Appendix 9-1: C.9.a Adopted Pollution Prevention Policy

City of San José, California

COUNCIL POLICY

TITLE POLLUTION PREVENTION	PAGE 1 of 2	POLICY NUMBER 4-5
EFFECTIVE DATE May 24, 1994	REVISED DATE June 24, 2003	
APPROVED BY COUNCIL ACTION		

BACKGROUND

Pollution prevention is a key element of environmental protection. In addition to compliance with regulatory requirements, implementation of measures to prevent and reduce pollutants that can cause water quality impairment, air pollution, and the generation of hazardous waste can have the following beneficial effects:

- Improving the protection of human health and the environment;
- Improving air and water quality;
- Reducing or eliminating inventories and possible releases of hazardous materials;
- Enhancing organizational reputation and image;
- Enhancing City's role as model for local businesses;
- Minimizing quantities of hazardous waste generated, thereby reducing waste disposal and compliance costs;
- Possibly decreasing future Superfund and RCRA liabilities, as well as future toxic tort liabilities.

PURPOSE AND SCOPE

It is the purpose of this policy to protect water and air quality by minimizing the release of pollutants and the generation of hazardous wastes through the reduced use, recycling, and proper disposal of materials from City operations.

POLICY

It is the policy of the City of San José to minimize the release of pollutants into the water and air and reduce the generation of hazardous wastes by adopting the following practices:

1. Whenever feasible, the use of hazardous materials will be minimized at the source.
2. The City will seek, in its procurement processes, to eliminate the unnecessary use of hazardous substances and toxic chemicals. The City will take into account factors such as risk; the availability, cost, and performance of substitutes and process changes; and life-cycle costs including final disposal costs.
3. The City will practice pollution prevention, which is defined as source reduction and other practices that reduce the amount of pollutants entering a waste stream prior to out-of-process recycling, treatment, or disposal. Prevention includes improvements in processes, such as the substitution with less-or non-toxic materials, redesign of products to reduce environmental impacts, in-process recycling, modification of equipment, and housekeeping measures such as improved maintenance. It encompasses increased efficiency in the use of energy and water, and other practices that can protect natural resources through conservation.

TITLE POLLUTION PREVENTION	PAGE 2 of 2	POLICY NUMBER 4-5

4. The City will seek to minimize the use of pesticides in City operations to the maximum extent practicable. In particular, the City will use organophosphate and copper-based pesticides only when their use is justified and adverse water quality impacts are minimized. The City will reduce, phase-out, and ultimately eliminate the use of pesticides that cause impairment of surface waters. To minimize the use of pesticides, the City will incorporate Integrated Pest Management (IPM) techniques into City operations. IPM is an ecosystem-based strategy that focuses on long-term prevention of pests or their damage through a combination of techniques such as biological control, habitat manipulation, modification of cultural practices, and the use of resistant varieties. IPM techniques include limiting the use of pesticides to situations where monitoring indicates that they are needed; selecting least toxic pest control materials; and applying these materials in a manner that minimizes risk to human health, beneficial and no target organisms, and the environment.
5. The City will seek to eliminate the use of mercury-containing products and subsequent releases of mercury to the environment, to the maximum extent practicable. Where elimination is not feasible due to technological, safety, or economic factors, the City will seek to reduce use of and properly handle and dispose of mercury products, to minimize the potential for release to the environment. To achieve this goal, the City will evaluate pollution prevention opportunities to eliminate mercury from municipal activities, and ensure proper handling and disposal of those mercury-containing products that cannot be eliminated.
6. Hazardous wastes that cannot be prevented will be recycled in an environmentally safe manner. Disposal or other release into the environment will be employed only as a last resort and will be conducted in an environmentally safe manner and in accordance with all applicable regulations.

RESPONSIBILITY

All City departments that procure and/or dispose of products and materials, or are involved in activities with the potential to cause water quality impairment, air pollution, or generation of hazardous wastes, will be responsible for implementing the provisions of this policy to the maximum extent practicable. In addition, products and services will be procured in accordance with the City's Environmentally Preferable Procurement Policy (Council Policy 4-6).

Appendix 9-2: C.9.d Language Incorporated in Pest Management Contracts

Language Incorporated in Pest Management Contracts

City of San Jose

1. **Integrated Pest Management (IPM) :** Integrated pest management is a decision making process for managing pests that uses monitoring to determine pest injury levels and combines biological, cultural, physical and chemical tools to minimize health, environmental and financial risks. IPM emphasizes the use of extensive knowledge about the target pests, such as infestation thresholds, life histories, environmental requirements and natural enemies to compliment and facilitate biological and other natural control measures of pests. IPM uses the least toxic pesticides only as a last resort for controlling pests.

2. **Compliance with City IPM Policy:** Contractor shall obtain and comply with all requirements of the City of San José's Integrated Pest Management (IPM) policy. The contractor shall apply all pesticides with extreme care to avoid any hazard to persons, pets, property and the environment.

3. **Best Management Practices (BMPs) and Standard Operating Procedures (SOPs):** Contractor shall obtain and comply with pest specific City BMPs and SOPs. If contractors wish to propose the use of other BMPs and SOPs, the contractor must submit a copy of the proposed BMPs and SOPs in writing to the contract manager for review and approval. City approval of BMPs and SOPs will be based on degree of conformance with the City IPM Policy, BMPs and SOPs.

4. **Use of Pesticides:** Contractor shall comply with all federal, state and local rules and regulations that govern the use of pesticides, including the City of San José's IPM Policy. Pesticides utilized for control of pests on City property shall have current EPA registration and be applied in strict accordance with label directions. All pesticide use on City property shall be subject to advance approval by the contract manager.

5. **Pesticide Use Reporting:** Contractor shall submit monthly pest management reports to the contract manager. The report shall contain the following information:

    a. Date and time of pesticide application or service*
    b. Site of the pesticide application* (and Project ID/Purchase order, if applicable)
    c. Manufacturer and name/formulation of product applied*
    d. Pesticide EPA registration number*
    e. Targeted Pest*
    f. Amount of product applied*
    g. City Generated Service Order Reference Number (work order number)
    h. Date and time of receipt of request
        i. Name of site contact
        ii. Prevention and other non-chemical methods of control used*
        iii. Recommendations for future prevention*

iv. Recommendation for continued treatment based on IPM (including cause of problem, source of pest entry to facility, etc.)
v. Square footage of area serviced

(* Indicates required field for Stormwater tracking purposes)

i. Reports shall be supplied in Microsoft Excel, Access or other approved format.
j. The City may withhold payment for services until the report for the invoice month is received and approved. The report shall include information for San José municipal property only.

6. **Evidence of Training:** Contractor shall demonstrate evidence of recent IPM training, to the maximum extent feasible, upon entering into a new contract or renewal of an existing contract.

SANTA CLARA CALIFORNIA

Santa Clara
All-America City
2001

Street Department

September 8, 2010

Mr. Bruce H. Wolfe, Executive Officer
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay Street, Suite 1400
Oakland, CA 94612

Subject: City of Santa Clara Urban Runoff Management Program
FY 2009–2010 Annual Report

Dear Mr. Wolfe:

This report is submitted by City of Santa Clara in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.16 of the Program's municipal stormwater NPDES Permit (Order No. R2-2009-0074). The report summarizes activities performed during FY 2009-2010 in accordance with requirements set forth in the municipal regional stormwater NPDES Permit.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of the municipal regional stormwater NPDES Permit for FY 09-10 and 2) evaluate program results for continuous improvement. The FY 2009-10 Annual Report contains the following sections:

- Certification Statement
- Municipal Operations (C.2)
- New Development and Redevelopment (C.3)
- Industrial and Commercial Site Controls (C.4)
- Illicit Discharge Detection and Elimination (C.5)
- Site Control (C.6)
- Public Information and Outreach (C.7)
- Water Quality Monitoring (C.8)
- Pesticides Toxicity Control (C.9)
- Trash Load Reduction (C.10)
- Mercury Controls (C.11)
- Polychlorinated Biphenyls (PCB's) Controls (C.12)
- Copper Controls (C.13)
- Polybrominated Diphenyl Ethers (PBDE), Legacy Pesticides and Selenium (C.14)
- Exempted and Conditionally Exempted Discharges (C.15)

Program Summary

The City of Santa Clara has been active in the Program elements and very active at the Co-permittee element level. The City successfully implemented all of the provisions of the permit that were required to be completed by the end of FY 2009-10.

Corporation Yard
1700 Walsh Avenue
Santa Clara, CA 95050
(408) 615-3080
FAX (408) 988-0237
www.santaclaraca.gov

Unfortunately, the City of Santa Clara is challenged with similar fiscal and staffing restraints as other public agencies during this down economy. As you know, the City's Urban Run-Off Management Program has been tasked to do significant additional work, with less financial and staffing resources. As such, the City reprioritized its efforts to focus on construction site inspections and the most significant industrial facility inspections.

Because of the resource constraints and the other demands placed on the City by the MRP, in FY 2010-11 the City will re-evaluate balancing the number of industrial/commercial inspections and construction site inspections against other MRP demands. The City is currently evaluating how to address the resource shortfall with the goal of full cost recovery for the stormwater program. In this regard, preliminary estimates indicate that the current stormwater fees would need to be increased by a factor of 30 to achieve this goal, via a Proposition 218 ballot initiative process that would require a 2/3 majority vote.

The City continues to retain EOA Inc. to assist with the planning and implementation of the C.3. Provisions. The assistance provided by EOA has been valuable in supporting staff on site specific C.3. Provision questions.

Thank you for your review of this FY 09-10 Annual Report. If you have any questions regarding the materials submitted, please contact Dave Staub at 408-615-3086.

Dave Staub
Superintendent of Solid Waste and Storm Drains

Section 2 - Provision C.2 Reporting Municipal Operations

Program Highlights and Evaluation

Highlight/summarize activities for reporting year:

Summary:

The City of Santa Clara completed the inventory of storm pump stations by March 1, 2010. All City corporation yards were inspected in FY 09-10, and all have SWPPP's in place. The City participated in the Program's Municipal Operations Ad Hoc Task Group (AHTG), which has developed pump station sampling guidance. Refer to the C.2 Municipal Operations section of the Program's FY 09-10 Annual Report for a description of the AHTG activities.

C.2.a. ►Street and Road Repair and Maintenance

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of these BMPs were not adequately implemented during the reporting fiscal year then indicate so and provide explanation in the comments section below:

X	Control of debris and waste materials during road and parking lot installation, repaving or repair maintenance activities from polluting stormwater
X	Control of concrete slurry and wastewater, asphalt, pavement cutting, and other street and road maintenance materials and wastewater from discharging to storm drains from work sites.
X	Sweeping and/or vacuuming and other dry methods to remove debris, concrete, or sediment residues from work sites upon completion of work.

Comments:

C.2.b. ►Sidewalk/Plaza Maintenance and Pavement Washing

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of these BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

X	Control of wash water from pavement washing, mobile cleaning, pressure wash operations at parking lots, garages, trash areas, gas station fueling areas, and sidewalk and plaza cleaning activities from polluting stormwater
X	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs

Comments:

C.2.c. ►Bridge and Structure Maintenance and Graffiti Removal

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of these BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

X	Control of discharges from bridge and structural maintenance activities directly over water or into storm drains
X	Control of discharges from graffiti removal activities
X	Proper disposal for wastes generated from bridge and structure maintenance and graffiti removal activities
X	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs for graffiti removal

Comments:

C.2.d. ►Stormwater Pump Stations

Does your municipality own stormwater pump stations:	X	**Yes**		**No**

If your answer is **No** then skip to **C.2.e.**

(For FY 10-11Annual Report only) Complete the following table for dry weather DO monitoring and inspection data for pump stations[1] (add more rows for additional pump stations): Not required for this Annual Report.

Pump Station Name and Location	**First inspection Dry Weather DO Data**		**Second inspection Dry Weather DO Data**	
	Date	**mg/L**	**Date**	**mg/L**
Not required for this Annual Report.				

(For FY 10-11Annual Report only) Summarize corrective actions as needed for DO monitoring at or below 3 mg/L. Attach inspection records of additional DO monitoring for corrective actions:

Summary:
Not required for this Annual Report

(For FY 10-11Annual Report only) Complete the following table for wet weather inspection data for pump stations (add more rows for additional pump stations):
Not required for this Annual Report

Pump Station Name and Location	**Date** (2x/year required)	**Presence of Trash** (Cubic Yards)	**Presence of Odor** (Yes or No)	**Presence of Color** (Yes or No)	**Presence of Turbidity** (Yes or No)	**Presence of Floating Hydrocarbons** (Yes or No)
Not required for this Annual Report						

[1] Pump stations that pump stormwater into stormwater collection systems or infiltrate into a dry creek immediately downstream are exempt from DO monitoring.

C.2.e. ►Rural Public Works Construction and Maintenance				
Does your municipality own/maintain rural[2] roads:		**Yes**	**X**	**No**
If your answer is **No** then skip to **C.2.f**.				
Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:				
	Control of road-related erosion and sediment transport from road design, construction, maintenance, and repairs in rural areas			
	Identification and prioritization of rural road maintenance based on soil erosion potential, slope steepness, and stream habitat resources			
	No impact to creek functions including migratory fish passage during construction of roads and culverts			
	Inspection of rural roads for structural integrity and prevention of impact on water quality			
	Maintenance of rural roads adjacent to streams and riparian habitat to reduce erosion, replace damaging shotgun culverts and excessive erosion			
	Re-grading of unpaved rural roads to slope outward where consistent with road engineering safety standards, and installation of water bars as appropriate			
	Inclusion of measures to reduce erosion, provide fish passage, and maintain natural stream geomorphology when replacing culverts or design of new culverts or bridge crossings			
Comments including listing increased maintenance in priority areas:				

[2] Rural means any watershed or portion thereof that is developed with large lot home-sites, such as one acre or larger, or with primarily agricultural, grazing or open space uses.

C.2.f. ►Corporation Yard BMP Implementation

Place an **X** in the boxes below that apply to your corporation yard(s):

	We do not have a corporation yard
	Our corporation yard is a filed NOI facility and regulated by the California State Industrial Stormwater NPDES General Permit
X	We certify that we have a current **Stormwater Pollution Prevention Plan (SWPPP)** for the Corporation Yard(s)

Place an **X** in the boxes below next to implemented SWPPP BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

X	Control of pollutant discharges to storm drains such as wash waters from cleaning vehicles and equipment
X	Routine inspection prior to the rainy seasons of corporation yard(s) to ensure non-stormwater discharges have not entered the storm drain system
	Containment of all vehicle and equipment wash areas through plumbing to sanitary or another collection method
X	Use of dry cleanup methods when cleaning debris and spills from corporation yard(s) or collection of all wash water and disposing of wash water to sanitary or other location where it does not impact surface or groundwater when wet cleanup methods are used
X	Cover and/or berm outdoor storage areas containing waste pollutants

Comments:
Street Corporation Yard has temporarily discontinued vehicle washing activities because its system previously discharged wash water that went through a series of treatments to the stormdrain system. A new washout station is under construction and projected to be complete and operational in August/September of 2010.

If you have a corporation yard(s) that is not an NOI facility, complete the following table for inspection results for your corporation yard(s) or attach a summary including the following information:

Corporation Yard Name	**Inspection Date** (1x/year required)	**Inspection Findings/Results**	**Follow-up Actions**
Street Corporation Yard	06-29-10	Batteries stored by catch basin – 1 violation	Violation corrected that day
Water/Electric Corporation Yard	Not done in FY 09-10	Inspection will be conducted early FY 10-11	
Parks Service Center	06-08-10	No violations found	

Section 3 - Provision C.3 Reporting New Development and Redevelopment

C.3.a. ►New Development and Redevelopment Performance Standard Implementation Summary Report
(For FY 10-11Annual Report only) Provide a brief summary of the methods of implementation of Provisions C.3.a.i.(1)-(8).
Summary: Not required for this Annual Report.

C.3.b. ►Green Streets Status Report (All projects to be completed by December 1, 2014)
On an annual basis (if applicable), report on the status of any pilot green street projects within your jurisdiction. For each completed project, report the capital costs, operation and maintenance costs, legal and procedural arrangements in place to address operation and maintenance and its associated costs, and the sustainable landscape measures incorporated in the project including, if relevant, the score from the Bay-Friendly Landscape Scorecard.
Summary: No projects planned at this time in the City. City is working with the Program to identify candidates for Green Streets.

C.3.b.v.(1) ►Regulated Projects Reporting Table
Fill in attached table **C.3.b.v.(1)** or attach your own table including the same information

C.3.h.iv. ► Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

(1) Fill in attached table **C.3.h.iv.(1)** or attach your own table including the same information

(2) On an annual basis, provide a discussion of the inspection findings for the year and any common problems encountered with various types of treatment systems and/or HM controls. This discussion should include a general comparison to the inspection findings from the previous year.

Summary: This was the first yeart that the City inspected installed treatment systems. We encountered no difficulty with specific treatment systems. The problem we encountered was the failure of the developer to notify the property owner that the treatment measures were installed. In every instance the property owner was issued a Notice of Violation for failure to maintain the installed treatment systems.

(3) On an annual basis, provide a discussion of the effectiveness of the O&M Program and any proposed changes to improve the O&M Program (e.g., changes in prioritization plan or frequency of O&M inspections, other changes to improve effectiveness program).

Summary: The Planning Department requires applicants to execute a Stormwater Treatment Measure Inspection and Maintenance Agreement before signing off on a project. The executed agreement is then turned over to the Street Department for inspection one year after installation. We are now advising develpers that they need to convey the need for ongoing maintenance of stormwater treatment to property owners upon completion of the project. The number of sites to inspect is still small, so the City plans to inspect each site once a year until the number of sites grows to a number that makes doing so no longer practicable, assuming staffing levels do not grow.

C.3.b.v.(1) ►Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Project Location[1], Street Address	Name of Developer	Project Phase No.[2]	Project Type & Description[3]	Project Watershed[4]	Total Site Area (Acres)	Total Area of Land Disturbed (Acres)	Total New and/or Replaced Impervious Surface Area[5] (ft^2)	Total Pre-Project Impervious Surface Area[6] (ft^2)	Total Post-Project Impervious Surface Area[7] (ft^2)
Private Projects										
3240 and 3250 Scott Office Building Project APN Nos. 216-29-117 and 216-19-111	3240 & 3250 Scott Boulevard, Santa Clara, CA 95054 Cross street: Olcott Street	Lowe Enterprises Real Estate Group	N/A	Redevelopment. Demolish two existing industrial office/research and development buildings, construct an approximately 215,520 gross square foot, five-story, Class A office building	San Tomas Aquino Creek	8.8	8.8	New: 0 Replaced: 383,467?	383,467	383,467
3000 Olcott Street Office Building Project APN No. 224-47-017	3300 Olcott Street, Santa Clara, CA 95054 Cross street: Scott Boulevard	Santa Clara Office Partners LLC	N/A	Redevelopment. Commercial project with demolition of existing office building and construction of new office building.	San Tomas Aquino Creek	6.73	6.73	New: 27,880 Replaced: 217,365	217,365	245,245
Kaiser Psychiatric Facility APN No. 316-04-033	3840 Homestead Road, Santa Clara, CA 95051 Cross street: Bing Drive	Kaiser Foundation	N/A	New Development. Commercial project with construction of a new building with parking and drop off location.	Calabazas Creek	2.55	2.55	New: 59,210 Replaced: 16,390	29,340	88,850

[1] Include Cross Streets
[2] If a projects is being constructed in phases, use a separate row entry for each phase.
[3] Project Type is the type of development (i.e., new and/or redevelopment). Example descriptions of development are: 5-story office building, residential with 160 single-family homes with five 4-story buildings to contain 200 condominiums, 100 unit 2-story shopping mall, mixed use retail and residential development (apartments), industrial warehouse.
[4] State the watershed(s) that the Regulated Project drains to. Optional but recommended: Also state the downstream watershed(s).
[5] State both the total new impervious surface area and the total replaced impervious surface area, as applicable.
[6] For redevelopment projects, state the pre-project impervious surface area.
[7] For redevelopment projects, state the post-project impervious surface area.

C.3.b.v.(1) ►Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period

C.3.b.v.(1) ►Regulated Projects Reporting Table (part 2) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Status of Project[8]	Source Control Measures[9]	Site Design Measures[10]	Treatment Systems Approved[11]	Operation & Maintenance Responsibility Mechanism[12]	Hydraulic Sizing Criteria[13]	Alternative Compliance Measures[14/15]	Alternative Certification[16]	HM Controls[17/18]
Private Projects									
3240 and 3250 Scott Office Building Project APN Nos. 216-29-117 and 216-19-111	Approved on July 22, 2009[19]			Vegetated Swales	O&M agreement with private landowner	2.c.	None	No	Not required – drains to hardened channel or tidal area
3000 Olcott Street Office Building Project APN No. 224-47-017	Approved on August 5, 2009	Covered dumpster area, drain to sanitary sewer; maintenance agreement; storm drain signage or stencils; pesticide reduction plan; beneficial landscaping; litter controls.	Disconnected downspouts.	Bioretention area; media filter.	O&M agreement with private landowner	2.b.	None	Yes	Not required – drains to hardened channel or tidal area

[8] For private projects, state project application submittal date; application deemed complete date; and, final discretionary approval date. For public projects, state plans and specifications approval date.
[9] List source control measures approved for the project. Examples include: properly designed trash storage areas; storm drain stenciling or signage; efficient landscape irrigation systems; etc.
[10] List site design measures approved for the project. Examples include: minimize impervious surfaces; conserve natural areas, including existing trees or other vegetation, and soils; construct sidewalks, walkways, and/or patios with permeable surfaces, etc.
[11] List all approved stormwater treatment system(s) to be installed onsite or at a joint stormwater treatment facility (e.g., flow through planter, bioretention facility, infiltration basin, etc.).
[12] List the legal mechanism(s) (e.g., O&M agreement with private landowner; O&M agreement with homeowners' association; O&M by public entity, etc…) that have been or will be used to assign responsibility for the maintenance of the post-construction stormwater treatment systems.
[13] See Provision C.3.d. "Numeric Sizing Criteria for Stormwater Treatment Systems" for list of hydraulic sizing design criteria (i.e., 1.a., 1.b., 2.a., 2.b., 2.c., or 3)
[14] For Alternative Compliance at an offsite location in accordance with Provision C.3.e.i.(1), on a separate page, give a discussion of the alternative compliance site including the information specified in Provision C.3.b.v.(1)(m)(i) for the offsite project.
[15] For Alternative Compliance by paying in-lieu fees in accordance with Provision C.3.e.i.(2), on a separate page, provide the information specified in Provision C.3.b.v.(1)(m)(ii) for the Regional Project.
[16] Note whether a third party was used to certify the project design complies with Provision C.3.d.
[17] If HM control is not required, state why not.
[18] If HM control is required, state control method used (e.g., method to design and size device(s) or method(s) used to meet the HM Standard, and description of device(s) or method(s) used, such as detention basin(s), biodetention unit(s), regional detention basin, or in-stream control).
[19] This project is currently not active and may not move forward to construction in its present form. If the project is significantly amended, the project plans, including the stormwater plans, will need to be updated and will be subject to review by the Planning Division Staff or Planning Commission (depending on the significance of the changes). The project would then be reported again in a subsequent annual report.

C.3.b.v.(1) ►Regulated Projects Reporting Table (part 2) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Status of Project[8]	Source Control Measures[9]	Site Design Measures[10]	Treatment Systems Approved[11]	Operation & Maintenance Responsibility Mechanism[12]	Hydraulic Sizing Criteria[13]	Alternative Compliance Measures[14/15]	Alternative Certification[16]	HM Controls[17/18]
Kaiser Psychiatric Facility APN No. 316-04-033	September 16, 2009	Storm drain signage or stencils, beneficial landscaping, other: No pesticides used on landscape or tree filters.	Disconnected downspouts, detention of runoff in landscaping	Biofilter, tree well filter	O&M agreement with private landowner	2.b.	None	Yes	Not required – drains to hardened channel or tidal area
Terremark Data Center APN No. 216-33-014	Approved on December 2, 2009	None	Minimize impervious surfaces	Bioretention area.	O&M agreement with private landowner	2.b.	None	Yes	Not required – drains to hardened channel or tidal area
Robinson Oil Headquarters APN No. 224-60-004	Approved on December 15, 2009	Pesticide reduction plan; beneficial landscaping; litter controls.	Minimize impervious surfaces; disconnected downspouts; detention of runoff in landscaping.	Bioretention area.	O&M agreement with private landowner	1.b., 2.b.	None	Yes	Not required – drains to hardened channel or tidal area

Minimize impervious surfaces; minimum-impact street design; cluster structures/ pavement; permeable pavement; disconnected downspouts ; detention of runoff in landscaping.	Biofilter; bioretention area; media filter; hydrodynamic device; storm drain inlet filter; green roof.	O&M agreement with private landowner	1.b., 2.b.	None	Yes	Not required – drains to hardened channel or tidal area
Lexus, Stevens Creek APN No. 303-19-078	Approved on June 9, 2010	Maintenance agreement; storm drain signage or stencils.	Minimize impervious surfaces.	Biofilter; Bioretention area.	O&M agreement with private landowner	2.b.	None	No	Not required – drains to hardened channel or tidal area

C.3.b.v.(1) ►Regulated Projects Reporting Table (part 2) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Status of Project[8]	Source Control Measures[9]	Site Design Measures[10]	Treatment Systems Approved[11]	Operation & Maintenance Responsibility Mechanism[12]	Hydraulic Sizing Criteria[13]	Alternative Compliance Measures[14/15]	Alternative Certification[16]	HM Controls[17/18]
Public Projects									
Kenneth Substation APN No. 224-08-121	Approved on May 27, 2010.	None	Detention of runoff in landscaping.	Biofilter; detention in landscaping; hydrodynamic device.	O&M agreement by public entity.	2.b.	None	Yes	Not required – drains to hardened channel or tidal area

C.3.h.iv. ►Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

Fill in table **below** or attach your own table including the same information.

Facility/Site Inspected and Location	Party Responsible[20] For Maintenance	Date of Inspection	Type of Inspection[21]	Type of Treatment/HM Control(s) Inspected[22]	Inspection Findings or Results[23]	Enforcement Action Taken[24]	Comments
Pruneridge Villas	HOA	6/24/10	annual	CDS unit	Unit needs to be cleaned and inspection reports need to be made available	Violation Notice	New HOA as of January 2010
Sabrato	HOA/Sabrato	6/30/10	annual	CDS unit	Phone call made to initiate inspection, no call back, unit not accessible, no maintenance records provided	Violation Notice	Calling HOA and Sobrato
Homestead	HOA	6/30/10	annual	CDS unit	Phone call made to initiate inspection, no call back, unit not accessible, no maintenance records provided	Violation Notice	Calling HOA to set up time for inspection and maintenance records

[20] State the responsible operator for installed stormwater treatment systems and HM controls.
[21] State the type of inspection (e.g., annual, follow-up, spot, etc.).
[22] State the type(s) of treatment systems inspected (e.g., bioretention facility, flow-through planter, infiltration basin, etc…) and the type(s) of HM controls inspected, and indicate whether the treatment system is an onsite, joint, or offsite system.
[23] State the inspection findings or results (e.g., proper installation, improper installation, proper O&M, immediate maintenance needed, etc.).
[24] State the enforcement action(s) taken, if any, as appropriate and consistent with your municipality's Enforcement Response Plan.

Section 4 – Provision C.4 Industrial and Commercial Site Controls

C.4.a.ii ► Legal Authority

(For FY 09-10 Annual Report only) Do you have adequate legal authority to obtain effective stormwater pollutant control on industrial sites?	X	**Yes**		**No**

Section 13.20 of the Santa Clara City Code provides legal authority to obtain effective stormwater pollutant control on industrial sites.

C.4.c.ii.(5) ► Enforcement Response Plan

(For FY 09-10 Annual Report only) Have you developed and implemented an Enforcement Response Plan by April 1, 2010?	X	**Yes**		**No**

See attached Industrial/Commercial Program Enforcement Response Plan.

Program Highlights

Provide background information, highlights, trends, etc. For FY 09-10 Annual Report describe steps taken to revise your program to meet new data tracking and reporting requirements.

The quantity of IND/COM facility inspections dropped from 920 in FY 08-09 to 23 in FY 09-10. The primary reason for this precipitous decrease was the reallocation of Stormwater Inspector time to comply with other new MRP mandates, which took the primary focus away from IND/COM facility inspections. Due to fiscal/budgetary constraints, the City was not able to bring on an as-needed inspector to beef up the IND/COM facility inspection program. Staff forecasts the number of IND/COM facilities that are inspected during a given year will remain at a lower level than in the past because staff must spend time implementing other provisions of the MRP.

Inspections for FY 09-10 were geared mostly towards construction and IC/ID response. IND/COM facility inspections encompassed only mandatory NOI filers in FY 09-10 plus 2 manufacturing facilities which do not have NOI's. IND/COM lists are updated every year. The permitted facilities are updated using the Water Board's website and the non permitted facilities are updated using the City's Business Licenses software.

IND/COM inspector conducts training for the various departments in the City and will continue to conduct training in FY 10-11 to keep City facilities in compliance. Inspector attends training when provided by EOA. The City's Stormwater Inspector attends the IND/IDEE Ad Hoc Task Group meetings on a regular basis and will continue to attend in FY 10-11. Refer to the C.4 IND/COM site controls section of the Program's FY 09-10 Annual Report for a description of activities of the IND/COM AHTG and the BASMAA Municipal Operations Committee.

C.4.b.i. ► Business Inspection Plan

(For FY 09-10 Annual Report only) Do you have a Business Inspection Plan? [X] **Yes** [ ] **No**

City of Santa Clara Business Inspection Plan

NOI Filers	Annual	Auto Wreckers Sites with violations the previous inspection
Other NOI Filers	2-3 years	No violations during previous 2 inspections
Non NOI Filers	5 years	Restaurants Machine Shops/Sheet Metal Auto Repair Printing/Photo Dry Cleaners Printing Car Wash

If Violations are found re-inspections are conducted within 10 days. If violation(s) are not corrected within 10 days, escalating enforcement action takes place.

C.4.b.iii.(1) ► Potential Facilities List

List below or attach your list of industrial and commercial facilities in your Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.

See attached list labeled C.4.b.iii (1) City of Santa Clara Potential Facilities List

C.4.b.iii.(2) ►Facilities Scheduled for Inspection

List below or attach your list of facilities scheduled for inspection during the current fiscal year.

See attached lists labeled C.4.b.iii. (2) - City of Santa Clara Food Facilities List (goal of 30% to be inspected)
C.4.b.iii. (2) - City of Santa Clara Active Industrial NOI Filers (all to be inspected)

C.4.c.iii.(1) ►Facility Inspections

Fill out the following table or attach a summary of the following information.

	Number	Percent
Number of businesses inspected (if known)	23	
Total number of inspections conducted	23	
Violations issued (excluding verbal warnings)	9	
Sites inspected in violation	7	30%
Violations[1] resolved within 10 working days or otherwise deemed resolved in a longer but still timely manner	9	100%

[1] Total number of violations equals the number of initial enforcement actions (i.e. one violation issued for several problems during an inspection at a site). It does not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

C.4.c.iii.(2) ►Frequency and Types/Categories of Violations Observed

Fill out the following table or attach a summary of the following information.

Type/Category of Violations Observed	Number of Violations
Actual discharge (e.g. non-stormwater discharge)	0
Potential discharge (e.g. BMPs not in place or ineffective)	9

C.4.c.iii.(2) ►Frequency and Type of Enforcement Conducted

Fill out the following table or attach a summary of the following information.

	Enforcement Action (as listed in ERP)[1]	Number of Enforcement Actions Taken	% of Enforcement Actions Taken[2]
Level 1- Violation Notice	7	7	100%
Level 2- Pre-Citation	0	0	0
Level 3- Citation	0	0	0
Level 4 – Further Citations – Attorney notified	0	0	0
Total	**7**	7	100%

Notes:

[1]Agencies to list specific enforcement actions as defined in their ERPs.

[2]Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

C.4.c.iii.(3) ►Types of Violations Noted by Business Category

Fill out the following table or attach a summary of the following information.

Business Category[1]	Actual Discharge Violations	Potential Discharge Violations
7 – Machine Shops	0	2
8 – Metal Manufacturing	0	1
9 – Electric/Electric Components	0	2
11 – Local Highway Transit	0	2
14 – Concrete, Clay, Stone Products	0	1
17 - Other	0	1

Notes:

[1] List your Program's standard business categories.

C.4.c.iii.(4) ►Non-Filers

List below or attach a list of the facilities required to have coverage under the Industrial General Permit but have not filed for coverage:

There were no industries identified as non-filers during scheduled inspections during the fiscal year.

C.4.d.iii ►Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
Construction Stormwater Management Compliance Workshop	October 21, 2009	-How to comply with the new Statewide Construction General Permit -Simple and effective stormwater BMP's for small and large construction projects -Selecting and maintaining BMP's during construction -Monitoring and reporting requirements -Post construction stormwater management techniques	2	50%
Construction Stormwater Management Compliance Workshop	January 19, 2010	-How to comply with the new Statewide Construction General Permit -Simple and effective stormwater BMP's for small and large construction projects -Selecting and maintaining BMP's during construction -Monitoring and reporting requirements -Post construction stormwater management techniques	2	50%
Street Department Stormwater Pollution Prevention Training	February 9, 2010	What to look for out in the field, basic response protocol and contact information	1	100%
Parks Department Storm Water Training	June 8, 2010	What to look for out in the field, basic response protocol and contact information	1	100%

Section 5 – Provision C.5 Illicit Discharge Detection and Elimination

C.5.a.ii ► Legal Authority

(For FY 09-10 Annual Report only) Do you have adequate legal authority to prohibit and control illicit discharges and escalate stricter enforcement to achieve expedient compliance?	X	**Yes**		**No**

Section 13.20 of the Santa Clara City Code provides legal authority to prohibit and control illicit discharges and escalate stricter enforcement to achieve expedient compliance.

C.5.b.ii.(4) ► Enforcement Response Plan

(For FY 09-10 Annual Report only) Have you developed and implemented an Enforcement Response Plan by April 1, 2010?	X	**Yes**		**No**

See attachment labeled C.5.b.ii. (4) City of Santa Clara Urban Runoff Pollution Prevention Emergency Spill Protocol

Program Highlights

Provide background information, highlights, trends, etc. For FY 09-10 Annual Report describe steps taken to revise your program to meet new data tracking and reporting requirements.

1) Made map(s) of the MS4 publicly available by July 1, 2010; 2) Developed a collection system screening program; 3) Participated in the Program's IND/IDDE Ad Hoc Task Group (AHTG) and/or reviewed AHTG products, including collection system screening program guidance. Refer to the C.5 Illicit Discharge Detection and Elimination section of Program's FY 09-10 Annual Report for description of activities of the IND/IDDE AHTG and the BASMAA Municipal Operation Committee.

C.5.c.iii ►Complaint and Spill Response Phone Number and Spill Contact List

List below or attach your complaint and spill response phone number and spill contact list.

Contact	Description	Phone Number
Elliott Wier (radio call #417)	Code Enforcement Technician	408-615-3092 office 408-857-8604* cell
Joe Luna (radio call #414)	Street Maintenance Worker IV	408-418-2861* work cell 925-373-3819 925-784-8460
Doug Abernethy (radio call #407)	Street /Storm Drain Maintenance Foreperson	408-615-3093 office 408-410-2411* work cell
Don Myers (radio call #415)	Street Maintenance Worker IV	408-243-3169
Mick Cucuzza (radio call #413)	Street Maintenance Worker IV	408-244-5985
Communications Dispatch (after hours)		408-615-5580
		*Primary number

C.5.d.iii ►Evaluation of Mobile Business Program

Describe implementation of minimum standards and BMPs for mobile businesses and your enforcement strategy. This may include participation in the BASMAA Mobile Surface Cleaners regional program or local activities.

Description:

The City of Santa Clara responds to mobile surface cleaners on a complaint driven basis. BMPs are provided to mobile businesses, as applicable. Appropriate enforcement action is taken when violations are found. The City of Santa Clara follows the BMPs recommended by the BASMAA Mobile Surface Cleaner's Program regarding mobile surface cleaners when needed.

Refer to the C.5 Illicit Discharge Detection and Elimination section of the Program's FY 09-10 Annual Report for a description of efforts by the IND/IDDE AHTG and the BASMAA Municipal Operators Committee to address mobile businesses.

C.5.e.iii ►Evaluation of Collection System Screening Program

Provide a summary or attach a summary of your collection screening program, a summary of problems found during collection system screening and any changes to the screening program this FY.

Description:

In FY 10-11 the City implemented a recording form to keep records of all incoming complaints to meet the collection screening program requirements. Also in FY 10-11 all verbal notices will be recorded with a violation or correction notice and documented with this new recording form. This will help keep records of complaints that end up not being violations and also eliminated verbal warnings to more efficiently track inspector responses.

Refer to the C.5 Illicit Discharge Detection and Elimination section of the Program's FY 09-10 Annual Report for a description of efforts by the IND/IDDE AHTG and the BASMAA Municipal Operators Committee to develop collection system screening program guidance.

C.5.f.iii.(1), (2), (3) ►Spill and Discharge Complaint Tracking

Spill and Discharge Complaint Tracking (fill out the following table or include an attachment of the following information)

	Number	Percentage
Discharges reported (C.5.f.iii.(1))	31	
Discharges reaching storm drains and/or receiving waters (C.5.f.iii.(2))	3	9.67%
Discharges resolved in a timely manner (C.5.f.iii.(3))	31	100%

C.5.f.iii.(4) ►Summary of major types of discharges and complaints

Provide a narrative or attach a table and/or graph.

The majority of discharge types in the City for FY 09-10 were category 12- unhardened cement discharge (including plaster and tile cuttings) with a total of 8 recorded incidents followed by category 25 – oil and grease discharge with 4 recorded incidents.

SUMMARY OF MAJOR TYPES OF DISCHARGES AND COMPLAINTS		
#	**Category Type**	**Number of Incidents**
1	Tracking soil	1
2	Saw cutting slurry discharge	1
4	Vehicle & equipment leaking	2
7	Landscape material dumping	3
9	Vehicle washing	3
11	Used oil dumping	1
12	**Unhardened cement discharge (plaster & tile cutting)**	**8**
15	Pools/Spas/Fountain discharge	1
19	Sanitary spill or leak	1
20	Dumping – hazardous	2
21	Dumping – non-hazardous	1
24	Paint discharge	2
25	**Food facility oil & grease discharge**	**4**
30	Complaint not found	1
TOTAL RECORDED INCIDENTS		**31**

Attachment C.5.b.ii.(4)
Urban Runoff Pollution Prevention Emergency Spill Protocol
Enforcement Response Plan

* Support includes traffic control and other needed labor/material outside of the incident area. Vactor is not to be utilized for any flammables. For sewage spills call Sewer Department at 408-615-2000

Section 6 – Provision C.6 Construction Site Controls

C.6.a.iii ► Legal Authority

(For FY 09-10 Annual Report only) Is your agency's legal authority adequate for C.6 compliance?	X	**Yes**		**No**
Section 13.20 of the Santa Clara City Code provides legal authority to inspect and enforce The City's NPDES Permit.				

C.6.b.ii.(3) ► Enforcement Response Plan

(For FY 09-10 Annual Report only) Was your Enforcement Response Plan developed and implemented by April 1, 2010?	X	**Yes**		**No**
See attachment C.6.b.ii. (3) labeled City of Santa Clara Construction Program Enforcement Plan				

C.6.e.iii.1.a, b, c ►Site/Inspection Totals

Number of sites disturbing < 1 acre of soil requiring storm water runoff quality inspection (i.e. High Priority) (C.6.e.iii.1.a)	**Number of sites disturbing ≥ 1 acre of soil** (C.6.e.iii.1.b)	**Total number of storm water runoff quality inspections conducted** (C.6.e.iii.1.c)
1	6	693

C.6.e.iii.1.d ►Construction Activities Storm Water Violations

BMP Category	**Number of Violations[1]**	**% of Total Violations[2]**
Erosion Control	0	0
Run-on and Run-off Control	3	23.07
Sediment Control	2	15.38
Active Treatment Systems	1	7.69
Good Site Management	7	53.84
Non Stormwater Management	0	0
Total	**13**	**100%**

Notes:
[1]Count one violation in a category for each site and inspection regardless of how many violations/problems occurred in the BMP category.
[2]Percentage calculated as number of violations in each category divided by total number of violations in all six categories.

C.6.e.iii.1.e ►Construction related storm water enforcement actions

	Enforcement Action (as listed in ERP)[1]	Number Enforcement Actions Taken	% Enforcement Actions Taken[2]
Level 1 No Action	0	0	0
Level 2 Violation Notice	4	4	80
Level 3 Pre-Citation	1	1	20
Level 4 Citation	0	0	0
Total	**5**	**5**	**100%**

Notes:

[1]Agencies should list the specific enforcement actions as defined in their ERPs.

[2]Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

C.6.e.iii.1.f, g ►Illicit Discharges

	Number
Number of illicit discharges, actual and those inferred through evidence (C.6.e.iii.1.f)	0
Number of sites with discharges, actual and those inferred through evidence (C.6.e.iii.1.g)	0

C.6.e.iii.1.h, i ►Violation Correction Times

	Number	Percent
Violations fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii.1.h)	8	61.5%[2]
Violations not fully corrected within 30 days after violations are discovered (C.6.e.iii.1.i)	5	38.5%[3]
Total number of violations for the reporting year[1]	13	100%

Notes:

[1]Total number of violations equals the number of initial enforcement actions (i.e. one violation issued for several problems during an inspection at a site). It does not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

[2]Calculated as number of violations fully corrected in a timely period after the violations are discovered divided by the total number of violations for the reporting year.

[3]Calculated as number of violations not fully corrected within 30 days after the violations are discovered divided by the total number of violations for the reporting year.

C.6.e.iii.(2) ►Evaluation of Inspection Data
Describe your evaluation of the tracking data and data summaries and provide information on the evaluation results (e.g., data trends, typical BMP performance issues, comparisons to previous years, etc.).
Description: Our forms covered the BMP Categories well. New Forms will be in development to better fit the BMP criteria. All inspections were tracked using an excel spreadsheet and covered all data needed for the entire fiscal year.

C.6.e.iii.(2) ►Evaluation of Inspection Program Effectiveness
Describe what appear to be your program's strengths and weaknesses, and identify needed improvements, including education and outreach.
Description: The Stormwater Construction Inspection Form effectively tracks BMP category requirements. The Stormwater Inspector has been trained to use the inspection form and new inspection tracking tools. The Stormwater Inspector participated in the Program's Construction AHTG, which created a template construction inspection form, an inspection data tracking spreadsheet, and guidance for identifying high priority sites. The total number of construction site inspections remained high in FY 09-10. The quantity of construction site inspections will decrease significantly in FY 10-11 due to City budgetary constraints and the diversion of Stormwater Inspector time to address other new requirements in the MRP.

C.6.f ►Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Employees in Attendance	Percent of Inspectors in Attendance
Construction Stormwater Management Compliance Workshop	October 21, 2009	-How to comply with the new Statewide Construction General Permit -Simple and effective stormwater BMP's for small and large construction projects -Selecting and maintaining BMP's during construction -Monitoring and reporting requirements -Post construction stormwater management techniques	2	100%
Construction Stormwater Management Compliance Workshop	January 19, 2010	-How to comply with the new Statewide Construction General Permit -Simple and effective stormwater BMP's for small and large construction projects -Selecting and maintaining BMP's during construction -Monitoring and reporting requirements -Post construction stormwater management techniques	2	100%
Street Department Stormwater Pollution Prevention Training	February 9, 2010	What to look for out in the field, basic response protocol and contact information	1	100%
Parks Department Storm Water Training	June 8, 2010	What to look for out in the field, basic response protocol and contact information	1	100%

Attachment C.6.b.ii.(3) CITY OF SANTA CLARA CONSTRUCTION PROGRAM ENFORCEMENT PLAN

Prepared By : Elliot Wier Date: 11/25/05

Section 7 – Provision C.7. Public Information and Outreach

C.7.b.ii.1 ►Advertising Campaign

Summarize advertising efforts. Include details such as messages, creative developed, and outreach media used. The detailed advertising report may be included as an attachment. If advertising is being done by participation in a countywide or regional program, refer to the separate countywide or regional Annual Report.

Summary:

The following separate reports developed by SCVURPPP summarize county wide advertising efforts conducted during FY 09-10:

- FY 09-10 Watershed Watch Campaign Annual Campaign Report
- FY 09-10 Watershed Watch Partner Report
- FY 09-10 Watershed Watch Web Statistics Report

These reports are included within the C.7 Public Information and Outreach section of Program's FY 09-10 Annual Report

C.7.b.iii.1 ►Pre-Campaign Survey

(For the FY 10-11 Annual Report only) Summarize survey information such as sample size, type of survey (telephone survey, interviews etc.). Attach a survey report that includes the following information. If survey was done regionally, refer to a regional submittal that contains the following information: **Not required for this Annual Report.**

- Summary of how the survey was implemented.
- Analysis of the survey results.
- Discussion of the outreach strategies based on the survey results.
- Discussion of planned or future advertising campaigns to influence awareness and behavior changes regarding trash/litter and pesticides.

Place an **X** in the appropriate box below:

	Survey report attached
	Reference to regional submittal:

C.7.c ►Media Relations

Summarize the media relations effort. Include the following details for each media pitch in the space below, AND/OR refer to a regional report that includes these details:

- Topic and content of pitch
- Medium (TV, radio, print, online)
- Date of publication/broadcast

Summary:

Local efforts include informational articles placed in the Mission City Scenes (utility bill insert) and Inside Santa Clara (City newspaper).

Pertinent articles in **Mission City Scenes** (circulation 50,000) included:

- Household Hazardous Waste Program (Aug. 2009)
- Household Battery Recycling – Curbside Program (Aug. 2009)
- Falling Leaves Clog Storm Drain (Sep. 2009)
- Fluorescent Light Bulb Curbside Pickup (Nov. 2009)
- 69th Annual Camellia Show –IPM information (Jan. 2010)
- New Single-Stream Recycling Program (Feb. 2010)
- Cleanup Campaign Information (Feb. 2010)
- Arbor Day/Earth Day (March 2010)
- Household Hazardous Waste Program (March 2010)

Pertinent articles in **Inside Santa Clara** (circulation 54,000) include:

- Single-Stream Curbisde Recycling (Fall 2009)
- Clean Leaves to Protect Creeks From Stormdrain Pollution (Fall 2009)
- "Clean Green-ing" Your Neighborhood (Fall 2009)
- Household Hazardous Waste Drop-Off (Fall 2009)
- Curbside Battery Recycling Program (Fall 2009)
- Single-Stream Curbside Recycling (Winter 2009)
- 69th Annual Camellia Show –IPM Information (Winter 2009)
- Farmer's Market- Reusable Bag Information (Winter 2009)
- Arbor Day/Earth Day – April 23, 2010 (Spring 2010)
- Clean-Up Campaign – March 8th to April 2nd, 2010 (Spring 2010)
- Household Hazardous Waste Drop-Off Day (Spring 2010)
- B.Y.O.B. – Bring Your Own Bag (Summer 2010)
- Keep Stormdrains Free of Construction Waste (Summer 2010)
- Household Hazardous Waste Drop-Off (Summer 2010)
- Disposing of Pressure Treated Wood (Summer 2010)
- The Latest Dirt on Bay Friendly Gardening (Summer 2010)

C.7.c ►Media Relations - continued

The following separate report develop by BASMAA summarizes media relations efforts conducted during FY 09-10:

- BASMAA Media Relations Final Report

This report is included within the C.7 Public Information and Outreach section of Program's FY 09-10 Annual Report.

C.7.d ►Stormwater Point of Contact

(For FY 09-10 Annual Report only, unless changes made) Provide details of website or phone number used as the point of contact. Report on how the point of contact is publicized and maintained. If any change occurs in this contact, report in a subsequent Annual Report.

Contact Summary:

The City of Santa Clara internally maintains a website (www.santaclaraca.gov). Information about the website and contact numbers for all departments, including after hour emergency numbers, are listed on the City Calendar which is distributed to all residents via mail and can be obtained at City Hall (1500 Warburton Avenue, Santa Clara, CA).

The Street Department is the main point of contact for all stormwater issues; 408-615-3080

All after hour stormwater incidents are directed to our Police Dispatch; 408-615-5580

Another point of contact is the Watershed Watch Campaign hotline (1-866-WATERSHED) and Watershed Watch Campaign website (www.mywatershedwatch.org). Individual agency points of contact are publicized on SCVURPPP outreach materials and websites and the point of contact is maintained by the Program and their authorized agents.

C.7.e ►Public Outreach Events

Describe general approach to event selection. Provide a list of outreach materials and giveaways distributed.
Use the following table for reporting and evaluating public outreach events.

Program staff, the Watershed Watch consultant, and Co-permittees staffed ten outreach events in FY 09-10. Events were selected based upon target audience and attendance. Materials distributed at the events included the following: Less Toxic Pest Management fact sheets, "10 Most Wanted Backyard Bugs" brochures, "Don't Plant a Pest" brochure, "You are the Solution to Water Pollution "brochures, "Clean Cars & Clean Creeks" brochure, and giveaways (e.g. flyswatters, OWOW magnets, notepads, and temporary tattoos). The flyswatters have the Watershed Watch website and hotline number and the words "The Original Earth-Friendly Pest Control" printed on them. The beanbag game for children was used at most of the events. Event staff distributed more than 5,000 outreach materials and giveaways.

Event Details	**Description** (messages, audience)	**Evaluation of Effectiveness**
Name: Pumpkins in the Park Date: October 10, 2009 Location: Guadalupe River Park and Gardens, San Jose Region: Countywide	Type of Event: Community fair Audience: Families with children Message: Stormwater pollution prevention, less-toxic pest control and, proper disposal of household hazardous waste (HHW).	General Feed Back: The event was very well attended. A lot of attendees stopped at the booth to play the bean bag game and pick up brochures. This is a good event for educating families with children. Estimated Overall Event Attendance: 12,000-14,000. Number of Brochures Distributed: 432 Number of Giveaways Distributed: over 1,000
Name: Muslim Green Fair Date: October 18, 2009 Location: 3003 Scott Blvd., Santa Clara Region: Countywide	Type of Event: Community fair Audience: Families with children Message: Stormwater pollution prevention, less-toxic pest control and, proper disposal of HHW	General Feed Back: This is a good event for reaching members of the Muslim community. The bean bag game was used at this event. Estimated Overall Event Attendance: 1,000 Number of Brochures Distributed: 14 Number of Giveaways Distributed: 221
Name: Haunted History Date: October 31, 2009 Location: History Park at Kelley Park, San Jose Region: Countywide	Type of Event: Halloween Event Audience: Families Message: Stormwater pollution prevention.	General Feed Back: This event is good for getting the Program's name out, but not for educating attendees. Most children stop at the booth only for candies and are not receptive to information. Estimated Overall Event Attendance: 1,500 Number of Brochures Distributed: 12 Number of Giveaways Distributed: 267

Event Details	**Description** (messages, audience)	**Evaluation of Effectiveness**
Name: Spring Garden Market Date: April 10, 2010 Location: History Park at Kelley Park, San Jose Region: Countywide	Type of Event: Plant sale Audience: Home owners/gardeners Message: Stormwater pollution prevention, less-toxic pest control	General Feed Back: Most people came to the event to buy plants and did not want to pick up information. The Program will probably not attend this event next year. Estimated Overall Event Attendance: 3,000 Number of Brochures Distributed: 181 Number of Giveaways Distributed: 61
Name: NVIDIA Corp. Earth Day Event Date: April 22, 2010 Location: 2701 San Tomas Expwy, Santa Clara Region: Countywide	Type of Event: Corporate event Audience: Information Technology Professionals Message: Stormwater pollution prevention, less-toxic pest control	General Feed Back: The event was held during lunch hour in the cafeteria and very well attended. Most employees stopped at the booth to ask questions and take brochures. Estimated Overall Event Attendance: 500 Number of Brochures Distributed: 60 Number of Giveaways Distributed: 183
Name: Spring in Guadalupe Gardens Date: April 24, 2010 Location: Guadalupe River Park and Gardens, San Jose Region: Countywide	Type of Event: Community fair, plant sale. Audience: Families with children, homeowners and gardeners Message: Stormwater pollution prevention, less-toxic pest control and, proper disposal of HHW.	General Feed Back: Good attendance at booth. Most people were looking for specific pest control information. The bean bag toss game was used. Estimated Overall Event Attendance: 4,500 Number of Brochures Distributed: 423 Number of Giveaways Distributed: 797
Name: Watershed Watch Car Wash Event Date: May 5, 2010 Location: Robertsville Classic Car Wash, 5005 Almaden Expwy, San Jose Region: Countywide	Type of Event: Car Wash Audience: Car wash customers Message: Stormwater pollution prevention, proper car washing.	General Feed Back: Excellent turn-out, resulted in a 50% increase of business for the car wash during the 2-hour time period. Event staff spoke with customers and provided them information on proper car washing. Most people were interested in taking the Watershed Watch discount card. Estimated Overall Event Attendance: 150 Number of Brochures Distributed: 103 Number of Watershed Watch Discount Cards Distributed: 129

Event Details	**Description** (messages, audience)	Evaluation of Effectiveness
Name: Watershed Watch Car Wash Event Date: May 19, 2010 Location: Delta Queen Classic Car Wash, 981 E Hamilton Ave, Campbell Region: Countywide	Type of Event: Car Wash Audience: Car wash customers Message: Stormwater pollution prevention, proper car washing.	General Feed Back: Due to a rainy day forecast, attendance was low at this event. Estimated Overall Event Attendance: 45 Number of Brochures Distributed: 34 Number of Watershed Watch Discount Cards Distributed: 49
Name: Watershed Watch Car Wash Event, Date: June 2, 2010 Location: Capitol Premier Car Wash, 735 Capitol Expwy Auto Mall, San Jose Region: Countywide	Type of Event: Car Wash Audience: Car wash customers Message: Stormwater pollution prevention, proper car washing.	General Feed Back: Good turn-out. Car wash owner indicated there was an increase in business from their normal expectations. Estimated Overall Event Attendance: 100 Number of Brochures Distributed: 101 Number of Watershed Watch Discount Cards Distributed: 107
Name: Festival in the Park Date: June 26, 2010 Location: Hellyer County Park, San Jose Region: Countywide	Type of Event: Community Health Fair Audience: Families with children. Message: Stormwater pollution prevention, less-toxic pest control and, proper disposal of HHW.	General Feed Back: Good event for reaching the Hispanic community. The bean bag game drew a lot of families with children to the booth. Estimated Overall Event Attendance: 5,000 Number of Brochures Distributed: 418 Number of Giveaways Distributed: 365

C.7.f. ►Watershed Stewardship Collaborative Efforts

Summarize watershed stewardship collaborative efforts and/or refer to a regional report that provides details. Describe the level of effort and support given (e.g., funding only, active participation etc.). State efforts undertaken and the results of these efforts. If this activity is done regionally refer to a regional report.

Evaluate effectiveness by describing the following:

- Efforts undertaken
- Major accomplishments

Summary:

During FY 09-10, the Program actively supported the Santa Clara Basin Watershed Initiative (SCBWMI), including the Core Group, the Land Use Subgroup, and the Trash Subgroup (now the Santa Clara Valley Zero Litter Initiative); the Bay Area Macroinvertebrate Bioassessment Information Network (BAMBI); and the Stevens & Permanente Creeks Watershed Council. Information on these efforts is included within the C.7 Public Information and Outreach section of the Program's FY 09-10 Annual Report.

C.7.g. ►Citizen Involvement Events

The Program provided funding for the following citizen involvement events:

1) National River Clean up Day – The Program supports the involvement of Santa Clara County citizens by providing advertising support for the National River Clean-up Day.

Citizen involvement events at the Don Edwards San Francisco Bay Wildlife Refuge (Refuge) – A number of citizen involvement and stewardship programs are conducted as part of the Program funded Watershed Watchers Program at the Refuge. Participants usually work in the Refuge gardens planting native plants, pulling non-native plants, and mulching. More details are included in the Watershed Watchers Report in the Program Annual Report Appendix 7-5.

Event Details	Description	Evaluation of effectiveness
Name: Summer of Service Programs Date: 7/16/09, 7/30/09, 8/13/09 Location: Don Edwards Wildlife Refuge, Alviso Focus: Countywide	Partnership program between Santa Clara Valley youth groups and the Watershed Watchers program. Youth spend a day at the Refuge and they work in the gardens in the morning and explore the Refuge in the afternoon.	Number of attendees on 7/16/09: 2 elementary school students and 6 middle school students. Number of attendees on 7/30/09: 10 middle school students. Number of attendees on 8/13/09: 8 middle school students.
Name: Gardening at the Refuge Date: 11/21/09 Location: Don Edwards Wildlife Refuge, Alviso Focus: Countywide	Participants usually work in the Refuge gardens planting native plants, pulling non-native plants, and mulching.	Number of attendees: 4 elementary school students, 2 high school students, and 9 adults.
Name: Community Service Days Date: 1/16/10, 3/20/10, 4/17/10, 5/17/10 Location: Don Edwards Wildlife Refuge, Alviso Focus: Countywide	This is an open day for the general public. Participants work in the gardens planning native plants, puling non-native plants, and mulching.	Number of attendees on 1/16/10:1 elementary school student, 1 high school student, and 6 adults. Number of attendees on 3/20/10: 1 elementary school student and 6 adults. Number of attendees on 4/17/10: 4 elementary school students and 4 adults. Number of attendees on 5/17/10: 13 elementary school students and 7 adults.

Event Details	Description	Evaluation of effectiveness
Name: National River Cleanup Day Date: 5/15/10 Location: Various locations throughout the County Focus: Countywide	In FY 09-10, the Creek Connection Action Group sponsored two creek clean-up events: Coastal Clean-up Day on September 19, 2009 and National Rivers Clean-up Day on May 15, 2010. The Program provided funding for the National Rivers Clean-up Day advertising.	A total of 1,068 volunteers participated in cleaning 34 sites and removed approximately 29,098 pounds of trash and 6,394 pounds of recyclables from creeks.

The following separate reports developed by SCVURPPP and other organizations also include information about citizen involvement events conducted during FY 09-10:

- Watershed Watchers: Keeping Our Waterways Clean: FY 09-10 Fourth Quarter Report (includes end-of-year Summary from Alviso Education Center)
- Going Native Garden Tour 2010- Summary Report

These reports are included within the C.7 Public Information and Outreach Section of Program's FY 09-10 Annual Report.

C.7.h. ►School-Age Children Outreach

Outreach to school-age children is implemented through ZunZun assemblies at local elementary schools and the "Watershed Watchers" program at the Environmental Education Center at the Don Edwards San Francisco Bay Wildlife Refuge (Refuge) in Alviso. The Program sponsors up to 50 ZunZun assemblies at elementary schools in Santa Clara Valley and funds an Interpretive Specialist position at the Refuge for conducting activities and programs about watershed and urban runoff pollution prevention. The Fourth Quarter "Watershed Watchers" Report including the End-of-Year summary is included in the Program Annual Report Appendix 7-5. The ZunZun Final Report is included in the Program Annual Report Appendix 7-7.

Program Details	Focus & Short Description	Number of Students/Teachers reached	Evaluation of Effectiveness
Name : ZunZun Musical Assembly Grade or level: elementary	Interactive, musical school assemblies educating K-6 children about watersheds and pollution prevention.	14,161 students	ZunZun assemblies were evaluated using postage-paid evaluation cards that were distributed to all teachers present at the performances. The Program received 130 completed evaluation cards from teachers. Overall, the feedback is positive and indicates an increase in the students' knowledge about watersheds and pollution prevention. A few highlights of the evaluations are: • Twenty-two teachers indicated that after the performance, 50% of their students knew what a watershed is; 51 teachers indicated that 75% of their students knew what a watershed is and 28 teachers indicated that 100% of their students knew what a watershed is. • Eight teachers indicated that after the performance, 50% of their students could name a way to prevent pollution in the watershed; 38 teachers indicated that 75% of their students could name a way to prevent pollution in the watershed; and 78 teachers indicated that 100% of their students could name a way to prevent pollution in the watershed. The Final Teacher Evaluation Report is included in the Program Annual Report Appendix 7-7.

Program Details	Focus & Short Description	Number of Students/Teachers reached	Evaluation of Effectiveness
Name: Watershed Watchers Program at Don Edwards Wildlife Refuge in Alviso Grade or level: elementary, middle, high school	The Refuge offers a number of interpretive programs to educate children and youth about preventing urban runoff pollution. These include: Bike the Levees; Discover Native Species; Habitat Exploration; Living Wetlands; Marshes, Mud and Plankton; Quackers and Honkers; and Water Water Everywhere.	80 pre-kindergarteners, 1,359 elementary school students, 33 middle school students, and 199 high school students	Visitor Surveys are used to determine visitor demographics, effectiveness of publicity, and the effectiveness or the Watershed Watchers Program. In addition, an "Urban Runoff Bead Drop" display is used to record actions (e.g., pick up litter, spread the word, take car to car wash) that children promise to do the help keep storm drains clean. Results of both these evaluation mechanisms are summarized in the Watershed Watchers Fourth Quarter Report included in the Program Annual Report Appendix 7-5.
Name: City of Santa Clara Arbor Day Celebration 2010 Grade or level: elementary	City of Santa Clara offers a free, educational assembly for schools and public alike. Subjects covered include: tree preservation, recycling, litter reduction, water pollution and energy conservation.	325 kindergarteners, 661 elementary school students, and 237 teachers, chaperones	No formal evaluation process in place, but it is a very well received program. Multiple requests received for return visits from teachers.

The following separate reports developed by SCVURPPP and other organizations also include information about school-age children outreach efforts conducted during FY 09-10:

- ZunZun School Assemblies for Watershed Watch Campaign – FY 09-10 Academic Year Final Report
- Memorandum- Evaluation of the School Assembly Program FY 09-10
- Watershed Watchers: Keeping Our Waterways Clean: FY 09-10 Fourth Quarter Report (includes end-of-year Summary form Alviso Education Center)

These reports are included as within the C.7 Public Education and Outreach section of Program's FY 09-10 Annual Report.

Section 8 - Provision C.8 Water Quality Monitoring

C.8 ►Water Quality Monitoring

State below if information is reported in a separate regional report. Municipalities can also describe below any Water Quality Monitoring activities in which they participate directly, e.g. participation in RMP workgroups, fieldwork within their jurisdictions, etc.

Summary:

During FY 09-10, we contributed to the SCVURPPP Monitoring and Assessment Program which conducts water quality monitoring in Santa Clara Valley creeks and rivers. In coordination with the BASMAA Regional Monitoring Coalition (RMC). In addition, we contribute financially to the Regional Monitoring Program for Water Quality in the San Francisco Estuary (RMP) and actively participate in RMP committees and work groups. For additional information on monitoring activities conducted by SCVURPPP, BASMAA RMC and the RMP, see the C.8 Water Quality Monitoring section of the Program's FY 09-10 Annual Report.

In addition, The City of Santa Clara and City of San Jose prepared and submitted a joint Stormwater Pump Station Discharge Monitoring Report to the SFRWQB in June 2010. The City was required to conduct two dry weather and three wet weather monitoring events at the Laurelwood, Fairway Glen, and Nelo-Victor Stormwater Pumpstations as a result of a fish kill in The Guadalupe River in October of 2008.

Pumpstation discharges were monitored for biochmical oxygen demand (BOD), total suspended solids (TSS), total coliform organisms, pH, salinity, dissolved oxygen, and temperature.

Section 9 – Provision C.9 Pesticides Toxicity Controls

C.9.a ►Adopt an Integrated Pest Management (IPM) Policy or Ordinance

(For FY 09-10 Annual Report only) Attach a copy of your individual IPM ordinance or policy.	X	**Attached**		**Not attached,** explain below
If **Not attached**, explain:				

C.9.b ►Implement IPM Policy or Ordinance

Report implementation of IPM BMPs by showing trends in quantities and types of pesticides used, and suggest reasons for increases in use of pesticides that threaten water quality, specifically organophosphorous pesticides, pyrethroids, carbaryl, and fipronil. A separate report can be attached as evidence of your implementation.

Summary:

For FY 09-10 we continued to evaluate our IPM procedures and pesticides. Of the pesticides we have used in the past, we continued to either not use or minimize many of these pesticides (see attached usage report). Organophosphorus, pyrethroids, carbaryl, and fipronil pesticides are not applied due to the risk of ground water contamination. Due to the length and volume of rainfall this season, we saw an increase in Round Up usage. We also saw a significant decrease in our pre-emergent use this year. We have been expanding our mulch program every year, and this has allowed us to decrease the number of sites requiring pre-emergent applications. This year we also continued with our second application of bark banding product which has allowed us to discontinue our large overhead foliar spray program for olive fruit suppression.

C.9.c ►Train Municipal Employees

Enter the number of employees that applied or used pesticides (including herbicides) within the scope of their duties this reporting year.	19
Enter the number of these employees who received training on your IPM policy and IPM standard operating procedures within the last 3 years.	19
Enter the percentage of municipal employees who apply pesticides who have received training in the IPM policy and IPM standard operating procedures within the last three years.	100%

C.9.d ►Require Contractors to Implement IPM

Did your municipality contract with any pesticide service provider in the reporting year?	X	Yes		No

If yes, attach one of the following:

- [ ] Contract specifications that require adherence to your IPM policy and standard operating procedures, OR
- [ ] Copy(ies) of the contractors' IPM certification(s) or equivalent, OR
- [ ] Equivalent documentation.

If not attached, explain:

Animal Damage Management provides gopher/mole control for the Parkways and Boulevards Division. They follow all standard IPM procedures, but do not have a formal certification or policy. We will review our current contract and require adherence to all City IPM policies for future contracts.

C.9.e ►Track and Participate in Relevant Regulatory Processes

Summarize participation efforts, information submitted, and how regulatory actions were affected **OR** reference a regional report that summarizes regional participation efforts, information submitted, and how regulatory actions were affected.

Summary:

During FY 09-10, we participated in regulatory processes related to pesticides through contributions to SCVURPPP, BASMAA and CASQA. For additional information, see the Regional Pollutants of Concern Report submitted by BASMAA on behalf of all MRP Permittees. This Report is included within the Program's FY 09-10 Annual Report.

C.9.f ►Interface with County Agricultural Commissioners

Provide a summary of improper pesticide usage reported to County Agricultural Commissioners and follow-up actions to correct violations, if any. A separate report can be attached as your summary.

Summary:

No corrective actions needed. No violations.

C.9.h.ii ►Public Outreach: Point of Purchase

Provide a summary of public outreach at point of purchase, and any measurable awareness and behavior changes resulting from outreach (here or in a separate report); **OR** reference a report of a regional effort for public outreach in which your agency participates.

Summary:

The following separate reports developed by SCVURPPP and BASMAA summarize point of purchase outreach efforts conducted during FY 09-10:

- FY 09-10 Store Employee Training Report (SCVURPPP)
- FY 09-10 Store Employee Training Evaluation Summary (SCVURPPP)
- FY 09-10 Store Employee Training Status Table (SCVURPPP)
- FY 09-10 List of Stores in the IPM Store Partnership Program (SCVURPPP)
- FY 09-10 BASMAA "Our Water, Our World" (OWOW) Report (BASMAA)

These reports are included within the C.9 Pesticides Toxicity Control section of Program's FY 09-10 Annual Report.

The Countywide Household Hazardous Waste Program collected 165,010 pounds of poison liquids and 130,560 pounds of poison solids in FY 09-10.

In addition, the City participated in the Countywide Composting Program. Forty-seven two-hour composting classes were conducted in calendar year 2009. Also, the Composting Program implemented the Bay Friendly Landscaping Program. Eight Bay Friendly workshops were held in calendar year 2009.

C.9.h.vi ►Public Outreach: Pest Control Operators

Provide a summary of public outreach to pest control operators and landscapers and reduced pesticide use (here or in a separate report); **OR** reference a report of a regional effort for outreach to pest control operators and landscapers in which your agency participates.

Summary:

The following separate reports developed by SCVURPPP summarizes Public Outreach: Pest Control Operators efforts conducted during FY 09-10:

- FY 09-10 Green Gardener Training Report

This report is included within the C.9 Pesticides Toxicity Control section of Program's FY 09-10 Annual Report.

C.9 Attachments

C.9.a

City of Santa Clara
Integrated Pest Management
Policy

The City of Santa Clara has adopted the following policy and procedures that follow the guidelines of an Integrated Pest Management Program (IPM). The City of Santa Clara IPM program shall use current comprehensive information on the life cycles of pests and their interactions with the environment. This information, in combination with available pest control methods, shall be used to manage pest damage by the most economical means, with the least possible hazard to people, property and the environment. The Santa Clara IPM program will utilize all pest management options possibly including, but not limited to, the judicious use of pesticides.

The City shall take a proactive approach in implementing IPM procedures in accordance with this policy. The City will direct its employees and contractors to use IPM tools to prevent pests (weeds, insects and fungi) from developing or worsening. These choices of control use the right tool, at the right time, and the right way. The ultimate goal is to minimize the amount of chemicals used to control pests.

Contractors hired by the City of Santa Clara to provide pest control work, must adhere to all policy and procedures set forth in their IPM program.

C.9.b

City of Santa Clara Pesticide Use FY 08-09 and FY 09-10		
HERBICIDES	**2008-09**	**2009-10**
Round-Up Pro	112.53 gallons	10.69 gallons
Round-Up Pro Max	0	119.34 gallons

Section 10 - Provision C.10 Trash Load Reduction

C.10.a.i ►Short-Term Trash Loading Reduction Plan

(For FY 10-11 Annual Report only) Provide description of actions/tasks initiated/conducted/completed in developing a Short-Term Trash Loading Reduction Plan (due February 1, 2012).

Description*:*

Not required for this Annual Report.

C.10.a.ii ►Baseline Trash Load and Trash Load Reduction Tracking Method

(For FY 10-11 Annual Report only) Provide description of actions/tasks initiated/conducted/completed to gather trash loading data and develop a Baseline Trash Load and Trash Load Reduction Tracking Method (due February 1, 2012).

Description*:*

A summary of Program accomplishments for this sub-provision are included within the C.10 Trash Load Reduction section of Program's FY 09-10 Annual Report.

C.10.a.iii ►Minimum Full Trash Capture

(For FY 10-11 Annual Report and Each Annual Report Thereafter) Provide a description of actions/tasks initiated/conducted/completed in implementing Minimum Full Trash Capture Devices (due July 1, 2014) within individual jurisdictions. Include information on Full Trash Capture Devices installed under Bay-area Wide Trash Capture Demonstration Project administered by San Francisco Estuary Partnership.

Description*:*

A summary of Program accomplishments for this sub-provision are included within the C.10 Trash Load Reduction section of Program's FY 09-10 Annual Report. In addition, the Program recently finalized a technical report detailing the results of its Pilot Trash Structural Treatment control Study implemented in 2007. This technical report is also available within the C.10 Trash Load Reduction section of Program's FY 09-10 Annual Report.

C.10.b.iii ►Trash Hot Spot Assessment

(For FY 10-11 Annual Report and Each Annual Report Thereafter) Provide volume of material removed from each Trash Hot Spot cleanup, and the dominant types of trash (e.g., glass, plastics, paper) removed and their sources to the extent possible. Provide required photo documentation.

Fill out the following table or attach a summary of the following information.

Trash Hot Spot	Cleanup Date	Volume of Material Removed	Dominant Type of Trash	Trash Sources (where possible)
N/A for FY 09-10 Annual Report				

C.10.d ►Summary of Trash Load Reduction Actions

Provide summary of new trash load reduction actions or increased levels of implementation of existing actions that were implemented after adoption of the MRP (control measures and best management practices) including the types of actions and levels of implementation, and the total trash loads and dominant types of trash removed from each type of action.

Suggested trash load reduction actions to track and report may include:

- Anti-litter Campaigns
- Anti-litter/Dumping Enforcement Activities
- Curbside Recycling Programs
- Education and Outreach Efforts
- Free Trash Pickup/Dropoff Days
- County HHW Program Activities
- Improved Trash Bin Management
- Inspection/Maintenance of Storm Drain Outfalls
- Litter Pickup and Control
- Removal of Homeless Encampments
- Solid Waste Recycling Efforts
- Source Controls/Bans/Prohibitions
- Storm Drain Operation and Maintenance
- Storm Drain Signage/Marking
- Street Sweeping Activities
- Trash Removal from Receptacles
- Volunteer Creek Cleanups

Type of Trash Load Reduction Action	Date of First Implementation	Level of Implementation (specify if level was increased after MRP adoption)	Total Trash Load Removed by Action	Dominant Types of Trash Removed by Action
Not all trash load reduction actions were tracked by "loads removed" this fiscal year. Once the Trash Load Reduction Tracking Method is developed (see Provision C.10.a.ii), trash loads removed will be documented for each load reduction (as feasible). See the Program's FY 09-10 Annual Report for schedule.				
Curbside Recycling Program	1989 (estimate)	Implemented residential single stream recycling December 2009	6,513 tons	Paper, cardboard, glass, plastic, aluminum, motor oil, household batteries, and CFL's
Clean-Up Campaign	1967 (estimate)	Routine and ongoing	6,329 tons	Landscape debris and furniture
Free Disposal Days at Transfer Station	1996 (estimate)	Routine and ongoing	unknown	Furniture and other bulky items

C.10.d ►Summary of Trash Load Reduction Actions				
Type of Trash Load Reduction Action	**Date of First Implementation**	**Level of Implementation (specify if level was increased after MRP adoption)**	**Total Trash Load Removed by Action**	**Dominant Types of Trash Removed by Action**
Household Hazardous Waste Program	1991 (estimate)	Routine and ongoing	3.4 million pounds	Paint, pesticides, batteries, motor oil, household chemicals
Environmental Day	March 2010	Implemented in 2010	unknown	Paper and electronic documents
Litter pickup and control	unknown	Routine and ongoing	unknown	Mostly paper done on an as needed basis
Catch basin cleaning (includes tops)	unknown	Routine and ongoing	535 cubic yards	Organics, paper, plastic
Removal of homeless encampments	unknown	Routine and ongoing	unknown	Varies
Stormdrain Pumpstation trash rack cleaning	unknown	Routine and ongoing	unknown	Plastics
Street Sweeping	Unknown	Routine and ongoing	7,593 cubic yards	Silt, organics, plastics
Leaf Vacuum Program	unknown	Routine and ongoing	1,427 cubic yards	organics
Stormdrain inlet marking	unknown	Routine and ongoing	unknown	N/a

Section 11 - Provision C.11 Mercury Controls

C.11.a.i ►Mercury Recycling Efforts

List below or attach lists of efforts to promote, facilitate, and/or participate in collection and recycling of mercury containing devices and equipment at the consumer level (e.g., thermometers, thermostats, switches, bulbs).

The Countywide Household Hazardous Waste Program (CoHHWP) served 34,629 residents and 432 small businesses at 60 collection events in FY 09-10. Residents are able to dispose of mercury containing devices at all collection events. The CoHHWP has 34 fluorescent lamp and 67 household battery local retail recycling partners that accept mercury containing devices at no charge. The City provides single-family curbside collection of CFL's and household batteries through its solid waste collection program. Also, the City accepts household batteries at no charge at all 10 of our fire stations. Twenty-four thermometer exchange events were conducted. The CoHHWP participated in 28 community outreach events.

C.11.a.ii ►Mercury Collection

Provide an estimate of the mass of mercury collected through these efforts, or provide a reference to a report containing this estimate.

Amount collected by the Santa Clara Household Hazardous Waste Program:

Fluorescent Lamps: 92,684 pounds;
Household Batteries: 178,602 pounds;
Elemental Mercury: 580 pounds

The methodologies for estimating the mass of mercury collected through mercury collection and recycling efforts has been made using the new conversion factor established by CalRecycle in 2009; 1 foot = 0.125 pounds and one CFL = 0.25 pounds.

271 pounds of CFL's and 6,800 pounds of household batteries were collected from single-family homes through the City's weekly curbside recycling program.

C.11.b ►Monitor Methylmercury
C.11.c ►Pilot Projects to Investigate and Abate Mercury Sources in Drainages
C.11.d ►Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices
C.11.e ►Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit
C.11.f ►Diversion of Dry Weather and First Flush Flows to POTWs
C.11.g ►Monitor Stormwater Mercury Pollutant Loads and Loads Reduced
C.11.h ►Fate and Transport Study of Mercury In Urban Runoff
C.11.i ►Development of a Risk Reduction Program Implemented Throughout the Region
C.11.j ►Develop Allocation Sharing Scheme with Caltrans

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.

Summary:

A summary of Program accomplishments for these sub-provisions are included within the C.11 Mercury Controls section of Program's FY09-10 Annual Report and/or the BASMAA Regional POC Report.

Section 12 - Provision C.12 PCBs Controls

C.12.a.i,iii ►Municipal Inspectors Training

(For FY 09-10 Annual Report only) List below or attach description of results of training municipal industrial inspectors to identify, in the course of their existing inspections, PCBs or PCB-containing equipment.

Description:

In FY 09-10 inspector training materials were developed through in-kind contributions of SCVURPPP to BASMAA. Training materials can be found in the BASMAA Regional POC Report. City's Code Enforcement Technician that is responsible for commercial/industrial facility inspections has reviewed the material.

C.12.a.ii,iii ►Ongoing Training

(For FY 10-11 Annual Report and Each Annual Report Thereafter) List below or attach description of ongoing training development and inspections for PCB identification, including documentation and referral to appropriate regulatory agencies (e.g. county health departments, Department of Toxic Substances Control, California Department of Public Health, and the Water Board) as necessary.

Description:

Not required for this annual report.

C.12.b ►Conduct Pilot Projects to Evaluate Managing PCB-Containing Materials and Wastes during Building Demolition and Renovation Activities
C.12.c ►Pilot Projects to Investigate and Abate On-land Locations with Elevated PCB Concentrations
C.12.d ►Conduct Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices
C.12.e ►Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit
C.12.f ►Diversion of Dry Weather and First Flush Flows to POTWs
C.12.g ►Monitor Stormwater PCB Pollutant Loads and Loads Reduced
C.12.h ►Fate and Transport Study of PCBs In Urban Runoff
C.12.i ►Development of a Risk Reduction Program Implemented Throughout the Region

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.

Summary:
A summary of Program accomplishments for these sub-provisions are included within the C.12 PCB Controls section of Program's FY 09-10 Annual Report and the BASMAA Regional POC Report.

Section 13 - Provision C.13 Copper Controls

C.13.a.i and iii ► Legal Authority: Architectural Copper

(For FY 10-11 Annual Report only) Do you have adequate legal authority to prohibit discharge of wastewater to storm drains generated from the installation, cleaning, treating, and washing of the surface of copper architectural features, including copper roofs to storm drains?	X	**Yes**		**No**

Section 13.20.030 (a) of The Santa Clara City Code provides legal authority and reads "Discharge into the stormdrain prohibited – (a) it is unlawful to discharge, or cause, allow, permit to be discharged into any stormdrain, storm sewer, or natural outlet or channel any waste, including, but not limited to , sewage, industrial wastes, petroleum products, coal tar, or any refuse substance arising from the manufacture of gas from coal or petroleum, chemicals, detergents, solvents, paints, contaminated water, or chlorinated swimming pool water, pesticides, herbicides, fertilizers, or other process waste water.

C.13.b.i and iii ► Legal Authority: Pools, Spas, and Fountains

(For FY10-11 Annual Report only) Do you have adequate legal authority to prohibit discharges to storm drains from pools, spas, and fountains that contain copper-based chemicals?	X	**Yes**		**No**

Section 13.20.030 (a) of The Santa Clara City Code provides legal authority. See language above.

C.13.c ►Vehicle Brake Pads

Reported in a separate regional report.

A summary of the Program's participation with the Brake Pad Partnership (BPP) is included within the C.13 Copper Controls section of Program's FY 09-10 Annual Report and/or the BASMAA Regional POC Report.

C.13.d.iii ►Industrial Sources Copper Reduction Results

List below or attach annotated lists or tables from your Industrial and Commercial Site Controls portion of this report, that highlight copper reduction results among the facilities identified as potential users or sources of copper, facilities inspected, and BMPs addressed. For FY 09-10 describe below or highlight in the C.4 Evaluation portion (if provided) of this report the steps taken to revise your program to meet new data tracking and reporting requirements for implementation levels described in C.13.d.ii.

Summary:

In FY 09-10, inspector training materials were developed through in-kind contributions of SCVURPPP to BASMAA. Training materials can be found in the BASMAA Regional POC Report. City's Code Enforcement Technician that is responsible for commercial/industrial stormwater inspections has received and is familiar with materials.

Plating shops were inspected as potential copper pollutant sources. See inspection list below.

POTENTIAL COPPER POLLUTION INSPECTION LIST FY 09-10

COMPANY NAME	ADDRESS	INSPECTION DATE	# OF VIOLATIONS	VIOLATION TYPE*	REINSPECTION DATE	# OF CORRECTED VIOLATIONS	ENFORCEMENT*	BMP GIVEN	CATEGORY	INSEPCTION FREQUENCY
SJ Valley Plating	491 Perry Ct.	5/18/2010	0	N/A	N/A	N/A	0	no	8	
Swift Metal Finishing	1161 Richard Ave.	6/1/2010	0	N/A	N/A	N/A	0	no	8	
Auto Chlor	3400 Thomas Rd.	7/1/2009	1	swppp	7/9/2009	1	1	no	17	1 per year

C.13.e ►Studies to Reduce Copper Pollutant Impact Uncertainties

Revised. Description reads "State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below."

Summary:

A summary of the Program's efforts (i.e., participation in RMP committee and work group meetings) to develop regional studies to reduce copper pollutant impact uncertainties is included within the C.13 Copper Controls section of Program's FY 09-10 Annual Report and/or BASMAA Regional POC Report.

Section 14 - Provision C.14 PBDE, Legacy Pesticides and Selenium Controls

C.14.a ►Control Programs for PBDEs, Legacy Pesticides and Selenium Controls
Revised. Description reads "State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below."
Summary: A summary of the Program's efforts (i.e., participation in RMP committee and work group meetings) to develop a control program for PBDE's, legacy pesticides and selenium is included within the C.14 PBDE, Legacy Pesticides, and Selenium section of the Program's Annual Report and the BASMAA Regional POC Report.

Section 15 - Provision C.15 Exempted and Conditionally Exempted Discharges

C.15.b.iii.(1), C.15.b.iii.(2) ► Planned and Unplanned Discharges of Potable Water				
Is your agency a water purveyor?	X	**Yes**		**No**
If **No**, skip to C.15.b.vi.(2):				
If **Yes**, Complete the attached reporting tables or attach your own table with the same information. Describe program highlights below. For FY 09-10 only, describe steps taken to revise your program to meet new monitoring, data tracking and reporting requirements.				
Summary: For FY 09-10 our utility has revised program by documenting both planned and unplanned discharges, conducting water quality monitoring including chlorine residual, pH, discharge turbidity, implementing revised best management practices (BMP's) and correction actions including sediment control, chlorine control, turbidity control and chemical additives. A summary of the programs efforts to update the Water Utility Operations & Maintenance Discharge Pollution Prevention Plan (WUDPPP) to assist municipal water purveyors in complying with this provision of the MRP is included within the C.15 Exempted and Conditionally Exempted Discharges section of the Programs FY 09-10 Annual Report.				

C.15.b.vi.(2) ► Irrigation Water, Landscape Irrigation, and Lawn or Garden Watering

Provide implementation summaries of the required BMPs to promote measures that minimize runoff and pollutant loading from excess irrigation. Generally the categories are:

- Promote conservation programs
- Promote outreach for less toxic pest control and landscape management
- Promote use of drought tolerant and native vegetation
- Promote outreach messages to encourage appropriate watering/irrigation practices
- Implement Illicit Discharge Enforcement Response Plan for ongoing, large volume landscape irrigation runoff.

Summary:

Promote conservation programs: The city of Santa Clara promotes conservation programs by educating the community about methods of conserving water. Additionally, the City coordinates with the Santa Clara Valley Water District for rebate programs for both indoor and outdoor water conservation. The City is currently expanding the recycled water mains and promoting the use of recycled water to save potable water for other and future uses.

Promote outreach for less toxic pest control and landscape management: City staff is proactive when finding or being informed about irrigation leaks or runoff and contact residents directly to educate them about efficient landscape management. The City coordinates with the Santa Clara Valley Water District to perform irrigation audits and provide rebates for water conserving irrigation. Additionally, the City's Recycled Water Program promotes landscape management and water conservation.

Promote use of drought tolerant and native vegetation: The City promotes the use of drought tolerant and native vegetation through landscape displays that City staff present at City sponsored events. Additionally, the City coordinates with the Santa Clara Valley Water District for landscape audits and rebate programs, which specifically require drought tolerant and recommend native vegetation planting materials.

Promote outreach messages to encourage appropriate watering/irrigation practices: City staff directly contact residents that are found to be, or reported to be, overwatering or running irrigations systems with broken sprinklers. City staff is drafting a water efficient landscape ordinance for residential, commercial and industrial properties. City staff works with recycled water customers to ensure that their irrigation systems are in proper working order. The City coordinates with the Santa Clara Valley Water District on irrigation audits and rebate programs to encourage efficient, water conserving irrigation.

Implement Illicit Discharge Enforcement Response Plan for ongoing, large volume landscape irrigation runoff: When City staff learn about ongoing, large volume landscape irrigation runoff, staff contact and work directly with property owners and property managers to educate them about water conservation and require that these irrigation problems are corrected in a timely manner.

For outreach for less toxic pest control and appropriate irrigation practices, refer to the Watershed Watch Campaign in the C.7 Public Information and Outreach section and the IPM Store Partnership and Green Gardener Training Programs in the C.9. Pesticide Toxicity Control section of Programs FY 09-10 Annual Report.

C.15.b.iii.(1) ►Planned Discharges of the Potable Water System

Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Duration of Discharge (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual (mg/L)	pH (standard units)	Discharge Turbidity[1] (NTU)	Implemented BMPs & Corrective Actions
Fire Hydrant #1627 Lillick and Halford	Hydrant flushing	Calabazas Creek	4/14/10	00:10	9,000	1.3 million	2.4	8.2	0.2 (clear)	Sediment, Chlorine and Turbidity Control and Chemical Additive
Fire Hydrant #1680 Humbolt and Kiely	Hydrant flushing	Saratoga Creek	5/12/10	00:05	4,190	1.2 million	0.03	8.0	0.3 (clear)	Sediment, Chlorine and Turbidity Control and Chemical Additive
Fire Hydrant #131 Jackson and Homestead	Hydrant flushing	Guadalupe River	6/9/10	00:05	4,400	1.3 million	0.01	9.4	0.6 (clear)	Sediment, Chlorine and Turbidity Control and Chemical Additive
Fire Hydrant #2241 Coronado and Central Expressway	Hydrant flushing	San Tomas Aquino Creek	6/9/10	00:05	5,500	1.6 million	0.07	7.9	0.8 (clear)	Sediment, Chlorine and Turbidity Control and Chemical Additive
Fire Hydrant #1941 Space Park and Raymond	Hydrant flushing	San Tomas Aquino Creek	6/9/10	00:05	5,000	1.4 million	0.16	8.0	0.9 (clear)	Sediment, Chlorine and Turbidity Control and Chemical Additive
Fire Hydrant #805 Benton and Moraga	Hydrant flushing	Calabazas Creek	6/9/10	00:05	4,500	1.3 million	0.06	8.0	0.6 (clear)	Sediment, Chlorine and Turbidity Control and Chemical Additive

Notes: [1] Monitor the receiving water for turbidity if necessary and feasible. Include data in this column if available.

FY 2009-2010 Annual Report
Permittee Name: City of Santa Clara

C.15 – Exempted and Conditionally Exempted Discharges

C.15.b.iii.(2) ►Unplanned Discharges of the Potable Water System

Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Discharge Duration (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual[2] (mg/L)	pH[2] (standard units)	Discharge Turbidity (Visual)[2,]	Implemented BMPs & Corrective Actions	Time of discharge discovery	Regulatory Agency Notification Time[4]	Inspector arrival time	Responding crew arrival time
Northside Tank 1 2339 Gianara	Tank Discharge	San Tomas Aquino Creek	3/11/10	36:00	4.2 million	3.16 million	0.00	7.8	0.3 (clear)	Sediment, Chlorine and Turbidity Control and Chemical Additive	09:30	13:00	13:00	09:30

Notes:
1. This table contains all of the unplanned discharges that occurred in this FY.
2. Monitoring data is only required for 10% of the unplanned discharges. If you monitored more than 10% of your unplanned discharges report all of the data collected.
4. Notification to Water Board staff is required for unplanned discharges where the chlorine residual is >0.05 mg/L and total volume is ≥ 50,000 gallons. Notification to State Office of Emergency Services is required after becoming aware of aquatic impacts as a result of unplanned discharge or when the discharge might endanger or compromise public health and safety.

ACRONYMS

BASMA – Bay Area Stormwater Management Association

BMP – Best Management Practices

CEQA – California Environmental Quality Act

CoHHWP- Countywide Household Hazardous Waste Program

WEST VALLEY
CLEAN WATER PROGRAM

September 15, 2010

Mr. Bruce H. Wolfe
Executive Officer
San Francisco Bay Regional Water Quality Control Board
1515 Clay Street, Suite 1400
Oakland, CA 94612

Subject: FY2009-2010 Annual Report for the West Valley Communities
- City of Campbell's Urban Runoff Management Program
- Town of Los Gatos' Urban Runoff Management Program
- City of Monte Sereno's Urban Runoff Management Program
- City of Saratoga's Urban Runoff Management Program

Dear Mr. Wolfe:

This Annual Report is submitted on behalf of the West Valley Communities of Campbell, Los Gatos, Monte Sereno, and Saratoga, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to Permit Provision C.16.a of the Municipal Regional Stormwater NPDES Permit (MRP), Order R2-2009-0074, NPDES Permit No CAS612008 issued by the San Francisco Bay Regional Water Quality Control Board. The Annual Report provides documentation of activities conducted during FY 2009-2010 and consists of the following:

A. Certification Statement
B. Annual Report Form
   - Table of Contents
   - Completed Annual Report Form: Sections 1-15
C. Appendices
   - Index of Attachments

Please contact me at (408) 354-4734 regarding any questions or concerns.

Very truly yours,

Kelly Carroll

Kelly Carroll

Section 2 - Provision C.2 Reporting Municipal Operations

Program Highlights and Evaluation

Highlight/summarize activities for reporting year:

Summary:

Corporation Yard SWPPPP was in place and implemented by July 1, 2010. Participation in SCVURPPP Municipal Operations Ad Hoc Task Group (AHTG) was provided by West Valley Clean Water Program Staff on behalf of our agency, and includes AHTG member discussions and review of AHTG work products [see SCVURPPP FY0910 Annual Report for description of AHTG activities and work products]. Participation in BASMAA's Municipal Operations Committee was provided by SCVURPPP Staff on behalf of our agency [see SCVURPPP FY0910 Annual Report for description of BASMAA Committee activities and work products].

C.2.a. Street and Road Repair and Maintenance

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of these BMPs were not adequately implemented during the reporting fiscal year then indicate so and provide explanation in the comments section below:

X	Control of debris and waste materials during road and parking lot installation, repaving or repair maintenance activities from polluting stormwater
X	Control of concrete slurry and wastewater, asphalt, pavement cutting, and other street and road maintenance materials and wastewater from discharging to storm drains from work sites.
X	Sweeping and/or vacuuming and other dry methods to remove debris, concrete, or sediment residues from work sites upon completion of work.

Comments:

Continued implementation of Street and Road Repair and Maintenance Performance Standard, including applicable BMPs.

Continued implementation of Rural Roads Performance Standard and applicable BMPs for 'rural type' of roads, which were defined as "roads (and walkways) without curb and gutters."

Contractors/ Vendors working on CIP/ agency projects are required to also follow applicable BMPs.

Staff attended the Program's "Rural Roads Maintenance BMPs" Workshops on [September 25 and 26, 2008 and/or March 23, 2009] presented by Ledwith Watershed Services, which covered in class and in-field training of various erosion and sediment control measures, effective installation and typical failure points.

C.2.b. Sidewalk/Plaza Maintenance and Pavement Washing

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of these BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

X	Control of wash water from pavement washing, mobile cleaning, pressure wash operations at parking lots, garages, trash areas, gas station fueling areas, and sidewalk and plaza cleaning activities from polluting stormwater
X	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs

Comments:
Continued implementation of Street and Road Repair and Maintenance Performance Standard, including applicable BMPs.
Contractors/ Vendors working on CIP/ agency projects are required to also follow applicable BMPs.

C.2.c. Bridge and Structure Maintenance and Graffiti Removal

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of these BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

X	Control of discharges from bridge and structural maintenance activities directly over water or into storm drains
X	Control of discharges from graffiti removal activities
X	Proper disposal for wastes generated from bridge and structure maintenance and graffiti removal activities
X	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs for graffiti removal

Comments:
Continued implementation of Street and Road Repair and Maintenance Performance Standard, including applicable BMPs.
Contractors/ Vendors working on CIP/ agency projects are required to also follow applicable BMPs.

C.2.d. Stormwater Pump Stations

Does your municipality own stormwater pump stations:		**Yes**	X	**No**

If your answer is **No** then skip to **C.2.e.**

(For FY 10-11Annual Report only) Complete the following table for dry weather DO monitoring and inspection data for pump stations[1] (add more rows for additional pump stations):

Pump Station Name and Location	**First inspection Dry Weather DO Data**		**Second inspection Dry Weather DO Data**	
	Date	**mg/L**	**Date**	**mg/L**

(For FY 10-11Annual Report only) Summarize corrective actions as needed for DO monitoring at or below 3 mg/L. Attach inspection records of additional DO monitoring for corrective actions:

Summary:

(For FY 10-11Annual Report only) Complete the following table for wet weather inspection data for pump stations (add more rows for additional pump stations):

Pump Station Name and Location	**Date** (2x/year required)	**Presence of Trash** (Cubic Yards)	**Presence of Odor** (Yes or No)	**Presence of Color** (Yes or No)	**Presence of Turbidity** (Yes or No)	**Presence of Floating Hydrocarbons** (Yes or No)

[1] Pump stations that pump stormwater into stormwater collection systems or infiltrate into a dry creek immediately downstream are exempt from DO monitoring.

C.2.e. Rural Public Works Construction and Maintenance

Does your municipality own/maintain rural[2] roads:		**Yes**	X	**No**

If your answer is **No** then skip to **C.2.f**.

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

	Control of road-related erosion and sediment transport from road design, construction, maintenance, and repairs in rural areas
	Identification and prioritization of rural road maintenance based on soil erosion potential, slope steepness, and stream habitat resources
	No impact to creek functions including migratory fish passage during construction of roads and culverts
	Inspection of rural roads for structural integrity and prevention of impact on water quality
	Maintenance of rural roads adjacent to streams and riparian habitat to reduce erosion, replace damaging shotgun culverts and excessive erosion
	Re-grading of unpaved rural roads to slope outward where consistent with road engineering safety standards, and installation of water bars as appropriate
	Inclusion of measures to reduce erosion, provide fish passage, and maintain natural stream geomorphology when replacing culverts or design of new culverts or bridge crossings

Comments including listing increased maintenance in priority areas:

Definition and BMPs in MRP are different than previously defined "Rural Public Works" found in SCVURPPP Rural Public Works Performance Standard [rural roads]. While all agency operations and maintenance occur in urbanized areas, geographic characteristics of our landscape do include 'rural types of roads,' which are roads without traditional curb/gutter. For these facilities the SCVURPPP Rural Public Works Maintenance and Support Performance Standards and associated BMPs have been in place and implemented since 2003, and are included with streets/road maintenance reporting under C2a above. Staff attended the Program's "Rural Roads Maintssenance BMPs" Workshops on [September 25 and 26, 2008 and/or March 23, 2009] presented by Ledwith Watershed Services, which covered in class and in-field training of various erosion and sediment control measures, effective installation and typical failure points.

[2] Rural means any watershed or portion thereof that is developed with large lot home-sites, such as one acre or larger, or with primarily agricultural, grazing or open space uses.

C.2.f. Corporation Yard BMP Implementation

Place an **X** in the boxes below that apply to your corporations yard(s):

	We do not have a corporation yard
	Our corporation yard is a filed NOI facility and regulated by the California State Industrial Stormwater NPDES General Permit
X	We certify that we have a current **Stormwater Pollution Prevention Plan (SWPPP)** for the Corporation Yard(s)

Place an **X** in the boxes below next to implemented SWPPP BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

X	Control of pollutant discharges to storm drains such as wash waters from cleaning vehicles and equipment
X	Routine inspection prior to the rainy seasons of corporation yard(s) to ensure non-stormwater discharges have not entered the storm drain system
X	Containment of all vehicle and equipment wash areas through plumbing to sanitary or another collection method
X	Use of dry cleanup methods when cleaning debris and spills from corporation yard(s) or collection of all wash water and disposing of wash water to sanitary or other location where it does not impact surface or groundwater when wet cleanup methods are used
X	Cover and/or berm outdoor storage areas containing waste pollutants

Comments:
Corporation Yard SWPPPP is in place and being implemented. The SWPPP has been in place since 1996 and was fully updated in 2004. Implementation includes use of SWPPP recommended BMPs, annual training and yard walk-thru/ self-inspection. Newly implemented is a Self-Inspection Form, and will yield data/results in then next FY Annual Report.

If you have a corporation yard(s) that is not an NOI facility , complete the following table for inspection results for your corporation yard(s) or attach a summary including the following information:

Corporation Yard Name	**Inspection Date** (1x/year required)	**Inspection Findings/Results**	**Follow-up Actions**
Saratoga Service Yard	5/26/10	Review, per SWPPP, during walk-thru included: o Location of SWPPP => in office o Location of Adsorbent Stations => in place, accessible, stocked o Housekeeping BMPs => in place and implemented o Outdoor Storage BMPs (materials, chemicals, waste	• BMP Follow-up: None • Conduct Wet Weather Observation during next rainy season.

		areas) => areas are clean and contained o Outdoor Process BMPs (wash rack, fueling stations) – in place, functioning o Visual inspection of on-site SD/CBs => clear, no evidence of non-stormwater discharges

Section 3 - Provision C.3 Reporting New Development and Redevelopment

C.3.a. New Development and Redevelopment Performance Standard Implementation Summary Report

(For FY 10-11Annual Report only) Provide a brief summary of the methods of implementation of Provisions C.3.a.i.(1)-(8).

Summary:
Not required for this Annual Report

C.3.b. Green Streets Status Report

(All projects to be completed by December 1, 2014)

On an annual basis (if applicable), report on the status of any pilot green street projects within your jurisdiction. For each completed project, report the capital costs, operation and maintenance costs, legal and procedural arrangements in place to address operation and maintenance and its associated costs, and the sustainable landscape measures incorporated in the project including, if relevant, the score from the Bay-Friendly Landscape Scorecard.

Summary:
Currently under consideration as one of SCVURPPP's required Green Street Projects is Campbell's Hacienda Avenue Street Rehabilitation project. The project's concept design for green street components and corresponding grant application have been approved by Campbell's City Council for submission, and are now awaiting response from the Grants Committee [Urban Greening for Sustainable Communities Grant Program]. The Grant Application was submitted with support letters from SCVURPPP and RWQCB.

See APPENDIX C3: Attachment C3b Grant Application Project Description for a brief description of City of Campbell's proposed project at Hacienda Avenue. Also see SCVURPPP's FY0910 Annual Report Section C.3 New Development and Redevelopment for a description of C3PO AHTG Green Streets Work Group and the BASMAA Development Committee activities [note: there may also be a separate BASMAA report regarding region-wide efforts on this topic].

Section 4 – Provision C.4 Industrial and Commercial Site Controls

C.4.a.ii Legal Authority

(For FY 09-10 Annual Report only) Do you have adequate legal authority to obtain effective stormwater pollutant control on industrial sites?	X	**Yes**		**No**

If **No**, explain:

C.4.c.ii.(5) Enforcement Response Plan

(For FY 09-10 Annual Report only) Have you developed and implemented an Enforcement Response Plan by April 1, 2010?	X	**Yes**		**No**

If **No**, explain:

Program Highlights

Provide background information, highlights, trends, etc. For FY 09-10 Annual Report describe steps taken to revise your program to meet new data tracking and reporting requirements.

Continued integrated Stormwater/Urban Runoff Inspections with Santa Clara Department of Environmental Health (SCC DEH) in Food Facilities and with Santa Clara Fire Department/HazMat (SCC FD) for Industrial/Commercial inspections. Met with SCC FD for annual review of program, types of facilities to be inspected and changes due to MRP. Met with SCC DEH in a series of meetings to review program and prepare for a comprehensive training session on the MRP, stormwater inspection requirements and filling out new inspection forms. Conducted Training for DEH inspectors on Urban Run-off, including focus on POC Litter/trash. Met again with SCC DEH to review reporting and data requirements for new MRP/ Annual Reporting Format.

Participation in IND/IDDE Ah Hoc Tack Group was provided by West Valley Clean Water Program Staff on behalf of our agency, and includes AHTG member discussions and review of AHTG work products. See SCVURPPP FY0910 Annual Report, Section C.4. Industrial and Commercial Site Controls for a description of activities of the IND/IDDE AHTG and the BASMAA Municipal Operations Committee.

C.4.b.i. Business Inspection Plan

(For FY 09-10 Annual Report only) Do you have a Business Inspection Plan?	X	**Yes**		**No**

If No, explain:

C.4.b.iii.(1) Potential Facilities List

List below or attach your list of industrial and commercial facilities in your Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.

See APPENDIX C4: Attachment: C4biii(1) Potential Facilities List

C.4.b.iii.(2) Facilities Scheduled for Inspection

List below or attach your list of facilities scheduled for inspection during the current fiscal year.

See APPENDIX C4: Attachment C4biii(2) Facilities Scheduled

C.4.c.iii.(1) Facility Inspections

Fill out the following table or attach a summary of the following information.

	Number	Percent
Number of businesses inspected (if known)	64	
Total number of inspections conducted	75	
Violations issued (excluding verbal warnings)	0	
Sites inspected in violation	1	1%
Violations[1] resolved within 10 working days or otherwise deemed resolved in a longer but still timely manner	1	100%

[1] Total number of violations equals the number of initial enforcement actions (i.e. one violation issued for several problems during an inspection at a site). It does not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

C.4.c.iii.(2) Frequency and Types/Categories of Violations Observed

Fill out the following table or attach a summary of the following information.

Data collected in this section is based on a method of counting rather than being captured while in the field. During the past year, new forms and guidelines have been put in place to be consistent in the future Annual Reports and MRP requirements.

Type/Category of Violations Observed	Number of Violations
Actual discharge (e.g. non-stormwater discharge)	1
Potential discharge (e.g. BMPs not in place or ineffective)	0

C.4.c.iii.(2) Frequency and Type of Enforcement Conducted

Fill out the following table or attach a summary of the following information.

	Enforcement Action (as listed in ERP)[1]	Number of Enforcement Actions Taken	% of Enforcement Actions Taken[2]
Level 1	None/incident resolved	0	0
Level 2	Education/Cooperation	0	0
Level 3	Warning Notice (NTC)	1	<1%
Level 4	Notice of Violation/ Legal Action	0	0
Total		1	<1%

Notes:
[1]Agencies to list specific enforcement actions as defined in their ERPs.
[2]Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

C.4.c.iii.(3) Types of Violations Noted by Business Category

Fill out the following table or attach a summary of the following information.

Data collected in this section is based on a method of counting rather than being captured while in the field. During the past year, new forms and guidelines have been put in place to be consistent in the future Annual Reports and MRP requirements.

Business Category[1]	Actual Discharge Violations	Potential Discharge Violations
Food Facilities	1	0
Automotive	0	0

Notes:

[1] List your Program's standard business categories.

C.4.c.iii.(4) Non-Filers

List below or attach a list of the facilities required to have coverage under the Industrial General Permit but have not filed for coverage:

No industries identified as non-filers during scheduled inspections during this fiscal year

C.4.d.iii Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
DEH Urban Run-off Inspector Training	06-16-10	Appropriate BMPS, POC and new inspection reporting forms and procedures	8	88%

Section 5 – Provision C.5 Illicit Discharge Detection and Elimination

C.5.a.ii Legal Authority

(For FY 09-10 Annual Report only) Do you have adequate legal authority to prohibit and control illicit discharges and escalate stricter enforcement to achieve expedient compliance?	X	**Yes**		**No**

If **No**, explain:

C.5.b.ii.(4) Enforcement Response Plan

(For FY 09-10 Annual Report only) Have you developed and implemented an Enforcement Response Plan by April 1, 2010?	X	**Yes**		**No**

If **No**, explain:

Program Highlights

Provide background information, highlights, trends, etc. For FY 09-10 Annual Report describe steps taken to revise your program to meet new data tracking and reporting requirements.

Made map(s) of the MS4 publicly available by July 1, 2010; continued to implement a collection system screening program; Participation in SCVURPPP's IND/IDDE Ad Hoc Task Group (AHTG) was provided by West Valley Clean Water Program Staff on behalf of our agency, and includes AHTG member discussions and review of AHTG work products;.and SCVURPPP staff provided participation in the BASMAA Municipal Operations Committee. Refer to the C.5 Illicit Discharge Detection and Elimination section of Program's FY 09-10 Annual Report for description of activities of the IND/IDDE AHTG and the BASMAA Municipal Operations Committee.

C.5.c.iii Complaint and Spill Response Phone Number and Spill Contact List

List below or attach your complaint and spill response phone number and spill contact list.

See APPENDIX C5: Attachment: C5ciii Construction-Illegal Discharge-Industrial Contacts

Contact	Description	Phone Number

C.5.d.iii Evaluation of Mobile Business Program

Describe implementation of minimum standards and BMPs for mobile businesses and your enforcement strategy. This may include participation in the BASMAA Mobile Surface Cleaners regional program or local activities.

Description:

Response to complaints/ observations of illicit discharges is thru WVCWP, who follows ERP procedures and conveys appropriate information, such as BMPs recommended by BASMAA Mobile Surface Cleaners Program. Municipal Staff and contractors are directed to utilize the same Mobile Surface Cleaner BMPs. See also SCVURPPP's FY 0910 Annual Report, Section C.5 Illicit Discharge Detection and Elimination, for a description of efforts by IND/IDDE AHTG and the BASMAA Municipal Operations Committee to address mobile businesses.

C.5.e.iii Evaluation of Collection System Screening Program

Provide a summary or attach a summary of your collection screening program, a summary of problems found during collection system screening and any changes to the screening program this FY.

Description:

Continued with efforts to inspect the storm drain system and clean at least 50% of the system. Meetings with the contractor to modify data collection, to separately report man-made debris (litter) from leaves/natural debris, and to begin tracking storm drain markings Data and field reports will be used during the next cycle of system inspection and cleaning. Efforts are also underway to maximize system cleaning areas based on priority/need rather than simple geographic boundries, and which takes into account probable trash capture device locations. See also SCVURPPP's FY 0910 Annual Report, Section C.5 Illicit Discharge Detection and Elimination, for a description of the IND/IDDE AHTG activities, including development of *collection system screening program guidance*.

C.5.f.iii.(1), (2), (3) Spill and Discharge Complaint Tracking

Spill and Discharge Complaint Tracking (fill out the following table or include an attachment of the following information)

The one incident that was not able to be resolved within 10 days was an incident that involved numerous types of violations and multiple regulating agencies/ city departments. [Urban runoff staff worked with the planning department to prevent construction permits /sale of property until clean up was made to the satisfaction of both the city and fire department.

	Number	Percentage
Discharges reported (C.5.f.iii.(1))	7	
Discharges reaching storm drains and/or receiving waters (C.5.f.iii.(2))	2	29%
Discharges resolved in a timely manner (C.5.f.iii.(3))	6	86%

C.5.f.iii.(4) Summary of major types of discharges and complaints
Provide a narrative or attach a table and/or graph.
See APPENDIX C5: Attachment: A.C.5.f.iii(4) Summary of IDDE by Incident Type.

West Valley Clean Water Program

Section 6 – Provision C.6 Construction Site Controls

C.6.a.iii Legal Authority

(For FY 09-10 Annual Report only) Is your agency's legal authority adequate for C.6 compliance?	X	**Yes**		**No**
If **No**, explain:				

C.6.b.ii.(3) Enforcement Response Plan

(For FY 09-10 Annual Report only) Was your Enforcement Response Plan developed and implemented by April 1, 2010?	X	**Yes**		**No**
If **No**, explain:				

C.6.e.iii.1.a, b, c Site/Inspection Totals

Number of sites disturbing < 1 acre of soil requiring storm water runoff quality inspection (i.e. High Priority) (C.6.e.iii.1.a)	**Number of sites disturbing ≥ 1 acre of soil** (C.6.e.iii.1.b)	**Total number of storm water runoff quality inspections conducted** (C.6.e.iii.1.c)
Data not captured this year	Data not captured this year	Data not captured this year

C.6.e.iii.1.d Construction Activities Storm Water Violations

BMP Category	Number of Violations[1]	% of Total Violations[2]
Erosion Control	Data not captured this year	Data not captured this year
Run-on and Run-off Control	Data not captured this year	Data not captured this year
Sediment Control	Data not captured this year	Data not captured this year
Active Treatment Systems	Data not captured this year	Data not captured this year
Good Site Management	Data not captured this year	Data not captured this year
Non Stormwater Management	Data not captured this year	Data not captured this year
Total	Data not captured this year	Data not captured this year

Notes:
[1]Count one violation in a category for each site and inspection regardless of how many violations/problems occurred in the BMP category.
[2]Percentage calculated as number of violations in each category divided by total number of violations in all six categories.

C.6.e.iii.1.e Construction Related Storm Water Enforcement Actions

	Enforcement Action (as listed in ERP)[1]	Number Enforcement Actions Taken	% Enforcement Actions Taken[2]
Level 1	No action/ no incident found	Data not captured this year	na
Level 2	Verbal Warning and/or Education	Data not captured this year	Data not captured this year
Level 3	Notice to Comply	Data not captured this year	Data not captured this year
Level 4	Notice of Violation/ Administrative Action/ Penalties	Data not captured this year	Data not captured this year
Total		Data not captured this year	Data not captured this year

Notes:
[1]Agencies should list the specific enforcement actions as defined in their ERPs.
[2]Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

C.6.e.iii.1.f, g Illicit Discharges

	Number
Number of illicit discharges, actual and those inferred through evidence (C.6.e.iii.1.f)	Data not captured this year
Number of sites with discharges, actual and those inferred through evidence (C.6.e.iii.1.g)	Data not captured this year

C.6.e.iii.1.h, i Violation Correction Times

	Number	Percent
Violations fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii.1.h)	Data not captured this year	Data not captured this year
Violations not fully corrected within 30 days after violations are discovered (C.6.e.iii.1.i)	Data not captured this year	Data not captured this year
Total number of violations for the reporting year[1]	Data not captured this year	Data not captured this year

Notes:

[1]Total number of violations equals the number of initial enforcement actions (i.e. one violation issued for several problems during an inspection at a site). It does not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

[2]Calculated as number of violations fully corrected in a timely period after the violations are discovered divided by the total number of violations for the reporting year.

[3]Calculated as number of violations not fully corrected within 30 days after the violations are discovered divided by the total number of violations for the reporting year.

C.6.e.iii.(2) Evaluation of Inspection Data

Describe your evaluation of the tracking data and data summaries and provide information on the evaluation results (e.g., data trends, typical BMP performance issues, comparisons to previous years, etc.).

Description:

While in-field observation and enforcement of stormwater / construction site BMPs have been conducted as a matter of routine, formal tracking and inspection reports are new implementation levels effective with the MRP. During FY0910 efforts were focused on the development and review of SW Inspection Data Collection Forms and corresponding data tracking tables thru participation in SCVURPPP's C3PO AHTG. Training and use of new county-wide inspection forms is scheduled for implementation during FY1011 and will be reflected in the next Annual Report.

C.6.e.iii.(2) Evaluation of Inspection Program Effectiveness

Describe what appear to be your program's strengths and weaknesses, and identify needed improvements, including education and outreach.

Description:

Generally contractors working in the area are well aware of stormwater/urban runoff protection BMPs, so typical issues that come up are quickly addressed/resolved before a discharge occurs. In FY 09-10 efforts were focused on the development and review of SW Inspection Data Collection Forms and corresponding data tracking tables thru participation in SCVURPPP's C3PO AHTG. Training and use of new county-wide inspection forms is scheduled for implementation during FY1011 and will be reflected in the next Annual Report. In Los Gatos, a limited number of inspections were conducted while field testing early versions of data collection forms to introduce inspectors to their use and field test SOP for recording data in preparation for Annual Report. WVCWP will provide training to inspectors on the new SCVURPPP data collection forms and excel data tracking spreadsheets in Fall 2010 and subsequently inspections with the new forms will begin. Participation in the SCVURPPP's Construction Ad Hoc Task Group (AHTG) was provided by WVCWP and includes review of AHTG products; Participation in the BASMAA Development Committee was provided through SCVURPPP. Refer to SCVURPPP's FY0910 C.6 Construction Site Control section of the Annual Report for a description of activities of the Construction AHTG and the BASMAA Development Committee.

C.6.f Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
SCVURPPP Annual Inspector Training	10/21/09	Construction Site Inspection Training • Current construction site regulations & responsibilities • effective erosion and sediment control BMPs • inspection procedures See SCVURPPP FY09-10 Annual Report for more details.	1	Data not tracked in this format this year
SCVURPPP Annual C3 Workshop	6/8/10	Complying with New Stormwater Requirements for New and Redevlopment Projects See SCVURPPP FY09-10 Annual Report for more details.	2	Data not tracked in this format this year
SCVURPPP Rural Public Works Training – in class and in field	3/23/10 (in class) and 3/24 or 3/25/10 (in field)	Rural Roads BMP Installation Training In-class training includes practical and effective best management practices (BMPs) for road maintenance to protect riparian habitat, aquatic	5	Data not tracked in this format this year

		species, and water quality. In-field trainings will demonstrate the correct way to properly use and install the following BMPs: • Inlet protection • Silt fence • Straw wattles (coir logs) • Straw Bales • Erosion Control Blankets (2-3) kinds • Mulching/seeding • Planting Strategies

West Valley Clean Water Program

Section 7 – Provision C.7. Public Information and Outreach

C.7.b.ii.1 Advertising Campaign

Summarize advertising efforts. Include details such as messages, creative developed, and outreach media used. The detailed advertising report may be included as an attachment. If advertising is being done by participation in a countywide or regional program, refer to the separate countywide or regional Annual Report.

Summary:

Centralized advertising campaign for stormwater/urban runoff is conducted through SCVURPPP and BASMAA. The following reports summarize countywide advertising efforts conducted during FY09-10 and are included in the Program's FY0910 Annual Report Section C.7 Public Information and Outreach:

- FY 09-10 Watershed Watch Campaign Annual Campaign Report
- FY 09-10 Watershed Watch Partner Report
- FY 09-10 Watershed Watch Web Statistics ReportActive participation in SCVURPPP's AHTG is through West Valley Clean Water program, whose staff provides review and input on deliverables and strategies. In addition, local advertising is carried out through West Valley Clean Water Program (WVCWP), is directed towards specific POCs and demographic characteristics of the West Valley Communities of Campbell, Los Gatos, Monte Sereno and Saratoga. WVCWP's main strategy in recent years is to move away from paid 'advertisements,' and focus on placing selected articles in local municipal newsletters (mailed and/or online), local newspaper and developing target specific 'give-away' items for distribution at events. The give-away items which are bundled w/literature, are incentives to take the printed information and 'motivate the recipient to action.' WV CWP also 'advertises' at various municipal facilities with posters and flyers for local and municipal sponsored events. WVCWP also supports and utilizes the Watershed Watch website to advertise local events (i.e., Mercury take back events). Details regarding local advertising and material distribution efforts are included in Appendix C7.

SEE APPENDIX C7: Attachment C7bc Local Advertising and Media Relations

C.7.b.iii.1 Pre-Campaign Survey

(For the FY 10-11 Annual Report only) Summarize survey information such as sample size, type of survey (telephone survey, interviews etc.). Attach a survey report that includes the following information. If survey was done regionally, refer to a regional submittal that contains the following information:

- Summary of how the survey was implemented.
- Analysis of the survey results.
- Discussion of the outreach strategies based on the survey results.
- Discussion of planned or future advertising campaigns to influence awareness and behavior changes regarding trash/litter and pesticides.

Not required for this Annual Report

Place an **X** in the appropriate box below:

	Survey report attached
	Reference to regional submittal:

C.7.c Media Relations

Summarize the media relations effort. Include the following details for each media pitch in the space below, AND/OR refer to a regional report that includes these details:

- Topic and content of pitch
- Medium (TV, radio, print, online)
- Date of publication/broadcast

Summary:

Media Relations for stormwater/urban runoff is conducted through SCVURPPP and BASMAA. The following separate report developed by BASMAA summarizes media relations efforts conducted during FY 09-10:

- BASMAA Media Relations Final Report

This report is included within the C.7 Public Information and Outreach section of Program's FY 09-10 Annual Report

Active participation in SCVURPPP's AHTG is through West Valley Clean Water program, which provides review of deliverables and strategies; for example WVCWP staff participated in AHTG review and provided feedback on bus ads for anti-litter campaign, participated in development and review of a video ad for the anti-litter campaign.

Local media coverage is coordinated through West Valley Clean Water Program (WVCWP), and focuses press release/articles on local events addressing specific POCs and BMPs of interest to the demographic characteristics within the West Valley Communities. Media coverage in the WV area consists of 3 local weekly papers (Campbell Reporter, Los Gatos Weekly, Saratoga News), four Municipal Newsletters (printed/mailed, e-delivery and online available), municipal website postings and postings in municipal facilities. Press Releases to local papers typically involve a local event or occurrence which provides an opportunity to highlight a POC and corresponding pollution prevention measure which residents can employ. Articles in municipal newsletters typically provides an opportunity to inform residents of POCs in a more direct or restrictive manner, as well as provide BMP options for preventing polluted discharges to the storm drain system and creeks. In addition to urban runoff specific articles, municipal newsletters often carry other relevant topics to stormwater, such as HHW, composting or solid waste. Use of municipal websites for conveying information tends to be more abbreviated sound bites, quick tips or notification of events. This type of communication works best with

time sensitive and transient information. For examples and details regarding local press and media related efforts **SEE APPENDIX C7: Attachment C7bc Local Advertising and Media Relations**

C.7.d Stormwater Point of Contact

(For FY 09-10 Annual Report only, unless changes made) Provide details of website or phone number used as the point of contact. Report on how the point of contact is publicized and maintained. If any change occurs in this contact, report in a subsequent Annual Report.

Contact Summary:

The main stormwater pollution prevention point-of-contact to the general public is publicized and maintained thru the West Valley Clean Water Program, joint urban runoff program for City of Campbell, Town of Los Gatos, City of Montes Sereno and City of Saratoga.

WVCWP website address: http://www.cleancreeks.org

WVCWP general information e-mail: info@cleancreeks.org

WVCWP general information phone number: 408.354.5385

Contact information is publicized on locally created and distributed materials and articles, on SCVURPPP outreach materials and websites (which is maintained by the Program and their authorized agents).

Collectively, with other SCVURPPP co-permittees, the Watershed Watch Campaign provides a hotline (1-866-WATHERSHED) and online ability to make inquiries, report illegal discharges and find volunteer opportunities (www.mywatershedwatch.org).

C.7.e Public Outreach Events

Describe general approach to event selection. Provide a list of outreach materials and giveaways distributed.

Use the following table for reporting and evaluating public outreach events

We work together with three other west valley communities through our joint urban runoff program, West Valley Clean Water Program (WVCWP) and SCVURPPP to collectively meet Public Outreach Event participation levels. Event selection (type of event and level of support/hosting) is based upon pollutant of concern, applicability, and ability to influence local residents. WVCWP also participates in SCVURPPP's WEO AHTG and its various sub-groups, and typically provides staffing for various SCVURPPP events. See SCVURPPP's Table "C.7 Public Information and Outreach section of Program's FY 09-10 Annual Report" summarizing countywide Public Outreach events.:

For local events highlighting urban runoff and stormwater pollution prevention, the level of effort for support is largely based upon an estimated return on effort – the first level of effort is utilization/leveraging of an existing event. Utilization of an existing/related municipal event (i.e., municipal Public Works Open House event), dictates that stormwater messages be general topics with highlights of common POCs -like litter and pesticides. Typically such an event lends itself simply to dissemination of literature and requires a high content of 'give-aways' to entice visitors in engagment of information sharing. Leveraging a broader based county-wide or nationally recognized event (like Pollution Prevention Week) provides a better opportunity to focus on POCs and gain a higher return of audience interaction; plus there is the added benefit to 'scale' – higher visibility /publicity without exponential increase of cost or resources. The second level of effort is a partnership or co-hosting of an event, where efforts are shared. Examples are our partnership with schools for school-yard/creek clean-ups and co-hosting Mercury Thermometer Exchange Events. The third level of effort is solely hosting an event for the single purpose of stormwater information dissemination and/or public participation (i.e., trash hot spot clean-up, staff training).

For more information on local Public Outreach Events **see APPENDIX C7: Attachment C7egh Events**

Event Details	**Description** (messages, audience)	**Evaluation of Effectiveness**
Provide event name, date, and location. Indicate if event is local, countywide or regional.	Identify type of event (e.g., school fair, farmers market etc.), type of audience (school children, gardeners, homeowners etc.) and outreach messages (e.g., Enviroscape presentation, pesticides, stormwater awareness)	Provide general staff feedback on the event (e.g., success at reaching a broad spectrum of the community, well attended, good opportunity to talk to gardeners etc.). Provide other details such as: • Estimated overall attendance at the event. • Number of people that visited the booth, comparison with previous years • Number of brochures and giveaways distributed • Results of any spot surveys conducted
Event: Car Wash Fundraising Event Dates: 7/26/09 Location: Del Taco Parking Lot, Campbell Local, private event Fundraiser,	Type of Event: private -fundraising [Susan G. Komen Cancer "Walk for Life"] Audience: residents Message: prevent runoff pollution from car washing	Feedback: This event was successful and the group returned in June 2010 to borrow the Kit again. Estimated Attendance: 4 adults managed the car wash; unknown how many cars passed thru, however organizer was satisfied with amount of funds raised for each day.
Event: Pollution Prevention Resource Fair Date: 9/23/09	Type of Event: Thermometer Exchange, battery recycling, eyeglasses drop-off, cell-phone	Estimated Attendance: 150 residents Items collected:

Location: Campbell Community Center Local event, part of National Event (Pollution Prevention Week)	recycling, and medications disposal. Audience: residents. Message: stormwater and pollution, especially mercury pollution (i.e. related to the thermometer and battery recycling opportunity).	242.5 lbs of pharmaceuticals 57 thermometers 18 cell phones 95.5 lbs of batteries Brochures & Giveaways Distributed: 99x - reusable bags. 45x -- Native Seed Packets with Healthy Gardens: Naturally Managing Pests flyer 30x -- /10 pollution prevention tri-fold with Watershed Watch Discount Card 44x -- Fly Swatters 18x -- Pest or Pal Activity guide 14x -- Pests Bugging You?
Event: Thermometer Exchange Date: 10/7/09 Location: Saratoga Senior/ Community Center Local, part of POTW regional effort	Type of Event: Thermometer Exchange, battery recycling, eyeglasses drop-off, and cell-phone recycling Audience: residents.in particular senior citizens; Message: stormwater and pollution, especially mercury pollution (i.e. related to the thermometer and battery recycling opportunity).	Feedback: This event was successful with Saratoga's senior citizens; they appeared to be residents who had a number of glass thermometers that needed to be properly disposed of. Estimated Attendance: 126 residents Items collected: 216 mercury thermometers
Event: Thermometer Exchange Date: 4/11/10 Location: Los Gatos Farmers' Market Local, part of "Keep Los Gatos Beautiful" Month .	Type of Event: Thermometer Exchange Audience: residents, in particular senior citizens; Message: stormwater and pollution, especially mercury pollution (i.e. related to the thermometer and battery recycling opportunity).	Feedback: Due to very rainy weather at this outdoor event, it turned out to not be very productive. Extensive outreach/advertising had been conducted. Estimated Attendance: 10 residents stopped at booth, despite rainy conditions. Items collected: 1 mercury thermometer was collected. Brochures & Giveaways Distributed: 10x - HHW Tri-fold 1x – Medication Disposal 1x - Seafood Watch Guide – Spanish 1x - Seafood Watch – Sushi Guid 1x – What You Don't Know About Mercury

		8x – Grease Scrapers 4x – Grow It Guide 4x – 10 Most Wanted Bugs 1x – Wonder of our Water Works
Event: Arbor Day Date: Location: City of Campbell Local, part of national recognition of Arbor Day and Earth Day	Type of Event: Annual event recognizing efforts to preserve trees. Audience: residents Message: The value of trees, and encourage planting of trees appropriate to the area (pest resistant, etc.).	Feedback: Well attended by students and residents
Event: Arbor Day Date: 4/22/10 Location: City of Saratoga, Azule Park Local, part of national recognition of Arbor Day and Earth Day	Type of Event: Annual event recognizing efforts to preserve trees. Audience: residents, youth/children Message: The value of trees, and encourage planting of trees appropriate to the area (pest resistant, etc.).	Feedback: Well attended by students and residents Estimated Attendance: 60 attendees Brochures & Giveaways Distributed: 5x – "You are the Solution to Water Pollution" 15x – "Kids Guide to Backyard Bugs" 18x – "Pests Bugging You" brochures 38x – "Original Pest Control" fly swatters
Event: Arbor Day Date: 4/30/10 Location: Town of Los Gatos, Belgatos Park Local, part of national recognition of Arbor Day and Earth Day	Type of Event: Annual event recognizing efforts to preserve trees. Audience: residents, youth/children; Targeted the Bel Gatos neighborhood and local schools. Message: The value of trees, and encourage planting of trees appropriate to the area (pest resistant, etc.).	Feedback: This year was a celebration of the Town's 30th year to have been named a "Tree City USA". Town staff planted 30 trees at various park locations in recognition of this honor. Estimated Attendance: 100 elementary schoolchildren from Mulberry School – pre-K through 5th grade and many residents Brochures & Giveaways Distributed: 14x – "Soil Matters" booklets 8x – "Stream Care Guide" booklets 12x – "Pests Bugging You" brochures 14x – "Clean It Guides" 80x – "Original Pest Control" fly swatters 50x – "Get the Scoop – Don't Pollute" pencils 100x – "Pest or Pal" Activity guides/booklets
Event: Bike to Work Day 2 Date: May 13, 2010	Type of Event: Annual event held on the third Friday of May across the United States and	Feedback: Muni offices received positive feedback from staff who participated in the event.

Locations: City of Campbell Municipal offices Local, part of regional/national recognition	Canada that promotes the bicycle as an option for commuting to work. Audience: Municipal employees Message: Encourage people to try bicycle commuting as an alternative to driving, which can help reduced various forms of pollution, including copper pollution in waterways.	
Event: Bike to Work Day 2 Date: May 13, 2010 Locations: Town of Los Gatos Municipal offices Local, part of regional/national recognition	Type of Event: Annual event held on the third Friday of May across the United States and Canada that promotes the bicycle as an option for commuting to work. Audience: Municipal employees Message: Encourage people to try bicycle commuting as an alternative to driving, which can help reduced various forms of pollution, including copper pollution in waterways.	Feedback: Muni offices received positive feedback from staff who participated in the event.
Event: Watershed Watch Car Wash Event Date: May 19, 2010 Location: Delta Queen Classic Car Wash, 981 E Hamilton Ave, Campbell Regional/ Countywide	Type of Event: Type of Event: Car Wash Audience: Residents/ car wash customers Message: Impacts of car washing on stormwater pollution.	Feedback: Due to a rainy day forecast, attendance was low at this event. Estimated Attendance: 45 vehicles Brochures & Giveaways Distributed: 34 Watershed Brochures (gen outreach) 49 Watershed Watch Discount Cards
Event: Los Gatos Public Works Open House Date: 5/19/10 Location: Town of Los Gatos Corporation Yard Local, part of regional/national recognition	Type of Event: Municipal Outreach and Education Audience: Residents, Students (3rd Grade) Message: ,General stormwater pollution, w/ demonstration using Enviroscape	Feedback: This event was well-attended. Estimated Attendance: 80 Third Grade students,6 teachers and 9 parent chaperones; additionally several members of the public (residents) and a few neighboring municipal staff members Brochures & Giveaways Distributed: 6x – "Naturally Managing Pests" IPM Fact Sheet 12x – Copper Tri-fold with Discount Card 9x – "Original Pest Control" fly swatter 40x – "Get the Scoop – Don't Pollute" pencils 40x – "Watershed Watch" tattoos

1 Event: Classroom Enviroscape Demonstration Date: 5/20/10 Location: St. Mary's School (K-8), Los Gatos Local	Type of Event: Annual School Outreach Audience: Students (Kdg) Message: ,General stormwater pollution, including: trash/litter, re-usable containers in lunches, pet waste, car washing, pesticides, vehicle fluids and construction dirt.	Feedback: The teachers gave positive feedback, and stated they would like to continue to have WVCWP return each year. Attendance: 28 Students (2 Kindergarten classes), 2 Teachers Brochures & Giveaways Distributed: 28 pencils and "Watershed Puzzles Worksheets"
Event: Car Wash Fundraising Event Dates: 6/26/10 Location: Del Taco Parking Lot, Campbell Local, private event Fundraiser,	Type of Event: private -fundraising [Susan G. Komen Cancer "Walk for Life"] Audience: residents Message: prevent runoff pollution from car washing	Feedback: This is the same group returning to borrow the Kit again. The group has informed WVCWP they would like to make their car wash an annual fundraiser, and continue to utilize the car wash kit. Estimated Attendance: 4 adults plus 4 kids managed the car wash; unknown how many cars passed thru, however organizer was satisfied with amount of funds raised for each day.

C.7.f. Watershed Stewardship Collaborative Efforts

Summarize watershed stewardship collaborative efforts and/or refer to a regional report that provides details. Describe the level of effort and support given (e.g., funding only, active participation etc.). State efforts undertaken and the results of these efforts. If this activity is done regionally refer to a regional report.

Evaluate effectiveness by describing the following:

- Efforts undertaken
- Major accomplishments

Summary:

During FY 09-10, the Program actively supported the Santa Clara Basin Watershed Initiative (SCBWMI), including the Core Group, the Land Use Subgroup, and the Trash Subgroup (now the Santa Clara Valley Zero Litter Initiative, aka ZLI); the Bay Area Macroinvertebrate Bioassessment Information Network (BAMBI); and the Stevens & Permanente Creeks Watershed Council; Information on these efforts is included within the C.7 Public Information and Outreach section of the Program's FY 09-10 Annual Report. WVCWP was also active in the Silicon Valley Anti-Litter Campaign (SCVAL) and Trash Subgroup (now the Santa Clara Valley Zero Litter Initiative, aka ZLI).

During FY 09-10, the Town actively supported and implemented the Santa Clara Valley Water Resources Protection Collaborative Guidelines and Standards for Land Use Near Streams when working with prospective applicants and when reviewing development applications subject to these guidelines

C.7.g. Citizen Involvement Events

List the types of events conducted (e.g., creek clean up, storm drain inlet marking, native gardening etc.). Use the following table for reporting and evaluating citizen involvement events.

Event Details	Description	Evaluation of effectiveness
Provide event name, date, and location. Indicate if event is local, countywide or regional	Describe activity (e.g., creek clean-up, storm drain marking etc.)	Provide general staff feedback on the event. Provide other evaluation details such as: • Number of participants. Any change in participation from previous years. • Distance of creek or water body cleaned • Quantity of trash/recyclables collected (weight or volume). • Number of inlets marked. • Data trends
The following separate reports developed by SCVURPPP and other organizations also include information about citizen involvement events conducted during FY 09-10: • Watershed Watchers: Keeping Our Waterways Clean: FY 09-10 Fourth Quarter Report (includes end-of-year Summary from Alviso Education Center) • Going Native Garden Tour 2010- Summary Report These reports are included within the C.7 Public Information and Outreach section of Program's FY 09-10 Annual Report. For more information on local Citizen Involvement Events **see APPENDIX C7: Attachment C7egh Events**		
Event: Coastal Cleanup Day 2009 Date: 9/19/09 Location: San Tomas Aquino Creek @ Westmont High, Campbell Local site, part of County-wide effort and International event.	Creek Clean Up Event	Volunteers: 11 Results: • Trash collected: 330 Lbs. • Recyclables: 90Lbs.
Event: Great American Pick-up Date: 5/8/10 Location: City of Campbell, 4 sites Local site, part of County-wide Effort	Clean Up Event	Volunteers: 100 Results: • 29 partially-filled bags of recyclables • 52 partially-filled bags of trash Materials Distributed: • 8x – "Soil Matters" literature

		• 10x – "Pests Bugging You" brochure • 14x – "Clean-It Guides" • 5x – "Mercury – What You Don't Know" brochures • 42x – "Strip" thermometers • 4x Copper Tri-fold w/Discount Card attached • 20x "Original Pest Control" fly swatters • 20x – "2000 Creek Cleanup" bandanas • 12x – Lip Balm • 35x – "Get the Scoop – Don't Pollute" pencils • 3x – "Native Plants" seeds with "10 Most Wanted Bugs" brochure attached
Event: Creek Cleanup Date: 4/17/10 Location: Prospect High School/ Saratoga Creek at Prospect Ave, Saratoga Local Event	Creek Clean Up Event	Students that participated were very enthusiastic. Participants: • 11 Prospect High School students • 1 Teacher • WVCWP & City of Saratoga staff Results: • 14 partially-filled 30 gal. trash bags Materials Distributed: • 5x "Your Copper & Your Creeks" tri-folds (with Car Wash Discount card) • 5x "Native Plants" seeds (with "10 Most Wanted" bug brochures attached) • 5x "Original Pest Control" Fly Swatters • 2x "Don't Litter" license plate covers
Event: National River Cleanup Day 2010 Date: 5/15/10 Location: San Tomas Aquino Creek @ Westmont High, Campbell Local site, part of County-wide effort and National event.	Creek Clean-Up Event	Volunteers: 16 (8 of these were families associated with a local elementary school where the Zun Zun assembly was held on 12/10/09). Materials Distributed: • 5x – "You're the Solution to Water Pollution" brochures • 10x – "Adopt a Creek" lanyards

		• 9x - Re-usable bags (sponsored by Safeway) • 10x – "Watershed Watch" tattoos
Event: Classroom Enviroscape Demonstration Date: 5/20/10 Location: St. Mary's School (K-8), Los Gatos Local	School Outreach	Feedback: The teachers gave positive feedback, and stated they would like to continue to have WVCWP return each year. Attendance: 28 Students (2 Kindergarten classes), 2 Teachers Brochures & Giveaways Distributed: • 28 pencils and "Watershed Puzzles Worksheets"

C.7.h. School-Age Children Outreach

Summarize school-age children outreach programs implemented. A detailed report may be included as an attachment.
Use the following table for reporting school-age children outreach efforts.

Program Details	Focus & Short Description	Number of Students/Teachers reached	Evaluation of Effectiveness
Provide the following information: Name, Grade or level (elementary/ middle/ high)	Brief description, messages, methods of outreach used	Provide number or participants	Provide agency staff feedback. Report any other evaluation methods used (quiz, teacher feedback etc.). Attach evaluation summary if applicable.
The following separate reports developed by SCVURPPP and other organizations also include information about school-age children outreach efforts conducted during FY 09-10: • ZunZun School Assemblies for Watershed Watch Campaign- FY 09-10 Academic Year Final Report • Memorandum- Evaluation of the School Assembly Program- FY 09-10 • Watershed Watchers: Keeping Our Waterways Clean: FY 09-10 Fourth Quarter Report (includes end-of-year Summary from Alviso Education Center) These reports are included as within the C.7 Public Information and Outreach section of Program's FY 09-10 Annual Report. For more information on local School Outreach Events **see APPENDIX C7: Attachment C7egh Events**			
Program Details	**Focus & Short Description**	**Number of Students/ Teachers reached**	**Evaluation of Effectiveness**
ZunZun School Assemblies for Watershed Watch Campaign	See FY 09-10 Academic Year Final Report for assembly details	Marshall Lane Elementary Campbell	For full details on effectiveness of the Zun Zun shows in general, see the Program (SCVURPPP) report Section C.7.h. and Memorandum- Evaluation of the School Assembly Program- FY 09-10.

		12/10/09 2 Shows 550 students <u>Capri Elementary</u> Campbell 1/26/09 2 Shows 600 students <u>Foothill Elementary</u> Saratoga 5/25/10 1 Show 380 students <u>Argonaut Elementary</u> Saratoga 6/4/10 1 Show 500 students	
Watershed Watchers Program at Don Edwards Wildlife Refuge in Alviso Grade level: K-8	See Watershed Watchers: Keeping Our Waterways Clean: FY 09-10 Fourth Quarter Report (includes end-of-year Summary from Alviso Education Center)	• Christa McAuliffe School • Village Elementary • Sacred Heart • Rolling Hills • Hillbrook • Blossom Hill	For full details on effectiveness of the Watershed Watchers Program, see the Program (SCVURPPP) report Section C.7.h and the Watershed Watchers Fourth Quarter Report included in the Program Annual Report Appendix 7-5. FY 09-10 WVC Schools which sent field trips to the Watershed Watchers Program:
Creek Cleanup Prospect High School Saratoga 4/17/10	Topic: Trash Description: 600 feet of creek bank, near the High School, were cleaned.	Participants: 11 Prospect High School students 1 Teacher WVCWP & City of Saratoga staff	WVCWP provided trash bags, gloves and litter grabbers for this event. Students handled monitoring tasks during cleanup. 14 partially-filled 30 gal. trash bags were collected. See "C.10 Trash" for details.

			Participants selected the following 'give-away items: • 5x "Your Copper & Your Creeks" tri-folds (with Car Wash Discount card) • 5x "Native Plants" seeds (with "10 Most Wanted" bug brochures attached) • 5x "Original Pest Control" Fly Swatters • 2x "Don't Litter" license plate covers
Creek Cleanup Sacred Heart School (K-8) Saratoga 5/5/10	Topic: Trash Description: Cleanup of a schoolyard and adjacent creek.	Participants: Appx. 40 students 1 parent WVCWP staff	WVCWP provided trash bags, gloves and litter grabbers for this event. This event was very effective in that 40 students, from a small school, participated – which demonstrated a high level of interest. Students handled monitoring tasks. Results: 10 partially-filled bags of trash were collected. Results were: 20 lbs trash 5 lbs recyclables School yard and .5 - .75 miles of creek and creekbank were cleaned.
Los Gatos Public Works Open House 5/19/10 (3rd Grade students attended)	Topics: Litter, Trash, Pet Waste, Car Washing Description: Municipal Public Works/Operations Open House Event	80 Third Grade students attended.	Attendees chose to take: 6x – "Naturally Managing Pests" IPM Fact Sheet 12x – Copper Tri-fold with Discount Card 9x – "Original Pest Control" fly swatter 40x – "Get the Scoop – Don't Pollute" pencils 40x – "Watershed Watch" tattoos This event was well-attended. Until a few years ago, LG staff took this program directly to the schools, but for the past several years the venue has been changed to recruit students to come to the Corp Yard itself. It is rewarding to see this many students make the effort to come to the site and attend the event.
Classroom outreach with Enviroscape	Topics: Litter, reusable lunch items, pet waste, car washing	Presentation was given to 2 Kindergarten classes	Having a relevant story read prior to the presentation was very effective for a Kindergarten class.

St. Mary's School (K-8) 5/20/10	Description: Enviroscape Demonstration and Schoolyard litter pick-up	28 Students 2 Teacjers 1 Parent	The students loved the presentation and really knew the answer to the question "where does the water/pollution go?". The teachers also gave positive feedback, and stated they would like to continue to have WVCWP return each year, 28 "Watershed Puzzles Worksheets" were distributed to the students.
Creek Education program at Audubon Environmental Education Center, 3rrd Grade students Various dates in FY 09-10	Topics: creek, watersheds, habitat, litter Description: Creek Education Field Trip	In FY 09-10 student participation was: • Blue Hills School 64 students 14 parents • Meyerholz & Murdoch-Portal Schools combined 15 students

Section 8 - Provision C.8 Water Quality Monitoring

C.8 Water Quality Monitoring
State below if information is reported in a separate regional report. Municipalities can also describe below any Water Quality Monitoring activities in which they participate directly, e.g. participation in RMP workgroups, fieldwork within their jurisdictions, etc.
Summary During FY 09-10, we contributed to the SCVURPPP Monitoring and Assessment Program which conducts water quality monitoring in Santa Clara Valley creeks and rivers. In coordination with the BASMAA Regional Monitoring Coalition (RMC). In addition, we contribute financially to the Regional Monitoring Program for Water Quality in the San Francisco Estuary (RMP) and actively participate in RMP committees and work groups. For additional information on monitoring activities conducted by SCVURPPP, BASMAA RMC and the RMP, see the C.8 Water Quality Monitoring section of the Program's FY 09-10 Annual Report. Continued participation in SCVURPPP Monitoring AHTG.

Section 9 – Provision C.9 Pesticides Toxicity Controls

C.9.a Adopt an Integrated Pest Management (IPM) Policy or Ordinance

(For FY 09-10 Annual Report only) Attach a copy of your individual IPM ordinance or policy. **See APPENDIX C9: Attachment C.9.a IPM Policy Plan.**	X	**Attached**		**Not attached,** explain below
If **Not attached**, explain:				

C.9.b Implement IPM Policy or Ordinance

Report implementation of IPM BMPs by showing trends in quantities and types of pesticides used, and suggest reasons for increases in use of pesticides that threaten water quality, specifically organophosphorous pesticides, pyrethroids, carbaryl, and fipronil. A separate report can be attached as evidence of your implementation.

Summary:

All pesticide records are filed and available. Typically, little or none of the pesticides listed above are used as a matter of standard operations,to the maximum extent practicable; use of IPM practices has been in place for a number of years. Analysis and identification of trends tends to be less useful in because one chemical may be used for an isolated pest incident one year, then not used again for several years, or not at all as different IPM practices are put into place.

See APPENDIX C9: Attachment C9b Implementation IPM Policy

C.9.c Train Municipal Employees

Enter the number of employees that applied or used pesticides (including herbicides) within the scope of their duties this reporting year.	9
Enter the number of these employees who received training on your IPM policy and IPM standard operating procedures within the last 3 years.	13
Enter the percentage of municipal employees who apply pesticides who have received training in the IPM policy and IPM standard operating procedures within the last three years.	100%

C.9.d Require Contractors to Implement IPM

Did your municipality contract with any pesticide service provider in the reporting year?	X	**Yes**		**No**

If yes, attach one of the following:

	Contract specifications that require adherence to your IPM policy and standard operating procedures, OR
	Copy(ies) of the contractors' IPM certification(s) or equivalent, OR
X	Equivalent documentation. **See APPENDIX C9: Attachment C9d Contractor Implement IPM** Note: Contractors originally signed when IPM policy went into place, and were reminded of policy annually. However, formal signature to the IPM Policy was not collected as a matter of routine because the same contractor has been used through the years. A new signature form has been created and will be presented for signature to contractor annually.

If **Not attached**, explain:

C.9.e Track and Participate in Relevant Regulatory Processes

Summarize participation efforts, information submitted, and how regulatory actions were affected **OR** reference a regional report that summarizes regional participation efforts, information submitted, and how regulatory actions were affected.

Summary:

During FY 09-10, we participated in regulatory processes related to pesticides through contributions to SCVURPPP, BASMAA and CASQA. For additional information, see the Regional Pollutants of Concern Report submitted by BASMAA on behalf of all MRP Permittees. This Report is included within the Program's FY 09-10 Annual Report.

C.9.f Interface with County Agricultural Commissioners

Provide a summary of improper pesticide usage reported to the County Agricultural Commissioner and follow-up actions to correct violations, if any. A separate report can be attached as your summary.

Summary:

No improper pesticide usage to report

C.9.h.ii Public Outreach: Point of Purchase

Provide a summary of public outreach at point of purchase, and any measurable awareness and behavior changes resulting from outreach (here or in a separate report); **OR** reference a report of a regional effort for public outreach in which your agency participates.

Summary:

The following separate reports developed by SCVURPPP and BASMAA summarize point of purchase outreach efforts conducted during FY 09-10:

- FY 09-10 Store Employee Training Report (SCVURPPP)
- FY 09-10 Store Employee Training Evaluation Summary (SCVURPPP)
- FY 09-10 Store Employee Training Status Table (SCVURPPP)
- FY 09-10 List of Stores in the IPM Store Partnership Program (SCVURPPP)
- FY 09-10 BASMAA "Our Water, Our World" (OWOW) Report (BASMAA)

These reports are included within the C.9 Pesticides Toxicity Control section of Program's FY 09-10 Annual Report.

C.9.h.vi Public Outreach: Pest Control Operators

Provide a summary of public outreach to pest control operators and landscapers and reduced pesticide use (here or in a separate report); **OR** reference a report of a regional effort for outreach to pest control operators and landscapers in which your agency participates.

Summary:

The following separate report developed by SCVURPPP summarizes Public Outreach: Pest Control Operators efforts conducted during FY 09-10:

- FY 09-10 Green Gardener Training Report

This report is included within the C.9 Pesticides Toxicity Control section of Program's FY 09-10 Annual Report.

Section 10 - Provision C.10 Trash Load Reduction

C.10.a.i Short-Term Trash Loading Reduction Plan

(For FY 10-11 Annual Report only) Provide description of actions/tasks initiated/conducted/completed in developing a Short-Term Trash Loading Reduction Plan (due February 1, 2012).

Description:

Not required for this Annual Report

C.10.a.ii Baseline Trash Load and Trash Load Reduction Tracking Method

(For FY 10-11 Annual Report only) Provide description of actions/tasks initiated/conducted/completed to gather trash loading data and in developing a Baseline Trash Load and Trash Load Reduction Tracking Method (due February 1, 2012).

Description:

A summary of Program accomplishments for this sub-provision are included within the C.10 Trash Load Reduction section of Program's FY 09-10 Annual Report.

C.10.a.iii Minimum Full Trash Capture

(For FY 10-11 Annual Report and Each Annual Report Thereafter) Provide description of actions/tasks initiated/conducted/completed in implementing Minimum Full Trash Capture Devices (due July 1, 2014) within individual jurisdictions. Include information on Full Trash Capture Devices installed under Bay-area Wide Trash Capture Demonstration Project administered by San Francisco Estuary Partnership.

Description:

A summary of Program accomplishments for this sub-provision are included within the C.10 Trash Load Reduction section of Program's FY 09-10 Annual Report. In addition, the Program recently finalized a technical report detailing the results of its Pilot Trash Structural Treatment Control Study implemented in 2007. This technical report is also available within the C.10 Trash Load Reduction section of Program's FY 09-10 Annual Report..

C.10.b.iii Trash Hot Spot Assessment

(For FY 10-11 Annual Report and Each Annual Report Thereafter) Provide volume of material removed from each Trash Hot Spot cleanup, and the dominant types of trash (e.g., glass, plastics, paper) removed and their sources to the extent possible. Provide required photo documentation.

Fill out the following table or attach a summary of the following information.

See APPENDIX C10: Attachments C10biii Trash Hot Spot Assessment Photos

Trash Hot Spot	Cleanup Date	Volume of Material Removed	Dominant Type of Trash	Trash Sources (where possible)
WVC02 San Tomas Aquino Crk	05-15-10	25 bags/~300 pounds	Bottles, Aluminum Cans, Convenience Food items, Cigarette butts, other plastic products	Trash accumulation
WVC03 Saratoga Creek	4-17-10	14 bags	Convenience Food items, other plastic products, paper/cardboards, aluminum cans, plastic bags	Trash accumulation/Litter
WVC04 Los Gatos Creek	6-15-10	10 bags/7 pounds	Paper/carboard, plastic bags, misc., cigarette butts	Litter

C.10.d Summary of Trash Load Reduction Actions

Provide summary of new trash load reduction actions or increased levels of implementation of existing actions that were implemented after adoption of the MRP (control measures and best management practices) including the types of actions and levels of implementation, and the total trash loads and dominant types of trash removed from each type of action.

Suggested trash load reduction actions to track and report may include:

- Anti-litter Campaigns
- Anti-litter/Dumping Enforcement Activities
- Curbside Recycling Programs
- Education and Outreach Efforts
- Free Trash Pickup/Dropoff Days
- County HHW Program Activities
- Improved Trash Bin Management
- Inspection/Maintenance of Storm Drain Outfalls
- Litter Pickup and Control
- Removal of Homeless Encampments
- Solid Waste Recycling Efforts
- Source Controls/Bans/Prohibitions
- Storm Drain Operation and Maintenance
- Storm Drain Signage/Marking
- Street Sweeping Activities
- Trash Removal from Receptacles
- Volunteer Creek Cleanups

Type of Trash Load Reduction Action	Date of First Implementation	Level of Implementation (specify if level was increased after MRP adoption)	Total Trash Load Removed by Action	Dominant Types of Trash Removed by Action
Not all trash load reduction actions were tracked by "loads removed" this fiscal year. Once the Trash Load Reduction Tracking Method is developed (see Provision C.10.a.ii), data to fill in this table, including trash loads removed, will be able to be defined and determined for each load reduction action (as feasible). See the Program's FY 09-10 Annual Report for schedule				
Anti-litter Campaign: • SCVURPPP and BASMAA each have Ad Campaigns that address Litter • C/ WVCWP- Zero Litter Initiative participation • C/ WVCWP- Silicon Valley Anti-Litter Campaign (hosted by San Jose)	• See SCVURPP Annual Report • ZLI- 2008 • SVALC- ?2006		N/A	Topics aim to reduce pollution (litter, pesticides) by encouraging better behavior/habits
Anti-litter/Dumping Enforcement Activities	Part of municipal operations as occurs	As is occurs and is necessary; for NPDES purposes, an increased focus has been placed on anti-litter and dumping near and around creeks and from construction sites.		

Education and Outreach Efforts: • Thru SCVURPPP Watershed Watch website, ad campaign, etc • Thru WVCWP – literature, give-aways, Enviroscape presentations, clean-up events, local newspaper articles, newsletter articles, information board in MS PO	In place	For NPDES purposes, additional collaborative efforts have been supported- such as the Watershed Watch Campaign, MyWatershedWatch website (www.mywatershedwatch.org) Per NPDES purposes added/adding support and events for various 'take back' of POC related items (e-waste events, mercury thermometer events, clean-up events)		
County HHW Program Activities	In place	As is occurs and is necessary		
Removal of Homeless Encampment	In place, as needed	As is occurs and is necessary		
Solid Waste Recycling Efforts: • Curbside Recycling Program- Residential [glass, paper, plastic] • By Drop off: oil, batteries, e-waste • Improved Trash Bin Management: Solid Waste moved to single recycle bin with lid (from individual sorting bins w/ no lid) Commercial Cardboard Recycling Program – voluntary (paid for service) Downtown recycling receptacles	In place	As is occurs and is necessary		
Source Controls/Bans/Prohibitions	Not at this time			
Storm Drain Operation and Maintenance • Inspection/Maintenance of Storm Drain Outfalls	In place – circa 1992	SD cleaning program put into place to meet NPDES requirements;		

• Storm Drain Signage/Marking		data collection/ categorization of 'trash/litter' as separate category in 2009, for meeting MRP data collection.		
Street Sweeping Activities	In place – circa 1994			
Trash Removal: Litter Pickup and Control • Downtown • Parks • Public Facilities: City/Town Hall, Community Center, Senior Center, Corporation Yard • use of Solar Belly Compactors Free Trash Pickup/Dropoff Days Community Garage Sales	In place – part of municipal services			
Volunteer Creek Cleanups • National River Clean Up Day • Great American Litter Pick-up • Coastal Clean-up • LG Volunteer Program	In place – circa 2003

Section 11 - Provision C.11 Mercury Controls

C.11.a.i Mercury Recycling Efforts

List below or attach lists of efforts to promote, facilitate, and/or participate in collection and recycling of mercury containing devices and equipment at the consumer level (e.g., thermometers, thermostats, switches, bulbs).

Mercury collection and recycling is available throughout the year at locally sponsored events (private fundraisers), through e-waste drop-off events hosted by the waste hauler and drop-off services at the waste hauler and Santa Clara County HHW program.

Extensive local outreach for events, including specific information on mercury pollution, is conducted regularly through WVCWP and solid waste contractor. Event information is included in **APPENDIX C7: Attachments C7egh Events and C7bc Advertising and Media Efforts**.

Outreach by WVCWP includes press releases to local weekly newspapers and to municipal newsletters. Flyers are posted in public places (such as libraries, community centers, senior center, city/town hall) and information is featured on municipal websites.

Pollution Prevention Fair – 9/22/09 – Campbell Community Center

Event included opportunities for recycling: thermometers, batteries and cell phones

Thermometer Exchange – 10/7/09 – Saratoga Community Center

Event included opportunities for recycling: thermometers and batteries

Thermometer Exchange – 4/11/10 –Los Gatos Farmers' Market (part of "Keep Los Gatos Beautiful" event)

Event focused on recycling thermometers

E-Waste Drop-off event for residents

7/18/09 – Campbell United Church of Christ, Campbell
7/25/09 – Los Gatos United Methodist Church, Los Gatos
7/25/09 – City of Saratoga N. Campus, Saratoga
10/17/09 – Campbell United Church of Christ, Campbell
10/17/09 – Los Gatos United Methodist Church, Los Gatos
10/24/09 – City of Saratoga N. Campus, Saratoga
4/10/10 – Campbell United Church of Christ, Campbell
4/17/10 – Los Gatos United Methodist Church, Los Gatos
5/15/10 – City of Saratoga N. Campus, Saratoga

Municipal Facility annual recycling of 'mercury containing products' includes Fluorescent Bulbs and Batteries.

C.11.a.ii Mercury Collection
Provide an estimate of the mass of mercury collected through these efforts, or provide a reference to a report containing this estimate.
Amount collected: The methodologies for estimating the mass of mercury collected through mercury collection and recycling efforts are currently in development and are due to the Water Board by September 15, 2010. Therefore, estimates could not be made for FY 09-10. Estimates of the mass of mercury collected through recycling efforts during FY 10-11 will be provided with the FY 10-11 Annual Report (see FY 10-11 BASMAA Regional POC Report).

C.11.b Monitor Methylmercury C.11.c Pilot Projects to Investigate and Abate Mercury Sources in Drainages C.11.d Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices C.11.e Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit C.11.f Diversion of Dry Weather and First Flush Flows to POTWs C.11.g Monitor Stormwater Mercury Pollutant Loads and Loads Reduced C.11.h Fate and Transport Study of Mercury In Urban Runoff C.11.i Development of a Risk Reduction Program Implemented Throughout the Region C.11.j Develop Allocation Sharing Scheme with Caltrans
State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.
Summary A summary of Program accomplishments for these sub-provisions are included within the C.11 Mercury Controls section of Program's FY 09-10 Annual Report and/or the BASMAA Regional POC Report.

Section 12 - Provision C.12 PCBs Controls

C.12.a.i,iii Municipal Inspectors Training

(For FY 09-10 Annual Report only) List below or attach description of results of training municipal industrial inspectors to identify, in the course of their existing inspections, PCBs or PCB-containing equipment.

Description:

In FY 09-10, inspector training materials were developed through in-kind contributions of SCVURPPP to BASMAA. Training materials can be found in the BASMAA Regional POC Report.

Through WVCWP, participate in SCVURPPP's AHTG for local applicability of sites [identification of facility types]; also through WVCWP, work with the Industrial/Commercial Site Inspection contractor (see Section 4 Ind/Commercial Discharge Program) to determine which facilities may fall under this category. As sites are identified, they will be inspected and reported upon accordingly. Newly developed training materials by BASMAA will be made available to the Industrial/Commercial Inspection contractor for training implementation.

C.12.a.ii,iii Ongoing Training

***(For FY 10-11 Annual Report** and Each Annual Report Thereafter)* List below or attach description of ongoing training development and inspections for PCB identification, including documentation and referral to appropriate regulatory agencies (e.g. county health departments, Department of Toxic Substances Control, California Department of Public Health, and the Water Board) as necessary.

Description:

Not required for this Annual Report

C.12.b Conduct Pilot Projects to Evaluate Managing PCB-Containing Materials and Wastes during Building Demolition and Renovation Activities
C.12.c Pilot Projects to Investigate and Abate On-land Locations with Elevated PCB Concentrations
C.12.d Conduct Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices
C.12.e Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit
C.12.f Diversion of Dry Weather and First Flush Flows to POTWs
C.12.g Monitor Stormwater PCB Pollutant Loads and Loads Reduced
C.12.h Fate and Transport Study of PCBs In Urban Runoff
C.12.i Development of a Risk Reduction Program Implemented Throughout the Region

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.

Summary

A summary of Program accomplishments for these sub-provisions are included within the C.12 PCB Controls section of Program's FY 09-10 Annual Report and/or the BASMAA Regional POC Report

Section 13 - Provision C.13 Copper Controls

C.13.a.i and iii Legal Authority: Architectural Copper

(For FY 10-11 Annual Report only) Do you have adequate legal authority to prohibit discharge of wastewater to storm drains generated from the installation, cleaning, treating, and washing of the surface of copper architectural features, including copper roofs to storm drains?		**Yes**		**No**

If **No**, explain and provide schedule for obtaining authority within 1 year:

Not required for this Annual Report.

C.13.b.i and iii Legal Authority: Pools, Spas, and Fountains

(For FY10-11 Annual Report only) Do you have adequate legal authority to prohibit discharges to storm drains from pools, spas, and fountains that contain copper-based chemicals?		**Yes**		**No**

If **No**, explain and provide schedule for obtaining authority within 1 year:

Not required for this Annual Report.

C.13.c Vehicle Brake Pads

Reported in a separate regional report.

A summary of the Program's participation with the Brake Pad Partnership (BPP) is included within SCVURPPP FY0910 Annual Report Section C.13 Copper Controls and/or the BASMAA Regional POC Report." Support of the BPP was extended through WVCWP's letters of support for Senate Bill 346.

C.13.d.iii Industrial Sources Copper Reduction Results

List below or attach annotated lists or tables from your Industrial and Commercial Site Controls portion of this report, that highlight copper reduction results among the facilities identified as potential users or sources of copper, facilities inspected, and BMPs addressed. For FY09-10 describe below or highlight in the C.4 Evaluation portion (if provided) of this report the steps taken to revise your program to meet new data tracking and reporting requirements for implementation levels described in C.13.d.ii.

Summary

In FY 09-10, inspector training materials were developed through in-kind contributions of SCVURPPP to BASMAA. Training materials can be found in the BASMAA Regional POC Report

Through WVCWP, participated in SCVURPPP's AHTG for local applicability of sites [identification of facility types]; also through WVCWP, work with the Industrial/Commercial Site Inspection contractor (see Section 4 Ind/Commercial Discharge Program) to determine which facilities may fall under this category. As sites are identified, they will be inspected and reported upon accordingly. Newly developed training materials by BASMAA will be made available to the Industrial/Commercial Inspection contractor for training implementation.

C.13.e Studies to Reduce Copper Pollutant Impact Uncertainties

Revised. Description reads "State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below."

Summary

A summary of Program efforts (i.e., participation in RMP committee and work group meetings) to develop regional studies *to reduce copper pollutant impact uncertainties* is included within the SCVURPPP FY0910 Annual Report, Section C.13 Copper Controls and/or BASMAA Regional POC Report

Section 15 - Provision C.15 Exempted and Conditionally Exempted Discharges

C.15.b.iii.(1), C.15.b.iii.(2) Planned and Unplanned Discharges of Potable Water

Is your agency a water purveyor?		**Yes**	X	**No**
If **No**, skip to C.15.b.vi.(2):				
If **Yes**, Complete the attached reporting tables or attach your own table with the same information. Describe program highlights below. For FY 09-10 only, describe steps taken to revise your program to meet new monitoring, data tracking and reporting requirements.				
Summary:				

C.15.b.vi.(2) Irrigation Water, Landscape Irrigation, and Lawn or Garden Watering

Provide implementation summaries of the required BMPs to promote measures that minimize runoff and pollutant loading from excess irrigation. Generally the categories are:

- Promote conservation programs
- Promote outreach for less toxic pest control and landscape management
- Promote use of drought tolerant and native vegetation
- Promote outreach messages to encourage appropriate watering/irrigation practices
- Implement Illicit Discharge Enforcement Response Plan for ongoing, large volume landscape irrigation runoff.

Summary:

For county-wide outreach on less toxic pest control and appropriate irrigation practices, refer to SCVURPPP's FY0910 Annual Report Section C7, Public Information and Outreach [reports on the Watershed Watch Campaign and the IPM Store Partnership], and Section C9 Pesticide Toxicity Control [report on the Green Gardener Training Program. Participated in these Program outreach efforts via WVCWP, including review of outreach pieces to be published (print, radio, tv), and review of programmatic reports provided to the Program.

WVCWP published seasonal articles in agency newsletters and posted seasonal information on an Info Board in Monte Sereno Post Office.

Also, promotion of 'less toxic pest control' and 'landscape management,' along with use of drought tolerant and native vegetation, is specifically addressed by WVCWP's distribution of native plant seed packets, which are also 'beneficial bug attractants'. The seed packets, attached to related literature, have proved to be an effective means of encouraging residents to take home literature as well as trial the use of basic IPM measures.

Water conservation has been promoted through articles in municipal newsletters.

CITY OF CAMPBELL

Hacienda Avenue “Green Street” Improvements
Project Description
Urban Greening for Sustainable Communities Grant Program

By
Fredrick Ho

March 15, 2010

Located in the southwesterly portion of the City of Campbell, the mile long Hacienda Avenue is a vital east/west residential collector connecting the more rural San Tomas Area Neighborhood of Campbell to Winchester Boulevard, a north/south arterial that provides connections to Los Gatos, Campbell, and San Jose. The Hacienda corridor also provides a pedestrian and bicycle link from the neighborhood to the Hacienda Percolation Ponds (See Attachment 1) and the extremely popular Santa Clara County Los Gatos Creek Park and Creek Trail. The City, in coordination with the Santa Clara Valley Water District, enhanced the area surrounding the Hacienda Avenue percolation pond at the intersection of Hacienda Avenue and S. Winchester Boulevard. These enhancements provide a much improved site for use as a passive recreational area for nearby residents. Additionally, the intersection of Hacienda Avenue and S. Winchester Boulevard is a potential location for a future VTA facility along the Vasona Light Rail Line.

Due to significant traffic volumes experienced on Hacienda Avenue, combined with a variation in the pavement sections constructed over the years, many under designed for the loads experienced today, Hacienda Avenue has fallen into disrepair. The pavement condition for the majority of Hacienda Avenue is very poor with much of the street in need of major rehabilitation, and some portions requiring actual reconstruction. This street has a predominant street right-of-way of 90-ft, with approximately 70-ft of this area in street pavement. Given its residential surrounding and its wider than necessary pavement width, and the City's commitment to sustainable designs, the City is proposing to develop Hacienda Avenue as a "Green Street". The proposed improvements include installing bike lanes, planting street trees, installing bioswales and other stormwater treatment facilities, narrowing the existing pavement from 70' to 50' and using open space or alternative permeable paving surfaces to allow stormwater infiltration.

Developing Hacienda Avenue as a Green Street will help the City of Campbell comply with its NPDES Permit requirements. However, this project goes beyond permit compliance as highlighted below:

1) Project Size – The project proposes to develop the entire one mile stretch of Hacienda Avenue as a Green Street. To meet Permit requirements, developing only a block would be sufficient.

2) Key Issues Addressed – The Permit requires each green street project to address one of six key green street elements. The proposed Hacienda Avenue Improvement Project goes beyond permit compliance by addressing four of the six key elements. These elements are:

- Stormwater storage for landscaping reuse or stormwater treatment and/or infiltration for groundwater replenishment through the use of natural feature systems;
- Creation of attractive streetscapes that enhance neighborhood livability by enhancing the pedestrian environment and introducing park-like elements into neighborhoods;
- Service as an urban greenway segment that connects neighborhoods, parks, recreation facilities, schools, main streets, and wildlife habitats; and
- Meets broader community goals by providing pedestrian and, where appropriate, bicycle access;

The Hacienda Avenue Improvement Project will also provide multiple other benefits that are not required by the NPDES Permit. These are:

1) Decrease in Air Pollution – Installing bike lanes would encourage use of an alternative transportation mode thereby decreasing air pollution from passenger vehicles. Increased bicycle use would also decrease the consumption and dependency on oil. The project proposes to plant more street trees which would lead to cleaner air and reduce the impact of heat islands leading to decreased energy consumption by nearby residents.
2) Reduce Consumption of Natural Resources & Energy – Narrowing the existing pavement from 70' to 50' would reduce the amount of natural resources and energy associated with manufacture and installation of asphalt and also for maintenance purposes.

3) Reliability of Water Supplies – Use of open space and/or alternative permeable paving methods allow storm water runoff to infiltrate into native soil, removing contaminants before recharging the ground water. This would improve the reliability of water supply.

	Bike Lane	Tree Planting	Infiltration Bioswales	Reduce Asphalt Concrete	Increase Permeable Area
Decrease Air Pollution	X	X		X	
Decrease Water Pollution		X	X		X
Reduce Consumption of Natural Resources & Energy	X	X		X	
Reliability of Water Supplies					X

- **July 2009 / Summer 2009**

– Created & distributed Press Release on car-washing, use of the WVCWP "Car Wash Kit" for fundraising events, and the upcoming car wash fundraiser in Campbell for Susan G. Komen.

Distribution: to 3 WV weekly newspapers,

- Article printed in the Campbell Reporter (7/23/2009)

- Article printed Saratoga News (7/23/2009).

- Generated calls to the WVCWP office, with questions about the Car Wash Kit.

– Created & distributed Press Release noting presentation of Stormwater Awards to WV Communities, via County-wide program. Press release covered topics related to "Trash" and "IPM".

Distribution: to 3 WV weekly newspapers
4 Municipal Newsletters

- Article printed in Campbell's "Profile" newsletter: Summer 2009 "City Receives Pollution Prevention Awards" which awards presented by CASQA -- details on the Trash Toolbox program, and a link to the "Trash Toolbox" flyer; the award-winning "Green Gardeners" program, -- and the "IPM Innovators Award".

– Created & distributed Press Release: encourage residents to recognize and use 'beneficial bugs' in home gardens in place of pesticides.

Distribution: to 4 Municipal Newsletters

- Article printed in Campbell's "**Profile**" newsletter: Summer 2009 "A Safe Garden" (Beneficial Bugs). The article included photos of beneficial bugs, and links to additional photos and information available on web sites. The article also encouraged residents to obtain free packets of seeds from WVCWP; the sees are for plants that attract 'beneficial bugs'. Information on proper disposal of pesticides was also included.

- City of Monte Sereno Newsletter: July 2009 "15% Water Use Reduction"

The Newsletter included a reminder to residents to reduce water use. Readers were reminded to refer to conservation tips in the previous Newsletter (April 2009) which contained an article on water conservation.

- **Sept. 2009 / Fall 2009**

– Created & distributed 2 versions of a Press release on Pollution Prevention program at Campbell Cmmty Ctr (Thermometer Exchange, battery drop-off, prescription drugs drop-off). Created & distributed PR, including photos of previous events and encouraging a reporter to cover the P2 event, was submitted.

Distribution: to 3 WV weekly newspapers,

- A "Brief"/short article on the event was printed in the Campbell Reporter (DATE?)

– Created and distributed a Press Release encouraging participation in the California Coastal Cleanup event at WVCWP's Westmont site.

Distribution: to 3 WV weekly newspapers and 4 municipal newsletters

- Info on the event was **printed** in the "Briefs" section of the "Campbell Reporter" (9-11-09)
- Info on the event was **printed** in the "Briefs" section of the "Saratoga News" (9-11-09)

– Created and distributed a Press Release on the Thermometer Exchange/ Battery Drop-off event at Saratoga Community Center

Distribution: to 3 WV weekly newspapers

- A "Brief" article on the upcoming event was **printed** in the Saratoga News,(9/22/09).

-Related Article: The Campbell Profile featured a colorful graphic and a short article promoting water conservation, including a link to the website www.save20gallons.org

- Campbell's "Profile" newsletter: Fall 2009 "Water Conservation"

- Saratoga's "**The Saratogan**" Fall 2009 "E-Waste Drop-off Event"

The newsletter included information on the upcoming free E-waste Drop-off sponsored by the City's waste contractor.

- **Jan 2010/ Winter 2010**

-Related Article: Campbell's "**Profile**" newsletter: Winter/Spring 09/10 "Hamilton Median Project" (Water Conservation). This article discusses a median project on a major arterial; the project incorporates the most up-to-date irrigation system, which saves water, and also ensures there will be no runoff in case of a stuck sprinkler head or similar problem. By setting an example of what can currently be done with appropriate irrigation systems, the article encourages water conservation, and discourages over-watering and runoff.

- Created and distributed article alerting residents on the need to keep leaves out of the gutter area and stormdrain system, and to dispose of them properly in the Yard Waste containers.

Distribution: to 4 municipal newsletters

- Campbell's "**Profile**" newsletter: Winter/Spring 09/10 "The Rain is Coming" (Keeping leaves out of gutters/stormdrains)

- **Mar 2010/ Spring 2010**

– Created and distributed Press Release to present Mercury info prior to the upcoming Thermometer Exchange. The Press Release resulted in a "Growing Greener" newsletter devoted to Mercury & HHW information.

Distribution: 4 municipal Newsletters

- Mercury article for Keep LG Beautiful Flyer.doc
- Los Gatos' "**Growing Greener**" newsletter: March 2010 "Taking Charge of Hazardous Waste".
- Los Gatos' Newsletter included articles on:
    - Thermometer Exchange at LG Farmer's Market;
    - upcoming HHW Drop-off events;

- links to HHW info;
- proper drug disposal;
- proper car-washing.

- Los Gatos "**Vista**" Annual Newsletter: Spring 2010 "Safe Disposal of Medications". In response to a flyer on this subject distributed by WVCWP, Los Gatos published a long article on keeping medications out of our waterways. The article discussed the problem of medications as water pollution, and explained proper disposal procedures.

- City of Monte Sereno Newsletter: May/June 2010 "Maintaining Your Pool & Spa"

This full, front-page article discussed all the aspects of potential copper pollution in creeks due to improper draining. It discussed proper drainage methods and alternative, copper-free maintenance methods, and included links ot further info on the Watershed Watch website.

BRIEFS

Free e-waste event Oct. 17 at church

There's a better place than the landfill for unwanted old electronics.

The Campbell United Church of Christ will be taking in those outdated products free of charge at an e-waste event on Oct. 17 from 9 a.m. to 2 p.m. at the church campus, 400 W. Campbell Ave.

Electronics contain harmful chemicals and should be disposed of properly or recycled. The church will accept computers, monitors, keyboards, hard drives, TVs, VCRs, video games and systems, cell phones and batteries for recycling.

Call 408.378.4418.

Open seats on parks and rec commission

Two terms on the city's parks and recreation commission will expire this year, leaving a couple of openings on the seven-member committee.

Applicants must be at least 18 years old and a resident of Campbell. Applications may be picked up at city hall, 70 N. First St., and must be returned by Oct. 30 at 5 p.m. Visit www.cityofcampbell.com or call 408.866.2117.

Plans for park now available on city website

The three conceptual plans for Steppenwolf Family Park can now be viewed online at the city's website, www.cityofcampbell.com/dp.

Several residents got to see the plans in person at a community meeting on Oct. 5, but it's still not too late to submit feedback on the design of the park at 316 Union Ave.

Comments and questions can be submitted to public.works@cityofcampbell.com.

BRIEFS

Congregation to honor foreign diplomat

Congregation Beth David will honor Chiune Sugihara, a Japanese diplomat who helped save the lives of approximately 6,000 Jews during World War II. Sugihara died in 1986.

The commemoration will be held Oct. 25 from 1 to 3 p.m. at the synagogue, 19700 Prospect Road. A street sign, "Chiune Sugihara Way," will also be unveiled in the parking lot of the congregation property.

Visit www.jewishvirtuallibrary.org/jsource/Holocaust/sugihara.html.

City to host North Campus grand opening

The city of Saratoga is celebrating the grand opening of the North Campus by hosting an open house for residents on Oct. 23 at 3:30 p.m. A tour of the new multipurpose room will be available.

The city bought the real estate in 2002 and is hoping the multipurpose building will be an attraction for citywide community events.

Contact Nina Walker at 408.868.1259 or nwalker@saratoga.ca.us.

Residents can rid themselves of e-waste

West Valley Collection and Recycling is hosting an e-waste event where Saratoga residents can rid their garages of old and unused electronic items.

Television and computer monitors, laptops, external hard drives, keyboards, mice, printers, DVD players and VCRs, phones and fax machines are some of the acceptable items.

The event will be held Oct. 24 from 9 a.m. to 2 p.m. at the North Campus, 19848 Prospect Road.

Call 408.283.2950.

BRIEFS

This week is 'Walk to School Week'

Expect to see more children in crosswalks Oct. 5-9 as they participate in "Walk to School Week," a program focusing on teaching children safe walking and biking habits, such as how to cross streets and choose safe routes to school.

The program is part of the "International Walk to School Month," which runs through October. There is also a national "Walk to School Day" on Oct. 7. Visit www.cawalktoschool.com.

City to host thermometer exchange

Exposure to mercury can cause damage to the nervous system, brain, kidneys, liver and immune system. In an effort to rid homes of the dangerous substance, the city of Saratoga is hosting a thermometer exchange.

The event will take place Oct. 7 from 10 a.m. to 2 p.m. in the Joan Pisani Community Center, 19655 Allendale Ave.

Residents can rid themselves of e-waste

West Valley Collection and Recycling is hosting an e-waste event where Saratoga residents can rid their garages of old and unused electronic items.

Television and computer monitors, laptops, external computer hard drives, keyboards, computer mice, printers, DVD players and VCRs, phones, fax machines, electronic toys, typewriters, cameras, stereos and speakers are some of the acceptable items.

North Campus Open House

Renovations to the North Campus have been finished! The City will be celebrating completion of the work during an open house on October 23, 2009 at 3:30 p.m. at the North Campus, which is located at 19848 Prospect Road in Saratoga. The event is open to the public and will feature live music, refreshments, and more.

Purchased in 2002, the City has been making improvements to the 2.6 acre site in phases. The first stage of work started in 2007 with improvements to the Administration Building, which is primarily used for meetings and recreation classes.

The second phase of work started last year with renovations to Fellowship Hall. The improvements to the building include a new hardwood floor, a kitchen, fully accessible bathrooms, and more. This work has also included demolition of two unusable buildings on the property, which have been replaced with new landscaping.

The City was able to make the improvements to Fellowship Hall thanks to a generous donation from the House Family Foundation, which was administered by the Saratoga-Monte Sereno Community Foundation.

The City is looking for a new name for the North Campus.
Submit your ideas online at www.saratoga.ca.us by October 23, 2009!

Fellowship Hall at the North Campus

E-Waste Drop Off – Electronics such as computers, monitors, televisions, fax machines, printers, copiers, stereos, phones, and cameras all can contain toxic chemicals and compounds that should not be thrown in the trash. West Valley Collection & Recycling will be offering a free E-Waste drop-off event for residents to get rid of unwanted electronics from 9am to 2pm on Saturday, October 24th, 2009. The drop-off is located at the City of Saratoga's North Campus located at 19848 Prospect Road in Saratoga.

Enroll for Fall Recreation Class!

This fall, the City of Saratoga Recreation Department has classes for all ages and all interests. Youth programs include *My First Art Class*, which begins November 20th and runs through December 18th, as well as *Camp Winter Wonderland* that will be held at the Joan Pisani Community Center over the holiday break for children between 3.5 years to 10 years old. Some of the exciting adult programs include *Salsa & Ladies Latin Styling* with Agnes beginning November 9th and *Brewing 101* at St. Stan's Brewing Company in downtown Saratoga starting November 7th. *For more information, visit http://www.saratoga.ca.us/cityhall/rec/default.asp or call (408) 868-1249.*

Got ideas? Send story ideas or comments about *The Saratogan* to Crystal Morrow at cmorrow@saratoga.ca.us or (408) 868-1275.

Holiday Tree Recycling
December 28, 2009 - January 15, 2010 West Valley Collection and Recycling will pick up holiday trees curbside as a part of their regular collection schedule. Up to 2 undecorated, natural or flocked trees, will be picked up per residence. Trees must be cut into 5 foot lengths and placed 1 foot away from garbage/recycling carts. More Info at 408-283-9250 or www.westvalleyrecycles.com

Spare the Air
Did you know that smoke from wood burning fireplaces is harmful for the environment and our health? Do your part to protect our environment and community by not burning wood in your fireplace this winter. The American Cancer Society and the Bay Area Air Quality Management District have teamed up to provide more information about the dangers of wood smoke.

E-Waste Collection Events
With the holiday season upon us, many households end up with new electronics. It is important that the old ones are disposed of and recycled properly so they do not end up in the landfills. The county's Household Hazardous Waste Program will be sponsoring two e-waste collection events:

January 9, 2010
Lifescan, Inc. (Parking Lot)
1000 Gibraltar Dr.
Milpitas, CA 95035

March 6, 2010
Microsoft (Parking Lot)
1065 La Avenida Street
Mountain View, CA 94043

For more information, please visit www.hhw.org.

Los Gatos: Growing Greener Together

The Town of Los Gatos has been certified as a Green Business. This program, coordinated by ABAG, is a partnership of environmental agencies that assists, recognizes and promotes business and government agencies who operate in a more environmentally responsible way. The key goals of the program are to promote resources conservation and pollution prevention.

At the Town, we take this certification seriously and ask our Town Employees to follow our Green Business Commitments and do the right thing for our environment everyday, while at work in our Town offices. We invite you and your family to join us in our efforts to protect the

2. Material Development: Give-aways and Handout items (including brochures and other stormwater literature)

a. RE-USABLE BAG/ ANTI-LITTER CAMPAIGN

Topic: POC-Trash/Litter

Audience: Residents and Students

Goal: Modify behavior => provide incentive for using re-usable bag thru ease of use (size, convenience) and ownership (personalization of bags)

2 types of re-usable bags, to promote litter reduction efforts; the bags carry the message is "Clean Creeks… It's In Our Hands". Both bags are foldable, and can easily fit in a pocket, purse, or school backpack.

- Blue nylon bag is aimed at residents who would use this instead of a grocery bag**. 250** of these bags have been purchased. They can be distributed with relevant literature inside, depending on the event where they will be featured.
- White canvas is aimed at schoolchildren. **150** of these bags have been purchased. The message is printed on the small carrying bag; on the main bag, children will be able to color in a comic, which conveys a stormwater message. This children's activity portion will be a pilot program for WVCWP; it is being adopted from a similar program at the City of Palo Alto.

b. NATIVE PLANTS/ IPM CAMPAIGN (Beneficial Bugs)

Topic: POC-Pesticides/IPM

Audience: Residents and Students

Goal: Modify behavior => provide alternate option to pesticide usage

In FY 08-09 WVCWP carried out a Pilot Program of purchasing seeds for 4 types of California native plants; species which would attract 'beneficial bugs' to gardens, thus encouraging residents to reduce the use of pesticides. WVCWP developed labels for the seeds, and volunteers helped to package them in 2"x3" l envelopes. The packages were attached to IPM literature. This seed program turned out to be very successful in terms of encouraging residents to pick up the IPM literature. In FY 09-10, the Pilot Program was reviewed, and 3 types of seeds were ordered, and more seed packages and blank labels were purchased. WVCWP is looking into soliciting volunteers to package these seeds for distribution in FY 10-11.

c. Copper Brochure

Topic: POC-Copper

Audience: Residents

Goal: Information dissemination => provide incentive (discount card) to learn and participate in pollution reduction thru typical daily activity (car washing)

WVCWP staff created a Copper outreach tri-fold, since no general Copper outreach material was available. The tri-fold was designed to have the "Watershed Watch Discount Card" attached to it, as a means of encouraging residents to take home the literature (i.e if they wanted the Discount Card, they were also getting the Copper information). This tri-fold with Discount Card has proven to be relatively successful in getting residents to take home literature about copper pollution.

d. CAR WASHING- residential and fundraising

Topic: POC-Copper

Audience: Residents

Goal: Modify behavior => provide mechanism for preventing pollution discharge during chosen activity (car wash for fundrasing)

This tri-fold was forwarded to the Program, along with a request for more public outreach material on 'Car Washing & Copper"; subsequently a Car Washing tri-fold was produced by the Program. WVCWP modified this piece for the WVC by highlighting local contact info on it.

e. Information Cards

Topic: POCs (Trash/Litter, Pesticides, Copper); Creeks and SF Bay as local resource, Watersheds

Audience: Residents, Teachers, Students

Goal: Information dissemination

f. PRESENTATION: "A Stormwater Campaign in Cartoons"

Topic: Conveying BMP and POC message to residents

Audience: Municipal/ Stormwater Staff

Goal: Information dissemination

At the end of FY 08-09, WVCWP staff was invited to present at the EPA National Outreach Conference in Portland on the topic of "A Stormwater Campaign in Cartoons". The presentation was very well received, and WVCWP continues to receive requests for information on this topic. The presentation is posted on the EPA website; WVCWP has shared information via e-mail so that other agencies can initiate advertising campaigns using cartoon characters.

Why keep Copper out of our Creeks ?

1000 sq ft of copper roof, by itself, can lead to

TOXIC CONDITIONS
in a nearby creek
within just 1 rainstorm

How does COPPER get into our Creeks?

Rain, irrigation, hosing down driveways, etc. can all carry pollution from our homes to nearby stormdrains.

STORMDRAINS FLOW DIRECTLY INTO OUR CREEKS

Water flowing into a stormdrain does NOT flow to the Water Treatment Plant— it flows straight into our creeks.

From there, it can enter our groundwater system or San Francisco Bay

Our Copper & Our Creeks

Did you know ... ?

- **COPPER**, even in very small amounts, can be **deadly to life in our creeks** and SF Bay
- **COPPER is common in car brake pads**, and runs into our creeks when we wash cars in driveways & parking lots
- **COPPER** can come from home sources, such as
  - **pool/spa chemicals**
  - **copper garden pieces**
  - **architectural elements**

How can YOU help keep Copper out of creeks ?

Car Washing

Take your car to a commercial car wash

Or, use a commercial 'wash-it-yourself' facility.

This way the dirty water is cleaned and recycled, rather than carrying pollutants straight to a creek.

If you can't use a car wash facility,

at least wash your car on a lawn or gravel area

— this allows dirty water to sink into the soil instead of running straight into a creek.

for Car Wash Fundraiser Events borrow a FREE "Car Wash Kit"

This kit ensures that water from your event will flow to the Water Treatment Plant, rather than straight to our creeks.

Get the kit from West Valley Clean Water Program at:

(408)354-3585
office@wvcwp.org

Pools & Spas

Choose safe algaecides

Check with your pool store for copper-free algaecides.

Drain your Pool or Spa properly

NO: draining into a street, gutter or storm drain

YES: discharge water to a sanitary sewer cleanout.

If you are on a septic system or have no sanitary sewer clean-out, contact your ***wastewater treatment authority***. You may be told to drain the water to a lawn or gravel area.

Residents of Campbell, Los Gatos Monte Sereno and parts of Saratoga, can get direction from:

West Valley Sanitation District at (408) 378-2407

How can YOU help keep Copper out of creeks ?

Around your Home

Choose Copper-free outdoor garden accessories and architecture

Use non-copper weathervanes, birdbaths, gutters, roofing etc.

Copper, when used outdoors, will oxidize. These particles will be washed off by rain and flow straight into creeks.

For existing copper gutters & roofs, create a percolation area at your downspout outlet. The roof runoff can soak into the ground, rather than flowing to the creek.

3. Posters, Flyers

It is common for local events to be publicized via municipal websites and posting of event flyers in municipal facilities.

Municipal Facilities include:

- City/ Town Hall: main building: Planning, Building, Engineering Counter, where development applications and building permits are issued
- Corporation Yard/ Service Center: Location for maint crews and equipment/ vehicles
- Community Center
- Senior Center
- Library
- Other Facility Building: MS Post Office

a. Campbell: Campbell posted flyers at the Community Center, and on the City website for:

   i. Pollution Prevention Event – (9/09);
   ii. Arbor Day (4/10);
   iii. Community Cleanup (5/10);
   iv. Bike to Work Day (5/10);

b. Los Gatos: Los Gatos posted flyers at various municipal buildings and also notified residents of events via the Town website, especially by making use of it's "What's New" e-mail subscription service.

   i. E-waste Drop-off event (10/09);
   ii. Thermometer Exchange (4/10);
   iii. Arbor Day (4/10);
   iv. Bike to Work Day (5/10)
   v. PPW Open House (5/10)

c. Monte Sereno: Monte Sereno posts flyers in the City Hall foyer; in addition, WVCWP posts info and events regularly on a large arrangement in the Monte Sereno City Post Office, which is the spot in Monte Sereno which receives the most foot traffic. Topics included:

   i. Mercury pollution prevention
      a. Mercury Thermometer exchange
      b. Battery recycling
      c. Fluorescent Bulb recycling
   ii. Protect creeks during Car Wash Fundraisers
   iii. Preventing pollution with everyday activities
   iv. Trash/ Litter/ Recycling
   v. Sediment Impacts
   vi. Watershed Watch/Protect our Creeks and Bay
   vii. Clean-up Events
   viii. Arbor Day/ Earth Day Events
   ix. Home Maintenance Tips
   x. Bike to Work
   xi. Copper-Free Pools. Spas, and Fountains
   xii. Pesticide-Free Gardens/ IPM

d. Saratoga: Saratoga posts flyers at various municipal buildings, and also uses the City website's Home Page, RSS news feeds, and web-based calendar to advertise events.

   i. Thermometer Exchange (10/09);
   ii. E-waste collection (10/09);
   iii. Arbor Day (4/10)

Outreach Event Evaluation

Event Name: Mercury Fever Thermometer Exchange

Your Name: Evelyn Broeker Your Program (if applicable): WVCWP

Shift Date: October 7, 2009 Time Started: 10am Time Ended: 2pm

1. Report the materials taken and their estimated quantities distributed at this event. (An attachment is fine.) 75 each of the following:
   a. Re-usable bags (plastic from SaveMart, users can receive 5cents credit at any participating grocery store, not just SaveMart – i.e., Safeway, Genes, etc) [=> covers litter topic]
   b. WW Discount Cards w/ WVCWP brochure on Copper pollution [=> covers POC Copper topic]
   c. Fly Swatter w/booklet on Less Toxic Fact Sheets on Pests (insects, rodents, etc) [=> covers POC Pesticide topic]
   d. Mercury Disposal booklet [=> covers POC Mercury topic]
2. Report the estimated number of attendees you engaged with in "information contacts" or discussions at this event. Approximately 126 attendees; 216 mercury thermometers were collected and this equates to 108 grams of mercury. We also collected a 5 gallon bucket of batteries, 2 cell phones and 7 eyeglasses.
3. Was this event a satisfactory venue? Yes. The location and timing were excellent. Senior citizens are most likely to have mercury thermometers. The Senior Center was also holding a luncheon with a guest speaker and an opportunity to speak with a librarian from El Camino Hospital.
4. How appropriate were the materials for this audience at this event? Quite appropriate.
5. How adequate was the staffing at the event during the time that you were working? Two working at the table and one to actually hand out information.
6. What messages (not materials) did you deliver? Pollution awareness and venues for discarding toxic/hazardous waste. (medicine, sharps, paint, e-waste)
7. What did you learn from interfacing with the public at this event? Some attendees have gardeners and housekeepers which could benefit by extending them the gardening and cleaning information.
8. What giveaway items did you find most useful for this event? Discount Cards w/ WVCWP brochure on Copper pollution and San Jose's polymer material reusable grocery bags.
9. Which giveaway items were least useful for this event? SaveMart's recycled plastic reusable bags.
10. What other literature should have been provided at this event? N/A

Other comments: Have chairs available for senior citizens to complete the onsite evaluation form. Keep evaluation forms brief with a maximum of three questions to include multiple choice answers. Have forms with large print.

Bike to Work – May 13, 2010

BIKE TO WORK DAY
MAY 13, 2010

- ✓ Reduce your carbon foot print for the day.
- ✓ It's fun!
- ✓ It's green!
- ✓ It's a great way to see all those details you miss in the car!

For more information about this event visit the Silicon Valley Bike Coalition at: bikesiliconvalley.org

BIKE TO WORK DAY
MAY 13, 2010

When is the last time you smelled the crisp springtime air during your morning commute? Or pulled into the parking lot with a big smile plastered across your face, pumped with endorphins and ideas? Or lost weight just by going back and forth to work each day?

A HEALTHY BODY – Ride your bike to work, and you no longer need to make time to exercise. Racking up just 3 hours of riding time a week can lead to cutting your risk of heart disease in half. Please consult your doctor before starting any new physical activity.

MORE MONEY – The average annual price of keeping an automobile running: at least $3,000. The cost of running a bike for a year: less than $300. The joy of saving more than two thousand dollars a year: priceless.

CLEAN AIR – Motorized vehicles are responsible for 70% of the carbon monoxide, 45% of the nitrogen dioxide, and 35% of the hydrocarbons people produce. Riding a bike is a simple way to improve the environment.

FREE BREAKFAST

All those who participate in Bike-to-Work Day, including those who walk, carpool or use low fuel vehicles (hybrids, motorcycles, etc.) for their commutes, and those who live within a mile or two of the work place will be honored with a light breakfast to be hosted on the patio outside Greg's office on the morning of Thursday, May 13th from 9:00 AM -10:00 AM.

Please RSVP with Patsy Garcia at PGarcia@LosGatosCA.gov or by calling (408) 354-6832 if you are planning on attending the breakfast.

Great American Litter

PICK UP

Saturday, May 8, 2010
Clean-up: 8:30 – 11:30 AM • Celebration: 12:00 – 1:00 PM

Help clean up litter in the City of Campbell. Register your family, friends, students or service club!
To register for this event, please call (408)866-2145, or visit our website at www.cityofcampbell.com

The City of Campbell's cleanup will focus on four locations: John D. Morgan Park, the freeway on and off ramps at Camden and Highway 17, along the railroad tracks adjacent to Winchester Boulevard, and the Creekside under crossing on the Los Gatos Creek Trail.

Rain or shine, volunteers will be asked to meet at the park at which time they will sign in and then disperse into groups. An agenda and instructions on safety and debris removal will be discussed. Gloves, vests and other tools will be provided.

Volunteers are encouraged to dress appropriately for the event.

Refreshments will be provided in the morning and the event will conclude with a lunch at noon at the park.

Schedule of Events:

Registration	**8:00 – 8:15 AM**	**John D. Morgan Park** **540 W. Rincon Avenue, Campbell**
Orientation	**8:15 – 8:30 AM**	**Welcome and Introductions, safety precautions, group assignments**
Disperse to Cleanup Sites	**8:30 – 11:30 AM**	**Pick up litter in designated areas**
Celebratory Lunch	**12:00 – 1:00 PM**	**Return to John D. Morgan Park, Closing Ceremonies**

For information online, please visit our website at www.cityofcampbell.com.

WEST VALLEY CLEAN WATER PROGRAM

C7egh Events

Car Wash using WVCWP CAR WASH KIT 7/26/09 Location: Del Taco Parking Lot, Campbell	Susan G. Komen Cancer "Walk for Life" organized this event; WVCWP supported the event by providing the Car Wash Kit to prevent runoff pollution.	This event was successful in that the organizers learned about use and benefits of the Car Wash Kit. In fact, the group returned in June 2010 to borrow the Kit again. All volunteers were receptive to using it. In addition, the Kit includes automatic hose shut-off nozzles, which help volunteers learn about water conservation. At the time this Car Wash event took place, no Copper or Car Wash outreach materials had been developed, so copper pollution education was conducted by WVCWP via 'word of mouth'. A Press Release for this event, and use of the Car Wash Kit, was issued by WVCWP. An article ran in the local weekly newspapers (see C.7.c "Media Relations", above). In addition to increasing public awareness, the Kit serves the very important function of keeping the wash water runoff from entering the stormdrain system.
Pollution Prevention Resource Fair Event at Campbell Community Center 9/23/09 Sponsored by City of Campbell, WVCWP and San Jose Environmental Service Dept. The event was open to any SC County residents, but much of the outreach was aimed at the WVC area.	The Fair provided a Thermometer Exchange, battery recycling, eyeglasses drop-off, cell-phone recycling, and medications disposal. WVCWP staffed a table and provided info on stormwater and pollution, especially mercury pollution (i.e. related to the thermometer and battery recycling opportuny). This event is aimed at local residents.	**150** residents attended (appx). Items collected & removed from the landfill stream: **242.5** lbs of pharmaceuticals (14.5 controlled, 228 non-controlled), **57** thermometers **18** cell phones **95.5 lbs** of batteries <u>Brochures & Giveaways Distributed:</u> • 99x - reusable bags. • 45x -- Native Seed Packets with Healthy Gardens: Naturally Managing Pests flyer • 30x -- /10 pollution prevention tri-fold with Watershed Watch Discount Card • 44x -- Fly Swatters • 18x -- Pest or Pal Activity guide • 14x -- Pests Bugging You?

C7egh Events

Thermometer Exchange Event at Saratoga Community Center 10/7/09 Sponsored by City of Saratoga, WVCWP and San Jose Environmental Service Dept. The event was open to any SC County residents, but much of the outreach was aimed at the WVC area.	This event provided a Thermometer Exchange, battery recycling, eyeglasses drop-off and cell-phone recycling. WVCWP staffed a table and provided info on stormwater and pollution, especially mercury pollution (i.e. related to the thermometer and battery recycling opportuny).The event was especially convenient for Senior Citizens whose 'Senior Center' is attached to the Community Center. This event is aimed at local residents.	This event was particularly successful with Saratoga's senior citizens; they appeared to be residents who had a number of glass thermometers that needed to be properly disposed of, and they appreciated the convenience of the location (attached to the Senior Center) and the chance to drop off household batteries at the same time. They did ask to have more chairs available for sitting, the next time this event is held. Event included opportunities for recycling: thermometers and batteries **126** people came to drop off their thermometers and receive some literature on pollution prevention, **216** mercury thermometers were collected, equating to **108** grams of mercury.
Thermometer Exchange Event at Los Gatos Farmers' Market; part of "Keep Los Gatos Beautiful" Month 4/11/10 Sponsored by Town of Los Gatos, WVCWP and San Jose Environmental Service Dept. The event was open to any SC County residents, but much of the outreach was aimed at the WVC area.	This event is aimed at local residents. WVCWP worked with SJ Env. Services Dept and Town of LG to arrange this event as part of "Keep Los Gatos Beautfiul Month". SJ ESD staff a table and provided info on stormwater and pollution, especially mercury pollution (i.e. related to the thermometer recycling opportuny).	**1** mercury thermometer was collected. Due to rainy weather at this outdoor event, it turned out to not be very productive. Extensive outreach/advertising had been conducted, and despite the rain at least 10 people stopped at the booth. WVCWP staff is exploring options for an indoor venue for FY 10-11. Materials distributed were: 10x - HHW Tri-fold 1x – Medication Disposal 1x - Seafood Watch Guide – Spanish 1x - Seafood Watch – Sushi Guid 1x – What You Don't Know About Mercury 8x – Grease Scrapers 4x – Grow It Guide 4x – 10 Most Wanted Bugs 1x – Wonder of our Water Works

Bike to Work Day May 13, 2010 Town of Los Gatos & City of Campbell Municipal offices	**Bike-to-Work Day** is an annual event held on the third Friday of May across the United States and Canada that promotes the bicycle as an option for commuting to work. WVC muni offices encourage people to try bicycle commuting as an alternative to driving, which can help reduced various forms of pollution, including copper pollution in waterways. The City of Campbell and the Town of Los Gatos promoted the event to staff, and to their general communities. Flyers were posted, and info appeared on municipal websites.	Town of Los Gatos had appx. 5 staff members who participated. Participants met at "Orchard City Green" (park) for remarks by the City CEO, and refreshments donated by the City Manager.
Car Wash using WVCWP CAR WASH KIT 6/26/10 Location: Del Taco Parking Lot, Campbell	Susan G. Komen Cancer "Walk for Life" organized this event; WVCWP supported the event by providing the Car Wash Kit to prevent runoff pollution.	This event was successful in that the organizers learned about use and benefits of the Car Wash Kit. This group had borrowed the Kit 11 months previously and chose to request it again. All volunteers were receptive to using it. In addition, the Kit includes automatic hose shut-off nozzles, which help volunteers learn about water conservation. In addition to increasing public awareness, the Kit serves the very important function of keeping the wash water runoff from entering the stormdrain system.

Coastal Cleanup Day 2009 9/19/09 San Tomas Aquino Creek @ Westmont High, Campbell Local site; part of County-wide effort and International event.	WVCWP has served as the sponsor for this Creek Cleanup site for a number of years. Outreach has been targeted at different groups, at different times – for example, Westmont High School students, Scout troops, and elementary school students. This event is aimed at local residents; WVCWP also targets schools and Scout troops during outreach.	Volunteers: 11 Trash collected: 330 Lbs. Recyclables: 90Lbs.

C7egh Events

City of Campbell Great American Pick-up 5/8/10	Campbell holds this event annually, and traditionally generates excellent community participation. For the 2010 event, 4 tasks were assigned: **Litter pickup** & graffiti removal from the undercrossing of Creekside of the Los Gatos Creek Trail **Litter pickup** at 3 other sites: • John D. Morgan Park • Hwy 17 from Camden on-ramp to Pedestrian over-crossing • railroad tracks along Winchester Blvd from Hacienda to Kennedy This event is aimed at Campbell residents. City of Campbell does extensive outreach to solicit residents to volunteer for this activity.	Volunteers: 100 Resutls: 29 partially-filled bags of recyclables 52 partially-filled bags of trash Participants chose to take: 8x – "Soil Matters" literature 10x – "Pests Bugging You" brochure 14x – "Clean-It Guides" 5x – "Mercury – What You Don't Know" brochures 42x – "Strip" thermometers 4x Copper Tri-fold w/Discount Card attached 20x "Original Pest Control" fly swatters 20x – "2000 Creek Cleanup" bandanas 12x – Lip Balm 35x – "Get the Scoop – Don't Pollute" pencils 3x – "Native Plants" seeds with "10 Most Wanted Bugs" brochure attached
National River Cleanup Day 2010 5/15/10 San Tomas Aquino Creek @ Westmont High, Campbell Local site; part of County-wide effort and National event.	WVCWP has served as the sponsor for this Creek Cleanup site for a number of years. Outreach has been targeted at different groups, at different times – for example, Westmont High School students, Scout troops, and elementary school students. For this event, outreach was focused on generating interest among families of students from a nearby elementary school (Marshall Lane).	Volunteers: 16 (8 of these were families associated with a local elementary school where the Zun Zun assembly was held on 12/10/09). Two sections of the creek were cleaned: 600 feet on two sides of the creek and another 300 feet on one side of the creek in a different direction. <u>Participants chose to take:</u> 5x – "You're the Solution to Water Pollution" brochures 10x – "Adopt a Creek" lanyards 9x - Re-usable bags (sponsored by Safeway) 10x – "Watershed Watch" tattoos

Program Details	Focus & Short Description	Number of Students/Teachers reached	Evaluation of Effectiveness
Creek Cleanup Prospect High School Saratoga 4/17/10 Saratoga Creek at Prospect Ave.	WVCWP and City of Saratoga staff organized this cleanup of a Saratoga 'Trash Hot Spot', located near Prospect High School. High School students were solicited for the cleanup; those that participated were every enthusiastic. 600 feet of creek bank, near the High School, were cleaned.	Participants: 11 Prospect High School students 1 Teacher WVCWP & City of Saratoga staff	WVCWP provided trash bags, gloves and litter grabbers for this event. Students handled monitoring tasks during cleanup. 14 partially-filled 30 gal. trash bags were collected. See "C.10 Trash" for details. Participants selected the following 'give-away items: • 5x "Your Copper & Your Creeks" tri-folds (with Car Wash Discount card) • 5x "Native Plants" seeds (with "10 Most Wanted" bug brochures attached) • 5x "Original Pest Control" Fly Swatters • 2x "Don't Litter" license plate covers
Creek Cleanup Sacred Heart School (K-8) Saratoga 5/5/10 Wildcat Creek at Saratoga Ave.,	WVCWP and a parent voluteer organized this cleanup of a Saratoga schoolyard and adjacent creek. WVCWP has traditionally worked with Sacred Heart School for a number of years.	Participants: Appx. 40 students 1 parent WVCWP staff	WVCWP provided trash bags, gloves and litter grabbers for this event. This event was very effective in that 40 students, from a small school, participated – which demonstrated a high level of interest. Students handled monitoring tasks. Results: 10 partially-filled bags of trash were collected. Results were: 20 lbs trash 5 lbs recyclables School yard and 0.5 - 0.75 miles of creek and creekbank were cleaned.

C7egh Events

Los Gatos Public Works Open House 5/19/10 (3rd Grade students attended) Town of Los Gatos Corporation Yard	At this annual event, the Town showcases Public Works activities, including stormdrain-related topics. School children are invited, and parents accompany them. WVCWP staff (2) provided stormwater pollution information, and performed hands-on demonstrations with the students, using the Enviroscape Watershed Model. The students learned about pollution from litter, pet waste, car washing, etc. – and learned about appropriate behaviors to help prevent pollution.	80 Third Grade students attended.	Attendees chose to take: 6x – "Naturally Managing Pests" IPM Fact Sheet 12x – Copper Tri-fold with Discount Card 9x – "Original Pest Control" fly swatter 40x – "Get the Scoop – Don't Pollute" pencils 40x – "Watershed Watch" tattoos This event was well-attended. Until a few years ago, LG staff took this program directly to the schools, but for the past several years the venue has been changed to recruit students to come to the Corp Yard itself. It is rewarding to see this many students make the effort to come to the site and attend the event.
Classroom outreach with Enviroscape St. Mary's School (K-8) downtown Los Gatos 5/20/10	WVCWP has given Enviroscape presentations to various classes at St. Mary's for a number of years. St. Mary's requested that WVCWP give a classroom presentation in May. This-presentation was given in support of a science unit. Last year WVCWP donate a book to the school "All the Way to the Ocean. Before the presentation began, the teacher read the book to each class, which provided background information relevant to the hands-on activity. The presentation covered the impact on watersheds of trash/litter/re-usable containers in lunches, pet waste, car washing, pesticides, vehicle fluids, etc. – and behavior changes to help prevent watershed pollution. WV CWP also brought litter grabbers; while one class was involved in the Enviroscape activity, the other class rotated outside to pick up litter and vice versa.	Presentation was given to 2 Kindergarten classes 28 Students 2 Teacjers 1 Parent	Having a relevant story read prior to the presentation was very effective for a Kindergarten class. The students loved the presentation and really knew the answer to the question "where does the water/pollution go?". The teachers also gave positive feedback, and stated they would like to continue to have WVCWP return each year, 28 "Watershed Puzzles Worksheets" were distributed to the students.

Creek Education program at Audubon Environmental Education Center, 3rrd Grade students Various dates in FY 09-10 MeClellan Ranch, McClellan Ave. at Stevens Creek, Cupertino	3rd Grade Storm Drain Pollution Prevention Program: Creek Education Field Trip City of Saratoga provides funding for students who are Saratoga residents, attending schools in adjoining districts, which participate in this education program. City of Saratoga provides funding for busing students from Blue Hills School; in addition, some Saratoga students attend other local schools, but funding for them is not requested from the City (some travel via car pool). This activity involves a ½ -day creek field trip to Stevens Creek at McClellan Ranch in Cupertino. City of Cupertino provides two docents for creek field trip. Messages include less-toxic pest control and litter prevention. Docents stress the importance of protecting the ecosystem and the habitat for all aquatic life. The field trip helps to encourages protection of habitat for these creatures.	In FY 09-10 student participation was: <u>Blue Hills School –</u> Saratoga residents: 64 students 14 parents <u>Meyerholz & Murdoch-Portal Schools combined:</u> <u>Saratoga residents:</u> 15 students (appx.) (Due to a scheduling conflict, students from <u>McCauliffe Elementary</u> were not able to attend this year).	More than 95% of the students are very enthusiastic about this trip. Students and the parents always are amazed at how much they have learned about the creek and how storm drains can affect creeks.. A large b/w picture for them to identify undesirable activity around storm drains in their neighborhood is distributed. They are encouraged to take this home and share it with their family. On the day of the trip a handout is sent home, with one more reminder about the correct way to dispose of light bulbs and batteries, so that these items do not end up polluting storm drains.

Attachment A-Department IPM Checklist and Plan Template 6
Attachment B- Monthly City Pesticide Use Record 7
Attachment C- Saratoga Contractor Monthly Pesticide Use Summary 8
Attachment D- Annual Department "IPM Plan" Report and Pesticide Inventory 9

Policy Statement

The City of Saratoga will carry out its pest management operations using reduced-risk IPM techniques to reduce or eliminate chemicals to the maximum extent. Chemicals will be used only as a last resort for pest management problems. Each department that applies pesticides will maintain an active IPM plan to ensure the long-term prevention or suppression of pest problems with minimum negative impact on human health, non-target organisms, and the environment.

The City will actively pilot non-toxic alternatives for structural and landscape pest control, seeking to use the most recent technology, best management practices, and least toxic methods for all pest control measures.

The City will use appropriate venues to educate staff and the public about its IPM commitment in an effort to role model less toxic approaches to structural and landscaping pest control.

Integrated Pest Management Plan

A. Restricted Chemicals

Pesticides are defined as: any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest. Pests can be insects, mice and other animals, unwanted plants (weeds), or fungi. The term pesticide applies to herbicides, fungicides, rodenticides, molluscicides and other substances used to control pests.

City employees and City contractors will not use the following pesticides: diazinon or chlorpyralid. Emergency applications may be authorized by the completion of a written request and approval by the Pest Control Advisor.

B. Annual Storage Inventory and Unwanted Chemical Disposal

An annual storage inventory will be conducted to remove and dispose of any chemicals that are unwanted or that are prohibited from City use by the IPM policy. These chemicals will be disposed through the City's Hazardous Waste Program.

C. Staff Education and Training

The City will provide City-wide IPM training. City staff who are not applying pesticides as part of their regular job will receive annual outreach from City staff about the City's IPM policy and appropriate procedures for controlling pests.

Applicator training and supervision: City staff who manage pest problems and who apply pesticides as part of their job must be trained according to Department of Pesticide Regulation as outlined in the California Code of Regulations Title 3, Division 6 for pesticide applicators and advisors. Annual "Integrated Pest Management" training will also be provided to all staff who apply any pesticides on the job.

D. Record Keeping and Annual Evaluation

All city staff who apply pesticides will maintain pest management and pesticide application records using the Monthly City Pesticide Use Record (Attachment B). Copies should be sent to the Department of Agriculture weights & measure Agricultural Commissioners Office. Contractors will also send copies of Monthly Contractor Pesticide Use Record (Attachment C) to the Department of Agriculture weights & measure Agricultural Commissioners Office. Pesticide use records will record the amount used, date and location of use, target pest, and biological and mechanical controls used. All records will be made available to the public upon request.

Annual Evaluation - Departments will provide the Environmental Programs Manager with an annual summary of pest management problems and an inventory of banned pesticides (Attachment D). Because this is a County-wide storm water permit requirement, the West Valley Clean Water Program will be responsible for consolidating the monthly use reports and preparing the annual report.

E. Public Outreach

The City will use appropriate opportunities to communicate with the public about IPM strategies and their benefits. Public outreach will include:

- IPM information provided to schools, residents, and businesses via special events, IPM workshops, advertisements, and point-of-sale (hardware and nurseries).

- Pesticide disposal options: Residential and business pesticide disposal options will be provided and promoted through the City's Household Hazardous Waste Program.

- All IPM and pesticide use records will be made available to the public within one week of request.

F. Contractor Compliance

Saratoga's contractors must follow all aspects of Saratoga's IPM Plan, including the restrictions contained in "A" above.

G. Department-Specific Components

Departments using pesticides will maintain site-specific plans. Each City Department applying pesticides (Public Works Department and Community Services Department) will develop an IPM plan (*Integrated Pest Management Plan*, Attachment A) which will outline pest management guidelines for the most persistent and frequent pests. The IPM Plans will:

- Use preventative maintenance and the most recent best management practices as a primary strategy to prevent key pests and thereby minimize the use of chemical pesticides.
- Establish inspection procedures for key pests to monitor pest population and tolerance levels based on the biological, aesthetic, and economic loss each site can tolerate, and set pest population levels at which corrective action should be taken.
- Use alternative control options such as (but not limited to): habitat management (changing the biological environment), maintenance practices (modifying watering, mulching, waste disposal), physical controls (mechanical removal, traps and barriers), biological controls (use of natural enemies), and re-design (modifying landscape design) to the maximum extent practical.
- Pilot and report on the results of new less-toxic measures for animal or plant pest control.

Attachment A

Department IPM Checklist: Also Reference Specific Pest Plans

IPM Requirements

Pesticide Use
The following pesticides are prohibited from use: diazinon and chlorpyralid.

Contractors
Contractors will comply with all elements of the City's pesticide plan and must make arrangements with Department staff for reporting.

Annual Responsibilities

Each Department who is responsible for pest management activities must complete or provide the following by February 1 each year:

- ☐ Review Department-level IPM plans for any updates, changes, and for evaluation from previous year.
- ☐ Complete the *Annual Department "IPM Plan" Report and Pesticide Inventory* (Attachment D) and provide to Environmental Programs Manager by February 1 of each year.
- ☐ Provide necessary staff training based on California State Code of Regulations, Title 3 and annual IPM training to City staff on seasonally relevant topics.
- ☐ Pilot new least-toxic IPM strategies.

On-Going Responsibilities

- ☐ Maintain and adhere to site specific IPM Plans using Attachment A-*IPM Plan Template.*
- ☐ Report all pesticide applications using Attachment B - *Monthly City Pesticide Record.* Route monthly to Environmental Programs Manager.
- ☐ Trial new least–toxic IPM strategies
- ☐ Submit California State Monthly Summary Pesticide Use reports to County Agricultural Department.

Attachment B

City of Saratoga Pesticide Use Record

Month_____ Year_____

A. List all total chemicals (including baits) and biological/mechanical (traps, hoeing, mulching, release of predator, landscape design controls, etc.) used during the previous month. Copies should be sent to the Environmental Programs Manager.

Date	Specific Location	Active Ingredient	TradeName/ EPA ID Number	Quantity of chemical used	Total gallons of mix used	Type of biological/mechanical control	Type of pest/weed targeted

Attachment C

Date: ***Company Name:*** ***Contact/Phone:***

City of Saratoga Contact:

Saratoga Contractor Monthly Pesticide Use Summary

Month_____ Year_____

1. **List all total chemicals (including baits) and biological/mechanical (traps, hoeing, mulching, release of predator, landscape design controls, etc.) used at each site serviced. Copies should be sent to the Environmental Programs Manager.**

Specific Location	**Active Ingredient**	**Trade Name/EPA #**	**Quantity**	**Biological/ Mechanical Control**	**Target Pest**

Attachment D

Department contact/ext: Date:

Annual Department "IPM Plan" Report and Pesticide Inventory

Please complete the following information and submit to the Environmental Programs Manager by February 1.

A. List all training attended that demonstrates compliance with city IPM training and state requirements. Include name and title of attendee, title and date of training, and brief description of training. Also describe any training needs/requests for the coming year.

B. List and describe the pest problem trends your Department dealt with this year, including peak season problems and non-chemical/structural/landscape solutions that were used.

C. Which IPM pesticide alternatives were considered and tested. Please explain the reason for their inclusion or rejection for City use.

D. List goal(s) for the following year.

Attachment D2

Annual Inventory

As part of a City-wide "house cleaning" and sweep for chemicals prohibited by the IPM policy, inventory chemicals in your storage areas and record and remove any of the following restricted pesticides: diazinon, chlorpyrifos, and chlorpyralid. List below any restricted pesticides which were found. Please write "none" if none were found.

Department	Storage Location	Chemical	Formulation	Amount (gallons, pounds)
				Total:

CITY OF SARATOGA – IPM IMPLEMENTATION

The City of Saratoga has been implementing a policy of 'turf reduction' as a means of decreasing use of herbicides.

In FY 08-09, at El Quito Park, 8699 sq. feet of turf was replaced with decomposed granite, which will result in less herbicide use, reduced mower emissions, and less potential runoff from irrigation. Estimated water savings are 107570 gallons (144 CCF) per year.

In FY 09-10 the following reductions in turf area were implemented:

TURF REDUCTION FY 09-10			
PARK	**sq ft of Turf Removed**	**Water Saved (per yr)**	**Replaced with:**
Brookglen	1,734	30,600 gallons	Wood Chip Mulch
Ravenwood	520	56,000	Wood Chip Mulch
Wildwood	1,628	Not Available	Wood Chip Mulch
Azule	1,327	64,800	Wood Chip Mulch
Gardiner	1,740	48,600	Wood Chip Mulch
Kevin Moran	14,110	Not Available	Wood Chip Mulch
Kevin Moran	1,742	Not Available	Wood Chip Mulch
Quito	9,442	96,720	Wood Chip Mulch
Foothill Park	13,058	102,600	Wood Chip Mulch

These reductions will result in decreased pesticide/herbicide use. Since much of Saratoga's herbicide use is via 'spot treatment', it is not possible to make a percentage estimate of the actual decrease in amount of pesticides used.

In addition, Saratoga has been applying IPM practices by undertaking changes in plantings and irrigation equipment. These are designed to reduce the need for pesticides through use of native and pest-resistant plants, and to reduce irrigation run-off by employing water-conserving irrigation systems.

Examples of this direction in IMP implementation are:

In FY 08-09, extensive renovations and upgrades at Kevin Moran Park included new plantings which have proven to be resistant to diseases and pests.

A number of medians also had plantings changed out with replacements that are disease/ pest resistant.

The City plants trees or photinia hedge along the fence-lines, which helps avoid having to spray for weeds along fences.

A number of new irrigation controllers have been installed, and are being connected to the City weather station for flexible run times based on the evapo-transpiration rate. The irrigation nozzles are also designed to prevent runoff. This focus on runoff prevention results in a greatly decreased chance of any pesticides (or fertilizers) reaching stormdrains and/or streams.

PESTICIDE USAGE REDUCTION MEASURES: PEST SPECIFIC

Campbell is implementing IPM in the following situations:

1) On-going - Yellowjackets:

Saratoga uses traps as the main means of control.

Parks staff cleans off picnic tables every Monday to prevent attracting wasps & ants. The Parks Dept. purchased and installed plastic tables which are easier to clean

2) On-going - Weeds:

Mulch is spread wherever possible for weed control, including medians. A landscape contractor also cuts roadside weeds, which helps to avoid applications of herbicides.

Hand hoeing/pulling of weeds is used where possible. Weekly walk-throughs with lots of hand weeding are done. Weeds are spot-sprayed, as opposed to blanket spraying of large areas; the emphasis is on catching the problem early to avoid having to spray larger areas later.

3) On-going - Rodents:

A contractor is engaged to trap rodents in order to avoid poisonous baits; this is done when there is an outbreak of a number of rodents at once.

RESULTS OF PESTICIDE USE REVIEW

The City is making an effort to stress prevention (prevent weed growth, prevent pest infestations) where possible. Saratoga is using IPM and engineered, rather than chemical, controls as much as possible given budget and staff limitations.

Over the past several years, the Public Works Dept. has worked on landscape design and improved irrigation systems which will reduce need for pesticide/herbicide use, and reduce any potential runoff which could carry pesticides. Natural insect controls include use of traps for wasp control, and soapy water for ant control. Through these types of efforts, Saratoga is progressively reducing chemical pesticide use.

FACILITIES MAINTENANCE

The City's Facilities Maintenance Dept. continues to avoid use of any pesticides, through stressing sanitation (prevention).

CITY OF SUNNYVALE CALIFORNIA

September 15, 2010

Mr. Bruce H. Wolfe
Executive Officer
San Francisco Bay Regional Water Quality Control Board
1515 Clay Street, Suite 1400
Oakland, CA 94612

Re: City of Sunnyvale FY 2009-2010 NPDES Stormwater Permit Annual Report

Dear Mr. Wolfe:

This letter and Annual Report with attachments is submitted by the City of Sunnyvale, pursuant to Permit Provision C.16.a of the Municipal Regional Stormwater NPDES Permit (MRP), Order R2-2009-0074, NPDES Permit No CAS612008 issued by the San Francisco Bay Regional Water Quality Control Board. The Annual Report provides documentation of activities conducted during FY 2009-2010 and consists of the following attachments:

A. Certification Statement
B. Annual Report Form
   - Table of Contents
   - Completed Annual Report Form: Sections 1-15
C. Appendix
   - Table of Contents
   - Appendices

Please contact Lorrie B. Gervin, Environmental Division Manager at (408) 730-7268 regarding any questions or concerns.

Sincerely,

Marvin A. Rose

Marvin A. Rose
Director of Public Works

Section 2 - Provision C.2 Reporting Municipal Operations

Program Highlights and Evaluation
Highlight/summarize activities for reporting year:

Summary:

Sunnyvale staff completed the information requested for the inventory of our two city-owned pump stations by March 1, 2010 and provided the information regarding the pump stations to Sue Ma, as requested via e-mail. Sunnyvale staff developed Standard Operating Procedures (SOPs) for dry-weather dissolved oxygen sampling and wet-weather monitoring at the two city-owned pump stations. These SOPs will be implemented in FY 10-11. A draft SOP for stormwater collection system screening to meet the requirements of Provision C.5 was developed and will be implemented in FY 10-11.

The Sunnyvale Corp Yard SWPPP has been in place since 1995 and the current version in use was revised in June 2006. The City will be reviewing it and revising it in FY 10-11, as needed.

Sunnyvale staff participated in the Program's Municipal Operations Ad Hoc Task Group (AHTG) and provided reviews and comments of the AHTG's work products, including dry and wet weather pump station sampling guidance. City staff also attended several of the BASMAA Municipal Operations Committee meeting and provided comments on its work products. Please see the C.2 Municipal Operations section of the Program's FY 09-10 Annual Report for a description of activities of the Municipal Operations AHTG and the BASMAA Municipal Operations Committee.

Training was conducted in the fall of 2009 to educate staff regarding polluted runoff prevention at worksites.

048629

C.2.a. ►Street and Road Repair and Maintenance

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of these BMPs were not adequately implemented during the reporting fiscal year then indicate so and provide explanation in the comments section below:

x	Control of debris and waste materials during road and parking lot installation, repaving or repair maintenance activities from polluting stormwater
x	Control of concrete slurry and wastewater, asphalt, pavement cutting, and other street and road maintenance materials and wastewater from discharging to storm drains from work sites.
x	Sweeping and/or vacuuming and other dry methods to remove debris, concrete, or sediment residues from work sites upon completion of work.

Comments:

Debris and waste materials are controlled from street maintenance activities and kept from storm drains at all worksites. Measures include covering and/or placing berms around storm drain inlets (DI's) during pavement maintenance. Debris is vacuumed and taken to the landfill. All trucks carry sand and silt sacks in case of accidental spills, so as to keep spilled materials out of storm drain inlets.

C.2.b. ►Sidewalk/Plaza Maintenance and Pavement Washing

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of these BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

x	Control of wash water from pavement washing, mobile cleaning, pressure wash operations at parking lots, garages, trash areas, gas station fueling areas, and sidewalk and plaza cleaning activities from polluting stormwater
x	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs

Comments:

Pedestrian over-crossings of roads are often cleaned using pressure washing. Debris and runoff are captured and vacuumed to keep them from entering the storm drain collection system. Areas are swept and debris collected and properly disposed of following the BMPs outlined in the City's Urban Runoff Management Plan Standard Operating Procedures.

For sidewalk and plaza maintenance, staff is currently following BASMAA Mobile Surface Cleaner Guidelines for pavement washing and is in the process of acquiring new equipment that will improve implementation of our BMPs for public areas maintenance.

048630

C.2.c. ►Bridge and Structure Maintenance and Graffiti Removal

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of these BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

NA	Control of discharges from bridge and structural maintenance activities directly over water or into storm drains
X	Control of discharges from graffiti removal activities
X	Proper disposal for wastes generated from bridge and structure maintenance and graffiti removal activities
X	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs for graffiti removal

Comments:

The City does not perform bridge or structural maintenance activities directly over water.

For other maintenance activities involving graffiti removal via power washing or other techniques that produces runoff, storm drain inlets are covered and/or bermed to prevent runoff entering storm system. Debris and runoff is vacuumed and swept up at all worksites and disposed of properly, following the BASMAA guidance and BMPs that are included in the City's SOPs for these activities.

C.2.d. ►Stormwater Pump Stations

Does your municipality own stormwater pump stations:	**X**	**Yes**		**No**

If your answer is **No** then skip to **C.2.e.**

(For FY 10-11Annual Report only) Complete the following table for dry weather DO monitoring and inspection data for pump stations[1] (add more rows for additional pump stations):

Pump Station Name and Location	**First inspection Dry Weather DO Data**		**Second inspection Dry Weather DO Data**	
	Date	**mg/L**	**Date**	**mg/L**
Not required for this Annual Report. Samples are being collected in FY 10-11				

(For FY 10-11Annual Report only) Summarize corrective actions as needed for DO monitoring at or below 3 mg/L. Attach inspection records of additional DO monitoring for corrective actions:

Summary: **Not required for this Annual Report. Sampling begins in FY 10-11 and will be reported then.**

Attachments:

[1] Pump stations that pump stormwater into stormwater collection systems or infiltrate into a dry creek immediately downstream are exempt from DO monitoring.

048631

(For FY 10-11Annual Report only) Complete the following table for wet weather inspection data for pump stations (add more rows for additional pump stations):

Pump Station Name and Location	**Date** (2x/year required)	**Presence of Trash** (Cubic Yards)	**Presence of Odor** (Yes or No)	**Presence of Color** (Yes or No)	**Presence of Turbidity** (Yes or No)	**Presence of Floating Hydrocarbons** (Yes or No)
Not required for this Annual Report.						

C.2.e. ►Rural Public Works Construction and Maintenance

Does your municipality own/maintain rural[2] roads:		**Yes**	X	**No**

If your answer is **No** then skip to **C.2.f**.

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

	Control of road-related erosion and sediment transport from road design, construction, maintenance, and repairs in rural areas
	Identification and prioritization of rural road maintenance based on soil erosion potential, slope steepness, and stream habitat resources
	No impact to creek functions including migratory fish passage during construction of roads and culverts
	Inspection of rural roads for structural integrity and prevention of impact on water quality
	Maintenance of rural roads adjacent to streams and riparian habitat to reduce erosion, replace damaging shotgun culverts and excessive erosion
	Re-grading of unpaved rural roads to slope outward where consistent with road engineering safety standards, and installation of water bars as appropriate
	Inclusion of measures to reduce erosion, provide fish passage, and maintain natural stream geomorphology when replacing culverts or design of new culverts or bridge crossings

Comments including listing increased maintenance in priority areas:

Based on the MRP definition of "Rural" in Footnote 2 below, the City of Sunnyvale does not have any rural roads to which the permit criteria outlined above apply. While portions of the Bay Trail found along the northern areas of the City's flood protection levees and Baylands Park do not meet the criteria for Rural Roads, we have implemented the Program's Rural Public Maintenance and Support

[2] Rural means any watershed or portion thereof that is developed with large lot home-sites, such as one acre or larger, or with primarily agricultural, grazing or open space uses.

048632

Performance Standards and associated BMPs for their maintenance since 2003. Staff continues to implement these standards for portions of the Bay Trail within Sunnyvale's jurisdiction. Parks maintenance staff attended the Program's "Rural Roads Maintenance BMPs workshop in September 2008 that was presented by Ledwith Watershed Services.

048633

C.2.f. ►Corporation Yard BMP Implementation

Place an **X** in the boxes below that apply to your corporations yard(s):

	We do not have a corporation yard
	Our corporation yard is a filed NOI facility and regulated by the California State Industrial Stormwater NPDES General Permit
X	We certify that we have a current **Stormwater Pollution Prevention Plan (SWPPP)** for the Corporation Yard(s)

Place an **X** in the boxes below next to implemented SWPPP BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

X	Control of pollutant discharges to storm drains such as wash waters from cleaning vehicles and equipment
X	Routine inspection prior to the rainy seasons of corporation yard(s) to ensure non-stormwater discharges have not entered the storm drain system
X	Containment of all vehicle and equipment wash areas through plumbing to sanitary or another collection method
X	Use of dry cleanup methods when cleaning debris and spills from corporation yard(s) or collection of all wash water and disposing of wash water to sanitary or other location where it does not impact surface or groundwater when wet cleanup methods are used
	Cover and/or berm outdoor storage areas containing waste pollutants

Comments:

The Corporation Yard has a wash rack area where debris and runoff from washing vehicles, sweepers, and lawn mowers is discharged to a filter and treated by an oil-water separator system prior to discharge to the sanitary sewer.

The fuel island is covered and the storage area for hazardous wastes/materials (flammables pavilion) is bermed and covered, as described in the Corp Yard SWPPP.

Outdoor storage areas in the southwest corner of the facility for non-hazardous materials (e.g., base rock, gravel, green waste, mulch, and material collected from street sweepers) were not bermed. The City is assessing the possibility of a capital project for the covering and/or berming of dry storage areas at the Corp Yard, but funding availability is an obstacle. In the meantime, the storm drain inlet (DI) near the storage areas is being protected by straw waddles and silt sacks/screens. During the rainy season, extra steps will be taken to ensure the runoff from the dry storage area will not enter the DI, including adding extra waddles near the storage area to supplement those adjacent to the DI.

048634

If you have a corporation yard(s) that is not an NOI facility , complete the following table for inspection results for your corporation yard(s) or attach a summary including the following information:

Corporation Yard Name	**Inspection Date** (1x/year required)	**Inspection Findings/Results**	**Follow-up Actions**
Sunnyvale Corp Yard	**10/26/09**	**Leaves present in storm drain inlets (DIs) (<1 cu ft.)**	**Leaves cleaned from DIs and properly disposed of.**
Sunnyvale Corp Yard	**3/29/10**	**Leaves present in DIs (<1 cu ft.); DIs in need of marking with "No Dumping Flows To Bay" message**	**Leaves removed from DIs and properly disposed of; all six (6) DIs marked (metal badges placed) with "No Dumping Flows To Bay" message.**

048635

Section 3 - Provision C.3 Reporting New Development and Redevelopment

C.3.a. ►New Development and Redevelopment Performance Standard Implementation Summary Report

(For FY 10-11Annual Report only) Provide a brief summary of the methods of implementation of Provisions C.3.a.i.(1)-(8).

Summary:

Not required for this Annual Report. However, the City has been implementing requirements of this provision:

- **The City currently has legal authority to implement C.3 provisions. We are in the process of amending SMC 12.60 to clarify new MRP requirements in our ordinance, remove those sections for alternative compliance that are no longer allowed, and to have adequate authority to implement the new requirements of the permit that become effective in 2011. Adoption by Council is expected in the fall of 2010.**
- **Staff has received training on the new permit requirements (5/19/10- Planning staff meeting, 6 attending and SCVURPPP training, 2 attending). One planner also attended LID training on 4/23/10 and information was relayed back to planners.**
- **The City developed a new flyer prior to May 1, 2010, to be provided at the front counter for all projects subject to the planning review process. The flyer provides information about site design measures in Provision C.3.a (6 & 7).**

C.3.b. ►Green Streets Status Report

(All projects to be completed by December 1, 2014)

On an annual basis (if applicable), report on the status of any pilot green street projects within your jurisdiction. For each completed project, report the capital costs, operation and maintenance costs, legal and procedural arrangements in place to address operation and maintenance and its associated costs, and the sustainable landscape measures incorporated in the project including, if relevant, the score from the Bay-Friendly Landscape Scorecard.

Summary:

Please see the C.3 New Development and Redevelopment section of Program's FY 09-10 Annual Report for a description of activities of the C3PO AHTG Green Streets Work Group and the BASMAA Development Committee.

C.3.b.v.(1) ►Regulated Projects Reporting Table

Fill in attached table **C.3.b.v.(1)** or attach your own table including the same information

Please see Attached Table C.3.b.v (1) Regulated Projects Reporting Table at the end of this section.

048636

C.3.h.iv. ► Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

(1) Fill in attached table **C.3.h.iv.(1)** or attach your own table including the same information.

Please see attached table C.3.h.iv (1) Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting Table at the end of this section.

(2) On an annual basis, provide a discussion of the inspection findings for the year and any common problems encountered with various types of treatment systems and/or HM controls. This discussion should include a general comparison to the inspection findings from the previous year.

In general, inspection findings indicate a common problem with the inspection of installed vault based treatment systems in that most facilities are still not aware of the maintenance and documentation requirements. This is consistent with last year's findings in that initial inspections are typically more educational in nature to ensure that the facility operator is aware of the requirements, and to establish the required maintenance program including documented inspections and clean out activities. No other typical problems were encountered.

(3) On an annual basis, provide a discussion of the effectiveness of the O&M Program and any proposed changes to improve the O&M Program (e.g., changes in prioritization plan or frequency of O&M inspections, other changes to improve effectiveness program).

In accordance with MRP provision C.3.h.ii.(6), Sunnyvale Environmental Division and Community Development Department have incorporated the following elements into our prioritized inspection plan for each year:

(a) Building Division inspectors will perform inspection of all newly installed stormwater treatment systems and HM controls within 45 days of installation to ensure approved plans have been followed.

(b) The Pretreatment Program will perform Operation and Maintenance Verification Inspections of installed stormwater treatment systems and HM controls. Each fiscal year, Pretreatment will inspect at least 20% of the total number (at the end of the preceding fiscal year) of installed stormwater systems.

(c) Each fiscal year, Pretreatment will inspect at least 20% of the total number (at the end of the preceding fiscal year) of installed vault based systems; and

(d) All installed stormwater treatment systems will be inspected by Pretreatment at least every five years.

In addition, Environmental Division Inspectors will continue to attend training, as it becomes available. This year, one inspector attended the Annual SCVUPRRR C3 Training held in June 2010. One inspector also attended several sessions regarding "Stormwater Treatment 101" and "Stormwater Issues" at the Annual CWEA P3S Conference held March 1-3, 2010.

The City will continue to evaluate ways to coordinate C3 requirements and internal processes to ensure compliance with data collection and reporting requirements.

048637

C.3.b.v.(1) ►Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Project Location[3], Street Address	Name of Developer	Project Phase No.[4]	Project Type & Description[5]	Project Watershed[6]	Total Site Area (Acres)	Total Area of Land Disturbed (Acres)	Total New and/or Replaced Impervious Surface Area[7] (ft^2)	Total Pre-Project Impervious Surface Area[8] (ft^2)	Total Post-Project Impervious Surface Area[9] (ft^2)
Private Projects										
2009-0896	590 Old San Francisco Road	Old San Francisco Road, LLC	N/A	Redevelopment of existing commercial center.	Sunnyvale East Channel	30,100 sf (0.7 acres)	30,100 sf (0.7 acres)	23,680 sf	23,680 sf	23,680 sf
Public Projects										
No regulated projects approved in FY 09-10.										

[3] Include cross streets
[4] If a project is being constructed in phases, use a separate row entry for each phase.
[5] Project Type is the type of development (i.e., new and/or redevelopment). Example descriptions of development are: 5-story office building, residential with 160 single-family homes with five 4-story buildings to contain 200 condominiums, 100 unit 2-story shopping mall, mixed use retail and residential development (apartments), industrial warehouse.
[6] State the watershed(s) that the Regulated Project drains to. Optional but recommended: Also state the downstream watershed(s).
[7] State both the total new impervious surface area and the total replaced impervious surface area, as applicable.
[8] For redevelopment projects, state the pre-project impervious surface area.
[9] For redevelopment projects, state the post-project impervious surface area.

048638

C.3.b.v.(1) ►Regulated Projects Reporting Table (part 2) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Status of Project[10]	Source Control Measures[11]	Site Design Measures[12]	Treatment Systems Approved[13]	Operation & Maintenance Responsibility Mechanism[14]	Hydraulic Sizing Criteria[15]	Alternative Compliance Measures[16/17]	Alternative Certification[18]	HM Controls[19/20]
Private Projects									
2009-0896	Submittal: 11/19/08 Complete: 1/6/10 Approved: 1/27/10	Beneficial Landscaping; Covered Dumpster Area	Disconnect Downspouts	Bioretention area, vegetated bioswale	As per Sunnyvale Municipal Code (12.60.200) and submittal of Final Stormwater Management and Maintenance Plan included in approved construction drawings.	Flow (2.c) The flow of runoff resulting from a rain event equal to at least 0.2 inches per hour intensity.	Not Applicable	Third party certification of design flow (C.3.d) to be done during building permit review and before building permit is issued.	Not Applicable
Public Projects									
No regulated projects approved in FY 09-10.									

[10] For private projects, state project application submittal date; application deemed complete date; and, final discretionary approval date. For public projects, state plans and specifications approval date.
[11] List source control measures approved for the project. Examples include: properly designed trash storage areas; storm drain stenciling or signage; efficient landscape irrigation systems; etc.
[12] List site design measures approved for the project. Examples include: minimize impervious surfaces; conserve natural areas, including existing trees or other vegetation, and soils; construct sidewalks, walkways, and/or patios with permeable surfaces, etc.
[13] List all approved stormwater treatment system(s) to be installed onsite or at a joint stormwater treatment facility (e.g., flow through planter, bioretention facility, infiltration basin, etc.).
[14] List the legal mechanism(s) (e.g., O&M agreement with private landowner; O&M agreement with homeowners' association; O&M by public entity, etc…) that have been or will be used to assign responsibility for the maintenance of the post-construction stormwater treatment systems.
[15] See Provision C.3.d. "Numeric Sizing Criteria for Stormwater Treatment Systems" for list of hydraulic sizing design criteria (i.e., 1.a., 1.b., 2.a., 2.b., 2.c., or 3)
[16] For Alternative Compliance at an offsite location in accordance with Provision C.3.e.i.(1), on a separate page, give a discussion of the alternative compliance site including the information specified in Provision C.3.b.v.(1)(m)(i) for the offsite project.
[17] For Alternative Compliance by paying in-lieu fees in accordance with Provision C.3.e.i.(2), on a separate page, provide the information specified in Provision C.3.b.v.(1)(m)(ii) for the Regional Project.
[18] Note whether a third party was used to certify the project design complies with Provision C.3.d.
[19] If HM control is not required, state why not.
[20] If HM control is required, state control method used (e.g., method to design and size device(s) or method(s) used to meet the HM Standard, and description of device(s) or method(s) used, such as detention basin(s), biodetention unit(s), regional detention basin, or in-stream control).

048639

C.3.h.iv. ►Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

Fill in table **below** or attach your own table including the same information.

APN # for Facility/ Site Inspected and Location	Party Responsible[21] For Maintenance	Date of Inspection	Type of Inspection[22]	Type of Treatment/HM Control(s) Inspected[23]	Inspection Findings or Results[24]	Enforcement Action Taken[25]	Comments
201-22-010/ 707 S. Mathilda Avenue Classics at Las Palmas Park	HOA / Derek Pater	6/22/2010	Routine	Vegetated Swale	No Visible/Apparent Problems	None	
201-22-010 / 707 S. Mathilda Avenue Classics at Las Palmas Park	HOA / Derek Pater	6/22/2010	Routine	Hydrodynamic Separators	Other	None	Maintenance records needed, follow up needed to obtain required documentation.
201-22-010/ 707 S. Mathilda Avenue Classics at Las Palmas Park	HOA / Derek Pater	6/22/2010	Routine	Infiltration Basin	No Visible/Apparent Problems	None	
323-30-055/ 1485 Yukon Drive Classics at Sunnyvale Manor	HOA / Theodore Iacob	6/23/2010	Routine	Hydrodynamic Separators	Other	None	Maintenance records needed, follow up needed to obtain required documentation.
323-30-055 / 1485 Yukon Drive Classics at Sunnyvale Manor	HOA / Theodore Iacob	6/23/2010	Routine	Infiltration Basin	No Visible/Apparent Problems	None	
201-22-016/ 398 W. El Camino Real Cherry Glenn Plaza	Paul Biagini	6/18/2010	Routine	Vegetated Swale	No Visible/Apparent Problems	None	

[21] State the responsible operator for installed stormwater treatment systems and HM controls.
[22] State the type of inspection (e.g., annual, follow-up, spot, etc.).
[23] State the type(s) of treatment systems inspected (e.g., bioretention facility, flow-through planter, infiltration basin, etc…) and the type(s) of HM controls inspected, and indicate whether the treatment system is an onsite, joint, or offsite system.
[24] State the inspection findings or results (e.g., proper installation, improper installation, proper O&M, immediate maintenance needed, etc.).
[25] State the enforcement action(s) taken, if any, as appropriate and consistent with your municipality's Enforcement Response Plan.

048640

APN # for Facility/ Site Inspected and Location	Party Responsible[26] For Maintenance	Date of Inspection	Type of Inspection[27]	Type of Treatment/HM Control(s) Inspected[28]	Inspection Findings or Results[29]	Enforcement Action Taken[30]	Comments

048644

Section 4 – Provision C.4 Industrial and Commercial Site Controls

C.4.a.ii ► Legal Authority

(For FY 09-10 Annual Report only) Do you have adequate legal authority to obtain effective stormwater pollutant control on industrial sites?	X	**Yes**		**No**
If **No**, explain:				

C.4.c.ii.(5) ► Enforcement Response Plan

(For FY 09-10 Annual Report only) Have you developed and implemented an Enforcement Response Plan by April 1, 2010?	X	**Yes**		**No**
If **No**, explain:				

Program Highlights

Provide background information, highlights, trends, etc. For FY 09-10 Annual Report describe steps taken to revise your program to meet new data tracking and reporting requirements.

- **Sunnyvale currently has legal authority to obtain stormwater pollutant control on industrial sites. However, to effectively and clearly maintain stormwater pollutant control at industrial sites and to maintain clear consistency with the MRP, significant progress has occurred during FY 09-10 to update and revise Sunnyvale Municipal Code (SMC) Chapter 12.60 The revised SMC Chapter 12.60 will be going to Council for adoption in the fall of 2010.**
- **An Enforcement Response Plan was in place prior to April 1, 2010. However, to clarify and better track enforcement responses per the MRP, revisions to the existing plan were approved on 5/14/10 by the Environmental Division Manager. It is anticipated that additional revisions to the ERP will occur in FY 10-11, once additional enforcement tools become available after amendments to the Sunnyvale Municipal Code Chapter 12.60 are adopted by Council.**
- **Sunnyvale updated its Business Inspection Plan to include prioritization criteria, facilities lists, and inspection procedures. The Business Inspection Plan will be updated as needed in the future for consistency with the upcoming revisions to SMC Chapter 12.60**
- **In addition, the Sunnyvale Commercial Database has been modified to maintain all of the required recordkeeping data, as well as generate the required reporting data.**
- **The City completed 360 Industrial/Commercial inspections during the reporting period; 37 verbal warnings and 10 warning notices were issued for a total of 47 enforcement actions.**
- **Staff attended stormwater training at the CWEA annual P3S conference as well as Provision C.3-related training in FY 10-11. SCVURPPP/BASMAA developed training on Industrial/Commercial Pollutants of Concern (PCBs, Mercury, and Copper) was received in July 2010.**
- **Sunnyvale has actively participated in the SCVURPPP IND-IDDE Ad-Hoc Task Group (IND-AHTG). The Task Group facilitated the development of regional standard stormwater facility category types that will be used in data tracking and reporting**

048645

applications. Sunnyvale has updated all stormwater inspection forms to include all information required for recordkeeping in Provision C.4.b.ii.(6) and C.4.c.ii.(4).

- **Please see the C.4. Industrial and Commercial Site Controls section of the Program's FY 09-10 Annual Report for a description of activities of the IND/IDDE AHTG and the BASMAA Municipal Operations Committee.**

C.4.b.i. ► Business Inspection Plan

(For FY 09-10 Annual Report only) Do you have a Business Inspection Plan?	X	Yes		No

If No, explain:

C.4.b.iii.(1) ► Potential Facilities List

List below or attach your list of industrial and commercial facilities in your Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.

The Sunnyvale Commercial Database maintains the list of facilities in our Inspection plan. See Appendix 4-1: C.4.b.iii (1) Potential Facilities List for the current facilities listed in the database.

C.4.b.iii.(2) ►Facilities Scheduled for Inspection

List below or attach your list of facilities scheduled for inspection during the current fiscal year.

See Appendix 4-2: C.4.b.iii (2) Facilities Scheduled for Inspection in FY 10-11.

C.4.c.iii.(1) ►Facility Inspections

Fill out the following table or attach a summary of the following information.

	Number	Percent
Number of businesses inspected (if known)	**357**	
Total number of inspections conducted	**360**	
Violations issued (excluding verbal warnings)	**10**	
Sites inspected in violation	**6**	**1.7%**
Violations[1] resolved within 10 working days or otherwise deemed resolved in a longer but still timely manner	**8**	**80%**

[1] Total number of violations equals the number of initial enforcement actions (i.e. one violation issued for several problems during an inspection at a site). It does not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

048646

C.4.c.iii.(2) ►Frequency and Types/Categories of Violations Observed

Fill out the following table or attach a summary of the following information.

Type/Category of Violations Observed	Number of Violations
Actual discharge (e.g. non-stormwater discharge)	5
Potential discharge (e.g. BMPs not in place or ineffective)	5

C.4.c.iii.(2) ►Frequency and Type of Enforcement Conducted

Fill out the following table or attach a summary of the following information.

	Enforcement Action (as listed in ERP)[1]	Number of Enforcement Actions Taken	% of Enforcement Actions Taken[2]
Level 1	**Verbal Warning**	**37**	**79%**
Level 2	**Warning Notice**	**10**	**21%**
Level 3	**Notice of Violation**	**0**	**0%**
Level 4	**Administrative Order/ Penalty**	**0**	**0%**
Total		**47**	

Notes:
[1]Agencies to list specific enforcement actions as defined in their ERPs.
[2]Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

C.4.c.iii.(3) ►Types of Violations Noted by Business Category

Fill out the following table or attach a summary of the following information.

Business Category[1]	Actual Discharge Violations	Potential Discharge Violations
Domestic	**1**	
Food Service	**4**	**4**
Permitted		**1**

Notes:
[1] List your Program's standard business categories.

048647

C.4.c.iii.(4) ►Non-Filers

List below or attach a list of the facilities required to have coverage under the Industrial General Permit but have not filed for coverage:

No industries were identified during inspections this fiscal year that were required to have coverage under the Industrial General Permit that did not already have coverage.

C.4.d.iii ►Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
Pollutants of Concern IND training.	7/12/10	Identifying pollutants of concern at commercial and industrial stormwater inspections, PCBs, Copper, Mercury.	5	100%
SCVURPPP- Complying with New Stormwater Requirements for New & Redevelopment Projects	6/8/10	Review of new requirements for development projects and LID measures.	1	20%
CWEA Annual P3S Conference	March 1-3, 2010	U.S. EPA and SWRCB Updates, MS4 Permit Trends, Stormwater enforcement case study, Stormwater Treatment 101	1	20%

048648

Section 5 – Provision C.5 Illicit Discharge Detection and Elimination

C.5.a.ii ► Legal Authority

(For FY 09-10 Annual Report only) Do you have adequate legal authority to prohibit and control illicit discharges and escalate stricter enforcement to achieve expedient compliance?	X	Yes		No

If **No**, explain:

C.5.b.ii.(4) ► Enforcement Response Plan

(For FY 09-10 Annual Report only) Have you developed and implemented an Enforcement Response Plan by April 1, 2010?	X	Yes		No

If **No**, explain:

Program Highlights

Provide background information, highlights, trends, etc. For FY 09-10 Annual Report describe steps taken to revise your program to meet new data tracking and reporting requirements.

Below is a summary of activities for the reporting year conducted by Sunnyvale:

- **The City currently has adequate legal authority. However, significant progress has occurred during FY 09-10 to update and revise Sunnyvale Municipal Code (SMC) Title 12.60 to more effectively and clearly control and enforce illicit discharges and connections to stormwater collection systems, and to maintain clear consistency with the MRP. The revised Chapter 12.60 will be going to Council for adoption in the fall of 2010.**
- **An existing Enforcement Response Plan was in place prior to April 1, 2010. However, to clarify and better track enforcement responses per the MRP, revisions to the existing plan were approved on 5/14/10 by the Environmental Division Manager. It is anticipated that additional revisions to the ERP will occur in FY 10-11, once additional enforcement tools become available after revisions to the Sunnyvale Municipal Code Chapter 12.60 are adopted by Council.**
- **The City of Sunnyvale has updated its IDDE database, complaint, and inspection forms to more efficiently capture all required data and reporting information. In addition, as part of the development and implementation of the IND / IDDE Enforcement Response Plan, the Environmental Division has developed a way to coordinate with the Department of Public Safety (DPS) in order to track responses by DPS to off-hours incidents of illegal dumping or discharges that are non-emergency in nature. This allows for the appropriate follow up and response, including education and / or enforcement for discharges that may not have been previously tracked or recorded.**
- **Maps(s) of the MS4 publicly were made available by July 1, 2010. See City's website at http://sunnyvale.ca.gov/Departments/PublicWorks/Sewers/StormDrains.aspx to view a map of the City's storm drain collection system. A copy of the Oakland Museum Maps that also shows the City's collection system distributed on three different**

048649

watershed maps is available from the Program's website at www.scvurppp.org .

- Sunnyvale began developing a collection system screening program in FY 09-10 that will be initiated in the dry season of FY 10-11. Results of the inspection system screening will be reported in FY 10-11.
- Sunnyvale staff participated in the Program's IND/IDDE Ad Hoc Task Group (AHTG) and reviewed/provided input on AHTG products, including collection system screening program guidance.
- Sunnyvale staff attended several of the BASMAA Municipal Operations Committee meetings and provided comments/input on work products of the group. See the C.5 Illicit Discharge Detection and Elimination section of Program's FY 09-10 Annual Report for description of activities of the IND/IDDE AHTG and the BASMAA Municipal Operations Committee.

C.5.c.iii ►Complaint and Spill Response Phone Number and Spill Contact List

List below or attach your complaint and spill response phone number and spill contact list.

Contact	Description	Phone Number
See Appendix 5-1: C.5.c.iii Complaint and Spill Response Phone Number and Spill Contact List		

C.5.d.iii ►Evaluation of Mobile Business Program

Describe implementation of minimum standards and BMPs for mobile businesses and your enforcement strategy. This may include participation in the BASMAA Mobile Surface Cleaners regional program or local activities.

Sunnyvale currently addresses mobile businesses by responding to any complaints/observations of illicit discharges on an as needed basis and shares the BMPs recommended by the BASMAA Mobile Surface Cleaners Program with those that we encounter. In addition, Sunnyvale has a practice of recommending certified Mobile Surface Cleaners.

The City rarely hires contractors to perform outdoor surface cleaning. City staff in the Community Services Department (Parks) has training plans for FY 10-11 that include taking the BASMAA Mobile Surface cleaner training program. They currently implement the standard operating procedures that are in place in the City's Urban Runoff Management Plan which, incorporate the BMPs identified in the BASMAA program.

For additional information, see the C.5 Illicit Discharge Detection and Elimination section of Program's FY 09-10 Annual Report for a description of efforts by the IND/IDDE AHTG and the BASMAA Municipal Operations Committee to address mobile businesses.

048650

C.5.e.iii ►Evaluation of Collection System Screening Program

Provide a summary or attach a summary of your collection screening program, a summary of problems found during collection system screening and any changes to the screening program this FY.

Description:

A formal screening program using the guidance from the USEPA/Center for Watershed Protection publication *Illicit Discharge Detection and Elimination: A Guidance Manual for Program Development and Technical Assessment* has not been fully implemented as of June 30, 2010. A Standard Operating Procedures (SOP) for the Collection System Screening Program, including changes to the existing Storm Drain Inlet (SDI) inspection form and adding a new outfall inspection form and procedures have been developed and will be used for SDI cleaning/inspections starting in FY 10-11. Implementation of the SOP for dry – weather monitoring of outfalls will also begin in FY 10-11. Data collected during the FY 10-11 collection system screening inspections will be reported in that year's annual report.

Sunnyvale staff has been participating in the Program's IND/IDDE Ad Hoc Task Group (AHTG) to assist in the development of collection system screening program guidance to be implemented in FY 10-11. See section C.5 of the Program's IND/IDDE section of the FY 09-10 Annual Report for a description of all the activities of the AHTG.

Currently, Field Services staff notifies IDDE inspection staff if they find a suspicious discharge in Storm Drain Inlets (SDIs) when they perform their annual cleaning activities before the beginning of the wet season. IDDE inspectors follow up and report on results as IDDE incidents in the annual report.

Public Works Field Services staff, as well as Parks workers receive annual training and a copy of the Illicit Discharge to Storm Drains Response card for them to keep in their vehicles or at job sites. The cards provide examples of what to look for and contact information if they observe a problem discharge to the SDIs.

C.5.f.iii.(1), (2), (3) ►Spill and Discharge Complaint Tracking

Spill and Discharge Complaint Tracking (fill out the following table or include an attachment of the following information)

	Number	Percentage
Discharges reported (C.5.f.iii.(1))	**31**	
Discharges reaching storm drains and/or receiving waters (C.5.f.iii.(2))	**8**	**26%**
Discharges resolved in a timely manner (C.5.f.iii.(3))	**29**	**93%**

048651

C.5.f.iii.(4) ►Summary of major types of discharges and complaints

Provide a narrative or attach a table and/or graph. **See Table Below:**

Category Name	Number of Complaints
Paint	**7**
Misc. Incident	**4**
Equipment Cleaning	**3**
Un-Hardened Concrete	**2**
Tracking Soil	**2**
Saw Cutting Slurry	**2**
Sanitary Spill	**2**
Pools/Spas/Fountains	**2**
Dumpster Discharge	**2**
Vehicle and Equipment Leaking	**1**
Surface Cleaning	**1**
Landscaping Material	**1**
Dumping, Non-hazardous	**1**
Carpet Cleaning	**1**

048652

Section 6 – Provision C.6 Construction Site Controls

C.6.a.iii ► Legal Authority

(For FY 09-10 Annual Report only) Is your agency's legal authority adequate for C.6 compliance?	X	Yes		No
If **No**, explain:				

C.6.b.ii.(3) ► Enforcement Response Plan

(For FY 09-10 Annual Report only) Was your Enforcement Response Plan developed and implemented by April 1, 2010?	X	Yes		No
If **No**, explain:				

C.6.e.iii.1.a, b, c ►Site/Inspection Totals

Number of sites disturbing < 1 acre of soil requiring storm water runoff quality inspection (i.e. High Priority) (C.6.e.iii.1.a)	**Number of sites disturbing ≥ 1 acre of soil** (C.6.e.iii.1.b)	**Total number of storm water runoff quality inspections conducted** (C.6.e.iii.1.c)
Private Projects:		
0	**9**	**78**
Public Projects:		
18	**0**	**18**

048653

C.6.e.iii.1.d ►Construction Activities Storm Water Violations		
BMP Category	**Number of Violations[1]**	**% of Total Violations[2]**
Private Projects:		
Erosion Control	**9**	**13%**
Run-on and Run-off Control	**6**	**8%**
Sediment Control	**15**	**21%**
Active Treatment Systems	**0**	**0%**
Good Site Management	**38**	**53%**
Non Stormwater Management	**4**	**6%**
Total	**72**	**100%**
Public Projects:		
Erosion Control	**1**	**10%**
Run-on and Run-off Control	**3**	**30%**
Sediment Control	**3**	**30%**
Active Treatment Systems	**0**	**0%**
Good Site Management	**3**	**30%**
Non Stormwater Management	**0**	**0%**
Total	**10**	**100%**

Notes:

[1]Count one violation in a category for each site and inspection regardless of how many violations/problems occurred in the BMP category.

[2]Percentage calculated as number of violations in each category divided by total number of violations in all six categories.

048654

C.6.e.iii.1.e ►Construction Related Storm Water Enforcement Actions

	Enforcement Action (as listed in ERP)[1]	Number Enforcement Actions Taken	% Enforcement Actions Taken[2]
Private Projects:			
Level 1	**Notice of Correction**	**54**	**95%**
Level 2	**Notice of Violation**	**2**	**4%**
Level 3	**Stop Work Order**	**1**	**1%**
Level 4	**Administrative Actions**	**0**	**0%**
Total		**57**	**100%**
Public Projects:			
Level 1	**Notice of Correction**	**4**	**66%**
Level 2	**Notice of Violation**	**2**	**34%**
Level 3	**Stop Work Order**	**0**	
Level 4	**Administrative Actions**	**0**	
Total		**6**	**100%**

Notes:
[1]Agencies should list the specific enforcement actions as defined in their ERPs.
[2]Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

C.6.e.iii.1.f, g ►Illicit Discharges

	Number
Private Projects:	
Number of illicit discharges, actual and those inferred through evidence (C.6.e.iii.1.f)	**1**
Number of sites with discharges, actual and those inferred through evidence (C.6.e.iii.1.g)	**1**
Public Projects:	
Number of illicit discharges, actual and those inferred through evidence (C.6.e.iii.1.f)	**0**
Number of sites with discharges, actual and those inferred through evidence (C.6.e.iii.1.g)	**0**

048655

C.6.e.iii.1.h, i ►Violation Correction Times

	Number	Percent
Private Projects:		
Violations fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii.1.h)	70	97%[2]
Violations not fully corrected within 30 days after violations are discovered (C.6.e.iii.1.i)	2	3%[3]
Total number of violations for the reporting year[1]	72	100%
Public Projects:		
Violations fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii.1.h)	6	100%
Violations not fully corrected within 30 days after violations are discovered (C.6.e.iii.1.i)	0	0%
Total number of violations for the reporting year[1]	6	100%

Notes:

[1]Total number of violations equals the number of initial enforcement actions (i.e. one violation issued for several problems during an inspection at a site). It does not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

[2]Calculated as number of violations fully corrected in a timely period after the violations are discovered divided by the total number of violations for the reporting year.

[3]Calculated as number of violations not fully corrected within 30 days after the violations are discovered divided by the total number of violations for the reporting year.

C.6.e.iii.(2) ►Evaluation of Inspection Data

Describe your evaluation of the tracking data and data summaries and provide information on the evaluation results (e.g., data trends, typical BMP performance issues, comparisons to previous years, etc.).

Description:

Private Projects:

Staff began using the new site inspection form in March 2010 when they became available. All of the data collected in 09-10 reporting year was included in the electronic tracking system. Not all data were available for this report because some information was not previously tracked on the construction inspection forms prior to MRP adoption.

Public Projects:

Staff began using the new site inspection forms in March 2010 when they became available. The data shows the level of violations on the City's Public projects. Two thirds of these violations were Level 1 and were addressed after verbal directions. Overall, contractors worked closely with the City's inspectors to ensure compliance with the stormwater pollution prevention requirements. Comparisons with last year's data will not be feasible, since this is the first year of collecting such data.

048656

C.6.e.iii.(2) ►Evaluation of Inspection Program Effectiveness

Describe what appear to be your program's strengths and weaknesses, and identify needed improvements, including education and outreach.

Description:

Private Projects:

The City's Community Development Department/ Building Safety Division performed the following actions in FY 09-10:

1) Revised storm water construction inspection forms and inspection data tracking;

2) Developed electronic tracking system;

3) Revised operating procedures and provided training to all inspectors on new requirements;

4) Began using the new inspection forms in March 2010;

5) Participated in the Program's Construction AD Hoc Task Group (AHTG) and reviewed AHTG products, including a template construction inspection form, an inspection data tracking spreadsheet, and guidance for identifying high priority sites.;

6) Started using the Stormwater Best Management Practices Handbook Portal for Construction. See also the C.6 Construction Site Control section of the Program's FY 09-10 Annual Report for a description of the activities of the SCVURPPP Construction AHTG and the BASMAA Development Committee.

The City will continue staff training on the ERP and inspection/enforcement per the ERP process in FY 10-11. Revisions to the "Blueprint for a Clean Bay" guidance from BASMAA will be included as outreach to contractors once they become available.

Public Projects:

Public Works Department/ Engineering Services Division performed the following actions in FY 09-10:

1) Revised storm water construction inspection forms and inspection data tracking;

2) Developed electronic tracking system;

3) Revised operating procedures and provided training to all inspectors on new requirements;

4) Began using the new inspection forms in March 2010;

5) Participated in the Program's Construction AD Hoc Task Group (AHTG) and reviewed AHTG products, including a template construction inspection form, an inspection data tracking spreadsheet, and guidance for identifying high priority sites.;

6) Started using the Stormwater Best Management Practices Handbook Portal for Construction. See also the C.6 Construction Site Control section of the Program's FY 09-10 Annual Report for a description of the activities of the SCVURPPP Construction AHTG and the BASMAA Development Committee.

The City will continue staff training on the ERP and inspection/enforcement per the ERP process in FY 10-11. Revisions to the Public Works Storm Water Pollution Prevention Specifications will be included in future Capital Improvement projects.

City's efforts to implement the new permit's requirements have been well coordinated. Inspectors were well trained and tracking

048657

procedures of violations and corrections were put in place. The regionally generated inspection template along with the data tracking spreadsheet have made this year's reporting a much easier task for all involved.

No improvements are needed at this time except for the need to maintain inspector attendance for provided refresher courses and training.

C.6.f ►Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
Private Projects:				
Start of Winter: Construction Site Requirements	9/28/09	Review of Storm Water Pollution Prevention and Construction Site Requirements During the Rainy Season	11	100%
SCVURPPP Construction Site Inspection Training	10/21/09	Erosion control at construction sites	1	9%
New C .3 and C.6 requirements in MRP	3/24/10	Requirements of ERP and New Inspection Reporting Forms	11	100%
SCVURPPP Construction Management Workshop	1/19/10	Erosion control at construction sites	3	27%
CASQA Construction BMP Handbook	6/23/10	BMP Web Portal	1	9%
Public Projects:				
New C .3 and C.6 requirements in MRP (Project Admin. Inspectors, Capital Project Engineers, and City Engineers	3/26/10 & 4/20/10	Regional Plan Updates, NOI, Reporting Requirements, SWPPP, BMPS, permitting process and ERP	10	77%
New C .3 and C.6 requirements in MRP (Mathilda Project Contractors/Inspectors)	4/14/10	City's ERP inspection, enforcement & reporting requirements	7	100%
SCVURPPP C.3 Workshop (Capital Project Engineers and City Engineers)	6/8/10	Complying with new stormwater requirements for new and redevelopment projects	6	75%
SCVURPPP Construction Management Workshop (Project Admin. Inspectors)	1/19/10	Erosion control at construction sites	2	40%

048658

Section 7 – Provision C.7 Public Information and Outreach

C.7.b.ii.1 ►Advertising Campaign

Summarize advertising efforts. Include details such as messages, creative developed, and outreach media used. The detailed advertising report may be included as an attachment. If advertising is being done by participation in a countywide or regional program, refer to the separate countywide or regional Annual Report.

Summary:

For Sunnyvale's campaign details, see Appendix 7-1.

Examples of advertising materials are available for review upon request.

The following separate reports developed by SCVURPPP summarize countywide advertising efforts conducted during FY 09-10:

- **FY 09-10 Watershed Watch Campaign Annual Campaign Report**
- **FY 09-10 Watershed Watch Partner Report**
- **FY 09-10 Watershed Watch Web Statistics Report**

These reports are included within the C.7 Public Information and Outreach section of Program's FY 09-10 Annual Report.

C.7.b.iii.1 ►Pre-Campaign Survey

(For the FY 10-11 Annual Report only) Summarize survey information such as sample size, type of survey (telephone survey, interviews etc.). Attach a survey report that includes the following information. If survey was done regionally, refer to a regional submittal that contains the following information:

- Summary of how the survey was implemented.
- Analysis of the survey results.
- Discussion of the outreach strategies based on the survey results.
- Discussion of planned or future advertising campaigns to influence awareness and behavior changes regarding trash/litter and pesticides.

Place an **X** in the appropriate box below:

	Survey report attached: **Not required for this Annual Report.**
	Reference to regional submittal: **Not required for this Annual Report.**

048659

C.7.c ►Media Relations

Summarize the media relations effort. Include the following details for each media pitch in the space below, AND/OR refer to a regional report that includes these details:

- Topic and content of pitch
- Medium (TV, radio, print, online)
- Date of publication/broadcast

Summary:

For Sunnyvale's media relation effort details, see Appendix 7-2.

Examples of media outreach efforts are available for review upon request.

The following separate report developed by BASMAA summarizes media relations efforts conducted during FY 09-10:

• BASMAA Media Relations Final Report

This report is included within the C.7 Public Information and Outreach section of Program's FY 09-10 Annual Report.

C.7.d ►Stormwater Point of Contact

(For FY 09-10 Annual Report only, unless changes made) Provide details of website or phone number used as the point of contact. Report on how the point of contact is publicized and maintained. If any change occurs in this contact, report in a subsequent Annual Report.

Contact Summary:

Point of contact information for Sunnyvale can be found at the following site: http://sunnyvale.ca.gov/Departments/PublicWorks/Sewers/StormDrains.aspx and on the home page of the WPCP site(Reporting Spills and Dumping) at wpcp.inSunnyvale.com

The contact phone number is (408) 730-7270. The point of contact is maintained by Sunnyvale WPCP staff between 7 AM and 4 PM, Monday – Friday. Outside these business hours, callers are referred by the answering machine to contact Public Safety Dispatch at (408) 730-7181 or to call 911 in the case of an emergency.

Collectively, an additional point of contact is the Watershed Watch Campaign hotline (1-866-WATERSHED) and Watershed Watch Campaign website (www.mywatershedwatch.org). Individual agency points of contact are publicized on SCVURPPP outreach materials and websites and the point of contact is maintained by the Program and their authorized agents.

048660

C.7.e ►Public Outreach Events

Describe general approach to event selection. Provide a list of outreach materials and giveaways distributed.
Use the following table for reporting and evaluating public outreach events

Event Details	**Description** (messages, audience)	Evaluation of Effectiveness
For the table of Sunnyvale's event details, see Appendix 7-3.		
For additional regional event details, see Program's section of report.		

C.7.f. ►Watershed Stewardship Collaborative Efforts

Summarize watershed stewardship collaborative efforts and/or refer to a regional report that provides details. Describe the level of effort and support given (e.g., funding only, active participation etc.). State efforts undertaken and the results of these efforts. If this activity is done regionally refer to a regional report.

Evaluate effectiveness by describing the following:

- Efforts undertaken
- Major accomplishments

Summary:

During FY 09-10, the Program actively supported the Santa Clara Basin Watershed Initiative (SCBWMI), including the Core Group, the Land Use Subgroup, and the Trash Subgroup (now the Santa Clara Valley Zero Litter Initiative); the Bay Area Macroinvertebrate Bioassessment Information Network (BAMBI); and the Stevens & Permanente Creeks Watershed Council. Information on these efforts is included within the C.7 Public Information and Outreach section of the Program's FY 09-10 Annual Report.

In addition, City of Sunnyvale staff continued to support and participate in activities of the SCBWMI's Communications and Outreach Subgroup, Land Use Subgroup, and the Santa Clara Valley Zero Litter Initiative. Sunnyvale has continued to support the Stevens and Permanente Watershed Council by providing the group free meeting space and participating in meetings. Sunnyvale also provided financial support of the Santa Clara County Creeks Coalition for their conference held in November 2009.

048661

C.7.g. ►Citizen Involvement Events

List the types of events conducted (e.g., creek clean up, storm drain inlet marking, native gardening etc.). Use the following table for reporting and evaluating citizen involvement events.

Event Details	Description	Evaluation of effectiveness
For a list of details, descriptions, and evaluations of effectiveness for Sunnyvale events in FY 09-10, see Appendix 7-4. **For additional regional citizen involvement event details, see the Program's Public Information and Outreach Section C. 7 of the Annual Report :** • **Watershed Watchers: Keeping Our Waterways Clean: FY 09-10 Fourth Quarter Report (includes end-of-year Summary from Alviso Education Center)** • **Going Native Garden Tour 2010- Summary Report**		

C.7.h. ►School-Age Children Outreach

Summarize school-age children outreach programs implemented. A detailed report may be included as an attachment.
Use the following table for reporting school-age children outreach efforts.

Program Details	Focus & Short Description	Number of Students/Teachers reached	Evaluation of Effectiveness
For Sunnyvale's Environmental Outreach details, see Appendix 7-5. **For additional regional outreach details, see the following separate reports developed by SCVURPPP and other organizations that also include information about school-age children outreach efforts conducted during FY 09-10. These reports are included as within the C.7 Public Information and Outreach section of Program's FY 09-10 Annual Report:** • **ZunZun School Assemblies for Watershed Watch Campaign- FY 09-10 Academic Year Final Report** • **Memorandum- Evaluation of the School Assembly Program- FY 09-10** • **Watershed Watchers: Keeping Our Waterways Clean: FY 09-10 Fourth Quarter Report (includes end-of-year Summary from Alviso Education Center)**			**For Sunnyvale's summary of evaluations of the program received from classroom instructors, see Appendix 7-6.**

048662

Section 8 - Provision C.8 Water Quality Monitoring

C.8 ►Water Quality Monitoring
State below if information is reported in a separate regional report. Municipalities can also describe below any Water Quality Monitoring activities in which they participate directly, e.g. participation in RMP workgroups, fieldwork within their jurisdictions, etc.
Summary: **During FY 09-10, Sunnyvale contributed to the SCVURPPP Monitoring and Assessment Program which conducts water quality monitoring in Santa Clara Valley creeks and rivers, in coordination with the BASMAA Regional Monitoring Coalition (RMC). In addition, SCVURPPP contributes financially to the Regional Monitoring Program for Water Quality in the San Francisco Estuary (RMP) and actively participates in RMP committees and work groups. For additional information on monitoring activities conducted by SCVURPPP, BASMAA RMC and the RMP, see the C.8 Water Quality Monitoring section of the Program's FY 09-10 Annual Report.**

048663

Section 9 – Provision C.9 Pesticides Toxicity Controls

C.9.a ►Adopt an Integrated Pest Management (IPM) Policy or Ordinance

(For FY 09-10 Annual Report only) Attach a copy of your individual IPM ordinance or policy. **See Appendix 9-1**	X	**Attached**		**Not attached,** explain below
If **Not attached**, explain:				

C.9.b ►Implement IPM Policy or Ordinance

Report implementation of IPM BMPs by showing trends in quantities and types of pesticides used, and suggest reasons for increases in use of pesticides that threaten water quality, specifically organophosphorous pesticides, pyrethroids, carbaryl, and fipronil. A separate report can be attached as evidence of your implementation.

Summary:

See Appendix 9-2 for a report on the implementation of IPM Best Management Practices; trends in the quantities and types of pesticides used, where they were used, and increases or decreases observed in their use.

C.9.c ►Train Municipal Employees

Enter the number of employees that applied or used pesticides (including herbicides) within the scope of their duties this reporting year.	**50**
Enter the number of these employees who received training on your IPM policy and IPM standard operating procedures within the last 3 years.	**50**
Enter the percentage of municipal employees who apply pesticides who have received training in the IPM policy and IPM standard operating procedures within the last three years.	**100%**

048664

C.9.d ►Require Contractors to Implement IPM

Did your municipality contract with any pesticide service provider in the reporting year?	X	Yes		No

If yes, attach one of the following:

x	Contract specifications that require adherence to your IPM policy and standard operating procedures, OR
	Copy(ies) of the contractors' IPM certification(s) or equivalent, OR
	Equivalent documentation.

If **Not attached**, explain:

See Appendix 9-3 for a copy of the current contract with Bay Valley Pest Control for structural pest control activities on City-owned property, which requires the contractor to follow the City's IPM policy as referenced in the City Policy Manual and SOPs. As other contracts are developed for pesticide/herbicide applications, the same language will be included about following the City's IPM policy in Chapter 6, Article 12 of the City's Administrative Policy Manual.

C.9.e ►Track and Participate in Relevant Regulatory Processes

Summarize participation efforts, information submitted, and how regulatory actions were affected **OR** reference a regional report that summarizes regional participation efforts, information submitted, and how regulatory actions were affected.

Summary:

During FY 09-10, Sunnyvale participated in regulatory processes related to pesticides through contributions to SCVURPPP, BASMAA and CASQA. For additional information, see the Regional Pollutants of Concern Report submitted by BASMAA on behalf of all MRP Permittees. This Report is included within the Program's FY 09-10 Annual Report.

C.9.f ►Interface with County Agricultural Commissioners

Provide a summary of improper pesticide usage reported to the County Agricultural Commissioner and follow-up actions to correct violations, if any. A separate report can be attached as your summary.

Summary:

- **No improper usage of pesticides was observed by City staff, nor was any complaint received from the public that would have been reported to the Santa Clara County Agricultural Commissioner.**
- **Sunnyvale made no improper pesticide usage reports to the Agricultural Commissioner in FY 09-10.**

048665

C.9.h.ii ►Public Outreach: Point of Purchase

Provide a summary of public outreach at point of purchase, and any measurable awareness and behavior changes resulting from outreach (here or in a separate report); **OR** reference a report of a regional effort for public outreach in which your agency participates.

Summary:

Sunnyvale hosted a booth at the Spring Landscaping Event at the Sunnyvale Home Depot in April 2010. See Appendix 7-3 for complete details of the event.

The following separate reports developed by SCVURPPP and BASMAA summarize point of purchase outreach efforts conducted during FY 09-10:

- **FY 09-10 Store Employee Training Report (SCVURPPP)**
- **FY 09-10 Store Employee Training Evaluation Summary (SCVURPPP)**
- **FY 09-10 Store Employee Training Status Table (SCVURPPP)**
- **FY 09-10 List of Stores in the IPM Store Partnership Program (SCVURPPP)**
- **FY 09-10 BASMAA "Our Water, Our World" (OWOW) Report (BASMAA)**

These reports are included within the C.9 Pesticides Toxicity Control section of Program's FY 09-10 Annual Report.

C.9.h.vi ►Public Outreach: Pest Control Operators

Provide a summary of public outreach to pest control operators and landscapers and reduced pesticide use (here or in a separate report); **OR** reference a report of a regional effort for outreach to pest control operators and landscapers in which your agency participates.

Summary:

The following separate report developed by SCVURPPP summarizes Public Outreach: Pest Control Operators efforts conducted during FY 09-10:

- **FY 09-10 Santa Clara Valley Green Gardener Training Report**

  This report is included within the C.9 Pesticides Toxicity Control section of Program's FY 09-10 Annual Report.

In support of the Green Gardener Program, Sunnyvale staff have provided both technical and in-kind assistance to coordinate the Santa Clara Valley Green Gardener classes through the following efforts:

- **Researching and providing supplemental materials regarding IPM for classes in both Spanish and English.**
- **Providing classroom instruction in soils, fertilizers, and Integrated Pest Management practices.**
- **Offering free classroom space and developing/coordinating presentations for four Green Gardener recertification classes for previously trained students held in the spring of 2010. Classes were offered on Water Conservation- Smart Controller Programming (English and Spanish); Maintenance of California Native Plants (English); and Advanced Integrated Pest Management (Spanish).**
- **Meeting with representatives from the California Landscape Contractors Association Education Committee to establish a working**

048666

relationship to promote Green Gardener classes, including Integrated Pest Management approaches with their membership.

- Establishing a new partnership with the Sunnyvale-Cupertino Adult Education Program to offer the Green Gardener classes in the fall of 2010.
- Meeting with other city/agency staff to promote the expansion of the Green Gardener training program into other communities and providing technical assistance to agencies who implemented the training program for landscape maintenance workers.
- In addition to the SCVURPPP efforts, Sunnyvale promoted the Santa Clara Valley Green Gardener trainings at the Sunnyvale Farmers Market and other venues (see Appendix 7-3 for event details) and through internal outreach resources.

048667

Section 10 - Provision C.10 Trash Load Reduction

C.10.a.i ►Short-Term Trash Loading Reduction Plan

(For FY 10-11 Annual Report only) Provide description of actions/tasks initiated/conducted/completed in developing a Short-Term Trash Loading Reduction Plan (due February 1, 2012).

Description: **Not required for this Annual Report.**

C.10.a.ii ►Baseline Trash Load and Trash Load Reduction Tracking Method

(For FY 10-11 Annual Report only) Provide description of actions/tasks initiated/conducted/completed to gather trash loading data and in developing a Baseline Trash Load and Trash Load Reduction Tracking Method (due February 1, 2012).

Description:

- **A summary of Program accomplishments for this sub-provision are included within the C.10 Trash Load Reduction section of Program's FY 09-10 Annual Report.**
- **Sunnyvale staff assisted the Program in collecting data on baseline trash loading rates from the 13 full capture trash devices installed in Sunnyvale. All debris within the retrofitted SD inlets was collected, sorted to separate trash items from street tree leaves and quantified. Additional efforts in FY 10-11 are underway to collect similar information from the wet season of FY 09-10.**

C.10.a.iii ►Minimum Full Trash Capture

(For FY 10-11 Annual Report and Each Annual Report Thereafter) Provide description of actions/tasks initiated/conducted/completed in implementing Minimum Full Trash Capture Devices (due July 1, 2014) within individual jurisdictions. Include information on Full Trash Capture Devices installed under Bay-area Wide Trash Capture Demonstration Project administered by San Francisco Estuary Partnership.

Description:

- **A summary of Program accomplishments for this sub-provision are included within the C.10 Trash Load Reduction section of Program's FY 09-10 Annual Report. In addition, the Program recently finalized a technical report detailing the results of its Pilot Trash Structural Treatment Control Study implemented in 2007. This technical report is also available within the C.10 Trash Load Reduction section of Program's FY 09-10 Annual Report.**
- **Also, Sunnyvale staff participated in the efforts of the SFEP's Bay-area Wide Trash Capture Demonstration Project by providing information about the City's experiences with the pilot installation, issues, and effectiveness of the 13 Storm-Tek ® full-capture devices in Sunnyvale at their "vendor fair" meeting in May 2010. Staff has also provided comments and suggestions to the proposed contract language for cities wishing to participate in the pilot project.**

048668

C.10.b.iii ►Trash Hot Spot Assessment

(For FY 10-11 Annual Report and Each Annual Report Thereafter) Provide volume of material removed from each Trash Hot Spot cleanup, and the dominant types of trash (e.g., glass, plastics, paper) removed and their sources to the extent possible. Provide required photo documentation.

Fill out the following table or attach a summary of the following information. **See Appendix 10-1 for more information and photos.**

Trash Hot Spot	Cleanup Date	Volume of Material Removed	Dominant Types of Trash	Trash Sources (where possible)
SNV01-Guadalupe Slough (Site 3)	5/18/2010	124 gallons of litter and ~5.0 cu. ft of lumber	1. Bottles (plastic and glass) 2. Styrofoam (pieces or pellets) 3. Balls (sport and tennis) 4. Construction debris 5. Spent shot gun shells and wadding	Most from upstream or tidal deposition. Some from hunters (shotgun shells) and some from nearby trail users (bottles and cans)
SNV02 – Sunnyvale East Channel, Caribbean Drive Bridge	5/13/2010	39 gallons of litter	1. Styrofoam (pieces or pellets) 2. Bottles (plastic or glass) 3. Convenience/Fast Food items 4. Plastic bags 5. Spray paint cans	Most from upstream outfalls. Some from roadway vehicle litter blowing into the channel.
SNV03-Guadalupe Slough (Site 1)	5/18/2010	91 gallons of litter and ~8 cu. ft. of lumber	1. Styrofoam (pieces or pellets) 2. Construction debris 3. Balls (sports and tennis) 4. Bottles (plastic and glass) 5. Spent shotgun shells and wadding	Most from upstream or tidal deposition. Some from hunters (shotgun shells) and some from nearby trail users (bottles and cans)
SNV04-Guadalupe Slough (Site 2)	5/18/2010	65 gallons of litter and ~4 cu. ft. of lumber	1. Spent shotgun shells and wadding 2. Bottles (plastic or glass) 3. Styrofoam pieces or pellets 4. Balls (sports and tennis) 5. Construction debris	Most from upstream or tidal deposition. Some from hunters (shotgun shells) and some from nearby trail users (bottles and cans)
SNV 05-San Tomas Aquino Creek, east of intersection with Calabazas Creek	5/19/2010	52 gallons of litter and ~2 cu. ft of lumber	1. Styrofoam pieces or pellets 2. Bottles (plastic or glass) 3. Balls (sports and tennis) 4. Construction debris 5. Spray paint cans	Most from upstream outfalls or roadway crossings (e.g., Highway 237), but some may be from tidal deposition.

048669

C.10.d ►Summary of Trash Load Reduction Actions

Provide summary of new trash load reduction actions or increased levels of implementation of existing actions that were implemented after adoption of the MRP (control measures and best management practices) including the types of actions and levels of implementation, and the total trash loads and dominant types of trash removed from each type of action.

Suggested trash load reduction actions to track and report may include:

- Anti-litter Campaigns
- Anti-litter/Dumping Enforcement Activities
- Curbside Recycling Programs
- Education and Outreach Efforts
- Free Trash Pickup/Drop-off Days
- County HHW Program Activities
- Improved Trash Bin Management
- Inspection/Maintenance of Storm Drain Outfalls
- Litter Pickup and Control
- Removal of Homeless Encampments
- Solid Waste Recycling Efforts
- Source Controls/Bans/Prohibitions
- Storm Drain Operation and Maintenance
- Storm Drain Signage/Marking
- Street Sweeping Activities
- Trash Removal from Receptacles
- Volunteer Creek Cleanups

Type of Trash Load Reduction Action	Date of First Implementation	Level of Implementation (specify if level was increased after MRP adoption)	Total Trash Load Removed by Action	Dominant Types of Trash Removed by Action
Not all trash load reduction actions were tracked by "loads removed" this fiscal year. Once the Trash Load Reduction Tracking Method is developed (see Provision C.10.a.ii), trash loads removed will be documented for each load reduction action (as feasible). See the Program's FY 09-10 Annual Report for schedule. Actions/events where data are available are listed below:				
Coastal Clean Up Day event – site sponsorship on Guadalupe Slough September 2009	**September 2008**	**Not required before MRP. Increased numbers of volunteers at site in 2009**	**778 gallons of trash removed**	**Styrofoam, bottles (Plastic and glass), shot gun shells, construction debris.**
Great American Litter Pick Up Event April 2010	**April 2008**	**Not required before MRP. Increased number of neighborhood site locations from 3 to 4**	**546 gallons of trash removed.**	**Convenience/snack food/fast food wrappers or containers, bottles (plastic and glass), single use merchandise bags.**

048670

Type of Trash Load Reduction Action	Date of First Implementation	Level of Implementation	Total Trash Load Removed by Action	Dominant Types of Trash Removed by Action
National River Clean Up Day event- Sunnyvale East Channel and Calabazas/San Tomas Aquino Creeks May 2010	May 2008	Not required before MRP. Increased outreach efforts for volunteers, but had similar number s as previous years	384 gallons of trash removed	Styrofoam, bottles (plastic and glass), convenience/snack food/fast food wrappers or containers
Education and Outreach Efforts – Fremont High School "APE" Club Discussion, Litter Pick-ups (City provided clean up tools, gloves, safety training, and bags.)	January 2010- May 2010	Three volunteer clean-ups by students in a high school club of neighborhood around the school.	345 gallons of trash and 105 gallons of recyclables removed from neighborhoods	Convenience/snack food/fast food wrappers or containers, bottles (plastic and glass
Education and Outreach Efforts (classroom presentations) on litter and how it can enter waterways	September 2009 – May 2010	Since MRP adoption, include more information on litter issues in classroom presentations	Unable to quantify	Not Applicable
SCVURPPP Pilot Trash Retrofit Project (13 Storm Drain inlets were retrofitted with trash full capture devices prior to the MRP implementation)	July 2009 – June 2010	Retrofitted inlets were monitored and debris collected help identify trash loading rates, based on land use.	Approximately 30 gallons of trash were removed from installed full capture Storm-Tek devices for the year..	Convenience/snack food/fast food wrappers or containers, bottles (plastic and glass), single use merchandise bags.
Public Works Solid Waste Program added new city-maintained trash receptacle along route between Homestead High School and local shopping areas.	April 2010	Added after adoption of MRP. Requested by high school students and residents.	Can is emptied weekly – approximately 20-30 gallons of trash collected per month.	Convenience/snack food/fast food wrappers or containers, bottles (plastic and glass), single use merchandise bags.
Removed 3 homeless encampments along in the PG&E right of way near the JWC Greenbelt (Sunnyvale East Channel watershed)	February 2010	Done after adoption of MRP.	Removed 1 truckload of debris (Approx. 2 cubic yards)	Cardboard, old clothes, paper and empty food containers

048671

Type of Trash Load Reduction Action	Date of First Implementation	Level of Implementation	Total Trash Load Removed by Action	Dominant Types of Trash Removed by Action
Inspection/Maintenance of Storm Drain Outfalls & Storm Drain Operation/Maintenance	Inspection of City storm drain inlets began 8/17/09 and was completed (approximately 4200 inlets inspected) 11/16/09. Inspections also conducted during and after storm events.	Fully implemented in the storm program prior to MRP adoption.	Total of 1,350 cubic feet of debris removed during normal inspection. Storm event inspections and cleaning are done on an emergency basis and loads removed are not recorded.	Mostly leaves, but also some trash and grit (sediment).
Storm Drain Signage/Marking	"No Dumping, Flows to Bay" metal badges installed on all DIs (approx. 4200) beginning 8/17/09. Project was completed in mid-May 2010.	Fully implemented in FY 09-10 in response to expected MRP adoption, though capital project for marking storm drains with metal badges. This had been in planning stages for a couple of years.	Unable to quantify	Storm drain inlet marking (badging) project assists with education/outreach efforts to keep various pollutants from area waterways.
Street Sweeping Activities	During FY 09-10, City streets swept once per month. Beginning August 2, 2010, street sweeping doubled to twice per month for all City streets.	Sweeping program fully implemented prior to MRP adoption. Increased sweeping to be implemented August, 2010. Trash load reductions to be reported in FY10-11 annual report.	Residential areas: 10,478 curb miles swept, 6,743 cubic feet of debris collected and disposed of. Commercial areas: 4,290 curb miles swept, 2,026 cubic feet of debris removed and disposed of	Leaves, trash & other debris.

048672

Section 11 - Provision C.11 Mercury Controls

C.11.a.i ►Mercury Recycling Efforts

List below or attach lists of efforts to promote, facilitate, and/or participate in collection and recycling of mercury containing devices and equipment at the consumer level (e.g., thermometers, thermostats, switches, bulbs).

- **Outreach to Sunnyvale residents, related to proper mercury recycling is promoted in the following ways: Table at Farmers Market, Articles, Utility Bill Inserts, Flyers, Department and Division web sites, Mercury Thermometer Exchanges, Health and Safety Fairs and other outreach events. See Appendices 7-1, 7-2 and 7-3 for complete details of outreach activities promoting mercury product recycling.**
- **Sunnyvale collected 150 mercury thermometers at two thermometer exchange events in FY 09-10.**
- **Sunnyvale also collected the following mercury-containing products at the SMaRT Station:**

  Mercury containing items : 26 lbs
  4' tubes: 9,523
  8' tubes : 1,247
  10' tubes: 10
  Compact, circular and u-tube lamps: 6,003
  HID/ARC lamps – 1,007
  UV lamps – 29
  Note: the SMaRT Station collects items from residents of the cities of Sunnyvale, Mountain View and Palo Alto.
- **Sunnyvale continues financial support of the Santa Clara County Household Hazardous Waste collection program through the Solid Waste program. Data on quantities of mercury containing products collected by the County HHW program are provided to SCVURPPP for reporting on a county-wide basis.**
- **Sunnyvale continues to collect and recycle mercury-containing products generated by city-owned facilities and operations (e.g., fluorescent/HID lamps, mercury switches)**

C.11.a.ii ►Mercury Collection

Provide an estimate of the mass of mercury collected through these efforts, or provide a reference to a report containing this estimate.

Amount collected: **The methodologies for estimating the mass of mercury collected through mercury collection and recycling efforts are currently in development and are due to the Water Board by September 15, 2010. Therefore, estimates could not be made for FY 09-10. Estimates of the mass of mercury collected through recycling efforts during FY 10-11 will be provided with the FY 10-11 Annual Report (see FY 10-11 BASMAA Regional POC Report).**

048673

C.11.b ►Monitor Methylmercury **C.11.c ►Pilot Projects to Investigate and Abate Mercury Sources in Drainages** **C.11.d ►Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices** **C.11.e ►Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit** **C.11.f ►Diversion of Dry Weather and First Flush Flows to POTWs** **C.11.g ►Monitor Stormwater Mercury Pollutant Loads and Loads Reduced** **C.11.h ►Fate and Transport Study of Mercury In Urban Runoff** **C.11.i ►Development of a Risk Reduction Program Implemented Throughout the Region** **C.11.j ►Develop Allocation Sharing Scheme with Caltrans**
State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.
Summary **A summary of Program accomplishments for these sub-provisions are included within the C.11 Mercury Controls section of Program's FY 09-10 Annual Report and/or the BASMAA Regional POC Report.**

048674

Section 12 - Provision C.12 Polychlorinated Biphenyls (PCBs) Controls

C.12.a.i,iii ►Municipal Inspectors Training

(For FY 09-10 Annual Report only) List below or attach description of results of training municipal industrial inspectors to identify, in the course of their existing inspections, PCBs or PCB-containing equipment.

Description:

In FY 09-10, inspector training materials were developed through in-kind contributions of SCVURPPP to BASMAA. Training materials can be found in the BASMAA Regional Pollutant of Concern (POC) Report.

In addition, 7 municipal industrial inspectors and manager (100% of Industrial Waste/Pretreatment Program inspectors and sample technicians) were given training on the identification of PCBs and PCB-containing equipment using the Power Point training module provided by BASMAA on July 12, 2010. Modifications to the IND Stormwater Inspection Form to include inspection reminders related to this POC are in progress and will be implemented in FY 10-11.

C.12.a.ii,iii ►Ongoing Training

(For FY 10-11 Annual Report and Each Annual Report Thereafter) List below or attach description of ongoing training development and inspections for PCB identification, including documentation and referral to appropriate regulatory agencies (e.g. county health departments, Department of Toxic Substances Control, California Department of Public Health, and the Water Board) as necessary.

Description:

Not required for this Annual Report.

048675

C.12.b ►Conduct Pilot Projects to Evaluate Managing PCB-Containing Materials and Wastes during Building Demolition and Renovation Activities
C.12.c ►Pilot Projects to Investigate and Abate On-land Locations with Elevated PCB Concentrations
C.12.d ►Conduct Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices
C.12.e ►Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit
C.12.f ►Diversion of Dry Weather and First Flush Flows to POTWs
C.12.g ►Monitor Stormwater PCB Pollutant Loads and Loads Reduced
C.12.h ►Fate and Transport Study of PCBs In Urban Runoff
C.12.i ►Development of a Risk Reduction Program Implemented Throughout the Region

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.

Summary

A summary of Program's accomplishments for these sub-provisions are included within the C.12 PCB Controls section of Program's FY 09-10 Annual Report and/or the BASMAA Regional POC Report.

048676

Section 13 - Provision C.13 Copper Controls

C.13.a.i and iii ► Legal Authority: Architectural Copper

(For FY 10-11 Annual Report only) Do you have adequate legal authority to prohibit discharge of wastewater to storm drains generated from the installation, cleaning, treating, and washing of the surface of copper architectural features, including copper roofs to storm drains?	x	Yes		No

If **No**, explain and provide schedule for obtaining authority within 1 year:

Not required for this Annual Report. Current ordinance language prohibits non-stormwater discharges that contain pollutants of concern to the storm drain collection system. However, Sunnyvale is in the process of amending the Municipal Code, SMC 12.60 to address this specific type of discharge in FY 10-11.

C.13.b.i and iii ► Legal Authority: Pools, Spas, and Fountains

(For FY10-11 Annual Report only) Do you have adequate legal authority to prohibit discharges to storm drains from pools, spas, and fountains that contain copper-based chemicals?	X	Yes		No

If **No**, explain and provide schedule for obtaining authority within 1 year:

Not required for this Annual Report. However, Sunnyvale is in the process of amending the Municipal Code, SMC 12.60 to address this specific type of discharge in FY 10-11.

C.13.c ►Vehicle Brake Pads

Reported in a separate regional report.

A summary of the Program's participation with the Brake Pad Partnership (BPP) is included within the C.13 Copper Controls section of Program's FY 09-10 Annual Report and/or the BASMAA Regional POC Report.

Sunnyvale also provided a letter of support for state legislation (SB 346 – Kehoe) to regulate the copper content of brake pads on June 11, 2010.

C.13.d.iii ►Industrial Sources Copper Reduction Results

List below or attach annotated lists or tables from your Industrial and Commercial Site Controls portion of this report, that highlight copper reduction results among the facilities identified as potential users or sources of copper, facilities inspected, and BMPs addressed. For FY 09-10 describe below or highlight in the C.4 Evaluation portion (if provided) of this report the steps taken to revise your program to meet new data tracking and reporting requirements for implementation levels described in C.13.d.ii.

Summary

048677

In FY 09-10, inspector training materials were developed through in-kind contributions of SCVURPPP to BASMAA. Training materials can be found in the BASMAA Regional POC Report. In addition, 7 municipal industrial inspectors (100% of Industrial Waste/Pretreatment Program inspectors and sample technicians) were given training on the identification of copper-generating processes and inspection procedures using the Power Point training module provided by BASMAA on July 12, 2010.

The City has identified facilities likely to use or have sources of copper and has included them in our business inspection plans. The City identified thirteen Industrial Users (IUs) classified under 40CFR 433 as Metal Finishers as potential contributing sources of copper. These IUs will be inspected, at a minimum, annually by the Pretreatment Program. Other Permitted Significant Industrial Users are also inspected annually and include inspection procedures to identify potential copper sources, mainly from roof runoff sources. The potential commercial contributors of copper to the sanitary sewer system or stormwater collection system include automotive service facilities, building trades / yards, electrical/electronic, laboratory, machine shop, building materials, printers and food service facilities. These commercial business categories are inspected by the City's Pretreatment Program inspectors a minimum of once every three years.

In FY 09-10, 295 stormwater inspections were conducted at the facilities identified in the above mentioned categories.

- **11 Automotive facilities were inspected, with no violations from copper sources.**
- **Two Building Materials facilities were inspected, with no violations from copper sources.**
- **Two Building Trades / Yards facilities were inspected, with no violations from copper sources.**
- **One Electronic facility was inspected, with no violations from copper sources.**
- **221 Food Service facilities were inspected, with no violations from copper sources.**
- **Three Laboratories were inspected, with no violations from copper sources.**
- **48 Permitted SIUs were inspected, including Metal Finishers, with no violations from copper sources.**
- **Three Print shops and three "other" types of commercial users were also identified as potential copper sources, but with no violations identified from copper sources.**

The City has educational BMP material available for distribution to the above-listed commercial business

C.13.e ►Studies to Reduce Copper Pollutant Impact Uncertainties

Revised. Description reads "State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below."

Summary

A summary of the Program's efforts (i.e., participation in RMP committee and work group meetings) to develop regional studies to reduce copper pollutant impact uncertainties is included within the C.13 Copper Controls section of Program's FY 09-10 Annual Report and/or BASMAA Regional POC Report.

048678

Section 14 - Provision C.14 PBDE, Legacy Pesticides and Selenium Controls

C.14.a ►Control Programs for PBDEs, Legacy Pesticides and Selenium Controls
Revised. Description reads "State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities can provide descriptions below."
Summary **A summary of the Program's efforts (i.e., participation in Regional Monitoring Program (RMP)committee and work group meetings) to develop a Control Program for PBDEs, Legacy Pesticides and Selenium is included within the C.14 PBDE, Legacy Pesticides and Selenium section of Program's FY 09-10 Annual Report and/or BASMAA Regional POC Report.**

048679

Section 15 - Provision C.15 Exempted and Conditionally Exempted Discharges

C.15.b.iii.(1), C.15.b.iii.(2) ► Planned and Unplanned Discharges of Potable Water				
Is your agency a water purveyor?	X	Yes		No
If **No**, skip to C.15.b.vi.(2):				
If **Yes**, Complete the attached reporting tables or attach your own table with the same information. Describe program highlights below. For FY 09-10 only, describe steps taken to revise your program to meet new monitoring, data tracking and reporting requirements.				

Summary:

To begin implementation of the monitoring requirements of C.15.b, the City purchased a Hach DR890 Handheld Recorder and trained staff on its calibration and use in the field. Staff began using the equipment in May 2010 to collect data on planned discharges. Unplanned discharges did not occur in the time period from when the equipment became available and the end of the reporting year.

Based on guidance received from the Program, the City revised existing data tracking forms to meet both the goals of the permit and BMPs provided by the Program. City crews record hand written readings using appropriate testing equipment and turned in documents to the Field Supervisor at the end of their shift. As time permits, staff will enter hand-written data on a system spreadsheet and file it electronically.

The reporting tables for 15.b.iii (1) and C.15.b.iii (2) for FY 09-10 are filled out to the best of our ability this reporting year, as guidance for the reporting data tables was not finalized until the late spring of 2010. Data for FY10-11 are being collected and will be reported using the reporting table template.

A summary of the Program's efforts to update the Water Utility Operations & Maintenance Discharge Pollution Prevention Plan (WUDPPP) to assist municipal water purveyors in complying with this provision of the MRP is included within the C.15 Exempted and Conditionally Exempted Discharges section of Program's FY 09-10 Annual Report.

048680

C.15.b.vi.(2) ► Irrigation Water, Landscape Irrigation, and Lawn or Garden Watering

Provide implementation summaries of the required BMPs to promote measures that minimize runoff and pollutant loading from excess irrigation. Generally the categories are:

- Promote conservation programs
- Promote outreach for less toxic pest control and landscape management
- Promote use of drought tolerant and native vegetation
- Promote outreach messages to encourage appropriate watering/irrigation practices
- Implement Illicit Discharge Enforcement Response Plan for ongoing, large volume landscape irrigation runoff.

Summary:

The City of Sunnyvale promotes the measures listed above in the following ways:

- **In cooperation with the Program, Sunnyvale promotes outreach efforts for less toxic pest control options, and appropriate irrigation practices. See the Watershed Watch Campaign in the C.7 Public Information and Outreach section and the IPM Store Partnership and Green Gardener Training programs in the C.9 Pesticide Toxicity Control Section of the Program's FY 09-10 Annual Report.**
- **See the City's outreach efforts and messages for water conservation, less toxic pest control options, and proper irrigation practices that are described in Appendices 7-1, 7-2, 7-3, and 7-5 of this report. See section C.9.h.vi of this report for more detailed information on Sunnyvale's support of the Santa Clara Valley Green Gardener training program and the Integrated Pest Management and water conservation/irrigation control practices included in that training/outreach.**
- **In April 2010, the City adopted a new Water-Efficient Landscape Ordinance to meet the requirements of the State Department of Water Resources (DWR) model ordinance to meet a stated goal of a 20% reduction in water usage. The City's ordinance exceeds the requirements of the DWR model Water-Efficient Landscape Ordinance by applying requirements to a smaller lot size threshold and placing a limit on turf areas (not to exceed 25% of non-turf areas) or requiring implementation of a water-budget approach to design a proposed landscape. See Chapter 19.12 of the Sunnyvale Municipal Code for the complete ordinance language. This ordinance promotes the use of drought tolerant vegetation, of which many varieties are natives.**
- **City cooperates and collaborates with the water conservation efforts of the Santa Clara Valley Water District (SCVWD) in its regional outreach campaigns and conservation messages.**
- **Pretreatment Program staff incorporated the large volume irrigation discharges as an element in the Illicit Discharge Enforcement Response Plan. In FY 09-10, Staff responded to one IDDE incident that required corrective actions due to discharge of a large quantity of irrigation water, as well as sediment erosion.**

048681

C.15.b.iii.(1) ►Planned Discharges of the Potable Water System

Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Duration of Discharge (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual (mg/L)	pH (standard units)	Discharge Turbidity[1] (NTU)	Implemented BMPs & Corrective Actions
Homestead/ Ortega Transmission	Disinfectant Flushing	Sanitary sewer	4/1/2010	930 - NA	0	0	8.8 – Start – residual not available	8.32	54	Pumped to sanitary sewer line
Homestead/ Ortega Transmission	Disinfectant Flushing	Sanitary sewer	4/1/2010	1145 - 1200	21600	1.73 mgd	2.8- start- residual not available	7.83	0	Pumped to sanitary sewer line

BM534-103	Flushing	Calabazas Creek	6/6/2010	0715-0726	16,489	Not available[3]	0.00	6.6	0	Dechlor
BM534-104	Flushing	Calabazas Creek	6/6/2010	0730-0738	11,992	Not available[3]	0.00	6.2	0	Dechlor
BM534-105	Flushing	Calabazas Creek	6/6/2010	0745-0756	16,489	158,894[3] This represents the entire flow rate for 6/6/2010				

Notes:
[1] Monitor the receiving water for turbidity if necessary and feasible. Include data in this column if available.

048684

C.15.b.iii.(2) ►Unplanned Discharges of the Potable Water System

Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Discharge Duration (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual[2] (mg/L)	pH[2] (standard units)	Discharge Turbidity (Visual)[2,]	Implemented BMPs & Corrective Actions	Time of discharge discovery	Regulatory Agency Notification Time[4]	Inspector arrival time	Responding crew arrival time
No unplanned discharges were reported in FY 09-10 using this form. Data will be collected in FY 10-11														

Notes:

1. This table contains all of the unplanned discharges that occurred in this FY.
2. Monitoring data is only required for 10% of the unplanned discharges. If you monitored more than 10% of your unplanned discharges report all of the data collected.
4. Notification to Water Board staff is required for unplanned discharges where the chlorine residual is >0.05 mg/L and total volume is ≥ 50,000 gallons. Notification to State Office of Emergency Services is required after becoming aware of aquatic impacts as a result of unplanned discharge or when the discharge might endanger or compromise public health and safety.

Provision C.7 – Public Information and Outreach

Appendix 7-3: C.7.e - Public Outreach Events Table

C.7.e ► Public Outreach Events

Event Details	Description (messages, audience)	Evaluation of Effectiveness
COMMUNITY OUTREACH		
Community Presentation at Fox Hollow Mobile Home Park July 8, 2009	Joint effort with Recycling and other city staff for a community presentation. Environmental outreach staff focused on IPM and Water Conservation. Was attended by adult residents.	Good outlet to meet with residents in their community and to focus on their needs and answer questions. Approximately 14 individuals attended.
Community Presentation at Willow Ranch Mobile Home Park August 11, 2009	Joint effort with Recycling and other city staff for a community presentation. Environmental outreach staff focused on IPM, litter and an overview of our program. Was attended by adult residents.	Good outlet to meet with residents in their community and to focus on their needs and answer questions. Approximately 36 individuals attended.
Human Relations & Cultural Diversity Advisory Committee Mtg. Sunnyvale City Hall Conf. Room September 16, 2009	Environmental Outreach staff spoke to committee members about our program and what services we could provide to them and their groups. Took various handouts on pollution prevention and invited individuals to upcoming cleanup event. Audience was all adults.	Great opportunity to reach a multicultural group. There were 12 individuals in attendance.
Sunnyvale 2009 State of the City Heritage Park Museum September 26, 2009	The event featured activities and exhibits providing community information for residents. The Outreach booth featured water pollution prevention information. Literature distributed included IPM information, less-toxic options for pest control, and proper disposal information on pesticides, pharmaceuticals and mercury. Audience consisted of youth and adults.	Good opportunity for outreach to community. Approximately 100 individuals stopped by the booth to ask questions and/or receive information.

Event Details	Description (messages, audience)	Evaluation of Effectiveness
COMMUNITY OUTREACH (cont)		
Mercury Thermometer Exchange / MedDrop Sunnyvale Senior Center October 14, 2009	First year to host joint thermometer exchange and pharmaceutical drop off event. Along with the exchange/drops off, staff provided information on other proper disposal options. Audience was all adults.	During this event, 119 mercury- containing thermometers were collected for proper disposal and a 55 gallon drum was filled with medications for proper disposal.
Muslim Green Fair Muslim Community Association October 18, 2009	This event consisted of a variety of “green” exhibits and exhibitors. Sunnyvale supported Program efforts by helping to staff the exhibit at this event. The goal of the outreach was to inform the public through interaction and providing literature and “fly swatter” give-aways to promote IPM practices. Also, at this event individuals played the bean bag game. The player decides how to properly dispose of an item (pollution) printed on the bean bag by "disposing" of it into the correct receptacle. The activity helps individuals learn about proper disposal of hazardous products. Audience consisted of youth and adults.	Approximately 40 children/parents stopped by the booth for literature, information and/or to play the bean bag game during the time that Sunnyvale staff manned the booth. See Regional section for complete details.
Sunnyvale Neighborhood Association Quarterly Meeting Sunnyvale Senior Center November 11, 2009	Environmental Outreach staff spoke to association leaders about our program and what services we could provide to them and their groups. Took various handouts on pollution prevention (Mercury, IPM, Pharmaceutical disposal, etc..). Audience was all adult.	Great opportunity to share with leaders in the community on arising issues and how we can assist their neighborhoods. There were 19 individuals in attendance.

Event Details	Description (messages, audience)	Evaluation of Effectiveness
COMMUNITY OUTREACH (cont)		
Santa Clara County Creeks & Watershed Conference Quinlan Community Center November 14, 2009	This event was held by the Santa Clara County Creeks & Watershed Council and consisted of various booths and exhibits on related to county creeks, watershed issues and/or concerns and local government. We used the exhibit that showed that focused on various pollution prevention messages (auto fluid, litter, storm drain pollution prevention & IPM) and handed out information on pollution prevention. Audience was all adults.	This event offered a venue for Outreach to focus on how indoor/outdoor daily activities impact the health of our watershed. During this event, we spoke to approximately 28 individuals.
Senior Church Group Milpitas, CA January 27, 2010	Since group was unable to physically walk for a tour, Environmental Outreach staff went in and did a virtual tour of the WPCP and had a discussion on various pollution prevention topics. Took various pollution prevention handouts (IPM, mercury disposal, HHW, etc …) to share as well. Audience was all adults.	Great opportunity to discuss items of concern to those in attendance and to have an open discussion. There were 20 members present for the tour and the discussion.

Event Details	Description (messages, audience)	Evaluation of Effectiveness
COMMUNITY OUTREACH (cont)		
Leadership Sunnyvale Sunnyvale SMaRT Station / WPCP April 15, 2010	Leadership Sunnyvale is a community education program that provides it members with training on the fundamentals of leadership and classes in community awareness. The intention is to broaden participant awareness of complex community issues, strengthen leadership skills, and increase effectiveness in the community. During this annual event Public Works hosts an Environmental Awareness Day. Environmental staff topics included: wastewater treatment overview, a tour of the WPCP, and discussion on public outreach and education efforts regarding water pollution and its prevention.	This event presents a key opportunity to provide awareness to potential community leaders about watershed issues. For this reporting year, 22 individuals participated in the event.
Virtual Tour / Pollution Prevention Sunnyvale Senior Center April 21, 2010	First time to present this topic at the Senior Center. Environmental Outreach staff went in and did a virtual tour of the WPCP and had a discussion on various pollution prevention topics. Took various pollution prevention handouts (IPM, mercury and pharmaceutical disposal, etc …) to share as well.	Great opportunity to discuss items of concern to those attending and to have an open discussion. There were 8 people in attendance. Turn out could have been low due to inclement weather.
Spring Landscaping Event Sunnyvale Home Depot April 23, 2010	First time event. This event consisted of various booths related to landscaping and gardening. Environmental staff took an IPM display board and various IPM and water conservation materials. Audience was all adults.	While attendance was low, the event did allow staff to have good one-on-one communications to directly addresses residents questions. During the event, 28 people stopped by our booth for material and/or discussion.

Event Details	Description (messages, audience)	Evaluation of Effectiveness
COMMUNITY OUTREACH (cont)		
Mercury Thermometer Exchange / MedDrop Sunnyvale's Earth Day event April 24, 2010	Sunnyvale staff hosted a thermometer exchange and medicine disposal at the Earth Day event. Along with the exchange/drops off, staff provided information on other proper disposal options, as well . Audience at event consisted of youth and adults, however we spoke only to adults at our table.	During this event, 31 mercury- containing thermometers and 73.75 pounds of medicine were collected for proper disposal. Staff also spoke to an additional 18 people in regards to pollution prevention actions.
Sunnyvale Health & Safety Fair Columbia Neighborhood Center May 22, 2010	Although the main emphasis is on fun, the city teams up once a year with local organizations to inform and educate area residents about health, safety, and community services. The event provides opportunities for residents to educate and inform themselves about issues affecting their daily lives. The outreach exhibit highlighted the difference between sanitary sewers and storm drains. Literature about water pollution prevention was distributed and the bean bag game was available to play. This event was attended by all ages.	This was a well-attended and busy event. Approximately 239 individuals (adults, students and children) visited the exhibit for information, literature and/or to play the bean bag game.

Event Details	Description (messages, audience)	Evaluation of Effectiveness
COMMUNITY OUTREACH (cont)		
Festival in the Park Hellyer County Park June 26, 2010	The event provides opportunities for residents to educate and inform themselves about issues affecting their daily lives. Sunnyvale supported Program efforts by helping to staff the exhibit at this event. The goal of the outreach was to inform the public through interaction and providing literature and “fly swatter” give-aways to promote IPM practices. Also, at this event individuals played the bean bag game. The player decides how to properly dispose of an item (pollution) printed on the bean bag by "disposing" of it into the correct receptacle. The activity helps individuals learn about proper disposal of hazardous products. Audience consisted of youth and adults.	Approximately 60 children/parents stopped by the booth for literature, information and/or to play the bean bag game during the time that Sunnyvale staff manned the booth. See Regional section for complete details.
Compost Workshops Sunnyvale Community Center Workshops are held once per month, 10 times during the year	Registrants learn that at-home composting turns organic material into valuable product for gardens and landscaping. Applying compost to gardens and landscaping reduces the need to apply fertilizer resulting in healthier plants, thus reducing the need for pesticide applications.	Attendance was sporadic, depending on the season. Generally, anywhere between 12 and 40 individuals attended each new workshop session.

Event Details	Description (messages, audience)	Evaluation of Effectiveness
COMMUNITY OUTREACH (cont)		
Sunnyvale Farmers Market In FY 09/10 attended 9 times	The Sunnyvale Farmers Market is held every Saturday all year round. The Environmental Outreach exhibit promotes pesticide reduction through IPM practices during the Spring and Summer months, and highlights the difference between sanitary sewers and storm drains and pollution prevention during the Fall and Winter. Literature and fact sheets on less-toxic pest control are distributed. Other water pollution prevention literature is available, including the HHW mercury brochure and surplus utility bill inserts that target water pollution concerns.	The market draws 2-3000 people each Saturday and provides an effective way to interface with shoppers in a venue that promotes healthy food and pesticide free gardening. For this reporting year, we spoke to approximately 284 individuals.
Plant Tours	Plant Tours are conducted year round. Treatment stages and processes are discussed, and attendees learn the function and importance of the wastewater treatment plant and its role of preventing water pollution from wastewater discharge. Both stormwater and wastewater pollution issues are discussed.	The Plant conducted 19 adult tours (including college students) in FY 09-10, reaching 425 individuals. This was an increase of over 350%. Discussions about water pollution and issues impacting the watershed and the environment help tour attendees gain a better understanding of the problem. At the completion of the tour, attendees are given educational materials that promote environmentally responsible behaviors. See below under employee outreach and Section C.7.h for additional outreach information. By the end of the tour, all participants know the difference between sanitary sewers and storm sewers.

Event Details	Description (messages, audience)	Evaluation of Effectiveness
BUSINESS OUTREACH		
Health and Safety Fair QuickLogic Corporation, Sunnyvale August 5, 2009	Exhibitor booths offered free information to company employees that focused on helping them live a safer and healthier lifestyle. Our exhibit focused on the difference between sanitary sewer and storm drains. We also provided general water pollution prevention literature about mercury, pesticides/IPM, car wash, automotive fluids, etc.	Event participants were enthusiastic. We had approximately 47 employees stop by the booth for information.
Sunnyvale Sunrise Rotary Club Sunken Gardens August 19, 2009	Outreach staff was invited to speak at the Rotary Club's morning meeting. Discussion was on our pilot storm drain retrofit, upcoming events and the program as a whole. In addition to the presentation, we provided various pollution prevention literature.	Event was attended by 10 individuals who were very interested in the information and programs available.
Health and Safety Fair Alpha & Omega Semiconductor, Sunnyvale August 20, 2009	Exhibitor booths offered free information to company employees that focused on helping them live a safer and healthier lifestyle. Our exhibit focused on the difference between sanitary sewer and storm drains. We also provided general water pollution prevention literature about mercury, pesticides/IPM, car wash, automotive fluids, etc...	This is a new venue Outreach was invited to attend. We had approximately 46 employees stop by the booth for information.

Event Details	Description (messages, audience)	Evaluation of Effectiveness
BUSINESS OUTREACH (cont)		
Appreciation Fair Country Inn and Suites, Sunnyvale September 16, 2009	Exhibitor booths offered free information to vendors, business accounts and guests that focused on helping them live a safer and healthier lifestyle. Our exhibit focused on the difference between sanitary sewer and storm drains. We also provided general water pollution prevention literature about mercury, pesticides/IPM, car wash, automotive fluids, etc...	This is a new venue Outreach was invited to attend. We had approximately 28 individuals stop by the booth for information.
Environmental Fair Lockheed Corporation, Sunnyvale September 23, 2009	Exhibitor booths offered free information to company employees that focused on helping them live a safer and healthier lifestyle. Our exhibit focused on various P2 messages since it was P2 week. We also provided general water pollution prevention literature about mercury, pesticides/IPM, car wash, automotive fluids, etc...	This was a well-attended and busy event. We had approximately 258 employees stop by the booth for information.
Health / Go Green Fair Applied Micro Circuits, Sunnyvale November 6, 2009	Exhibitor booths offered free information to company employees that focused on helping them live a safer and healthier lifestyle. Our exhibit focused on various pollution prevention messages. We also provided general water pollution prevention literature about mercury, pesticides/IPM, car wash, automotive fluids, etc ... as well as water conservation.	This is a new venue Outreach was invited to attend. We had approximately 52 individuals stop by the booth for information.
Our Water Our World Training Sunnyvale Home Depot January 13, 2010	Supported Our Water Our World staff at a training. Training was held to inform/train individuals on IPM methods and the Our Water Our World program which has been adopted by Home Depot.	Training was attended by 10 management staff. Prior to event, 0 employees were aware of IPM.

Event Details	Description (messages, audience)	Evaluation of Effectiveness
BUSINESS OUTREACH (cont)		
Health and Safety Fair Aruba Networks, Sunnyvale April 9, 2010	Exhibitor booths offered free information to company employees that focused on helping them live a safer and healthier lifestyle. Our exhibit focused on various pollution prevention messages. We also provided general water pollution prevention literature about mercury, pesticides/IPM, car wash, automotive fluids, etc ... as well as water conservation.	This was a smaller event, with 31 individuals stopping by the booth for information.
Earth Day Event NetApp, Sunnyvale April 15, 2010	Exhibitor booths offered free information to company employees that focused on helping them live a safer and healthier lifestyle. Our exhibit focused on various pollution prevention messages. We also provided general water pollution prevention literature about mercury, pesticides/IPM, car wash, automotive fluids, etc ... as well as water conservation.	This was a well-attended event with 70 individuals stopping by the booth for information.
GreenNG Fair Northrop Grumman, Sunnyvale May 20, 2010	Exhibitor booths offered free information to company employees that focused on helping them live a safer and healthier lifestyle. Our exhibit focused on various pollution prevention messages. We also provided general water pollution prevention literature about mercury, pesticides/IPM, car wash, automotive fluids, etc ... as well as water conservation.	This was a well-attended and busy event, with 213 employees spoken to and/or receiving information.

Event Details	Description (messages, audience)	Evaluation of Effectiveness
EMPLOYEE OUTREACH		
Sunnyvale Environmental Procurement Policy Training Water Pollution Control Plant	A 15 minute Power Point presentation was given to staff. Topics covered include purchasing recycled material, the City's IPM policy, and identification/proper disposal of mercury-containing products.	Approximately 42 employees were in attendance.
Plant Tours	Plant Tours are conducted year round. Treatment stages and processes are discussed, and attendees learn the function and importance of the wastewater treatment plant and its role of preventing water pollution from wastewater discharge. Both stormwater and wastewater pollution issues are discussed.	The Plant conducted 2 employee tours in FY 09-10, reaching 26 employees. Discussions about water pollution and issues impacting the watershed and the environment help tour attendees gain a better understanding of the problem. At the completion of the tour, attendees are given educational materials that promote environmentally responsible behaviors. See above under community outreach and Section C.7.h for additional outreach information. By the end of the tour, all participants knew the difference between sanitary sewers and storm sewers.
REGIONAL OUTREACH		
The following is information received from program on events that we participated in.		
Muslim Green Fair Muslim Community Association October 18, 2009	Type of Event: Community fair Audience: Families with children Message: Stormwater pollution prevention, less-toxic pest control and, proper disposal of HHW.	General Feed Back: This is a good event for reaching members of the Muslim community. The bean bag game was used at this event. Estimated Overall Event Attendance: 1,000 Number of Brochures Distributed: 14 Number of Giveaways Distributed: 221
Festival in the Park Hellyer County Park June 26, 2010	Type of Event: Community Health Fair Audience: Families with children Message: Stormwater pollution prevention, less-toxic pest control and, proper disposal of HHW.	General Feed Back: Good event for reaching the Hispanic community. The bean bag game drew a lot of families with children to the booth. Estimated Overall Event Attendance: 5,000 Number of Brochures Distributed: 418 Number of Giveaways Distributed: 365

For additional Regional efforts, see program's section of report.

C.7.g ► Citizen Involvement Events

Event Details	Description	Evaluation of Effectiveness
California Coastal Cleanup Day Sunnyvale site focused on Sunnyvale West Channel and a portion of Guadalupe Slough. September 19, 2009	Clean up along waterways.	Sunnyvale had 47 volunteers and collected approximately 675 pounds of trash and 100 pounds of recyclables (bottles / glass) during the event. Most common debris items: -over 300 plastic bottles (too numerous to count) -over 240 toys, including balls of all kinds- golf to soccer -over 320 pieces of Styrofoam packing materials or containers -over 260 shotgun shells/wadding A good, muddy time was had by all.
Great American Litter Pickup Sunnyvale had four sites: Columbia Neighborhood Center, Lakewood Park, Fair Oaks Park and Orchard Garden Park April 17, 2010	Collected litter from neighborhoods around location sites.	During the three hour event, 32 volunteers collected 725 pounds of trash and 125 of recyclables cans and bottles within a one-mile radius of each location site.
National River Clean Up Sunnyvale site focused on Sunnyvale East Channel and a portion of Calabazas/San Tomas Aquino Creek. May 16, 2010	Clean up along waterways.	Another successful event. Sunnyvale had 30 volunteers and collected approximately 440 pounds of trash (most common items were plastic bottles, styrofoam (pieces, packing material, and food/beverage containers, plastic bags, and cigarette butts) and 50 pounds of recyclables (glass, aluminum, and plastic) during the event. Approximately 1.6 miles of the Channel and creek were cleaned.
For additional Regional efforts, see program's section of report.

Sunnyvale Library Program Grades 1-3 August 6, 2010	A joint venture between Solid Waste and WPCP staff. The presentation was titled Pollution Solutions and focused on water pollution prevention and recycling.	Approximately 10 children and 5 adults attended	Well received by library staff and those in attendance. Was asked to come back and do an event around Earth Day.
Muslim Green Fair	See Appendix 7-3 for details		
Actions to Protect the Environment (APE) Meeting High School Students January 13, 2010	Spoke to Fremont High School's APE club in regards to stormwater pollution prevention and litter. Passed along brochures and took a loaner litter pick-up kit for them to start doing clean up activities around their school.	31 students 1 teacher	Teacher and president of club thought it was well received. Students asked several questions about safety and what more could be done.
Community Kidz Camp - Winter Break Session Ages 7-12, broken into two sessions of ages 7-9 and 10-12 February 16, 2010	Sponsored by the City twice a year during Winter and Spring school breaks. Through fun games and activities, camp participants learn about living a healthy lifestyle and how they can contribute to the welfare of the community they live in. Presentations focused on the difference between sanitary sewers and storm drains, leading to information about water pollution prevention. This was primarily done through discussion, student participation in an “Environmental Jeopardy” game, and a demonstration using the Enviroscape. In cooperation with Solid Waste staff who presented recycling information, Earth Care Kidz cards were given to participants.	27 campers 4 camp instructors / volunteers	Good great. Fished early so took group out on a litter hunt. In a 5 minute walk, they located over 100 pieces of trash in the park. Later in the week, staff went out with the youth and collected litter. Was asked if we could become a permanent part of the camp.

Judge AP Environmental Science Class Projects High School Students May 25, 2010	Homestead High's Advanced Placement Environmental Science classes work on a community outreach project titled, "Your World." This is a major project in which classes produce a comprehensive campaign that promotes a certain environmental cause. Students were responsible for setting up such events as community outreach or a press conference, a rally, and a fundraiser to make a positive environmental change in their community. One class pursed a campaign to promote awareness of storm drain pollution. The other class chose to work towards the eradication of plastic grocery bags. The project is structured as a competition between the two classes. The classes will participate in a culminating activity in which they present their projects. Outreach staff was asked to sit on a panel of 7 judges from the "real world" of environmental science to evaluate the projects. The idea is that students will gain feedback from professionals that will allow them to connect to the larger applications of the knowledge they have gained.	Approximately 40 students (2 classes) 1 teacher	A great opportunity for the students to gain feedback from professionals that will allow them to connect to the larger applications of the knowledge they have gained. Also, opened doors for a wide array of conversations related to the two presentations. Sunnyvale staff is working with some of the youth to be able to use some of the materials they created in future outreach pieces.
Festival in the Park	See Appendix 7-3 for details		

048748

Program Details	Focus & Short Description	Number of Students/Teachers Reached	Evaluation of Effectiveness
Plant Tours School Groups and Boy/Girl Scouts Grades 3-9	Students learn the stages of treatment by viewing the various processes, equipment, and tanks. They also learn the function and importance of the wastewater treatment plant and its role of preventing water pollution from wastewater discharge. Both stormwater and wastewater pollution issues are discussed.	The Plant conducted a total of 18 tours for school-age students / scouts during FY 09-10, reaching 440 youth and 87 adult chaperones. This was an increase of 17% for the number of youth that toured the facility from last fiscal year.	Discussions about water pollution and issues impacting the watershed and the environment help tour attendees gain a better understanding of the problem. By the end of the tour, all participants know the difference between sanitary sewers and storm sewers. At the completion of the tour, attendees are given educational materials that promote environmentally responsible behaviors and have the opportunity to ask any questions.
Creek Education Program	Water and Structures of Life. After studying the course in class, students take a creek education trip to McClellan Ranch Park as a supplement to their water studies course. This program is produced in partnership with the Cupertino School District.	This reporting year, Sunnyvale provided funding to cover the transportation cost of (4) buses, reaching 348 students, 14 teachers, and 65 parent helpers.	Sunnyvale will continue to support this program in the next fiscal year.

048749

Program Details	Focus & Short Description	Number of Students/Teachers Reached	Evaluation of Effectiveness
Classroom Presentations Various Sunnyvale Schools Grades K-5	In this water pollution education program, staff provides a presentation as well as a demonstration on water pollution and prevention. This is done primarily done through discussion that involves student participation and a demonstartion using the Enviroscape . Lesson plans vary depending on age of students. Topics include: the forms of water, the water cycle, what a watershed is, how water pollution happens, how to prevent water pollution, aquifers (includes building one in the classroom) and how to conserve water.	Outreach conducted 39 classroom presentations during FY 09-10 reaching approximately 893 students and 56 teachers / teacher aides. There was a slight increase (1%) in the amount of youth reached this school year. See class breakdown below.	Feedback from teachers indicated the information greatly improved student understanding of storm drains and water pollution caused by human activities, and teachers felt the program reinforced and supplemented their own curriculum. See appendix 7-6 for evaluation summary table.

For additional Regional efforts, see program's section of report.

Breakdown of Classroom Presentations

Classroom Presentations		Number of Students
Number of Kindergarten Classes	28	607
Number of First Grade Classes	1	22
Number of Second Grade Classes	1	20
Number of 4/5 Grade Classes	9	244
Number of Sunnyvale Schools	12	893

Provision C.7 – Public Information and Outreach

Appendix 7-6: C.7.h – School-Age Children Outreach Evaluation Summary Table

C.7.h ► School-Age Children Outreach Evaluation Summary Table

Evaluations were handed out to the teachers for all classroom presentations. The following is a summary of the evaluations returned. Number of classroom presentations - 39. Number of evaluations returned - 27.

Question	1 Strongly Disagree	2 Disagree	3 Agree	4 Strongly Agree	Other
1. The visuals were appropriate for the attending grade level.			2	25	
2. The visual aids were effective.			2	25	
3. The messages were communicated clearly.			2	25	
4. The content fit well with the student's current curriculum.			6	21	
5. The pace of the program was appropriate.			2	25	
6. The length of the program was appropriate.			2	25	
7. The presenter held the students' attention.			1	26	
8. The ratio of new and review material was well balanced.			3	22	received a ? and a N/A
9. The students enjoyed the presentation.			1	24	received a 5 and 4 ++
10. I would consider the program again next year.			1	26	

COMMENTS: A sampling of what was received. Evaluations are available for review.

What elements of the program were successful?

The kids could easily see how the waste moves towards the bay with the model.
All. However, the model city demo helped to solidify the info while putting it into perspective for students.
Visual aids were relevant and captivating. Lesson was relatable to their lives.
It was fabulous - material meshed nicely with science standards - they got extended info compared to what curricula cover, but it is real info. It is there watershed + a current issue - so it was very authentic learning.

What would you change or add to improve the program?

Nothing … it is an excellent program.
Some of the concepts seemed difficult for the students to understand. Not sure how to change that though. Overall great presentation!
Perhaps a bit less time on the carpet at the beginning (K class - gets wiggly)
Outstanding!! Great program.

048752

Section 9
Provision C.9 Pesticides Toxicity Control

Appendix 9-1: C.9.a – City of Sunnyvale Integrated Pest Management Policy

Integrated Pest Management Policy for City-Owned Facilities	**Administrative Policy Manual** **Chapter 6 – Facilities & Equipment** ***Article 12***
	Attachments: *none*
Effective Date: June 1, 2010	**Responsible Department:** Department of Public Works
Prior Version & Notes: Prior Version: November 2002	

Section 1. Purpose

This policy sets forth the guiding principles for development and implementation of an Integrated Pest Management (IPM) program for all City properties and facilities. The goals of the IPM policy and its implementation throughout the city are to:

- Create awareness among City staff of the Integrated Pest Management program.
- Provide education for all City departments to practice the most appropriate approach to managing pests on City properties and facilities.
- Reduce or eliminate pesticide use on City properties and facilities while providing guidelines for their use when appropriate.
- Eliminate adverse impacts to the environment due to pesticide usage including water quality (both in urban streams and South San Francisco Bay), composted green waste and soil quality.

Subd. 1. Background

The City's National Pollutant Discharge Elimination System (NPDES) permit from the California Regional Water Quality Control Board (NPDES Permit No. CAS 612008 Order R2-2009-0074) requires that the City develop and implement a pesticide toxicity control policy to address urban stream impairment by pesticides. In particular, organophosphorus-containing pesticides (e.g., Diazinon, chlorpyrifos, and Malathion); pyrethroid pesticides (e.g., bifenthrin, cyfluthrin, beta-cyfluthrin, cypermethrin, deltamethrin, esfenvalerate, lambda-cyhalothrin, permethrin, and tralomethrin); carbamates (e.g., carbaryl); and fipronil have been found to persist in the environment and cause water quality or aquatic life impairment of some South San Francisco Bay area urban creeks and streams. Also, the City is required to limit discharges of copper into South San Francisco Bay by its NPDES permit. Using less toxic chemical and non-chemical controls instead of using organophosphates, pyrethroids, carbamates, fipronil, and copper-based pesticides to control pest problems will help reduce the impacts to urban streams and South San Francisco Bay.

Clopyralid is the very persistent active ingredient in a number of herbicides that can be used for weed control. Very small amounts of Clopyralid contained in green waste that is collected for composting will continue to be active and cause

the finished compost product to adversely affect plants to which it is applied. However, Clopyralid is also a valuable herbicide for managing the noxious thistle family of weeds that may infest native grass areas and restoration projects. Restrictions on the collection of green waste for composting from Clopyralid-treated areas are included in this policy to prevent the contamination of compost products produced at the SMaRT Station or other City facilities.

Section 2. Policy

Subd. 1. Definitions

The following definitions are used in this Article:

Biological control – The use of biological technologies to manage unwanted pests. Examples of this type of control include, but would not be limited to the use of pheromone traps or beneficial insect release for control of certain types of weeds or invasive insects in landscapes.

Cultural control - The use of IPM control methods such as mulching, grazing, re-vegetation and seeding or landscaping with competitive or tolerant species to manage unwanted weeds, rodents or plant diseases.

DPR - Department of Pesticide Regulations for the State of California's Environmental Protection Agency. DPR, in partnership with Federal Environmental Protection Agency (EPA) and County Department of Agriculture, oversees all issues regarding the registration, licensing and enforcement of laws and regulations pertaining to pesticides.

Environmental Stewardship - The strategic approach to pest management in which the IPM practitioners focus on preserving the natural integrity and health of the environment, including public safety, while recommending or applying pest management methods. Environmental Stewardship philosophy helps to create awareness of the Best Management Practices (BMPs) and their relationship to maintaining a healthy environment while conducting pest management activities.

Integrated Pest Management (IPM) – IPM is a strategic ecosystem-based approach that focuses on the long-term prevention of pests and their damage from reaching unacceptable levels, by selecting and applying the most appropriate combination of available techniques. These include assessment and monitoring, cultural, mechanical, biological and chemical controls and the use of resistant varieties. Pesticides are used only after monitoring indicates that they are needed, according to established thresholds. Pesticide treatments are made with the goal of removing only the target organism and are implemented for a given site and pest situation in ways that minimize risks to human health, beneficial and non-target organisms and the environment.

PCA – PCA or Pest Control Advisor is one licensed by the California Department of Pesticide Regulations according to Title 3, Article 5 of the California Code of Regulations. Only a licensed PCA who is registered with the County Agricultural Commissioner, may provide written pest control recommendations for agricultural and non-agricultural pest management, including parks, cemeteries, golf courses, and rights-of-way.

Pesticides – Defined in Section 12753 of the California Food and Agricultural Code as any spray adjuvant, or any substance, or mixture of substances intended to be used for defoliating plants, regulating plant growth, or for preventing, destroying, repelling, or mitigating any pest, as defined in Section 12754.5 (of the Food and Agricultural Code), which may infest or be detrimental to vegetation, man, animals, or households, or be present in any agricultural or nonagricultural environment whatsoever. The term pesticide applies to herbicides, insecticides, fungicides, rodenticides and other substances used to control pests. Antimicrobial agents are not included in this definition of pesticides

Physical/Mechanical controls – The use of IPM control methods utilizing hand labor or equipment such as mowers, graders, weed-eaters, and chainsaws. Crack and crevice sealants and closing small entryways (i.e., around pipes and conduits) into buildings for insect and rodent management are also mechanical controls.

QAC - Qualified Applicators Certificate is a certified applicator of pesticides according to Title 3, Article 3 of the California Code of Regulations. Applications may include residential, industrial, institutional, landscape, rights-of-way sites.

QAL - Qualified Applicators License is a licensed applicator according to Title 3, Article 3 of the California Code of Regulations. This license allows supervision of applications that may include residential, industrial, institutional, landscape, or rights-of-way sites.

Structural Pest Control Operator (Branch I, II or III) – These are licensed applicators for pest control within buildings and homes according to the requirements of the Structural Pest Control Board of the California Department Pesticide Regulations.

Subd. 2. Integrated Pest Management (IPM) Policy

The City of Sunnyvale, including all departments and staff herein, and contractors providing pest control services on City property shall follow the City's IPM policy for the control or management of pests in and around City buildings and facilities, parks and golf courses, urban landscape areas, rights-of-way, and other City properties.

A. Pest Control Advisor (PCA)

Licensed PCAs will consider the options or alternatives listed below in the following order, before recommending the use of or applying any pesticide on City property:

(1) No controls (e.g., tolerating the monitored level of pest infestation, use of resistant plant varieties or allowing normal life cycle of weeds)

(2) Physical or mechanical controls (e.g., hand labor, mowing, etc.)

(3) Cultural controls (e.g., mulching, disking, alternative vegetation, use of goats)

(4) Biological controls (e.g., natural enemies or predators)

(5) Reduced-risk chemical controls (e.g., soaps or oils)

B. Pesticide Applicator (QAL, QAC, or Structural Pest Control Operator)

(1) Those licensed or certified City staff and contractors who are employed by the City to control or manage pests will follow the IPM Best Management Practices and Standard Operating Procedures found in the City of Sunnyvale Urban Runoff Management Plan (URMP) Pest Management Control Program chapter.

(2) Pesticide Applicators will use the most current IPM approaches or technologies available to ensure the long-term prevention or suppression of pest problems and to minimize negative impacts on the environment, non-target organisms, and human health.

C. All City Staff and Departments

(1) City departments and staff will promote non-toxic and reduced-risk alternatives for structural and landscape pest control, seeking to use the most up to date IPM technologies and best management practices.

(2) The City will provide education for all City staff regarding IPM practices. The Public Works Department/Environmental Division will also provide information to residents and businesses within the City regarding the IPM Policy and how it is being implemented. The City, through Public Works Department/ Environmental Division activities, will establish a role model approach to encourage the use of IPM techniques for structural and landscaping pest management practices with residents and, businesses.

D. Pest Management Contractors Employed by the City

(1) New contracts that are negotiated with pest management contractors doing work on City-owned property after June 30, 2010 will include requirements that the contractors follow the practices of the City's IPM Policy as described in the Sunnyvale Administrative Policy Manual and the Best Management Practices (BMPs) and Standard Operating Procedures (SOPs) of the Sunnyvale Urban Runoff Management Plan, Pest Management Control Program chapter.

(2) Copies of these BMPs and SOPs in the Pest Management Control Program chapter of the Urban Runoff Management Plan are available from the Environmental Division Manager.

(3) City staff overseeing pest control contracts for City property or structures will annually provide documentation to the Environmental Division Manager that confirms contractor

compliance with the City's IPM policy. Documentation will include the list of contractors used, a brief description of pest control techniques used, and a copy of the specific contract language included in their contract that addresses the City's IPM Policy. This information is required for the City's NPDES Stormwater Permit Annual Report.

E. City Property Leaseholders

(1) The City shall use reasonable efforts to require the use of IPM practices as a part of new and renewed leases negotiated for City property after June 30, 2010.

(2) City property leaseholders will be informed of the City's IPM Policy by Public Works Department staff and encouraged to use, whenever practical, the IPM Best Management Practices and Standard Operating Procedures described in the Sunnyvale Urban Runoff Management Plan.

Subd. 3. **Pesticide Application**

A. Who May Apply Pesticides

(1) Only City employees or pest control contractors employed by the City who are authorized to recommend and/or trained to apply pesticides (i.e., hold PCA, QAL, QAC, or Structural Branch Operator I, II, or III certifications or licenses) may apply any pesticides to City property. City staff who are not QACs, but have received mandatory state training and are under the direct supervision of a QAC, may also apply pesticides.

(2) City employees who are not authorized and trained in pesticide application are prohibited from using any pesticides, including over-the-counter brands, in or around the work place. If insects or other pests are infesting an indoor work area, contact Facilities Services (x7761) to arrange for a pest management contractor to apply the appropriate control methods. If an outdoor area is infested then contact the Parks Division (x7506).

(3) PCAs will write a recommendation for the use of each pesticide product before it is applied on City-owned property.

B. Pesticides of Concern

(1) City employees and/or contractors employed by the City who are trained to recommend or apply pesticides will not use Category I and II pesticides, organophosphorus pesticides (e.g., Diazinon, chlorpyrifos, Malathion); pyrethroid pesticides (e.g., bifenthrin, cyfluthrin, beta-cyfluthrin, cypermethrin, deltamethrin, esfenvalerate, lambda-cyhalothrin, permethrin, tralomethrin); carbamates (e.g., carbaryl); fipronil; or copper-based pesticides unless:

(a) Their use can be justified,

(b) Other approaches and techniques have been considered and determined to be ineffective; and

(c) Adverse water-quality impacts are eliminated through use of appropriate application techniques.

2) Pesticides that contain Clopyralid are of concern because they are persistent and must not enter the green waste recycling or composting process. Therefore, City employees or pest control contractors employed by the City will not apply Clopyralid-containing pesticides to City property unless:

(a) Their use can be justified,

(b) Other approaches and techniques have been considered and determined to be ineffective, and;

(c) Green waste (grass clippings, etc.) from areas where Clopyralid-containing pesticides are to be applied will not be collected for composting, but will be left on site to promote a healthy thatch layer.

C. Water Quality Management

(1) When recommending pesticides for use or applying pesticides, the element of Environmental Stewardship must always be taken into consideration. City employees or pest control contractors employed by the City will select and apply IPM methods that will have the least impact on water quality and the environment.

(2) City employees or pest control contractors employed by the City will always avoid applications of pesticides that directly contact water, unless the pesticide is registered under Federal and California law for aquatic use. Pesticides that are not approved for aquatic use will not be applied to areas immediately adjacent to water bodies where through drift, drainage, or erosion, there is a possibility of a pesticide being transported into surface water.

(3) Discharges of pollutants from the use of aquatic pesticides to the waters of the United States require coverage under a NPDES permit. Those city employees or pest control contractors employed by the City who apply pesticides directly to waters of the United States will obtain a NPDES permit from the California State Water Quality Resources Control Board Region 2, prior to making any pesticide applications.

Subd. 4. **Employee and Pest Control Contractor Training for PCA, QAL, QAC or Structural Pest Control Operators (Branch I, II, and III)**

A. All Pest Control Advisors and Applicators employed by the City or its pest control contractors will be licensed by the State of California Department of Pesticide Regulations (DPR) as a Pest Control Advisor or licensed Qualified Applicator.

B. All other employees involved with pesticide applications as a normal part of their job duties and pest control contractors hired by the City will be trained as required by State of California DPR rules, the County

Agricultural Commissioner, and/or the Structural Pest Control Board. They will work under the direct supervision of a licensed applicator.

C. All City Departments that use pesticides on City property will provide annual training to all employees who apply pesticides as a normal part of their job duties on:

- Pesticide Safety, as contained in the California Department of Pesticide Regulation, Pesticide Safety Information (PSI) series for Non-agricultural use.
- The City's IPM Policy,
- Appropriate BMPs and SOPs from the Sunnyvale Urban Runoff Management Plan, Pest Management Control Program chapter. and
- New techniques for implementing IPM, as appropriate.

Subd. 5. **Education and Outreach on the Sunnyvale IPM Policy and Implementation Plan**

A. The Public Works Department/Environmental Division, in participation with the Santa Clara Valley Urban Runoff Pollution Prevention Program, will continue with its existing program to encourage people who live, work, and/or attend school in Sunnyvale to:

(1) Obtain information on IPM techniques to control pests and minimize pesticide use;
(2) Use IPM approaches for dealing with pest problems;
(3) Properly dispose of unused pesticides and their containers in cooperation with County Household Hazardous Waste collection programs: and
(4) Provide information about the EcoWise Certified IPM certification in Structural Pest Management or functionally equivalent programs.

B. The Public Works Department/Environmental Division will implement a public outreach program on the topics described above to include:

(1) City employees who are not authorized to apply pesticides as a part of their normal job duties.

(2) Business owners and their employees.

(3) Residents of Sunnyvale, including schools and youth.

Subd. 6. **Reporting**

A. To provide details on pesticide use on City-owned property for reporting requirements required in the City's Municipal Regional NPDES Stormwater Discharge Permit, each City department and any pest control contractors employed by the City will submit copies of their State of California Monthly Summary Pesticide Use Report (Form PR-ENF-060) or equivalent information showing types, quantities, and locations of pesticides applied to city property and structures to the Environmental

Division Manager of the Public Works Department. This information will be provided on a monthly basis and will be compiled by the Public Works Department/ Environmental Division staff to meet annual permit reporting requirements.

(1) Any contractors hired by the City who may hire sub-contractors to perform pest control work, will be responsible for reporting pesticide use information listed in (A) above, to the City for pest control work performed by their sub-contractors.

B. Each City department that applies pesticides will conduct an annual inventory by December of each calendar year to identify pesticides that are no longer legal or appropriate for applications per Federal, State, County, or City requirements. Those products no longer deemed acceptable for use will be properly disposed of by the department or division that purchased them, in accordance with applicable State and Federal laws.

C. Each City department that applies pesticides will conduct an annual review and evaluation process of the effectiveness of the City's IPM Policy, BMPs and SOPs. They will provide a written evaluation to the Environmental Division Manager of the Public Works Department in July of each year that discusses:

(1) New IPM techniques that could be used to improve results

(2) Staff training needs with a focus on the safe use, disposal, and storage of pesticides

(3) Suggested modifications to the City's IPM Policy, BMPs, and SOPs to ensure that the Policy and implementation plan continue to be effective.

D. Environmental Division staff will compile IPM program implementation information and report data from other City Departments/Divisions as required in the City's NPDES Stormwater Permit Annual Report.

Section 9
Provision C.9 Pesticides Toxicity Control

Appendix 9-2: C.9.b - Implement IPM Policy or Ordinance

Implementation of the Integrated Pest Management (IPM) Best Management Practices in Sunnyvale

The City of Sunnyvale has had an IPM policy in place since 2002, which focused on reducing the use of organophosphorous (OP) pesticides. With the new requirements of the MRP adopted in October 2009, the City has been in the process of amending its current policy to address the new pesticides of concern that can affect water quality and aquatic life. The City's revised IPM policy became effective in June 2010. A copy of the revised policy is included in Appendix 9-1.

The City has been tracking and reporting the top five quantities of pesticides used in previous annual reports submitted to the Water Board (FY 03-04 through FY 09-09). We have reviewed our data tables from the past few years, in light of the change in focus on the specific pesticides of concern listed in Provision 9 of the MRP. We are providing this data in the table below to show that although the use of OP pesticides has not occurred in the past five years, the City or its contractors have used some pesticides containing pyrethroids, carbaryl, and fipronil.

Table 1. Pesticides of Concern Usage in Sunnyvale 2006-2010

2006

Product Name	Active Ingredient	Quantity of Active Ingredient Applied (annually)	Who Applied (City/Contractor)	Precautions Taken
Tempo	Cyfluthrin	991.6 oz (liquid)	Contractor	Unknown, but generally sprayed in doorways or enclosed areas for spiders (e.g., black widows)
Talstar	Bifenthrin	134.4 oz (solid)	Contractor	unknown
Max Force Pro Ant & Roach Baits	Fipronil	0.09 oz (solid)	Contractor	Bait station
Tengard	Permethrin	262.6 oz (liquid)	Contractor	unknown
Termidor	Fipronil	8.8 oz (liquid)	Contractor	unknown
Drion Dust	Pyrethrin	0.002 oz (solid)	Contractor	Crevice dusting

048763

	Piperonyl Butoxide	0.018 oz (solid)		applications
Spectracide	Piperonyl Butoxide Tetramethrin Permethrin	0.8 oz (liquid) 0.2 oz (liquid) 0.4 oz (liquid)	City/Golf	Spray for identified wasp/hornet nest

2007

Product Name	Active Ingredient	Quantity of Active Ingredient Applied (annually)	Who Applied (City/Contractor)	Precautions Taken
Tempo	Cyfluthrin	695.6oz (liquid)	Contractor	Unknown, but generally sprayed in doorways or enclosed areas for spiders (e.g., black widows)
Talstar	None used this year			
Max Force Pro Ant & Roach Baits	Fipronil	0.17 oz (solid)	Contractor	Bait station
Tengard	Permethrin	353.3 oz (liquid)	Contractor	unknown
Termidor	Fipronil	23.5 oz (liquid)	Contractor	unknown
Drion Dust	Pyrethrin Piperonyl Butoxide	0.4 oz (solid) 2.7 oz (solid)	Contractor	Crevice dusting applications
Spectracide	Piperonyl Butoxide Tetramethrin Permethrin	0.4 oz (liquid) 0.1 oz (liquid) 0.2 oz (liquid)	City/Golf Div.	Spray for identified wasp/hornet nest

2008

Product Name	Active Ingredient	Quantity of Active Ingredient Applied (annually)	Who Applied (City/Contractor)	Precautions Taken
Tempo	Cyfluthrin	572.5oz (liquid)	Contractor	Unknown, but generally

048764

				sprayed in doorways or enclosed areas for spiders (e.g., black widows)
Talstar	None used this year			
PT 565	Pyrethrins & Piperonyl Butoxide	0.06 oz (solid) 0.12 oz (solid)	Contractor	Crack and crevice spray
Max Force Pro Ant & Roach Baits	Fipronil	0.14 oz (solid)	Contractor	Bait station
Tengard	Permethrin	847.87 oz (liquid)	Contractor	unknown
Termidor	Fipronil	0,8 oz (liquid)	Contractor	unknown
Drion Dust	Pyrethrin Piperonyl Butoxide	0.2 oz (solid) 0.44 oz (solid)	Contractor	Crevice dusting applications
Cutrine Plus	Copper (elemental)	88 oz (solid)	City/Golf Div.	Runoff not leaving property
Spectracide	Lambda-cyhalothrin Prallethrin	.007 oz (liquid) .015 oz (liquid)	City/Golf Div.	Spray for identified wasp/hornet nest
Bugetta	Carbaryl	.096 oz (liquid)		Runoff not leaving property
Turcam	Bendiocarb (carbamate)	12 oz (solid)	City/Golf Div.	Runoff not leaving property

2009

Product Name	Active Ingredient	Quantity of Active Ingredient Applied (annually)	Who Applied (City/Contractor)	Precautions Taken
Tempo	Cyfluthrin	584.3oz (liquid)	Contractor	Unknown, but generally sprayed in doorways or enclosed areas for spiders (e.g., black

048765

				widows)
Talstar	None used this year			
PT 565	Pyrethrins & Piperonyl Butoxide	0.005 oz (solid) 0.01 oz (solid)	Contractor	Crack and crevice spray
Max Force Pro Ant & Roach Baits	Fipronil	0.14 oz (solid)	Contractor	Bait station
Tengard	None Applied in 2009			
Termidor	None Applied in 2009			
Drione Dust	None Applied in 2009			
Spectracide	Lambda-cyhalothrin Prallethrin	.005 oz (liquid) .014 oz (liquid)	City/Golf Div.	Spray for identified wasp/hornet nest

1/1/-2010 – 6/1/2010

Product Name	Active Ingredient	Quantity of Active Ingredient Applied (1/1/2010 – 6/1/2010)	Who Applied (City/Contractor)	Precautions Taken
Tempo	Cyfluthrin	313.6 oz (liquid)	Contractor	Unknown, but generally sprayed in doorways or enclosed areas for spiders (e.g., black widows)
Talstar	None used to date			
PT 565	None used to date			
Max Force Pro Ant & Roach Baits	Fipronil	0.00012 oz (solid)	Contractor	Bait station
Tengard	None used to date			
Termidor	None used to date			
Drione Dust	None used to date			
Delta Dust	Deltamethrin	0.0075 oz (solid)	Contractor	Crack and crevice dust

048766

Since the adoption of our revised IPM policy, the City is working with the pest control contractor performing most of the structural pest control applications that use products containing pyrethroids and fipronil to either identify other pest control products that could be used which do not contain the pesticides of concern, or if none are available, to put into place measures that will reduce or eliminate potential stormwater contact and thus runoff that might contain the pesticides of concern.

Talstar, Tengard, Termidor and Drione Dust, products all containing pyrethroids for structural pest control, were not used in FY 08-09 and in FY 09-10. We are working with the city's structural pest control contractor to identify other options that do not contain the pesticides of concern listed in the City's IPM policy. If a problem is significant, and can only be controlled using one of the pesticides of concern, measures will be included to reduce or eliminate the potential for water quality impacts.

Currently, Tempo, a product containing Cyfluthrin is used around building entrances and within buildings to control spiders (in particular, black widow spiders). The amount of the pesticide applied will vary from year-to-year, depending on weather conditions and pest life-cycles. We are working with the City's contractor to identify a different material to assist with their control and in the mean time they are making sure application practices and procedures are used that will limit potential impacts to stormwater quality.

Golf Division staff will sometimes use Spectracide to control identified wasp/hornet nests that are threats to public safety. Though this material contains pyrethroids, its use is limited, the quantity of active ingredient applied is small, and is done as a spot treatment. A similar situation occurs for carbamates use by Golf staff. Applications are limited to specific areas, the quantity of active ingredient is small, and measures are in place to ensure any runoff does not leave the property.

Other products such as Maxforce Pro and Delta Dust that contain Fipronil or pyrethroids are baits or crack/crevice dusts, which have a very limited potential for coming into contact with stormwater, as they are used inside structures in spot locations.

Since 2006, the City's contractor has been using alternatives to products containing pyrethroids (e.g., Bifenthrin – Talstar) for outdoor ant control measures. The products currently in use do not contain pyrethroids. Instead, they use a combination of eugenol and thyme oil, or cornmint oil.

With the recent revisions to the City's IPM policy, the use of products that have the potential to impact water quality will continue to be reduced.

Duplicate Blanket Purchase Order NO **BL002404**

ITEM	DESCRIPTION	UNIT	UNIT COST
9	Miscellaneous pest control work, as required Requisition Number: RQ006316 This purchase order replaces BL001737 1. The contractor shall follow the policies for Integrated Pest Management outlined in the City's Administrative Policy Manual, Chapter 6, Article 12 - Integrated Pest Management Policy for City-Owned Facilities for both structural or landscape pest control activities. 2. The Contractor shall provide records on location, product name, manufacturer,EPA/California registration number from the label, and quantity (pounds or gallons) of pesticides applied to city-owned property or structures to the Environmental Division Manager on a monthly basis for NPDES Stormwater Permit reporting purposes. 3. Before any of the pesticides listed in the Administrative Policy Manual, Chapter 6, Article 12, Subdivision 3.B (Pesticides of Concern) are applied, the contractor must provide a written recommendation from a Pest Control Advisor, licensed by the State of California, Department of Pesticide Regulations that includes a justification for its use, lists other approaches and techniques that have been considered and determined to be ineffective, and how adverse water quality impacts will be eliminated through the use of appropriate application techniques.	DLR	$1.0000

Potential Data Points with Definitions

Data Points	Definitions
I. Site Information	
Site ID#	The unique identification number assigned to the site. The site ID# will be used to track trash hot spot activities within databases or other tabular formats.
Site Location	The exact physical location of the upstream and/or downstream ends of the trash hot spot in relation to roads and/or physical landmarks (e.g., bridge crossings, outfalls) on the creek (e.g., Coyote Creek, outfall located 100 feet downstream of Julian Street Bridge). Alternatively, for larger hot spots, provide a length of creek between two different roads/bridge crossings or other physical landmarks (e.g., Guadalupe River between W. Hedding Street and Coleman Avenue).
Latitude	The geographic coordinate north or south of the equator. Latitude should be taken at the downstream end of the trash hot spot (preferably in decimal degrees to at least four decimal places) with a GPS receiver. Record the datum setting of the unit preferably in NAD83/ WGS84.
Longitude	The geographic coordinate east or west of the prime meridian (0 degrees longitude). Longitude should be taken at the downstream end of the trash hot spot (preferably in decimal degrees to at least four decimal places) with a GPS receiver. Record the datum setting of the unit preferably in NAD83/ WGS84.
Watershed	The watershed where the trash hot spot is located. See www.scvurppp.org for list.
Waterbody	The waterbody (i.e., creek, river or other waterway) where the trash hot spot is located.
Ownership	The owner of the land where the trash hot spot is located. Possible answers are public, private, SCVWD or unknown.
Jurisdiction(s)	The jurisdiction(s) responsible for trash hot spot assessment and cleanup. Multiple jurisdictions may exist for certain water bodies (e.g., San Francisquito Creek).
II. Trash Information	
1. Potential Trash Types	
Convenience/Fast Food Items	Waste packaging, (i.e., plastic or paper) from convenience foods (e.g., potato chips, snack foods, candy bars, gum, etc.) and other wastes (e.g., bags, napkins, etc.) generated from fast food establishments or carry out restaurants.
Other Plastic Products	Plastic Bottle Caps, Plastic Cup Lid/Straw, Plastic Pipe Segments, Plastic Six-Pack Rings, Plastic Wrappers, Soft Plastic Pieces, Hard Plastic Pieces, Fishing Line, Tarp
Paper and Cardboard	Cups, Boxes, Newspapers, Magazines, Mail, Flyers and all other products made of paper or cardboard.
Metal Products	Aluminum Foil, Aluminum or Steel Cans, Bottle Caps, Metal Pipe Segments, Auto Parts, Wire (barb, chicken wire etc.), Metal Objects
Biohazards	Human Waste/Diapers, Pet Waste, Syringes or Pipettes, Dead Animals
Construction Debris	Concrete (not placed), Rebar, Bricks, Wood Debris
Toxic Substances	Chemical Containers, Oil/Surfactant on Water, Lighters, Small Batteries, Vehicle Batteries
Large Items	Appliances, Furniture, Garbage Bags of Trash, Tires, Shopping Carts
Miscellaneous Items	Synthetic Rubber, Foam Rubber, Balloons, Ceramic Pots/Shards, Hose Pieces
Fabric and Cloth	Synthetic Fabric, Natural Fabric (cotton, wool)
Other	All other materials or products not on the above list.
2. Potential Trash Pathways/Sources	
Trash Accumulation	Litter/trash observed to be accumulating in creeks below the high water line. Litter/trash is may be worn and aged in appearance; consist of light-weight, persistent and buoyant trash items (e.g., plastic bags, plastic bottles); and observed caught in surrounding vegetation, tree branches and rocks.
Litter	Improperly disposed/discarded wastes or other items observed in creek channels and/or creek banks. Commonly referred to as "trash". Litter/trash appears relatively "new" in appearance. Litter/trash is usually located in areas accessible to the public.
Illegal Dumping	Illegal dumping or discarding of larger quantities/sizes of litter/trash directly into a waterway or in close proximity to a creek. Garbage bags of trash or other unwanted items, appliances, furniture, tires, shopping carts and other large items are usually observed at illegal dump sites.
Homeless Encampments	Areas where homeless individuals live or congregate.
Outfall	The point where the storm drain system discharges (i.e., usually from a pipe) into a receiving water or channel.
Multiple	The contribution of more than one trash pathway/source listed above. List all potential pathways/sources.
Other	All other potential sources not described above.
Unknown	Trash source can not be determined or are known.
3. Adjacent Land Uses to Trash Areas	
Adjacent Land Uses to Trash Areas	Residential (Single-family), Residential (High-density), Commercial, Industrial, Public/Institutional, Mixed-use, Other Developed
III. Trash Removal	
Volume of Trash Removed During Cleanup (Un-Compacted)	
Size of Trash Bag (in gallons)	Size of trash bag (in gallons) used to remove trash during cleanup.
Total Bags	Total number of bags of trash removed during cleanup.
Cubic Yards	Estimated cubic yards of trash removed during cleanup.
Wet Weight (lbs)	Wet weight (in pounds) of trash removed during cleanup.
IV. Photo Documentation	
Photo #	The number assigned to a photograph taken to depict trash condition before or after trash cleanup. At creek hot spots, a total of 12 photographs (6 before cleanup and 6 after cleanup) are required. At shoreline hot spots, a total of 24 photographs (12 before cleanup and 12 after cleanup) are required.
Segment ID	The segment ID (i.e., A-L) where the photograph was taken to depict trash condition before or after trash cleanup. Segment IDs A-F correspond to both creek and shoreline hot spots, while segment IDs G-L only correspond to shoreline hot spots.
Optional Photographs After Cleanup	The number assigned to optional photographs taken to illustrate the volume of trash collected during the cleanup.
Notes	Comments or other notes regarding photo documentation.

Convenience/Fast Food Items	Waste packaging, (i.e., plastic or paper) from convenience foods (e.g., potato chips, snack foods, candy bars, gum, etc.) and other wastes (e.g., bags, napkins, etc.) generated from fast food establishments or carry out restaurants.
Other Plastic Products	Plastic Bottle Caps, Plastic Cup Lid/Straw, Plastic Pipe Segments, Plastic Six-Pack Rings, Plastic Wrappers, Soft Plastic Pieces, Hard Plastic Pieces, Fishing Line, Tarp
Paper and Cardboard	Cups, Boxes, Newspapers, Magazines, Mail, Flyers and all other products made of paper or cardboard.
Metal Products	Aluminum Foil, Aluminum or Steel Cans, Bottle Caps, Metal Pipe Segments, Auto Parts, Wire (barb, chicken wire etc.), Metal Objects
Biohazards	Human Waste/Diapers, Pet Waste, Syringes or Pipettes, Dead Animals
Construction Debris	Concrete (not placed), Rebar, Bricks, Wood Debris
Toxic Substances	Chemical Containers, Oil/Surfactant on Water, Lighters, Small Batteries, Vehicle Batteries
Large Items	Appliances, Furniture, Garbage Bags of Trash, Tires, Shopping Carts
Miscellaneous Items	Synthetic Rubber, Foam Rubber, Balloons, Ceramic Pots/Shards, Hose Pieces
Fabric and Cloth	Synthetic Fabric, Natural Fabric (cotton, wool)
Other	All other materials or products not on the above list.
2. Potential Trash Pathways/Sources	
Trash Accumulation	Litter/trash observed to be accumulating in creeks below the high water line. Litter/trash is may be worn and aged in appearance; consist of light-weight, persistent and buoyant trash items (e.g., plastic bags, plastic bottles); and observed caught in surrounding vegetation, tree branches and rocks.
Litter	Improperly disposed/discarded wastes or other items observed in creek channels and/or creek banks. Commonly referred to as "trash". Litter/trash appears relatively "new" in appearance. Litter/trash is usually located in areas accessible to the public.
Illegal Dumping	Illegal dumping or discarding of larger quantities/sizes of litter/trash directly into a waterway or in close proximity to a creek. Garbage bags of trash or other unwanted items, appliances, furniture, tires, shopping carts and other large items are usually observed at illegal dump sites.
Homeless Encampments	Areas where homeless individuals live or congregate.
Outfall	The point where the storm drain system discharges (i.e., usually from a pipe) into a receiving water or channel.
Other	All other potential sources not described above.
Unknown	Trash source can not be determined or are known.
3. Adjacent Land Uses to Trash Areas	
Adjacent Land Uses to Trash Areas	Residential (Single-family), Residential (Multi-Family), Commercial, Urban Park, Freeway, Industrial, Public/Institutional, Mixed-use, Other Developed
III. Trash Removal	
Volume of Trash Removed During Cleanup (Un-Compacted)	
Size of Trash Bag (in gallons)	Size of trash bag (in gallons) used to remove trash during cleanup.
Total Bags	Total number of bags of trash removed during cleanup.
Cubic Yards	Estimated cubic yards of trash removed during cleanup.
Wet Weight (lbs)	Wet weight (in pounds) of trash removed during cleanup.
IV. Photo Documentation	
Segment ID	The segment ID (i.e., A-L) where the photograph was taken to depict trash condition before or after trash cleanup. Segment IDs A-F correspond to both creek and shoreline hot spots, while segment IDs G-L only correspond to shoreline hot spots.
Photo #	The number assigned to a photograph taken to depict trash condition before or after trash cleanup. Within each segment, a minimum of one photograph must be taken before the cleanup and one photograph after the cleanup - for a total of 6 before and 6 after photographs for 300 ft creek hot spots and 12 before and 12 after photographs for shoreline hot spots. Additional photographs may be taken within each hot spot.
Optional Photographs After Cleanup	The number assigned to optional photographs taken to illustrate the volume of trash collected during the cleanup.
Notes	Comments or other notes regarding photo documentation.

Trash Hot Spot Cleanup Data Collection Form

Cleanup Date: 05/18/2010

I. Site Information

Site ID# snv03 Site Location: Guadalupe Slough site 1

Lat: 37.43528 Long: -122.02699 Watershed: Baylands Waterbody: Guadalupe Slough

Ownership: SCVWD Jurisdiction(s): SCVWD, Sunnyvale, San Jose

II. Trash Information

1. Describe trash type. **Rank five most prevalent trash types (1-5, 1 being the most prevalent).** ***List of potential trash types on back.*** **OPTIONAL: Provide qualitative estimate of total trash types by volume.**

____ Plastic bags (_____%)	____ Cigarette butts (_____%)	____ Miscellaneous items* (_____%)
____ Convenience/Fast Food items* (_____%)	____ Spray paint cans (~1 %)	____ Fabric and cloth* (_____%)
4 Bottles (plastic or glass) (~20 %)	____ Metal products* (_____%)	____ Yard waste (incl. trees) (_____%)
____ Aluminum cans (~1-2%)	____ Biohazards* (_____%)	____ Leaf litter piles (_____%)
1 Styrofoam (pieces or pellets) (~25 %)	2 Construction debris* (~25 %)	____ Glass pieces (_____%)
____ Other plastic products* (_____%)	____ Toxic substances* (_____%)	3 Golf or tennis balls (~20 %)
____ Paper and cardboard* (_____%)	____ Large items* (_____%)	5 Other* shotgun shells ~5%
		____ Other* fire extinguisher ~1-2%

2. Potential trash pathways/sources (**Check all that apply**):

☒ Trash accumulation	☐ Homeless encampments	☐ Other _____
☒ Litter	☐ Outfall _____	☐ Unknown _____
☐ Illegal dumping	☐ Multiple _____	

3. Identify adjacent land uses to trash area: ☐ Residential (Single-family) ☐ Residential (High-density) ☐ Commercial ☐ Industrial ☒ Public/Institutional ☐ Mixed-use ☐ Other Developed

III. Trash Removal

Volume of Trash Removed During Cleanup (Un-compacted)

Size of trash bag (in gallons): 13

Total # of bags: 7 + 8 cu ft of lumber (not bagged) Cubic Yards

(Optional)

OR Wet Weight (lbs.): *~220 lbs

*Estimated 20 lb/bag and 80lbs for lumber

IV. Photo Documentation

Potential Data Points with Definitions

Data Points	Definitions
I. Site Information	
Site ID#	The unique identification number assigned to the site. The site ID# will be used to track trash hot spot activities within databases or other tabular formats.
Site Location	The exact physical location of the upstream and/or downstream ends of the trash hot spot in relation to roads and/or physical landmarks (e.g., bridge crossings, outfalls) on the creek (e.g., Coyote Creek, outfall located 100 feet downstream of Julian Street Bridge). Alternatively, for larger hot spots, provide a length of creek between two different roads/bridge crossings or other physical landmarks (e.g., Guadalupe River between W. Hedding Street and Coleman Avenue).
Latitude	The geographic coordinate north or south of the equator. Latitude should be taken at the downstream end of the trash hot spot (preferably in decimal degrees to at least four decimal places) with a GPS receiver. Record the datum setting of the unit preferably in NAD83/ WGS84.
Longitude	The geographic coordinate east or west of the prime meridian (0 degrees longitude). Longitude should be taken at the downstream end of the trash hot spot (preferably in decimal degrees to at least four decimal places) with a GPS receiver. Record the datum setting of the unit preferably in NAD83/ WGS84.
Watershed	The watershed where the trash hot spot is located. See www.scvurppp.org for list.
Waterbody	The waterbody (i.e., creek, river or other waterway) where the trash hot spot is located.
Ownership	The owner of the land where the trash hot spot is located. Possible answers are public, private, SCVWD or unknown.
Jurisdiction(s)	The jurisdiction(s) responsible for trash hot spot assessment and cleanup. Multiple jurisdictions may exist for certain water bodies (e.g., San Francisquito Creek).
II. Trash Information	
1. Potential Trash Types	
Convenience/Fast Food Items	Waste packaging, (i.e., plastic or paper) from convenience foods (e.g., potato chips, snack foods, candy bars, gum, etc.) and other wastes (e.g., bags, napkins, etc.) generated from fast food establishments or carry out restaurants.
Other Plastic Products	Plastic Bottle Caps, Plastic Cup Lid/Straw, Plastic Pipe Segments, Plastic Six-Pack Rings, Plastic Wrappers, Soft Plastic Pieces, Hard Plastic Pieces, Fishing Line, Tarp
Paper and Cardboard	Cups, Boxes, Newspapers, Magazines, Mail, Flyers and all other products made of paper or cardboard.
Metal Products	Aluminum Foil, Aluminum or Steel Cans, Bottle Caps, Metal Pipe Segments, Auto Parts, Wire (barb, chicken wire etc.), Metal Objects
Biohazards	Human Waste/Diapers, Pet Waste, Syringes or Pipettes, Dead Animals
Construction Debris	Concrete (not placed), Rebar, Bricks, Wood Debris
Toxic Substances	Chemical Containers, Oil/Surfactant on Water, Lighters, Small Batteries, Vehicle Batteries
Large Items	Appliances, Furniture, Garbage Bags of Trash, Tires, Shopping Carts
Miscellaneous Items	Synthetic Rubber, Foam Rubber, Balloons, Ceramic Pots/Shards, Hose Pieces
Fabric and Cloth	Synthetic Fabric, Natural Fabric (cotton, wool)
Other	All other materials or products not on the above list.
2. Potential Trash Pathways/Sources	
Trash Accumulation	Litter/trash observed to be accumulating in creeks below the high water line. Litter/trash is may be worn and aged in appearance; consist of light-weight, persistent and buoyant trash items (e.g., plastic bags, plastic bottles); and observed caught in surrounding vegetation, tree branches and rocks.
Litter	Improperly disposed/discarded wastes or other items observed in creek channels and/or creek banks. Commonly referred to as "trash". Litter/trash appears relatively "new" in appearance. Litter/trash is usually located in areas accessible to the public.
Illegal Dumping	Illegal dumping or discarding of larger quantities/sizes of litter/trash directly into a waterway or in close proximity to a creek. Garbage bags of trash or other unwanted items, appliances, furniture, tires, shopping carts and other large items are usually observed at illegal dump sites.
Homeless Encampments	Areas where homeless individuals live or congregate.
Outfall	The point where the storm drain system discharges (i.e., usually from a pipe) into a receiving water or channel.
Multiple	The contribution of more than one trash pathway/source listed above. List all potential pathways/sources.
Other	All other potential sources not described above.
Unknown	Trash source can not be determined or are known.
3. Adjacent Land Uses to Trash Areas	
Adjacent Land Uses to Trash Areas	Residential (Single-family), Residential (High-density), Commercial, Industrial, Public/Institutional, Mixed-use, Other Developed
III. Trash Removal	
Volume of Trash Removed During Cleanup (Un-Compacted)	
Size of Trash Bag (in gallons)	Size of trash bag (in gallons) used to remove trash during cleanup.
Total Bags	Total number of bags of trash removed during cleanup.
Cubic Yards	Estimated cubic yards of trash removed during cleanup.
Wet Weight (lbs)	Wet weight (in pounds) of trash removed during cleanup.
IV. Photo Documentation	
Photo #	The number assigned to a photograph taken to depict trash condition before or after trash cleanup. At creek hot spots, a total of 12 photographs (6 before cleanup and 6 after cleanup) are required. At shoreline hot spots, a total of 24 photographs (12 before cleanup and 12 after cleanup) are required.
Segment ID	The segment ID (i.e., A-L) where the photograph was taken to depict trash condition before or after trash cleanup. Segment IDs A-F correspond to both creek and shoreline hot spots, while segment IDs G-L only correspond to shoreline hot spots.
Optional Photographs After Cleanup	The number assigned to optional photographs taken to illustrate the volume of trash collected during the cleanup.
Notes	Comments or other notes regarding photo documentation.

___ Plastic bags (1-2 %)
___ Convenience/Fast Food items* (1-2 %)
2 Bottles (plastic or glass) (~30 %)
___ Aluminum cans (~30 %)
1 Styrofoam (pieces or pellets) (~25 %)
___ Other plastic products* (___%)
___ Paper and cardboard* (1-2 %)

___ Cigarette butts (___%)
5 Spray paint cans (~5 %)
___ Metal products* (~5 %)
___ Biohazards* (___%)
4 Construction debris* (~10 %)
___ Toxic substances* (___%)
___ Large items* (___%)

___ Miscellaneous items* (___%)
___ Fabric and cloth* (___%)
___ Yard waste (incl. trees) (___%)
___ Leaf litter piles (___%)
___ Glass pieces (___%)
*3 Golf or tennis balls (~10 %)
___ Other* ___%
___ Other* Fiberglass pipe 2-3%

*No golf balls, mostly other sports balls

2. Potential trash pathways/sources (**Check all that apply**):

☒ Trash accumulation
☐ Litter
☐ Illegal dumping
☐ Homeless encampments
☐ Outfall ___
☐ Other ___
☐ Other ___
☐ Unknown ___

3. Identify adjacent land uses to trash area (**Check all that apply**): ☐ Residential (Single-family) ☐ Residential (Multi-family) ☐ Commercial ☐ Urban Park ☐ Freeway ☐ Industrial ☒ Public/Institutional adjacent to Bay Trail ☐ Mixed-use ☐ Other Developed

III. Trash Removal

Volume of Trash Removed During Cleanup (Un-compacted)

Size of trash bag (in gallons): 13

Total # of bags: 4 bags + ~2 cu ft lumber unbagged Cubic Yards ___

(Optional)

OR Wet Weight (lbs.): *100 lbs

*Estimates 20lbs/bag + 20 lbs for lumber

IV. Photo Documentation

Before Cleanup (For shorelines only)

Potential Data Points with Definitions

Data Points	Definitions
I. Site Information	
Site ID#	The unique identification number assigned to the site. The site ID# will be used to track trash hot spot activities within databases or other tabular formats.
Site Location	The exact physical location of the upstream and/or downstream ends of the trash hot spot in relation to roads and/or physical landmarks (e.g., bridge crossings, outfalls) on the creek (e.g., Coyote Creek, outfall located 100 feet downstream of Julian Street Bridge). Alternatively, for larger hot spots, provide a length of creek between two different roads/bridge crossings or other physical landmarks (e.g., Guadalupe River between W. Hedding Street and Coleman Avenue).
Latitude	The geographic coordinate north or south of the equator. Latitude should be taken at the downstream end of the trash hot spot (preferably in decimal degrees to at least four decimal places) with a GPS receiver. Record the datum setting of the unit preferably in NAD83/ WGS84.
Longitude	The geographic coordinate east or west of the prime meridian (0 degrees longitude). Longitude should be taken at the downstream end of the trash hot spot (preferably in decimal degrees to at least four decimal places) with a GPS receiver. Record the datum setting of the unit preferably in NAD83/ WGS84.
Watershed	The watershed where the trash hot spot is located. See www.scvurppp.org for list.
Waterbody	The waterbody (i.e., creek, river or other waterway) where the trash hot spot is located.
Ownership	The owner of the land where the trash hot spot is located. Possible answers are public, private, SCVWD or unknown.
Jurisdiction(s)	The jurisdiction(s) responsible for trash hot spot assessment and cleanup. Multiple jurisdictions may exist for certain water bodies (e.g., San Francisquito Creek).
II. Trash Information	
1. Trash Types	
Convenience/Fast Food Items	Waste packaging, (i.e., plastic or paper) from convenience foods (e.g., potato chips, snack foods, candy bars, gum, etc.) and other wastes (e.g., bags, napkins, etc.) generated from fast food establishments or carry out restaurants.
Other Plastic Products	Plastic Bottle Caps, Plastic Cup Lid/Straw, Plastic Pipe Segments, Plastic Six-Pack Rings, Plastic Wrappers, Soft Plastic Pieces, Hard Plastic Pieces, Fishing Line, Tarp
Paper and Cardboard	Cups, Boxes, Newspapers, Magazines, Mail, Flyers and all other products made of paper or cardboard.
Metal Products	Aluminum Foil, Aluminum or Steel Cans, Bottle Caps, Metal Pipe Segments, Auto Parts, Wire (barb, chicken wire etc.), Metal Objects
Biohazards	Human Waste/Diapers, Pet Waste, Syringes or Pipettes, Dead Animals
Construction Debris	Concrete (not placed), Rebar, Bricks, Wood Debris
Toxic Substances	Chemical Containers, Oil/Surfactant on Water, Lighters, Small Batteries, Vehicle Batteries
Large Items	Appliances, Furniture, Garbage Bags of Trash, Tires, Shopping Carts
Miscellaneous Items	Synthetic Rubber, Foam Rubber, Balloons, Ceramic Pots/Shards, Hose Pieces
Fabric and Cloth	Synthetic Fabric, Natural Fabric (cotton, wool)
Other	All other materials or products not on the above list.
2. Potential Trash Pathways/Sources	
Trash Accumulation	Litter/trash observed to be accumulating in creeks below the high water line. Litter/trash is may be worn and aged in appearance; consist of light-weight, persistent and buoyant trash items (e.g., plastic bags, plastic bottles); and observed caught in surrounding vegetation, tree branches and rocks.
Litter	Improperly disposed/discarded wastes or other items observed in creek channels and/or creek banks. Commonly referred to as "trash". Litter/trash appears relatively "new" in appearance. Litter/trash is usually located in areas accessible to the public.
Illegal Dumping	Illegal dumping or discarding of larger quantities/sizes of litter/trash directly into a waterway or in close proximity to a creek. Garbage bags of trash or other unwanted items, appliances, furniture, tires, shopping carts and other large items are usually observed at illegal dump sites.
Homeless Encampments	Areas where homeless individuals live or congregate.
Outfall	The point where the storm drain system discharges (i.e., usually from a pipe) into a receiving water or channel.
Other	All other potential sources not described above.
Unknown	Trash source can not be determined or are known.
3. Adjacent Land Uses to Trash Areas	
Adjacent Land Uses to Trash Areas	Residential (Single-family), Residential (Multi-Family), Commercial, Urban Park, Freeway, Industrial, Public/Institutional, Mixed-use, Other Developed
III. Trash Removal	
Volume of Trash Removed During Cleanup (Un-Compacted)	
Size of Trash Bag (in gallons)	Size of trash bag (in gallons) used to remove trash during cleanup.
Total Bags	Total number of bags of trash removed during cleanup.
Cubic Yards	Estimated cubic yards of trash removed during cleanup.
Wet Weight (lbs)	Wet weight (in pounds) of trash removed during cleanup.
IV. Photo Documentation	
Segment ID	The segment ID (i.e., A-L) where the photograph was taken to depict trash condition before or after trash cleanup. Segment IDs A-F correspond to both creek and shoreline hot spots, while segment IDs G-L only correspond to shoreline hot spots.
Photo #	The number assigned to a photograph taken to depict trash condition before or after trash cleanup. Within each segment, a minimum of one photograph must be taken before the cleanup and one photograph after the cleanup - for a total of 6 before and 6 after photographs for 300 ft creek hot spots and 12 before and 12 after photographs for shoreline hot spots. Additional photographs may be taken within each hot spot.
Optional Photographs After Cleanup	The number assigned to optional photographs taken to illustrate the volume of trash collected during the cleanup.
Notes	Comments or other notes regarding photo documentation.

September 15, 2010

Mr. Bruce H. Wolfe
Executive Officer
San Francisco Bay Regional Water Quality Control Board
1515 Clay Street, Suite 1400
Oakland, CA 94612

Subject: **County of Santa Clara**
FY 2009-2010 Annual Report

Dear Mr. Wolfe:

This letter and Annual Report with attachments is submitted by the County of Santa Clara, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's (SCVURPPP) and the Bay Area Stormwater Management Agencies Association's (BASMAA) Annual Report, pursuant to Permit Provision C.16.a of the Municipal Regional Stormwater NPDES Permit (MRP), Order R2-2009-0074, NPDES Permit No CAS612008 issued by the San Francisco Bay Regional Water Quality Control Board. The Annual Report provides documentation of activities conducted during FY 2009-2010 and consists of the following:

A. Certification Statement
B. Annual Report Form
   - Table of Contents
   - Completed Annual Report Form: Sections 1-15
C. Appendix
   - Table of Contents
   - Appendices

The County's Clean Water Program continues to be funded directly from the County General Fund. As was stated in previous annual reports, Proposition 218 eliminated the storm water fee that supported Clean Water Program activities in 1997. Additional tax funding can only be obtained by a 2/3 vote of the people. Last fiscal year, the County's Clean Water Program was staffed with one full time junior civil (environmental) engineer and in January 2010 the program was expanded to include a part-time Planner. Staff members of the involved departments, listed below, coordinate compliance and reporting activities as they relate to each involved department, with guidance from the Clean Water Program Coordinator as well as the SCVURPPP program staff.

Board of Supervisors: Donald F. Gage, George Shirakawa, Dave Cortese, Ken Yeager, Liz Kniss
County Executive: Jeffrey V. Smith

Implementing the Municipal Regional Permit (MRP) at the County involves many departments, including: Fleet and Facilities, Roads and Airports, Parks and Recreation, Planning and Development (Planning Office, Development Services Office, Clean Water Program, Surveyor), Agriculture and Environmental Management (Integrated Waste Management, Pollution Prevention, Graffiti and Litter Abatement, Green Business Program, Master Composter Education Project), Environmental Health (Consumer Protection, Hazardous Materials, Solid Waste, Household Hazardous Waste, Vector Control), the County Executive's Office (Special Construction Projects, and Integrated Pest Management). Each of these departments is individually responsible for implementing the MRP, as applicable.

The County lies within two regional water quality control boards. The northern portion of the County is under the San Francisco Bay Regional Water Quality Control Board and the southern portion is under the Central Coast Regional Water Quality Control Board (CCRWQCB). In April 2010, the County was issued their first NPDES Storm Water Discharge Phase II Permit (South County Permit) for the southern portion of the County. Leading up to adoption, the County has been working with the City of Gilroy (Gilroy) and the City of Morgan Hill (Morgan Hill) to finalize a Draft Regional Storm Water Management Plan (SWMP). County staff focused their time on getting a South County Permit adopted during the months of December, January and February. Once the SWMP was adopted the County faced implementing two separate and new NPDES permits, raising questions on which requirements belonged to which part of the County. The Clean Water Program staff intends to provide more training to each department involved in the implementation of the MRP to minimize confusion in the future.

Thank you in advance for your review of this Annual Report for fiscal year 09-10. If you or your staff members have any questions regarding the materials submitted, please contact Clara Spaulding at 408- 299-5737.

Very truly yours,

Tom Whisler
Building Official

County of Santa Clara

Section 2 - Provision C.2 Reporting Municipal Operations

Program Highlights and Evaluation

Highlight/summarize activities for reporting year:

Summary: The Departments of Parks and Recreation, Facilities and Fleets, and Roads and Airports perform tasks for the County under this permit section. These departments have continued to become more aware and involved in the Storm Water Program through trainings, meetings and discussions.

Staff from the Department of Roads and Airports and the Department of Planning and Development participated in the Program's Municipal Operation Ad Hoc Task Group (AHTG) group, where the staff reviewed the AHTG products (such as pump station sampling guidance). The County did not have staff attend the BASMAA Municipal Operation Committee meeting. However, at the Program's Municipal Operation AHTG meetings the BASMAA meetings were discussed and the products developed by the BASMAA Committee were reviewed. For more information on the activities of the Municipal Operation AHTG and the BASMAA Municipal Operation Committee please see section C.2 Municipal Operations of the Program's FY09-10 Annual Report.

The Department of Roads and Airports (R&A) is the only department at the County that owns and operates pump stations. The Department completed their pump station inventory by March 1, 2010. In addition, R&A updated the SWPPP for their corporation yards by July 1, 2010 and participated in trainings and workshops offered by SCVURPPP on the New Regional Municipal Permit and the State Construction General Permit.

The Department of Facilities and Fleets provided additional training to their department staff then in prior years. The " Best Management Practices for Storm Water Pollution Prevention Activities" training materials template supplied by SCVURPPP was tailored to create a presentation on the information that is applicable to the Building Operations and Custodian and Grounds employees. There were six training sessions of the training presented during work group all-staff meetings during the week of July 29th, 2009. The effectiveness of the training became apparent during a slurry-coating project at Berger Drive that was postponed due to wet weather. Although there was no actually work being done there was still the potential for stormwater to come in contact with pollutants. The training enabled the Building Operation Staff to identify that the installed BMPs were not adequate to preventing pollutants from entering the storm drain system and required the contractors to put in additional drain protection. Additional BMPs were put into place prior to any pollutants entered the storm drain system.

In mid-May 2010 the Department of Facilities and Fleets completed and opened the Junction Avenue Fleet Management Garage for service. A SWPPP and SPCC were developed for the site due to the above ground storage of hazardous materials and associated business activities. The activities associated with the SWPPP have since been enacted (i.e. dry/wet season inspection s, dry absorbent clean-up techniques, Maintenance of the "Swirl a drain") effective July 1,2010.

The Department of Parks and Recreation have been working to develop SWPPP for their corporation yards and intend to have them in place in six months. Most of Parks Corporation yards are not connected to a storm drain system. All water from the corporation yard runs into the surrounding landscaping.

C.2.a. Street and Road Repair and Maintenance

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of these BMPs were not adequately implemented during the reporting fiscal year then indicate so and provide explanation in the comments section below:

X	Control of debris and waste materials during road and parking lot installation, repaving or repair maintenance activities from polluting stormwater
X	Control of concrete slurry and wastewater, asphalt, pavement cutting, and other street and road maintenance materials and wastewater from discharging to storm drains from work sites.
X	Sweeping and/or vacuuming and other dry methods to remove debris, concrete, or sediment residues from work sites upon completion of work.

Comments: The Department of Roads and Airports and the Department of Parks and Recreation perform street and road repair and maintenance. Both of these departments used the BMPs listed above. The Department of Roads and Airports follows CASQA's Stormwater BMP Municipal Handbook for all maintenance work and BASMAA's " Blueprint for a clean Bay" for spills and leaks.

The Department of Parks and Recreation also uses the CASQA Municipal Handbook for street and road maintenance activities. The department uses their Hazardous Materials Incident Decision Tree and Department policy for cleaning up small spills of known substances and for larger uncontrolled spills and releases, the department using County Contract vendors and hazardous materials teams from responding fire agencies.

C.2.b. Sidewalk/Plaza Maintenance and Pavement Washing

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of these BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

X	Control of wash water from pavement washing, mobile cleaning, pressure wash operations at parking lots, garages, trash areas, gas station fueling areas, and sidewalk and plaza cleaning activities from polluting stormwater
NA	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs

Comments: The Departments of Facilities and Fleets and Parks and Recreation typically perform sidewalk and plaza maintenance and pavement washing. The only surface the Department of Parks and Recreation cleans are their paved picnic pads (concrete), which are first blown and then washed down with a power washer to the surrounding landscaped areas. No flow goes into the storm water system and no soap or solvent is used to clean the picnic pads.

The Department of Roads and Airports performs street sweeping. During street sweeping operation the sweeper sprays minimal water on pavement to prevent dusting and the water is immediately vacuumed, which prevents water runoff on pavement.

The Department of Facilities and Fleets attended one of the SCVURPPP trainings there was a section on pressure washing BMPs, including specifics on recovering debris and wastewater when using spray equipment. The Department of Facilities and Fleets found the training to be effective

when a Project Manager asked questions pertaining to a paint removal job and then redirected a resurfacing contractor to use dry methods to perform the surface coating removal.

C.2.c. Bridge and Structure Maintenance and Graffiti Removal

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of these BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

X	Control of discharges from bridge and structural maintenance activities directly over water or into storm drains
X	Control of discharges from graffiti removal activities
X	Proper disposal for wastes generated from bridge and structure maintenance and graffiti removal activities
NA	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs for graffiti removal

Comments: The Department of Roads and Airports and the Department of Parks and Recreation perform bridge and structure maintenance and graffiti removal. Both of these departments implement all three of the BMPs checked off above and implementation of the BASMAA Mobile Surface Cleaner Program BMPs for graffiti Removal activities is not applicable because neither of these department use wet methods to remove graffiti. The Department of Roads and Airport and the Departments of Parks and Recreation removes graffiti by painting over the graffiti areas, which was performed during dry weather. The Department of Parks and Recreation also removes graffiti by applying a gel and wiping the surface clean.

The Integrated Waste Management Division under the Department of Agriculture and Environmental Management discontinued their Graffiti and Litter Abatement (GALA) program on July 1, 2009 due to a lack of funding. Integrated Waste Management is still involved in litter abatement activities, which are discussed more in Section 7- Provision C.7 Public Information and Outreach and Section 10- Provision C.10 Trash Load Reduction.

The Department of Roads and Airports limits maintenance of bridges and structures to preventive maintenance and repair/replacement of damaged bridge rails. During maintenance activities the Department of Roads and Airports follows appropriate BMPs indicated in the CASQA's Municipal Handbook.

C.2.d. Stormwater Pump Stations

Does your municipality own stormwater pump stations:	X	Yes		No

If your answer is **No** then skip to **C.2.e.**

(For FY 10-11Annual Report only) Complete the following table for dry weather DO monitoring and inspection data for pump stations[1] (add more rows for additional pump stations): **Not required for this Annual Report.**

Pump Station Name and Location	First inspection Dry Weather DO Data		Second inspection Dry Weather DO Data	
	Date	mg/L	Date	mg/L

(For FY 10-11Annual Report only) Summarize corrective actions as needed for DO monitoring at or below 3 mg/L. Attach inspection records of additional DO monitoring for corrective actions:

Summary: **Not required for this Annual Report.** In addition, all pump stations owned and operated by the County of Santa Clara discharge into another stormwater collection system and are exempt from DO monitoring.

Attachments:

(For FY 10-11Annual Report only) Complete the following table for wet weather inspection data for pump stations (add more rows for additional pump stations): **Not required for this Annual Report.**

Pump Station Name and Location	Date (2x/year required)	Presence of Trash (Cubic Yards)	Presence of Odor (Yes or No)	Presence of Color (Yes or No)	Presence of Turbidity (Yes or No)	Presence of Floating Hydrocarbons (Yes or No)

[1] Pump stations that pump stormwater into stormwater collection systems or infiltrate into a dry creek immediately downstream are exempt from DO monitoring.

C.2.e. Rural Public Works Construction and Maintenance

Does your municipality own/maintain rural[2] roads:	X	Yes	No
If your answer is **No** then skip to **C.2.f**.			

Place an **X** in the boxes next to implemented BMPs to indicate that these BMPs were implemented in applicable instances. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

X	Control of road-related erosion and sediment transport from road design, construction, maintenance, and repairs in rural areas
X	Identification and prioritization of rural road maintenance based on soil erosion potential, slope steepness, and stream habitat resources
X	No impact to creek functions including migratory fish passage during construction of roads and culverts
X	Inspection of rural roads for structural integrity and prevention of impact on water quality
X	Maintenance of rural roads adjacent to streams and riparian habitat to reduce erosion, replace damaging shotgun culverts and excessive erosion
X	Re-grading of unpaved rural roads to slope outward where consistent with road engineering safety standards, and installation of water bars as appropriate
X	Inclusion of measures to reduce erosion, provide fish passage, and maintain natural stream geomorphology when replacing culverts or design of new culverts or bridge crossings

Comments including listing increased maintenance in priority areas: The Departments of Roads and Airports and the Department of Parks and Recreation both own and maintain rural roads. Both of these departments have been implementing the Program's Rural Public Works Maintenance and Support Performance Standards and associated BMPs since 2003. In addition, maintenance staff attended the Program's Rural Roads Maintenance Workshops on September 25 and 26, 2008 and the Rural Roads BMP installation on March 23 and 24, 2009 presentation by Ledwith Watershed Services.

The Department of Parks and Recreation identifies and prioritizes rural road maintenance based on soil erosion potential, slope steepness and stream habitat resources. The Department of Roads and Airports prioritizes road repairs based on public safety and road conditions.

The Department of Roads and Airports uses appropriate BMPs found in the Program's Rural Public Works Maintenance and Support Standards and associated BMPs when performing maintenance of rural roads. Work on culverts replacement was performed in accordance with permits and in compliance with the applicable Regional Water Quality Control Board, California Fish and Game Department, US Army Corps of Engineers and/ or the Santa Clara Valley Water Districts requirements.

[2] Rural means any watershed or portion thereof that is developed with large lot home-sites, such as one acre or larger, or with primarily agricultural, grazing or open space uses.

C.2.f. Corporation Yard BMP Implementation

Place an **X** in the boxes below that apply to your corporations yard(s):

	We do not have a corporation yard
	Our corporation yard is a filed NOI facility and regulated by the California State Industrial Stormwater NPDES General Permit
X	We certify that we have a current Stormwater Pollution Prevention Plan (SWPPP) for the Corporation Yard(s)

Place an **X** in the boxes below next to implemented SWPPP BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type **NA** in the box. If one or more of the BMPs were not adequately implemented during the reporting fiscal year then indicate so and explain in the comments section below:

X	Control of pollutant discharges to storm drains such as wash waters from cleaning vehicles and equipment
X	Routine inspection prior to the rainy seasons of corporation yard(s) to ensure non-stormwater discharges have not entered the storm drain system
X	Containment of all vehicle and equipment wash areas through plumbing to sanitary or another collection method
X	Use of dry cleanup methods when cleaning debris and spills from corporation yard(s) or collection of all wash water and disposing of wash water to sanitary or other location where it does not impact surface or groundwater when wet cleanup methods are used
X	Cover and/or berm outdoor storage areas containing waste pollutants

Comments: The Departments of Facilities and Fleets, Roads and Airports, and Parks and Recreation own and operate corporation yards. The Department of Facilities and Fleets completed and opened their Junction Avenue Fleet Management Garage in May of 2010 and did not performed an inspection of the facility prior to the end of fiscal year 09-10. The Department of Parks and Recreation is currently developing SWPPPs for their corporation yards and hope to have them in place in six months or January 1, 2011.

If you have a corporation yard(s) that is not an NOI facility, complete the following table for inspection results for your corporation yard(s) or attach a summary including the following information:

Corporation Yard Name	**Inspection Date** (1x/year required)	**Inspection Findings/Results**	**Follow-up Actions**
Schallenberger Rd	8, 9,10,11,12/2009 and 1, 2, 3, 4/2010	Minor problems with tire storage (10-13-09 and 1-20-10), D.I. needed cleaning after rainy season (11-20-09 and 4-20-10), safe Drains needed maintenance (12-28-09, 2-19-2010 and 3-26-10)	Tires removed, drains cleaned, safe drain cleaned.
Doyle Rd	8, 9,10,11,12/2009 and 1, 2, 3, 4/2010	Tire storage needed cover (10-14-09 and 4-20-10). Safe drains need cleaning (7-21-09, 11-24-09, 12-29-09,and 2-9-10. Sweeping needed some increase in frequency by car wash rack (9-16-09 and 4-20-10).	Tires removed, and new tires are now covered. Sweeping done by hand and sweeper. The frequency for sweeping

			the car wash rack was increased to once a week in the summer and once a month in the rainy season.

Section 3 - Provision C.3 Reporting New Development and Redevelopment

C.3.a. New Development and Redevelopment Performance Standard Implementation Summary Report

(For FY 10-11Annual Report only) Provide a brief summary of the methods of implementation of Provisions C.3.a.i.(1)-(8).

Summary: **Not required for this Annual Report.**

C.3.b. Green Streets Status Report

(All projects to be completed by December 1, 2014)

On an annual basis (if applicable), report on the status of any pilot green street projects within your jurisdiction. For each completed project, report the capital costs, operation and maintenance costs, legal and procedural arrangements in place to address operation and maintenance and its associated costs, and the sustainable landscape measures incorporated in the project including, if relevant, the score from the Bay-Friendly Landscape Scorecard.

Summary: The County of Santa Clara is participating in SCVURPPP and BASMAA, which is working cumulatively to complete ten pilot green street projects through out the San Francisco Bay Region. Please see SCVURPPP Program's FY 09-10 Annual Report, more specifically the C.3 New Development and Redevelopment section for a summary on the activities of the C3PO AHTG Green Streets Work Group.

C.3.b.v.(1) Regulated Projects Reporting Table

Fill in attached table **C.3.b.v.(1)** below.

C.3.h.iv. Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

(1) Fill in attached table **C.3.h.iv.(1)** or attach your own table including the same information

(2) On an annual basis, provide a discussion of the inspection findings for the year and any common problems encountered with various types of treatment systems and/or HM controls. This discussion should include a general comparison to the inspection findings from the previous year.

Summary: The stormwater treatment systems installed for the Departments of Facilities and Fleets and Roads and Airports are in proper working order. The vegetation growth for the bio-filtration swale at Montague expressway is more normal to area as compare to previous years. There were no significant changes in trash or debris collected in trash collectors for the pump station Vortech separators. The Department of Parks and Recreation does not have an Operation and Maintenance program developed for their post construction stormwater treatment systems installed but will be working on developing a program during this fiscal year.

The Planning and Development Department had the Operation and Maintenance Agreement authorized by the Board of Supervisors during this

fiscal year. The program has been implemented. There was only one C.3 project approved during this fiscal year and it was approved in September 2009. The O&M verification program was not effective at this time and the project was not required to sign into an operation and maintenance agreement. The Board of Supervisors approved the O&M agreement in April 2010. All projects that were subject to C.3 requirements have since been conditioned to sign into an Operation and Maintenance Agreement. The projects that included O&M agreements have not begun construction and no inspections were made for this fiscal year on post construction stormwater treatment systems.
(3) On an annual basis, provide a discussion of the effectiveness of the O&M Program and any proposed changes to improve the O&M Program (e.g., changes in prioritization plan or frequency of O&M inspections, other changes to improve effectiveness program).
Summary: The Department of Roads and Airports is currently responsible for maintaining a biofiltration swale and two Vortechs trash separators, which are inspected annually. For the Bio-filtration swale, visual inspections of area and cut/trim/removal of vegetation is performed as needed to maintain efficiency. The current annual inspection program is effective in maintaining efficiency of system. For the two Vortechs separators, an annual inspection prior to rainy season is conducted and debris/trash collected are removed. During the rainy season, periodic visual inspections are conducted and trash/debris are removed, as needed. Current inspection of Vortechs separators is effective at maintaining the efficiency of systems. The Department of Planning and Development just began implementing their O&M program. A model O&M agreement has been developed and approved by the Board of Supervisors. Next year, grading inspectors will be trained on what to look for during inspections of post development stormwater treatment systems.

C.3.b.v.(1) Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Project Location[3], Street Address	Name of Developer	Project Phase No.[4]	Project Type & Description[5]	Project Watershed[6]	Total Site Area (Acres)	Total Area of Land Disturbed (Acres)
Private Projects							
Concert Hall Fie # 9963	327 Lasuen St and Campus Dr, Stanford Ca 94305	Stanford University	N/A	New Construction	Matadero Creek	5.5	4.09
Public Projects							
Department of Roads and Airports							
Central Expwy Auxiliary Lane	Central expressway between Mathilda Ave & Fair Oaks Ave	County of Santa Clara, Roads and Airports Dept.	N/A	Roadway widening	Sunnyvale West Channel	8.1	3
Department of Facilities and Fleets							
Elmwood Correctional Facility, Sally Port / Gate House No. 263-CP08014	701 S. Able Street Milpitas, CA 95035	Santa Clara County	n/a	New vehicle sally port including gate house, enhanced security systems and access roadway	San Francisco Bay	62.3 acres	2.2 acres
Elmwood Correctional Facility, Perimeter Fence Access Road No. 263-CP08012	701 S. Able Street Milpitas, CA 95035	Santa Clara County	n/a	New paved surface for foot and golf cart accessibility between double perimeter fence.	San Francisco Bay	62.3 acres	2.2 acres

[3] Include cross streets
[4] If a project is being constructed in phases, use a separate row entry for each phase.
[5] Project Type is the type of development (i.e., new and/or redevelopment). Example descriptions of development are: 5-story office building, residential with 160 single-family homes with five 4-story buildings to a mall, mixed use retail and residential development (apartments), industrial warehouse.
[6] State the watershed(s) that the Regulated Project drains to. Optional but recommended: Also state the downstream watershed(s).
[7] State both the total new impervious surface area and the total replaced impervious surface area, as applicable.
[8] For redevelopment projects, state the pre-project impervious surface area.
[9] For redevelopment projects, state the post-project impervious surface area.

C.3.b.v.(1) Regulated Projects Reporting Table (part 2) – Projects Approved During the Fiscal Year Reporting Period								
Project Name Project No.	**Status of Project[10]**	**Source Control Measures[11]**	**Site Design Measures[12]**	**Treatment Systems Approved[13]**	**Operation & Maintenance Responsibility Mechanism[14]**	**Hydraulic Sizing Criteria[15]**	**Alternative Compliance Measures[16/17]**	**Al Ce**
Private Projects								
Concert Hall Fie # 9963-07-82-09A	• Submittal=2/20/09 • Deemed complete =7/6/09 • Final discretionary approval=9/10/09	Properly designed covers, drains and storage precautions for outdoor material storage areas, loading docks, repair/maintenance bays, fueling areas, and trash storage areas. Bay area friendly native plants and vegetation and efficient irrigation system to maximize water efficiency	Limited disturbance of natural water bodies and drain systems. Minimized impervious surface area and conserve existing landscape areas and trees.	Vegetated swales (4) and drive aisles and parking areas are drained through landscape areas.	O&M agreement with project owner	Rational method	N/A	N,
Public Projects								
Department of Roads and Airports								

[10] For private projects, state project application submittal date; application deemed complete date; and, final discretionary approval date. For public projects, state plans and specifications approval date.
[11] List source control measures approved for the project. Examples include: properly designed trash storage areas; storm drain stenciling or signage; efficient landscape irrigation systems; etc.
[12] List site design measures approved for the project. Examples include: minimize impervious surfaces; conserve natural areas, including existing trees or other vegetation, and soils; construct sidewalks, walkway
[13] List all approved stormwater treatment system(s) to be installed onsite or at a joint stormwater treatment facility (e.g., flow through planter, bioretention facility, infiltration basin, etc.).
[14] List the legal mechanism(s) (e.g., O&M agreement with private landowner; O&M agreement with homeowners' association; O&M by public entity, etc…) that have been or will be used to assign responsibility fo treatment systems.
[15] See Provision C.3.d. "Numeric Sizing Criteria for Stormwater Treatment Systems" for list of hydraulic sizing design criteria (i.e., 1.a., 1.b., 2.a., 2.b., 2.c., or 3)
[16] For Alternative Compliance at an offsite location in accordance with Provision C.3.e.i.(1), on a separate page, give a discussion of the alternative compliance site including the information specified in Provision
[17] For Alternative Compliance by paying in-lieu fees in accordance with Provision C.3.e.i.(2), on a separate page, provide the information specified in Provision C.3.b.v.(1)(m)(ii) for the Regional Project.
[18] Note whether a third party was used to certify the project design complies with Provision C.3.d.
[19] If HM control is not required, state why not.
[20] If HM control is required, state control method used (e.g., method to design and size device(s) or method(s) used to meet the HM Standard, and description of device(s) or method(s) used, such as detention ba or in-stream control).

C.3.b.v.(1) Regulated Projects Reporting Table (part 2) – Projects Approved During the Fiscal Year Reporting Period								
Project Name Project No.	**Status of Project[10]**	**Source Control Measures[11]**	**Site Design Measures[12]**	**Treatment Systems Approved[13]**	**Operation & Maintenance Responsibility Mechanism[14]**	**Hydraulic Sizing Criteria[15]**	**Alternative Compliance Measures[16/17]**	**Al Ce**
Central Expwy Auxiliary Lane	Approved 10/20/2009	Hydroseeding	Protection of existing vegetation, minimizing additional pavement	Vortech stormwater treatment system	O&M by Department of Roads and Airports	Uniform Intensity Approach	None	N
Department of Facilities and Fleets								
Elmwood Correctional Facility, Sally Port / Gate House No. 263-CP08014	Plans & Specs approved 3/23/10	n/a	Direct run-off into grass area	Bio Swales	O&M SCC FAF	Uniform Intensity Approach	n/a	n/
Elmwood Correctional Facility, Perimeter Fence Access Road No. 263-CP08012	Plans & Specs approved 3/23/10	n/a	Direct run-off into grass area	Bio Swales	O&M SCC FAF	Uniform Intensity Approach	n/a	n/

C.3.h.iv. Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

Fill in table **below** or attach your own table including the same information.

Facility/Site Inspected and Location	Party Responsible[21] For Maintenance	Date of Inspection	Type of Inspection[22]	Type of Treatment/HM Control(s) Inspected[23]	Inspection Findings or Results[24]	Enforcement Action Taken[25]
Montague Expressway at Lick Mill Rd	Roads Maintenance	3/2010	Annual	Biofiltration Swale	In normal condition	None
Central Expressway near Mary/Lawrence Expressway	Roads Maintenance	10/2009	Annual and periodic	Vortechs Trash Separator	In normal condition	None
Central Expressway near Lafayettee RR Overpass	Roads Maintenance	10/2009	Annual and periodic	Vortechs Trash Separator	In normal condition	None
Morgan Hill JAB	FAF /Courts	11/2009	Annual/Visual	Retention Pond	In normal condition	None
Sunnyvale Health Clinic	FAF	NA	Bi-annual /Visual	Deflective Separation Unit	In normal condition	None
Crime lab	FAF	NA	Annual/Visual	Storm Water Detention Chamber	In normal condition	None

[21] State the responsible operator for installed stormwater treatment systems and HM controls.
[22] State the type of inspection (e.g., annual, follow-up, spot, etc.).
[23] State the type(s) of treatment systems inspected (e.g., bioretention facility, flow-through planter, infiltration basin, etc…) and the type(s) of HM controls inspected, and indicate whether the treatment system is a
[24] State the inspection findings or results (e.g., proper installation, improper installation, proper O&M, immediate maintenance needed, etc.).
[25] State the enforcement action(s) taken, if any, as appropriate and consistent with your municipality's Enforcement Response Plan.

Section 4 – Provision C.4 Industrial and Commercial Site Controls

C.4.a.ii Legal Authority				
(For FY 09-10 Annual Report only) Do you have adequate legal authority to obtain effective stormwater pollutant control on industrial sites?	X	**Yes**		**No**
If **No**, explain:				

C.4.c.ii.(5) Enforcement Response Plan				
(For FY 09-10 Annual Report only) Have you developed and implemented an Enforcement Response Plan by April 1, 2010?	X	**Yes**		**No**
If **No**, explain:				

Program Highlights

Provide background information, highlights, trends, etc. For FY 09-10 Annual Report describe steps taken to revise your program to meet new data tracking and reporting requirements.

Summary: The Department of Environmental Health is the Department in the County that performs inspections of industrial and commercial facilities. The Department of Environmental Health and the Department of Planning and Development participated in the Program's IND/IDDE Ad Hoc Task Group (AHTG) and review AHTG products. Please see Section C,4 Industrial and Commercial Site Controls in the Program's FY 2009-2010 Annual Report for more information.

The Department of Environmental Health has been working over the 2009-2010 fiscal year to revise their existing inspection program to meet new data tracking and reporting requirements. The Department of Environmental Health- Consumer Protection Division has permit obligations for not only the County of Santa Clara but also the Cities of Cupertino, Los Gatos, Monte Sereno, Saratoga and Campbell. The Consumer Protection Division seeks to keep the tracking and reporting procedures consistent across these Cities and the County. The Stormwater Coordinators representing these Cities and the County worked together to develop a training program to teach the Consumer Protection Division inspectors on what to be looking for, how to report a violation, and how to refer a violation to the appropriate agency using one reporting form for all involved agencies. However, this training was not provided early enough to track data consistent with the MRP requirements but is expected to be consistent with the MRP requirements for the next annual report. Some of the inspectors were previously trained on how to identify and report NPDES violations. However, these violations were observed in the unincorporated areas of Gilroy, which is located in region 3.

In addition, the Consumer Protection Division developed and implemented new food inspection forms to track stormwater violations at commercial retail food sites, revised inspection frequencies for commercial retail food sites, updated data reporting formats through the Consumer Protection Division's Envision database, conducted routine inspections of commercial retail food sites, and created the enforcement response plan for Consumer Protection Division.

The Department of Environmental Health- Hazardous Materials Program incorporates Clean Water Program inspection as part of their routine hazardous materials inspections. The inspections primary focus in on handling, use, and disposal of hazardous materials. All inspections conducted are now electronically recorded and maintained in the Department wide database. For the current fiscal year, the Hazardous Materials Programs

intends to work closely with the Non-Point Source program to incorporate the data tracking into their routine inspection procedures for future reporting needs. To improve the Hazardous Material Program ability to identify problem and assist businesses in compliance with the MRP requirements, the Hazardous Materials staff has asked for and will be trained on the laws, regulations and ordinances pertaining to the County's NPDES Clean Water Program in late September/early October.

In addition, the Hazardous Materials Specialists (HMS) receive on-going training in a variety of hazardous materials program areas that indirectly are related to the Clean Water Program. Every other month the Santa Clara County Fire Chief's Hazardous Materials Subcommittee provides a training forum for inspectors from different programs and geographic areas. In addition, HMS staff receives training from other sources (State, Local Agencies, private companies, etc.) as the training becomes available.

The Hazardous Materials Compliance Division meets monthly with other government environmental agencies (POTW's, Code Enforcement, DTSC, FBI and others) and the District Attorneys office meet to discuss compliance issues found throughout the County. This task force meets to discuss individual sites, businesses and methods for obtaining compliance. The task force identifies particular businesses or operations that have compliance issues and the "team" works to conduct investigations and prepare enforcement cases, if appropriate. This task force has been successful in correcting many violations and protecting the environment from contamination.

The data presented in this Annual Report includes all the inspections that were conducted during this fiscal year. However, some of information to develop the summary tables was not previously tracked (such as frequency and type of violations and/ enforcement conducted) in the industrial and commercial inspection program. Therefore, data that was provided does not represent all inspections that were performed this fiscal year.

C.4.b.i. Business Inspection Plan

(For FY 09-10 Annual Report only) Do you have a Business Inspection Plan?	X	**Yes**		**No**
If No, explain:				

C.4.b.iii.(1) Potential Facilities List

List below or attach your list of industrial and commercial facilities in your Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.

Please see Appendix 4-1 for more a list of the facilities that could reasonably be considered to cause or contribute to pollution of stormwater runoff.

C.4.b.iii.(2) Facilities Scheduled for Inspection

List below or attach your list of facilities scheduled for inspection during the current fiscal year.

The Consumer Protection Division inspects all of their potential facilities that are listed under C.4.b.iii.(1), each year. Therefore, The facilities listed in Appendix 4-1are the same facilities the Consumer Protection Divisions plans to inspect next year. Please see Appendix 4-2 for a list of facilities scheduled for inspection during the current fiscal year for the Hazardous Material Compliance Division.

C.4.c.iii.(1) Facility Inspections

Fill out the following table or attach a summary of the following information.

	Number	Percent
Number of businesses inspected (if known)	370	
Total number of inspections conducted	397	
Violations issued (excluding verbal warnings)	0	
Sites inspected in violation	2	
Violations[1] resolved within 10 working days or otherwise deemed resolved in a longer but still timely manner	2	

[1] Total number of violations equals the number of initial enforcement actions (i.e. one violation issued for several problems during an inspection at a site). It does not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

C.4.c.iii.(2) Frequency and Types/Categories of Violations Observed

Fill out the following table or attach a summary of the following information.

Type/Category of Violations Observed	Number of Violations
Actual discharge (e.g. non-stormwater discharge)	0
Potential discharge (e.g. BMPs not in place or ineffective)	2

C.4.c.iii.(2) Frequency and Type of Enforcement Conducted

Fill out the following table or attach a summary of the following information.

	Enforcement Action (as listed in ERP)[1]	Number of Enforcement Actions Taken	% of Enforcement Actions Taken[2]
Level 1	Written warning	2	100
Level 2	Referrals/administrative	0	0
Level 3	Citation/enforcement	0	0
Level 4	Administrative Hearing	0	0
Total		2	100

Notes:

[1]Agencies to list specific enforcement actions as defined in their ERPs.

[2]Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

C.4.c.iii.(3) Types of Violations Noted by Business Category

Fill out the following table or attach a summary of the following information.

There were no violations observed for north county

Business Category[1]	Actual Discharge Violations	Potential Discharge Violations
Concrete/stone/clay products (sic 1429)	0	1
Corporation Yards (sic 9512)	0	1

Notes:

[1] List your Program's standard business categories.

C.4.c.iii.(4) Non-Filers

List below or attach a list of the facilities required to have coverage under the Industrial General Permit but have not filed for coverage:

There were no industries identified as non-filers during schedule inspections during this fiscal year.

C.4.d.iii Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
NPDES	June 16, 2010	General overview of MRP, Sections C.5 and C.4, inspections, and data reporting of County's NPDES Permit requirements	14	93%

Section 5 – Provision C.5 Illicit Discharge Detection and Elimination

C.5.a.ii Legal Authority

(For FY 09-10 Annual Report only) Do you have adequate legal authority to prohibit and control illicit discharges and escalate stricter enforcement to achieve expedient compliance?	X	Yes		No
If **No**, explain:				

C.5.b.ii.(4) Enforcement Response Plan

(For FY 09-10 Annual Report only) Have you developed and implemented an Enforcement Response Plan by April 1, 2010?	X	Yes		No
If **No**, explain:				

Program Highlights

Provide background information, highlights, trends, etc. For FY 09-10 Annual Report describe steps taken to revise your program to meet new data tracking and reporting requirements.

The Department of Environmental Health is the department primarily responsible for C.5 but the Department of Roads and Airports is also involved in a few of the tasks associated with this Provision of the Municipal Regional Permit.

The Department of Environmental Health and the Department of Planning and Development participated in the Program's IND/IDDE Ad Hoc Task Group (AHTG) and reviewed AHTG products including collection system screen program guidance. The County did not participate in the BASMAA Municipal Operation Committee but appropriate materials developed by this committee were discussed at the Program's IND/IDDE AHTG meetings. For a description of the activities of the IND/IDDE AHTG and BASMAA Municipal Operation Committee please see Section C.5 Illicit Discharge Detection and Elimination in the Program's FY 09-10 Annual Report. The Department of Environmental Health- Consumer Protection Division developed an ERP. The Department of Environmental Health also begun utilizing the AHTG excel file to track complaints generated from stormwater investigations and violations for FY 2010 and 2011. The Department of Environmental Health did not have an adequate method in place during this fiscal year to track spill and discharge complaints.

The Department of Roads and Airports is involved with the collection system screening program requirements. The Department of Road and Airports made the maps of the County's MS4 available to the public at their Administrative Office Plan County located at 101 Skyport Drive, San Jose, CA 95110. The Department also put a note in their web page informing the public of the availability of the maps. In addition, maps are also made available on the SCVURPPP website.

The Department of Environmental Health- Solid Waste Program received 94 solid waste complaints, 54 of these complaints were related to stormwater issues. The Hazardous Material Program had 2 complaints. The Hazardous Materials Program and Solid Waste Program have not received training on the new reporting requirements but training is planned for late September/early October. The solid waste program does track their complaints but not in a manner consistent with the MRP requirements. The training will address this problem.

C.5.c.iii Complaint and Spill Response Phone Number and Spill Contact List

List below or attach your complaint and spill response phone number and spill contact list.

Contact	Description	Phone Number
Department of Environmental Health	For onsite-septic sewage complaints, solid waste, hazmat and vector control	(408) 918 -3400
911	For hazardous spills	911

C.5.d.iii Evaluation of Mobile Business Program

Describe implementation of minimum standards and BMPs for mobile businesses and your enforcement strategy. This may include participation in the BASMAA Mobile Surface Cleaners regional program or local activities.

Description: The County of Santa Clara has been attending the IND/IDDE AHTG. A description of the efforts this program has made are available in section C.5 Illicit Discharge and Elimination of the Program's FY 09-10 Annual Report and the BASMAA Municipal Operations Committee, to address mobile business. In addition, the Consumer Protection Division has jurisdiction over the mobile retail food vehicles and actively enforces against illegal discharges that come from mobile retail food vehicle operations, such as: grey water tanks not properly capped and discharging to the ground.

C.5.e.iii Evaluation of Collection System Screening Program

Provide a summary or attach a summary of your collection screening program, a summary of problems found during collection system screening and any changes to the screening program this FY.

Description: The Department of Roads and Airports and the Department of Planning and Development has participated in the IND/IDDE AHTG. Please see Section C.5 Illicit Discharge Detection and Elimination of the Program's FY09-10 Annual Report for a description of the activities of the IND/IDDE AHTG to develop collection system screening program guidance.

In addition, the Department of Roads and Airports Maintenance Division has a policy for inspecting and cleaning manholes and drainage inlets, as well as reporting and removing illegal discharges. For inlet inspections, the Department is currently participation in the IND/IDDE AHTG to develop collection screening program data and inspection forms for use in next fiscal year.

C.5.f.iii.(1), (2), (3) Spill and Discharge Complaint Tracking

Spill and Discharge Complaint Tracking (fill out the following table or include an attachment of the following information)

	Number	Percentage
Discharges reported (C.5.f.iii.(1))	56	
Discharges reaching storm drains and/or receiving waters (C.5.f.iii.(2))	0	
Discharges resolved in a timely manner (C.5.f.iii.(3))	56	

C.5.f.iii.(4) Summary of major types of discharges and complaints
Provide a narrative or attach a table and/or graph.
The County of Santa Clara was not able to tracking all discharge incidents for this fiscal year. The Department of Environmental Health- Consumer Protection Division was not able to track this data in a manner consistent with the MRP requirements. A training class was given to the Consumer Protection Division in June but has since started tracking the information for the current fiscal year. The Hazardous Materials Program was tracking discharges and had only two to report this year for the unincorporated area of the County. Those two included improperly material storage and improper disposal of used oil and filter. The Solid Waste Program was tracking complaints this year and all complaints have been corrected. The Solid Waste primarily received complaints regarded refuse/rubbish/debris and junk accumulation as well as problems associated with no garbage services.

Section 6 – Provision C.6 Construction Site Controls

C.6.a.iii Legal Authority				
(For FY 09-10 Annual Report only) Is your agency's legal authority adequate for C.6 compliance?	X	Yes		No
If **No**, explain:				

C.6.b.ii.(3) Enforcement Response Plan				
(For FY 09-10 Annual Report only) Was your Enforcement Response Plan developed and implemented by April 1, 2010?		Yes	X	No
If **No**, explain: The Department of Planning and Development had an ERP developed prior to April 1,2010. However due to the timing of Board of Supervisor Meetings, the ERP was not approved until April 13th. Implementation begun once the ERP was approved.				

C.6.e.iii.1.a, b, c Site/Inspection Totals

Number of sites disturbing < 1 acre of soil requiring storm water runoff quality inspection (i.e. High Priority) (C.6.e.iii.1.a)	**Number of sites disturbing ≥ 1 acre of soil** (C.6.e.iii.1.b)	**Total number of storm water runoff quality inspections conducted** (C.6.e.iii.1.c)
13	71	423

C.6.e.iii.1.d Construction Activities Storm Water Violations

BMP Category	Number of Violations[1]	% of Total Violations[2]
Erosion Control	0	0
Run-on and Run-off Control	0	0
Sediment Control	0	0
Active Treatment Systems	0	0
Good Site Management	0	0
Non Stormwater Management	0	0
Total	**0**	**100%**

Notes:

[1]Count one violation in a category for each site and inspection regardless of how many violations/problems occurred in the BMP category.

[2]Percentage calculated as number of violations in each category divided by total number of violations in all six categories.

C.6.e.iii.1.e Construction Related Storm Water Enforcement Actions

	Enforcement Action (as listed in ERP)[1]	Number Enforcement Actions Taken	% Enforcement Actions Taken[2]
Level 1- First Time offense for violations that doe not cause an immediate threat to the storm drain system or potential violation.	1. Providing education. 2. Informing responsible parties of the area of concern, corrective actions to take and a date for compliance. 3. Verbal or written warning.	1	100%
Level 2- violations that cause an immediate treat, reoccurring violations or when corrective actions have not been taken (second contact).	1. Provide education if it has not be previously prod and the violation causes an immediate threat 2. Post a notice of violation on the site if it is a violation that causes an immediate threat or corrective actions have not been taken. 3. Stop all inspections, as necessary. 4. Give administrative fines for sites that discharge to the storm drain system or directly into a water body and cause a threat to water quality, aquatic life and/or public health and safety or when corrective actions have not been taken, appropriate.	0	0%
Level 3- Egregious violations, reoccurring violations or when corrective actions have not been taken (third contact or more).	1. County staff filing a Criminal Action/Misdemeanor Compliant with County's District Attorney Office for egregious violations, reoccurring violations or when corrective actions have not been taken. 2. Obtaining a Public Nuisance Abatement Order from the Board of Supervisors for egregious violations, reoccurring violations or when corrective actions have not been taken after multiple offenses. This could serve as the basis for a civil injunction request. 3. Obtaining a Summary abatement order	0	0%

	from county executive office for egregious violations that must be corrected immediately.		
Total		**1**	**100%**

Notes:

[1]Agencies should list the specific enforcement actions as defined in their ERPs.

[2]Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

C.6.e.iii.1.f, g Illicit Discharges

	Number
Number of illicit discharges, actual and those inferred through evidence (C.6.e.iii.1.f)	0
Number of sites with discharges, actual and those inferred through evidence (C.6.e.iii.1.g)	1

C.6.e.iii.1.h, i Violation Correction Times

	Number	Percent
Violations fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii.1.h)	1	100%[2]
Violations not fully corrected within 30 days after violations are discovered (C.6.e.iii.1.i)	0	0%[3]
Total number of violations for the reporting year[1]	**1**	**100%**

Notes:

[1]Total number of violations equals the number of initial enforcement actions (i.e. one violation issued for several problems during an inspection at a site). It does not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

[2]Calculated as number of violations fully corrected in a timely period after the violations are discovered divided by the total number of violations for the reporting year.

[3]Calculated as number of violations not fully corrected within 30 days after the violations are discovered divided by the total number of violations for the reporting year.

C.6.e.iii.(2) Evaluation of Inspection Data

Describe your evaluation of the tracking data and data summaries and provide information on the evaluation results (e.g., data trends, typical BMP performance issues, comparisons to previous years, etc.).
Description: The Department of Planning and Development has a construction inspection program to inspect private projects in the unincorporated areas of the Santa Clara County. The Departments of Roads and Airport, Facilities and Fleets and Parks and Recreation have their

own respective inspection programs for their department's public projects.

For the Department of Planning and Development, the senior construction inspectors perform stormwater inspections for private projects in the unincorporated area. During this fiscal year the inspectors were not able to track all the information necessary to develop the summary statistics, such as violation by BMP categories. The senior construction inspectors started tracking violations by BMP categories when the ERP was approved in April and there were no violations observed during this time period. Since the senior construction inspectors started tracking violations there was one warning given for lack of proper sediment and erosion control on one construction site.

The senior construction inspectors keep a journal of all inspections performed and give their journal entries to their supervisor to enter into the excel spreadsheet. There will be training in the future on how to use the excel spreadsheet that was developed by the Program. In addition, the inspectors are in the process of updating their inspection checklist.

The Department of Planning and Development primarily see violations that are associated with erosion and sediment control BMPs that are either improperly installed or are not appropriate for the site. In the past, the Department of Planning and Development handled these types of violations through a grading violation and abatement program. However, this process is not able to efficiently handle stormwater issues and the Department will be working on implementing the enforcement program to go along with the ERP this fiscal year. Since the Department has not had a violation to test the enforcement program, the Department is expecting to make revisions to the enforcement program. This past fiscal year there were 14 properties cited with grading violations, only one of these was a stormwater issue. During fiscal year 2008-2009, there were 21 properties cited with grading violations.

The Departments of Facilities and Fleets, Roads and Airports and Parks and Recreation have their own staff that conducts inspection to ensure that no accidental discharges enter the storm drain system. There were no violations reported for any of these departments this fiscal year.

C.6.e.iii.(2) Evaluation of Inspection Program Effectiveness

Describe what appear to be your program's strengths and weaknesses, and identify needed improvements, including education and outreach.

Description: The Department of Planning and Development is working to improve our construction inspection program for private construction projects in the unincorporated area of Santa Clara County. The Department's senior construction inspectors inspect all private projects that have a grading permit with the County, in the unincorporated area, on a continuing basis and inspect sites with a high potential for erosion more frequently. Since our senior construction inspectors frequently visit private construction sites they are able to identify potential problems at a site and provide education and corrective actions to prevent violations from occurring. Since the senior construction inspectors visits each construction site frequently there is usually only the need to issue a verbal warning and escalating enforcement actions are rarely taken. At private construction sites that do not have a grading permit the building inspections inform senior construction inspectors if there is a stormwater violation.

The Department of Planning and Development only has three senior construction inspectors to cover private projects for the entire unincorporated areas of Santa Clara County. Some of the private projects only have building permits and not all the building inspectors are trained to identify stormwater issues and when to inform the senior construction inspectors of actual or potential violation. The County is currently in the process of developing a training program to indentify non-point source violations at construction sites for our building inspectors. This will allow the building inspectors to identify problems and either provide education to correct the problem immediately or refer to the senior construction

inspectors for construction sites that the senior construction inspectors would not normally inspect.

The Department of Planning and Development holds an applicants roundtable meeting each quarter. At these meeting the Clean Water coordinator discusses up coming NPDES permit requirements. During the January meeting the Clean Water Coordinator reviewed the new NPDES permit requirements. These applicant roundtable meetings will be used over the next fiscal year to provided additional education and outreach to project applicants.

The Department of Roads and Airports and Planning and Development participated in the construction inspection AHTG to develop construction inspection forms and inspection data tracking tools. The Department of Roads and Airports completed the update of the SWPPP provisions in its construction special provisions template applicable to construction projects administered by the Department. In FY 2010-2011, the Department of Roads and Airports is developing:

1) Standard SWPPP provisions for compliance by projects with encroachment permits and a stormwater inspection procedure at construction sites of these projects
2) Review and update the existing procedures and documentation on inspections & maintenance of stormwater treatment measures for use by Road Maintenance.

The Department of Facilities and Fleets did not have any site work performed this fiscal year but did perform routine inspections to ensure that there were no discharges to the storm drain system. The Department will have their inspection programs fully employed with the start of the two new projects planned for the current fiscal year.

C.6.f Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
New permit requirements under MRP (internal Staff meeting)	11-13-09	New permit requirements under C.3 and C.6	3	100%
Clean Water Act Enforcement Law Update	3/4/10	Combined sewer overflows (CSO), animal waste, stormwater runoff, Wetlands, clean drinking water, water bodies of regional and local importance	1	33.3%
CASQA BMP Web Portal: Tools for Complying with the New Construction General Permit	6/23/10	The new Construction BMP Handbook Portal, demonstrating how the enhanced content and format can assist your development of SWPPPs for Risk Level 1, Risk Level 2, and Risk Level 3 construction projects.	PLN=1 R&A=8	PLN= 33.3% R&A=80%

Construction Inspection BMPs	10/21/2009	Current construction site regulations & responsibilities; effective erosion and sediment control BMPs, inspection procedures.	PLN=3 Parks=1 R&A=3	PLN=100% PARKS=100% R&A=30%
Construction Site Compliance	1/19/10& 1/20/2010	How to comply with the New Statewide Construction General Permit. Simple and effective stormwater BMPs for small/large construction projects. Selecting and maintaining BMPs during construction. Monitoring and reporting requirements. Post construction stormwater management techniques.	PLN= 1 R&A= 10 PARKs=1	PLN=33% R&A=100% PARKs=100%
Construction site storm water Compliance	5/19/2010	Focused on the requirements in the new Construction General Permit, including understanding the requirements for Qualified SWPPP Developer and Qualified SWPPP Practitioner, stormwater and receiving water monitoring, linear utility projects and the SMARTS web tool for document submittal.	R&A=2	R&A=20%

Section 7 – Provision C.7. Public Information and Outreach

C.7.b.ii.1 Advertising Campaign

Summarize advertising efforts. Include details such as messages, creative developed, and outreach media used. The detailed advertising report may be included as an attachment. If advertising is being done by participation in a countywide or regional program, refer to the separate countywide or regional Annual Report.

Summary: The County of Santa Clara participates in a countywide advertising program. The countywide advertizing efforts are summarized in three separate reports located in the Program's FY 09-10 Annual Report; section C.7 Public Information and Outreach. These separate reports include the following:

- FY 09-10 Watershed Watch Campaign Annual Campaign Report,
- FY 09-10 Watershed Watch Partner Report, and
- FY 09-10 Watershed Watch Web Statistics Report.

In addition the Department of Agriculture and Environmental Management- Integrated Waste Management conducted a public outreach campaign. The Integrate Waste Management Division conducted a single Countywide Public outreach campaign focusing on "bring your own bag" message. The Public Education Subcommittee (PES) Reusable Bag Campaign for FY2009/10 began on April 19 and ended July 4. Overall, the campaign realized over $350,000 in value (paid spots, bonus spots, streaming spots, web mentions, promo mentions, Summer Made Simple sponsorship and ad placements, grants, and live events) for a total media investment of $79,600.

The media investment with KBAY/Mix 106.5 netted over 9 million gross impressions (GI's) and reached 1.2 million people (Reach) in Santa Clara County over 7 times (Frequency). Reaching over 80% of the population with a frequency over 7 are both excellent metrics. These statistics do not include the added impressions and messaging achieved at the events, DJ mentions, or online media.

Additionally, a subgroup of interested jurisdictions from the PES raised $21,000 in contributions from the Cities of Milpitas, San Jose, and Santa Clara, Unincorporated County of Santa Clara, KBAY/Mix 106.5, California Product Stewardship Council, and the Discovery Channel. These funds were used to purchase 19,639 reusable bags branded with the PES slogan "Silicon Valley Shops Green" which were distributed via KBAY/Mix106.5 events throughout Santa Clara County. Some of the events bags were distributed at include A la Carte & Art (Mountain View), Mushroom Mardi Gras (Morgan Hill), Dancin' on the Avenue (San Jose), Great Mall (Milpitas), and many more events that will continue into September 2010.

The Subcommittee will know after the conclusion of the Godbe Research Study if it was successful in its stated goal to raise awareness, (the first phase of behavior change) of the importance of reusable bag use. Godbe Research is currently slated to begin the study on August 9 and have a top line report ready by August 19. A full, cross-tabbed report should be available to the PES by October 1 and a recap will be presented to the TAC after this report is received.

C.7.b.iii.1 Pre-Campaign Survey

(For the FY 10-11 Annual Report only) Summarize survey information such as sample size, type of survey (telephone survey, interviews etc.). Attach a survey report that includes the following information. If survey was done regionally, refer to a regional submittal that contains the following information: **Not required for this Annual Report.**

- Summary of how the survey was implemented.
- Analysis of the survey results.
- Discussion of the outreach strategies based on the survey results.
- Discussion of planned or future advertising campaigns to influence awareness and behavior changes regarding trash/litter and pesticides.

Place an **X** in the appropriate box below:

	Survey report attached
	Reference to regional submittal:

C.7.c Media Relations

Summarize the media relations effort. Include the following details for each media pitch in the space below, AND/OR refer to a regional report that includes these details:

- Topic and content of pitch
- Medium (TV, radio, print, online)
- Date of publication/broadcast

Summary: The County of Santa Clara participates in SCVURPPP, which also participates in BASMAA, which provides a regional effort for media outreach. Please see the BASMAA Media Relations Final Report, developed by BASMAA, for more information on the media relation efforts conducted in FY 09-10. This report can be found in the Program's FY09-10 Annual Report under the C.7 Public Information and Outreach section.

In addition, the Integrated Waste Management Division has media coverage. The Home Composting Education Program (HCEP) buys some advertising and purchases advertising space in local papers to promote their workshops. Upcoming workshops are posted on the reduce waste.org website. Integrated Waste Management also provides unincorporated area residents with quarterly newsletters providing information on variety of waste and recycling- related topics as well as bill inserts from haulers with pertinent information. The documents are produced collaboratively with hauler and IWM input. There is a Countywide recycling hotline (1-800-533-8414) and Recycling Website (ReduceWaste.org) that provide a wide range of waste reduction and recycling information to the public. One of the most important services that the Integrated Waste Management Program provides is staffing the Compost Rotline (408-918-4640) which is used to answer composting questions, troubleshooting with compost bins and worm bins, workshop registration, and master composter volunteer sign-ups. The Rotline takes on average 75 calls a week.

C.7.d Stormwater Point of Contact

(For FY 09-10 Annual Report only, unless changes made) Provide details of website or phone number used as the point of contact. Report on how the point of contact is publicized and maintained. If any change occurs in this contact, report in a subsequent Annual Report.

Contact Summary: At the County of Santa Clara each department is individually responsible for their own compliance however, the Department

of Planning and Development has a Clean Water program that acts as the point of contact for the County of Santa Clara. This program has a webpage on the Development Services website and contact information (Clara Spaulding 408-299-5737) is available on this webpage and in an organization chart on the Department of Planning and Development's website. The contact information is also available on many of the brochures and flyers that are available to the public. County staff maintains the web pages, brochures and flyers.

In addition, the Department of Environmental Health provides the public with information on stormwater pollution prevention alternatives. This Department has a website, brochures, flyers and contact information that is discussed in Section C.5. The website, brochures and flyers are also maintained by Department staff.

Another point of contact is the Watershed Watch Campaign hotline (1-866-WATHERSHED) and Watershed Watch Campaign website (www.mywatershedwatch.org). Where individual agency points of contact are publicized on SCVURPPP outreach materials and websites and the point of contact is maintained by the Program and their authorized agents."

C.7.e Public Outreach Events

Program Staff, Watershed watch consultant, and Co-permittees staffed ten outreach events in FY09-10.Events were selected based upon target audience and attendance. Materials distributed at the events included the following: Less Toxic Pest Management Fact Sheets, " 10 Most Wanted Backyard Bugs" brochures, "Don't plant a Pest" brochure, " You are the Solution to Water Pollution" brochures, "Clean Cars & Clean Creeks" brochures and giveaways (e.g. flyswatters, OWOW magnets, notepads and temporary tattoos). The flyswatters have the Watershed Watch website and hotline number and the words " the Original Earth-Friendly Pest Control" printed on them. The beanbag game for children was used at most of the events. Event staff distributed more than 5,000 outreach materials and giveaways.

Event Details	**Description** (messages, audience)	**Evaluation of Effectiveness**
Provide event name, date, and location.	Identify type of event (e.g., school fair, farmers market etc.), type of audience (school children, gardeners, homeowners etc.) and outreach messages (e.g., Enviroscape presentation, pesticides, stormwater awareness)	Provide general staff feedback on the event (e.g., success at reaching a broad spectrum of the community, well attended, good opportunity to talk to gardeners etc.). Provide other details such as: • Estimated overall attendance at the event. • Number of people that visited the booth, comparison with previous years • Number of brochures and giveaways distributed • Results of any spot surveys conducted
Name: Public outreach Events	Type of Event: Local Public events, fairs,	This information was not tracked for this fiscal

Date: Various times throughout the year Location: Various locations throughout the County	and home and garden shows Audience: Residents of Santa Clara County Message: waste prevention, recycling, household hazardous waste management, home composting and other environmental topics	year but will be tracked in the future.
Name: Bay Friendly Gardening Date: Various times throughout the year Location: Various locations throughout the County	Type of Event: Workshop Audience: Residents of Santa Clara County Message: Encourage residents to make environmentally friendly gardening choices. Includes one integrated waste management workshop.	This information was not tracked for this fiscal year but will be tracked in the future.
Name: Compost Workshop Date: Usually once a month Location: Various locations within the County	Type of Event: Workshop Audience: County residents Message: Encouraging basic composting, worm composting and healthy soils which reduce water runoff	General Feed Back: This information was not tracked for this fiscal year but will be tracked in the future. Estimated Overall Event Attendance: 28 compost workshops with a total of 1,045 attendees
Name: Applicants Round Table Meeting Date: January 27, 2010 Location: 70 W. Hedding ST San Jose CA	Type of Event: Public meeting Audience: Engineering consultants Message: New/redevelopment requirements, post construction treatment BMPs, Source control measures and site control measures.	General Feed Back: This is a good event for reaching project applicants to make them aware of the new C.3 requirements. Estimated Overall Event Attendance: 11
Name: Pumpkins in the Park Date: October 10, 2009 Location: Guadalupe River Park and Gardens, San Jose Region: Countywide	Type of Event: Community fair Audience: Families with children Message: Stormwater pollution prevention, less-toxic pest control and, proper disposal of household hazardous waste (HHW).	General Feed Back: The event was very well attended. A lot of attendees stopped at the booth to play the bean bag game and pick up brochures. This is a good event for educating families with children. Estimated Overall Event Attendance: 12,000-14,000. Number of Brochures Distributed: 432 Number of Giveaways Distributed: over 1,000
Name: Muslim Green Fair Date: October 18, 2009 Location: 3003 Scott Blvd., Santa Clara	Type of Event: Community fair Audience: Families with children Message: Stormwater pollution prevention, less-toxic pest control and, proper disposal	General Feed Back: This is a good event for reaching members of the Muslim community. The bean bag game was used at this event. Estimated Overall Event Attendance: 1,000

Region: Countywide	of HHW	Number of Brochures Distributed: 14 Number of Giveaways Distributed: 221
Name: Haunted History Date: October 31, 2009 Location: History Park at Kelley Park, San Jose Region: Countywide	Type of Event: Halloween Event Audience: Families Message: Stormwater pollution prevention.	General Feed Back: This event is good for getting the Program's name out, but not for educating attendees. Most children stop at the booth only for candies and are not receptive to information. Estimated Overall Event Attendance: 1,500 Number of Brochures Distributed: 12 Number of Giveaways Distributed: 267
Name: Spring Garden Market Date: April 10, 2010 Location: History Park at Kelley Park, San Jose Region: Countywide	Type of Event: Plant sale Audience: Home owners/gardeners Message: Stormwater pollution prevention, less-toxic pest control	General Feed Back: Most people came to the event to buy plants and did not want to pick up information. The Program will probably not attend this event next year. Estimated Overall Event Attendance: 3,000 Number of Brochures Distributed: 181 Number of Giveaways Distributed: 61
Name: NVIDIA Corp. Earth Day Event Date: April 22, 2010 Location: 2701 San Tomas Expwy, Santa Clara Region: Countywide	Type of Event: Corporate event Audience: Information Technology Professionals Message: Stormwater pollution prevention, less-toxic pest control	General Feed Back: The event was held during lunch hour in the cafeteria and very well attended. Most employees stopped at the booth to ask questions and take brochures. Estimated Overall Event Attendance: 500 Number of Brochures Distributed: 60 Number of Giveaways Distributed: 183
Name: Spring in Guadalupe Gardens Date: April 24, 2010 Location: Guadalupe River Park and Gardens, San Jose Region: Countywide	Type of Event: Community fair, plant sale. Audience: Families with children, homeowners and gardeners Message: Stormwater pollution prevention, less-toxic pest control and, proper disposal of HHW.	General Feed Back: Good attendance at booth. Most people were looking for specific pest control information. The bean bag toss game was used. Estimated Overall Event Attendance: 4,500 Number of Brochures Distributed: 423 Number of Giveaways Distributed: 797
Name: Watershed Watch Car Wash Event Date: May 5, 2010 Location: Robertsville Classic Car Wash, 5005 Almaden Expwy, San Jose	Type of Event: Car Wash Audience: Car wash customers Message: Stormwater pollution prevention, proper car washing.	General Feed Back: Excellent turn-out, resulted in a 50% increase of business for the car wash during the 2-hour time period. Event staff spoke with customers and provided them information

Region: Countywide		on proper car washing. Most people were interested in taking the Watershed Watch discount card. Estimated Overall Event Attendance: 150 Number of Brochures Distributed: 103 Number of Watershed Watch Discount Cards Distributed: 129
Name: Watershed Watch Car Wash Event Date: May 19, 2010 Location: Delta Queen Classic Car Wash, 981 E Hamilton Ave, Campbell Region: Countywide	Type of Event: Car Wash Audience: Car wash customers Message: Stormwater pollution prevention, proper car washing.	General Feed Back: Due to a rainy day forecast, attendance was low at this event. Estimated Overall Event Attendance: 45 Number of Brochures Distributed: 34 Number of Watershed Watch Discount Cards Distributed: 49
Name: Watershed Watch Car Wash Event, Date: June 2, 2010 Location: Capitol Premier Car Wash, 735 Capitol Expwy Auto Mall, San Jose Region: Countywide	Type of Event: Car Wash Audience: Car wash customers Message: Stormwater pollution prevention, proper car washing.	General Feed Back: Good turn-out. Car wash owner indicated there was an increase in business from their normal expectations. Estimated Overall Event Attendance: 100 Number of Brochures Distributed: 101 Number of Watershed Watch Discount Cards Distributed: 107
Name: Festival in the Park Date: June 26, 2010 Location: Hellyer County Park, San Jose Region: Countywide	Type of Event: Community Health Fair Audience: Families with children. Message: Stormwater pollution prevention, less-toxic pest control and, proper disposal of HHW.	General Feed Back: Good event for reaching the Hispanic community. The bean bag game drew a lot of families with children to the booth. Estimated Overall Event Attendance: 5,000 Number of Brochures Distributed: 418 Number of Giveaways Distributed: 365

C.7.f. Watershed Stewardship Collaborative Efforts

Summarize watershed stewardship collaborative efforts and/or refer to a regional report that provides details. Describe the level of effort and support given (e.g., funding only, active participation etc.). State efforts undertaken and the results of these efforts. If this activity is done regionally refer to a regional report.

Evaluate effectiveness by describing the following:

- Efforts undertaken
- Major accomplishments

Summary: During Fiscal Year 09-10, the Program actively supported the Santa Clara Basin Watershed Initiative (SCBWMI), including the Core Group, the Land Use Subgroup, and the Trash Subgroup (now the Santa Clara Valley Zero Litter Initiative); the Bay Area Macroinvertebrate Bioassessment Information Network (BAMBI); and the Stevens & Permanente Creeks Watershed Council. Information on these efforts is included within the C.7 Public Information and Outreach section of the Program's FY 09-10 Annual Report."

C.7.g. Citizen Involvement Events

List the types of events conducted (e.g., creek clean up, storm drain inlet marking, native gardening etc.). Use the following table for reporting and evaluating citizen involvement events.

In addition to the information provided in the table below, SCVURPPP and other organizations have also developed two separate reports on citizen involvement events conducted during FY 09-10. These reports include:

• Watershed Watchers: Keeping Our Waterways Clean: FY 09-10 Fourth Quarter Report (includes end-of-year Summary from Alviso Education Center)

• Going Native Garden Tour 2010- Summary Report

These reports are included within the C.7 Public Information and Outreach section of Program's FY 09-10 Annual Report.

Event Details	Description	Evaluation of effectiveness
Provide event name, date, and location. Indicate if event is local, countywide or regional	Describe activity (e.g., creek clean-up, storm drain marking etc.)	Provide general staff feedback on the event. Provide other evaluation details such as: • Number of participants. Any change in participation from previous years. • Distance of creek or water body cleaned • Quantity of trash/recyclables collected (weight or volume). • Number of inlets marked.

		• Data trends
Name: Community clean ups Date: N/A Location: Various Communities in the County	Local Community Cleanup event were a few neighborhood is served each year	1,463 households were served this year. A total of 110.47 tons of waste and recyclable metals were collected.
Name: Great American Litter Pick up Date: March 20, 2010 Location: Burbank Community	Annual Clean up event held on the third Sunday in March. Location of event changes each year.	30 Attendees including Luther Burbank School, members of the Kiwanis Club and a few Sheriff recruits. There were 31 bags of litter and three bags of recyclables collected.
Name: National River Cleanup Day Date: 5/15/10 Location: Various locations throughout the County Focus: Countywide	In FY 09-10, the Creek Connection Action Group (CCAG) sponsored two creek clean-up events: Coastal Clean-up Day on September 19, 2009 and National Rivers Clean-up Day on May 15, 2010. The Program provided funding for the National Rivers Clean-up Day advertising.	A total of 1,068 volunteers participated in cleaning 34 sites and removed approximately 29,098 pounds of trash and 6,394 pounds of recyclables from creeks. Santa Clara County Parks is a sponsoring organization of the CCAG, and the Department hosted 13 cleanup sites in FY 09-10.
Name: Park Beautification Day Date: 10/16/09, 10/31/09, 1/9/10, 2/6/10, 3/6/10, 6/12/10 Location: Vasona and Hellyer County Parks Focus: Countywide	Park Beautification Days are volunteer park clean up events at two of our urban, creekside parks. Litter is picked up in the entire park, including the shoreline and trails adjacent to Vasona Reservoir and Los Gatos Creek, and Cottonwood Lake and Coyote Creek.	A total of 269 volunteers participated in these FY 09-10 park beautification work days.
Name: LDS Community Service Day Date: 5/8/10 Location: Vasona, Lexington, Montalvo, Stevens Creek and Sanborn County Parks Focus: Countywide	On 5/8/10 County Parks hosted 5 cleanup sites for the Latter Day Saints statewide Community Service Day. Volunteers picked up litter at locations in 5 County Parks.	282 volunteers served a total of 890 hours for this single day event.
Name: Summer of Service Programs Date: 7/16/09, 7/30/09, 8/13/09 Location: Don Edwards Wildlife Refuge, Alviso	Partnership program between Santa Clara Valley youth groups and the Watershed Watchers program. Youth spend a day at the Refuge and they work in the gardens in the	Number of attendees on 7/16/09: 2 elementary school students and 6 middle school students. Number of attendees on 7/30/09: 10 middle

Focus: Countywide	morning and explore the Refuge in the afternoon.	school students. Number of attendees on 8/13/09: 8 middle school students.
Name: Gardening at the Refuge Date: 11/21/09 Location: Don Edwards Wildlife Refuge, Alviso Focus: Countywide	Participants usually work in the Refuge gardens planting native plants, pulling non-native plants, and mulching.	Number of attendees: 4 elementary school students, 2 high school students, and 9 adults.
Name: Community Service Days Date: 1/16/10, 3/20/10, 4/17/10, 5/17/10 Location: Don Edwards Wildlife Refuge, Alviso Focus: Countywide	This is an open day for the general public. Participants work in the gardens planning native plants, puling non-native plants, and mulching.	Number of attendees on 1/16/10:1 elementary school student, 1 high school student, and 6 adults. Number of attendees on 3/20/10: 1 elementary school student and 6 adults. Number of attendees on 4/17/10: 4 elementary school students and 4 adults. Number of attendees on 5/17/10: 13 elementary school students and 7 adults.
Name: National River Cleanup Day Date: 5/15/10 Location: Various locations throughout the County Focus: Countywide	In FY 09-10, the Creek Connection Action Group sponsored two creek clean-up events: Coastal Clean-up Day on September 19, 2009 and National Rivers Clean-up Day on May 15, 2010. The Program provided funding for the National Rivers Clean-up Day advertising.	A total of 1,068 volunteers participated in cleaning 34 sites and removed approximately 29,098 pounds of trash and 6,394 pounds of recyclables from creeks.

C.7.h. School-Age Children Outreach

Summarize school-age children outreach programs implemented. A detailed report may be included as an attachment.
Use the following table for reporting school-age children outreach efforts.

In addition to the information provided below, the following separate reports were prepared by SCVURPPP and other organizations:

- ZunZun School Assemblies for Watershed Watch Campaign- FY 09-10 Academic Year Final Report
- Memorandum- Evaluation of the School Assembly Program- FY 09-10
- Watershed Watchers: Keeping Our Waterways Clean: FY 09-10 Fourth Quarter Report (includes end-of-year Summary from Alviso Education Center)

These reports contain information about school-age children outreach efforts conducted during FY 09-10 and can be found in the C.7 Public Information and Outreach section of the Program's Fy09-10 Annual Report.

Program Details	Focus & Short Description	Number of Students/Teachers reached	Evaluation of Effectiveness
Provide the following information: Name Grade or level (elementary/ middle/ high)	Brief description, messages, methods of outreach used	Provide number or participants	Provide agency staff feedback. Report any other evaluation methods used (quiz, teacher feedback etc.). Attach evaluation summary if applicable.
Name : ZunZun Musical Assembly Grade or level: elementary	Interactive, musical school assemblies educating K-6 children about watersheds and pollution prevention.	14,161 students	ZunZun assemblies were evaluated using postage-paid evaluation cards that were distributed to all teachers present at the performances. The Program received 130 completed evaluation cards from teachers. Overall, the feedback is positive and indicates an increase in the students' knowledge about watersheds and pollution prevention. A few highlights of the evaluations are: • Twenty-two teachers indicated that after the performance, 50% of their students knew what a watershed is; 51 teachers indicated that 75% of their students knew what a watershed is and 28 teachers

			indicated that 100% of their students knew what a watershed is. • Eight teachers indicated that after the performance, 50% of their students could name a way to prevent pollution in the watershed; 38 teachers indicated that 75% of their students could name a way to prevent pollution in the watershed; and 78 teachers indicated that 100% of their students could name a way to prevent pollution in the watershed. The Final Teacher Evaluation Report is included in the Program Annual Report Appendix 7-7.
Name: Watershed Watchers Program at Don Edwards Wildlife Refuge in Alviso Grade or level: elementary, middle, high school	The Refuge offers a number of interpretive programs to educate children and youth about preventing urban runoff pollution. These include: Bike the Levees; Discover Native Species; Habitat Exploration; Living Wetlands; Marshes, Mud and Plankton; Quackers and Honkers; and Water Water Everywhere.	80 pre-kindergarteners, 1,359 elementary school students, 33 middle school students, and 199 high school students.	Visitor Surveys are used to determine visitor demographics, effectiveness of publicity, and the effectiveness or the Watershed Watchers Program. In addition, an "Urban Runoff Bead Drop" display is used to record actions (e.g., pick up litter, spread the word, take car to car wash) that children promise to do the help keep storm drains clean. Results of both these evaluation mechanisms are summarized in the Watershed Watchers Fourth Quarter Report included in the Program Annual Report Appendix 7-5.

Section 8 - Provision C.8 Water Quality Monitoring

C.8 Water Quality Monitoring
State below if information is reported in a separate regional report. Municipalities can also describe below any Water Quality Monitoring activities in which they participate directly, e.g. participation in RMP workgroups, fieldwork within their jurisdictions, etc.
Summary: For FY 09-10 the County of Santa Clara contributed to the SCVURPPP Monitoring and Assessment Program. This program conducted water quality monitoring in Santa Clara Valley creeks and rivers, in coordination with the BASMAA Regional monitoring Coalition (RMC). The County of Santa Clara also contributes financially to the Regional Monitoring Program for Water Quality in the San Francisco Estuary (RMP) and in RMP committees and work groups. For additional information on monitoring activities conducted by SCVURPPP, BASMAA RMC and the RMP, please see the C.8 Water Quality Monitoring section of the Program's FY09-10 Annual Report.

Section 9 – Provision C.9 Pesticides Toxicity Controls

C.9.a Adopt an Integrated Pest Management (IPM) Policy or Ordinance

(For FY 09-10 Annual Report only) Attach a copy of your individual IPM ordinance or policy.	X	**Attached**		**Not attached,** explain below
If **Not attached**, explain: The County of Santa Clara has an IPM and Pesticide Use Ordinance. A copy of the ordinance in available in Appendix 9-1.				

C.9.b Implement IPM Policy or Ordinance

Report implementation of IPM BMPs by showing trends in quantities and types of pesticides used, and suggest reasons for increases in use of pesticides that threaten water quality, specifically organophosphorous pesticides, pyrethroids, carbaryl, and fipronil. A separate report can be attached as evidence of your implementation.

Summary: The County developed an Integrated Pest Management (IPM) Program in 2002. The IPM program reported in the IPM Program Progress Report 2002-2008 that total number of pesticides, applications, pesticide volume and toxicity has been significantly reduced. Pesticide use in invasive weed management projects, urban turf landscape, recreational turf and structures can be stated as statistically insignificant. In right of way vegetation management, there has been an 80% reduction in acreages under herbicide management. Since 2002, no aquatic herbicides are used in ponds or lakes. In 2008, no pesticide use was reported in fifteen regional parks (out of 17). Dependence upon and use of non-chemical alternatives have increased significantly. The development of management tools as well as research and outreach components, have provided a foundation for continued success and improved employee and stakeholder participation.

For more information a copy of The County of Santa IPM Program Progress Report 2002-2008 is available on the IPM website at http://www.sccgov.org/portal/site/ipm/. The 2009 Report is due to be published in September 2010 and will be available on this website as well.

C.9.c Train Municipal Employees

Enter the number of employees that applied or used pesticides (including herbicides) within the scope of their duties this reporting year.	26
Enter the number of these employees who received training on your IPM policy and IPM standard operating procedures within the last 3 years.	194
Enter the percentage of municipal employees who apply pesticides who have received training in the IPM policy and IPM standard operating procedures within the last three years.	100%

C.9.d Require Contractors to Implement IPM

Did your municipality contract with any pesticide service provider in the reporting year?	X	Yes		No

If yes, attach one of the following:

X	Contract specifications that require adherence to your IPM policy and standard operating procedures, OR
	Copy(ies) of the contractors' IPM certification(s) or equivalent, OR
	Equivalent documentation.

If **Not attached**, explain:

All contracted services are rendered using IPM Principles and Practices. For details see SCC IPM Progress Report 2002-2008 at http://IPM.sccgov.org ; SCC IPM Progress Report 2009 is due in September 2010. An example of a contract is located in Appendix 9-2.

C.9.e Track and Participate in Relevant Regulatory Processes

Summarize participation efforts, information submitted, and how regulatory actions were affected **OR** reference a regional report that summarizes regional participation efforts, information submitted, and how regulatory actions were affected.

Summary: In FY 09-10 The County of Santa Clara participated in regulatory process related to pesticides through contributions to SCVURPPP, BASMAA and CASQA. Please see the Regional Pollutants of Concern Report by BASMAA (submitted on behalf of all MRP Permittees) for more information. This Report is included within the Program's FY 09-10 Annual Report.

C.9.f Interface with County Agricultural Commissioners

Provide a summary of improper pesticide usage reported to the County Agricultural Commissioner and follow-up actions to correct violations, if any. A separate report can be attached as your summary.

Summary: There was only one improper pesticide usage reported to the County Agricultural Commissioner this year and it was located in Morgan Hill within the Central Coast Regional Water Quality Control Board region. The Department of Agriculture and Environmental Management investigated the complaint, discovered and filed a violation. Staff from the Department of Agriculture and Environmental Management intends to work with the contractor to ensure that the new herbicide application protocol is followed in order to prevent reoccurrences.

C.9.h.ii Public Outreach: Point of Purchase

Provide a summary of public outreach at point of purchase, and any measurable awareness and behavior changes resulting from outreach (here or in a separate report); **OR** reference a report of a regional effort for public outreach in which your agency participates.

Summary: The County of Santa Clara participates in a regional effort for public outreach. In section C.9 Pesticide Toxicity Control of the Program's FY 09-10 Annual Report are the following separate reports developed by SCVURPPP and BASMAA. These reports summarize the point of purchase outreach efforts conducted during FY 09-10.

- FY 09-10 Store Employee Training Report (SCVURPPP)
- FY 09-10 Store Employee Training Evaluation Summary (SCVURPPP)

- FY 09-10 Store Employee Training Status Table (SCVURPPP)
- FY 09-10 List of Stores in the IPM Store Partnership Program (SCVURPPP)
- FY 09-10 BASMAA "Our Water, Our World" (OWOW) Report (BASMAA)

C.9.h.vi Public Outreach: Pest Control Operators

Provide a summary of public outreach to pest control operators and landscapers and reduced pesticide use (here or in a separate report); **OR** reference a report of a regional effort for outreach to pest control operators and landscapers in which your agency participates.

Summary: The County of Santa Clara participates in a regional effort to provide outreach to pest control operators and landscapers. In section C.9 Pesticide Toxicity Control of the Program's FY 09-10 Annual Report is the following separate report developed by SCVURPPP and BASMAA. This report summarize the Public Outreach: Pest Control Operators efforts conducted during FY 09-10:

- FY 09-10 Green Gardener Training Report

Section 10 - Provision C.10 Trash Load Reduction

C.10.a.i Short-Term Trash Loading Reduction Plan
(For FY 10-11 Annual Report only) Provide description of actions/tasks initiated/conducted/completed in developing a Short-Term Trash Loading Reduction Plan (due February 1, 2012).
Description: **Not required for this Annual Report.**

C.10.a.ii Baseline Trash Load and Trash Load Reduction Tracking Method
(For FY 10-11 Annual Report only) Provide description of actions/tasks initiated/conducted/completed to gather trash loading data and in developing a Baseline Trash Load and Trash Load Reduction Tracking Method (due February 1, 2012).
Description: Please see Section C.10 Trash Load Reduction of the Program's FY 09-10 Annual Report for a summary of the Programs accomplishments.

C.10.a.iii Minimum Full Trash Capture
(For FY 10-11 Annual Report and Each Annual Report Thereafter) Provide description of actions/tasks initiated/conducted/completed in implementing Minimum Full Trash Capture Devices (due July 1, 2014) within individual jurisdictions. Include information on Full Trash Capture Devices installed under Bay-area Wide Trash Capture Demonstration Project administered by San Francisco Estuary Partnership.
Description: Please see Section C.10 Trash Load Reduction section of the Program's FY 09-10 Annual Report for a summary of the Programs accomplishments. In addition, a technical report was recently finalized by Program. This report detailing the results of the Program's Pilot Trash Structural Treatment Control Study implemented in 2007, this report is also available within the C.10 Trash Load Reduction section of the Program's FY 09-10 Annual Report.

C.10.b.iii Trash Hot Spot Assessment

(For FY 10-11 Annual Report and Each Annual Report Thereafter) Provide volume of material removed from each Trash Hot Spot cleanup, and the dominant types of trash (e.g., glass, plastics, paper) removed and their sources to the extent possible. Provide required photo documentation.

Fill out the following table or attach a summary of the following information. The photo documentation is available in Appendix 10-1. The before and after photos for SCC01 did not turn out. A single set of photos is provided. The County will be changing the location of Site SCC01 for a variety of reason, such as limited and dangerous access. The new site is schedule to be cleaned as part of the Coast Cleanup day on September 25, 2010.

Trash Hot Spot	Cleanup Date	Volume of Material Removed	Dominant Type of Trash	Trash Sources (where possible)
SCC01	5/15/2010	3,240 lbs	Dumping (inc. Auto parts, 1 car body)	Dumping
SCC02	5/15/2010	430 lbs	Litter	Park users or upstream light industrial/business park
SCC03	5/15/2010	240 lbs	Litter	Park users or upstream light industrial/business park

C.10.d Summary of Trash Load Reduction Actions

Provide summary of new trash load reduction actions or increased levels of implementation of existing actions that were implemented after adoption of the MRP (control measures and best management practices) including the types of actions and levels of implementation, and the total trash loads and dominant types of trash removed from each type of action.

Suggested trash load reduction actions to track and report may include: Not All trash Load reduction activities were tracked by "loads removed" this fiscal year. Once the Trash Load Reduction Tracking Method is developed (see provision C.10.a.ii), trash loads removed will be documented for each load reduction action (as feasible). Please see the Program's FY 09-10 Annual Report for the schedule.

- Anti-litter Campaigns
- Anti-litter/Dumping Enforcement Activities
- Curbside Recycling Programs
- Education and Outreach Efforts
- Free Trash Pickup/Drop-off Days
- County HHW Program Activities
- Improved Trash Bin Management
- Inspection/Maintenance of Storm Drain Outfalls
- Litter Pickup and Control
- Removal of Homeless Encampments
- Solid Waste Recycling Efforts
- Source Controls/Bans/Prohibitions
- Storm Drain Operation and Maintenance
- Storm Drain Signage/Marking
- Street Sweeping Activities
- Trash Removal from Receptacles
- Volunteer Creek Cleanups

Type of Trash Load Reduction Action	Date of First Implementation	Level of Implementation (specify if level was increased after MRP adoption)	Total Trash Load Removed by Action	Dominant Types of Trash Removed by Action
Residential Garbage Collection Services	N/A	Weekly Garbage collection services	Reached 18, 000 unincorporated area households and all unincorporated area business	Household and business garbage.
Residential Recycling Collection Services	N/A	Weekly/biweekly recycling collection services	Weekly (13,854 households) Bi-weekly (4,902 Households)	Recycling materials (plastics, paper and glass)
Residential used oil& used oil filter and household battery collection	N/A	Weekly neighborhood collection	18,000 households served	Used oil & used oil filters and household batteries.
Plastic Bag Ban	N/A	Held a single public	20,000 reusable	Plastic bags

		outreach campaign focusing on " bring your own bag"	bags were/will be distributed via the IWM media partner KBAY and the Summer Made Simple guide with further positive reinforcement of reusable bag message	
Special Cleanup services and Events	N/A	Annual community clean-up event	1,463 households, 110.46 tons of waste collected	Household waste and recyclable metals
Great American Litter Pick-up	N/A	Annual pickup	31 bags of litter and 3 bags of recyclables and 3910 tons of litter (at hot spots)	Litter and recyclables
Green Business program- business are required to stencil' no Dumping-flows to Bay" signage on storm drain inlets	1996	111 business have certified/recertified and 82 business applied to the program.	Not available	Litter
Drain, Culvert and Ditch cleaning	N/A	Conditions are monitored and frequency is changed as needed	9884 drains, 855 culverts, and 79,080 lineal feet of ditch cleaned. Materials to landfill 569.3 cubic yards	Litter and dumping
Street sweeping	N/A	Conditions are monitored and frequency is changed as needed. Sweep 10954 miles of expressway Sweep 680 miles of non-expressways.	Expressways debris collected=3733 Non-expressways debris collected=267	Generally these are silt, fines, gravel, and paper/plastic products.

Solid Waste program	1950's	Investigates complaints regarding solid waste	Received 94 complaints, 54 had water quality concerns, all were resolved	Trash, garbage, junk, dumping, yard waste and manure management
Household Hazardous Waste Collection events	1992	60 events: 41 at 2 permanent facilities and 19 at temporary site	34,629 residents were served, 432 small business drop-offs, 3.4 million lbs of hazardous waste was collected	Paints, pesticides, and Mercury containing product
National River Cleanup Day and California Coastal Cleanup Day at Santa Clara County Parks	1996 (Coastal Cleanup Day), 1998 (National River Cleanup Day)	Total number of sites per event and number of volunteers has increased each year.	Since County Parks began compiling statistics in 2006, 1,999 County Parks volunteers have collected 57,777 lbs. of trash plus 36,702 lbs. of recyclable goods	Litter and dumping.

Section 11 - Provision C.11 Mercury Controls

C.11.a.i Mercury Recycling Efforts

List below or attach lists of efforts to promote, facilitate, and/or participate in collection and recycling of mercury containing devices and equipment at the consumer level (e.g., thermometers, thermostats, switches, bulbs).

The Department of Environmental Health- Household Hazardous Waste Program held 60 collection events throughout the County to collect hazardous waste. There were 41 collection events at two permanent facilities and 19 events at temporary sites strategically located throughout the County. In addition, the Household Hazardous Waste Program served 432 small business drop-offs including local governments, Goodwill Industries and the Salvation Army. A total of 92,684 pounds of fluorescent lamps, 178,602 pounds of household batteries and 580 pounds of Elemental Mercury (including thermostats, thermometers and other products). A new conversion factor for fluorescent lamps was used in FY 09-10. The new conversion was established by the California Integrated Waste Management Board, now CalRecycle, in 2009, and is: 1foot equals .125 lbs and 1CFL equals 0.25lbs. Previously, the conversion used was: 1foot equals .25lbs and 1 CFL equals 0.0625lbs. At the end of FY 09-10, there were 34 retailers serving as fluorescent lamp drop-offs and 67 locations served as battery drop-offs. A total of 1,297 thermometers were collected from 24 thermometer exchange events where residents exchanged their mercury-containing thermometer for a free mercury-free one. Staff also participated in 28 community outreach events. In addition, the Integrated Waste management Division also collected used oil, used oil filters and household batteries at curbside on a weekly basis from all unincorporated area neighborhoods (18,000 households served).

In addition, the Department of Facilities and Fleets offered a training program to their staff that focused on the information available from the "EPA Clean-up Guidelines for Broken Mercury Containing Lamps." This training was presented at six different sessions at work group all-staff meetings. During the week of October 8th, 2009. As a result the Building Operations/Custodial & Grounds Departments collected and disposed of 13,105 lbs. of Mercury vapor containing fluorescent and compact fluorescent lamps/bulbs in seven different loads. In addition, 15 lbs. of Mercury containing devices from our Building Operations maintenance activities were properly disposed.

C.11.a.ii Mercury Collection

Provide an estimate of the mass of mercury collected through these efforts, or provide a reference to a report containing this estimate.

Amount collected:

"The methodologies for estimating the mass of mercury collected through mercury collection and recycling efforts are currently in development and are due to the Water Board by September 15, 2010. Therefore, estimates could not be made for FY 09-10. Estimates of the mass of mercury collected through recycling efforts during FY 10-11 will be provided with the FY 10-11 Annual Report (see FY 10-11 BASMAA Regional POC Report)."

C.11.b □Monitor Methylmercury **C.11.c □Pilot Projects to Investigate and Abate Mercury Sources in Drainages** **C.11.d □Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices** **C.11.e □Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit** **C.11.f □Diversion of Dry Weather and First Flush Flows to POTWs** **C.11.g □Monitor Stormwater Mercury Pollutant Loads and Loads Reduced** **C.11.h □Fate and Transport Study of Mercury In Urban Runoff** **C.11.i □Development of a Risk Reduction Program Implemented Throughout the Region** **C.11.j □Develop Allocation Sharing Scheme with Caltrans**
State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.
Summary: The County of Santa Clara participates in a regional effort to accomplish these sub-provisions. A summary of the Program's accomplishments are include in the C.11 Mercury Controls section of the Program's Fy09-10 Annual Report and/or the BASMAA Regional POC report.

Section 12 - Provision C.12 PCBs Controls

C.12.a.i,iii □Municipal Inspectors Training
(For FY 09-10 Annual Report only) List below or attach description of results of training municipal industrial inspectors to identify, in the course of their existing inspections, PCBs or PCB-containing equipment.
Description: In FY 09-10, inspector training materials were developed through in-kind contributions of SCVURPPP to BASMAA. Training materials can be found in the BASMAA Regional POC Report.

C.12.a.ii,iii □Ongoing Training
(For FY 10-11 Annual Report and Each Annual Report Thereafter) List below or attach description of ongoing training development and inspections for PCB identification, including documentation and referral to appropriate regulatory agencies (e.g. county health departments, Department of Toxic Substances Control, California Department of Public Health, and the Water Board) as necessary.
Description: **Not required for this Annual Report.**

C.12.b □Conduct Pilot Projects to Evaluate Managing PCB-Containing Materials and Wastes during Building Demolition and Renovation Activities **C.12.c □Pilot Projects to Investigate and Abate On-land Locations with Elevated PCB Concentrations** **C.12.d □Conduct Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices** **C.12.e □Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit** **C.12.f □Diversion of Dry Weather and First Flush Flows to POTWs** **C.12.g □Monitor Stormwater PCB Pollutant Loads and Loads Reduced** **C.12.h □Fate and Transport Study of PCBs In Urban Runoff** **C.12.i □Development of a Risk Reduction Program Implemented Throughout the Region**
State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.
Summary: Please see Section C.12 PCB Controls of the Program's Fy09-10 Annual Report and/or the BASMAA Regional POC Report for a summary of the Program's accomplishments for these sub-provisions.

Section 13 - Provision C.13 Copper Controls

C.13.a.i and iii Legal Authority: Architectural Copper

(For FY 10-11 Annual Report only) Do you have adequate legal authority to prohibit discharge of wastewater to storm drains generated from the installation, cleaning, treating, and washing of the surface of copper architectural features, including copper roofs to storm drains?		**Yes**		**No**
If **No**, explain and provide schedule for obtaining authority within 1 year: **Not required for this Annual Report.**				

C.13.b.i and iii Legal Authority: Pools, Spas, and Fountains

(For FY10-11 Annual Report only) Do you have adequate legal authority to prohibit discharges to storm drains from pools, spas, and fountains that contain copper-based chemicals?		**Yes**		**No**
If **No**, explain and provide schedule for obtaining authority within 1 year: **Not required for this Annual Report.**				

C.13.c Vehicle Brake Pads

Reported in a separate regional report.

Please see Section C.13 Copper Controls of the Program's FY 09-10 Annual Report and/or the BASMAA Regional POC report for a summary of the Program's participation with the Brake Pad Partnership (BPP).

C.13.d.iii Industrial Sources Copper Reduction Results

List below or attach annotated lists or tables from your Industrial and Commercial Site Controls portion of this report, that highlight copper reduction results among the facilities identified as potential users or sources of copper, facilities inspected, and BMPs addressed. For FY09-10 describe below or highlight in the C.4 Evaluation portion (if provided) of this report the steps taken to revise your program to meet new data tracking and reporting requirements for implementation levels described in C.13.d.ii.

Summary: "In FY 09-10, inspector training materials were developed through in-kind contributions of SCVURPPP to BASMAA. Training materials can be found in the BASMAA Regional POC Report."

C.13.e Studies to Reduce Copper Pollutant Impact Uncertainties

Revised. Description reads, "State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below."
Summary: Please see Section C.13 Copper Controls in the Program's FY 09-10 Annual Report and/or BASMAA Regional POC Report for a summary of the Programs efforts (such as Participation in RMP committee and work group meetings) to develop regional studies to reduce copper pollution impact uncertainties.

Section 14 - Provision C.14 PBDE, Legacy Pesticides and Selenium Controls

C.14.a Control Programs for PBDEs, Legacy Pesticides and Selenium Controls
Revised. Description reads "State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities can provide descriptions below."
Summary: Please see Section C.14 PBDE, Legacy Pesticides and Selenium section of the Program's FY 09-10 Annual Report and/or BASMAA Regional POC report for a summary of the Program's efforts (such as participation in RMP committee and work group meetings) to develop a Control Program for PBDE's, Legacy Pesticides ad Selenium.

Section 15 - Provision C.15 Exempted and Conditionally Exempted Discharges

C.15.b.iii.(1), C.15.b.iii.(2) Planned and Unplanned Discharges of Potable Water

Is your agency a water purveyor?	X	Yes		No

If **No**, skip to C.15.b.vi.(2):

If **Yes**, Complete the attached reporting tables or attach your own table with the same information. Describe program highlights below. For FY 09-10 only, describe steps taken to revise your program to meet new monitoring, data tracking and reporting requirements.

Summary: The Department of Parks and Recreation is considered a water purveyor. This was not confirmed until July 2010. The Department of Parks and Recreation will be working over the next fiscal year to meet the new monitoring, data tracking and reporting requirements. To aid in this development the Department will be using information the Program developed to help update the Water Utility Operation & Maintenance Discharge Pollution Prevention Plan (WUDPPP) to be in compliance with this provision of the MRP. A summary of the Program's efforts is available in Section C.15 Exempt and Conditionally Exempted Discharges of the Program's Fy09-10 Annual Report.

C.15.b.vi.(2) Irrigation Water, Landscape Irrigation, and Lawn or Garden Watering

Provide implementation summaries of the required BMPs to promote measures that minimize runoff and pollutant loading from excess irrigation. Generally the categories are:

- Promote conservation programs
- Promote outreach for less toxic pest control and landscape management
- Promote use of drought tolerant and native vegetation
- Promote outreach messages to encourage appropriate watering/irrigation practices
- Implement Illicit Discharge Enforcement Response Plan for ongoing, large volume landscape irrigation runoff.

Summary: The Department of Parks and Recreation is currently using a split schedule for water turf areas that promotes water conservation. The Department of Parks and Recreation is watering twice at a half hour on a repeat schedule rather then for an hour at a time. The time between the first watering and the second watering is at least 2 hours. This allows water to be absorbed at a slower rate instead of too much water being applied at one time and having run-off. The Department is also installing irrigation clocks that can reduce the amount of water they are using based on weather reports (ET clocks). The Department is also using mulch wherever possible and base their planning on policies adopted by Bay Friendly Landscape Coalition.

The Department of Planning and Development is working with the Santa Clara Valley Water District and other local planning and conversation representatives to develop a Landscape Ordinance. The Draft Ordinance closely follows the regional model ordinance and would apply to landscaping associated with certain residential, commercial, office, industrial, and institutional projects, and would require a number of specific water conservation measures, including the following: water efficient landscape design emphasizing low water use plants, water budgeting, efficient irrigation systems, soil improvements and mulch and maintenance of landscaping materials and irrigation systems.

In addition, the County contributes to Program outreach efforts. For more information on outreach for less toxic pest control and appropriate irrigation practice please see the Watershed Watch Campaign in Section C.7 Public Information and Outreach and the IPM Store Partnership and Green Gardener Training Programs in section C.9 Pesticide Toxicity Control of the Program's FY 09-10 Annual Report.

C.15.b.iii.(1) Planned Discharges of the Potable Water System

Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Duration of Discharge (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual (mg/L)	pH (standard units)

Notes:

[1] Monitor the receiving water for turbidity if necessary and feasible. Include data in this column if available.

C.15.b.iii.(2) Unplanned Discharges of the Potable Water System

Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Discharge Duration (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual[2] (mg/L)	pH[2] (standard units)	Discharge Turbidity (Visual)[2,]	Implemented BMPs & Corrective Actions	Time discha disco

Notes:

1. This table contains all of the unplanned discharges that occurred in this FY.

2. Monitoring data is only required for 10% of the unplanned discharges. If you monitored more than 10% of your unplanned discharges report all of the data collected.

4. Notification to Water Board staff is required for unplanned discharges where the chlorine residual is >0.05 mg/L and total volume is ≥ 50,000 gallons. Notification to State C after becoming aware of aquatic impacts as a result of unplanned discharge or when the discharge might endanger or compromise public health and safety.

FY 2009-2010 Annual Report **Appendix 9**
Permittee Name: County of Santa Clara

Section 9- Pesticides Toxicity Controls

Appendix 9-1: C.9.a Adopt an Integrated Pest Management (IPM) Policy or Ordinance
Appendix 9-2: C.9.d Require Contractors to Implement IPM

Appendix 9-1: C.9.a Adopt an Integrated Pest Management (IPM) Policy or Ordinance

Sec. B28-1. - Intent and purpose.

The County, in carrying out its operations, finds it necessary from time to time to use pesticides on County property. The intent of this division is to protect the health and safety of County employees and the general public, the environment, and water quality, as well as to provide sustainable solutions for pest control on County property. The Board of Supervisors hereby finds and declares that it shall be the policy of the County of Santa Clara to eliminate or reduce pesticide applications on County property to the maximum extent feasible. Preference shall be given to available non-pesticide alternatives, where feasible, before considering the use of pesticides on County property.

This division concerns the application of pesticides to property owned by the County of Santa Clara only, and does not concern the application of pesticides to property that is not owned by the County of Santa Clara.

(Ord. No. NS-517.70, 5-21-02)

Sec. B28-2. - Definitions.

Whenever used in this division, the following terms shall have the meanings set forth below:

(a)
Antimicrobial pesticides are pesticides, such as disinfectants and sanitizers, that are intended to disinfect, sanitize, reduce, or mitigate growth or development of microbiological organisms; or protect inanimate objects (for example floors and walls), industrial processes or systems, surfaces, water, or other chemical substances from contamination, fouling, or deterioration caused by bacteria, viruses, fungi, protozoa, algae, or slime.

(b)
Approved list is the list of pesticides authorized by the County IPM Coordinator for use on County property developed in accordance with Section B28-5.

(c)
Carbamates means esters on N-methyl carbamic acid, which inhibit cholinesterase.

(d)
Contract is a binding written agreement, including but not limited to a contract, permit, license or lease between a person, firm, corporation or other entity, including a governmental entity, and the County of Santa Clara which grants a right to use or occupy property of the County or which provides pest management services.

(e)
County Executive is the County Executive or his or her designee of the County of Santa Clara.

(f)
Demonstration site is a specific area or site designated by a department to evaluate the use of a pest management strategy.

(g)
Department is any agency or department of the County of Santa Clara. Department does

not include the vector control district or any other local, state, or federal agency.

(h)

Departmental IPM coordinator is someone designated by a department head to coordinate the department's IPM program.

(i)

County IPM Coordinator is the person designated by the County Executive to implement and oversee the County of Santa Clara's IPM program.

(j)

Feasible means capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, social, and technological factors.

(k)

Integrated pest management (IPM) is a decision-making process for managing pests using monitoring to determine pest-caused injury levels and combining biological control, cultural practices, mechanical and physical tools, and chemicals to minimize pesticide usage. The method uses extensive knowledge about pests, such as infestation thresholds, life histories, environmental requirements, and natural enemies to complement and facilitate biological and other natural control of pests. The method uses the least hazardous pesticides only as a last resort for controlling pests.

(l)

IPM technical advisory group (IPM TAG) is the technical advisory group to the County for the IPM program and is further described in Section B28-9.

(m)

Organophosphates means organophosphorus esters, which inhibit cholinesterase.

(n)

Pest is any insect, rodent, nematode, fungus, weed, or any other form of terrestrial or aquatic plant or animal life or virus, bacteria, or other microorganism (except certain insects, viruses, bacteria, or other microorganism on or in living man or living animals).

(o)

Pesticide is any substance, or mixture of substances which is intended to be used for defoliating plants, regulating plant growth, or for preventing, destroying, repelling, or mitigating any pest, which may infest or be detrimental to vegetation, man, animals, or households, or be present in any agricultural or nonagricultural environment. Pesticide for purposes of this division does not include antimicrobial agents.

(p)

Posting is to place signs as identified in Section B28-7 to inform employees and the public of pesticide use at a given site.

(q)

Signal words are the words used on a pesticide label—Danger, Warning, Caution—to indicate level of toxicity.

(r)

Toxicity Category I pesticide product is any pesticide product that meets United States Environmental Protection Agency criteria for Toxicity Category I under Section 156.10 of Part 156 of Title 40 of the Code of Federal Regulations.

(s)

Toxicity Category II pesticide product is any pesticide product that meets United States Environmental Protection Agency criteria for Toxicity Category II under Section 156.10 of Part 156 of Title 40 of the Code of Federal Regulations.

(Ord. No. NS-517.70, 5-21-02)

Sec. B28-3. - General exemptions.

(a)

This division shall not apply to the use of any pesticide for the purpose of improving or maintaining water quality at any County owned or operated drinking water treatment plants, wastewater treatment plants, reservoirs, and related collection, distribution, and treatment facilities.

(b)

This division shall not apply to any use of pesticides on County property by any department when performing pest management or pesticide activities authorized by state or federal laws or regulations.

(c)

This division shall not apply to the use of pesticides by the vector control district.

(d)

This division shall not apply to antimicrobial pesticides or pesticides used to control pests in or on living humans or animals.

(e)

This division shall not apply to existing contracts except as provided in Section B28-10.

(f)

This division shall not apply to contracts under negotiation at the time this division becomes effective for a period of five years.

(Ord. No. NS-517.70, 5-21-02)

>> >> >> >>

CHAPTER II. - PESTICIDE MANAGEMENT

Sec. B28-4. - County integrated pest management (IPM) program.
Sec. B28-5. - Pesticide use.
Sec. B28-6. - Restriction on the use of pesticides.
Sec. B28-7. - Posting of pesticide use.
Sec. B28-8. - Record keeping and reporting.

Sec. B28-4. - County integrated pest management (IPM) program.

(a)

The County IPM Coordinator shall oversee and coordinate implementation of the IPM program.

(b)

The IPM program shall include, but not be limited to, the following:

(1)

Identify staff member(s) responsible for program implementation;

(2)

Acquaint County workers with the IPM approach and new pest management strategies, as they become known;

(3)

Inform the public of the County's effort to reduce pesticide use;

(4)

Respond to questions about the County's pest management program and practices;

(5)

Conduct ongoing educational programs, where appropriate;

(6)

Maintain records and evaluate program effectiveness;

(7)

Develop and maintain the approved list of pesticides.

(c)

Departments shall implement the IPM program consistent with the IPM practices outlined below. Where feasible, departments shall consider a range of potential treatments for the pest problem and employ non-pesticide management tactics first, consider the use of chemicals only as a last resort, and select and use chemicals in accordance with the provisions of this division. The IPM practices shall include ways to:

(1)

Monitor pests to determine pest population size, occurrence, and natural enemy population, if present. Identify decisions and practices that could affect pest populations. Keep records of monitoring results;

(2)

Set treatment levels for each pest at each site based on how much biological, aesthetic or economic damage the site can tolerate;

(3)

Determine the most effective treatment time, based on pest biology and other variables, such as weather, seasonal changes in wildlife use and local conditions;

(4)

Design construction and building remodels to reduce or eliminate pest habitats and improve efficiency in facility and landscape maintenance and sanitation;

(5)

Reduce pest incidences by modifying management practices such as watering, mulching, fertilizer use, and pruning;

(6)

Modify pest ecosystems, including waste management and food storage, to reduce pest food, living space, and access;

(7)

Use physical controls such as hand-weeding, traps and barriers, heat and cold;

(8)

Use biological controls such as introducing or enhancing pests' natural enemies;

(9)

When indoors, use baits or least toxic methods of pest control rather than sprays;

(10)

Monitor treatment to evaluate effectiveness;

(11)

Maintain records as set forth in Section B28-8.

(Ord. No. NS-517.70, 5-21-02)

Sec. B28-5. - Pesticide use.

(a)

Approved list. The County IPM Coordinator shall develop the approved list using a set of criteria that will be developed with the review and input of the IPM TAG. The criteria will take into account environmental and human health hazards, principles of the IPM approach, and technically based methods, conditions, and specifications for pesticide use. The County IPM Coordinator shall maintain the list of approved pesticides that may be used on County property. The approved list shall be reviewed and updated at least annually. The IPM Coordinator may amend this list as needed at any time as long as the products are consistent with the established criteria. These amendments shall be communicated to the IPM TAG in writing at the quarterly meetings.

(b)

Specific exemptions. An exemption may be obtained from the County IPM Coordinator for use of a product not on the approved list as follows:

(1)

One-year exemptions. The County IPM Coordinator may grant a specific exemption, with limited conditions for use, for a one-year period upon a written request showing that a department has:

a.

Identified the need for use;

b.

Made a good-faith effort to find alternatives to the pesticide;

c.

Identified or demonstrated that effective economic alternatives to the pesticide do not exist for that particular use; and

d.

Developed a reasonable plan for investigating alternatives to the pesticide during the exemption period.

(2)

An exemption may be continued beyond the one-year period by filing a new request for exemption as required in Subsection (b)(i) above.

(3)

The County Executive shall have the discretion to revoke any exemption.

(c)

Emergency use of pesticides.

(1)

A department responsible for maintenance of a site or facility may apply to the County IPM Coordinator for an emergency pesticide use exemption in the event that a pest outbreak poses an immediate threat to public health or may cause significant economic damage.

(2)

If the County IPM Coordinator cannot respond to the application in a timely manner, the departmental IPM coordinator submitting the application may authorize the one-time emergency use of the required pesticide and provide notice of the emergency application to the County IPM Coordinator in writing within 48 hours.

(3)

Posting of emergency use of pesticides shall be at the time of pesticide application and comply with all other posting requirements.

(4)

Reporting of the exemption and pesticide use will comply with all other reporting requirements as stated in Section B28-8.

(Ord. No. NS-517.70, 5-21-02)

Sec. B28-6. - Restriction on the use of pesticides.

Except for the use of pesticides exempted pursuant to Section B28-3, pesticides granted an exemption pursuant to Section B28-5(b) or 5(c) or pesticides on the approved list per Section B28-5 (a), no department shall use any of the following types of pesticides. A list of the pesticides and pesticide products identified in (b) through (g) below shall be on file with the County IPM Coordinator.

(a)

Toxicity Category I or II pesticide products.

(b)

Any pesticide containing a chemical identified by the State of California as a chemical known to the State to cause cancer or reproductive or developmental toxicity pursuant to the California Safe Drinking Water and Toxic Enforcement Act of 1986.

(c)

Pesticides identified by the State of California on the Groundwater Protection List (Food and Agricultural Code § 13145(d)).

(d)

Pesticides classified by active ingredient as organophosphate type pesticides as identified by the United States Environmental Protection Agency (Office of Pesticide Programs, Document 735-F-99-14, May 1999), or California Environmental Protection Agency, Department of Pesticide Regulation, Chemical Inquiries Database.

(e)

Pesticides containing carbamate-type chemicals (California Environmental Protection Agency, Department of Pesticide Regulation, Chemical Inquiries Database).

(f)

Any pesticide classified as a human carcinogen, probable human carcinogen or possible human carcinogen by the United States Environmental Protection Agency, under procedures established in "Proposed Guidelines for Carcinogen Risk Assessment," EPA/600/P-92/003C, April 1996, or equivalent documents.

(g)

Any pesticide group officially designated by the California Environmental Protection Agency Department of Pesticide Regulation or by the United States Environmental Protection Agency as posing significant hazard to human health or the environment.

(Ord. No. NS-517.70, 5-21-02)

Sec. B28-7. - Posting of pesticide use.

(a)

Except as provided for in Section B28-5(c) and Section B28-7(b), any department that uses or authorizes the use of a pesticide shall comply with the following posting procedures:

(1)

Signs shall be posted at least three days before application of the pesticide and remain posted at least four days after application, except for baits and emergency use of pesticides, which are posted at the time of treatment in accordance with Section B28-5 (c)(3) above and Subsection (b)(3) below;

(2)

For buildings and/or landscaped areas adjacent to buildings, signs shall be posted at main entry points where the pesticide is applied;

(3)

For open areas, signs shall be posted in highly visible locations around the perimeter of the area where the pesticide is applied;

(4)

For vehicles used primarily by County staff, signs shall be posted at areas where vehicles are obtained or posting information shall be given to the primary drivers.

(5)

Signs shall contain the:

a.

Trade name and active ingredient of the pesticide product;

b.

Target pest;

c.

Date of posting;

d.

Date(s) of anticipated pesticide use; the date(s) of actual pesticide use will be posted at the main entrance, park office, or designated site;

e.

Signal word indicating the toxicity category of the pesticide product;

f.

Date for re-entry of staff and the public to the area treated if applicable;

g.

Name and contact number for the department responsible for the application.

(6)

Signs shall have a standard design that is easily recognizable by the public and workers;

(b)

Exemptions to posting.

(1)

Departments shall not be required to post signs in accordance with Section B28-7(a) in right-of-way locations and other areas that the general public does not use for recreational purposes.

a.

Each department that uses pesticides in such locations shall provide a public access telephone number for information about pesticide applications. The public access telephone number shall be posted in a prominent location at the department's main office building. Information provided shall include all the items in Subsection (a)(5) above.

(2)

Any pesticide granted an emergency exemption by the County IPM Coordinator shall not be required to be posted prior to treatment. However, all other requirements for posting as set forth in Section B28-7(a) shall be followed.

(3)

Any pesticide bait placed in a container or trap, or applied as a gel or paste in a crack or crevice shall not be required to post signs prior to treatment. Baits, used indoors, shall be posted in the vicinity of application. Baits, used outdoors, shall be posted in the main office, park office, or a designated site. Signs shall be posted according to the requirements as set forth in Section B28-7(a).

(4)

The County IPM Coordinator may in his or her discretion grant necessary exemptions to the posting requirements.

(Ord. No. NS-517.70, 5-21-02)

Sec. B28-8. - Record keeping and reporting.

(a)

Each department that uses pesticides shall keep records of pest management activities, including information about demonstration sites and exemptions. A copy of this information shall be placed in a centralized record keeping area in each department. Where feasible, this information shall be kept in a notebook or electronic equivalent maintained in each occupied building. Each pest management activity such as pesticide application, trapping or inspection shall be recorded and, when applicable, include at least the following information:

(1)

Target pest and extent of problem;

(2)

Product name, active ingredients, EPA registration number, formulation, and quantity of pesticide used;

(3)

Site of the pesticide application;

(4)

Date of pesticide application;

(5)

Name of person conducting pest management activity;

(6)

Application equipment number, if applicable;

(7)
Prevention and other non-chemical methods of control recommended or used, and;

(8)
Evaluation of effectiveness.

(b)
The departmental IPM coordinator shall keep the following:

(1)
Records of pesticide use;

(2)
A copy of the label of all pesticides used; and,

(3)
The material safety data sheet for each pesticide used.

(c)
Each department that uses pesticides shall submit a summary of pest management records required in Section B28-8(a) and (b) to the County IPM Coordinator at least quarterly.

(d)
Pest management records, including pesticide use records, are all public records.

(e)
Pesticide use records shall be kept indefinitely until an electronic database tracking system has been established.

(Ord. No. NS-517.70, 5-21-02)

>> >> >> >>

CHAPTER III. - IPM IMPLEMENTATION

Sec. B28-9. - Implementation of County Integrated Pest Management Ordinance.
Sec. B28-10. - County contracts and easements.
Sec. B28-11. - Pesticide purchases.
Sec. B28-12. - Policy and guidelines.
Sec. B28-13. - No criminal penalties or sanctions.
Sec. B28-14. - No civil liability for violations of this chapter.

Sec. B28-9. - Implementation of County Integrated Pest Management Ordinance.

(a)
This division shall be phased-in over one to two years in order to provide adequate time for developing the approved list, documenting current IPM practices and/or reductions, and identifying and implementing alternate pest management measures. The County IPM Coordinator shall develop a timetable and format for departments to each submit a plan for implementing this division.

(b)
A technical advisory group (TAG) shall be formed and shall meet at least four times per year to review the County's IPM program and provide comments to the County Executive. The following representatives will be invited to participate on the TAG: two from Pesticide Alternatives of Santa Clara County; one from the Santa Clara Valley Water District; one from the County Agricultural Commissioner; one from the Santa Clara County Pollution Prevention Committee; one County employee representing a labor organization; and one representative from each of the following Santa Clara County agencies and departments: Roads and Airports, Parks and Recreation, the General Services Agency, Valley Health and Hospital System, and Occupational Safety and Environmental Compliance. The Board of Supervisors may at their discretion make changes to the composition of the group as deemed necessary.

(c)
The IPM Coordinator shall provide a quarterly report to one or more Board-designated committees on the status of the IPM program including information about pest problems, pesticide use, list of exemptions, goals and progress, staff training and public education, and anticipated changes that may affect pesticide use.

(Ord. No. NS-517.70, 5-21-02)

Sec. B28-10. - County contracts and easements.

(a)

Except as provided in (i) below, when a department enters into a new contract (see Section B28-2(d)) or amends an existing contract to extend the term of the contract for more than six months beyond the current term and any optional extension periods, the contract shall require compliance with the provisions of this division including those relating to pesticide restrictions, record keeping, and reporting.

(1)

The County Executive may grant an exemption for up to five years from contract compliance with all or part of the provisions of this division in the event compliance would negatively impact County revenues, prevent the highest and best use of an asset as determined by the County Executive, or where it is demonstrated that full compliance cannot be achieved. Notice of any exemption granted pursuant to this Subsection (1) shall be given to the applicant and to the IPM TAG. The notice shall state that any person dissatisfied with the decision of the County Executive may file an appeal with the Clerk of the Board within 15 calendar days of the date of the notice. The appeal will first be heard before the County's Housing, Land Use, Environment, and Transportation Committee, which Committee shall make a recommendation to the Board of Supervisors. The decision of the Board of Supervisors shall be final.

(b)

A contractor, or department on behalf of a contractor, may apply for exemptions authorized under Section B28-5(b) and (c), and this Section B28-10.

(c)

When a department enters into a new lease in which the County is occupying or using property not owned by the County (and thus not within the definition of contract in Section B28-2(d)), the County shall use reasonable efforts to negotiate the use of IPM practices as part of that lease.

(d)

In current leases in which the County is occupying or using property not owned by the County, the County shall encourage the use of IPM practices whenever practical.

(e)

When the County is granted an easement, the maintenance of the easement shall be in compliance with this division if consistent with the terms of the easement.

(f)

A process, which incorporates a request for qualifications, shall be used in the selection of all contractors for pest management services and shall be in compliance with County contracting policies and state law. The County IPM Coordinator and the TAG may participate in the process. All contractors applying for pest management services shall submit a pest management plan, which outlines how they will comply with the IPM Ordinance. The plan shall give preference to prevention and other non-pesticide or least toxic methods of pest control.

(Ord. No. NS-517.70, 5-21-02)

Sec. B28-11. - Pesticide purchases.

All pesticide products and pest control services that include pesticide applications shall comply with this division and be purchased through the County Procurement Department, not using the petty cash or direct pay methods.

(Ord. No. NS-517.70, 5-21-02)

Sec. B28-12. - Policy and guidelines.

The County Executive may recommend policy for Board approval and issue guidelines to implement this division.

(Ord. No. NS-517.70, 5-21-02)

Sec. B28-13. - No criminal penalties or sanctions.

The provisions of Section A1-28 of the Santa Clara County Ordinance Code shall not apply to this division; nor shall any person, or government official, board, commission, or agency be responsible for any criminal penalties for any violation of the division.

(Ord. No. NS-517.70, 5-21-02)

Sec. B28-14. - No civil liability for violations of this chapter.

This division and the provisions are directory, and are intended to set forth goals and program elements for management of pests and pesticide use. This chapter is not intended to create a standard of civil liability for the acts or failure to act of the County and its employees and contractors. No person, government official, board, commission, or agency shall be liable in any civil action or proceeding for damages for violation of any of the provisions of this division.

(Ord. No. NS-517.70, 5-21-02)

Appendix 9-2: C.9.d Require Contractors to Implement IPM

COUNTY OF SANTA CLARA, CALIFORNIA

REQUEST FOR PROPOSAL # 0030
FOR
LANDSCAPE MAINTENANCE
Though Integrated Pest Management (IPM) principals and techniques for pest and weed control.

October 6, 2003

RFP DUE
DATE: November 14, 2003

In the GSA Procurement Department
333 W. Julian Street, Suite 400
San Jose, CA 95110

BUYER: Kathleen Sandoval
(408) 491-7422

MANDATORY PRE-BID CONFERENCE

Date and Time: October 17, 2003
Friday, 1:30 pm

Location: Santa Clara County GSA Procurement Office,

SECTION I - INVITATION & INQUIRIES

A. Invitation

This document is a Request for Proposal (RFP) to obtain qualified perspective contractors to perform landscape maintenance and related pest control through Integrated Pest Management (IPM). The issuing departments for this RFP are the County IPM Administration, Office of the County Executive and the Procurement Department.

B. Mandatory Pre-Bid Conference

A mandatory Pre-Bid Conference will be held on **Friday, October 17, 2003 at 1:30 pm.** Your attendance at this Pre-Bid Conference is mandatory for bid submittal. Failure to attend this meeting will be an automatic disqualification and no subsequent bid will be accepted.

C. Inquires

All inquiries concerning the Administrative, Cost & IPM- Personnel & Technical specifications should be addressed to:

County of Santa Clara
Procurement Department
Attention: Kathleen Sandoval
333, West Julian Street, Suite 400
San Jose, CA 95110

By e-mail: kathleen.sandoval@ gsa.sccgov.org
Or Fax: 408-938-2393

All questions should be submitted in writing, citing the particular proposal section and paragraph number. Prospective contractors should note that all clarifications and exceptions including those relating to the terms and conditions of the contract are to be resolved prior to the submission of a proposal. Answers to all questions of a substantive nature will be given to all contractors in the form of a formal addendum, which will be annexed to and become part of the ensuing contract.

SECTION II - INTRODUCTION

A. Scope

This document is a Request for Proposal (RFP) to obtain qualified perspective contractors to perform Landscape maintenance in accordance with the County of Santa Clara's Integrated Pest Management (IPM) Ordinance (Appendix B). The issuing departments for this RFP are the County IPM Administration, Office of the County Executive and the Procurement Department. The services of RFP will be limited to County of Santa Clara departments. Non-profit organizations, which would like to utilize this process, may do so with written permission from County IPM Administration, however the County will not be responsible for subsequent actions of such organizations.

The intent of this specification is to request technical proposals from perspective IPM contractors to ensure contractors meet the County of Santa Clara IPM Technical & Experience qualification requirements in the performance of Landscape Maintenance & related IPM for the County – logistically. Responses to this RFP shall be evaluated based on two individual submittals returned to Procurement concurrently in separate envelopes. The first section to be evaluated will be the Request for Qualification (RFQ) as contained in Sections IIIA, B, C of this RFP. Failure to meet the qualifications stated in this section will result in no further consideration of Section V submittal from potential contractors which shall remain sealed. Upon qualification for the RFQ by contractor, Section V submittal will be opened, evaluated, and the contract awarded to the lowest responsible bidder.

The project definition for this RFP is for Landscape Management and related pest and weed control. All qualified perspective contractors may under the County's discretion be asked to submit an individual RFP or RFQ for specified project definition(s). See Section D. Definitions, item number 3. Project Definition or Description.

B. Background

The County of Santa Clara recently adopted Integrated Pest Management and Pesticide Use Ordinance No. NS-517.70- (Appendix B).

The principles and concepts of turf grass and landscape pest management are tied directly into routine turf grass and landscape management. It is generally recognized by virtually all acknowledged pest control scientists, experts and regulatory personnel that chemical use will not produce safe, long-lasting and effective control and elimination of weeds, insect and other pests. It is required that as a qualified and experienced landscape maintenance & pest control operator, the contractor is familiar with the fundamentals of turf grass &

landscape management in relation to Integrated Pest Management (IPM) now recognized as the most effective and up-to-date approach to modern professional pest control.

IPM incorporates flexibility in choices of pest resistant species and varieties well adapted to local conditions, correctly preparing sites before planting, using proper planting techniques, and provides optimum conditions for plant growth, bringing an ecologically well balanced system for long-term plant health, preventing unacceptable pest presence or damage.

IPM also prevents problems in established landscapes through pest and symptom identification, regular surveying for pests, action threshold and establishing guidelines and sound management methods so that pests and the environment can be managed in such a way as to balance cost, benefits, public health, safety, and environmental quality.

C. Objectives

This RFP is intended to accomplish several objectives:

- The utilization of this process will assist in expanding the County's use of Integrated Pest Management practices in a uniform, consistent manner, streamlining IPM & Pesticide Use reporting.
- The use of this RFQ/RFP after the initial screening for qualifications will facilitate user department contracting of pest control and landscape maintenance.
- Contractors will benefit by having to only submit one initial detailed proposal in response to RFQ/RFP rather than submitting a detailed proposal for each individual RFP.
- The County's contracting practices for landscape maintenance and related pest control will become more uniform, less labor intensive in the future.
- It is envisioned that the cost of landscape maintenance and related pest control will decrease as IPM is expanded and the contract process facilitated.
- Those user departments who have existing in-house programs for landscape maintenance and related pest control and desire to implement IPM will benefit from available expertise of this contract resource.

D. Definitions

1. **"County"** shall mean the County of Santa Clara.

2. **"Integrated Pest Management (IPM)"** is a decision-making process for managing pests using monitoring to determine pest-caused injury levels and combining biological control, cultural practices, mechanical and physical tools, and chemicals to minimize pesticide usage. The method uses extensive

knowledge about pests, such as infestation thresholds, life histories, environmental requirements, and natural enemies to complement and facilitate biological and other natural control of pests. The method uses the least hazardous pesticides only as a last resort for controlling pests.

3. **"Pest Control"** shall mean the system used to reduce or eliminate pests from the office or building environment or land or water and enhance safety of occupants or users.

4. **"Project Definition or Description"** shall mean the individual structure or land or water body descriptions or projects which will be defined by the user department using this contract. Such project may be related to landscape management in scope but could be more or less extensive and for limited duration, i.e. brush removal in fire areas, tree pruning and trimming above 12', initial landscape cleanup, etc. Work and payment for such services will be accomplished through utilization of a County authorized purchase order and not as a contract release against the awarded contract for landscape management. Only those contractors who submit a successful RFQ will be eligible to bid the individual project definitions. Contractor awarded the landscape management contract in association with this RFP may submit a competitive bid for such projects but is not guaranteed any favored treatment. All terms and conditions of this RFP will apply to the project definition unless otherwise stated in the project definition itself.

5. **"Request for Proposal (RFP)"** shall refer to the complete document inclusive of the Request for Qualifications (RFQ) Section IIIA, B, & C and Procurement Administrative Specifications and cost proposal Section V and the resultant submission of a contractor's cost proposal, and later, the awarded contracts.

6. **"Request for Qualification (RFQ)"** shall refer to process of Contractor to the process of determining Contractors Personnel Qualifications, business Operational Qualifications, Background, Technical Qualifications as laid out in Section IIIA, B, & C and the resultant submission of a contractor's proposal for performance to be selected under Qualified IPM Prospective Contract.

7. **"User department"** shall mean any County of Santa Clara department that desires to utilize this contract.

8. **"RFP-Selection Committee"** shall mean committee reviewing the submitted proposals comprised of one (1) and or two (2) persons representing all User Departments, two (2) persons representing IPM-Technical Advisory Group, one (1) person representing Procurement department and County IPM Coordinator.

SECTION III: COUNTY OF SANTA CLARA INTEGRATED PEST MANAGEMENT REQUEST FOR PROPOSAL (RFP) SPECIFICATIONS

This is a detailed abstract from the Request for Proposal (RFP) specification that will be used for bidding the backdrop of Landscape maintenance and related IPM contracts provided by COUNTY OF SANTA CLARA. All Perspective Contractors must submit their RFP responses in separate envelopes. Each envelope must indicate on the outside which section is contained within. Envelope 1 must contain all documentation required for substantiating the Request for Qualification Sections IIIA, B, C. Contractor must meet these requirements prior to County accepting Section V of the RFP contained in Envelope 2. If a contractor fails to qualify based on the information contained in Envelope 1, Envelope 2 shall be returned to the unqualified candidate unopened.

This package includes all of the terms and conditions that a contractor must meet in order to successfully perform a Landscape maintenance & related IPM program or provide the IPM consulting services.

To understand the entire process of RFP, the process is divided into following sections:

This RFP section is subdivided into two categories:

A. RFQ (REQUEST FOR QUALIFICATION)
   1. **Section IIIA, QUALIFICATIONS OF PROSPECTIVE CONTRACTORS**
   2. **Section IIIB, IPM-TECHNICAL SERVICE REQUIREMENTS**
   3. **Section IIIC, RFQ PROPOSAL SUBMITTAL**

B. Section V, PROCUREMENT ADMINISTRATIVE SPECIFICATIONS, REQUIREMENT & COST PROPOSAL

SECTION IIIA QUALIFICATIONS:

1. Qualifications of Prospective Contractors

NOTE: All contractors' qualifications will be reviewed and a determination will be made that they meet these qualifications. However, they will be cited here so that Departments may be aware of them and assure themselves that the contractor still meets these requirements. Personnel turnover, etc. may effect a vendor's qualifications at any point in time. Contractor must notify GSA Procurement of any such change.

1.0. General:

The contractor certifies that it meets the following requirements for submitting a RFP for Landscape maintenance and related IPM Services and shall provide verification of such within their proposal.

1.1 Pest Control Services Related To The Control of Plant or Landscape Pests:

a. The contractor has been in the professional landscape maintenance and related pest management business handling industrial, commercial, and institutional accounts for **at least five (5) years** immediately prior to the submission of this RFQ. Contractor must submit a list of **at least five (5) verifiable references** in the form provided herein from accounts for which work, comparable to that contained in these specifications, has been completed or is currently in progress. (Note: All references shall specifically show IPM methods.)

b. The contractor maintains a current Agricultural Pest Control Business license and a valid Qualified Applicator License in the appropriate activity category issued by the California Department of Pesticide Regulation. The contractor must provide a copy of this license with the RFQ.

c. The contractor and pertinent personnel are certified to perform the work specified herein in accordance with the administration by the California Department of Pesticide Regulation of the Core Certification Program of the Department, as outlined in the most recent revision under "State of California-Department of Pesticide Regulation-Laws and Regulations" and must also have Qualified Applicator Licensee responsible for the pest control operations of the business. Further, the contractor must be currently registered to perform agricultural pest control in the appropriate category with the

Santa Clara County Division of Agriculture (Agriculture Commissioner's Office) and shall maintain such registration through the duration of any contract with the County of Santa Clara. The contractor must hold Qualified Applicator license and Certificate in the Pest Control Category they are bidding for. These Pest Control categories are as follows:

A. Residential, Industrial and Institutional
B. Landscape Maintenance
C. Right of Way
D. Plant Agriculture
E. Forest
F. Aquatic
G. Regulatory
H. Seed Treatment
I. Animal Agriculture
J. Demonstration and Research
K. Health Related
L. Wood Preservation (Subcategory of A and C)
M. Antifouling-Tributyltin (Subcategory of A)
N. Sewer Line Root Control (Subcategory of A)
O. Maintenance Gardner (Subcategory of B)

Any other category, which may apply to any work in the facilities indicated herein. If they are not applicable, no related license is needed.

d. The contractor has never previously failed to perform satisfactorily in connection with public bidding or public contracts.

e. The contractor has access to or can obtain the services of a certified accredited professional mammalogist, zoologist, biologist, arborist, horticulturist, agronomist (Weed Management Subject Matter Specialist) and ecologist to provide supportive consultation and training under this contract.

f. The contractor has completed the Bidder's Information Form consisting of the requirements for Section III & Section V.

g. The Contractor is licensed in accordance with the provisions of the State Business and Professions Codes.

2.0 Personnel:

The contractor shall provide in the proposal, the names of all pest management personnel to be assigned to this contract, and pertinent information regarding

their qualifications, experience and training. Throughout the life of this contract all personnel providing on- site pest management & landscape maintenance services must be certified in appropriate jurisdictions as qualified pesticide applicators in the appropriate category of their work as listed above.

2.1 Qualifications and Experience

a) IPM Service technicians to be used by the contractor must possess the following minimum qualifications and experience:

1. Good knowledge of problem pests and methods of reducing or eliminating the same, and the proper and safe use of least toxic pesticides.
2. **For Plant and/or Landscape Related Pest Control**- a California Department of Pesticide Regulation qualified applicator license & certificate for plant or landscape related pest control. Technician must hold valid license in appropriate categories and other such certification as may apply to the work.
3. At least two (2) years of recent full-time paid experience in professional pest control with experience in license categories & facilities similar to those outlined herein.
4. It is preferred, but not required, that IPM Service Technician possesses Certification in Turf Grass Management from the University of California or Purdue University or other accredited institution. The IPM service technician must demonstrate his/her knowledge, or training or registration for training with an accredited institution in turf grass management.

The contractor shall provide, under this contract, only qualified pest management personnel with adequate experience in the conduct of IPM programs. All on-site personnel must understand current practices in this field and be able to make judgments regarding IPM techniques.

Any substitutions, additions, or replacement of personnel from those cited in the contractor's original proposal must be submitted to the County IPM Coordinator for approval prior to their starting work under this contract.

The contractor must meet the following specific staff requirements:

b) On-Site Supervisor: A supervisor and an alternate must be identified in the proposal. The supervisor must have the contractor's authority to act on matters pertaining to the performance of services required under the contract. This individual shall assure safety and carry out coordination and continuity of IPM routine. The supervisor and alternate shall both have a working knowledge of this contract and the detailed Pest Management

Plan and schedule for each site. The supervisor and alternate must both meet the qualifications identified under "IPM Service Technicians".

2.1.1 **Conduct** -- The contractor and pest control personnel shall maintain the highest standards of conduct and integrity while on facility premises.

2.1.2 **Appearance** -- Technicians shall wear a distinct uniform with the company's name displayed and present a clean, neat and professional appearance. Technicians shall have an identification photo also.

2.1.3 **Identification** -- The contractor's personnel shall wear proper company identification when servicing the facilities.

2.1.4 **Personnel's Equipment** -- The contractor shall supply and insure that each service technician assigned to these facilities maintains the necessary and required equipment for the safe use and application of pesticides if it is required by conditions.

2.1.5 **Replacements** -- The contractor shall be responsible for the orientation of replacement personnel who are not familiar with the facilities to be serviced.

C. The fact that this bid proposal has been furnished to you by the Procurement Department does not mean that County of Santa Clara has made a determination that your firm can comply with the prerequisites and other qualifications necessary and required in order to enable you to submit a bid.

D. Prospective Contractors are advised that the County's intent in having requirements IIIA-1-1.0 &IIIA-1-2.0 above is to ensure that only qualified and reliable Contractors perform the work of the contract. The County recognizes that there may be equally qualified and reliable Contractors who do not meet all of the above requirements specifically as stated above, but may in fact meet the objectives and criteria in some other manner. However, the Contractor shall have the burden of demonstrating to the County's satisfaction that it can in fact perform the work. This shall be in the form of written statements as to the Contractor's experience, references, listing of contracts performed, financial statements, manpower, and ability to respond to the County. County must be able to verify all subsequent statements made herein.

The County retains the right to request any additional information pertaining to the contractor's ability, qualifications, and procedures, as it deems necessary to ensure safe and satisfactory work.

Note: Any Contractor failing to submit in whole or in part the above-requested information signed by a duly authorized representative of the company attesting to its qualifications may result in a rejection of the bid of that Contractor. County staff will make a sole determination based on the best interests of the County.

SECTION IIIB RFQ-IPM TECHNICAL SPECIFICATIONS:

The general and specific program requirements outlined in this section apply to both these RFQ and the resultant individual project definition bid by the user departments. Of necessity, some of the inspections and other specific requirements can only be done at the time of bidding a particular facility or group of facilities as outlined in the project descriptions. Nevertheless, they are outlined here to give prospective contractors and user Departments an overview of the entire contract and IPM program requirements. Contractors are referred to SECTION IIIB & SECTION VIII, which outlines what must be submitted in their proposal.

1.0 General IPM Program Requirements

The principles and concepts of turf grass and landscape pest management are tied directly into routine turf grass and landscape management. It is generally recognized by virtually all acknowledged pest control scientists, experts and regulatory personnel that chemical usage, by itself, will not produce safe, long-lasting and effective control and elimination of weeds, insect and other pests. It is required that as a qualified and experienced landscape maintenance & pest control operator, the contractor is familiar with the fundamentals of turf grass & landscape management in relation to Integrated Pest Management (IPM) in Turf Grass & landscape concept, now recognized as the most effective and up-to-date approach to modern professional pest control and landscape maintenance.

This program incorporates flexibility in choices of pest resistant species and varieties well adapted to local conditions, correctly preparing sites before planting, using proper planting techniques, which provide optimum conditions for plant growth, bringing an ecologically well balanced system for long-term plant health, preventing unacceptable pest presence or damage.

IPM also asks to prevent problems in established landscapes through pest and symptom identification, regular surveying for pests, action threshold and establishing guidelines and sound management methods so that pests and the environment can be managed in such a way as to balance cost, benefits, public health, safety, and environmental quality through the cooperation of all concerned.

Therefore, it is the duty and obligation of the contractor to institute an IPM program on each landscape site and to supply all services within the framework of this program. The contractor is to elicit the cooperation of the user department-building management and others concerned in order to protect the health, safety and well being of tenants, staff and pest control technicians, to insure compliance with regulatory regulations and guidelines and to guarantee the maximum effectiveness for the money and effort invested.

General requirements of the IPM program shall include the following for each landscape site specified in this contract:

1.1.0 **Contractor & User Department understanding of County of Santa Clara Integrated Pest Management & Pesticide Use Ordinance NO. NS-517.70:** (Appendix B)
Prior to preparing project definition (by User Department representative or submitting RFQ by Perspective Contractor), they must familiarize themselves with the ordinance (Appendix B) as stated. Any questions in this regard should be submitted in writing via mail, fax or e-mail to Procurement Department for clarification. Answers will only be given in writing. Allow at least ten (10) working days for response to inquiries.

1.1.1 **Initial Inspection**
After award of the contract has been made, the successful respondent will be required to conduct a thorough, initial inspection during the first thirty (30) calendar days of the contract by the contractor's entomologist/agronomist and landscape design expert and the user department representative (preferably facility manager & Department IPM Coordinator). The purpose of this initial inspection is for the contractor to evaluate the landscape management and related pest management needs of the site and to discuss these needs with the Department.

The following specific points should be addressed:

a) Identification of problem areas in and around the site.

b) Identification of landscape features or cultural, personnel practices that are contributing to pest infestations or other cited landscape problems.

c) Discussion of the effectiveness of previous landscape maintenance and related pest control efforts.

d) Facilitation of contractor access to all necessary areas. Access to site shall be coordinated with the user Department representation.

e) Informing the contractor of any restrictions or special safety precautions.

1.1.2 **Submission of Plan**
Following the initial inspection, the contractor will develop a detailed landscape management and Service Schedule for each site. This written plan and schedule must be submitted to the user

department representative for approval prior to initiation. The plan and schedule should address any site or operational changes, which might facilitate the overall success of the project. In addition, the plan must identify the proposed primary pesticides and alternatives by California Environmental Protection Agency (EPA) accepted common name (generic name) **(Please note that Pesticide Selection is limited to County of Santa Clara "Approved List of Pesticides") Appendix D**; the site; and rationale for each type of use. Proposed cultural, mechanical, physical and biological & chemical control methods for pests, if any, should also be included. The plan should describe in detail the contractor's means for monitoring pest populations in and around the site.

Frequency of inspections and treatment by the contractor shall depend on the specific landscape management needs of the premises and shall be included in the initial scope of service.

The plan and schedule shall be submitted not more than **ten (10) business days** following the initial inspection of the premises. The user department will render a decision regarding the acceptability of the plan and schedule **within ten (10) business days** following receipt. If the plan is not acceptable, contractor and authorized representative of the using department shall come to a mutual agreement in regard to any such modifications or changes in schedule as may be necessary. Following acceptance of the plan the contractor shall be on-site to implement the plan and schedule within **five (5) business days** following notice of approval of the plan.

Any subsequent changes in the plan and schedule must receive the concurrence of the Department IPM Coordinator. Prior to approval, Department IPM Coordinator's are encouraged to discuss the technical merits of any proposed changes in Landscape maintenance & related IPM program with County IPM Coordinator.

Any subsequent changes in the "approved pesticide list" must receive the concurrence of the County IPM Coordinator prior to being used by the contractor.

1.1.3. **Monitoring and Inspection**

A critical aspect of the landscape management is the Pest Management Plan. Pest activity (weed, insect, fungi etc.) shall be monitored through an established inspection program to allow an objective assessment of pest population levels. Monitoring and inspection shall be continued throughout the duration of this

contract. The contractor shall describe in his proposal his approach to meeting this requirement.

1.1.4 **Landscape Modifications**

Unless otherwise stated in the project definition, landscape modifications for pest suppression shall be the responsibility of the contractor and agreed to mutually by both parties. The contractor shall make recommendations to the user department of what modifications can reasonably be accomplished. However, Contractor must provide adequate landscape maintenance & pest management even if such modifications have not been approved/accomplished as requested. Non compliance to the landscape modification can be discussed with the Department IPM coordinator and if there is need with the County IPM Coordinator, so that issues can be resolved to provide effective, efficient, economical landscape and IPM program.

1.1.5 **Pesticide Treatment**

The contractor shall apply only pesticides, which have been listed on the "County of Santa Clara Approved List of Pesticides" Appendix D, or specifically approved by (the County IPM Administrator) under specific exemption or Emergency Use exemption (IPM & Pesticide Use Ordinance No. NS-517.70 Division B-28-5. Appendix B.

As a general rule, application of pesticides on a landscape site shall not occur unless inspections or monitoring indicate the presence of pests in that specific site and alternate IPM methods or measures (physical, cultural, mechanical, biological) fail to suppress the pest population. An actual specimen of an insect pest, weeds, fungi etc., or active signs of same, must be seen before pesticides are applied. Care must be taken to avoid contamination or destroying any nesting site or habitat of any wildlife within an endangered species group.

Preventive treatments as applicable by California Law & Regulations (Department of Pesticide Regulations) of the site where inspections indicate a potential pest problem are acceptable only on a case-by-case basis with approval from the user department in consultation with County IPM Coordinator. The contractor must indicate areas for the preventive treatment in the landscape maintenance & related integrated pest management Plan for the site and list the methods of application.

1.1.6 **Record Keeping**

The contractor shall be responsible for maintaining a complete and accurate pest management log (Attachment B). In order to streamline and to provide consistent, uniform integrated pest management reporting system it is recommended that the contractor use the County reporting form. Any modifications or request for additional information to be added to the form shall be by mutual consent between both parties. Each site or group of sites (for a group of buildings on one campus representing one landscape site) that is serviced under this contract shall maintain its own records, which will be kept in the user department designated office and data shall be provided by the contractor.

The log shall contain the following items:

a) A copy of the landscape maintenance scope & related integrated pest management Plan and Service Schedule for the site.

b) A copy of the current label and EPA registration number (California DPR Registration Number) for each pesticide used ion the site, including the Material Safety Data Sheet. Pesticide labels are normally interpreted as including in-depth safety and use documentation.

c) The contractor may duplicate the information on their own work tickets, invoices or reporting systems, however contractor must also provide the County with acceptable data.

1.1.7 **Special Requests and Emergency Service**

The regular service shall consist of performing all components of a landscape maintenance & related IPM program, as described in the contractor's detailed plan and schedule for each landscape site during the period of this contract.

The user department representative shall place occasional requests for corrective action, special services beyond the routine requests or emergency service, with the contractor’s on-site supervisor. Corrective action or special services shall be by mutual agreement as agreed to between the Facility Project Manager and Contractor. Conditions that constitute an emergency service response shall be any that may cause bodily harm or life threatening situations to the public or County employees or damage to public property. The contractor shall respond to requests for emergency service on the day of the request.

The contractor shall describe in the Qualifications section his capability of meeting emergency requests (e.g., radio-dispatched service, cellular phone, paging system, Toll Free Emergency Phone Number,

Weekend and Off Time Emergency Contact List, name of office personnel handling the account, availability of trucks and personnel, etc.).

1.1.8 **Chemical Controls**

Since this is a landscape maintenance & related IPM contract, chemical controls shall be used primarily as a last resort and only after approval by the user department representative on a case-by-case basis or as described and approved in the general plan submission. When chemical controls are utilized, the following conditions shall be applicable:

a) Approved List of Pesticide – The contractor will only apply pesticides listed under County of Santa Clara Approved List of Pesticides; Appendix D.

b) Samples - The user department shall receive from the contractor or its technicians such samples of chemicals and materials for laboratory analysis as it may require.

c) Ineffective Chemicals - Success in pest control is largely determined by the skill of the pest control technician and the cooperation received from all concerned and involved in a particular pest problem. In cases where it has been determined that a particular chemical in use at these facilities has, indeed, lost its effectiveness due (to a resultant increase in resistance in the target pest population) the contractor shall replace such ineffective chemicals with more effective ones only with the approval of County IPM Coordinator.

The contractor shall bear the cost of any risk assessment studies or consultant work as it may be required to include the requested chemical to the "County of Santa Clara Approved List of Pesticides" Appendix B.

d) Safety and Chemical Data - Within thirty (30) days from the start of this contract, the contractor shall provide to the user department representative, his safety officer or other designate, the following most current safety and technical data for chemicals to be used in these facilities:

I. A list of chemicals including trade name and name of active and inert (including carriers and propellants) ingredients chemicals and their respective chemical classifications (i.e., Botanical etc.) Note: Chemicals, where necessary, shall be

restricted to non-persistent chemicals that are least harmful to people and the environment.

II. Material Safety Data Sheets for each chemical.
III. Copies or sample labels for each chemical.
IV. Antidote data where applicable, including a copy of a standard quick reference chart.
V. A list of poison control centers and respective telephone numbers as they may apply to the geographic areas in which these facilities described herein are located.
VI. All chemical controls shall be applied at night or on weekends except insecticide or rodenticide baits, and the contractor shall cooperate with the user department representative to provide re-entry interval information, where necessary.
VII. Contractor shall cooperate with the user department representative to place proper public notices or otherwise inform building occupants when chemical controls will be applied, what controls will be applied, etc. and comply with Section B28-7Posting of Pesticide Use of the County of Santa Clara IPM & Pesticide Use Ordinance requirements. Appendix B.

2.0 Specific Program Requirements

2.1.0 Manner and Time to Conduct Service

It shall be the contractor's responsibility to carry out work according to the detailed landscape maintenance and related Pest Management Plan and schedule developed for each site. The contractor's on-site supervisor shall be responsible for coordination with the user department or representative at the beginning of each visit. The purpose of this coordination is to review the plan and schedule and to receive information on problem areas needing corrective action.

Services (such as landscape maintenance other than chemical applications), which do not adversely affect tenant health or productivity may be performed during the regular hours of operation in the various landscape sites. When it is necessary to perform work on weekends or outside the regularly scheduled hours set in the contractor's plan and schedule, the contractor shall notify the user department representative **at least three (3) business days in advance**, and all arrangements will be coordinated between the user department representative and the on-site supervisor.

All application of toxicants, when necessary, is to be done after normal business hours, night or on weekends or pre-arranged times with facility management to meet re entry time and allow users to reenter the site. Non-business hours are generally considered to be after 5:00pm and

before 7:00 am, weekends, and County holidays. Affecting the daily business includes hindering or endangering pedestrian traffic, risking damaging or "dirtying" automobiles parked on the site, and blocking off multiple parking areas with Contractor vehicles. Examples of inappropriate work during normal business hours are irrigation repairs, tree pruning over parked cars or littering streets/lots with debris, chemical applications, mowing or trimming along parked vehicles, etc. We expect the Contractor to use common sense to identify other tasks that should be performed during non-work hours. To facilitate posting requirement for any chemical application as set forth in the Section B28-7(a)-i of the IPM Ordinance; contractor shall notify the Department IPM Coordinator **at least five (5) business days in advance**.

The contractor shall allow the user department representative sufficient time to inform tenants or application and assure the security of the areas treated.

The contractor shall observe all safety precautions throughout the performance of this contract. Certain areas within some landscape sites may require special instructions for persons entering the site. The user department representative will explain to the contractor and any restrictions associated with these special areas. These restrictions shall be adhered to and incorporated into the contractor's detailed plan and schedule for the building.

All persons employed under this contract shall be subject to County regulations and ordinances as are applicable during the time spent on County property. When necessary user department will supply site passes to the Contractor.

All contractor personnel, while working in or on government-owned or leased premises, shall wear distinctive uniform clothing. The uniform shall have the contractor's name easily identifiable, affixed thereon in a permanent or semi permanent manner. Additional personal protective equipment required for the safe performance of work must be determined and provided by the contractor. Protective clothing, equipment, and devices shall as a minimum, conform to Occupational Safety and Health Administration (OSHA) standards for the products being used. Vehicles used by the contractor must be identified in accordance with State, County and local regulations.

2.1.1 **Pesticide Products and Use**

The contractor shall be responsible for the safe use of pesticides & fertilizers. All pesticides used by the contractor must be registered with the EPA, California Department of Pesticide Regulations and appropriate County and/or local jurisdiction – listed on County of Santa Clara

Approved list of Pesticide **Appendix D** Transport, handling, and use of all pesticides shall be in strict accordance with the manufacturer's label instructions and all applicable Federal, County, and local laws and regulations. The environment and the public shall be protected at all times.

The contractor shall minimize the use of pesticides and general spectrum spray applications wherever possible. For example:

a. The contractor will use selective application techniques that reduce pesticide use such as spot treatment, band treatment, treating alternate rows or blocks, low volume applications, reducing dosage level of pesticide.
b. Pesticide space sprays (including mist, fogging, ULV, Smoke etc. as classified) will be restricted to unique situations for which no alternative measures are practical and must be consulted with Department IPM Coordinator & County IPM Coordinator prior to use.
c. The contractor shall consider the leaching potential of fertilizers into ground water or running off into surface water.

The addition of Spot Treatment and General Treatments will only be performed where:

- Called for by the service procedure and in case of infestation
- Compliance to product label and Legislative requirements can be met.
- Surfaces are sufficiently clean to allow effective application and no staining

Prior to performing a space spray treatment (mist, fogging, ULV, Smoke etc. as classified), the contractor shall submit a written request for approval to the user department representative **at least seven (7) calendar days prior to the proposed treatment time.** The request must identify the target pest, time and specific place(s) of treatment, pesticide(s) to be used, method of application, precautions to be taken to ensure the containment of the spray to the site of application. No space application of pesticide shall be made without the written approval of the Department IPM coordinator and County IPM Coordinator. No space application of pesticide shall be made while tenant personnel are present.

No product identifiable as a fumigant shall be used in any County space for any purpose until otherwise approved by County IPM Coordinator under Specific Use or Emergency Use Exemption.

2.1.2 **Rodents & Other Wild Life Control:**

Contractor shall not be responsible for any rodent & other wild life control. Any problem situations the Contractor becomes aware in respect to them

during the course of routine landscape maintenance should be reported to the Facility Project Manager responsible for the site.

SECTION V - QUALIFICATIONS SUBMITTAL

Qualifications submitted by the contractor shall include, but not necessarily be limited to, the items of information requested below. Prospective contractors are advised, Qualifications are judged on personnel qualifications, IPM experience, technical merits and contractor's answers to Approach to IPM projects as asked in the following format. It is in the Proposers best interest to provide a complete and detailed proposal. You may be asked to present the proposed cost to the Selection/Evaluation committee, if required. Each proposal shall follow the format below. Each item numbered below shall form a separate section as outlined and shall be referenced in the Table of Contents and separated by tabs in a binder for easy reference. Five (5) Additional Copies (Photocopies) shall be submitted along with the original.

The proposal shall include and will be evaluated on the following:

1.0 **Executive Summary**

a) Describe briefly history of the company, corporate background and a history of the company's involvement with the practice of landscape maintenance and related IPM.

b) What is your company's landscape and related Pest Management philosophy?

c) Are you active member of landscape maintenance and Pest management trade & related associations? If so, list name of associations with their address & telephone numbers?

d) What is your employee turnover rate compared to the rest of the pest management service industry?

e) Describe your company policy on Employee technical & safety training and how certified employees are kept current.

f) Describe your company policy on Safe Driving and how company vehicles are equipped with standard safety devices.

g) Does your company have a uniform code for the employees? Describe?

h) Are your company vehicles identified by signage indicating the company name?

1.1 **Technical Support to Company's Staff and IPM Awareness Training To the Customer:**

a. Do you have technical support team that provides informational, interactive IPM awareness to Company's staff as well as Customer? Describe.

1.2 **Quality Assurance**

a) Do you have Quality Assurance Team that provides random or pre determined inspections to evaluate the progress of IPM program and how often? Describe.

b) Describe your company's quality assurance approach?

c) How do you handle non-compliance and assure quality or work? How does your management ensure that landscape maintenance & related IPM service work is carried out as per the specification?

1.3 **Personnel**

a) A description of how the contractor's personnel meet the qualifications stated herein. Resumes of Entomologist/Agronomist, Scientist, Pest Control Advisor, On-Site Supervisor, and Service Technicians shall be included.

b) What is the length of employment with your company and years of experience of Service Technician and On-Site Supervisors who will be assigned to this project?

1.4 **Logistics of Operations**

a) Describe your office location, distance in comparison to area of work.

b) Does your company provide 24 hours 7 days a week emergency service support?

c) Does your company have on staff live customer service personnel or is it a third party messaging service?

d) How do you keep a track of customer complaints or phone calls? How do you track customer complaint calls, which requests have been taken care of in a timely manner?

e) Describe how many service technicians will be assigned to this project full time and or half time? Describe back up support?

f) Describe how many service calls per day, proposed service technicians handle other than work for the County of Santa Clara. Is he/she the dedicated Service Technician for this project alone?

g) Describe mechanics of Emergency response – Emergency Response Team Flow chart, Pager, Cellular phone, Toll Free Number etc. How much time would it take to respond to emergency calls?

1.5 **Licenses**

a) Submit copies of all vendor & applicator Business & licenses and related certifications as applicable, including those for each technician, On-Site Supervisor, Entomologist/Agronomist, Pest Control Advisor, and Weed Management Specialist etc.

1.6 **General Landscape Maintenance & related IPM Plan**

Using a typical One (1) acre landscape site as a guide, submit a General Plan for landscape management and related IPM process you would apply including:

a) Provide a landscape design and management plan for a new landscape site using native (Santa Clara County, California) grasses, trees and shrubs as most preferred plants.
    1. Explain Prevention Program for this landscape
    2. List Pests (weeds, arthropods and fungi most likely to be encountered with in this landscape) their symptoms and identification
    3. Explain regular surveying methods/ forms to be utilized for these pests
    4. Explain Action Threshold and Guidelines when pesticide use will be warranted
    5. Explain preventive pesticide usage for this landscape and why it is necessary
    6. Explain Fertilization for this landscape with alternatives to synthetic commercial fertilizers
    7. Explain Sound management methods – cultural, mechanical, physical and biological that can assist you to minimize reliance on chemical management (both pesticide and synthetic fertilizer usage).
    8. How long would it take to establish a pest and chemical free landscape? Is it factually

possible? If so, what kind of expectation would public have to explore such landscape?

9 What would you consider to protect surface and ground water quality in this landscape design?

10 What procedures would you provide reduced worker exposure to pesticides?

b) Consider you are hired to provide landscape maintenance and related IPM program for an already established landscape with native and non-native plants. Describe alternatives to herbicide approach (Designing & Redesigning landscape to avoid weeds, Controlling Weeds with out herbicides in established plantings) to Annual, Biannual & Perennial control of the most common broadleaf, grasses, and weeds in the County of Santa Clara such as;

1. Crabgrass
2. Pigweed
3. Sow thistle
4. Milk thistle
5. Yellow Star thistle in Cattle Ranches
6. Poison Oak
7. Field bindweed

c) Describe your experience in Weed management annual planning and what percentage it emphasizes on non-herbicide approach.

1.6.1 Describe the level of involvement for the entomologist/ biologist/ vertebrate specialist, Agronomist (Weed Management Specialist, if applicable to the project). What task(s) will he/she perform?

1.6.2 Describe how much time and what personnel will be involved in ongoing monitoring. How will pest populations be monitored? What type of logs will be used? How will traps be monitored?

1.6.3 Describe and outline the methods used to evaluate the IPM program.

1.7 **IPM Experience**

List at least five (5) verifiable customer references of similar nature as the project demands, where IPM has been practiced for at least for three (3) or more years.

These records shall include:

a) Name, Address and phone number of references where IPM techniques were utilized.
b) A description of actual pest interventions utilized.
c) Qualifications of the staff that made the interventions
d) The amount of time spent by staff implementing the IPM interventions
e) List the actual non-chemical and chemical products utilized in the intervention techniques described in (b) above. Also, detail the criteria used to determine the selection method of application and frequency utilized.
f) What was the outcome of the IPM program? Was it successful or not? If no, state the reasons.
g) Sample copies of all forms used including the comprehensive inspection, monitoring, intervention and evaluation.

1.8 **Additional Information**

The contractor may submit any additional information, which they believe, should be considered in determining whether their company should be awarded a contract.

September 15, 2010

Mr. Bruce H. Wolfe
Executive Officer
San Francisco Bay Regional Water Quality Control Board
1515 Clay Street, Suite 1400
Oakland, CA 94612

Subject: **Santa Clara Valley Water District**
FY 2009-2010 Annual Report

Dear Mr. Wolfe:

This letter and Annual Report with attachments is submitted by the **Santa Clara Valley Water District (SCVWD)** pursuant to Permit Provision C.16.a of the Municipal Regional Stormwater NPDES Permit (MRP), Order R2-2009-0074, NPDES Permit No CAS612008 issued by the San Francisco Bay Regional Water Quality Control Board. The Annual Report provides documentation of activities conducted during FY 2009-2010 and consists of the following:

A. Certification Statement
B. Annual Report Form
   - Table of Contents
   - Completed Annual Report Form: Sections 1-15
C. Appendix
   - Table of Contents
   - Appendices

Please contact Brett Calhoun at 408-265-2600 regarding any questions or concerns.

Very truly yours,

Ann Draper
Duly Authorized Representative
Assistant Operating Officer

Santa Clara Valley Water District
FY 2009-2010 ANNUAL REPORT

Certification Statement

"I certify, under penalty of law, that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted, is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

Section 2 - Provision C.2 Reporting Municipal Operations

Program Highlights and Evaluation

Highlight/summarize activities for reporting year:

Summary:

C.2.1 Corporation Yard BMP implementation is the primary C.2 provision that the district is responsible for.

PROGRAM EVALUATION

Over the last decade District Urban Runoff Program staff have been instrumental in developing a significantly improved appreciation by Corp Yard staff of the need for pollution prevention. The staff of the Corp Yard have dramatically reduced the volume of potential pollutants stored on site and have implemented a very affective good housekeeping strategy. A District wide Green Business Certification has also brought a heightened environmental awareness to all District staff regarding pollution prevention.

Corp Yard stormwater samples were collected in the fall both upstream and downstream of the Sediment control best management practice device.

The District owns and operates the stormwater drainage systems at its facilities, which includes storm drains, catch basins, vegetated swales, open drainage ditches, utility trenches, and storm drain lines. Storm drains from District facilities discharge to creeks, the Guadalupe River, and recharge ponds. Storm drains outside District facilities are owned and operated by the local (city or county) jurisdiction.

The District completed the following tasks:

1) Revised draft of Stormwater Pollution Prevention Plan for the Corporation Yard.
2) Continued implementation of the storm drain inspection and cleaning program.

HIGHLIGHTS AND ACCOMPLISHMENTS

The Corp Yard sampling has continued. Pollution Prevention and pollutant reduction has continued to be a focus of Corp Yard staff.
Storm drain inspections and cleaning work orders continue to be distributed via the District's Comcate (field maintenance work order software) Preventative Maintenance Program for the three Water Treatment Plants. Each month facility maintenance staff receive a computer generated work order to inspect all storm drains at their facility and have them cleaned as needed. The Stream Stewardship Unit has been performing storm drain inspections since FY 2005 at the Vasona Meter Shop, Corporation Yard, Headquarters and Administration Campus and the Blossom Hill Annex to ensure compliance with Urban Runoff Management Plan.

C.2.a. ►Street and Road Repair and Maintenance

These BMPs were not applicable.

NA	Control of debris and waste materials during road and parking lot installation, repaving or repair maintenance activities from polluting stormwater
NA	Control of concrete slurry and wastewater, asphalt, pavement cutting, and other street and road maintenance materials and wastewater from discharging to storm drains from work sites.
NA	Sweeping and/or vacuuming and other dry methods to remove debris, concrete, or sediment residues from work sites upon completion of work.

Comments:
The SCVWD does not conduct street and road repair maintenance activities.

C.2.b. ►Sidewalk/Plaza Maintenance and Pavement Washing

These BMPs were not applicable.

NA	Control of wash water from pavement washing, mobile cleaning, pressure wash operations at parking lots, garages, trash areas, gas station fueling areas, and sidewalk and plaza cleaning activities from polluting stormwater
NA	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs

Comments:
The SCVWD does not conduct clearing activities using pressure washers on sidewalks.

C.2.c. ►Bridge and Structure Maintenance and Graffiti Removal

An **X** in the boxes next to implemented BMPs indicates that these BMPs were implemented in applicable instances.

X	Control of discharges from bridge and structural maintenance activities directly over water or into storm drains
X	Control of discharges from graffiti removal activities
X	Proper disposal for wastes generated from bridge and structure maintenance and graffiti removal activities
NA	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs for graffiti removal

Comments: Graffiti on District property is not removed; it is painted over, predominately by the use of rollers. We do not spray near standing or flowing water. When spraying is the preferred method we cover the immediate area.

C.2.d. ►Stormwater Pump Stations				
Does your municipality own stormwater pump stations:		Yes	X	No
If your answer is **No** then skip to **C.2.e.**				
SCVWD does not own or operate storm water pumping stations and therefore is not applicable.				

C.2.e. ►Rural Public Works Construction and Maintenance				
Does your municipality own/maintain rural[1] roads:		Yes	X	No
If your answer is **No** then skip to **C.2.f**.				
These BMPs were not applicable.				
NA	Control of road-related erosion and sediment transport from road design, construction, maintenance, and repairs in rural areas			
NA	Identification and prioritization of rural road maintenance based on soil erosion potential, slope steepness, and stream habitat resources			
NA	No impact to creek functions including migratory fish passage during construction of roads and culverts			
NA	Inspection of rural roads for structural integrity and prevention of impact on water quality			
NA	Maintenance of rural roads adjacent to streams and riparian habitat to reduce erosion, replace damaging shotgun culverts and excessive erosion			
NA	Re-grading of unpaved rural roads to slope outward where consistent with road engineering safety standards, and installation of water bars as appropriate			
NA	Inclusion of measures to reduce erosion, provide fish passage, and maintain natural stream geomorphology when replacing culverts or design of new culverts or bridge crossings			
Comments including listing increased maintenance in priority areas: The District does not have any rural roads under its jurisdiction. The District completed a geomorphic upgrade in Jacques Gulch, in the Guadalupe watershed, which included upgrading of a culvert pipe that flows below Almaden Rd.				

[1] Rural means any watershed or portion thereof that is developed with large lot home-sites, such as one acre or larger, or with primarily agricultural, grazing or open space uses.

C.2.f. ►Corporation Yard BMP Implementation	
The boxes below that contain an X apply to our corporation yard(s):	
	We do not have a corporation yard
	Our corporation yard is a filed NOI facility and regulated by the California State Industrial Stormwater NPDES General Permit
X	We certify that we have a current **Stormwater Pollution Prevention Plan (SWPPP)** for the Corporation Yard(s)
An **X** in the boxes below, next to implemented SWPPP BMPs, indicate that these BMPs were implemented in applicable instances.	
X	Control of pollutant discharges to storm drains such as wash waters from cleaning vehicles and equipment
X	Routine inspection prior to the rainy seasons of corporation yard(s) to ensure non-stormwater discharges have not entered the storm drain system
X	Containment of all vehicle and equipment wash areas through plumbing to sanitary or another collection method
X	Use of dry cleanup methods when cleaning debris and spills from corporation yard(s) or collection of all wash water and disposing of wash water to sanitary or other location where it does not impact surface or groundwater when wet cleanup methods are used
X	Cover and/or berm outdoor storage areas containing waste pollutants

Comments:
The Stream Stewardship Unit has been performing storm drain inspections since FY 2005 at the Corporation Yard, to ensure compliance with the Urban Runoff Management Plan and Storm Water Pollution Prevention Plans.

The water quality sampling at the Corporation Yard has continued. Pollution prevention and pollutant reduction has continued to be a focus of Corporation Yard staff training.

The stormwater quality BMPs were visually inspected quarterly during non-stormwater observations at the Corporation Yard. The Corporation Yard culvert inlet protection device (constructed of cinderblocks filter fabric and washed gravels) was inspected in September, 2008 and determined to be in need of reconstruction and cleaning which will occur in October, 2010, as it has collected sediment preventing this material from entering the Guadalupe River. Other BMPs are working effectively, as noted on the non-storm water observation forms submitted. The Camden and Brokaw yards are used to store various stream maintenance related materials such as large tree trunks and large rocks. These facilities are inspected monthly to insure that soil does not leave the site and that erosion is not occurring on the property. The Camden yard was used as the site for the 2009 Rural Public Works training provided through the SCVURPPP program and hosted by the District.

The following table is for inspection results for our corporation yard(s).

Corporation Yard Name	**Inspection Date** (1x/year required)	**Inspection Findings/Results**	**Follow-up Actions**
Corporation Yard	Non-Storm Water Inspections: 8/3/09, 9/10/09, 10/15/09, 11/10/09, 1/28/10	Non-storm water discharge was not observed. The BMPs needed cleaning.	N/A
	Storm Water Inspections: 1/21/09, 12/8/09	1/21- Storm water was observed but the liquid was clear with no sheen or odor and low turbidity. 12/8 - Storm water was observed along with leafy debris in or around the BMPs.	N/A N/A
Camden Yard	4/2010	BMPs will need re-inspection in the Fall.	Visit site 9/2010
Brokaw Yard	4/2010	BMPs will need re-inspection in the Fall.	Visit site 9/2010

Section 3 - Provision C.3 Reporting New Development and Redevelopment

C.3.a. ►New Development and Redevelopment Performance Standard Implementation Summary Report

Provide a brief summary of the methods of implementation of Provisions C.3.a.i.(1)-(8).

Summary:

Not required for this Annual Report.

The Santa Clara Valley Water District (District) is not the local construction activities permitting agency. The District does incorporate LID principles in its own projects and at its facilities and as part of facility retrofits. As an example at the Administration Building outdoor classroom impermeable concrete was replaced with permeable concrete. In addition the Districts Headquarters and Administration Campus parking lots incorporate vegetated swales as part of the landscape and pollution prevention structures. The recently completed District Laboratory includes a storm water sand filter system for storm water treatment and it is also used as an example for interested parties to see what a storm water detention and treatment facility looks like and how they function.

C.3.b. ►Green Streets Status Report

(All projects to be completed by December 1, 2014)

On an annual basis (if applicable), report on the status of any pilot green street projects within your jurisdiction. For each completed project, report the capital costs, operation and maintenance costs, legal and procedural arrangements in place to address operation and maintenance and its associated costs, and the sustainable landscape measures incorporated in the project including, if relevant, the score from the Bay-Friendly Landscape Scorecard.

Summary:

The District does not have jurisdiction over streets or other roadways.

Refer to the C.3 New Development and Redevelopment section of Program's FY 09-10 Annual Report for a description of activities of the C3PO AHTG Green Streets Work Group and the BASMAA Development Committee [note that there may also be a separate BASMAA report].

C.3.b.v.(1) ►Regulated Projects Reporting Table

Fill in attached table **C.3.b.v.(1)** or attach your own table including the same information –

This table is not applicable to the Santa Clara Valley Water District.

C.3.h.iv. ► Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting
(1) Fill in attached table **C.3.h.iv.(1)** or attach your own table including the same information
(2) On an annual basis, provide a discussion of the inspection findings for the year and any common problems encountered with various types of treatment systems and/or HM controls. This discussion should include a general comparison to the inspection findings from the previous year.
Summary: N/A – The District is not the permitting agency for local building activities.
(3) On an annual basis, provide a discussion of the effectiveness of the O&M Program and any proposed changes to improve the O&M Program (e.g., changes in prioritization plan or frequency of O&M inspections, other changes to improve effectiveness program).
Summary: N/A – The District is not the permitting agency for local building activities.

C.3.b.v.(1) ►Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period
N/A – The District is not the permitting agency for local building activities.

C.3.h.iv. ►Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

Fill in table **below** or attach your own table including the same information.

Facility/Site Inspected and Location	Party Responsible[1] For Maintenance	Date of Inspection	Type of Inspection[2]	Type of Treatment/HM Control(s) Inspected[3]	Inspection Findings or Results[4]	Enforcement Action Taken[5]	Comments
Not applicable							

[1] State the responsible operator for installed stormwater treatment systems and HM controls.
[2] State the type of inspection (e.g., annual, follow-up, spot, etc.).
[3] State the type(s) of treatment systems inspected (e.g., bioretention facility, flow-through planter, infiltration basin, etc…) and the type(s) of HM controls inspected, and indicate whether the treatment system is an onsite, joint, or offsite system.
[4] State the inspection findings or results (e.g., proper installation, improper installation, proper O&M, immediate maintenance needed, etc.).
[5] State the enforcement action(s) taken, if any, as appropriate and consistent with your municipality's Enforcement Response Plan.

Section 4 – Provision C.4 Industrial and Commercial Site Controls

C.4.a.ii ► Legal Authority				
Do you have adequate legal authority to obtain effective stormwater pollutant control on industrial sites?		**Yes**	X	**No**
If **No**, explain: Not applicable as the Santa Clara Valley Water District (District) is not the local industrial site permitting agency.				

C.4.c.ii.(5) ► Enforcement Response Plan				
Have you developed and implemented an Enforcement Response Plan by April 1, 2010?		**Yes**	X	**No**
If **No**, explain: Not applicable as the Santa Clara Valley Water District (District) is not the local industrial site permitting agency.				

Program Highlights
Provide background information, highlights, trends, etc. For FY 09-10 Annual Report describe steps taken to revise your program to meet new data tracking and reporting requirements.
Not applicable to the Santa Clara Valley Water District.

C.4.b.i. ► Business Inspection Plan				
Do you have a Business Inspection Plan?		**Yes**	X	**No**
If No, explain: Not applicable to the Santa Clara Valley Water District.				

C.4.b.iii.(1) ► Potential Facilities List
List below or attach your list of industrial and commercial facilities in your Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.
Not applicable to the Santa Clara Valley Water District.

C.4.b.iii.(2) ►Facilities Scheduled for Inspection
List below or attach your list of facilities scheduled for inspection during the current fiscal year.
Not applicable to the Santa Clara Valley Water District.

C.4.c.iii.(1) ►Facility Inspections
Not applicable to the Santa Clara Valley Water District.

C.4.c.iii.(2) ►Frequency and Types/Categories of Violations Observed

Not applicable to the Santa Clara Valley Water District.

C.4.c.iii.(2) ►Frequency and Type of Enforcement Conducted

Not applicable to the Santa Clara Valley Water District.

C.4.c.iii.(3) ►Types of Violations Noted by Business Category

Not applicable to the Santa Clara Valley Water District.

C.4.c.iii.(4) ►Non-Filers

List below or attach a list of the facilities required to have coverage under the Industrial General Permit but have not filed for coverage:

Not applicable to the Santa Clara Valley Water District.

C.4.d.iii ►Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
Not applicable.				

Section 5 – Provision C.5 Illicit Discharge Detection and Elimination

C.5.a.ii ► Legal Authority

(For FY 09-10 Annual Report only) Do you have adequate legal authority to prohibit and control illicit discharges and escalate stricter enforcement to achieve expedient compliance?		**Yes**	X	**No**

If **No**, explain:

The Municipalities and County have sole jurisdiction over their respective storm drain systems. SCVWD does not own or operate public storm drain systems and therefore does not have legal authority over illicit connections and illegal dumping into the storm drain system.

SCVWD's does have some legal authority over direct discharges to waterways that it owns or operates through an easement through its "Water Resource Protection Ordinance" (Ordinance 06-01). This ordinance establishes District permitting authority only over lands and facilities "owned, controlled, operated, or maintained by the District" and requires outside parties to obtain an encroachment permit for any modification to District facilities including but not limited to development activities. The District may issue an encroachment permit if it finds, based on substantial evidence, that the proposed modification conforms to requirements of the District Water Resources Protection Manual such that, among other things, it will not pollute or erode waterways. Violators may be served a written "compliance order" delivered in person or by US Mail to the person responsible for the violation. Following prescribed hearings the District Chief Executive Officer (CEO) may impose administrative penalties up to $1000 per day (not to exceed $100,000 in total) for continuing violations. In addition to financial penalties the District may recoup administrative costs - potentially including any abatement costs - incurred by the District with regard to the violation. Additionally, violations of the Water Resource Protection Ordinance are punishable as a misdemeanor and may also be enjoined by civil action.

Utilization of enforcement components within the Water Resource Protection Ordinance is often either impractical or unnecessary when dealing with illegal dumpers. This is because the parties responsible for illegal dumping can only rarely be identified and sometimes the cost of enforcement may exceed the cost of simply absorbing the clean-up expense. In the case of significant spills the responsible party, if they can be identified, is usually eager to implement clean-up activities in order to avoid prosecution under more serious municipal, county, state, and federal codes. In instances where an uncooperative responsible party can be identified, the District will implement ordinance provisions such as compliance orders and administrative penalties and costs as appropriate. Additionally, District ordinance violation may be added to the list of violations prosecuted by the Santa Clara County District Attorney. During FY 09-10 no compliance orders, administrative penalties, administrative costs, civil actions, or misdemeanor prosecutions were brought against Ordinance 06-01 illegal dumping violations.

C.5.b.ii.(4) ► Enforcement Response Plan

(For FY 09-10 Annual Report only) Have you developed and implemented an Enforcement Response Plan by April 1, 2010?		**Yes**	X	**No**

If **No**, explain:

SCVWD Does not have police powers or citation authority. All district property and facilities fall within the jurisdiction of municipal or county code enforcement regulations. The District's Enforcement Response Plan derives from enforcement procedures related to Ordinance 06-01 violations

that are defined within the ordinance as described in C.5.ii above, and Watershed Resource Protection Ordinance Enforcement work instructions maintained in the District's watershed division quality and environmental management system as document number WW75181.

Program Highlights

Provide background information, highlights, trends, etc. For FY 09-10 Annual Report describe steps taken to revise your program to meet new data tracking and reporting requirements.

The District addresses IC/ID incidents effectively through its hazardous materials "Emergency Response" (ER) Program. This aggressive 24-7 program responds reactively to IC/ID incidents by providing referral and inter-agency cooperation and/or conducting field investigation and clean-up activities as appropriate. The ER Program may be contacted via the Pollution Hotline (1-888-510-5151) which is advertised on the District's internal and external websites as well as in occasional fliers, county wide mailers and various memos. The Hotline is also advertised on the Santa Clara Valley Urban Runoff Pollution Prevention Program's website. The ER Team routinely responds to over 100 reported incidents per year as reported by District field workers, staff from other agencies, and members of the general public.

The ER Program is recognized as an effective and timely means of addressing acute contaminants that are illegally dumped or discharged to District lands and facilities. The Emergency Response Program's performance was evaluated by four mechanisms during FY09: (1) within the context of the District's Clean, Safe Creeks program (semi-annually); (2) by the District CEO's scorecard (quarterly); and (3) by an external ISO 9000/14000 recertification audit (December 2007). The results of these evaluations were as follows: (1) the Clean, Safe Creeks key performance indicator was met; (2) the program received a "Superior" rating (the highest rating possible) on the CEO scorecard based on phone and field response times; and (3) the ER Program passed the quality and environmental recertification audit of date according to ISO 9000 and 14000 standards.

The District received and responded to a total of 93 emergency response reports throughout Santa Clara County during fiscal year 2009-20010. This total is down from the 116 reports in FY 08-09. Of the 93 total incidents reported during the last fiscal year, 82 were within the jurisdiction of the San Francisco Bay Regional Board. 54 required a field response by a team member or members for general investigation, source identification, multi-agency coordination, clean up or evidence collection. The District is one of the few Santa Clara County Permittees that has 24 hour availability to implement acute stormwater pollution investigation s. The District staff will as needed investigate and collect evidence at a site that can later be transferred to the appropriate jurisdictional authority during the next regularly schedule business hours for the jurisdictional authority whether it be our co-permittees, state or federal agencies. The District responded within the two hour target field response time, 100% of the time in 2009-2010 for all incidents.

Water Resource Protection Ordinance Enforcement

As previously reported there were no compliance orders, administrative penalties, administrative costs, civil actions, or misdemeanor prosecutions brought against Ordinance 06-01 violators during FY 09-10. Additionally, District emergency responders continue to work cooperatively to assist investigations by law enforcement agents at the Department of Fish and Game and the District Attorney's Office, as well as municipal and Regional Board code enforcement staff.

C.5.c.iii ►Complaint and Spill Response Phone Number and Spill Contact List

List below or attach your complaint and spill response phone number and spill contact list.

Contact	Description	Phone Number
24-hour, 7-day per week Pollution Prevention Hotline	The pollution hotline should be used to report the presence of hazardous and non-hazardous pollutants that acutely impact or threaten district-owned surface waters. 1. The caller will be greeted by a automated message and asked to record information about the incident 2. The hotline will then notify a district responder to make a return call to the reporting party and assess the information 3. If the situation warrants, district staff will investigate further or refer the incident for timely response	1-888-510-5151

C.5.d.iii ►Evaluation of Mobile Business Program

Describe implementation of minimum standards and BMPs for mobile businesses and your enforcement strategy. This may include participation in the BASMAA Mobile Surface Cleaners regional program or local activities.

Description: NA

C.5.e.iii ►Evaluation of Collection System Screening Program

Provide a summary or attach a summary of your collection screening program, a summary of problems found during collection system screening and any changes to the screening program this FY.

Description: NA

C.5.f.iii.(1), (2), (3) ►Spill and Discharge Complaint Tracking

	Number	Percentage
Discharges reported (C.5.f.iii.(1))	93	
Discharges reaching storm drains and/or receiving waters (C.5.f.iii.(2))	Not Tracked for FY10	-
Discharges resolved in a timely manner (C.5.f.iii.(3))	93	100

C.5.f.iii.(4) ►Summary of major types of discharges and complaints

Provide a narrative or attach a table and/or graph.

The following charts illustrate incidents by watershed, jurisdiction, and pollutant type. As would be expected of the largest city in both area and population the City of San Jose and the Guadalupe Watershed had the most number of incidents. As a pollutant category, fuel & oil accounted for the most number of incidents.

Incidents By Pollutant
Fuel & Oil
29
Organic, Sediment
& Trash
19
Chemical
20
Other
27

Section 6 – Provision C.6 Construction Site Controls

C.6.a.iii ► Legal Authority

Is your agency's legal authority adequate for C.6 compliance?		Yes	X	No

If **No**, explain: The Santa Clara Valley Water District (District) is not the local permitting agency.

C.6.b.ii.(3) ► Enforcement Response Plan

Was your Enforcement Response Plan developed and implemented by April 1, 2010?	X	Yes		No

If **No**, explain:
An enforcement response plan was developed and implemented by April 1, 2010. Since that time the enforcement response plan has been updated. See attached Enforcement Response Matrix.

C.6.e.iii.1.a, b, c ►Site/Inspection Totals

Number of sites disturbing < 1 acre of soil requiring storm water runoff quality inspection (i.e. High Priority) (C.6.e.iii.1.a)	**Number of sites disturbing ≥ 1 acre of soil** (C.6.e.iii.1.b)	**Total number of storm water runoff quality inspections conducted** (C.6.e.iii.1.c)
9	8	(Data is still being compiled)

C.6.e.iii.1.d ►Construction Activities Storm Water Violations

BMP Category	Number of Violations[1]	% of Total Violations[2]
Erosion Control	0	NA
Run-on and Run-off Control	0	NA
Sediment Control	0	NA
Active Treatment Systems	0	NA
Good Site Management	0	NA
Non Stormwater Management	0	NA
Total		NA

Notes:
[1]Count one violation in a category for each site and inspection regardless of how many violations/problems occurred in the BMP category.
[2]Percentage calculated as number of violations in each category divided by total number of violations in all six categories.

C.6.e.iii.1.e ►Construction related storm water enforcement actions

	Enforcement Action (as listed in ERP)[1]	Number Enforcement Actions Taken	% Enforcement Actions Taken[2]
Level 1	NA	0	NA
Level 2	NA	0	NA
Level 3	NA	0	NA
Level 4	NA	0	NA
Total		**0**	**NA**

Notes:
[1]Agencies should list the specific enforcement actions as defined in their ERPs.
[2]Percentage calculated as number of each type of enforcement action divided by the total number of enforcement actions.

C.6.e.iii.1.f, g ►Illicit Discharges

	Number
Number of illicit discharges, actual and those inferred through evidence (C.6.e.iii.1.f)	0
Number of sites with discharges, actual and those inferred through evidence (C.6.e.iii.1.g)	0

C.6.e.iii.1.h, i ►Violation Correction Times

	Number	Percent
Violations fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii.1.h)	0	NA
Violations not fully corrected within 30 days after violations are discovered (C.6.e.iii.1.i)	0	NA[3]
Total number of violations for the reporting year[1]	0	NA

Notes:

[1]Total number of violations equals the number of initial enforcement actions (i.e. one violation issued for several problems during an inspection at a site). It does not equal the total number of enforcement actions because one violation issued at a site may have a second enforcement action for the same violation at the next inspection if it is not corrected.

[2]Calculated as number of violations fully corrected in a timely period after the violations are discovered divided by the total number of violations for the reporting year.

[3]Calculated as number of violations not fully corrected within 30 days after the violations are discovered divided by the total number of violations for the reporting year.

C.6.e.iii.(2) ►Evaluation of Inspection Data

Describe your evaluation of the tracking data and data summaries and provide information on the evaluation results (e.g., data trends, typical BMP performance issues, comparisons to previous years, etc.).

Description:

This year the District did not have any violations reported during construction site inspections. The District has developed a new system to track construction site inspections and violations.

The Stream Stewardship Unit did not have staff in 2009-2010 to conduct pre-rainy season inspections to facilitate site compliance. However for 2010-2011 staff resources do exist to continue inspections whenever they are requested by Construction Inspection Unit staff. In 2009-2010 the Stream Stewardship Unit focused on training engineers and construction staff on the new statewide general construction permit, the tier requirements and addressing the legally responsible party issue, as well as providing guidance on who can be a Qualified SWPPP Developer and a Qualified SWPPP Practitioner. In 2010-2011 improvements are being implemented to enhance evaluations.

C.6.e.iii.(2) ►Evaluation of Inspection Program Effectiveness

Describe what appear to be your program's strengths and weaknesses, and identify needed improvements, including education and outreach.

Description:

The District continued to use the monthly inspection sheet developed in FY 02-03 to facilitate compliance and follow up inspections. The Stream Stewardship Unit continued to coordinate with the construction inspectors in the field to go over SWPPP implementation at the construction sites. The Stream Stewardship Unit coordination proved beneficial, and will continue providing monthly reminders to Construction Inspection Unit staff to complete SWPPP implementation paper work during FY 10-11.

Construction Inspection Unit continues to use the Incident Response/Pollution Prevention Hotline to contact Stream Stewardship Unit staff to report construction sites that are creating exempted discharges.

In FY 09-10, the District had 17 Capital Improvement Projects (CIP) under construction that included flood protection/channel improvement projects. Stream Stewardship Unit assisted with review of CIP SWPPPs on occasion. A table showing the inspections completed is included with this section.

All Steam Maintenance Program (SMP) work is reported by the Stream Stewardship Unit in the SMP annual SMP post-construction report due every January. This annual report is also submitted to the Regional Water Quality Control Board (RWQCB). The SMP report outlines activities completed to maintain the flood conveyance capacity and indicates what erosion repairs where implemented to reduce fine grained sediment availability, stabilize channel banks and protect property. The specific of each project are thoroughly described in the SMP Annual Report.

C.6.f ►Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance	Percent of Inspectors in Attendance
SCVURPPP Construction Site Inspection Training	10/21/09	Inspection and enforcement procedure, Complaint controls	4	
***Construction Stormwater Management Compliance* Workshop**	1/19/10	SWPPP submittals, Site monitoring	1	
***Construction Stormwater Management Compliance* Workshop**	1/20/10	SWPPP submittals, Site monitoring	5	
Construction Site Stormwater Compliance Workshop	5/19/10	SWPPP submittals, Site monitoring	43	

CONSTRUCTION BMP ENFORCEMENT RESPONSE PLAN

Section 7 – Provision C.7. Public Information and Outreach

C.7.b.ii.1 ►Advertising Campaign

The cornerstone of the Program's outreach activities is the Watershed Watch Campaign (Campaign). The Campaign completed 10 years of implementation (and 9 years of advertising) in FY 09-10. The Campaign implemented various outreach activities including media advertising.

The following separate reports developed by SCVURPPP summarize countywide advertising efforts conducted during FY 09-10:

- FY 09-10 Watershed Watch Campaign Annual Campaign Report
- FY 09-10 Watershed Watch Partner Report
- FY 09-10 Watershed Watch Web Statistics Report

These reports are included within the C.7 Public Information and Outreach section of Program's FY 09-10 Annual Report.

C.7.b.iii.1 ►Pre-Campaign Survey

Not required for this Annual Report.

☐	Survey report attached
☐	Reference to regional submittal:

C.7.c ►Media Relations

The Program participated in the BASMAA Media Relations Project which conducted three pitches. The pitches were on pesticides, car washing and litter, relating specifically to plastic bags.

In addition, on February 2, 2010, San Jose Mercury News' Action Line Column included a letter about draining pool water. Program staff developed a response and it was printed in Dennis Rockstroh's column on February 24, 2010.

The following separate report developed by BASMAA summarizes media relations efforts conducted during FY 09-10:

- BASMAA Media Relations Final Report

This report is included within the C.7 Public Information and Outreach section of Program's FY 09-10 Annual Report.

C.7.d ►Stormwater Point of Contact

The Program maintained two toll free telephone numbers, the Program's information number (800-794-2483) and the Watershed Watch hotline (866-WATERSHED), for calls from the general public and requests for information. Program and Watershed Watch consultant staff continued to maintain the Program and Watershed Watch websites respectively.

The District maintained a 24-7 emergency response hotline (888-510-5151) and website (www.valleywater.org).

The District website is www.valleywater.org and the phone number is 408-265-2600. Both the website and the phone number are included in articles in the Flood Mailer and the Countywide Mailer as well as articles in other e-Newsletters and brochures.

*Another point of contact is the Watershed Watch Campaign hotline (1-866-WATHERSHED) and Watershed Watch Campaign website (**www.mywatershedwatch.org**).*

District points of contact are also publicized on SCVURPPP outreach materials and websites and the point of contact is maintained by the Program and their authorized agents.

C.7.e ►Public Outreach Events

Program staff, the Watershed Watch consultant, and Co-permittees staffed ten outreach events in FY 09-10. Events were selected based upon target audience and attendance. Materials distributed at the events included the following: Less Toxic Pest Management fact sheets, "10 Most Wanted Backyard Bugs" brochures, "Don't Plant a Pest" brochure, "You are the Solution to Water Pollution" brochures, "Clean Cars & Clean Creeks" brochure, and giveaways (e.g. flyswatters, OWOW magnets, notepads, and temporary tattoos). The flyswatters have the Watershed Watch website and hotline number and the words "The Original Earth-Friendly Pest Control" printed on them. The beanbag game for children was used at most of the events. Event staff distributed more than 5,000 outreach materials and giveaways.

Event Details	**Description** (messages, audience)	**Evaluation of Effectiveness**
Name: Pumpkins in the Park Date: October 10, 2009 Location: Guadalupe River Park and Gardens, San Jose Region: Countywide	Type of Event: Community fair Audience: Families with children Message: Stormwater pollution prevention, less-toxic pest control and, proper disposal of household hazardous waste (HHW).	General Feed Back: The event was very well attended. A lot of attendees stopped at the booth to play the bean bag game and pick up brochures. This is a good event for educating families with children. Estimated Overall Event Attendance: 12,000-14,000. Number of Brochures Distributed: 432 Number of Giveaways Distributed: over 1,000
Name: Muslim Green Fair Date: October 18, 2009 Location: 3003 Scott Blvd., Santa Clara	Type of Event: Community fair Audience: Families with children Message: Stormwater pollution prevention, less-toxic pest control and, proper disposal	General Feed Back: This is a good event for reaching members of the Muslim community. The bean bag game was used at this event. Estimated Overall Event Attendance: 1,000

Region: Countywide	of HHW	Number of Brochures Distributed: 14 Number of Giveaways Distributed: 221
Name: Haunted History Date: October 31, 2009 Location: History Park at Kelley Park, San Jose Region: Countywide	Type of Event: Halloween Event Audience: Families Message: Stormwater pollution prevention.	General Feed Back: This event is good for getting the Program's name out, but not for educating attendees. Most children stop at the booth only for candies and are not receptive to information. Estimated Overall Event Attendance: 1,500 Number of Brochures Distributed: 12 Number of Giveaways Distributed: 267
Name: Spring Garden Market Date: April 10, 2010 Location: History Park at Kelley Park, San Jose Region: Countywide	Type of Event: Plant sale Audience: Home owners/gardeners Message: Stormwater pollution prevention, less-toxic pest control	General Feed Back: Most people came to the event to buy plants and did not want to pick up information. The Program will probably not attend this event next year. Estimated Overall Event Attendance: 3,000 Number of Brochures Distributed: 181 Number of Giveaways Distributed: 61
Name: NVIDIA Corp. Earth Day Event Date: April 22, 2010 Location: 2701 San Tomas Expwy, Santa Clara Region: Countywide	Type of Event: Corporate event Audience: Information Technology Professionals Message: Stormwater pollution prevention, less-toxic pest control	General Feed Back: The event was held during lunch hour in the cafeteria and very well attended. Most employees stopped at the booth to ask questions and take brochures. Estimated Overall Event Attendance: 500 Number of Brochures Distributed: 60 Number of Giveaways Distributed: 183
Name: Spring in Guadalupe Gardens Date: April 24, 2010 Location: Guadalupe River Park and Gardens, San Jose Region: Countywide	Type of Event: Community fair, plant sale. Audience: Families with children, homeowners and gardeners Message: Stormwater pollution prevention, less-toxic pest control and, proper disposal of HHW.	General Feed Back: Good attendance at booth. Most people were looking for specific pest control information. The bean bag toss game was used. Estimated Overall Event Attendance: 4,500 Number of Brochures Distributed: 423 Number of Giveaways Distributed: 797
Name: Watershed Watch Car Wash Event Date: May 5, 2010 Location: Robertsville Classic Car Wash, 5005 Almaden Expwy, San Jose	Type of Event: Car Wash Audience: Car wash customers Message: Stormwater pollution prevention, proper car washing.	General Feed Back: Excellent turn-out, resulted in a 50% increase of business for the car wash during the 2-hour time period. Event staff spoke with customers and provided them information

Region: Countywide		on proper car washing. Most people were interested in taking the Watershed Watch discount card. Estimated Overall Event Attendance: 150 Number of Brochures Distributed: 103 Number of Watershed Watch Discount Cards Distributed: 129
Name: Watershed Watch Car Wash Event Date: May 19, 2010 Location: Delta Queen Classic Car Wash, 981 E Hamilton Ave, Campbell Region: Countywide	Type of Event: Car Wash Audience: Car wash customers Message: Stormwater pollution prevention, proper car washing.	General Feed Back: Due to a rainy day forecast, attendance was low at this event. Estimated Overall Event Attendance: 45 Number of Brochures Distributed: 34 Number of Watershed Watch Discount Cards Distributed: 49
Name: Watershed Watch Car Wash Event, Date: June 2, 2010 Location: Capitol Premier Car Wash, 735 Capitol Expwy Auto Mall, San Jose Region: Countywide	Type of Event: Car Wash Audience: Car wash customers Message: Stormwater pollution prevention, proper car washing.	General Feed Back: Good turn-out. Car wash owner indicated there was an increase in business from their normal expectations. Estimated Overall Event Attendance: 100 Number of Brochures Distributed: 101 Number of Watershed Watch Discount Cards Distributed: 107
Name: Festival in the Park Date: June 26, 2010 Location: Hellyer County Park, San Jose Region: Countywide	Type of Event: Community Health Fair Audience: Families with children. Message: Stormwater pollution prevention, less-toxic pest control and, proper disposal of HHW.	General Feed Back: Good event for reaching the Hispanic community. The bean bag game drew a lot of families with children to the booth. Estimated Overall Event Attendance: 5,000 Number of Brochures Distributed: 418 Number of Giveaways Distributed: 365
In addition, the District water conservation and pollution prevention units staffed ten outreach events in FY 09-10. Events were selected based upon target audience and attendance. Materials distributed at the events may have included the following: Less Toxic Pest Management fact sheets, "Don't Plant a Pest" brochure, "You are the Solution to Water Pollution "brochures, Adopt-A-Creek Program brochures, National Rivers Cleanup and Coastal Cleanup Days information, Water Conservation information (Water-Wise Gardening, Soil Matters, Mulch), and giveaways (e.g. notepads, temporary tattoos, aerators, hose nozzles). Items distributed by the District were not tracked during FY 09-10. Units distributing materials will be asked to track items in the future.		
Name: Ladies Night Out at Summerwinds Nursery Date: July 23, 2009 Location: Summer Winds Nursery, 4606 Almaden	Type of Event: Gardening Fair Audience: Residents. Message: Water conservation, proper	General Feed Back: Good event for reaching residents interested in gardening and proper irrigation techniques.

Expressway , San Jose Region: Countywide	irrigation techniques, Stormwater pollution prevention.	Estimated Overall Event Attendance: 200 Number of Brochures Distributed: Number of Giveaways Distributed:
Name: Fall Garden Fair at Yamagami's Nursery Date: September 19 & 20, 2009 Location: Yamagami's Nursery, 1361 South De Anza Blvd., Cupertino Region: Countywide	Type of Event: Gardening Fair Audience: Residents. Message: Water conservation, proper irrigation techniques, Stormwater pollution prevention.	General Feed Back: Good event for reaching residents interested in gardening and proper irrigation techniques. Estimated Overall Event Attendance: 250 Number of Brochures Distributed: Number of Giveaways Distributed:
Name: Rinconada Open House Date: September 23, 2009 Location: Rinconada Water Treatment Plant, 400 More Avenue, Los Gatos Region: Neighborhood Event	Type of Event: Water Treatment Plant Open House. Message: Water conservation, Stormwater pollution prevention.	General Feed Back: Good event for reaching neighborhood residents. Estimated Overall Event Attendance: 50 Number of Brochures Distributed: Number of Giveaways Distributed:
Name: Green Fair for Maxim-IC Corp Date: October 1, 2009 Location: Maxim-IC Corporation, Maxim Parking Lot, 120 San Gabriel Drive, Sunnyvale Region: Countywide	Type of Event: Corporate event Audience: Information Technology Professionals Message: Stormwater pollution prevention, water conservation	General Feed Back: The event was held during lunch hour in the parking lot and was very well attended. Most employees stopped at the booth to ask questions and take brochures. Estimated Overall Event Attendance: 100 Number of Brochures Distributed: Number of Giveaways Distributed:
Name: YSI Wildlife Festival Date: October 4, 2009 Location: Alum Rock Park, San Jose Region: Countywide	Type of Event: Festival Audience: Families with children Message: Stormwater pollution prevention, less-toxic pest control and, proper disposal of household hazardous waste (HHW).	General Feed Back: The event was very well attended. A lot of attendees stopped at the booth to talk and pick up brochures. This is a good event for educating families with children. Estimated Overall Event Attendance: 700. Number of Brochures Distributed: Number of Giveaways Distributed:
Name: NASA Ames Safety Fair Week Date: October 8, 2009 Location: NASA Ames Research Center M/S 218-1, Moffett Field Region: Countywide	Type of Event: Corporate event Audience: Aeronautical Professionals Message: Stormwater pollution prevention, water conservation	General Feed Back: The event was held during lunch hour in the cafeteria and was very well attended. Most employees stopped at the booth to ask questions and take brochures. Estimated Overall Event Attendance: 80 Number of Brochures Distributed: Number of Giveaways Distributed:

Name: Summerwinds Nursery Fall Fair Date: October 10, 2009 Location: Summer Winds Nursery, 805 Yuba Drive, Mountain View Region: Countywide	Type of Event: Gardening Fair Audience: Residents. Message: Water conservation, proper irrigation techniques, Stormwater pollution prevention.	General Feed Back: Good event for reaching residents interested in gardening and proper irrigation techniques. Estimated Overall Event Attendance: 50 Number of Brochures Distributed: Number of Giveaways Distributed:
Name: San Jose Fall Home Show Date: October 16, 17 & 18, 2009 Location: San Jose McEnery Convention Center, 435 South Market Street, San Jose Region: Countywide	Type of Event: Home &Garden Show Audience: Families Message: Stormwater pollution prevention, water conservation	General Feed Back: Good event for distributing irrigation, planting and water conservation information. Estimated Overall Event Attendance: 4,000 Number of Brochures Distributed: Number of Giveaways Distributed:
Name: Sixteenth Annual Spring Garden Market Date: April 10, 2010 Location: History San Jose- Kelley Park, 1650 Senter Road, San Jose Region: Countywide	Type of Event: Plant sale Audience: Home owners/gardeners Message: Stormwater pollution prevention, water conservation materials	General Feed Back: Most people came to the event to buy plants. Estimated Overall Event Attendance: 3,000 Number of Brochures Distributed: Number of Giveaways Distributed:
Name: Verisign Earth Day Fair Date: April 14, 2010 Location: Verisign, 685 E. Middlefield Road, Mountain View Region: Countywide	Type of Event: Corporate event Audience: Information Technology Professionals Message: Stormwater pollution prevention, water conservation	General Feed Back: The event was held during lunch hour in the cafeteria and was very well attended. Most employees stopped at the booth to ask questions and take brochures. Estimated Overall Event Attendance: 100 Number of Brochures Distributed: Number of Giveaways Distributed:

C.7.f. ►Watershed Stewardship Collaborative Efforts

During FY 09-10, the Program continued to participate in the Santa Clara Basin watershed Management Initiative.

During FY 09-10, the Program actively supported the Santa Clara Basin Watershed Initiative (SCBWMI), including the Core Group, the Land Use Subgroup, and the Trash Subgroup (now the Santa Clara Valley Zero Litter Initiative); the Bay Area Macroinvertebrate Bioassessment Information Network (BAMBI); and the Stevens & Permanente Creeks Watershed Council. Information on these efforts is included within the C.7 Public Information and Outreach section of the Program's FY 09-10 Annual Report.

District staff participated in the Trash Summit, Zero Litter Initiative and the Product Action Committee.

C.7.g. ►Citizen Involvement Events

The Program provided funding for the following citizen involvement events:

1) National River Clean up Day – The Program supports the involvement of Santa Clara County citizens by providing advertising support for the National River Clean-up Day.
2) Citizen involvement events at the Don Edwards San Francisco Bay Wildlife Refuge (Refuge) – A number of citizen involvement and stewardship programs are conducted as part of the Program funded Watershed Watchers Program at the Refuge. Participants usually work in the Refuge gardens planting native plants, pulling non-native plants, and mulching. More details are included in the Watershed Watchers Report in the Program Annual Report Appendix 7-5.

Event Details	Description	Evaluation of effectiveness
Name: Summer of Service Programs Date: 7/16/09, 7/30/09, 8/13/09 Location: Don Edwards Wildlife Refuge, Alviso Focus: Countywide	Partnership program between Santa Clara Valley youth groups and the Watershed Watchers program. Youth spend a day at the Refuge and they work in the gardens in the morning and explore the Refuge in the afternoon.	Number of attendees on 7/16/09: 2 elementary school students and 6 middle school students. Number of attendees on 7/30/09: 10 middle school students. Number of attendees on 8/13/09: 8 middle school students.
Name: Gardening at the Refuge Date: 11/21/09 Location: Don Edwards Wildlife Refuge, Alviso Focus: Countywide	Participants usually work in the Refuge gardens planting native plants, pulling non-native plants, and mulching.	Number of attendees: 4 elementary school students, 2 high school students, and 9 adults.
Name: Community Service Days Date: 1/16/10, 3/20/10, 4/17/10, 5/17/10 Location: Don Edwards Wildlife Refuge, Alviso Focus: Countywide	This is an open day for the general public. Participants work in the gardens planning native plants, puling non-native plants, and mulching.	Number of attendees on 1/16/10:1 elementary school student, 1 high school student, and 6 adults. Number of attendees on 3/20/10: 1 elementary school student and 6 adults. Number of attendees on 4/17/10: 4 elementary school students and 4 adults. Number of attendees on 5/17/10: 13 elementary school students and 7 adults.
Name: National River Cleanup Day Date: 5/15/10 Location: Various locations throughout the	In FY 09-10, the Creek Connection Action Group sponsored two creek clean-up events: Coastal Clean-up Day on September 19, 2009 and National Rivers Clean-up Day on May 15,	A total of 1,068 volunteers participated in cleaning 34 sites and removed approximately 29,098 pounds of trash and 6,394 pounds of recyclables from creeks.

County Focus: Countywide	2010. The Program provided funding for the National Rivers Clean-up Day advertising.	
In addition, the District provides support for the following citizen involvement events: 1) National River Cleanup Day – The District chairs the Creek Connections Action Group, providing meeting support and supplies, coordinating the Site Coordinator Training and supply pickup meeting and manning the phones on the day of the event. 2) Coastal Cleanup Day – The District chairs the Creek Connections Action Group, providing meeting support and supplies, coordinating the Site Coordinator Training and supply pickup meeting, manning the phones on the day of the event and reporting back to the California Coastal Commission. 3) Adopt-A-Creek Program – The District administers the Adopt-A-Creek Program, providing cleanup supplies and pickup of collected trash.		
Name: Coastal Cleanup Day Date: 9/19/09 Location: 35 locations throughout Santa Clara County Focus: Countywide	Creek Connection Action Group sponsored Coastal Clean-up Day on September 19, 2009. The District chairs CCAG, providing meeting support and supplies for the cleanup.	A total of 1,486 volunteers participated in cleaning 35 sites and removed approximately 23,173 pounds of trash and 7,499 pounds of recyclables from 56.7 miles of creeks.
Name: National River Cleanup Day Date: 5/15/10 Location: 34 locations throughout Santa Clara County Focus: Countywide	Creek Connection Action Group sponsored National River Clean-up Day on May 15, 2010. The District chairs CCAG, providing meeting support and supplies for the cleanup.	A total of 1,068 volunteers participated in cleaning 34 sites and removed approximately 29,098 pounds of trash and 6,394 pounds of recyclables from 66.4 miles of creeks.
Special Note for FY 2010-11	Coastal Cleanup Day, September 25, 2010, has grown by 23% to 43 sites throughout Santa Clara County.	
Name: Adopt-A-Creek Program Date: Ongoing throughout the year Location: various locations throughout Santa Clara County Focus: Countywide	The Adopt-A-Creek program was established in 1994 to encourage residents of Santa Clara County to take an active role in helping to preserve the health and beauty of our local creeks. Partners are asked to conduct a minimum of two cleanup events per year. The District supplies gloves and trash bags and picks up the collected trash.	There are currently 106 Adopt-A-Creek partners that conducted 58 cleanup events in FY 09-10. Details are included on Table 7-1 in Appendix 7.
The following separate reports developed by SCVURPPP and other organizations also include information about citizen involvement events conducted during FY 09-10:	• Watershed Watchers: Keeping Our Waterways Clean: FY 09-10 Fourth Quarter Report (includes end-of-year Summary from Alviso Education Center) • Going Native Garden Tour 2010- Summary	

	Report These reports are included within the C.7 Public Information and Outreach section of Program's FY 09-10 Annual Report."	

C.7.h. ►School-Age Children Outreach

Outreach to school-age children is implemented through ZunZun assemblies at local elementary schools and the "Watershed Watchers" program at the Environmental Education Center at the Don Edwards San Francisco Bay Wildlife Refuge (Refuge) in Alviso. The Program sponsors up to 50 ZunZun assemblies at elementary schools in Santa Clara Valley and funds an Interpretive Specialist position at the Refuge for conducting activities and programs about watershed and urban runoff pollution prevention. The Fourth Quarter "Watershed Watchers" Report including the End-of-Year summary is included in the Program Annual Report Appendix 7-5. The ZunZun Final Report is included in the Program Annual Report Appendix 7-7.

Program Details	Focus & Short Description	Number of Students/Teachers reached	Evaluation of Effectiveness
Name : ZunZun Musical Assembly Grade or level: elementary	Interactive, musical school assemblies educating K-6 children about watersheds and pollution prevention.	14,161 students	ZunZun assemblies were evaluated using postage-paid evaluation cards that were distributed to all teachers present at the performances. The Program received 130 completed evaluation cards from teachers. Overall, the feedback is positive and indicates an increase in the students' knowledge about watersheds and pollution prevention. A few highlights of the evaluations are: • Twenty-two teachers indicated that after the performance, 50% of their students knew what a watershed is; 51 teachers indicated that 75% of their students knew what a watershed is and 28 teachers indicated that 100% of their students knew what a watershed is. • Eight teachers indicated that after the performance, 50% of their students could name a way to prevent pollution in the watershed; 38 teachers indicated that 75% of their students could name a way

			to prevent pollution in the watershed; and 78 teachers indicated that 100% of their students could name a way to prevent pollution in the watershed. The Final Teacher Evaluation Report is included in the Program Annual Report Appendix 7-7.
Name: Watershed Watchers Program at Don Edwards Wildlife Refuge in Alviso Grade or level: elementary, middle, high school	The Refuge offers a number of interpretive programs to educate children and youth about preventing urban runoff pollution. These include: Bike the Levees; Discover Native Species; Habitat Exploration; Living Wetlands; Marshes, Mud and Plankton; Quackers and Honkers; and Water Water Everywhere.	80 pre-kindergarteners, 1,359 elementary school students, 33 middle school students, and 199 high school students	Visitor Surveys are used to determine visitor demographics, effectiveness of publicity, and the effectiveness or the Watershed Watchers Program. In addition, an "Urban Runoff Bead Drop" display is used to record actions (e.g., pick up litter, spread the word, take car to car wash) that children promise to do the help keep storm drains clean. Results of both these evaluation mechanisms are summarized in the Watershed Watchers Fourth Quarter Report included in the Program Annual Report Appendix 7-5.
The District has a very active School Outreach Program that reaches student from PreK to college. District staff conduct in-classroom presentations and tours at three outdoor classroom facilities. A table of students reached is included in Table 7.2			
Name: Santa Clara Valley Water District School Outreach Program	The District offers classroom presentations that are correlated to State Standards for grades PreK through College. Topics covered include: water conservation, water quality, pollution prevention, water sources, watersheds, stewardship and flood safety.	Number of educators reached: 627 Number of classes reached: 627 Number of students reached: 11,492 PreK 475 Kindergarten 1,412 First 2,070 Second 2,052 Third 1,785 Fourth 489 Fifth 2,035	Teacher surveys are used to determine effectiveness of the program and provide input for changes.

Section 8 - Provision C.8 Water Quality Monitoring

C.8 ►Water Quality Monitoring
State below if information is reported in a separate regional report. Municipalities also describe below any Water Quality Monitoring activities in which they participate directly, e.g. participation in RMP workgroups, fieldwork within their jurisdictions, etc.
Summary During FY 09-10, the District contributed to the SCVURPPP Monitoring and Assessment Program which conducts water quality monitoring in Santa Clara Valley creeks and rivers. In coordination with the BASMAA Regional Monitoring Coalition (RMC). In addition, we contribute financially to the Regional Monitoring Program for Water Quality in the San Francisco Estuary (RMP) and actively participate in RMP committees and work groups. For additional information on monitoring activities conducted by SCVURPPP, BASMAA RMC and the RMP, see the C.8 Water Quality Monitoring section of the Program's FY 09-10 Annual Report.

Section 9 – Provision C.9 Pesticides Toxicity Controls

C.9.a ►Adopt an Integrated Pest Management (IPM) Policy or Ordinance

(For FY 09-10 Annual Report only) Attach a copy of your individual IPM ordinance or policy.	X	**Attached**		**Not attached,** explain below

If **Not attached**, explain:
Our QEMS Document "Control and Oversight of Pesticide Use" (Q751D02 Rev A) serves as our reduced risk pest management policy.

C.9.b ►Implement IPM Policy or Ordinance

Report implementation of IPM BMPs by showing trends in quantities and types of pesticides used, and suggest reasons for increases in use of pesticides that threaten water quality, specifically organophosphorous pesticides, pyrethroids, carbaryl, and fipronil. A separate report can be attached as evidence of your implementation.

Summary:
The District does not use any of these products.

C.9.c ►Train Municipal Employees

Enter the number of employees that applied or used pesticides (including herbicides) within the scope of their duties this reporting year.	21
Enter the number of these employees who received training on your IPM policy and IPM standard operating procedures within the last 3 years.	21
Enter the percentage of municipal employees who apply pesticides who have received training in the IPM policy and IPM standard operating procedures within the last three years.	100%

C.9.d ►Require Contractors to Implement IPM

Did your municipality contract with any pesticide service provider in the reporting year?	X	Yes		No

If yes, attach one of the following:

X	Contract specifications that require adherence to your IPM policy and standard operating procedures, OR
	Copy(ies) of the contractors' IPM certification(s) or equivalent, OR
	Equivalent documentation.

If not attached, explain:

N/A

C.9.e ►Track and Participate in Relevant Regulatory Processes

Summarize participation efforts, information submitted, and how regulatory actions were affected **OR** reference a regional report that summarizes regional participation efforts, information submitted, and how regulatory actions were affected.

Summary:

During FY 09-10, we participated in regulatory processes related to pesticides through contributions to SCVURPPP, BASMAA and CASQA. For additional information, see the Regional Pollutants of Concern Report submitted by BASMAA on behalf of all MRP Permittees. This Report is included within the Program's FY 09-10 Annual Report.

C.9.f ►Interface with County Agricultural Commissioners

Provide a summary of improper pesticide usage reported to County Agricultural Commissioners and follow-up actions to correct violations, if any. A separate report can be attached as your summary.

Summary:

N/A

C.9.h.ii ►Public Outreach: Point of Purchase

Provide a summary of public outreach at point of purchase, and any measurable awareness and behavior changes resulting from outreach (here or in a separate report); **OR** reference a report of a regional effort for public outreach in which your agency participates.

Summary:

The following separate reports developed by SCVURPPP and BASMAA summarize point of purchase outreach efforts conducted during FY 09-10:

- FY 09-10 Store Employee Training Report (SCVURPPP)
- FY 09-10 Store Employee Training Evaluation Summary (SCVURPPP)
- FY 09-10 Store Employee Training Status Table (SCVURPPP)
- FY 09-10 List of Stores in the IPM Store Partnership Program (SCVURPPP)
- FY 09-10 BASMAA "Our Water, Our World" (OWOW) Report (BASMAA)

These reports are included within the C.9 Pesticides Toxicity Control section of Program's FY 09-10 Annual Report.

C.9.h.vi ►Public Outreach: Pest Control Operators

Provide a summary of public outreach to pest control operators and landscapers and reduced pesticide use (here or in a separate report); **OR** reference a report of a regional effort for outreach to pest control operators and landscapers in which your agency participates.

Summary:

The following separate reports developed by SCVURPPP summarizes Public Outreach: Pest Control Operators efforts conducted during FY 09-10:

- FY 09-10 Green Gardener Training Report

This report is included within the C.9 Pesticides Toxicity Control section of Program's FY 09-10 Annual Report.

Santa Clara Valley Water District	CONTROL OF OVERSIGHT OF PESTICIDE USE	DOCUMENT NO.: Q751D02 REVISION: A EFFECTIVE DATE: January 27, 2010 PROCESS OWNER: Mark Wander Page 1 of 8

Downloaded or printed copies are for reference only. Verify this is the current version prior to use. See the District website for released version.

1. PURPOSE AND SCOPE

This document defines District policies and procedures for pesticide use and reporting. These policies and procedures apply to all District-owned or operated facilities and staff, contractors, permittees, and suppliers.

Pesticide Policy

It is the District policy to minimize the environmental risk and exposure resulting from its pesticide use by employing alternatives the maximum extent practicable.

Operational Controls

This procedure specifies the process to evaluate pest control methods, and alternatives to pesticides, where pest control is needed. A proposed use is evaluated based on:

- Regulatory restrictions
- Effectiveness
- Public health aspects
- Long and short term environmental impacts
- Financial cost
- Consistency with District's policies

Pesticides are one tool for pest control on District properties and facilities. The most common pesticide use is herbicide application to manage vegetation. Insecticides and rodenticides are used infrequently and in small quantities. Standard pesticide use practices are:

1. Only pesticides included on the W751D01 **Pesticides Products Approved for District Use** (Product List) may be used, in the appropriate categories for product application on District facilities. Product lists will be updated, as needed, by the Pesticide Review Team to ensure compliance to these practices.

2. A **State-certified Qualified Applicator** (see definition) with the appropriate current certification categories will provide immediate oversight for application of all pesticides.

3. **To minimize the use of pesticides in the work place,** only natural derivatives can be purchased or used by District staff.

Limitations on Use

1. Only herbicides registered for aquatic use may be used within the channel banks of a creek, ditch, canal, or Percolation Pond systems, or within twenty feet of any water present.

2. No copper based products will be used for algae control on Percolation Ponds.

3. Wherever physically possible, non-toxic UV blocking dyes shall be used to control algae and pond weed

4. Herbicides are used only when alternatives to pesticide use such as mowing, hand removal, disking, or grazing are not effective to achieve vegetation management objectives.

5. Insecticides are used after other methods, such as prevention or natural nontoxic control methods, have proven ineffective. Where use is needed, the product with the lowest toxicity is used in accordance with the label.

6. Rodenticides are used only after trapping to control burrowing rodents proves ineffective or impractical.

7. Products listed on the State Department of Pesticide Regulation (DPR) "A" list of known groundwater contaminants will not be used. Detailed information on DPR regulations can be found on their web site at www.cdpr.ca.gov

8. Category I and II pesticides will not be used for routine projects without review and approval by the Pesticide Review Team

9. All pesticide products not on the approved list that are to be used on District facilities (by employees or contractors) will be reviewed and approved by the pesticide review team prior to their use in accordance with Section 6.3 of this document

10. No Organophosphate or Carbamate products may be used.

All pesticide use performed by any employee, contractor, or permittee under the direction of the District on properties and facilities either owned by the District, or where an exclusive easement has been granted and the underlying property owner is effectively excluded from the use of the property, shall comply with the following:

- Applicable sections of California Food and Agricultural Code for non-crop use
- Regulations enforced by the State Department of Pesticide Regulation
- State Department of Fish and Game Code relative to stream alterations
- Applicable Environmental Protection Agency regulations
- Applicable National Pollutant Discharge Elimination System (NPDES) permit requirements
- Countywide Urban Runoff permit requirements
- The pesticide label

Guidelines set forth within this pesticide program which go beyond the laws and regulations established by the regulatory agencies mentioned above

2. REFERENCE DOCUMENTS

- W751M01 – Best Management Practicies (BMP) Handbook
- WQ75101 – Field Operations Work Order Process
- WW75100 – Vegetation Control Work Instructions
- W751D01 – Pesticides Products Approved for District Use
- F751D01 – Pest Control Recommendation & Spray Operators Report
- Pesticide Safety Training Record

3. DEFINITIONS

Pesticide – A product formulated specifically for the purpose of controlling pests. The generic term "pesticide" refers to a broad spectrum of products, including herbicides, insecticides, rodenticides, fungicides, etc. The following pesticides are used by the District:

Algaecide – Algae control in percolation ponds.

Herbicides – Control of weeds and undesirable vegetation to minimize fire hazards, maintenance of flood conveyance of waterways, and to compliance with State and Federal requirements.

Insecticides – control of insects in and around District buildings, or in the case of a serious pest outbreak, on landscape or re-vegetation facilities.

Rodenticides – control of burrowing rodents, including ground squirrels, moles and gophers, in flood control levees.

Toxicity – The Environmental Protection Agency and the State Department of Pesticide Regulation define pesticides in the following categories:

- **Category I** – highest pesticide toxicity, or specific health hazards such as a severe eye hazard. Category Toxicity Signal Word(s) - I High ***Danger/Poison; Skull & Crossbones***
- **Category II** – pesticides 1-10 times less toxic than Category I. Moderate toxicity, signal word- ***Warning***
- **Category III and IV** – lowest toxicity, 1-10 times less toxic than Category II, and Category IV is considered practically non-toxic. Signal word – **Caution**

Pesticide Review Team – A Pesticide Review Team will be formed that consists of the Vegetation Unit Manager, the District's Pest Control Adviser, the Watersheds Health and Safety Program Administrator, the Environmental Management Unit Manager, the Utility Program Support Unit Manager, and the Facilities Management Unit Manager or their designees.

Product Lists – W751D01 Pesticides Products Approved for District Use approved by Pesticide Review Team

Pest Control Advisor – As defined by the State of California, is an individual who meets the minimum educational requirements to qualify for examination and who passes the State examination in the categories relative to the area of pesticide work for which they will be making written

recommendations for pesticide use. Categories relative to this policy include: Insects, Mites and Other Invertebrates, Vertebrate Pests, and Weeds. The licensed Pest Control Advisor is the authority making written recommendations for pesticide use.

Qualified Applicator – As defined by the State of California is an individual who has passed the State examination for application of various pesticide products and is certified to do so. A Qualified Applicator must be certified in the appropriate certification categories to perform the pesticide application. Categories relative to this policy include: Landscape Maintenance, Right of Way, Aquatic, and Residential, Industrial and Institutional.

Pest Control Operator – The Pest Control Operator possesses a valid Qualified Applicator License from the State of California, supervises the pesticide application (restricted use and/or general use) made by a licensed pest control business, and is responsible for the safe and legal operation of that business relative to pesticide use.

4. ROLES AND RESPONSIBILITIES

Pesticide Review Team: The purpose of this team is to oversee compliance to the pesticide program. The team will also be responsible for:

- The Team will meet annually and as-needed
- As needed evaluation of the District's pesticide use
- Revise, as needed, the Pesticides Products Approved for District Use list.
- Responding to issues relative to the use of pesticides
- Recommending changes to the pesticide program including training and procedures
- Reviewing, evaluating, and approving the use of new products including those to used by contractors and permittees
- Researching alternatives to pesticides using staff and consultant services

District's Pest Control Adviser: Is responsible for coordinating, reviewing, tracking, documenting and reporting pest control practices at the District. Additionally, the Coordinator provides updates of the policy changes and modifications to all District staff, and to work with the Watersheds Environmental Health and Safety Program Administrator on the aspects of employee training. This role is filled by the Vegetation Program Specialist.

5. REQUIREMENTS

5.1 ISO Requirements

- **ISO 9001:2000 Quality Management System Requirements**
  - 7.5.1 Control of Production and Service Provision
- **ISO 14001:2004 Environmental Management System**
  - 4.4.6 Operational Control

5.2 Other Requirements

- Board Governance Policies and Executive Limitations
- Best Management Practices of the various environmental documents covering the District's work on streams, water utility facilities, buildings and grounds

6. MONITORING AND MEASUREMENT

The Pesticide Review Team will review and report on this process annually.

7. PROCEDURE

OVERVIEW	DETAILS	QUALITY RECORDS
(1) Review of Pesticide Use (Pesticide Review Team)	• The Team will meet annually and as-needed to: o Evaluate the District's pesticide use. o Revise, as needed, the W751D01 Pesticide Products Approved for District Use list. o Responding to issues relative to the use of pesticides. o Recommending changes to the pesticide program including training and procedures. o Reviewing, evaluating, and approving the use of new products including those to used by contractors and permittees. o Researching alternatives to pesticides using staff and consultant services.	W751D01 Pesticide Products Approved for District Use
(2) Pesticide Use Certification and Training Requirements (District Staff, Contractors, Permittees)	• Any pesticide use by District Staff, contractors, or permittees in the course of District business must be done with immediate oversight by a State-certified Qualified Applicator with the appropriate endorsement. o Includes any pesticides purchased from over the counter (i.e Raid, foggers, bait stakes, etc) • All District staff who use or oversee the use of pesticides in the course of their duties shall also receive annual training by the District. The annual training shall provide: o Review of laws and regulations o Updates on new products o Review of proper procedures for use and handling	

OVERVIEW	DETAILS	QUALITY RECORDS
(2) Pesticide Use Certification and Training Requirements *Continued*	o Review of impacts of pesticides on the environment o Label/MSDS training • All contractors and permittees shall provide proof of appropriate training and licensing of staff performing pesticide applications. • All pesticides must be approved by the Pesticide Review Team and added to W751D01 Pesticides Products Approved for District Use list.	
(3) Pesticide Requests Posting and Notification (Qualified Applicator**)**	• Pesticide requests are initiated, entered, and tracked in Maximo in accordance with WQ75101 Field Operations Work Order Process and WW75100 Vegetation Control Work Instructions • The Pest Control Adviser will evaluate the request. o Any questions or issues will be resolved by the Pesticide Review Team o Biological Survey and clearance must be obtained before proceeding with request o BMPs must be followed • The Pest Control Advisor develops a written Pest Control Recommendation for use in accordance with requirements of the California Food and Agricultural Code and forwards the request and recommendation to a Qualified Applicator. o Any questions or issues will be resolved by the Pesticide Review Team • The Qualified Applicator reviews the request and recommendation and completes the work. • Posting of areas where pesticides are used shall be performed in compliance with this policy as follows: o Posting shall be performed in compliance with the label requirements of the product being applied. o In addition, the District shall provide posting for **any** products applied in areas used by the public for recreational purposes, or those areas readily accessible to the public, regardless of whether the label requires such notification. In doing this, the District ensures that exposure risk is minimized further by adopting practices that go beyond the product label requirements.	F751D01 Pest Control Recommendation & Spray Operators Report

OVERVIEW	DETAILS	QUALITY RECORDS
(3) Pesticide Requests Posting and Notification *Continued*	o These sign postings shall notify staff and the general public of the date and time of application, the product's active ingredients, and common name, and the time of allowable re-entry into the treated area. A District staff contact phone number shall be posted on the sign. o Signs shall not be removed until after the end of the specified re-entry interval. o Right-to-know literature on the product shall be made available upon request to anyone in the Area. o Notification of pesticide activities shall be made as required by law. • The District shall maintain records of neighbors with specific needs relative to notification prior to treatment of an adjacent area to ensure such needs are met. These records are maintained in Maximo with the pest control recommendation. • A Spray Operators Report shall be completed for each pesticide application performed by District staff. This report shall be submitted with each daily work order in accordance with WQ75101 Field Operations Work Order Process and include: • Pesticide common name and active ingredient • Method of application • Dilution rate, if applicable • Total amount of product applied, **plus** the total amount of diluted material • For outdoor applications, weather conditions, including temperature and wind speed • Specific pests controlled with each application • District facilities pesticide use should be listed on a log maintained by the Facilities unit.	Pest Control Recommendation & Spray Operators Report
(4) Reporting (Vegetation Unit Manager)	• A report will be run monthly from Maximo listing the total amount of products used for pest control including the common name. • This listing will be submitted to the Agricultural commissioner no later than the 10th of each month.	

8. QUALITY RECORDS

QUALITY RECORD	LOCATION KEPT	FILING ORDER	DURATION KEPT	DISPOSITION	COMMENTS
Pesticide Products Approved for District Use List	District Document Control	Document ID	Until list is revised	Dispose	
Maximo Database Record	Network Server	Work Order Number	Permanent

9. CHANGE HISTORY

Date	Revision	Comments
02/10/10	A	Initial release into QEMS, effective 1/27/10. Supersedes Administrative Policy and Procedure Ad-8.2 Pesticide Use. This document was reviewed by: Bill Smith; Geoffrey Weigand; David Matthews; Marc Klemencic; Liang Lee; Mike Martin; Debra Caldon; Mike Cresap; Melanie Richardson (Maryann O'Brien); Ann Draper; Chris Elias; Jim Fiedler; Michael Hamer; Frank Maitski; and Neddal Ali-Adeeb.

10. ADDENDA

None

Section 10 - Provision C.10 Trash Load Reduction

C.10.a.i ►Short-Term Trash Loading Reduction Plan

Provide description of actions/tasks initiated/conducted/completed in developing a Short-Term Trash Loading Reduction Plan (due February 1, 2012).

Description:

Not required for this Annual Report.

C.10.a.ii ►Baseline Trash Load and Trash Load Reduction Tracking Method

Provide description of actions/tasks initiated/conducted/completed to gather trash loading data and develop a Baseline Trash Load and Trash Load Reduction Tracking Method (due February 1, 2012).

Description:

A summary of Program accomplishments for this sub-provision are included within the C.10 Trash Load Reduction section of Program's FY 09-10 Annual Report.

C.10.a.iii ►Minimum Full Trash Capture

Provide a description of actions/tasks initiated/conducted/completed in implementing Minimum Full Trash Capture Devices (due July 1, 2014) within individual jurisdictions. Include information on Full Trash Capture Devices installed under Bay-area Wide Trash Capture Demonstration Project administered by San Francisco Estuary Partnership.

Description:

The District is not required in the MRP to implement full trash capture devices. A summary of Program accomplishments for this sub-provision are included within the C.10 Trash Load Reduction section of Program's FY 09-10 Annual Report. In addition, the Program recently finalized a technical report detailing the results of its Pilot Trash Structural Treatment Control Study implemented in 2007. This technical report is also available within the C.10 Trash Load Reduction section of Program's FY 09-10 Annual Report.

C.10.b.iii ►Trash Hot Spot Assessment

Provide volume of material removed from each Trash Hot Spot cleanup, and the dominant types of trash (e.g., glass, plastics, paper) removed and their sources to the extent possible. Provide required photo documentation.

Fill out the following table or attach a summary of the following information.

Trash Hot Spot	Cleanup Date	Volume of Material Removed	Dominant Type of Trash	Trash Sources (where possible)
SWD01 – Stevens Creek at La Avenida St				
SWD02 – Stevens Creek at State Route 237				
SWD03 – San Thomas Aquino Creek @ Mission				
SWD04 – Stevens Creek 150 feet downstream of Highway 85				
SWD05 – San Thomas Aquino Creek at Walsh Ave				
SWD06 – Coyote Creek confluence with lower Silver Creek	6/16/10	~3.4 cy	#1 Convenience/Fast Food Items, #2 Bottles, #3 Fabric and cloth, #4 Aluminum Cans.	
SWD07 – Lower Silver Creek at N. King Rd and McKee Rd	7/8/10	~0.6 cy	#1 Paper and cardboard (44%), #2 Convenience/Fast Food Items (28%), #3 Other Plastic Products (8%), #4 Styrofoam (4%).	Trash Accumulation, Litter,
SWD08 – Lower Silver Creek, Alum Rock Ave to S. Sunset Ave				
SWD09 – Lower Silver Creek between East San Antonio St and Interstate 680				

SWD10 – Los Gatos Creek, adjacent to San Fernando VTA Station				
SWD11 – Los Gatos Creek between interstate 280 and Lincoln Ave				
SWD12 – Guadalupe River, 200 feet upstream of Montague Expressway				

C.10.d ►Summary of Trash Load Reduction Actions

Provide summary of new trash load reduction actions or increased levels of implementation of existing actions that were implemented after adoption of the MRP (control measures and best management practices) including the types of actions and levels of implementation, and the total trash loads and dominant types of trash removed from each type of action.

Suggested trash load reduction actions to track and report may include:

- Anti-litter Campaigns
- Anti-litter/Dumping Enforcement Activities
- Curbside Recycling Programs
- Education and Outreach Efforts
- Free Trash Pickup/Dropoff Days
- County HHW Program Activities
- Improved Trash Bin Management
- Inspection/Maintenance of Storm Drain Outfalls
- Litter Pickup and Control
- Removal of Homeless Encampments
- Solid Waste Recycling Efforts
- Source Controls/Bans/Prohibitions
- Storm Drain Operation and Maintenance
- Storm Drain Signage/Marking
- Street Sweeping Activities
- Trash Removal from Receptacles
- Volunteer Creek Cleanups

Not all trash load reduction actions were tracked by "loads removed" this fiscal year. Once the Trash Load Reduction Tracking Method is developed (see Provision C.10.a.ii), trash loads removed will be documented for each load reduction action (as feasible). See the Program's FY 09-10 Annual Report for schedule.

Type of Trash Load Reduction Action	Date of First Implementation	Level of Implementation (specify if level was increased after MRP adoption)	Total Trash Load Removed by Action	Dominant Types of Trash Removed by Action
Anti-litter Campaigns		District has had significant resource commitment in this area. No change due to MRP.	NA	NA
Anti-litter/Dumping Enforcement Activities		District has had significant resource commitment in this area. No change due to MRP.	Tracked as Good Neighbor Program. See Below.	Not tracked
Education and Outreach Efforts		District has had significant resource commitment in this area. No change due to MRP.	NA	NA
County HHW Program Activities		District has had significant resource commitment in this area. No change due to MRP.	District provides the County with financial support	NA
Inspection/Maintenance of Storm Drain Outfalls		District Water Treatment Plant Outfalls are inspected and cleaned annually.	Volume not tracked.	Leaves.
Removal of Homeless Encampments		District has had significant resource commitment in this area. No change due to MRP.	Total Removed - 88.56 CY (Coyote Watershed- 57.59 CY, from Guadalupe Watershed - 30.97 CY)	Not tracked in 2009-2010.

Type of Trash Load Reduction Action	Date of First Implementation	Level of Implementation (specify if level was increased after MRP adoption)	Total Trash Load Removed by Action	Dominant Types of Trash Removed by Action
Trash Removal Program		District has had significant resource commitment in this area. No change due to MRP.	Good Neighbor Program Total Removed = 1329 CY (Coyote Watershed = 465 CY, Guadalupe Watershed = 54 CY, Lower Pen Watershed = 341 CY, Uvas/Llagas Watershed = 333 CY West Valley Watershed = 136 CY)	#1 Plastic bags, #2 Plastic Bottles, #3 Styrofoam. (Others include Fast food Items, paper/plastic litter, cigarettes, glass, car parts, and other items illegally dumped. The SCVWD removes and recycles batteries, propane tanks, electronics, and metal shopping carts from creeks.
Solid Waste Recycling Efforts		District has had significant resource commitment in this area. No change due to MRP.	Not tracked	Not tracked
Storm Drain Operation and Maintenance		District does not manage storm drains	NA	NA
Storm Drain Signage/Marking		No change due to MRP. Inlets are marked "Flows to Bay"	NA	NA
Street Sweeping Activities		County conducts street sweeping at District Facilities	Not tracked	Not tracked

Type of Trash Load Reduction Action	Date of First Implementation	Level of Implementation (specify if level was increased after MRP adoption)	Total Trash Load Removed by Action	Dominant Types of Trash Removed by Action
Volunteer Creek Cleanups National River Cleanup Day Coastal Cleanup Day Adopt A Creek	 1995 1995 1994	District has had significant resource commitment in this area. No change due to MRP.	**National River Cleanup Day** (Total Removed = 35,492 lbs.) **Coastal Cleanup Day** (Total Removed = 30,672 lbs) **Adopt A Creek** Total Removed = 156 CY (Coyote Watershed -25 CY, Guadalupe Watershed -52 CY, Lower Pen. Watershed -21 CY, West Valley Watershed -58 CY)	Plastic bags, recyclables, paper, Styrofoam and cigarette butts.

Section 11 - Provision C.11 Mercury Controls

C.11.a.i ►Mercury Recycling Efforts
Below is a list of efforts to promote, facilitate, and/or participate in collection and recycling of mercury containing devices and equipment at the consumer level (e.g., thermometers, thermostats, switches, bulbs).
Items such as, thermometers, switches, thermostats have been removed over the years and have been disposed of as a hazardous waste. District staff continued to purchase alternative products, where available, and to dispose of mercury-containing materials in accordance with applicable regulations.

C.11.a.ii ►Mercury Collection
An estimate of the mass of mercury collected through these efforts will be reported in the FY10-11 Annual Report.
Amount collected: The methodologies for estimating the mass of mercury collected through mercury collection and recycling efforts are currently in development and are due to the Water Board by September 15, 2010. Therefore, estimates could not be made for FY 09-10. Estimates of the mass of mercury collected through recycling efforts during FY 10-11 will be provided with the FY 10-11 Annual Report (see FY 10-11 BASMAA Regional POC Report).

C.11.b ►Monitor Methylmercury
C.11.c ►Pilot Projects to Investigate and Abate Mercury Sources in Drainages
C.11.d ►Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices
C.11.e ►Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit
C.11.f ►Diversion of Dry Weather and First Flush Flows to POTWs
C.11.g ►Monitor Stormwater Mercury Pollutant Loads and Loads Reduced
C.11.h ►Fate and Transport Study of Mercury In Urban Runoff
C.11.i ►Development of a Risk Reduction Program Implemented Throughout the Region
C.11.j ►Develop Allocation Sharing Scheme with Caltrans

SCVWD participates directly in regional activities and descriptions are provided below.

Summary

A summary of Program accomplishments for these sub-provisions are included within the C.11 Mercury Controls section of Program's FY 09-10 Annual Report and/or the BASMAA Regional POC Report.

C.11.b ►Monitor Methylmercury

The District has undertaken a monitoring program to evaluate water quality in Lake Almaden, Almaden Reservoir, Calero Reservoir, Guadalupe Reservoir and Stevens Creek Reservoir. Depth profile measurements of temperature, pH, conductivity, and dissolved oxygen were conducted monthly. In addition, water samples were collected from the epilimnion and hypolimnion for analyses of total and dissolved mercury, total and dissolved methyl mercury, ammonia, nitrate/nitrite, sulfate and phosphorus at Lake Almaden, Almaden Reservoir, Calero Reservoir, and Guadalupe Reservoir. Samples were also collected from the epilimnion for analyses for chlorophyll a. The purpose of this monitoring is to establish existing water quality conditions and seasonal variability to evaluate the implementation of management changes to improve water quality.

Lake Almaden Circulation

Lake Almaden is a former gravel quarry that lies at the confluence of Guadalupe Creek and Los Alamitos Creek that drain Guadalupe and Almaden Reservoirs, respectively. Below this confluence is the Guadalupe River. This lake provides recreational amenities to the community, including swimming, boating, and fishing. The Guadalupe River Watershed Mercury Study identified the lake as a significant source of methyl mercury that bioaccumulates in fish within the lake and in fish downstream. In 2009-10 two additional circulators were installed in the lake, providing full treatment. Monitoring of the performance was continued in 2009-10.

Reservoir Circulation

The Guadalupe River Watershed Mercury Study identified reservoirs as a significant source of methyl mercury that bioaccumulates in fish within the reservoirs and in downstream creeks. The study also demonstrated a correlation between the seasonal development of anoxia in the hypolimnion and increased methyl mercury concentrations. Building on the success of the Lake Almaden pilot project, the District installed three solar-powered circulators in Almaden Reservoir in April 2007, and three solar-powered circulators were installed in Guadalupe Reservoir in July 2007. Monitoring of the performance was continued in 2009-10.

C.11.c ►Pilot Projects to Investigate and Abate Mercury Sources in Drainages

Jacques Gulch is a tributary to Almaden Reservoir that drains approximately one-third of the reservoir watershed. A portion of this drainage includes a small tributary that drains a portion of the former New Almaden Mining District, which is now Almaden-Quicksilver County Park. The project will remove approximately 10,000 to 15,000 cubic yards of mercury-laden sediments from an approximately 650-foot section of Jacques Gulch and an approximately 1,400-foot section of an unnamed tributary to Jacques Gulch. The project will also replace undersized culverts that convey streamflow from Jacques Gulch to Almaden Reservoir. This project is scheduled for completion in 2011. The District accepted a bid for construction, which began in June 2009 and in-channel work was completed in October 2009. Assuming that 12,000 cubic yards of soil has been removed at 20mg/kg – 100mg/kg, the amount of mercury removed would be in the range of 327 kg Hg – 1632 kg Hg.

Soil Removed	Mercury Removed
20mg/kg	327 kg Hg
50mg/kg	816 kg Hg
100mg/kg	1632 kg Hg

C.11.d ►Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices

In 2009, routine sediment removal maintenance resulted in the disposal of 17,409 cubic yards of material, with 3,847 of this total from the creeks in the upper portion of the Guadalupe River Watershed. The total mercury removed from the system was 102 kg, with 101 kg from the Guadalupe River Watershed. This number is in addition to the amount of Hg and sediment removed during the Jacques Gulch project to date.

Section 12 - Provision C.12 PCBs Controls

C.12.a.i,iii ►Municipal Inspectors Training

Below is a description of SCVWD's involvement in training municipal industrial inspectors to identify, in the course of their existing inspections, PCBs or PCB-containing equipment.

Description:

In FY 09-10, inspector training materials were developed through in-kind contributions of SCVURPPP and to BASMAA. Training materials can be found in the BASMAA Regional POC Report.

C.12.a.ii,iii ►Ongoing Training

Description of ongoing training development and inspections for PCB identification, including documentation and referral to appropriate regulatory agencies (e.g. county health departments, Department of Toxic Substances Control, California Department of Public Health, and the Water Board) as necessary.

Description:

Not required for this Annual Report.

C.12.b ►Conduct Pilot Projects to Evaluate Managing PCB-Containing Materials and Wastes during Building Demolition and Renovation Activities
C.12.c ►Pilot Projects to Investigate and Abate On-land Locations with Elevated PCB Concentrations
C.12.d ►Conduct Pilot Projects to Evaluate and Enhance Municipal Sediment Removal and Management Practices
C.12.e ►Conduct Pilot Projects to Evaluate On-Site Stormwater Treatment via Retrofit
C.12.f ►Diversion of Dry Weather and First Flush Flows to POTWs
C.12.g ►Monitor Stormwater PCB Pollutant Loads and Loads Reduced
C.12.h ►Fate and Transport Study of PCBs In Urban Runoff
C.12.i ►Development of a Risk Reduction Program Implemented Throughout the Region

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below.

Summary

A summary of Program accomplishments for these sub-provisions are included within the C.12 PCB Controls section of Program's FY 09-10 Annual Report and/or the BASMAA Regional POC Report.

Section 13 - Provision C.13 Copper Controls

C.13.a.i and iii ► Legal Authority: Architectural Copper

Do you have adequate legal authority to prohibit discharge of wastewater to storm drains generated from the installation, cleaning, treating, and washing of the surface of copper architectural features, including copper roofs to storm drains?		**Yes**	X	**No**

If **No**, explain and provide schedule for obtaining authority within 1 year:
District does not have construction permit authority.

C.13.b.i and iii ► Legal Authority: Pools, Spas, and Fountains

Do you have adequate legal authority to prohibit discharges to storm drains from pools, spas, and fountains that contain copper-based chemicals?		**Yes**	X	**No**

If **No**, explain and provide schedule for obtaining authority within 1 year:
Not required for this Annual Report. District does not have permit authority.

C.13.c ►Vehicle Brake Pads

A summary of the Program's participation with the Brake Pad Partnership (BPP) is included within the C.13 Copper Controls section of Program's FY 09-10 Annual Report and/or the BASMAA Regional POC Report.

C.13.d.iii ►Industrial Sources Copper Reduction Results

List below or attach annotated lists or tables from your Industrial and Commercial Site Controls portion of this report, that highlight copper reduction results among the facilities identified as potential users or sources of copper, facilities inspected, and BMPs addressed. For FY09-10 describe below or highlight in the C.4 Evaluation portion (if provided) of this report the steps taken to revise your program to meet new data tracking and reporting requirements for implementation levels described in C.13.d.ii.

Summary

In FY 09-10, inspector training materials were developed through in-kind contributions of SCVURPPP to BASMAA. Training materials can be found in the BASMAA Regional POC Report.

Not applicable as the Santa Clara Valley Water District (District) is not the local industrial site permitting agency.

C.13.e ►Studies to Reduce Copper Pollutant Impact Uncertainties

State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities can provide descriptions below.

Summary

A summary of the Program's efforts (i.e., participation in RMP committee and work group meetings) to develop regional studies to reduce copper pollutant impact uncertainties is included within the C.13 Copper Controls section of Program's FY 09-10 Annual Report and/or BASMAA Regional POC Report.

Section 14 - Provision C.14 PBDE, Legacy Pesticides and Selenium Controls

C.14.a ►Control Programs for PBDEs, Legacy Pesticides and Selenium Controls
Revised. Description reads "State below if information is reported in a separate regional report. Municipalities that participate directly in regional activities to can provide descriptions below."
Summary A summary of the Program's efforts (i.e., participation in RMP committee and work group meetings) to develop a Control Program for PBDEs, Legacy Pesticides and Selenium is included within the C.14 PBDE, Legacy Pesticides and Selenium section of Program's FY 09-10 Annual Report and/or BASMAA Regional POC Report. On property it owns, The District provides hazardous materials cleanup of legacy pesticides during demolition operations for flood control related activities.

Section 15 - Provision C.15 Exempted and Conditionally Exempted Discharges

C.15.b.iii.(1), C.15.b.iii.(2) ► Planned and Unplanned Discharges of Potable Water				
Is your agency a water purveyor?	X	**Yes**		**No**
If **No**, skip to C.15.b.vi.(2):				
If **Yes**, Complete the attached reporting tables or attach your own table with the same information. Describe program highlights below. Describe steps taken to revise your program to meet new monitoring, data tracking and reporting requirements.				
A summary of the Program's efforts to update the Water Utility Operations & Maintenance Discharge Pollution Prevention Plan (WUDPPP) to assist municipal water purveyors in complying with this provision of the MRP is included within the C.15 Exempted and Conditionally Exempted Discharges section of Program's FY 09-10 Annual Report. Summary: The District owns, operates, and/or maintains 3 water treatment plants, 2 pumping and metering stations, 1 pump station, 11 reservoirs, percolation facilities, water wells, a recycled water facility (South County Regional Wastewater Authority Treatment Plant), and distribution pipelines. All of these water facilities have a potential for discharging non-stormwater to surface water bodies. The District continued reporting on all water utility O&M discharges. Please see attached inventory table (Table 15.1). Typical District discharges include raw water from water quality testing devices at District plants, San Tomas Injection Well, and Vasona Meter Shop testing. The District's water utility maintenance staff performs all discharges. District staff implemented BMPs after consultation with the Stream Stewardship Unit. The District has been working with the Regional Water Quality Control Board staff to coordinate notification activities between various District units that conduct discharges.				

C.15.b.vi.(2) ► Irrigation Water, Landscape Irrigation, and Lawn or Garden Watering
Provide implementation summaries of the required BMPs to promote measures that minimize runoff and pollutant loading from excess irrigation. The categories are: 1. Promote conservation programs 2. Promote outreach for less toxic pest control and landscape management 3. Promote use of drought tolerant and native vegetation 4. Implement Illicit Discharge Enforcement Response Plan for water line breaks.
Summary: For outreach for less toxic pest control and appropriate irrigation practices, refer to the Watershed Watch Campaign in the C.7. Public Information and Outreach section and the IPM Store Partnership and Green Gardener Training Programs in the C.9. Pesticide Toxicity Control section of Program's FY 09-10 Annual Report. 1. The Water Conservation Unit provides free residential water use audits to encourage water conservation. 2. During Pollution Prevention Week in September employees are reminded to use less toxic pest control alternatives at home. District employees are not allowed to use toxic pesticides or herbicides at work unless they are certified. 3. The District provides brochures on the use of drought tolerant and native vegetation. 4. The District maintains a 24/7 emergency response hotline that can respond to major water line breaks.

C.15.b.iii.(1) ►Planned Discharges of the Potable Water System

Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Duration of Discharge (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual (mg/L)	pH (standard units)	Discharge Turbidity[1] (NTU)	Implemented BMPs & Corrective Actions

Cox Turnout	Dechlorinated	Saratoga Creek	11/3/2009	5:45	155,000	646,316		Low to mid 8s (two high readings of 9.8)		
WP #30	Dechlorinated	Rodeo Creek	11/3/2009 - 11/4/2009	9:45	530,000	1,292,633		at least mid 8s		On both days, it is likely that the background flow in the creek had a high pH (at least mid 8s) prior to any discharge. However, these readings decreased over time and was not an issue.
WP #35	Dechlorinated	Calabazas Creek	11/3/2009 - 11/4/2009	10:30	567,000	1,292,633		low to mid 8s (one high reading of 9.0)		On both days, it is likely that the background flow in the creek had a high pH (at least mid 8s) prior to any discharge.
WP #40	Dechlorinated	Calabazas Creek	11/4/2009	1:20	36,000	646,316		High 8s and low 9s (a high reading of 9.3)	Turbidity within range.	The upstream pH was in the high 8s. The change in pH was within 0.5 units on all but one reading. Two turbidity readings with an increase of more than 5 units
WP #44	Dechlorinated	Regnert Creek	11/5/2009	1:50	50,000	646,316		low to mid 9s (two high readings of 9.7)		It is likely that the background flow in the creek had a high pH (around 9s) prior to any discharge. All of the downstream pH readings were in the
WP #49	Dechlorinated	Regnert Creek	11/9/2009	4:20	117,000	646,316		mid 8s (a high reading of 8.7)		The upstream pH was in the mid 8s. The change in pH was within 0.5 units.
WP #51	Dechlorinated	Regnert Creek	11/9/2009	2:30	70,000	646,316		mid 8s (a high reading of 8.7)		The upstream pH was in the mid 8s. The change in pH was within 0.5 units.
WP #56	Dechlorinated		11/9/2009	2:50	80,000	646,316				Hydrographers did not see the water coming out of the outfall.
WP #64	Dechlorinated	Stevens Creek	11/9/2009	1:20	36,000	646,316			Turbidity within range.	The creek had some high initial turbidity readings (baseline was > 50). The turbidity decreased over time & were all within range.

WP #106	Dechlorinated	Stevens Creek	11/5/2009 - 11/6/2009	19:20	525,000	646,316		high 8s (when background flow had a high pH.		The upstream pH fluctuated between the high 7s & high 8s. The change in pH was within 0.5 units on all but one reading.
WP #113	Dechlorinated	Permanente Creek	11/4/2009 - 11/6/2009	16:10	440,000	646,316		low 7s to high 8s (two high readings of 8.8)	Turbidity within range	When there was background flow, The change in pH was within 0.2 units. On 11/4 & 11/6, debris in the creek contributed to some high initial turbidity readings. The turbidity decreased over time & were all within range.

Rinconata Force Main	Raw	Saratoga Creek	?	?	3,063,003	3,231,584 - 3,877,901				Erosion control by Visual monitoring. Turbidity and temperature monitoring. This operation to dewater the pipeline will result in a net reduction of discharge

Notes:

[1] Monitor the receiving water for turbidity if necessary and feasible. Include data in this column if available.

*Continuous flow discharge

C.15.b.iii.(1) ►Unplanned Discharges of the Potable Water System

Site/ Location	Discharge Type	Receiving Waterbody(ies)	Date of Discharge	Duration of Discharge (military time)	Estimated Volume (gallons)	Estimated Flow Rate (gallons/day)	Chlorine Residual[2] (mg/L)	pH[2] (standard units)	Discharge Turbidity[2] (NTU)	Implemented BMPs & Corrective Actions	Time of discharge discovery	Regulatory Agency Notification Time[3]	Inspector arrival time	Responding crew arrival time[3]
No Unplanned Discharges in FY09-10														

Notes:

1. This table contains all of the unplanned discharges that occurred in this FY.
2. Monitoring data is only required for 10% of the unplanned discharges. If you monitored more than 10% of your unplanned discharges report all of the data collected.
3. Notification to Water Board staff is required for unplanned discharges where the chlorine residual is >0.05 mg/L and total volume is ≥ 50,000 gallons. Notification to State Office of Emergency Services is required after becoming aware of aquatic impacts as a result of unplanned discharge or when the discharge might endanger or compromise public health and safety.
