter; or large amount (>50 pieces) of settleable glass or metal.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
4. Threat to Human Health	Trash contains no evidence of bacteria or virus hazards such as medical waste, diapers, pet or human waste. No evidence of toxic substances such as chemical containers or batteries. No ponded water for mosquito production. No evidence of puncture and laceration hazards such as broken glass or metal debris.	No bacteria or virus hazards or sources of toxic substances, but small presence (<10 pieces) of puncture and laceration hazards such as broken glass and metal debris. No presence of ponded water in trash items such as tires or containers that could facilitate mosquito production.	Presence of **any one** of the following: hypodermic needles or other medical waste; used diaper, pet waste, or human feces; any toxic substance such as chemical containers, batteries, or fluorescent light bulbs (mercury). Medium prevalence (10-50 pieces) of puncture hazards.	Presence of **more than one** of the items described in the marginal condition category, or high prevalence of any one item (e.g. greater than 50 puncture or laceration hazards).
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0

Rapid Trash Assessment Worksheet

Surface Water Ambient Monitoring Program, San Francisco Bay Regional Water Quality Control Board

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
5. Illegal Dumping	D: No evidence of illegal dumping. No bags of trash, no yard waste, no household items placed at site to avoid proper disposal, no shopping carts.	D: Some evidence of illegal dumping. Limited vehicular access limits the amount of potential dumping, or material dumped is diffuse paper-based debris.	D: Presence of **one** of the following: furniture, appliances, shopping carts, bags of garbage or yard waste, coupled with vehicular access that facilitates in-and-out dumping of materials to avoid landfill costs.	D: Evidence of chronic dumping, with **more than one** of the following items: furniture, appliances, shopping carts, bags of garbage, or yard waste. Easy vehicular access for in-and-out dumping of materials to avoid landfill costs.
Illegal Littering	L: Any trash is incidental litter (< 5 pieces) or carried downstream from another location.	L: Some evidence of litter within creek and banks originating from adjacent land uses (<10 pieces).	L: Prevalent (10-50 pieces) in-stream or shoreline littering that appears to originate from adjacent land uses.	L: Large amount (>50 pieces) of litter within creek and on banks that appears to originate from adjacent land uses.
D-SCORE	10 9	8 7 6	5 4 3	2 1 0
L-SCORE	10 9	8 7 6	5 4 3	2 1 0
6. Accumulation of Trash	There does not appear to be a problem with trash accumulation from downstream transport. Trash, if any, appears to have been directly deposited at the stream location.	Some evidence (<10 pieces) that litter and debris have been transported from upstream areas to the location, based on evidence such as silt marks, faded colors or location near high water line.	Evidence that (10 to 50 pieces) trash is carried to the location from upstream, as evidenced by its location near high water line, siltation marks on the debris, or faded colors.	Trash appears to have accumulated in substantial quantities at the location based on delivery from upstream areas, and is in various states of degradation based on its persistence in the waterbody. Over 50 items of trash have been carried to the location from upstream.

MONITORING GROUP, STAFF: SD/KL SAMPLE ID: 3759
SITE DESCRIPTION (Station Name, Number, etc.): TIJ07

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
1. Level of Trash	On first glance, no trash visible. Little or no trash (<10 pieces) evident when streambed and stream banks are closely examined for litter and debris, for instance by looking under leaves.	On first glance, little or no trash visible. After close inspection small levels of trash (10-50 pieces) evident in stream bank and streambed.	Trash is evident in low to medium levels (51-100 pieces) on first glance. Stream, bank surfaces, and riparian zone contain litter and debris. Evidence of site being used by people: scattered cans, bottles, food wrappers, blankets, clothing.	Trash distracts the eye on first glance. Stream, bank surfaces, and immediate riparian zone contain substantial levels of litter and debris (>100 pieces). Evidence of site being used frequently by people: many cans, bottles, and food wrappers, blankets, clothing.

L-SCORE	10 9	8 7 6	5 4 3	2 1 0
6. Accumulation of Trash	There does not appear to be a problem with trash accumulation from downstream transport. Trash, if any, appears to have been directly deposited at the stream location.	Some evidence (<10 pieces) that litter and debris have been transported from upstream areas to the location, based on evidence such as silt marks, faded colors or location near high water line.	Evidence that (10 to 50 pieces) trash is carried to the location from upstream, as evidenced by its location near high water line, siltation marks on the debris, or faded colors.	Trash appears to have accumulated in substantial quantities at the location based on delivery from upstream areas, and is in various states of degradation based on its persistence in the waterbody. Over 50 items of trash have been carried to the location from upstream.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0

Total Score ~~79~~ ~~82~~ 50 3/17/11 12/8/11

SITE DEFINITION:

UPPER/LOWER BOUNDARIES OF REACH: Lower reach = center of bridge abutment (angle point) Upper reach = smaller bridge abutment or 100 feet upstream

HIGH WATER LINE: Base of bridge abutment

UPPER EXTENT OF BANKS OR SHORE: one-half way up bank next to road

NOTES:

Concrete slabs from bridge were not considered illegaly dumped.

MONITORING GROUP, STAFF: SD/KL SAMPLE ID: 3837
SITE DESCRIPTION (Station Name, Number, etc.): TIJ10

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
1. Level of Trash	On first glance, no trash visible. Little or no trash (<10 pieces) evident when streambed and stream banks are closely examined for litter and debris, for instance by looking under leaves.	On first glance, little or no trash visible. After close inspection small levels of trash (10-50 pieces) evident in stream bank and streambed.	Trash is evident in low to medium levels (51-100 pieces) on first glance. Stream, bank surfaces, and riparian zone contain litter and debris. Evidence of site being used by people: scattered cans, bottles, food wrappers, blankets, clothing.	Trash distracts the eye on first glance. Stream, bank surfaces, and immediate riparian zone contain substantial levels of litter and debris (>100 pieces). Evidence of site being used frequently by people: many cans, bottles, and food wrappers, blankets, clothing.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
2. Actual Number of Trash Items Found	0 to 10 trash items found based on a trash assessment of a 100-foot stream reach.	11 to 50 trash items found based on a trash assessment of a 100-foot stream reach.	51 to 100 trash items found based on a trash assessment of a 100-foot stream reach.	Over 100 trash items found based on a trash assessment of a 100-foot stream reach.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
3. Threat to Aquatic Life	Trash, if any, is mostly paper or wood products or other biodegradable materials. Note: A large amount of rapidly biodegradable material like food waste creates high oxygen demand, and should not be scored as optimal.	Little or no (<10 pieces) transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts. Presence of settleable, degradable, and non-toxic debris such as glass or metal.	Medium prevalence (10-50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts Larger deposits (< 50 pieces) of settleable debris such as glass or metal. Any evidence of clumps of deposited yard waste or leaf litter.	Large amount (>50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, balloons, Styrofoam, cigarette butts; toxic items such as batteries, lighters, or spray cans; large clumps of yard waste or dumped leaf litter; or large amount (>50 pieces) of settleable glass or metal.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
4. Threat to Human Health	Trash contains no evidence of bacteria or virus hazards such as medical waste, diapers, pet or human waste. No evidence of toxic substances such as chemical containers or batteries. No ponded water for mosquito production. No evidence of puncture and laceration hazards such as broken glass or metal debris.	No bacteria or virus hazards or sources of toxic substances, but small presence (<10 pieces) of puncture and laceration hazards such as broken glass and metal debris. No presence of ponded water in trash items such as tires or containers that could facilitate mosquito production.	Presence of **any one** of the following: hypodermic needles or other medical waste; used diaper, pet waste, or human feces; any toxic substance such as chemical containers, batteries, or fluorescent light bulbs (mercury). Medium prevalence (10-50 pieces) of puncture hazards.	Presence of **more than one** of the items described in the marginal condition category, or high prevalence of any one item (e.g. greater than 50 puncture or laceration hazards).
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
5. Illegal Dumping	D: No evidence of illegal dumping. No bags of trash, no yard waste, no household items placed at site to avoid proper disposal, no shopping carts.	D: Some evidence of illegal dumping. Limited vehicular access limits the amount of potential dumping, or material dumped is diffuse paper-based debris.	D: Presence of **one** of the following: furniture, appliances, shopping carts, bags of garbage or yard waste, coupled with vehicular access that facilitates in-and-out dumping of materials to avoid landfill costs.	D: Evidence of chronic dumping, with **more than one** of the following items: furniture, appliances, shopping carts, bags of garbage, or yard waste. Easy vehicular access for in-and-out dumping of materials to avoid landfill costs.
Illegal Littering	L: Any trash is incidental litter (< 5 pieces) or carried downstream from another location.	L: Some evidence of litter within creek and banks originating from adjacent land uses (<10 pieces).	L: Prevalent (10-50 pieces) in-stream or shoreline littering that appears to originate from adjacent land uses.	L: Large amount (>50 pieces) of litter within creek and on banks that appears to originate from adjacent land uses.
D-SCORE	10 9	8 7 6	5 4 3	2 1 0
L-SCORE	10 9	8 7 6	5 4 3	2 1 0
6. Accumulation of Trash	There does not appear to be a problem with trash accumulation from downstream transport. Trash, if any, appears to have been directly deposited at the stream location.	Some evidence (<10 pieces) that litter and debris have been transported from upstream areas to the location, based on evidence such as silt marks, faded colors or location near high water line. SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0

Total Score 86

SITE DEFINITION:

UPPER/LOWER BOUNDARIES OF REACH: upper - 20' from upstream edge of bridge; in line with base of apron

HIGH WATER LINE: Debris line

UPPER EXTENT OF BANKS OR SHORE: Base of upland slope

lower - 20' downstream from downstream edge of Bridge, in line with base of concrete apron.

NOTES: 2nd trash assessment conducted.

Recent storms (since 1st assessment) have apparently exposed some items of historical trash. The majority of trash collected appears to have been historically most likely exposed by wind/water erosion.

Rapid Trash Assessment Worksheet

Surface Water Ambient Monitoring Program, San Francisco Bay Regional Water Quality Control Board

WATERSHED/STREAM: TIJ / Tecate Creek DATE/TIME: 3/28/11 / 11:50
MONITORING GROUP, STAFF: SD/MZ SAMPLE ID: 3841
SITE DESCRIPTION (Station Name, Number, etc.): TIJ09

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
1. Level of Trash	On first glance, no trash visible. Little or no trash (<10 pieces) evident when streambed and stream banks are closely examined for litter and debris, for instance by looking under leaves.	On first glance, little or no trash visible. After close inspection small levels of trash (10-50 pieces) evident in stream bank and streambed.	Trash is evident in low to medium levels (51-100 pieces) on first glance. Stream, bank surfaces, and riparian zone contain litter and debris. Evidence of site being used by people: scattered cans, bottles, food wrappers, blankets, clothing.	Trash distracts the eye on first glance. Stream, bank surfaces, and immediate riparian zone contain substantial levels of litter and debris (>100 pieces). Evidence of site being used frequently by people: many cans, bottles, and food wrappers, blankets, clothing.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
2. Actual Number of Trash Items Found	0 to 10 trash items found based on a trash assessment of a 100-foot stream reach.	11 to 50 trash items found based on a trash assessment of a 100-foot stream reach.	51 to 100 trash items found based on a trash assessment of a 100-foot stream reach.	Over 100 trash items found based on a trash assessment of a 100-foot stream reach.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
3. Threat to Aquatic Life	Trash, if any, is mostly paper or wood products or other biodegradable materials. Note: A large amount of rapidly biodegradable material like food waste creates high oxygen demand, and should not be scored as optimal.	Little or no (<10 pieces) transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts. Presence of settleable, degradable, and non-toxic debris such as glass or metal.	Medium prevalence (10-50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts Larger deposits (< 50 pieces) of settleable debris such as glass or metal. Any evidence of clumps of deposited yard waste or leaf litter.	Large amount (>50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, balloons, Styrofoam, cigarette butts; toxic items such as batteries, lighters, or spray cans; large clumps of yard waste or dumped leaf litter; or large amount (>50 pieces) of settleable glass or metal.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
4. Threat to Human Health	Trash contains no evidence of bacteria or virus hazards such as medical waste, diapers, pet or human waste. No evidence of toxic substances such as chemical containers or batteries. No ponded water for mosquito production. No evidence of puncture and laceration hazards such as broken glass or metal debris.	No bacteria or virus hazards or sources of toxic substances, but small presence (<10 pieces) of puncture and laceration hazards such as broken glass and metal debris. No presence of ponded water in trash items such as tires or containers that could facilitate mosquito production.	Presence of **any one** of the following: hypodermic needles or other medical waste; used diaper, pet waste, or human feces; any toxic substance such as chemical containers, batteries, or fluorescent light bulbs (mercury). Medium prevalence (10-50 pieces) of puncture hazards.	Presence of **more than one** of the items described in the marginal condition category, or high prevalence of any one item (e.g. greater than 50 puncture or laceration hazards).
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0

Rapid Trash Assessment Worksheet

Surface Water Ambient Monitoring Program, San Francisco Bay Regional Water Quality Control Board

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
5. Illegal Dumping	D: No evidence of illegal dumping. No bags of trash, no yard waste, no household items placed at site to avoid proper disposal, no shopping carts.	D: Some evidence of illegal dumping. Limited vehicular access limits the amount of potential dumping, or material dumped is diffuse paper-based debris.	D: Presence of **one** of the following: furniture, appliances, shopping carts, bags of garbage or yard waste, coupled with vehicular access that facilitates in-and-out dumping of materials to avoid landfill costs.	D: Evidence of chronic dumping, with **more than one** of the following items: furniture, appliances, shopping carts, bags of garbage, or yard waste. Easy vehicular access for in-and-out dumping of materials to avoid landfill costs.
Illegal Littering	L: Any trash is incidental litter (< 5 pieces) or carried downstream from another location.	L: Some evidence of litter within creek and banks originating from adjacent land uses (<10 pieces).	L: Prevalent (10-50 pieces) in-stream or shoreline littering that appears to originate from adjacent land uses.	L: Large amount (>50 pieces) of litter within creek and on banks that appears to originate from adjacent land uses.
D-SCORE	10 9	8 7 6	5 4 3	2 1 0
L-SCORE	10 9	8 7 6	5 4 3	2 1 0
6. Accumulation of Trash	There does not appear to be a problem with trash accumulation from downstream transport. Trash, if any, appears to have been directly deposited at the stream location.	Some evidence (<10 pieces) that litter and debris have been transported from upstream areas to the location, based on evidence such as silt marks, faded colors or location near high water line.	Evidence that (10 to 50 pieces) trash is carried to the location from upstream, as evidenced by its location near high water line, siltation marks on the debris, or faded colors.	Trash appears to have accumulated in substantial quantities at the location based on delivery from upstream areas, and is in various states of degradation based on its persistence in the waterbody. Over 50 items of trash have been carried to the location from upstream.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0

Total Score 61

lower - culvert grating near border fence

SITE DEFINITION:

UPPER/LOWER BOUNDARIES OF REACH: upper - 100' upstream near willow, marked w/ stake, ≈ 20' downstream of large oak just below level of dirt roads.

HIGH WATER LINE: debris line

UPPER EXTENT OF BANKS OR SHORE:

NOTES: Majority of trash appears to be historic; excavated by recent storms

Rapid Trash Assessment Worksheet

Surface Water Ambient Monitoring Program, San Francisco Bay Regional Water Quality Control Board

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
5. Illegal Dumping	D: No evidence of illegal dumping. No bags of trash, no yard waste, no household items placed at site to avoid proper disposal, no shopping carts.	D: Some evidence of illegal dumping. Limited vehicular access limits the amount of potential dumping, or material dumped is diffuse paper-based debris.	D: Presence of **one** of the following: furniture, appliances, shopping carts, bags of garbage or yard waste, coupled with vehicular access that facilitates in-and-out dumping of materials to avoid landfill costs.	D: Evidence of chronic dumping, with **more than one** of the following items: furniture, appliances, shopping carts, bags of garbage, or yard waste. Easy vehicular access for in-and-out dumping of materials to avoid landfill costs.
Illegal Littering	L: Any trash is incidental litter (< 5 pieces) or carried downstream from another location.	L: Some evidence of litter within creek and banks originating from adjacent land uses (<10 pieces).	L: Prevalent (10-50 pieces) in-stream or shoreline littering that appears to originate from adjacent land uses.	L: Large amount (>50 pieces) of litter within creek and on banks that appears to originate from adjacent land uses.
D-SCORE	10 (9)	8 7 6	5 4 3	2 1 0
L-SCORE	10 9	8 7 6	5 (4) 3	2 1 0
6. Accumulation of Trash	There does not appear to be a problem with trash accumulation from downstream transport. Trash, if any, appears to have been directly deposited at the stream location.	Some evidence (<10 pieces) that litter and debris have been transported from upstream areas to the location, based on evidence such as silt marks, faded colors or location near high water line.	Evidence that (10 to 50 pieces) trash is carried to the location from upstream, as evidenced by its location near high water line, siltation marks on the debris, or faded colors.	Trash appears to have accumulated in substantial quantities at the location based on delivery from upstream areas, and is in various states of degradation based on its persistence in the waterbody. Over 50 items of trash have been carried to the location from upstream.
SCORE	20 19 18 17 16	15 14 13 12 (11)	10 9 8 7 6	5 4 3 2 1 0

Total Score 78

Lower - upstream face of middle bridge abutment of Old Hwy. 80.

SITE DEFINITION:

UPPER/LOWER BOUNDARIES OF REACH:

HIGH WATER LINE: Debris line

UPPER EXTENT OF BANKS OR SHORE: Dirt path/base of rocks

NOTES: Some historic trash was observed.

Upper: 100' upstream of lower boundary, marked with a wood stake + pile of stones.

WATERSHED/STREAM: TIJ01/Cottonwood Creek DATE/TIME: 4/01/11 / 11:20
MONITORING GROUP, STAFF: SD/RL SAMPLE ID: 3845
SITE DESCRIPTION (Station Name, Number, etc.): TIJ01

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
1. Level of Trash	On first glance, no trash visible. Little or no trash (<10 pieces) evident when streambed and stream banks are closely examined for litter and debris, for instance by looking under leaves.	On first glance, little or no trash visible. After close inspection small levels of trash (10-50 pieces) evident in stream bank and streambed.	Trash is evident in low to medium levels (51-100 pieces) on first glance. Stream, bank surfaces, and riparian zone contain litter and debris. Evidence of site being used by people: scattered cans, bottles, food wrappers, blankets, clothing.	Trash distracts the eye on first glance. Stream, bank surfaces, and immediate riparian zone contain substantial levels of litter and debris (>100 pieces). Evidence of site being used frequently by people: many cans, bottles, and food wrappers, blankets, clothing.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
2. Actual Number of Trash Items Found	0 to 10 trash items found based on a trash assessment of a 100-foot stream reach.	11 to 50 trash items found based on a trash assessment of a 100-foot stream reach.	51 to 100 trash items found based on a trash assessment of a 100-foot stream reach.	Over 100 trash items found based on a trash assessment of a 100-foot stream reach.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
3. Threat to Aquatic Life	Trash, if any, is mostly paper or wood products or other biodegradable materials. Note: A large amount of rapidly biodegradable material like food waste creates high oxygen demand, and should not be scored as optimal.	Little or no (<10 pieces) transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts. Presence of settleable, degradable, and non-toxic debris such as glass or metal.	Medium prevalence (10-50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts Larger deposits (< 50 pieces) of settleable debris such as glass or metal. Any evidence of clumps of deposited yard waste or leaf litter.	Large amount (>50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, balloons, Styrofoam, cigarette butts; toxic items such as batteries, lighters, or spray cans; large clumps of yard waste or dumped leaf litter; or large amount (>50 pieces) of settleable glass or metal.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
4. Threat to Human Health	Trash contains no evidence of bacteria or virus hazards such as medical waste, diapers, pet or human waste. No evidence of toxic substances such as chemical containers or batteries. No ponded water for mosquito production. No evidence of puncture and laceration hazards such as broken glass or metal debris.	No bacteria or virus hazards or sources of toxic substances, but small presence (<10 pieces) of puncture and laceration hazards such as broken glass and metal debris. No presence of ponded water in trash items such as tires or containers that could facilitate mosquito production.	Presence of **any one** of the following: hypodermic needles or other medical waste; used diaper, pet waste, or human feces; any toxic substance such as chemical containers, batteries, or fluorescent light bulbs (mercury). Medium prevalence (10-50 pieces) of puncture hazards.	Presence of **more than one** of the items described in the marginal condition category, or high prevalence of any one item (e.g. greater than 50 puncture or laceration hazards).

Evidence that (10 to 50 pieces) trash is carried to the location from upstream, as evidenced by its location near high water line, siltation marks on the debris, or faded colors.	Trash appears to have accumulated in substantial quantities at the location based on delivery from upstream areas, and is in various states of degradation based on its persistence in the waterbody. Over 50 items of trash have been carried to the location from upstream.

MONITORING GROUP, STAFF: SD/KL SAMPLE ID: 4355
SITE DESCRIPTION (Station Name, Number, etc.): TIJ12

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
1. Level of Trash	On first glance, no trash visible. Little or no trash (<10 pieces) evident when streambed and stream banks are closely examined for litter and debris, for instance by looking under leaves.	On first glance, little or no trash visible. After close inspection small levels of trash (10-50 pieces) evident in stream bank and streambed.	Trash is evident in low to medium levels (51-100 pieces) on first glance. Stream, bank surfaces, and riparian zone contain litter and debris. Evidence of site being used by people: scattered cans, bottles, food wrappers, blankets, clothing.	Trash distracts the eye on first glance. Stream, bank surfaces, and immediate riparian zone contain substantial levels of litter and debris (>100 pieces). Evidence of site being used frequently by people: many cans, bottles, and food wrappers, blankets, clothing.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
2. Actual Number of Trash Items Found	0 to 10 trash items found based on a trash assessment of a 100-foot stream reach.	11 to 50 trash items found based on a trash assessment of a 100-foot stream reach.	51 to 100 trash items found based on a trash assessment of a 100-foot stream reach.	Over 100 trash items found based on a trash assessment of a 100-foot stream reach.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
3. Threat to Aquatic Life	Trash, if any, is mostly paper or wood products or other biodegradable materials. Note: A large amount of rapidly biodegradable material like food waste creates high oxygen demand, and should not be scored as optimal.	Little or no (<10 pieces) transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts. Presence of settleable, degradable, and non-toxic debris such as glass or metal.	Medium prevalence (10-50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts Larger deposits (< 50 pieces) of settleable debris such as glass or metal. Any evidence of clumps of deposited yard waste or leaf litter.	Large amount (>50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, balloons, Styrofoam, cigarette butts; toxic items such as batteries, lighters, or spray cans; large clumps of yard waste or dumped leaf litter; or large amount (>50 pieces) of settleable glass or metal.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
4. Threat to Human Health	Trash contains no evidence of bacteria or virus hazards such as medical waste, diapers, pet or human waste. No evidence of toxic substances such as chemical containers or batteries. No ponded water for mosquito production. No evidence of puncture and laceration hazards such as broken glass or metal debris.	No bacteria or virus hazards or sources of toxic substances, but small presence (<10 pieces) of puncture and laceration hazards such as broken glass and metal debris. No presence of ponded water in trash items such as tires or containers that could facilitate mosquito production.	Presence of **any one** of the following: hypodermic needles or other medical waste; used diaper, pet waste, or human feces; any toxic substance such as chemical containers, batteries, or fluorescent light bulbs (mercury). Medium prevalence (10-50 pieces) of puncture hazards.	Presence of **more than one** of the items described in the marginal condition category, or high prevalence of any one item (e.g. greater than 50 puncture or laceration hazards).
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0

Rapid Trash Assessment Worksheet

Surface Water Ambient Monitoring Program, San Francisco Bay Regional Water Quality Control Board

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
5. Illegal Dumping	D: No evidence of illegal dumping. No bags of trash, no yard waste, no household items placed at site to avoid proper disposal, no shopping carts.	D: Some evidence of illegal dumping. Limited vehicular access limits the amount of potential dumping, or material dumped is diffuse paper-based debris.	D: Presence of **one** of the following: furniture, appliances, shopping carts, bags of garbage or yard waste, coupled with vehicular access that facilitates in-and-out dumping of materials to avoid landfill costs.	D: Evidence of chronic dumping, with **more than one** of the following items: furniture, appliances, shopping carts, bags of garbage, or yard waste. Easy vehicular access for in-and-out dumping of materials to avoid landfill costs.
Illegal Littering	L: Any trash is incidental litter (< 5 pieces) or carried downstream from another location.	L: Some evidence of litter within creek and banks originating from adjacent land uses (<10 pieces).	L: Prevalent (10-50 pieces) in-stream or shoreline littering that appears to originate from adjacent land uses.	L: Large amount (>50 pieces) of litter within creek and on banks that appears to originate from adjacent land uses.
D-SCORE	10 9	8 7 6	5 4 3	2 1 0
L-SCORE	10 9	8 7 6	5 4 3	2 1 0
6. Accum-ulation of Trash	There does not appear to be a problem with trash accumulation from downstream transport. Trash, if any, appears to have been directly deposited at the stream location.	Some evidence (<10 pieces) that litter and debris have been transported from upstream areas to the location, based on evidence such as silt marks, faded colors or location near high water line.	Evidence that (10 to 50 pieces) trash is carried to the location from upstream, as evidenced by its location near high water line, siltation marks on the debris, or faded colors.	Trash appears to have accumulated in substantial quantities at the location based on delivery from upstream areas, and is in various states of degradation based on its persistence in the waterbody. Over 50 items of trash have been carried to the location from upstream.

Rapid Trash Assessment Worksheet

Surface Water Ambient Monitoring Program, San Francisco Bay Regional Water Quality Control Board

WATERSHED/STREAM: TIJ / Cottonwood Creek DATE/TIME: 2/10/12 / 10:40
MONITORING GROUP, STAFF: KL/SD SAMPLE ID: 4386
SITE DESCRIPTION (Station Name, Number, etc.): TIJ07

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
1. Level of Trash	On first glance, no trash visible. Little or no trash (<10 pieces) evident when streambed and stream banks are closely examined for litter and debris, for instance by looking under leaves.	On first glance, little or no trash visible. After close inspection small levels of trash (10-50 pieces) evident in stream bank and streambed.	Trash is evident in low to medium levels (51-100 pieces) on first glance. Stream, bank surfaces, and riparian zone contain litter and debris. Evidence of site being used by people: scattered cans, bottles, food wrappers, blankets, clothing.	Trash distracts the eye on first glance. Stream, bank surfaces, and immediate riparian zone contain substantial levels of litter and debris (>100 pieces). Evidence of site being used frequently by people: many cans, bottles, and food wrappers, blankets, clothing.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
2. Actual Number of Trash Items Found	0 to 10 trash items found based on a trash assessment of a 100-foot stream reach.	11 to 50 trash items found based on a trash assessment of a 100-foot stream reach.	51 to 100 trash items found based on a trash assessment of a 100-foot stream reach.	Over 100 trash items found based on a trash assessment of a 100-foot stream reach.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
3. Threat to Aquatic Life	Trash, if any, is mostly paper or wood products or other biodegradable materials. Note: A large amount of rapidly biodegradable material like food waste creates high oxygen demand, and should not be scored as optimal.	Little or no (<10 pieces) transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts. Presence of settleable, degradable, and non-toxic debris such as glass or metal.	Medium prevalence (10-50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts Larger deposits (< 50 pieces) of settleable debris such as glass or metal. Any evidence of clumps of deposited yard waste or leaf litter.	Large amount (>50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, balloons, Styrofoam, cigarette butts; toxic items such as batteries, lighters, or spray cans; large clumps of yard waste or dumped leaf litter; or large amount (>50 pieces) of settleable glass or metal.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
4. Threat to Human Health	Trash contains no evidence of bacteria or virus hazards such as medical waste, diapers, pet or human waste. No evidence of toxic substances such as chemical containers or batteries. No ponded water for mosquito production. No evidence of puncture and laceration hazards such as broken glass or metal debris.	No bacteria or virus hazards or sources of toxic substances, but small presence (<10 pieces) of puncture and laceration hazards such as broken glass and metal debris. No presence of ponded water in trash items such as tires or containers that could facilitate mosquito production.	Presence of **any one** of the following: hypodermic needles or other medical waste; used diaper, pet waste, or human feces; any toxic substance such as chemical containers, batteries, or fluorescent light bulbs (mercury). Medium prevalence (10-50 pieces) of puncture hazards.	Presence of **more than one** of the items described in the marginal condition category, or high prevalence of any one item (e.g. greater than 50 puncture or laceration hazards).
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0

TIJ07 2/10/12

Rapid Trash Assessment Worksheet

Surface Water Ambient Monitoring Program, San Francisco Bay Regional Water Quality Control Board

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
5. Illegal Dumping	D: No evidence of illegal dumping. No bags of trash, no yard waste, no household items placed at site to avoid proper disposal, no shopping carts.	D: Some evidence of illegal dumping. Limited vehicular access limits the amount of potential dumping, or material dumped is diffuse paper-based debris.	D: Presence of **one** of the following: furniture, appliances, shopping carts, bags of garbage or yard waste, coupled with vehicular access that facilitates in-and-out dumping of materials to avoid landfill costs.	D: Evidence of chronic dumping, with **more than one** of the following items: furniture, appliances, shopping carts, bags of garbage, or yard waste. Easy vehicular access for in-and-out dumping of materials to avoid landfill costs.
Illegal Littering	L: Any trash is incidental litter (< 5 pieces) or carried downstream from another location.	L: Some evidence of litter within creek and banks originating from adjacent land uses (<10 pieces).	L: Prevalent (10-50 pieces) in-stream or shoreline littering that appears to originate from adjacent land uses.	L: Large amount (>50 pieces) of litter within creek and on banks that appears to originate from adjacent land uses.
D-SCORE	10 9	8 7 6	5 4 3	2 1 0
L-SCORE	10 9	8 7 6	5 4 3	2 1 0
6. Accumulation of Trash	There does not appear to be a problem with trash accumulation from downstream transport. Trash, if any, appears to have been directly deposited at the stream location.	Some evidence (<10 pieces) that litter and debris have been transported from upstream areas to the location, based on evidence such as silt marks, faded colors or location near high water line.	Evidence that (10 to 50 pieces) trash is carried to the location from upstream, as evidenced by its location near high water line, siltation marks on the debris, or faded colors.	Trash appears to have accumulated in substantial quantities at the location based on delivery from upstream areas, and is in various states of degradation based on its persistence in the waterbody. Over 50 items of trash have been carried to the location from upstream.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0

Trash distracts the eye on first glance. Stream, bank surfaces, and immediate riparian zone contain substantial levels of litter and debris (>100 pieces). Evidence of site being used frequently by people: many cans, bottles, and food wrappers, blankets, clothing.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
2. Actual Number of Trash Items Found	0 to 10 trash items found based on a trash assessment of a 100-foot stream reach.	11 to 50 trash items found based on a trash assessment of a 100-foot stream reach.	51 to 100 trash items found based on a trash assessment of a 100-foot stream reach.	Over 100 trash items found based on a trash assessment of a 100-foot stream reach.
SCORE	20 19 18 17 16	SD 15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
3. Threat to Aquatic Life	Trash, if any, is mostly paper or wood products or other biodegradable materials. Note: A large amount of rapidly biodegradable material like food waste creates high oxygen demand, and should not be scored as optimal.	Little or no (<10 pieces) transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts. Presence of settleable, degradable, and non-toxic debris such as glass or metal.	Medium prevalence (10-50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts Larger deposits (< 50 pieces) of settleable debris such as glass or metal. Any evidence of clumps of deposited yard waste or leaf litter.	Large amount (>50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, balloons, Styrofoam, cigarette butts; toxic items such as batteries, lighters, or spray cans; large clumps of yard waste or dumped leaf litter; or large amount (>50 pieces) of settleable glass or metal.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
4. Threat to Human Health	Trash contains no evidence of bacteria or virus hazards such as medical waste, diapers, pet or human waste. No evidence of toxic substances such as chemical containers or batteries. No ponded water for mosquito production. No evidence of puncture and laceration hazards such as broken glass or metal debris.	No bacteria or virus hazards or sources of toxic substances, but small presence (<10 pieces) of puncture and laceration hazards such as broken glass and metal debris. No presence of ponded water in trash items such as tires or containers that could facilitate mosquito production.	Presence of **any one** of the following: hypodermic needles or other medical waste; used diaper, pet waste, or human feces; any toxic substance such as chemical containers, batteries, or fluorescent light bulbs (mercury). Medium prevalence (10-50 pieces) of puncture hazards.	Presence of **more than one** of the items described in the marginal condition category, or high prevalence of any one item (e.g. greater than 50 puncture or laceration hazards).
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0

Surface Water Ambient Monitoring Program, San Francisco Bay Regional Water Quality Control Board

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
5. Illegal Dumping	D: No evidence of illegal dumping. No bags of trash, no yard waste, no household items placed at site to avoid proper disposal, no shopping carts.	D: Some evidence of illegal dumping. Limited vehicular access limits the amount of potential dumping, or material dumped is diffuse paper-based debris.	D: Presence of **one** of the following: furniture, appliances, shopping carts, bags of garbage or yard waste, coupled with vehicular access that facilitates in-and-out dumping of materials to avoid landfill costs.	D: Evidence of chronic dumping, with **more than one** of the following items: furniture, appliances, shopping carts, bags of garbage, or yard waste. Easy vehicular access for in-and-out dumping of materials to avoid landfill costs.
Illegal Littering	L: Any trash is incidental litter (< 5 pieces) or carried downstream from another location.	L: Some evidence of litter within creek and banks originating from adjacent land uses (<10 pieces).	L: Prevalent (10-50 pieces) in-stream or shoreline littering that appears to originate from adjacent land uses.	L: Large amount (>50 pieces) of litter within creek and on banks that appears to originate from adjacent land uses.
D-SCORE	(10) 9	8 7 6	5 4 3	2 1 0
L-SCORE	10 9	8 (7) 6	5 4 3	2 1 0
6. Accumulation of Trash	There does not appear to be a problem with trash accumulation from downstream transport. Trash, if any, appears to have been directly deposited at the stream location.	Some evidence (<10 pieces) that litter and debris have been transported from upstream areas to the location, based on evidence such as silt marks, faded colors or location near high water line.	Evidence that (10 to 50 pieces) trash is carried to the location from upstream, as evidenced by its location near high water line, siltation marks on the debris, or faded colors.	Trash appears to have accumulated in substantial quantities at the location based on delivery from upstream areas, and is in various states of degradation based on its persistence in the waterbody. Over 50 items of trash have been carried to the location from upstream.
SCORE	20 19 18 17 16	15 14 13 12 11	(10) 9 8 7 6	5 4 3 2 1 0

Total Score 86

Lower: Center of bridge abutment (angle point)

SITE DEFINITION:

UPPER/LOWER BOUNDARIES OF REACH: Upper: Smaller bridge abutment

HIGH WATER LINE: Base of bridge abutment ≈ 100' upstream.

UPPER EXTENT OF BANKS OR SHORE: Halfway up bank next to road.

NOTES: Concrete slabs from bridge were not considered illegally dumped.

Large amount (>50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, balloons, Styrofoam, cigarette butts; toxic items such as batteries, lighters, or spray cans; large clumps of yard waste or dumped leaf litter; or large amount (>50 pieces) of settleable glass or metal.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
4. Threat to Human Health	Trash contains no evidence of bacteria or virus hazards such as medical waste, diapers, pet or human waste. No evidence of toxic substances such as chemical containers or batteries. No ponded water for mosquito production. No evidence of puncture and laceration hazards such as broken glass or metal debris.	No bacteria or virus hazards or sources of toxic substances, but small presence (<10 pieces) of puncture and laceration hazards such as broken glass and metal debris. No presence of ponded water in trash items such as tires or containers that could facilitate mosquito production.	Presence of **any one** of the following: hypodermic needles or other medical waste; used diaper, pet waste, or human feces; any toxic substance such as chemical containers, batteries, or fluorescent light bulbs (mercury). Medium prevalence (10-50 pieces) of puncture hazards.	Presence of **more than one** of the items described in the marginal condition category, or high prevalence of any one item (e.g. greater than 50 puncture or laceration hazards).
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0

Rapid Trash Assessment Worksheet

Surface Water Ambient Monitoring Program, San Francisco Bay Regional Water Quality Control Board

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
5. Illegal Dumping	D: No evidence of illegal dumping. No bags of trash, no yard waste, no household items placed at site to avoid proper disposal, no shopping carts.	D: Some evidence of illegal dumping. Limited vehicular access limits the amount of potential dumping, or material dumped is diffuse paper-based debris.	D: Presence of **one** of the following: furniture, appliances, shopping carts, bags of garbage or yard waste, coupled with vehicular access that facilitates in-and-out dumping of materials to avoid landfill costs.	D: Evidence of chronic dumping, with **more than one** of the following items: furniture, appliances, shopping carts, bags of garbage, or yard waste. Easy vehicular access for in-and-out dumping of materials to avoid landfill costs.
Illegal Littering	L: Any trash is incidental litter (< 5 pieces) or carried downstream from another location.	L: Some evidence of litter within creek and banks originating from adjacent land uses (<10 pieces).	L: Prevalent (10-50 pieces) in-stream or shoreline littering that appears to originate from adjacent land uses.	L: Large amount (>50 pieces) of litter within creek and on banks that appears to originate from adjacent land uses.
D-SCORE	10 9	8 7 6	5 4 3	2 1 0
L-SCORE	10 9	8 7 6	5 4 3	2 1 0
6. Accumulation of Trash	There does not appear to be a problem with trash accumulation from downstream transport. Trash, if any, appears to have been directly deposited at the stream location.	Some evidence (<10 pieces) that litter and debris have been transported from upstream areas to the location, based on evidence such as silt marks, faded colors or location near high water line.	Evidence that (10 to 50 pieces) trash is carried to the location from upstream, as evidenced by its location near high water line, siltation marks on the debris, or faded colors.	Trash appears to have accumulated in substantial quantities at the location based on delivery from upstream areas, and is in various states of degradation based on its persistence in the waterbody. Over 50 items of trash have been carried to the location from upstream.

TITLE: QUALCOMM STADIUM DROP OFF COMMUNITY CLEANUP AND RECYCLING EVENT SPONSORSHIP

ID #: TJ-037

ACTIVITY DESCRIPTION

The City of San Diego Environmental Services Department (ESD) conducted a drop off clean up event in March. The event was open to all City residents and targeted items like appliances, metals, junk furniture, mattresses and tires. The Qualcomm Stadium parking lot was the site for the drop off and ESD staff conducted both events. This event was selected based upon citizen requests, pledges of community involvement and previous citizen participation levels.

A total of 112,000 pounds were collected of which 44,000 pounds were recycled. Some of the items collected were, refrigerators, microwaves, stoves, window air conditioners, clothes washers and dryers, dishwashers and tires.

TMDL APPLICABILITY

N/A

TIME SCHEDULE FOR IMPLEMENTATION

This event took place in March and was in the planning stages for approximately 2-3 months. Scheduling and coordinating available dates at Qualcomm stadium, writing traffic control patterns if needed, reserving equipment for use and scheduling drivers, creating a site map of the staging area and traffic flow pattern for ease of use.

LEAD WATERSHED COPERMITTEE

- City of San Diego

OTHER PARTICIPATING COPERMITTEES

- Not Applicable

OTHER PARTICIPATING ENTITIES

- None

HIGH PRIORITY WATER QUALITY PROBLEM(S) ADDRESSED

- Bacteria/Pathogens
- Trash

CONSISTENCY WITH THE COLLECTIVE WATERSHED STRATEGY

Both the City's *Strategic Plan for Watershed Activity Implementation* and the Collective Watershed Strategy for the Tijuana River WMA identify trash and bacteria as high priority water quality problems throughout the WMA, and recommend implementing load reduction/source abatement activities to address it. Sponsorship of these Cleanup events will result in load reduction of trash and debris directly and of bacteria indirectly.

EFFECTIVENESS MEASUREMENTS

Management Questions

1) What is the load reduction associated with sponsorship?
2) What is the efficiency of the sponsored cleanup? ($/lb collected)

Targeted Measurable Outcome(s)

1) Load reduction due to reduction of trash (any amount) due to trash cleanup sponsorship

Assessment Method(s)

1) Quantification (e.g., pounds of trash collected)

Data Recorded

- Pounds of trash removed (Outcome Level 4): 68,000 lbs
- Pounds of trash recycled (Outcome Level 4): 44,000 lbs
- Total pounds of trash removed and recycled (Outcome Level 4): 112,000 lbs
- Amount of money spent on cleanups for all six watersheds (Outcome Level 1): $2,200
- Total money spent on the cleanup for the Tijuana River watershed (Outcome Level 1): $367
- Efficiency (Total Cost/Total Pounds Removed and Recycled): $0.03/lb

Expected Benefits

The goal of this assessment is to determine the effectiveness and efficiency of free drop off clean up and recycling events. In sponsoring these clean up events, the City is providing a convenient drop off location for the free drop off/disposal of furniture, appliances and tires. These community cleanup events are also intended to deter residents from illegally dumping unwanted items in street and alley rights-of-way, canyons, creeks and riverbeds as well as other locations throughout the City. They also replace a house by house "bulky item" pick up.

Analysis Results

ESD staff collected a total of 112,000 lbs of metals, appliances, junk furniture and mattresses. Disposed 68,000 lbs and recycled 44,000 lbs. The sponsorship from the City of San Diego Transportation and Storm Water Department, Storm Water Division for this event was $2,200. The efficiency was calculated by dividing the sponsorship cost for the Tijuana River WMA by the total pounds of trash removed and recycled.

Conclusions

This activity fulfills a watershed water quality activity for FY2012 as the effectiveness assessment demonstrates this activity resulted in a measurable pollutant load reduction (Outcome Level 4) of 112,000 pounds during the reporting period.

TITLE: TIJUANA RIVER RECOVERY TEAM – RECOVERY STRATEGY DOCUMENT

ID #: TJ-038

ACTIVITY DESCRIPTION

On September 23, 2009, the City of San Diego received a $700,000 Grant from the State Water Resources Control Board (SWRCB), Clean up and Abatement Fund to develop a viable plan of addressing the trash and sediment in the Tijuana River Valley. Included in the Grant Scope of Work (SOW) was a task to analyze alternatives addressing trash and sediment in the lower Tijuana River Watershed (Tijuana River Valley) and develop a "project implementation matrix" through engagement of the stakeholders on the Tijuana River Recovery Team (TRVRT) with support from URS consultants. The TRVRT Steering committee decided that the document would not be a new plan for the Tijuana River Valley; rather it would rely on plans and studies previously adopted by the City, County, State and other regional authorities. The document would define a strategy based on the goals and objectives within the previously adopted plans to affect a "recovery" of the Tijuana River Valley.

The first steps in the process were the consensus agreement amongst the participating agencies and stakeholders on the definition the "recovery" end state. Next a number of key high-level "outline projects" were defined to achieve the "recovery" states and which referred to previously adopted goals and objectives to ensure consistency. Lastly, specific project types were defined along with an implementation schedule, funding requirements, and anticipated outcomes. The intent of this approach is to allow the Recovery Strategy and the Vision of the Tijuana River Valley to be used or referred to by several varied agencies and non-governmental organizations in their project planning and funding efforts within the context of their missions and without conflict to any agency's mandates and limitations. This approach would create a document flexible enough to be referenced by each agency in their specific project plans, budget requests, and long range planning efforts, yet remain general enough to not require adoption, environmental permit review, or obligate an agency to perform a specific project or initiative, which may be inconsistent with its goals or mission.

Efforts on the document began in January 2011 with a number of scoping visioning workshops, focused on identifying and documenting activities, programs and gathering other related data for maps and exhibits. Drafting of the document content began in earnest in summer 2011. After a number of drafts the Draft Final Recovery Strategy was prepared in December 2011. The Final Document was prepared in March 2012 and distributed to all of the participating agencies, stakeholders and a number of interested parties and presented to a number of Agency Groups in Mexico and the United States including the International Boundary Water Commission (IBWC), Citizens Forum and the Tijuana River National Estuarine Research Reserve Advisory Council.

TMDL APPLICABILITY

- Not applicable

TIME SCHEDULE FOR IMPLEMENTATION

It is anticipated that this work will resume in FY 2014 under the City's Master Storm Water Maintenance Program, which was recently approved.

LEAD WATERSHED COPERMITTEE

- City of San Diego

OTHER PARTICIPATING COPERMITTEES

- County of San Diego
- City of Imperial Beach

OTHER PARTICIPATING ENTITIES

- California Department of Fish and Game
- California State Parks
- US EPA
- IBWC
- San Diego Water Authority

HIGH PRIORITY WATER QUALITY PROBLEM(S) ADDRESSED

- Sediment
- Trash

CONSISTENCY WITH THE COLLECTIVE WATERSHED STRATEGY

Both the City's *Strategic Plan for Watershed Activity Implementation* and the Collective Watershed Strategy for the Tijuana River Watershed Management Area (WMA) identify sediment and trash as high priority water quality problems and recommends implementing load reduction/source abatement activities to address them. This activity results in a direct load reduction of these pollutants.

EFFECTIVENESS MEASUREMENTS

Management Questions

- None

Targeted Measurable Outcome(s)

- None

Assessment Method(s)

- None

Data Recorded

- None

Expected Benefits

It is anticipated that this activity will lead to projects and findings which will result in a reduction of sediment and trash loads in the Tijuana River. This task is completed and the Strategy is currently being implemented, specifically with coordination between State and Federal Agencies and Mexican counterpart agencies. Assessment of the Recovery Strategy document will involve tracking individual activities that will be implemented as a result of the document.

Table 1.5 – Legal Restrictions on the Use of Program Funding 12

FISCAL ANALYSIS COMPONENT

1.1. Introduction

This section presents an estimated annual budget for the County's urban runoff management programs for FY 2013-14.

1.2. Fiscal Analysis Methods

This section continues to utilize the methodologies and standards established in *Fiscal Analysis Method* submitted by the Copermittees in January 2009.

1.3. Fiscal Analysis Results

As shown the County estimated its total FY 2013-14 expenditures at $31,006,556. This fiscal analysis addresses each of the County's Urban Runoff Management Program elements (jurisdictional, watershed, and regional activities) for the current reporting period (FY 2013-14). Expenditures are described by department and major program area. They represent an estimate of the expenditures that the County incurred in meeting its compliance obligations for FY 2013-14. They should not be interpreted as either budgeted or actual expenditures. Because stormwater program expenditures are distributed throughout a considerable number of County programs, a single consolidated "budget" does not exist for the program as a whole. As such, these figures should be considered best estimates of stormwater-related expenditures.

1.3.1. Expenditures

1.3.1.1. Jurisdictional

Table 1.1 presents the County's estimated jurisdictional expenditures for FY 2013-14.

Table 1.1 – Estimated Jurisdictional Expenditures for FY 2013-14

Jurisdictional Worksheet Component			Explanation/Notes
1	**ADMINISTRATION**	**$4,167,099**	These costs correspond to the DPW WPP development, administrative oversight, and assessment of the County's stormwater programs. The WPP is responsible for the development of new and augmented County stormwater programs, regulatory reporting, and program assessment. Some administrative costs are associated with other specific functions shown below, but are included here because they could not be separated out.
2	**DEVELOPMENT PLANNING**	**$1,729,309**	
A	**Land Use Planning**	$0	Expenditures not reported for FY 2013-14.
B	**Environmental Review**	$0	Expenditures not reported for FY 2013-14.
C	**Development Project Approval and Verification**	**$1,729,309**	
C1	**Public Projects (CIP)**	$1,440,733	
	Project Planning and Engineering	$1,084,483	Costs include: preparing and reviewing plans and specifications for stormwater

Table 1.1 – Estimated Jurisdictional Expenditures for FY 2013-14

Jurisdictional Worksheet Component			Explanation/Notes
	Compliance Inspection and Enforcement	$43,500	BMPs, and SWPPP/WPCP review. These costs apply to DPW, DPR, and DGS.
	BMP Implementation	$312,750	
C2	**Private Projects**	$288,576	
	Permitting and Licensing	$288,756	This cost covers DPW and PDS plan reviews at permitted sites. Total costs are estimated as fixed percentages of annual plan-checking fees.
3	**CONSTRUCTION**	**$3,000,930**	
A	**Public Projects (CIP)**	$1,660.056	Costs include: BMP compliance inspections during construction, and implementation of construction phase BMPs. These costs apply to DPW, DPR, and DGS.
	Compliance Inspection and Enforcement	$1,133,424	
	BMP Implementation	$526,632	
B	**Private Projects** **Combined totals for DPW PDCI and PDS Building**	$1,340,874	
	Compliance Inspection and Enforcement	$1,340,874	This cost primarily covers DPW and PDS construction inspections at permitted sites. Total costs are estimated as fixed percentages of inspection program fees.
4	**MUNICIPAL**	**$14,763,531**	
A	**Administration**	$182,554	Expenditures associated with the administrative oversight of the stormwater programs, regulatory reporting, and program assessment of municipal facilities by the DPW - Watershed Protection Program.

Table 1.1 – Estimated Jurisdictional Expenditures for FY 2013-14

Jurisdictional Worksheet Component			Explanation/Notes
B	**Streets, Roads, and Highways Element**	$2,190,380	
	Administration	$288,680	Founded road operations activities include: culvert inspections and cleaning; increased culvert waste disposal costs, street sweeping, installation and maintenance of BMPs and road structures, and the placement of additional controls. 10% of the Maintenance and Inspections and BMP Implementation is reported as Administration cost.
	Maintenance Inspections	$1,835,741	
	BMP Implementation	$71,959	
	Other	$0	
C	**MS4 Element**	$8,958,000	
	Administration	$8,600,000	The combined costs shown here apply across (1) DPW Flood Control -- conversion of existing concrete lined channels to natural bottom channels, updating flood control master plans, increased maintenance of flood control systems, and construction and maintenance of regional treatment BMPs; and (2) DPW Flood Control MS4 Operation & Maintenance -- maintenance on flood control facilities throughout the unincorporated areas of the County, exclusive of facilities within road rights-of-way (included in 4.B above).
	Maintenance Inspections	$40,000	
	BMP Implementation	$318,000	
	Other	$0	
D	**Solid Waste Facilities Element**	$425,000	
	Administration	$100,000	Costs include Regional Board stormwater permit fees, consultant costs associated with stormwater upgrade and repair projects, and office staff time.
	Maintenance Inspections	$50,000	Costs include staff time to perform site inspections.
	BMP Implementation	$140,000	Costs include stormwater consultant site inspections, sampling/testing and BMP materials.
	Other (construction)	$135,000	Drainage improvement projects and BMP site maintenance projects.

Table 1.1 – Estimated Jurisdictional Expenditures for FY 2013-14

	Jurisdictional Worksheet Component		Explanation/Notes
E	**Wastewater Facilities Element**	$284,000	
	Administration	$8,000	This includes costs associated with JURMP report, the sanitary sewer system and facilities including: pump stations, sewage treatment plants and Spring Valley Operations facility. Also includes the cost of BMP design, acquisition, maintenance and monitoring, for wastewater Capital Improvement Projects, and Major maintenance projects, and at various wastewater facilities.
	Maintenance Inspections	$226,000	
	BMP Implementation	$50,000	
	Other	$0	
F	**Road Stations Element**	$893,074	
	Administration	$81,188	This includes DPW road station operations related to Permit compliance. The Administration cost is determined as 10% of the total costs of maintenance and Inspections and BMP Implementation as reported by the DPW Roads Divisions.
	Maintenance Inspections	$776,129	
	BMP Implementation	$35,376	
	Other	$0	
G	**Fleet Maintenance Element**	$119,937	
	Administration	$51,000	This includes costs associated with operation of the County's fleet maintenance and fueling facilities.
	Maintenance Inspections	$62,000	
	BMP Implementation	$6,937	
	Other	$0	
H	**Municipal Airfields Element**	$166,269	These costs involve site inspections, annual reporting, and maintenance of BMPs at airports, including oversight of tenant operations. The BMP implementation item includes Palomar asphalt cap repairs.
	Administration	$5,000	
	Maintenance Inspections	$80,000	

Table 1.1 – Estimated Jurisdictional Expenditures for FY 2013-14

	Jurisdictional Worksheet Component		Explanation/Notes
	Compliance Inspection and Enforcement	$20,000	
	BMP Implementation	$81,269	
	Other (sampling and analysis)	$0	
I	**Parks & Recreational Facilities Element**	$1,188,781	
	Administration	$117,828	This includes: coordinating all training requirements, preparing and reviewing reports, and overseeing the overall implementation of the stormwater program for DPR.
	BMP Implementation	$974,212	This includes costs associated with implementation of BMPs at County parks.
	Compliance Inspection and Enforcement	$96,742	Costs are for DPR enforcement of stormwater requirements at County parks.
	Other	$0	
J	**Office Buildings & Other Municipal Facilities Element**	$237,210	
	Administration	$0	DGS conducts a variety of storm water activities including: inspections and clean-up of County-owned, occupied, and leased facilities and vacant lands; maintenance and signage of storm drain inlet inserts and trash dumpsters; placement of inlet filters; maintenance of coverage and containment improvements for on-site supplies and materials; parking lot sweeping and controlled parking lot power washing; and application of erosion and sediment control measures. These costs are exclusive of fleet maintenance and fueling operations.
	Maintenance Inspections	$136,685	
	BMP Implementation	$100,525	
	Other	$0	

Table 1.1 – Estimated Jurisdictional Expenditures for FY 2013-14

	Jurisdictional Worksheet Component		Explanation/Notes
	Management of Pesticides, Herbicides, & Fertilizers	$118,326	
	Administration	$118,326	Integrated Pest Control Program within the Department of Agriculture Weights and Measures performs eradication and control of invasive weeds. This program also provides weed control on roadsides, airports, flood control channels, sewage treatment plants and inactive landfills. It also provides structural pest control to facilities owned and operated by the county.
	Maintenance Inspections		
	BMP Implementation		
	Other		
5	**INDUSTRIAL and COMMERCIAL**	**$1,337,886**	
	Administration	$227,880	DPW and AWM conduct inspections of a variety of businesses in the unincorporated County, provide regulatory oversight of mobile businesses, and conduct follow-up and enforcement of stormwater violations.
	Compliance Inspection and Enforcement	$835,947	
	Educational Outreach	$274,059	
	Other expenditures	$0	
6	**RESIDENTIAL**	**$921,191**	
	Compliance Inspection and Enforcement	$462,620	DPW conducts complaint investigations for residential sources in the unincorporated County, and conduct follow-up and enforcement of stormwater violations. DPW also operates a regional hotline.
	Educational Outreach	$458,571	Several County departments coordinate and provide outreach to the residential sector and schoolchildren in support of Permit Section D.5 requirements. Costs reported here correspond to DPW only. Funded activities include developing pollution prevention content and providing direct outreach to various target audiences within the general residential and schoolchildren target audiences.

Table 1.1 – Estimated Jurisdictional Expenditures for FY 2013-14

Jurisdictional Worksheet Component			Explanation/Notes
7	**IDDE**	**$243,716**	
		$243,716	DPW conducts monitoring programs, assesses scientific data, and provides technical and scientific support to other County program staff. They also provide support for all technical and scientific aspects of URMP development and implementation. These costs are exclusive of the regional monitoring program which is addressed separately under regional costs.
8	**EDUCATION**	**$0**	Education costs are included in other sections as applicable.
9	**PUBLIC PARTICIPATION**	**$0**	Public participation costs are included in other sections as applicable.
10	**SPECIAL INVESTIGATIONS**	**$0**	Expenditures not reported for FY 2013-14.
11	**NON-EMERGENCY FIREFIGHTING**	**$0**	Expenditures not reported for FY 2013-14.

$26,163,662

1.3.1.2 Watershed

1.3.2. Funding Sources

Table 1.5 shows the major sources of funding for the County's urban runoff management programs in FY 2013-14, and describes the legal restrictions applicable to the use of each.

Table 1.5 – Legal Restrictions on the Use of Program Funding

Funding Source	Legal Restrictions
General Fund	There are no restrictions on the use of general fund for County water quality programs and activities except that they must be used only for the purposes for which they are budgeted and allocated by the County Board of Supervisors.
Flood Control District Fees	Revenue generated from these fees must be expended for activities related to flood and storm management.
Developer Deposits / Permit Fees	Deposits / fees may be used only to fund activities related to the work for which the permits are issued.
Gas Tax	Gas Tax is collected by the state and allocated to local government for transportation-related work including maintenance of existing transportation systems and construction of new transportation facilities. These funds may not be used for other purposes.
Sanitary District Fees	Sanitary District Fees are used for work related to the maintenance of sewer lines, pump stations, force mains, and several treatment plants that serve the unincorporated areas. They may be used only for such maintenance-related purposes within the respective sewer district for which they are collected.
Other Funding Sources	Other funding sources collectively account for a relatively small portion of ongoing expenditures. However, all funding for the County's stormwater compliance programs is expended within applicable legal restrictions and limitations.

1.4. Conclusions and Recommendations

The figures presented here are an estimate of the expenditures that the County incurred to meet its compliance obligations for FY 2013-14. For the reasons explained above, they should be considered only best estimates of stormwater-related expenditures.

FISCAL ANALYSIS COMPONENT

1.1. Introduction

This section presents an estimated annual budget for the County's runoff management programs for FY 2014-15.

1.2. Fiscal Analysis Methods

This section continues to utilize the methodologies and standards established in *Fiscal Analysis Method* submitted by the Copermittees in January 2009.

1.3. Fiscal Analysis Results

As shown the County estimated its total FY 2014-15 expenditures at $28,867,398. This fiscal analysis addresses each of the County's Runoff Management Program elements (jurisdictional, watershed, and regional activities) for the current reporting period (FY 2014-15). Expenditures are described by department and major program area. They represent an estimate of the expenditures that the County incurred in meeting its compliance obligations for FY 2014-15. They should not be interpreted as either budgeted or actual expenditures. Because stormwater program expenditures are distributed throughout a considerable number of County programs, a single consolidated "budget" does not exist for the program as a whole. As such, these figures should be considered best estimates of stormwater-related expenditures.

1.3.1 Expenditures

1.3.1.1. Jurisdictional

Table 1.1 presents the County's estimated jurisdictional expenditures for FY 2014-15.

Table 1.1 – Estimated Jurisdictional Expenditures for FY 2014-15

Jurisdictional Worksheet Component			Explanation/Notes
1	**ADMINISTRATION**	**$5,399,660**	These costs correspond to the DPW WPP development, administrative oversight, and assessment of the County's stormwater programs. The WPP is responsible for the development of new and augmented County stormwater programs, regulatory reporting, and program assessment. Some administrative costs are associated with other specific functions shown below, but are included here because they could not be separated out.
2	**DEVELOPMENT PLANNING**	**$1,433,347**	
A	**Land Use Planning**	$0	Expenditures not reported for FY 2014-15; included in other elements.
B	**Environmental Review**	$0	Expenditures not reported for FY 2014-15; included in other elements.
C	**Development Project Approval and Verification**	**$1,433,347**	
C1	**Public Projects (CIP)**	$1,165,341	
	Project Planning and Engineering	$1,115,591	Costs include: preparing and reviewing plans and specifications for stormwater

Table 1.1 – Estimated Jurisdictional Expenditures for FY 2014-15

	Jurisdictional Worksheet Component		Explanation/Notes
	Compliance Inspection and Enforcement	$0	BMPs, and SWPPP/WPCP review. These costs apply to DPW, DPR, and DGS.
	BMP Implementation	$49,750	
C2	**Private Projects**	$268,006	
	Permitting and Licensing	$268,006	This cost covers DPW and PDS plan reviews at permitted sites. Total costs are estimated as fixed percentages of annual plan-checking fees.
3	**CONSTRUCTION**	**$5,032,519**	
A	**Public Projects (CIP)**	$3,405,039	Costs include: BMP compliance inspections during construction, and implementation of construction phase BMPs. These costs apply to DPW, DPR, and DGS.
	Compliance Inspection and Enforcement	$1,944,310	
	BMP Implementation	$1,460,729	
B	**Private Projects** **Combined totals for DPW PDCI and PDS Building**	$1,627,480	
	Compliance Inspection and Enforcement	$1,627,480	This cost primarily covers DPW and PDS construction inspections at permitted sites. Total costs are estimated as fixed percentages of inspection program fees.
4	**MUNICIPAL**	**$8,826,071**	
A	**Administration**	$217,538	Expenditures associated with the administrative oversight of the stormwater programs, regulatory reporting, and program assessment of municipal facilities by the DPW - Watershed Protection Program.

Table 1.1 – Estimated Jurisdictional Expenditures for FY 2014-15

Jurisdictional Worksheet Component			Explanation/Notes
B	**Streets, Roads, and Highways Element**	$2,299,899	
	Administration	$296,814	Founded road operations activities include: culvert inspections and cleaning; increased culvert waste disposal costs, street sweeping, installation and maintenance of BMPs and road structures, and the placement of additional controls. 10% of the Maintenance and Inspections and BMP Implementation is reported as Administration cost.
	Maintenance Inspections	$1,927,528	
	BMP Implementation	$75,557	
	Other	$0	
C	**MS4 Element**	$2,800,000	
	Administration	$1,500,000	The combined costs shown here apply across (1) DPW Flood Control -- conversion of existing concrete lined channels to natural bottom channels, updating flood control master plans, increased maintenance of flood control systems, and construction and maintenance of regional treatment BMPs; and (2) DPW Flood Control MS4 Operation & Maintenance -- maintenance on flood control facilities throughout the unincorporated areas of the County, exclusive of facilities within road rights-of-way (included in 4.B above). Other includes the cost of disposal of debris removed from MS4.
	Maintenance Inspections	$750,000	
	BMP Implementation	$500,000	
	Other	$50,000	
D	**Solid Waste Facilities Element**	$325,791	
	Administration	$45,643	Costs include Regional Board stormwater permit fees, consultant costs associated with stormwater upgrade and repair projects, and office staff time.
	Maintenance Inspections	$16,313	Costs include staff time to perform site inspections.
	BMP Implementation	$77,939	Costs include stormwater consultant site inspections, sampling/testing and BMP materials.
	Other (construction)	$185,896	Drainage improvement projects and BMP site maintenance projects.

Table 1.1 – Estimated Jurisdictional Expenditures for FY 2014-15

	Jurisdictional Worksheet Component		Explanation/Notes
E	**Wastewater Facilities Element**	$335,000	
	Administration	$10,000	This includes costs associated with JRMP report, the sanitary sewer system and facilities including: pump stations, sewage treatment plants and Spring Valley Operations facility. Also includes the cost of BMP design, acquisition, maintenance and monitoring, for wastewater Capital Improvement Projects, and Major maintenance projects, and at various wastewater facilities.
	Maintenance Inspections	$225,000	
	BMP Implementation	$100,000	
	Other	$0	
F	**Road Stations Element**	$984,613	
	Administration	$89,509	This includes DPW road station operations related to Permit compliance. The Administration cost is determined as 10% of the total costs of maintenance and Inspections and BMP Implementation as reported by the DPW Roads Divisions.
	Maintenance Inspections	$855,683	
	BMP Implementation	$39,421	
	Other	$0	
G	**Fleet Maintenance Element**	$119,937	
	Administration	$51,000	This includes costs associated with operation of the County's fleet maintenance and fueling facilities.
	Maintenance Inspections	$62,000	
	BMP Implementation	$6,937	
	Other	$0	
H	**Municipal Airfields Element**	$166,269	These costs involve site inspections, annual reporting, and maintenance of BMPs at airports, including oversight of tenant operations. The BMP implementation item includes Palomar asphalt cap repairs.
	Administration	$5,000	
	Maintenance Inspections	$80,000	

Table 1.1 – Estimated Jurisdictional Expenditures for FY 2014-15

	Jurisdictional Worksheet Component		Explanation/Notes
	Compliance Inspection and Enforcement	$0	
	BMP Implementation	$81,269	
	Other (sampling and analysis)	$0	
I	**Parks & Recreational Facilities Element**	$1,116,026	
	Administration	$117,828	This includes: coordinating all training requirements, preparing and reviewing reports, and overseeing the overall implementation of the stormwater program for DPR.
	BMP Implementation	$901,457	This includes costs associated with implementation of BMPs at County parks.
	Compliance Inspection and Enforcement	$96,742	Costs are for DPR enforcement of stormwater requirements at County parks.
	Other	$0	
J	**Office Buildings & Other Municipal Facilities Element**	$340,830	
	Administration	$0	DGS conducts a variety of storm water activities including: inspections and clean-up of County-owned, occupied, and leased facilities and vacant lands; maintenance and signage of storm drain inlet inserts and trash dumpsters; placement of inlet filters; maintenance of coverage and containment improvements for on-site supplies and materials; parking lot sweeping and controlled parking lot power washing; and application of erosion and sediment control measures. These costs are exclusive of fleet maintenance and fueling operations.
	Maintenance Inspections	$232,490	
	BMP Implementation	$108,340	
	Other	$0	

Table 1.1 – Estimated Jurisdictional Expenditures for FY 2014-15

	Jurisdictional Worksheet Component		Explanation/Notes
	Management of Pesticides, Herbicides, & Fertilizers	$120,168	
	Administration	$120,168	Integrated Pest Control Program within the Department of Agriculture, Weights and Measures (AWM) performs eradication and control of invasive weeds. This program also provides weed control on roadsides, airports, flood control channels, sewage treatment plants and inactive landfills. It also provides structural pest control to facilities owned and operated by the county.
	Maintenance Inspections		
	BMP Implementation		
	Other		
5	**INDUSTRIAL and COMMERCIAL**	**$1,296,798**	
	Administration	$243,631	DPW and AWM conduct inspections of a variety of businesses in the unincorporated County, provide regulatory oversight of mobile businesses, and conduct follow-up and enforcement of stormwater violations.
	Compliance Inspection and Enforcement	$813,816	
	Educational Outreach	$239,351	
	Other expenditures	$0	
6	**RESIDENTIAL**	**$1,191,881**	
	Compliance Inspection and Enforcement	$650,409	DPW conducts complaint investigations for residential sources in the unincorporated County, and conduct follow-up and enforcement of stormwater violations. DPW also operates a regional hotline.
	Educational Outreach	$541,472	Several County departments coordinate and provide outreach to the residential sector and schoolchildren in support of Permit Section D.5 requirements. Costs reported here correspond to DPW only. Funded activities include developing pollution prevention content and providing direct outreach to various target audiences within the general residential and schoolchildren target audiences.

Table 1.1 – Estimated Jurisdictional Expenditures for FY 2014-15

Jurisdictional Worksheet Component			Explanation/Notes
7	**IDDE**	**$304,205**	
		$304,205	DPW conducts monitoring programs, assesses scientific data, and provides technical and scientific support to other County program staff. They also provide support for all technical and scientific aspects of JRMP development and implementation. These costs are exclusive of the regional monitoring program which is addressed separately under regional costs.
8	**EDUCATION**	**$0**	Education costs are included in other sections as applicable.
9	**PUBLIC PARTICIPATION**	**$0**	Public participation costs are included in other sections as applicable.
10	**SPECIAL INVESTIGATIONS**	**$0**	Expenditures not reported for FY 2014-15.
11	**NON-EMERGENCY FIREFIGHTING**	**$0**	Expenditures not reported for FY 2014-15.

$23,484,481

1.3.1.2 Watershed

Table 1.2 presents the County's estimated watershed expenditures for FY 2014-15.

Table 1.2 – Estimated Watershed Expenditures for FY 2014-15

	Santa Margarita WMA	San Luis Rey WMA	Carlsbad WMA	San Dieguito WMA	Peñasquitos WMA	San Diego River WMA	San Diego Bay WMA	Tijuana WMA
Administration	$60,000	$60,000	$80,000	$11,000	$11,000	$80,000	$30,000	$58,000
Cost Share Contribution	$0	$0	$46,205	$146,006	$20,162	$0	$7,256	$55,208
Watershed Activities	$100,569	$200,533	$0	$0	$0	$308,495	$3,590	$0

Total Estimated County Costs	***$28,867,398***

1.3.2 Funding Source

Table 1.5 shows the major sources of funding for the County's urban runoff management programs in FY 2014-15, and describes the legal restrictions applicable to the use of each.

Table 1.5 – Legal Restrictions on the Use of Program Funding

Funding Source	Legal Restrictions
General Fund	There are no restrictions on the use of general fund for County water quality programs and activities except that they must be used only for the purposes for which they are budgeted and allocated by the County Board of Supervisors.
Flood Control District Fees	Revenue generated from these fees must be expended for activities related to flood and storm management.
Developer Deposits / Permit Fees	Deposits / fees may be used only to fund activities related to the work for which the permits are issued.
Gas Tax	Gas Tax is collected by the state and allocated to local government for transportation-related work including maintenance of existing transportation systems and construction of new transportation facilities. These funds may not be used for other purposes.
Sanitary District Fees	Sanitary District Fees are used for work related to the maintenance of sewer lines, pump stations, force mains, and several treatment plants that serve the unincorporated areas. They may be used only for such maintenance-related purposes within the respective sewer district for which they are collected.
Other Funding Sources	Other funding sources collectively account for a relatively small portion of ongoing expenditures. However, all funding for the County's stormwater compliance programs is expended within applicable legal restrictions and limitations.

1.4. Conclusions and Recommendations

The figures presented here are an estimate of the expenditures that the County incurred to meet its compliance obligations for FY 2014-15. For the reasons explained above, they should be considered only best estimates of stormwater-related expenditures.

National Pollutant Discharge Elimination System

San Diego Regional Stormwater Copermittees

MEMORANDUM OF UNDERSTANDING

December 3, 2001

This Memorandum of Understanding (MOU), entered into by the County of San Diego (herein called County), the San Diego Unified Port District (herein called Port), and the incorporated cities of San Diego, Carlsbad, Chula Vista, Coronado, Escondido, Imperial Beach, La Mesa, San Marcos, Del Mar, El Cajon, Encinitas, Lemon Grove, National City, Oceanside, Poway, Santee, Solana Beach, and Vista (herein called Cities), collectively called Copermittees, establishes the responsibilities of each party with respect to compliance with the National Pollutant Discharge Elimination System (NPDES) storm water permit regulations administered by the United States Environmental Protection Agency (U.S. EPA) under the authority granted by the Federal Water Pollution Control Act (Clean Water Act) 33 USCA 1251 et. seq. as amended.

RECITALS

WHEREAS, in 1987 Congress amended Section 402 of the Federal Water Pollution Control Act (33 USCA 1342p) to require the U.S. EPA to promulgate regulations for applications for permits for storm water discharges; and

WHEREAS, the U.S. EPA adopted final permit regulations on November 16, 1990; and

WHEREAS, these permit regulations require the control of pollutants from storm water discharges by requiring a NPDES permit which would allow the lawful discharge of storm waters into waters of the United States; and

WHEREAS, the County, the Port, and the Cities desire to implement an integrated storm water management program with the objective of improving surface water quality in the County of San Diego; and

WHEREAS, the California State Water Resources Control Board (CSWRCB) as designee of the U.S. EPA has delegated authority to the San Diego Regional Water Quality Control Board (SDRWQCB) for administration of the NPDES storm water permit within the boundaries of its region; and

WHEREAS, on February 21, 2001, the Regional Board issued a NPDES permit and Board Order No. 2001-01 (herein called Permit) governing waste discharge requirements for storm water and urban runoff from the County, the Port, and the Cities, naming these entities as Copermittees; and

WHEREAS, said permit and order require that the Copermittees cooperate in the implementation of a Storm Water Management Plan including the execution of a Memorandum of Understanding;
NOW, THEREFORE, the parties hereto do mutually agree as follows:

I PERMITTEE RESPONSIBILITIES

A. DESIGNATION AND RESPONSIBILITIES OF PRINCIPAL PERMITTEE

1. The County of San Diego ("County") is hereby designated Principal Permittee. As such, the County incurs each of the responsibilities described in Section I.A.2. below. The County also has the responsibilities of all Copermittees described in Section I.B. of this MOU.

2. As necessary to meet the requirements of the Permit, the Principal Permittee shall provide overall program coordination and support, including the following tasks and responsibilities:

   a. Establish, chair, and provide overall Permit coordination and leadership of the Regional Storm Water Management Committee (herein called Management Committee, see Section II).
   b. Submit to the SDRWQCB the formal agreement between the Copermittees that provides a management structure for meeting the requirements of the Permit.
   c. Submit to the SDRWQCB the standardized formats for all reports required by the Permit by February 21, 2002.
   d. Submit the unified Jurisdictional Urban Runoff Management Program (URMP) document, including the Model Standard Urban Stormwater Mitigation Plan (SUSMP), to the SDRWQCB by February 21, 2002.
   e. Provide personnel and resources to facilitate the development and implementation of Regional General Programs (as defined in Section I.B.2.a.i.).
   f. Execute, manage and administer contracts on behalf of the Copermittees as necessary to support the implementation of Regional General Programs. With consent of the Principal Permittee, this may also include Watershed or Other General Programs. The Principal Permittee shall not be obliged to enter into any contract, or continue with a contract, unless the Principal Permittee has received the funds each Copermittee is obliged to contribute to the cost of the contract, or has received adequate assurances that such funds will be received before payments under that contract become due. The Principal Permittee shall have sole discretion to determine whether assurances that required funds will be timely received are adequate.
   g. Collect and assemble the individual and joint program reports, plans, and submit them to the SDRWQCB as required in the Permit. The following individual Copermittee documents and reports shall be integrated into a single unified document and/or report:
      - Jurisdictional Urban Runoff Management Plans (URMPs)
      - Jurisdictional URMP Annual Reports
      - Watershed URMP Documents
      - Watershed URMP Annual Reports
      - Dry Weather Analytical Monitoring Reports
      - Receiving Waters Monitoring and Reporting Program Annual Proposals and Reports
   h. Provide the Management Committee with meeting agendas including topic input from the Copermittees.
   i. Record all Management Committee votes and provide meeting summaries.
   j. Maintain a current mailing list of interested parties.
   k. Coordinate public input process(es) for proposed regional management and implementation plans where applicable.

l. Provide a repository for the centralization of urban runoff data and information.

m. Conduct data management and analysis.

n. Maintain knowledge of and advise the Copermittees regarding current and proposed State and Federal policies, regulations, and other NPDES programs; assist the Copermittees in the development and presentation of positions on these issues before local, State, and Federal agencies.

o. Represent the Copermittees on the California Storm Water Quality Task Force. However, Copermittees do not waive their right to represent themselves individually as they deem appropriate.

p. Formally advise appropriate State and Federal agencies of termination or amendment of this MOU.

q. Formally advise Copermittees in advance of official votes to be taken by the Management Committee.

3. Responsibilities of the Principal Permittee may be amended by a vote of the Management Committee to include additional tasks or responsibilities necessary to meet the requirements of the Permit, or to provide additional water quality benefits as determined appropriate with consent of the Principal Permittee.

B. RESPONSIBILITIES OF ALL COPERMITTEES

1. INDIVIDUAL PROGRAM RESPONSIBILITIES

a. Individual Programs are urban runoff management activities and programs which are required of individual Copermittees as defined in Sections F, G, H, and I of the Permit (excluding the collaborative development of model Standard Urban Storm Water Mitigation Plans (SUSMPs) required in Section F.1.b.(2)).

b. Within their sole jurisdiction, each of the Copermittees shall incur each of the following Individual Program responsibilities:

i. Establish and maintain adequate legal authority to control pollutant discharges from its MS4 as required by Section D (Legal Authority) of Order No. 2001-01 and to ensure compliance with the provisions of Section F of the Permit.

ii. Provide data, information, and reports within the time frames agreed upon by the Management Committee, to the Principal Permittee as necessary for program development, assessment, and reporting purposes.

iii. Cooperate with the SDRWQCB in pursuing enforcement action as necessary to ensure compliance with their URMP.

iv. Enforce local laws, codes, and ordinances as necessary to ensure implementation of plans where it has statutory authority to pursue such enforcement actions.

v. Ensure adequate response to emergency situations such as accidental spills, leaks, and illicit discharges.

vi. Prepare and submit to Principal Permittee an individual jurisdictional URMP document.

vii. Prepare and submit to Principal Permittee individual jurisdictional URMP annual reports.

viii. Abide by the terms of this MOU where it does not conflict with any other statutory requirements.

2. GENERAL PROGRAM RESPONSIBILITIES

General Programs are urban runoff management activities and programs which are required of, or provide a general and collective benefit to, all Copermittees or groups of more than one, but less than all Copermittees. General Programs must be mandated by the Permit, or be necessary to implement activities mandated by the Permit, or otherwise be conducted with the consent of all Copermittees participating or cooperating in the particular activity or program.

a. The following definitions shall apply to General Programs.

i. Regional General Programs are activities and programs that apply to all Copermittees of the Permit.

ii. Watershed General Programs are activities and programs that apply to the Copermittees within any of the Watershed Protection Areas (WPAs) defined by the Permit.

iii. Other General Programs are activities and programs that apply to multiple Copermittees, but which do not apply to Regional or Watershed General Programs as described above.

II REGIONAL STORM WATER MANAGEMENT COMMITTEE

A. ESTABLISHMENT OF THE REGIONAL STORM WATER MANAGEMENT COMMITTEE

A Regional Storm Water Management Committee (Management Committee) is hereby established. The purpose of the Management Committee is to provide regional coordination of urban runoff management activities, to develop and implement Regional General Programs, and to develop a framework for consistency between Watershed or Other General Programs and Individual Programs. The development of urban runoff management activities at the regional, watershed, and individual program levels requires the input and participation of all Copermittees. The Management Committee will provide a forum for the representation of interests, and the development of consensus during the presentation, discussion, and evaluation of proposed activities and program elements.

B. MANAGEMENT COMMITTEE REPRESENTATION

1. The Management Committee shall be chaired by the Principal Permittee who shall record all votes in the meeting summaries.
2. Each of the Copermittees (18 cities, the County and the Port) shall be allocated one vote.
3. Each of the Copermittees shall have one representative as a member of the Management Committee.
4. A quorum of two-thirds rounded up to the next whole person of the Management Committee must be present for a vote to be held.
5. Except as noted elsewhere in this MOU, approval of all Management Committee recommendations shall require a two-thirds affirmative vote of the total number of Copermittees present. In all instances, a majority affirmative

vote of the total Management Committee rounded up to the next whole person shall be required.

6. Meetings of the Management Committee, including any closed sessions with legal counsel, shall be conducted in accordance with the "Brown Act" (Government Code Section 54950 et seq.) The individual Copermittees have differing opinions on whether the Brown Act legally should be interpreted as applying to members of the Management Committee. In executing this Agreement, the Copermittees do not waive their right to take the position that the Brown Act legally does not apply, but voluntarily agree to follow Brown Act procedures for Management Committee meetings. Except for official meetings of the Management Committee, nothing herein shall be interpreted to require meetings between staff members of the individual Copermittees (including designated representatives of the Copermittees) to be subject to the Brown Act, where the Brown Act would not otherwise apply. Each Copermittee is individually responsible for ensuring that it complies with the Brown Act.

C. RESPONSIBILITIES OF THE MANAGEMENT COMMITTEE

The Management Committee shall be responsible for the following:

1. Developing, implementing, and/or arranging for implementation of, Regional General Programs (see Section I.B.2.a.i.).
2. Addressing common issues, promoting consistency among Jurisdictional Urban Runoff Management Programs (Jurisdictional URMPs) and Watershed Urban Runoff Management Programs (Watershed URMPs), and planning and coordinating activities required under the Permit.
3. Jointly developing standardized format(s) for all reports required under the Permit (e.g., annual reports, monitoring reports, fiscal analysis reports, and program effectiveness reports).
4. Approving an annual Budget (see Section IV.A.).
5. Establishing by-laws for the conduct of all meetings.
6. Establishing subcommittees or workgroups to review specific issues and make recommendations.

III WATERSHED ACTIVITIES

For each of the nine watersheds listed in Table 4 of the Permit, each Copermittee shall collaborate with other Copermittees within its watershed and shall develop and implement a Watershed URMP as required by the Permit.

IV FISCAL RESPONSIBILITIES

A. GENERAL RESPONSIBILITIES

1. The Copermittees shall each pay a yearly assessment into a fund established for Program operations for their assigned portion of the Management Committee approved Budget (Budget). The proportionate share of the Budget that each Copermittee shall pay is defined in Section IV.B below.
2. Any individual Copermittee, or group of Copermittees, may enter into separate agreements with other Copermittees, including the Principal Permittee, for services necessary to fulfill Individual Program responsibilities as described in Section I.B.1. above.
3. Each Copermittee shall pay its share of expenses within 60 days of receipt of an invoice from the Principal Permittee. Funds collected and not expended in any fiscal year shall be credited to the Copermittees' share of the next fiscal year's costs in accordance with the Copermittees' defined participation rates.
4. No later than January 1st of each year, a Budget Subcommittee shall prepare and submit for consideration by the Management Committee an estimated budget of costs and expenses for Regional General Programs applicable to the ensuing fiscal year.
5. To ensure that Copermittee governing bodies have sufficient time to consider fiscal impacts, the Management Committee shall prepare a draft Budget by no later than January 31st of each year for those Regional General Programs to be instituted in the ensuing fiscal years. After consideration of comments and discussion, a final Budget will be prepared, approved, and distributed by no later than February 28th of each year. The Budget will be based on the fiscal year beginning July 1st and ending June 30th, and shall include a description of major tasks, schedules, and projected costs for Regional General Programs.
6. Unless amended by a vote of the Management Committee, annually budgeted shared costs for Regional General Programs and activities shall include the following elements. Copermittees shall be responsible for their proportionate share of the amount approved pursuant to this section for each of these elements:

    a. <u>Stormwater Permit Fees</u> ($10,000 per year unless amended by the SWRCB).
    b. <u>Receiving Waters Monitoring and Reporting Program</u>.
    c. <u>Regional Outreach and Education Program</u>. Activities not required for Permit compliance shall be considered Other General Programs rather than Regional General Programs.
    d. <u>Regional Stormwater Hotline</u>. The County agrees to continue operation of a Regional Stormwater Hotline as an in-kind contribution to the Copermittees' Regional Outreach and Education Program subject to the following conditions.

        i. The County's total staffing contribution, including its proportionate share, shall not exceed 1.0 full-time equivalent hotline operator.
        ii. The County's expenses will be limited to those costs necessary to facilitate the receipt of public inquiries and complaints, make referrals for followup and investigation to appropriate Copermittees or other agencies, and provide basic educational information.

iii. The cost of producing and/or distributing written or other materials in response to Hotline requests shall be the sole responsibility of the Copermittee to which those requests apply. With consent of the County, such materials may be provided under separate agreement.

iv. The County may discontinue providing this service at its own discretion, but in such case agrees to provide Copermittees sufficient notice to allow the establishment of other services as necessary to meet their Permit obligations. This period shall be at the discretion of the County, but shall include no less than 60 days written notice.

e. Contribution to the California Stormwater Quality Task Force.

f. Additional elements which have received unanimous consent of the Management Committee.

7. Following the end of each fiscal year, the Principal Permittee shall provide a detailed accounting of the costs and expenses. The Principal Permittee shall also provide the Management Committee quarterly Budget Balance and Expenditure Status Reports.
8. The Principal Permittee agrees to waive administrative or other costs necessary to fulfill the responsibilities described in Section I.A. above.
9. Each Copermittee shall timely submit a budget request, sufficient to fund the Copermittee's assigned share of the approved Management Committee Budget for the ensuing fiscal year, to that Copermittee's governing body for approval. The submission shall reference and provide information on the approved Management Committee Budget, and shall inform that Copermittee's governing body that if the requested funds are not provided the Copermittee will be excluded from further Management Committee participation and will be in violation of RWQCB Order No. 2001-01.
10. Subject to approval by the Copermittees participating in a particular shared General Program, individual Copermittees may provide in-kind rather than monetary contributions toward the cost of that activity.
11. Should a dispute arise among any of the parties regarding any matter related to this MOU, the parties agree to first meet and confer in good faith to attempt to resolve the dispute. If that fails to resolve the dispute, they will submit the matter to mediation. If mediation fails to resolve the dispute, they shall submit it to non-binding arbitration. If they cannot agree on a single arbitrator, they shall each select one arbitrator and the two arbitrators shall select a third arbitrator. The matter shall then be decided by a panel of the three arbitrators by a majority vote.

B. DIVISION OF GENERAL PROGRAM COSTS

The following shall apply to the development and administration of the annual Management Committee Budget described in IV.A. above. Only shared Regional General Program costs described in Section IV.A.6. above are required to be included as part of this Budget. However, for convenience and/or economy, groups of Copermittees may elect to include Watershed and/or Other General Programs within this overall Budget. The cost share basis between the participating Copermittees for Watershed and/or Other General Programs included in the budget may differ from the cost allocation formula described below. The waiver of administrative costs described in Section IV.A.8. shall apply to Watershed and Other General Programs only with consent of the Principal Permittee.

Prior to the allocation of shared costs, each proposed or approved budget element or sub-element shall be identified as either a Regional General Program, a Watershed General Program, or an Other General Program, and the Copermittees sharing that cost shall be identified. The cost of any particular budget element shall be subject to the approval of only the Copermittees to which it applies. For each, costs shall be divided among participating Copermittees. The costs of Regional General Programs shall be allocated according to the following formula:

1. Ten percent (10%) of the cost shall be divided equally among all Copermittees.
2. Forty-five percent (45%) of the cost shall be divided based on population. Population-based costs shall be divided among all Copermittees as follows:

    a. The percentage of Population Share Costs for which each Copermittee is responsible shall be calculated by dividing their total population by the combined total population of all participating Copermittees within the geographic area applicable to the shared program or activitity. These percentages shall be calculated using the "Household" population figures of the San Diego Association of Governments (SANDAG) "Population and Housing Estimates" for the year 2000 or as formally updated or amended by SANDAG.
    b. The County's population for Regional Programs shall be the entire population of the unincorporated County. The County acknowledges that this will be a greater total population than that which would otherwise be included within the geographic area described in Section IV.B.3.c. below.
    c. The Port's population shall be based on the most recent available estimate of the number of persons whose primary place of residence is aboard a vessel within San Diego Bay (e.g., marinas, moorings, etc.). These numbers shall be based on estimates provided by the Harbor Police.

3. Forty-five percent (45%) of the cost shall be based on urbanized land area to be divided among all participating Copermittees as follows.

    a. The percentage of land area costs for which each Copermittee is responsible shall be calculated by dividing their total urbanized land area by the combined total urbanized land area of all participating Copermittees within the geographic area applicable to the shared program or activitity.
    b. These totals shall be calculated using the most recently available San Diego Association of Governments (SANDAG) land use statistics.
    c. The total urbanized land area for the County shall include those urbanized lands in the unincorporated portion of the County that are west of the County Water Authority (CWA) service area boundary as it exists on the

date of this Agreement or as formally amended by the CWA, plus land areas east of this line but draining toward the ocean that are served by a public water supply authority on the date of this Agreement (i.e., parts of Julian, Descanso, and Jamul/Dulzura).

d. The total urbanized land area for the Port shall include those urbanized lands within Port District boundaries. These totals shall be subtracted from the urbanized land areas of each of the respective Port member cities (San Diego, Coronado, National City, Chula Vista, and Imperial Beach).

C. DIVISION OF INDIVIDUAL PROGRAM COSTS

During the life of this MOU, it may be necessary or desirable for Copermittees or groups of Copermittees to enter into agreements for services necessary to fulfill Individual Program responsibilities. Determination of costs for these services is solely the responsibility of participating Copermittees.

V LIFE OF AGREEMENT

A. TERM OF AGREEMENT

The term of this MOU commences on its execution by each and all of the duly authorized representatives in the County, the Port, and the Cities. The life of the MOU shall run with the life of the current Permit plus six months, unless the Copermittees agree to put a revised MOU in place sooner. For purposes of this paragraph, any permit renewal or replacement after January 2006 shall be considered a new permit; any earlier amendment of the Permit increasing the obligations of the Principal Copermittee may at the County's sole option, be declared to be a new permit; and the Management Committee shall determine whether any other earlier amendment to the Permit is of such significance as to effectively be a new Permit.

B. WITHDRAWAL OF COPERMITTEE

1. Participation in this MOU may be withdrawn by any Copermittee for any reason only after the Copermittee complies with all of the following conditions of withdrawal:

   a. The Copermittee shall notify all of the other Copermittees in writing 90 days prior to its intended date of withdrawal.

   b. The withdrawing Copermittee shall have its name deleted as a Copermittee to the Permit.

2. Any expenses associated with withdrawal, including but not limited to, filing and obtaining the withdrawing Copermittee's individual NPDES permit and the amendment of the Permit will be solely the responsibility of the withdrawing Copermittee.
3. The withdrawing Copermittee shall be responsible for their portion of any shared costs incurred according to the conditions of this MOU up to the time that each of the conditions in Section V.B.1. above has been met.
4. Any monies paid by withdrawing Copermittee in excess of the amount due under the terms of the MOU shall be refunded to the Copermittee at the time the withdrawal becomes final as set forth in Section V B.1.a. above.

5. The withdrawing Copermittee shall not be entitled to participate in the division of proceeds in any reserve fund account, if any, if, and when, the MOU is dissolved.

C. NON-COMPLIANCE WITH MOU REQUIREMENTS

Any participant to this MOU found to be in non-compliance with the conditions of this MOU shall be solely liable for any lawfully assessed penalties resulting from such non-compliance. Failure to comply with MOU conditions within specified or agreed upon timelines shall constitute non-compliance with the MOU.

D. AMENDMENTS TO THE MEMORANDUM OF UNDERSTANDING

This MOU may be amended only by consent of all Copermittees. No amendment shall be effective unless it is in writing and signed by the duly authorized representatives of the Copermittees.

E. GOVERNING LAW

This MOU shall be governed and construed in accordance with the laws of the State of California. If any provision or provisions shall be held to be invalid, illegal, or unenforceable, the validity, legality, and enforceability of the remaining provisions shall not in any way be affected or impaired thereby.

The headings used throughout this MOU are for convenience only and do not in any way limit or amplify the terms or provisions of the MOU.

F. CONSENT AND BREACH NOT WAIVER

No term or provision hereof shall be deemed waived and no breach excused, unless such waiver or consent shall be in writing and signed by the Copermittee to have waived or consented. Any consent by any Copermittee to, or waiver of, a breach by the other, whether expressed or implied, shall not constitute a consent to, waiver of, or excuse for any other different or subsequent breach.

G. INDEMNIFICATION

Each party to this MOU (1) shall have the sole responsibility to comply with the Permit, (2) shall pay all fines, penalties, and costs which may arise out of such party's non-compliance with the Permit, and (3) shall enter into agreements with neighboring copermittees as necessary to address cross-boundary pollution.

H. APPLICATION OF PRIOR AGREEMENTS

This MOU constitutes the entire Agreement between the parties with respect to the subject matter; all prior agreements, representations, statements, negotiations, and undertakings are superseded hereby.

National Pollutant Discharge Elimination System

San Diego Regional Stormwater Copermittees

MEMORANDUM OF UNDERSTANDING

November 16, 2007

This Memorandum of Understanding (MOU), entered into by the County of San Diego (County), the San Diego Unified Port District (Port), the San Diego County Regional Airport Authority (Airport), and the incorporated cities of San Diego, Carlsbad, Chula Vista, Coronado, Escondido, Imperial Beach, La Mesa, San Marcos, Del Mar, El Cajon, Encinitas, Lemon Grove, National City, Oceanside, Poway, Santee, Solana Beach, and Vista (Cities), collectively called Copermittees, establishes the shared program responsibilities of each party with respect to compliance with the National Pollutant Discharge Elimination System (NPDES) stormwater permit regulations administered by the United States Environmental Protection Agency (U.S. EPA) under the authority granted by the Federal Water Pollution Control Act (Clean Water Act) 33 USCA 1251 et seq. as amended.

RECITALS

WHEREAS, in 1987 Congress amended Section 402 of the Federal Water Pollution Control Act (33 USCA §1342p) to require the U.S. EPA to promulgate regulations for applications for permits for stormwater discharges; and

WHEREAS, the U.S. EPA adopted final permit regulations on November 16, 1990; and

WHEREAS, these permit regulations require the control of pollutants from stormwater discharges by requiring an NPDES permit, which would allow the lawful discharge of stormwaters into waters of the United States; and

WHEREAS, the County, the Port, the Airport, and the Cities desire to implement an integrated stormwater management program with the objective of improving surface water quality in the County of San Diego; and

WHEREAS, the California State Water Resources Control Board (CSWRCB) as designee of the U.S. EPA has delegated authority to the San Diego Regional Water Quality Control Board (Regional Board) for administration of the NPDES stormwater permit within the boundaries of its region; and

WHEREAS, on, January 24, 2007, the Regional Board issued an NPDES permit as Order No. R9-2007-0001 (Permit) governing waste discharge requirements for stormwater and urban runoff from the County, the Port, the Airport, and the Cities, naming these entities as Copermittees; and

WHEREAS, said Permit requires that the Copermittees cooperate in the implementation of various Urban Runoff Management Plans and execute a Memorandum of Understanding;
NOW, THEREFORE, the parties hereto do mutually agree as follows:

I. DEFINITIONS

Chair means presiding over and providing leadership and direction to a Working Body. This includes serving as a point of contact to external entities such as Regional Board staff, stakeholders, and industry groups, soliciting group input on and developing meeting content, facilitating meetings, and coordinating with the Secretary or Working Body Support staff to finalize work products for distribution to the Working Body. Chair responsibilities may also be divided between Co-Chairs.

Contract Administration means developing, soliciting, awarding, and managing contracts.

Direct Costs mean those costs directly related to the development of a work product, or to the performance of a particular function or service. Direct Costs may include the wages of Copermittee employees engaged in an activity and the cost of materials or supplies needed to support that activity. Depreciation, equipment, and office space are not considered Direct Costs.

Fiscal Year starts on July 1 and ends on June 30 of the following year.

General Programs are collaborative urban runoff management activities which are (1) mandated by or necessary to implement requirements of the Permit, (2) necessary to anticipate the requirements, or prepare for renewal, of the Permit, (3) required to comply with Regional Board Orders or other directives required of Copermittees as dischargers of urban runoff (e.g., 13267 Orders, Total Maximum Daily Loads, etc.), or (4) other urban runoff management activities conducted with the unanimous approval of Copermittees sharing the cost or responsibility.

In-kind Contribution means a non-monetary contribution that can be used to satisfy an equivalent monetary obligation. Examples of In-kind Contributions are equipment or services provided for use.

Other General Programs are activities that apply to a subset of more than one and less than all Copermittees. Other General Programs do not include the activities of the Planning Subcommittee or any Workgroup or Sub-workgroup of the Management Committee. Other General Programs also do not include Watershed URMP Sub-workgroups, but may apply to a subset of any Watershed URMP Sub-workgroup.

Participant means a Copermittee regularly attending meetings, participating in the development, review, and finalization of work products, and carrying out the responsibilities of the Working Body. Participants are a subset of Representatives. Participant implies a higher and more active level of involvement than general representation.

Regional General Programs are activities that apply to all Copermittees.

Representative means a Copermittee providing general representation to a Working Body. This includes serving as a Copermittee point of contact, and, as applicable, receiving, reviewing, and providing input on correspondence, meeting materials, and work products. Representatives are not required to attend meetings, but are expected to maintain a reasonable knowledge of, and involvement in, the activities of the Working Body. To the best of their ability each Copermittee Representative should have expertise and knowledge in the subject matter of each assigned Working Body.

Secretary means a person who takes responsibility for the records, correspondence, minutes or notes of meetings, and related affairs of a Working Body. This includes: maintaining group contact lists;

preparing and sending out meeting notifications and agendas; arranging for meeting rooms and equipment; taking, preparing, and finalizing meeting minutes or notes; and, coordinating with the Chair or Working Body Support staff to organize and distribute work products to the Working Body.

Simple Majority means at least one-half (50%) of applicable Copermittees, rounded up to the nearest integer, or plus one where the number of Copermittees is even. For the purposes of this MOU, a simple majority may never be less than three Copermittees.

Special Formula means any cost share formula that differs from the Default Formula in the selection or weighting of individual factors or in the methodology used to calculate one or more of them.

Three-fourths Majority means at least three-fourths (75%) of applicable Copermittees, rounded up to the nearest integer. For the purposes of this MOU, a Three-fourths Majority may never be less than three Copermittees.

Two-thirds Majority means at least two-thirds (67%) of applicable Copermittees, rounded up to the nearest integer. For the purposes of this MOU, a Two-thirds Majority may never be less than three Copermittees.

Urbanized Land Area means the total of all SANDAG land uses within the geographic area, subject to the cost share, excepting therefrom, the following coded land uses: 1403 Military Barracks; 4102 Military Airports; 6700 Military Use; 6701 Military Use; 6702 Military Training; 6703 Military Weapons; 7209 Casinos; 7603 Open Space Reserves, Preserves; 7609 Undevelopable Natural Areas; 9200 Water; 9201 Bays, Lagoons; 9202 Inland Water; and 9300 Indian Reservations.

Watershed Copermittee means any Copermittee that is a member of a Watershed Management Area as defined in Table 4 of the Permit.

Watershed General Programs are activities that apply to the Copermittees comprising any individual Watershed URMP Sub-workgroup corresponding to a Watershed Management Area (WMA) defined in Table 4 of the Permit.

Working Body means Committees, Subcommittees, Workgroups, Sub-workgroups, or any other group of Copermittees assembled to conduct work required by, for, or in furtherance of, compliance with the Permit (Figure A identifies the Working Bodies established in this MOU).

Working Body Support means those tasks not within the assigned responsibilities of the Chair, Co-chair, or Secretary, or equitably divided amongst the Participants of the Working Body. This includes researching, drafting, modifying, and finalizing work products such as work plans, budgets, and meeting materials, and any other tasks associated with the responsibilities of the Working Body.

II. RESPONSIBILITIES OF ALL COPERMITTEES

The following apply to General Programs.

A. Performance and Reimbursement of Tasks

1. Any individual Copermittee performing tasks necessary to fulfill budgeted General Program responsibilities for a Working Body in which they are a Participant is entitled to reimbursement of the costs incurred in accordance with section II.B.1.
2. Any Copermittee performing contract administration tasks to fulfill budgeted General Program responsibilities for a Working Body in which it is a Participant is entitled to reimbursement of contract management costs at a rate of 5% of the total contract cost or as shown by accounting records and as agreed on by the participating Copermittees.
3. Any Copermittee performing tasks other than contract administration, or serving as a Working Body Chair, Co-chair, or Secretary, is entitled to reimbursement of the Direct Costs of performing those services in accordance with section II.B.1.
4. A Copermittee shall not be obliged to conduct work, enter into any contract, continue with any work or contract, or incur any other cost on behalf of other Copermittees if each Copermittee has not contributed the funds that it is obliged to contribute toward the activity or program, or if the Copermittee has not received adequate assurances that such funds will be received before payments become due. The Copermittee shall have sole discretion to determine whether assurances that require funds will be timely received or adequate.
5. A member of a Working Body providing Working Body Support may terminate those obligations for convenience if another party has been selected to the satisfaction of the other members of the Working Body, agrees to perform the obligations, and the applicable work plan and budget have been modified in accordance with the provisions of this MOU.

B. Fiscal Responsibilities

1. Division of Shared General Program Costs

   a. Prior to the allocation of shared costs, each proposed or approved budget element or sub-element shall be identified as either a Regional General Program cost, a Watershed General Program cost, or an Other General Program cost, and the Copermittees sharing that cost shall be identified. The cost of any particular budget element shall be subject to the approval of only the Copermittees to which it applies. The associated costs shall be divided among participating Copermittees as described below.

      (1) <u>Default Formula</u>. Shared costs shall be divided according to a Default Formula of 45% Urbanized Land Area, 45% Population, and 10% Equal Division unless a Special Formula is approved by the Copermittees to which the cost applies.

         (a) Population costs shall be divided among the Copermittees as follows: Whenever any geographic portion of the Port or Airport jurisdiction(s), respectively, lies(s) within the geographic area to which the shared program or activity is applicable, the Port or Airport, respectively, will each pay a fixed 0.5% of total Population costs. The remaining percentage of the population costs shall be divided among Copermittees by dividing the total population of each Copermittee by the combined total Copermittee population within the geographic area applicable to the shared program or activity. These percentages shall be calculated using the most recently available population data available from the San Diego Association of Governments (SANDAG), unless more recent data are available from an equivalent source such as the U.S. Census Bureau, and are determined to be acceptable by the Copermittees sharing the cost.

(b) Urbanized Land Area costs shall be divided among Copermittees by dividing the total Urbanized Land Area of each Copermittee by the combined total Urbanized Land Area of all participating Copermittees within the geographic area applicable to the shared program or activity. Urbanized Land Area shares shall be calculated using the most recently available San Diego Association of Governments (SANDAG) land use statistics. The Urbanized Land Area share for the County shall include those urbanized lands in the unincorporated portion of the County that are west of the County Water Authority (CWA) service area boundary as it exists on the date of this MOU or as formally amended by the CWA.

(c) Ten Percent (10%) of the total cost to be shared shall be divided equally amongst all of the Copermittees.

(d) Modification of the Default Formula requires the unanimous approval of all Copermittees.

(2) Special Formulas

(a) Special Formulas may be applied to any shared General Program cost, and require the approval of a Three-fourths Majority of the Copermittees participating in the cost.

(b) Special Formula for Hydromodification Management Plan (HMP) development. The Copermittees have initially estimated the total cost of developing an HMP by a professional consultant to be $1,000,000 over a two year period, and on March 15, 2007 approved a Fiscal Year 2007-08 regional shared costs budget that included $600,000 toward such costs, plus an additional 5% for contract management. The remaining estimated costs for completing the HMP, based on the actual consultant contract award amount and associated administrative costs, will be included in the Regional Work Plan and Regional Shared Costs budget for the 2008-09 fiscal year. HMP costs shall be allocated according to the following formula:

i. Ten percent (10%) of the cost shall be divided equally among all Copermittees.

ii. Ninety percent (90%) of the cost shall be divided based on the estimated number of Developable Parcels within each Copermittees' jurisdiction. Developable Parcel-based costs shall be divided among all Copermittees as follows:

[1] The percentage of developable parcel share costs for which each Copermittee is responsible shall be calculated by dividing the Copermittee's total number of developable parcels by the combined total developable parcels of all participating Copermittees. Developable parcels shall be calculated as the number of parcels within each Copermittee's developable land area using the SANDAG 2007 Parcel Layer. Developable lands shall be determined using the SANDAG 2004 developable land layer.

[2] The total developable land area for the County shall include those urbanized lands in the unincorporated portion of the

County that are west of the CWA service area boundary as it exists on the date of this MOU or as formally amended by the CWA.

(3) In-kind Contributions. Subject to approval by the Copermittees participating in a particular shared General Program budget, a Copermittee may provide an in-kind contribution of equal value rather than a monetary contribution toward all or part of the cost of an activity.

2. Annual Shared Cost Budgets and Work Plans

a. No later than October 31st of each year, each Regional Working Body shall prepare and submit to the Planning Subcommittee a Work Plan and estimated Budget of costs and expenses for the upcoming Fiscal Year. These budgets shall describe major tasks, schedules, and projected costs, which Copermittees will provide Working Body Support, Contract Administration, in-kind contributions, and any other information applicable to regional general program costs.

b. To ensure that each Copermittee governing body has sufficient time to consider fiscal impacts, the Planning Subcommittee shall prepare a consolidated draft Regional Work Plan and Regional Shared Costs Budget no later than December 31st of each year for the regional general programs. After consideration of comments and discussion, a final Regional Work Plan and Regional Shared Costs Budget shall be prepared, approved by the Management Committee, and distributed to the Copermittees no later than January 31st of each year. Modifications to any adopted Regional Shared Costs Budget or Regional Work Plan that will result in an overall increase in cost require the approval of the Regional Management Committee.

c. No later than January 31st of each year, each Watershed Urban Runoff Management Plan Sub-workgroup, for which costs will be shared in the ensuing fiscal year, shall prepare, adopt, and distribute to the Watershed Copermittees a Watershed Work Plan and Watershed Shared Costs Budget. These budgets shall include a description of major tasks, schedules, and projected costs, and shall identify the Copermittees that will provide or contract services or incur other costs. Modifications to any adopted Watershed Shared Costs Budget or Watershed Work Plan that will result in an overall increase in cost require the approval of the applicable Watershed URMP Sub-workgroup.

d. Each Copermittee shall submit for approval by its governing body a budget request as necessary to fund its assigned share of any approved Work Plan and Budget for the ensuing fiscal year. The submission shall reference and provide information on the approved Budget, and shall inform the Copermittee's governing body that if the requested funds are not provided the Copermittee will be excluded from further participation and may be in violation of the Permit.

3. Management and Payment of Funds

a. For Regional General Programs, the Copermittees shall each pay a yearly assessment into a Regional General Program operations fund for their assigned portion of any Regional Shared Costs Budget approved pursuant to this MOU. The Regional General Program operations fund shall be managed by the Regional Principal Permittee, or any other Permittee on approval of the Copermittees.

b. For Watershed General Programs, the Watershed Copermittees for each WMA shall each pay a yearly assessment into a Watershed General Program operations fund for their assigned portion of any Watershed Shared Costs Budget approved pursuant to this MOU. Each Watershed General Program operations fund shall be managed by the Watershed Lead Permittee, or any other Watershed Permittee on approval of the Watershed Copermittees.

c. The Copermittee managing each General Program operations fund shall provide Budget Balance and Expenditure Status Reports quarterly and following the end of each fiscal year. This shall include a detailed accounting of all costs and expenses in accordance with the adopted Work Plan and Shared Costs Budget, including those incurred by Copermittees providing Working Body Support, contracting services, in-kind services, or other applicable costs.

d. Each Copermittee shall pay invoices within 60 days of receipt from the Copermittee managing the applicable General Program operations fund.

e. Funds collected and not expended in any fiscal year shall be credited to the Copermittees' share of the next fiscal year's costs in accordance with the Copermittees' defined shared costs.

f. Copermittees providing Working Body Support, Contract Administration, in-kind services, or incurring other budgeted costs on behalf of other Copermittees shall provide documentation of those expenses as requested by the Copermittee managing the applicable General Program operations fund. They shall only receive credit for those expenses if a detailed accounting of all costs and expenses meeting the minimum standards agreed upon by the Copermittees has been provided.

g. Differences in the approved actual cost of expenses from those budgeted shall be either credited or added as appropriate to the amount of the Copermittee's share.

III. REGIONAL GENERAL PROGRAMS

In addition to the requirements of section II, the following apply to Regional General Programs.

A. Regional Principal Permittee

1. The County is hereby designated Regional Principal Permittee (Principal Permittee).

   a. A change in the assignment or responsibilities of the Principal Permittee requires the unanimous approval of all Copermittees.

   b. In addition to the responsibilities of all Copermittees described in Section II, the Principal Permittee shall provide general coordination for the development and implementation of Regional General Programs, including the following tasks and responsibilities:

      (1) Establish, chair, and provide overall coordination and leadership of the Regional Stormwater Management Committee (Management Committee) and the Regional Program Planning Subcommittee (Planning Subcommittee).

      (2) Submit to the Regional Board the formal agreement between the Copermittees that provides a management structure for meeting the requirements of the Permit.

      (3) Collect and assemble individual and joint program reports and plans, and submit them to the Regional Board as required by the Permit.

(4) Maintain a current contact list of Copermittees and interested parties.

(5) Maintain knowledge of and advise the Copermittees regarding current and proposed state and federal policies, regulations, and other NPDES programs; assist the Copermittees in the development and presentation of positions on these issues before local, state, and federal agencies.

(6) Formally advise appropriate state and federal agencies of termination or amendment of this MOU.

B. Regional Stormwater Management Committee

1. The purpose of the Management Committee is to provide a public forum for the development, approval, and coordination of urban runoff management programs, and for the exploration of issues of regional significance.
2. The Management Committee shall consist of one Participant representing each Copermittee. Each Copermittee shall have one vote.
3. The Management Committee shall meet at least four times per year.
4. At a minimum, the Management Committee shall have the following responsibilities:

   a. Address common issues, promote consistency among jurisdictional and watershed programs, and plan and coordinate activities required under the Permit;

   b. Develop, implement, and arrange for implementation of Regional General Programs;

   c. Provide a general forum for informing and receiving input from stakeholders and interested parties;

   d. Provide a forum for public participation in the development and implementation of regional urban runoff management programs and activities;

   e. Establish or modify Working Bodies to review specific issues, make recommendations, or conduct work in support of shared regional priorities or objectives;

   f. Adopt by-laws for the conduct of all Working Body meetings;

   g. Formally approve the recommendations, work products, and deliverables of Working Bodies presented for consideration;

   h. Adopt an Annual Regional Shared Costs Budget;

   i. Approve an Annual Regional Work Plan; and

   j. Approve quarterly and year-end Budget Balance and Expenditure Status Reports.

5. The Management Committee shall be chaired by the Principal Permittee, or may alternatively be chaired or co-chaired by any other Copermittee upon approval of the Management Committee.
6. For a meeting or a vote to be held, a quorum of a Two-thirds Majority of voting representatives of the Management Committee must be present.
7. Management Committee voting shall not be conducted outside of meetings (e.g., by email).
8. For a motion to be approved, an affirmative vote of a Simple Majority of the Management Committee is needed.
9. To approve any shared cost, or any cost-sharing formula or methodology applicable to a shared cost, (1) the affirmative votes must represent greater than fifty percent (50%) of the cost being shared, and (2) any Copermittee that is responsible for 25% or more of the total proposed cost must be present.

10. Meetings of the Management Committee, including any closed sessions with legal counsel, shall be conducted in accordance with the "Brown Act" (Government Code Section 54950 et seq.). Except for official meetings of the Management Committee, nothing herein shall be interpreted to require meetings between staff members of the individual Copermittees (including designated representatives of the Copermittees) to be subject to the Brown Act, where the Brown Act would not otherwise apply.

C. Regional Program Planning Subcommittee

1. The purpose of the Planning Subcommittee shall be to provide regional coordination of urban runoff management activities, to develop and implement Regional General Programs, and to direct and coordinate the activities of Regional, Watershed, or Other General Programs.
2. Unless a different minimum meeting frequency is established through the unanimous approval of all Copermittees, the Planning Subcommittee shall meet at least six times per year.
3. At a minimum, the Planning Subcommittee shall have the following responsibilities:

    a. Serve as an intermediary between the Management Committee and other Copermittee Working Bodies;
    b. Plan and coordinate Management Committee meetings;
    c. Report the activities of the Management Committee to the County and City Managers Association or equivalent;
    d. Prepare and recommend by-laws for Management Committee approval for the conduct of all Working Body meetings;
    e. Schedule, coordinate, and track the progress of Working Bodies in the completion of their assigned responsibilities;
    f. Establish and maintain a calendar of Copermittee meetings and events;
    g. Direct and assign work products and information requests between Working Bodies;
    h. Conduct regional program planning including developing an Annual Regional Work Plan and Regional Shared Costs Budget for Management Committee consideration and approval;
    i. Review and recommend Management Committee approval of work products, recommendations, and requests of Working Bodies for consideration and approval;
    j. Annually receive, review, comment on, and consolidate the recommended Work Plan and Shared Costs Budget of each regional Working Body;
    k. Annually prepare and present for Management Committee approval a final recommended Regional Work Plan and Regional Shared Costs budget;
    l. Monitor and recommend Management Committee approval of budget expenditures of Working Bodies in accordance with the adopted Regional Work Plan and Regional Shared Costs budget;
    m. Provide a Representative to each Regional Workgroup;
    n. Regularly coordinate and liaise with Regional Board staff, stakeholders, regulated parties, and other interested parties to identify and explore key regional issues and concerns.
    o. Provide Representation to the following California Stormwater Quality Association (CASQA) Working Bodies or their equivalent; Executive Program Committee, Board of Directors (if elected), Stormwater Policy and Permitting and Legislation; Phase II Programs;

p. Provide representation or participation for other professional organizations and societies as appropriate and feasible;
q. Provide regular updates to Copermittees and interested parties via Management Committee meetings or other appropriate means (e-mail, etc.); and
r. Provide subject area input as needed for the development, implementation, review, and revision of General Programs, and the development of associated reports and work products.

4. The Planning Subcommittee may not alter the responsibilities of, or impose new fiscal obligations on, any Copermittee or Working Body, except as approved by the Management Committee.
5. Each Watershed Lead Permittee shall provide one Participant to the Planning Subcommittee. Subject to approval of the applicable WURMP Sub-workgroup, a Copermittee other than the Watershed Lead Permittee may also serve as the Planning Subcommittee representative for a WMA. Upon approval of the Management Committee, up to two additional representatives may be appointed to the Planning Subcommittee in any year, so long as the total number of representatives does not exceed ten. The Management Committee shall determine the length of these additional appointments, but they shall be at least one year.
6. The Planning Subcommittee shall be chaired by the Principal Permittee, or may alternatively be chaired or co-chaired by any other Copermittee upon approval of the Management Committee.
7. Voting Requirements for the Planning Subcommittee:

   a. The Planning Subcommittee shall only make advisory recommendations for Management Committee approval.
   b. The Planning Subcommittee may use any voting methodology it deems appropriate to develop advisory recommendations or conduct other business, and, shall present minority or dissenting recommendations for consideration by the Management Committee as applicable.
   c. Except as prohibited by law, the Planning Subcommittee may conduct votes outside of meetings (e.g., by e-mail) as appropriate.

D. General Responsibilities of Regional Workgroups and Sub-Workgroups

1. The purpose of Regional Workgroups and Sub-workgroups is to provide regional coordination of urban runoff management activities within assigned subject areas, to develop and implement recommended Regional General Programs, and to provide coordination of activities with stakeholders and interested parties. Regional Workgroups are advisory to the Management Committee through the Planning Subcommittee. Regional Sub-workgroups are advisory to the Regional Workgroups to which they are subordinate.
2. Unless a different minimum meeting frequency is established through the unanimous approval of all Copermittees, each Regional Workgroup and Sub-workgroup shall meet at least four times per year.
3. At a minimum, each Regional Workgroup and Sub-workgroup shall have the following responsibilities within its assigned subject area:

   a. Nominate for Management Committee approval a Chair or Co-chairs, and a Secretary from among its participants;
   b. Facilitate consistency in the development, implementation, review, and revision of General Programs, and the development of associated reports and work products;

c. Develop, annually review, and update as necessary subject-specific standards for reporting, assessment, and data and information management;

d. Develop and implement Regional General Programs as appropriate and feasible;

e. Provide subject area input to other Working Bodies as requested by the Planning Subcommittee; and

f. Regularly coordinate and liaise with Regional Board staff, stakeholders, regulated parties, and other interested parties to identify and explore key regional issues and concerns.

4. Regional Workgroups shall also have the following responsibilities:

a. By October 31st of each year, prepare and submit to the Planning Subcommittee a recommended Work Plan for the activities of the Workgroup and its Sub-workgroups in the ensuing fiscal year. This shall include a description of major tasks, deliverables, and projected schedules, and the assignment and/or division of responsibilities for task completion.

b. By October 31st of each year, prepare and submit to the Planning Subcommittee a recommended Work Plan and Shared Costs Budget for the ensuing fiscal year.

c. Twice per year, provide Written Status Reports to the Planning Subcommittee describing (1) activities and accomplishments for the previous period, (2) success in completing scheduled tasks, and (3) key issues, activities, and tasks to be addressed in the next period. Written Status Reports shall be submitted as directed by the Planning Subcommittee.

d. Provide Workgroup updates at Management Committee meetings.

5. Voting Requirements for Regional Workgroups and Sub-workgroups

a. Regional Workgroups shall make consensus recommendations to the Planning Subcommittee, who shall in turn make recommendations for formal votes to the Management Committee.

b. Regional Sub-workgroups shall make consensus recommendations to the Regional Workgroup to which they are subordinate.

c. Regional Workgroups and Regional Sub-workgroups may use any voting methodology they deem appropriate to develop consensus, and, as applicable, shall present minority or dissenting recommendations for consideration.

d. Regional Workgroups and Sub-workgroups may conduct votes outside of meetings (e.g., by email) as appropriate.

6. Copermittee Representation and Participation on Regional Workgroups and Regional Sub-workgroups:

a. Each Copermittee shall provide at least one Representative to each Regional Workgroup or Regional Sub-workgroup.

b. Each of the Copermittees represented on the Planning Subcommittee shall serve as a Participant on at least one Regional Workgroup or Regional Sub-workgroup each year. Assignments shall be coordinated through the Planning Subcommittee to ensure adequate participation in each Regional Workgroup and Regional Sub-workgroup.

c. Each of the Copermittees that is not a Participant on the Planning Subcommittee in a given year shall serve as a Participant on at least two Regional Workgroups or Regional Sub-workgroups during that year.

d. Each Copermittee shall serve as a Regional Workgroup or Sub-workgroup Chair, Co-chair, or Secretary each year. The responsibilities of Chairs, Co-chairs, and Secretaries are not reimbursable. Subject to Management Committee approval, Copermittees may voluntarily serve the required assignments of other Copermittees so long as the minimum number of required assignments is filled in each year.

E. Responsibilities Specific to Individual Regional Workgroups and Sub-Workgroups

In addition to the general responsibilities described in section III.D, the following apply to individual Workgroups and Sub-workgroups. Regional Workgroups and Sub-workgroups may be added, deleted, or modified through the unanimous approval of the Management Committee.

1. Fiscal, Reporting, and Assessment Workgroup

The purpose of the Fiscal, Reporting, and Assessment Workgroup is to provide regional standards and consistency in the implementation, assessment, and reporting of Copermittee urban runoff management activities and programs. At a minimum the Fiscal, Reporting, and Assessment Workgroup shall have the following responsibilities:

a. Develop, annually review, and update as necessary regional reporting, assessment, and program data and information management standards;

b. Develop regional fiscal analysis standards and metrics by December 31, 2008;

c. Develop, annually review, and update as necessary standards for tracking and reporting expenditures;

d. Receive and consolidate data for budget preparation and monitoring;

e. Develop the Copermittees' Regional URMP (RURMP);

f. Develop the Copermittees' RURMP Annual Reports;

g. Develop the Copermittees' Long-Term Effectiveness Assessment (LTEA);

h. Develop the Copermittees' Report of Waste Discharge (ROWD); and

i. Provide representation on the CASQA Effectiveness Assessment Subcommittee or equivalent.

2. Education and Residential Sources Workgroup

The purpose of the Education and Residential Sources Workgroup is to provide regional standards and consistency in the development, implementation, assessment, and reporting of Copermittee educational and residential source management activities and programs. At a minimum, this shall include the following responsibilities:

a. Develop, annually review, and update as necessary recommended regional standards and approaches for conducting educational activities;

b. Develop and coordinate the implementation of the Copermittees' Regional Residential Education Plan;

c. Develop, annually review, and update as necessary regional reporting, assessment, program data and information management standards for Copermittee educational activities and programs;

d. Review and comment on the educational content of work products developed by other Working Bodies;

e. Liaise with and assist the Regional WURMP, Land Development, Industrial and Commercial, and Municipal Workgroups in developing training and outreach strategies, materials, and activities;

f. Provide a Representative to the CASQA PIPP, Website, and Workshops subcommittees or their equivalent;

g. As applicable, facilitate the centralized management of educational program data and information;

h. Develop, annually review, and update as necessary regional standards and approaches for the management of residential sources to address at a minimum:

(1) Priority Sources and Inventories,

(2) BMP Requirements and Recommendations, and

(3) Program Implementation Approaches (including education);

i. Develop, annually review, and update as necessary recommended regional reporting, assessment, program data and information management standards for residential urban runoff management activities and programs;

j. As applicable, facilitate the centralized management of regional residential program data and information (sources, BMP inventories, etc.); and

k. Coordinate with the Regional WURMP workgroup to assist in the development of residential content for watershed program strategies.

3. Regional Monitoring Workgroup and Sub-workgroups

The purpose of the Regional Monitoring Workgroup and its Sub-workgroups is to provide regional standards and consistency in the development, implementation, assessment, and reporting of receiving waters and urban runoff monitoring activities and programs. At a minimum, the following responsibilities shall apply to the Regional Monitoring Workgroup, or may be delegated to its Dry Weather and Coastal Monitoring Sub-workgroups as appropriate:

a. Develop, annually review, and update as necessary recommended regional standards and approaches for conducting monitoring activities;

b. Develop and coordinate the implementation of the Copermittees' Regional Receiving Waters Monitoring Program or other specific monitoring program elements;

c. Develop and update as necessary reporting, assessment, program data and information management standards for Copermittee monitoring activities and programs;

d. Develop, review, and recommend approval of work plans, monitoring reports, and other required work products;

e. Provide a Representative to the CASQA Stormwater Monitoring and Science subcommittee or its equivalent;

f. Regularly coordinate and liaise with Regional Board staff, stakeholders, regulated parties, and other interested parties to identify and explore key monitoring issues; and

g. As applicable, facilitate the centralized management of water quality monitoring data.

4. Regional Watershed URMP Workgroup

The purpose of the Regional Watershed URMP Workgroup is to provide regional standards and consistency in the development, implementation, assessment, and reporting of Copermittee watershed management activities and programs. At a minimum, this shall include the following responsibilities:

a. Coordinate Watershed URMP administration and reporting;

b. Develop, annually review, and update as necessary recommended regional standards and approaches for conducting watershed urban runoff management activities and programs;

c. Develop, annually review, and update as necessary regional reporting, assessment, program data and information management standards for watershed urban runoff management activities and programs;

d. As applicable, coordinate the implementation of regionally applied watershed urban runoff management activities and programs;

e. As applicable, facilitate the centralized management of watershed program data and information;

f. Coordinate as necessary with other Copermittee Working Bodies to assist in the development of watershed-related program content;

g. Provide a Representative to the CASQA Watershed Management and Impaired Waters subcommittee or equivalent; and

h. As appropriate, facilitate Total Maximum Daily Load development, implementation, and reporting.

5. Land Development Workgroup

The purpose of the Land Development Workgroup is to provide regional standards and consistency in the development, implementation, assessment, and reporting of urban runoff activities and programs related to the construction and post-construction phases of the land development process. At a minimum, this shall include the following responsibilities:

a. Develop, annually review, and update as necessary recommended regional standards and approaches for the management of construction and post-construction sources to address at a minimum:

(1) Priority Sources and Inventories,

(2) BMP Requirements and Recommendations, and

(3) Program Implementation Approaches;

b. Develop the Copermittees' Hydromodification Management Plan (HMP);

c. Update the Model Standard Urban Stormwater Mitigation Plan (SUSMP) in accordance with Permit requirements;

d. Develop, annually review, and update as necessary regional reporting, assessment, program data and information management standards for construction and post-construction sources;

e. As applicable, coordinate the implementation of regional urban runoff management programs and activities for construction and post-construction sources;

f. As applicable, facilitate the centralized management of construction and post-construction program data and information; and

g. Provide a Representative to the CASQA Construction Workgroup or its equivalent.

6. Municipal Activities Workgroup

The purpose of the Municipal Activities Workgroup is to provide regional standards and consistency in the development, implementation, assessment, and reporting of urban runoff activities and programs related to municipal activities and sources. At a minimum, this shall include the following responsibilities:

a. Develop, annually review, and update as necessary recommended regional standards and approaches for the management of municipal sources to address at a minimum:

(1) Priority Sources and Inventories,

(2) BMP Requirements and Recommendations, and

(3) Program Implementation Approaches;

b. Develop, annually review, and update as necessary regional reporting, assessment, program data and information management standards for municipal sources;

c. As applicable, coordinate the implementation of regional urban runoff management activities and programs for municipal sources;

d. As applicable, facilitate the centralized management of municipal program data and information.

7. Industrial and Commercial Sources Workgroup

The purpose of the Industrial and Commercial Sources Workgroup is to provide regional standards and consistency in the development, implementation, assessment, and reporting of urban runoff activities and programs related to industrial and commercial activities and sources. At a minimum, this shall include the following responsibilities:

a. Develop, annually review, and update as necessary recommended regional standards and approaches for the management of industrial and commercial sources to address at a minimum:

(1) Priority Sources and Inventories,

(2) BMP Requirements and Recommendations, and

(3) Program Implementation Approaches;

b. As applicable, coordinate the implementation of regional urban runoff management activities and programs for industrial and commercial sources;

c. Develop, annually review, and update as necessary regional reporting, assessment, program data and information management standards for industrial and commercial sources; and

d. As applicable, facilitate the centralized management of industrial and commercial program data and information.

IV. WATERSHED GENERAL PROGRAMS

The following apply to Watershed General Programs.

A. Watershed Lead Permittees

1. The following Copermittees are hereby designated as Watershed Lead Permittees for the Watershed Management Areas listed:

   a. Santa Margarita WMA: County of San Diego
   b. San Luis Rey River WMA: City of Oceanside
   c. Carlsbad WMA: City of Carlsbad
   d. San Dieguito River WMA: City of Escondido
   e. Penasquitos WMA: City of Poway
   f. Mission Bay WMA: City of San Diego
   g. San Diego River WMA: City of El Cajon
   h. San Diego Bay WMA: Port of San Diego
   i. Tijuana WMA: County of San Diego

2. Changes in the assignment or responsibilities of Watershed Lead Permittees require unanimous approval of the applicable Watershed Permittees.
3. In addition to the responsibilities of all Copermittees described in Section II, each Watershed Lead Permittee shall provide general program coordination for Watershed General Programs applicable to their respective WMA, including the following tasks and responsibilities:

   a. Establish, chair, and provide overall coordination and leadership of its respective WURMP Sub-workgroup;
   b. Collect and assemble the individual and joint program reports, plans, and submit them to the Regional Principal Permittee or the Regional Board as required in the Permit; and
   c. Maintain knowledge of and advise the Watershed Copermittees regarding current and proposed watershed-related State and Federal policies, regulations, and other NPDES programs; assist the Copermittees in the development and presentation of positions on these issues before local, State, and Federal agencies.

B. Watershed URMP Sub-workgroups

1. For each WMA listed in section IV.A.1, a Watershed URMP Sub-workgroup is hereby established.

2. Copermittee Participation in Watershed URMP Sub-workgroups

   a. Each of the Watershed Copermittees shall have one Participant as a member of the Watershed URMP Sub-workgroup; and
   b. The Chair of the Watershed URMP Sub-workgroup shall be the Watershed Lead Permittee, or any other Copermittee on approval of the group.

3. Unless a different minimum meeting frequency is established through the unanimous approval of all Copermittees, each Watershed URMP Sub-workgroup shall meet at least four times per year.
4. At a minimum, each Watershed URMP Sub-workgroup shall have the following responsibilities:

   a. Develop and implement a Watershed URMP as required by the Permit;
   b. Develop and implement watershed activities and programs that are consistent with all minimum regional standards established through the Regional WURMP Workgroup and approved by the Management Committee;
   c. Provide data, information, and other input to the Regional WURMP Workgroup and other Copermittee Working Bodies as requested;
   d. Coordinate the development, implementation, and reporting of TMDL activities and programs within the WMA; and
   e. Adopt an annual Watershed Work Plan and Watershed Shared Costs Budget in accordance with section II.B.2.c.

5. Voting Requirements for Watershed URMP Sub-workgroups

   a. The voting membership of each Watershed URMP Sub-workgroup shall consist of one designated voting representative for each Watershed Copermittee;
   b. For a vote to be held, a quorum representing a Three-fourths Majority of the voting representatives of the Watershed URMP Sub-workgroup must be present;
   c. For a vote to pass, an affirmative vote of at least a Simple Majority of voting members of the Watershed URMP Sub-workgroup is needed;
   d. The affirmative votes must represent greater than fifty percent (50%) of any cost being shared;
   e. Any Copermittee that is responsible for 25% or more of the total proposed cost must be present for a vote to be approved; and
   f. Watershed URMP Sub-workgroup voting on matters related to approving shared costs, designating watershed leads, or approving Special Formulas shall not be conducted outside of meetings (e.g., by e-mail).

V. OTHER GENERAL PROGRAMS

The following apply to Other General Programs.

1. For convenience, the Management Committee or any applicable Watershed Sub-workgroup may provide a forum for deliberating and voting on issues and costs applicable to a subset of its membership, and for which a separate Working Body has not been established.
2. For a vote to be held, a Two-thirds Majority of the Copermittees participating in or subject to the activity or cost must be present, and voting shall be limited to those Copermittees.
3. For a vote to be approved:

    a. An affirmative vote of a Simple Majority of the Copermittees participating in or subject to the activity or cost is needed;

    b. The affirmative votes must represent greater than fifty percent (50%) of any cost being shared; and

    c. Any Copermittee that is responsible for 25% or more of the total proposed cost must be present.

VI. DISPUTE RESOLUTION

Should a dispute arise among any of the parties regarding any matter related to this MOU, the parties agree to first meet and confer in good faith to attempt to resolve the dispute. If that fails to resolve the dispute, they shall submit the matter to mediation.

1. Mandatory Non-binding Mediation. If a dispute arises out of, or relates to this MOU, or the breach thereof, and if the dispute cannot be settled through normal contract negotiations, the Parties agree to settle the dispute in an amicable manner, using mandatory mediation under the Mediation Rules of the American Arbitration Association [AAA] or any other neutral organization agreed upon before having recourse in a court of law. The cost of mediation shall be borne by the parties equally.

2. Selection of Mediator. A single Mediator that is acceptable to both Parties shall be used to mediate the dispute. The Mediator may be selected from lists furnished by the AAA or any other agreed upon Mediator. To initiate mediation, the initiating Party shall serve a Request for Mediation on the opposing Party.

3. Conduct of Mediation Sessions. Mediation hearings will be conducted in an informal manner and discovery will not be allowed. All discussions, statements, or admissions will be confidential to the Party's legal position. The Parties may agree to exchange any information they deem necessary.

    a. Both Parties must have an authorized representative attend the mediation. Each representative must have the authority to recommend entering into a settlement. Either Party may have attorney(s) or expert(s) present. Upon reasonable demand, either Party may request and receive a list of witnesses and notification whether attorney(s) will be present.

    b. Any agreements resulting from mediation shall be documented in writing. All mediation results and documentation, by themselves, shall be “non-binding” and inadmissible for any purpose in any legal proceeding, unless such admission is

otherwise agreed upon, in writing, by both Parties. Mediators shall not be subject to any subpoena or liability and their actions shall not be subject to discovery.

VII. GENERAL PROVISIONS

A. Term of Agreement

1. This MOU shall become effective on the date the last party executes the MOU.
2. The life of the MOU shall run with the life of the current Permit plus twelve months. For purposes of this paragraph, any permit renewal or replacement after January 2012 shall be considered a new permit; any earlier amendment of the Permit increasing the obligations of the Regional Principal Permittee or a Watershed Lead Permittee may at that Copermittee's sole option, be declared to be a new permit; and the Management Committee shall determine whether any other earlier amendment to the Permit is of such significance as to effectively be a new Permit.

B. Withdrawal of Copermittee

1. Participation in this MOU may be withdrawn by any Copermittee for any reason only after the Copermittee complies with all of the following conditions of withdrawal:

    a. The Copermittee shall notify all of the other Copermittees in writing 90 days prior to its intended date of withdrawal.

    b. The withdrawing Copermittee shall have its name deleted as a Copermittee to the Permit prior to or on the withdrawal date.
2. Any expenses associated with withdrawal, including but not limited to, filing and obtaining the withdrawing Copermittee's individual NPDES permit and the amendment of the Permit will be solely the responsibility of the withdrawing Copermittee.
3. The withdrawing Copermittee shall be responsible for their portion of any shared costs incurred according to the conditions of this MOU up to the time that each of the conditions in Section VII.B.1. has been met.
4. Any monies paid by withdrawing Copermittee in excess of the amount due under the terms of the MOU shall be refunded to the Copermittee at the time the withdrawal becomes final as set forth in Section VII.B.1.a.
5. The withdrawing Copermittee shall not be entitled to participate in the division of proceeds in any reserve fund account when the MOU is dissolved.

C. Non-Compliance with MOU Requirements

Any participant to this MOU found to be in non-compliance with the conditions of this MOU shall be solely liable for any lawfully assessed penalties resulting from such non-compliance. Failure to comply with MOU conditions within specified or agreed upon timelines shall constitute non-compliance with the MOU.

D. Amendments to the Memorandum of Understanding

This MOU may be amended only by consent of all Copermittees. No amendment shall be effective unless it is in writing and signed by the duly authorized representatives of the Copermittees.

E. Governing Law

This MOU shall be governed and construed in accordance with the laws of the State of California. If any provision or provisions shall be held to be invalid, illegal, or unenforceable, the validity, legality, and enforceability of the remaining provisions shall not in any way be affected or impaired thereby.

The headings used throughout this MOU are for convenience only and do not in any way limit or amplify the terms or provisions of the MOU.

F. Consent and Breach Not Waiver

No term or provision hereof shall be deemed waived and no breach excused, unless such waiver or consent shall be in writing and signed by the Copermittee to have waived or consented. Any consent by any Copermittee to, or waiver of, a breach by the other, whether expressed or implied, shall not constitute a consent to, waiver of, or excuse for any other different or subsequent breach.

G. Indemnification

1. Each Copermittee shall have the sole responsibility to comply with the Permit.
2. Each Copermittee shall pay all fines, penalties, and costs which may arise out of such Copermittees's non-compliance with the Permit.
3. By entering into this MOU, no Copermittee assumes liability for claims or actions arising out of the performance of any work or actions or omissions, by any other Copermittee, its agents, officers, and employees under this MOU.
4. By entering into this MOU, each Copermittee agrees to defend itself from any claim, action or proceeding arising out of the acts or omissions of itself and retain its own legal counsel, and bear its own defense costs.

H. Application of Prior Agreements

This MOU constitutes the entire Agreement between the parties with respect to the subject matter; all prior agreements, representations, statements, negotiations, and undertakings are superseded hereby.

I. Execution of Agreement

This MOU may be executed in counterpart and the signed counterparts shall constitute a single instrument.

First Amendment to National Pollutant Discharge Elimination System San Diego Regional Stormwater Copermittees Memorandum of Understanding, Dated November 16, 2007

This First Amendment to National Pollutant Discharge Elimination System San Diego Regional Stormwater Copermittees Memorandum of Understanding (MOU), dated November 16, 2007, is entered into by the County of San Diego (County), the San Diego Unified Port District (Port), the San Diego County Regional Airport Authority (Airport), and the incorporated cities of Carlsbad, Chula Vista, Coronado, Del Mar, El Cajon, Encinitas, Escondido, Imperial Beach, La Mesa, Lemon Grove, National City, Oceanside, Poway, San Diego, Santee, San Marcos, Solana Beach, and Vista (Cities), collectively called Copermittees.

RECITALS

WHEREAS, the MOU sets forth procedures for the management of funds contributed by the Copermittees to fund programs implemented in order to facilitate compliance with San Diego Regional Water Quality Control Board Order No. R9-2007-0001 (Permit); and

WHEREAS, the MOU at Section II.B.3 provides for the carry over of unused contributed funds from one fiscal year to another, but does not otherwise provide any direction regarding the refund of excess funds; and

WHEREAS, Copermittees desire to amend Section II.B.3. of the MOU to authorize the refund of funds that would otherwise only be authorized to be carried over from one fiscal year to another as a credit.

FIRST AMENDMENT

NOW THEREFORE, the Copermittees amend the MOU as follows:

1. Section II.B.3 of the MOU entitled "Management and Payment of Funds" is hereby amended and restated to read as follows:

a. For Regional General Programs, the Copermittees shall each pay a yearly assessment into a Regional General Program operations fund for their assigned portion of any Regional Shared Costs Budget approved pursuant to this MOU. The Regional General Program operations fund shall be managed by the Regional Principal Permittee, or any other Permittee on approval of the Copermittees.

b. For Watershed General Programs, the Watershed Copermittees for each WMA shall each pay a yearly assessment into a Watershed General Program operations fund for their assigned portion of any Watershed Shared Costs Budget approved pursuant to this MOU. Each Watershed General Program operations fund shall be managed by the Watershed Lead Permittee, or any other Watershed Permittee on approval of the Watershed Copermittees.

c. The Copermittee managing each General Program operations fund shall provide Budget Balance and Expenditure Status Reports quarterly and following the end of each fiscal year. This shall include a detailed accounting of all costs and expenses in accordance with the adopted Work Plan and Shared Costs Budget, including those incurred by Copermittees providing Working Body Support, contracting services, in-kind services, or other applicable costs.

d. Each Copermittee shall pay invoices within 60 days of receipt from the Copermittee managing the applicable General Program operations fund.

e. Funds collected and not expended in any fiscal year shall be credited to the Copermittees' share of the next fiscal year's costs in accordance with the Copermittees' defined shared costs.

f. Copermittees providing Working Body Support, Contract Administration, in-kind services, or incurring other budgeted costs on behalf of other Copermittees shall provide documentation of those expenses as requested by the Copermittee managing the applicable General Program operations fund. They shall only receive credit for those expenses if a detailed accounting of all costs and expenses meeting the minimum standards agreed upon by the Copermittees has been provided.

g. Differences in the approved actual cost of expenses from those budgeted shall be either credited or added as appropriate to the amount of the Copermittee's share. In the event that any Copermittees' share of the next fiscal year's costs is less than the amount to be credited, the difference shall be refunded to the Copermittee. This provision shall be retroactive to include credits from FY 2008-09. Refunds shall be provided to Copermittees no later than 90 days after final accounting.

h. At its discretion, a Copermittee managing a General Program operations fund may, prior to the completion of a fiscal year, make payment to any Copermittee providing Working Body Support, Contract Administration, in-kind services, or incurring other budgeted expenditures on behalf of other Copermittees so long as all of the conditions of Section II. B.3.f above have been satisfied and there are sufficient funds available to make a payment without requiring additional contributions or jeopardizing program objectives. If for some reason excess payment is made, the Copermittee receiving the payment agrees to return the additional payment without any recourse against the managing Copermittee.

2. Effect of Amendment

2.1 This Amendment to National Pollutant Discharge Elimination System, San Diego Regional Stormwater Copermittees, Memorandum of Understanding shall be effective and binding on all parties hereto commencing upon the date the last party executes the First Amendment to MOU.

2.2 This First Amendment to MOU may be executed in counterparts and the signed counterparts shall constitute a single instrument.

SECOND AMENDMENT TO NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM SAN DIEGO REGIONAL STORMWATER COPERMITTEES MEMORANDUM OF UNDERSTANDING

This Second Amendment to National Pollutant Discharge Elimination System San Diego Regional Stormwater Copermittees Memorandum of Understanding (MOU), dated March 21, 2014, is entered into by the County of San Diego (County), the San Diego Unified Port District (Port), the San Diego County Regional Airport Authority (Airport), and the incorporated cities of Carlsbad, Chula Vista, Coronado, Del Mar, El Cajon, Encinitas, Escondido, Imperial Beach, La Mesa, Lemon Grove, National City, Oceanside, Poway, San Diego, Santee, San Marcos, Solana Beach, and Vista (Cities), collectively called Copermittees.

RECITALS

WHEREAS, on May 8, 2013, the San Diego Regional Water Quality Control Board (SDRWQCB) issued NPDES Order No. R9-2013-0001, which includes requirements in addition to those that were imposed on the Copermittees in NPDES Permit No. R9-2007-0001; and

WHEREAS, the Copermittees entered into a National Pollutant Discharge Elimination System, San Diego Regional Stormwater Copermittees, Memorandum of Understanding (MOU) on November 16, 2007 to comport with the NPDES Permit No. R9-2007-001 requirement that they cooperate in the implementation of activities and programs;

WHEREAS, the Copermittees entered into a First Amendment to National Pollution Discharge Elimination System San Diego Regional Stormwater Copermittees Memorandum of Understanding, dated November 16, 2007, (First Amendment) on June 15, 2010 in order to allow the refund of budgeted but unspent funds to the Parties at the conclusion of each fiscal year; and

WHEREAS, the Copermittees wish to amend the MOU to extend the termination date of the MOU through August 31, 2015, and expressly limit the sharing of Fiscal Year 2014-15 expenditures to those identified in this amendment; and

NOW, THEREFORE, in consideration of the above recitals and the mutual promises contained herein, the parties agree to amend and supplement the MOU as follows:

1. SECOND AMENDMENT TO NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES), SAN DIEGO REGIONAL STORMWATER COPERMITTEES MEMORANDUM OF UNDERSTANDING

1.1 Paragraph four under "RECITALS" is hereby amended and restated to read in its entirety as follows:

WHEREAS, the County, the Port, the Airport, and the Cities desire to implement an integrated stormwater management program with the objective of improving surface water quality in the County of San Diego, but do so without waiving and expressly subject to any and all objections and appeals made by any Copermittee in response to any NPDES Permit; and

1.2 Section II.B.2 of the MOU entitled "Annual Shared Cost Budgets and Work Plans" is hereby amended to add sub-section e, which will read as follows:

e. The regional costs to be shared by the Copermittees during Fiscal Year 2014-15 shall not exceed $4,051,589. These funds may only be used toward expenditures identified in the FY 2014-15 Consolidated Work Plan and Budget included as MOU Attachment 2, or as subsequently modified by unanimous consent of all Copermittees.

1.3 Attachment 1 to this amendment is hereby added as Attachment 2 to the MOU.

1.4 Section VII.A of the MOU, entitled "Term of Agreement", is hereby amended and restated to read in its entirety as follows:

1. This MOU shall become effective on the date the last party executes the MOU.
2. The life of the MOU shall run through August 31, 2015.

1.5 Section VII.C of the MOU, entitled "Non-Compliance with MOU Requirements", is hereby amended and restated to read in its entirety as follows:

1. Any participant to this MOU found to be in non-compliance with the conditions of this MOU shall be solely liable for any lawfully assessed penalties resulting from such non-compliance. Failure to comply with MOU conditions within specified or agreed upon timelines shall constitute non-compliance with the MOU.
2. Federal Limitations on Use of Airport Revenue. Notwithstanding the rights and obligations of the Parties created by this MOU, no Party may be found in breach of this MOU where compliance would require that Party to violate any law or grant assurance, including but not limited to provisions of the Federal Aviation Administration 1999 Policy and Procedure Concerning the Use of Airport Revenue [64 Fed. Reg. 7696, dated Feb. 16, 1999]; the Airport and Airway Improvement Act of 1982 codified at 49 U.S.C. § 47107(b); the Federal Aviation Administration Authorization Act of 1994, P.L. 103-305 (Aug. 23, 1994); the Airport Revenue Protection Act of 1996, Title VIII of the Federal Aviation Administration Act of 1996, P.L. 104-264 (Oct. 9, 1996), 110 Stat. 3269 (Oct. 9, 1996); 49 U.S.C. § 46301(n)(5); and 49 U.S.C. § 47133. The Parties recognize that the Authority has received federal Airport Improvement Project ("AIP") grants containing grant assurance 25, which provides: "All revenues generated by the airport . . . will be expended by it for the capital or operating costs of the airport; the local airport system; or other local facilities which are owned or operated by the owner or operator of the airport and which are directly and substantially related to the actual air transportation of passengers or property; or for noise mitigation purposes on or off the airport."

2. EFFECT OF AMENDMENT

2.1 This Amendment to National Pollutant Discharge Elimination System, San Diego Regional Stormwater Copermittees, Memorandum of Understanding shall be effective

and binding on all parties hereto commencing upon the date the last party executes the Second Amendment to MOU.

2.2 This Amendment may be executed in any number of counterparts, each of which shall be an original, but all of which together shall constitute one instrument. In the event that any Copermittee is unable to execute this amendment prior to May 8, 2014, execution of this amendment after that date shall constitute ratification of this amendment, and the MOU and extensions shall be in effect once all signatures are obtained.

RESOLUTION NO. 2014-111

A RESOLUTION OF THE CITY COUNCIL OF THE CHARTERED CITY OF VISTA, CALIFORNIA, APPROVING A SECOND AMENDMENT TO THE MEMORANDUM OF UNDERSTANDING BETWEEN THE CITY OF VISTA, THE COUNTY OF SAN DIEGO AND ALL NPDES COPERMITTEES

The City Council of the City of Vista does resolve as follows:

1. **Findings.** The City Council hereby finds and declares the following:

A. The San Diego Regional Water Quality Control Board ("RWQCB") issued Order No. 2001-01 in February 2001, wherein it required the County of San Diego, the San Diego Port District and the municipalities within the County of San Diego (collectively "Co-Permittees") to improve water quality by preventing pollutants from entering receiving waters from stormwater and urban runoff.

B. On January 24, 2007, the RWQCB issued Order No. R9-2007-0001, which replaced Order No. 2001-01 and expanded on that Order's MOU requirements for the NPDES San Diego Regional Co-Permittees. The original requirements included the establishment of a management structure and determining a cost sharing mechanism for complying with the Order. Order No. R9-2007-0001 required that the Co-Permittees address the new additional requirements and that they add the San Diego Regional Airport Authority as a Co-Permittee.

D. On November 16, 2007 the Co-Permittees entered into a new NPDES San Diego Regional Co-Permittee MOU.

E. On June 15, 2010, the Co-Permittees entered into a First Amendment to the Memorandum of Understanding, which updated the cost sharing mechanism.

F. At this time, a Second Amendment is necessary to extend the termination date of the MOU through August 31, 2015, and expressly limit the sharing of Fiscal Year 2014-15 expenditures to those identified in this amendment.

2. **Action.**

A. The Second Amendment to the Memorandum of Understanding between the City of Vista, the County of San Diego and all NPDES Co-Permittees is approved.

B. The Mayor is authorized to execute the Agreement.

[Continued on page 2.]

3. Adoption. PASSED AND ADOPTED at a meeting of the City Council held on June 24, 2014, by the following vote:

	Total	$147,861.92		

These are the County Only Activities taken from the WURMP Activities Database.

County Only Activity Name	Implementing Department	Watershed Activity ID	UFM Notes	Estimated Cost (contractor)	Activity Description
Pet Waste Dispenser Program	DPR	CHU-WQA10, SDB-001A(SWT/Otay), SDR-A13, SD-WQA19, SLR-005, SMR-021, TJ-001	S:\Watershed Project\Watershed Planning\01 Watersheds\Carlsbad\WURMP\WURMP Activities\Pet Waste Bags in County Parks.		San Elijo Lagoon Ecological Reserve (2)
Land Acquisitions	DPR	CHU-WQA11, SDB-046, SDR-A23, SD-WQA2, SLR-012, SMR-017, TJ-002			
Water Quality Monitoring in the Aqua Hendionda Creek Watershed	DPW - WPP	CHU-WQA14	S:\Watershed Project\Watershed Planning\01 Watersheds\Carlsbad\WURMP\WURMP Annual Reports\FY 08-09\CHU-WQA Water Quality Monitoring in AH S:\Watershed Project\WATER QUALITY\SCIENCE AND MONITORING\ADMIN\Contracts\F-40 Contracts\Weston-2008-2013\Taskorders\Task3Aquahedionda. Monitoring conducted on Weston Contract # 526933, Task Order 3	$165,154	One dry weather event was monitored on June 23-24, 2009, at the two locations. Wet weather monitoring will be conducted during the 2009-2010 Wet Weather Season (October 1, 2009-April 30, 2010). Cost look to be solely within FY 09/10
Water Quality Treatment Facility at McClellan- Palomar Airport (monitoring done by WPP, facility constructed by FCD)	DPW - WPP	CHU-WQA15	Post-project monitoring conducted by WPP S:\Watershed Project\WATER QUALITY\SCIENCE AND MONITORING\ADMIN\Contracts\F-40 Contracts\Mactec2008-2013\task orders\Task12_PalomarAirport. MACTEC contract 526934, Task Order 2, Addendum #2	$47,000	Cost fall across FY 10/11 and FY 11/12
Residential Rain Barrel Subsidies and Distribution	DPW - WPP	CHU-WQA17, SDB-062, SDR-A71, SLR-022, SMR-025	S:\Watershed Project\Watershed Planning\01 Watersheds\San Diego Bay\z_Archive\03-15 Old SD Bay Docs\Annual Reports\FY 09-10\09-10 Activities\New Activities		
Stormwater Quality Master Plans for SDA Fee Areas	DPW - FCD	CHU-WQA7, SDB-056, SDR-A55, SD-WQA18	Not a WPP cost. This is a Flood Control District activity that was occuring regardless of the 2007 MS4 Permit		a couple of ways we implemented. Truck sales using a third party vendor (probably have data?) Solana Center? Rancho San Diego event held on 8/28/10 and Fallbrook event held on 9/26/10. **Solana Center Supplier ID is 1119172**. Cost would fall into FY 10/11.
Nitrate Source Identification and Abatement: Buena Creek	DPW - WPP	CHU-WQA8	S:\Watershed Project\Watershed Planning\01 Watersheds\Carlsbad\WURMP\WURMP Activities\Nitrate Source ID and Abatement - Buena Creek **Documented as staff time**		WPP and AWM - inventory and map in drainage CAR 05, compile baseline BMPs, WQ monitoring, investigations. FY 07/08 and FY 08-09
LID and Watershed Planning for Community Planning and Sponsor G	DPW - WPP	CHU-WQEA4, LP-WQEA4, SDB-043,SDR-A37, SD-WQEA2, TJ-014	Stephanie conducted this effort. I think I did hit at least 22 of the official CP/CSG's, but not the 'unofficial' ones, such as Palomar Mt. At that time, we had very few KRONOS charges available to us; I believe there were three basic charges we used, including 1019978 for general WPP planning activities. The development of the presentations took a few days, working a bit with Todd on the messaging, then scheduling with the CP/CSG's, travel time and actual presentation with Q&A would probably commit about 4 hours per presentation. If we assume that I met with 24 of the groups (that may be a bit high) then ~96 hours of effort. **Documented as Staff time**		
LID Features in San Elijo Nature Center	DPR/DGS	CHU-WQEA5			
Compost Sock Demonstration Project, Poway Landfill	DPW - WPP	LP-WQEA12	S:\Watershed Project\Watershed Planning\01 Watersheds\Los Penasquitos\WURMP\WURMP Activities\Compost Sox at Poway Landfill; **MACTEC Project Number 5013-09-0005** S:\Watershed Project\WATER QUALITY\SCIENCE AND MONITORING\ADMIN\Contracts\F-40 Contracts\Mactec2008-2013\task orders\task02_compostdemo. **PO 542923**		1) Installation of BMPs at the Poway Landfill was completed August 2009, 2) Educational DVDs were created during FY 2008-09, 3) Wet weather monitoring and reporting will occur during FY 2009-10, 4) Outreach activities will occur during FY 2009-10.
Chollas Creek Runoff Reduction and Groundwater Recharge Project	DGS	SDB-050	IRWM Grant funded project (Prop 50?). Project Implemented by DGS		
Water Quality Monitoring at additional Mass Loading Stations	DPW - WPP	SDB-057. SMR-016	S:\Watershed Project\Watershed Planning\01 Watersheds\San Diego Bay\z_Archive\03-15 Old SD Bay Docs\Annual Reports\FY 08-09\FY08-09 County Activity Sheets Brown and Caldwell?		Brown and Caldwell contract 537276
Focused Outreach to Equestrian Community	DPW - WPP	SDB-066; SDR-A70; SLR-015	S:\Watershed Project\Watershed Planning\01 Watersheds\San Diego Bay\z_Archive\03-15 Old SD Bay Docs\Annual Reports\FY 09-10\09-10 Activities\New Activities		Meant to memic "Livestock to Land" program from Santa Cruz. SDB effort was done in partnership with Solana Center and North County was done by MRCD. Dates include 10/17/09, 10/18/09, 5/16/10, 5/28/10, 5/29/10, 6/19/10

Lakeside Baseball Park	DPR	SDR-A22	
Flinn Springs County Park Porous Paving Project	DPR	SDR-A27	
San Diego River Indicator Bacteria Study	DPW - WPP	SDR-A28	
Woodside Avenue Detention Basin	DPW - FCD	SDR-A32	
Project Clean Water SDR webpage	DPW - WPP	SDR-A46	
San Diego River Invasive Species Removal	?	SDR-A57	
Water Quality Monitoring in the San Diego River	DPW - WPP	SDR-A59	
Santa Maria Creek Protection and Restoration Project	DPR	SD-WQA1	
Ramona County Library Project	DGS?	SD-WQA23	LID BMPs adjacent to Library
Volunteer Clean Up Events	DPW - WPP	SD-WQA24, SDR-A58, SMR-018	Donation from BOS to Coast to Bay Clean ups. WPP got a chance to pick sites, in concert with I Love Clean SD and SLR Watershed Council.
San Luis Rey Watershed Water Quality Monitoring	DPW - WPP	SLR-001	
Guajome Lake Water Quality Monitoring Program	DPW - WPP	SLR-008	
Nutrient Source Identification and Abatement: Guajome Lake	DPW - WPP	SLR-009	
Hellhole Canyon County Park Educational Signage	DPR	SLR-019	
Fallbrook Community Center Artificial Turf	DPR	SLR-021	
Rainbowcreek.org website	DPW - WPP	SMR-005	Rainbow Creek 319(h) grant (1st one)
Focused Onsite Wastewater System Outreach	DPW - WPP	SMG-006	Rainbow Creek 319(h) grant (1st one)
Focused Grove and Nursery Outreach	DPW - WPP	SLR-016, SMG-007	Rainbow Creek 319(h) grant (1st one)
Focused Horse and Small Animal Operator Outreach	DPW - WPP	SMR-008	Rainbow Creek 319(h) grant (1st one)
Focused General Residential Outreach	DPW - WPP	SMR-009	Rainbow Creek 319(h) grant (1st one)
Rainbow Valley Groundwater Level Monitoring Network	DPW - WPP	SMR-010	Rainbow Creek 319(h) grant (1st one)
Rainbow Water Quality Monitoring	DPW - WPP	SMR-011	Rainbow Creek 319(h) grant (1st one)
Santa Margarita Lagoon Investigative Order Monitoring Program	DPW - WPP	SMR-015	
Water Quality Monitoring at additional Mass Loading Stations	DPW - WPP	SMR-016	
Parcel-based Characterization of Nutrient Sources in Rainbow	DPW - WPP	SMR-023	We could recover costs on this one
Fallbrook Library Green Roof	DGS	SMR-024	

San Elijo Pet Waste Study When was this done?

Laboratory Analysis to support the Poway Compost BMP Study
Enviromatrix Analytical, INC.
PO 531748

Invoices #	Date	Amount	Project
0100160	10/8/2010	$936.00	Poway Compost BMP Site
0080382	8/17/2010	$1,336.00	Poway Compost BMP Site
0070199	7/1/2010	$732.50	Calrsbad Special Sampling
0090552	9/29/2010	$165.00	San Diego Storm Drain Study
0090554	9/29/2010	$165.00	San Diego Storm Drain Study
0090555	9/29/2010	$165.00	San Diego Storm Drain Study

0090553	9/29/2010	$165.00	San Diego Storm Drain Study
0100087	10/5/2010	$165.00	San Diego Storm Drain Study
0100089	10/5/2010	$165.00	San Diego Storm Drain Study
0100088	10/5/2010	$165.00	San Diego Storm Drain Study
0090534	9/28/2010	$165.00	San Diego Storm Drain Study
0100110	10/6/2010	$165.00	San Diego Storm Drain Study
0100331	10/15/2010	$330.00	San Diego Storm Drain Study

Snapshot of SMR WURMP activities from WURMP Annual Reports that take credit for permit requried water quality and educational activities

FY 07/08

A total of six *WWQAs* were in an active implementation phase during FY 2007-08:

- SMR-003 Avocado Grove BMP Demonstration Project
- SMR-012 Vegetation and Compost Buffer Strip BMP Demonstration Project
- SMR-013 Irrigation and Fertilizer BMP Demonstration Project
- SMR-017 Land Acquisitions
- SMR-018 Cleanup Event Sponsorships
- SMR-021 Pet Waste Bag Dispenser Program in County Parks

A total of two WWQAs were initiated during FY 2007-08, but were not in an active implementation phase:

- SMR-002 Portable Constructed Biofilter BMP Demonstration Project
- SMR-004 Irrigation System Consultation and Monitoring

Additional water quality activities included three special monitoring studies and development of a nutrient reduction management plan for the Rainbow Creek Watershed:

- SMR-011 Rainbow Creek Water Quality Monitoring Program
- SMR-015 Santa Margarita Lagoon Investigative Order Monitoring Program
- SMR-016 Water Quality Monitoring at Additional Mass Loading Stations
- SMR-001 Rainbow Creek Nutrient Reduction Management Plan

A total of seven *WEAs* were in active implementation phase during FY 2007-08:

- SMR-005 Rainbowcreek.org Web Site
- SMR-006 Rainbow Valley Onsite Wastewater System Outreach
- SMR-007 Rainbow Valley Grove and Nursery Outreach
- SMR-008 Rainbow Valley Horse and Small Animal Operator Outreach
- SMR-009 Rainbow Valley General Residential Outreach
- SMR-010 Rainbow Valley Groundwater Monitoring Well Network
- SMR-014 Agricultural Technology Transfer
- SMR-022 Water Quality Runoff Management and Agricultural Waiver Workshop for Nurseries and Agricultural Businesses

One additional *WEA* was in a planning phase during FY 2007-08:

- SMR-020 LID & Watershed Planning Education for Community Planning/Sponsor Groups

G. Industrial and Commercial Sources Workgroup

Task	Description	Estimated Hours	Hourly Rate	Estimated Cost
Task 1 Meeting Support				
Subtask 1.A. Industrial and Commercial Sources Workgroup Meeting Support. Provide ongoing support for Industrial and Commercial Sources Workgroup meetings (research and develop written materials, preparing presentations, etc).				
Completion date	Ongoing (minimum quarterly)			
Party conducting work	Port/El Cajon			
Copermittee hourly costs	Senior Environmental Specialist	20	$ 69.05	$1,381
	Associate Civil Engineer	20	$ 69.00	$1,380
	Assistant Environmental Specialist	10	$ 49.10	$491
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$3,252**
Task 2 Development of Miscellaneous Work Products				
Subtask 2.A. Semi-annual Workgroup Update. Provide a written update describing the key activities and accomplishments of the Industrial and Commercial Sources Workgroup for the period of July 1 through December 31, 2008.				
Completion date	February 15, 2009			
Party conducting work	Port/El Cajon			
Copermittee hourly costs	Senior Environmental Specialist	10	$ 69.05	$691
	Associate Civil Engineer	10	$ 69.00	$690
		0		$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$1,381**
Subtask 2.B. FY Work Plans and Budgets. Develop for submittal to the Regional Program Planning Subcommittee the FY 2008-09 and FY 2009-10 work plans and budgets covering the planned activities of the Industrial and Commercial Sources Workgroup.				
Completion date	December 31, 2008			
Party conducting work	Port			
Copermittee hourly costs	Senior Environmental Specialist	20	$ 69.05	$1,381
		0	$ -	$0
		0	$ -	$0
Contract costs				$0

G. Industrial and Commercial Sources Workgroup

Task	Description	Estimated Hours	Hourly Rate	Estimated Cost
Contract management costs				$0
Other direct costs				$0
Total				$1,381

Subtask 2.C. FY 2007-08 Regional URMP Annual Report Input. Provide subject area content as requested for inclusion in the Copermittees' FY 2007-08 Regional URMP Annual Report.

Completion date	December 30, 2008			
Party conducting work	Port/El Cajon			
Copermittee hourly costs	Senior Environmental Specialist	10	$ 69.05	$691
	Associate Civil Engineer	10	$ 69.00	$690
		0	$ -	$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				$1,381

Subtask 2.D. Regional Program Approach. Develop for submittal to the Regional Program Planning Subcommittee a regional program approach for the management of industrial and commercial sources. This approach will include the integration of watershed assessments for inventories, BMPs, and compliance actions. Management questions will be developed during this FY to help guide development of regional work products. A phased approach should be considered with completion of a draft conceptual plan by June 2009. Further development and implementation of the program elements will occur in FY 09-10.

Completion date	Draft conceptual plan complete by 6/30/2009			
Party conducting work	Port/Vista			
Copermittee hourly costs	Senior Environmental Specialist	90	$ 69.05	$6,215
	Stormwater Program Manager	90	$ 68.78	$6,190
				$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				$12,405

Subtask 2.E. Regional Industrial and Commercial Facility Tracking. Develop standard templates for compiling and tracking industrial and commercial facility inventories. Ensure watershed scale interpretation can be accomplished through use of the templates.

Completion date	June 30, 2009
Party conducting work	Port

G. Industrial and Commercial Sources Workgroup

Task	Description	Estimated Hours	Hourly Rate	Estimated Cost
Copermittee hourly costs	Senior Environmental Specialist	40	$ 69.05	$2,762
	Assistant Environmental Specialist	80	$ 49.10	$3,928
		0	$ -	$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$6,690**

Subtask 2.F. Review Current Inspection Standards. Review Copermittee inspection forms to find common information collected by all. "Provide input to workgroup on how to develop a standard format for reporting inspection information that is commonly collected by Copermittees and/or that Copermittees agree would be useful and feasible to report on regional basis. Provide input to workgroup on how to develop inspection standards that can be implemented by all Copermittees.

Completion date	June 30, 2009			
Party conducting work	TBD - Sub group of the Ind/Comm Workgroup			
Copermittee hourly costs	TBD	80	$ 125.00	$10,000
		0		$0
		0	$ -	$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$10,000**

Subtask 2.G. Pilot Program Development and Implementation. Identify potential opportunities for pilot studies pertaining to industrial and commercial facilities. Opportunities could include BMP tests, regional waste collection efforts, facility enhancements or other ideas. Use of outside parties and/or agencies may be considered as part of this effort.

Completion date	Ongoing			
Party conducting work	TBD - based on pilot opportunities			
Copermittee hourly costs	TBD - standard budget placeholder for hrs/costs	60	$ 125.00	$7,500
		0	$ -	$0
		0	$ -	$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$7,500**

G. Industrial and Commercial Sources Workgroup

Task	Description	Estimated Hours	Hourly Rate	Estimated Cost
Subtask 2.H. Regional Mobile Business Program. Complete the development of a Regional Mobile Business Program to include at a minimum, (1) a regional inventory, and (2) regional minimum BMPs. Investigate feasibility of using a web portal to store mobile business information for the region.				
Completion date	June 30, 2009			
Party conducting work	Consultant (TBD) / Port			
Copermittee hourly costs	Assistant Environmental Specialist	80	$ 49.10	$3,928
		0	$ -	$0
		0	$ -	$0
Contract costs				$50,000
Contract management costs				$2,500
Other direct costs				$0
Total				**$56,428**

G. Industrial and Commercial Sources Workgroup

Task	Description	Estimated Hours	Hourly Rate	Estimated Cost
Subtask 2.I. Unallocated.				
Completion date	June 30, 2009			
Party conducting work	Consultant (TBD) / Port			
Copermittee hourly costs	Assistant Environmental Specialist	0	$ -	$0
		0	$ -	$0
		0	$ -	$0
Contract costs	5% of total working body budget generically assigned to contract costs.			$5,032
Contract management costs				$252
Other direct costs				$0
Total				**$5,284**
Total Estimated Cost				**$105,700**

2008-2009 Monitoring Program
Invoices Submitted by Copermittees

D. Monitoirng Workgroup and Sub-workgroups

Task 1 Meeting Support

	Budgeted	Invoiced	Amt Different	Copermit	Balance
Subtask 1.A Regional Monitoirng Workgroup Meeting Support	$1,482.00	$1,481.75	$0.25	County	$0.25
Subtask 1.B Dry Weather Monitoring Meeting Support					
D-Max Engin contract	$12,600.00	$9,891.00	$2,709.00	La Mesa	
H. Perry	$0.00	$1,602.13	($1,602.13)	Santee	
					$1,106.87
Subtask 1.C Coastal Storm Drain Monitoring Support					
Annual Report Prep	$741.00	$5,987.30	($5,246.30)	Port	
Annual Report Prep	741.00	$3,603.75	($2,862.75)	Carlsbad	
					($8,109.05)
Task 2 Development of Miscellaneous Work Products					
Subtask 2.A Semi-annual Workgroup Update	593.00	$0.00	$593.00		593
Subtask 2B. FY2009-10 Work Plan and Budget	1,482.00	$1,481.75	$0.25	County	0.25
Subtask 2.C. FY2007-08 Regional URMP Annual Report	237.00	$45.78	$191.22	Santee	
					$191.22
Subtask 2.D. FY2008-09 Source Identification Work Plan					
Weston	10,000.00	$10,000.00	$0.00		0
5% mark up	500.00	$500.00	$0.00	County	0
Subtask 2.E. FY2009-10 Source Identfication Plan					
Weston	10,000.00	$10,000.00	$0.00		0
includes 5 % mark up	500.00	$500.00		County	0

	Budgeted	Invoiced	Amt Different	Copermit	Balance
Subtask 2.F. Targeted Wet Weather MS4 Program					
Weston	8,000.00	$5,205.00	$2,795.00		$2,795.00
includes 5 %mark up	400.00	$260.25	$139.75	County	$139.75
Task 3. Regional Monitoring Program					
Subtask 3.A Regional Monitoring Program					
Weston	1,566,963.00	$1,536,963.00	$30,000.00		
SCCWRP- wetlands	143,541.00	$143,541.00	$0.00		
SCCWRP- Microbiol	189,823.00	$0.00	$189,823.00		
Consultant mark up 5%	95,016.35	84,025.20	$10,991.15	County	
Total	$1,995,343.35	$1,764,529.20	$230,814.15		$230,814.15
Subtask 3.B. Southern California Stormwater Monitoring Coalition					
SCCWRP/San Bernardino	30,000.00	25,000.00	$5,000.00	County	
Consultant mark up 5%	1,500.00	1,250.00	$250.00	County	
Total	31,500.00	26,250.00	$5,250.00	County	$5,250.00

Total to carry over to 2009-2010	$232,781.44
includes carry over for SCCWRP- Bight 08 Microbiology Study	$189,823.00
with 5% consultant mark up for Bight 08Microbiology Study	$9,491.15
Total of uncommited funds to carry over to 2009-2010	$33,467.29

D. Monitoring Workgroup and Sub-workgroups

Task	Description	Estimated Hours	Hourly Rate	Estimated Cost
Task 1 Meeting Support				
Subtask 1.A. Regional Monitoring Workgroup Meeting Support. Provide ongoing support for Regional Monitoring Workgroup meetings (research and develop written materials, preparing presentations, etc).				
Completion date	Ongoing (minimum quarterly)			
Party conducting work	County			
Copermittee hourly costs	Supervising Environmental Health Specialist	25	59.27	$1,482
		0	0	$0
		0	0	$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$1,482**
Subtask 1.B. Dry Weather Monitoring Sub-workgroup Meeting Support. Provide ongoing support for Dry Weather Monitoring Sub-workgroup meetings (research and develop written materials, preparing presentations, etc).				
Completion date	Ongoing (minimum quarterly)			
Party conducting work	Consultant (D-MAX Engineering)			
Copermittee hourly costs		0	0	$0
		0	0	$0
		0	0	$0
Contract costs	Contract to be administered by the City of La Mesa; The City will be credited for contract-related expenditures in FY 2009-10. Contract will be for the evaluation of historical data to update Dry Weather Action Levels. Exact scope TBD by Dry Weather Workg			$12,000
Contract management costs				$600
Other direct costs				$0
Total				**$12,600**
Subtask 1.C. Coastal Storm Drain Monitoring Sub-workgroup Meeting Support. Provide ongoing support for Coastal Storm Drain Monitoring Sub-workgroup meetings (research and develop written materials, preparing presentations, etc).				
Completion date	Ongoing (minimum quarterly)			
Party conducting work	Divided amongst sub-workgroup members			
Copermittee hourly costs	Supervising Environmental Health Specialist	25	59.27	$1,482
		0	0	$0
		0	0	$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0

D. Monitoring Workgroup and Sub-workgroups

Task	Description	Estimated Hours	Hourly Rate	Estimated Cost
Total				**$1,482**
Task 2 Development of Miscellaneous Work Products				
Subtask 2.A. Semi-annual Workgroup Update. Provide as requested by the Program Planning Subcommittee a written update describing the key activities and accomplishments of the Regional Monitoring Workgroup and its sub-workgroups for the period of July 1 through December 31, 2007.				
Completion date	February 15, 2009			
Party conducting work	County			
Copermittee hourly costs	Supervising Environmental Health Specialist	10	59.27	$593
		0	0	$0
		0	0	$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$593**
Subtask 2.B. FY 2009-10 Work Plan and Budget. Develop for submittal to the Regional Program Planning Subcommittee a FY 2009-10 work plan and budget covering the planned activities of the Regional Monitoring Workgroup and its sub-workgroups.				
Completion date	November 30, 2008			
Party conducting work	County			
Copermittee hourly costs	Supervising Environmental Health Specialist	25	59.27	$1,482
		0	0	$0
			0	$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$1,482**
Subtask 2.C. FY 2007-08 Regional URMP Annual Report Input. Provide subject area content as requested for inclusion in the Copermittees' FY 2007-08 Regional URMP Annual Report.				
Completion date	November 30, 2008			
Party conducting work	County			
Copermittee hourly costs	Supervising Environmental Health Specialist	4	59.27	$237
		0	0	$0
		0	0	$0
Contract costs				$0
Contract management costs				$0

D. Monitoring Workgroup and Sub-workgroups

Task	Description	Estimated Hours	Hourly Rate	Estimated Cost
Other direct costs				$0
Total				**$237**

Subtask 2.D. FY 2008-09 Source Identification Work Plan. Consultant will develop the detailed work plan for the residential source identification project identified in the Source Identification Monitoring Program submitted to the RWQCB on July 1, 2008.

Completion date	April 1, 2009			
Party conducting work	County			
Copermittee hourly costs		0	$0	$0
		0	0	$0
		0	0	$0
Contract costs				$10,000
Contract management costs				$500
Other direct costs				$0
Total				**$10,500**

Subtask 2.E. FY 2009-10 Source Identification Work Plan. Consultant will develop a Source Identification Program Project to satisfy Permit requirements for the 2009-2010 monitoring year and will be submitted with the Scope of Work due September 1, 2009

Completion date	August 1, 2009			
Party conducting work	Consultant (TBD)			
Copermittee hourly costs		0	$0	$0
		0	0	$0
		0	0	$0
Contract costs				$10,000
Contract management costs				$500
Other direct costs				$0
Total				**$10,500**

Subtask 2.F. Targeted Wet Weather MS4 Program. In the June 30, 2008 MS4 Monitoring Program submitted to the RWQCB, Coeprmittees committed to providing the details of the targeted weather portion of the program in 2009. This will be included in the Scope of Work to be submitted to the RWQCB on September 1, 2008.

Completion date	August 1, 2009			
Party conducting work	Consultant (TBD)			
Copermittee hourly costs		0	$0	$0
				$0
				$0
Contract costs				$8,000

D. Monitoring Workgroup and Sub-workgroups

Task	Description	Estimated Hours	Hourly Rate	Estimated Cost
Contract management costs				$400
Other direct costs				$0
Total				**$8,400**
Task 3 Regional Monitoring Program				
Task 3.A. Regional Monitoring Program. As directed, develop and implement regional monitoring programs and activities to satisfy the requirements of Receiving Waters and Urban Runoff Monitoring and Reporting Program No. R9-2007-0001 and other regional initiatives.				
Completion date	Ongoing			
Party conducting work	Consultant (Weston Solutions)			
Copermittee hourly costs		0	$0	$0 $0 $0
Contract costs	Consultant contract administered by County (see Contract 514270); Consultant expenses are invoiced and paid approximately monthly.			$1,900,330
Contract management costs				$95,017
Other direct costs				$0
Total				**$1,995,347**
Task 3.B. Southern California Stormwater Monitoring Coalition. As directed by Copermittees, partner with other municipalities and the RWQCBs in Southern California to improve our understanding of stormwater.				
Completion date	Ongoing			
Party conducting work	Consultants (TBD)			
Copermittee hourly costs		0	$0	$0 $0 $0
Contract costs	Memorandum of Agreement and subsequent research implementation agreements are administered by County; Payments are made approximately annually.			$30,000
Contract management costs				$1,500
Other direct costs				$0
Total				**$31,500**
Task 3.C. Unallocated.				
Completion date	Ongoing			
Party conducting work	Consultants (TBD)			
Copermittee hourly costs		0	$0	$0 $0 $0

D. Monitoring Workgroup and Sub-workgroups

Task	Description	Estimated Hours	Hourly Rate	Estimated Cost
Contract costs	Nothing assigned to "unallocated" because Task 3.A includes "as-needed" in consultant scope.			$0
Contract management costs				$0
Other direct costs				$0
Total				**$0**
Total Estimated Cost				**$2,074,122**

Subtask 2.C. FY 2007-08 Regional URMP Annual Report Input. Provide subject area content as requested for inclusion in the Copermittees' FY 2007-08 Regional URMP Annual Report.				
Completion date	December 30, 2008			
Party conducting work	TBD			
Copermittee hourly costs	TBD - Standard budget placeholder for hrs/costs	16	$ 125.00	$2,000
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$2,000**
Subtask 2.D. Explore Regional Program Approach. The group will seek to identify portions of the municipal program where workgroup members feel some additional guidance from a regional group might be helpful and develop an approach toward creating such guidance where applicable and feasible. The group will explore whether there may be areas where regional data reporting standardization may be beneficial and feasible for elements of the municipal program. The work product for this task will be a written document listing the areas and approaches identified and developed through the process described above. Further development and implementation of areas identified during this process will also likely continue into FY 09-10.				
Completion date	Draft conceptual plan complete by 6/30/2009			
Party conducting work	TBD			
Copermittee hourly costs	TBD - Standard budget placeholder for hrs/costs	130	$ 125.00	$16,250
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$16,250**
Subtask 2.E. Pilot Program Development and Implementation. Identify potential opportunities for pilot studies pertaining to municipal facilities and/or activities. Opportunities could include BMP tests, regional waste collection efforts, facility enhancements, irrigation control projects, or other ideas. Use of outside parties and/or agencies may be considered as part of this effort.				
Completion date	Ongoing			
Party conducting work	TBD - based on pilot opportunities			
Copermittee hourly costs	TBD - standard budget placeholder for hrs/costs	150	$ 125.00	$18,750
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$18,750**

Copermittee hourly costs	Land Use / Environmental Planning Manager	4	$ 72.20	$289
			$ -	$0
			$ -	$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$289**

H. Regional WURMP Workgroup (FY 2008-09)

Task	Description	Estimated Hours	Hourly Rate	Estimated Cost
Subtask 2.C. Watershed Activities Database. Develop a database of watershed activities currently being implemented or planned throughout the San Diego region. Develop a template or form to be used to populate the database, which will be used as a tool for sharing information about pilot projects and other relevant watershed activities across watershed groups. The template/form will include information on activity type, pollutants addressed, pollutant sources addressed, effectiveness measurements, costs, staff burden, and other data to be determined.				
Completion date	March 15, 2009			
Party conducting work	County of San Diego			
Copermittee hourly costs	Land Use / Environmental Planning Manager	20	$ 72.20	$1,444
	Land Use / Environmental Planner III	120	$ 63.43	$7,612
			$ -	$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$9,056**
Subtask 2.D. Development of Watershed Program Approach. Correspondence and coordination with RWQCB staff in response to the comments and recommendations contained in the RWQCB's WURMP correspondence dated September 23, 2008. Activities may include coordination of meetings between RWQCB staff and Copermittees, communication with RWQCB on potential revisions to Permit language and/or WURMP Annual Reporting procedures as determined necessary.				
Completion date	June 30, 2009			
Party conducting work	County of San Diego, City of Carlsbad, and City of Escondido			
Copermittee hourly costs	Land Use / Environmental Planning Manager (County)	25	$ 72.20	$1,805
	Land Use / Environmental Planner III (County)	25	$ 63.43	$1,586
	Environmental Programs Manager (City of Carlsbad)	25	$ 64.31	$1,608
	Environmental Programs Manager (City of Escondido)	25	$ 55.00	$1,375
			$ -	$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$6,374**
Subtask 2.E. Consistent Approaches to TMDL Implementation Planning. Develop a regional template or strategy to encourage consistent approaches to TMDL implementation planning across watersheds.				
Completion date	December 1, 2009			
Party conducting work	Consultant (TBD)			
Copermittee hourly costs			$ -	$0
			$ -	$0
			$ -	$0
Contract costs				$61,135
Contract management costs				$3,057
Other direct costs				$0

H. Regional WURMP Workgroup (FY 2008-09)

Task	Description	Estimated Hours	Hourly Rate	Estimated Cost
Total				**$64,192**
Subtask 2.F. Unallocated.				
Completion date	Ongoing			
Party conducting work	TBD			
Copermittee hourly costs			$ -	$0
			$ -	$0
			$ -	$0
Contract costs	5% of total working body budget generically assigned to contract costs.			$4,178
Contract management costs				$209
Other direct costs	4387			$0
Total				**$4,387**
Total Estimated Cost				**$87,731**

TAX	
TOTAL	**$40,000.00** OK

TERMS

X UltraStar Cinemas agrees to exhibit, prior to each theatrical movie that plays trailers, as part of their movie trailer reel, One (1) Think Blue PSA.

X UltraStar Cinemas will run provided PSA's starting on or before May 15th 2010 and ending September 15th 2010.

X The City of San Diego and Think Blue will provide, at their sole expense, one PSA in a Jpeg 2000 DCP that is compatible with UltraStar's DLP cinema projectors.

X The City Of San Diego and Think Blue will hold UltraStar Cinema harmless for unforeseen equipment failure and other acts of god that may prevent PSA from being shown. UltraStar will make its best effort to present PSA on every screen for every show during the agreed period of time.

Please sign that you accept the following terms for your group and that you agree to pay all listed charges.
Your signature will lock in the date of your event.

Renters Name Title Date

Thank you for choosing Ultra Star Cinemas.

Subject: RE: Emailing: CommCinema Invoice 07-21-09 for San Marcos.pdf

Hi Scott,

I have a favor to ask of you. Would you please split the invoice as follows?

$1000 billed to:

City of San Marcos
Attn: Stormwater Program Manager
201 Mata Way
San Marcos, CA 92069

This bill should be for:
Stormwater Public Education Outreach at Movie in the Park (July 18, 2009)
You can email it to Erica Ryan at eryan@san-marcos.net
Please cc me on this also.

$1100 billed to:

City of San Marcos
(info same as last invoice)

Thanks
Cathy 760-744-9000 Ext. 3504

			****	1044	116	****	10/1/2008	10/2/2008	5.50	97.76	537.68
Lesson from Josh Fluty of how to create an ACCESS sheet using various scripts. Begin creating a list of data to fill gaps in Fallbrook											
			****	1044	116	****	10/2/2008	10/2/2008	8.00	97.76	782.08
Finish creating a list of data to fill gaps in Fallbrook QA/QC Janelle's list of data Begin work on Bonita ACCESS data											
			****	1044	116	****	10/3/2008	10/9/2008	0.50	97.76	48.88
Began Escondido, but stopped when I found out Janelle had already begun work on the ACCESS database.											
			****	1044	116	****	10/7/2008	10/9/2008	3.00	97.76	293.28
Began Bonita ACCESS database Began Ramona ACCESS database											
			****	1044	116	****	10/8/2008	10/9/2008	8.00	97.76	782.08
10am meeting to discuss data holdups and a plan of action Purchase NOAA hourly data (between 1973 and 1981) for Santee and San Vicente region to fulfill a minimum 35 years of record delivery. Error with data purchase, left message with NOAA to confirm availability Revised San Vicente Data to include precipitation values (inches) instead of just bucket tips. Still missing applicable codes to define an aggregate count. Update and print Figure 1 - Rainfall station map for Eric M.											
			****	1044	116	****	10/9/2008	10/9/2008	8.00	97.76	782.08
Download NOAA hourly data (between 1973 and 1981) for Santee and San Vicente region to fulfill a minimum 35 years of record delivery. Discussion with NOAA to consider a more tabular source of data. Confirmed that the new source is less expensive to buy and already in a tabular form (though it is purchased by station). Purchased NOAA hourly data in tabular form. Begin filling in the 1973-1981 data gap.											
			****	1044	116	****	10/10/2008	10/16/2008	7.00	97.76	684.32
Problem ordering the delineated data from NOAA website. Had to spend time with the customer service department to properly download. Finish converting the El Capitan station data set to our required format for San Vicente and Santee. No other stations need this large sum of supplemental data. Quick check for dataset against separate NOAA paperwork for consistency.											
			****	1044	116	****	10/13/2008	10/16/2008	6.00	97.76	586.56
Insert appropriate ACCESS data for San Vicente and Santee. Setup a revised san Vicente and Santee data set for missing codes/precipitation values. Told to stop and wait for Rand to insert his own codes and comments. Proceeded to focus on setup of the Bonita and Oceanside ACCESS data sets. The failure of the P drive caused a temporary loss of data.

San Diego HMP - preparation of PowerPoint presentation for San Diego HMP TAC meeting; attendance and presentation at San Diego HMP TAC meeting; coordination with fellow presenters Eric Stein and Andy Collison prior to TAC meeting; address comments made by Coastkeeper											
			****	1044	112	****	10/1/2009	10/1/2009	4.00	200.10	800.40
San Diego HMP - provide SCCWRP screening tools for distribution to the TAC; coordination with PWA and review of PWA critical shear stress calculator (note problems with the calculator); update to HMP Decision Matrix to describe process for determining lower flow threshold; prepare recommendations for minimum outlet orifice sizing; finalize and submit Scope of Work for HMP Sizing Calculator											
			****	1044	112	****	10/7/2009	10/8/2009	1.75	200.10	350.18
San Diego HMP - updates to Decision Matrix and Minimum Orifice Size technical memos											
			****	1044	112	****	10/8/2009	10/8/2009	1.50	200.10	300.15
San Diego HMP - review meeting minutes from Sept 30th TAC meeting; prepare summary notes from progress meeting with Sara Agahi; develop agenda for October 16th TAC meeting; post flow threshold memo to ftp site; review of flow threshold memo and lower flow calculator											
			****	1044	112	****	9/11/2009	9/17/2009	1.00	200.10	200.10
Meeting with Andy Baldwin to discuss final scoping for San Diego Sizing Calculator											
			****	1044	112	****	9/14/2009	9/17/2009	2.00	200.10	400.20
San Diego HMP - preparation of draft monitoring plan for submittal to the Copermittees and TAC and inclusion into Final HMP											
			****	1044	112	****	9/15/2009	9/17/2009	6.50	200.10	1,300.65
San Diego HMP - provide vegetated swale information related to SUSMP update; consult with Dan Cloak regarding cumulative watershed impact issue and coordinate preparation of 1-page memo detailing issues; provided draft Caltrans HMP decision matrix to Sara for review; updates to draft HMP Decision Matrix; provided draft to Sara, Nancy and Lisa; updates draft San Diego HMP Outstanding Items memo and distributed the draft to Sara, Lisa and Nancy; prepared updates to draft San Diego HMP Decision Matrix Guide technical memo											
			****	1044	112	****	9/16/2009	9/17/2009	4.50	200.10	900.45
Coordination with PWA regarding the submittal of PWA outstanding Technical Reports, responses to RWQCB comments, and lower flow threshold calculator; prepared updates to draft San Diego HMP Decision Matrix Guide technical memo and provided the draft to Sara, Nancy and Lisa; preparation of draft San Diego HMP Design Standards memo and provided draft to Sara, Nancy and Lisa											
			****	1044	112	****	9/17/2009	9/17/2009	3.50	200.10	700.35
Coordination with PWA regarding the submittal of PWA outstanding Technical Reports, responses to RWQCB comments, and lower flow threshold calculator; consult with Dan Cloak regarding cumulative watershed impact issue and coordinate preparation of 1-page memo detailing issues; San Diego HMP - preparation of draft monitoring plan for submittal to the Copermittees and TAC and inclusion into Final HMP; provide draft to Sara, Lisa and Nancy for review

Monika Smoczynski
City of San Diego
Metropolitan Wastewater Division
9192 Topaz Way, MS 901
San Diego, California 92123

Subject: Progress Billing Report – City of San Diego Metropolitan Wastewater District As Needed Agreement for Engineering Services 2008-2011

Dear Ms. Smoczynski:

Enclosed with this progress report are Brown and Caldwell's most recent progress billings dated July 2, 2010, for services rendered during the period of May 28, 2010 through June 30, 2010 totaling $47,846.38.

Status Report for Active Task Orders Under the City of San Diego 2008-2011 As Needed Wastewater Contract

Task Order Number	Task Order Name	Description of Work Performed	Progress Percent or Deliverables Completed	Description of Potential Cost Over-runs	Invoice Number	Invoice Amount
8	Storm Water Funding Strategy Development	• Worked on BMP Incentives. • Review Merit invoices.	• 88% Complete	None	44127882	$8,937.88
14	Storm Water Standards Update	• Preparation of draft final Storm Water Standards Manual.	• 82% Complete	None	44127889	$6,524.50
21	San Diego Hydromodification Management Plan	• Sizing factor analysis; pond sizer analysis; HMP monitoring plan development.	• 90% Complete	None	44127890	$32,384.00
					Total for Invoices	$47,846.38

If you have any questions regarding the attached invoices or any previous invoices please contact Victor Occiano at (858) 571-6715 or myself at (858) 571-6726.

Very truly yours,

BROWN AND CALDWELL

D. Monitoring Workgroup and Sub-workgroups				FY 2010-11
Task	**Description**	**Estimated Hours**	**Hourly Rate**	**Estimated Cost**
Task 1 Meeting Support				
Subtask 1.A. Regional Monitoring Workgroup Meeting Support. Provide ongoing support for Regional Monitoring Workgroup meetings (research and develop written materials, preparing presentations, etc).				
Completion date	Ongoing (minimum quarterly)			
Party conducting work	County			
Copermittee hourly costs	Program Coordinator	72	59.27	$4,267
		0	0	$0
		0	0	$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$4,267**
Subtask 1.B. Dry Weather Monitoring Sub-workgroup Meeting Support. Provide ongoing support for Dry Weather Monitoring Sub-workgroup meetings (research and develop written materials, preparing presentations, etc).				
Completion date	Ongoing (minimum quarterly)			
Party conducting work	Divided amongst sub-workgroup members			
Copermittee hourly costs	Santee	20	59.27	$1,185
	Poway	20	59.27	$1,185
		0	0	$0
Contract costs	Contract to be administered by the City of La Mesa; The City will be credited for contract-related expenditures in FY 2009-10. Contract will be for the evaluation of historical data to update Dry Weather Action Levels. Exact scope TBD by Dry Weather Workgroup			$0
Contract management costs				$0
Other direct costs				$0
Total				**$2,371**
Subtask 1.C. Coastal Storm Drain Monitoring Sub-workgroup Meeting Support. Provide ongoing support for Coastal Storm Drain Monitoring Sub-workgroup meetings (research and develop written materials, preparing presentations, etc). Includes Prepraring annual report.				
Completion date	Ongoing (minimum quarterly)			
Party conducting work	Divided amongst sub-workgroup members			
Copermittee hourly costs	Port of San Diego	15	59.27	$889
	City of Carlsbad	15	59.27	$889
		0	0	$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$1,778**

D. Monitoring Workgroup and Sub-workgroups FY 2010-11

Task	Description	Estimated Hours	Hourly Rate	Estimated Cost
Task 2 Development of Miscellaneous Work Products				
Subtask 2.A. Semi-annual Workgroup Update. Provide as requested by the Program Planning Subcommittee a written update describing the key activities and accomplishments of the Regional Monitoring Workgroup and its sub-workgroups for the period of July 1 through December 31, 2010.				
Completion date	February 15, 2011			
Party conducting work	County			
Copermittee hourly costs	Program Coordinator	10	59.27	$593
		0	0	$0
		0	0	$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$593**
Subtask 2.B. FY 2011-12 Work Plan and Budget. Develop for submittal to the Regional Program Planning Subcommittee a FY 2011-12 work plan and budget covering the planned activities of the Regional Monitoring Workgroup and its sub-workgroups.				
Completion date	November 30, 2010			
Party conducting work	County			
Copermittee hourly costs	Program Coordinator	25	59.27	$1,482
		0	0	$0
			0	$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$1,482**
Subtask 2.C. FY 2009-10 Regional URMP Annual Report Input. Provide subject area content as requested for inclusion in the Copermittees' FY 2009-10 Regional URMP Annual Report.				
Completion date	November 30, 2010			
Party conducting work	County			
Copermittee hourly costs	Program Coordinator	30	59.27	$1,778
		0	0	$0
		0	0	$0

G. Industrial and Commercial Sources Workgroup

FY 2010-11, modified Nov 2010 with roll-overs

Task	Description	Estimated Hours	Hourly Rate	Estimated Cost
Subtask 2.F. Develop Regional Inspection Standards. Identify common pollutant generating activities and BMPs. Develop regional guidance for inspectors to achieve regional consistency during inspections. Standardize information collected during inspections so that facility and/or BMP assessments can occur at regional and/or watershed levels.				
Completion date	June 30, 2011			
Party conducting work	City of Poway (sub-workgroup lead)			
Copermittee hourly costs	Engineering Technician II	40	47.31	$1,892
		0	0.00	$0
		0	0.00	$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$1,892**
Subtask 2.G. San Diego River Watershed Core BMP Pilot Program. Collaborate with the San Diego River Watershed to implement the Core IC Regional BMPs at the identified high priority pollutant generating sources. Conduct assessments to determine 1) the appropriateness of BMP guidance standards in achieving regional inspection consistency, 2) the percentage of properly implemented BMPs, and 3) the effectiveness of proper BMP implementation in reducing pollutants. Coordination with SD River consultants may also be included to conduct monitoring to assess BMP effectiveness and pollutant reductions.				
Completion date	Ongoing			
Party conducting work	City of El Cajon			
Copermittee hourly costs	Associate Civil Engineer - City of El Cajon	20	69.00	$1,380
		0	0.00	$0
		0	0.00	$0
Contract costs				$0
Contract management costs				$0
Other direct costs				$0
Total				**$1,380**
Subtask 2.H. Regional Mobile Business Program. Provide as-needed support and maintenance of the Regional Mobile Businesses Database. Efforts include report enhancements, minor website refinements, and data adjustments, where applicable. Also includes cost for hosting database on external website and providing user reports and staticstics to the workgroup.				
Completion date	Ongoing			
Party conducting work	Port of San Diego with consultant support (TBD)			
Copermittee hourly costs	Assistant Environmental Specialist - Port	16	49.10	$786
	Senior Environmental Specialist - Port	5	69.05	$345
		0	0.00	$0
Contract costs	Includes roll-over from FY 09-10. Put $9,700 inot contract costs.			$16,700
Contract management costs				$835
Other direct costs				$0
Total				**$18,666**

G. Industrial and Commercial Sources Workgroup

FY 2010-11, modified Nov 2010 with roll-overs

Task	Description	Estimated Hours	Hourly Rate	Estimated Cost
Subtask 2.I. BMP Toolbox Website Improvements. Coordinate with County consultant to improve BMP Toolbox website. Incorporate Regional IC Workgroup BMP information into website where applicable. If needed, provide consultant services to improve website				
Completion date	June 30, 2011			
Party conducting work	TBD			
Copermittee hourly costs	Copermittee TBD - cost estimated	20	70.00	$1,400
		0	0.00	$0
		0	0.00	$0
Contract costs				$9,000
Contract management costs				$450
Other direct costs				$0
Total				**$10,850**
Subtask 2.J. Regional IC Education and Training Events. Conduct regional training events for IC inspectors (and code compliance personnel). Events will be geared at improving consistency of documenting BMP implementation and determining proper BMP implementation. Regional education materials for municipal inspection staff and also for business may also be developed as a part of this task.				
Completion date	TBD			
Party conducting work	TBD			
Copermittee hourly costs	Copermittee TBD - cost estimated	20	70.00	$1,400

G. Industrial and Commercial Sources Workgroup

Approved March 2010, modified Nov 2010

Task	Description	Estimated Hours	Hourly Rate	Estimated Cost	Port of San Diego	City of El Cajon	City of Vista	City of Poway	County of San Diego	Not Assigned
Task 1 Meeting Support										
Subtask 1.A. Industrial and Commercial Sources Workgroup Meeting Support. Provide ongoing support for Industrial and Commercial Sources Workgroup meetings (research and develop written materials, preparing presentations, etc).										
Completion date	As-needed (minimum quarterly)									
Party conducting work	Port of San Diego and City of El Cajon									
Copermittee hourly costs	Senior Environmental Specialist - Port	20	69.05	$1,381	$1,381					
	Associate Civil Engineer - City of El Cajon	20	69.00	$1,380		$1,380				
	Assistant Environmental Specialist - Port	10	49.10	$491	$491					
Contract costs				$0						
Contract management costs				$0						
Other direct costs				$0						
Total				**$3,252**						
Task 2 Development of Miscellaneous Work Products										
Subtask 2.A. Semi-annual Workgroup Updates. Provide written updates describing the key activities and accomplishments of the Industrial and Commercial Sources Workgroup.										
Completion date	August 15, 2010 and February 15, 2011									
Party conducting work	Port of San Diego and City of El Cajon									
Copermittee hourly costs	Senior Environmental Specialist - Port	2.5	69.05	$173	$173					
	Associate Civil Engineer - City of El Cajon	2.5	69.00	$173		$173				
		0	0.00	$0						
Contract costs				$0						
Contract management costs				$0						
Other direct costs				$0						
Total				**$345**						
Subtask 2.B. FY 2011-12 Work Plan and Budget. Develop for submittal to the Regional Program Planning Subcommittee a FY 2011-12 work plan and budget covering the planned activities of the Industrial and Commercial Sources Workgroup.										
Completion date	November 30, 2010									
Party conducting work	Port of San Diego and City of El Cajon									
Copermittee hourly costs	Senior Environmental Specialist - Port	5	69.05	$345	$345					
	Associate Civil Engineer - City of El Cajon	5	69.00	$345		$345				
		0	0.00	$0						
Contract costs				$0						
Contract management costs				$0						
Other direct costs				$0						
Total				**$690**						

G. Industrial and Commercial Sources Workgroup

Approved March 2010, modified Nov 2010

Task	Description	Estimated Hours	Hourly Rate	Estimated Cost	Port of San Diego	City of El Cajon	City of Vista	City of Poway	County of San Diego	Not Assigned
Subtask 2.C. FY 2009-10 Regional URMP Annual Report Input. Provide subject area content as requested for inclusion in the Copermittees' FY 2009-10 Regional URMP Annual Report.										
Completion date	November 30, 2010									
Party conducting work	Port of San Diego and City of El Cajon									
Copermittee hourly costs	Senior Environmental Specialist - Port	5	69.05	$345	$345					
	Associate Civil Engineer - City of El Cajon	5	69.00	$345		$345				
		0	0.00	$0						
Contract costs				$0						
Contract management costs				$0						
Other direct costs				$0						
Total				**$690**						
Subtask 2.D. Regional Program Approach - IC Conceptual Plan Review. The conceptual plan was finalized in FY2009-10 and is the guidance document for developing future work plan tasks and budgets. This guidance document will be reviewed and revised as needed annually.										
Completion date	Ongoing									
Party conducting work	Port of San Diego									
Copermittee hourly costs	Senior Environmental Specialist - Port	8	69.05	$552	$552					
		0	0.00	$0						
		0	0.00	$0						
Contract costs				$0						
Contract management costs				$0						
Other direct costs				$0						
Total				**$552**						
Subtask 2.E. Regional Reporting and Assessment Standards. Develop regional minimum standards for reporting IC related information in a manner that facilitates watershed and/or regional assessments. Incorporate relevant regional/watershed IC data and findings into annual reports (JURMP, RURMP, WURMP) and other Permit-required documents (ROWD, BLTEA), where applicable.										
Completion date	June 30, 2011									
Party conducting work	Port of San Diego and Consultant TBD									
Copermittee hourly costs	Senior Environmental Specialist - Port	0	69.05	$0						
	Assistant Environmental Specialist - Port	0	49.10	$0						
		0	0.00	$0						
Contract costs				$20,000	$20,000					
Contract management costs				$1,000	$1,000					
Other direct costs				$0						
Total				**$21,000**

H. Regional WURMP Workgroup (FY 2010-11)

Approved on January 2010, amended January 2011

Task	Description	Estimated Hours	Hourly Rate	Estimated Cost	County of San Diego	City of Carlsbad	City of Escondido	City of San Diego	Port of San Diego	Not Assigned
Subtask 2.F. Watershed Activities Database. Develop a database of watershed activities currently being implemented or planned throughout the San Diego region. Develop a template or form to be used to populate the database, which will be used as a tool for sharing information about pilot projects and other relevant watershed activities across watershed groups. The template/form will include information on activity type, pollutants addressed, pollutant sources addressed, effectiveness measurements, costs, staff burden, and other data to be determined.
