Hand Delivered on September 15, 2005

September 15, 2005

Mr. Bruce H. Wolfe
Executive Officer
San Francisco Bay Region
Regional Water Quality Control Board
1515 Clay Street, Suite 1400
Oakland, CA 94612

Subject: Submittal of FY 2004-2005 Annual Report

Dear Mr. Wolfe:

I am pleased to submit the Annual Report for implementation of the Santa Clara Valley Urban Runoff Pollution Prevention Program's (SCVURPPP's) Urban Runoff Management Plan (URMP) during fiscal year 2004-2005. Submittal of this Annual Report fulfills Provision C.6 of NPDES Permit No. CAS029718 (Order 01-024 as amended). The report provides documentation of the SCVURPPP's and the Co-permittees' activities; evaluation of the effectiveness of these activities; and measures for continuous improvement toward achieving the SCVURPPP goals.

Sections 1 and 2 of the Annual Report describe activities conducted by the SCVURPPP on behalf of the Co-permittees, in the areas of program management, permit management and continuous improvement. Section 3 contains information on the Program's local and regional public information/participation program including the Watershed & Outreach efforts coordinated with the Santa Clara Basin Watershed Management Initiative (SCBWMI). Section 4 contains information on the Program's two pronged monitoring approach covering: environmental monitoring and assessment, and programmatic monitoring for FY-04-05. Section 5 covers the Program's watershed management measures including the work that Program and Co-permittees have conducted to both support the SCBWMI and integrate both efforts. Section 6 covers the Program's pesticide management activities to comply with Provision C.9.d.and Section 7 contains a report of the Program's Mercury Pollution Prevention Activities conducted during FY 04-05 per Provision C.9.c

Section 8 describes the Program's efforts during FY 04-05 to assist Co-permittees in addressing and controlling development and re-development as it relates to stormwater quality and flow through the development project planning, review and approval process, per Provision C.3. Section 9 contains the Co-permittees' IND and IC/ID Summary Tables for FY 04-05. Co-permittee summary tables are also included in each Co-permittee Annual Report and contain similar information to what is found within Section 9 of the Program's *FY 03-04 Annual Report.*

699 Town & Country Village • Sunnyvale, CA 94086 • tel: (408) 720-8811 • fax: (408) 720-8812
1410 Jackson Street • Oakland, CA 94612 • tel: (510) 832-2852 • fax: (510) 832-2856
1-800-794-2482

Section 10 (bound in two separate volumes) contains the Co-permittees' FY 04-05 Annual Reports, prepared in accordance with the Water Board staff document entitled *Suggested SCVURPPP Co-permittee Annual Report Format* (Draft) dated May 29, 2003. Each Co-permittee Annual Report includes a cover letter summarizing local program highlights, accomplishments and continuous improvement items; and a certification statement.

During FY 04-05, a significant amount of Program and Co-permittee staff time was expended working with Water Board staff on two Tentative Orders (one of which was adopted), responding to Water Board staff comments and preparing submittals required by the Program's NPDES permit. In addition, Program staff focused on completion of the SCVURPPP *Hydromodification Management Plan Report*, including holding public meetings, incorporating public and Water Board staff comments, completing the final report for Management Committee approval on April 21, 2005, culminating in adoption by the Water Board on July 20, 2005.

Please contact me if you have any comments or questions. We look forward to working with you to successfully address new challenges during FY 05-06.

Very truly yours,

Adam W. Olivieri, Dr. P.H., P.E.
Program Manager

CREDITS

This Annual Report was a collaborative effort of the fifteen agencies participating in the Santa Clara Valley Urban Runoff Pollution Prevention Program (Program). EOA, Inc., as the Program management consultant, coordinated and compiled the Annual Reports submitted by the fifteen Co-permittees, wrote Sections 1 through 9, and was responsible for the overall preparation of the Program's Annual Report. The Program expresses its appreciation to all those who contributed to this fifteenth Annual Report.

SECTION 1

INTRODUCTION

1. INTRODUCTION

BACKGROUND

Program Description

The Santa Clara Valley Urban Runoff Pollution Prevention Program ("Program") is an association of thirteen cities and towns in Santa Clara Valley, the County of Santa Clara, and the Santa Clara Valley Water District ("Co-permittees") that share a common permit to discharge stormwater to South San Francisco Bay. The Program incorporates regulatory, monitoring and outreach measures aimed at reducing pollution in urban runoff to the "maximum extent practicable" to improve the water quality of South San Francisco Bay and the streams of Santa Clara Valley. The Program is organized, coordinated, and implemented in accordance with a Memorandum of Agreement (MOA) signed by the Co-permittees in 1990, 1999 and 2005. The MOA covers the responsibilities of each Co-permittee and a cost-sharing formula for joint expenditures.

In June 1990, the San Francisco Bay Regional Water Quality Control Board (Water Board or RWQCB) issued the Program its first NPDES permit.[1] The permit was reissued in 1995[2] and 2001.[3] On October 17, 2001, the Water Board amended the permit[4] to include expanded requirements for controlling pollutants from new and redevelopment activities (Provision C.3.). On July 20, 2005, the Water Board approved a second amendment which revised Provisions C.3.c. and C.3.f.[5]

The Program's Management Committee, consisting of one designated representative from each Co-permittee, is the official decision-making body for the Program. At the inception of the Program, the Santa Clara Valley Water District took the lead responsibility for management of the Program. In September 1997, the Management Committee retained EOA, Inc. to provide Program management services. On July 1, 2005, the City of Sunnyvale became the Program's new fiscal agent.

The Program's Urban Runoff Management Plan

The Program and Co-permittees submitted a *Storm Water Management Plan* (SWMP) as part of the application for its 1995 NPDES permit renewal. The 1995 Permit required the Program to develop performance standards[6] for various stormwater control measures and incorporate them in a revised management plan by September 1, 1997. The revised plan, called the *Urban Runoff Management Plan* (URMP) because of its focus on stormwater pollution prevention efforts in urban areas, was completed and submitted to the Water Board on September 1, 1997 and subsequently approved by Water Board staff (7/10/98 and 12/14/98 letters). In addition, the URMP is incorporated into the urban runoff permit. In 2000 and 2005, updated URMPs were submitted to the Water Board as part of permit renewal applications.

---

[1] NPDES Permit No. CAS029718, Order No. 90-094.
[2] NPDES Permit No. CAS029718, Order No. 95-180 (as amended 7/21/99).
[3] NPDES Permit No. CAS029718, Order No. 01-024 (2/21/01).
[4] NPDES Permit No. CAS029718, Order No. 01-119, Amendment Revising Provision C.3. (10/17/01).
[5] NPDES Permit No. CAS029718, Order No. R2-2005-0035, Amendment Revising Order 01-119 (7/20/05).
[6] Performance standards are defined as "the level of implementation necessary to demonstrate control of pollutants in stormwater to the maximum extent practicable."

The URMP consists of an area-wide plan and individual Co-permittee plans describing what the fifteen Co-permittees will do, collectively and individually, to reduce urban runoff pollution. The URMP describes the goals and objectives of the Program and its various elements, including monitoring and watershed management measures.

The URMP also contains model performance standards that may be modified as appropriate to fit local conditions and are implemented by the Co-permittees. These include:

- Illicit Connection and Illegal Dumping (IC/ID) Elimination Activities
- Industrial/Commercial Discharger (IND) Control Program
- Public Streets, Roads, and Highways Operation and Maintenance
- Storm Drain System Operation and Maintenance
- Water Utility Operation and Maintenance
- Planning Procedures for New Development and Redevelopment
- Construction Inspection
- Pest Management
- Rural Public Works Maintenance and Support

In addition, the URMP presents a framework for the relationship between Program area-wide and Co-permittee specific Public Information/Participation (PI/P) activities that the Program and Co-permittees use to develop and conduct PI/P tasks.

In early FY 04-05, Program staff updated the URMP to include the new and revised model performance standards and other Management Committee-approved multi-year plans (e.g., Guidelines for Reduction and Management of Mercury-Containing Products, revised Multi-Year Receiving Waters Monitoring Plan, Pesticide Management Work Plan, sediment assessment Work Plan, CAP/NAP approach, Trash Work Plan and goals statement, Watershed Education and Outreach strategy, etc.). The revised Program URMP was part of the NPDES permit reapplication package submitted to the Water Board on February 24, 2005.

The Program implements watershed management through its participation in the Santa Clara Basin Watershed Management Initiative (SCBWMI). The SCBWMI was established (by the EPA, State Water Resources Control Board and Water Board) to manage water resources within the Santa Clara Basin watersheds. Stakeholders that include local, state and federal government agencies; business, agriculture and industry associations; and environmental and civic groups guide the SCBWMI. The Program has been an active participant in the SCBWMI Core Group and its subgroups. The Program is working through the SCBWMI to: 1) identify and assess beneficial uses in the watershed within the urban area; and 2) identify and prioritize reasonable urban runoff control strategies.

Co-permittee Urban Runoff Management Plans

Each Co-permittee has developed an URMP tailored to its local characteristics. The Co-permittee URMPs contain strategies for local urban runoff controls, covering each of the Program elements (Industrial/Commercial Discharger Control, New Development and Construction, etc.) that are applicable to local conditions. The Co-permittee URMPs include:

- Performance standards (using the Program URMP's model performance standards as a template);

- Work Plans to implement performance standards;
- Description of the Co-permittee's legal authority;
- Best management practices (BMPs); and
- Standard operating procedures (SOPs) that detail how control measures will be carried out from day-to-day.

The Co-permittees also have responsibilities to conduct local PI/P programs, properly maintain corporation yards, conduct staff training and participate in Program and SCBWMI activities as appropriate.

The general relationship between the NPDES Permit, the Program's URMP and the Co-permittees' URMPs is shown on Figure 1-1.

In accordance with Permit Provision C.2.b., all Co-permittees updated their URMPs and submitted the revisions to the Water Board on September 1, 2004. The updated Co-permittee URMPs, which were part of the NPDES permit reapplication package submitted to the Water Board on February 24, 2005, included a summary table indicating what changes were made and/or what sections were added to the URMP's since the last version was updated in October 2000.

Program Work Plan

By March 1 of each year, the Program submits to the Water Board a draft Work Plan for implementation of the Program's URMP for the coming fiscal year, in accordance with NPDES Permit Provision C.6.b. The Work Plan includes clearly defined tasks, responsibilities and schedules to be implemented by the Program and Co-permittees. It also includes development of new, or modification of existing performance standards (Provision C.2.b), provides the Work Plan for implementing Provision C.3, describes planned monitoring activities (Provision C.7), describes pollutant-specific requirements (Provision C.9) and defines the Program's role relative to Watershed Management efforts (Provision C.10).

The Work Plan builds on the baseline efforts conducted by the Program and Co-permittees through a "continuous improvement" process, in which the Program seeks new opportunities to control stormwater pollution. The continuous improvement process contained in the URMP is illustrated on Figure 1-2. The Work Plan includes a discussion of continuous improvement tasks that were identified, in part, during individual Co-permittee performance reviews, effectiveness evaluations in previous annual reports, and cooperative efforts between the Program and groups that include the Bay Area Stormwater Management Agencies Association (BASMAA), SCBWMI, Regional Monitoring Program (RMP) and Clean Estuary Partnership (CEP).

On March 1, 2005, the Program's *FY 05-06 Work Plan* was submitted to the Water Board.

Program Annual Report

In accordance with NPDES Permit Provision C.6.a., the Program must submit an Annual Report by September 15 of each year. In addition, the Annual Report serves as an important internal Program tool in the cycle of planning, implementation, evaluation and continuous improvement. The Annual Report is the mechanism for documenting the status of planned activities, evaluating the effectiveness of those activities and identifying potential improvements. An

additional evaluation mechanism is holding local program performance review meetings with each of the Co-permittees. These meetings serve as external evaluations, while the Annual Report is a self-evaluation by the Program. The results of the Annual Report and the performance reviews are used to assist the Program and Co-permittees in revising their Work Plans for the following year, as part of the Program's continuous improvement process.

During FY 04-05, Water Board staff did not conduct performance review meetings. In late April 2005, Water Board staff and its consultant Tetra Tech, Inc. provided an independent evaluation of certain elements of the Cities of Milpitas, Palo Alto, Santa Clara and Santa Clara County stormwater programs. The following elements were included within the evaluation: ICID/IND inspections and enforcement, municipal maintenance, new development/redevelopment and construction inspection. The evaluation provided helpful input to the Co-permittees on implementation of their URMPs.

On September 15, 2004, the Program's *FY 03-04 Annual Report* was submitted to the Water Board. In April 2005, the Program received separate Water Board comment letters on the Monitoring and New Development/Redevelopment sections. A response to Water Board staff comments on the *FY 03-04 Annual Report- Monitoring Section* (Water Board letter dated March 4, 2005; Program received this letter on April 7, 2005) was submitted to the Water Board on May 20, 2005. This submittal is provided within Appendix A-6. A response to Water Board staff comments on the *FY 03-04 Annual Report- New and Redevelopment Section* (Water Board later dated April 8, 2005) was submitted to the Water Board on June 3, 2005. This submittal is also provided within Appendix A-6.

The goals of this *FY 04-05 Annual Report* are to: 1) meet specific permit requirements for reporting; 2) provide an efficient mechanism for reporting and self-evaluation without duplicating information in the work plan or urban runoff management plans (URMPs); and 3) identify areas for continuous improvement.

ORGANIZATION OF REPORT

The *FY 04-05 Annual Report* consists of two volumes and one appendix placed in three-ring binders. Volume I will contain Program's activities and Volume II will consist of Co-permittees' activities. Each section contains relevant tables at the end of the section.

Following Section 1, Volume I of the *FY 04-05 Annual Report* describes the implementation of *FY 04-05 Work Plan* activities in the following sections:

FY 04-05 Annual Report	FY 04-05 Work Plan
Section 2 – Program Management*	Program FY 04-05 Budget Performance Standard Revisions Program Continuous Improvement Tasks
Section 3 – Public Information/Participation (PI/P) Activities	FY 04-05 PI/P Work Plan
Section 4 – Monitoring	Multi-Year Year Receiving Waters Monitoring Plan FY 04-05 Annual Monitoring Plan

Section 5 – Watershed Management Measures	FY 04-05 Monitoring Plan (activities undertaken with/for the SCBWMI)
Section 6 – Pesticide Management	FY 04-05 Pesticide Management Work Plan
Section 7 – Mercury Pollution Prevention Activities	FY 04-05 Mercury Pollution Prevention Work Plan
Section 8 – New and Redevelopment Control Measures	FY 04-05 C.3. Work Plan

* Note that the "Work Plan" for many of the Program management activities is the scope of work in EOA's contract for Program management services.

Section 9 contains the Co-permittees' IND and IC/ID Summary Tables for FY 04-05. Each Co-permittee summary table provides information on the required categories as described in the Industrial/Commercial Discharger Control Program and Illicit Connection & Illegal Dumping Elimination Activities Performance Standards. Co-permittee summary tables are also included in each Co-permittee Annual Report and will contain similar information to what is found within Section 9 of the Program's *FY 04-05 Annual Report*. Each Co-permittee includes a breakdown of the levels of enforcement action taken for each IND inspection.

Section 10 contains the Co-permittees' FY 04-05 Annual Reports. Each Co-permittee report includes a cover letter summarizing local program highlights, accomplishments and continuous improvement items; and a certification statement. Co-permittees have prepared and submitted the following information (with appropriate attachments) in accordance with the Water Board's document entitled *Suggested SCVURPPP Co-permittee Annual Report Format* (Draft) dated May 29, 2003:

- IC/ID Elimination Activities
- Industrial/Commercial Discharger Control Program
- Public Agency Activities
    - Public Streets, Roads and Highways O&M (including Corporation Yards)
    - Rural Public Works O&M
    - Storm Drain O&M
    - Water Utility O&M
    - Other Public Agency Activities (Golf Courses, Parks, Ponds, etc.)
- New Development Planning Procedures
- Construction Inspection
- Public Information and Participation
- Pesticide Management Activities
- Mercury Pollution Prevention Activities
- Copper Action Plan/Nickel Action Plan
- Trash Inventory and Management
- Water Quality Monitoring
- Staff Training Summary Table

Other elements that do not fall under the above categories (e.g., PCB Control Program (C.9.e.), Control Program for Sediment (C.9.f.) and Watershed Management (C.10.)) are provided by each respective Co-permittee conducting the activity.

Figure 1-1. Program Implementation

Figure 1-2
Continuous Improvement

SECTION 2

PROGRAM MANAGEMENT

2. PROGRAM MANAGEMENT

PROGRAM BUDGET

FY 04-05 Budget

The FY 04-05 Program Budget is summarized in Table 2-1. A budget of $3,287,400 represented a negligible decrease of funding over the FY 03-04 budget ($3,287,494). The Program budget has been able to remain flat over the past three years while more work has been accomplished and additional fees and collaboration contributions (i.e., annual permit fee, BASMAA, RMP, CEP) have been paid. It is important to note that the Program funds collected from the Co-permittees represent only what is spent on Program-wide activities. It does not include what the Co-permittees are spending to implement controls within their jurisdictions.

FY 05-06 Budget

During FY 04-05, the FY 05-06 Budget was prepared by Program staff, reviewed and approved by the Budget Ad Hoc Task Group and the Management Committee, and submitted as part of the *FY 05-06 Draft Work Plan*. The total budget for FY 05-06 is $3,287,400. Even though the Program budget did not increase over the previous year's budget, the Management Committee recognized that permit fees and collaborative resource demands are a significant percentage of the overall budget. As a result, these demands as well as the increased need for in-kind resources to participate in various regulatory programs will continue to reduce the overall operating budget.

GENERAL PROGRAM MANAGEMENT ACTIVITIES

Management Committee Meetings

The Management Committee continues to meet monthly, on the third Thursday of the month from 9:00 a.m. to 12 noon, to discuss and make decisions regarding Program business. Agendas and supporting information were mailed and posted on the Program's website (www.scvurppp.org) approximately one week in advance of each meeting and handouts were presented at each meeting. The meeting agendas were posted at Sunnyvale City Hall at least 72 hours prior to each meeting and meetings were held in the City of Sunnyvale's West Conference Room. A list of current Management Committee representatives is provided as Appendix A-1 and is on the Program's website.

Ad Hoc Task Group and Work Group Meetings

In order to effectively manage the area-wide activities required by the NPDES permit, Ad Hoc Task Groups are formed by the Management Committee to address specific Program elements or major work items. These are groups of Co-permittee representatives and Program staff with expertise in the issue at hand. Once the Ad Hoc Task Group's assignment is completed to the satisfaction of the Management Committee, the group is disbanded. The Management Committee reviews the need for Ad Hoc Task Groups on a monthly basis. Ad Hoc Task Groups may form smaller work groups with subsets of their members to focus on specific issues in more

detail. The work groups bring information back to the overseeing Ad Hoc Task Group for decision making.
A Program management organizational chart showing current Ad Hoc Task Groups and work groups is provided on the Program's website. Ad Hoc Task Groups and work groups generally meet on an as-needed basis, although some establish a regular meeting schedule.

Table 2-2 presents a list of the FY 04-05 Ad Hoc Task Groups, their members and their accomplishments. These groups worked with Program staff to provide products or recommendations to the Management Committee. There were approximately 24 Ad Hoc Task Group (AHTG) and work group meetings held during the fiscal year. In addition, task group and work group products were often distributed for review and comment via electronic mail ("virtual meetings"), thus minimizing the number of actual meetings.

The Public Information/Participation (PI/P) Ad Hoc Task Group formed work groups to define the final work plans for and oversee the implementation of the FY 04-05 PI/P projects. The accomplishments of these work groups are described in Section 3, Table 3-1. Work groups were also formed under the C.3 Provision Oversight (C3PO) AHTG to address specific Permit Provision C.3 requirements, as described in Section 8.

Program Management Activities

Program management activities provided by Program staff during the period July 1, 2004 through June 30, 2005 are summarized in Table 2-3. These tasks, which are discussed within the Annual Report, are separate from the permit management and technical support provided by Program staff. General types of activities completed during FY 04-05 include the following:

- Responded to calls on the Program's and Watershed Watch toll-free numbers and distributed materials to the public;
- Facilitated and supported Management Committee and Ad Hoc Task Group meetings;
- Developed the FY 05-06 Program Budget and tracked expenditures;
- Communicated with and assisted the Program's legal counsel;
- Prepared and submitted the Program's *FY 03-04 Annual Report, FY 05-06 Draft Work Plan* and other permit-required submittals;
- Provided guidance to Co-permittees on technical and Program-related issues;
- Conducted and/or assisted with three workshops relating to the assessment of trash problem areas; inspection of industrial and commercial facilities; and maintenance and inspection of stormwater treatment BMPs.
- Oversaw development and implementation of the Watershed Education & Outreach Campaign;
- Represented the Program at external organization meetings; and
- Continued to oversee and/or assist with implementation of the Pesticide User Outreach and Mercury Pollution Prevention Outreach Plans, and participated in the Regional Media Relations and Regional Advertising Campaign projects (through BASMAA).

During FY 04-05, a significant amount of Program and Co-permittee staff time was expended working with Water Board staff on two Tentative Orders (one of which was adopted), responding to Water Board staff comments, and preparing thirteen submittals required by the Program's

NPDES permit. These activities are discussed in Section 2, Permit Management Activities, and Section 8, New and Redevelopment Activities. Additional details on completed Program management activities are provided in the memorandum entitled *Review of FY 04-05 Program Management Services* within Appendix A-2.

External Organization Meetings

Program staff represented the Program at 182 external organization meetings during FY 04-05. These included meetings of the following organizations (Program staff positions indicated in parentheses):

- Bay Area Stormwater Management Agencies Association (BASMAA) – Executive Board (Vice Chair), Regional General Permit, PI/P Work Groups, New Development Committee and Monitoring Committee;
- Regional Monitoring Program Technical Review Committee, Steering Committee, Contaminant Fate Work Group and Sources, Pathways and Loadings Work Group;
- Clean Estuary Partnership Technical Committee, Mercury Risk Reduction Work Group, Diazinon Work Group and PCBs Work Group;
- Urban Pesticide Committee (UPC);
- BASMAA/Water Board PCB TMDL Stakeholders Work Group;
- BASMAA/BACWA Media Relations Committee;
- California Stormwater Quality Association (CASQA) and Executive Program Committee;
- Bay Area Macro-invertebrate Bioassessment Information Network.

In addition, Program staff participated in 37 meetings relating to the Santa Clara Basin Watershed Management Initiative (SCBWMI). These included meetings of the following organizations:

- Core Group
- Watershed Assessment and Monitoring Subgroup (including Guadalupe Mercury TMDL Work Group and Guadalupe Mercury TMDL Stakeholder Group);
- Land Use Subgroup;
- Bay Monitoring and Modeling Subgroup (including Copper/Nickel TMDL and Copper Action Plan Work Groups).
- Work Group I- Indicator Development
- Work Group H

Program staff prepared meeting summaries for the Management Committee highlighting items of interest and required action items. Summaries are routinely included in Management Committee mail-out and handout packets and posted on the Program's website. Tables listing all internal and external meetings attended during FY 04-05 are attached to the memorandum entitled *Review of FY 04-05 Program Management Services* within Appendix A-2.

Evaluation of Effectiveness

During FY 04-05, Program staff continued to implement policies and procedures related to consideration of funding requests, subcontracting, budget tracking and other improvements in Program management identified in past years. A significant amount of staff time during FY 04-05 was devoted to preparation of 13 permit-required submittals. Despite these resource needs,

Program staff completed the general Program management tasks on schedule. The Program budget development and mid-year and year-end reviews were completed within a reasonable timeframe.

The "Work Plan" for many of the Program management activities is the scope of work in EOA's contract for Program management services. Each year, Program staff prepares a self-audit report on Program management services, including significant accomplishments, continuous improvement for existing program elements and feedback regarding Program status, as required by Section 200.5 of the Program Bylaws. A draft of this year's report, *Review of FY04-05 Program Management Services,* was submitted to the Management Committee on March 25, 2005 and approved by the Management Committee on April 21, 2005. The final version of the *Review of FY04-05 Program Management Services* is provided in Appendix A-2.

Continuous improvement items related to Program management are normally identified from three sources: the Program's performance review with Water Board staff; Water Board staff comments on the prior year's Annual Report; and/or Management Committee comments on the draft *Review of Program Management Services* memorandum submitted each year. There were no continuous improvement items identified through these sources for FY 04-05. An update and plan of action for continuous improvement items remaining from previous years are presented within Table 2-4 of this Annual Report. Comments and recommendations for continuous improvement of Program Management during FY 05-06 and beyond are provided within the *FY 04-05 Review of Program Management Services* memorandum.

To satisfy Bylaws Section 200.4, Program staff prepared an *Annual Budget Review Compilation Report* ("ABC Report") that was submitted to the Management Committee as an addendum to the report on Program management services. The addendum contained the FY 03-04 budget, periodic budget status reports, mid-year budget reconciliation, final budget closeout balance sheet and other supporting documentation. This report was submitted to the Budget Ad Hoc Task Group on December 3, 2004 and subsequently distributed to the Management Committee on December 9, 2004 for review and approval.

PERMIT MANAGEMENT ACTIVITIES

This section describes tasks related to permit management (i.e., compliance with permit requirements and Co-permittee guidance) completed by Program staff during FY 04-05.

Reporting Requirements

In addition to the Program's Annual Report and Annual Work Plan[1], the Program completed 13 permit-required items during FY 04-05:

1. *Hydromodification Management Plan (Public Review Draft)*, permit provision C.3.f., submitted July 9, 2004.
2. *Stevens Creek Limiting Factor Analysis Technical Report (Draft)*, permit provision C.9.f.iii, submitted July 13, 2004.
3. *Sediment Management Practice Assessment Report (Draft)*, permit provision C.9.f.iii, submitted July 13, 2004.
4. *2004 Urban Runoff Management Plan*, submitted September 1, 2004, per permit

[1] As of August 8, 2005, no comments have been received from the Water Board on the Program's *FY 05-06 Work Plan*.

provision C.2.b

5. Copper and Nickel Action Plan FY 03-04 Accomplishments and FY 04-05 Work Plan, submitted September 15, 2004, per POTW order 00-109 and permit provisions C.9.a and b.
6. *SCVURPPP FY03-04 Watershed Monitoring and Assessment Summary Report,* submitted September 15, 2004, per permit provision C.10.b.
7. *Hydromodification Management Plan Report (Revised Public Review Draft),* permit provision C.3.f, submitted November 10, 2004.
8. *Stevens Creek Limiting Factor Analysis Technical Report (Final)*, per permit provision C.9.f.iii, submitted December 8, 2004.
9. *Sediment Management Practice Assessment Report (Final)*, permit provision C.9.f.iii, submitted December 8, 2004.
10. *Report of Waste Discharge* (NPDES Permit Application for Re-issuance of SCVURPPP NPDES Permit) submitted February 24, 2005, per permit provision C.14.
11. *Copper and Nickel Action Plan FY 05-06 Work Plan and Reporting Tables (final),* submitted February 25, 2005, per POTW order 00-109 and permit provisions C.9.a and b.
12. *FY 05-06 Annual Receiving Waters Monitoring Plan and Watershed Management Measures Work Plan* submitted February 25, 2005, per permit provisions C.7.c and C.10.
13. *Hydromodification Management Plan Report (Final), April 21, 2005,* permit provision C.3.f, submitted May 4, 2005.

Additional submittals to the Water Board included:

- Response to RWQCB comments dated March 26, 2004 on the Program's FY 02-03 Annual Report (submitted to RWQCB on September 15, 2004 as part of the Program's *FY 03-04 Annual Report, Appendix A-9*);
- Response to RWQCB comments dated March 25, 2004 referencing the FY 02-03 monitoring program evaluation administered by the United States Environmental Protection Agency conducted by Tetra Tech, Inc. in December 2003 (submitted to RWQCB on September 15, 2004 as part of the Program's *FY 03-04 Annual Report, Appendix A-9*);
- FY 03-04 Co-permittee Street Sweeping Activity Summary to RWQCB on September 15, 2004 (as part of the Program's FY 03-04 Annual Report);
- *Executive Summary- FY 2003-2004 Annual Repor*t on November 17, 2004;
- Response to RWQCB comments dated August 25, 2004 on the Program's *Hydromodification Management Plan (HMP) Report (Public Review Draft)* dated June 2004 (submitted to RWQCB on December 15, 2004);
- Response to RWQCB letter dated December 23, 2004 on an Administrative Draft Tentative Order Revising Permit Provisions C.3.c.and C.3.g (submitted to RWQCB on January 11, 2005);
- Response to RWQCB comments dated January 6, 2005 on the Program's *Hydromodification Management Plan (HMP) Report (Revised Public Review Draft)* dated November 2004 (submitted to RWQCB on February 4, 2005);

- Final revised versions of the Industrial/Commercial Discharger Control Program and Illicit Connection/Illegal Dumping Elimination Activities Performance Standards (submitted to RWQCB on February 25, 2005 as part of the Program's *FY 05-06 Work Plan*);
- Technical memorandum entitled *Watershed Characterization and Sampling Design Rationale- Stevens and Permanente Creek Watersheds* (submitted to RWQCB on February 25, 2005 as part of the Program's *FY 05-06 Work Plan*);
- Memorandum entitled *Data Analysis of Development Patterns for Group 2 Projects* (includes histograms and data spreadsheets) to RWQCB on March 30, 2005;
- Response to RWQCB comments dated March 4, 2005 (comments were received on April 7, 2005) on the Program's *FY 03-04 Annual Report –Monitoring Section* (submitted to RWQCB on May 20, 2005);
- Letter re: Request for Regional Board Approval of Alternative "Group 2 Project" Definition (submitted to RWQCB on March 29, 2005);
- Response to RWQCB staff electronic mail dated April 6, 2005 on the Program's letter entitled *Data Analysis of Development Patterns for Group 2 Projects* (submitted to RWQCB on April 11, 2005); and
- Response to RWQCB comments dated April 8, 2005 on the Program's *FY 03-04 Annual Report-New/Redevelopment Section* (submitted to RWQCB on June 3, 2005).

A summary of the Program's permit-required submittals, Water Board staff comments, Program responses, and Water Board staff approvals during the past several years (beginning with the most recent submittals) is included within Appendix A-3.

Guidance to Co-permittees

The Program sponsored three workshop sessions to educate Co-permittee staff and others about important issues and program requirements, as described below. The workshop flyers, agendas, attendance lists, and evaluation summaries for listed workshops (except the Trash Assessment Training Workshop) are presented in Appendices A-4 and A-5.

<u>Trash Assessment Training Workshop</u>

On July 16, 2004, Program staff sponsored a workshop on how to use existing trash assessment tools [i.e. RWQCB Rapid Trash Assessment protocol Version 7.0 and the Keep America Beautiful (KAB) Litter Index]. The training was intended to assist Co-permittees in determining the severity of trash identified in "creek" or "non-creek" trash problem areas. The workshop consisted of a morning and afternoon session. The morning session provided training on the use of RWQCB Rapid Trash Assessment protocol Version 7.0. It was conducted at both Coyote and Lower Silver Creeks within Watson Park in San Jose. Fifteen people attended the field session. The afternoon session provided training on the use of the KAB Litter Index. It was conducted within a classroom setting and consisted of reviewing the KAB Litter Index instruction manual and training video. Fifteen people attended the classroom session. The majority of workshop participants conducted trash assessments within their jurisdictions during FY 04-05.

<u>Conducting Effective Stormwater Inspections of Industrial and Commercial Facilities</u>

On April 5, 2005, the Program conducted a workshop on conducting effective stormwater inspections of industrial and commercial facilities. The workshop attracted 81 participants, most of who gave the workshop high marks (see evaluation summary within Appendix A-4).

Topic presented at the workshop included: what to look for during stormwater inspections of commercial and industrial facilities; performance standards and reporting requirements of the Program's NPDES permit (including model inspection forms; examples of common stormwater violations; ways to encourage good business practices; guidance on source control and proper disposal practices; and BMP education materials for common industrial and commercial facilities.

Conducting Stormwater Treatment Best Management Practices (BMP) Maintenance and Inspections

On June 9, 2005, the Program conducted a one-day workshop to assist Co-permittees with implementation of Provision C.3.e., Operation and Maintenance of Treatment BMPs. The workshop, which attracted 116 participants, covered requirements for treatment BMP O&M verification programs; examples of cities' approaches to conducting inspection programs; lessons learned about BMP maintenance from the Caltrans BMP Retrofit Pilot Program and other agencies; mosquito management; and porous pavement design and maintenance. The workshop also featured exhibits for eight stormwater control measure vendors. The agenda and evaluation summary for the workshop are presented in Appendix A-5.

Other Workshops

Program staff and Co-permittees also participated in the following workshops conducted by other agencies:

- Alameda Countywide Clean Water Program Workshop on How to Meet the New Development/Redevelopment NPDES Permit Requirements, November 16, 2004 -- Jill Bicknell gave a presentation on "Understanding Potential Obstacles to Better Site Design for Water Quality Protection".
- San Francisco Bay Area Chapter of the Maintenance Superintendents Association Workshop, November 18, 2004 -- John Fusco gave a presentation on "Stormwater Best Management Practices for Municipal Operations".
- Bay Area Macroinvertebrate Bioassessment Information (BAMBI) Workshop, January 31, 2005 -- Paul Randall gave a presentation on "Summary of SCVURPPP Bioassessment Efforts".
- Municipal Public Works Officials of Santa Clara County, Monthly Meeting, February 10, 2005 -- Jill Bicknell and Adam Olivieri gave a presentation on "Urban Runoff Permit Issues".
- City/County Managers Association, Monthly Meeting, May 11, 2005 -- Dave Chesterman (SCVWD) and Adam Olivieri gave a presentation on "The Santa Clara Valley Urban Runoff Pollution Program: Cost Allocation Review".
- American Public Works Association Workshop, May 12, 2005 -- Jill Bicknell gave a presentation on "Integrating Water Quality Protection and Development Project Design".

- San Mateo Countywide Stormwater Pollution Prevention Program 2005 New Development Workshop, May 24, 2005 – Jill Bicknell gave a presentation on "Introduction to HMP Requirements – Santa Clara Valley's Experience".
- Santa Clara County Regional IPM Workshop, June 14, 2005 – The Program was a co-sponsor (see Section 3-Regional IPM Workshop). Program staff and several Co-permittee staff attended.

DEVELOPMENT OF NEW OR REVISED MODEL PERFORMANCE STANDARDS

The Program developed model performance standards (PS) in 1996. Model PS were accepted by the Water Board in June 1997. Co-permittees adopted the model PS that applied to their specific conditions. The PS were incorporated into the September 1, 1997 Urban Runoff Management Plan (URMP) and into the Co-permittees' local URMPs. The Program and local URMPs were updated by October 2000 to include revisions to performance standards for Industrial/Commercial Discharger Control, Illicit Connection/Illegal Dumping Elimination and Storm Drain Operation and Maintenance.

One goal of the Program's continuous improvement process is to review an existing PS, or create a new PS, each year. During FY 04-05, the Industrial/Commercial Discharger Control Program and Illicit Connection/Illegal Dumping Elimination Activities Performance Standards were revised.

<u>Enhanced Annual Reporting Requirements- Industrial/Commercial Discharger Control</u>
<u>Enhanced Annual Reporting Requirements- Illicit Connection/Illegal Dumping Elimination</u>

On September 7, 2001, the Industrial Inspection Ad Hoc Task Group (Industrial Inspection AHTG) recommended the adoption of Program-wide categories and enforcement actions developed by the Industrial Inspection AHTG. These categories and procedures are described in the *Continuous Improvement of Industrial Reporting Technical Memorandum* and *Continuous Improvement of Illicit Connection/Illegal Dumping Reporting Technical Memorandum*. The Management Committee approved both memoranda as the Program's strategy to implement IND and IC/ID reporting requirements (as required in Permit Provisions C.6.a.i. and ii). The memoranda were included as attachments within the Program's FY 00-01 Annual Repor*t* and submitted to the Regional Board on September 17, 2001. Each Co-permittee began implementing these procedures immediately thereafter. Implementation of the enhanced reporting requirements by the Co-permittees has been very successful as shown in the past three Program annual reports.

In accordance with the Regional Board's letter, *Review of Program's Draft FY 2003-04 Work Plan* dated June 24, 2003, the Program informed the Co-permittees (see FY 02-03 Annual Report Preparation Guidance dated June 18, 2003) that each Co-permittee should independently evaluate their individual IND and IC/ID inspection data and utilize the results of the analysis to set inspection priorities and gauge program effectiveness. Within the FY 02-03 Annual Report, Co-permittees provided an effectiveness evaluation or analysis of their IND and ICID programs and/or data. This step was performed to address the Regional Board's concerns regarding IND reporting procedures.

In accordance with the Program's FY 04-05 Work Plan submitted to the Regional Board on March 1, 2004, the Program committed to updating both performance standards during FY 04-05. The updates were essentially administrative (e.g., incorporating enhanced reporting requirements and results of Co-permittee evaluations) and were directed at modifying the

Program's model performance standards to reflect Management Committee direction and actual Co-permittee implementation. These administrative updates were provided to the Industrial Inspection AHTG for review during January 2005. The Management Committee approved the final updated performance standards on February 17, 2005. The final updates were provided within Attachments 2-1 and 2-2 of the Program's *FY 2005-2006 Draft Work Plan* and incorporated into the URMP.

LOCAL PROGRAM PERFORMANCE REVIEWS

As part of the Program's continuous improvement process (as described in the 2004 URMP), the Program, Water Board staff and interested outside parties conduct on-site performance reviews of the Co-permittees' local urban runoff management programs. Performance reviews in recent years have focused on one element of the Co-permittees' local programs in detail.

During April 26-28, 2005, Tetra Tech, Inc. provided an independent third party evaluation of certain elements of the Cities of Milpitas, Palo Alto, Santa Clara and Santa Clara County stormwater programs. The following elements were included within the evaluation: ICID/IND inspections and enforcement, municipal maintenance, new development/redevelopment and construction inspection. The evaluation was helpful in gauging how well the Co-permittees are implementing their URMPs. Water Board staff intends to have Tetra Tech return in the fall of 2005 to check the implementation of Provision C.3 requirements. The preliminary findings of these evaluations included the following:

- Santa Clara County has made improvements in every area that was found to be deficient in the December 2003 evaluation;
- Although inspectors were knowledgeable and performing adequate inspections, procedures need to be better documented. Standard checklists should be used for consistency and training of new staff. Checklists are also helpful when pretreatment inspectors perform stormwater inspections;
- Checklists should be used for development project application and plan reviews;
- Better interdepartmental communication was encouraged; and
- Some corporation yards SWPPPs need updating.

Water Board staff voiced the following:

- Stressed the use checklists as a means of instruction, documentation, and basis for enforcement;
- Suggested better coordination/referrals between city inspectors and pretreatment inspectors (e.g., between a city in the San Jose Water Quality Control Plant service area and the San Jose pretreatment inspectors;
- Encouraged more formal enforcement procedures, similar to those used in the pretreatment program.

Another recommendation from the evaluations included the review of Program-developed IND/ICID data collection forms (with the Co-permittees) for possible improvements. In some cases, these forms may create a duplication of effort. In others, the forms have replaced the actual inspection form and are not as effective as the inspection form in describing the problems encountered onsite. It was also suggested that the Program consider developing other model checklists for Co-permittee use.

Water Board staff did not conduct any other performance review meetings during FY 04-05.

CONTINUOUS IMPROVEMENT MEASURES

In its annual Work Plans and Annual Reports, the Program presents a list of continuous improvement items to be addressed at the Program level and an approach for implementing them. As discussed earlier under Program Management, continuous improvement items are normally identified from three sources: the Program's performance review with Water Board staff; Board staff comments on the prior year's annual report; and Management Committee comments on the *Review of Program Management Services* memorandum and other Program staff products. A summary of the Budget AHTG recommendations for continuous improvement in FY 04-05 and beyond are provided in the memorandum entitled *Review of FY 04-05 Program Management Services* (Appendix A-2).

Internal CI tasks identified include updating and maintaining the Program's web site (www.scvurppp.org) to ensure the effective distribution and review of draft and final products; and internal communication with the MC and other interested parties. In July 2005, Program staff released an updated version of the Program's website. The updated version allows easy navigation and location of final work products and other relevant information. In addition, Program staff has focused both technical and legal resources on working with Water Board staff (through the Regional Permit Steering Committee) on developing a Regional General Permit that will address the Program's permit re-issuance.

Finally, there are a few remaining lower priority continuous improvement tasks from previous years. Their status and updated schedules are provided within Table 2-4 of the *FY 04-05 Annual Report*. Program staff will continue to complete these items during FY 05-06. There were no new continuous improvement items identified for FY 05-06.

PERMIT PROVISION C.1. COMPLIANCE SUMMARY TABLE

The State of California's and USEPA's 303(d) water quality list, approved in 1999, identifies several "pollutants of concern" in the Lower South San Francisco Bay for which urban runoff is listed as a potential source. Consistent with Provision C.1 of its NPDES Permit, the Program has prepared a "C.1. Table" which summarizes the urban runoff controls being implemented to address these pollutants of concern. Although not required by Provision C.1, Table 2-5 provides an update to Table 2-5 contained in the *FY 03-04 Annual Repor*t and, as required, addresses the direction received from Water Board staff with regard to certain items.

Table 2-5 provides an updated summary of the Program's current and proposed (i.e., FY 05-06) BMPs/programs for the "pollutants of concern" and "pollutants of potential concern" in the Lower South San Francisco Bay for which urban runoff is listed as a potential source. Although urban runoff is listed as a potential source, in reality urban runoff is the transport vehicle and not the actual source. Therefore, key urban sources of the "pollutants of concern" and "pollutants of potential concern" are identified in Table 2-5.

As noted in Table 2-5, additional information on the Program's controls/programs can be found in the following documents:

- Program and Co-permittee 2004 *Urban Runoff Management Plans*
- 1997 *Metals Control Measures Plan*

- Past Annual Report and Work Plans
- Pollutant-specific technical reports (www.scvurppp.org)

In addition, the Program intends to incorporate updates to the summary table as part of the Program's continuous improvement process where new controls/programs will be identified and reported in the Program's Annual Work Plan.

Table 2-1
SCVURPPP Total FY 04-05 Budget

Budget Summary

Item	Budget
Operational Group	
1. Program Management/Administration (EOA)	$436,700
2. Permit Management (EOA)	$475,200
3. Technical Program Management (EOA)	$137,500
4. Legal Services (MOFO)	$80,000
5. Fiscal Agent (SCVWD)	$15,000
6. RMP Contribution (SFEI) (see Collaborative Budget)	
Subtotal Operational Group	**$1,144,400**
Projects Group	
7. Monitoring Projects (EOA/Subs)	$690,000
8. HMP Technical Assistance/Guidance/Workshops	$100,000
9. PI/P & WEO budget	$520,000
10. Project Monitoring Special Study (10% per MOA – moved to Collaborative Group)	
11. NPDES Permit Renewal	$126,000
Sub-total Project Group	**$1,436,000**
Collaborative Group	
A. Program Monitoring Special Studies	$159,000
B. WE&O - Watershed Support Fund	$100,000
C. CASQA Dues (Regional Collaboration)	$15,000
D. TMDL CEP Participation (Regional Collaboration)	$97,000
E. RMP Fee (Regional Collaboration)	$162,000
F. BASMAA Fee (Regional Collaboration)	$65,000
G. NPDES Permit Fee	$109,000
Subtotal	**$707,000**
TOTAL FY 04-05 BUDGET	**$3,287,400**

Table 2-2
FY 2004-2005 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
Budget – Closeout old budgets; review and approve proposed budgets; review and provide direction to the MC on budget & policy issues. Permit Provision: Program Management	Lorrie Gervin, Sunnyvale – Chair Randolph Shipes, San Jose Melody Tovar, San Jose Steven Osborn, San Jose Rick Mauck, Santa Clara Cheri Donnelly, West Valley Communities Beau Goldie, SCVWD (former member) Dave Chesterman, SCVWD Roger Narsim, SCVWD Jill Bicknell, Program staff Adam Olivieri; Program Staff	10/16/97		Closed out FY 02-03 budget; made decisions on FY 03-04 and 04-05 budgets; selected consultant to do a cost allocation study; continued to meet to discuss other budget and policy issues.
Monitoring* - Review & approve monitoring project priorities and products for consistency with Program and WMI goals, and with NPDES permit requirements. * Meets quarterly in concert with SCBWMI WAMS meetings. Permit Provision: C.7.	Marilyn Nickel, Milpitas Dave Grabiec, Sunnyvale Kristy McCumby-Hyland, Sunnyvale Chris Sommers, Program staff Jim Ervin, San Jose James Downing, San Jose Steven Osborn, San Jose Jan O'Hara, RWQCB Brett Calhoun, SCVWD	6/19/97		Met jointly with WMI Watershed Assessment & Monitoring Subgroup (WAMS) to provide input on the *Multi-Year Receiving Waters Monitoring Plan* (dated March 1, 2004), SSI updates, relationship between the SSI and the MDDB, Program's expectations of WAMS and the second year results of the Multi-Year Monitoring Program.

*No longer a member of the group

FY 2004-2005 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
Industrial Inspection – Revise performance standard/guidance to include recommendations for enhanced reporting, implement and review results. Permit Provision: C.6.a.i.	John Fusco, Program Staff Roberto Medina, Palo Alto (former member) Eric Anderson, Mountain View Dave Grabiec, Sunnyvale Anastazia Aziz, San Jose Mary Morse, San Jose (former member) Bhavani Yerrapotu, San Jose Jack Lovell, West Valley Brett Calhoun, SCVWD Roger Lee, Santa Clara	2/6/01		Program staff worked with the Industrial Inspection AHTG to the update Industrial/Commercial Discharger Control Program and Illicit Connection/Illegal Dumping Elimination Activities performance standards. The updates were essentially administrative (e.g., incorporating enhanced reporting requirements and results of Co-permittee evaluations). The Management Committee approved the final updated performance standards on February 17, 2005.
Mercury Pollution Prevention – Assist Co-permittee and Program staffs to implement Mercury P2 Plan tasks. Permit Provision: C.9.c.	Kristy McCumby-Hyland, Sunnyvale Melody Tovar, San Jose Sharon Newton, San Jose James Downing, San Jose Dave Drury, SCVWD Steve Homan, Santa Clara County Rob D'Arcy, SC County HHW Program Kristin Kerr, Program Staff Mary Morse, San Jose	10/18/01		Developed mercury-containing product use survey, and model guidelines and virtual elimination policy for implementing the Mercury Pollution Prevention Plan. Did not meet in FY 04-05.
Pest Management Performance Standard - Develop new performance standard to address Permit Provision C.9.d. and to assist Program staff to implement Program tasks. Permit Provision: C.9.d.	Phil Bobel, Palo Alto (Chair) Julie Weiss, Palo Alto Melody Tovar, San Jose Sharon Newton, San Jose Cheryl Dayley, San Jose Jean La Duc, San Jose Kate Slama, SCVWD Kristy McCumby-Hyland, Sunnyvale John Mendoza, Santa Clara	8/17/00	10/21/04	Developed, reviewed and finalized the Pest Management Performance Standards in FY 01-02 and FY 02-03. Did not meet in FY 04-05.

Table 2-2
FY 2004-2005 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
	Jill Bicknell, Program Staff			
Watershed Analysis – Assist with conduct and review of work plan tasks to conduct watershed analysis and management practice assessment in "other creeks" which may be impaired by sediment. Permit Provision: C.9.f.iii	Brett Calhoun, SCVWD Kristy McCumby-Hyland, Sunnyvale Steve Homan, Santa Clara County Larry Lind, Los Altos Jim Ervin, San Jose James Downing, San Jose Chris Sommers, Program Staff Paul Randall, Program Staff Brett Calhoun, SCVWD Jae Abel, SCVWD	6/20/02		The AHTG met on September 22, 2004 to discuss the results and next steps of the Stevens Creek Limiting Factor Analysis. On December 6, 2004 the AHTG met to discuss the goals and objectives and existing data sources for the Upper Penitencia Creek watershed.
Trash – Develop Trash Work Plan, coordinate trash-related activities, and assist Program Staff to implement Program tasks. Permit Provision: C.1.	Dave Staub, Santa Clara Cheri Donnelly, WVCWP Kristy McCumby-Hyland, Sunnyvale Brett Calhoun, SCVWD Lisa Fleming, SCVWD (former member) Skip LaCaze, San Jose Sharon Newton, San Jose Melody Tovar, San Jose Phil Bobel, Palo Alto Chris Rummel, County DEH Steve Homan, Santa Clara County Lisa Rose, County GALA Trish Mulvey, CLEAN South Bay Jan O'Hara, RWQCB John Fusco, Program Staff Paul Randall, Program Staff	12/20/01		Reviewed and approved memorandum entitled *Trash Problem Area Evaluation Results- FY 04-05* (includes tables and figures). Continue to meet on a quarterly basis to discuss the results of trash evaluations and potential implementation strategies.
C.3. Provision Oversight (C3PO) – Develop approach to implementing Permit Provision C.3.requirements for new and redevelopment and review	Joe Teresi, Palo Alto Paramjit Uppal, Milpitas Cheri Donnelly, WVCWP Scott Alman, Monte Sereno (former)	11/15/01		Continued implementing the Permit Provision C.3 Work Plan. Received updates from Program staff on C.3. and HMP

Table 2-2
FY 2004-2005 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
Program work products. **(Work Groups under C3PO are:** HMP BMP Operations & Maintenance Site Design Infiltration) <u>Permit Provision</u>: C.3.	Imad Baiyasi, Los Gatos (former member) Sandy Baily, Los Gatos Trish Duarte, Los Gatos Kevin Riley, Santa Clara (former member) Roger Lee, Santa Clara Mike Campbell, San Jose Anastazia Aziz, San Jose Joe Vafa, San Jose Calvin Matsui, San Jose Ebrahim Sohrabi, San Jose Maria Angeles, San Jose Timm Borden, San Jose Laurel Prevetti, San Jose Jenny Nusbaum, San Jose Dipankar Sen, SCVWD Roger Narsim, SCVWD Jill Bicknell, Program staff Jan O'Hara, RWQCB (former member) Sue Ma, RWQCB Kristy McCumby-Hyland, Sunnyvale Erin Walters, Sunnyvale Christine Cannizzo, Sunnyvale Liliana Price, Sunnyvale Eric Anderson, Mountain View Genevieve Fire, Cupertino Curtis Banks, Los Altos Ann Welsh, Saratoga (former member) Lynn Penoyer, Campbell (former member) Al Oxonian, Campbell Steve Homan, Santa Clara County Richard Chen, Los Altos Hills Michael Liw, San Jose Bill Ekern, San Jose Mary Ellen Dick, San Jose Melody Tovar, San Jose			requirements and BASMAA and CASQA activities. Helped plan a C.3 training workshop on BMP O&M Inspection and Verification, held on June 9, 2005. Worked on C.3.e. and C.3.n. reporting requirements with Water Board staff.

Table 2-2
FY 2004-2005 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
	Dan Strickman, Vector Control (SCC) Salifu Yakubu, San Jose Brett Calhoun, SCVWD Bill Springer, SCVWD Pamela Wu, Santa Clara County Chris Freitas, Santa Clara County Tracy Ingebritsen, Stanford (former member) Kelly Rohlfs, Stanford			
Waiver Provision – Develop proposed model waiver. Permit Provision: C.3.g.	Randolph Shipes, San Jose Mollie Dent, San Jose Counsel Anthony Bennetti, SCVWD Counsel Blair King, Milpitas Darryl Wong, Milpitas Donna Scott, Sunnyvale Counsel Shelley Emerson, Mountain View Counsel Bob Reid, West Valley Communities Adam Olivieri, Program Staff Robert Falk, Program Counsel	11/15/01	10/21/04	Completed revised model alternative compliance program during FY 02-03 and accepted it as internal guidance. Did not meet in FY 04-05.
WORK GROUP INFORMATION **(PIP & WEO Work Groups)**				
Script Review – To review scripts created for media use related to the Watershed Watch Campaign (on a short turn around basis), oversee development of Watershed Watch web site and review page content. Permit Provision: C.4.	Roxan Nasiri, Cupertino Sally Personett, Sunnyvale Kate Slama, SCVWD Julie Weiss, Palo Alto Cheri Donnelly, WVCWP Bruce Frisbey, San Jose Mary Morse, San Jose Vishakha Atre, Program Staff	12/99		Provided input on a number of scripts and articles with a short turnaround time.
Pesticide User Outreach – To help Program staff develop work plans for and implement pesticide user	Joanne Johnson, Milpitas (Chair) Roxan Nasiri, Cupertino Julie Weiss, Palo Alto	Reformed 8/02		Work group members reviewed and approved detailed FY 04-05 work plan; provided input to

Table 2-2
FY 2004-2005 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
outreach tasks from the Program's Pesticide Management Work Plan. This project combines elements of the IPM Store partnership Work Group and the Household Chemical Management Work Group. It builds on the relationships developed with independent nurseries and hardware stores developed during the previous years of the IPM Store Partnership project. The work group also reviews the Program's Work Plan for pesticide outreach and participates in outreach events. Permit Provision: C.9.d.	Larry Lind, Los Altos Paramjit Uppal, Milpitas Eric Anderson, Mountain View Bruce Frisbey, San Jose Sharon Newton, San Jose Cheryl Dayley, San Jose Mary Morse, San Jose Kristy McCumby-Hyland, Sunnyvale Sally Personett, Sunnyvale Kate Slama, SCVWD Cheri Donnelly, WVCWP Rob D'Arcy, Santa Clara Co. Rosemary Lombard, Palo Alto Vishakha Atre, Program Staff			Program staff on Regional IPM issues; planned, conducted and staffed IPM outreach related events and conducted outreach to stores.
Mercury P2 Outreach – To help Program staff, develop work plans for and implement mercury outreach tasks. Permit Provision: C.9.c.	Julie Weiss, Palo Alto (Chair) Roxan Nasiri, Cupertino Mary Morse, San Jose Sally Personett, Sunnyvale Kristy McCumby-Hyland, Sunnyvale Kate Slama, SCVWD Marilyn Nickel, Milpitas Joanne Johnson, Milpitas Zakk Devine, Santa Clara County Integrated Waste Management Division Rob D'Arcy, CoHHW Program Gena Pinheiro, CoHHW (former) Cheri Donnelly, WVCWP Jim Blamey, Santa Clara County Vishakha Atre, Program Staff	12/02		The work group reviewed and approved the detailed FY 04-05 work plan; reviewed and approved materials for the spring advertising campaign.

Table 2-2
FY 2004-2005 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
Schools Outreach – To plan for and oversee school outreach activities coordinated with the WEO Campaign (e.g. Zun Zun performances), Coordinate Co-permittee school outreach efforts and identify gaps in outreach for watershed/stormwater education. Identify a program for conducting outreach at the middle-school level. Permit Provision: C.4.	Mary Morse, San Jose – Chair Roxan Nasiri, Cupertino Julie Weiss, Palo Alto Jan Raissle, Palo Alto Bruce Frisbey, San Jose Trish Mulvey, CLEAN South Bay Cheri Donnelly, West Valley Kate Slama, SCVWD Vishakha Atre, Program Staff	12/99		Provided input for conducting 50 ZunZun school assemblies. Identified ways to promote the Wacky Watersheds Workshop. Approved a plan for purchasing supplies for Wacky Watersheds and providing funds for teacher grants to encourage attendance.
Alviso Education Program – To periodically evaluate and provide input to S.F. Bay Wildlife Refuge staff regarding educational programs funded by SCVURPPP. Permit Provision: C.4.	Kate Slama, SCVWD Bob Chessman, San Jose Bruce Frisbey, San Jose Roxan Nasiri, Cupertino Sally Personett, Sunnvyale Mary Morse, San Jose Genie Moore, S.F. Bay Wildlife Refuge Trish Mulvey, CLEAN South Bay Vishakha Atre, Program Staff	12/99		Reviewed work done in FY 04-05; discussed improvements and approved work plan for FY 05-06.
C3PO Work Groups				

Table 2-2
FY 2004-2005 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
Hydromodification Management Plan (HMP) Work Group - Review task and approve products, final HMP, and co-permittee guidance. Permit Provision: C.3.f.	Joe Teresi, Palo Alto Dipankar Sen, SCVWD Roger Narsim, SCVWD Jenny Nusbaum, San Jose Anastazia Aziz, San Jose Ebrahim Sohrabi, San Jose Maria Angeles, San Jose Joe Vafa, San Jose Calvin Matsui, San Jose Melody Tovar, San Jose Crisand Giles, HBA (former member) Fariborz Heydari, Milpitas Trish Mulvey, CLEAN South Bay Kristy McCumby-Hyland, Sunnyvale Lorrie Gervin, Sunnyvale Jan O'Hara, RWQCB Jill Bicknell, Program Staff Paul Randall, Program Staff	4/22/02		Reviewed draft s of HMP report. (In FY 04-05, most decisions made by MC Executive Committee).
Operations & Maintenance Work Group -- Review model O&M documentation and develop guidance for verification programs. Permit Provision: C.3.e.	Dipankar Sen, SCVWD Patti Joki, Milpitas Paramjit Uppal, Milpitas Jenny Nusbaum, San Jose Brett Calhoun, SCVWD Cheri Donnelly, WVCWP Dan Cloak, DCE (former) Eric Anderson, Mountain View Genevieve Fire, Cupertino Imad Baiyasi, Los Gatos (former member) Trish Duarte, Los Gatos Jack Lovell, West Valley Communities Jamie Matthews, San Jose	4/22/02		Reviewed and provided input to agenda for June 9, 2005 workshop on BMP O&M Inspection and Verification. Reviewed draft Program memo on C.3.e. Data collection, management and reporting and BMP inspection form.

Table 2-2
FY 2004-2005 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
	Jan O'Hara, RWQCB (former) Kristy McCumby-Hyland, Sunnyvale Lavenia Millar, Cupertino Lisa Fleming, SCVWD Maria Angeles, San Jose Melody Tovar, San Jose Anastazia Aziz, San Jose Rafles Warnars, San Jose Ray Ho, San Jose Robert Gallo, Sunnyvale Roger Narsim, SCVWD Roberto Medina, Palo Alto (former) John Fusco, Program Staff Paul Randall, Program Staff			
Infiltration Work Group - To develop guidance to Co-permittees on design of Stormwater infiltration measures to protect groundwater quality. Permit Provision: C.3.i	Tracy Hemmeter, SCVWD (former) Yaping Liu, SCVWD Larry Lind, Los Altos Mike Campbell, RBF Consulting Ellen Fostersmith, SCVWD (former member) Jenny Nusbaum, San Jose Anastazia Aziz, San Jose Kelly Rohlfs, Stanford Kristy McCumby-Hyland, Sunnyvale Scott Alman, Monte Sereno (former) Jill Bicknell, Program Staff Paul Randall, Program Staff	1/22/03		In FY 02-03, identified desirable infiltration methods, discussed allowable siting and design criteria, and reviewed draft guidance. In FY 03-04, revised draft guidance.

Table 2-3
Performance of FY 04-05 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
	1.0 Program Management/Administration	
Task 1.1 - Administrative Assistance	• Provide general administrative assistance • Maintain toll-free numbers for both SCVURPPP and the Watershed Watch Campaign. • Distribute materials to the public	• Continuing • Responded to 227 calls in FY 04-05. Database of requests is regularly updated and will be distributed to Co-permittees. • Sent materials to all 157 callers who requested materials. Responded to 88 requests from the Watershed Watch website for Watershed Watch kits.
Task 1.2 - Management Committee and Ad HocTask Group (AHTG) Support	• Facilitate and support up to 12 MC meetings* • Facilitate and support up to 40 AHTG meetings**	• Completed 13 meetings (10 regular and three special) in FY 04-05. • Facilitated 17 AHTG meetings. AHTG meetings include: Budget AHTG (4); C3 Provision Oversight AHTG (4); Trash AHTG (1); Watershed Analysis Work Plan AHTG (3); Watershed Education & Outreach AHTG (5). • Program Staff also facilitated 7 Work Group meetings: C3 Infiltration Work Group (1); Mercury P2 Outreach Work Group (2); Pesticide User Work Group (1); WE & O RFP Work Group (2); HMP Map Work Group (1).
Task 1.3 - Program Budget Administration	• Develop subsequent year's budget	• Total Program budget reviewed and approved by Budget AHTG on 1/4/05;

* Includes: develop/distribute agendas, comply with Brown Act, update mailing lists, do copying, reserve meeting places, facilitate meetings, draft/finalize minutes, and organize/conduct follow-up.

Table 2-3, continued
Performance of FY 04-05 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		budget distributed to MC on 1/12/05; budget revised based on BATG direction from 1/18/05 and 2/2/05 meetings and distributed to Executive Committee and BATG on 2/7/05. Revised budget approved by BATG and distributed to MC on 2/14/05. Budget reviewed and approved by MC on 2/17/05.
	• Track expenditures and prepare quarterly reports to Management Committee • Identify and apply for grant opportunities as directed by Management Committee	• Continued tracking system developed in FY 97-98. Submitted budget updates in September 2004, December 2004 and May 2005. • Program assisted with applications for the following grants: • Supported the City of San Jose in applying for a grant from the SWRCB to fund the City's Public Safety Runoff Reduction Project. The proposal was not selected for funding.
Task 1.4 - Coordination with Fiscal Agent	• Track Program Fund receipts/expenditures; obtain budget status information	• Continued to receive updated information on revenues and expenditures monthly from Santa Clara Valley Water District and directed the District to pay invoices. This process worked effectively. • Assisted Management Committee transfer fiscal and contract agent responsibilities from the Santa Clara Valley Water District to the City of Sunnyvale.

Table 2-3, continued
Performance of FY 04-05 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
Task 1.5 - Coordination with Legal Consultant	• Communicate with and provide assistance to legal counsel.	• Held three closed sessions with Management Committee (8/26/04, 2/2/05 and 5/19/05).
Task 1.6 – Coordinate Program Representation	• Communicate with and report information provided by Co-permittees representing Program at external meetings.	• Program staff attends external meetings requiring Program representation. See report under Task 2.3. Co-permittees normally do not represent the Program at external meetings. An exception is that several Co-permittees represent themselves at the San Francisquito Creek Watershed Council meetings regarding sediment control studies. (Program staff is not involved).
Task 1.7 – Develop and Manage PI/P Program	• Conduct long-range planning for Program PI/P activities	• Managed the implementation of the Watershed Watch Campaign; including development of the Watershed Watch Mid-year Campaign Report, Teacher Evaluation Mid-year Report, Final Campaign and Media Report, Teacher Evaluation Final Report, and Spring Mercury Outreach Media Campaign; reviewed products by the consultant (TRG and Associates); coordinated campaign with other PIP goals and activities.
	• Manage development of PI/P work plan for FY 04-05	• Developed FY 05-06 PI/P Work Plan with input from Budget and WEO AHTGs. Updated pollutant/PIP materials matrix and developed recommendations and strategies for FY 05-06 projects.

Table 2-3, continued
Performance of FY 04-05 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
	• Provide support to Co-permittee's requests for public education assistance	• Throughout the year, oversaw development of work plans for and/or management of PI/P projects. • Ongoing support to Co-permittee requests; coordinated reprints of materials and distribution of Watershed Watch kits; staff outreach events, as needed; kept PI/P contacts informed about local and regional activities through email. • Coordinated with BASMAA Regional Ad Campaign.
2.0 Permit Management		
Task 2.1 - Report Preparation & Submittal	• Prepare Program Annual Report and submit to Water Board by Sept. 15 of each year. • Prepare FY 05-06 Draft Work Plan and submit to Water Board by March 1	• FY 03-04 Annual Report prepared and submitted on September 15, 2004. Continued the streamlined reporting format to reduce Co-permittee effort while satisfying Water Board requirements. Prepared guidance to Co-permittees and reviewed Co-permittee submittals for completeness and consistency. • FY 05-06 Draft Work Plan prepared and submitted on February 25, 2005. Work Plan contained the following: the Program Continuous Improvement Plan, Revisions to the Industrial/Commercial Discharger Control Program and Illicit Connection/Illegal Dumping Elimination Activities Performance Standards, PI/P Work Plan, FY 05-06 Annual Receiving Water Monitoring Plan, FY 05-06

Table 2-3, continued
Performance of FY 04-05 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		Copper/Nickel Work Plan, Watershed Management Measures, Status of ongoing Pesticide Management Plan tasks, Mercury Pollution Prevention efforts and Work Plan, New and Redevelopment (C.3.) Work Plan and Program FY 05-06 Budget and Co-permittee FY 05-06 Work Plan Summary Tables.
Task 2.2 - Internal Co-Permittee Liaison	• Develop guidance as directed by MC. May include guidance documents, evaluation methods and effectiveness indicators.	• Developed guidance on the Annual Report, Work Plan, C.3 implementation, Copper Action Plan Work Plan, street sweeping tracking and evaluation, submittal of trash problem area evaluation data and submittal of IND and IC/ID inspection data. Provided additional guidance to Co-permittees in response to telephone and email requests.
	• Conduct local program reviews	• During April 26-28, 2005, Water Board staff, in cooperation with EPA's contractor Tetra Tech, Inc. conducted performance reviews of selected Co-permittee (i.e., Cities of Milpitas, Palo Alto, Santa Clara and Santa Clara County) stormwater programs. An evaluation report will be provided in the near future. Preliminary findings are provided within *FY 04-05 Annual Report*. • During December 2-4, 2003, Tetra Tech, Inc. provided an independent evaluation of the Program's monitoring element and certain elements of the City of San Jose and Santa Clara County stormwater programs. An evaluation report was provided to Program staff on March 26, 2004. Program staff responded to these comments, as

Table 2-3, continued
Performance of FY 04-05 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		appropriate, on September 15, 2004. The Program had also addressed each of these areas in the Program's *Revised Multi-Year Monitoring Plan*, submitted to the Water Board on March 1, 2004.
	• Conduct up to 4 training workshops; may include educational outreach to businesses.	• Planned, conducted, assisted with, and/or co-sponsored the following workshops: 1) Trash Assessment Training Workshop (July 16, 2004) - attracted 17 participants. 2) Conducting Effective Stormwater Inspections of Industrial and Commercial Facilities (April 5, 2005) – attracted 81 participants. 3) Conducting Stormwater Treatment Best Management Practices (BMP) Maintenance and Inspections (June 9, 2005) – attracted 116 participants. • Gave presentations on behalf of the Program at workshops/conferences planned by others: 1) "Understanding Potential Barriers to Better Site Design for Water Quality Protection", co-authored by Wendy Edde and Jill Bicknell and presented by Wendy Edde, at the Putting the LID on Stormwater Management Conference, College Park, Maryland, September 21, 2004; 2) Alameda Countywide Clean Water Program Workshop on How to Meet the New Development/Redevelopment NPDES Permit Requirements, presentation by Jill

Table 2-3, continued
Performance of FY 04-05 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		Bicknell on “Understanding Potential Obstacles to Better Site Design for Water Quality Protection”, November 16, 2004; 3) San Francisco Bay Area Chapter of the Maintenance Superintendents Association, presentation by John Fusco on “Stormwater Best Management Practices for Municipal Operations”, November 18, 2004; 4) Bay Area Macroinvertebrate Bioassessment Information (BAMBI) Workshop, presentation by Paul Randall on “Summary of SCVURPPP Bioassessment Efforts”, January 31, 2005; 5) Municipal Public Works Officials of Santa Clara County, presentation by Jill Bicknell and Adam Olivieri on “Urban Runoff Permit Issues”, February 10, 2005; 6) City/County Managers Association, presentation by Dave Chesterman and Adam Olivieri on “The Santa Clara Valley Urban Runoff Pollution Program: Cost Allocation Review”, May 11, 2005; 7) American Public Works Association, presentation by Jill Bicknell and Wendy Edde on “Integrating Water Quality Protection and Development Project Design”, May 12, 2005; and 8) San Mateo Countywide Stormwater Pollution Prevention Program 2005 New Development Workshop, presentation on “Introduction to HMP Requirements- Santa Clara Valley’s Experience”, May 24, 2005.

Table 2-3, continued
Performance of FY 04-05 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
Task 2.3 - External Organization Liaison	• Identify regulatory issues, prepare comments, and represent Program at meetings.	• Distributed information to MC on following issues: revisions to 303(d) list and TMDL priorities; mercury, diazinon, pesticides, PBDE's and copper/nickel TMDL studies and action plans; issues discussed at NPDES permit reissuance stakeholder meetings; legislation of concern; various items related to permit issues on San Mateo and Contra Costa appeals; various water quality pending lawsuits; other items of interest from the RWQCB, BASMAA and CASQA. Program staff served on the PCB TMDL Stakeholder Group and Mercury TMDL Work Group, commented and prepared TMDL study products, helped update and report progress on the Copper Action Plan, and assisted Water Board staff with preparation of Basin Plan amendments related to mercury.
	• Represent Program at up to 77 external organization meetings (RWQCB, BASMAA, CASQA, CEP, RMP, others) as directed by MC.	• Attended 182 external organization meetings (see separate summary table – not including WMI and Program Data Coordination meetings); prepared summaries for MC distribution; prepared and/or distributed full meeting notes for most meetings. • Program staff served as Vice Chair of BASMAA Executive Board and interim Chair of the SCBWMI Land Use Subgroup, BASMAA representative on the RMP

Table 2-3, continued
Performance of FY 04-05 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		Steering Committee, RMP Technical Committee and Regional General Permit Steering Group.
	• Represented Program at WMI Core Group and Subgroup meetings.	• Attended 37 WMI meetings, including: Land Use Subgroup (3); BAMBI Workshop (1); BAMBI Planning Meeting (1); Workshop SCBWMI Bay Modeling and Monitoring Subgroup (2); SCBWMI Core Group (7); SCBWMI Guadalupe Mercury TMDL WG (6); SCBWMI Watershed Assessment and Monitoring Subgroup (8); SCBWMI Workgroup I (8); SCBWMI Workgroup H (1).
	• Obtain updates to State NOI database.	• Continued to place updated NOI lists on SCVURPPP website on a quarterly basis.

Table 2-3, continued
Performance of FY 04-05 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
Task 2.4 – Permit Renewal	• Coordinate development of permit with WMI via Regulatory Subgroup	• Coordinated with Water Board staff. MC direction contained in work plan and budget for FY 04-05.
	• Present to Water Board at regular Board meeting	• N/A- At direction of the Management Committee, Program staff attended and made presentations at five Water Board meetings. • Program staff, at direction of MC, is working on the Regional General Permit and have attended two Steering Group meetings and four internal BASMAA Work Group meetings (as well as conducted numerous e-mail review of products). • Program staff worked with Water Board staff on two Tentative Orders, released in December 2004 and May 2005, the latter of which was adopted by the Water Board in July 2005. Program staff conducted extensive review of the draft Orders, provided written comments to Water Board staff and negotiated revisions on behalf of the Management Committee.

Table 2-3, continued
Performance of FY 04-05 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
Task 2.5 – Implement Continuous Improvement Items	• Investigate, develop implementation plans, and implement items for Program continuous improvement identified in Co-permittee reviews, work plan, and annual report	• Table 1-1 of the *FY 05-06 Draft Work Plan* and Table 2-4 of the *FY 04-05 Annual Report* presented the progress of continuous improvement tasks. There were no new continuous improvement items identified for FY 04-05.
	• Summarize for Program Annual Report	• The status of continuous improvement items was presented in the *FY 05-06 Draft Work Plan,* and is updated in the *FY 04-05 Annual Report.*

Table 2-3
Performance of FY 04-05 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
	3.0 Technical Program Management	
Task 3.1 - Prepare RFPs and Manage Contractors	• Develop RFPs, scopes of work, and contracts for up to 4 projects/services; assist with advertisement and selection; oversee contracted work.	• Prepared scopes of work for monitoring projects for FY 04-05; continue to oversee contracted work. (All contractors are now subcontractors to EOA, Inc., per the Program's "Procedures for Contracting Outside Services", 5/15/98). • Coordinated CEP Work Group investigating PCBs and Hg in the Bay and managed contractor finishing PCB case study investigations. Worked via CEP to develop RFPs and manage contractors. • Developed scopes and contracts; and managed contractors conducting Multi-year Receiving Waters Monitoring Plan, sediment assessment and bioassessment scopes of work (Contractors were selected by MC and are assisting the Program with implementing the Multi-year Plan in accordance with the permit). • Managed the following regional project: Introduction to Dioxins for Bay Areas Stormwater Management Agencies (BASMAA task of regional benefit). • Developed scope and contract; and managed WE&O contractor (TRG and Associates-selected previously via RFP process). • Developed scopes and contracts and managed two outreach contractors, the ZunZun performance group and the San

Table 2-3, continued
Performance of FY 04-05 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		Francisco Bay Wildlife Society's Environmental Education Center in Alviso. • Developed scope and contract for and managed contractor to complete Phase I of the BASMAA Task of Regional Benefit – BMP Sizing Tool Project (AEI-CASC).
Task 3.2 - Provide Technical Review	• Provide technical review of work products of contractors and provide recommendations to MC regarding acceptability/modifications.	• Reviewed all consultant products related to C.3. HMP, Multi-year Receiving Waters Monitoring Plan, sediment and bioassessment work.
Task 3.3 - Develop Additional Performance Standard	• Assist MC in developing or improving one performance standard.	• Worked with an Industrial Inspection AHTG to update the Industrial/Commercial Discharger Control Program and Illicit Connection/Illegal Dumping Elimination Activities Performance Standards. These administrative updates were provided to the Industrial Inspection AHTG for review in January 2005 and approved by the Management Committee on February 17, 2005. The final revised versions of both performance standards were formally transmitted to the RWQCB on February 25, 2005.

Table 2-4
Program Continuous Improvement (CI) Tasks

Tasks	Updated Schedule	Status[1]	Evaluation of Effectiveness
FY 03-04 CI Tasks – New Development and Redevelopment			
4. Develop design guidance containing stormwater control opportunities for small road modifications.	June 2006	**Update** – The Program's permit requirements were made consistent with other Bay Area permits, which exempt road reconstruction (within the same footprint) from C.3. Program staff will discuss with the C3PO AHTG whether this is a priority for road projects that are not exempt.	Cannot be evaluated at this stage.
Remaining FY 00-01 CI Tasks – Program Management			
3. Provide guidance to Co-permittees on requirements for temporary non-stormwater discharges to storm drains.	Pending	**Update** – Co-permittees have requested assistance from the RWQCB staff with determining under what conditions temporary non-stormwater discharges are allowed to flow to storm drains. To date, RWQCB have only provided guidance in individual letters to contractors.	Cannot be evaluated at this stage. Waiting for direction from RWQCB staff.
6. Conduct a workshop for municipal staff based on the municipal training protocols being developed by an ad hoc task group. (Priority – Medium)	June 2006	**Update** -- Four Power Point presentations were developed in FY 01-02 on BMPs for corporation yards, storm drain O&M, road maintenance and pest management. In FY 02-03 and FY 03-04, this project was put on hold due to work on higher priority items. During FY 04-05, a fifth training module was developed on mercury pollution prevention. Planning will begin for the workshop (tentatively scheduled for spring 2006**)**	Cannot be evaluated at this stage.

[1] [1] Tasks reported in previous fiscal years have been removed from the list.

Table 2-4
Program Continuous Improvement (CI) Tasks

Tasks	Updated Schedule	Status[1]	Evaluation of Effectiveness
Remaining FY 99-00 CI Tasks – Program Management			
6. Send letter to contractors who received Construction General Permit Binder, explaining that the binder is being revised and contractors should reference the Regional Board's Erosion Control Field Manual. (Priority- Medium)	June 2006	**Update** – One of the fact sheets in the *C.3. Stormwater Handbook* provides resources for information on construction BMPs (Attachment II-6). Due to the many resources now available to contractors, a separate SCVURPPP binder may no longer be needed. Program staff will bring this item to the C3PO AHTG for discussion and next steps.	Cannot be evaluated at this stage.
9. Consider developing, with the help of an ad hoc task group, a fact sheet addressing common construction BMP problems, like drain inlet protection and dewatering. (Priority – Medium)	June 2006	**Update** – Management Committee approved having the Program adapt an existing brochure on dewatering (created by Palo Alto, Mountain View and San Jose) for the other Co-permittees' use. Due to higher priorities, no further work was completed on this task. Program staff will bring this item to the C3PO AHTG for discussion and next steps.	Cannot be evaluated at this stage.
15. Look into providing storm water training to building officials through the Peninsula Chapter of Building Officials monthly training sessions. (Priority –Low)	June 2006	**Update** – This item is low priority, and has been delayed due to Program staff's focus on higher priority items. Program staff will bring this item to the C3PO AHTG for discussion and next steps.	Cannot be evaluated at this stage.

[1] [1] Tasks reported in previous fiscal years have been removed from the list.

CHEMICAL	WATER-BODY	KEY URBAN SOURCES[i]	URBAN RUNOFF CONTROLS (ONGOING PROGRAM CONTROLS)[ii]	FY 04-05 ADDITIONAL URBAN RUNOFF CONTROLS/PROGRAMS PROPOSED TO REDUCE POLLUTANTS[iii]	CONTINUOUS IMPROVEMENT (IDENTIFICATION & ASSESSMENT OF NEW URBAN RUNOFF CONTROLS/PROGRAMS)
Pollutants of Concern [iv]					
Metals (particulate form)	**Lower South Bay**	**All Urban Sources**	Performance standards[v]: • Illicit Discharge and Illegal Dumping Elimination • Industrial/Commercial Discharger Control • Public Streets, Roads and Highways O&M • Storm Drain Systems O&M • Water Utility O&M • New Development and Construction Control Measures-Planning Procedures • New Development and Construction Control Measures-Construction Inspections • Rural Public Works Maintenance and Support	Performance Standard Improvements: Implement & Track Performance (see Section 2 and 6 of Work Plan and changes to Work Plan contained in Annual Report): PI/P Work Plan: Implement and Track Watershed Education & Outreach Strategy (see Section 3 of Work Plan, Tables 2-2 and 3-1 for specific Program projects and Co-permittee Work Plans) Monitoring Program: Implement and Track monitoring projects. (See Section 4 of Work Plans). See Appendix C-1 for a summary of specific projects. See Section for additional detail on status of monitoring projects and project summaries. Watershed Measures: Implement and Track watershed measures (see Section 5 for details). Five areas of effort include: • Characterizing watersheds and stormwater discharges; • Assessing existing or potential adverse impacts to beneficial uses; • Identifying potential sources of pollutants of concern; • Aiding in developing and implementing strategies for controlling adverse impacts of beneficial uses; and • Assessing the effectiveness of pollutant prevention/control measures.	Evaluate the need for additional BMPs to reduce discharges of "pollutants of concern"

Table 2-5
SCVURPPP Current and Proposed BMPs for Pollutants of Concern Prepared in Compliance with NPDES Order 01-024

CHEMICAL	WATER-BODY	KEY URBAN SOURCES[i]	URBAN RUNOFF CONTROLS (ONGOING PROGRAM CONTROLS)[ii]	FY 04-05 ADDITIONAL URBAN RUNOFF CONTROLS/PROGRAMS PROPOSED TO REDUCE POLLUTANTS[iii]	CONTINUOUS IMPROVEMENT (IDENTIFICATION & ASSESSMENT OF NEW URBAN RUNOFF CONTROLS/PROGRAMS)
				See SCVURPPP Watershed Monitoring and Assessment Summary Report (September 15, 2005) and revised MY-RWMP (July 1, 2004) per permit condition C7b and C9. See Watershed Integration report (June 29, 2001) prepared per condition C10a. Program is a key player in the CEP and RMP efforts and is involved in various technical advisory committees. The Program provides funding to the CEP and the RMP to investigate key issues related to the health of the Bay; and assists the RWQCB in meeting TMDL mandates. Develop guidance for the implementation of Permit Provision C3, which is indirectly related to the control of many of the pollutants of concern.	
Copper	**Lower South Bay**	**Brake pads & Industrial sources** (approximately 46% of total copper load to Lower South Bay)	Same as above for general metals, plus copper specific controls: AUTO-1 *Support Brake Pad Partnership efforts to promote reformulation of friction materials in brake pads.* AUTO-2 *Participate in educating the storm water community about the significance of metals loading from brake pads* AUTO-3 *Participate in educating the public about the significance of metals loading from brake pads* AUTO-4 *Monitor, and respond to research reports that could lead to an effective*	See Permit Provision C9a. Same as above for metals, plus baseline copper specific controls described in Table 4-1 (reviewed and approved by BMM/RS on August 23, 2000) of the Lower South San Francisco Bay- Copper Action Plan (June 2000). See CAP table attached to Permit. Refer to the FY 05-06 Copper/Nickel Work Plan and FY 04-05 Reporting Tables (see Appendix C-3) for specific activities planned and completed during FY 04-05. See semi-annual meeting notes for BMM	Same as above including: • Evaluating the results of Table 4-1 control activities. • CEP developed and approved scopes of work for a variety of projects, which will be conducted in FY 05-06. These include Copper and Nickel Site Specific Objectives for San Francisco Bay North of the Dumbarton Bridge and analysis of pollutants in sediment cores near storm water inputs. • Continue to actively track activities of Brake Pad Partnership

			methodology for prioritizing cleaning of "hot spot" catch basins INDUSTRY-1 *Assist industry, on a pilot program basis, to develop storm water sampling and analysis protocols and conduct independent spot-checking to verify SWRCB industrial data. -Completed* INDUSTRY-2*, Collaborate with targeted industry (i.e., electroplating) to investigate potential pathways and develop appropriate BMPs*. Developing a pilot education and outreach effort in San Jose and Sunnyvale and evaluating best approach to update Program performance standard.	review meetings (November 11, 2003 and April 22, 2005) and relative to implementing CAP and semi-annual review reports prepared by Program. See summary of CAP and NAP implementation contained in Annual Report. A summary of FY 03-04 and FY 04-05 activities are contained in the FY 05-06 Copper/Nickel Work Plan and FY 04-05 Reporting Tables (see Appendix C-3). CEP approved and funded a project to measure the loading of a variety of contaminants (e.g., mercury, copper, nickel and PCBs) from the Guadalupe River to the Bay.	

Table 2-5
SCVURPPP Current and Proposed BMPs for Pollutants of Concern Prepared in Compliance with NPDES Order 01-024

CHEMICAL	WATER-BODY	KEY URBAN SOURCES[i]	URBAN RUNOFF CONTROLS (ONGOING PROGRAM CONTROLS)[ii]	FY 04-05 ADDITIONAL URBAN RUNOFF CONTROLS/PROGRAMS PROPOSED TO REDUCE POLLUTANTS[iii]	CONTINUOUS IMPROVEMENT (IDENTIFICATION & ASSESSMENT OF NEW URBAN RUNOFF CONTROLS/PROGRAMS)
Nickel	**Lower South Bay**	**Industrial sources, tailpipe emissions & construction erosion** (Major nonpoint source is erosion of native soils, approximately 59% of total nickel load to Lower South Bay)	Same as above for general metals and copper, plus nickel specific controls connected with sediment control activities: • Support RWQCB's Annual Workshops for contractors and municipal staff on construction site management and erosion/sediment controls. EROSION-1 *Implement performance standards for construction inspection.* EROSION-2 *Participate in development of region-wide training and certification program for construction site inspectors.*	See Permit Provision C9b. Same as above for metals and copper, plus nickel specific controls connected with sediment control activities: • BASMAA media relations campaign topic, • Construction Tri-folds, • "Start at the Source" manual and workshops, • Construction site management workshops, and • Mobile polluter database project. Baseline nickel specific controls described in Table 4-1 (reviewed and approved by BMM/RS on August 23, 2000) of the Lower South San Francisco Bay- Nickel Action Plan (August 2000). NAP discussion is the same as above for CAP. A summary of FY 03-04 and FY 04-05 activities are contained in the FY 05-06 Copper/Nickel Work Plan and FY 04-05 Reporting Tables (see Appendix C-3). Implemented revised Construction Inspection Performance Standard, incorporate into Co-permittee URMPs and initiate implementation. Implementing the Rural PW Maintenance and Support Performance Standard. CEP approved and funded a project to measure the loading of a variety of contaminants (e.g., mercury, copper, nickel and PCBs) from the Guadalupe River to the Bay.	Same as above including: • Evaluating the results of Table 4-1 control activities, and • Evaluating the need for Phase 1 and Phase II control activities (see August 2000 Nickel Action Plan and Table 4-2 reviewed and approved by the BMM/RS on August 23, 2000)

Table 2-5

[i] The SCVURPPP Metals Control Measures Plan (MCMP) contains an updated loads assessment and source evaluation, environmental significance evaluation, and identification and evaluation of existing and new source controls for metals in the particulate form (WWC/EOA, 1997). The analysis was conducted consistent with NPDES Permit provision C.6, and the results and measures have been incorporated into the approved SCVURPPP 1997 Urban Runoff Management Plan (URMP). Estimated loads are taken from MCMP.
[ii] Complete descriptions of all controls can be found in the 1997 URMP and the FY 98-99 and FY 99-00 Work Plans. Controls identified as AUTO, INDUSTRY and EROSION were developed as part of Metals Control Measures Plan and are contained in 1997 URMP.
[iii] Complete description of controls can be found in the Annual Work Plans submitted on March 1 of each year to the RWQCB and the final additions to the Work Plan contained in the Annual Report dated submitted each year to the RWQCB on September 15.
[iv] For South San Francisco Bay, urban runoff/storm sewers are identified on the 303(d) list as contributing to the discharge of the following pollutants that may be causing impairment: copper and nickel.
[v] Performance Standards describe a specific result, or level of effort, that constitutes the "maximum extent practicable" based on current technical knowledge, available resources and local conditions (see the SCVURPPP 1997 Urban Runoff Management Plan). Co-permittee URMPs contain community specific performance standards, standard operating procedures and best management practices. The URMPs also contain annually updated Workplans including specific actions and milestones.
[vi] Freshwater streams in the Santa Clara Valley where urban runoff/storm sewers are identified on the 303(d) list as contributing to the discharge of diazinon that may be causing or contributing to impairment include: Calabazas Creek, Coyote Creek, Guadalupe Creek, Guadalupe River, Los Gatos Creek, Matadero Creek, San Francisquito Creek, Saratoga Creek, and Stevens Creek.
[vii] Based on draft San Francisco Bay RWQCB Urban Creeks Diazinon TMDL Workplan (January 28, 1999).
[viii] In addition, sedimentation/siltation is a pollutant of concern from nonpoint sources in San Francisquito Creek and is being addressed by various cities in San Mateo County with involvement from two SCVURPPP Co-permittees (i.e., SCVWD and the City of Palo Alto).

SECTION 3

PUBLIC INFORMATION/PARTICIPATION

3. PUBLIC INFORMATION/PARTICIPATION

INTRODUCTION

The goals of the PI/P element of the Program are to identify and change behaviors that adversely affect water quality, and to increase the understanding and appreciation of streams and the Bay. The Program's FY 04-05 PI/P Work Plan provided a strategy to achieve these education and public participation goals with specific projects funded in the Program's FY 04-05 budget.

A number of ad hoc task groups (AHTGs) and work groups, comprised of Co-permittee representatives and Program staff, continued to meet and communicate via email to implement PI/P projects. A summary of the work groups' accomplishments is provided in Table 2-2.

Highlights of the accomplishments of FY 04-05 PI/P projects and ongoing projects from previous years are described below, along with an evaluation of the effectiveness of activities and measures for continuous improvement. Table 3-1 presents a summary of the projects and the effectiveness evaluation.

FY 04-05 PI/P PROJECTS

FY 04-05 PI/P Work Plan

The FY 04-05 PI/P Work Plan focused significant resources on Year Five of the Watershed Education and Outreach Campaign and on other permit-required activities. The Management Committee approved the work plan and budget for specific projects, and the work plan was submitted as part of the Program's FY 04-05 Work Plan, submitted on March 1, 2004. No comments on the FY 04-05 Work Plan were received from the Water Board.

FY 04-05 PI/P projects included:

- Watershed Education and Outreach (WEO) Campaign (this includes funding for Watershed Watch Campaign, ZunZun School Assemblies and the Watershed Watchers Program at the Alviso Education Center, Don Edwards San Francisco Bay National Wildlife Refuge)
- Pesticide User Outreach
- Mercury Pollution Prevention Outreach
- Schools and Youth Education Outreach
- Regional Coordination (participation in BASMAA PI/P Work Groups, described at the end of Section 3),
- Program Supplies/Materials Reprinting

Scopes of work for these projects were included in Section 3 of the Program's FY 04-05 Work Plan. The FY 04-05 PI/P Work Plan also includes ongoing PI/P support activities, such as support of the toll-free information hotlines, mailing brochures and Watershed Watch kits on request, etc.

Watershed Education and Outreach Campaign

The Program's Watershed Education and Outreach Campaign included funding for the Watershed Watch Campaign, the Watershed Watchers program at the San Francisco Bay

National Wildlife Refuge Environmental Education Center in Alviso ("Wildlife Refuge") and ZunZun assemblies at elementary schools in Santa Clara County.

Watershed Watch Campaign

The Watershed Watch Campaign completed its fifth year of implementation (fourth year of advertising) during FY 04-05. The Campaign focused on implementation of various outreach tasks including the media advertising campaign.

Based on the recommendations of the September 2003 Watershed Watch Campaign evaluation and the Watershed Education and Outreach Strategy, June 2004, Campaign outreach continued to use messages on specific pollution prevention actions aimed at residents.

The Watershed Watch Campaign developed a media strategy using print, radio and transit advertising. The media strategy, which ran in two flights, consisted of a fall campaign (August through October 2004) and the spring campaign (March through May 2005). The fall campaign used the popular "Got Bugs" and "Got Paint" ads; and the spring campaign focused on the mercury pollution prevention outreach and used a new ad entitled "Got Bulbs".

A draft FY 04-05 Watershed Watch Work Plan was submitted with the Program's FY04-05 Work Plan on March 1, 2004, and is attached as Appendix B-1. The fall Media Advertising Plan, completed in July 2004, is included in Appendix B-2. The spring Media Advertising Plan, focusing on mercury pollution prevention, is included as Appendix B-3.

Accomplishments

The following describes tasks completed by the Program's consultant, with assistance from Program and Co-permittee staff, during FY 04-05. The detailed Watershed Watch Campaign and Media Final Report is provided as Appendix B-4:

- **Task 2 – Materials Development** – Developed flyers, receipt flyers, ads, and posters for the Classic Car Wash, Kelley Moore Paints and Quality Tune Up promotions. Copies of these promotional materials are included in Appendix B-5.
- **Task 3 – Partner Coordination -** Continued development of the partner database and conducted numerous meetings with potential partners. Three new partnerships were developed in FY 04-05. A list of current partners and the estimated value of resources provided by the partners is provided within Appendix B-6. The estimated total value added to the FY 04-05 Campaign from partners is $467,838. This is a 22 percent increase from the same time period in FY 03-04 despite a 7.8 percent decrease in advertising budget.
- **Task 4 – School Education Outreach (Campaign-related only) –** Funded performances by the entertainment troupe ZunZun at two assemblies conducted at the Pumpkins in the Park event in October 2004.
- **Task 7 – Events** – Developed and regularly updated an events calendar that was circulated to the Co-permittees. Organized and attended five events with the Watershed Watch display booth and provided Watershed Watch kits for 16 media partner and other organizations' events. This includes four outreach events at Classic Car Wash locations and two events at Quality Tune Up locations staffed by Program and Co-permittee staff. Watershed Watch kits were distributed at these events. (See final events calendar in Appendix B-7).

- **Task 8 – Media Advertising –** During FY 04-05, the Watershed Watch Campaign consultants developed a media strategy that involved print, radio and transit advertising in two flights (August through October 2004 and March through May 2005). The fall advertising used the popular "Got Bugs" and "Got Paint" ads and targeted the Latino community. A new ad "Got Bulbs" was developed and used in the spring media campaign. The fall campaign used 23 print ads, 100 transit ads (bus taillight posters) and 1,208 radio ads (240 radio ads were in Spanish). Media advertising in the spring campaign used 10 print ads, 88 transit ads and 177 radio ads. In addition, all media partners offered free ads and announcements. Third party sponsors gained through media advertisers/partners generated a large amount of value-added resources for the Campaign. In the fall campaign, Kelly Moore Paints, Classic Car Wash and Quality TuneUp distributed more than 17,000 educational receipt flyers to their customers in Santa Clara County. Kelly Moore Paints and Classic Car Wash also offered valuable discounts on various products and services with the Watershed Watch Discount Card. Third party incentives reinforced behaviors sought by the Watershed Watch Campaign by encouraging the public to wash their cars at commercial car washes, keep their cars tuned up and dispose unwanted paint at a household hazardous waste facility. These promotions also generated traffic to the Watershed Watch web site where visitors could download the discount card and get more information about what discounts are available with the card. Media partners helped augment these promotions by conducting live-remote broadcasts at the business locations and running free ads. In the spring (mercury) media campaign, media partners KRTY and the *San Jose Mercury News* ran a contest and provided free advertising to promote the free fluorescent lamps drop-off locations offered by the County Household Hazardous Waste Program at select hardware stores. The advertising budget for the fall campaign was $99,904. Media and business partners provided a total value-added package of benefits and resources of $175,018. The advertising budget for the second phase was approximately $40,000. Media partners provided a total value-added package of benefits and resources of $74,610. Additional details are available in the final Watershed Watch Campaign and Media Report included as Appendix B-4.
- **Task 11 – Develop Web Site –** Continued to maintain and update the Watershed Watch web site. During FY 04-05, the web site had an average of 342 page views per day compared to 287 page views per day in FY 03-04. This increase is significant considering that the website was only promoted in the fall media campaign. The spring campaign promoted the County HHW Program's website. Total web page views have increased from 16,550 in FY 01-02, 59,130 in FY 02-03, 100,000 in FY 03-04 and 124,500 in FY 04-05. Additional details on web site statistics are included in Appendix B-8 and the Final FY 04-05 Campaign and Media Report (Appendix B-4)
- **Task 12 – Reports and Meetings –** Conducted numerous meetings with WEO Ad Hoc Task Group and work groups, and submitted monthly campaign reports to the AHTG and Management Committee.

Evaluation of Effectiveness

Many factors indicate that the Watershed Watch Campaign implementation during FY 04-05 was a success (See Final Campaign and Media Report (Appendix B-4) and other documents in Appendix B). Some of these include:

- The continued successful partnership with three local businesses (Classic Car Wash, Kelly Moore Paints and Quality Tune up);

- The large number of gross impressions (i.e., number of people reached by the message) made by media advertising (56,402,733);
- The rapidly increasing number of visitors to the Watershed Watch web page (average of 342 average page views per day as compared to 287 average page views per day in FY 03-04). There were 124,500 page views in FY 04-05 as compared to 100,000 page views in FY 03-04;
- The increase in calls to the Watershed Watch hotline (146 in FY 03-04 to 227 in FY 04-05) even though the fall media flight promoted the hotline. This indicates that additional people are becoming aware of the hotline and using it to obtain information on less-toxic pest controls and watersheds.
- The use of the Watershed Watch discount cards increased significantly in FY 04-05. One of the Campaign partners, Classic Car Wash, agreed to track and report the use of discount cards. During the promotion from July through December 2004, the discount card was used 357 times at Classic Car Wash locations. In addition, the discount card was downloaded from the web site 456 times from July 2004 through June 2005.
- The completion of all tasks in the FY 04-05 scope of work, with active participation of Program staff and Co-permittees.

Another measure of effectiveness was the results of a survey taken by ZunZun performance attendees after a performance at the Pumpkins in the Park event. The results include the following:

- Thirty-six people responded that they had prior knowledge of watersheds before the performance; fifty-one did not.
- Fifty-seven people responded that after the ZunZun performance, they could define a watershed; twenty-four could not.
- Seventy-two people responded that they could name ways to prevent pollution in the watershed; twenty-one people listed possible actions they could take; and fourteen people could not name any ways to prevent pollution.
- When asked if the performance was educational, entertaining, or both, fourteen people responded that it was educational; fourteen said it was entertaining, and fifty-seven said it was both.

Currently, the Program is re-evaluating the Watershed Watch Campaign. On July 5, 2005, the Program issued a Request for Proposal to select a consultant for planning and implementing the Watershed Watch Campaign during FY 05-06.

<u>The Watershed Watchers Program at the Don Edwards San Francisco Bay Wildlife Refuge, Alviso ("Wildlife Refuge")</u>

The Wildlife Refuge Environmental Education Center (EEC) offers trails and access to wildlife viewing for the public to gain first-hand knowledge of the value of Bay habitats. Visitors to the EEC can view a storm drain model and receive copies of Program materials, including the Watershed Watch kits and pesticide reduction brochures and fact sheets.

Evaluation of Effectiveness

As part of their "Watershed Watchers" Program, EEC staff conducted 110 programs that attracted 9,067 participants. Topics discussed at the workshops included watershed protection, wildlife in the watershed, gardening without chemicals, and the public's role in urban runoff pollution. The EEC's Fourth Quarter Report, including a summary of FY 04-05 accomplishments, is provided in Appendix B-10.

Pesticide User Outreach

A detailed FY 04-05 Pesticide User Outreach Work Plan was developed by Program staff and approved by the Pesticide User Outreach Work Group on October 20, 2004. The Pesticide User Outreach Work Plan included the following tasks:

- IPM store partnership program
- Media advertising
- IPM outreach to businesses and special districts
- IPM outreach events
- IPM workshops
- Development of outreach articles

The accomplishments of this project are described below:

<u>Integrated Pest Management (IPM) Store Partnership Program</u>

Background

The IPM Store Partnership Program, also known as the Our Water Our World (OWOW) program, was in its seventh year in FY 04-05. The goal of the OWOW program is to reduce toxicity caused by pesticides in stormwater, creeks and the Bay by:

- Developing partnerships with retailers who can educate the general public about water quality problems related to residential pesticide use while promoting the sales and use of less toxic alternatives; and
- Through the partnerships with retailers, educate the public about effective less-toxic pest control strategies, the value of the IPM approach to home and garden pest control and safe use and disposal of pesticides.

The Program contributes funding to and participates in the Regional IPM (OWOW) program, which is administered through BASMAA. The Regional Program, with input from IPM experts and participating stormwater programs, has developed fact sheets, promotional materials, training sessions, display materials for stores and an alternative products list. The Program and Co-permittees are responsible for recruiting stores, arranging training sessions for store employees, in-store display set-up, display maintenance and on-going contact with participating stores.

FY 04-05 Activities

During FY 04-05, the Program continued to support participating stores within the Program's jurisdiction. Program staff visited all the participating 31 stores at regular intervals and updated the display racks and shelf talkers as needed.

Outreach material purchased for the Stores Partnership Program included IPM fact sheets, shelf talkers and literature rack material (side decals, headers and property tags).

The Program also continued to use the services of Ms. Annie Joseph, an experienced IPM consultant, to provide training to store employees on selling less-toxic products. Ms. Joseph is also a consultant to BASMAA for the Pesticide Distributor Outreach Project (now funded through a Prop 13 grant to Marin County). The purpose of the Pesticide Distributor Project is to increase the amount and variety of less-toxic products on store shelves by working through the product distributors and educating the distributor sales force. This is a valuable complimentary program to the OWOW program as it helps to ensure that the products OWOW promotes will be available to support consumer choices. Ms. Joseph's presence at stores through this project made them more receptive to the local Store Partnership Program and increased the likelihood of attending the trainings.

Past Program experience with training stores indicated that employees were not amenable to attending off-site trainings. In FY 04-05, the Program continued to offer trainings as in-the-aisle trainings during working hours or on-site after-hour trainings. Approximately 71 employees representing six SummerWinds stores and one Palo Alto Hardware were trained in February 2005. Employees were also requested to fill out evaluations. The list of participating stores, their training status and a summary of evaluations received are provided within Appendix B-11.

As part of its outreach to stores, the Program also provided information to all participating stores about the stop sale date for diazinon containing products. Follow-up calls were made to all stores and these indicated that all store managers are aware of the stop-sale date and have removed all diazinon-containing products from store shelves.

Evaluation of Effectiveness

The IPM Store Partnership (OWOW) program continued to be a success in FY 04-05. The store managers and employees were enthusiastic about the program and extremely receptive to having the OWOW display in stores, as indicated in the evaluations attached in Appendix B-14. A few highlights of the evaluation are:

- 90% of the respondents agreed that the training information was useful;
- 42% agreed that the information changed their attitude about pesticides;
- 85% agreed that the information will help them sell less-toxic products; and
- 91% agreed that they would recommend the training to co-workers.

Most of the stores that responded to the training offer and received trainings were the larger stores (e.g., SummerWinds). During FY 05-06, the Program will evaluate ways to encourage smaller stores and nurseries to attend these trainings.

The BASMAA Regional IPM Committee conducted a customer intercept survey in October – November 2004 to evaluate the Store Partnership Project. BASMAA funded two surveys at two stores in each County. In order to obtain data significant enough for making County-specific conclusions, the Program provided funding to survey three additional stores in Santa Clara County. The survey included interviewing 375 customers at five stores in Santa Clara County. The evaluation indicates that:

- Overall, 31% of the people interviewed were aware of the Our Water Our World promotion;
- The fact sheet garnered the highest recognition of the four promotional items (16%), followed by the logo (15%); and

- Of the people who had identified at least one of the promotional items (n=104), 82 percent said that these items helped them identify less-toxic products or methods.

The evaluation also indicated that that "health/human safety" was the biggest motivating factor for respondents that were going to buy a less-toxic pest control product on the day they were interviewed (54%). "Environmental concern" and "Pet safety" (43% and 31%, respectively) were the next biggest motivating factors.

Based on evaluation report, the BASMAA IPM Committee recommended changing the OWOW shelf-talker tag line from *"Choose Less Toxic Products"* to "*Less Toxic to People and Pets".* It is anticipated that this tag line will motivate more people to buy less-toxic products.

The detailed Santa Clara Survey Report and the Executive Summary for the Bay Area wide Survey are included in Appendix B-12. The detailed Bay Area wide report is available on request.

Media Advertising

The Program's Watershed Watch Campaign used the "Got Bugs" radio, TV and transit ads in its fall advertising campaign. Details of the media campaign are included in the Watershed Watch Final Campaign and Media Report attached as Appendix B- 4.

Evaluation of Effectiveness

The "Got Bugs?" transit, print and radio ads caused a sharp increase in the number of web page views and hot line calls. Website visits increased significantly during the advertising phase, reaching a peak of 460 page views per day in September 2004. Additional information is available in the Watershed Watch Final Campaign and Media Report (Appendix B-4). The OWOW IPM fact sheets were mailed to people requesting information on less-toxic pest control.

IPM Outreach to Restaurants

The Program continued to provide copies of the "Don't Lay a Table for Pests" poster to County Health inspectors for distribution to food facilities. This poster has been incorporated into the "Final Construction" packet of information that is distributed to new and remodeled food facilities. In addition, these posters were also provided to Co-permittees for distribution during routine stormwater inspections.

Evaluation of Effectiveness

During FY 04-05, County Health inspectors distributed 628 posters and will continue to distribute posters to restaurants during FY 05-06.

IPM Outreach Events

Program staff and Co-permittees staffed six events at which IPM outreach was conducted. To reduce staffing requirements, five events were coordinated with Watershed Watch outreach. Outreach events in FY 04-05 included:

- Prusch Farm Harvest Festival, San Jose, October 2, 2004;
- YSI Festival, Alum Rock Park, San Jose, October 17, 2004;
- Pumpkins in the Park, Discovery Park, San Jose, October 9, 2004;

- San Jose Spring Home and Garden Show, San Jose Convention Center, San Jose – April 15 to April 17, 2005;
- Spring in Guadalupe Gardens, Columbus Park, San Jose – April 23, 2005; and
- International Migratory Bird Day, Don Edwards San Francisco Bay Wildlife Refuge, Alviso – May 14, 2005.

In addition to talking to the general public about less-toxic pest control methods, event staff distributed fact sheets; "Grow It" guides, "Backyard Bugs" brochures, "Pests Bugging You" brochures and other IPM related brochures and giveaways. The beanbag game for children was also used at most of the events.

Evaluation of Effectiveness

Overall, the six outreach events were successful in providing opportunities for educating the public about less-toxic pest control methods. Event staff distributed approximately 2,580 IPM fact sheets and brochures and 2,793 giveaways (pencils, activity books, magnets, etc.).

Community IPM Workshop

The Watershed Watch Campaign conducted an IPM workshop for the Program in coordination with the Friends of Guadalupe River Park and Gardens; Master Gardeners of Santa Clara County and SummerWinds Nursery. To improve attendance, the workshop was conducted at an existing event, Spring in Guadalupe Gardens on April 23, 2005. It featured three presentations on less-toxic gardening methods spread throughout the day of the event. Stephanie Morris, local landscape architect, Laura Monczynski of Master Gardeners and Claudia Groth of Whitney Farms were the featured speakers. The presentations were interactive and featured various examples of plants with pest problems and non-toxic or less-toxic remedies. In addition, SummerWinds Nursery donated plant giveaways (4" drought resistant grasses) to workshop attendees. In addition, workshop attendees were given a "goody" bag filled with less-toxic pest control literature, a Watershed Watch kit and some promotional items. The workshop flyer is included in Appendix B-13.

Evaluation of Effectiveness

Overall, approximately 55 people attended the presentations. Each session had approximately 20 attendees. Attendees actively participated in each presentation and asked many questions.

Regional IPM Workshop

The Program contributed funds to the Regional IPM Workshop held on June 14, 2005. An estimated 412 people from approximately 300 public agencies and private businesses attended. This includes approximately 96 participants from Santa Clara County agencies and businesses. All attendees received a resource manual complete with conference overview, importance of collaborative efforts towards promoting the adoption of IPM practices in agencies, and a compact disk of the resource manual. The speakers were extremely knowledgeable on their respective areas of specialty and were engaged with the audience (which allowed for a give and take of ideas). The morning session was devoted to advocating the case for less toxic pest control and relating ways in which agencies can establish successful IPM programs. The afternoon session focused on structural pest control and urban turf and landscape, right of way vegetation management and aquatic weed management. Various sponsors (e.g., industry, non-profit organizations and government groups) secured booths and distributed a wide variety of outreach materials to attendees.

The Program also provided support for promotion of the Going Native Garden Tour held on April 17, 2005. Approximately 2,000 people attended the tour. The tour featured 28 gardens that demonstrated environmentally sensitive gardening practices which include the use of native plants, water conservation, landscaping to prevent urban runoff, reducing pesticide and fertilizer use, etc. The final report for the Going Native Garden Tour is included in Appendix B-14.

Other IPM Outreach Activities

In addition, Program staff developed an IPM outreach article and distributed it to selected publications. The article was included in the April 2005 issue of *SF Bay Wildlife Societies Tideline* magazine and was also placed on the Friends of Guadalupe Gardens website in October 2004. The *Tideline* article is included in Appendix B- 15.

The Program conducted a mailing to provide information on less toxic pest control to neighboring special districts within the Co-permittees' jurisdiction. A letter explaining the impact of pesticide use on urban runoff was developed and mailed (along with IPM fact sheets) to all special districts. The cover letter and list of special districts are included within Appendix B-16.

Mercury Pollution Prevention Outreach Project

The Program's mercury outreach continued to focus on educating Santa Clara Valley residents on the proper disposal of fluorescent lamps. The Program coordinated its outreach with the Santa Clara County Household Hazardous Waste Program (County HHW Program). The County HHW Program received a Mercury Grant from the California Integrated Waste Management Board on September 16, 2003. This $300,000 grant proposes to: 1) develop an aggressive mercury reduction public education and outreach program targeted for residents and Heating, Ventilation, and Air Conditioning (HVAC) contractors and remodeling contractors in partnership with local planning and permitting agencies; 2) expand collection opportunities for mercury containing wastes including thermostats, button batteries and fluorescent lamps by increasing services at HHW collection events, retail stores, and community sites; and 3) conduct three Earth Day Thermometer Exchanges through a residential campaign entitled "Catch the Fever".

FY 04-05 Work Plan tasks

In FY 04-05, the County HHW Program partnered with approximately 13 retail stores to provide free fluorescent lamps drop-off locations for residents. The Program's outreach focused on promoting these drop-off locations and educating people about mercury pollution.

The Program's Mercury Outreach Pollution Prevention Work Plan included the following tasks:

- Development of In-store Signage Materials – The Program developed posters and floor decals to inform people about the availability of free fluorescent drop-off locations.
- Development of Outreach Articles –A newsletter article and press release were developed to inform residents about store drop-off locations. This information was provided to Co-permittees for use in conducting local outreach (e.g., employee newsletters or community papers).
- Implementation of a Media Campaign –The fall Watershed Watch Campaign used the Watershed Watch 'Got Paint" ad to educate people on the proper disposal of hazardous wastes (e.g., fluorescent lamps). During spring 2005, a media campaign consisting of print,

radio and transit advertising was implemented. A new ad, "Got Bulbs" was developed to inform residents about the free drop-off locations. The advertising campaign ran from March through May 2005. The Program provided funding for radio and print advertising and the Santa Clara County Integrated Waste Management Division provided funding for transit advertising. In addition, radio station KRTY offered, at no cost, an "enter-to-win" contest promoting the drop-off locations. The contest prize was a four-day/three night trip to Baja Mexico. Both KRTY and the *San Jose Mercury News* provided free advertising to support this promotion. Listeners/readers were encouraged to participate in the contest by either dropping-off their used fluorescent bulbs at participating stores or by submitting the "pledge to dispose mercury properly" contest entry form available online and within the *San Jose Mercury News*.

Copies of all mercury outreach materials are included in Appendix B-17.

Evaluation of Effectiveness

The mercury outreach media campaign included five free promotional print ads, 100 live promotional announcements, web site exposure and a vacation contest package from KRTY, third party sponsor. Posters, contest boxes and floor decals were featured at participating hardware stores within Santa Clara County. Bus signs were also visible throughout the County and featured a four-week override. Total gross impressions from media advertising were 22,127,000. The total added value of bonus spots, public service announcement's and promotions for the various media partners is estimated at $13,500.

Nearly 400 Got Bulbs contest entries were received by KRTY, mostly from the web site and the *San Jose Mercury News* ad. In addition, the quantity of used fluorescent bulbs collected at participating stores increased during the advertising period (March through May), as shown in the chart below[1].

[1] Since fluorescent light tubes come in different sizes, quantities are reported in terms of the total length (feet) of tubes collected.

During FY 04-05, the CoHHW Program collected 166,000 feet (41,597 pounds) of fluorescent lamps at 15 retail drop-off locations within Santa Clara County[2]. Rob D'Arcy, Santa Clara County Hazardous Materials Program Manager indicated that the majority of lamps collected were the four-foot fluorescent type[3]. It is estimated that approximately 0.483 kilograms of mercury was destined for recycling from fluorescent lamps collected by the CoHHW Program[4]. During FY 03-04, the CoHHW Program collected 48, 652 feet (12,163 pounds) of fluorescent lamps. In addition, 155 pounds of devices which contained elemental mercury (includes thermostats, thermometers and other products) and 450 mercury-containing thermometers were collected during FY 04-05.

Schools and Youth Education Outreach

The Watershed Action Fund Work Group was reformed as the Schools and Youth Education Outreach Work Group in FY 02-03 to oversee various projects related to outreach to school children. The following tasks were accomplished under this project:

General Outreach to Schools

The Program and its Co-permittees conduct various school outreach programs individually and through the Program. These activities are described in detail in the tables provided in Appendix B-18.

Outreach to Elementary Schools

Each year, the Program's Schools and Youth Education and Outreach Work Group provide a list of schools for ZunZun to contact. In addition to schools with high Hispanic populations, the Work Group continued to extend outreach to schools with high Asian/Pacific Islander populations. The Program's Schools and Youth Outreach Work Group researched demographics of Santa Clara County and generated a list of 103 schools for ZunZun to contact. The ZunZun performances use physical comedy, audience participation and musical instruments to educated teachers and children about watersheds and stormwater pollution prevention. ZunZun continued to distribute the two vocabulary lists (one for grades K-2 and the other for grades 3-6) of terms used in the presentation. These lists were mailed to every school prior to the presentation.

Evaluation of Effectiveness

During FY 04-05, ZunZun conducted 50 assemblies reaching 15, 722 students in grades K-5 at 27 schools in seven cities. Assemblies were evaluated using postage-paid evaluation cards that were distributed to all teachers present at the performances. The Program received completed evaluation cards from 188 teachers. Overall, the feedback has been very positive and indicates an increase in the students' knowledge about watersheds and pollution prevention. A few highlights of the evaluation are:

---

[2] Information regarding the collection of mercury containing products (e.g., fluorescent lamps, thermostats, thermometers and other products) during FY 04-05 and the weight of a four-foot fluorescent lamp was obtained from a memorandum *entitled Fiscal Year 2004/2005 HHW Program Update* (dated August 2, 2005). Rob D'Arcy, Santa Clara County Hazardous Materials Program Manager, prepared this memorandum.

[3] Information provided with electronic mail (dated August 8, 2005) to John Fusco from Rob D'Arcy.

[4] Based on a 1999 National Electrical Manufacturers Association survey entitled *Environmental Impact Analysis: Spent Mercury-Containing Lamps, January, 2000 (Fourth Edition*), the average four-foot fluorescent lamp contains about 11.6 milligrams (mg) of mercury. For the sake of estimating the amount of mercury sent for recycling, approximately 41,600 four-foot fluorescent lamps were collected. As a result, 0.483 kilograms of mercury destined for recycling is a rough estimate.

- Thirty-five teachers (out of the 188 that sent completed evaluation cards) indicated that 50 percent of their students know what a watershed is; 64 teachers indicated that 75 percent of their students know what a watershed is and 36 teachers indicated that 100 percent of their students know what a watershed is.

- Sixteen teachers indicated that 50 percent of their students could name a way to prevent pollution in the watershed; 54 teachers indicated that 75 percent of their students can name a way to prevent pollution in the watershed; and 96 teachers indicate that 100 percent of their students can name a way to prevent pollution in the watershed.

Overall, teachers had positive comments on the presentation. A few recommendations for improvement include using slides to demonstrate the flow of water within a watershed and providing additional information on damage done by human activities within a watershed. The Schools Work Group will discuss these recommendations as ways to improve ZunZun performances.

ZunZun's Final Report and the Teachers' Evaluation Report are included in Appendix B-9. Highlights of the teachers' evaluations are presented on pages 3, 4 and 5. Comments of the effectiveness of evaluation for Co-permittee schools outreach are included within Appendix B-18.

Outreach to Middle Schools

In response to a request by Water Board staff, the Program conducted a gap analysis study in FY 03-04 to identify gaps in school outreach conducted by the Program and its Co-permittees.

The objective of the study was to conduct a detailed review and analysis of the data to guide further school outreach. Data collected from Co-permittees was analyzed and GIS maps were developed to present the data. The final Schools Outreach Gap Analysis Report was submitted to the Water Board within the FY 02-03 Annual Report. The study identified some geographic gaps in outreach and gaps at the middle school level, and recommended that the Program and Co-permittees develop Program-wide outreach that targets the middle/intermediate school level. In addition, it was recommended that outreach increase to underserved and underrepresented communities.

The Work Group evaluated various methods for targeting outreach to this grade level and identified a teachers training program as the best means of maximizing outreach with limited resources. After considering several options, the work group decided to use the City of San Jose's South Bay Water Connections "Wacky Watersheds" teachers training workshop. Currently, the workshop is structured as a full-day Saturday workshop offered to all teachers within the San Jose POTW service area. In FY 03-04, the Work Group selected three Project WET lessons plans on watershed education at the middle school level for inclusion in the "Wacky Watershed" binder, and contracted with an educator to correlate the lesson plans to California State Standards.

In FY 04-05, the Work Group purchased tote bags for teachers for packaging the workshop materials (binder, video tapes and a map). The Work Group also recommended that teachers should be offered stipends as incentives to increase attendance at the workshop. Teachers will receive the stipend only after the Work Group receives documented completion of their proposed watershed project. This effort will be piloted in FY 05-06. Work group members are also trying to coordinate with their school districts so this workshop can be made available to

middle school teachers at their "in-service" training days. Currently, this workshop is available only a few times a year on Saturdays.

Other Program PI/P Support Activities

Program's Toll-Free Telephone Numbers

The Program maintained two toll free telephone numbers, the Program's information number (800-794-2482) and the Watershed Watch hotline (866-WATERSHED), for calls from the general public and requests for information. Program staff responded to about 227 calls during FY 04-05 and sent information materials to about 157 of these callers.

PI/P Material Reprints and Supplies

The Program purchased and coordinated Co-permittee orders for reprinting the storm drain stencils, Bay Nature magazine's Soil Supplement and 400 copies of the Oakland Museum Watershed maps.

ONGOING PI/P PROJECTS

Creek Clean-ups

In FY 04-05, the Creek Connection Action Group sponsored two creek clean-up events: Coastal Clean-up Day on September 18, 2004 and National Rivers Clean-up Day on May 21, 2005. The Program provided financial support for one of the events (National Rivers Clean-up Day). A total of 1,618 volunteers participated in cleaning 61 sites and removed approximately 39,730 pounds of trash from the creeks during the two events. This is the largest number of sites that have been cleaned up as part of these two events since the events began in Santa Clara County.

Results by clean-up event for FY 04-05 are as follows:

	Coastal Clean-up Day Sept. 18, 2004	National Rivers Clean-up Day May 21, 2005	Totals
Number of sites	33	28	61
Number of volunteers	970	648	1,618
Pounds of recyclables	6,426	1,464	7,890
Pounds of trash	24,351	15,379	39,730
Pounds of material (trash plus recyclables)	30,777	16,843	47,620

Evaluation of Effectiveness

To evaluate the effectiveness of the two annual creek clean-up events, data from the past seven years of events were compiled and reviewed. The table below presents the total numbers of sites, numbers of volunteers, and pounds of materials collected each year.

Summary Results of Creek Clean-up Events[5], September 1998 – May 2005

	FY 98-99	FY 99-00	FY 00-01	FY 01-02	FY 02-03	FY 03-04	FY 04-05	Annual Average	Total
No. of sites	35	35	41	37	48	56	61	45	313
No. of volunteers	1,877	1,586	1,745	1,742	2,091	1,943	1,618	1,800	12,602
Lbs. of recyclables				13,750	8,071	6,537	7,890	9,062	36,248
Lbs. of trash	84,582	43,475	58,108	59,340	44,883	36,718	39,730	52,405	366,836
Total lbs. collected	84,582	43,475	58,108	73,090	52,954	43,255	47,620	57,583	403,084

Beginning in FY 01-02, some site managers implemented a procedure for separating out recyclable materials from trash prior to weighing it. Thus, the total pounds of material collected are the sum of the recyclables and trash quantities. According to the Santa Clara Valley Water District, this procedure is done more frequently at Coastal Clean-up Event sites than at National Rivers Day sites. Since this procedure is not done at all sites, it is more appropriate to compare the total quantities of materials collected rather than the individual components.

The total amount of trash and recyclables collected during the two creek cleanup events each year are plotted in the figure below:

[5] The data presented in this table represent the total quantities from the two major creek cleanup events in Santa Clara County. The data do not include quantities of trash that may have been collected by the Santa Clara Valley Water District (SCVWD) or by other volunteer groups during other times of the year. The SCVWD has an "Adopt-a-Creek" program in which community groups (e.g., scout troops and schools) agree to care for a certain section of creek. Care includes trash pickup at least twice during the year. These groups are not required to report the amount of trash they collect. A section of creek that is regularly cleaned may not be included as one of the sites involved in the two major creek cleanup events.

From the data in the table and figure, the following conclusions can be drawn:

- The number of volunteers for the events has remained relatively constant, averaging 1,800 per year plus or minus ten percent.
- The number of sites has increased over time to a high of 61 in FY 04-05.
- The total amount of trash and recyclables collected by volunteers indicates a decreasing trend over the past seven years. In fact, this amount has decreased to nearly half of the amount collected in FY 98-99. This reduction in trash and recyclables is likely related to the success of outreach being provided to the general public about not dumping trash in creeks, rivers and storm drains. It may also be due to the increase in Adopt-a Creek and other trash reduction programs encouraging trash pickup during other times of the year (see footnote on previous page).

Outreach Campaign for NOI Filers

The goal of this project, funded solely by the City of San Jose, is to increase the level of knowledge among targeted businesses on the General Industrial Activities Stormwater Permit (GIASP), Notice of Intent (NOI) and stormwater pollution prevention plan (SWPPP) requirements. The targeted businesses are specific industries in the City of San Jose with potential to discharge copper and nickel (identified by SIC code). This outreach project is coordinated with San Jose's Industrial Storm Water Monitoring Pilot Program (Task "IND-2" from the Metals Control Measures Plan).

During FY 04-05, the City of San Jose completed this project. Select facilities were contacted and encouraged to comply with the State's GIASP. The contact letter included a checklist to help determine if the facility was required to comply with the GIASP, a flow chart detailing the development and implementation of a SWPPP and a reprint of a previously published *Tributary Tribune* article (which contained information about the GIASP and the Storm Water Enforcement Act of 1998 (AB 2019).

The City sent the "contact package" to 178 facilities within San Jose. The mailing list and copies of outreach materials are included in Appendix B-19. These facilities were selected based on the following criteria:

- Facilities listed in the City's Watershed Enforcement's Industrial and Commercial database (EEDMS);
- Facilities with a GIASP Category of 8 or 10 (Based on SIC Code); and
- Facilities documented by City Watershed Enforcement Inspectors as needing to file a NOI (or if no determination was made regarding their filing status).

Facilities that already filed (or were determined that they did not need to file) were not contacted. Initially, the "contact package" was to be sent to all facilities with the above criteria and to facilities with the SIC code identified in the 1998 Industrial Stormwater Quality Monitoring Pilot Project. However, the City of San Jose decided to send the information to all facilities (within their database) that may be subject to the GIASP.

To date, three calls were received from facilities requiring additional information. Two callers filed their NOIs and were inquiring about additional requirements. These facilities were referred to the Water Board for further information. The third caller used the checklist and self-

determined that they had no exposure. City of San Jose staff informed the caller that the GIASP only applied to facilities in Categories 8 and 10 with exposure and that their determination will be confirmed during the next inspection.

The following tasks have been accomplished for this project:

- Provided training on GIASP requirements to City of San Jose Watershed Enforcement inspectors. During each inspection, inspectors determine if the GIASP applies and make recommendations to the facility owners/operators based on their findings. Facilities required to file are reported to the Water Board annually within the City's URMP Annual Report (See *2.C Companies Requiring NOI Based on SIC but Have Not Filed and 2.C Companies Requiring NOI Based on Exposure but Have Not Filed*).

- Provided NOI filing information to twenty-five industry representatives at the San Jose Industrial User Academy Training on April 27, 2005. Information included: regulatory background and requirements; steps to come into compliance; and details on determining exposure. Evaluations indicated that 91 percent agreed or strongly agreed that the workshop was useful. Eighty-six percent indicated an increase in understanding for the big picture of water regulations.

- Posted NOI filing information on the City of San Jose web site.

- Produced an all-purpose BMP brochure entitled *Preventing Storm Drain Pollution* in FY 03-04. It details general stormwater BMP information and is being distributed to all facilities as part of routine stormwater facility inspections. In FY 04-05, the brochure was translated to Vietnamese and Spanish. Printing and distribution of translated brochures is scheduled to occur in FY 05-06.

Restaurant BMP Materials

In FY 99-00, a work group comprised of Program staff, representatives of the California Restaurant Association and Santa Clara County Department of Environmental Health (DEH), and Co-permittee stormwater inspectors developed a strategy of targeting food handling facility personnel with one simple message and continuously reinforcing the message over a three-year period. The focus for the first three-year period is on the improper discharge of wash water.

In FY 00-01, a restaurant wash water BMPs kit was created for County Health Inspectors to hand out to restaurant managers during inspections (see FY 00-01 Annual Report). The Santa Clara County Department of Environmental Health inspectors (Consumer Protection Division) have been distributing this kit to every newly constructed and remodeled food facility in the County. In FY 02-03, one of the signatories of the cover letter was changed. The letter was updated for distribution in FY 03-04. In FY 04-05, the poster was distributed to 628 food facilities.

Municipal Employee Training Modules

The goal of this project is to develop a municipal employee-training curriculum with modules to address various municipal activities that have potential impacts to stormwater. The training curricula provide education on stormwater pollution, technical training on the use of BMPs, and examples of practical BMP application. Generic modules are being developed that can be customized for each agency. In addition, a "Train the Trainer" workshop will be held to introduce

and explain the applicability of the training modules to designated trainers from each Co-permittee.

During FY 01-02, training topics were selected and developed into individual modules using Microsoft Power Point. Training modules relating to BMPs for corporation yards, storm drain operation and maintenance, streets, roads and highway maintenance and pest management were developed by Program staff. The project was put on hold due to work on higher priority items in FY 02-03 and FY 03-04. A fifth training module was developed in FY 04-05 on mercury pollution prevention. The Program will begin planning for the workshop (tentatively scheduled for spring 2006).

REGIONAL COLLABORATION

Bay Area Stormwater Management Agencies Association (BASMAA) PI/P Committee

The BASMAA PI/P Committee has not met for some time, due to the Committee's interest in focusing its efforts on three active work groups: Media Relations, Regional IPM Store Partnership Program and Regional Advertising Campaign. Program staff participated in the Media Relations and Regional IPM Partnership Program, and the Program benefited from regional PI/P activities, as described below.

Media Relations Campaign

Program staff participated in the development and implementation of the sixth year of the joint Media Relations effort supported by BASMAA and the Bay Area Clean Water Association (BACWA). The primary goals of the campaign are to develop long-term relationships with the media and to generate media coverage that would encourage individuals to adopt behavior changes to prevent water pollution. The Program contributed funding (approximately $7,575) to the campaign as part of its baseline budget contribution to BASMAA.

A copy of the BASMAA/BACWA Regional Media Relations Campaign Final Report is included in Appendix B-20. Campaign accomplishments included the following:

- During FY 04-05, the media covered thirty-six articles and broadcast stories. This includes 9 print articles, 7 television stories, 7 radio stories and 10 web stories and 3 wire stories.
- The total value of the coverage is estimated at $78,250. The figure is less than the coverage value in FY 03-04 because some pitches were not pursued due to a lack of a project manager (for part of the year) and decisions by the Media Relations Work Group.
- A new component of the campaign was requesting television meteorologists to include water pollution prevention messages in their broadcasts. Simple messages were developed and emailed during times of heavy rains in the early spring 2005. Initial feedback from meteorology departments was positive.

Regional IPM Store Partnership Program

The IPM Store Partnership Program, also known as the Our Water Our World (OWOW) program, completed its seventh year in FY 04-05. The Program contributed funds and participated in the Regional Program, which is administered through BASMAA (the Program's contribution for FY 03-04 was approximately $6,060). The Regional Program, with input from IPM experts and participating stormwater programs, provides fact sheets, promotional materials, training sessions, display

materials for stores, and an alternative products list. The Program and Co-permittees are responsible for recruiting stores, arranging training sessions for store employees, in-store display set-up, display maintenance, and on-going contact with participating stores.

The Regional Program coordinated a print run of fact sheets and store display materials with regional funding (BASMAA and the Bay Area Pollution Prevention Group) and local funding. The Regional Program also conducted a customer intercept survey to evaluate the Our Water Our World program. The Executive Summary of survey results is included in Appendix B-12. The detailed customer survey report is available upon request.

Pesticide Distributors Outreach Project

During FY 02-03, the Program contributed $5,000 to a BASMAA Task of Regional Benefit known as the Pesticide Distributors Outreach Program, an expansion of the IPM Store Partnership concept to target distributors of pesticide products to retail stores. The purpose of the program is to increase the amount and variety of less-toxic products on store shelves by working through the product distributors and educating the distributor sales force. This is a valuable complimentary program to the OWOW program as it helps to ensure that the products OWOW promotes will be available on the shelves to support consumer choices and makes stores more willing to participate in the OWOW program. The Distributors Outreach Program achieved significant success and translated into more stores wanting to participate in the OWOW program in the future. In May 2003, Marin County received a Proposition 13 grant from the State to expand this program into State Water Board Regions 1 (North Coast) and 3 (Central Coast) and create a website for the program (www.ourwaterourworld.org). The Pesticide Distributors Outreach Project for Region 2 is also being continued through this grant funding.

The Program is continuing to support this project by offering support whenever tabling or training events are conducted within Santa Clara County stores.

BASMAA Regional Ad Campaign

In FY 03-04, the Program's WEO AHTG recommended participating in the Regional Ad Campaign for FY 04-05. During FY 02-03 and FY 03-04, the Regional Ad Campaign (RAC) implemented the "Beautiful Watersheds" advertising campaigns for increasing the public's awareness about watersheds. The ads were broadcast on radio and television. In FY 04-05, new ads focusing on trash were developed. Both TV and radio spots used trash/litter to make the connection between how pollutants flow through storm drains to reach creeks or the Bay. These ads were used concurrently with the "Beautiful Watersheds" ads. Advertising was conducted from August 16 to October 3, 2004. During the course of the Fall 2004 Campaign, BASMAA reached 76.6% of adults 18+, 6.8 times and 74.4% of women 25-54, 6.5 times. A total of 960 radio and television spots aired over the campaign period.

The Regional Ad Campaign Committee conducted a pre-campaign awareness survey in FY 02-03. In FY 04-05, a post campaign awareness survey was conducted. Since the Program only began participating in the campaign in FY 04-05, Santa Clara County residents were not included in this survey. A few highlights of the survey are:

- When asked about the main impacts of water pollution problems, water quality showed a significant increase when compared to the 2002 baseline study (2004: 15%; 2002:9%).

- Nearly a quarter (24%) as compared to 17 percent in 2002 of the respondents pointed to "people/everyone/residents" in response to the open-ended question regarding the causes of water pollution.
- Almost half of the respondents reported using pesticides or weed killers (45%) or fertilizers (48%) in the past year. Almost a third (31%) of the respondents knew to take leftovers to a household hazardous waste collection center, while 16 percent indicated that they threw the leftovers in the trash.
- A significant majority (65%) of the respondents reported using fluorescent bulbs and some (17%) reported using mercury thermometers. Half of these respondents admitted to throwing one or the other in the trash.
- When respondents were asked to agree or disagree with a statement that the storm drain system and sewer system sharing the same underground pipes, 36 percent answered incorrectly and another 27 percent did not know.

The detailed Regional Ad Campaign survey report is available upon request.

Other External Coordination

Program staff tracked PI/P activities and attended meetings (as needed) conducted by the following local and regional programs in FY 04-05:

- California Stormwater Quality Association, PIPP Forum
- Santa Clara County Household Hazardous Waste Program
- Bay Area Pollution Prevention Group
- Watershed Management Initiative's Outreach Subgroup.

Continuous Improvement

The status of PI/P continuous improvement tasks, identified during the evaluation of projects in previous years, is presented in Table 2-4 of Section 2. There were no PI/P continuous improvement tasks identified in FY 04-05. Program staff will obtain input from Co-permittees on continuous improvement items for FY 05-06 and document any agreed upon items in the Program's FY 06-07 Work Plan submittal (March 1, 2006).

Future Tasks

Section 3 of the Program's FY 05-06 Work Plan (submitted March 1, 2005) describes the PI/P activities planned for FY 05-06.

Table 3-1
Evaluation of PI/P Projects Conducted During FY 04-05 (New and Ongoing)

Project Title	Project Description[1]	Type of Outreach[2]	Summary of Evaluation of Effectiveness[3]
Watershed Education and Outreach Campaign	This project included funding for conducting year five of the Watershed Watch Campaign, ZunZun Schools Assemblies and the Watershed Watchers Program at the Alviso Education Center (San Francisco Bay Wildlife Refuge), and educational assemblies at elementary schools by the musical group ZunZun	G,T,P,C	**Effective**- Some measures of the success of the FY 04-05 Watershed Watch Campaign include: the number of new campaign partners (3); value-added resources from partners ($467,828); Watershed Watch events (5); partner events (16); gross impressions from advertising (56,402,733); average of 342 page views a day (compared to 287 in FY 03-04) at the Watershed Watch website; and the use of discount cards (the card was used approximately 357 times at the four Classic Car Wash locations). **Alviso Ed Center** – 110 programs were conducted and 9,067 people participated. **ZunZun Assemblies** – ZunZun conducted 50 assemblies at 27 schools reaching 15,722 students and their teachers
Pesticide User Outreach – "Household Chemical Management" and "Local IPM Store Partnership Program"	Implementation of the following tasks: • Conduct media advertising on less-toxic pest control methods • Implement the local store partnership program • Conduct IPM outreach at events • Conduct IPM workshops • Conduct IPM outreach to businesses	G,T,P,C	**Effective** – • The Watershed Watch Campaign advertising used the "Got Bugs" print, radio and transit ads in fall of 2004. Website visits increased significantly during the advertising phase, reaching a peak of 460 page views per day in September 2004. Based on the number of requests for information on the hotline and website, the advertising campaign was a success.

[1] For detailed project descriptions, see FY 01-02 Annual Report, Section 3, and FY 02-03 Work Plan, Section 3.
[2] Type of outreach codes: G = General, T = Targeted, P = Public Education, C = Citizen Participation
[3] Please refer to text in Section 3 for more detailed effectiveness evaluations and recommendations for improvement.

Table 3-1
Evaluation of PI/P Projects Conducted During FY 04-05 (New and Ongoing)

Project Title	Project Description[1]	Type of Outreach[2]	Summary of Evaluation of Effectiveness[3]
	• Other outreach as needed		• The local IPM Store Partnership Program continued to be a success in FY 04-05. Ms. Annie Joseph, who is also a consultant to BASMAA on the Pesticide Distributors Outreach project, was contracted to provide training on selling less-toxic products to store employees. Ms. Joseph's presence at stores through the Pesticide Distributors project (this project is now being funded through a Prop 13 Grant) made them more receptive to the local Store Partnership Program and willing to attend trainings. Ms. Joseph trained 71 employees representing seven stores. Program staff maintained all 31 participating stores (set-up, restocking of fact sheets, etc.) during FY 04-05. This ensured regular maintenance of stores and helped build an ongoing relationship with the stores. • IPM outreach was conducted at six events. Event staff distributed approximately 2,580 IPM fact sheets and brochures and 2,793 giveaways (pencils, activity books, magnets, tattoos etc.). • The Program contributed to the Regional IPM Workshop. It was hosted by Alameda County this year. Approximately 412 people attended the workshop. • The Program's Watershed Watch Campaign conducted a community IPM Workshop at the Spring in Guadalupe Gardens event on April 23, 2005. The workshop entitled "Greening Your Green Thumb" included three

Table 3-1
Evaluation of PI/P Projects Conducted During FY 04-05 (New and Ongoing)

Project Title	Project Description[1]	Type of Outreach[2]	Summary of Evaluation of Effectiveness[3]
			presentations on less-toxic gardening methods, spread throughout the day of the event. Approximately 50 people attended the presentation. • The Program continued to provide copies of the "Don't Lay a Table for Pests" poster to County Health Inspectors for distribution to newly constructed or remodeled food facilities. County Health inspectors distributed 628 posters during FY 04-05. • The Program contributed funds for promoting the Going Native Garden Tour 2005. The tour was held on April 17, 2005 and attracted 2,000 people. The tour featured 28 gardens. Featured gardens demonstrate environmentally sensitive gardening practices that include the use of native plants, water conservation, landscaping to prevent urban runoff, reducing pesticide and fertilizer use, etc. • The Program also developed an article on IPM which was included in the April issue of *Tideline* and posted on the Friends of Guadalupe River website. • The Program conducted a mailing to inform special districts about the impact of pesticides on urban runoff. Information was sent to about 50 special districts. **Needs Improvement** – The Work Group needs to explore ways to encourage employees from more stores and nurseries to attend trainings on selling less-toxic pesticides. During FY 04-05, most of

Table 3-1
Evaluation of PI/P Projects Conducted During FY 04-05 (New and Ongoing)

Project Title	Project Description[1]	Type of Outreach[2]	Summary of Evaluation of Effectiveness[3]
			the employees trained were from SummerWinds Nursery.
Mercury Pollution Prevention Outreach Project	The Program worked closely with the Santa Clara County Household Hazardous Waste Program in developing the outreach plan. Outreach activities implemented during FY 04-05 include the following: • Development of In-store Signage Materials – The Program developed posters and floor decals to inform people about the availability of free fluorescent drop-off locations. • Development of Outreach Articles – A newsletter article and a press release were developed to inform residents about the store drop-off locations. These were provided to Co-permittees for conducting local outreach (e.g., employee newsletters or community papers). • Implementation of Media Campaign – The fall Watershed Watch Campaign used the Watershed Watch 'Got Paint" ad to educate people on the proper disposal of hazardous wastes (e.g., fluorescent lamps). During spring 2005, a media campaign consisting of print, radio and transit advertising was implemented. A		**Effective** – Total gross impressions from media advertising were 22,127,000. The total added value of bonus spots, public service announcements and promotions for the various media partners is estimated at $13,500. Nearly 400 Got Bulbs contest entries were received by KRTY, mostly from the web site and the *San Jose Mercury News* ad. In addition, the quantity of used fluorescent bulbs collected at participating stores also increased during the advertising period (March through May). Additional details are provided within Section 7 and Appendix B-17 of this Annual Report. The CoHHW Program collected 166,000 feet (41,597 pounds) of fluorescent lamps at 15 retail drop-off locations within Santa Clara County[4]. Rob D'Arcy, Santa Clara County Hazardous Materials Program Manager indicated that the majority of lamps collected were the four-foot fluorescent type[5]. It is estimated that approximately 0.483 kilograms of mercury was

[4] Information regarding the collection of mercury containing products (e.g., fluorescent lamps, thermostats, thermometers and other products) during FY 04-05 and the weight of a four-foot fluorescent lamp was obtained from a memorandum *entitled Fiscal Year 2004/2005 HHW Program Update* (dated August 2, 2005). Rob D'Arcy, Santa Clara County Hazardous Materials Program Manager, prepared this memorandum.
[5] Information provided with electronic mail (dated August 8, 2005) to John Fusco from Rob D'Arcy.

Table 3-1
Evaluation of PI/P Projects Conducted During FY 04-05 (New and Ongoing)

Project Title	Project Description[1]	Type of Outreach[2]	Summary of Evaluation of Effectiveness[3]
	new ad, "Got Bulbs" was developed to inform residents about the free drop-off locations. The advertising campaign ran from March through May 2005. The Program provided funding for radio and print advertising and the Santa Clara County Integrated Waste Management Division provided funding for transit advertising. In addition, radio station KRTY offered, at no cost, an "enter-to-win" contest promoting the drop-off locations. The contest prize was a four-day/three night trip to Baja Mexico. Both KRTY and the *San Jose Mercury News* provided free advertising to support this promotion. Listeners/readers were encouraged to participate in the contest by either dropping-off their used fluorescent bulbs at participating stores or by submitting the "pledge to dispose mercury properly" contest entry form available online and within the *San Jose Mercury News*.		destined for recycling from fluorescent lamps collected by the CoHHW Program[6]. In addition, 155 pounds of devices which contained elemental mercury (includes thermostats, thermometers and other products) and 450 mercury-containing thermometers were collected during FY 04-05.
Schools and Youth Outreach Work Group	In FY 02-03 the Watershed Action Fund was reformed as the Schools and Youth Outreach Work Group. The group aimed to accomplish the following tasks: • Provide input for conducting 50 ZunZun school assemblies and report on activities	T,P,C	**Effective**- During FY 04-05, ZunZun performed at 27 schools reaching 15, 772 children. The teacher evaluations of the performances indicate they were successful in increasing the children's knowledge about watersheds and pollution prevention activities (see Appendix B-9).

[6] Based on a 1999 National Electrical Manufacturers Association survey entitled *Environmental Impact Analysis: Spent Mercury-Containing Lamps, January, 2000 (Fourth Edition*), the average four-foot fluorescent lamp contains about 11.6 milligrams (mg) of mercury. For the sake of estimating the amount of mercury sent for recycling, approximately 41,600 four-foot fluorescent lamps were collected. As a result, 0.483 kilograms of mercury destined for recycling is a rough estimate.

Table 3-1
Evaluation of PI/P Projects Conducted During FY 04-05 (New and Ongoing)

Project Title	Project Description[1]	Type of Outreach[2]	Summary of Evaluation of Effectiveness[3]
	conducted individually by Co-permittees. • Identify a program for increasing outreach to middle schools		In FY 02-03, the Work Group collected data on outreach (conducted in FY 01-02) from all Co-permittees and completed the gap analysis study. The study indicated that 47 percent of all schools in Santa Clara Valley receive outreach from the Program and/or Co-permittees. The study identified a gap in outreach at the middle school level and recommended targeting outreach to this level. In FY 03-04, the Work Group identified an existing teachers training program at the City of San Jose for addressing gaps in outreach. To include additional information on watersheds, the Work Group identified three lesson plans for this program. In FY 04-05, the Work Group purchased tote bags for teachers for packaging the workshop materials (binder, video tapes and a map). The Work Group also recommended that to increase attendance at the workshop, teachers should be offered stipends as incentives. Teachers will receive the stipend only after the Work Group receives documented completion of their proposed watershed project. This effort will be piloted in FY 05-06. In addition, the correlated lessons will be included in the "Wacky Watershed" binder.
Program Supplies	Conduct reprints of materials for Program use and order supplies as necessary.	G,T,P,C	**Effective**- The Program Supplies budget was used toward printing storm drain stencils, Bay Area Nature Soil Supplement and Oakland Museum Watershed Maps.
Program Toll Free Number	Answer the Program's toll free number (1-	G,P	**Effective**- Both phone numbers are being used to

Table 3-1
Evaluation of PI/P Projects Conducted During FY 04-05 (New and Ongoing)

Project Title	Project Description[1]	Type of Outreach[2]	Summary of Evaluation of Effectiveness[3]
	800-794-2482) and the Watershed Watch Campaign's toll free number, 1-866-WATERSHED, and respond to requests for information.		contact the Program and request materials. Phones are answered and messages are checked daily. During FY 04-05, Program staff responded to over 227 calls (from individual residents, business owners and local agency representatives); and provided materials to approximately 157 of these callers.
Creek Cleanup Events	Work with Creek Connections Action Group to organize and fund two creek cleanup events per year.	G,C	**Effective**- Provided support for advertising for one event. A total of 1,618 volunteers participated in cleaning 61 sites and removed nearly 39,730 pounds of trash. This is the largest number of sites for the past seven years. Coordinated with Watershed Watch Campaign – received coverage on two radio stations and giveaway items from Keep California Beautiful. The quantities of trash and recyclables have shown a decreasing trend since 1998, which is likely due in part to the success of public outreach about not dumping trash in creeks, rivers and storm drains.
Industrial Outreach to NOI Filers	Increase the knowledge among targeted businesses of the Industrial General Permit, NOI, and SWPPP requirements. Continue work on industrial business database and implementing outreach and evaluation plan. (Conducted with City of San Jose).	T,P	**Effective-** During FY 04-05, the City of San Jose completed this project. Select facilities were contacted and encouraged to comply with the State's GIASP. The contact letter included a checklist to help determine if the facility was required to comply with the GIASP, a flow chart detailing the development and implementation of a SWPPP and a reprint of a previously published *Tributary Tribune* article (which contained information about the GIASP and the Storm Water Enforcement Act of 1998 (AB 2019). The City sent the "contact package" to 178 facilities within San Jose. Facilities were selected based on the following criteria:

Table 3-1
Evaluation of PI/P Projects Conducted During FY 04-05 (New and Ongoing)

Project Title	Project Description[1]	Type of Outreach[2]	Summary of Evaluation of Effectiveness[3]
			• Facilities listed in the City's Watershed Enforcement's Industrial and Commercial database (EEDMS); • Facilities with a GIASP Category of 8 or 10 (Based on SIC Code); and • Facilities documented by City Watershed Enforcement Inspectors as needing to file a NOI (or if no determination was made regarding their filing status). Initially, the "contact package" was to be sent to all facilities with the above criteria and to facilities with the SIC code identified in the 1998 Industrial Stormwater Quality Monitoring Pilot Project. However, the City of San Jose decided to send the information to all facilities (within their database) that may be subject to the GIASP. In addition, the City of San Jose provided NOI information at its Industrial User Academy training held April 27, 2005. An all-purpose BMP brochure entitled *Preventing Storm Drain Pollution* was also translated to Vietnamese and Spanish. Printing and distribution of translated brochures is scheduled to occur in FY 05-06.
Restaurant BMP	Distribute a restaurant wash water BMP packet for County Health Inspectors to hand out to restaurant managers via County Health Inspectors at the time of their inspections	T,P	**Effective** - In FY 04-05, County Health inspectors distributed the wash water BMPs and the poster to 628 newly constructed and remodeled food facilities in the County.
Municipal Employee Training Modules	Develop a municipal employee training curriculum with modules to address various	T,P	**Cannot be evaluated at this time** - In FY 01-02, four Power Point presentations were developed

Table 3-1
Evaluation of PI/P Projects Conducted During FY 04-05 (New and Ongoing)

Project Title	Project Description[1]	Type of Outreach[2]	Summary of Evaluation of Effectiveness[3]
	municipal activities that have potential impacts to stormwater. Conduct a "Train the Trainer" workshop to introduce and explain the applicability of the training modules to designated trainers from each Co-permittee.		on BMPs for corporation yards; storm drain O&M; road maintenance; and pest management. In FY 02-03 and FY 03-04, this project was put on hold due to work on higher priority items. During FY 04-05, a fifth training module was developed on mercury pollution prevention. Upon completion and approval of the funding Co-permittees, planning will begin for the workshop (tentatively scheduled for spring 2006).
Regional Collaboration	Participate in the following BASMAA PI/P work groups and tasks of regional benefit. Attend meetings as needed, participate in review of products, and obtain input from Co-permittee representatives. • Media Relations Work Group • Regional IPM Store Partnership Program Work Group • Pesticide Distributors Outreach Project	 G,P G,P G,P T	**Effective**- See Media Relations Campaign Final Report in Appendix B-20. **Effective**- Contributions to BASMAA helped fund fact sheet reprints and development of new fact sheets.

SECTION 4

MONITORING ACTIVITIES

4. MONITORING ACTIVITIES

INTRODUCTION

During FY 04-05, a considerable amount of water quality data and information was gathered and/or assessed by the Program through the direct implementation of and active participation in monitoring-related activities in the San Francisco Bay Area. The Program's monitoring resources were primarily spent preparing permit-required submittals, continuing to implement the Program's Revised Multi-Year Receiving Waters Monitoring Plan (Revised Multi-Year Plan), participating in regional monitoring-related programs, conducting special studies and implementing pollutant-specific control programs.

This section provides a brief background of the Program's monitoring and assessment program and summarizes significant monitoring-related activities conducted during FY 04-05. The activities described in this section are consistent with Provisions C.7 and C.9 of the Program's NPDES Permit. Each summary includes the following information, to the extent possible:

1) A description of the relationship to NPDES Permit requirement(s) and management question(s) the study was designed to address;
2) A brief description of subtasks and status of project/activity;
3) A brief description of the results;
4) A summary of findings to-date and recommendations (where feasible); and
5) A description of lessons learned and planned/recommended follow-up activities.

In addition, summaries of management activities conducted through the implementation of the Program's Pollutant of Concern (POC) Control Plans are provided for those POCs that do not have separate Annual Report sections (e.g., PCBs, Copper/Nickel and Dioxins). An effectiveness assessment of current monitoring activities is also provided at the end of the chapter.

The findings of many technical reports are briefly described within this section. To ensure public access to completed reports, work products and environmental data, the Program has placed the majority of its reports and work products on its website (www.scvurppp.org). The website is continually updated to include the latest reports and work products, data inventory sets and other pertinent Program information. When viewing the website, a large majority of the reports and work products are linked to downloadable documents. Reports and work products not available through the website may be obtained by submitting a request form to Program staff.

BACKGROUND

Multi-Year Receiving Waters Monitoring Plan

Consistent with Provision C.7.b and C.9 of its Permit, the Program developed (and submitted to the Water Board), a Multi-Year Receiving Waters Monitoring Plan (Multi-Year Plan) on March 1, 2002 that identifies Program monitoring activities in Santa Clara Basin Watersheds over an eight-year period. As new monitoring priorities were established, the Multi-Year Plan was revised in FY 03-04 (Revised Multi-Year Plan). This Revised Multi-Year Plan can be found under the Environmental Monitoring and Assessment Measures link on the Program's website (www.scvurppp.org).

The Revised Multi-Year Plan contains the following information: watershed location (prioritized based on SCBWMI and Program assessment priorities), data type (chemical, biological and physical), number and frequency of sampling events, fiscal years (eight years starting with FY 02-03 through FY09-10), rationale and lead agency. The information on data type uses a tiered monitoring approach discussed by the Water Board staff in its Regional Monitoring and Assessment Strategy (RMAS) memo (Draft Monitoring Design in Water Board-lead Pilot Watersheds, spring 2001) dated February 8, 2001. The following monitoring categories were included within the memorandum: screening level, detailed investigation, and status and trends. The field and analytical methods used in the Revised Multi-Year Plan are described in the Program's Draft Quality Assurance Project Plan (QAPP), which is consistent with the Water Board's Surface Waters Ambient Monitoring Program (SWAMP) Quality Assurance Project Plan.

The Revised Multi-Year Plan incorporates specific data needs that have been identified in Program activities relevant to watershed assessment and monitoring. For example, the Revised Multi-Year Plan incorporates future monitoring activities that will be implemented for sediment-related studies in Stevens and Coyote Creek watersheds. Tasks associated with these monitoring activities are identified in the Program's Work Plan entitled *Workplan for Conducting Watershed Analysis and Management Practice Assessment in Other Creeks Potentially Impaired by Sediment from Anthropogenic Activities* (dated August 30, 2002). A clear identification of the specific monitoring activities planned for each year is included as part of the Program's Annual Monitoring Plan submitted to the Water Board every March 1.

Annual Monitoring and Watershed Management Measures Work Plans and Watershed Characterization Memorandum

During FY 03-04, the Program developed the *FY 04-05 Annual Monitoring and Watershed Management Measures Work Plan* (FY 04-05 Monitoring Plan). The FY 04-05 Monitoring Plan was included in the Program's *FY 04-05 Draft Work Plan* (submitted March 1, 2004). The FY 04-05 Monitoring Plan identified monitoring and watershed assessment activities for five sites in the Adobe Creek watershed, eleven sites in San Tomas Aquino Creek watershed, six sites in the Matadero/Barron Creek watershed, three sites in the Sunnyvale East/West Channel watersheds and five sites in the Calabazas Creek watershed. The selection of these watersheds is consistent with the Program's *Watershed Management and Urban Runoff Management Integration Report* (dated June 29, 2001). The data type and sampling frequency were identified for each sampling site and accompanied by maps showing proposed sampling locations. The monitoring schedule is consistent with the sampling design presented in the Revised Multi-Year Plan (i.e., two sampling events per year representing different hydrological cycles). Information collected during implementation of the FY 04-05 Monitoring Plan is described in this Annual Report.

In preparation for Program-led receiving waters monitoring in FY 05-06, the Program developed the *FY 05-06 Annual Monitoring and Watershed Management Measures Work Plan* (FY 05-06 Monitoring Plan) in FY 04-05. The FY 05-06 Monitoring Plan was submitted to the Water Board on March 1, 2005 as part of the Program's *FY 05-06 Draft Work Plan*. Similar to past annual monitoring plans, the FY 05-06 Monitoring Plan describes planned monitoring that will be conducted in Santa Clara Valley creeks during FY 05-06. To provide additional details on the rationale for the selecting sampling site locations and parameters, the Program supplemented the FY 05-06 Monitoring Plan with a watershed characterization technical memorandum. This memorandum includes a summary of existing data and information resources; descriptions of

the relevant watershed attributes; and lists key issues relevant to the development of the proposed sampling design for Stevens and Permanente Creek watersheds that will be implemented in FY 05-06.

SUMMARIES OF FY 04-05 MONITORING AND ASSESSMENT ACTIVITIES

A summary of FY 04-05 monitoring and assessment activities is provided within Appendix C-1 and Table 4-1. Appendix C-1 provides a historical summary of all monitoring and assessment activities conducted by the Program. The following summaries highlight the objectives, results and conclusions of specific monitoring-related projects conducted during FY 04-05. Monitoring activities were generally aimed at developing and implementing programs/projects designed to assess the condition of water bodies using practical, implementable indicators and protocols. The implementation of these indicators and protocols are a necessary step toward establishing a sound regulatory basis for locally based watershed management.

Monitoring activities presented within this section, involve multiple tasks, subtasks, or coordinated activities that may take place over multiple years and at varying geographical scales (i.e., regional or sub-watershed). In addition, it is important to note that monitoring and assessment activities described within this section are not entirely independent from activities described in Section 5 – Watershed Management Measures. Information gained from conducting studies and implementing activities/measures described in both sections have been used (and will continue to be used) in concert to meet objectives outlined in Permit Provisions C.7, C.9, and C.10, which include; (1) characterizing watersheds and stormwater discharges; (2) assessing existing or potential adverse impacts to beneficial uses; (3) identifying potential sources of pollutants of concern; (4) aiding in developing and implementing strategies for controlling adverse impacts on beneficial uses; and (5) assessing the effectiveness of pollutant prevention/control measures.

FY 04-05 SCVURPPP Receiving Waters Monitoring and Assessment

In accordance with Provision C.10 (b), the Program developed a *Watershed Monitoring and Assessment Summary Report* (Summary Assessment Report) that summarizes the results and analyses of baseline data collected during the implementation of the Program's FY 04-05 Annual Monitoring and Watershed Management Measures Work Plan (FY 04-05 Monitoring Plan). The FY 04-05 Monitoring Plan included ambient surface water quality monitoring; and physical habitat assessment studies and bioassessment studies for the following watersheds:

- San Tomas Aquino/Saratoga Creeks;
- Adobe Creek;
- Matadero/Barron Creeks;
- Calabazas Creek; and
- Sunnyvale East/West Channels

The Summary Assessment Report provides information on possible beneficial use impacts to the extent possible (based on the study design and available data) and suggests next steps for monitoring/assessments and developing strategies to control potential impacts. The following paragraphs provide a brief synopsis of the information found within the Summary Assessment Report that is included within Appendix C-2.

Monitoring and Assessment Summary and Conclusions

In FY 04-05, the Program implemented the FY 04-05 Annual Monitoring Program Plan (Annual Plan) in fulfillment of Provision C.7 of its NPDES Permit. The Plan identifies monitoring activities that were implemented as part of the third year (FY 04-05) of the Revised Multi-Year Plan. This Watershed Monitoring and Assessment Summary Report discusses the results of FY 04-05 Watershed Monitoring and Assessment activities conducted in Adobe Creek, Matadero/Barron Creek, Calabazas Creek, Sunnyvale East/West Channel and San Tomas Aquino Creek watersheds.

During FY 04-05, water samples were collected during two events (one representing the dry season (June-October) hydrological cycle and the other the wet season (January-March) hydrological cycle) and analyzed for physio-chemical, chemical, aquatic toxicity and microorganism parameters. Benthic macroinvertebrate (BMI) bioassessments and physical habitat assessments (PHAB) were conducted during the spring/decreasing hydrograph season (April – May). Fish bioassessments were conducted during the late end of the dry season (October).

Field measurements and water samples were collected from three sites in the Adobe and Barron Creek watersheds; three sites in the Matadero Creek watershed; three sites in the Sunnyvale East/West Channels; three sites in the Calabazas Creek watershed; and four sites in the San Thomas Creek watershed, including Saratoga Creek (Figure ES-1). Site identifications, description of locations and parameter types that were measured for each site are listed in Table 3. BMI and PHAB assessments were performed in four sites in Adobe Creek watershed; two sites in Matadero Creek watershed; and eight sites in the San Tomas Aquino Creek watershed. Fish bioassessments were conducted during the dry season at one site in Adobe Creek watershed; two sites in the Matadero Creek watershed; and five sites in Saratoga Creek subwatershed.

The conclusions for each watershed are provided below. Specific recommendations are provided in the *Conclusions and Recommendations* Section within the Summary Assessment Report (Appendix C-2).

Adobe Creek Watershed

No beneficial uses have been designated in the Basin Plan for water bodies in the Adobe Creek watershed. The results of the two years of screening level indicators monitoring indicate that Adobe Creek is supporting WARM Uses in a limited area near A-3.5 (upstream of the Redwood Preserve). Water quality sampling results generally met all Basin Plan Water Quality Objectives and CTR criteria. However, water quality conditions may become unsuitable during the dry season at pools that act as refugia for warm water native fishes (due to low dissolved oxygen concentrations). The lack of deep pools, low flows during the summer and physical fish barriers are likely the biggest limiting factor for existing fish populations. The BMI bioassessment and physical habitat assessment indicate that Adobe Creek, downstream of Foothill Community College, is in poor condition. In contrast, the BMI community and habitat condition in Hidden Villa Farms was in good condition, despite intermittent flow conditions. Due to historically minimal disturbances in the headwater areas, site A-5 is a good candidate for representing reference conditions for intermittent creeks in the South Bay.

Beneficial uses for recreation have not been designated for this water body and limited bacterial indicator[1] data collected for total and fecal coliforms in FY 04-05 indicated that values were below Basin Plan water quality objectives for both REC-1 and REC-2 Uses. One sample analyzed for enterococcus[2] was above the USEPA's suggested bacteriological criteria for water contact recreation at "infrequently used areas". The site where indicator bacteria were collected appeared to have moderate potential for both public access and risk to exposure. Public access and risk for exposure upstream and downstream of this site appear to be low.

Matadero/Barron Creek Watersheds

The Basin Plan identifies several designated Uses in Matadero Creek associated with aquatic life uses, including COLD, WARM, MIGR and SPWN. The results from one year of screening level indicator monitoring indicate that WARM Uses are supported to some extent in the upper reaches of Matadero Creek (upstream of Bol Park). Although water quality sampling results met Basin Plan Water Quality Objectives, site M-3 exhibited poor water quality during the summer season (i.e., extremely high conductivity, total hardness, TDS and sulfate concentrations). The results were inconclusive to determine if these conditions were caused by runoff from adjacent and/or upstream land uses, or if they represented natural conditions during the dry season. The BMI bioassessment show upper reaches of Matadero Creek is in poor condition. These results, however, were not consistent with either the fish bioassessment data or physical habitat assessments, which showed relatively good habitat supporting a native fish population. One explanation for this discrepancy may be the approach used to sample the BMIs (i.e., CSBP high gradient riffles) was not suitable for the stream type observed in the upper reaches of Matadero Creek (i.e., low gradient with limited riffle habitat).

Both contact (REC-1) and non-contact (REC-2) beneficial uses for recreation are designated for Matadero Creek. The limited bacterial indicator data for total and fecal coliforms were less than both the Basin Plan WQOs for contact and non-contact recreation, with one exception (site M-2). In addition, enterococcus data collected at site M-2 was above the USEPA's suggested bacteriological criteria for water contact recreation at "infrequently used areas". Site M-2 is located at a city park and appears to have high potential for public access and exposure. There are several grade control structures that create water depths that are suitable for wading with evidence of contact water recreation along the banks (i.e., rope swing and well worn pathways to creek). Additional investigations relative to characterizing exposure and E. coli concentrations are needed to better determine waterborne pathogen-related risks at this site. Public access and exposure appear to be very low in the remaining creek areas. Upstream and downstream areas that are accessible to the public have limited flow during summer season and/or insufficient water depths (i.e., concrete channel) for contact recreation.

[1] Total Coliform and E. Coli are indicator organisms. Indicator organisms are organisms that co-exist with pathogens in the fecal environment and are easier and are less expensive to test for than pathogens. For this reason, indicators are often the focus of water quality analysis. However, there is little if any conclusive proof that disease risk are directly associated with large numbers of coliforms. Thus, traditional public health practices for regulating beach areas include conducting a sanitary survey in conjunction with water quality monitoring (i.e., includes statistically based sampling program as well as the collection and analysis of meteorological, water circulation and dilution data.) The assumption that exposure to potential pathogens occurs thru swimming (i.e., REC-1 full body contact activities) is key to analyzing the indicator data since it also implies that a relatively large population exists and that the indicator-to-pathogen relationship is relatively stable and thus the estimated "swimming-associated illness rate" is predictable. In situations where the population is small and exposure is very infrequent the relationships tend not to be reliable and predictable. Finally, the presence of the above bacterial indicator organisms may also indicate the presence of warm-blooded animals, especially along stream and creek habitats.

[2] Enterococcus is an indicator organism typically used in marine waters.

There are no designated beneficial uses for Barron Creek. The results from one year of screening level indicator monitoring were not conclusive for assessing support of aquatic life uses in this water body. The stream appears to be nearly dry during the dry season and does not appear to contain suitable habitat (i.e., deep pools or stream connectivity) to support a warm water native fish community. Water quality sampling results generally met all Basin Plan Water Quality Objectives. However, the CTR criterion for copper was exceeded at B-1 during the dry season.

Sunnyvale East/West Channel Watersheds

There are no designated beneficial uses for Sunnyvale East or West Channels in the Basin Plan. The results from one year of screening level indicator monitoring were not conclusive for assessing support of aquatic life uses in these water bodies. The upper reaches of the channels have intermittent flow during the dry season with unsuitable habitat (i.e., deep pools or stream connectivity) to support a warm water native fish community. Water quality sampling results generally met all Basin Plan Water Quality Objectives and CTR criteria. Given these results, no additional investigations are proposed for these watersheds at this time.

Calabazas Creek Watershed

The Basin Plan designates both COLD, WARM and WILD beneficial uses in Calabazas Creek. Results from one year of screening level indicator monitoring were not conclusive for assessing support of aquatic life uses in this water body. The upper reaches of the stream have intermittent flow during the dry season with unsuitable habitat (i.e., deep pools or stream connectivity) to support a warm water native fish community. Water quality sampling results generally met all Basin Plan Water Quality Objectives and CTR criteria. BMI bioassessment and physical habitat assessments indicate poor biological integrity and habitat condition for all of the sampling sites, including C-5, which was relatively rural. The poor conditions are likely to be the result of intermittent flow conditions and poor substrate quality and habitat complexity. The poor quality of the substrate may be a significant factor for limiting BMI community assemblages.

Both contact (REC-1) and non-contact (REC-2) beneficial uses for recreation are designated for Calabazas Creek. The limited bacterial indicator data for total and fecal coliforms were slightly above the Basin Plan WQOs for contact recreation. In addition, enterococcus data collected at sites C-3 and C-5 were slightly above the USEPA's suggested bacteriological criteria for water contact recreation at "infrequently used areas". Site C-3 appeared to have high potential for both public access and potential exposure, although activities appear to be associated with REC-2 rather than REC-1. Site C-5 appeared to be mostly on private property. As a result, there is a low potential for public access. Public access was also limited in the urban reaches of the stream channel due to fencing along the backs (e.g., Creekside Park). Additional investigations relative to characterizing exposure and E. coli concentrations are needed to better determine waterborne pathogen-related risks at this site.

San Tomas Aquino Creek Watershed (includes Saratoga Creek)

The Basin Plan designates both COLD, WARM and WILD beneficial uses in Saratoga Creek. The results of the two years of screening level indicators monitoring indicate that Saratoga Creek is supporting both COLD and WARM Uses, at least upstream of site S-4. Water quality sampling results met all Basin Plan Water Quality Objectives and CTR criteria for COLD Use. In addition, both the fish and BMI community assemblages appear to be in good condition. The results of the Unified Stream Assessment in the 2.4-mile reach showed good overall habitat and

buffer/floodplain condition and relatively few localized impacts. Embeddedness values measured during the physical habitat assessment may indicate a fine sediment supply in the upper reaches of the watershed. The data results were not conclusive for determining if the fine sediment observed in the streambed, or any other impacts to the habitat, are having an adverse affect on the fish or BMI community assemblages.

Both contact (REC-1) and non-contact (REC-2) beneficial uses for recreation are designated for Saratoga Creek. The limited bacterial indicator data collected at three sites for total and fecal coliforms were all below the Basin Plan WQOs for water contact and non-contact recreation, with the exception of fecal coliform concentrations at site S-1 that were slightly higher than WQOs for water contact recreation. In addition, enterococcus data collected at a high majority of Saratoga Creek sites were below USEPA's suggested bacteriological criteria for water contact recreation at "infrequently used areas". Although all Saratoga Creek sites did not appear to have much potential for access and/or exposure, additional investigations relative to characterizing exposure and E. coli concentrations are needed to better determine waterborne pathogen-related risks at sites in this watershed.

There are no designated beneficial uses for San Tomas Aquino Creek in the Basin Plan. Screening level monitoring results in San Tomas Aquino Creek indicate that WARM uses may be supported in areas that have suitable habitat. Water quality sampling results met all Basin Plan Water Quality Objectives and CTR criteria. However, habitat for WARM use is extremely limited due to highly modified channel in the system. Limited habitat was available in the upper reaches, however, BMI bioassessment results determined that physical habitat and the BMI community assemblage at ST-3 was in poor condition. The upper reaches of San Tomas Aquino appear to be affected by existing channel incision and potential unstable channel conditions upstream. No water samples collected in San Tomas Aquino were analyzed for bacterial indicators because public access and potential exposure appear to be very low in this system.

Quality Assurance Project Plan

During December 2-4, 2003, an independent evaluation of the Program's FY 02-03 monitoring program was administered by the United States Environmental Protection Agency and conducted by Tetra Tech, Inc. The purpose of the evaluation was to evaluate the overall monitoring program components and their respective contributions toward satisfying the requirements of the Program's NPDES Permit; and to evaluate the current implementation status of the Multi-Year Plan with respect to the overall purposes of the monitoring program.

As presented in Tetra Tech's *Program Evaluation Report- Santa Clara Valley Urban Runoff Pollution Prevention Program: Monitoring Evaluation* (Evaluation Report), dated January 19, 2004, data quality control and review procedures were identified as areas needing improvement. In response, the Program has developed a *Draft Quality Assurance Project Plan for SCVURPPP Receiving Waters Monitoring* (Draft QAPP) in FY 04-05 to ensure that data quality is being managed adequately. The Draft QAPP, which is included within Appendix C-3, is consistent with the Water Board's QAPP for the Surface Water Ambient Monitoring Program (SWAMP). In FY 05-06, the Program will respond to comments received, revise (as necessary), finalize and begin implementing the QAPP.

Regional Collaborative Monitoring Activities

Regional Monitoring Program for Trace Substances (RMP)

The Regional Monitoring Program for Trace Substances in the San Francisco Estuary (RMP) is a collaborative effort between the San Francisco Estuary Institute (SFEI), the Water Board and the regulated discharger community (including SCVURPPP). The RMP's goal is to collect scientifically valid information that allows movement towards understanding contaminant impacts on beneficial uses of the Bay. The RMP focuses on determining spatial patterns and long term trends through sampling of water, sediment, bivalves, and fish; effects on sensitive organisms; and chemical loading to the Bay. To provide the most complete assessment possible of chemical contamination in the Bay, the RMP seeks to synthesize RMP data with data from other sources.

The RMP is based on management questions and program objectives that are updated by the Water Board, RMP staff, RMP Technical Review Committee (TRC) and RMP Steering Committee (SC) every five years. The RMP recently updated its management questions and objectives in January 2005 (www.sfei.org/rmp/RMPproginfo.htm). However, during FY 04-05 the RMP objectives in effect were to:

1. Describe patterns and trends in contaminant concentration and distribution;
2. Describe general sources and loading of contamination to the Estuary;
3. Measure contaminant effects on selected parts of the Estuary ecosystem;
4. Compare monitoring information to relevant water quality objectives and other guidelines; and
5. Synthesize and distribute information from a range of sources to present a more complete picture of the sources, distribution, fates, and effects of contaminants in the Estuary ecosystem.

The Program actively participated and contributed approximately $161,000 to SFEI for FY 04-05 expenditures on the RMP. This funding to SFEI is in addition to funding provided by the three south Bay public owned treatment works (POTWs), which are also Co-permittees. In addition, Program staff actively participated on a variety of RMP committees and work groups that included the RMP Steering Committee, Technical Review Committee and the Sources, Pathways and Loadings Work Group (SPLWG). In addition, a City of San Jose staff member currently serves as the chair of the RMP TRC. In FY 05-06, the Program will continue to provide financial support for the RMP and actively participate in committees and workgroups.

The RMP budget is generally broken into two monitoring programs: Status and Trends; and Special and Pilot Studies. The following paragraphs provide a brief overview of these programs.

Status and Trends Monitoring Program

The Status and Trends Monitoring Program is the long-term contaminant-monitoring component of the RMP that was initiated as a pilot study in 1989. The Status and Trends Monitoring Program is comprised of four program elements that collect data to address the RMP objectives:

1. The *Status and Trends Monitoring Program* consists of long-term contaminant monitoring to characterize the status and trends for contaminants in water, sediment and biota (bivalves) in the Estuary (Objectives 1,3, and 4);

2. The *Sport Fish Contamination Study* is a triennial screening of fish tissue for contaminants of concern to human health (Objectives 1,3, and 4);
3. The *Episodic Toxicity Monitoring* component investigates potential toxic effects in Estuary tributaries (Objectives 1 and 2); and
4. The *USGS* conducts two long-term monitoring efforts partially funded by the RMP, including monthly water quality measurements in the deep channels of the Estuary (from the Lower South Bay to the confluence of the Sacramento and San Joaquin Rivers), and sediment transport monitoring and modeling in the northern Estuary.

The summaries provided within this section focus on the latest information available from the Status and Trends Monitoring Program (i.e., 2003). The 2003 information was the second year that the Status and Trends Monitoring Program collected water and sediment samples using EPA's Environmental Monitoring Program (EMAP) Generalized Random Tessellation Stratified (GRTS) sample design. This type of design is appropriate for addressing the RMP objective (Objective 1) to describe the spatial and temporal patterns of contamination in the Estuary. Monitoring data are available for downloading via the RMP website using the *Status and Trends Monitoring Data Access Tool* at www.sfei.org/rmp/data.htm.

Pilot and Special Studies

The RMP also conducts Pilot and Special Studies. Pilot Studies usually are designed to investigate and develop new monitoring measures related to anthropogenic contamination or contaminant effects on biota in the Estuary. Special Studies address specific scientific issues that the TRC, SC, or Water Board identify for further study. These additional studies are developed through an open application process, which starts with an applicant submitting a study idea to the RMP Program Manager for discussion at a TRC quarterly meeting.

Summaries of the most pertinent Pilot and Special Studies conducted in FY 04-05 are provided under each summary of pollutant-specific monitoring activities within this section. A summary of past Pilot and Special Studies conducted by the RMP is available on the RMP website (www.sfei.org/rmp/). In addition to providing funding for these studies, Program and Co-permittee staff provided in-kind support on the development, analysis of results and conclusions of each study summarized.

Clean Estuary Partnership

On August 6, 2001, a Memorandum of Understanding (MOU) regarding development of: 1) a Water Quality Attainment Strategy for San Francisco Bay-Delta and Tributaries; and 2) TMDLs for 303(d) pollutants (including mercury) was entered into by the Water Board, Bay Area Clean Water Agencies (BACWA) and Bay Area Stormwater Management Agencies Association (BASMAA). This group is referred to as the Clean Estuary Partnership (CEP).

The mission of the Clean Estuary Partnership (CEP) is to use sound science, adaptive management, and public collaboration to develop and implement technically valid and cost-effective strategies (including TMDLs) that result in identifiable, sustainable water quality improvements for San Francisco Bay. As a member agency of BASMAA, the Program contributed approximately $100,000 to the CEP in FY 04-05. In addition, Program staff participated in CEP Executive Management Board (EMB) meetings, CEP Technical Committee (TC) meetings, pollutant-specific workgroup meetings and CEP Mercury Risk Reduction Work Group meetings. A City of San Jose staff member also serves as chair of the CEP TC. The Program plans to continue to actively participate and contribute approximately $100,000 to the CEP in FY 05-06.

FY 04-05 accomplishments included (but are not limited to) the development of a variety of technical reports and projects. Summaries of information collected during these studies are included under each summary of pollutant-specific monitoring activities. In addition, CEP-approved projects that will be conducted in future years are also described. In addition to funding these studies, Program and Co-permittee staff provided in-kind support on the development, analysis of results and conclusions of each study summarized.

BASMAA Monitoring Committee

In FY 04-05, Program and Co-permittee staff continued to actively participate in the BASMAA Monitoring Committee (MC). The purpose of the BASMAA MC is to discuss and coordinate monitoring activities conducted by the Bay area urban runoff management programs. Although no environmental monitoring is currently being conducted by BASMAA (as a whole), the BASMAA MC provides a valuable forum to discuss monitoring related activities with BASMAA member agencies, Water Board staff, and other agencies and organizations. The Program will continue to actively participate in the BASMAA MC during FY 05-06.

Mercury Monitoring Activities (Provision C.9.c)

Permit Provision C.9.c. requires the Program to develop and implement a mercury pollution prevention plan. In response, the Program developed a Mercury Pollution Prevention Plan (Mercury Plan) consistent with the Provision. The Mercury Plan was submitted to the Water Board on March 1, 2002 as part of the Program's *FY 02-03 Work Plan*. The Mercury Plan identifies actions that will be implemented at the Program level, municipality level, or both; and provides the schedule for initiation and/or completion of Program-level actions. The details of municipality actions and schedules are included in the individual Co-permittee Work Plans and/or Annual Reports, as appropriate.

During FY 04-05, a variety of mercury-related monitoring activities occurred including sampling and analysis of mercury in water, sediment and biota in the Estuary and the Guadalupe River watershed; and water quality monitoring conducted by the Program under the Revised Multi-Year Plan. The following summaries briefly describe the results and conclusions of these efforts. A more detailed description of FY 04-05 accomplishments and the prominent mercury pollution prevention activities planned for FY 05-06 are provided within Section 7 - Mercury Pollution Prevention Activities.

Watershed Monitoring

In FY 04-05, the Program continued to analyze water samples collected in Santa Clara creeks through the implementation of its Revised Multi-Year Plan. Water samples were collected as screening level indicators of water quality at a variety of creek sites draining urban and rural land use areas. As described in the Program's Revised Multi-Year Plan, grab samples were collected during two seasons (wet and dry).

Mercury concentrations detected in Santa Clara creeks in FY 04-05 ranged between 5.0 ng/L and 18.0 ng/L, below the four-day average mercury water quality objective (25 ng/L) for freshwater bodies in the San Francisco Bay region. A full description of methods, results and conclusions are presented in the Summary Assessment Report (see Appendix C-1).

Mercury Atmospheric Deposition Monitoring

One pathway of pollutants to the Estuary is atmospheric deposition, which was examined in the RMP Atmospheric Deposition Pilot Study. One study site (i.e., San Jose) remains from this pilot effort. RMP and City of San Jose in-kind funding were used in FY 04-05 to continue mercury deposition monitoring. The following objectives were used:

- Evaluate concentrations of mercury in rainwater as part of TMDL refinement; and
- Contribute to the national database to evaluate contributions of mercury from large urban areas and long-range aerial transport from outside the region to surface waters.

The latest results available (from 2003) indicated that 3.6 ug/m^2 of mercury was deposited via wet deposition at the San Jose station. Wet deposition in 2000, 2001 and 2002 were 3.8 ug/m^2, 2.7 ug/m^2 and 1.7 ug/m^2, respectively. Mercury concentrations in rainwater averaged 0.013 ug/L in 2003, compared to 0.01 ug/L in 2000, 0.0095 ug/L in 2001, and 0.0069 ug/L in 2002. In addition, when compared to non-urban sites in California, mercury deposited via rainfall at San Jose is substantially higher.

Current plans call for the RMP and the City of San Jose to continue to fund the San Jose monitoring station in FY 04-05. Results from 2004 sampling will be included in the Program's *FY 05-06 Annual Report*.

Contaminant Loads from the Sacramento and San Joaquin Rivers

In FY 04-05, the RMP continued to collaborate with the USGS to monitor suspended solid concentrations at Mallard Island. Sampling will continue through 2005 and contribute to nearly ten years of continuous data when combined with data collected by the USGS from 1994-98. The RMP also collaborated with other groups conducting fixed-time and flood-response water sampling (Interagency Ecological Program) to collect sediment-related contaminant concentrations at Mallard Island for the purpose of developing statistical relationships between concentrations and optical backscatter measurements. These relationships can be used to estimate time-continuous concentration data, that when combined with estimates of discharge, can estimate sediment loads from the Delta and model contaminant loads entering the Estuary from the San Joaquin Valley.

The most recent data available from this study is from Water Years (WY) 2002 and 2003. Total mercury was measured in 30 water samples collected during these years. Total mercury concentrations ranged from 4 to 14 ng/L, whereas dissolved mercury concentrations in seven samples ranged from 0.8 to 1.6 ng/L. Despite dissolved mercury concentrations making up between 11 to 24 percent of the total mercury concentrations, a linear relationship was observed between instantaneous SSC and total mercury. The linear relationship allowed for estimation of annual loads for WY 2002 and WY 2003, which were 58(±20) and 97(±33) kg for total mercury. Extrapolation of mercury data (from WY 2002 and WY 2003) over a nine year period (WY 1995 to WY 2003) using SSC data resulted in long-term average annual load of 201(±68) kg total mercury entering the Estuary from the Sacramento and San Joaquin Rivers.

Current plans call for contaminant loading data collected from the Sacramento and San Joaquin Rivers to continue to be collected in WY 2005 and WY 2006 through funding from the RMP. In the future, long-term trends data collected at this station (used to estimate mercury loads) will be compared against TMDL Waste Load Allocations (WLAs) assigned to the Central Valley region to determine if required load reductions are evident.

Guadalupe River Contaminant Loading Study

During FY 02-03, the CEP approved and funded a project to begin measuring the loads of a variety of contaminants (e.g., mercury, copper, nickel and PCBs) from the Guadalupe River to the Estuary. The main objective of this project was to improve our knowledge on the magnitude of contaminant loads entering the Estuary from local tributaries. The San Francisco Estuary Institute (SFEI) managed the project. Sampling occurred during Water Year (WY) 2003 (November 2002 through May 2003). The study results were generally well accepted by CEP and RMP partners and funding through the RMP was allocated towards another year of sampling (i.e., WY 2004). The following is a summary of the draft results for mercury loads from the Guadalupe River watershed during water years 2003 and 2004.

During WY 2003, a total of 238 water samples were analyzed for SSC and four samples were analyzed for grain size. During WY 2004, a total of 226 water samples were analyzed for SSC and 105 samples were analyzed for grain size. These sample concentrations were combined with the turbidity measurements to estimate a continuous 15-minute SSC record. Water samples for analysis of mercury were collected in the thalweg within one meter of the turbidity probe using clean-hands protocols. Discharge during WY 2003 was 111 percent of the 1971 - 2000 normal.

During Water Year 2003, mercury concentrations varied from 0.18 to 18.67 ng/L. In 2004, mercury concentrations varied from 0.01 to 1.42 ng/L. The variation of mercury relative to SSC was distinctive when compared to the other trace elements. Mercury did not exhibit first flush characteristics and the highest concentrations were uniquely associated with the first year of observations. In WYs 2003 and 2004, the loads of total mercury were estimated to be 116 (± 37) kg and 14.8 (± 4.7) kg, respectively.

Contaminant loading data collected from the Guadalupe River continued to be collected in WY 2005 using similar methods. In addition, the Program provided supplemental funding towards sampling the concentrations of mercury in the bed load of the Guadalupe River during FY 04-05. Results from WY 2005 will be provided within the Program's *FY 05-06 Annual Report*.

Guadalupe River TMDL for Mercury

The Santa Clara Basin Watershed Management Initiative (SCBWMI) is serving as the stakeholder forum for the development of the Guadalupe River TMDL Report for Mercury. The Guadalupe River Watershed encompasses parts of San Jose, Los Gatos, Campbell, Monte Sereno and the unincorporated Santa Clara County. The Program is a stakeholder in the Guadalupe River TMDL. The Santa Clara Valley Water District (SCVWD) is taking a lead role in the TMDL development process by funding the $900,000 study and is participating as Co-Chair of the TMDL Work Group and Stakeholder Group. Program staff is also participating in the TMDL process. In addition, the SCVWD entered into a Memorandum of Understanding (MOU) with the Regional Board for Phase I and Phase II studies which were funded by the SCVWD.

Since FY 02-03, Program staff, along with other Co-permittee staff, have attended Work Group meetings and reviewed draft technical memoranda developed by the consultant (i.e., Tetra Tech). During July and August 2003, a synoptic survey and preliminary field sampling effort was conducted. The results of the synoptic survey were incorporated into the *Draft Conceptual Model Report* (Tetra Tech, October 2, 2003). Based on the information collected for the conceptual model, a *Data Collection Plan* (Tetra Tech, February 20, 2004) was developed. Sampling in the Guadalupe River watershed, which began in February 2004, included an element to compare total and methyl mercury in creeks draining urban watersheds unaffected

by mining (Ross, Canoas and Los Gatos Creeks) to those affected by mining (Alamitos, Guadalupe, Arroyo Calero, Canoas, Randol Creeks and Guadalupe River). Under a contract with the Water Board, the consultant has incorporated the data collection results into the *Final Conceptual Model Report* (Tetra Tech, May 22, 2005). The following paragraphs summarize the findings in this report.

Summary of Conclusions

The watershed has two distinct hydrologic seasons, a wet winter season and a long dry summer season. The winter season is punctuated by the storms that create large flows in the streams and in the main stem of the Guadalupe River. The large storms lead to flows on the main stem that may increase from 10 to over 1000 cubic feet per second (cfs) in less then 24 hours. In the upper part of the watershed, the reservoirs typically limit the variability of flow. The larger rain events, particularly those proceeded shortly in time by similar events; create conditions where large quantities of mercury-bearing solids are routed downstream. These solids are believed to originate from hillside drainage, stream sediments, banks, and in some cases flood plains. The larger-sized, mobilized solids in the streams are collected by impoundments created by drop structures and instream zones of aggregation. However, during large storms, flows can overtop these drop structures. Above the reservoirs, only suspended sediment is transported downstream since spilling is extremely rare. In summary, the wet season is largely a season of transport. Methylmercury concentrations are much lower than observed in the outlets of the reservoirs during the warm dry season. However, mercury is likely being transported to locations where under warmer conditions methylation can occur.

Biogeochemical reactions predominate during the warm dry season. The periodic high flows of winter are past and surface water temperatures increase to values of 65 to 85 F. Over the summer, the reservoirs become stratified. Settling of particulate organic matter in summer depletes the lower waters of dissolved oxygen. The reservoirs now are net methlyators of mercury. The methylmercury concentrations in the discharges of Almaden and Guadalupe Reservoirs are high, up to 12.8 ng/l. Methylmercury concentrations in the epilimnetic and upper hypolimnetic waters are less than in the discharge. Unlike the reservoirs, the creeks in the summer were net demethylators of mercury, with most of the methylmercury in the reservoir releases being lost from the stream water within the first few miles. Although the stream sediment methylmercury concentrations indicate that methylation is occurring at some locations in the creeks, the amount of methylmercury produced is not enough to offset the loss of methylmercury.

Mercury load estimates were made based upon flow and mercury data and modeled flows for selected subwatersheds. Findings from this effort are described below:

- Most of the total mercury is transported in the wet season, particularly during high flow events;
- Two major reservoirs, Guadalupe and Calero are sinks for total mercury; they release less total mercury than they receive;
- Inputs of mercury derived from mine wastes are substantially greater than atmospheric deposition inputs for Guadalupe and Almaden Reservoirs, and for Alamitos and Guadalupe Creeks;
- The urban creeks contribute less total and methylmercury than the mine influenced creeks;

- The total mercury loads from the Guadalupe River have high variability due to varying rainfall from year to year, as seen in the results of a Monte Carlo analysis of loads at the Highway 101 gauging station; and
- While there are multiple uncertainties in the sources of the total and methylmercury load from the Guadalupe River to San Francisco Bay, re-suspension of sediments along the main stem of the Guadalupe River and urban storm drains appear to be important contributors.

The *Final Conceptual Model Report* completes a series of documents developed in Phase 1 of the TMDL for Mercury in the Guadalupe River Watershed. Each document has summarized new information and contributed to the understanding of the biogeochemical processes controlling mercury transport and fate within the watershed. Several data gaps remain and additional data is needed to reduce uncertainties, including large uncertainties in the source of the mercury loads estimated for the Guadalupe River at the Highway 101 gauging station. Additional mercury sampling at high flows of the main tributaries and the main stem of the river are needed to refine the present estimate.

Water Board staff are currently developing a draft TMDL report. Program and Co-permittee staff will continue to participate in the development of the Guadalupe River Watershed TMDL for Mercury by attending meetings and reviewing/commenting on technical results and reports.

Pesticide Monitoring Activities (Provision C.9.d)

In response to Provision C.9.d of the Program's NPDES Permit, the SCVURPPP developed a Pesticide Management Plan consistent with the Provision. The Pesticide Management Plan, which has many components, is described in Section 6 of the Annual Report. Pesticide-related monitoring activities conducted during FY 04-05 are described below.

Watershed Monitoring Activities

SCVURPPP Annual Receiving Waters Monitoring

During FY 04-05, the Program continued to analyze water samples collected in Santa Clara creeks through the implementation of its Revised Multi-Year Plan. Water samples were collected as screening level indicators of water quality at a variety of creek sites draining urban and rural land use areas. Specific to pesticides, creek water was analyzed for organophosphate pesticide concentrations and aquatic toxicity. As described in the Program's Revised Multi-Year Plan, grab samples were collected during two seasons (wet and dry).

Organophosphate pesticides were not detected in any of the twenty samples collected from eight creeks in the Santa Clara Valley in FY 04-05. Specifically, diazinon was not detected above its reporting limit (0.036 ng/L) in any of the samples analyzed.

Results from three species chronic toxicity testing also indicated very few problems in Santa Clara Valley creeks. Six sites were sampled two times (wet and dry seasons) during FY 04-05. The survival and reproduction of test organisms *Ceriodaphnia dubia* and *Pimephales promelas* were slightly inhibited in 3 of 24 samples analyzed. Growth of the green algal *Selenasturm capricornutum* was inhibited in 2 of 12 samples analyzed.

A full description of methods, results and conclusions are presented in the Summary Assessment Report (see Appendix C-1). In future years, the Program will continue to

coordinate pesticide and toxicity monitoring activities with CEP monitoring efforts to ensure that useful and adequate information is being collected. This information should determine the impacts of pesticides on local water bodies.

CEP Urban Creeks Monitoring

In FY 04-05, the Clean Estuary Partnership (CEP) funded the development of an urban creeks monitoring program for pesticides of concern to supplement monitoring already being conducted by local agencies in the Bay Area (e.g., SCVURPPP). During FY 04-05 the CEP's focus was on performing wet weather, storm-event-based sampling and analysis of creek flows for diazinon and aquatic toxicity. This monitoring is intended to provide support for the adaptive implementation of the *Diazinon and Pesticide-Related Toxicity in Urban Creeks Water Quality Attainment Strategy and Total Maximum Daily Load*.

Seven creeks were sampled during WY 2005. These include:

1) Corte Madera Creek (Marin);
2) Blue Rock Springs Creek (Solano);
3) Rheem Creek (Contra Costa);
4) Castro Valley Creek (Alameda);
5) Calabazas Creek (Santa Clara);
6) San Francisquito Creek (Santa Clara/San Mateo); and,
7) Belmont Creek (San Mateo).

A total of nine creek samples were collected between January and May 2005. Field sampling was conducted (by City of Sunnyvale staff) at Calabazas Creek and samples were transported to contracted laboratories for analysis. Creek samples were analyzed for organophosphate pesticides (or diazinon only) and pyrethroid pesticides. Three species chronic aquatic bioassays were also performed using *Selenastrum capicornutum* (green alga), *Ceriodaphnia dubia* (water flea) with acute and chronic (reproduction) endpoints, and *Pimephales promelas* (fathead minnow) with acute and chronic (reproduction) endpoints.

Of the nine samples analyzed, diazinon was only detected in one sample (117 ng/L) above the suggested TMDL target (100 ng/L) for diazinon concentrations in Bay Area urban creeks. In addition, diazinon was detected in four samples at concentrations between 40 and 50 ng/L. Diazinon concentrations in all other samples were not detected above the reporting limit. Pyrethriods were not detected above the reporting limit in any samples analyzed in WY 2005.

Five chronic toxicity effects were exhibited in the nine samples collected. One sample had a significant reduction in fathead minnow growth and Ceriodaphnia reproduction was reduced in four samples. Only one sample caused an acute toxicity effect on Ceriodaphnia (50 percent mortality).

Preliminary results suggest that diazinon concentrations and acute aquatic toxicity are not widespread throughout Bay Area creeks. However, additional data is needed to validate this preliminary finding. Suggested next steps for CEP Urban Creeks Monitoring include: 1) revise site selection criteria; 2) selecting long term monitoring sites; 3) deciding if sediment toxicity and chemistry analysis if warranted; and 4) discussing funding for additional monitoring in WY 2006.

RMP Urban Creeks and Creek/Estuary Interface Monitoring

As part of the RMP's Exposure and Effects Pilot Study (EEPs), sediment toxicity monitoring was conducted in selected tributaries (above and below the tidal prism) during FY 04-05. Creeks sampled included:

1) Suisun Creek (Solano);
2) Napa River (Napa);
3) Petaluma River (Sonoma/Marin);
4) San Lorenzo Creek (Alameda);
5) Coyote Creek (Santa Clara); and,
6) San Mateo Creek (San Mateo).

Results were not available at the time this report was competed. They will be included in the Program's *FY 05-06 Annual Report*. Additional EEPs sampling is also expected to occur in FY 05-06.

Legacy Pesticide Monitoring

Sacramento and San Joaquin River Loadings

In addition to mercury, legacy pesticides were also monitored in the Guadalupe River watershed during WY 2003. From January 10, 2002 to May 6, 2003, 24 discrete water samples were collected for analyses of legacy pesticides (DDTs, Chlordanes and Dieldrin) during and after major storm events. Concentrations of legacy pesticides ranged from 240 to 1,600 pg/L of DDT, 40 to 180 pg/L of chlordanes and 60 to 250 pg/L of dieldrin. Pesticide concentrations were significantly correlated to SSC and displayed a first flush effect consistent with that found for sediment. Ratios of different DDT compounds showed that proportions of DDT and DDE (o,p' and p,p'-isomers), a major aerobic breakdown product of DDT, increased with increasing SSC and discharge, whereas proportions of DDD, an anaerobic breakdown product, decreased. This pattern presumably results from greater contributions of eroded watershed soils with increasingly fresh inputs of DDT residues in samples collected during higher flows.

Organic contaminant mass loads were estimated over the study period using available flow information for the Sacramento-San Joaquin Delta and time-continuous SSC data collected at Mallard Island. Correlations between SSC and pesticide concentrations were used to estimate daily concentrations and loads of these contaminants. Daily contaminant loads varied by one to three orders of magnitude; DDT (1.4 to 150 g), chlordanes (0.22 to 22 g) and dieldrin (0.37 to 56 g). Annual loads for WY 2003 were 9.7 (±3.7) kg DDT, 1.5 (±0.57) kg chlordanes and 3.0 (±1.3) kg dieldrin. Extrapolation of pesticide data (from W Y 2002 and WY 2003) over a nine year period using SSC data (WY 1995 to WY 2003) resulted in long-term average annual loads of 18 (±7.0) kg DDT, 2.7 (±1.0) kg chlordanes, and 6.2 (±2.7) kg dieldrin.

Legacy Pesticide Conceptual Model and Impairment Assessment Report

During FY 04-05, the CEP funded the development of the *Legacy Pesticides in the San Francisco Estuary - Conceptual Model and Impairment Assessment Report (CMIA)*. The CMIA report had several objectives, including:

- Evaluate the current level of impairment of beneficial uses, including description of standards or screening indicators and relevant data;

- Develop a conceptual model than describes the current state of knowledge for the pollutant of concern, including sources, loads, and pathways into and out of the Estuary and its water, sediment, and biota; and
- Identify potential studies that might reduce uncertainties associated with the report's conclusions.

The CMIA report examined legacy pesticides (i.e., pesticides that are no longer used but that persist) in San Francisco Bay. The pesticides of concern include DDTs, chlordanes and dieldrin.

The impairment assessment portion of the CMIA reviewed past information, which led the USEPA to determine that sport fishing in San Francisco Estuary was impaired by legacy pesticides. The assessment used the most recent, available data on concentrations of legacy pesticides in fish tissues, water, sediments, and bird eggs to determine whether sport fishing or other beneficial uses are impaired. The assessment compared the data to screening values and other criteria derived from regulatory standards and scientific literature to determine whether the weight of evidence indicates:

- **No impairment:** The available data demonstrates no negative effect on beneficial uses of the Bay, and there is sufficient information to make the finding.
- **Impairment unlikely:** The data indicate that legacy pesticides cause no impairment to the Bay. However, there is some uncertainty, due to lack of sufficient information or disagreement about how to interpret the data.
- **Possible impairment:** There is some suggestion of impairment, but the uncertainties preclude making a definitive judgment.
- **Definite impairment:** The data clearly demonstrate a negative effect on the beneficial uses of the Bay.
- **Unable to determine impairment:** There is insufficient information to make any determination.

The assessment found some indications that beneficial uses of San Francisco Estuary may continue to be impaired by legacy pesticides. In particular, water and fish data indicate impairment of the Sport Fishing Use. The level of impairment is not high when compared to other organochlorine compounds (e.g., PCBs). There is evidence of long-term declines in pesticide levels. There is less evidence of impairment of other uses of the Bay—preservation of rare and endangered species, fish spawning, or wildlife and estuarine habitat. Chlordane concentrations in sediments may, in some locations, affect animals living in the sediments, and DDT concentrations in bird eggs may be close to limits that would indicate impairment.

The conceptual model portion of the CMIA provides a framework for optimizing management decisions and actions for reducing contamination by legacy pesticides in San Francisco Bay. The conceptual model:

- Presents a simple one-box model of the Bay;
- Synthesizes information on the sources of DDTs, chlordanes, and dieldrin to the Bay;
- Estimates total loads to the Bay;
- Describes the chemical characteristics of the pesticides and the dominant processes that determine their fate within the Bay; and
- Uses the one-box model to facilitate understanding responses within the Estuary and estimating recovery rates.

The conceptual model also identifies areas of uncertainty, which limit the ability to quantify responses and rates.

Results from the conceptual model indicate that legacy pesticides enter the water and active sediment of San Francisco Estuary in runoff from the Central Valley and local watersheds, in municipal and industrial effluent, by deposition from the atmosphere, by erosion of historically contaminated sediment deposits, and through dredging and disposal of dredged material. Runoff from the Central Valley and local watersheds introduce the largest loads of legacy pesticides to the Bay.

There are many uncertainties and information gaps provided in the CMIA conclusions. They include the following:

- Uncertain understanding of the large runoff events from the Central Valley;
- Uncertain understanding of loads from small tributaries;
- Model uncertainties;
- Lack of established criteria for determining impairment;
- Uncertain understanding of trends in pesticide concentrations; and
- Lack of understanding of sediment "hot spots."

Future projects will obtain additional data and conduct more analysis of the sources, fate, transport and effects of legacy pesticides. During FY 05-06, appropriate strategies for addressing legacy pesticides in the Estuary and its watersheds will likely be addressed through CEP efforts. The CMIA suggested that future CEP data gathering and technical analysis should focus on determining the potential effectiveness and actual effects of actions to reduce or eliminate impairment; and to restore beneficial uses of the Bay.

Copper and Nickel[3] Control Measures (Provisions C.9.a and b)

Management Activities

Copper Action Plan and Nickel Action Plan Reviews

In FY 04-05, the Program assisted the SCBWMI Bay Modeling and Monitoring (BMM) Subgroup to conduct two semi-annual reviews of the Copper Action Plan (CAP) and Nickel Action Plan (NAP). These reviews occurred on November 10, 2004 and April 22, 2005. A focus of the November 2004 meeting was to review the current CAP using the adaptive management

[3] In response to Regional Board staff comments dated November 13, 2002 and June 26, 2003, the Program formalized the process in which the Program and Co-permittees identify specific baseline actions within their individual Cu/Ni Work Plans. Program and Co-permittee staff met on June 6 and July 8, 2003 to discuss and subsequently finalize proposed changes to the CAP/NAP reporting approach and format. On August 5, 2003, the Program and Co-permittees submitted a Revised FY 03-04 Copper/Nickel Work Plan consisting of the updated baseline activity tables for each copper and nickel action. Appendices B and C of the Program's 2001 NPDES permit were used as the starting point in developing the updated Cu/Ni baseline activity tables. The Revised FY 03-04 Copper/Nickel Work Plan also included clarifications and additions intended to address questions and concerns raised by Regional Board staff over the last year.

At the Regulatory Executive Forum meeting on September 26, 2003, Regional Board staff provided Program staff a one page document entitled *CAP/NAP briefing 9-23-03 CAP/NAP talking points only*. The document contained comments on several of the baseline activities contained in the Program's Revised FY 03-04 Copper/Nickel Work Plan. On November 21, 2003, Program staff provided Regional Board staff with some additional background information to clarify the baseline activities mentioned in the "talking points".

process built into the CAP. This process involved reviewing tables which described how each baseline activity had either been completed or been incorporated into another on-going Program or POTW activity. The tables also contained proposed revised CAP activities reporting approaches, describing where and how annual CAP activity information could be found within other reports. The goal of the effort was to reduce the increasingly voluminous and generally duplicative CAP reporting by changing to reporting by reference to other reports to the greatest extent possible. The tables also included a column with recommendations on whether or not each baseline activity would be appropriate to implement (or continue to implement) Bay-wide and how reporting might best be conducted. The subgroup agreed that the majority of baseline activities are being addressed by on-going stormwater program required activities or on-going POTW required activities. Agreement was not reached on what activities could be considered "completed" or how to move towards CAP reporting by reference. It was suggested that an actual Bay-wide Copper Action Plan would not necessarily need to be developed if all the pertinent CAP activities were otherwise included and conducted as stormwater and POTW NPDES permit conditions (e.g., pursuant to pollutant reduction plans). Water Board staff is in the process of reviewing the proposed revised CAP activities reporting approach tables and providing comments on the recommendations.

At the April 2005 CAP/NAP review meeting, discussions continued about how the transition would likely occur to a bay-wide Copper Management Strategy (CMS). Water Board staff would like a uniform level of effort bay-wide (by agencies) and an effectiveness level at least as great as that achieved in the CAP/NAP. Ambient monitoring and trigger criteria need to be revisited so that there is a consistent and equivalent level of effort expended North and South of the Dumbarton Bridge. The proposed approach North of the Dumbarton Bridge is to rely on RMP data that is collected once per year versus the monthly dry season data collected south of the Dumbarton Bridge. The City of Palo Alto proposed to convert its Copper Indicators Report to a model for a bay-wide indicators report, if provided the necessary information. New funding mechanisms will need to be identified for on-going implementation of these bay-wide CMS components (stormwater and POTW annual reporting, indicators reporting and ambient monitoring). CMS requirements may be implemented through a blanket (watershed) permit. Currently, timing is uncertain. It is believed that the Basin Plan Amendment adopting the North of Dumbarton Bridge Copper/Nickel (Cu/Ni) site-specific water quality objectives (SSOs) and the CMS would likely be completed and adopted before the Stormwater Regional Group Permit.

Implementation of CAP/NAP Baseline Activities

The majority of baseline actions are implemented at the Program level (except for those assigned to San Jose, Sunnyvale and Palo Alto), and are included in the Program's Annual Reports and Work Plans. In mid-2003, the Program identified the following copper control activities that were deemed appropriate to implement at the Co-permittee level:

- CB-1: Measures to reduce copper discharges from vehicle washing operations;
- CB-3: Measures to control copper in discharges of stormwater in targeted industrial sources;
- CB-6, 7: Measures to reduce traffic congestion/promote alternative transportation;
- CB-8: Measures to classify and assess watersheds and improve institutional arrangements for watershed protection;
- CB-11: Measures to improve street sweeping controls and stormwater system operation and Maintenance;
- CB-12: Measures to control copper discharges from pools and spas;

- CB-21: Measures to discourage architectural use of copper; and
- NB-1: Measures to control nickel discharges from construction sites (sediment).

The *FY 05-06 Copper/Nickel Work Plan* and summary of FY 04-05 accomplishments are provided within Appendix C-4. Currently, the Copper/Nickel Work Plan contains twenty-one copper and seven nickel baseline actions. During FY 04-05, some specific accomplishments included:

- Distributed approximately 2,068 English and 1,038 Spanish Watershed Watch (WW) campaign brochures that included outreach on car washing (aimed at reducing copper and nickel; and other pollutant inputs to stormwater). In addition, the Program distributed Watershed Watch campaign brochures at public events and worked with WW partner, Classic Car Wash, to do four promotional events in October and November 2004(CB-1);
- The City of San Jose conducted additional rooftop inspections of selected facilities that may be potential sources of copper. Contact letters and the stand-alone roof vent BMP information (prepared by the City of San Jose) were mailed to the selected facilities (CB-3);
- Completed the NOI Filers outreach project with the City of San Jose (CB-3);
- The City of Palo Alto prepared the fourth annual Copper Action Plan Report (CB-4.3);
- Continued to actively support the Brake Pad Partnership (BPP) (CB-5), providing resources to fund and advocate BPP through BASMAA, actively tracking activities of BPP and efforts under the Proposition 13 grant, and attending the annual BPP meeting on June 22, 2005.
- Established links/information relating to Bay copper impairment research data posted to a prototype SFEI-based web portal (CB-5, CB-16);
- Continued to work with and support the Land Use Subgroup (LUS). Tasks included finalizing two memoranda relating to transportation impacts on water quality. CB-6 and CB-7);
- Implemented the third year of the Multi-Year Monitoring Plan (Included specific water quality and sediment sampling and analyses for all metals including copper and nickel.) (CB-8.4);
- Continued to implement Co-permittee street sweeping and catch basin cleaning programs consistent with performance standards (aimed at reducing discharges of pollutants, including copper and nickel, to storm drains and receiving waters). Summarized the amount of material collected and miles swept within the Program's jurisdiction (CB-11);
- Continued distributing the updated brochure entitled Keep Pool, Spa and Fountain Water Out of Storm Drains, Creeks, and the Bay (aimed at reducing discharges of pool water, which can contain copper and nickel, to storm drains and receiving waters.) (CB-12);
- Implemented a web-based environmental clearinghouse on copper and nickel pollution prevention activities. (CB-16);
- Continued to track and report relevant activities related to water quality modeling to keep abreast of potential applications and to update the current impairment assessment box model (CB-18) and;

- The City of San Jose continued to monitor dissolved copper and nickel during the dry season (in Lower South San Francisco Bay) as part of their ambient monitoring program (additional information provided below).

Lower South Bay Ambient Monitoring

In February 1997, the City of San Jose, on behalf of all local agencies in the South Bay, began sampling total and dissolved copper and nickel concentrations at ten stations in the Lower South San Francisco Bay (LSSB). In October 1997, two fresh water stations were added, one each in the lower reaches of Coyote Creek and the Guadalupe River, bringing the total number of stations to twelve (Figure 4-1). The sampling design from the CAP/NAP requires monthly compliance sampling. Ten locations in South San Francisco Bay are monitored to compare mean dry season dissolved copper and nickel concentrations to respective trigger levels. Results from monthly monitoring at ten stations show ambient concentrations continuing to be well below the adopted SSOs of 6.9 ug/L and 11.9 ug/L for copper and nickel, respectively. Ambient concentrations have remained consistent (no upward or downward trend) and below the stringent Action Plan trigger values (established as NPDES permit requirements in 2000) of 4.0 ug/L and 6.0 ug/L for copper and nickel, respectively. The monitoring results are located on the City of San Jose's Environmental Services Department website (www.sanjoseca.gov/esd/pub_res.htm).

Figure 4-1: Map of monitoring station locations in LSSB (City of San Jose)

Future CAP/NAP Approach

In 2003, the BMM Subgroup determined that further efforts at fine-tuning the CAP baseline activities would likely be unproductive due to certain remaining inherent challenges with the original CAP/NAP language. To assist in the identification of key baseline copper control activities that are most effective in the removal of copper, the Program helped fund preparation of a Clean Estuary Partnership document entitled *Copper Sources in Urban Runoff and Shoreline Activities: Information Update*. This report was prepared as part of North of Dumbarton Cu/Ni SSOs project funded through the CEP and finalized in November 2004.

Additional information regarding this report is discussed below. The CEP also funded a follow-up project to prepare a draft reporting template and guidance on how the top priority stormwater CMS activities should be implemented and how the effectiveness of those activities should be assessed. The first source to be assessed is architectural copper. The draft CEP report is scheduled for Work Group review in September 2005. Depending on the success of this first effort, additional write-ups may be prepared for vehicle brake pads, copper pesticides and marine antifouling compounds. Other sources of copper in urban runoff would be addressed through existing permit requirements and public outreach.

The Cities of Palo Alto and San Jose are funding efforts to complete a mockup of the bay-wide POTW CMS Annual Performance Summary Report which consists of influent, effluent, and loading time series graphs. More specifically, the Report would include three rolling ~ ten year time series graphs on a single page with likely one page per POTW. At least ten years of data is needed to document the reductions already achieved by past actions. These graphs are designed to provide simple visual documentation of continued reasonable levels of pollution prevention and treatment plant performance by each POTW. Influent concentrations are used as an integrated indicator of the effectiveness of pretreatment, pollution prevention and water purveyors' corrosion control measures within individual POTW service areas. Effluent concentrations are a direct indicator of the effectiveness of plant performance.

As noted above under CAP/NAP reviews, efforts are continuing towards finalizing and implementing a coordinated equitable bay-wide CMS effort that minimizes redundant reporting. Based on these efforts and subsequent review and discussions with Water Board staff and Co-permittees, the Program will develop and submit future Copper/Nickel Work Plan which reflects focused copper control activities.

Monitoring Activities

Watershed Monitoring

During FY 04-05, the Program continued to analyze water samples collected in Santa Clara creeks through the implementation of its Revised Multi-Year Plan. Water samples were collected as screening level indicators of water quality at a variety of creek sites draining urban and rural land use areas and analyzed for total recoverable copper and dissolved copper concentrations. As described in the Program's Revised Multi-Year Plan, grab samples were collected during two seasons (wet and dry).

In FY 04-05, total recoverable copper concentrations ranged from 1.1 to 47 ug/L in twenty samples collected from eight creeks in Santa Clara County. At the same sites, dissolved copper concentrations ranged from 1.0 – 12.0 ug/L. Site B-1 (Barron Creek at Park Blvd.) exhibited the highest total recoverable (47 ug/L) and dissolved (12 ug/L) concentrations for both the dry and wet season sampling events. The median total recoverable copper concentration for all sites during dry season sampling event was 5.1 ug/L, as opposed to wet season sampling event median of 2.1 ug/L (n=20).

Dissolved copper concentrations were adjusted for hardness and compared to copper water quality standards for freshwater described in the California Toxics Rule (CTR). Analytical results indicated that only one sample exceeded the Continuous Concentration Criterion (CCC) for copper (n=20). A full description of methods, results and conclusions are presented in the Summary Assessment Report within Appendix C-1.

Urban Runoff Copper Source Assessment

As mentioned previously, the CEP provided funding during FY 04-05 for the development of a report entitled *Copper Sources in Urban Runoff and Shoreline Activities: Information Update*. This report was prepared as part of North of Dumbarton Bridge Cu/Ni SSOs project. The focus of this report is copper sources in urban runoff to San Francisco Bay. Two types of non-runoff Bay shore copper releases not previously investigated are also included—marine antifouling paint and copper algaecides applied to shoreline lagoons.

The information within this report was assembled from available data sources. Only existing information was used; sampling and chemical analysis were not conducted.
The purpose of this report is to summarize information on copper sources that are carried to San Francisco Estuary in urban runoff; and copper that is released directly into the San Francisco Estuary from shoreline activities. The report accomplishes the following:

- Provides estimates of the amount of copper released to San Francisco Estuary from each source;
- Estimates the relative degree of uncertainty in each copper release estimate and lists the sources of uncertainty for each estimate;
- Reviews available control measures for each copper source, providing control measure effectiveness information to the extent data are available;
- Identifies feasible control measures for copper sources in urban runoff and shoreline activities; and
- Identifies priorities for investigation of sources and control measures.

This report, Cu/Ni loading estimates and Cu/Ni control measures is provided on the Program's Copper *Sources and Management Strategies Clearinghouse Website* (www.scvurppp-w2k.com/cu_clearinghouse_web/cu_source.htm).

Brake Pad Partnership

The Brake Pad Partnership (BPP) is a multi-stakeholder effort to understand the environmental impacts of automobile brake pad wear debris (which contains copper). Manufacturers, regulators, stormwater management agencies (e.g., SCVURPPP) and environmentalists are working together to understand these impacts. BPP efforts are aimed at developing an approach for evaluating potential impacts of copper (from brake pad debris) affecting water quality in the South San Francisco Bay. Brake pad manufacturers have committed to adding this evaluation approach (to existing practices) for designing products that are safe for the environment while meeting performance requirements.

To understand the fate and transport of copper from automobile brake pad wear debris, the Program (through BASMAA) continued to financially support the BPP in conducting a set of interlinked laboratory, environmental monitoring and environmental modeling studies. BPP efforts include the following three environmental modeling studies:

- Air Deposition Modeling—To predict how much brake pad wear debris is released and deposited in the study watershed (Castro Valley);

- Watershed Modeling—To estimate how much copper from the deposited wear debris washes into the storm drainage system and eventually reaches the waters of the South San Francisco Bay; and.

- Bay Modeling—To determine whether and, if so, to what extent copper from brake pad wear debris affects short- and long-term concentrations of copper in the Bay.

In support of these modeling efforts, the BPP is conducting additional studies to develop accurate input data for the models. An air deposition monitoring effort will provide data necessary for comparison of the model results with the data values as a part of the air deposition model evaluation. Stormwater monitoring data is being collected to help calibrate and validate the watershed modeling. In addition, the BPP is conducting physical and chemical characterization analyses to determine model parameters specific to brake pad wear debris.

In FY 04-05, the BPP made substantial progress in its work on air deposition monitoring; generation and characterization of a representative sample of brake pad wear debris; estimating the amount of copper released to the watershed from brake and non-brake sources; water quality monitoring; and watershed modeling. The following are summaries of the findings:

Characterization of Airborne Brake Pad Wear Debris - The characterization of a representative sample of airborne brake pad wear debris has been completed and the BPP's Scientific Advisory Team conducted a stakeholder and independent expert review of their work. The researchers found that the generation of airborne brake pad wear debris varied significantly for the three different materials that comprise the representative sample. The material that generated the most airborne brake pad wear debris produced nearly fifteen times as much wear debris as the one that generated the least. The mass mean aerodynamic diameter of the representative sample of airborne brake pad wear debris was approximately 2.7 µm. A copy of the report can be found on the BPP's website at:
www.suscon.org/brakepad/pdfs/ADPSD%20Final%20Report%2001-28-05.pdf

PCBs and Dioxin Compounds Control Program (Provision C.9.e)

Provision C.9.e. of the Program's NPDES permit requires development of a control program to reduce or eliminate discharges of Polychlorinated Biphenyls (PCBs) and dioxin-like compounds from urban runoff conveyance systems from controllable sources (if any). As part of the PCBs/Dioxins Control Program, monitoring activities were conducted by the Program during FY 04-05. In addition, PCBs/Dioxins related management activities are described.

Polychlorinated Biphenyls

PCBs were manufactured in the United States from 1929 to 1977. They were widely used by many industries because of their low electrical conductivity, high boiling point, chemical stability and flame retardant properties. The largest use of PCBs was in electrical equipment, including transformers and capacitors. However, they were also widely used in a variety of other applications, including hydraulic fluids, dust control, flame retardants, lubricants, paints, sealants, wood preservatives, inks, dyes and plasticizers. PCBs have also been found in a variety of non-liquid materials, including construction materials (i.e., insulation, roofing and siding materials). In 1979, the USEPA banned the manufacture of PCBs in the United States. Their import, export and distribution in commerce were also banned and PCBs uses were restricted to totally enclosed applications. The USEPA has authorized other minor uses since that time but the unavailability of PCBs and health and safety concerns effectively ended their use in new applications. PCBs are often referred to as a "legacy" pollutant, meaning there are relatively few current uses, but past uses appear to have left large amounts in the environment.

All segments of San Francisco Bay were listed as impaired by PCBs in the 2002 Clean Water Act Section 303(d) list. The listing was in response to an interim advisory on the consumption of fish from the Bay issued by the California Office of Environmental Health Hazard Assessment. The advisory was issued after PCBs and other pollutants (e.g., mercury) were found in Bay fish tissue at levels thought to potentially pose a health risk to people consuming fish caught in the Bay. The Water Board has placed high priority on addressing PCBs in the Bay and is currently developing a PCBs TMDL.

The Program has provided leadership to Bay Area storm water management agencies in their efforts to assist the Bay PCBs TMDL. This included leading a regional study that characterized the distribution of PCBs concentrations in storm water conveyance sediments in Bay Area watersheds. The Program also performed PCBs case studies in selected areas where elevated concentrations of PCBs were found during the regional study and coordinated similar case studies by other Bay Area storm water management agencies. The case studies were aimed at identifying PCBs sources and controls. The Program also prepared work plans for the above regional and local field studies. The work plans included a preliminary list of known sites where PCBs were used, stored and/or released in Santa Clara County. To facilitate regional coordination, the Program led a work group of representatives from BASMAA and Water Board staff and provided a staff to represent BASMAA on the CEP PCBs workgroup.

The Program also completed a report on efforts to develop methods of controlling discharges of PCBs from Bay Area urban runoff conveyances. The study describes 1) past, current and planned efforts to identify PCBs control options in the Bay Area, 2) management practices currently implemented by Bay Area storm water management agencies that may reduce discharges of PCBs from urban runoff conveyances, and 3) potential additional PCBs storm water control options and some of their advantages, limitations and cost factors.

During FY 04-05, the Program continued to work with other Bay area dischargers and Water Board staff through BASMAA, the CEP and the RMP to coordinate and plan activities related to PCBs and other pollutants of concern. Efforts included providing funding to these organizations, participating in selected stakeholder meetings, committees and work groups and, as appropriate, reviewing and commenting on relevant documents prepared by the CEP, RMP and Water Board staff. Program staff continued to represent BASMAA on the RMP TRC, RMP SPLWG and CEP PCBs Work Group. CEP projects related to PCBs include the following:

PCBs Concentrations of Nearshore Sediments and Assessment of Data Quality

The primary objective of this project is to determine whether existing data are sufficient to quantify PCB concentrations in the nearshore sediments of central and south San Francisco Bay that are not directly impacted by local PCBs sources (i.e., the project aims to quantify PCB concentrations in nearshore sediments impacted primarily by regional or Bay-wide sources). If existing data are sufficient they may support selection of interim TMDL numeric targets for PCBs in sediments. A draft project report is currently undergoing scientific peer review.

PCBs TMDL Implementation Plan Development

This project will assist Water Board staff in developing an implementation plan for the PCBs TMDL. The project report describes identification and prioritization of PCBs sources, control strategies, and regulatory oversight and responsibility. One focus is municipal roles and responsibilities in the cleanup of PCBs “hot spots,” including on–land spill sites and accumulated sediments with PCBs in storm water conveyances. The first draft of project report

was released in June 2005 and is currently being revised in response to comments from BASMAA and other stakeholders.

Conceptual Model / Impairment Assessment Report on PCBs in San Francisco Bay

This project provides a detailed analysis of the status of the impairment of the Bay by PCBs and associated uncertainties. It also presents a conceptual model that describes sources, estimated loads, and processes that affect the fate of PCBs in the Bay. The first draft of the project report was released in October 2004 and is being revised in response to comments from BASMAA and other stakeholders.

San Francisco Bay Food Web Model

This project expanded an existing Bay food web model to include sensitive wildlife species as endpoints. The expanded model predicts the maximum concentration of PCBs in Bay sediments that result in safe levels of PCBs in Bay wildlife, in addition to the model's capability of predicting sediment concentrations associated with safe levels of PCBs in edible fish tissue for human consumption. These data may assist Water Board staff select numeric targets for PCBs in sediments for the Bay TMDL. A draft project report has undergone stakeholder and scientific peer review and is near finalization.

Multibox Bay PCBs Fate and Transport Model and Multi-year Sediment Sampling Program

This project is a multi-year program, building on model development efforts already underway, to construct a mechanistic model that will advance our understanding of pollutant behavior in the Estuary and provide a new tool for water quality management. The project goals include: 1) developing a better tool for predicting future pollutant concentrations and testing potential management actions; 2) clarifying the uncertainty of existing model predictions; 3) identifying key areas where fieldwork can reduce uncertainties; and 4) conducting key fieldwork, including sediment coring in the Bay to improve estimates of the PCB inventory and historic loads and tracer experiments to quantify flushing. The model is currently undergoing review and testing and a simulation framework for an uncertainty/sensitivity analysis is being built.

Dioxins

The term "dioxin-like compounds" typically refers to a group of chemical compounds with similar chemical structures that fall under three main categories: polychlorinated dibenzo-p-dioxins (PCDDs), polychlorinated dibenzofurans (PCDFs) and certain polychlorinated biphenyl (PCB) congeners with dioxin-like potency that are often referred to as dioxin-like PCBs. Currently, the Program is addressing PCBs, including dioxin-like PCBs, as part of the separate program described above. PCDDs and PCDFs (collectively referred to as "dioxins") are not commercially produced but are unintentional by-products of combustion and chemical production processes. Contemporary sources of dioxins in the Bay Area may be primarily associated with combustion (e.g., residential wood burning and diesel exhaust). Dioxins may also remain in the Bay Area environment from practices potentially carried out more widely in the past. These practices include garbage burning, medical waste incineration and the use of chlorinated pesticides (e.g., pentachlorophenol).

All segments of San Francisco Bay were listed as impaired by certain dioxin compounds in the 1998 and 2002 Clean Water Act Section 303(d) lists. The impetus for the listing was an interim advisory on the consumption of fish from the Bay issued by the California Office of Environmental Health Hazard Assessment. As with PCBs, the advisory was issued after dioxin

compounds and other pollutants were found in Bay fish tissue at levels thought to potentially pose a health risk to people consuming them. The Water Board opposed the 1998 listing of dioxins in the Bay but was overruled by the USEPA. The 2002 303(d) list designates the TMDL priority for dioxins in the Bay as low, and a schedule for performing a TMDL is not included. The Program understands that the Water Board does not plan to perform a TMDL for dioxins in the Bay.

The Program has developed and implemented three work plans related to dioxins. In March 2002, the Program submitted an initial work plan. This work plan specified reviewing readily available data on methods used to characterize dioxins in storm water runoff and surface waters and concentrations typically found in the Bay Area and other areas. The completed review revealed that dioxins have been found in urban runoff in the Bay Area and other locations, and in sediments in the Bay and other estuaries. It was concluded that existing data are not sufficient to characterize the distribution in urban runoff among Bay Area land uses or calculate loadings to the Bay. The second work plan was completed in March 2004 and described the Program's collaboration with other Bay area storm water management agencies to develop an introductory report on dioxins. The completed report emphasized issues related to urban runoff in the Bay area, including regulatory context, impacts, sources, pathways, review of relevant Bay Area, national and international studies, and qualitative review of potential storm water controls. The third work plan was completed in March 2004. It specified that Program Staff will track regional, state and federal efforts to address dioxins and encourage Co-permittees to track, understand, and participate in these programs, as appropriate.

Summary of Selected Regional, State and Federal Efforts Relevant to Addressing Dioxins

In FY 04-05, Program Staff prepared a memorandum which:

- Provides some general and regulatory background information about dioxins;
- Summarizes recent SCVURPPP activities related to dioxins;
- Summarizes selected regional, state and federal efforts that address dioxins; and
- Recommends that the Co-permittees consider implementing dioxins pollution prevention options and/or encourage others to implement dioxins pollution prevention options through outreach and/or resolution adoption.

The memorandum describes programs by the Association of Bay Area of Governments (ABAG), California Environmental Protection Agency and USEPA to address dioxins in the Bay Area environment. In particular, the memorandum describes dioxins pollution prevention options developed by ABAG's Bay Area Dioxins Project in the context of potential implementation by municipalities. Municipal pollution prevention demonstration projects conducted by the Bay Area Dioxins Project are also described. The demonstration projects developed tools and resources intended to facilitate municipal implementation of practices that reduce the use of diesel fuel vehicles, chlorine bleached paper and PVC building materials.

The memorandum also indicates that Program Staff plan to survey all Co-permittees during FY 05-06 to identify dioxins pollution prevention actions currently implemented and formal policies already adopted. Based on the results of the survey, the Management Committee will consider next steps in encouraging dioxins pollution prevention at the municipal level. The Dioxins memorandum is included within Appendix C-5.

Conceptual Model/Impairment Assessment for Dioxins in San Francisco Estuary

In FY 04-05 the CEP funded the development of the *Dioxins in the San Francisco Estuary - Conceptual Model and Impairment Assessment Report (CMIA)*. The CMIA report had several objectives which include:

- Evaluating the current level of impairment of beneficial uses, including descriptions of standards or screening indicators and relevant data;
- Developing a conceptual model that describes the current state of knowledge for the pollutant of concern, including sources, loads, and pathways into and out of the Bay and its water, sediment, and biota; and
- Identifying potential studies that might reduce uncertainties associated with the report's conclusions.

The impairment assessment reviews past information, which led the USEPA to determine that sport fishing in San Francisco Bay was impaired by dioxins. The assessment uses the most recent, available data on concentrations of dioxins in fish tissues, water, sediments, and wildlife to make an independent assessment of the current level of impairment of sport fishing and other uses of the Bay. The assessment uses the data to determine whether there is a weight of evidence indicating:

- **No impairment:** The available data demonstrate no negative effect on beneficial uses of the Bay, and there is sufficient information to make the finding.
- **Impairment unlikely:** The data indicate that dioxins cause no impairment to the Bay. However, there is some uncertainty, due to lack of sufficient information or disagreement about how to interpret the data.
- **Possible impairment:** There is some suggestion of impairment, but the uncertainties preclude making a definitive judgment.
- **Definite impairment:** The data clearly demonstrate a negative effect on the beneficial uses of the Bay.
- **Unable to determine impairment:** There is insufficient information to make any determination.

Dioxins are present in the environment in very low concentrations, and chemical analyses are difficult and expensive. As a result, relatively few measurements have been made of dioxins in the water, sediments, and biota of San Francisco Bay. The majority of available data is difficult to interpret because many specific dioxin compounds are present at levels below analytical detection limits. These constraints make an impairment assessment nearly impossible. Nevertheless, the available fish and water data do indicate possible impairment of the Bay for sport fishing. However, the degree of impairment from dioxins and furans alone is small compared to impairment by the dioxin-like PCBs, which are being addressed by a separate TMDL. Since very little information is available, there is virtually no evidence of impairment of other beneficial uses.

The conceptual model provides a framework for prioritizing management decisions and actions for reducing contamination by dioxins in San Francisco Bay. The conceptual model:

- Presents a simple one-box model of the Bay;
- Synthesizes information on sources of PCDD/Fs to San Francisco Bay, including use of national and regional studies of PCDD/Fs to augment the limited available local data;
- Describes pathways and estimates loads from single-point and more diffuse sources;

- Describes the dominant local processes that determine the fate of PCDD/Fs in the Bay; and
- Presents inputs to and outputs from the one-box mass balance model of the current inventory, long-term change, loading estimates, and loss pathways.

The conceptual model also identifies areas of uncertainty, which limit the ability to quantify responses and rates.

Dioxins are mostly produced as by-products of combustion and as contaminant by-products of chlorinated-chemical processes (e.g., syntheses of organochlorine pesticides, pulp bleaching and manufacture of polyvinyl chloride (PVC). In the past, emissions from facilities (i.e., incinerators and smelters) were thought to be the largest sources of dioxins. These sources have been controlled, reducing the major historic sources of dioxins. More disperse sources (e.g., yard burning and vehicle emissions) remain uncontrolled and persist at levels similar to those in the past.

Since there is little local information, estimates of loads to the Bay are subject to great uncertainties. However, it is clear that the legacy of dioxins in the watershed and the sediments outweigh the other sources. Model estimates of the degradation and transport rates for dioxins suggest that current inputs of dioxins to the Bay may also be sufficient to continue the current level of estimated impairment.

There are many uncertainties and information gaps in this report's conclusions. Perhaps the greatest uncertainty is in dioxin measurements themselves—because so many compounds occur at extremely low concentrations. As a result, the available analyses include estimated and measured values. Dioxins are thought to be so toxic that these estimated values can affect data interpretation. Future projects will obtain additional data and conduct more analysis of the sources, fate, transport, and effects of dioxins.

Sediment Control Program (Provision C.9.f)

<u>San Francisquito Creek Sediment TMDL</u>

In response to a listing of impairment by sediment under section 303(d) of the Clean Water Act and a need to provide information for a TMDL assessment, two separate (but coordinated) projects have been developed. These projects are the San Francisquito Creek Watershed Analysis and Sediment Reduction Plan (Plan), administered by the San Francisquito Creek Joint Powers Authority (JPA); and the Aquatic Habitat Assessment and Limiting Factors Analysis, managed by the Santa Clara Valley Water District (SCVWD). The Plan fulfills Permit Provisions C.9.f.i and C.9.f.ii of the Program's NPDES permit.

The primary issues driving the TMDL are flooding and degradation of habitat, impacting steelhead trout and other threatened aquatic species. The approach adopted by the JPA and SCVWD in these projects is to assess factors limiting the threatened aquatic species, including but not confined to those related to excessive sedimentation caused by human land use activities. Project products are intended to produce information that will assist the Water Board to confirm or reject the validity of the sediment impairment listing and help identify other causes of impairment to aquatic species and their habitats in San Francisquito Creek.

There were two main objectives for developing the Sediment Reduction Plan. The first objective was to understand the erosion, transport and deposition of sediment in the San Francisquito

Creek watershed, focusing on human-related activities that modify hydrology, alter erosion rates or trap sediment. The second objective was to review existing sediment management policies and practices and recommend management measures to effectively reduce erosion and sediment transport in the watershed. The specific tasks for this project are:

1) *Historical Conditions Analysis:* Analyze historical conditions in the San Francisquito watershed, particularly sediment supply, transport, and deposition as they relate to stream and water character;
2) *Existing Conditions Analysis*: Analyze land use, biological resources, stream management and maintenance and designated beneficial uses;
3) *Watershed Sediment Analysis:* Develop a rapid sediment budget for the watershed, detailing sediment sources, sediment sizes, storage and sediment yield;
4) *Assessment of Existing Management Practices:* Assess existing policies and regulations that provide erosion control or channel protection, identified deficiencies and recommended improvements; and
5) *Watershed Analysis and Sediment Reduction Management Plan:* Incorporate all analyses completed in previous tasks and makes recommendations for measures to manage erosion of the identified human-related sediment sources and estimate reduction of sediment load from these measures.

The *Watershed Analysis and Sediment Reduction Management Plan* (Final Report) was completed in May 2004. The sediment study was funded under a Proposition 13 grant and administered by the JPA. This report can be found at www.cityofpaloalto.org/jpa/references.html.

The *Aquatic Habitat Assessment and Limiting Factors Analysis* is intended to characterize channel and habitat conditions with respect to factors that limit the steelhead population in the San Francisquito Creek watershed. Information for this analysis came both from direct data collection and analysis and from studies that have already been performed. Data collection and analysis evaluated stressors that limit: (1) aquatic habitat, (2) steelhead (*Oncorhyncus mykiss*), and (3) development of individuals in specific steelhead life history stages within the watershed. Extensive studies have already been conducted within the watershed. These studies provided a base for study design, and data from these studies were incorporated with new data for the current habitat assessment and the limiting factors analysis. A draft report on the results and conclusions of this project are expected in FY 05-06.

During FY 05-06, the Program will continue to follow and participate in the sediment-related activities within the San Francisquito watershed.

Stevens Creek Watershed Analysis and Sediment Management Practices Assessment

The Program developed a *Work Plan for Conducting a Watershed Analysis and Management Practice Assessment in Other Creeks Potentially Impaired by Sediment from Anthropogenic Activities (*Work Plan) in fulfillment of Permit Provision C.9.f.iii paragraph 2. The Work Plan identifies a two-phased approach to assess watersheds previously identified by the Program as high priority for watershed analysis due to the potential for anthropogenic sediment impairment. Phase 1 entails completing Tasks 1 through 3. The Program contracted with Stillwater Sciences to complete Task 1 of the Work Plan, Conduct Watershed Analysis using a Limiting Factor Analysis (LFA) Approach in the Stevens Creek watershed during FY 03-04. Program staff completed a sediment management practice assessment in the Stevens Creek watershed

to complete Task 2 of the Work Plan. Both the Draft LFA Technical Report and Draft Sediment Management Practice Analysis Report were released on July 7, 2004 for external review by the Watershed Analysis AHTG. The following are summaries of the results and conclusions that were presented in each report.

Stevens Creek LFA Results

The primary focus of the Stevens Creek LFA was to characterize the nature and degree of potential sediment-related effects on a selected indicator species (i.e., Steelhead Trout). The objectives of the LFA were to identify and fill information gaps related to physical and biological factors controlling population dynamics of steelhead and to determine to what degree human-related sediment impacts are key factors limiting steelhead production. Based on the available information and reconnaissance surveys, several focused studies were developed to test hypotheses on potential limiting factors for steelhead. The focused studies addressed the following factors: fish passage barriers, gravel permeability, pool filling, bed mobility, overwintering habitat and water temperature. The LFA was conducted using a weight of evidence approach that was based on best available information and the results from each of the focused studies. The findings of the Stevens Creek LFA included:

1. Barriers, both partial and complete, limit access to a substantial amount of stream habitat; effects of barriers on smolt production depend on the ability of fish to pass barriers (upstream and downstream);
2. Seasonal low flows downstream of Fremont Avenue may severely limit steelhead outmigration success in some years, especially if channel drying occurs before the end of the outmigration period (typically February–May).
3. Gravel permeability is low but not likely limiting smolt production;
4. Pool filling is low, indicating high sediment transport capacity relative to sediment supply;
5. Bed mobility (and therefore potential redd scour) is relatively low in upper reaches but increases downstream;
6. Overwintering habitat is likely the key limiting factor for steelhead prior to smolt outmigration; and
7. Water temperature is elevated but not likely to lethal levels and is not likely limiting fish growth, as evidenced by the size distributions of age 0+ and 1+ steelhead.

In summary, the results from the focused studies indicate that factors associated with fish passage and lack of overwintering habitat are likely to have the greatest influence on the existing and future steelhead populations. The combination of substrate embeddedness, lack of cobble and boulder aggregations of sufficient density and thickness, low amounts of unembedded cobble and boulder substrate, and a lack of other key habitat features such as large woody debris jams, root wads, and backwater habitat, appears to result in relatively low winter carrying capacity for juvenile steelhead. Because of the uncertainties regarding the degree to which specific barriers impede upstream migration and the specific relationship between stream flow and passability, the extent that barriers restrict habitat under existing conditions could not be identified. However, Stillwater maintained the hypothesis that identifying and removing high priority barriers to fish passage would likely lead to substantial increases in smolt production.

Sediment Management Analysis Results

The objectives of the sediment management practices assessment were to inventory and document management practices relevant to erosion processes and sediment transport and deposition within the Stevens Creek watershed; and to evaluate the effectiveness of these

practices to the extent possible. The assessment approach relied on available information identifying existing sediment management practices and policies implemented by Co-permittee that have jurisdictions within the Stevens Creek watershed. The evaluation component of the assessment summarizes the relevant issues related to potential anthropogenic sources of sediment found in the Stevens Creek watershed and identifies data and information needed to more effectively evaluate existing management practices. The following results from the assessment were based on the best available information:

1. A variety of policies and best management practices are currently being implemented in the upper watershed areas that are designed to reduce the impacts of anthropogenic activities on landslide, surface and stream erosion. Although limited information is currently available to determine the effectiveness of these practices, this assessment identified data and information gaps that would be useful to evaluate management practices in the future.
2. Anthropogenic activities may be affecting stream erosion and may be a relatively large source of sediment to Stevens Creek reaches below the dam. Activities that are hypothesized to be potentially causing stream erosion include, dam influences on downstream bank stability, hydromodification, channel modifications and urban encroachment.
3. Surface erosion is believed to be minimal in the Stevens Creek watershed. However, based on preliminary observations, it appears that the Stevens Creek Quarry may be contributing to the release of fine sediment to the lower watershed via the dam.
4. The Stevens Creek dam likely blocks all coarse sediment supply from the upper watershed drainage area. The lack of coarse sediment migrating from the upper watershed to the lower could significantly be affecting channel stability in the lower watershed.
5. Sediment removal in the lower watershed continues to be an effective way to reduce impediments to fish migration in the lower watershed. In addition, existing grade control structures are likely reducing stream erosion by creating depositional areas throughout the creek through the reduction of flow. However, these structures may also be barriers to fish migration.

Conclusions and Recommended Next Steps

Consistent with the findings of the LFA and Sediment Management Practices Assessment, the Watershed Analysis AHTG concludes that although anthropogenic activities may be affecting stream erosion, current data suggests that factors related to anthropogenic sediment inputs are not believed to substantially limit steelhead production. These conclusions are based on results indicating that spawning habitat quality and quantity, as related to sediment, are not limiting the smolt production in Stevens Creek. Furthermore, while the low quality of pools may be limiting the amount of juvenile steelhead habitat, filling of pools by fine sediment does not appear to be an important factor.

Although additional studies would be required to determine the exact mechanisms responsible for the embeddedness, the results of the study suggest that the underlying lithology of the Stevens Creek channel, rather than anthropogenic sediment sources, is the primary contributor. A stiff silty clay layer was observed periodically underlying the channel and in outcrops at the bank toe at various locations along the entire length of Stevens Creek below the dam. This layer, in combination with lack of sediment supply of large substrate, is likely the primary reason

for the embeddedness observed in Stevens Creek. In addition, local inputs of fine sediment from eroding banks in the unurbanized upper reach and sources above the dam may also contribute to surface embeddedness observed in the upper and transitional reaches. Fine sediment deposition on the channel bed is commonly observed in streams below dams when changes to the hydrologic regime reduce scouring flows. However, the study results show low pool filling suggesting that the sediment transport capacity of Stevens Creek is sufficient to transport the majority of fine sediment delivered to the channel.

Future management actions may choose to focus on the key limiting factors that were identified in the LFA. Examples include increasing the availability of overwintering habitat in the upper reaches and evaluating the effects of specific barriers on steelhead migration (upstream and downstream). Further investigation of the feasibility of implementing these management actions is beyond the scope of this study and may be better addressed through additional assessment efforts in the Stevens Creek watershed (e.g., SCVWD's Watershed Stewardship Program).

The Water Board submitted a letter on August 4, 2004 providing comments and recommendations in response to the LFA and Sediment Management Practice Assessment Draft Reports submitted on July 13, 2004. In response to Water Board staff comments, Program staff coordinated a field reconnaissance trip to Stevens Creek on August 25, 2004. Participants on the field trip included Program staff, Water Board staff, Stillwater Sciences staff and SCVWD staff. As a result of the field trip and further discussion, Water Board staff agreed with the conclusions provided in the Limiting Factors Analysis Draft report (i.e., sediment is not a significant limiting factor for steelhead).

Based on the results and conclusions of the LFA and further discussion with Water Board staff, the Program has developed recommended next steps. The following table briefly describes the next steps and their current status.

Recommendation	Current Status
Finalize Stevens Creek Limiting Factors Analysis and Sediment Management Practices Assessment Reports and submitting them to the Water Board in fulfillment of Provision C.9.f.iii paragraph 2	Final reports were submitted to the Water Board on December 8, 2004.
Develop outreach materials for residents in the Stevens Creek watershed that demonstrate ways to protect the current steelhead population.	In FY 05-06, the Program will develop an outreach piece that will be designed to inform the residents of Stevens Creek watershed about the steelhead trout population and recommend ways to protect the current population.
Begin implementation of Phase 1 of the Work Plan in FY 04-05 in the high priority watershed, Upper Penitencia Creek.	See Summary on Watershed Analysis and Sediment Management Practices Assessment in the Upper Penitencia Creek Watershed.

<u>Upper Penitencia Creek Watershed Analysis and Sediment Management Practices Assessment</u>

After completing the Stevens Creek Watershed Analysis and Sediment Management Practices Assessment in FY 04-05, the Program began to conduct an LFA in another high priority watershed, Upper Penitenica Creek. The Program contracted with Stillwater Sciences to

complete Task 1 of the Work Plan, Conduct Watershed Analysis using a Limiting Factor Analysis (LFA) Approach in the Stevens Creek watershed.

In FY 04-05, existing data was complied, analyzed and initial hypothesis and focused field studies were conducted as part of the LFA. The Draft LFA Technical will be released in early September 2005 for external review by the Watershed Analysis AHTG. Consistent with the Program's FY05-06 Work Plan, Program staff will complete a sediment management practice assessment once the LFA is completed.

Trash Characterization and Management Activities

On November 14, 2001, the Water Board released the document entitled *Proposed Revisions to Section 303(d) List of Priorities for Development of Total Maximum Daily Loads for the San Francisco Bay Region* Report. This report states that "between now and the next 303(d) listing cycle, municipalities will be expected to assess trash impairments in their jurisdiction …", Water Board staff will review information concerning trash in the next listing cycle to determine whether specific water bodies warrant 303(d) listing. In a proactive response to the 303(d) Staff Report, the Program's Management Committee formed a Trash AHTG (first meeting on February 21, 2002). The Trash AHTG developed a Work Plan (submitted March 1, 2003) to identify a strategy for addressing trash problem areas that occur in or near urban streams and waterways of the Santa Clara Basin.

During FY 03-04, the Program assisted Co-permittees in completing the following Work Plan tasks: 1) document existing trash management practices implemented by municipalities and agencies within the Program's jurisdiction; 2) identify and map high priority trash problem areas and sources of trash in Santa Clara Basin watersheds; 3) develop a strategy to conduct trash evaluations in or near creeks; 4) sponsor a training workshop on how to use existing trash assessment tools (i.e., RWQCB Rapid Trash Assessment Protocol (Version 7.0) and Keep America Beautiful (KAB) Litter Index); and 5) develop standardized reporting format for documenting and evaluating trash management and monitoring activities.

During FY 04-05, Co-permittee staff and volunteers from watershed stakeholder groups conducted trash evaluations at a subset of the identified trash problem areas. The RWQCB Rapid Trash Assessment Protocol (Version 7.0)[4] was used to qualitatively assess trash conditions in wadeable creeks and the Keep America Beautiful (KAB) Litter Index was used to evaluate trash problem areas not located in creeks. Summary results from Co-permittee trash evaluations conducted during FY 04-05 are provided within a technical memorandum entitled *Trash Problem Area Evaluation Results- FY 04-05* (see Appendix C-6). The table entitled *Trash Evaluation Area Results by Watershed*, which is attached to the memorandum, provides the following information: site ID, date, location of trash problem area, assessment tool, score, trash source, trash management activities and comments. The approximate physical location, score (for both KAB and RWQCB trash evaluations) and major watershed boundaries within the Santa Clara Basin are provided within Figures 1 through 6 of the memorandum. A summary of the trash evaluation results and conclusions are discussed below.

[4] On November 12, 2004, Water Board staff provided RWQCB Rapid Trash Assessment Protocol (Version 8.0) to Program staff. Version 8.0 includes revisions to the text for easier readability; no changes were made to the scoring. Co-permitees plan to use Version 8.0 for all future trash assessments.

Results

Co-permittees conducted a total of 193 trash evaluations within the Program's jurisdiction. Four evaluations consisted of a site visit with no actual evaluation being conducted due to restricted access or observation of a clean site. As a result, 189 sites were scored using one of the existing evaluation tools (see Figure 4-2). Co-permittees conducted 146 trash evaluations using the KAB Litter Index (i.e., non-creek sites) and 43 trash evaluations using the RWQCB Rapid Trash Assessment Protocol (Version 7.0) (i.e., creek sites). The table entitled *FY 04-05 Trash Evaluation Summary Results* provides scores (for both KAB and RWQCB trash evaluations) by watershed. In addition, thirty sites were evaluated more than once (i.e., two to four times) at different seasonal time periods. As a result, a total of 156 unique sites were scored. For sites evaluated more than once, there was no change in score for 45 percent of the sites. Subsequent evaluations indicated that higher scores occurred at 30 percent of the sites and lower scores occurred at 25 percent of the sites. The majority of trash evaluations were conducted in the Guadalupe River (n=35), Coyote Creek (n=28), Calabazas Creek (n=23) and San Tomas Creek watersheds (n=24). Guadalupe River and Coyote Creek watersheds represent the largest watersheds in the Santa Clara Basin.

Evaluation scores for each assessment tool (i.e., RWQCB Rapid Trash Assessment Protocol-Version 7.0) and KAB Litter Index) are provided within the table entitled *Trash Problem Area Evaluations Results by Assessment Tool* (see Appendix C-7). The following results were observed during FY 04-05.

KAB Litter Index – Non-Creek Sites

The KAB Litter Index uses a four-point scoring system to estimate the presence of litter within a specific area. To ensure consistent KAB Litter Index scoring between Co-permittees, Co-permittee staff reviewed materials developed by Keep America Beautiful. These materials included written descriptions (on how to score), photographs (which show conditions) and a training video (which detail how to conduct an evaluation). Several Co-permittees increased the resolution of the original KAB litter scale by assigning scores as fractions. The following describes the modified scoring system of the KAB Litter Index: 0 – 1.0 ("no litter"); 1.1 – 2.0 ("slightly littered"); 2.1 – 3.0 ("littered"); and 3.1 – 4.0 ("extremely littered").

- Seventy-five percent of the sites were scored as "no litter" or "slightly littered";
- Twenty-two percent of the sites were scored as "littered". Only three percent were scored as "extremely littered";
- Guadalupe River and Coyote Creek watersheds had twelve and eight sites, respectively, that were scored as "no litter";
- Guadalupe River and Adobe Creek watersheds had seven and six sites, respectively, that were scored as "littered";
- Coyote, San Tomas, Calabazas and Sunnyvale East watersheds had four, four, three and three "littered" sites, respectively;
- Guadalupe River watershed had three "extremely littered" sites; and
- Coyote Creek and San Tomas Aquino Creek watersheds each had one "extremely littered" site.

The most common trash items observed at the non-creek "littered" sites were beverage containers, food wrappers, paper and plastic bags (note: the actual number of trash items was not recorded). The most common trash source reported for these sites was litter from motorists

that accumulates along roadways. Other common trash sources reported include grocery and convenience stores (e.g., dumpsters and parking lots), fast food restaurants, schools and homeless encampments. Illegal dumping was infrequently reported as potential trash source. Potential management activities identified for these sites include: referral to outside agency (i.e., Cal Trans); inclusion into existing clean up programs (e.g., Adopt-a-Highway); conduct public education outreach to businesses and schools; and continue monitoring to determine trash source.

RWQCB Rapid Trash Assessment Protocol (Version 7.0) – Creek Sites

The RWQCB Rapid Trash Assessment consists of six assessment parameters (with narrative descriptions) that qualitatively rate the trash condition of each parameter on a scale of 0 – 120. The range of scores for each parameter is divided into four categories: "poor", "marginal", "suboptimal", and "optimal". The total site score represents the summation of the six individual parameter scores. For the purposes of this analysis, the total site score was divided into the same four categories: 0 – 30 ("poor"); 31 – 60 ("marginal"); 61-90 ("suboptimal"); and (91 – 120: "optimal").

- Twenty-three percent of the sites were scored as "optimal" or "suboptimal";
- Sixty-three percent of the sites were scored as "marginal" and fourteen percent as "poor";
- Three sites identified as optimal (scores of 91 to 120) were located in upper reaches of Stevens Creek (neither of which were originally identified as trash problem areas) and the Baylands;
- Seven sites identified as suboptimal (scores of 61 to 90) were located in tributaries to Coyote Creek and lower reaches of Sunnyvale East Channel, Barron Creek (near the Baylands), San Tomas Aquino Creek and San Francisquito Creek;
- Twenty-seven sites were identified as marginal (scores of 31 to 60); and
- Six sites identified as poor (scores of 0 to 30) were located in Coyote Creek, Guadalupe River mainstem and San Francisquito Creek mainstem.

The most common trash items observed at the creek sites scored as poor or marginal (i.e., scores ranging between 0 and 60) were plastic (e.g., bags, bottles, wrappers, Styrofoam). Other common items included biodegradables (e.g., paper, yard waste), metal, glass and miscellaneous wastes (e.g., cigarette butts, rubber). The most common trash sources reported for these sites were litter from adjacent land uses that accumulate within and along the creek area. Other important trash sources reported include homeless encampments, illegal dumping and trash accumulation from unknown sources upstream. A majority of the sites were reported to have ongoing clean up efforts related to channel maintenance activities. Potential management activities identified for these sites include installation of trash receptacles or fencing near creek; coordination with local law enforcement to address homeless issues; conduct public education outreach to businesses and schools that are adjacent to creeks; and continue monitoring to determine trash source.

Conclusions

KAB trash evaluation results for non-creek sites indicate that a large number of the originally identified trash problem areas have no or limited amounts of litter (i.e., seventy-five percent). The majority of sites characterized as "littered" or "extremely littered" are along roadways; several which are within Cal Tran's jurisdiction. A majority of the trash (beverage containers

and food wrappers) appeared to be from littering and not from illegal dumping. A data analysis of sites evaluated more than once indicated that there was no consistent pattern in changes of trash condition over time. However, these results do indicate that current trash management practices are maintaining low levels of trash for a majority of evaluated sites.

RWQCB Rapid Trash Assessment evaluation results for creek sites indicate that the majority of the originally identified trash problem areas were scored as "marginal" or "poor" (i.e., seventy-seven percent). These sites contained primarily plastic and paper items. Both waste types are highly mobile litter that can be transported by wind and water. Low trash scores were frequently found in areas with homeless encampments. Several sites also reported moderate amounts of metal and glass, which indicate a direct source of litter within the creek area. There were no apparent spatial patterns for trash conditions in creeks (i.e., optimal and suboptimal sites were located in both upper and lower reaches of watersheds). It is important to note that most Co-permittees expect the originally identified trash problem areas to receive "marginal" or "poor" scores since these areas are considered the most problematic trash areas within their jurisdictions. Further, as discussed in the document entitled *SCVURPPP and SMSTOPPP Pilot Implementation and Testing of the RWQCB Rapid Trash Assessment* (dated March 1, 2003), two rating parameters ("actual number of trash items" and "threat to human health") can influence the overall score towards a "marginal" or "poor" rating. For example, numerical thresholds for trash items observed are too conservative and are not representative for a range of conditions in urban streams; and the presence of glass automatically reduces the score for the threat to human health regardless of human risk to exposure.

Future Trash Work Plan Tasks

The tasks identified in the FY 05-06 Trash Work Plan include: 1) continue conducting trash evaluations in a subset of identified trash problem areas; 2) identify and begin to implement or refine existing trash control measures, as appropriate, to address trash problem areas within high priority areas; and 3) begin to develop a long-term strategy for trash conditions in urban streams and waterways. The Trash AHTG is meeting on a quarterly basis to continue discussing the results of trash evaluations and potential implementation strategies.

Summary of Co-permittee Street Sweeping Results

A summary of street sweeping activities conducted by Co-permittees is provided within the table entitled *Summary of Co-permittee Street Sweeping Activities- FY 2004-2005* (see Appendix C-8). During FY 04-05, Co-permittees swept approximately 198,388 miles of paved streets and removed approximately 74,982 yd^3 or 28,118 tons of material[5]. Approximately 7,980 yd^3 of leaf litter was removed[6] by Co-permittees who have leaf removal programs other than routine street sweeping. In addition, approximately 184,060 tons of yard waste (which includes large amounts of leaves) was routinely collected by Co-permittees. As a result, yard waste pick-up programs are keeping large amounts of leaves out of Co-permittee storm drain systems.

[5] The City of San Jose collects and reports the amount of material removed in tons rather than cubic yards. During FY 04-05, the City removed 9,818 tons of material. To determine the total volume of material removed in cubic yards, it is necessary to convert tons to cubic yards. It is estimated that the average density of street sweeping material is 750 pounds per cubic yard (0.375 tons per cubic yard) assuming equal volume of materials are collected during dry and wet weather (Source: Woodward Clyde Consultants, August 1993, *Street Sweeping Status and Recommendation (Draft Report)*. Prepared for Santa Clara Valley Nonpoint Source Control Program). As a result, a value of 26,181 cubic yards is calculated when 9,818 tons is converted over to cubic yards. In addition, a value of 28,118 tons is calculated when 74,982 cubic yards is converted over to tons

[6] An additional 2,205 tons of leaf litter was collected by the City of Palo Alto. However, this figure is a combined figure that included the weight of the material collected from street sweeping plus the leaves collected by our autumn leaf pushing and pickup program. Since all of the material (both street sweeping debris and leaves gathered by leaf pusher trucks) is combined and hauled to the landfill in garbage compactor trucks, there is no way to provide a separate figure for leaf removal.

Evaluation of Effectiveness

One way to measure street sweeping effectiveness is to determine what solids and associated pollutants are collected within street sweeping debris. A typical unit of measure is the total volume of the pollutant removed by the sweeper relative to the curb length swept (e.g., yd^3/curb mile). This unit is typically referred as the removal rate. During FY 04-05, the average Co-permittee removal rate was 0.38 yd^3/curb mile (see Appendix C-8). The Co-permittee removal rate ranged from 0.20 yd^3/curb mile (City of Saratoga) to 0.59 yd^3/curb mile (City of Palo Alto). During FY 03-04, the average Co-permittee removal rate was 0.34 yd^3/curb mile. The effectiveness of street sweeping depends upon a number of factors including accumulation rates of pollutants, the relationship between rainfall and sweeping frequencies, particle size, pavement condition and automobile parking controls[7].

Many studies have shown that street sweeping removes significant quantities of dirt and debris from street surfaces[8]. However, results also demonstrate that the coefficient of variation of copper values and other metals (e.g., lead and zinc) in street sweeping debris is quite high[9]. To illustrate the effectiveness of street sweeping activities for pollutant removal, Program staff estimated the mean pollutant reduction for the following four metals: copper, nickel, lead and zinc. These estimates are provided within the tables entitled *Summary of Co-permittee Street Sweeping Activities and estimated Mean Pollutant Load Reduction for Copper and Nickel- FY 2004- 2005* and *Summary of Co-permittee Street Sweeping Activities and estimated Mean Pollutant Load Reduction for Lead and Zinc- FY 2004- 2005*. Both tables are provided within Appendix C-8. To determine the estimated pollutant load reduction (in pounds), the volume of material collected (in cubic yards) for each Co-permittee land use type (i.e., residential, commercial and industrial) was determined. This value was then multiplied by the mean concentration of trace metal content for street sweeping samples collected in the study entitled *Chemical and Physical Characteristics of Street Sweeping Sediments in Tampa, Florida, May 1999* and converted over to pounds of pollutant removed. These mean concentration values and the algorithm used to calculate the pounds of pollutant removed are provided within the tables. The estimated mean pollutant load reduction values for each land use type were summed. During FY 04-05, it is estimated that Co-permittees street sweeping activities resulted in the following pollutant load reductions for copper, nickel, lead and zinc:

Land Use Type	**Estimated Mean Pollutant Load Reduction (Pounds)**			
	Copper	Nickel	Lead	Zinc
Residential	837	1602	1560	2100
Commercial	417	826	1993	1412
Industrial	333	64	313	257
Total	**1588**	**2492**	**3865**	**3769**

[8] Source: Sartor, J. and G. Boyd, 1972. *Water Pollution Aspects of Street Surface Contaminants*. Prepared for United States Environmental Protection Agency, Washington, DC.
[9] Source: EOA, Inc, October 1996. *Estimation of Copper Collected Through Street Sweeping Efforts: Final Report*. Prepared for San Mateo Countywide Stormwater Pollution Prevention Program.

It is important to note that there is uncertainty with these estimates since certain assumptions were made regarding the exact volume of material collected from a particular land use type.

EVALUATION OF EFFECTIVENESS

Although typically subjective, the success (i.e., effectiveness) of a stormwater management program can be measured using many different assessment methods. Effectiveness assessment is defined as the process that managers use to evaluate whether their programs are resulting in desired outcomes, and whether these outcomes are being achieved efficiently and cost-effectively. The specific approach to be used in assessing effectiveness depends on a variety of factors including the type of program element or activity being evaluated and the stage of program development (i.e., planning, implementation, completion). Effectiveness assessments fall into two general categories:

- Implementation Assessment - Provides managers feedback on the effectiveness of their programs in achieving targeted objectives. This type of assessment is essential in determining whether priority sources of pollution are being effectively addressed. Implementation assessment may include any of three levels of analysis: the overall program, the elements that comprise the program (construction sources, municipal sources, etc.), or the specific activities that are conducted within these program elements. These may range in complexity from simple activities (e.g., verifying the completion of activities) to more sophisticated techniques (e.g., assessing the probable or actual locations of these activities and the significance of their spatial distribution).

- Water Quality Assessment - is the use of sampling data and related information to evaluate the condition of non-stormwater or stormwater discharges and the water bodies that receive these discharges. This can include a variety of chemical, biological, and physical parameters or outcomes. In instances where water quality assessment is used to draw conclusions about overall program effectiveness, results are usually very general and require extended periods of analysis.

Ideally, the two types of assessments should be linked together to create an integrated assessment, which is process of evaluating whether program implementation is resulting in the protection or improvement of water quality. In this process, relationships between program activities and water quality improvements are explored and refined. Due to the number and variety of BMPs and control programs being implemented at any given time, and because data is limited, establishing these relationships is difficult.

Efforts to date often include speculative or hypothetical exercises aimed at better understanding likely program outcomes and potential relationships to water quality. Quantitative “cause and effect” relationships will increasingly be sought in the future. This is a critical linkage because implementation assessment is, in many cases, simpler and less costly than water quality assessment. In addition, the time frame needed to see measurable results is shorter for implementation assessments. Over time, correlating water quality improvement to programmatic results will assist the Program in identifying the most expedient and cost-effective approaches to planning and assessing their programs. In the interim, the effectiveness of Program monitoring and assessment activities will continued to be assessed using an implementation assessment approach (i.e., were monitoring objectives met). As a result, the collection of data through environmental indicators continues to inform us about the condition of water bodies in the Santa Clara Valley and allows resources to be focused on the most pressing problems. The implementation of these indicators is a necessary step toward establishing a

sound regulatory basis for locally based watershed management described in Section 5.

Effectiveness of FY 04-05 Monitoring and Assessment Activities

In FY 04-05, the Program effectively met all obligations stated in its FY 04-05 Monitoring Program and Watershed Management Measures Work Plan. Monitoring and assessment activities were implemented through a variety of programs and projects which include the following: 1) baseline water quality monitoring described in the Program's Annual Monitoring Plan and Watershed Management Measures Work Plan; 2) regional collaborative efforts (e.g. RMP and CEP); and 3) active participation in TMDL development. In addition, the Program continued to address the following monitoring program objectives (as stated in the Program's NPDES Permit): (1) characterization of representative drainage areas and stormwater discharges; (2) assessment of existing or potential adverse impacts on beneficial uses caused by pollutants of concern in stormwater discharges; (3) identification of potential sources of pollutants of concern found in stormwater; and (4) evaluation of effectiveness of representative stormwater pollution prevention of control measures. The following paragraphs briefly describe the effectiveness of monitoring activities described in this Annual Report in addressing these objectives.

1) Characterization of Representative Drainage Areas and Stormwater Discharges

- Stevens and Permenente Creek Watershed Characterization Memorandum –This memorandum was intended to assist the Program in developing the appropriate sampling design for Stevens and Permenente Creek watersheds that will be implemented in FY 04-05. To develop this design, existing data and information resources were collected and reviewed; descriptions of the relevant watershed attributes were developed; and key issues relevant to these watersheds were identified. From a Program staff perspective; the memorandum was an effective "first cut" at: 1) describing watershed characteristics that may affect the quality of stormwater discharges in these creeks; 2) identifying known issues in the watershed; and 3) guiding the selection of indicators and sampling sites that will yield useful data.

- Trash Characterization and Management Activities – During FY 04-05, the Co-permittees conducted trash evaluations at a subset of trash problem areas to establish baseline levels of trash. Thirty sites were evaluated more than once to evaluate changes in trash conditions over time and to determine the effectiveness of existing trash management practices (i.e., rate of trash accumulation following clean up activities). A data analysis of sites evaluated more than once indicated that there was no consistent pattern in changes of trash condition over time. More specifically, there was no change in score for 45 percent of the sites. Subsequent evaluations indicated that higher scores occurred at 30 percent of the sites and lower scores occurred at 25 percent of the sites. There was also no apparent pattern in changes of scores for season or in the types of trash observed at the site over time. During the initial trash evaluations, Co-permittee staff, where feasible, identified potential management actions to address trash problem areas (e.g., educational outreach to businesses and schools). During FY 05-06, trash evaluations will be conducted at selected locations over time to determine the effectiveness of both existing and planned trash management actions.

2) Assessment of Existing or Potential Adverse Impacts on Beneficial Uses Caused by Pollutants of Concern in Stormwater Discharges

- Legacy Pesticides, Dioxins and PCBs Conceptual Model/Impairment Assessment Reports –The Bay was first listed as impaired by these pollutants of concern in 1998. Since 1998, a significant amount of data and information has been collected by the RMP and other stakeholders. Therefore, the CEP revisited the data originally used to justify an impairment listing and also assessed more recent data in an attempt to determine if the Bay is still impaired by legacy pesticides and PCBs. Although, the impairment assessment reports did not concretely state that impairments do or do not exist, the completion of the CMIA reports should be considered successful. Each report summarizes existing information into a single document, which allows all stakeholders to discuss possible management and regulatory actions from a level playing field.

- CEP Urban Creeks Monitoring – Urban creeks monitoring that were conducted by the CEP during FY 04-05 greatly assisted Bay Area urban runoff programs and the Water Board in assessing the adverse impacts on beneficial uses caused by pesticides. In addition, the monitoring results validated hypotheses that suggested diazinon concentrations and associated aquatic toxicity would decline with the phase out of diazinon.

- Receiving Water Monitoring – SCVURPPP water quality monitoring and assessments continue to yield baseline information on the condition of water bodies in the Santa Clara Valley. Potential impacts to beneficial uses were identified in the FY 04-05 Summary Assessment Report. Recommended next steps were also outlined to better define the potential issues or management actions that can be implemented.

- Stevens Creek Watershed Analysis – The Limiting Factors Analysis (LFA) conducted in the Stevens Creek watershed directly assessed the factors limiting steelhead trout (i.e., a cold water use). Key limiting factors that are directly attributable to natural conditions and anthropogenic activities were identified along with potential management actions.

3) Identification of Potential Sources of Pollutants of Concern Found in Stormwater

- Urban Runoff Copper Source Assessment – The Copper Source Report assisted stormwater management agencies by summarizing information on the sources of copper that is carried to San Francisco Estuary in urban runoff and copper that is released directly into the San Francisco Estuary from shoreline activities. The report also reviews available control measures for each copper source, providing control measure effectiveness information to the extent data are available.

4) Evaluation of Effectiveness of Stormwater Pollution Prevention of Control Measures

- Urban Runoff BMP Evaluation for Pollutants of Concern – In FY 04-05, SFEI was awarded a Proposition 13 grant to evaluate the effectiveness BMPs in reducing POCs in urban runoff. BASMAA member agencies (including SCVURPPP) have played an active role in developing the scope of work and technical advisory committee during this fiscal year. Results from the project will likely assist the Program in further evaluation of the effectiveness of control measures for POCs.

SECTION 5

WATERSHED MANAGEMENT MEASURES

5. WATERSHED MANAGEMENT MEASURES

INTRODUCTION

During FY 04-05, the Program conducted a variety of watershed-related management measures and activities. They included conducting watershed assessment activities and special studies, and participating in and coordinating with the Santa Clara Basin Watershed Management Initiative (SCBWMI) sub- and core groups. Activities described in this section are consistent with Provision C.10 (i.e., Watershed Management) of the Program's NPDES Permit.

The Program's watershed management strategy (pursuant to NPDES Permit Provision C.10) is to integrate its watershed management efforts with the SCBWMI. Activities that include implementing environmental monitoring and assessment measures are necessary components needed to fully integrate our efforts. Therefore, it is important to note that watershed management measures described in this section are not entirely independent from activities described in Section 4 – Monitoring Activities. Information gained from conducting studies and implementing activities/measures described in both sections have been used (and will continue to be used) in concert to meet objectives outlined in Permit Provisions C.7, C.9, and C.10. They include: (1) characterizing watersheds and stormwater discharges; (2) assessing existing or potential adverse impacts to beneficial uses; (3) identifying potential sources of pollutants of concern; (4) aiding in developing and implementing strategies for controlling adverse impacts on beneficial uses; and (5) assessing the effectiveness of pollutant prevention/control measures.

BACKGROUND

The Water Board started the SCBWMI in 1996. The first meetings of the SCBWMI's Core Group and subgroups were held in 1997. During FY 98-99, SCBWMI stakeholders formally joined in a signatory document outlining the SCBWMI's mission, goals and objectives. The Santa Clara Valley Water District and the Cities of San Jose, Sunnyvale and Palo Alto committed additional funds and other resources to the SCBWMI. A Report Preparation Team (RPT) consisting of staff from these agencies developed a plan, schedule, and outline for a Watershed Assessment Report (WAR). The RPT and the SCBWMI subgroups began preparing sections of the WAR soon after.

In late 1999, the Program prepared *Watersheds 2000: A Vision of the Santa Clara Valley Urban Runoff Program's Role in Watershed Management and the Santa Clara Basin Watershed Management Initiative*. This document outlines the Program's long-term vision, roles and responsibilities with regard to the SCBWMI and provides a monitoring/continuous improvement and outreach strategy.

The Program's involvement in the SCBWMI is organized by the concept of continuous improvement, as described in the Program's Urban Runoff Management Plan (URMP). The SCBWMI identifies specific watershed issues and recommendations that are brought to the Program's Management Committee for consideration and action as appropriate. In addition, results from SCVURPPP studies related to watershed monitoring, assessment and management are frequently distributed, presented and discussed with SCBWMI subgroups. This approach creates an informed and coordinated partnership between the Program and SCBWMI.

FY 04-05 SCVURPPP ACCOMPLISHMENTS

1. Bay Area Macroinvertebrate Bioassessment Information Network (BAMBI)

The increased interest in bioassessment within the Bay Area spawned the formation of the Bay Area Macroinvertebrate Bioassessment Information Network (BAMBI) in February 2002. BAMBI is a network of scientists, watershed managers, regulators and community members interested in using biological communities as indicators (i.e., benthic macroinvertebrates) of stream health in the San Francisco Bay Area. The goal of BAMBI is to maximize the utility of aquatic bioassessment in the Bay Area by developing a programmatic and analytical framework for the collection, sharing, analysis and use of bioassessment data.

In collaboration with Alameda Countywide Clean Water Program and Water Board staff, Program staff developed a draft Work Plan to outline tasks that should be completed during the development of a Benthic Macroinvertebrate Index of Biotic Integrity (B-IBI) for creeks and rivers in the San Francisco Bay Area. An IBI serves as an easy-to-use scorecard for determining the condition of water quality and stream habitat (i.e., stream health) using biological communities. The IBI approach is designed to maximize detection of degradation by controlling for natural variation in biological communities. The IBI Work Plan is included as Appendix D-1.

Program staff co-presented the draft Work Plan at the fourth annual Bay Area Macroinvertebrate Bioassessment Information Network (BAMBI) workshop on January 31, 2005. The Work Plan has six main tasks:

1. Form Technical Advisory Group;
2. Compile Existing BMI Data from Participating Agencies/Organizations;
3. Standardize Datasets and Import Into Database;
4. Develop Reference Conditions;
5. Select Metrics for the IBI; and
6. Develop, Validate and Refine IBI.

During FY 04-05, Program staff contributed in-kind services to begin working on Tasks 1-3. In turn, a draft data request form entitled *San Francisco Bay Area Benthic Index of Biotic Integrity (B-IBI)- Potential Fields to Include with Data Request Form* was created to itemize the potential information needed to complete the IBI (see Appendix D-2). In addition, Program staff completed a grant proposal to the San Francisco Bay Fund to complete Task 4 (Develop Reference Conditions). This task entails collecting and analyzing existing watershed/creek data; and conducting bioassessments at reference sites in watersheds within the nine-county San Francisco Bay Area.

In FY 05-06, Program staff plans to continue supporting and actively participating in BAMBI activities, with specific objectives to complete Tasks 1-3 and investigate potential funding sources to complete tasks 4-6 identified in the Work Plan.

2. Stream Studies Inventory

The Watershed Assessment and Monitoring Subgroup (WAMS), an entity within the SCBWMI, has a mission to provide the SCBWMI with a solid scientific foundation for watershed planning. One of WAMS's tasks is to coordinate the SCBWMI's data collection and data management efforts with stream monitoring studies within the Basin. The *Inventory of Santa Clara Basin Stream Studies* (SSI) is a result of this task and was initially prepared by the Program in

November 1998. The purpose of the SSI is to promote inter-agency awareness of environmental investigations within riparian corridors and to facilitate coordination of related data collection and management. It also describes stream-related multi-stakeholder studies and projects that were in-progress in the Santa Clara Basin. The SSI was updated, revised and reissued in February 2000 (Version 2.0), July 2001 (Version 3.0), August 2002 (Version 4.0) and November 2003 (Version 5.0). The Program funded the initial development of the SSI and each of the annual updates.

On June 21, 2005, the Program finalized the *Inventory of Santa Clara Basin Stream Studies (Updated Version 6.0)*. This version describes thirty stream-related multi-stakeholder studies and projects that recently started or are in-progress within the Santa Clara Basin. Information for eight new studies was added to the updated version and twenty-two ongoing projects were updated with current information. Ten projects listed in the SSI Version 5.0 Report were determined to be complete or discontinued. As a result, they are not included within the updated SSI Version 6.0. Information describing the completed studies was archived into the Program's metadata database. Updated SSI Version 6.0 is provided within Appendix D-3.

3. Watershed Data Management

To comply with its NPDES permit, the Program compiles, develops and analyzes a variety of data sets and reports. Most of this data is collected and generated as part of the Program's environmental monitoring and assessment activities. A majority of the information collected and used by the Program originates from different municipalities and agencies that conduct studies within Program jurisdictional boundaries.

The Program developed a relational database as an initial task to systematically describe and document data used for its activities. The intent of the database is to demonstrate its usefulness of how to systematically and efficiently collect and document all of the relevant data used in the Program's activities. In addition, the database was designed to explore the feasibility of eventually expanding and coordinating its maintenance and use with other agencies and organizations in the Program.

The SCVURPPP metadata database currently stores information on watershed studies described in the updated SSI Version 6.0 as well as archived information from previous versions of the SSI. The database was also developed to produce a report listing current project information in a format similar to previous SSI Reports. The project summaries of the 2003 SSI report were produced from the database. In addition, the Program database provides querying capabilities for watershed information listed in both the SSI and SCBWMI's Metadata Database.

On November 30, 2004, the Program continued to expand the accessibility of the SCVURPPP Metadata Database by finalizing a guidance manual entitled *SCVURPPP Metadata Database Program User Documentation*. The manual describes software and hardware requirements, installation procedures, data entry procedures and querying techniques for watershed information listed in both the SSI and SCBWMI's Metadata Database. The *SCVURPPP Metadata Database Program User Documentation* is provided within Appendix D-4.

4. SCBWMI Indicators Work Group (Work Group "I")

Within the 2003 Watershed Action Plan, the SCBWI identified a goal of developing and using environmental indicators to characterize progress toward the protection of watershed health.

The effort to develop environmental indicators for the Santa Clara Basin is referred as the "State of the Santa Clara Basin" Project. The goal of this project is to provide a suite of environmental indicators that can be used to periodically assess the status and trends of stream and riparian systems and management actions within the Santa Clara Basin. In addition, the project is intended to: (1) evaluate the effectiveness of environmental programs, policies and projects; (2) improve environmental planning; and (3) adaptively manage emerging issues within watersheds. During January 2005, the development of indicators began with the initiation of the WMI Phase I Indicators Work Group (Work Group "I").

During FY 04-05, Program staff participated in eight Work Group "I" meetings with the objective of identifying candidate indicators for assessing and reporting on stream ecosystem health within the Santa Clara Basin. The framework used to develop indicators and specific recommendations for candidate indicators were documented in the Phase I Indicators Report (June 2005). The recommendations presented in the report were designed to provide a foundation for broadening the approach for later phases.

5. Develop Strategies for Controlling Impacts of Land Use on Beneficial Uses

To implement this monitoring priority during FY 04-05, Program staff provided administrative support to the SCBWMI Land Use Subgroup (LUS) and served as Interim Chair. Due to concurrent activities of the Water Resources Protection Collaborative, formed by the Santa Clara Valley Water District to address land use activities near streams, the LUS met less frequently than in previous years because many of its members were involved in Collaborative meetings. In August 2005, the Collaborative held its last monthly planning meeting and participating agencies began implementing the resulting guidelines and standards. As a result, the LUS plans to resume its normal meeting schedule in FY 05-06. A new chairperson has been identified and LUS is continuing to implement its 2005 Work Plan.

A summary of LUS accomplishments during FY 04-05 include:

- The Program, in conjunction with the LUS, was tasked under the Copper Action Plan with investigating the role of stormwater agencies in regional congestion management planning and implementation and examining the issue of traffic congestion reduction from a stormwater perspective. Program staff developed two memoranda for review and discussion by the LUS: 1) *Status of Projects to Reduce the Impacts of Transportation on Stormwater using Common Transportation Control Measures;* and 2) *Overview of Alternative Transportation Section - SCVURPPP Development Policies Comparison Project.* The first memorandum provides a status update of projects that may reduce transportation impacts on water quality. The second memorandum provides a summary of alternative transportation-related items from the Development Polices Comparison Project and Site Design Standards Review. The memoranda were finalized on June 7, 2005 and are provided within Appendix D-5.

- LUS reviewed the SCBWMI's *Public Visual Preference Survey* (which includes the same transportation-related subjects) at its October 27, 2004 and April 27, 2005 meetings. The goal of the Survey was to assess the attitudes of residents of the Santa Clara Basin toward a variety of visual images including stormwater controls, housing development styles, modes of transportation, forms of outdoor recreation, and other physical constructs that may affect water quality in the Santa Clara Basin. During the June 2, 2005 SCBWMI Core Group meeting, feedback was provided to the SCBWMI on how to use the Survey. A report

entitled *Santa Clara Basin WMI Visual Preference Survey May 2004: Summary of Findings* is available on the SCBWMI website (www.scbwmi.org).

SECTION 6

PESTICIDE MANAGEMENT

6. PESTICIDE MANAGEMENT ACTIVITIES

INTRODUCTION

The goals and objectives of the Program's Urban Runoff Management Plan (URMP) include: effectively prohibiting non-storm water discharges to storm drains and watercourses; reducing pollutants in storm water discharges to the "maximum extent practicable" (MEP); and not causing or contributing to violations of water quality standards, as required by the Program's NPDES permit. The Program's approach to meeting these goals and objectives focuses on the use of best management practices (BMPs) for source control and pollution prevention.

The Program's approach to pesticide management has a similar focus on source control and pollution prevention. Program BMPs for pesticide management have included significant outreach efforts to residents, businesses, and municipal staff to provide education and achieve behavior changes relative to uses of pesticides and less toxic pest control methods. Outreach efforts have been supplemented by monitoring studies to define the problem; participation in regional monitoring and organizations to address pesticide issues; and development of performance standards and local pest management plans.

BACKGROUND

Diazinon and chlorpyrifos have been identified in recent studies as causing toxicity in local creeks and wastewater treatment plant effluent. In May 1999, the U.S. Environmental Protection Agency (USEPA) listed San Francisco Bay and 35 Bay Area urban creeks as impaired by diazinon under Section 303(d) of the Clean Water Act (CWA). The 303(d) listing triggered the need for USEPA and the State to develop Total Maximum Daily Loads (TMDLs) for the impaired waterbodies. The San Francisco Bay Regional Water Quality Control Board developed a draft TMDL work plan that calls for an urban creeks diazinon TMDL to be developed by June 2002, followed by an Implementation Plan by June 2003.

The Program's NPDES Permit Provision C.9.d. includes specific requirements for a pesticide control program. The Program and Co-permittees must develop and implement a pesticide control plan that addresses municipal uses of pesticides, including diazinon and other lower priority banned pesticides (e.g., chlordane, dieldrin, and DDT) and the use of these pesticides by others within municipal jurisdictions. The permit provision also requests that the Program continue to work with the Urban Pesticide Committee, BASMAA, and the California Stormwater Quality Association Pesticide Committee to assess impacts of pesticide use and encourage actions by other state and federal agencies.

As required by Permit Provision C.9.d., the Program developed a Pesticide Management Work Plan (Pesticide Plan) and submitted it to the Water Board on June 26, 2001. The submittal to the Water Board included a preliminary draft Pest Management Performance Standard and municipal pesticide use surveys completed by each Co-permittee. After receiving comments from Water Board staff, the final Pesticide Plan and Pest Management Performance Standard were provided in the Program's *FY 02-03 Work Plan* (dated March 1, 2002).

The purpose of the Pesticide Plan is to control pesticide-related toxicity in urban runoff, by minimizing pesticide use and reducing the amount of pesticides in storm water and landscape runoff to the maximum extent practicable. The Plan identifies the goals of each work plan element, actions, monitoring mechanisms and schedules. The Plan also identifies whether

actions will be implemented at the Program level, municipality level, or both. The details of municipality actions and schedules were provided in individual Co-permittee pest management plans submitted with the Co-permittees' FY 00-01 Annual Reports.

This Annual Report provides information on the progress of tasks in the Pesticide Plan to be completed by the Program in FY 04-05.

PAST PESTICIDE MANAGEMENT ACTIVITIES

The Program has, since its inception, actively participated in a number of activities aimed at understanding water quality problems in creeks and San Francisco Bay and reducing pollutants, including pesticides, to the MEP. The Program's earlier Work Plans and Annual Reports have presented the history of the Program's and Co-permittee's pesticide-related activities in the areas of monitoring and science, outreach and education, URMP implementation and correspondence with Water Board staff regarding these activities.

IMPLEMENTATION OF FY 04-05 PESTICIDE MANAGEMENT TASKS

Table 6-1 presents the status of the Program's pesticide management tasks scheduled for completion in FY 04-05. The table references tasks in the SCVURPPP Pesticide Plan (rev. 2/15/02) and the related performance standard and/or permit provision. More details on the accomplishments for and effectiveness of some of the key elements of the Pesticide Plan are provided below.

Outreach and Education

Highlights of Program PI/P activities specifically related to pesticide use that were accomplished in FY 04-05 include:

- Watershed Watch Campaign – Messages about less-toxic pest control were woven into the campaign advertising and materials. The popular "Got Bugs" ads were used in the media flight from August to October 2004. Additional details on the media campaign are included within Section 3 of this Annual Report.
- Pesticide User Outreach – The various elements of pesticide user outreach are described below:
    - IPM Store Partnership Program – The Program contributed funds to and participated in the Regional IPM Program and implemented the local IPM Partnership Program in 31 stores. The participating stores had in-store "Our Water Our World" displays and IPM fact sheets and stocked less-toxic products. Program staff routinely visited the participating stores for restocking literature racks and updating shelf-talkers. The Program contracted with Ms. Annie Joseph for store employee training. Approximately 71 employees representing the six SummerWinds stores and Palo Alto Hardware were trained in February 2005.
    - Media Advertising – Advertising was conducted in coordination with Watershed Watch Campaign. The popular "Got Bugs" ad was used in the fall media campaign which ran from August through October 2004.
    - Outreach at Events – Program, Co-permittee and Watershed Watch staff conducted IPM outreach at six events. Approximately 2,580 IPM fact sheets and brochures and

2,793 giveaways (pencils, activity books, magnets, tattoos etc.) were distributed to the public.

- Community IPM Workshop --The Watershed Watch Campaign conducted an IPM workshop for the Program in coordination with the Friends of Guadalupe River Park and Gardens; Master Gardeners of Santa Clara County and SummerWinds Nursery. Stephanie Morris, local landscape architect, Laura Monczynski of Master Gardeners and Claudia Groth of Whitney Farms were the featured speakers. The presentations were interactive and featured various examples of plants with pest problems and non-toxic or less-toxic remedies. In addition, SummerWinds Nursery donated plant giveaways (4" drought resistant grasses) to workshop attendees. Workshop attendees were also given a "goody" bag filled with less-toxic pest control literature, a Watershed Watch kit and some promotional items.
- Regional IPM Conference -- The Program contributed funds to a Regional IPM Conference. The conference, which was hosted by Alameda County was held on June 14, 2005 and attracted approximately 412 people. The Program also provided promotional support to the Going Native Garden Tour on April 17, 2005. An event report is included within Appendix B-14.
- IPM Outreach to Special Districts – The Program conducted a mailing to provide information on less toxic pest control to neighboring special districts within the Co-permittees' jurisdiction. A letter explaining the impact of pesticide use on urban runoff was developed and mailed (along with IPM fact sheets) to all special districts. The cover letter and list of special districts are included within Appendix B-16.
- Outreach Articles -- Program staff developed and distributed an IPM outreach article to selected publications. This article was included in the April 2005 issue of *Tideline* magazine and was also placed on the Friends of Guadalupe Gardens website in October 2004. The *Tideline* article is included within Appendix B-15.

Section 3 provides additional detailed descriptions and evaluations of PI/P projects.

Monitoring and Science

Monitoring and TMDL-related activities that were accomplished in FY 04-05 include:

- Continued to fund the Regional Monitoring Program ($160,804) and participate in the Regional Monitoring Program (RMP) steering and technical committees to focus RMP resources on 303(d) problem pollutants (including pesticides);
- Attended the Urban Pesticide Committee meetings and participated in discussions on development of the diazinon TMDL;
- Participated in implementation of a regional Urban Creeks Monitoring Program (developed by the Clean Estuary Partnership) which analyzed pesticide and pesticide-related toxicity in Calabazas Creek;
- Participated in the Clean Estuary Partnership's Diazinon/Toxicity Workgroup;
- Supported actions by the California Stormwater Quality Association (CASQA) to comment on and assist with USEPA's pesticide risk assessments. The Program's dues helped fund the CASQA consultant contract covering comment letters on risk assessments and other pesticide-related tasks.

- Completed third year of sampling for the Program's Multi-Year Receiving Waters Monitoring Program. Conducted organophosphate pesticide analyses of samples collected at two sites in the Adobe Creek watershed; two sites in the Matadero/Baron Creek watershed; three sites in the Sunnyvale East/West Channel watersheds; two sites in the Calabazas Creek watershed; and one site in the San Tomas Creek watershed. Conducted three species toxicity testing in one site in the Adobe Creek watershed; two sites in the Matadero/Baron Creek watershed; two sites in the Calabazas Creek watershed; and one site in the San Tomas Creek watershed.

Additional information on monitoring and science activities, including results, are provided within Section 4 and the *SCVURPPP FY 04-05 Summary Assessment Report* included within Appendix C-2.

URMP Implementation

Pest Management Performance Standard

The Program's 2004 Urban Runoff Management Plan (URMP) contains a model Pest Management Performance Standard (PMPS) approved by Water Board staff that: 1) limits the use of pesticides that are known to cause or contribute to impairment of receiving waters; 2) requires use of least-toxic pest control methods by municipal employees at municipally-owned facilities; and 3) meets other requirements of NPDES Permit Provision C.9.d. The PMPS includes guidance to Co-permittees on work plan tasks and legal authority needed to implement the standard, and BMPs for protecting water quality if pesticides must be used after implementing an IPM program. The Co-permittees have updated their local URMPs to include the PMPS and have been implementing the PMPS since FY 01-02.

Local Pest Management Plans

Co-permittees completed their local pest management work plans and submitted them as part of their FY 00-01 Annual Reports (September 15, 2001). Implementation of these work plan tasks began in FY 01-02. Efforts to date are described in Co-permittees FY 04-05 Annual Reports.

EVALUATION OF EFFECTIVENESS

Outreach and Education

Outreach and education tasks related to pesticide reduction are evaluated in Section 3 and Table 3-1.

Monitoring and Science

The Program and Co-permittee staff completed all environmental and programmatic monitoring tasks that were planned for FY 04-05. This included conducting, funding and/or participating in local and regional monitoring activities. A full description of these activities and an assessment of how effective these activities were in meeting monitoring program objectives are included in Section 4 – Monitoring Activities.

URMP Implementation

Program staff successfully worked with the Pest Management AHTG, Water Board staff and other interested parties to complete a revised version of the Pest Management Performance Standard (PMPS) that was acceptable to all parties involved. The Co-permittees are now in the process of implementing the PMPS. The Co-permittees have evaluated their local pest management efforts during FY 04-05 in their individual Annual Reports.

Table 6-1
Status of FY 04-05 Pesticide Management Tasks[1]

Task[1]	Updated Schedule	Status
I. Municipal Pesticide Use		
I.A.1 Develop and implement a process for tracking pesticide use on municipally owned property (PS#8). Include in the process reporting and justification for the use of OP pesticide and BMPs employed during OP pesticide use.	Annual Reporting	**Completed/ Ongoing** – The Pest Management Performance Standard includes a suggested reporting process, which the Co-permittees implemented for the FY 01-02 Annual Report. The first year was focused on reporting use of organophosphate pesticides, particularly chlorpyrifos and diazinon. For the FY 02-03 Annual Report, Water Board staff requested Co-permittees to submit pesticide use summaries and not actual data. This practice was continued for the FY 04-05 Annual Report.
Monitoring Mechanism 1.A.1 Document completion of tasks in annual reports. Use pesticide-tracking process to document pesticide use.	Annually	**Completed/Ongoing** – Pesticide use summaries are included in Co-permittee FY 04-05 Annual Reports.
II. Public Education and Outreach		
II.A.1 Implement the Watershed Education & Outreach (WE&O) Campaign targeting the general public and include messages about less-toxic pest control and proper disposal. The Campaign will include extensive media campaign with South Bay English- and Spanish-language TV and radio stations.	Began development FY 00-01; Ongoing through 04-05.	**Completed/Ongoing** – The popular "Got Bugs" ads ran from August 2004 through October 2004, and will run again in Fall of 2005.
II.A.2 Develop simple, effective, targeted messages regarding proper pesticide use and disposal, effects on water quality, and IPM.	Ongoing as needed	**Completed/Ongoing** —Website visits and hotline calls showed a remarkable increase during the "Got Bugs" media campaign. Additional details may be found within Section 3 of this Annual Report.

[1] **The status of the complete set of Program Pesticide Plan tasks is presented in Table 6-1 of the Program's *FY 03-04 Annual Report*.**

Table 6-1, continued
Status of FY 04-05 Pesticide Management Tasks

Task[1]	Updated Schedule	Status
II.A.3 Prepare appropriate outreach materials (e.g., fact sheets or a consumer guide regarding pest control services) to address target groups.	Ongoing as needed	**Completed/Ongoing** -- Developed through BASMAA participation. The Program continues to participate in BASMAA's regional IPM partnership and media relations efforts to develop new IPM fact sheets and press releases. The Program purchased and distributed large quantities of the fact sheets.
II.A.4 Identify and attend community events and distribute outreach materials. (Program will attend events strategic to the WE&O Campaign.)	Annually	**Completed/Ongoing** -- Program staff, Co-permittee representatives and Watershed Watch consultant staff conducted IPM outreach at six events during FY 04-05. The IPM display was used at some events. OWOW fact sheets and brochures (e.g., "Grow It!" Guides,"Backyard Bugs" and "Pests Bugging You?") were distributed. (See Section 3 of this Annual Report for details).
II.A.6. Create, update, and publicize web sites to promote IPM and reduce pesticide use.	Completed 6/02; Update as needed.	**Completed/Ongoing** -- The Watershed Watch website was launched in September 2001 and is continually updated. The website directs browsers to call the toll-free number to the Program office for information on less-toxic pest control. A web page specifically for IPM was completed in June 2002 and is updated regularly. The web page also includes many pages in Spanish and links to other sites with information on IPM.
II.A.7 Coordinate with the Master Gardeners program and use their services to train residents. Provide IPM training and information on water quality impacts of pesticide use to Master Gardeners as needed.	Ongoing as appropriate	**Completed/Ongoing** – Since FY 01-02, Program staff has worked with Master Gardeners and San Jose Community Garden staff to conduct IPM training programs for community gardeners. During the last three FYs (including FY 04-05), the Program conducted community IPM workshops in coordination with Watershed Watch, United Neighborhoods, Guadalupe Gardens, the Santa Clara County Household Hazardous Waste Program and Master

Table 6-1, continued
Status of FY 04-05 Pesticide Management Tasks

Task[1]	Updated Schedule	Status
		Gardeners. The FY 04-05 workshop was held on April 23, 2005 at the Spring in Guadalupe Gardens event. Stephanie Morris, local landscape architect, Laura Monczynski of Master Gardeners and Claudia Groth of Whitney Farms were the featured speakers. The presentations were very interactive and featured various examples of plants with pest problems and non-toxic or less-toxic remedies. In addition, SummerWinds Nursery donated plant giveaways (4" drought resistant grasses) to workshop attendees Workshop attendees were also given a "goody" bag filled with less-toxic pest control literature, a Watershed Watch kit and some promotional items.
II.A.8 Create and/or publicize existing IPM demonstration gardens (such as the garden at the San Francisco Bay Wildlife Refuge in Alviso).	Began FY 01-02; Ongoing	**Completed/Ongoing** – Since FY 01-02, the Watershed Watch Campaign has partnered with the Don Edwards San Francisco Bay Wildlife Refuge at Alviso. The Alviso site has a pesticide-free native plant demonstration garden. Workshops at this location are promoted on the Watershed Watch website. In addition, the Watershed Watch consultant is working with Don Edwards staff to develop page on the website specific to the demonstration garden. The Program provided promotional support for the Going Native Garden Tour on April 17, 2005. Approximately 2,000 people attended the tour which featured 28 gardens. Featured gardens demonstrate environmentally sensitive gardening practices which include the use of native plants, water conservation, landscaping to prevent urban runoff, reducing pesticide and fertilizer use, etc.

Table 6-1, continued
Status of FY 04-05 Pesticide Management Tasks

Task[1]	Updated Schedule	Status
II.A.9 Continue to fund BASMAA Regional Media Relations Campaign featuring pitches to Bay Area media and responses to breaking news on pesticide-related topics.	Ongoing.	**Completed/Ongoing** – SCVURPPP funded this campaign as part of its BASMAA baseline dues for FY 04-05. Program staff participated in meetings of the work group and reviewed draft products. (See Section 3 of this Annual Report for additional details)
II.A.11 Identify consumer and business publications that could include articles about IPM or less toxic pest management, submit articles or letters to the editor, and encourage them to print them.	Ongoing	**Completed/Ongoing** -- An article describing impacts of pesticide use to water quality and containing hints for pesticide-free pest control was developed in December 2004 and sent to select publications. The article was included in the April 2005 issue of the *Tideline* magazine and was also placed on the Friends of Guadalupe Gardens website in October 2004
II.A.12 Implement a "Pesticide User Outreach" project targeting residential and commercial users.	FY 01-02 through FY 04-05	**Completed/ Ongoing** -- A Pesticide User Outreach Work Plan is developed and implemented each year, as Program budget allows. Tasks implemented include the media advertising campaign (as part of the Watershed Watch Campaign), local IPM Store Partnership Program, restaurant outreach, IPM workshop, IPM outreach at events, IPM outreach to special districts and development of an outreach article. The Program continued to implement the IPM store partnership program in 31 stores in Santa Clara Valley. Training on selling less-toxic products was provided to 71 employees at seven stores. A summary of evaluations received is included in Appendix B-11 of this Annual Report.

Table 6-1, continued
Status of FY 04-05 Pesticide Management Tasks

Task[1]	Updated Schedule	Status
II.A.13 Provide information on less toxic pest control (e.g., IPM techniques, municipal IPM policies, model contract language, training opportunities, etc.) to neighboring special districts (e.g., Valley Transportation Authority, sanitary and utility districts, open space districts, vector control districts, and school districts) as appropriate.	FY 01-02 through FY 04-05	**Completed** – VTA, open space and vector control district staff were invited to the Program's IPM Workshop in March 2003 and provided copies of the Program's Pest Management Performance Standard. In January 2005, a letter explaining the impact of pesticide use on urban runoff was developed and mailed (along with IPM fact sheets) to all special districts within the Co-permittees' jurisdiction. The cover letter and list of special districts are included within Appendix B-16.
Monitoring Mechanism II.A.1. Document or estimate numbers of residents reached by outreach efforts, including events, web site promotion, municipal employee outreach, and media advertising. Monitor responses to outreach efforts through documentation of calls to the Program's general and watershed campaign hotlines.	Annually	**Completed/Ongoing** -- See Section 3 of this Annual Report.
Monitoring Mechanism II.A.2. Survey local public attitudes and behavior to evaluate the success of outreach efforts and the saturation of outreach messages. (Program will conduct countywide survey as part of evaluation of WE&O Campaign. Program may also conduct surveys to evaluate effectiveness of specific projects.)	FY 03-04 and FY 04-05	**Completed/Ongoing** – A Countywide survey was conducted to evaluate the success of the WE&O Campaign. The evaluation report was included in the Program's *FY 03-04 Annual Report*. Some of the survey questions tracked the publics' knowledge about various pollutants (including pesticides), which affect the water quality in San Francisco Bay. Nineteen percent of the respondents in 2003 say that pesticides affect the water quality of the Bay compared to seven percent in 1991. Approximately 23 percent of residents say that they use less-toxic ways to control pests in their home and garden. Details of the stores partnership program evaluation and IPM outreach events are described in Section 3. In October and November 2004, the BASMAA Regional IPM Committee conducted a customer intercept survey to evaluate the OWOW Store

Table 6-1, continued
Status of FY 04-05 Pesticide Management Tasks

Task[1]	Updated Schedule	Status
		Partnership Project. The survey included interviewing 375 customers at 5 stores in Santa Clara County. The evaluation indicates that: • Overall, 31% of the people interviewed were aware of the Our Water Our World promotion. • The fact sheet garnered the highest recognition of the four items (16%), followed by the logo (15%). • Of the people who had identified at least one of the promotional items in Q3 (n=104), 82 percent said that these items helped them identify less-toxic products or methods. The detailed survey report is included within Appendix B-12 of this Annual Report.
II.B.1 Continue to fund and participate in the BASMAA Regional IPM Partnership.	Ongoing	**Completed/Ongoing** -- SCVURPPP funded this program as part of its BASMAA baseline dues for FY 04-05. Program staff participated in meetings of the work group and reviewed draft products. See Section 3 for details.
II.B.2 Continue to implement cost-effective elements of the IPM Store Partnership Program, as identified in the work plan developed for Action Item II.A.12. Create and provide fact sheets and other materials to pesticide retailers to facilitate point-of-purchase outreach. Visit stores as necessary to ensure ongoing participation.	Ongoing	**Completed/Ongoing** – See Tasks II.A.2, II.A.3, and II.A.12 and Section 3 of this Annual Report. Fact sheets as well as an opportunity for employee training were provided to participating stores.
II.B.3 Offer IPM training opportunities to pesticide retailer employees through coordination with Master Gardener-taught educational programs. (See Action II.A.7.)	Ongoing	**Completed/Ongoing –** The Program contracted with Ms. Annie Joseph to provide training on selling less-toxic products to store employees (See Tasks II.A.12 and Section 3).

Table 6-1, continued
Status of FY 04-05 Pesticide Management Tasks

Task[1]	Updated Schedule	Status
Monitoring Mechanism II.B.1. Document number of participating stores, materials distributed and employees trained. Evaluate the cost-effectiveness of the IPM Store Partnership Program each year. Implement the evaluation component of the Pesticide User Outreach work plan each year.	Annually	**Completed/Ongoing** -- See Section 3 and Table 3-1 of this Annual Report.
III. Pest Control Operators (PCOs)		
III.B.1. Identify and work with PCO trade organizations to develop industry standards for BMPs to protect water quality, through participation in UPC and BASMAA.	Ongoing	**In Progress** – Program will work with the UPC and a consultant to accomplish this task.
IV. Commercial Businesses		
IV.A.1 Research reports and surveys of commercial business pesticide use and other stormwater programs' and POTWs' efforts to address this issue. Develop recommendations and a work plan (including an evaluation component) to provide outreach on less toxic pest control to target businesses in the South Bay, as appropriate and cost-effective.	FY 02-03 through FY 04-05	**Completed/Ongoing –** The SCVURPPP IPM Work Group decided to use San Francisco's "Setting a Table for Pests" poster for outreach to restaurants. This item was approved by the Santa Clara County Department of Environmental Health inspectors for inclusion in their new food facilities packet for distribution to new or remodeled food facilities during routine inspections. Copies of this poster were provided to County Health Inspectors in FY 02-03, FY 03-04 and FY 04-05.

Table 6-1, continued
Status of FY 04-05 Pesticide Management Tasks

Task[1]	Updated Schedule	Status
IV.A.2 Develop and implement education programs that target commercial businesses, per recommendations from Action IV.A.1	Ongoing;	**Completed/Ongoing –** As described above, the Program is distributing the "Don't Lay a Table for Pests" poster to new or remodeled food facilities through County Health Inspectors. During FY 03-04 and FY 04-05, the Program also focused on educating employees at local hardware stores and nurseries on selling less-toxic products to consumers.
Monitoring Mechanism IV.A.1. Document outreach efforts targeting businesses, as recommended in the work plan to be developed by the Program. Implement the evaluation component of the work plan.	Ongoing	County Health Inspectors distributed approximately 628 copies of the "Don't Set a Table for Pests" poster during FY 04-05
V. Household Hazardous Waste Collection		
V.A.3 Work with HHW collection agencies to support, enhance, and help publicize programs for proper pesticide disposal (PS #7).	Ongoing; began FY 00-01	**Ongoing** – In FY 04-05, the Watershed Watch Campaign's "Got Bugs" ad continued to educate consumers on proper pesticide disposal. The County HHW Program collected 4,200 pounds of dursban and diazinon in FY 04-05. In addition, the County HHW Program also managed over 213,000 pounds of poisons during FY 04-05. The Program also contacted all participating stores to ensure that employees were aware of the stop-sale date for diazinon. This follow-up indicated that all stores were aware of the stop-sale date and had taken diazinon off their shelves for proper disposal.

Table 6-1, continued
Status of FY 04-05 Pesticide Management Tasks

Task[1]	Updated Schedule	Status
Monitoring Mechanism V.A.1. Document that household hazardous waste collection programs adequately serve residents and businesses and that any exchange programs do not exchange organophosphate or banned pesticides.	Annually	County HHW -- No residents were turned away with the exception of those who brought munitions, explosives or radioactive waste. Collection facilities and events have expanded in number. The County does operate a material reuse program that allows residents to take usable items (e.g., paint, left by other residents). This program does not include banned pesticides exchange. Palo Alto – No Palo Alto residents were turned away. Palo Alto does not have an exchange for the items brought for disposal.
Monitoring Mechanism V.A.2. Document quantities of pesticide disposal at household hazardous waste collection facilities (only possible on a county-wide basis at present).	Annually	County HHW – Although the public education campaign about dursban and diazinon has ended, the HHW Program collected 4,200 pounds of these two pesticides in FY 04-05. Palo Alto -- 28,091 lbs of pesticides were collected from residents during FY 04-05. This represents a substantial increase from FY 03-04 (9,532 pounds were collected in FY 03-04).
VI. County Agricultural Commissioners – All Tasks Completed		

Table 6-1, continued
Status of FY 04-05 Pesticide Management Tasks

Task[1]	Updated Schedule	Status
VII. New Development		
VII.A.4 Develop and propose enhanced reporting format for documenting use of pesticide reduction measures at development sites. (Draft Permit Provision C.3.n.)	Annual Reports	**Completed/Ongoing** -- A section for documenting pesticide reduction measures required of project applicants is included in the Program's model data collection form for collecting other development project data prior to implementing C.3. (i.e., impervious surface area). The reporting form included in the Planning Procedures Performance Standard for annual reporting of information on Group 1 projects allows Co-permittees to more specifically list the pesticide reduction measures required.
VIII. Monitoring and Science		
VIII.A.1. Continue financial support of the Regional Monitoring Program (RMP). Continue to actively participate in the RMP advisory and technical committees to focus RMP resources on 303(d) problem pollutants, including OP pesticides.	Annually	**Completed/Ongoing** – The Program contributed $160,804 to the RMP in FY 04-05 and has budgeted $168,480 for FY 05-06. Program staff attends the RMP Technical Review Committee meetings and prepare meeting summaries for Management Committee.
VIII.A.2. Work with Water Board staff to refine the problem statement for the diazinon TMDL and determine data needs, with assistance from the BASMAA Pesticide Work Group.	FY 01-02 and beyond	**In Progress** – Program staff attend the Urban Pesticide Committee meetings at which the diazinon TMDL has been discussed. Program staff is also working on the TMDL with Water Board staff as part of the Clean Estuary Program (CEP).
VIII.A.3. Participate in a coordinated regional plan to collect data for the diazinon TMDL, as defined in the RWQCB/BACWA/BASMAA MOU.	FY 01-02 and beyond	**Ongoing** – Program staff are participating in a regional data collection plan as SCVURPPP is a member of the CEP (formerly the TMDL MOU). The Program contributed $97,000 to the CEP in FY 04-05 and will contribute the same amount in FY 05-06.

Table 6-1, continued
Status of FY 04-05 Pesticide Management Tasks

Task[1]	Updated Schedule	Status
Monitoring Mechanism VIII.A.1. Submit monitoring data and reports to the Regional Water Quality Control Board and other interested parties (such as USEPA) per the reporting schedule in the Program's Multi-Year Receiving Waters Monitoring Program.	FY 02-03 and beyond	**Completed/Ongoing –** The Program completed and submitted its third Receiving Waters Monitoring Report in September 2005 (See Section 4-Attachment C-1 of the *FY 04-05 Annual Report*).
IX. Regional, State, and Federal Coordination		
IX.A.1. Support actions by the California Stormwater Quality Task Force (now California Stormwater Quality Association) Pesticide Committee to comment on and assist with USEPA's pesticide risk assessments.	Ongoing	**Completed/Ongoing** – SCVURPPP provided funding to CASQA's consultant contract that funded Geoff Brosseau's and Kelly Moran's efforts to review risk assessments and provide comments on behalf of the CASQA member agencies.
IX.A.2. Through participation in the UPC and CASQA, work with the U.S.EPA, the California Department of Pesticide Regulation, and the pesticide industry to eliminate uses of pesticides likely to enter surface water from those listed on product labels.	Ongoing	**Ongoing** – Program staff regularly participates in the UPC and CASQA and support efforts to eliminate uses of pesticides that cause risk to water quality. The CASQA General Meeting in July 2005 focused on the topic of pesticide use, monitoring, and regulation.
Monitoring Mechanism IX.A.1. Document correspondence with U.S. EPA and the California Department of Pesticide Regulation and successes in achieving changes in registered uses and labeling that protect water quality.	Annually	**Completed/Ongoing –** Copies of correspondence sent by the CASQA Pesticide Committee, with support from SCVURPPP, are provided to the Management Committee and the Water Board. Successes related to protection of water quality were the banning of chlorpyrifos, limiting uses of diazinon and convincing EPA that its Offices of Pesticides and Water needed to coordinate their efforts.
IX.B.1. Participate in the activities of the Bay Area Stormwater Management Agencies Association, the California Storm Water Quality Association, and the Urban Pesticide Committee and communicate Program efforts.	Annually	**Completed/Ongoing** – Program staff regularly attended BASMAA, CASQA (General and Executive Committee) and UPC meetings to communicate Program efforts (see Section 2- Appendix A-2 for list of meetings attended during FY 04-05).

Table 6-1, continued
Status of FY 04-05 Pesticide Management Tasks

Task[1]	Updated Schedule	Status
IX.B.2. Collaborate in technical studies to support TMDL development and implementation. (See Action VIII.A.3.)	As Needed.	**Completed/Ongoing** – Program staff are participating in a regional effort to develop TMDLs. SCVURPPP is a member of the CEP (formerly the TMDL MOU).
Monitoring Mechanism IX.B.1. Document attendance by Program staff at regional and statewide meetings and completion of regional and statewide efforts.	Annually	**Completed/Ongoing** – Section 2-Appendix A-2 contains a list of meetings attended by Program staff during FY 04-05. Meeting summaries are provided within Management Committee packets.
X. Review and Revision of Work Plan		
X.A.1. Review and continuously improve the goals, actions, and monitoring mechanisms of the work plan considering results of self-evaluations, comments from Water Board staff and other interested parties, and results of local performance review meetings if any.	Annually- As Needed	**Completed/Ongoing –** The Pesticide Plan was revised twice in FY 01-02 based on comments from Water Board staff and interested parties (specifically RWQCB letters dated 8/15/01 and 12/21/01) and submitted to the Water Board on October 15, 2001 and March 1, 2002, respectively. The Plan will be updated at the beginning of the next permit cycle to correspond to the reissued permit requirements. Task evaluations are provided in Sections 3, 6, and 8 of this Annual Report.
Monitoring Mechanism IX.A.1. Complete revised work plan that incorporates continuous improvement items, and report on completion of work plan tasks.	Annually	**Completed/Ongoing** – See response to Action X.A.1. above and Section 6 of this Annual Report.

SECTION 7

MERCURY POLLUTION PREVENTION ACTIVITIES

7. MERCURY POLLUTION PREVENTION ACTIVITIES

INTRODUCTION

Mercury has been found in sediments in South San Francisco Bay and the Guadalupe River Watershed. Some types of fish caught in the Bay contain mercury and other pollutants at concentrations that may threaten the health of humans consuming those fish. In response, the California Office of Environmental Health and Hazard Assessment issued an interim fish consumption advisory. The U.S. Environmental Protection Agency (EPA) has listed the Bay and the Guadalupe River Watershed (including the Guadalupe River, Alamitos Creek, Guadalupe Creek, Calero Reservoir, and Guadalupe Reservoir) as impaired by mercury under Section 303(d) of the Clean Water Act. In accordance with Section 303(d), the Water Board is required to establish a Total Maximum Daily Load (TMDL) for mercury in the South San Francisco Bay and the Guadalupe River Watershed.

Permit Provision C.9.c. requires the Program to address the impairment by developing and implementing a mercury pollution prevention plan. The Program developed a Mercury Pollution Prevention Plan (Mercury Plan) consistent with this Provision. The Mercury Plan was submitted to the Water Board on March 1, 2002 as part of the Program's FY 02-03 Work Plan. This section describes and evaluates Mercury Plan tasks completed during FY 04-05.

MERCURY POLLUTION PREVENTION PLAN

The Mercury Plan is based on the premise that a Bay area-wide approach (and coordination) in addressing mercury pollution prevention will be most successful. For this reason, many of the actions identified in the Mercury Plan are for Program-level participation in regional efforts. These efforts are supplemented by countywide and local efforts.

The Mercury Pollution Prevention Plan addresses five general goals:

I. **Municipal Use of Mercury-Containing Products** – Eliminate all unnecessary municipal use of mercury-containing products and establish proper disposal methods for products that cannot be eliminated.

II. **Household Hazardous Waste Collection** – Provide mercury-containing product disposal services through household hazardous waste (HHW) collection programs for residents and small businesses, and encourage use of these programs.

III. **Monitoring and Science** – Participate in coordinated monitoring efforts to support mercury TMDL development and implementation, including assessment of air pollution sources of mercury and concentrations of mercury in sediment.

IV. **Regional, State, and Federal Coordination** – Actively participate in regional, state and federal coordination efforts to achieve a reduction in the amount of mercury in urban runoff and air emissions.

V. **Public Education and Outreach** –Increase awareness of proper disposal of mercury-containing products and available non-mercury containing alternatives.

The Mercury Plan identifies actions that will be implemented at the Program level, municipality level, or both; and provides the schedule for initiation and/or completion of Program-level actions. The details of municipality actions and schedules are included in the individual Co-permittee work plans and/or annual reports, as appropriate.

FY 04-05 MERCURY POLLUTION PREVENTION ACTIVITIES

The status of the Program's FY 04-05 Mercury Plan tasks is summarized in Table 7-1. Highlights of Program accomplishments, as developed and/or implemented by the Mercury P2 Plan AHTG, PIP AHTG, Program staff and municipalities are provided below.

Guidelines for Reduction and Management of Mercury-Containing Products

During FY 02-03, the Mercury P2 Plan AHTG and Program staff developed guidelines for the reduction and management of mercury-containing products identified for virtual elimination. The goals of the *Guidelines for Mercury-Containing Products Reduction and Management* are to work towards the virtual elimination of mercury from controllable sources that may affect urban runoff due to agency operations; and establish proper recycling and disposal methods for products that cannot be eliminated due to technological, safety or economic factors. Co-permittees continued implementing the *Guidelines for Mercury-Containing Products Reduction and Management* in FY 04-05.

Mercury Pollution Prevention Outreach Workgroup

In December 2002, Program staff established a new Work Group called the Mercury Pollution Prevention Outreach Work Group. This Work Group implements the Public Education and Outreach elements of the Mercury Plan by organizing a public education, outreach and participation program designed to reach residential and commercial users of mercury-containing products.

FY 04-05 Tasks

Santa Clara County Household Hazardous Program (CoHHW Program) staff is implementing (with SCVURPPP) the outreach requirements of a $300,000, three-year California Integrated Waste Management Board (CIWMB) grant, specifically the store partnership program for collecting spent fluorescent lamps.

During FY 04-05, the CoHHW Program partnered with approximately thirteen retail stores to provide free fluorescent lamps drop-off locations for residents. The Program's outreach focused on promoting these drop-off locations and educating people about mercury pollution.

The Program's FY 04-05 Mercury Outreach Pollution Prevention Work Plan included implementation of the following tasks:

- Development of In-store Signage Materials – The Program developed posters and floor decals to inform people about the availability of free fluorescent drop-off locations.

- Development of Outreach Articles – A newsletter article and press release were developed to inform residents about store drop-off locations. This information was provided to Co-permittees for use in conducting local outreach (e.g., employee newsletters or community papers).

- Conduct Media Advertising – The fall Watershed Watch Campaign used the Watershed Watch 'Got Paint" ad to educate people on the proper disposal of hazardous wastes (e.g., fluorescent lamps). During spring 2005, a media campaign consisting of print, radio and transit advertising was implemented. A new ad, "Got Bulbs" was developed to inform residents about the free drop-off locations. The advertising campaign ran from March to May 2005. The Program provided funding for radio and print advertising and the Santa Clara County Integrated Waste Management Division provided funding for transit advertising. In addition, radio station KRTY offered, at no cost, an "enter-to-win" contest promoting the drop-off locations. The contest prize was a four day/three night trip to Baja Mexico. Both KRTY and the *San Jose Mercury News* provided free advertising to support this promotion. Listeners/readers were encouraged to participate in the contest by either dropping-off their used fluorescent bulbs at participating stores or by submitting the "pledge to dispose mercury properly" contest entry form available online and within the *San Jose Mercury News*.

Copies of all outreach materials are included within Appendix B-17.

Monitoring and Science

The Santa Clara Basin Watershed Management Initiative (SCBWMI) is serving as the stakeholder forum for the development of the Guadalupe River TMDL Report for Mercury. The Guadalupe River Watershed encompasses parts of San Jose, Los Gatos, Campbell, Monte Sereno and Santa Clara. The Program is a stakeholder in the Guadalupe River TMDL process. The Santa Clara Valley Water District (SCVWD) is taking the lead role in the TMDL development process by solely funding the $900,000 study and serving as Co-Chair of the TMDL Work Group and Stakeholder Group. Program staff is also participating in the TMDL process.

Program staff, along with other Co-permittee staff, have attended work group meetings and reviewed draft technical memoranda developed by the consultant. Sampling in the Guadalupe River watershed, which began in February 2004, included an element to compare total and methyl mercury in creeks draining the urban watershed unaffected by mining (Ross, Canoas and Los Gatos Creeks) to those urban creeks affected by mining (Alamitos, Guadalupe, Arroyo Calero, Canoas, Randol Creeks and Guadalupe River). Results were reported within the *Data Collection Report Volume 1 and Volume 2* (Tetra Tech, February 8, 2005). Under a contract with the Water Board, the consultant has incorporated the data collection results into the *Final Conceptual Model Report* (Tetra Tech, May 22, 2005). Water Board staff are currently developing a draft TMDL report. Program and Co-permittee staff will continue to participate in the development of the Guadalupe River Watershed TMDL for mercury by attending meetings and reviewing technical results and reports.

The Program continued to provide financial support to the Regional Monitoring Program (RMP), including the Mercury Deposition Network Pilot Study. In addition, Program and Co-permittee staff actively participates in RMP Technical Review Committee (TRC) and Steering Committee (SC) meetings and provides meeting summaries to the Management Committee. Staff reviewed available draft reports, including the *Concentrations and Loads of Mercury, PCBs and OC Pesticides in the Lower Guadalupe River, San Jose, California* (SFEI, February 2005).

In addition, the Program's *Multi-Year Receiving Waters Monitoring Plan* includes collecting and analyzing receiving water samples for mercury. Refer to Section 4- Monitoring Activities for additional details regarding mercury monitoring activities.

U.S. Department of Energy (DOE) Office of Building Technology's Vision 2020 Lighting Technology Roadmap

Since the Mercury Plan's first year of implementation, Program staff has been tracking the progress made by the U.S. Department of Energy (DOE) office of Building Technology's Vision 2020 Lighting Technology Roadmap in accordance with Mercury Plan Action IV.F.

DOE's Building Technologies Program continues to move forward on their Vision 2020 Roadmap. Progress includes seven strategies to address the challenges of transforming the lighting marketplace and developing new technologies that enhance lighting quality, efficiency and cost effectiveness. There are no significant updates or progress to report in FY 04-05.

In May 2005, Program staff received a free *Lamp Recycling Outreach Project* CD-ROM. This information, which was developed in a cooperative effort by the Association of Lighting and Mercury Recyclers, NEMA, Solid Waste Association of North America (SWANA) and U.S. EPA will be reviewed by Program staff and provided to interested Co-permittees, as appropriate.

EVALUATION OF PROGRAM EFFECTIVENESS AND NEXT STEPS FOR MERCURY PLAN

During FY 04-05, there was considerable progress made on tasks outlined in the Mercury Plan, specifically related to public outreach and progress of regional partnerships. Significant outcomes from the FY 04-05 Work Plan and the primary mercury pollution prevention activities planned for FY 05-06 include:

Guidelines for Reduction and Management of Mercury-Containing Products: In FY 03-04, Co-permittees began strategizing on how to implement the Program's Guidelines for reducing and managing mercury-containing products identified for virtual elimination and began implementation in FY 04-05. Implementation will continue in FY 05-06.

Mercury Pollution Prevention Outreach: The Mercury Pollution Prevention Outreach Work Group successfully completed the implementation of a two-year, two-phase fluorescent light tube recycling campaign in FY 03-04 and continued outreach in FY 04-05 to support the CoHHW Program's Mercury Reduction Grant.

The mercury outreach media campaign included five free promotional print ads, 100 live promotional announcements, web site exposure and a vacation contest package from KRTY, third party sponsor. Posters, contest boxes and floor decals were featured at participating hardware stores within Santa Clara County. Bus signs were also visible throughout the County and featured a four-week override. Total gross impressions from media advertising were 22,127,000. The total added value of bonus spots, public service announcement's and promotions for the various media partners is estimated at $13,500.

Nearly 400 Got Bulbs contest entries were received by KRTY, mostly from the web site and the *San Jose Mercury News* ad. In addition, the quantity of used fluorescent bulbs collected at participating stores increased during the advertising period (March through May), as shown in the chart below[1].

[1] Since fluorescent light tubes come in different sizes, quantities are reported in terms of the total length (feet) of tubes collected.

During FY 04-05, the CoHHW Program collected 166,000 feet (41,597 pounds) of fluorescent lamps at 15 retail drop-off locations within Santa Clara County[2]. Rob D'Arcy, Santa Clara County Hazardous Materials Program Manager indicated that the majority of lamps collected were the four-foot fluorescent type[3]. It is estimated that approximately 0.483 kilograms of mercury was destined for recycling from fluorescent lamps collected by the CoHHW Program[4]. During FY 03-04, the CoHHW Program collected 48, 652 feet (12,163 pounds) of fluorescent lamps. In addition, 155 pounds of devices which contained elemental mercury (includes thermostats, thermometers and other products) and 450 mercury-containing thermometers were collected during FY 04-05.

As municipal budgets/resources permit, outreach on the negative health and environmental impacts of mercury and the methods available for properly disposing of FLTs to residents and small businesses will continue. In fall of 2005, the Program plans to conduct a Watershed Watch advertising campaign (see Section 3) which will include the "Got Bulbs?" ad and promote proper disposal of FLTs. In addition, the Program will continue to assist the CoHHW Program with the outreach requirements of their Mercury Reduction Grant.

Coordination Efforts with Regional Organizations: The Guadalupe Hg TMDL Data Collection Reports, SCBWMI Guadalupe Hg Work Group meetings and Program staff review of several draft products are recent highlights of the Program's coordination efforts with local and regional organizations. The Guadalupe River Watershed Mercury TMDL Report draft is

[2] Information regarding the collection of mercury containing products (e.g., fluorescent lamps, thermostats, thermometers and other products) during FY 04-05 and the weight of a four-foot fluorescent lamp was obtained from a memorandum *entitled Fiscal Year 2004/2005 HHW Program Update* (dated August 2, 2005). This memorandum was prepared by Rob D'Arcy, Santa Clara County Hazardous Materials Program Manager.
[3] Information provided with electronic mail (dated August 8, 2005) to John Fusco from Rob D'Arcy.
[4] Based on a 1999 National Electrical Manufacturers Association survey entitled *Environmental Impact Analysis: Spent Mercury-Containing Lamps, January, 2000 (Fourth Edition*), the average four-foot fluorescent lamp contains about 11.6 milligrams (mg) of mercury. For the sake of estimating the amount of mercury sent for recycling, approximately 41,600 four-foot fluorescent lamps were collected. As a result, 0.483 kilograms of mercury destined for recycling is a rough estimate.

expected to be completed by Water Board staff in the upcoming fiscal year. Program Staff will continue to attend CEP (Clean Estuary Partnership) TMDL meetings, Regional Monitoring Program (RMP) Steering Committee and Technical Review Committee meetings.

Table 7-1
Status of FY 04-05 Mercury Pollution Prevention Tasks[1]

Task	Status
I. Municipal Use of Mercury-Containing Products	
I.F. Implement guidelines developed under Action I.E.	**On-going -** Co-permittees began implementation in FY 03-04.
II. Household Hazardous Waste Collection	
II.A. Provide mercury-containing products disposal services for residents and small businesses.	**On-going** – Disposal services are provided by the County HHW Program, Palo Alto Regional Water Pollution Control Plant and the Sunnyvale Materials Recovery and Transfer (SMaRT®) Station.
II.C. Implement guidelines developed under Action II.B.	**On-going -** Co-permittees began implementation in FY 03-04.
II.F. Work with HHW collection agencies to develop and help publicize fluorescent light recycling program.[2]	**Completed/Ongoing –** Began effort in FY 02-03. The Mercury Pollution Prevention Outreach Workgroup collaborated with the Santa Clara CoHHW Program for implementing the outreach component in the Program's two-phase fluorescent light tube (FLT) recycling campaign. The first phase of the campaign, which was developed in FY 02-03, targeted residents. The second phase, completed in FY 03-04, targeted small businesses. The main objective of both phases was to show the negative health and environmental impacts of mercury and the methods available to the public for the proper disposal of FLTs. During FY 04-05, the Program conducted outreach to promote the free fluorescent bulb drop off locations provided by the County HHW Program.
III. Monitoring and Science	
III.A. Continue financial support of the Regional Monitoring Program (RMP), including the Mercury Deposition Network Pilot Study and	**On-going** – Program and Co-permittee staffs actively participated in RMP TRC and SC meetings and provided meeting summaries to

[1] Completed Mercury Pollution Prevention Tasks are described in previous Annual Reports (Table 7-1).
[2] Action II.F. is being conducted in conjunction with Public Education and Outreach Actions.

Table 7-1
Status of FY 04-05 Mercury Pollution Prevention Tasks[1]

	Task	Status
	the Clean Estuary Partnership (CEP). Continue to actively participate in the RMP Steering Committee (SC) and Technical Review Committee (TRC).	Management Committee. Staff reviewed available reports and provided comments. Draft reports included *Pulse of the Estuary* and *Concentrations and Loads of Mercury, PCBs and OC Pesticides in the Lower Guadalupe River, San Jose, California (February 2005).* Both Program and Co-permittees' staffs are actively involved with the CEP technical and management committees; and review of proposed Work Plans and study scopes. Program and Co-permittee staffs also participate in the CEP Mercury Work Group. In addition, the City of San Jose continues to chair the CEP technical committee.
	• The City of San Jose will continue to provide in-kind services for the maintenance of the Mercury Deposition Network site near San Jose.	**On-going through 2005**.
III.B.	Provide financial and staff support for a coordinated regional plan to collect data for the mercury TMDL, as defined in the CEP MOU.	**On-going—** The Program continued to participate in the CEP (see Section 4, Monitoring for a discussion of the CEP (formerly TMDL MOU) activities and accomplishments to date).
IV. Regional, State, and Federal Coordination		
IV.A.	Participate in the activities of the Bay Area Stormwater Management Agencies Association, the California Storm Water Quality Task Force, and the San Francisco Estuary Institute and communicate Program efforts.	**On-going** – Program staff continue to attend BASMAA, CASQA and SFEI RMP meetings (See Internal and External Meetings FY 04-05 attached to the *Review of FY 04-05 Program Management Services* within Appendix A-2).
IV.B.	Collaborate in technical studies to support TMDL development and implementation including the Santa Clara Basin WMI Guadalupe River Mercury TMDL Workgroup.	**On-going** – Program and Co-permittee staffs actively participate in the Guadalupe Mercury TMDL Watershed Work Group and Stakeholder group. Staff reviewed available reports including *Draft Data Collection Report and Final Conceptual Model Report*.
IV.E	Support, participate in, and advocate increased regional collaborati	**Ongoing** – The Program will support the RWQCB in collaborating with the BAAQMD but will not directly work with the BAAQMD. The

Table 7-1
Status of FY 04-05 Mercury Pollution Prevention Tasks[1]

Task	Status
	Program supports the RWQCB through participation in the CEP. Mercury air deposition is being addressed regionally.
IV.F. Support and track the progress of the U.S. Department of Energy (DOE) Office of Building Technology's Vision 2020 Lighting Technology Roadmap.[3]	**In Progress** – DOE's Building Technologies Program continues to move forward on their Vision 2020 Roadmap. Progress includes seven strategies to address the challenges of transforming the lighting marketplace and developing new technologies that enhance lighting quality, efficiency and cost effectiveness. There are no significant updates or progress to report in FY04-05.
V. Public Education and Outreach	
V.A. Develop various outreach programs to educate target audiences about proper disposal of mercury-containing products and alternative non-mercury containing products. Outreach programs will include, but may not be limited to, the following:	**Completed/Ongoing[4] –** In FY 04-05, the Mercury Pollution Prevention Outreach Work Group continued its mercury pollution prevention outreach. Outreach was coordinated with the County HHW Program's Mercury Grant implementation plan.
• Develop and begin to implement a fluorescent light recycling outreach program to educate residential users and encourage proper disposal of fluorescent lights.	**Completed/Ongoing[4] –** Phase I outreach of the two year, two phase Work Plan was completed in FY 02-03. This phase focused on residential outreach. Additional annual coordination will continue, as appropriate. In FY 04-05, the County HHW Program developed partnerships with approximately 13 retails stores to provide free fluorescent lamps drop-off sites for residents. To promote the drop-off locations, the Program conducted a media campaign from March to May 2005 (See Section 7 and Appendix B-17 of this Annual Report for additional details).

[3] DOE's Vision 2020 Lighting Technology Roadmap includes this goal for the year 2020, "Highly efficient, reduced-mercury fluorescent sources will come to market." Sustainable Conservation's September 27, 2000 report entitled *Reducing Mercury Releases from Fluorescent Lamps: Analysis of Voluntary Approaches* concluded that "we do not believe that starting a new collaborative approach with manufacturers to create mercury-free fluorescent lamps is the most effective use of resources at this time." Sustainable Conservation recommends focusing on voluntary recycling of mercury-containing lamps as an alternative approach.

[4] These tasks were marked as Completed and Ongoing since the specific public education and outreach task was completed but outreach is ongoing. Articles will continue to be posted and updated, as appropriate. The Program will continue to assist the CoHHW with public outreach activities as resources allow.

Table 7-1
Status of FY 04-05 Mercury Pollution Prevention Tasks[1]

Task	Status
• Develop and begin to implement a fluorescent light recycling outreach program to educate small businesses and conditionally exempt small quantity generators and encourage proper disposal of fluorescent lights. (For example, the small business outreach program might include coordination with local chapters of the Building Owners and Managers Association [BOMA] or the National Association of Industrial and Office Properties [NAIOP].)	**Completed/Ongoing[4] –** In FY 03-04, the Work Group implemented Phase II of the two-year, two-phase Work Plan. Phase II outreach efforts were focused on small businesses and CESQGs. Additional annual coordination will continue, as appropriate.
• Coordinate with municipal inspectors to integrate mercury outreach to industrial businesses into their existing routine pretreatment, source control, and/or hazardous materials inspection processes	**Ongoing –** Co-permittees began coordination efforts in FY 03-04.
V.B. Develop or adapt existing mercury outreach materials, as needed, for outreach programs.	**Completed/Ongoing[4] –** As part of the Outreach Work Plan for Action V.A, development of materials began in FY 02-03. To date, the following outreach pieces have been developed by the Outreach Work Group: • Two fact sheets for the worldwide web (one for residents and one for businesses); • Two newsletter articles (one for residents and one for businesses); • One press release; • One video public service announcement for broadcast on local city cable channels; • Three newspaper ads, two radio ads, one transit (bus poster) ad; and • In-store signage (posters and decals) for promoting the

Table 7-1
Status of FY 04-05 Mercury Pollution Prevention Tasks[1]

Task	Status
	fluorescent drop-off locations. All outreach pieces aim to show the negative health and environmental impacts of mercury and the methods available to the public for the proper disposal of FLTs. Copies of all outreach materials developed during FY 04-05 are included within Appendix B-17.
V.C. Attend community events and distribute outreach materials.	**Completed/Ongoing[4] –** As part of the Outreach Work Plan for Action V.A, distribution of outreach materials continued during FY 04-05.

SECTION 8

NEW AND REDEVELOPMENT CONTROL MEASURES

8. NEW AND REDEVELOPMENT CONTROL MEASURES

INTRODUCTION

This section describes the Program's efforts during FY 04-05 to assist Co-permittees to control the impacts of development on stormwater quality and flow through the development project planning, review and approval process. Tasks related to construction inspection are described under Section 2, Co-permittee Guidance, and Section 2, Performance Standards.

BACKGROUND

On October 17, 2001, the Water Board adopted Order 01-119 which amended the Program's Permit Provision C.3. (New and Redevelopment Requirements) to contain significant new requirements. These requirements include:

- Numeric design standards for sizing stormwater treatment controls;
- Limits on increases in peak stormwater discharge rates and/or durations from new or redevelopment sites that may result in increased potential for erosion or other adverse impacts in creeks;
- Requirements for operation and maintenance of stormwater controls;
- Requirements for site design and source control measures;
- Definition of a minimum project size, based on amount of impervious surface created, for which the design standards, control measures, peak flow limitations, and maintenance requirements apply;
- Requirements for changes to General Plans and environmental review processes to provide authority to implement the requirements;
- Reporting requirements; and
- Schedule for implementation.

In addition, Permit Provision C.3. requires the Program and Co-permittees to submit specific work plans for: 1) modifications to the development project review process (C.3.b.); 2) implementation of Group 1 requirements (C.3.c.); and 3) site design standards review and revision (C.3.j.). In response, the Program and Co-permittees submitted work plans for implementing all C.3. requirements to the Water Board on March 1, 2002 (as part of the Program's *FY 02-03 Work Plan*, Volume II). To guide this effort, Program staff prepared a separate document entitled *Guidance for Work Plan Tasks Related to Implementation of Permit Provision C.3. (New and Redevelopment Requirements), FY 01-02 and 02-03* (referred to herein as C.3. Work Plan Guidance). This guidance identifies proposed actions to meet the requirements of Provision C.3. and whether the actions will be implemented at the Program level, Co-permittee level or both. The Program and Co-permittee tasks for FY 04-05 (listed in the C.3. Work Plan Guidance) are the basis of this Annual Report section.

In February 2003, the Water Board adopted and/or amended the stormwater permits for the Contra Costa, Alameda, and San Mateo countywide stormwater programs with different requirements than those in the Program's permit. The Water Board Executive Officer stated the Board's intention to make all of the permits consistent, and as a result, extended the deadlines

for implementation of certain C.3. provisions[1]. In addition, the Program submitted a letter to the Water Board on September 22, 2003 proposing an alternative Group 1 and Group 2 project definition consistent with the other stormwater programs' permits[2], which was accepted by the Water Board in a letter dated January 29, 2004[3]. On July 20, 2005, the Water Board adopted a Tentative Order[4] (which amended portions of Provision C.3. in Order 01-119) to further conform the permit language to that of the other permits in the region, amend the Group 2 requirements to include a revised alternative Group 2 definition, and incorporate key provisions in the Hydromodification Management Plan (HMP) Report.

On October 15, 2003, Co-permittees began implementing the C.3. requirements for Group 1 projects (i.e., those projects that included creation or replacement of one acre or more of impervious surface). During FY 04-05, Program efforts were focused on assistance to Co-permittees with C.3. implementation, completion of the HMP Report, negotiations with Water Board staff regarding key provisions of the HMP Report, and the revised alternative Group 2 definition.

IMPLEMENTATION OF FY 04-05 C.3. TASKS

Table 8-1 presents the status of the Program's new and redevelopment (C.3.) tasks scheduled for completion in FY 04-05. The table includes tasks assigned to the Program in the C.3. Work Plan Guidance submitted March 1, 2002, as outlined in the *FY 04-05 Work Plan*.

Highlights of accomplishments and evaluation of effectiveness of some of the key elements of the C.3. Work Plan are provided below.

Ad Hoc Task Group and Work Group Participation

In FY 01-02, the Program formed the C.3. Provision Oversight Ad Hoc Task Group (C3PO AHTG) to oversee, coordinate, and discuss Program guidance on implementation of C.3. tasks. During FY 04-05, the C3PO AHTG continued to meet approximately bimonthly. It has provided valuable assistance to Program staff in development of the C.3. implementation tools and continues to be a useful forum for discussion of experience with implementing the C.3. requirements.

A number of work groups were formed to work on specific issues under C.3. The list of AHTG and work group members, and the missions of each group, is provided in Section 2, Table 2-2. During FY 04-05, one work group (BMP O&M Verification Work Group) was active. HMP issues were addressed by the Executive Committee and Management Committee.

---

[2] Letter to Loretta Barsamian, Executive Officer, California Regional Water Quality Control Board, San Francisco Bay Region, from Beau Goldie, Chair, SCVURPPP Management Committee, Re: Revised Request for Regional Board Approval of an Alternative "Group 2 Project" Definition, September 22, 2003.

[3] Letter to Beau Goldie, SCVURPPP Management Committee Chair, from Bruce Wolfe, Executive Officer, California Regional Water Quality Control Board, San Francisco Bay Region, Re: Approval of the Proposed Alternate Group 2 Project Definition, January 29, 2004.

[4] Order No. R2-2005-0035, NPDES Permit No. CAS029718, Amendment Revising Order No. 01-119 (Provision C.3., New and Redevelopment Requirements), July 20, 2005.

C.3. Workshops

During FY 04-05, the Program conducted one workshop to assist Co-permittees with implementation of Provision C.3.e., Operation and Maintenance of Treatment BMPs. The workshop, entitled *Conducting Stormwater Treatment BMP Maintenance and Inspections* was held on June 9, 2005 and attracted 116 participants. The workshop covered requirements for treatment BMP O&M verification programs; examples of cities' approaches to conducting inspection programs; lessons learned about BMP maintenance from the Caltrans BMP Retrofit Pilot Program and other agencies; mosquito management; and porous pavement design and maintenance. The workshop also featured exhibits for eight stormwater control measure vendors.

The agenda and evaluation summary for the workshop are presented in Section 2, Appendix A-5.

Guidance for Treatment BMP Operation and Maintenance Verification Programs

Provision C.3.e of the Program's NPDES permit requires each Co-permittee to implement a stormwater treatment BMP Operation and Maintenance (O&M) Verification Program. To address Provision C.3.e, the BMP O & M Verification Work Group was formed (by the C3PO AHTG) to develop guidance for implementing an O&M verification program. The Work Group consists of Program staff and representatives from the following jurisdictions: Cupertino, Los Gatos, Mountain View, Milpitas, Palo Alto, San Jose, Santa Clara Valley Water District and Sunnyvale.

In FY 02-03 and FY 03-04, Program staff developed (and the Work Group reviewed) a total of eight guidance documents to assist Co-permittees in implementing a BMP O&M Verification Program. Information from these documents was included in Chapter VI of the *C.3. Stormwater Handbook* (May 2004). The memoranda and the Handbook are available at www.scvurppp.org.

During FY 04-05, the Program provided assistance to Co-permittees that were setting up verification programs; planned and conducted a training workshop on O& M verification; and continued work on defining database and reporting requirements. On May 23, 2005, the C3PO AHTG met with Water Board staff to discuss the reporting requirements described in Permit Provisions C.3.e and C.3.n. At the meeting, Water Board staff requested that the Program propose an approach that would satisfy the reporting requirements described in Permit Provision C.3.e. Working with the BMP O&M Verification Work Group, the Program developed an approach to use standardized data fields to track treatment BMPs and relevant inspection results. To ensure consistent data collection among Co-permittees, Program staff and the Work Group are developing a data collection form which includes the standardized fields. During FY 05-06, the Work Group and C3PO AHTG will finalize the data collection form and determine what inspection data should be included in future Annual Reports. Co-permittees will be expected to use the form or a form with similar standardized fields while conducting BMP O&M verification inspections.

Hydromodification Management Plan

Background

Provision C.3.f. requires the Co-permittees to manage increases in runoff peak flows and volumes from Group 1 development projects through the implementation of a Hydromodification Management Plan (HMP). The HMP Draft Work Plan was developed by the Program's consultant, Geosyntec, in consultation with Program staff and the SCVWD, and submitted to the Water Board on March 1, 2002. A response to Water Board staff comments received May 14, 2002 and a revised HMP Work Plan were submitted to the Water Board on September 13, 2002 (see www.scvurppp.org).

In FY 02-03, the GeoSyntec consultant team was expanded to include Philip Williams & Associates and Balance Hydrologics, Inc. The addition of these consultants brought expanded expertise in geomorphology, stream function, hydrologic/hydraulic modeling and local knowledge to the team. The consultant team also recruited a panel of experts to provide outside technical review of HMP Work Plan products. They included Brian Bledsoe of Colorado State University, Thomas Dunne of University of California at Santa Barbara and Matt Kondolf of University of California at Berkeley. The Program formed an HMP Work Group to start reviewing products developed as part of the Plan. The consultant team developed a watershed assessment methodology and applied it to the first test subwatershed, Lower Silver-Thompson Creek (part of Coyote Creek watershed).

In FY 03-04, completed HMP tasks included the assessment of two additional watersheds, the Ross Creek Subwatershed (representing the Guadalupe River watershed) and the San Tomas Aquino Creek Subwatershed (representing the characteristics of the western watersheds). The assessment methodology consists of four elements: 1) problem area and reach characterization, 2) geomorphic assessment, 3) hydrologic modeling, and 4) stability assessment. The results of the assessments indicated that the methodology works in watersheds with different characteristics and that the watersheds studied are not significantly different to warrant separate hydromodification standards, criteria, and thresholds. Differences between watersheds are accounted for in the assessment methodology.

The Program and its consultant team also completed six technical memoranda describing the technical analyses performed to address key issues which include the range of storm events to be considered for HMP criteria; effectiveness of volume control, discrete storm hydrograph matching, and flow duration control techniques for mitigating hydromodification techniques; and examples of flow duration basin sizing for local projects. Two other draft memoranda on guidelines for exempt areas and development of hydromodification standards were not finalized but instead incorporated into Chapter 4 of the HMP Report.

The list of technical memoranda completed to date includes:

- TM #1 — HMP Assessment Methodology (completed in October 2002)
- TM #2 — Exempt Areas (draft incorporated into Chapter 4 of HMP Report)
- TM #3 — HMP Standards and Criteria (draft incorporated into Chapter 4 of HMP Report)
- TM #4 — Evaluation of the Range of Storms for HMP Performance Criteria
- TM #5 — Evaluation of Volume Control Effectiveness
- TM #6 — Volume Control Sizing Example and Cost Analysis
- TM #7 — Flow Duration Control Example
- TM #8 — Sizing Flow-Duration Controls for a Small Development Project in San Jose

Copies of the technical memoranda are available within Appendix C of the HMP Report provided on the Program's website (www.scvurppp.org).

During FY 03-04, the Program completed four HMP interim and draft reports:

- The *HMP Draft Interim Report, Assessment of the Lower Silver-Thompson Creek Subwatershed*, July 30, 2003. The report focuses on the application of a field investigation and assessment methodology for understanding the impacts of hydromodification on one watershed in Santa Clara Valley
- *Hydromodification Management Plan (Update)*, permit provision C.3.f., submitted January 15, 2004.[5] The update presented a progress report on the HMP, including a description of the products completed which constituted substantial compliance with Provision C.3.f.iv., and a plan and schedule for completion of the HMP Report.
- *Interim Progress Report on SCVURPPP HMP,* permit provision C.3.f., submitted April 1, 2004. A compilation of five technical memoranda on analyses needed for completion of the HMP was submitted to the RWQCB Executive Officer.
- *Hydromodification Management Plan (Public Review Draft),* permit provision C.3.f, submitted July 9, 2004. This draft report was released for public and peer review.

FY 04-05 Accomplishments

After the release of the *Hydromodification Management Plan* (*Public Review Draft)*, the Program conducted a series of public meetings (during July and August 2004) to get input from the development community (developers and engineering consulting firms) and other interested parties on the *Public Review Draft*. These meetings also served to update and get input from the Bay Area Stormwater Management Agencies Association (BASMAA) and Santa Clara Basin Watershed Management Initiative (SCBWMI) members on the HMP. Comments received were incorporated into a *Hydromodification Management Plan Report (Revised Public Review Draft)* released on November 4, 2004. After the release of the *Hydromodification Management Plan Report (Revised Public Review Draft)*, one additional public meeting was held.

A summary of the groups receiving presentations on HMP development and report is presented below:

Groups Receiving Presentations/Briefings	Date	Attendees[6]
HMP Development	2002-2004	
• SCBWMI's Watershed Assessment Subgroup and Flood Management Subgroup	Nov. 18, 2002	Municipal agency staff, SCVWD, CLEAN South Bay, GCRCD, engineering consultants, Water Board staff

[5]Letter to Bruce Wolfe, Executive Officer, California Regional Water Quality Control Board, San Francisco Bay Region, from David Chesterman and Randolph Shipes, Chair and Vice Chair, SCVURPPP Management Committee, Re: Hydromodification Management Plan, January 15, 2004.
[6] Legend: GCRCD = Guadalupe Coyote Resource Conservation District, SCVWD = Santa Clara Valley Water District, HBANC = Home Builders Association of Northern California.

Groups Receiving Presentations/Briefings	Date	Attendees[6]
• BASMAA's New Development Committee	Dec. 5, 2002	Municipal agency staff, Bay area stormwater program representatives, engineering consultants, Water Board staff
• SCVURPPP's C3 Provision Oversight Ad Hoc Task Group	April 26, 2004	Municipal agency staff, SCVWD and Water Board staff
• SCVURPPP's Management Committee	April 29, 2004	Municipal agency staff, Management Committee reps
HMP Report, Public Review Draft	June 29, 2004	
• SCBWMI's Watershed Assessment and Monitoring Subgroup and Flood Management Subgroup	July 30, 2004	Municipal agency staff, SCVWD, League of Women Voters, GCRCD, engineering consultants, Water Board staff
• BASMAA's New Development Committee	Aug. 5, 2004	Municipal agency staff, Bay area stormwater program representatives, engineering consultants, Water Board staff
• City of San Jose Developer Roundtable Meeting	Aug. 5, 2004	City of San Jose staff, developers, engineering consultants, Water Board staff
• City of San Jose Developer Roundtable Meeting	Aug. 12, 2004	City of San Jose staff, developers, engineering consultants, environmental consultants, HBANC, Water Board staff
HMP Report, Revised Public Review Draft	Nov. 4, 2004	
• SCVURPPP's C3 Provision Oversight Ad Hoc Task Group	Nov. 22, 2004	Municipal agency staff, SCVWD, SCVURPPP Management Committee reps
• SCBWMI's Watershed Assessment and Monitoring Subgroup and Flood Management Subgroup	Jan. 18, 2005	Municipal agency staff, GCRCD, Stevens Creek Watershed Council representative

The Final *Hydromodification Management Plan Report* was completed in March 2005 and approved by the Management Committee for submittal (to the Water Board) on April 21, 2005. It addressed comments provided by Water Board staff on the November 2004 *Hydromodification Management Plan Report (Revised Public Review Draft)*. Following submittal of the Final *Hydromodification Management Plan Report*, Water Board staff issued a Tentative Order that adopted the key provisions of the Report. The Tentative Order was approved by the Water Board on July 20, 2005. The Order requires Co-permittees to implement

the HMP provisions within three months of adoption (by October 20, 2005). The Report and its appendices are available on the Program's website (www.scvurppp.org).

Early Implementation of the HMP

City of San Jose, Water District and Program staff have been involved in a pilot project for implementation of the HMP in the Evergreen area (eastern edge of San Jose). Currently, the City of San Jose is developing a Smart Growth Strategy for Evergreen, which addresses the future development of several non-contiguous properties. The development of these properties comprises more than 500 acres and could include approximately 6,000 homes. The Evergreen Smart Growth Strategy provides a unique opportunity to address stormwater and HMP issues early in the planning stages of this community development. During FY 04-05, San Jose, Water District and Program staff continued to meet with the team of consultants representing the property owners and assisted them in evaluating how to meet the HMP requirements for the proposed developments.

San Jose staff is also addressing stormwater and HMP issues in the development of the Coyote Valley Specific Plan. The Land Use Plan Concept for Coyote Valley presented to City Council in January 2005 includes a lake that will be used for flood control and flow control purposes and other site design measures that will help to reduce increases in flow from the development.

Next Steps

The HMP Report will continue to be improved through lessons learned from implementation experiences and review of approaches proposed by other Bay Area stormwater programs. Chapter 7 of the Final HMP Report, HMP Implementation Guidance, describes the anticipated next steps towards addressing remaining implementation issues, refining the guidance and coordinating with other Bay Area programs and Water Board staff in development of a consistent, regional approach. A list and schedule of next steps is provided in Table 8-2.

Other Tasks

Other tasks that Program staff accomplished during FY 04-05 include the following:

- Program staff gave the following presentations on the permit requirements for new and redevelopment projects and other Program elements:
    - "Understanding Potential Barriers to Better Site Design for Water Quality Protection", Putting the LID on Stormwater Management Conference, College Park, Maryland, September 21, 2004.
    - "Urban Runoff Permit Issues: C.3. and the Regional Permit", Municipal Public Works Officials of Santa Clara County, February 10, 2005.
    - "Integrating Water Quality Protection and Development Project Design", American Public Works Association Workshop, May 12, 2005.
    - "Introduction to HMP Requirements – Santa Clara Valley's Experience", San Mateo Countywide Stormwater Pollution Prevention Program 2005 New Development Workshop, May 24, 2005.
- Program staff reported on the Program's C.3. implementation progress at BASMAA New Development Committee meetings.

- Program staff also chaired the BASMAA BMP Sizing Tools Work Group, a group overseeing a Task of Regional Benefit to develop an automated BMP sizing tool, and reviewed Phase 1 products from the consultant. The Program is helping to fund the project and overseeing the consultant contract.

Evaluation of Effectiveness

The process for working with the Co-permittees to prepare for C.3. has worked well. As mentioned above, the C3PO AHTG and its work groups have provided valuable assistance to Program staff in development of the C.3. implementation tools. In addition, the C3PO AHTG has also been a useful forum for discussion of development review processes used by the various Co-permittees and sharing of ideas for implementing C.3. requirements.

During FY 04-05, a significant amount of Program and Co-permittee staff time was expended working with Water Board staff on two Tentative Orders (one of which was adopted) and responding to Water Board staff comments. While the ultimate result was positive, this shifting of resources prevented the Program from making more progress on C.3. and HMP implementation tasks.

The evaluation summary from the BMP O&M Inspection workshop is provided in Appendix A-5. Based on the evaluations, the workshop was successful overall and the expectations of most attendees were met. Comments on the evaluation forms will be used in planning subsequent workshops. The Management Committee has requested a follow-up workshop targeted to maintenance staff with more detail on the actual inspection process.

Program staff will continue to work with the Co-permittees and Water Board staff to evaluate the C.3. planning and implementation process and products during future C3PO AHTG meetings and C.3. workshops.

Table 8-1
Status of FY 04-05 C.3. Implementation Tasks

Task	Updated Schedule	Status
C.3.c. Requirements for Group 1 and Group 2 Projects		
c.8. Conduct analysis of alternative minimum project size and prepare proposal for submittal to Water Board.	Completed 3/05	**Completed** – On September 22, 2003, the Program submitted a letter to the Water Board on September 22, 2003 proposing an alternative Group 1 and Group 2 project definition consistent with the other stormwater programs' permits. This request was accepted by the Water Board in a letter dated January 29, 2004. Program staff have collected impervious surface data for development projects from Co-permittees (during the period April 2002 to August 2003) and conducted an analysis of data trends. Program staff provided the data (and analysis) to the Water Board in a memorandum entitled *Data Analysis of Development Patterns for Group 2 Projects* (dated March 30, 2005). The memorandum was provided to the Water Board following the submittal of a letter with a second alternative Group 2 definition proposal (dated March 18, 2005). On April 18, 2005, Water Board staff requested additional data. Co-permittees responded by providing additional data (from their FY 03-04 Annual Reports) on impervious surface areas of development projects. Water Board staff then drafted a Tentative Order with the Program's proposed alternative Group 2 definition. On July 20, 2005, the Water Board adopted the Tentative Order amending Provision C.3.
c.9. Update guidance manual and performance standards for Group 2 projects as needed.	12/05	**In Progress** – The *C.3. Stormwater Handbook* and Planning Procedures Performance Standard currently cover Group 1 and 2 projects. The documents will be updated to include the most recent alternative Group 2 definition and the key provisions of the Hydromodification Management Plan (HMP), per the adopted Tentative Order (Order R2-2005-0035). This was not done in FY 04-05 since negotiations with Water Board staff were ongoing. *Guidance on Group 2 implementation will assist Co-permittee compliance with regulatory requirements in C.3.c. and C.3.d.*

Table 8-1, continued
Status of FY 04-05 C.3. Implementation Tasks

Task	Updated Schedule	Status
C.3.e. Operation and Maintenance of Treatment BMPs		
e.6. Report on the Co-permittee's treatment BMPs O&M verification program in each annual report, including organizational structure, evaluation of effectiveness, and planned improvement to the program. Include a list or summary of treatment BMPs inspected during the year, inspection results, and any required follow-up and correction.	Annually, beginning with FY 03-04 Annual Report	**Completed/Ongoing** – Co-permittees began reporting on their progress with this task in the *FY 03-04 Annual Report*. Since the C.3. implementation start date was October 15, 2003, Co-permittees have few, if any, BMP verification inspections to report because Group 1 projects proposed in FY 03-04 are either not yet constructed or only recently constructed. Program staff has provided guidance for compilation of data and will continue to assist Co-permittees with this task. *Guidance on O&M annual reporting assisted Co-permittee compliance with regulatory requirements in C.3.e. and C.3.n.*
C.3.f. Hydromodification Management Plan		
f.1. Complete the final HMP and submit to the Water Board.	Completed 4/05	**Completed** – The Program completed the Public Review Draft of the HMP Report in June 2004, and conducted a public review process during July and August 2004. After incorporation of public comments, the Program produced a Revised Public Review Draft of the HMP Report in November 2004. Both drafts were submitted to the Water Board and posted on the Program's website. Following further discussions with and response to comments from Water Board staff, the Program completed the Final HMP Report in April 2005 and submitted it to the Water Board on May 4, 2005. On July 20, 2005, the Water Board adopted a Tentative Order approving key provisions of the HMP Report (Order R2-2005-0035).

Table 8-1, continued
Status of FY 04-05 C.3. Implementation Tasks

Task	Updated Schedule	Status
f.2. Develop guidance to the Co-permittees on implementation of the HMP as part of requirements for Group 1 projects that may cause increased erosion or other related impacts.	Report completed 4/05; additional guidance 12/05	**Completed/Ongoing** – Guidance on HMP implementation is provided within Chapter 7 of the HMP Report. Additional guidance, including fact sheets for training Co-permittee staff and outreach to the development community, will be developed in FY 05-06. The *C.3. Stormwater Handbook* will be updated to include the HMP requirements and implementation guidance (see Task c.9.). *Guidance on HMP implementation will assist Co-permittee compliance with regulatory requirements in C.3.f.*
f.3. Upon adoption by the Water Board, begin implementation of HMP requirements for Group 1 projects that may cause increased erosion or other related impacts. Before adoption, encourage early implementation of likely elements of the HMP where possible.	10/05	**In Progress** –Order R2-2005-0035 (adopted July 20, 2005) requires implementation of HMP requirements by October 20, 2005. In order to implement the HMP, Co-permittees are currently amending their ordinances and policies. San Jose has begun early implementation by requiring flow controls in the conceptual planning phases of large development projects. Program staff will assist with guidance on implementation (see Task f.2.).
f.4. Provide assistance and input as needed to District study to evaluate potential regional treatment and/or flow control projects.	As needed	**Completed/Ongoing –** Program staff is continuing to review District products and participate in discussions with District and San Jose staffs and developers regarding requirements for the Evergreen Specific Plan Area, Coyote Valley Specific Plan and other major development projects (see description in Sec. 8).
C.3.g. Waiver and Compensatory Mitigation Program		
g.3 Assist Co-permittees to track and report information on waivers granted, including project name, location, type, percent impervious surface, reasons for and terms of waiver, and the alternative benefit project and completion date.	Each Annual Report	**Completed/Ongoing** – Program staff developed a reporting form for projects granted a waiver and alternative compliance, which is included in Attachment 6 to the Planning Procedures Performance Standards and Attachment VII-3, Part 3 of the *C.3. Stormwater Handbook*. *Guidance on waiver reporting assisted Co-permittee compliance with regulatory requirements in C.3.g.*
C.3.j. Site Design Measures Guidance and Standards Development		

Table 8-1, continued
Status of FY 04-05 C.3. Implementation Tasks

Task	Updated Schedule	Status
j.2. Assist Co-permittees to prepare and submit reports summarizing the status of review, revision, and implementation of local site design guidance and standards, as part of their annual reports.	Guidance completed 7/03; Site Design Analyses submitted 9/03; Progress report on revised standards due 9/04 in AR; continue in each AR.	**Completed** – Program staff worked with the Site Design Work Group and the C3PO AHTG to define an approach to this task and to prepare guidance, using the Development Policies Comparison Project worksheets as a starting point for Co-permittees to conduct the analysis of design standards. Co-permittee worksheets were combined into one Program submittal and delivered to the Water Board on September 15, 2003. During spring 2004, Program prepared guidance on follow-up reporting for the *FY 03-04 Annual Report*. *Guidance on site design standards review assisted Co-permittee compliance with regulatory requirements in C.3.j.*
C.3.n. Reporting Requirements		
n.1. Provide information described in Table 1 of Provision C.3. in annual reports (Program to provide guidance for each annual report).	Initial Guidance: 6/04 Begin with FY 01-02 AR; continue annually	**Completed/Ongoing** – Each June, Co-permittees are provides guidance (within the Program's Annual Report preparation guidance memorandum) on C.3. reporting. Reporting requirements are cross-referenced within Table 1 of Provision C.3. and any comments/direction provided by Water Board staff. *Guidance on annual reporting assisted Co-permittee compliance with regulatory requirements in C.3.n.*
n.2. Assist Co-permittees to collect information and summarize types of pesticide reduction measures required for development projects, and the percentage of projects for which pesticide reduction measures were required.	Guidance: 6/04 Begin with FY 01-02 AR; continue annually	**Completed/Ongoing** – Program staff provided guidance for reporting within the memorandum entitled *FY 03-04 Annual Report Preparation Guidance*-dated June 11, 2004. (See Task n.1). This is reinforced in subsequent annual report guidance memoranda provided each June. Data can be recorded on C.3. Summary Data Forms and reported using Group 1 and 2 reporting forms (PPPS and Attachment VII-3 of *C.3. Stormwater Handbook*.) *Guidance assisted Co-permittee compliance with regulatory requirements in C.3.n. and C.9.d.ii.*

TABLE 8-2

SCVURPPP HMP - Summary of Next Steps[1]

(From Chapter 7 of April 2005 HMP Report – *tasks in italics added*)

Task	Time Frame	Anticipated Start Date	Anticipated Completion Date
1. Develop the following:	Medium		
a. A funding mechanism such that projects can utilize in-stream control options		12/04	6/06
b. A methodology for determining developer contributions based on the stream changes expected to result from changes in project runoff conditions.		11/04	6/06
2. Work with City/County planning and public works departments and the Water District to determine the timing and method of notifying District staff during the development review process about HMP projects that may need in-stream controls, in a manner that does not unreasonably prolong the review process. Further, look at ways to improve method to provide early communication on group 1 projects reporting.	Short	11/04	10/05
3. Facilitate review of District's MDL analysis, both by the Co-permittees and the Expert Panel, and work with the Management Committee to determine the need to integrate some or all of the MDL analyses into implementation of the HMP.	Short	5/05	12/05
4. Conduct additional studies of implementation of site design, integrated management practices, and/or basins at example development sites in Santa Clara Valley.	Long	7/05	6/06
5. *BAHM Development Project* *Regional*	*Short*	6/05	6/06
(Conducted over 2 FYs) *Local Calibration*	*Long*		05-06& 06-07

[1] All dates depend on availability of resources and cooperation/collaboration of numerous staff from different agencies and may change because of circumstances beyond the control of the Program. The Program periodically updates the Management Committee regarding schedule changes and will transmit updates schedules to Water Board staff.

TABLE 8-2

SCVURPPP HMP - Summary of Next Steps
(From Chapter 7 of April 2005 HMP Report – *tasks in italics added*)

Task	Time Frame	Anticipated Start Date	Anticipated Completion Date
6. During implementation of the HMP, obtain feedback/suggestions for further refinement and implementation guidance	Medium	As needed, begin 1/05	As needed/Ongoing
7. Coordinate with other Bay Area stormwater programs to work toward a consistent approach for the Bay Area.	Medium	Ongoing	Ongoing
8. Coordinate additional Co-permittee, Bay Area stormwater program, and Water Board staff review process and progress meetings, including: a. The development of a schedule for Bay Area-wide HMP implementation pursuant to requirements to be adopted by the Water Board in the upcoming regional municipal urban runoff permit. *b. Public outreach – HMP updates, workshop* *c. HMP Work Group Meetings*	 Medium *Short* *Short*	 1/05 12/04 9/05	 12/05 12/05 Ongoing
9. Collect data on the implementation of the HMP at small sites for a period of two years after the start of implementation, and plan to re-evaluate the small site size threshold and approach at that time. *Conduct and document reevaluation.*	Long	6/05	10/07 10/07
10. Make additional refinements per: 1) lessons learned from implementation efforts based on the draft HMP; 2) the need for consistency with HMPs being developed by other Bay Area stormwater programs; and 3) development community, Co-permittee, and Water Board feedback.	Long	10/05	Report in ARs beginning with FY 05-06 AR

SECTION 9

CO-PERMITTEE IND AND IC/ID SUMMARY TABLES

9. CO-PERMITTEE IND AND IC/ID SUMMARY TABLES

INTRODUCTION

On September 7, 2001, the Industrial Inspection Ad Hoc Task Group (Industrial Inspection AHTG) recommended the adoption of Program-wide categories and enforcement actions developed by the Industrial Inspection AHTG. These categories and procedures are described in the *Continuous Improvement of Industrial Reporting Technical Memorandum* and *Continuous Improvement of Illicit Connection/Illegal Dumping Reporting Technical Memorandum.* The Management Committee approved both memoranda as the Program's strategy to implement IND and IC/ID reporting requirements (as required in Permit Provisions C.6.a.i. and ii). The memoranda were included as attachments within the Program's *FY 00-01 Annual Report* and submitted to the Water Board on September 17, 2001. Each Co-permittee began implementing these procedures immediately thereafter. Implementation of the enhanced reporting requirements by the Co-permittees has been very successful as shown in the past four Program annual reports.

In accordance with the Program's *FY 04-05 Work Plan* submitted to the Water Board on March 1, 2004, the Program committed to updating the Industrial/Commercial Discharger Control Program and Illicit Connection/Illegal Dumping Elimination Activities performance standards during FY 04-05. The updates were essentially administrative (e.g., incorporating enhanced reporting requirements and results of Co-permittee evaluations) and were directed at modifying the Program's model performance standards to reflect Management Committee direction and actual Co-permittee implementation. These administrative updates were provided to the Industrial Inspection AHTG for review during January 2005. The Management Committee approved final updated performance standards on February 17, 2005. Final updates were provided within Attachments 2-1 and 2-2 of the Program's *FY 05-06 Work Plan* (dated March 1, 2005) and hereby incorporated into the URMP.

IND and IC/ID summary tables, provided within Appendix H-1, were constructed by Program staff using data submitted from individual Co-permittees. The categories presented within the summary tables are consistent with the strategy provided in both performance dated February 17, 2005. In addition, summary tables represent incidents and/or inspections that occurred between July 1, 2004 and June 30, 2005. Pie charts and a bar graph showing pertinent information found within the IND and IC/ID summary tables are also included within this section. During FY 04-05, the Co-permittees conducted and/or responded to 7125 IND inspections and IC/ID incidents. A summary of IND inspections and IC/ID incidents reported for individual Co-permittees is provided as Appendix H-2. The vast majority (95 percent) of IND inspections conducted during FY 04-05 resulted in no action or level 1 enforcement (verbal or written warnings). Appendix H-1 provides detailed inspection data relating to facility categories and enforcement actions. In addition, the two most common IC/ID incidents during FY 04-05 were miscellaneous incidents and vehicle & equipment leaking. Approximately 53 percent of the IC/ID incidents received verbal or written warnings. Other relevant IC/ID information relating to incident type, incident report source, incident source and enforcement action is also provided within Appendix H-1.

In accordance with the Water Board's letter, *Review of Program's Draft FY 2003-04 Work Plan* dated June 24, 2003, the Program informed the Co-permittees (see FY 02-03 Annual Report Preparation Guidance dated June 18, 2003) that each Co-permitee should independently

evaluate their individual IND and IC/ID inspection data and utilize the results of the analysis to set inspection priorities and gauge program effectiveness. Within the FY 02-03 Annual Report, Co-permittees provided an effectiveness evaluation or analysis of their IND and ICID programs and/or data. This step was performed to address the Water Board's concerns regarding IND reporting procedures.

Mr. Bruce Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: West Valley Community Specific Urban Runoff Management Program
FY 2004-2005 Annual Report

Dear Mr. Wolfe:

This report is submitted by the West Valley Cities of Campbell, Monte Sereno, Saratoga, and the Town of Los Gatos, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2004-2005 in accordance with the West Valley Communities' Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 2004 and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 04-05 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

Table of Contents
Cover Letter
Certification Statements
List of Acronyms

Program Elements:

1. IC/ID Elimination Activities
2. Industrial / Commercial Discharger Control Program
3. Public Agency Activities
    - Storm Drain O & M
    - Corporation Yards & Street Sweeping

- Rural Public Works

4. New Development: Planning Procedures
5. Construction Inspection
6. Public Information & Participation
7. Pesticide Management Activities
8. Mercury Pollution Prevention Activities
9. Copper Action Plan / Nickel Action Plan
10. Trash Inventory & Management
11. Water Quality Monitoring & Permit Re-application

No comments regarding the West Valley Communities FY03-04 Annual Report require a response, as listed in the San Francisco Bay Regional Water Quality Control Board letter to Mr. Dave Chesterman dated April 8, 2005.

Program Highlights and Accomplishments

During FY04-05, the West Valley Communities of Campbell, Los Gatos, Monte Sereno, and Saratoga continued efforts to implement their URMPs to the maximum extent practicable. The activities that were implemented for each element of each Community's URMP are described in Chapter 14 of the Santa Clara Valley Urban Runoff Pollution Prevention Program's URMP. Highlights of the West Valley Communities accomplishments in various program elements are described below.

Industrial/Commercial Discharger Control Program. During FY04-05, the three West Valley Communities of Campbell, Los Gatos, and Saratoga continued to implement their Industrial/Commercial Inspection Program. The goal is that all identified facilities will be inspected each year. The City of Monte Sereno has no industrial or commercial facilities operating within the City and therefore does not participate in this activity. In Campbell, 285 of 311 facilities were inspected (92%), 104 of 113 facilities were inspected (92%) in Los Gatos, and 8 out of 8 facilities in Saratoga were inspected (100%). Inspection reports by facility type and noted violations are included in the IND section of the Program Annual Report. Discharge violations decreased slightly over the past year from 25 to 20 facilities. Of the 20 violations, 13 were auto repair facilities. The West Valley Clean Water Program began a pilot program to target auto repair facilities during FY 01-02 with additional inspections and education. The pilot inspection program was instrumental in getting two automotive facilities to install car wash waste water capture systems. Each facility is given an initial on-site inspection with multiple drive-by inspections. All facilities inspected were in compliance by the end of the fiscal year. This is once more a testament to the benefits of increased scrutiny and education. Due to the success of this targeted outreach to and inspection of auto repair facilities, the pilot was adopted permanently as the West Valley Auto Shop Inspection Program. The procedures and accomplishments were shared with co-permittees in a presentation given by the West Valley Inspector at SCVURPPP's Industrial & Commercial Inspector training on April 5, 2005.

Public Information/Participation Program. In FY 04-05, the West Valley Clean Water Program continued to expand its quest for effective public education and outreach. WVCWP pursued media coverage on six topics: safe disposal of mercury-containing products, household hazardous waste, copper pollution prevention, creek clean-up events, trash cleanup and monitoring by students, a student's science project and his campaign to keep residential pollutants (pesticides and copper) out of the storm drain. Six stories were covered by local community newspapers in FY04-05, including a Saratoga News cover story about local students cleaning up and monitoring trash. The WVCWP was advertised on national television on 10-7-04. CNN interviewed David Marash-Whitman, a student who found the West Valley Clean Water Program via its website. David, at age 12, worked with WVCWP to determine the scope of his award-winning science project, "Ecotoxicology of Stormwater Pollution in our Aquatic Communities." David was chosen as one of top 40 Young Scientists and traveled to Washington D.C. to compete in Discovery Channel's "Challenge". David continues volunteer for the West Valley Clean Water Program and will be mentioned again in the annual report for FY05-06. WVCWP has been pleased to receive extensive media coverage in these stories, which would be beyond its budget scope if purchased as advertising space.

In FY 04-05 a new *Mercury* page was uploaded to *Cleancreeks.org*, two creek cleanup events were advertised on the Home page and new links were added to the *Links* page. A few months into FY 03-04, the West Valley Clean Water Program changed its website host in order to optimize tracking ability for the web site, www.cleancreeks.org. In the twenty-one month period ending on June 30th 2005, visitors averaged about 141 views per month totaling 2,962 Web Page views. This was a substantial increase from the website's 30 hits during its first month of operation.

The West Valley Clean Water Program strives to maximize student involvement at every opportunity. Staff developed a script incorporating fresh messages on pesticides, copper, mercury and trash for its new Coastal Enviroscape and revised the script for the Uplands & Wetlands Enviroscape model. Offering a second Enviroscape station allows West Valley Clean Water staff to teach 20 students every 25 minutes, rather than 10 students. The two fifth grade classes who tried this requested the same presentations for next year. The second Enviroscape allowss staff to elaborate on topics that would initiate changes in behavior. Messages apparently stuck with the students: while participating at a soil infiltration station, a student told the science docent not to empty the waste water near the storm drain.

Illicit Connection and Illegal Dumping Elimination Activities. The IC/ID program is working phenomenally well for all four West Valley Communities. The inspector not only responded to 82 discharge incidents over the year (see the IC/ID section for the number and types of incidences), but conducted 105 proactive and follow-up inspections. Each of these inspection opportunities adds to the business community's knowledge of storm water pollution and prevention issues. As part of the inspection process, the inspector distributes appropriate educational materials. Significantly, the West Valley Clean Water Program's Stormwater Inspector provided 790 brochures and other educational materials to industrial and commercial facilities in FY04-05.

C.3 Implementation. In July and August, 2004 the West Valley Clean Water Program updated all sections of each municipal URMP. A consultant met with staff in each city to review any remaining challenges with C.3 implementation. This year the cities each made progress in preparing for upcoming requirements such as HMP and Group 2 deadlines. In fact, the cities were each prepared to implement requirements on all tiers of Group 2 projects by April 15, 2005.

Pesticide Activities. The most realistic way to implement pesticide management is to provide meaningful training to municipal staff and the public. The WVCWP, in FY03-04 and FY 04-05 utilized significant staff time and resources to offer in-depth, hands-on workshops on specific pests and beneficial predators. WVCWP staff researched speakers, selecting presenters who could offer the optimum learning experience. In FY03-04 more than twenty attendees participated and gave positive feedback. In FY 04-05, thirty-seven municipal staff and stakeholders, such as school district personnel, golf course superintendents and pest control contractors attended; 15 earned Continuing Education Credits at the workshop.

Each of the four municipalities adopted two new Integrated Pest Management plans, one on armored scales and one on soft scales. Additionally, the West Valley Clean Water Program and the Program collaborated on events with a former partner, *Summer Winds Garden Center* in Campbell and began to promote a partnership with *Orchard Supply Hardware,* bordering Saratoga and Campbell. Customers were enthusiastic about IPM samples and materials handed out by WVCWP staff at the OSH "Tax-Free Day" events. The store responded positively to these efforts, which complement their goal of personalized customer service.

Continuous Improvement Activities

Public Information/Participation. The West Valley Clean Water Program received feedback from schools indicating that teachers are inundated with paper promotional products. At the end of FY 04-05 the WVCWP produced a CD/DVD music video/slide show of volunteers, especially featuring students, at local creek cleanup and trash monitoring events. The CD was dubbed with music, including the words: "With my own two hands I can change the world." While WVCWP has not obtained permission to use the music or all of the photos at this point, the CD has already entertained a few students and teachers. Schools will continue to be a primary focus of the West Valley Clean Water Program's outreach efforts over the coming year. In FY 05-06 The West Valley Clean Water Program will enhance its relationship with school teachers, principals and students to involve more participation in trash monitoring and school cleanup events.

Staff Training. The West Valley Communities place a strong emphasis on training. The Annual Reports reflect this with numerous references to the Staff Training Summaries; these Summaries are located at the end of each Element section in the Annual Reports. In FY 05-06 training will be expanded by use of a video camera to tape various trainings, so that additional staff can later receive the same information.

In July and August, 2004 the West Valley Clean Water Program updated all sections of each municipal URMP. In the Streets Maintenance and Storm Drain Maintenance sections, at least two continuing improvement items were identified: efficient training on community-specific storm water BMPs was needed for <u>all</u> maintenance staff. WVCWP held two round-table trainings in January 2005 and in June 2005, where a consultant provided presentations on streets, parks, and rural public works BMPs that were applicable to the West Valley Communities.

By Agreement, storm drain maintenance for the West Valley Communities has been handled by the West Valley Sanitation District since the late 1990s. In the course of updating the URMPs some potential gaps were identified due to an assumed understanding of the Agreement. All staff agreed that they wanted an opportunity to clarify the roles of each signatory to the Agreement. In June 2005, the West Valley Clean Water Program offered a forum for this discussion as part of the annual Storm Drain Supervisor's meeting. A consultant gave a slide show on BMPs for storm drain maintenance and for rural public works, and facilitated a discussion of the Agreement that left everyone on the same page as far as understanding the terms. The West Valley Clean Water Program will continue to prioritize better communication between WVCWP staff and municipal staff and to host effective workshops that are convenient for staff to attend.

Thank you for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact me at 408.354.4734.

Very truly yours,

Cheryl C. Donnelly

ILLICIT CONNECTION & ILLEGAL DUMPING ELIMINATION ACTIVITIES

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	Work Plan Activity	Work Plan Tasks	Accomplishments	Responsible Party
Update Perf. Standard	ICID Performance Standards	Work with Program staff to update Performance Standards, via Ad hoc task group & Management Committee participation. As available, review and provide comments on the applicability of the updated performance standards.	Campbell and WVCWP staff updated the IC/ID PS in the City's URMP (Sept 2004). The City's Sr. Civil Engineer attended a training discussion, led by the WVCWP Manager, to review the completed revisions to the IC/ID PS on 2-8-05.	SCVURPPP, WVCWP Inspector & WVCWP Manager Municipality to assist
URMP	Response Program	Continue implementation of response program	During FY04-05, the WVCWP inspector responded to 16 reports of potential or actual stormwater violations in the City of Campbell. He also revisited 2 former problem sites and found them to be in compliance. Potential incidents are reported to WVCWP by SCC Fire Dept, the SCV Water District, and SCC DEHS, citizens, and WVCWP or municipal staff.	WV Inspector
Work Plan	Enhanced Reporting	Report on incidents using expanded categories consistent with SCVURPPP Program. Document follow-through to point of resolution or referral for enforcement action (penalty or fine).	FY04-05 is the first year that the WVCWP Inspector has kept 2 databases for inspections. When the WVCWP Inspector first started in FY01-02, he responded to incident reports. Over the next two years he piloted and then implemented two proactive inspection programs, the Restaurant Inspection Program and the Vehicle Shop Inspection Program. With the broadened number and type of inspections, the SCVURPPP Program found it necessary to separate the WVCWP's data in the existing IC/ID database (FY03-04) into two databases (FY04-05). 1. The IC/ID database contains reported incidents or incidents noted by the Inspector during his daily drive-bys. 2. The IND database consists of incidents that are	WV Inspector

			discovered as a result of the Inspector's pro-active inspections related to his Restaurant Program or his Vehicle Body Shop Program.	
CI Item	Restaurant Inspection Program	Continue implementation of inspection program, targeting medium to large-scale restaurants as per FY 03 - 04 Annual Report. *Medium to large-scale* is defined as, restaurants with 6 or more employees and/or restaurants that routinely handle large quantities of grease	In order to keep reporting data consistent with the other Co-permittees Program-wide, procedural revisions were made to data reporting for WVCWP's Restaurant Inspection Program. Pro-active restaurant inspections are now considered an IND task and are reported in the IND / Commercial Inspection section of Campbell's report.	WV Inspector
CI Item	Auto Shop Inspection Program	The West Valley Clean Water Program will continue expansion of the auto body pilot targeting auto repair facilities in the West Valley area and providing additional inspection and education on storm water issues.	In order to keep reporting data consistent with the other Co-permittees Program-wide, procedural revisions were made to data reporting for WVCWP's Vehicle Shop Inspection Program. Pro-active vehicle shop inspections are now considered an IND task and are reported in the IND / Commercial Inspection section of Campbell's report.	WV Inspector
URMP	Education	Distribute BMP materials during routine inspections. Distribute follow up education information for businesses cited for potential stormwater violations.	During FY 04-05, the WVCWP Inspector distributed three hundred forty-eight (348) IC/ID and IND brochures and fact sheets in Campbell, as part of his outreach and education program. The Fire Dept hands out a stormwater compliance packet to new commercial /industrial business owners or management.	SCC Fire and WVCWP Inspector
Work Plan comments RWQCB	Staff Training	WVCWP Inspector to conduct round table training & evaluation meetings with City staff.	The Inspector has started conducting informal round table meetings with municipal public works and building inspectors. In Los Gatos we have seen a big improvement in coordination between staff resulting in timely inspections and reporting. Campbell's Sr. Civil Engineer participated in WV training meetings on 2-8-05 and 4-26-05 where the Inspector discussed a positive break-through (car wash kit being used by citizens) and a review of the IC/ID inspection program.	Sr Civil Engineer, Pub Works Supt; WV Inspector to co-ord

Campbell

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Campbell Illegal Connection/ Illegal Dumping Incidents

Type of Incident 04-05	Incident Source	General Location	Report Source	Follow-up Action
• 4 Accidental Spill • 1 Dumping Non-Hazardous • 1 Dumping Hazardous • 2 Grey Water Discharge • 1 Pool /Spa/Fountain • 2 Vehicle and Equipment Leak • 1 Construction • 1 Sanitary Spill • 3 Complaint Not Found • 2 Non Incidents **Total 18**	• 1 Public Facility and Utilities • 10 Commercial • 2 Residential • 1 Construction Site	• 14 Commercial • 2 Residential • 1 Public Facilities • 1 Construction (sewer pipe)	• 2 Other Agency • 8 Interdepartmental • 1 Inspector • 4 Citizen Complaint • Other	• 6 Verbal Notice • 2 Written Notice • 3 Educational • 7 No Action o 2 re-inspections (ok now) o 3 accidents (immediate cleanup), o 1 complaint not found o 1 Fire Dept responded w/ absorbent Incident Status • 18 Resolved

IC/ID Program Evaluation

Implementation of IC/ID Performance Standards

WVCWP further implemented enhanced reporting standards by splitting the IC/ID database into two separate databases. The IC/ID database contains reported incidents or incidents noted by the Inspector during his daily drive-bys. The IND database consists of incidents that are discovered as a result of the Inspector's pro-active inspections related to his Restaurant Program or his Vehicle Body Shop Program.

IC/ID Evaluation Of Trends

The recent separation of IC/ID and IND data makes it difficult to comment on trends over the past 2 years.

Out of eighteen (18) reported incidents in Campbell during FY04-05, the most common incident type was *miscellaneous* (5), including grey water near construction of a sewer pipe; a sewer backup caused by a grease blockage; leaking brake fluid from a car (residential); a car oil leak in a parking lot (commercial); and a *complaint not found* concerning grey water (soapy) from a dumpster area.

In FY03-04 there were 3 *miscellaneous* incidents.

The second most common incident type during FY04-05 was *accidental spills*. Out of four, two of these were separate incidents involving oil drums falling off of trucks; one drum of solvent was knocked over; and one vehicle hit a tree resulting in a gas spill.

FY 03-04 data showed (3) *accidental spills*, an increase of one for that incident type.

Finally, there were two (2) *dumping* incidents, two (2) *grey water discharges*, one (1) *pool & spa discharge*, and four (4) *non-incidents*.

In FY03-04, the most common incident type was *automotive* (21 incidents). FY04-05 *automotive* incidents are reported in the IND section. While *automotive* accounted for 24 inspections in FY04-05, 13 actual *automotive* violations were discovered. The data is showing a 50% improvement in that area.

Note: The WVCWP Inspector's notes show that for several incidents *No Action* was listed as the enforcement action. There are three possible definitions for *No Action* in his records. 1) The Fired Dept reported the incident and took action, such as putting down absorbent; 2) the incident was corrected immediately and the Inspector provided some education or educational materials; or 3) *No Action* was taken because it was a *non-incident* or an *accident* where the person causing the problem was already informed. This also may account for *no action required* on many incident referrals. The Fire Dept inspector gives a copy of the potential violation notice to the facility owner. When the WVCWP inspector arrives to conduct the follow up inspection, the owner has had time to complete additional cleanup or repairs.

Procedural Changes for Reporting

One half-time IC/ID Inspector serves the four West Valley communities. The inspector follows up on all reports of potential incidents, including ones observed during his routine drive-bys. His pro-active investigations of restaurants & vehicle shops may lead to further need for education or enforcement. SOPs are discussed and adjusted each year, usually right after compiling the Annual Report. During data evaluation it becomes obvious which changes are necessary.

It is important to have standardized categories, but it has resulted in some awkward reporting modifications (splitting the IC/ID incident data base) for WVCWP staff. Previously all WVCWP inspections were included in one table, making it easier to identify trends. In the West Valley some of the IND program is part of the IC/ID program. Some of the pro-active IND inspections lead to a discovery of a violation. Then the incident is processed in exactly the same way as an IC/ID incident. This creates likelihood for mislabeled data or duplicate reporting. WVCWP staff is working on clearer internal procedures for categorization.

WVCWP Pro-Active Vehicle Shop and Restaurant Inspections are reported in the IND section of this report.

INDUSTRIAL/COMMERCIAL DISCHARGER CONTROL PROGRAMS

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	Work Plan Activity	Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Revise Perf. Standards	Commercial/ Industrial Performance Standards	Work with Program staff to revise/ implement the Performance Standards, via Ad hoc task group & Management Committee participation. As available, review and provide comments on the applicability of the new performance standards.	Campbell has implemented the Program's model Revised IND Performance Standard. Campbell's Sr. Civil Engineer attended a discussion led by the WVCWP Manager on the newly approved IND PS at the WVCWP meeting on March 8, 2005.	SCVURPPP; WVCWP Manager and Inspector; and Inspectors from SCC Fire Dept
URMP	DEH Inspections of Retail Food Facilities	Continue joint inspection program w/ DEH. Approximate number of *food handling* facilities in Campbell is 245. All facilities will be inspected at a minimum once per year. WVCWP Discharge Inspector will conduct follow-up and distribute BMP materials as needed per DEH referrals. Continue to evaluate data management and reporting for desirable improvements or updates.	In FY04-05, 261 food-handling facilities were inspected at least once in the City of Campbell by the SCC DEH. DEH provides additional inspections at most food service locations on a pro-active basis. During FY 04-05 the number of DEH food facility inspections and re-inspections totaled 528 in Campbell.	Insp'ns conducted by SCC DEH; Annual Mtg co-ord by WVCWP
Work Plan comments RWQCB	Food Facility Inspection Training & Evaluation	Conduct annual joint meeting/training w/ Cupertino & SCC DEH to evaluate program and confirm distribution of materials. Annual meeting per agreement; typically scheduled for Spring each yr.	The Annual training took place at the WVCWP office on April 27, 2005. The inspection packet letter and BMP checklist were updated at this meeting to give to restaurant owners and managers. See evaluation section.	WVCWP to co-ord. w/ Cupertino, DEH and County of SC
CI Item	WVCWP Restaurant Inspection Program	Continue implementation of inspection program, targeting medium to large-scale restaurants. *Medium to large-scale* is defined as, restaurants with 6 or more employees and/or restaurants that routinely handle large quantities of grease.	This task was originally part of the WVCWP IC/ID Inspector's Restaurant Pilot and was reported in the IC/ID section of Campbell's FY03-04 Annual Report. In FY04-05 the WVCWP Inspector visited 22 restaurants in the City of Campbell. Two (2) food facility inspections were the result of referrals from DEH. The West Valley	WV Inspector

			Inspector's Restaurant Inspection Program accounted for 20 pro-active inspections.	
URMP	Fire Dept Inspections of Designated IND Facilities	By Agreement with Fire Dept, continue joint inspection program. Number of identified commercial Industrial facilities in Campbell is 311. The inspection frequency goal for FY04-05 is 100%. The total number of facilities by business category inspected in FY04-05 will be included in the annual report.	In the City of Campbell, 285 commercial / industrial facilities were inspected by the Fire Dept, meeting 92% of the inspection goal. Of the 285 facilities inspected 9 were closed (no longer in business). The Fire Dept reported sixteen (16) potential or actual violations to the WVCWP for follow up. See IND Inspection report data.	Insp'ns conducted by SCC Fire
Work Plan comments RWQCB	Fire Dept Inspector Training and WVCWP/ Fire Dept Meeting & Evaluation	SCC Fire to conduct annual industrial, commercial inspection training of inspectors. WVCWP to arrange joint meeting/training w/ SCC Fire to evaluate inspection reporting and confirm distribution of materials.	Campbell's Senior Civil Engineer and Senior Construction Inspector attended the SCVURPPP Workshop, "*Conducting Stormwater Inspections of Industrial and Commercial Facilities",* which was held in Cupertino on April 5, 2005. The Fire Dept's Sr Haz Mat Specialist, who administers the inspection Agreement between the Fire Dept and the WV cities and provides training to inspectors, attended this training with two Haz Mat specialists. The Fire Dept's annual staff training was provided to their inspectors during June, 2005. The Inspectors noted that they have plenty of handout materials; most businesses have received all of the educational material during prior inspections. See evaluation below.	Annual Mtg arranged by WVCWP Manager and WVCWP Inspector w/ Sr. Haz Mat Specialist
CI Item	WVCWP Vehicle Shop Inspection Program	The West Valley Clean Water Program will continue expansion of the Vehicle Shop Inspection Program, targeting auto repair facilities in the West Valley area and providing additional inspection and education on storm water issues.	The Inspector conducted 38 inspections of various vehicle shops in the City of Campbell. Eleven (11) automotive inspections were the result of referrals from the Fire Dept. The West Valley Inspector's Vehicle Shop Inspection Program accounted for 27 pro-active inspections.	WV Inspector
2001 Perform. Review	NOI Filers	Provide updated list of NOI Filers to SCC Fire.	The list of NOIs (5 sites in Campbell) was sent electronically to the Fire Dept on 7-30-2004. However, there have been no new industrial NOIs added to the list since 2001.	WV Inspector

Industrial/Commercial Program Evaluation

Dept of Env Health Consumer Protection Division Inspections

It is important to note that DEH Inspectors look at all facilities that handle food. While gas station snack bars, *See's* candy stores, and video rental stores are not necessarily where we will find most stormwater violations, it does provide a helpful broad-ranged first look at commercial facilities.

Annual Food Facility Inspection Training Meeting

Alternately each year, the objective of this meeting is 1) to train and get feedback from DEH inspectors or 2) for inspection program administrators to review and adjust procedures as necessary. In FY04-05, two of DEH Consumer Protection Division's Supervising Health Specialists, Cupertino's Environmental Programs Manager, the County of SC's NPS Coordinator, the WVCWP Manager, the WVCWP Inspector, and the Director of Operations from the WV Sanitation District (WVSD), participated in a very productive meeting. Peter Sevcik, of the WVSD, initiated a discussion on the District's Fats, Oils, and Grease (FOG) Program. During a round table discussion participants suggested ways to incorporate FOG objectives into existing restaurant inspections. It was generally agreed that inspectors could, at a minimum, ask restaurants for grease trap cleaning records. Based on the records being readily available or not, the inspectors could refer a food facility to the municipal inspector for follow-up. In the West Valley this referral would go to the WVCWP Inspector. The WVCWP Inspector met with Sanitation District staff following the DEH meeting to gain more background information on implementing the FOG Program.

Other topics and action items at this meeting included

- updating the introductory letter and BMP check list for restaurant owners;
- a review of inspection procedures with discussion on glitches in the system and possible resolutions;
- a review of the effectiveness of outreach & educational handouts and the inclusion of pesticide reduction fact sheets specifically for restaurants,
- a discussion on training needs for inspectors in FY05-06,
- updated contact information.

As a result of this meeting, DEH, Consumer Protection Division's Supervising Health Specialist agreed to implement revised annual reporting procedures to ensure accurate tracking and follow-up for potential and actual violations. This implementation will strengthen coordination between DEH and municipal staff.

The Inspection Program for West Valley Communities continues to run more efficiently each year. The key reasons for this are believed to be 1) increased communication with other agency staff and 2) industrial & commercial facility owners who are becoming accustomed to NPDES requirements (BMPs) and the WVCWP Inspector's frequent educational visits.

West Valley Restaurant Inspection Program

The West Valley IC/ID Inspector continues to manage the West Valley Restaurant Inspection Program, by visiting a selected subset of mid-to large-size facilities in each WV community every year. This year twenty-two restaurants were visited in the City of Campbell. These visits provide an opportunity to educate restaurant owners and managers on the City's NPDES requirements and to introduce the West Valley Clean Water Program.

DEH inspectors or supervisors meet annually with the WVCWP Inspector and Manager to review stormwater quality concerns and objectives. DEH Inspectors refer potential violations to the WV Inspector. Once a food facility has been at risk for a violation, the WVCWP Inspector will revisit the facility until all potential and actual problems have been resolved. After resolution, the facility will remain on the Inspector's list to be re-checked a minimum of once annually depending on the nature of the incident.

Food Facility Inspections Uncover Incidents Predominately Related to Grease

During FY04-05 there were five dumpster discharges noted in the IND Incident Table (above). Four of these were actual grease trap dumpster problems. The IND database does not have a field for *incident type*. Violations are tracked by the less-specific category, *facility type*. The food facility incidents that are shaded in the Excel data attached represent both grease and dumpster discharges. The trends in the number of violations are not as easy to show when the *incident type* is not specified. One possible solution for this reporting problem is to move all pro-active inspections, which involve a violation, to the IC/ID database. *Incident type* is a field in the IC/ID database. For FY04-05 trends were evaluated based on incidents reported in both the IND and IC/ID sections. Nevertheless, the food facility violations reported in FY 04-05 (not counting one grease line problem which was a plumbing error and was immediately corrected), totaled five (5), the same number of food facility violations that were reported in the previous year (FY03-04).

Four (4) grease incidents in Campbell have been resolved. To help combat the grease challenge surrounding food facilities, the WVCWP has noted a procedural addition to the checklist for all future pro-active inspections. Restaurants will be required to present grease trap cleaning records to the WVCWP inspector. If a facility does not have available cleaning records, the site will be referred to the West Valley Sanitation District Dir of Operations for follow up inspection(s).

Feedback on Program-Wide Standardized Reporting Categories

One comment from West Valley staff on the standardized reporting categories is that a separate *incident type* category for *secondary containment* would be useful. During pro-active investigations for West Valley Municipalities, secondary containment problems are relatively common.

Industrial/ Commercial Inspector Training Sponsored by SCVURPPP

The first joint WVCWP/Fire Dept meeting for FY 04-05 was held at the Fire Dept on August 6, 2004. As a result of this meeting the Sr Haz Mat Specialist revised the FD's referral form for potential violations to include only the data required by the inspector and the WVCWP (for reporting purposes). This form will be discussed and may be edited again at the annual meeting in FY05-06. The WVCWP Manager and Inspector work closely with the Sr. Haz Mat Specialist each

year to review procedures for West Valley inspections and make adjustments as needed.

The Program's Industrial & Commercial Inspector training took place on April 5, 2005. In order to benefit from the Program's all day workshop, a Haz Mat Specialist, and the WVCWP Inspector and Manager, participated in planning meetings to select topics which addressed specific questions or concerns for the West Valley Program. The WVCWP Inspector gave his presentation on the ***Body Shop/Vehicle Repair Shop Program in West Valley Communities***. The Sr. Haz Mat Specialist coordinates inspector training each year; this year he held sessions starting in June 2005, allowing him to incorporate material from the Program's workshop. The Program's workshop was successful in answering most of the questions which had not been resolved during prior WVCWP meetings with the Sr. Haz Mat Specialist. City of Campbell's new Stormwater Rep and a construction inspector went to the workshop to gain a better understanding of the City's joint inspection program and how it is coordinated between three agencies.

West Valley Vehicle Shop Inspection Program

The West Valley IC/ID Inspector continues to manage the West Valley Vehicle Shop Inspection Program by visiting a selected subset of vehicle facilities in each WV community every year. This program mirrors the restaurant inspection program and results in the same benefits. Thirty-eight (38) automotive shops were inspected in the City of Campbell. In FY04-05 twenty-four (24) incidents were related to automotive. Out of twenty-four (24) incidents, twelve were re-checks on previously resolved violations. Out of fifteen (15) *Vehicle and Equipment Leaking* incidents noted above, only six (6) were actual violations; and out of nine (9) vehicle washing incidents, only six(6) were actual violations. The Inspector issued 10 level one or verbal warnings. In some cases the Fire Dept will issue a warning and then refer the site to the WVCWP Inspector; by the time the WVCWP Inspector arrives the incident has been resolved and no warning is necessary. The remaining automotive incidents involved rechecking sites where there had been previous problems. A total of twelve (12) actual automotive related violations occurred in FY04-05 compared to 28 (16 Vehicle/Equipment, 7 Vehicle Washing, and 5 Vehicle Repair) violations reported in Campbell's FY 03-04 Annual Report (IC/ID incidents). The reduction demonstrates a 50% improvement in automotive compliance. The perception is that shop owners are much more aware of stormwater issues and that there has been an improvement in controls and acceptance of the requirements

Automotive

#	Date	Facility Name	Facility Address	Enforcement Actions	Automotive Facility Inspection Notes	Notes - 2
1	8/11/2004	Elite Auto Body	1386 White Oaks Rd., Campbell	No Action	Proactive visit. New ownership. Was White Oaks Auto Body. Very seldom wash vehicles. If so, done inside, dry up water with heat lamps so nothing gets to SD.	Keep an eye on. Stop by frequently. OK right now.
2	8/24/2004	Elite Auto Body	1386 White Oaks Rd., Campbell	Level 1	Fire caught them washing vehicle outside. They tell me they are going to install a "Vacuum Boom" system. Keep after them.	Follow up. OK right now.
3	9/16/2004	Alfi's Auto Body	861 Camden Av., Campbell	No Action	Proactive inspection. OK. They have a wash rack which drains to sewer.	All AOK.
4	9/16/2004	Mota's Auto	861 Camden Av., Campbell	No Action	Proactive inspection. All OK. Have a wash rack which drains to sewer.	All AOK.
5	9/16/2004	Peninsulaa Automotive	861 Camden Av., Campbell	No Action	Proactive inspection. All OK. Have a wash rack which drains to sewer.	All AOK.
6	9/16/2004	Miller's Automotive	861 Camden Av., Campbell	No Action	Proactive inspection. All AOK. Have a wash rack which drains to sewer.	All AOK.
7	9/23/2004	Prestige Auto Body	3303 S. Winchester Blvd., Campbell	Level 1	Wants to order a Vacuum Boom product. Follow up.	Go back. OK now, keep checking.
8	9/23/2004	Park Vasona Auto	3303 S. Winchester Blvd., Campbell	No Action	All OK. Do not wash vehicles.	All OK.
9	9/23/2004	Scotty's Automotive	3303 S. Winchester Blvd., Campbell	No Action	All OK. Have been a problem in the past.	All OK.
10	9/23/2004	Mussman Automotive	3303 S. Winchester Blvd., Campbell	No Action	All OK. Do not wassh vehicles.	All OK.
11	9/27/2004	White Oaks Auto Body	1436 White Oaks Rd., Campbell	Level 1	Still washing vehicles. Try to contain it. Some runoff may get to SD.	Keep after. Maybe a Vacuum Boom. OK now.
12	9/27/2004	Silicon Valley Auto Group	1436 White Oaks Rd., Campbell	No Action	AOK. Use Vacuum Boom. Only wash one or two cars per week. No problem.	AOK.
13	11/1/2004	Jiffy Lube	535 Hamilton Av., Campbell	No Action	Proactive visit. Problems in past. OK now. Looks good. Clean. All work now done in service bays.	All OK now.
14	11/2/2004	C.T. Automotive	335 McGlincey Ln., Campbell	No Action	Proactive visit. All OK now. Clean. Problems in past.	All OK now.
15	11/23/2004	Classic Car Wash	981 E. Hamilton Av., Campbell	Level 1	Cameron Coleson. Video. Pressure washing driveway to Bascom. Told them no more power washing. Issued NTC# 1040.	OK for now. No more power washing. Vacuum boom on order. Follow up.
16	12/6/2004	Gemini Automotive/Goodyear	1790 S. Bascom Av., Campbell	Level 1	Fire inspection said exterior shed leakage. OK now but too much absorbent had been used. Ran to SD. Issued NTC#1041.Cleaned up right away.	All OK now.
17	1/3/2005	West Valley Transmissions	1460 White Oaks Rd., Campbell	Level 1	Fire reports inside processing and outside car storage over SD run off. OK now. No problem. Do not wash cars. Keep an eye on parked vehicles. No dripping fluids.	Looks OK.
18	1/3/2005	Concours Autobody	1460 White Oaks Rd., Campbell	Level 1	Fire reports washing cars outside on 12-10-04. Looks OK today. He said he will look into getting a "Vacuum Boom".	See findings. Keep after him. OK now.
19	1/3/2005	White Oaks Body	1436 White Oaks Rd., Campbell	Level 1	Problems in past. Looks OK today. Sometimes wash a car inside. May expand. If they do, he will install a drain to sewer.	OK today. Keep after.
20	2/4/2005	Earl's Transmission	921 Camden Av., Campbell	Level 1	Fire inspection showed an engine stored outside leaking fluids. All OK now. Engine gone. All cleaned up. He learned from this experience.	All Ok now.
21	3/18/2005	FM Autobody	60 E. Sunnyoaks Av., #12, Campbell	Level 1	DEH reported chalky liquid going toward SD. Did not reach SD. Drys up. I told him to build a better berm. Better yet get a "vacuum boom". He is interested.	Very seldom washes a vehicle. When he does he lets it dry and sweeps up residue.
22	5/9/2005	South Bay Auto	2970 Winchester Blvd., Campbell	Level 1	Fire reported used auto parts stored outside in front and on side of building. All parts are metal. No fluids, but he will get rid of these. Old batteries need secondary containment. We took care of this while I was there.	All OK now.

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

PUBLIC AGENCY ACTIVITIES: OPERATION AND MAINTENANCE
Storm Drain Operations and Maintenance

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	Work Plan Activity	Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
URMP	Annual Storm Drain Cleaning	Continue contract w/ WVSD. Continue schedule/cycle for cleaning and maintenance of storm drain system	WVSD performs systematic storm drain cleaning and inspection annually. Each year half the City's storm drains in residential areas are cleaned and inspected. Storm drain cleaning and inspection of the arterials and commercial/ industrial areas is done annually. Engineered treatment BMPs on City parking lots are cleaned twice at least twice a year. Fifteen storm drain filters were cleaned in the Community Center parking lot (3/16/05) WVSD has begun implementation of a GIS map with numbered stormdrains to facilitate monitoring. City staff performs additional pro-active cleaning of storm drain inlets and grates before storm season in high leaf drop areas. See evaluation section below	Sr Civil Engineer co-ord contract; Pub Works Supt co-ord in-field operations
CI Item	Thermoplastic Storm Drain Stenciling	Continue to evaluate thermo-plastic storm drain stencils on curbless storm drains. Observe deterioration, durability, practicality, & cost effectiveness.	Campbell ordered 18 more thermoplastic storm drain stencils for their downtown area. See evaluation section for details.	Public Works Supt
URMP	Annual Storm Drain O&M Training	Annual WVSD / Operations & Maint. Supervisors meeting - evaluate status of annual storm drain cleaning and provide training on maintenance issues.	The WV Storm Drain Op & Maint. Supervisor's workshop was held June 2, 2005. Eight Campbell staff attended, including the Public Works Superintendent, Acting Street Maint Spvsr, Asst. Streets Maint Spvsr, and five (5) Street Maint Workers. Staff from WVSD, WVCWP, and the other WV Communities also participated and joined in a round table discussion. Topics included: • Clarification/ review of roles and tasks of City and WV	Pub Works Supt/ Spvrs to attend; Hosted by WVCWP

CAMPBELL

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Source	Work Plan Activity	Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
			Sanitation District staff to prevent gaps • Review of Emergency Response Procedures for SD overflow • Power Point Presentation on BMPs for Streets, Rural Public Works and Storm Drain Maintenance • Working together to proactively prevent storm drain problems due to Fats, Oils and Grease (FOG) See details in *Evaluation* at end of this section, and Staff Training table Attachment.	

Storm Drain Operations and Maintenance Evaluation

Storm Drain Stencils: the City of Campbell has decided to use the thermoplastic storm drain stencils in selected areas. The City ordered 18 more to apply in the commercial downtown area. The fact that they are reflective, which provides visibility at night, and withstand heavy traffic was reason enough to spend more for stenciling in appropriate areas. Unlike the metal plates previously installed by the City, they adhere well to coarse and uneven surfaces, have not peeled, and do not have sharp edges that bend, creating a potential to injure pedestrians or bicyclists.

SDOM Training: WV Storm Drain Op & Maint Supervisor's workshop was held June 2, 2005. The cities participated in a round table discussion and compared maintenance practices. WV Sanitation staff distributed a summary of maintenance activities completed for each city, showcasing the District's new automated system for tracking inspections. WVSD can print out a history of the debris they've found in a storm drain line. This will be useful if history shows that the same lines have debris during each cycle. The cities/town may want to increase maintenance for those spots/lines to an annual rather than biennial schedule. The WVSD report also includes a list of construction deficiencies such as missing bike straps etc. Additional TV tracking of potential problem areas may be conducted by the WVSD at the request and cost of the city.

SD Op & Maint: Photos were passed around at the SD maintenance workshop on June 2, 2005, of debris that was pulled out of the SD lines in the early 90's when WVSD began cleaning the cities' storm drains. Now the work is primarily preventative maintenance and the program is running smoothly. All other aspects of the storm drain operation and maintenance program are working well.

CAMPBELL

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

STREET SWEEPING/ PAVEMENT MANAGEMENT				
URMP	a. Street Sweeping Program	By contract – residential swept twice monthly; downtown every week; arterials and Commercial/industrial areas once weekly. High leaf drop and other noted areas cleaned more frequently and as needed (i.e., construction zones - swept by responsible party).	The City of Campbell has a contractor that provides street sweeping services on residential and arterial streets. During FY 04-05, Campbell collected 1,327 cubic yards of debris from 5,454 curb miles of residential streets, and 994 cubic yards of debris from 1,619 curb miles of commercial and arterial streets. Total annual amount of debris recovered by the sweeper was 2,321 cubic yards. Residents and businesses are also given large recycling receptacles for yard waste as part of the required solid waste service. Yard waste is not allowed in streets but waste from receptacles is picked up weekly. **A total of 6,782 tons of yard waste was recycled** in Campbell during FY 04-05.	Public Works Supt
NPDES Permit	b. Street Sweeping Data Collection	Provide street sweeping data currently to WVCWP for submittal to SCVURPPP.	Street Sweeping was collected quarterly and provided to the SCVURPPP at the end of the fiscal year. The City has two contractors performing sweeping services. The residential and commercial areas are swept with a broom type sweeper and the parking lot and garage areas are swept with vacuum type sweepers. Street sweeping data includes both.	Sr. Civil Eng & Public Wks Specialist to co-ord with WVCWP
Work Plan comments RWQCB	c. Training	Provide training meetings, on collection of street sweeping data, to appropriate municipal staff.	Training on the specific requirements and the need for street sweeping data was covered at WVCWP's June 2, 2005 Storm Drain Operation and Maintenance Supervisors workshop. However, this did not include contractors. See evaluation section.	Senior Civil Engineer to co-ord with Public Works Supt & WVCWP to assist and Public Works staff to attend

CAMPBELL

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Street Sweeping/ Pavement Management Evaluation

Campbell's street sweeping contractor and Public Works staff kept us adapted to data collection this year. Data was collected and reported quarterly for the first 3 quarters and then monthly for the last quarter.

One continuous improvement item identified at the end of FY04-05 was the potential need to discuss, with street sweeping contractors, why the City tracks this data. This will help sweepers to become more aware of the importance of street cleaning as it relates to water quality.

As is often the case with residents, it is not obvious why sediment and runoff (for example from car washing) is a problem for creeks and the Bay. WVCWP staff have noticed that if others are aware of the reasons and benefits of street cleaning and tracking the results, they are generally more eager to support the activity including taking time to collect accurate data. At the end of FY04-05 the WVCWP Program manager was laying the groundwork for a meeting with Campbell staff and the City's street sweeping contractor.

CORPORATION YARD

Source	Work Plan Activity	Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
URMP	SWPPP	Implement BMPs.	Staff continued to implement the City's SWPPP and BMPs, which are reviewed annually during the Corp Yard Walk-thru training. Staff also attended the *Maintenance Supervisors Assn.* meeting which featured a review of Public Agency Activity BMPs presented by SCVURPPP staff.	Public Works Supt
URMP	Staff Training	Annual Review and evaluation of BMPs w/ Corp-Yard walk-thru	On April 13, 2005, Public Works and Parks Maintenance Department staff received their annual tour of the Service Center and training on the SWPPP and Best Management Practices for: ▪ IPM in landscaping & gardening ▪ Pool maintenance ▪ Earth moving and dewatering activities ▪ Concrete and mortar application ▪ Roadwork and paving The tour also pointed out the location of several absorbent stations and a demo of proper procedures for pressure washing on sidewalks and in parking lots. (**29 Attendees)** See attached table for additional staff training.	Led by Public Works Supt

PLANNING PROCEDURES

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	Work Plan Activity	Work Plan Tasks	Accomplishments	Responsible Party
C.3.b Development Project Approval Process -- Planning Procedures				
Implement Ordinance, Policy or COAs	Permit C.3.b, C.3.c.i and C.3.c.ii	Expand C.3 Implementation Ordinance, Policy, Procedures and Conditions of Approval will be implemented to incorporate the requirements of provision C.3.	On April 15, 2005, the City of Campbell began requiring stormwater treatment measures on all Group 2 projects that had not been deemed complete as of 4/14/05. To prepare for these new requirements, the Sr. Civil Engineer wrote a draft policy to provide guidance for Group 2 implementation. Although the Group 2 definition was being re-negotiated between SCVURPPP and the Water Board at that time, the City determined that the existing terms in Campbell's City Code were sufficient to implement Group 2 on April 15, 2005. Public Works and Community Development Department staff will reconsider the need for Code revisions during FY 05-06. In June 2005, the City's Standard Preliminary Conditions of Approval were revised to incorporate C.3 requirements that were previously set on a case-by-case basis. All project application packages now include the attached guidance for applicants. (Attachment B)	Sr. Civil Engineer, Sr Planner
Staff Training	Work Plan	Train appropriate staff (i.e. planning, building, engineering divisions) on new policies, procedures, & C3 provisions (may include SCVURPPP workshops).	April 20, 2005 – Sr. Civil Engineer met with the PW Director; and City Engineer to review and evaluate Group 2 implementation procedures and challenges. June 9, 2005 – Sr. Civil Engineer and Public Works Inspector attended the SCVURPPP workshop, "Conducting Stormwater Treatment BMP Maintenance and Inspections." June 15, 2005 – Sr Civil Engineer, the PW Director, and the	SR. Civil Engineer SCVURPPP (assist)

			City Engineer provided a follow-up training meeting to cover stormwater treatment BMP O&M inspection procedures with the Director of Community Development, and a Sr. Planner. During FY 04-05, the City's Environmental Programs Manager, and later the Sr. Civil Engineer attended SCVURPPP's monthly C3 Provision Oversight meetings as part of the C3 training for municipal staff'.	
C.3.c. Requirements for Group 1 and Group 2 Projects				
URMP: Planning Procedures Performance Std	C.3.c.6.	Continue implementation of Planning Procedures to comply with revised (FY03-04) Performance Standard in local URMP.	In August 2004, Campbell revised and updated all sections of the City's URMP, with a special focus on providing more specific details to the City's Planning Procedures PS. Additional sections on BMP O&M Inspection and Verification were added to this PS. During 04-05, Campbell continued to implement the PPPS.	Sr. Civil Engineer, Sr. Planner WVCWP assist w/ URMP SCVURPPP (guidance)
C.3.e Operation and Maintenance of Treatment BMPs				
BMP Inspection Program O&M Verification	Permit C.3.e	Implement local inspection program for treatment BMPs on all projects. Verify that proper O&M is being performed by the responsible party. (Program to assist in defining which BMPs are priority for inspection).	Campbell did not inspect stormwater treatment BMPs at Group 1 or Group 2 sites during '04-'05 because these BMPs have been in place for less than a year. Given Campbell's staff and budget shortages during FY04-05, the City's Sr. Civil Engineer anticipates that Campbell will inspect BMPs at a prioritized subset of Group 1 and Group 2 sites beginning in FY05-06. See the Evaluation section below.	Sr. Civil Engineer
	Work Plan	<u>Training & Evaluation</u> Train inspectors and data managers on O&M verification program. Include evaluation of effectiveness and planned improvement to the program	Campbell's Senior Civil Engineer and Public Works Inspector attended the SCVURPPP Workshop, "Conducting Stormwater Treatment BMP Maintenance and Inspections" on June 9, 2005. The WVCWP Manager and WVCWP Inspector also attended the training and video taped most of the presentations for WV municipal staff who could not attend. WVCWP staff has had a few delays in transferring the video to DVD for distribution. DVDs are expected to be made and distributed to WVCs during FY05-06.	Sr. Civil Engineer WVCWP to assist

C.3.f Hydromodification Management Plan				
Hydromodi-fication Manage-ment Plan	Work Plan task	Review and provide comments on the HMP products.	HMP comments were provided on behalf of Campbell via the WVCWP Manager. The WVCWP Manager attended SCVURPPP review meetings on progress of HMP and provided comments from West Valley meetings on the same subject. Campbell submitted a map to SCVURPPP showing undeveloped land parcels to help determine the percent of impervious surface within its local watersheds, San Tomas Aquino and Guadalupe.	Sr. Civil Engineer WVCWP to assist
	C.3.f.viii.5 and C.3.f.i. and C.3.c.i.	Implement HMP, which shall include the requirements of provision C.3.f. Prior to approval of the HMP by the Regional Board, encourage early implementation measures likely to be included in the HMP. Summarize the Progress of incorporating treatment measures, in Annual Reports.	In June 2005, the Sr. Civil Engineer reviewed the HMP applicability criteria and determined that there are no parcels in the City of Campbell that are subject to full HMP requirements. This determination has been made according to the HMP map showing percentage of existing imperviousness and taking into consideration the size of potential projects.	Sr. Civil Engineer, Sr Planner
	FY04-05 Work Plan & RWQCB comments	<u>Training</u> Attend Program workshops on HMP and provide in-house training as appropriate.	SCVURPPP workshops were deferred due to the extended negotiation regarding the HMP. On-going in-house training on the preliminary HMP was done through round table discussions between the WV Cities on May 24, 2005 and again on June 28, 2005. The discussions covered several aspects of the proposed HMP report, including its applicability to the WV cities and its feasibility. Municipal Reps were then prepared to review the comments and considerations with their appropriate municipal staff in follow-up meetings. WV Reps agreed to spend additional time after the May 24th session reviewing the proposed HMP. (Campbell's Sr Civil Engineer, Pub Works Dir, and City Engineer met on 6-15-05 to discuss the HMP). On June 28th all concluded that the WV Cities would prepare to implement the applicable requirements of the HMP on the implementation date specified by the Water Board.	SCVURPPP to host training & Sr. Civil Engineer, Engineering staff and WVCWP staff to attend.

CAMPBELL

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

C.3.g Waiver and Compensatory Mitigation Program				
Waiver Program Staff training and reporting	C.3.g.3 (Permit C.3.g.v.)	If a waiver & compensatory mitigation program is adopted, document in each annual report, all waivers granted according to permit provision C.3.c.g for Group 1 and Group 2 projects. Include: project name, location, type, percent impervious surface, reasons for and terms of waiver, and the alternative benefit project and completion date.	Waiver program was not adopted during FY 04-05 and none is anticipated in the near future. All Group 1 and Group 2 Projects must meet NPDES requirements for stormwater treatment measures.	Sr. Civil Engineer, WVCWP to assist
C.3.h Alternate Certification				
Alternate Certification reporting	(Permit C.3.h)	If alternate certification is used, list the Group 1 and Group 2 projects certified by someone other than City Staff.	The Public Works Department has a list of consultants approved to certify the BMP selection and design. The City will not provide this certification. No Group 1 projects were certified during FY04-05.	Sr. Civil Engineer
C.3.j Site Design Measures Guidance and Standards Development				
Site Design Measures Guidance and Standards Revision	(Permit C.3.j.)	Implement revised local site design standards and guidance, according to Permit C.3.j. by 9/15/04 (Report on progress in Sept. '04 AR) Reference: • City's 9/15/03 submittal labeled *Site Design Standards and Guidance Review,* from SCVURPPP (on CD); • "Development Policies Comparison Report" worksheet, from SCVURPPP (on CD, 4/2003); • Information and summary table from the SCVURPPP Site Design Dialogues & Workshop (FY03-04)	In June 2004, the City Council adopted Ordinance No. 2046 to amend Chapter 14.02, Stormwater Pollution Control, to amplify the existing code. Accordingly staff advises developers to reduce impervious surface and to use native plants in landscape plans. No other changes to code or policy regarding site design were implemented in Campbell during FY040-05.	Sr Civil Engineer, Sr. Planner SCVURPPP (guidance)

CAMPBELL

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

C.3.k Source Control Measures				
Implementa-tion of Source Control Measures	C.3.k.3 (Permit C.3.k. last paragraph)	Implement source control measures requirements by including appropriate conditions of approval in Group 1 and 2 projects. Stormwater pollutant source control measures will be encouraged for projects of all sizes where practicable.	During FY 04-05, the Sr. Civil Engineer compiled a table of source control measures to be used in Group 1 and 2 projects. (See Attachment B)	Sr. Civil Engineer& Sr. Planner
C.3.m Water Quality Review Processes				
CEQA Review	C.3.m.1	Dischargers shall evaluate water quality effects & identify mitigation measures when conducting Env Review Process for all projects. Report on changes to the Environmental Review process, if any.	Campbell ensures that the environmental documents required for projects that fall under CEQA review address both significant and cumulative stormwater quality impacts during the life of the project, and specific mitigation measures related to stormwater management. When considering potential urban runoff impacts for CEQA Review, Planning Division staff refers to SCVURPPP Guidance, including recommendations from the Regional Water Quality Control Board and SCVURPP, related to Provision C.3.m stormwater requirements. There were no changes to the City's environmental review process during FY04-05.	Comm Dev Dir Sr. Planner
C.3.n Reporting Requirements				
Source Control Measures Reporting	Permit C.3.n.i. (C.3.c.)	<u>Reporting on Source Control Measures</u> Use the Planning Procedures Performance Standard Reporting Form to provide detail in annul reports, on implementation of Source Control Measures for all Group 1 & Group 2, new and redevelopment projects: --project name, location, type (per C.3.c.), size (ac. or sq.ft.), and impervious surface	See Evaluation section below for list of stormwater measures on projects that have not been approved yet.	Sr. Civil Engineer/ Sr. Planner collect data WVCWP to prepare report

		area. For redevelopment projects, include area of land disturbance.		
Treatment Measures Reporting	Permit C.3.n.ii. (C.3.d.and C.3.e.)	Reporting on Treatment Measures For projects that must implement treatment measures, report which treatment BMPs were used and numeric-sizing criteria employed, the operation and maintenance responsibility mechanism including responsible party, site design measures used, and source control measures required.	See Part 2 of Group 1 Project Reporting Form for details on Campbell's only Group 1 project approved during FY04-05. (Attachment A) Also, see Evaluation section below.	Sr. Civil Engineer/ Sr. Planner collect data WVCWP to prepare report
Pesticide Control Measures Reporting	Permit C.3.n.iii.	Reporting on Pesticide Reduction Measures Collect information and report a summary of types of pesticide reduction measures required for development Group 1 & Group 2 projects and the percentage of projects for which pesticide reduction measures were required.	Campbell provides the handout "Landscape Maintenance Techniques for Pest Reduction," in the application package for all new and redevelopment projects.	Sr. Planner to collect data. WVCWP to report

Planning Procedures Evaluation

C.3 Implementation is proceeding relatively well with a few challenges. Pesticide Reduction measures are encouraged via the fact sheet on pest reduction in landscaping. However, West Valley Reps have identified a potential continuous improvement item in that it is difficult to require private property owners to comply. WVCWP will provide additional training and/ or round table discussions with municipal Planning staff to determine how best to expand knowledge and feasibility of Pest Resistant Landscaping in future new and redevelopment projects.

City of Campbell staff has worked well with developers applying for Group 1 projects. Newly hired City staff is becoming more comfortable with Provision C.3 requirements as they gain additional knowledge of their NPDES permit requirements.

The following are projects that have not received final approval but whose draft construction drawings show stormwater treatment measures.

- Building at 395 W. Rincon Avenue – ex. church to remain, all else to be removed and replaced w/new building, landscaping and parking: all runoff from site sheet flows to grassy area at back of site. Runoff filters through grass and then infiltrates to groundwater by way of perforated pipes underground. There is no connection to offsite storm drain. (Have not yet determined if this is in the Guadalupe or San Thomas Aquino Watershed)

- At 395 W. Rincon Avenue: sheet flow collected and filtered in landscaping drains to perforated pipes underground. Pipes discharge to detention basin (volume-based sizing) to treat all runoff from site. There is no connection to offsite storm drain. (Have not yet determined if this is in the Guadalupe or San Thomas Aquino Watershed)
- Industrial Park – former recycling and storage yard that had no landscaping at 700 E. McGlincy Lane: new project will add 0.5 acre of landscaping at a 4.5 acre site. Covered dumpsters are required. Two Stormceptors will be installed just upstream from the connection to the City storm drain. Pest Resistant Landscaping fact sheet was given to property owner. (Guadalupe Watershed)

Evaluation of BMP O&M Inspection & Verification Program

Challenges**:**

Although each WV municipality has assigned staff to conduct storm water treatment BMP O&M verification inspections, the biggest challenge, especially for the City of Campbell is to find staff time to carry out the inspections. At the West Valley Clean Water Program follow up session to SCVURPPP's workshop on BMP O&M Verification, Campbell's Sr Civil Engineer asked the WVCWP Manager to look into an alternative means of conducting West Valley BMP O&M inspections. He was interested in finding a consultant to work for all of the West Valley Communities on an "as-needed" schedule to perform annual inspections. The consultant would have sufficient engineering experience to recognize potential maintenance problems on treatment BMPs and be well-trained in stormwater quality requirements. Monte Sereno is not interested in participating because they have sufficient Engineering staff to meet the City's inspection needs. However, the other WV municipalities may be interested in jointly hiring a consultant to perform inspections and write inspection reports, especially during FY 06-07, as Group 1 projects near completion and the schedule for verification inspections becomes imminent. The WVCWP Manager, agreed to work with Campbell toward a resolution to this challenge; the topic of hiring a consultant will be considered during a round-table discussion among the WV Stormwater Reps in September or October 2005.

CITY OF CAMPBELL

Reporting Form for Planning Procedures Performance Standard and Provision C.3.n.i. Reporting Requirements

Part 1

Group 1 New Development and Significant Redevelopment Projects[1] Reviewed and/or Approved During FY 04-05

Project Name	Project Type[2]	Site Size (ac. or s.f.)	New Impervious Surface (s.f.)[3]	Area of Land Disturbed (Ac.)[4]	Project Status Deemed Complete & Project Approval Date[5]	Storm Water Control Measures Included in Project
Private Projects						
1. 1815 S. Bascom Avenue Guadalupe Watershed Developer: Pinn Brothers, Inc.	Group 1 Project is a 4-story building with 4500 sf of mixed use retail, 45 condominiums and underground parking.	1.68 ac.	**1.596 ac.** Redeveloped Area – Entire area used to be a parking lot for a restaurant with minimal landscaping.	1.68 ac.	Deemed Complete Nov. 2004 Approved by City Council 12/7/04. Under Construction.	Biofilters, Media filter in storm interceptor, porous pavement.

[1] List all projects with new impervious surface area greater than 1 acre (43,560 s.f.).
[2] Describe project type, as defined in Provision C.3.c.
[3] "New" is defined as impervious surface created, added or replaced.
[4] If the site is a "significant redevelopment", list the area of land disturbance, if information is readily available.
[5] **Date of Project Approval** is the date of final approval before construction begins on the project, typically approval of a grading or building permit.

NOTICE

to

Developers & Contractors

State of California
STORMWATER REGULATION CHANGES

This Notice is to inform you of changes to existing **Stormwater Quality Regulations**

NPDES Construction General Permit

As a result of recent state regulatory actions, effective immediately, all construction projects **disturbing an area of one (1) acre** or more are required to comply with:

State of California
"General National Pollutant Discharge Elimination System (NPDES) Permit for Discharges Associated with Construction Activities" ("Construction General Permit")

The size threshold for this permit had previously been 5 acres of disturbed land.

Compliance with this permit requires ALL of the following:

- Applicant to submit a Notice of Intent (**NOI**) and pay an annual payment during the project's construction period to : **State Water Resources Board – see website below for fee schedule**
- preparation of a Storm Water Pollution Prevention Plan (**SWPPP**)
- use of City Approved Best Management Practices (**BMP**s) to control storm water runoff,
- BMP inspection and maintenance by applicant to determine adequacy and maintenance
- File a Notice of Termination upon completion of construction.

For copies of the Construction General Permit, the NOI, and additional permit and fee information consult the **State Water Resources Control Board website** at:

http://www.swrcb.ca.gov/stormwtr/construction.html

STORMWATER QUALITY REGULATIONS

In order to comply with the City's State-issued **NPDES permit, No. 01-119**, Campbell & other public agencies in the Santa Clara Valley are required to place additional Conditions of Approval related to storm water quality control on certain development projects. **As of April 15, 2005, non-exempt projects creating or replacing 10,000 sq. ft. or more of impervious surface**, including roof area, **must incorporate design, control, and engineered treatment measures** to prevent pollutants from being washed into creeks and streams by stormwater runoff from new and re-development sites.

City of Campbell

Conditions of approval will include the use and maintenance of BMPs for site design and storm water treatment, which must be designed per approved numeric sizing criteria. General guidance on the selection and implementation of BMPs and Stormwater Management Plans can be found on the California Stormwater Quality Association website at www.cabmphandbooks.com and C.3 Stormwater Handbook – May 2004 (www.scvurppp.org) Link to "Reports & Products 2003-2004" and "Guidance Manual"

Each project will also require a Certification of Engineered Stormwater Treatment for New and Redevelopment Projects. This form may be obtained at the Department of Public Works, 70 N. First St. Campbell, California 95008.

Owners of properties with treatment BMPs will also be required to certify on-going operation and maintenance.

DEVELOPMENT & CONSTRUCTION
Construction Inspections

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
	URMP	Staff Training Participate in and support SCVURPPP sponsored workshops/ info sessions on erosion control and construction BMPs; support distribution of related materials.	On October 12th WVCWP IC/ID Inspector and Manager attended the "Construction Site Planning & Management for Compliance with NPDES Requirements" workshop, and purchased the videos, "**Hold onto your Dirt**" and "**Keep it Clean**", to use in training sessions within each city. Campbell sent the City's Senior Construction Inspector and Senior Building Inspector to the workshop: See Staff Training Table –Construction Inspection, for details.	WVCWP to co-ord w/ SCVURPPP; attend by City staff
	URMP	Construction Inspections Continue construction site inspections for stormwater issues (i.e., mudtracking, mat'l storage, housekeeping, etc.).	Campbell conducted construction site inspections on all projects. During 04-05 the City had 2 construction related incidents. One was a non-incident and the other was successfully resolved. See Construction Inspection Incident table for details. (Attached). During FY04-05, in Campbell had 1562 building and/or grading permits. Projects that were problematic received daily drive-by spot checks by City staff. Projects that were clearly well controlled were inspected at least every 2 weeks during the rainy season.	Sr Civil Engineer & City Bldg Official

	Program	Construction Inspection Performance Standard Implement revisions to the Construction Inspection Performance Standards (e.g., documenting and reporting enforcement actions and implementing process for graduated levels of enforcement).	WVCWP and Campbell staff rewrote the City's C.I. SOPs for the model Construction Inspection Performance Standards as part of Campbell's URMP revision (submitted to the Regional Board in 9/04).	WVCWP Staff to co-ord w/ Sr Civil Engineer & City Bldg Official

Campbell

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Construction Inspection Evaluation

Construction Site evaluation of trends:

FY04-05		Previous Year - 03-04	
Grey Water Discharge	1	Tracking Soil (water truck washing into S/D)	1
Complaint not found (in compliance, saw slurry being vacuumed)	0		
Total Number of Incidents	1		1

Potential incidents reported by other agency staff or citizens, are inspected and re-inspected through to final resolution, by the WV Inspector. This year the WVCWP Inspector went out on 2 potential incident reports. See the Construction Site Inspection table following this section. In addition to WVCWP inspections, the Senior Public Works Inspector for the City of Campbell talked with the Marriott general contractor about maintaining their erosion control measures after the first two storms because a section of the silt fence was dislodged.

The number of incidents is the same as the previous year. This year the only incident was a grey water discharge. Tracking soil accounted for 1 violation last year in Campbell. The Cities Construction Inspectors handle most of the incidents that can be easily and quickly resolved. However, meeting regularly with Los Gatos construction site inspectors has opened up better communication and easier reporting channels for referrals from municipal inspection staff. The WV Inspector hopes to meet with Campbell construction and building inspectors during 05-06 to verify that the low number of construction site incidents is an accurate reflection of the routine compliance of contractors working in the City of Campbell. The Site of the 05-06 Construction and Erosion workshop for Santa Clara will be at the Campbell Community Center.

Challenges to attending Construction Site Erosion Workshops, October is the worst month to attend a construction / erosion control workshop. Construction inspectors are, at that time, rushing to meet the October 15th deadline to be prepared for the rainy season. Construction / Erosion workshops in October and November are not practicable. Resolution – WVCWP arranged with a Planner from the SF Estuary Project to hold the Santa Clara Construction/ Erosion Control Workshop on Dec 8, 2005, at Campbell's Community Center.

The Construction Inspection Program currently works well – Continued public outreach efforts and further training or communication between municipal inspection staff and the WV Stormwater Inspector will serve to strengthen the Program.

CAMPBELL

Construciton Site Inspection Table Annual Report FY04-05

#	ICID Date	Contact Name	Incident Address	Report Source	Incident Type	Enforcment Action	Inspector's Notes	Incident - Status	Follow-up Notes	Compliance Date
1	12/8/2004	Dominic	1161 Glenblair, Campbell	Inter-departmental	Grey water discharge	Verbal Notice	New driveway construction. He hosed down the driveway causing runoff to flow down street gutter. He stopped. Clean it up moving dirt and water to dirt area near driveway. All OK now.	Incident - Resolved	Joanna who lives at 1183 Glenblair called Lynn. Her number is 374-3604, cell 309-6584. All AOK now.	08-Dec-04
2	12/17/2004	Insituform Technologies, Inc.	Campbell Av. @ San Thomas Expy., Campbell	Other	Complaint not found	No Action	Sewer pipe project under construction. Said lots of mud and water. Went out immediately. All OK now. Nothing went to SD.	Non-Incident	All OK when I got there. I drive this almost every day. I will keep an eye on it. They appear to be doing everything right.	17-Dec-04

A. SCV Program Projects/Support				
SCV Program PMP (II.A.1)	General Outreach	<u>a. Watershed Education and Outreach Campaign</u> Support multi-year watershed education and outreach campaign. WVCW Pgm Mgr assists via WEO Ad hoc Task Group. Participate in campaign development and special projects. Campaign will include funding for educational programs at the Alviso Ed Center and funding for ZunZun performances in local schools. Continue establishing partnerships with local recreational attractions to promote watershed messages. (i.e. Happy Hallow Zoo and Bonfante Gardens) See SCVURPPP Project Work Plan for details.	WV Communities (WVC) support the multi year Watershed Education Outreach (WEO) campaign. Program Mgr is active in the WEO AHTG and in the Schools & Youth Education Outreach Subgroup. **<u>Zun Zun Assemblies</u>** Letters and emails were sent to several local WVC Elementary schools informing them about the free sponsored ZunZun Assemblies available to their students. All schools which participated received two (2) vocabulary lists (one for K-2 and one for 3-6) and an information sheet about the assembly content for teachers to refer to. Teachers were asked to familiarize the students with the vocabulary words prior to the assembly. Three (3) WVC schools participated in the assembly. Castlemont Elementary, Campbell **742 students**	WVCWP Staff

ary Project		Continue a pilot study on Wacky Watershed's, 6th - 8th grade curriculum, consistent with state required education standards and current watershed campaign messages. Evaluate effectiveness and appeal by providing training to teachers and soliciting their evaluations.	"Wacky Watersheds" but did not receive responses. WVCWP then took a new approach which has proven very successful: since the **Calif. 5th grade** curriculum addresses "Keeping Water Clean" and "Pollutants Travel" in its Water Unit, WVCWP developed an Enviroscape-based 5th grade curriculum addressing these topics. Wacky Watersheds' messages have been incorporated into this curriculum. One rotation station features the Wacky Watersheds video "It's Wet, It's Wild, It's Water". WVCWP gained teacher invitations to present this curriculum to five different 5th grade classes in FY 04-05 (appx. 145 students participated). **Teachers' evaluations state** "Thanks for coming!" and consider that the program *"very much"* helped students learn about watersheds, learn to avoid residential runoff pollution, addressed curriculum topics; teachers state that they would refer it to other teachers. 3 "Wacky Watersheds" materials packages were distributed to participating teachers in FY 04-05. See 2.B.k "Coordinate Watershed Education with schools" for details.	
NPDES Permit, Provision c.9.c.	Targeted Outreach	<u>d. Mercury Pollution Prevention Outreach</u> This project will encompass local implementation of the Program's Mercury Pollution Prevention Plan and will include public education on: 1) the effects of mercury in the environment, and 2) products containing mercury and proper disposal of such products	WVCWP Program Manager participates in the Mercury Ad Hoc Task Group on behalf of the WVC. Project implementation and projects for consideration, which are discussed in the AHTG, are presented to City staff for appropriate follow-through. See Program's Annual Report; see PI/P Sections below, and the Mercury Section for each WVC, for further details.	WVCWP Staff

URMP	Targeted Outreach	2.B.a Distribute materials Provide pesticide management materials to: 1) nurseries and hardware stores for distribution at point-of-sale; 2) pest control operators and landscapers, and 3) municipal employees.	Summer Winds Garden Center in Campbell maintains an IPM materials literature holder for which WVCWP provides some of the outreach material. 50 Grow-It Guides were distributed here in FY 04-05; distribution was delayed by the store's recent change in management, and changing requests for type of display rack (floor vs. wall-mounted). Orchard Supply Hardware (bordering Saratoga & Campbell) allowed WVCWP to place an IPM basket display "Grow-It Guides" in their checkout area; 50 Grow-It Guides & 20 "A Child's Garden" coloring books were part of the display. Pest Control Contractors and Landscape Contractors for all WVC were contacted with information/invitations for the March 2005 free IPM training sponsored by WVC through WVCWP. CEUs for Pesticide Applicators and Nursery Professionals were offered. 1 Pest Control Contractor and 1 independent Landscape Contractor attended. Municipal Employees may pick up IPM materials from their respective City/Town offices.

EVALUATION

IPM Materials: The "Soil Matters" 32 page booklet was very-well received by the AgroEcology science class at Los Gatos High school, and will be kept as class reference material and incorporated into the curriculum for that class.

The "Grow-It Guide" continues to be the most popular IPM literature. Although WVCWP and the cities/town make available a variety of IPM materials at public places and community events, it is most common for residents to pick up only the Grow-It Guides. Among the IPM fact sheets, residents seem most interested in the Roses sheet and the Beautiful Lawns sheet.

Items for children are also popular – see 2.B.k "Coordinate Watershed Education with schools" below. One of the most popular items has been the "Our Water Our World" picture frame magnet. While the magnet doesn't give actual IPM advice, it features the web site address, and it is hoped that residents will visit the web site (partially funded by SCVURPPP) as it is an excellent resource. The "Kids Guide to Backyard Bugs" is always popular, but supplies are very limited, so these are distributed sparingly. Many more would be taken, if they were available.

WVCWP has had the most success in providing IPM material to the Master Gardeners classes at the Campbell Community Center, since these supplement the instructor's information, and attendees have an interest in gardening (see Pesticide Mgmt Section for details). It appears that there would be an interest in at least basic IPM info in any of the gardening classes in this series. In FY 05-06 a more concerted effort will be made to get some IPM materials to each of these classes, rather than just distributing to the Pest Management class, as was done this year.

In the WVC, it appears that quite a bit of residential landscape care is handled by very small landscape businesses. WVCWP continues to search for a means of reaching residents who use these services and who could request a change in pesticide use from their contractors. Discussions with Licensed PCOs indicate that residents call them after the small (probably unlicensed) contractors spray a variety of chemicals without successful results. This means that not only are residents resorting to pesticide spraying, they are ending up with more spraying than is actually needed, if the work was initially done correctly. It would be

West Valley Communities

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
helpful to have material which could simply and quickly educate residents on this matter. **Household Hazardous Waste / Copper – Nickel / Mercury / *Other:*** Staff created a variety of flyers this year focusing on Mercury, especially the need to recycle Fluorescent Light Bulbs – See" New Creations by WVCWP" below for details. WVCWP staff created a colorful outreach piece related to Copper (aimed at Car Wash Fundraisers --see" New Creations by WVCWP" below), but see a need for a general piece on Car Washing which would explain the reasons to avoid car wash runoff into storm drains. This would be especially helpful if the appearance appealed to a high school/ young adult age group who might be likely to wash at home rather than using a car wash. In addition, staff usually receive questions about copper water pipes when trying to explain the copper/brake pad/water pollution issue. Based on this, and the same questions related to architectural copper, it appears that some sort of outreach piece on copper would be useful. Staff have not yet found any outreach pieces which would serve as good models on these subjects, but will continue looking into possibilities. The Car Wash Kit flyer will be distributed to schools in FY 05-06.				
ICID/IND Materials Distribution

EVALUATION

The Stormwater Discharge Inspector has found that the best outreach item for restaurants is the "Good Cleaning Practices for Restaurants poster, which incorporates 6 pictures of proper cleaning BMPs. The piece is 12"x36" and can be hung either horizontally or vertically; the paper has a greaseproof coating. Unfortunately, WVCWP only has 8 of these left, and they have been distributed very sparingly, depending upon need and interest. SCVURPPP does not have any available on request. The poster was originally part of a 6 piece packet. WVCWP will investigate whether there might be any means/interest/funding for re-

West Valley Communities

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
printing the poster alone. The Discharge Inspector also sees a need for a simple piece on Car Washing which would explain the reasons to avoid car wash runoff into storm drains (as discussed above in "Materials Distribution – HHW/ Copper-Nickel"). Los Gatos has had good results with a doorhanger carried by the streetsweeper. When evidence of potential runoff pollution problems are encountered (such as grass clippings in the gutter) the resident receives notification/education through use of the doorhanger.				
New Creations by WVCWP / WVCWP Materials Distribution				
	General Outreach	.B.a WVCWP: Creation of new outreach materials **not part of Work Plan – additional activity**	**Created "With Your Own 2 Hands" – digital music video/ slide show** This DVD highlights Creek Clean-up volunteers and water pollution prevention. It shows *Creek Keepers Volunteers* with trash grabbers and clipboards as they clean creek sites and conduct trash monitoring, along with the creeks' natural beauty, and creek trash problems. WVCWP created this piece as outreach to encourage participation in Creek Clean-ups and to increase awareness of the problems of trash in creeks. WVCWP is discussing potential methods of having teachers and youth group leaders view the video to encourage schools/ scout troops, etc. to partner with WVCWP in Creek Clean-ups. This activity was chosen as an alternative to creation of a WVCWP newsletter this year (see 2.B.h below). The show was created at no extra cost, using existing computer software and existing photos from WVCWP creek clean-ups.	
	Educational	.B.a WVCWP: Creation of new outreach	**Created Ground Water Pollution Lesson – High School**	WVCWP Staff

West Valley Communities

	Outreach	materials **not part of Work Plan – additional activity**	**level** Distributed to Los Gatos High School Science teachers and Youth Science Institute staff (see 2.B.k "Coordinate Watershed Education with schools")	
	Educational Outreach	.B.a WVCWP: Creation of new outreach materials **not part of Work Plan – additional activity**	**Created 5th Grade Science – Water Curriculum "Pollutants Travel" & "Keeping Water Clean"** – 2x 20 minute presentations, 1 for Coastal Region Watershed Model, 1 for Upland Region Watershed Model. (see 2.B.k "Coordinate Watershed Education with schools")	WVCWP Staff
	General Outreach	.B.a WVCWP: Creation of new outreach materials **not part of Work Plan – additional activity**	**Created Pet Waste Pollution Poster** WVCWP was able to arrange for a free digital/ printable poster with WVCWP logo through "Earth 911". The poster has a humorous, eye-catching look and WVCWP has been using it with good response during school Enviroscape presentations. Text includes: "If you think picking up dog poop is unpleasant, try drinking it… Pet Waste washes into storm drains, polluting our rivers, lakes and drinking water sources. Get the scoop." Staff is discussing additional means of putting the poster to use, and obtaining posters on other topics.	
	General Outreach	.B.a WVCWP: Creation of new outreach materials **not part of Work Plan – additional activity**	**Created "HHW – Mercury" Display:** Color posters highlighting fluorescent light bulbs as HHW were created and attached to 3 tier literature racks. Flyers advertising the free WV HHW Drop-off event were created; these also highlighted proper disposal for Mercury products. Additional material in the displays included the SC County	

West Valley Communities

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
			HHW brochure, and WVCWP's "Keep Your Family & Water Safe from Mercury". At least 1 display was placed in each WV community at a library &/or community center or post office.	
	General Outreach	.B.a WVCWP: Creation of new outreach materials **not part of Work Plan – additional activity**	**Created 2 new Mercury Flyers (from Mercury Ad and Mercury article – LA Times)** **"Would You Eat It?"** highlights dangers of mercury in the environment, sources of mercury and where to recycle products (list of local participating hardware stores), and fish to avoid due to mercury contamination. An article from the LA Times (detailing a recent study on mercury in the environment and links to autism) was reprinted and distributed with the Would You Eat It? flyer. These were well-received when distributed at the LG Farmers' Market. All 15 were taken and more could have been given out, if available.	
	Targeted Outreach	.B.a WVCWP: Creation of new outreach materials **not part of Work Plan – additional activity**	**Created Car Wash Kit Flyers** WVCWP created a Flyer for each City/Town, including reference to the relevant Municipal Code for Stormwater. The flyer directs residents to contact WVCWP for free use of the Car Wash Kit whenever a fundraiser car wash will be conducted. The flyer is available at Municipal offices for residents who might ask about any necessary permits for their fundraiser. WVCWP has also initiated distribution of the flyer to schools. See Copper Section Attachment A	WVCWP Staff

EVALUATION

The new curriculums for the 2 Enviroscapes appeared to appeal to the students; students remained very engaged when they participated in their 2nd Enviroscape station and no one expressed any frustration that the 2 presentations were similar. Staff worked hard to create activities that would be unique to each model, and

West Valley Communities

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
also to stress a few similar but important points in both models. WVCWP will continue to use the 2 presentations together when space at a school allows for this. WVCWP continues to discuss creation of some type of material which could be distributed to classrooms when the Enviroscape is presented. However, since students bring home so many papers from school, it is felt that any piece would need to appear unique. While the calendar produced last year was unique, useful and popular, the current budget situation does not allow for printing of new calendars each year, and has never allowed for printing enough for the calendars to be 'take home' material. The curriculum on infiltration and pesticide pollution, created for the Ground Water Flow Model, was a very effective teaching tool, according to the High School Science teacher. The presentation has been requested for the 05-06 school year. The Mercury Warning flyer (see "Mercury Ad – Attachment A" in Mercury Section) was handed out with an article on Mercury & Autism, reprinted from the LA Times. Residents appeared to be very interested in both pieces. 15 of each were printed for a trial at Los Gatos Beautiful; all were taken, and many more could have been distributed. The Car Wash Kit flyers were created to meet a need for getting this information to the public. The Town of Los Gatos web site's Public Works page had some of this information, and WVCWP has received a number of calls based upon this page. The flyer was created as a means to easily get the information to schools; it has also been posted in municipal offices. It generated a call from one Los Gatos school district, which is now looking into setting up its own car wash kit. It will be distributed widely in FY 05-06 and will be posted on the WVCWP web site.				
URMP, PMP (II.A.4.)	General Outreach	<u>b. Participate in Community Events</u> Promote watershed messages by participating in community events (e.g., farmers market, festivals, creeks clean-ups, etc.). Conduct or participate in local activities that are coordinated with the Watershed Education & Outreach campaign, including outreach events targeted at pesticide users.	WVCWP partnered with the local Sierra Club chapter & Audubon Society to feature a table at Audubon's annual October "Wildlife Education Fair". The table featured: the Enviroscape hands-on watershed model demonstrating various types pollution in runoff, a display on dangers of diazinon for birds, and IPM materials. The Sierra Club distributed California Golden Poppy seeds to promote pest-resistant planting. Attendance at the fair was a bit lower this year, due to rain. However, the table attracted appx. 25 children, some of whom stayed for 2-3 presentations. Parents watched the presentations from behind their children. The City of Campbell conducted outreach through its Arbor Day activity (April 19th) and Community Clean Up	WVCWP Staff

West Valley Communities

			Day (April 23rd – 95 participants) and distributed a variety of materials, including IPM & HHW. The Town of Los Gatos conducted outreach through its Farmer's Market /Los Gatos Beautiful Celebration (April 2005). WVCWP staffed booths at the event and distributed a variety a materials. The City of Saratoga conducted outreach through its Building Bridges event (October 2004) and its Mustard Walk (Feb. 2005). A variety of materials was distributed by City staff at both events. WVCWP organized a Creek Clean-up Event with Sacred Heart School in Saratoga (students from all WVC). Appx 60 students and 5 parents participated. The beginning of the Clean-up featured a talk on protecting creeks and preventing litter. The event was featured on the front page of the Saratoga News weekly paper. (See Trash Management section for details) WVCWP Staff participated in **(2) Orchard Supply & Hardware** No Tax Weekends handing out IPM materials and talking with customers about less toxic pest management and mercury issues. *Grow It Guides*, *A Children's Garden* coloring books, and HHW flyers were left at the point of sale for customers. WVCWP staff participated in 4 WEO Outreach events. See Pesticide Management Section and Copper-Nickel Sectio for details.	
URMP, PMP (V.A.5)	c. Prepare Newsletter Articles	Prepare and contribute articles of interest to the City newsletter. Topics such as HHW disposal, pesticide, mercury, trash and copper/nickel will be promoted.	WVCWP contributed a variety of articles to municipal newsletters. Stormwater Reps also consulted with their editors on timely subjects.	WVCWP Staff

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
			the issue was held at a Saratoga Vineyard).	
URMP, PMP (V.A.3)	e. Ads in Local Newspapers	Continue placement of ad insertions in community newspapers and/or recreation guides.	A "Mercury" ad was created and space purchased in the 3 weekly newspapers serving the West Valley. The Mercury ad ran 2 xs in each of the 3 newspapers. When the ad was printed out as a flyer and distributed at Los Gatos Beautiful booth, it was very well-received – residents appeared to find the graphic appealing, and the information to be useful. See Mercury Section	WVCWP Staff
FY00-01 CI Item	f. WVCWP Web-Site	Continue to expand and update WVCWP web-site to provide new educational material to the public as it becomes available.	WVCWP created a new "Mercury" link on the Clean Creeks home page; the link features the SCVURPPP "Got Bulbs?" poster targeting fluorescent lights. The link takes visitors to a new page with discussion of the mercury runoff problem and links to related sites, such as "recyclemycellphone.org". See Mercury Section – Attachment B. WVCWP created 2 direct links from its website "Clean Creeks.org" to IPM Fact Sheets in PDF format on the Watershed Watch website. The "Creek Clean-up Volunteers" web page was updated, with a new photo and new info. A link to Creek Clean-up events was placed on the home page prior to events. WVCWP checked and updated all the links on its "Links" page, and added new links. **Campbell's** web site added a 'Stormwater Pollution Prevention' section with a Public Works phone # for further information and a link to the SCVURPPP web site. Prior to Earth Day, the web site featured an informational flyer on Electronic Waste and encouraged recycling at the	WVCWP Staff

Public Information/Participation Program Evaluation

Educational Outreach

The West Valley Clean Water Program will continue to build on the success of the existing public education program, with one of the main activities being outreach through schools.

WVCWP piloted 2 new programs for public schools this year: A "Coastal Watershed" Enviroscape (to supplement the "Uplands Watershed") and a Ground Water Pollution Model activity & curriculum.

WVCWP purchased a new and different (Coastal) *Enviroscape* specifically for targeting students. New outreach materials and activities were developed for this model. It was piloted with a middle school class as 1 of 3 stations relating to "Keeping Water Clean" & "Pollutants Travel". Students appeared to enjoy the opportunity to use the 2 different Enviroscapes, and to learn about different issues with each. The teacher expressed appreciation for an excellent program. It is anticipated that this system (3 stations using 1 video and 2 Enviroscapes) will be the standard WVCWP presentation for 5th grade students.

The WVCWP's Enviroscape/ Water Unit presentation in general is well-received and appears to be an effective educational tool. Students participated enthusiastically in these hands-on activities. Students came up with very good pollution solutions and identified their local watershed at the end of the presentations.

From the Youth Science Institute, WVCWP borrowed a Ground Water Flow Model. It was piloted in a 5th grade classroom and a high school science classroom. It appeared to fit best into the high school science class. An activity and curriculum were developed, focusing on pesticide pollution of groundwater. The new 32 page booklet "Soil Matters" served as an excellent supplement to the presentation. Topics from the presentation were included in the year-end final exam.

The high school teacher expressed appreciation for an excellent classroom activity, and requested a presentation for the coming year. YSI requested copies of the curriculum, and will use it with the model when appropriate; they mentioned that they did not currently have a high school level curriculum to use with the model.

Focusing on schools, teachers and students has proven to be a successful means of conveying information about Stormwater Pollution and Pollution Prevention. The calendar created by WVCWP in FY 03-04 continued to provide an attractive & fun method of keeping Stormwater pollution messages in the public eye throughout the year – calendars are hanging in classrooms, teachers' lounges, Senior Citizen Centers, Community Centers and municipal offices; a new message is displayed each month.

Creek Clean-Up/ Trash Monitoring Outreach

In terms of generating student participation in Creek Clean-ups, WVCWP will try 2 new avenues in FY 05-06. Participation at the spring Westmont High Cleanup was low because the information did not get from the school secretary to the person handling the "morning announcements". WVCWP has found 2 ways to inform the students more directly: the PTSA at Westmont High School will be contacted in order to post the information on their web site. The information will also be featured in the school's daily "e-mail bulletin". Contact names have already been obtained for this. In addition, Creek Clean-up flyers will be distributed to other schools in the area. The new music video "With Your Own 2 Hands" will also be a means of generating interest; WVCWP is investigating ways of letting teachers know about the video.

Additional evaluations have been included in several sections of the PI/P Table above.

Outreach on Pollutants of Concern

Additional outreach information is presented in specific Sections, such as the Copper Section, the Mercury Section and the Pesticide Management Section, within this report.

Note: **In order to prevent redundancy, the PI/P table has been created as one table for all four WV Communities;** activities sponsored by an individual community are noted where appropriate. PI/P activities for the WVC tend to be attended by residents from several WV communities, and many of the PI/P tasks are handled by WVCWP for all communities at once. In addition, a number of schools serve residents from more than one community.

	NPDES Permit Provision C.3.n.	reduction measures required (such as by conditions of approval) for new development and significant redevelopment projects, Summarize the percentage of new development and significant redevelopment projects for which pesticide reduction measures were required.	Any applicants for new/re-development activities receive the handout "Landscape Techniques for Pest Reduction". Any new landscaped street medians use native or pest-resistant trees, shrubs and groundcover, based upon the Official Street Tree List. The List was modified to remove tulip trees because of their history of pest problems. Water efficient landscaping is encouraged in 100% of new development and significant redevelopment projects.	
	NPDES Permit Provision C.9.d.ii.	Municipal Staff Training Education programs or training meetings (relevant to PMP Plan VII.A, above) will be conducted with City staff responsible for environmental reviews of new development projects.	The West Valley training meeting (December 21, 2004) included a review of required IPM practices and work plan tasks. Stormwater representatives were advised to deliver handout materials and provide additional review to appropriate municipal staff.	Sr. Planner with WVCWP to assist

Pesticide Management Activities Evaluation

Pest Specific IPM Plans for Armored Scale and Soft Scale were developed in FY 04-05. **This is consistent with the WVC strategy of developing 2 Pest Specific Plans per year to help incorporate IPM into municipal pest control procedures.** Staff received training in some of these methods at the annual WVCWP IPM Training.

Training Activities:

IPM training is a key element in Campbell's Pesticide Management Strategy. The Public Works Superintendent attended 3 external IPM trainings if FY 04-05; the Parks Maintenance Supervisor attended **6** external trainings (04/05); various Parks Maintenance workers also attended a number of trainings (see Pesticide Management Training Summary), including **17** in attendance at the WVCWP IPM for Trees & Shrubs training. Parks Supervisor assisted in development & production of full-day Regional IPM Training.

Parks Maintenance Supervisor participated in the October 04 "Approved Pesticide List Workshop II"; currently investigating possibly of incorporating this approach for Campbell. Park Maintenance Supervisor also participated in the April 05 "Public Agency IPM Exchange Meeting", attended the June 05 "9th Annual

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party

San Francisco Urban IPM Conference" and the June 05 "2nd Annual Regional IPM Conference".

IPM Implementation:

Campbell is implementing IPM in the following situations:

1) On-going - Yellowjackets: Campbell uses traps as the main means of control.

Parks Maintenance staff tries to clean off picnic tables to prevent attracting wasps and ants.

If a wasp nest in a tree requires treatment; the PCO uses a non-residual pesticide, and closes the hole in tree so wasps can't return to nest. Parks staff use home insulation spray foam to close the nest/hole; treatment has been successful in preventing return of wasps.

Staff is evaluating new traps which use pheromone to attract wasps, dry fish to bring them into trap, and soap inside trap, which kills in 5-15 seconds

2) On-going - Weeds:

Campbell uses a chipper to create mulch from green waste; this mulch is used for weed control wherever possible.

Work Furlough labor hand hoes weeds where possible.

Staff is investigating use of black plastic for 'solar control' of weeds, and determining spots where this would be feasible.

Staff has been using the tractor with a boom mower for mowing weeds, instead of spraying them. Additionally, the City of Campbell has loaned this tractor to the City of Saratoga and the Town of Los Gatos so they too can mow weeds instead of spraying.

3) On going - Insects:

In 02-03, Campbell controlled an Ash Whitefly infestation with a natural predator, a minute wasp. Since the wasps were ordered and released, they have continued to suppress the Whitefly population.

Staff is identifying insects and utilizing IPM when appropriate instead of using insecticides

Campbell has significantly reduced the spraying of pesticides for infestations of aphid and scale in the Urban forest by employing non-toxic horticultural oils and soaps. Unfortunately, the City has numerous street trees with aphid infestations, and the less-toxic methods, including spraying with ultra-fine oil, have not had a noticeable impact on this pest population. Despite the aphid problem, the City has used NO organophosphate sprays to control the aphids, in keeping with the City of Campbell IPM Plan. Staff will continue to investigate less-toxic control methods for aphids.

IPM Solutions: City staff have participated in implementation of new County computerized "IPM solutions database input/response", which allows input of pest

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party

problem and a response with IPM solutions. Staff are beginning to refer to this database as it becomes available.

RESULTS OF PESTICIDE USE REVIEW FY 04-05:

Campbell has taken a strong stance on pesticide use reduction in recent years, as evidenced by the extensive involvement in IPM training by City staff. The City's PW Superintendent and Parks Supervisor have actively been involved in regional IPM planning meetings and workshops.

Training:

Campbell and other WVCWP members are working towards pesticide-use reduction by sponsoring an extensive annual IPM training – 04-05 was the 2nd year of this effort. Expert speakers have been brought in and hands-on educational activities are conducted. The workshops are approved for CEUs by the State Dept. of Pesticide Regulation. Attendees have consistently rated the workshops as "excellent" and "worth my time to attend" and "will implement some of these IPM measures".

On March 23, 2005 WVCWP sponsored a 2.5 hour IPM training on insect egg, larvae and adult identification for all Park's Staff and it's Pest Control Contractors. This training proved valuable in training staff to identify potential insect infestations and to utilize an IPM approach to the problem before pesticides are needed. Hand lenses were distributed to all staff members to facilitate field identification of pests vs. beneficial predators. The training included hands-on identification of pests vs. predators.

Extensive community outreach was also conducted to encourage attendance by local school district staff, nursery staff, golf course staff and PCOs. Campbell provided the facilities for this training and participated in planning the agenda.

Field Activities:

Through use of IPM practices Campbell was able to eliminate use of any OP pesticides for the past 3 years, as compared to using 3.7 oz of diazinon for ant control in 01-02. Campbell has also significantly decreased it's use of pesticides by using oils and soaps to control aphids and scale in the urban forest.

The City is making an effort to stress prevention (prevent weed growth, prevent pest infestations) where possible. Campbell is moving into use of IPM, mechanical and cultural controls, rather than chemical controls, as much as possible given budget and staff limitations.

In City facilities, sanitation is being stressed as a means to prevent pest infestations (ants, mice, etc.) so that chemical controls will not be needed.

Over the past several years, the Public Works Dept. has instituted improved methods of weed control in some parks and roadsides, such as using green waste to make wood chips, used as mulch to prevent weed growth. For the past 2 years, the City has been using its new specialized tractor with boom mower for mowing roadside & park weeds and to avoid spraying.

The City Public Works Dept. has instituted use of more pest resistant trees and shrubs to minimize the need for pesticides; these efforts include removal of certain tree species (such as Tulip and Raywood Ash trees) from the City of Campbell's approved Street Tree List.

Section 1.01 MERCURY POLLUTION PREVENTION ACTIVITES

Section 1.02

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
	Mercury Plan (I.D.)	Mercury Policy Implement mercury policy or ordinance requiring the virtual elimination of mercury from controllable sources in urban runoff from agency operations.	Campbell adopted its mercury policy in FY 03-04 and continues to implement the policy. Campbell has continued its Battery Recycling Program handled by Building Maintenance Dept. Collection buckets are available in all departments. The City collects all dry cell and wet cell batteries.	WVCWP to assist Eng Div.
	Mercury Plan (I.F.)	Guidelines Continue implementing the Guidelines for Mercury-Containing Products Reduction and Management The quantities of mercury containing devices disposed of will be reported in the FY 04-05 Annual Report.	Guidelines are being implemented; extensive reduction of mercury-containing products is limited by a lack of alternatives. Research on alternatives to mercury-containing products has been conducted and implemented when possible, but few alternatives have been found. Campbell replaced 15 mercury thermostats with mercury-free thermostats. The 15 thermostats were taken for proper disposal by the City's HHW contractor.	WVCWP to assist Eng Div.
	Mercury Plan (II.D.)	Reporting HHW Disposal Continue documenting and reporting quantities of mercury-containing products disposed of by City buildings and departments at hazardous waste collection facilities in FY 04-05.	Although tracking quantities of mercury products disposed of by the City over the past year is not required by the Permit, the City did initiate attempts to track quantities. However, it was found that it was too costly in terms of staff time, especially with current staffing cutbacks. The number of thermostats replaced was tracked (15) but tracking fluorescent bulbs, etc. proved to be impractical. 100% of all mercury-containing items are removed via a private HHW contractor. Bins for recycling used batteries are distributed throughout city departments so that batteries don't end up in the regular trash.	SCVURRPP (guidance), WVCWP to assist Eng Div.

	Mercury Plan (V.A.)	Fluorescent Light Recycling Program Implement an outreach program to educate small businesses and conditionally exempt small quantity generators about recycling fluorescent lights. Coordinate educational outreach with fluorescent light recycling events sponsored by HHW.	City of Campbell communicated with Apple Computer concerning their Earth Day "Electronic Waste Recycling" event. Information was forwarded to all WVC. Details of the event were posted on the City of Campbell web site. Flyers were also posted at the Community Center and throughout the municipal buildings. At Campbell Earth Day/ Community Cleanup, **95 pieces each** of the following materials were distributed: -Household Hazardous Waste Program -Free Fluorescent Lamp Drop Off locations -Mercury FAQ Sheet -Hunt for Mercury at Home sheet -Household Battery Drop off Locations A WVCWP-created display was placed at the Campbell Library. The display included: ▪ a small, color poster ▪ flyer advertising the WV HHW Drop-off in Saratoga ▪ HHW brochures ▪ "Keep Your Family Safe from Mercury" flyers See PI/P "Materials Distribution" Section. "Claire Water" cartoon strip on recycling Fluorescent Lights and items with Mercury was printed in the "Campbell Profile" newsletter. Small Business Outreach was investigated by contacting the Campbell Chamber of Commerce. WVCWP was told that the on-line Chamber newsletter can be used to distribute a short informational mercury disposal article to businesses in the future. Advertising on proper Mercury disposal was handled	SCVURRPP (guidance), WVCWP to co-ord w/ HHW staff

			through placement of a "Mercury" ad. Space was purchased in the 3 weekly newspapers serving the West Valley. The Mercury ad ran 2 times in each of the 3 newspapers. When the ad was printed out as a flyer and distributed at the Los Gatos Beautiful booth, it was very well-received – residents appeared to find the graphic appealing, and the information to be useful. See Attachment A-Mercury. A Press Release/Article on mercury toxicity, fluorescent light disposal, and the upcoming HHW WV Drop-off event, was submitted to the SJ Mercury News and the 3 WV weekly newspapers. Several papers shortened the article and ran it (October 2004). WVCWP's website was revised to include a Mercury link on the home page. The link connects to a new Mercury web page which includes information on free local fluorescent light disposal, free cell phone recycling and mercury and runoff pollution. See Attachment B-Mercury See PI/P Section for additional outreach related to Mercury	

Mercury Pollution Prevention Activities Evaluation

All WVC have participated in several trainings/round table discussions about mercury policies and mercury product disposal in WVCWP meetings. All WVC have procedures in place to ensure safe disposal of mercury-containing products. When municipal staff purchase or replace mercury-containing products, they select products that contain less mercury. Campbell has made progress in this area by replacing 15 old thermostats with new mercury-free thermostats. The mercury policies have been adopted without any setbacks or challenges.

The WVC have also conducted extensive outreach on Mercury issues in FY-4-05. Outreach was conducted through web sites, distribution of a variety of information at various sites, classroom presentations, municipal newsletter articles, and newspaper advertising.

Outreach has included posting a small mercury poster on the WVCWP website home page, linked to a page devoted to mercury issues, including assorted

recycling information. The City of Campbell web site featured an informational flyer on Electronic Waste and encouraged recycling at the Apple Computer Drop-off event April 23rd.

WVCWP has also incorporated discussion of mercury and fluorescent light bulbs into the 5th grade classroom interactive presentations; the topic seems to generate strong interest from teachers and the students – reference to fluorescent lights usually causes students to look up at their overhead lights, and they make an immediate connection about behavior changes that can be included in their lives.

Additional outreach information is listed in the PI/P Section of this report.

Would you eat it?

MER-CU-RY

A **poisonous** heavy silver-white metallic chemical obtained from the mineral cinnabar, used in:

- **Fluorescent light bulbs**

Also: Oct. 30, 2004 Student Exchange Program & Italian Club of LG High School fundraiser Car Wash held at Van Meter School, LG Blvd. 20 students participated; appx. 95 vehicles were washed. April 2005 – LG Union School Dist. Education Foundation - fundraiser Car Wash held at Van Meter Elem. School, LG. April 2005 – Girl Scout Troop 630 Los Gatos - fundraiser Car Wash held at Union 76 gas station at Blossom Hill Rd., LG. 50 copies each of "Cars Pollute Too" and "Washing Cars" were distributed during car wash events.	
Vehicle Washing Oper-ations	CB-1	Submit data regarding vehicle washing outreach activities. Provide an effectiveness evaluation in Annual Reports.	The Stormwater Discharge Inspector distributes several vehicle washing pieces during pro-active inspections and in relation to any actual or suspected IC/ID incident. This means of outreach is very effective and the Inspector is able to answer questions and offer suggestions. See "Inspect Auto Businesses" below. WVCWP staff created a *Car Wash Kit* outreach flyer, including reference to Campbell's Municipal Code for Stormwater and information on copper's toxicity to aquatic life. The flyer is available at the City offices. 50 copies each of "Cars Pollute Too" and "Washing Cars" were distributed during car wash events. At its Arbor Day event (April 19th) the City of Campbell distributed *The Bay Begins at Your Door* brochure, which includes appropriate vehicle washing information.	WVWCP staff

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Activity	Source	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Vehicle Washing Oper-ations	CB-1	Require source control measures for Group 1 new development and redevelopment projects that will conduct vehicle/equipment washing and maintenance activities (consistent with Permit Provision C.3.k).	The City did not have any Group 1 projects that would conduct vehicle/equipment washing and maintenance activities.	Sr. Planner
Vehicle Washing	CB-1	Inspect auto businesses regarding car wash requirements, and prohibited storm drain discharge.	The WVCWP Inspector conducted 38 pro-active auto repair and vehicle facility shop inspections in Campbell. He distributed his fact sheet, providing information on wastewater capture systems to automotive facilities. The fact sheet was designed to provide small-scale automotive facilities (those that find installing a full-fledged wash rack cost prohibitive) with examples of inexpensive treatment technologies and distributor information.	WVWCP ICID Inspector
Vehicle Washing Oper-ations	CB-1	Maintain and inspect car wash systems for City vehicles at the corporation yard	Last year Campbell held a staff training on Mobile Cleaning BMPs. The staff continues to follow the suggested practices and to ensure that the Corp Yard systems function correctly.	WVWCP ICID Inspector / Pub Works Supt
Vehicle Washing Oper-ations	CB-1	Encourage municipal staff to attend SCVURPPP's "Mobile Cleaning Workshop".	Campbell PW Dept. held a Mobile Cleaning Workshop for staff last year.	WVWCP ICID Inspector / Pub Works Supt/ Bldg Maint Supvr
Industrial Copper Control	CB-3	Continue Industrial Inspection program, including NOI sites and other industrial sites such as plating and metal finishing facilities, vehicle service facilities, and other sites.	The City has an agreement with the SCC Fire District to conduct urban runoff inspections for machine shops and metal manufacturing facilities. Inspections were: ▪ 1 out 1 Welding ▪ 10 out of 12 Misc. Manufacturing ▪ 2 out of 2 Electrical components ▪ 22 out of 23 Machine shops ▪ 1 out of 1 Metal Manufacturing	SCVC Fire Dept./ WV ICID Inspector

Reducing Traffic Congest'nPromoting Alternative Transport-ation	CB-6/7	Complete revision of and implement revised development site design standards related to transportation per Permit Provision C.3.j Encourage and promote better transportation-related design practices and alternative modes of transportation.	The City of Campbell endorses and supports Santa Clara Valley Transportation Authority's *Best Practice Principles* for integrating public transportation and land use[1]. Principles promote: designing for pedestrians i.e. public connection to paths and sidewalks and tree covered sidewalks which provide comfortable pedestrian spaces. Providing a diverse mix of land use and focusing growth around transit stops reduces the need for residents to drive. The City continues to cooperate with the VTA as they extend their light rail system into Campbell. On Aug. 12, Light Rail service between Campbell and San Jose is scheduled to begin. The initial line will be 6.8 miles long and will include 3 stations. The June 2005 "Campbell Profile" promoted use of the Light Rail with an article and a map. The "Profile" is mailed to all City households. Additionally, one of the City Council members serves as Vice Chair of the VTA Board.	Sr. Planner with WVCWP guidance
Reducing Traffic Congest'n	CB-6/7	Continue to maintain signal interconnect systems for closely spaced signals on arterial streets to reduce braking and the associated accumulation of copper brake pad dust on streets.	Campbell continues to monitor these systems for efficient traffic flow and makes changes to traffic signal timing as needed.	Traffic Engineer
Reducing Traffic Congest'n	CB-6/7	Continue to partner with the Silicon Valley-ITS Program – a multi-agency effort to reduce congestion by using advanced	Campbell continues to partner with the Silicon Valley ITS Program as a means of working to reduce traffic congestion.	Traffic Engineer

CAMPBELL

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Activity	Source	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party

Copper/Nickel Action Plan Evaluation

Car Wash Outreach Evaluation:

The Car Wash Kit flyer was posted at the Campbell City offices in spring 2005, but WVCWP has not yet received calls from any groups within Campbell wishing to hold a car wash fundraiser. In Summer and Fall of FY 05-06, the flyer will be distributed to schools in Campbell, in hopes of increasing public awareness of the Car Wash Kit. The flyer will also be posted on the WVCWP website.

Since car washes are sometimes held at gas stations and churches, some form of efficient outreach to these locations is also being discussed. The best approach might be to contact youth sports teams and scout groups, who may hold car washes but perhaps aren't affiliated with a school. In FY 04-05, WVCWP began assembling a *Scouts and Sports Team Contacts* list; in FY05-06, additional contacts will be added and staff will investigate means of distributing the flyer to the appropriate contact people.

The Car Wash Kit for car wash fundraising events has been a success; it was used at 4 events in FY 04-05 year and is estimated to have prevented runoff from several hundred cars. The WVCWP's newly-created Car Wash Kit flyer will be distributed through more avenues in FY 05-06, in an effort reach potential users and to reduce car wash event discharges.

Copper Outreach Evaluation:

The WVCWP will continue to provide outreach on car washing, vehicle maintenance, alternative transportation, and pool maintenance during in-class presentations and partnerships with teachers and students in local schools. WVCWP incorporated messages about activities that can prevent copper runoff as part of the 5th grade Enviroscape curriculum.

The Campbell Profile's article on copper and pool draining reached all Campbell households.

Campbell continued its street sweeping program and was able to collect accurate data for submittal for FY 04-05.

The City has been successful in bringing Light Rail to Campbell to reduce vehicle trips; initial train service begins in August 2005. Light Rail service was promoted to residents in the Summer 05 "Campbell Profile". Campbell will continue to cooperate with VTA on Light Rail expansion.

The WVCWP Inspector's Vehicle Shop Inspection Program continues to be a strong addition to efforts to reduce copper runoff from carwashing. See IND Section.

www.cleancreeks.org , offers a *Take Action* page which encourages people to:

•Take cars to a commercial car wash (where the dirty water will flow to a Treatment Plant), or wash it on a non-paved surface.
•Drain pools and spas into a sanitary sewer outlet, NEVER into a street
•Drive less! Walk, ride a bike or a bus, or carpool.
WVCWP is working on design of a website "Copper" page featuring outreach pieces on residential car washing, use of the Car Wash Kit, and pool draining.

Protect Our Creeks during your next

Car Wash

Fundraising Event

Anyone organizing a **Car Wash Event**
in Campbell, Los Gatos, Monte Sereno or Saratoga
is directed to borrow the **Free Car Wash Kit** from
West Valley Clean Water Program *(WVCWP)*

The *State Water Board* requires municipalities to prevent Car Wash Event runoff from flowing into Storm Drains.
(Campbell Municipal Code 14.02.030)

All Car Wash Events should use the ***Car Wash Kit***, which keeps runoff out of Storm Drains.

To schedule pick-up & training on use of the Car Wash Kit,
e-mail WVCWP at: inspector@cleancreeks.org or phone 408-354-5385

- Copper is toxic to aquatic life - and it washes off of brake pads
- Oil, coolant & other pollutants are also carried in car wash runoff
- The Car Wash Kit drains runoff into the Sanitary Sewer lines, rather than into the Storm Drains (which flow untreated into our creeks)

TRASH INVENTORY & MANAGEMENT

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Trash Work Plan	Strategy and Goals	Use Program guidance to develop a strategy to conduct trash evaluations in watersheds.	The WVCWP Manager and Inspector participated in the Program's Trash Ad Hoc Group and developed goals for the West Valley Communities, which the WVCs approved in FY 03-04. These goals include: • Prioritizing inspections for trash dumpster areas at local restaurants. See IND – Restaurant Inspection Program of each municipality's annual report. • Educate local businesses about the need for dumpster cleanliness and encourage BMPs • Evaluate trash condition of urban creeks through drive-by monitoring and when feasible, rapid trash assessments. • Educate local teachers, students and principals by featuring trash problems and solutions in our interactive school presentations. • Evaluating the progress made on goals in each Ann Rpt	WVCWP to coordinate, WV Stormwater Reps to provide municipal input and feedback
Trash Work Plan	Evaluations	Conduct trash evaluations in a subset of trash problem areas.	The WVCWP staff conducted the following KAB litter index assessments for the identified problem spots for each WV community during FY04-05. See attached reports for detail. For: • Campbell's thirteen (13) identified problem areas, 23 assessments were conducted. • Los Gatos' eight (8) identified problem areas, 12 assessments were conducted. • Monte Sereno's one (1) identified problem areas, 3 assessments were conducted. • Saratoga's four (4) identified problem areas, 6	WVCWP to sponsor events Municipality to identify problem areas

			assessments were conducted. The WVCWP also sponsored three (3) trash cleanup events, where citizen volunteers performed monitoring which is very similar to the Water Board's RTA method.	
Trash Work Plan	Identify Control Measures & Begin Implementation	Identify and begin implementation of trash control measures, as appropriate, to address trash problem areas within high priority areas	The West Valley Cities have successfully implemented all of the strategic trash goals listed in item 1 above.	Municipal Storm Reps to determine Strategic Goals and WVCWP to assist with implementation
Trash Work Plan	Report on Trash Mgmt Practices Implemented	Provide Program staff with information on trash management practices implemented, using standardized reporting format.	Program staff was provided with all trash assessment information for FY 04-05 except for the data that was collected as part of the WVCWP citizen participation program, *Creek Keepers*, mentioned below.	WVCWP Staff
FY01-02 Work Plan	Monitoring/Citizen Participation	Continue to promote citizen participation program to monitor trash in local creeks (element of *Creek Keeper's* Program).	Three public participation events were held in FY04-05 for trash cleanup and monitoring near local creeks. All three event sites were near schools so that WVCWP staff efforts would accomplish three things. 1) Trash monitoring 2) Creek area cleanup and 3) teaching students about a citizen's responsibility to keep trash out of our watersheds. The method used by volunteers at these events resembles the RTA method closely enough that it is possible to take individual trash assessment forms from the participants and put the data almost directly into the RTA forms. Lack of staff time prevented WVCWP from transferring all the data for FY04-05. However data was transferred to the RTA format for the site on Wildcat Creek. See the Program's Trash Activities report. Also see attached data sheets, and the press release for the Wildcat Creek event, and the front-page story from the Saratoga Community Newspaper (Silicon Valley Community Newspaper Group) 4-27-05.	WVCWP Staff

FY04-05 Work Plan, RWQCB comments	Training	Conduct PI/P training meetings on implementation of volunteer creek and school site clean ups. Evaluate effectiveness of volunteer trash monitoring and success of clean-up events	On July 16, 2004, the WVCWP Manager and the half-time Public Outreach Assistant attended the following workshop: Regional Board Trash Rapid Assessment Training Presenters: Water Board Staff for the session on the Rapid Trash Assessment method; (RTA); and SCVURPP Program Staff for the session on the Keep America Beautiful (KAB) method of assessment	WVCWP Staff

Trash Inventory & Management Evaluation

The West Valley Communities have made good progress on each of their strategic goals for trash reduction.

Prioritizing Dumpster Area Inspections & Educating local businesses

The WVCWP Inspector patrols the downtown areas of each community to look for signs of illegal dumping or debris from dumpsters (especially those with open lids) and providing educational chats as needed. Monte Sereno is the exception; being strictly residential, the City does not have many dumpsters. See the IND and ICID section of this report for details.

Evaluate the Trash Condition of Urban Creeks by conducting Drive-by Monitoring of Identified Problem Areas

WVCWP staff conducted *Keep America Beautiful Litter Index* method assessments at all identified problem areas in the West Valley Communities, for a total of 44 assessments. Some new potential problem areas were identified and other, like the *Los Gatos Creek Trail,* which is cleaned up monthly by a local group of University Women, will not remain on the list. Although it is very heavily traveled it is also constantly monitored by residents. WVCWP staff finds that once the patrolling or monitoring has become routine (especially using the simple KAB method) the task is relatively easy to accomplish. WVCWP staff is becoming more familiar with the local watersheds, which makes it easier to identify areas which present potential problems.

Conduct Educational Outreach to Students and Teachers in Local Schools

WVCWP staff will respond to every opportunity to partner with schools and teachers on educating the students. The WVCWP has been particularly successful, in FY 04-05 and F Y03-04 in recruiting student volunteers for creek cleanups and the task of creek monitoring. The WVCWP's own method of trash assessing is very similar to the RTA method except that it is simplified for young students and for the needs the West Valley area. Refer to the combined results of the trash monitoring at three volunteer events, attached. WVCWP events during FY 04-05 all took place in the San Tomas Aquino Watershed. This is partly because choosing a site and recruiting volunteers is time intensive, and it becomes easier as the site is established and volunteers are more familiar with the site and the routine procedures for the event. Sacred Heart School next to Wildcat Creek contacted WVCWP this year to see if staff would sponsor another creek cleanup event. In FY05-06 WVCWP staff will investigate other areas in the West Valley to try to establish an on-gong site in the Guadalupe Watershed (the other West Valley Watershed).

Saratoga Gardening Guerillas

A group of Saratoga Volunteers have been cleaning the streets and sidewalks of the City (sometimes on hands and knees) for the last year. See article attached.

Volunteers met with a hurdle when the Saratoga decided that the City would be liable for the safety of the citizens while they were working. This demonstrates the enthusiasm of the volunteers in West Valley Communities and the set backs that the WVCWP sometimes encounters in encouraging and accepting citizen volunteer services. See attached article (*Gardening Guerillas)* from the Silicon Valley Community Newspaper, *Saratoga News.* Having to walk this fine line is a part of any idea which involves citizens working on municipal property e.g., students applying storm drain stencils or participants in a creek cleanup (especially if volunteers intend to enter the creek to facilitate the cleanup) or even a participation in a holiday parade (public outreach). The WVCWP tries to take advantage of every public participation opportunity without leaving the Municipality vulnerable to potential liability issues.

Trash Problem Area Evaluation Results by Copermittee & Watershed

Campbell

Subject: Sacred Heart Students Clean a Creek April 20th

Hi Lisa,

Sacred Heart School children and a few parent volunteers will be cleaning Wildcat Creek, behind their school grounds on Wednesday afternoon (April 20) from 1 to 2:30 pm. They have a **permit from the SCV Water District** to open the normally locked gate and pick up debris that came to the creek from the school lunch/ field area, the streets, or from other yards.

We are beginning to see the spring weather and notice that trash has settled in the creeks. We first approached Sacred Heart's Principal two years ago to see if she would allow the West Valley Clean Water Program staff to enter the creek area behind the school and pick up the trash that volunteers couldn't get to on National River (Creek) Clean up Day.

The Principal not only invited us onto the property but allowed us to hold a watershed assembly at the school to encourage the students to volunteer for the cleanup event. We were surprised when 80 students and parents turned out for the creek protection event. The principal confided to us that in preparation for Clean Water staff's visit to their school, the students combed the school grounds for trash a few days prior to the creek cleanup event.

School grounds and their surrounding areas are well known among creek and Bay environmentalists as a major source of beverage-container and food-wrapper trash. All of which ends up in our local creeks, streams and finally the Bay. We might look around the West Valley and say we don't have a trash problem but all our upstream food and beverage debris is carried by heavy rains to an unmanageable buildup of trash that is choking creeks in downstream areas.

This year the school called us to request that we help them sponsor another cleanup event. We are delighted to provide the gloves and trash bags and guidelines to keep this a safe event. The SCV Water District staff came out and cleared a path to prevent the students from coming into contact with poison oak. After the event the Water District will haul away the bags of collected trash.

We have cute photos of the previous event if you are interested. The student volunteers are from grades K-8. About 45 students have signed up thus far. I wish every school would celebrate Earth Day this way.

Best Regards,

Cheri Donnelly, Program Manager

Education

Sacred Heart School seventh-graders Lynn Vo (left) and Lucija Stimach participate in a Wildcat Creek cleanup day on April 20 behind the school grounds.

Students doing something about litter

By Lisa Toth

Students at Sacred Heart School may be litterbugs, but they're doing something about it.

More than 65 students in grades four to eight volunteered to clean up Wildcat Creek, which runs behind the Saratoga school's grounds. They were permitted by the Santa Clara Valley Water District to open a normally locked gate to gain access to the creek and they worked for more than two hours on April 20.

The zealous students, parent volunteers and representatives from the sponsoring organization, West Valley Clean Water Program, picked up debris that had been blown into the creek from the school lunch area, streets and school yard. The garbage had been carried into the creek by winter rain storms.

"It's gross," said seventh-grader Elizabeth Carte, picking up trash near the fence line of

the school property. "This shows you how the trash grows. One little piece from everyone becomes a big amount."

Armed with clipboards and pencils, students tracked each piece of trash they picked up, such as random bolts and screws or more common potato chip bags, candy wrappers and beverage containers.

The creek monitoring trash activity will help water program officials determine where the majority of the trash comes from and what behaviors are contributing to the trash. The students were also given gloves, bags for recyclable items and long-handled grippers to pick up hard-to-reach rubbish.

Parent volunteer Georgia Ellenikiotis, the school's Christian service commissioner, said the students received two community service hours for the activity. Each grade level is required to complete a different amount of community service, which includes activities such as playing bingo with senior citizens, assisting at homeless shelters or organizing food drives. Even though the creek cleanup was optional, Ellenikiotis said she was pleased the event had a high turnout. This was the school's third year participating in the creek cleanup event.

"It's fun to be cleaning up with all your friends," said Marianne Gera, a seventh-grader who also serves as the safety and ecology commission officer for the school. "It's helping the environment instead of trashing it."

Before beginning the trash cleaning expedition, students were instructed by Cheri Donnelly, West Valley Clean Water Program's manager, about safety rules, how to avoid poison oak and how to not disrupt the creek's natural habitat. She also showed students photographs of concentrated levels of garbage that can accumulate farther downstream if not prevented or remedied through volunteer cleanup efforts.

Wildcat Creek flows into the San Tomas Aquino Creek and then into Moffet Channel. From there, the water travels through Guadalupe Slough before entering the lower San Francisco Bay, according to Donnelly.

"It's an eye opener for these kids to realize what comes from their own backyard--plastic straws, food wrappers, chip bags, snack bags, bottle caps, water bottles," Ellenikiotis said.

Before the students were allowed to go through the locked gate and head down the steel embankment to access the creek, they had to comb the grounds and collect all the trash that had piled up along the fence line. Kathy Ottenberg, an assistant with the water program, said she hoped the students would take away a sense of responsibility and awareness about not littering in Saratoga.

"We're all partners of the larger community, and our actions and caring about the creek do make a difference," she said. "The creek is part of their campus, but they probably

don't notice it on a daily basis."

Marianne pointed out that much of the trash on the school campus and in the creek was the result of carelessness. She added that the school has implemented a recycling program in the classrooms, and classes are also required to periodically clean up the school yard. Sacred Heart students have been studying topics in their science classes like erosion, pollution and how animals can be affected by trash. In addition, the creek cleanup day also tied into national river cleanup day coming up on May 21 and fell close to Earth Day on April 22.

Donnelly also stressed the importance of the creek cleanup as a savings for taxpayers. In the Los Angeles area, a severe trash problem has resulted in the need for costly filters and trash inserts in storm drain pipes to catch the trash before it can run downstream, she said.

While Santa Clara County isn't listed as having an impaired trash problem and isn't being required to use such filters, representatives like Donnelly are preparing for the possibility of it occurring. The county must adhere to Clean Water Act standards.

"School grounds and their surrounding areas are well-known among creek and Bay environmentalists as a major source of beverage container and food wrapper trash, which ends up in our local creeks, streams and finally the Bay," Donnelly said. "We might look around the West Valley and say we don't have a trash problem, but all of our upstream food and beverage debris is carried by heavy rains to an unmanageable buildup of trash that is choking creeks in downstream areas."

Donnelly added she wished everyone would celebrate Earth Day like Sacred Heart students--by not being litterbugs.

Gardening Guerillas do their work in jungles of downtown Saratoga

By Kaustuv Basu

They call themselves the Gardening Guerillas. And it's the mission of these guerillas to clean the sidewalks of downtown Saratoga, get rid of weeds, plant flowers and make the area more attractive to visitors.

Leading the group is Jill Hunter, planning commissioner and president of the Saratoga Business Development Council, recently renamed the Saratoga Village Development Council.

Hunter and her team meet at a downtown coffee shop once a week.

On the rain-drenched morning of March 29, only a handful of people showed up at the International Coffee Exchange for the weekly meeting.

"This is only the beginning. The rain has kept people away," said Hunter.

She hopes that as news about the group spreads, more and more people will sign up.

"Some people have told me that they do not like our name. We might call ourselves the Saratoga Gardeners," Hunter said.

Armed with some improvised garden shears, Hunter and Dr. John Marian of Big Basin Chiropractic walked around, talking to business owners and pulling overgrown weeds and plants from flowerbeds near the sidewalk. They were

joined by Dorothy, Marian's mother.

In a few weeks, the guerillas will be wearing matching aprons as they walk about downtown Saratoga. Other plans include decorating some of the Village alleyways with arches. "We might buy some overhanging flower-pots," Hunter said.

Hunter has ambitious plans for the Village. "It's easy to criticize the city or knock the Village. My first priority is to have no negativity," she said.

Barely an hour before the meeting at the International Coffee Exchange, Hunter had presided over the meeting of the Saratoga Business Development Council, at which the group decided to rename itself the Saratoga Village Development Council and concentrate on business development in downtown Saratoga.

At the meeting, Hunter said that the group would soon request the city to put up a sign near Highway 85 that indicated a historic downtown with shops and restaurants in the vicinity.

Bill Cooper of the Bella Saratoga restaurant said that he hopes to have some of the faded American flags removed from the Village and replace them with spring flags.

"I know that the city has spring flags available," he said.

Cooper is working with other Village merchants so that they can ask the city to fund the Village shuttle program again. The program started last year and took concert-goers from the Village to Montalvo for free for those dining at a city restaurant or staying at a Village hotel.

For more information on the Gardening Guerillas, call Jill Hunter at 408.741.1213.

Gardeners cleaning up Village, but city council has concerns

By Kaustuv Basu

The Saratoga Gardeners, a group of volunteers who have been gathering in the Village every week to clean sidewalks and plant flowers, have run into a hurdle.

At its meeting on April 20, the Saratoga City Council asked Jill Hunter to register her group of volunteers with the city or ask the Saratoga Chamber of Commerce for help.

Hunter is the chairwoman of the Saratoga Village Development Council and also serves on the city's planning commission.

"We're asking them to do this because of liability issues," said Mayor Kathleen King.

King also said since the Village sidewalks are owned by Caltrans, they might also decide to ask for some liability insurance.

"We love what you are doing in the Village. But SVDC is like an unincorporated club. It is a legal non-entity. And all of you are working on public property," said Vice Mayor Norman Kline.

Kline said it would not be advisable for the Saratoga Gardeners to hang flower pots from poles or work on alleyways until some kind of liability insurance was guaranteed.

Councilwoman Ann Waltonsmith suggested that the Saratoga Gardeners try to find common cause with the Chamber. "It might be too cumbersome to work with the city," she said.

After the meeting, Hunter said that she will try to work out an amicable solution that will please everyone.

"We are getting some momentum," she said.

Hunter said almost 20 volunteers have attended the meetings, held every Tuesday morning at the International Coffee Exchange in downtown Saratoga.

"A lady from Beijing who was visiting Saratoga donated $100 to us when she saw us on our hands and knees cleaning the Village sidewalks," Hunter said.

She asked the council if it would be possible to install a sign near the Saratoga Avenue exit of Highway 85 that indicated the presence of a historic downtown in the area.

At the meeting, Hunter also said turning on the sprinklers and watering spigots in the Village would help the new shrubs and plants. The sprinklers in the Village have not been used for many years.

John Cherbone, the city's public works director, said some of the sprinkler nozzles might need some upgrading. "They should work. We can fund it as long as the cost is below $5,000," he said.

In other city business, the council directed staff to review the parking standards downtown.

"We have very strict parking rules in the Village. We need to loosen them up," Kline said.

Kline, who with King is part of the Village ad-hoc committee, said relaxing parking requirements might stimulate more business activity in the downtown.

Businesses on Big Basin Way have to buy parking spaces depending on their gross floor areas. For example, restaurants are required to buy one space for each 75 square feet of gross floor area.

Lori Tinfow, assistant city manager, said that the matter would come up for a public hearing soon.

City volunteers were honored at the April 20 council meetings as part of the Saratoga Volunteer Appreciation Week. More than 127 residents volunteered for the city between July 2004 and April 2005 and worked a total of 5,118 hours.

Urban Runoff Management Program

Annual Report FY 2004-2005

September 1, 2005

City Hall
10300 Torre Avenue
Cupertino, CA 95014-3255
(408) 777-3354
FAX: (408) 777-3333

PUBLIC WORKS DEPARTMENT
Environmental Division

September 1, 2005

Mr. Bruce Wolfe, Executive Officer
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: City of Cupertino Urban Runoff Management Program
FY 2004-2005 Annual Report

Dear Mr. Wolfe:

This report is submitted by the City of Cupertino, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a.of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2004-2005 in accordance with the City of Cupertino's Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 1997 and updated in October 2000 and September 2004, and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 04-05 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

- A: - Certification Statement
- A1: - Performance Standard Certification Form
- B: - ICID Elimination
- C: - Industrial/Commercial Discharger Control Program
- D: - Public Agency
  - D - 1: Public Streets, Roads & Highways O & M and Rural Roads
  - D - 2: Storm Drain Operation and Maintenance
  - D-3: Corporation Yards Operation and Maintenance
- E: Water Quality Monitoring
- F: Permit Reapplication Process
- G: Trash Inventory and Management
- H: Public Information & Participation
- I: New Development Planning Procedures
- J: Construction Inspection
- K: Pesticide Management
- L: Mercury Pollution Prevention
- M: Copper and Nickel Action Plan
- N: Staff Training Summary Table

- Appendix: Acronyms

Responses to Regional Board Staff's comments on the FY 03-04 Annual Report (April 8, 2005 letter) have been provided in a separate submittal in May 2005 and any requests to improve the annual report have been addressed.

Program Highlights and Accomplishments

Early in the fiscal year the Urban Runoff Management Plan final revisions were made and submitted to the RWQCB in September 2004.

New Development and Construction Controls (Planning Procedures Performance Standard):

A revised draft of Cupertino's "Nonpoint Source Pollution Prevention and Watercourse Protection" ordinance was prepared in March 2005 in anticipation of the final Group 2 requirements. City staff tracked the negotiations of the Tentative Order relating to C.3 and HMP. Subsequently, more changes were required to the ordinance for adoption in October 2005.

Cupertino didn't have any Group 1 projects to report on this year but anticipate a couple of projects to report in the 05-06 Annual Report.

Although the City had no Group 1 projects that qualified for reporting in the New Development Table, staff still incorporates site design, source controls and treatment measures into small projects. The photo on the cover of this report shows pavers on sand installed at a local coffee shop outdoor dining area, adjacent to pavers on concrete in the City's right of way. At this particular site a small swale was constructed to treat and infiltrate roof drain water.

Mercury:

The outreach efforts countywide, funded from the Mercury Education Project, aimed at collecting fluorescent lights has made a great difference in the number of lights collected at all collection sites. The number of pounds and feet of lights collected has more than tripled over the prior year.

Website:

Major changes were made to the City's website by adding documents and links related to C.3. The information is easily accessible and in one place for developers, engineers and architects, as well as city employees.

Thank you for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact me at (408) 777-3242.

Cupertino

P.S. Id.	*Activity*	*FY04-05 Tasks*	*Status / Comments*	*Due Date*	*Responsible Party*
Illicit Connection & Illegal Dumping Elimination Activities					
ICID PS-2	Staff training	Hold annual training for urban runoff inspector and on-call staff.	The NPS Prgm Mgr met with the city's NPS inspector on 5/3/05 for a formal review, as well as meeting on several other occasions, informally. On-call staffs were trained as part of the overall corp yard training held 3/24/05.	1/05	Public Works Dept.
ICID PS-4	Field Investigations	NPS inspector annually walks the creeks, watching for evidence of any illegal dumping or illicit connections.	Throughout the Spring, the nonpoint source inspector walked the creeks in Cupertino. No evidence of homeless camps, broken sewer lines, or trash was found.	On-going	Public Works Dept.
ICID PS-6	Enhanced reporting requirements	Provide quarterly reports to Program.	Quarterly reports were submitted to Program staff as requested.	Quarterly	Public Works Dept.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report: General Tasks
Cupertino

P.S. Id.	*Activity*	*FY04-05 Tasks*	*Status / Comments*	*Due Date*	*Responsible Party*
ICID PS-7	Effectiveness Evaluation	Review and evaluate the effectiveness of city efforts.	City staff has examined the data and found a total of 23 incidents where 19 required some type of enforcement action. The remaining 4 incidents were follow-ups to outside referrals, but of these, 2 were complaints not found, 1 was an allowable discharge and the other the violator was unknown. The most incidents were from two categories; food facility oil & grease discharge and surface cleaning discharge with 4 incidents each. There were a variety of problems; grease trap overflow, compactor leaking and washing into storm drain, using soap and solvents for surface cleaning. It has been noted that 2 incidents occurred at the same location but for different violations. Tracking the information by computer allows city staff to easily identify repeat problem locations from year to year. Again this year, there doesn't appear to be any major pattern emerging in any one category. The inspector educates violators at the time of the incident and distributes educational materials. The city will continue to provide articles in the city newsletter on topics such as the proper way to discharge pool water, soapy carwash water and disposal of car fluids.	7/05	Public Works Dept.

Industrial/Commercial Discharger Control Program

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report: General Tasks
Cupertino

P.S. Id.	*Activity*	*FY04-05 Tasks*	*Status / Comments*	*Due Date*	*Responsible Party*
Industrial/Commercial Discharger Control Programs					
IND-PS-3	Coordination with Health Dept.	Continue to hold an annual overview of the restaurant inspection program with the Co. Health Dept.	A training session was held 4/24/05 with the County Health Dept. along and reps from the WV cities, County and WV Sanitation Dist. on restaurant inspections' tracking, enforcement, data collection and public education materials.	5/05	Public Works Dept.
IND PS-3	Check for new industrial businesses.	In Spring '05 the city's Industrial Inspector will review applications for "Tenant Improvements" (TI) in the Building Dept. to determine if any of the businesses on our two light-Industrial streets had changed their operations and should be included in our routine Industrial inspections.	No improvements were found that would require industrial inspections.	Spring 05	Industrial inspector
IND PS-3	Commercial Inspections	There will not be any service station inspections this year since they were all inspected in FY 03-04. Inspections take place bi-annually.	No inspections by city staff to report this year, service stations are inspected every other year. The County Health Dept. inspected 263 facilities in Cupertino for a total number of 689 inspections. One warning notice was issued.	Report in 9/04 AR	Industrial Inspector
IND PS-4	Staff training	Hold annual training for Industrial Inspector.	A SCVURPPP sponsored training was held on 4/5/05 at the City's community center. Two nonpoint source inspectors attended along with the environmental programs assist. Unfortunately, the primary industrial inspector was not able to attend due to severe staffing shortages in his dept., but was given information and training documents.	2/05	Public Works Dept.
IND PS-4	Enhanced reporting requirements	Continue to track all non-compliance, follow-up enforcement actions and final resolutions resulting from inspections. Submit data to the Program quarterly.	Completed data on restaurant inspections was submitted to the Program in 7/05.	On-going	Public Works Dept.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report: General Tasks
Cupertino

P.S. Id.	*Activity*	*FY04-05 Tasks*	*Status / Comments*	*Due Date*	*Responsible Party*
IND PS-4	Effectiveness Evaluation	Review and evaluate the effectiveness of city efforts.	County staff reported one warning notice in Cupertino during their restaurant inspections related to urban runoff. The City and County have established a pattern of annual meetings for training and/ or program review that are working well and improving the inspection process. The City's nonpoint source inspector has reported 7 ICID incidents occurring at restaurants this past fiscal year (see ICID report). The inspector is able to respond to incidents he encounters on his daily travels throughout the city and to calls received from the public and other agencies. This provides an enhanced inspection program in addition to the County DEH inspections.	7/05	Public Works Dept.

Public Streets, Roads, and Highways Operation and Maintenance and Rural Roads

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report: General Tasks
Cupertino

P.S. Id.	*Activity*	*FY04-05 Tasks*	*Status / Comments*	*Due Date*	*Responsible Party*
Public Streets, Roads, and Highways Operation and Maintenance and Rural Roads					
PSRH PS-3	Staff training	Hold annual training for public works, streets division staff and public works supervisors.	Annual training was held on 3/24/05 for the streets, parks maintenance, facilities and other corporation yard staff. There was an opportunity for staff to ask questions about storm water concerns in general and specific PW SOPs. Annual training for Public Works staff: Topics included storm drain system operations and maintenance, corporation yard operations and maintenance, public streets and rural public works operation and maintenance, review of surface cleaning/steam cleaning/pressure washing/dumpster and graffiti cleaning BMPs, dumping incidents, corp yard SWPPP, pest management, limiting the use of mercury containing products, and proper disposal and clean-up of mercury containing products.	1/05	Public Works Dept.
PSRH PS-5	Effectiveness Evaluation	Review and evaluate the effectiveness of city efforts.	Many of the topics have been covered previously and the employees are very knowledgeable in those subjects. This year emphasis was placed on BMP's regarding surface cleaning/steam cleaning/pressure washing/dumpster and graffiti cleaning.	7/05	Public Works Dept.

City of Cupertino

FY 04- 05 Annual Report

Attachment D-2

Storm Drain Operation and Maintenance

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report: General Tasks
Cupertino

Storm Drain System Operation and Maintenance

SD PS-1	Storm Drain Maintenance	All tasks are routine and on-going	The City's contractor vacuums all of the storm drain inlets on a 2-year rotating basis. Due to financial constraints, the City no longer vacuums all storm drain inlets each year.	On-going	Public Works Dept.
SD PS - 2	Storm Drain Operation and Maintenance	Review and evaluate one BMP, with input from maintenance staff. Evaluate "hot spots" as appropriate.	It is apparent during annual training that corporation yard staff is well aware of the referral and follow-up process between corp yard staff and the city's nonpoint source inspector. The city's illegal dumping records indicate several interdepartmental referrals. The nonpoint source inspector has worked for the city for 30 years and is well known among the staff. The city has not found any on-going hot spots, the overall storm drain system is working well.	2/05	Public Works dept.
SD-4	Annual training	Hold annual training for staff responsible for the maintenance of the stormdrain system.	Annual training was held on 3/24/05 for the streets, parks maintenance, facilities and other corporation yard staff. There was an opportunity for staff to ask questions about storm water concerns in general and specific PW SOPs. Topics included storm drain system operations and maintenance, corporation yard operations and maintenance, public streets and rural public works operation and maintenance, review of surface cleaning/steam cleaning/pressure washing/dumpster and graffiti cleaning BMPs, dumping incidents, corp yard SWPPP, pest management, limiting the use of mercury containing products, and proper disposal and clean-up of mercury containing products.	2/05	Public Works dept.
SD PS-5	Effectiveness Evaluation	Review and evaluate the effectiveness of city efforts.	Storm drain vacuuming provides the benefit of preventing blockage of the drainage system from a build-up of debris and prevents pollutants of all types that have settled into the drains from being flushed into creeks. Corporation yard staff commented on the usefulness of the information presented in the training, particularly the portion on	7/05	Public Works dept.

			steam/surface cleaning and how to properly cover the storm drains during this process.

Watershed Management					
Trash Work Plan	Trash areas ID	Work with the Program to identify trash "hot spots" or trash problem areas within the city.	Complete 12/03. There were no new "hot spots" identified in FY 04-05.	Report in 9/05 AR	Public Works Dept.
Trash Work Plan	Trash mgmt practices	Support Program staff in identifying existing trash management practices.	City staff completed the Trash Management Practices Survey, developed by the Program in FY 03-04. No further action was required,	Task Completed	Public Works Dept.
Trash Work Plan	Trash documentation	Provide Program staff with documentation regarding trash complaints/incidents.	Code Enforcement reported 27 calls for service related to unlawful dumping.	Report in 9/05 AR	Public Works Dept.
Trash Work Plan	Trash eval. wkshop	Participate in trash evaluation methodology training workshop.	The City's contract consultant attended a trash evaluation training in July 2004. The training covered the Keep America Beautiful (KAB) Litter Index, the Regional Board's Rapid Trash Assessment, and SCVURPPP's Trash Problem Area Data Collection form.	FY 04-05	Public Works Dept.
Trash Work Plan	Street sweeping data	Collect street sweeping data and provide data to Program for a street sweeping effectiveness evaluation.	Monthly street sweeping reports for July through June were submitted to the Program for compilation in July 2005.	Report in 9/05 AR	Public Works Dept.
Trash Work Plan (New)	Trash evaluations	Use Program guidance to develop a strategy to conduct trash evaluations in watersheds.	The City conducted a total of 12 trash assessments in FY 04-05 in 6 different locations using the KAB index. The City also participated in 4 regional trash assessments using the Regional Boards Rapid Trash Assessment criteria.	FY 04-05	Public Works Dept.
Trash Work Plan (New)	Trash evaluations	Conduct trash evaluations in a subset of trash problem areas.	Trash evaluations were conducted in October 04 and again in January 05. Reports were submitted to the Program for compilation in April 2005.	FY 04-05	Public Works Dept.
Trash Work Plan (New)	Trash mgmt practices	Identify and begin implementation of trash control measures, as appropriate, to address trash problem areas within high priority areas.	The City's "hot spots" had little to no trash evident in both rounds of assessment. Most sites are City maintained and get cleaned on a regular basis. The site with	FY 04-05	Public Works Dept.

CL01	11/15/2004	La Avenida Stevens Creek Trailhead, 100 Ft South of island in creek	RWQCB Version 7.0	46	Most trash accumulation- waterborne with some potential trash coming from pedestrians along nearby trail.	Shoreline Park Rangers patrol the area daily and pick up trash on the trail, but not in the creek. Past clean-ups have occurred at this location. Site will continue to be monitored in cooperation with Stevens and Permanente Creeks Watershed Council volunteers.	Most trash was caught on overhanging willow branches into the west channel of the creek. Very little trash was visible on the east channel side.

Stevens Creek							
ID #	**Date**	**Location of Trash Problem Areas**	**Assessment Tool**	**Score**	**Trash Sources**	**Evaluation Results**	**Comments**
CL02	11/15/2004	El Camino Real Bridge crossing, 100 ft north	RWQCB Version 7.0	52	Some trash accumulation is waterborne, other is from debris/ shopping carts being thrown from the El Camino Bridge.	Area downstream of a homeless encampment but only some debris from that source present. Several shopping carts had been pushed from the bridge. Past volunteer cleanups have occurred in this area. The area will continue to be monitored and kept on the clean up list.	Site accessed through gated SCVWD trail, adjacent to the Kelly More Paint store. Area totally fenced off from public. However, kids/graffiti artists still decorate the concrete on the bridge supports.
CL03	11/19/2004	McClellan Ranch, Trailhead access area, 50 ft upstream and 50 ft downstream of the trailhead sign	RWQCB Version 7.0	112	Minor amounts of trash from trail users.	Very small amount of litter along side of trail access area. Site is cleaned at least 2x per year during creek clean up events. Site will continue to be monitored and assessed for trash periodically.	Large blocks of concrete on western bank, used for stabilization purposes many years ago (very overgrown). Historical metal pipes present were used for pumping water from the creek when the site operated as a farm/ranch.
CL04	11/19/2004	Moss Rock, on Stevens Creek Canyon Road, 100 ft downstream of the north end of the rock.	RWQCB Version 7.0	104	Small amounts of trash coming from occasional users of the site for "parties" or as a local youth hang out.	Small quantity of trash present due to area being a local “party” spot. Mostly alcoholic beverage bottles and cans present. Site is monitored and cleaned up at least 2x per year during creek clean up events. Baseline site for RWQCB. Site will continue to be monitored and assessed for trash periodically.	Significant amount of graffiti where moss is not present on the rock. Large 4x4 wood post, embedded metal piece, and red brick left behind.

Cupertino

General Outreach

Activity	Level of Implementation	Evaluation
NPS literature distribution to the general public at city facilities: • Library • City Hall lobby • Quinlan Community Ctr. • Planning/ Building Dept. counter • Backyard Compost workshops	**NPS Prgm. literature:** Pests Bugging You?, Grow It, Home Maintenance Tips, eight construction trifolds, Blueprint For a Clean Bay booklet, IPM pest-specific factsheets, Grow-It!, pool water brochure, Keeping It All In Tune, Bay Begins At Your Front Door **HHW Prgm literature:** HHW brochure, Alternatives To Household Chemicals, small business hazardous waste brochure, any new Mercury-products literature **Valley Trans. Agency literature**: bus maps and schedules **Air District** and **Rideshare literature:** Spare-the-Air brochures; transportation alternatives brochures	This material is easily obtained from the agencies or is copied by staff internally. The materials continue to be taken by the public at a pace where a weekly visit to each site is necessary.
Rideshare Week and Bike-to-Work Day: Encourage participation among city employees and the general public	E-mail messages: Email messages to employees in May for Bike-to-Work Day. Bike-to-Work Day breakfast for city employees: this event has been discontinued, but Cupertino's Bicycle Commission supports energizer stations at the Quinlan Community Center, Apple Computer, and Hewlett Packard sites. Articles in Scene newsletter: Articles were published in the May city newsletter, the Scene, for Bike-to-Work Day.	The email message serves to remind employees about this environmentally friendly form of transportation and the related activities occurring on Bike-to-Work Day. A few city staff members participate, but most drive as they have other activities or live too far from work. According to our Bicycle and Pedestrian Commission, 52 cyclists stopped by the Quinlan Community Center Energizer Station, 30 riders stopped by the Apple Computer Energizer Station, and 58 riders stopped at the Hewlett Packard site.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report: General Tasks
Cupertino

Activity	Level of Implementation	Evaluation
HHW display at Quinlan Community Ctr	General HHW display set up 2 wks prior to Cupertino HHW event in 8/28/04. Articles in Scene newsletter. Articles and ads in the Cupertino Courier and San Jose Mercury Guide (Cupertino region)	The County now surveys the HHW customers about how they became aware of the program-and sorts the data by city. In the most recent data available, FY 2004, residents found out about the program this way: • By calling the garbage company: 31% • By reading the city's newsletter: 33% • By calling the City: 9% • From a flyer: 7% • From the City's website: 8% We can conclude that our city newsletter, the Scene, is a valuable outreach tool. We will continue to buy ads in the local paper and present a display of what typical HHW products can be taken to a HHW event just before our major August HHW event.
NPS literature distribution to residents at Cupertino HHW event	The County's HHW staff distributes the following pieces, at the events, on behalf of the City of Cupertino: Alternatives to Household Chemicals, Santa Clara County HHW brochure, Computer and TV Recycling, and Donation Agency List, An event was held in Cupertino on 8/28/04.	We are assuming that those users of the HHW event are environmentally conscious, and are probably the kind of people who are interested in the IPM literature.
Audubon Fair; literature provided to Parks and Rec. staff to distribute at fair.	Pests Bugging You, Alternatives To Household Chemicals, Home Maintenance Tips brochure, and various IPM factsheets distributed on 10/23/04 at McClellan Ranch.	According to the City's naturalist, who staffed the event, 400-600 attended. Brochures were available to those in attendance.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report: General Tasks
Cupertino

Activity	Level of Implementation	Evaluation
Website: Include NPS information in city's website, especially new IPM website links.	The City's environmental division website has a specific section on Pest Management and direct links to the Program's IPM website and new information on Mercury.	On-going. As the public becomes more accustomed to using websites, this tool becomes a valuable and easy to use method of education the public.
Watershed Education & Outreach Campaign: Conduct or participate in local activities that are coordinated with the Watershed Education & Outreach campaign. Evaluate the effectiveness of PI/P projects by direct or indirect means as appropriate.	Staff attends WE&O campaign planning meetings and reviews and critiques work plans and campaign products. The City participated in staffing the Annual Home Show in conjunction with program consultants and staff from other jurisdictions.	The Cities Environmental Program Assistant staffed a 6-hour shift for the Annual Home Show held at the San Jose Convention Center. This past show attracted over 22,000 people. Outreach materials distributed included IPM fact sheets, pencils, Got Bugs Magnets, Activity Books, Kids Guide to Backyard Bugs, Grow It Guide, HHW brochure, and Pools and Spas Brochure.

"Hazardous Waste Dropoff" (8/11/04, 8/1804) 4'x 6" ad placed by city to encourage residents to use the HHW program.

"Computer Recycling" (12/15/04, 12/22/04, 4/13/05, 4/20/05) 4'x 6" ad placed by city to remind residents of program.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report: General Tasks
Cupertino

Type: Targeted Outreach

Targeted Group and Activity	Level of Implementation	Evaluation
City staff annual training: • Building inspectors • Public Works inspector and plan checker • Planning Dept. planners • NPS inspector (in Public Works) • Corp yard & street dept staff • Parks and Rec staff managing golf course maintenance contract and managing facilities pesticide spraying contract • City employees for general info on less-toxic alternatives for their own home use, and info on not using pesticides on the job, if unauthorized (detail in the Pesticide Workplan)	See Training Activities Table, for details about specific trainings. NPS literature distributed, as appropriate E-mails: • Sent 5/13/05 informing them of less toxic alternatives to pesticides and inviting them to get more info and see display. • Sent 5/17/05 informing them of Bike to Work Day Display: for city employees set up in May 2005 with the IPM fact sheets.	**General remarks:** Trainings regularly provide an informal forum for staff to discuss any recent concerns about operations. The city believes that employees understand stormwater concerns as evidenced by the number of public incidents reported by staff, the types of informed questions asked by staff, and the tradition of on-going training for many years. **Building Dept:** Focus: performance standard, construction BMPs and source control BMPs **PW and Planning Plan Checkers:** Focuses: C-3, Group 1 & 2, HMP Pesticide Control, new website information. **Co**rp Yard and Street Dept training: Focus: storm drain system operations and maintenance, corporation yard operations and maintenance, public streets and rural public works operation and maintenance, review of surface cleaning/steam cleaning/pressure washing/dumpster and graffiti cleaning BMPs, dumping incidents, corp yard SWPPP, pest management, limiting the use of mercury containing products, and proper disposal and clean-up of mercury containing products. In addition, building inspectors, planners, public works inspector and the city's storm water inspector may attend Program-sponsored training events.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report: General Tasks
Cupertino

Targeted Group and Activity	Level of Implementation	Evaluation
City contractors: Require PCOs, contracted for work on city facilities, to use pest control methods consistent with our IPM policy Require these PCOs to attend training workshops, as appropriate. (See Pesticide workplan for details.)	See "Training Activities" Contract specifications require an IPM approach.	The City's contractor for Blackberry Farm has attended accredited courses through the Continuing Education Center for Pest Management. He maintains his license as a Pest Control Advisor. The City's pest management policy and SOPs are reviewed with the contractor annually for compliance.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report: General Tasks
Cupertino

Targeted Group and Activity	Level of Implementation	Evaluation
Creek cleanup volunteers	*Scene* articles	Article in May '05 *Scene* newsletter
Nurseries: Pt-of-sale IPM campaign (2 stores: Yamagami's Nursery and Summer Winds Garden Ctr.)	IPM Partnership trainer. Program IPM factsheets	By EOA staff. Set up by EOA staff and Program contractor in the Spring. This is a very efficient way to be sure the nurseries get uniform and effective training, and up-to–date information on new products.
Auto Repair Shops	Education of shop mgrs. during bi-annual inspections by City Bldg. Dept staff; use Program lit, if necessary	Most auto repair shops comply with the city's stormwater policy. It is rare when the inspector requests any corrections. Auto repair shop inspections are conducted bi-annually and were completed in FY 03-04. None were conducted in FY 04-05, but will be done again in FY 05-06.
Restaurant education	Restaurant posters are distributed at inspections by County health inspectors, or by city NPS inspector, if responding to problems. County health inspector routinely inspects all restaurants annually, and inspects on an "on-complaint" basis. Additionally, the city's inspector provides a copy of a restaurant worker tri-fold (available in either English, Spanish, Vietnamese, or Chinese) explaining proper restaurant cleaning behavior, as needed. Health Dept. inspectors are now also distributing the recently acquired "Don't Set a Table for Pests" brochure.	The County continues to distribute posters to new restaurants that don't have them. When the city's NPS inspector responds to spills or illegal discharge problems at restaurants, he provides verbal guidance, written violation notices, and often leaves a program brochure, cards or poster. The illustrations on the IC/ID cards are helpful for situations where there is a language barrier. The Chinese version of the tri-fold is helpful in our community, which has a high percentage of Chinese speaking people, and many Chinese restaurants

Development community	Literature distributed at Planning/Bldg counter: • 8 construction tri-folds • Blueprint for a Clean Bay booklet • Small business haz waste brochure • City's post-construction matrix • stormdrain stencils • Pest Resistant Plant list • Pesticide Control Measures for Development Projects • Landscape Maintenance Techniques for Pest Reduction • Construction BMP sheet—is required to be incorporated in all building plan sets.	An important piece distributed by public works and building depts. is our formal Construction BMP sheet. The sheet is attached to all plans that move through the planning and bldg depts. No plans are finalized without it. It is made clear to the project applicant that the information must be conveyed to all subcontractors and that they are responsible for their sub's behavior on the site. The sheet will provide evidence that the NPS concerns were explained to the applicant in case of violations during construction.
	Website information: **Construction Requirements** California Stormwater Quality Association(CASQA) Construction BMP Handbook California Stormwater Quality Association(CASQA) Development BMP Handbook State Water Resource Control Baord (SWRCB) NPDES Construction Permit Website Blueprint For a Clean BayCupertino Muni Code 9.18.040 Discharge to SD prohibited 9.18.090 Storm Water Prevention Plan (SWPPP)	Many C.3 related documents and links were added to the City's website this fiscal year. The information is easily accessible and in one place for developers, engineers and architects, as well as city employees.

Problem contractors in the field	Primarily verbal. Program's specific activities cards.	Specific activity cards are available to give to violators in the field on an as-needed basis.
Residents living near creeks	Water District's Stream Care Guide, available at Planning counter. Restock as needed, but now out-of-print.	No feedback from residents, but the guides continue to be taken from the counter display area. Useful to have a piece that addresses the special responsibility of residents that live near creeks.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report: General Tasks
Cupertino

Targeted Group and Activity	Level of Implementation	Evaluation
Gardening community—city staff to identify and coordinate with local gardening clubs to provide them with IPM info.	Discontinued in FY 04-05 and removed from FY 05-06 workplan due to lack of response from the various gardening groups.	There was no response from the gardening groups, but currently we are reaching our local gardeners with IPM info at nurseries, in the library, city hall, and the community ctr., on the website, and at compost workshops.
Environmental groups, local—city staff to provide IPM factsheets to Audubon Society for their center and for their annual event.	The following pieces of literature are provided: Pests Bugging You, Alternatives To Household Chemicals, Home Composting Literature and Workshop information, Home Maintenance Tips brochure, and various IPM factsheets.	These pieces of information are displayed and available year round at the Audobon Society Center. They are also featured and displayed at their annual event in October.
Provide info on IPM workshop opportunities to school districts and sanitary district. (See Pesticide Workplan for details.)	IPM sheets. Info on IPM websites	Nareesh Duggal of Santa Clara County contacts these groups as trainings become available.
Outreach to local restaurants (working with the County Health inspectors) to encourage less-toxic control (Program Pesticide Workplan for details.)	Restaurant posters are distributed at inspections by County health inspectors, or by city NPS inspector, if responding to problems. County health inspector routinely inspects all restaurants annually, and inspects on an "on-complaint" basis. Additionally, the city's inspector provides a copy of a restaurant worker tri-fold (available in either English, Spanish, Vietnamese, or Chinese) explaining proper restaurant cleaning behavior, as needed. Health Dept. inspectors are now also distributing the recently acquired "Don't Set a Table for Pests" brochure.	The County continues to distribute posters to new restaurants during annual inspections. The enclosed letter from the Program, accompanying the poster, was revised this year to reflect updated information. When the city's NPS inspector responds to spills or illegal discharge problems at restaurants, he provides verbal guidance, written violation notices, and often leaves a program brochure, cards or poster. The illustrations on the IC/ID cards are helpful for situations where there is a language barrier. The Chinese version of the tri-fold is helpful in our community, which has a high percentage of Chinese speaking people, and many Chinese restaurants

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report: General Tasks
Cupertino

Public Participation

Activity	Communication Vehicle	Evaluation
Participate in regional creek cleanup event (if creeks in Cupertino need cleaning). Publicize cleanup.	Article submitted to May '05 Scene City did not host a creek cleanup site.	The Water district bought ads in the Courier and mailed out reminders to last year's volunteers. A site is hosted at the Stevens Creek reservoir, adjacent to the city limits. City staff find this to be a more useful use of the volunteers time, as we have not found any creeks in dire need of cleaning in Cupertino

Santa Clara Valley Urban Runoff Pollution Prevention Program

Cupertino

School/Education Outreach

Activity	Communication Vehicle	Evaluation
Creek Education project available to all 3rd and 3rd/4th teachers in School District: about 82 classes (half are in Cupertino; remaining schools in cities of San Jose, Sunnyvale, Santa Clara, Saratoga, Los Altos). Teachers are trained to teach the creek ed. unit to their own classes, and co-lead creek field trip for students.	Teachers are trained to teach the creek ed. unit to their own classes, and co-lead creek field trip for their students; City's Park & Rec naturalist teaches the teachers. City provides two docents for creek tours. 4-hr training workshops for teachers; 2-wk curriculum for students taught by teachers, w/ half-day creek field trip.	This program is very popular with our school district and the teachers. We started the program in 1995, and continue to refine it as needed. During the one-hour lecture and review of general NPS and creek concepts that precedes the actual creek walk, our docents have the opportunity to observe whether each teacher has, in fact, spent time in the classroom preparing the students for the field trip. Typically, almost all of the students are familiar with the concepts. This past year we had 1560 students participate and 150 parent helpers.
Respond to school group requests for tours, workshop, field trips, as possible	The city's Park and Rec staff naturalist is now assisting the students of Monta Vista High School to regularly perform water quality monitoring and research in Stevens Creek (the city's principal creek, 2 blocks from the high school).	In general, creek and water quality studies have become more common in schools, without the intervention of the city. However our city's naturalist is well known among local teachers as a science resource, and is often informally drawn into school projects. Since she is the lead docent in our 3rd-grade creek program, she is already very aware of stormwater and watershed issues, and shares that info with the teachers and students.

City of Cupertino

FY 04- 05 Annual Report

Attachment I

New Development Planning Procedures

Activity	Permit Item Source	FY04-05 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
NEW DEVELOPMENT AND CONSTRUCTION CONTROLS – PLANNING PROCEDURES					
C.3.b Development Project Approval Process -- Planning Procedures					
Ordinance Revision	C.3.b.2	Modify existing review policies, procedures, and/or conditions of approval to incorporate C.3 requirements (based on results of tasks under C.3.c. through C.3.m.)	The City prepared a draft revision to its Water Course Protection ordinance to include Numeric Sizing Criteria requirements for Group 2A projects in March 2005. Completion of the proposed ordinance revision was held-up pending negotiations between the Regional Board & SCVURPPP on the Group 2 definition. As the current schedule calls for Group 2A implementation to begin by October 20, 2005, the proposed ordinance revisions will be brought to the Cupertino City Council by the end of summer 2005. The proposed ordinance revisions will also include requirements for Group 1 projects to comply with HMP requirements. Code changes will be discussed in the FY '05-'06 Annual Report.	9/04 AR Group 2 Ordinance Revision 9/05	Public Works, Planning, City Attorney
Staff Training	C.3.b.3	Continue to train Cupertino staff in planning, building, and engineering departments on the C.3. provisions as they are refined.	Public Works Engineering staff attended the SCVURPPP BMP O&M Verification workshop on June 9, 2005. In-house training given to Planning and Public Work staff on June 22, 2005. Topics included Group 2A and HMP requirements and reviewing projects for architectural copper & pesticide control measures.	6/05	Public Works – Environmental Division
C.3.c. Requirements for Tier 1 and Tier 2 Projects					
Guidance Manual Guidance Manual (continued)	C.3.c.4	Review Guidance Manual developed by Program and, if needed, customize for projects likely in Cupertino.	During FY '04-'05, the City had planned to modify its *Stormwater Quality Guidelines for Development Projects* handout for developers to include Group 1 and Group 2 projects. However, this effort was deferred due to on-going negotiations between the SCVURPPP and the Regional Board regarding the Group 2	9/04 AR Revise Guidance Document 9/05	Public Works Environmental Division

Cupertino

Activity	Permit Item Source	FY04-05 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
			project definition. The City's Guidelines will be revised by September 2005, in preparation for the Group 2A implementation deadline on October 20, 2005. The changes will be discussed in the '05-'06 Annual Report. In June 2005, the City added a stormwater regulations section to its web site. This web page links users to the City's Storm Water Quality Guidelines and many other tools, including the SCVURPPP C.3 and the CASQA Handbooks.		
Group 2 Alternative Project Size	C.3.c.8	Conduct analysis of alternative project size and prepare proposal for submittal to Regional Board.	As requested, the City provided SCVURPPP with raw development data related to project type, size and amount of impervious surface existing, replaced, or newly created between April 17, 2002 and September 5, 2003.	4/15/04	Public Works Environmental Division
Guidance Manual Update	C.3.c.9	Update Guidance Manual and Performance Standard for Group 2 projects as needed.	This work was deferred pending negotiations with the Regional Board on the Group 2 definition.	4/05 (original date)	Public Works Environmental Division
C.3.e Operation and Maintenance of Treatment BMPs					
Data Form and Staff Training	C.3.e.1	Log information about treatment BMPs installed at approved Group 1 and 2 projects and maintain a list or database of properties, treatment BMPs, and responsible operators.	In fall 2004, the City began working with SCVURPPP and WVCWP staff on a BMP O&M database. The goal was to augment the municipalities' existing Access databases to include BMP O&M data. The City's engineering consultant continues to coordinate with SCVURPPP staff on integrating the BMP inspection forms and the BMP O&M database. There have been no Group 1 or Group 2 projects approved in Cupertino.	Ongoing	Public Works Environmental Division
BMP O&M Agreement Mechanism	C.3.e.2	Review use of City's BMP O&M and easement agreements and consider modifications, as needed.	A BMP O&M agreement template was prepared and submitted to the Regional Board in September 2005, as part of the	Ongoing	Public Works, Planning, City Attorney

Santa Clara Valley Urban Runoff Pollution Prevention Program

Cupertino

Activity	Permit Item Source	FY04-05 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
BMP O&M Agreement Mechanism (cont.)			Planning Procedures Performance Standard. Since no Group 1 or Group 2 projects have been approved in Cupertino, review of agreement has been deferred until the agreement is actually used.		
BMP Inspection Program	C.3.e.5	Develop local program for inspecting a subset of prioritized treatment BMPs to verify that proper O&M is being performed by the responsible party.	A description of the City's BMP O&M program was prepared and submitted to the Regional Board in September 2004, as part of the Planning Procedures Performance Standard. Subsequently, the Regional Board's comments on the City's '03-'04 Annual Report (dated 4/8/05), required that the FY '04-'05 Annual Report include "a detailed discussion of the organization structure of the Cupertino BMP O&M Inspection Program." A copy of this section of the Performance Standard is attached. The inspection forms included in this document will likely be significantly modified to be consistent with SCVURPPP data collection forms to allow for Program-wide tracking of effectiveness (similar to that done for the IND Inspection Program). Augmenting the City's BMP O&M Inspection Program to include Group 2A projects was deferred to September 2005, due to the negotiations regarding Group 2 definitions. A discussion of this modification to the BMP O&M Inspection Program will be included in FY '05-'06 Annual Report.	FY '05-'06 AR	Public Works Engineering
Reporting Reporting (cont.)	C.3.e.6	Report on the Co-permittee's treatment BMPs O&M verification program in each annual report, including organizational structure, evaluation of effectiveness, and planned improvement to the program. Include a list or summary of treatment	Since no Group 1 or Group 2 projects have been approved in Cupertino, there are no results or analysis to report upon this year.	Ongoing	Public Works Environmental and Engineering Divisions

Santa Clara Valley Urban Runoff Pollution Prevention Program

Cupertino

Activity	Permit Item Source	FY04-05 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
		BMPs inspected during the year, inspection results, and any required follow-up and correction.			
C.3.f Hydromodification Management Plan					
Staff training	C.3.f.3	Upon adoption by the Regional Board, begin implementation of HMP as part of requirements for Group 1 projects that may cause increased erosion or other related impacts. Before adoption, encourage early implementation of likely elements of the HMP where possible.	Where applicable, HMP to be integrated into existing programs for development, review, construction inspection and BMP operations and maintenance. City staff to receive incremental training in HMP requirements. In early December 2004, as prompted by the SCVURPPP, Cupertino Planning staff evaluated opportunities for early implementation of the HMP. At that time, there were no Group 1 projects anticipated on vacant lands subject to the HMP. Most Group 1 projects are redevelopments on relatively small sites (well under 20 acres). Subsequent to that time, one project between 20 and 50 acres appears to be on the horizon. Training on HMP requirements was given to Planning and Public Work staff on June 22, 2005.	*TBD pending RB approval*	Public Works and Planning
C.3.h Alternative Certification					
Reporting	C.3.h.1	List projects certified by someone other than City staff.	There were no projects submitting Alternative Certification.	Ongoing	Public Works Environmental Division
C.3.j Site Design Measures Guidance and Standards Development					
Standards Revisions	C.3.j.4	Incorporate any revised standards and guidance into local project approval process and “fully implement” the revised standards and guidance.	The revised parking ordinance, adopted in July 2004, requires bio-swales in parking lots and permeable or semi-pervious parking stalls. Planners reported no suitable projects where these requirements could be incorporated for this fiscal year.	9/05	Public Works Environmental Division and Planning

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report: New and Redevelopment Requirements

Cupertino

Activity	Permit Item Source	FY04-05 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
C.3.k Source Control Measures					
Ordinance Revision	C.3.k.	Enhance source control requirements for new and redevelopment projects.	Effective October 2003, the revised City Code includes a sub-section on source controls. These requirements will be reviewed annually to determine if changes are needed. No changes were needed in 04-05.	Ongoing	
Reporting	C.3.k.3	Implement source control measures requirements by including appropriate conditions of approval in Group 1 and 2 projects. Report status and provide examples of application of conditions in annual reports.	Since no Group 1 or Group 2A projects were approved in 04-05, there are no examples to report.	Ongoing	Public Works Environmental Division
C.3.l Update General Plans					
General Plan Review	C.3.l.1	Review current General Plan policies related to water quality and watershed protection and incorporate additional policies as needed to implement C.3.	General Plan revisions continued to go through the public hearing process during FY '04-'05. The current estimate for presenting the revised General Plan to the City Council for approval is August or September 2005. Approved G.P. revisions related to urban runoff pollution prevention will be discussed in the FY'05-'06 Annual Report. Any applicable modifications needed to address the HMP would occur in next scheduled G.P. revision.	9/06 AR	Public Works Environmental Division and Planning
C.3.m Water Quality Review Processes					
CEQA Review	C.3.m.1	Review CEQA initial study checklists and other environmental review documents and modify documents as needed to include questions that sufficiently address water quality impacts of projects.	In June, the initial study source list was revised to include City of Cupertino URPPP, SCVURPPP, SJ Water Co., NPDES Municipal Stormwater Permit, and HMP as additional sources and documents.	9/04 AR	Public Works Environmental Division and Planning

NO PROJECTS TO REPORT						

[1] List all projects with new impervious surface area greater than 10,000 s.f. (Group 1 and 2 projects – see definition on page 3 of the performance standard).

[2] Describe project type, as defined in Provision C.3.c.

[3] "New" is defined as impervious surface created, added or replaced.

[4] If the site is a "significant redevelopment", list the area of land disturbance.

Performance Standard and Supporting Documents for

CITY OF CUPERTINO
PLANNING PROCEDURES

INTRODUCTION

Introduction

The goal of new development and redevelopment control measures is to minimize the storm water quality impacts of land development after construction. These control measures apply to both private development projects and municipal capital improvement projects. The City of Cupertino requires these types of control measures as part of its development plan review procedures, municipal code, general plan, and policies.

The Planning Procedures Performance Standard defines the level of implementation that municipal agencies in the Santa Clara Valley Urban Runoff Pollution Prevention Program (SCVURPPP) must attain in order to demonstrate that their land use planning, development plan review and approval processes control stormwater quality impacts to the maximum extent practicable. This performance standard will be used as the basis for measuring the effectiveness of the City's Planning Procedures activities. Control of impacts on stormwater quality from construction activities is addressed under a separate Construction Inspection Performance Standard, although some overlap exists because the planning process is the most effective mechanism to ensure that projects include erosion and sediment control measures during construction and after completion of construction.

The Planning Procedures Performance Standard was based originally on the San Francisco Bay Regional Water Quality Control Board's April 1994 *Staff Recommendations for New and Redevelopment Controls for Storm Water Programs* (*Recommendations*). The *Recommendations* incorporate the mandates of EPA's storm water regulations as well as the *Coastal Zone Act Reauthorization Amendments.* The performance standard is also consistent with the goals and objectives of the New Development and Construction Activities Component of the Program's *Urban Runoff Management Plan (1997, rev. 2000).* Subsequently, the performance standard was updated to meet the requirements in Provision C.3 of the Program's NPDES permit, amended per Regional Board Order No. 01-119, October 17, 2001.

Performance Standard and Supporting Documents for the
CITY OF CUPERTINO
Planning Procedures

PERFORMANCE STANDARD

1) The City of Cupertino has adequate legal authority to implement new development control measures, including all applicable requirements of Provision C.3, as part of its development plan review and approval procedures and other appropriate new development and redevelopment permitting procedures (Permit Provision C.3.a.i).

2) The City of Cupertino provides developers with information and guidance materials on site design guidelines, building permit requirements, and best management practices (BMPs) for stormwater pollution prevention early in the application process, as appropriate for the type of project and location (C.3.a.ii).

3) The City of Cupertino ensures that the environmental documents required for those projects that fall under CEQA or NEPA review address both significant and cumulative stormwater quality impacts during the life of the project, relevant permit requirements, and specific mitigation measures related to stormwater management. These documents include EIRs, negative declarations, and initial study checklists (C.3.m).

4) All projects subject to City of Cupertino development plan review and approval procedures are encouraged to incorporate appropriate source control and site design measures to minimize stormwater pollutant discharges to the maximum extent practicable[1].

5) The City of Cupertino requires that developers of Group 1 Projects design and implement the following measures to reduce stormwater pollution to the maximum extent practicable.

   a. Site design shall include measures to minimize impervious land coverage, maximize infiltration (where appropriate and designed to protect groundwater quality[2]), and provide detention or retention as part of landscaping where feasible (C.3.b.i and C.3.j);

   b. Source controls[3] shall be required to limit pollution generation, discharge, and runoff as appropriate (C.3.k), including measures to discourage pesticide use (C.9.d.ii);

   c. Stormwater treatment measures shall be designed in accordance with the numeric design criteria in Provision C.3.d;

   d. Increases in peak runoff flow and volume shall be managed for appropriate projects by implementing the guidance in the Program's Hydromodification Management Plan (HMP) for the specific stream receiving the discharge, following approval of the HMP by the Regional Board (C.3.f).

---

[1] Definitions are provided at the end of this document.

[2] Refer to SCVURPPP *C.3. Handbook: Guidance for Implementing Stormwater Requirements for New and Redevelopment Projects*, Infiltration Guidelines.

[3] Source control measures are also required for all discretionary projects that include potential sources of pollutants or activities that are likely to generate pollutants.

6) The City of Cupertino requires developers of projects that disturb a land area of one acre or more to demonstrate coverage under the State General Permit for Storm Water Discharges Associated with Construction Activity (C.3.a.iii).

7) The City of Cupertino requires developers of projects with potential for significant erosion and planned construction activity during the wet season to prepare and implement an effective erosion and/or sediment control plan or similar document prior to the start of the wet season (C.3.a.iv).

8) The City of Cupertino conducts an operation and maintenance (O&M) verification program that includes: (C.3.e)

   a) Compiling a list of private and public properties and responsible operators for all stormwater treatment measures;

   b) Inspecting a subset of prioritized treatment measures for appropriate O&M, on an annual basis, with appropriate follow-up and correction;

   c) Requiring legally enforceable agreements or other mechanisms assigning responsibility for O&M of treatment measures.

9) The City of Cupertino ensures that municipal capital improvement projects include stormwater quality control measures during and after construction, as appropriate for each project, and that contractors comply with stormwater quality control requirements during construction and maintenance activities (C.3.a.v).

10) The City of Cupertino provides training annually to its Planning and Building Division staff, to plan check consultants and to staff in the Public Works Department on planning procedures; ordinances and policies; design guidelines; and BMPs for stormwater pollution prevention (C.3.a.vi).

Performance Standard and Supporting Documents for the
CITY OF CUPERTINO
Planning Procedures
HOW CUPERTINO MEETS THE PERFORMANCE STANDARD

1. Legal Authority (Permit Provision C.3.a.i)

The City has adequate legal authority to implement new development control measures primarily through its Stormwater Pollution Prevention and Watershed Protection Ordinance. There are also relevant ordinances in the Cupertino Building and Zoning sections of the City Code. See Section 2 of this Performance Standard, Legal Authority, for more information.

2. Developer Guidance (Permit Provision C.3.a.ii)

See Section 4 of the Performance Standard supporting documents, Standard Operating Procedures (SOPs). The subsection "General Description of Cupertino's Plan Review Process" provides details about how information and guidance materials are disseminated to the development community.

3. Environmental Review (Permit Provision C.3.m)

Planning staff prepare CEQA Initial Study checklists for private development and City projects using the checklist format available at the State of California Governor's Office of Planning and Research website. The OPR version of this checklist was revised in 1998 and includes more specificity on assessing potential stormwater impacts. Staff in the Planning Division have received training on the requirements of Provision C.3.m and request additional information from the project applicant if needed to complete the Initial Study Checklist. See the SOPs in Section 4 for additional details on the City's environmental review process.

4. Source Control and Site Design Measures

City Municipal Code Sections 9.18.100 and 9.18.110 require that all development and redevelopment projects include permanent BMPs designed and selected to the satisfaction of the Director of Public Works. Section 9.18.110 incorporates, by reference, the latest version of the Cupertino Permanent BMP Selection Matrix, which provides recommended site design and source control BMPs for certain land uses. In addition, Section 9.18.210 of the Cupertino Municipal Code specifies source control BMPs.

The City uses a standard condition of development approval to notify developers that all discretionary projects must include permanent BMPs to control stormwater quality impacts. Community Development and Public Works staff review all development projects for the inclusion of the required permanent BMPs. See the SOPs for more detail on the City's plan review process.

5. Group 1 Project Req. (Provisions C.3.b.i, C.3.d, C.3.f , C.3.j, C.3.k, and C.9.d.ii)

See the response to Item 4, above. Code Sections 9.18.100 through 9.18.180 contain additional requirements for Group 1 Projects. There is a standard condition of development approval used for Group 1 Projects notifying developers of the requirement for a Storm Water Management Plan and the agreements for BMP O&M and BMP Inspection Access. There is also a Public Works Engineering Division standard condition of approval calling for the use of pesticide control measures as part of landscape planning and design.

6. Coverage Under State General Construction Permit (Provision C.3.a.iii)

The City uses a standard condition of development approval to notify developers and contractors that projects disturbing an acre or more must be covered under the State NPDES General Permit for Storm Water Discharges Associated with Construction Activity. City Municipal Code Section 9.18.080 requires preparing a SWPPP, which must be made available at sites covered by the State NPDES Construction permit.

7. Erosion and/or Sediment Control (Provision C.3.a.iv)

City Municipal Code 16.08.110 requires an "Interim" Erosion and Sediment Control Plan. Under City Municipal Code 9.18.130, Group 1 Projects must include the erosion and sedimentation control plan with the required Stormwater Management Plan.

8. BMP O&M Verification Program (Provision C.3.e)

As a condition of the development permit, each owner of a Group 1 project in Cupertino is required, under Section 9.18.160 of the Municipal Code, to enter into a recorded agreement with the City for on-going operation and maintenance of all permanent on-site BMPs. This obligation runs with the land and is binding on all future owners of a Group 1 property. The City uses a standard condition of development approval to notify developers of this requirement.

The City keeps records of the location, ownership, and inspection status of permanent BMPs at private and public Group 1 properties using an Excel spreadsheet. The Public Works Inspectors inspects the BMPs at each Group 1 site annually.

9. City Capital Improvement Projects (Provision C.3.a.v)

The City includes specific construction BMP language in the contract specifications for all municipal capital improvement projects (CIPs).

Consultants design most non-maintenance CIPs. Public Works Project Management staff guide these consultants on the use of permanent BMPs using the City's Permanent BMP Selection Matrix and the SCVURPPP C.3 Compliance Manual. Any Group 1 CIP would have to comply with the related provisions of the City's Stormwater Pollution Prevention and Watershed Protection Ordinance.

10. Annual Planning Procedures Training (Provision C.3.a.vi)

The City provides formal annual training for staff in the Planning, Building and Public Works Departments. Contract building plan checkers also receive periodic training on stormwater issues. Informal on-going training occurs as needed to update City planners and engineers on implementation of the latest C.3 requirements. City staff and a City civil engineering consultant assisting with C.3 compliance also attend SCVURPPP and RWQCB workshops, meetings and roundtable discussions.

Section 1
PLANNING PROCEDURES PERFORMANCE STANDARD IMPLEMENTATION

A copy of the City's current Planning Procedures Annual Workplan is given in Chapter 2 of the City's Urban Runoff Management Plan. The workplan describes the activities conducted by the City to achieve the Performance Standard.

Performance Standard and Supporting Documents for the
CITY OF CUPERTINO
Planning Procedures

Section 2
LEGAL AUTHORITY TO IMPLEMENT

The legal authority of the City of Cupertino to implement this program is based upon the following:

Cupertino Municipal Code (on the Internet at http://www.amlegal.com/cupertino_ca/)

1) Cupertino Municipal Code Chapter 9.18, Stormwater Pollution Prevention and Watershed Protection Ordinance - requires permanent BMPs at all new and redevelopment projects, specifies BMP selection and design options, requires operation and maintenance of permanent BMP at Group 1 properties, prohibits non-permitted discharges to the stormwater system, and provides for enforcement.

2) Cupertino Municipal Code, Chapter 16.08, Excavation, Grading and Retaining Walls - preserves and enhances water quality by controlling surface runoff, erosion and sedimentation and through enforcement. Requires erosion and sediment control plans for specified projects.

3) Cupertino Municipal Code Chapter 19.100 Parking Regulations – contains several sections related to minimizing impervious surface and incorporating stormwater treatment in landscaping. These include, but are not limited to: Section 19.100.030-A.1.d, Regulations for Parking and Keeping Vehicles in Various Zones; Section 19.100.040-A, Regulations for Off-Street Parking; Section 19.100.040-E, Mixed-Use and Shared Parking; Section 19.100.040-N, Landscape Requirements; and Section 19.100.040-O, Swales and Permeable Surfaces.

4) Cupertino Municipal Code Chapter 19.40, Residential Hillside Zones - limits site grading in hillsides, establishes setbacks from watercourses, limits development on slopes 30% or greater.

5) Cupertino Municipal Code Chapter 19.44, Residential Single-Family Cluster Zones – encourages clustering to preserve and enhance land features, provides for open space and easement dedications and includes design criteria.

6) The City of Cupertino's draft General Plan (adoption scheduled by end of 2004)

Section 5, Environmental Resources/Sustainability Element:
(copy of this element in Appendix 'A')

- Policy 5-9: Development Near Sensitive Areas - encourages clustering away from riparian corridors and landscaping
- Policy 5-10: Landscaping Near Natural Vegetation - encourages landscaping for erosion control
- Policy 5-11: Natural Area Protection - encourages preserving natural vegetation and open space as part of new development planning
- Policy 5-12: Recreation and Wildlife Trails - encourages identification of watercourses and protecting them from adjacent development)

- 5-19:Natural Water Bodies and Drainage Systems – requires site design to respect natural topography and drainages and limit grading and disturbances to waterbodies
- 5-20 Reduction of Impervious Surfaces – reduce allowing amount of impervious surfaces and allow porous paving materials
- 5-21 Pollution and Flow Impacts – estimate increases in pollutant loading a flows from development projects, require BMPs to mitigate impacts
- 5-22 Compact Development Away From Sensitive Areas – encourage by zoning ordinances
- 5-23 Conformance With Watershed Based Planning and Zoning – encourage by examining development project in context of entire watershed area
- 5-27 Natural Watercourses – work with SCVWD to retain and restore riparian areas and watercourses
- 5-32 Urban Runoff Program – support and participate in SCVURPPP
- 5-34 Storm Water Runoff – encourage reduction of impervious surface and opportunities to retain and detain runoff on new development
- 5-36 Mitigation for Potential Stormwater Impacts – require mitigation measure for potential stormwater impacts for projects subject to environmental review
- 5-37 Pest-Resistant Landscaping and Design Features – encourage pest-resistance features and incorporation of other site design BMPs into proposed projects.

Land Use and Community Design Element

Many of the site design measures recommended for controlling impacts on stormwater runoff from new and significant redevelopment are discussed in the Land Use and Community Design Element of the General Plan. The SCVURPPP evaluated the City's General Plan as part of its ***Policy, Code & Ordinance Analysis for the Santa Clara Basin.*** A copy of the SCVURPPP's recommendations with the City's response and implementation status is included in Appendix 'B'.

6) Public Works Standard Conditions of Approval (given in Appendix 'C') – requires the following:
- Applicants must file an NPDES Construction Permit NOI if a project will disturb 1 acre or more
- All projects must include BMPs (site design and source control, at minimum)
- Group 1 Projects must use stormwater treatment BMPs
- Pesticide control measures shall be included on the landscaping plans for Group 1 projects
- A certified stormwater management plan is required for Group 1 projects
- All owners of Group 1 projects must enter into agreements with the City for BMP O&M and BMP inspection access

7) CEQA Initial Study Environmental Evaluation Checklist – includes questions related to a project's potential impacts on riparian habitat, erosion, hydrology, surface water quality and quantity, and groundwater quality. City Planning staff prepare this checklist for both private development and public projects. Planning staff have received training on addressing stormwater quality issues when completing this checklist, however, the City is considering the need for additional written guidance. A copy of the Initial Study checklist is given in Appendix 'C'.

Section 3
BMPs AND CONTROL MEASURES

Construction BMPs

The City uses a customized version of the "Blueprint for a Clean Bay" plan sheet based on the SCVURPPP "Blueprint" sheet. A copy of the City's "Blueprint" sheet is given in Appendix 'C'. The City also uses the SCVURPPP tri-fold brochures to relay BMP requirements for small projects. City Public Works Engineering staff may also refer to the California BMP Construction Handbook, the Regional Board's Erosion and Sediment Control Field Manual and the ABAG Manual of Standards for Erosion and Sediment Control Measures.

Contracts for City capital improvement projects include specific provisions requiring construction BMPs.

Permanent BMPs

Staff in the City's Public Works Department review discretionary private development projects and City capital improvement projects for stormwater quality control using the City's Permanent BMP Selection Matrix. A copy of the permanent BMP selection matrix is given in Appendix 'C'. All projects must use permanent source control measures and, as much as feasible, include site design measures. Group 1 projects must also include stormwater treatment BMPs designed to meet the required numeric sizing criteria. The City uses the SCVURPPP C.3 Manual, the California BMP Handbooks and the BASMAA "Start at the Source" Design Guidance Manual for design guidance.

Permanent BMP Operation and Maintenance

Owners of Group 1 properties are required by the City Code to operate and maintain permanent on-site BMPs in perpetuity. As a condition of the development permit for these projects, owners must enter into a written, recorded agreement with the City to this effect. Each year, these owners must submit proof to the City that they have met this requirement.

Since the City anticipates very few Group 1 projects, initially BMPs at all of these properties will be inspected annually by the Public Works Inspector. City access to on-site BMPs is ensured using a recorded Stormwater Management Facility Easement Agreement with Group 1 property owner(s). The City Code contains provisions related to enforcing private BMP maintenance. To determine if inspecting BMPs at every applicable site is cost-effective, the City will re-evaluate its BMP inspection program each year, as part of its annual report preparation.

Performance Standard and Supporting Documents for the
CITY OF CUPERTINO
Planning Procedures

Section 4
STANDARD OPERATING PROCEDURES

This section contains the City of Cupertino standard operating procedures (SOPs) related to managing the stormwater quality impacts of new and redevelopment projects. These SOPs demonstrate that urban runoff requirements related to development approval are incorporated into the development review processes of the Planning and Building Divisions and the Public Works Department. In addition, these SOPs describe how the City ensures continued operation and maintenance (O&M) of permanent BMPs at Group 1 Projects.

Standard operating procedures are provided for the following stormwater quality review processes:

- Private Development Project Approval - Non-Discretionary Projects[4]
- Private Development Project Approval - Discretionary Projects
- Capital Improvement Project Design and Acceptance
- Encroachment Permit Issuance
- Annual Inspection of Group 1 Private Development BMPs

[4] Definitions are provided at the end of this document.

Performance Standard and Supporting Documents for the
CITY OF CUPERTINO
Planning Procedures

STANDARD OPERATING PROCEDURES FOR CUPERTINO'S STORMWATER QUALITY REVIEW PROCESS FOR PRIVATE DEVELOPMENT PROJECTS

The following documents are included in Appendix 'C' of the Planning Procedures Performance Standard:

- CEQA Initial Study Checklist
- Written materials disseminated during the development approval process:
  - Cupertino Notice to Developers and Contractors-Stormwater Regulation Changes
  - Impervious Surface Calculation Worksheet (to determine if development could be a Group 1 project)
  - Cupertino Permanent BMP matrix (selection by land use)
  - Pesticide Control Measures for Development Projects Hand-Out (based on SCVURPPP model conditions of approval)
  - Cupertino Stormwater Quality Guidelines for Development Projects (guidance on complying with C.3 provisions related to Group 1 Projects)
  - Cupertino Blueprint for a Clean Bay Plan Sheet (construction BMPs)
- City of Cupertino Standard Conditions of Approval (includes misc. stormwater related items)
- Templates of BMP O&M and easement agreements

Performance Standard and Supporting Documents for the
CITY OF CUPERTINO
Planning Procedures

Non-Discretionary (Administrative) Private Development Projects

- Building Department plan checkers (in-house or consultants) review non-discretionary projects for the necessary construction and source control BMPs.
- Building Department counter staff attach a copy of the City's "Blueprint for a Clean Bay" sheet to all project plan sets at the time of building permit issuance.

Discretionary Private Development Projects

Preliminary Plans Consultation

The applicant presents the Planning Division with a preliminary project idea. The applicant receives an initial assessment of the idea, finds out which application forms would be necessary and the City's general concerns.

- The application packet includes the City's Notice to Developers and Contractors-Stormwater Regulation Changes (regarding Group 1 Projects and the State NPDES Construction permit); a hand-out on pesticide control measures; and the City's Permanent BMP Selection Matrix (copies of each given in Appendix 'C').
- If the project is subject to CEQA, the Project Planner fills out the CEQA Initial Study checklist, which includes items related to stormwater concerns.
- As needed, the Planning Division will arrange for additional CEQA compliance documentation, including any environmental assessments and studies, which will be paid for by the developer.
- The Planning Division informs the applicant of any environmental studies that will be needed. City staff are guided at this point in the review process by the City's General Plan provisions that pertain to urban runoff concerns.
- Group 1 Project applicants are advised to meet with engineers in the Public Works Department to discuss stormwater quality and other related issues, such as if a project will be built in an "unimproved" area (i.e., an area without curbs and gutters), in an area with drainage problems, on a hillside lot, on a lot with a dirt road needing street improvements, or if the ~~a~~ project will require significant grading.

Preliminary Meeting with Public Works

- If the proposed development could be a Group 1 Project, Public Works Engineering staff give the applicant the City's *Impervious Surface Calculation Worksheet for Projects One Acre of Larger* and explains how to complete this form (copy of worksheet given in Appendix 'C'.
- Public Works staff may recommend design changes to reduce the amount of impervious surface so that the proposed development is not considered a Group 1 Project.
- The Public Works staff will advise the applicant regarding construction and permanent stormwater BMP requirements.
- Applicants of Group 1 projects receive a copy of the *City of Cupertino Stormwater Quality Guidelines for Development Projects.* This document includes additional information on selection

and design of permanent BMPs, the Stormwater Management Plan submittal and long-term BMP operation and maintenance requirements.

- Public Works Engineering staff tell the applicant if a grading permit and an interim erosion and sediment control plan will be necessary and if street improvements will be required.

Development Application Is Submitted

- An application is submitted to the Planning Division, including 6 copies of the application plan set (which includes the site plan, elevations, floor plans, and preliminary landscaping plan.
- A completed *Impervious Surface Calculation Worksheet for Projects One Acre or Larger* is submitted with the development application. This worksheet is forwarded to Public Works Engineering.
- Group 1 Project applications must include a Stormwater Management Plan, which is reviewed by Public Works Engineering staff.
- If a grading permit will be necessary, the initial grading plan and the interim erosion and sediment control plan are submitted to the Public Works Department at the same time as the application.
- Staff from City's Public Works Department, the Building and Planning Divisions, the County Fire District and the Sanitary District will review the construction documents for their major concerns. Two weeks after the application is submitted, the applicant meets with staff from these agencies at the Pre-Hearing meeting.

Grading Permits and Erosion and Sediment Control Plans

- Public Works Engineering staff will review the grading plan and the interim erosion and sediment control plan submittals to verify that appropriate construction BMPs are incorporated.
- If street improvements are required, Public Works staff will review the construction plans for appropriate construction and permanent BMPs.
- If the developer's engineer is unclear about how to protect the streets and storm drains during construction, Public Works staff will provide the engineer with copies of specific BMPs from the *ABAG Manual of Standards for Erosion and Sediment Control Measures* or will suggest that the engineer buy a copy of the document.
- In accordance with City Code Section 9.18.120, no grading, or erosion and sediment control permit will be issued for a Group 1 Project until the Stormwater Management Plan has been reviewed and approved by the Director of Public Works.

Pre-Hearing Meeting

At the Pre-Hearing Meeting, representatives of the Planning and Building Divisions, the Public Works Department, the County Fire District and the Sanitary District formally meet to give their general comments to the applicant.

Environmental Review Committee (ERC)

The ERC (a small review committee made up of key Department heads, a Planning Commissioner, and a City Council member) develop a recommendation, to be presented to the Planning Commission, on the significance of the project's environmental impacts.

Planning Commission Hearing

- The proposed project is presented to the Planning Commission, resulting in a Planning Commission Resolution of denial or approval with Conditions.
- The City's standard Conditions of Approval related to stormwater quality are given in Appendix 'C'. Additional conditions of approval may also be required, depending on the type, size, and location of the proposed development.
- In matters related to stormwater quality, the Planning Commission and Planning staff are generally guided by the city's General Plan, Environmental Resources/Sustainability Element, which contains numerous goals relating to urban runoff pollution control.
- Large, significant development proposals (including most Group 1 projects) may also be presented for approval before the City Council.

Project "Deemed Complete"

- The Cupertino Planning Division provides the developer with a list of the requirements needed for planning application submittals. This list is the criteria for determining whether an application is complete and ready to be processed.
- The Project Planner will review applications within 30 days of submittal to determine if all required information has been provided and the application can be "deemed complete" and accepted.
- If the application submittal is incomplete, the Project Planner will send a letter to the applicant indicating that the application is "deemed incomplete" and lists the items needed to complete the application.
- If the Planning Division's written determination is not made within 30 days after receipt of the application, under State Law, the application is deemed "complete" and staff proceed with processing the application.
- Once an application is accepted as complete, the City cannot ask for new information, although it may require the applicant to clarify or add to the material provided in the application for clarification purposes.
- Proposed developments that would create or replace 10,000 square feet or more of impervious surface that are deemed complete prior to April 15, 2005 will not be subject to the Group 2 C.3 provisions of the City's Municipal NPDES Storm Water Discharge Permit.

Construction Drawings Submittal

- Construction drawings for private development projects are submitted to the Building Department. The Building Department is responsible for monitoring all construction aspects of private projects with the exception of required street improvements and the on-site BMPs, which are monitored by the Public Works Engineering Division.
- Street improvement plans are submitted to the Public Works Department.

- At this point, Building Department counter staff provide the applicant with a copy of the City's "Blueprint for a Clean Bay" sheet. The applicant is required to attach a copy of the "Blueprint" sheet to all construction drawings submittals. The Building Department plan checker verifies that the "Blueprint" sheet is attached. If it is not, he/she will call for the sheet to be attached before the Building Department will sign off on the final plans.
- A set of the drawings is provided to the Planning staff responsible for the project to verify that the project continues to abide by the Planning Commission's Conditions of Approval.
- Building Division staff review the construction drawing for source control BMPs.
- Planning staff also review the plans for non-Group 1 projects for site design BMPs.
- If the proposed development is a Group 1 Project, Public Works engineering staff receive a set of construction documents and review them for C.3 compliance, including incorporation of treatment control BMPs designed to the required numeric sizing criteria and consistency with the project's Stormwater Management Plan.
- If landscape plans are required, Planning staff review these for BMPs related to pesticide control measures.
- Construction tri-fold brochures and a copy of "Blueprint for a Clean Bay" booklet are made available to contractors at the planning/building counter.

Final Plan Approval

- Prior to issuance of a building permit for a Group 1 Project, Public Works Engineering staff will verify that the Stormwater Management Plan has been completed and signed by a Civil Engineer meeting the City's certification requirements, as specified in City Code Section 9.18.140.
- Prior to the issuance of a building permit for a Group 1 Project, Public Works Engineering staff will verify that the owner(s) of the property have signed a Stormwater Management Facilities Operation and Maintenance Agreement and a Stormwater Management Facility Easement Agreement (copies of templates for these agreements are given in Appendix 'C').

Final Occupancy Certificate

As required by City Code Section 9.18.130, after construction of a Group 1 Project and prior to the issuance of a building occupancy certificate, Public Works Engineering staff will require the developer's responsible registered civil engineer to inspect the stormwater management facilities, submit a complete set of as-built drawings, and certify on these drawings that:

- The stormwater management facilities were constructed in compliance with the approved plans.
- The Record Drawings show all pertinent constructed dimensions, elevations, shapes, and materials;
- All variations in construction from the approved design plan have been identified, including omissions to and additions from the approved plan; and
- Any changes are in conformance with local, state, or federal regulations.

STANDARD OPERATING PROCEDURES FOR CUPERTINO'S STORMWATER QUALITY REVIEW PROCESS FOR CAPITAL IMPROVEMENT PROJECTS

Project Design and Management

- Most of the City's non-maintenance capital improvement projects (CIPs) are designed using consultants.
- Public Works Department staff act as project managers and are responsible for reviewing plans and specifications and preparing the contract documents for bidding.
- The Public Works Department Project Manager will advise the consultant's design team of any stormwater quality issues at the project's design kick-off meeting.
- The Public Works Project Manager makes sure that the consultant's design team incorporates site design elements and source control measures into the project to avoid post-construction urban runoff problems. The City's Permanent BMP Selection Matrix, the SCVURPPP C.3 Compliance Manual, the "Start at the Source" Design Manual, and the California BMP Handbooks are used as guidance.
- If a CIP is a Group 1 Project, it is required to meet the stormwater treatment requirements of the City's NPDES Permit, C.3 Provisions.
- Public Works staff attach a copy of the City's Blueprint for a Clean Bay" plan sheet to each set of project plans.
- There is standard stormwater quality compliance contract language for capital improvement projects (a copy of these provisions are included in Appendix 'D'.
- If the CIP is covered under the State NPDES Construction Permit, the Public Works Project Manager will file an NOI.
- If a SWPPP is required, it may be done by the Public Works Project Manager or, by prior arrangement, by the consultant, or, if included in the construction documents, by the CIP contractor.
- If a SWPPP is required, but is written by someone other than City staff (such as the contractor or the design consultant), the Public Works Project Manager reviews it prior to the start of construction.

Project "Deemed Complete"

Any proposed City CIP that would create or replace 10,000 square feet or more of impervious surface would not be subject to the Group 2 C.3 provisions of the City's Municipal NPDES Storm Water Discharge Permit if funding is committed and construction is scheduled by April 15, 2005.

Environmental Review

- Planning and Public Works staff have received training on stormwater issues related to CEQA and are aware of those public projects exempt from the Group 1 requirements of the City's NPDES Permit, C.3 Provisions.
- If a CIP is not "Categorically Exempt" under CEQA and an Initial Study Checklist is needed, it is prepared by Planning Division staff.
- As needed, the CIP design consulting team would be responsible for preparing additional CEQA compliance documentation, including any environmental assessments and studies.

Project Certification

Upon completion of construction, the consultant's responsible registered civil engineer will inspect the stormwater management facilities, submit a complete set of as-built drawings, and certify on these drawings that:

- The stormwater management facilities were constructed in compliance with the approved plans.
- The Record Drawings show all pertinent constructed dimensions, elevations, shapes, and materials;
- All variations in construction from the approved design plan have been identified, including omissions to and additions from the approved plan; and
- Any changes are in conformance with local, state, or federal regulations.

STANDARD OPERATING PROCEDURES FOR CUPERTINO'S STORMWATER QUALITY REVIEW PROCESS FOR ENCROACHMENT PERMITS

- An encroachment permit is required for non-City construction work in the public right-of-way. The Cupertino Public Works Department issues these permits.
- Public Works Engineering staff review the encroachment permit request and attach the appropriate SCVURPPP construction trifold brochures.
- A copy of the City's "Blueprint for a Clean Bay" plan sheet is also attached to all encroachment permits.

STANDARD OPERATING PROCEDURES FOR CUPERTINO'S PERMANENT BMP OPERATION AND MAINTENANCE INSPECTION PROGRAM

The following are included in Appendix 'E' of the Planning Procedures Performance Standard:

- Permanent BMP Inspection tracking system format (Excel spreadsheet and/or Access database)
- Sample permanent BMP O&M inspection form
- Sample permanent BMP O&M Notice of Violation letter

Selection of Annual Permanent BMP O&M Inspection Sites

- Permanent BMPs at all Group 1 Project properties will be inspected annually, in March.
- Beginning April 15th 2006, all Group 1 and Group 2 Project properties will be inspected annually, in March.
- In the future, depending on the total number of Group 1 and 2 properties in Cupertino, the City may develop criteria for inspecting a subset of these sites, as allowed under NPDES Permit Provision C.3.e.

Permanent BMP O&M Inspection Program Responsibilities

- Public Works Engineering Division staff perform development plan review for stormwater quality compliance
- Public Works Engineering Division staff will inform the Public Works Inspector of new Group 1 Project sites as construction plans for these projects are approved.
- The Public Works Inspector maintains the tracking system for permanent BMP construction and BMP O&M inspection and enforcement for all Group 1 Projects (using the database format given in Appendix 'E').
- Since the Public Works Inspector will inspect construction of the on-site permanent BMPs at Group Projects and will sign-off on final City-approval for site occupancy, he/she will note when the project is completed in the Access database.
- The Public Works Inspector will submit a Permanent BMP O&M Inspection report for the previous fiscal year using the Access database to the Environmental Programs Manager by July 15th of each year.
- The Environmental Programs Manager will include BMP O&M inspection data in the Annual Report.

Permanent BMP O&M Pre-Inspection Preparation

- The Public Works Inspector will review the Permanent BMP O&M Inspection database at least two weeks prior to beginning annual inspections.
- The Public Works Inspector or Public Works Administrative staff will contact each Group 1 site owner/manager by telephone to arrange a mutually agreeable inspection appointment.
- Prior to each site inspection, the Public Works Inspector will review the site's Storm Water Management Plan, including any applicable as-built construction plans, for BMP information, including BMP types and locations. At this time, the Inspector will also review the site's current

BMP O&M self-certification report, any previous inspection reports, and any necessary special procedures (e.g., inspection forms, underground confined space entry).

- The Public Works Inspector will review the applicable CASQA or SCVURPPP BMP fact sheets and information on the City's BMP Inspection Program, which may be useful in addressing questions or comments raised by BMP owners or operators during the inspection.
- Prior to each site inspection, the Public Works Inspector will assemble the necessary equipment and supplies.

Permanent BMP O&M Inspection and Enforcement Procedures

- Upon arriving at the inspection site, the Public Works Inspector will contact the site manager/owner and explain the purpose of the visit.
- Permanent BMP O&M inspection by the City will be in accordance with the inspection checklist given in Appendix 'E'.
- Inspection results will be logged in writing using the permanent BMP O&M inspection checklist.
- If any deficiency is noted, the Public Works Inspector will document it in writing. The written Notice of Violation will include a copy of the BMP O&M inspection form, including a list of corrective actions needed and a compliance schedule. This Notice will be sent to the Group 1 property owner/manager within ten working days of an inspection. A sample Notice of Violation is given in Appendix 'E'.
- The Public Works Inspector will enter the permanent BMP O&M inspection information, including any violations, into the Permanent BMP O&M Inspection Access database.
- The Public Works Inspector will notify the Environmental Programs Manager by e-mail of any Group 1 property with a permanent BMP O&M violation, including information on location, the nature of violation and any needed follow-up.
- The property owner and, if applicable, the site manager, will be instructed to notify the Public Works Inspector within the time period indicated on the Notice of Violation so that the facilities can be reinspected. The inspector will complete a new inspection form, noting whether all recommended maintenance activities have been completed and if any other actions are needed to assure proper operation of the facility.
- If repairs are not undertaken or are not done properly within the time allocated in the compliance schedule, the City will begin enforcement proceedings as provided in City Code Section 9.18.
- Once all necessary repairs have been completed, the Public Works Inspector will note this in the Access database, including the date work was completed and any other pertinent information (such as if City intervention was required to complete corrective work).

STANDARD OPERATING PROCEDURES FOR CUPERTINO'S ANNUAL REPORTING

As required by Permit Provision C.3.n, Cupertino will provide the following information in its annual reports.

- The name or other identifier, type of project, site acreage or square footage, and square footage of new impervious surface on all new development and significant redevelopment projects which meet the Group 1 and Group 2 definitions of C.3.c. For significant redevelopment projects, the square footage of land disturbance will be reported.

- The treatment BMPs used and numeric sizing criteria employed, the operation and maintenance responsibility mechanism including the responsible party, site design measures used, and source control measures required for projects that must implement treatment measures.

- A summary of the types of pesticide reduction measures required for those new development and significant redevelopment projects to be addressed under C.3.c and the percentage of such new development and significant redevelopment projects for which pesticide reduction measures were required.

Model reporting forms for this information are provided in Appendix 'F'.

DEFINITIONS

Administrative Project - An "administrative project" is a project that the public agency with jurisdiction merely has to determine conformity with applicable statutes, ordinances or regulations. Examples are electrical or plumbing work requiring a building permit or sign permit.

Discretionary Project - A "discretionary project" is a project that requires the exercise of judgment or deliberation when the public agency with jurisdiction decides to approve or disapprove a particular activity. Examples include rezoning, a general plan land use amendment, a use permit, an architecture and site approval and and a tentative map.

Group 1 Project –A commercial, industrial, or residential development that creates one acre (43,560 square feet) or more of impervious surface, including roof area, streets and sidewalks. This includes development of any type on public or private land, which falls under the planning and building authority of the City of Cupertino, where one acre or more of new or replaced impervious surface, collectively over the entire project site, will be created. Excluded are construction of single-family homes which are not part of a larger common plan of development (with the incorporation of appropriate pollutant source control and design measures), sidewalks, bicycle lanes, trails, bridge accessories, guardrails, and landscape features.

Group 2 Project-This definition is the same as that for the Group 1 Project, except that the size threshold of impervious area is 10,000 square feet or more.

Maximum Extent Practicable – An iterative process to control storm water quality through the cumulative effect of implementing, continuously evaluating, and making corresponding changes to a variety of technically and economically feasible BMPs that ensure the most appropriate controls are implemented in the most effective manner.

Stormwater Management Plan - A document describing how existing runoff characteristics will be affected by a Group 1 Project and containing measures for complying with the provisions of the City's Stormwater Pollution Prevention and Watershed Protection Ordinance.

Wet season – The period from October 1st to April 15, as defined in Section 16.08.020 of the City of Cupertino Municipal Code.

FY 04- 05 Annual Report

Attachment J

Construction Inspection

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report: New and Redevelopment Requirements

Cupertino

Activity	Permit Item Source	FY04-05 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
NEW DEVELOPMENT AND CONSTRUCTION CONTROLS –CONSTRUCTION SITE INSPECTION					
Inspection Tracking	Const PS-5	City will include a summary of the year's written inspection notices and follow-up actions in each year's annual report.	The City uses a computer database to collect and track compliance activities. The inspection summaries for FY 04-05 are attached immediately following this section.	Ongoing	Public Works Engineering
Staff training	Const PS-6	Hold annual training for building dept. and public works staff.	The Public Works Inspector and 2 Building Inspectors attended a workshop on Construction Site Planning and Management put on by the SCVURPPP/Regional Board on 10/12/04. Bldg. Inspectors attended an in-house training on 6/14/05 that included a review of construction BMPs.	11/04	Public Works Engineering
Effectiveness Evaluation	Const PS-8	Review and evaluate the effectiveness of city efforts.	The two inspectors that have conducted the construction inspections have noted the following challenges and trends: BMPs are used in the field, but at times are not quite adequate to be effective (i.e. not enough rock at a construction entrance); another inspector notices more problems with homeowners and small contractors in contrast with large contractors that have equipment and resources to take care of problems immediately (i.e. street sweeping equipment).	9/04 AR and ongoing	Public Works Dept.

City of Cupertino

FY 04- 05 Annual Report

Attachment K

Pesticide Management Activities

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report—Pest Management

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
I. Municipal Pesticide Use				
Goal I.A. *Eliminate all unnecessary municipal pesticide use (particularly organophosphate (OP) pesticide use) and implement Integrated Pest Management (IPM) techniques.*				
I.A.1	Track pesticide use on municipally owned property. (PS #9). The results are reported in the AR.	City has collected information on pesticide use from four groups that apply pesticides on city property: • Streets Dept. (on medians) • Parks Dept. (In the parks) • Facilities maintenance (grounds surrounding city buildings) • Golf course Some of these depts. are now simply submitting copies of the monthly County Ag reports or their own information (instead of the use form that the city prepared). This seems to be adequate at this time (with the additional information about the type of pest that is being controlled). No organophosphates pesticides are being used.	On-going	Corp Yard Supervisor & Director, Park & Rec
I.A.3	Continue to refine and implement SOPs and BMPs for implementing the IPM policy. (PS #3).	The city has developed pest-specific and location-specific SOPs for pest management operations at city facilities. Any updates take place on an ongoing basis.	On-going	Corp Yard Supervisor & Director, Park & Rec
I.A.5	Continue to ensure that any contractor employed to conduct pest control and pesticide application on municipal property engages in pest control methods consistent with the IPM policy adopted by the agency (PS #6).	The city employs two contractors for pest management: 1. RPM Complete Pest Service (for structural and building grounds control): The principal has completed the SOPs that he follows when controlling ants, rats, and cockroaches. His work	On-going	Corp Yard Supervisor & Director, Park & Rec

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		will continue to be monitored by the city's Facilities Supervisor. 2. Professional Turf Management (contractor for maintenance of the golf course grounds). Specific IPM requirements are called out in the contract. Their work will continue to be monitored by the city's Recreation Supervisor at Blackberry Farm Golf Course. Pest-specific SOPs have been jointly established by the contractor, the city's in-house Pest Control Advisor, city Environmental staff, and the city's Recreation Supervisor An overview of SOPs takes place during annual discussions/meetings between city staff and contractors and updates take place on an ongoing basis.		
I.A.6	Conduct annual, city facility search of chemical storage areas for pesticides no longer legal for application, and properly dispose of them. (PS #10)	City staff conducted their annual search and no illegal pesticides were found.	Annually, in July.	Corp Yard Supervisor & Director, Park & Rec
MM I.A.1.	Document completion of tasks in annual reports. Use pesticide-tracking process to document pesticide use.	A summary report on pesticide use is included, following this document. It compares use in FY 03-04 and FY 04-05.	In 04-05 AR, annually	Corp Yard Supervisr & Dir, Park & Rec & Envt'l Div

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report—Pest Management

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
Goal I.B. *Raise awareness of all municipal employees and train employees who apply pesticides for the municipality about the municipality's IPM Policy and/or IPM techniques as appropriate.*				
I.B.1	Ensure that employees who apply pesticides for the agency obtain the appropriate County Ag and DPR-required training (PS #5a).	Included in "Pest Management Training FY 2004-2005," attached.	Spring 2005, annually	Corp Yard Supervisor & Director, Park & Rec
I.B.2	Provide annual training on the IPM Policy, SOPs, and BMPs, and the latest IPM techniques to employees within departments responsible for pesticide application (PS #5b).	This was covered in the trainings/meetings held on 4/24/05, 6/6/05 and 6/14/05 with staff. Additionally, affected staff is trained individually by the city's PCA when specific pest problems occur. See "Attachment N" Staff Training Summary Table.	4/05, annually	Corp Yard Supervisors & Director, Park & Rec & Envt'l Div
I.B.3	Annually inform employees who are not authorized to apply pesticides, that they cannot use over-the-counter pesticides in the workplace (PS #5c)	This subject was covered in the 4/24/05 training.	Spring 05	Envt'l Div
MM I.B.1.	Document and evaluate effectiveness of annual staff training.	From discussions with the city PCA and contract PCA, the industry trend is definitely toward IPM, and this is what is discussed in their professional meetings and trainings. The city's PCA (streets supervisor) and grounds supervisor attended the 2nd Annual Regional IPM Conference in Oakland CA June 14, 2005 sponsored by the County. In meetings with staff and contractors, they are all well aware of the city's IPM policy and have conveyed examples of IPM practices in the field such as baiting, mulching, and replacing plants with pest resistant plants. Staff is continuing to work with contractors to improve the flow of information for reporting and to	Annually in AR	Envt'l Div

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		ensure policies and SOPs are followed as written.		
II. Public Education and Outreach *Goal II.A. Increase awareness of IPM so target audiences recall less toxic pest management messages and adopt IPM behaviors. Target audiences include residential pesticide users, professional pest control businesses, customers of professional pest control businesses, pesticide retailers, school districts, and other special districts (PS # 7).*				
II.A.1	Assist with local implementation of the Watershed Education & Outreach (WE&O) Campaign[1], which will target the general public and include messages about less-toxic pest control and proper disposal.	City staff continues to participate in the WE&O group. The city's website has a link to the Watershed Watch campaign website. The Program conducted advertising in 04-05. The Program has decided to extend this campaign through FY 05-06. An RFP was released in July 05 for WE&O contract services beginning in FY 06-07.	FY 01-02 through FY 05-06	Envt'l Div
II.A.2	Assist Prgm in developing simple, effective, targeted messages regarding proper pesticide use and disposal, effects on water quality, and IPM.	Staff continues to review new fact sheets and ads.	As review of new pieces is needed.	Envt'l Div
II.A.4	Identify and attend local community events and distribute outreach material. 1. Distribute literature at Backyard Compost workshops 2. Install an IPM-products and literature display in the Community Ctr. for 2 wks	Literature is stocked and available for compost teachers (5 workshops held in Cupertino in 04-05). Staff continues to stock IPM factsheets at the Community Ctr. and the city library, "Pest Bugging You?", Grow It Guides, and Bay Begins at City Hall.	1. At 5 workshops/yr 2. 5/06	Envt'l Div
II.A.6	Review existing city web link, on the Cupertino city website, to any IPM website developed by the WE&O campaign.	The city website has a web link to the Watershed Watch campaign website.	Review annually	Envt'l Div

[1] Funded by all Co-permittees in FY 01-02.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report—Pest Management

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
II.A.9	Continue to fund BASMAA Regional Media Relations Campaign[2] featuring pitches to Bay Area media and responses to breaking news on pesticide-related topics.	Program funds BASMAA baseline projects, including Regional Media Relations Campaign.	Ongoing	N.A.
II.A.10	City staff to provide IPM-related press releases to local media—using Program generated materials	An IPM-related article appeared in the city newsletter, the Scene about pest specific fact sheets available in the May issue.	Annually, in Spring, as appropriate	Envt'l Div
II.A.12	Continue to assist with implementation of local components of a "Pesticide User Outreach" project targeting residential and commercial users (see Program FY 04-05 Work Plan).	City staff will continue to provide support to Program staff for the retail nursery IPM outreach.	Ongoing Complete annually	Envt'l Div
II.A.13	Inform local elementary and high school districts, and local sanitary district, of any pertinent opportunities for IPM training.	Nareesh Duggal of Santa Clara County contacts these groups as trainings become available.	As future wrkshops are announced.	Envt'l Div
II.A.14	Internal outreach on IPM to encourage employees to use IPM techniques away from work: 1. Set up display of less-toxic products and IPM literature at Corporation Yard and City Hall. 2. Distribute IPM fact sheets electronically to city employees through e-mail.	City staff set up a literature display in May for city employees at city hall and the corporation yard. An email was sent to all employees about the display and to provide a link to the IPM fact sheets on the Watershed Watch website.	5/05	Envt'l Div
MM II.A.1.	Document or estimate numbers of residents reached by outreach efforts and media advertising	Articles in the city's monthly newsletter (The Scene) are reportedly read by 87% of residential households, or about 16,677 households. (The city performs a telephone survey every 3 years). One article has been published in the newsletter in FY 04-05.	Annually, for AR	Envt'l Div

[2] Funded by all Co-permittees each year.

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		It appears, hundreds of each type of IPM factsheets have been taken from our displays in the Community Center and the city library.		
Goal II.B. *Educate pesticide retailers and consumers about less toxic pest control products and promote the sale of such products.*				
II.B.1	Continue to fund and participate in the BASMAA Regional IPM Partnership	Program funds BASMAA baseline projects, including Regional IPM Partnership.	Ongoing	Envt'l Div
II.B.2	Continue to support the IPM Store Partnership Program.	Two nurseries participate in Cupertino. Nursery employee training provided by Program contractor, Annie Joseph. Re-stocking visits are provided by Stormwater Program staff.	Annually. In Spring 05	Envt'l Div
MM II.B.1.	Assist Program in documenting number of participating stores, materials distributed, employees trained, and cost-effectiveness of the IPM Store Partnership Program.	Will be evaluated by Program staff. Two stores participate in Cupertino; Summerwinds and Yamagami's. Training was conducted for Summerwinds employees in February.	Annually	Envt'l Div

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report—Pest Management

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
III. Pest Control Operators (PCOs)				
***Goal III.A**. Minimize pesticide use by PCOs contracted for structural pest control and landscape maintenance.*				
III.A.4	Require PCOs contracted for municipal applications to use pest control methods consistent with the municipality's IPM policy (through contract specifications). Specifically, require contractors to: a) follow the agency's IPM policy, BMPs, and SOPs; b) provide evidence of current IPM training, when feasible; and c) provide documentation of pesticide use on agency property to the agency in a timely manner (PS#6).	IPM-specific specifications are included in the contract for our city's golf course maintenance contractor (as of Jan '02), An overview of the IPM policy, BMPs and SOPs takes place during annual discussions/meetings between city staff and contractors. The golf course contractor provided a list of training classes, see "Pest Management Training" following this section. The contractor has assured the City that IPM is covered in these seminars and meetings.	On-going Golf course employee annual training info submitted to the city in July	Corp Yard Supervisor & Director, Park & Rec & Envt'l Div
MM III.A.1.	Document pesticide use by PCOs on municipal property. City will strive, over time, to resolve difficulties associated with reporting use by contractors and lease holders, and other data collection limitations.	Pesticide use forms have been submitted to the city's Environmental Div for consolidation. See pesticide use report summary, following this section.	In the Annual Report	Corp Yard Supervisor & Director, Park & Rec
***Goal III.B.** Require all PCOs to implement Best Management Practices (BMPs).*				
III.B.2	Require PCOs contracted by municipalities to implement BMPs through contract specifications.	See III.A.4, above.	Ongoing	Corp Yard Supervisor & Dir. Park & Rec
MM III.B.1.	Document efforts to complete the above actions.	See III.A.4, above.	In the Annual Report	Corp Yard Supervisor & Dir. Park & Rec

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
IV. Commercial Businesses ***Goal IV.A.*** *Determine the extent of commercial business employees' use of pesticides (i.e., pesticide applications not performed by a licensed PCO) and conduct appropriate outreach regarding less toxic pest management.*				
IV.A.2	Assist in implementation of education programs that target commercial businesses, per recommendations developed in Program work plan—with restaurant focus.	Commercial business IPM outreach currently includes: restaurants, retail nurseries, and new development: The Program has provided the County Health Dept. restaurant inspectors with copies of "Don't Set a Table for Pests" brochure that inspectors are distributing to new or remodeled food facilities throughout the County. In Cupertino, outreach to restaurants is performed by County Health inspectors (through an agreement between the city and the Health Dept.) The city's nonpoint source inspector also inspects restaurants as needed and distributes brochures as needed. The Program's retail IPM training contractor held a training for Summerwinds nursery in Cupertino. The Program's Pest-Resistant Plant List is included in the City's development applicant information packet (as of July 2002).	FY 04-05	Envt'l Div
MM IV.A.1.	Document outreach efforts targeting businesses.	The County Health inspectors visited 263 food facilities in Cupertino and conducted 689 inspections. It is assumed, that through training, the inspectors know to distribute outreach materials as needed.	Annually in AR	Envt'l Div

Cupertino

V. Household Hazardous Waste Collection

Goal V.A. *Provide pesticide disposal services through household hazardous waste (HHW) collection programs for all residents and small businesses, and encourage use of these programs.*

V.A.1	Ensure that adequate pesticide disposal services exist for residents and conditionally exempt small quantity commercial generators.	Adequate services are available; the City participates in the Countywide HHW program.	Ongoing	Envt'l Div
V.A.3	Work with HHW collection agencies to support, enhance, and help publicize programs for proper pesticide disposal (PS #7).	The city is working with the County HHW program on developing and publicizing their programs. See PI/P outreach chart for specific complementary outreach.	Ongoing	Envt'l Div
V.A.5	Provide hazardous waste disposal information to residents, through 3-4 city newsletter articles, 3 ads in local newspaper, flyers at city library, community center, and City Hall.	City uses articles in the city's monthly newsletter, ads in the local newspaper, displays in the community center, and flyers in the library and community center, to advertise the HHW and small business hazardous waste disposal programs. See PI/P chart.	Periodically	Envt'l Div

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
MM V.A.1.	Document that household hazardous waste collection programs adequately serve residents and businesses and that any exchange programs do not exchange organophosphate or banned pesticides.	The city currently provides enough funding to the County HHW program to service the disposal needs of over 1,000 households (or 5% of the residential households in the city). The county HHW program does not re-distribute any organophosphate or banned pesticides.	Annually.	Envt'l Div
VII. New Development ***Goal VII.A*** *Minimize pesticide use at new and redevelopment sites.*				
VII.A.2	Consider pest-resistant landscaping and design features in the design, landscaping, and environmental reviews of proposed development projects. (C.9.d.ii.).	All applicants for a development permit are given information on pesticide-resistant plants. Starting in 6/04, each applicant is also given the SCVURPPP brochure, *Landscape Maintenance Techniques for Pest Reduction*, and the City's list of pesticide control measures (based on the SCVURPPP's model pesticide control conditions of approval) to be incorporated into the site design. City's Permanent BMP Selection Matrix includes reference to pest-resistant plantings.	Ongoing	Envt'l Div & Planning Dept.
VII.A.4	Collect information and report a summary of types of pesticide reduction measures required for development projects and the percentage of projects for which pesticide reduction measures were required. (C.3.n.5)	All projects (100%) are given a copy of the document "Pesticide Control Measures for Development Projects", listing six different control measures. Starting in June, 2005 planners will be including a new COA for all Group 1 projects requiring a landscaping plan to include pesticide reduction measures.	Ongoing	Envt'l Div & Planning Dept.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report—Pest Management

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
MM VII.A.1.	Summarize types of pesticide reduction measures required (such as by conditions of approval) for new development and significant redevelopment projects, and the percentage of new development and significant redevelopment projects for which pesticide reduction measures were required. (C.3.n.)	See VII.A.4, 100% of projects receive Pesticide Control Measures and now the COA.	Annually, in AR	Envt'l Div & Planning Dept.

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
VIII. Monitoring and Science				
Goal VII.A. *Participate in coordinated monitoring efforts to support pesticide TMDL development and implementation.*				
VIII.A.1	Continue financial support of the Regional Monitoring Program (RMP) through city contribution to Program budget.	The city continues to provide financial support through the annual assessment.	Annually	Envt'l Div
X. Review and Revision of Work Plan				
Goal X.A. *Implement a work plan that includes appropriate goals, actions, and monitoring mechanisms to reduce pesticide-related toxicity in urban runoff.*				
X.A.1.	Review and continuously improve the goals, actions, and monitoring mechanisms of the work plan considering results of self-evaluations, comments from Regional Board staff and other interested parties, and results of local performance review meetings, if any.	The Pesticide Work Plan was not revised in FY 04-05. There were no comments from Regional Board staff.	Annually	Envt'l Div
MM X.A.1.	Revise work plan to include any continuous improvement items. Report on completion of work plan tasks in Annual Report.	No continuous improvement items were identified by the RWQCB for Cupertino.	Annually; submit work plan updates in March. AR submitted in Sept.	Envt'l Div

FY 2004-2005 Annual Report
Cupertino

Pest Management Training 2004-2005

Cupertino employees:

Qualified Applicators Certified

The following Cupertino employees are Qualified Applicators Certified (they are members of the Pesticide Applicators Professional Association, who keeps track of the 20 hours of required training necessary in a two-year period.):
Bill Bridge, Shawn Tognetti, John Bisely, Karl Olsen, Mike Laitila, Chris Mertens, Brian Gathers, Cliff Mabutas, Gordon Jensen, John Hetland, Marc LaBrie, Mike Drake, Peter Arnst, Russ Polito, Mike Loomis, Cindy Martinez, Roger Winslow, Todd Hembree, Brad Alexander, Abe Cariaga, Ralph Garcia, Richard Garcia, Robert Hook, Angel Lopez, Diane Mahan, Jesus Moreno, Theodore Tefft, Peter Terada, Leonard Walton

Cupertino's Pest Control Advisor

The city's Pest Control Advisor, Diane Mahan, attended the following recent training sessions in FY 04-05. The PCA is a member of the California Association of Pest Control Advisors, who keeps track of the 40 hours of required training necessary in a two-year period.

7/28/04	PAPA Pesticide Application Seminar, San Jose
8/23/04	Protecting Families, Resources
9/14/04	Tree Care Symposium
12/9/04	PAPA Pesticide Application Seminar, San Jose
1/1/05	San Jose Field Day 2005
1/1/05	Aquatic Workshop

City contractors:

The city's structural pest control contractor, Keith Reuter, of RPM, attends monthly meetings of the Pest Control Operators Association of CA where discussions of IPM take place. He also attends training to satisfy the Structural Pest Control Board training requirements to maintain his license.

The city's Golf Course maintenance and pest control contractor, Professional Turf Management, has a PCA, Don Naumann, who is required to have 40 hours of training in a two-year period. He has attended the following training sessions.

11/08/04	Spreading Branches Managing
1/26/05	Controlled Release Fertilizer
3/21/05	USGA/NCGA Green Section Mtg
4/12/05	Turf Insect ID & Developing Sp

Pesticide Use Summary FY 04-05

IPM Policy:
On October 7, 2002 the City of Cupertino adopted an IPM policy that calls for city employees and city contractors to use reduced-risk Integrated Pest Management techniques, giving preference to reasonably available non-pesticide alternatives, and reduced-risk pesticides. Each Department, that is responsible for pest control, will develop a plan to ensure the long-term prevention or suppression of pest problems, while reducing or eliminating the need for chemical pest controls (to the maximum extent feasible), with minimum negative impact on human health, non-target organisms, and the environment.

Guidelines for Chemical Treatment:

- If corrective action is necessary, select non-chemical physical and biological treatments before choosing chemical treatments, wherever possible.
- Use products that are included in the City of San Francisco's "Reduced Risk Pesticide List", wherever possible. If a chemical product is not on that list, consult with the city's Pest Control Advisor to discuss its use.
- Favor the use of bait stations over sprayed or broadcasted pesticide applications.
- City staff and city contractors should avoid the use of Toxicity Category I pesticides (the label's signal word is "Danger").
- No products containing Clopyralid, Diazinon or Chlorpyrifos (Dursban) can be used by city staff or a city contractor on city property or property maintained by the city.

SOPs:
Pest-specific and site-specific Standard Operating Procedures have been established for all typical pest control situations.

Availability of data on pesticides used:
Stormwater staff consolidated the pesticide use data. A summary table follows this section.

Changes in city pesticide use:

- City crews are chipping tree limb trimmings and using for mulch to keep weeds down in parks on dirt areas. In these areas, spraying is not necessary. A new trail is maintained by using all chips from the site, none are disposed.
- The City's Contractor for the golf course at Blackberry Farm reported culturally using organic fertilizers, vertically mowing to break up disease patterns, using less nitrogen so less disease and less watering. He is using bark chips and compost for weed control under trees as well as using compost with an organic fertilizer on the tees.
- City's Contractor has replaced many Monterey Pine trees on the golf course with native California redwood, because they are pest resistant.
- The City's Contractor reported killing weeds around the lake at the golf course by lowering the water level and using a weed eater.

Continued IPM practices:

- Chlorpyrifos, Clopyralid, and Diazinon are no longer used.
- City does not use copper algaecides in the pond at the golf course.
- The city is awaiting the results of a pilot at the Presidio in San Francisco to see if English Daisy can be successfully controlled by Dow 565 (still not legal). Reportedly, registration costs are high.
- The city is hand-pulling English Daisies on greens only. In FY 04-05 they have virtually eliminated English Daisy growth.
- City crews are using less herbicide on school property since installing drip irrigation systems.
- Pentachloronitrobenzene (in Scotts's FFII) (not on the SF list) use will be permitted on the golf course greens in the short-term for pink show mold control. This fungicide is specific to pink snow mold. We currently prefer its limited use to the use of a more broad-spectrum fungicide such as Heritage (on the SF list). Other alternatives will continue to be researched.
- Thiophanate-methyl (on the SF list) (in Scotts ProTurf Systemic Fungicide) may be used for fungus control on the golf course greens against Dollar Spot and works on pink snow mold.
- The Pentachloronitrobenzene and the Thiophanate-methyl are rotated to eliminate pest resistance.
- The golf course contractor will continue to use canola oil instead of petroleum oil as a pesticide sticker.
- Roundup (Glyphosate) (on the SF list) continues to be the pesticide used in the greatest quantity on city property.

Annual Product Use, City-wide
FY 04-05

The following table.summarizes the use of specific pesticide products on city property in the fiscal years 03-04 and 04-05.

These totals combine data from all Divisions.

Active Ingredient	Target Pest	In SF list?	Locations	FY 03-04	FY 04-05
Aluminum Phosphide:	Rodents	No	Parks	.0094 lb	.0363 lbs

Cupertino

Program Work Plan Task	Activity	CI Item Source[1]	FY04-05 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Mercury Control Program						
I. Municipal Use of Mercury-Containing Products						
Goal I. Eliminate all unnecessary municipal use of mercury-containing products and establish proper disposal methods for products that cannot be eliminated.						
I.B	Mercury control program	C.9.c	Report results of survey of mercury-containing products used by municipal departments in Annual Report 9/03	City survey submitted to Prgm: 1/8/03	Reported In Sept 03 AR	Public Works
I.D	Mercury Policy	C.9.c	Adopt a mercury policy requiring the virtual elimination of mercury from controllable sources in urban runoff from city operations.	Cupertino's City Council adopted a policy requiring the virtual elimination of mercury from controllable sources, affecting urban runoff from municipal operations in March 2004.	6/04	Public Works
I.F	Implement guidelines for mercury reduction	C.9.c	Implement guidelines for mercury-containing products reduction and mgmt	Guidelines have been implemented (see next task).	Ongoing	Public Works
MMI	Mercury control program	C.9.c	Document completion of tasks in annual reports. Use mercury-containing product reporting guidelines.	1. The city has submitted the "Mercury-Containing Product Survey" results. 2. Cupertino's City Council adopted a policy requiring the virtual elimination of mercury from controllable sources, affecting urban runoff from municipal operations in March 2004. 3. High priority mercury-containing products are no longer in use. The city stormwater staff has discovered city maintenance staff is using only low- or no- mercury lamps. No mercury switches or relays are in use.	Annually, In AR	Public Works

[1] Place where continuous improvement item identified, either Annual Report, URMP, Work Plan, Review, or Program (task approved by the Management Committee for all co-permittees, if applicable, such as performance standard revisions).

				4. City maintenance staff has followed a specific protocol for disposal of fluorescent tubes. They are collected as universal waste and sent to a recycling facility for mercury recovery. 5. Corp yard staff trained on mercury policy and what to do when a fluorescent tube breaks. 6. E-mail sent to all city employees (11/04) informing them of a free mercury-free thermometer exchange for an old mercury thermometer. 7. An article was placed in the city newsletter regarding proper disposal of fluorescent tubes and mercury thermometer exchange, November'04. Brochures containing info on proper disposal of fluorescent tubes are distributed at city facilities. 8. Countywide HHW program distributes outreach materials re: mercury.		
II. Household Hazardous Waste Collection **Goal II.** Provide mercury-containing products disposal services through household hazardous waste (HHW) collection programs for residents and small businesses, and encourage use of these programs.						
II.B	Mercury control program	C.9.c	Provide mercury-containing products disposal services for residents and small businesses.	The city has provided adequate funding dedicated to provide hazardous waste disposal services for Cupertino residents since 1992.	Ongoing

Program Work Plan Task	Activity	CI Item Source	FY03-04 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
II.D	Document products disposed	C.9.c	Implement guidelines for documenting and reporting quantities of mercury-containing products disposed.	See Table 2.	Ongoing, AR	Public Works
III. Monitoring and Science **Goal III.** Participate in coordinated monitoring efforts to support mercury TMDL development and implementation, including assessment of air pollution sources of mercury and concentrations of mercury in sediment.						
III.A	Mercury control program	C.9.c	Assist Prgm to continue to provide financial support for the Regional Monitoring Program (RMP), including the Mercury Deposition Network Pilot Study. Support the Prgm's continued participation in the RMP steering committee and technical review committee.	The city supports the RMP and reviews meeting summaries through the Management Committee.	Ongoing	
III.B	Mercury control program	C.9.c	Assist Prgm to provide financial and staff support for a coordinated regional plan to collect data for the mercury TMDL, as defined in the RWQCB/BACWA/BASMAA MOU.	The city supports the mercury TMDL process, being handled at the regional level.	Ongoing	
III.C	Mercury control program	C.9.c	Assist the Prgm in providing continued financial and staff support for the Joint Stormwater Agency Project to Study Urban Sources of Mercury to assess sediment mercury concentrations and percentage of fine material.		Completed	
III.C.2	Mercury control program	C.9.c	Assist the Prgm in preparing the Joint Stormwater Agency Project to Study Urban Sources of Mercury, PCBs and Organochlorine Pesticides - Yr Two Report.		Completed

V. Public Education and Outreach **Goal V.** Increase awareness of proper disposal of mercury-containing products and available non-mercury containing alternatives. Target audiences include residential, commercial, and industrial users and municipal employees.						
V.A.	Mercury control program	C.9.c	Assist the Prgm to develop various outreach programs to educate target audiences about proper disposal of mercury-containing products and alternative non-mercury containing products. Outreach programs will include, but may not be limited to, the following subtasks:	Staff participated in the Work Group.	See below.	
V.A.1	Fluorescent light recycling outreach—residential	C.9.c	Continue our fluorescent light recycling outreach program to educate residential users and encourage proper disposal of fluorescent lights.	City staff participates in the review of outreach products associated with the Mercury Outreach group. An article was placed in the city newsletter regarding proper disposal of fluorescent tubes, November '04. Brochures containing info on proper disposal of fluorescent tubes are distributed at city facilities. Mercury Work Group implemented and expanded a residential and small business fluorescent light-recycling program at various hardware stores throughout the County. In 04-05 13,814 bulbs of various sizes equaling a total of 55,992.5 feet were collected.	Ongoing	
V.A.2	Fluorescent light recycling outreach—small businesses	C.9.c	Assist the Prgm to develop and begin to implement a fluorescent light recycling outreach program to educate small businesses and CESQGs and encourage proper disposal of fluorescent lights.	The staff has participated in planning sessions about business disposal. Mercury Work Group implemented and expanded a residential and small business fluorescent light-recycling program at	Ongoing

				various hardware stores throughout the County.		
V.A 3	Outreach to auto shops	C.9.c	Coordinate with city inspectors to integrate mercury outreach into their routine auto repair shops inspections	Staff prepared a fact sheet about mercury-containing products and proper disposal that was distributed by the industrial inspector during vehicle maintenance facility inspections in 03-04. Inspections will again be conducted in 05-06.	Ongoing	
V.A.4	Mercury control program	C.9.c	Train City staff on proper disposal of mercury containing products. Inform City staff on Mercury Thermometer Exchange event.	Corp yard staff was trained on how to handle the clean up of a broken fluorescent tube. E-mail sent to all city employees (11/04) informing them of a free mercury-free thermometer exchange for an old mercury thermometer. Corp yard staff trained on mercury policy and what to do when a fluorescent tube breaks.	FY 04-05	
V.B	Mercury control program	C.9.c	Assist Program to develop or adapt existing mercury outreach materials, as needed, for outreach programs.	City staff reviews outreach products that are proposed by the Mercury Outreach AHTG.	Ongoing	
V.C	Mercury control program	C.9.c	Attend community events and distribute outreach materials.	HHW disposal brochures (with fluorescent tubes, thermostats, and thermometers listed) are routinely distributed at the city's library, community center and city hall lobbies.	Ongoing	
MM V.B	Mercury control program	C.9.c	**Monitoring Mechanism V.B.** In the Annual Report, document and evaluate each outreach activity, including the target audience and number of residents and/or businesses reached.	On a countywide basis, participation has increased 6% from the previous year. Countywide HHW program served 24,927 residents during 04-05 and almost 400 small businesses through 64 events held at permanent facilities and 6 held at temporary sites.	Ongoing

Cupertino

Program Work Plan Task	Activity	FY03-04 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
CB-1. Vehicle Washing Operations					
Goal: Reduce copper discharges from vehicle washing operation					
CB-1.1	Refer mobile cleaners to training	Refer mobile surface cleaners to SJ POTW service cleaning certification trainings, if any are held.	Referred upon request. No mobile surface cleaning certification trainings were held this last fiscal year in SJ.	On-going	Public Works
CB-1.2	Distribute list of trained cleaners	Distribute most recent list of trained mobile cleaners to interested parties, and to city staff who contract for cleaning services.	A list is provided to city corp yard staff for in-house projects and is available to violators in illegal dumping incidents provided by the nonpoint source inspectors.	On-going	Public Works
CB-1.3	Outreach materials	Continue to distribute Home Maintenance Tips brochure at city facilities and city events (contains general remarks on residential car washing).	See PIP section, General Outreach for distribution plan.	On-going	Public Works
CB-1.4	Website for outreach	Add information about copper brake pad dust to the stormwater section of our website, with a link to the SCVURPPP copper brake pad report. Add general information about residential car washing to the city's website.	Our focus this year was to get C.3 documents on the website, and consequently these changes were not made.	9/04	Public Works
CB-1.5	Scene article	Add information about copper brake pad dust to the annual article on home car washing in the city's newsletter, the Scene.	An article was submitted to the editor of the newsletter for the June issue, but not printed due to space constraints.	May '05 Scene	Public Works
CB-1.6	Non-profit car washes	City provides brochures to non-profits about how to properly conduct a car wash event.	City staff provides this brochure to non-profit organizations planning to have a car wash when requested.	On-going	Public Works
CB-1.7	City vehicles	Continue to maintain car wash systems for City vehicles at the corporation yard.	City vehicles are taken to a commercial car wash where the water discharges to the sanitary sewer. Equipment is cleaned in a recycled water, wash facility, on-site.	On-going	Public Works
CB-1.8	Gas station car washing	Verify that all gas stations/repair shops understand and comply with restrictions concerning washing cars on-site.	This was reviewed during the bi-annual vehicle facility inspections in 03-04. The next scheduled inspections are in 05-06.	On-going, during normal inspection routine.	Industrial Inspector
CB-1.9	Auto sales car	Verify that all auto sale operations understand and	At this time, there are no auto sales	On-going,	Industrial

	washing	comply with restrictions concerning washing cars on-site.	businesses in Cupertino. In the past the city had one, but that facility has since closed. Should another one open, it will be inspected as part of the bi-annual industrial inspections.	during normal inspection routine.	Inspector

Program Work Plan Task	Activity	FY03-04 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
CB-3. Industrial Copper Control					
Goal: Control copper in discharges of stormwater from targeted industrial sources					
CB-3	Industrial inspection program	Continue industrial inspection of vehicle service facilities and other future permitted sites.	The City inspects the vehicle service facilities once every two years. See Industrial Inspection section.	On-going, during normal inspection routine.	Industrial Inspector
CB-6/7. Reducing Traffic Congestion/Promoting Alternative Transportation					
CB-8. Incorporate watershed protection in planning procedures					
Goal: Classify and assess watersheds, and improve institutional arrangements for watershed protection					
CB-8.1	General Plan changes	Revise City's General Plan, as needed, based on recommendations from the *Development Policies Comparison Project* and Provision C.3.I.	General Plan revisions continued to go through the public hearing process during FY '04-'05. The current estimate for presenting the revised General Plan to the City Council for approval is August or September 2005. The revisions include additional strategies for City participation in Regional Transportation Planning. Discussion of these policies to be included in FY '05-'06 Annual Report.	9/06 AR (revised date)	Planning Division
CB-11. Street sweeping controls & stormdrain system O&M					
Goal: Improve street sweeping controls and stormdrain system O&M					
CB-11.1	Street sweeping	Follow Program guidance regarding the collection and reporting of street sweeping data. Provide data for Annual Report.	Monthly street sweeping reports for 04-05 were submitted to the Program for compilation in July 2005.	On-going; Data in 9/05 AR	Public Works
CB-11.2	Evaluate Street	Evaluate need for improvement of current street	Streets are swept twice a month, and all	9/05 AR	Public Works

Training Event	Date	Participants
Trash Assessment Training: Trash training put on by SCVURPPP at the SCVWD on July 16, 2004. Training covered the Keep America Beautiful (KAB) Litter Index and how to use it, the Regional Board's Rapid Trash Assessment (which applies to areas within 100' of a watercourse or shoreline), and SCVURPPP's Trash Problem Area Data Collection form. Training attendees also discussed whether the findings of the collected assessments could result in a new trash performance standard.	8/16/04	Jenny Fire, Consultant
Construction Inspectors: Construction Site Planning and Management for Compliance with Phase I and II NPDES Requirements	10/12/04	Kevin Rieden, Public Works; Tim Orbea, Larry Squarcia, Building.
Public Works staff that apply pesticides: As Qualified Applicators Certified, these employees are required, by the State, to attend 20 hrs.of pesticide applicator training in a two-year period.	1/20/05	Annual Pesticide Handlers Safety training – 29 corporation yard employees attended, training is required for handlers. (20 hours required in a 2-year period)
Industrial inspector: SCVURPPP sponsored workshop regarding industrial inspections.	4/05/05	Manual Barragan, Shawn Tognetti, nonpoint source inspectors, Public Works; Roxan Nasiri, Public Works environmental division.
Corporation Yard/Streets staff: Annual training for Public Works staff: Topics included storm drain system operations and maintenance, corporation yard operations and maintenance, public streets and rural public works operation and maintenance, review of surface cleaning/steam cleaning/pressure washing/dumpster and graffiti cleaning BMPs, dumping incidents, corp yard SWPPP, pest management, limiting the use of mercury containing products, and proper disposal and clean-up of mercury containing products.	4/24/05	Public Works corp yard staff , including on-call staff, facilities, streets, grounds and vehicle maintenance personnel, and supervisors. Roxan Nasiri and Lavenia Millar, Environmental Division of PW

City of Cupertino
Stormwater Pollution Prevention Program
FY '04-'05 Annual Report
Training Activities

Co. Health Dept: Annual meeting with Dept of Environmental Health, restaurant inspection program.	4/27/05	Arlette Kerley, Karioki Humphrey DEH Supervisors; Steve Homan, County Stormwater Program; Peter Sevcik, WV Sanitation; Cheri Donnelly and Jack Lovell, WV cities Program staff; Lavenia Millar, City of Cupertino stormwater staff.
Nonpoint Source Inspector: Annual in-house training to review performance standard and SOPs.	5/3/05	Manuel Barragan, nonpoint source inspector; Diane Mahann, PW streets supervisor; Lavenia Millar, PW.
City's Streets and Grounds Supervisors: Annual in-house training to review performance standards, SOPs and pesticide use.	6/6/05	Diane Mahan, PW Streets supervisor and City's PCA, John Bisely, PW Grounds supervisor, Lavenia Millar and Roxan Nasiri, Public Works Environmental Division.
Public Works Engineering: Conducting Stormwater Treatment BMP Maintenance and Inspections (SCVURPPP)	6/9/05	Jason Chou, Lavenia Millar, Kevin Rieden, Public Works; Jenny Fire, consultant.
Corporation Yard Staff, Parks and Streets staff: Public Agency Regional IPM Conference, Oakland.	6/14/05	Diane Mahann, PW Streets Supervisor and city's PCA, John Bisely, Public Works Parks Supervisor; Roxan Nasiri, Public Works environmental division.
Park & Rec staff; Golf Course contractor: Mtg to review golf course SOPs, permitted pesticides, potential for less-toxic pesticide use.	6/14/05	Mike O'Dowd, Park and Rec Dept.; Don Naumann (Spot Water Management), golf course contractor; Lavenia Millar and Roxan Nasiri, Public Works
Building inspectors: In-house training regarding performance standard, construction BMPs and source control BMPs.	6/14/05	Larry Squarcia, Bob Sabich , building inspectors; Greg Casteel, Building Official; Lavenia Millar, Public Works - trainer.
Planning and Public Works staff: Annual training regarding C.3 requirements (Group 1, 2A, HMP, Pesticide Control), website.	6/22/05	Ciddy Wordell, Vera Gil, Gary Chao, Colin Jung, Alex Stanford and Piu Ghosh, Planning; Jason Chou and Lavenia Millar, Public Works - trainer.
City's Pest Control Advisor: As a Pest Control Advisor, this supervisor is required, by the State, to attend 40 hrs. of PCA training in a two-year period.	On-going	Diane Mahan, PW Streets supervisor, and City's PCA, courses include IPM.
City's Golf Course Contractor, Pest Control Advisor: As a Pest Control Advisor, this contractor is required, by the State, to attend 40 hrs. of PCA training in a two-year period.	On-going	Don Naumann, contractor for Blackberry Farm Golf Course, courses include IPM.

SUBJECT: CITY OF LOS ALTOS URBAN RUNOFF MANAGEMENT PROGRAM FY 2004-2005 ANNUAL REPORT

Dear Mr. Wolfe:

This report is submitted by the City of Los Altos, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water National Pollutant Discharge Elimination System (NPDES) Permit (Order No. 01-024). The report summarizes activities performed during FY 2004-2005 in accordance with the City of Los Altos's Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 1997 and updated in October 2000 and September 2004, and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 04-05 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; and 3) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the City of Los Altos Annual Report contains the following sections:

I. Cover Letter
II. Certification Statement
III. Performance Standard Completion Certification Statement
IV. Self-Evaluation and Work Plan Completion Matrix:
- IC/ID Elimination Activities
- Industrial/Commercial Discharger Control Program
- Public Agency Activities
  - i. Public Streets, Roads and Highways Operation and Maintenance
  - ii. Corporation Yard Operation and Maintenance
  - iii. Storm Drain System Operation and Maintenance
- New Development and Redevelopment Planning Procedures
- New Development and Redevelopment Construction Inspection
- Public Information/Participation
- Pest Management Activities
- Mercury Pollution Prevention Activities
- Other Water Quality and Watershed Management Requirements
  - i. Trash Management
  - ii. Copper Action Plan
  - iii. Nickel Action Plan
- Annual Report and Work Plan
- Staff Training

Program Highlights and Accomplishments

During FY 2004-2005 the City of Los Altos continued to implement our Urban Runoff Management Plan (URMP) to the maximum extent practicable. The activities implemented for each element of the City's URMP are described in Chapter 6 of the Santa Clara Valley Urban Runoff Pollution Prevention Program's Urban Runoff Management Plan. Some brief highlights of our accomplishments during FY 2004/2005 are described below.

The City of Los Altos reports its sanitary sewer overflows as an illegal discharge in the annual reports. The city has completed it citywide sanitary sewer master plan. This plan conducted a complete evaluation of its sewer system and provide detail recommendations for improvements. The improvements were presented in a form of a 20-year program. In anticipation of this the improvements, the city recently approved a five-year budget plans that includes the initiation of this improvement plan during fiscal year 2005-2006. It is hoped that the eventual outcome of the implementation of this plan is a reduction of any sewer overflows. This plan has given the city a head start on complying with the Regional Boards Section 13267 letter, which directed the city to initiate the preparation of a Sewer System Management Plan.

The City of Los Altos is pleased with its maintenance program and compliance with the control of sources of pollution. The City's corporation yard received its 12th consecutive Clean Bay Business certification for having the area in complete compliance with all point source control. The city continues to follow a thorough training program for its staff dealing with the use of pesticides along with the other miscellaneous hazardous material it deals with. For all of its new development, though primary rebuilding of single-family homes, the city continues to enforce its policy of not direct connection to the city's storm drain system. All flow must be directed over landscaped area prior to discharge in the city's system.

Continuous Improvement Activities

The City continues to address challenges encountered in implementation of improvements to its Urban Runoff Management Plan with existing staff. Overall, staff believes that the program is being implemented consistently throughout the City and is effective in reducing pollution of the local creeks. This still has proven to be especially difficult in light of California's economy. As with other cities, Los Altos now has less funding and less staff available for its programs. This is especially true for Los Altos since the city has a small sales tax base due to the lack of commercial and no industrial businesses. The result is that other areas of our operation have been negatively impacted because of the resources required to comply with the new and ever increasing mandates established in our NPDES permit which includes well over one hundred individual tasks that a small city like Los Altos must execute and document each year. The city did try a few years ago to impose a storm drain fee, but was not successful. The city will continue to explore opportunities to help offset the expense required to comply with the permit requirements.

During the recent five-year budget cycle, the City Council approved two new positions for the engineering department. One of these positions is for an inspector. As noted in the construction inspection evaluation of the annual report, the city uses building inspectors to conduct storm water inspections for private projects. But these inspectors are primary used to inspect for building code violation and often only visit the site if the contractor has requested an appointment. Therefore there are times where the requirement for inspection for storm water BMPs for these construction sites have not met the requirements of the city's Management Plan. It is anticipated that with the new inspector that a more aggressive and thorough inspection program can be set up to better comply with the city's Plan.

In summary, the City continues to be committed to the implementation of its Urban Runoff Management Plan. This has proven again to be a challenge with limited staffing levels, less funding availability and increased work effort to comply with the Program. In the coming year the City will continue to strive to increase its level of effort dedicated to the Santa Clara Valley Urban Runoff Pollution Protection Program.

I welcome your review of this Annual Report and any comments that you might have to offer that would help the City improve the managing of the program. If you have any questions regarding the materials submitted, please contact me at (650) 947-2624

Very truly yours,

Larry Lind
Associate Civil Engineer

ILLICIT CONNECTION & ILLEGAL DUMPING ELIMINATION ACTIVITIES

FY 2004-2005 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
1	Continue to provide training as required on ICID activities	Los Altos will continue to provide information and training to Engineering, Planning, Building Inspection and Public Safety personnel with a focus on new personnel. Each Department holds regular meetings for which the subject of ICIDs is discussed. Staff will be encouraged to attend formal training as it comes available.	The City of Los Altos continues to provide training to city staff ICID issues. For example, the city sent personnel to SCVURPPP training workshop, "Conducting Stormwater Inspections of Industrial and Commercial Facilities," in April 2005 at the Quinlan Center in Cupertino. City personnel learned what to look for during stormwater inspections of commercial and industrial facilities.	Community Development & Public Works Department
2	Continue to evaluate and improve response and documentation of illegal dumping activities	Los Altos uses the police department to respond to reports of illegal dumping. Primarily this would be the Code Enforcement Officer during normal working hours. Currently the CEO position is documenting and tracking ICID incidents.	The URP Coordinator continues to work with the police department on means to improve the documentation on these responses. During the past FY, the Coordinator met with the Chief of Police and his staff to discuss their role and solidify requirements for the reportable responses by the police department. During FY 04-05, PD recorded three responses that relate to potential illegal dumping. The sewer maintenance department continues to respond to sewer overflows. The city has a crew on standby 24 hours a day and therefore can respond to these quickly. During FY 04-05, city crews addressed 8 sewer overflows, which were properly cleaned up before entering any storm drain systems.	Public Works Department

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
3	Sanitary Sewer System	Los Altos expects to complete sanitary sewer system master plan and will program system improvement projects identified in the study.	The Sanitary Sewer Master Plan was completed on 1 August 2005. The City has begin budgeting for the repairs that were recommended in the draft version The City has also raised sewer rates in order to fund these improvements and repairs and will continue to raise the rates to fulfill the recommendations of the Master Plan.	Public Works & Community Development Departments
4	Evaluate IC/ID activities in FY 2003-2004 and explore opportunities to increase program effectiveness.	Report results in the FY 2003-2004 Annual Report.	See “ICID Report Data” below.	Public Works Department

ICID Program Evaluation
FY 2004/2005

Overall the program seems to be working very well. It would seem more and more people, as well as contractors, are becoming aware that no discharges, other than storm water, are allowed into the storm drain systems. This appears to have come from the extensive outreach and enforcement throughout the Bay Area. The effectiveness was apparent for the outreach on swimming pool discharges conducted a year ago. The City recently provided all pool owners a copy of the Program’s new brochure on the acceptable method of discharging the pool water and provided a point of contact at the city for any further guidance. During the last fiscal year, staff has continued to assist residents in the proper disposal of pool water, which was in response to the outreach material they had received.

This Program’s effectiveness appears more apparent by the reduced number of illegal discharges that are recorded in the City. City staff continue to assure BMPs are properly applied and are continually trained on the reporting of any illegal dumping incidents to the city’s police department.

The City of Los Altos continues to address sanitary sewer system maintenance practices in an attempt to reduce overflows. With the completion of the citywide Sewer Master Plan, the City has began to implement the long-range plan that was developed in this Plan in hopes to further reduce overflows.

The City continues to struggle with the documentation necessary for any of these incidents. Staff will continue to work with the police department in their documentation and follow-up actions on these incidents.

INDUSTRIAL/COMMERCIAL DISCHARGER CONTROL PROGRAMS

FY 2004-2005 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
1	Inspection of Vehicle Service Facilities	Los Altos will continue to coordinate and support the program conducted by the Palo Alto regional Water Quality Treatment Plant. Palo Alto conducts annual inspections of all 15 vehicle service facilities in Los Altos. The City will document and conduct follow-up on any storm water discharge violations identified in these inspections.	In fall of 2004 the City of Palo Alto inspected 17 vehicle service facilities in Los Altos. None were found with any violations and all facilities were given the Clean Bay Business award. During the year, there were no other reports on discharges from any of these facilities.	URP Coordinator
2	Inspection of Food Service Facilities	Los Altos will continue to coordinate and support the County of Santa Clara Department of Environmental Health's annual inspections of all 101 food service facilities in the City. The City will document and conduct follow-up on any storm water discharge violations identified in these annual inspections.	During the year Santa Clara County Department of Environmental Health (DEH) conducted 378 individual inspections of 133 food services facilities in Los Altos. During inspections, DEH make sure that the wastewater is being deposited in the mop sink. DEH reminds the facility of the importance of using the mop sink and instruct them to not put wastewater outside or to wash mats outside. They also inspect and report on the storage of oil, grease and garbage, which is usually exterior to the facility. They provide guidance and proper handling and cleanup of those areas. During the FY 04/05, DEH reported 4 areas of concern. Three of those were issued a cleanup action by the City's Code Enforcement Officer and was properly addressed. The other was given a warning to cleanup. Follow-up visit showed that the situation had been corrected.	URP Coordinator & Code Enforcement Officer

3	Inspection of Other Commercial Facilities	Los Altos has very limited Commercial Facilities (and no Industrial facilities), but is prepared to inspect any of these other listed categories of commercial facilities should a complaint be filed and take necessary action if required.	No violations or complaints were filed during the fiscal year.	URP Coordinator & Code Enforcement Officer
4	Evaluate inspection activities in FY 2003-2004 and explore opportunities to increase program effectiveness.	Report results in the FY 2003-2004 Annual Report.	See “Industrial/Commercial Program Evaluation” below.	URP Coordinator

Industrial/Commercial Program Evaluation
FY 2004/2005

Only one violation was found during the FY 04/05 inspections, which was properly addressed. The city did not receive any other reports of violations. Therefore it would appear that this program is working well. Biggest reason, obviously, is the lack of industrial/commercial facilities in the city. The city could increase the frequency of the inspections, but it is difficult to justify since there are no reportable violations or potential violations. This may be due to the limited number of industrial/commercial businesses in Los Altos.

1	BMP for street and road operations and maintenance	Los Altos will continue to assure that BMPs are applied at all of its street maintenance operations. Will evaluated its SOP for this maintenance annually and update as deemed necessary.	Crews are trained to utilizing BMP's from the CSQA Stormwater Best Management Practice Handbook for Municipal Operations. For example, for sawcutting and sidewalk grinding, which is a sizable task for city staff, the SOPs include vacuuming up excessive material and slurry before reaching storm drains.	Public Works Maintenance Department
2	BMP training	Los Altos will continue to provide training on an as needed basis to its municipal staff in the use of appropriate BMPs. Will provide monthly discussions with maintenance staff on the implementation of BMPs. Staff will be encouraged to attend any formal training if available.	City maintenance crews receive a wide range of training during the year. See "Staff Training" list at the end for this report of a list of training attended by the various maintenance staff.	Public Works Department

Public Streets, Roads & Highway O&M Program Evaluation FY 2004/2005
Roads and streets operations follow BMPs for storm water protection. There have been no complaints or incidents of discharge to the storm system due to Street Division operations. Crews completed 267 hours in road shoulder work to ensure proper drainage and spent 291 hours during the fall leaf pickup program in support of the annual street sweeping program. They picked up over 220 loads of leaves during this time.

Silt sacks were inspected quarterly and replaced as needed. One replacement was required during the FY as a result of these inspections. There were no spills in the Municipal Service Center that required containment.	Public Works Department
2	Evaluate O&M activities in FY 2004-2005 and explore opportunities to increase program effectiveness	Report results in the FY 2004-2005 Annual Report.	See "Public Corporation O&M Program Evaluation" section below.	URP Coordinator

Corporation Yard O&M Program Evaluation
FY 2004/2005

During FY 04-05, the Municipal Service Center was awarded its 12th Clean Bay Business Certificate. Automotive and shop personnel also passed the Hazardous Material Program compliance inspection by the Santa Clara County Department of Environmental Health. Automotive personnel completed 3314 hours on vehicle maintenance and shop personnel spent 42 hours for regulatory compliance in handling petroleum products and hazardous materials. Since FY 03-04, the fuel tank operation has been taken out of service and in early FY 05, the empty fuel tanks and associated pipes and dispensers will be removed. Crews will continue fueling at local gas stations. The one-year-old wash pad has been successful in receiving wastewater and putting it into the sewer system after going through a separator. Regulatory compliance has been maintained in emptying the separator on a quarterly basis and crews have been utilizing BMP's for use of the wash pad.

STORM DRAIN SYSTEM O & M
FY 2004-2005 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
1	Storm Drain O & M & Training	Los Altos will continue to train staff & implement and improve BMPs and SOP for the storm drain system operation and maintenance activities. Will evaluate its SOP for this maintenance task annually and update as deemed necessary.	Staff followed the guidance in the CSQA Handbook on Municipal Stormwater Best Management Practice for storm drain maintenance. Entire storm drain system was inspected and cleaned where needed. All material was disposed of properly. Maintenance Staff continue to receive annual training as is noted in the training listed at the end of this Annual Report.	Public Works Department
2	Reporting of Observed ICID Evidence	Los Altos will continue to train and require staff to notify appropriate personnel when hot spots or unusual contaminants are encountered during routine maintenance. Eventually this information is forwarded to the Police Department where it will be documented and considered for enforcement.	The City of Los Altos continues to provide guidance and training to their staff personnel. For example, during routine maintenance staff training, field crews are instructed on what an illegal discharges are and are told to report them to their supervisor or to the city's Code Enforcement Officer for follow-up action. Once during the fiscal the sewer flushing crew spotted and reported what appeared to be a resident that was preparing to drain a swimming pool into the street. This allowed the appropriate staff to respond and provide instructions to the resident on the proper disposal of the pool water prior to any releases into the storm drain system.	Public Works Department

Storm Drain System O&M Program Evaluation
FY 2004/2005

O&M activities for storm drain maintenance were very successful this year. Crews were able to work through zone cleaning of the storm drain system and we experienced very little storm drain problems during the rainy season. Staff has evaluated the method for inspecting and cleaning the storm drain system and will refine our method so that we will be cleaning and inspecting through the GIS quadrant system (63 quadrants) instead of our 10 maintenance zones.

C.3.c Requirements for Group 1 and Group 2 Projects **Goal:** Prepare to require proponents of Group 1 projects to design and implement stormwater treatment BMPs or reduce stormwater pollution of the maximum extent practicable. Participate in development of the proposal for an alternative Group 2 project definition and prepare to implement C.3 requirements for Group 2 projects as needed				
1	Assist Program to conduct analysis of alternative project size and prepare proposal for submittal to Regional Board.	Los Altos will assist the Program as necessary in the evaluation of the data.	The City of Los Altos has completed some of the necessary data required by the Program to evaluate alternative project size for Group 2 projects. Los Altos attends the monthly C.3 Adhoc Committee to assist the Program in analyzing this data and assisted the Program in developing an alternative project size for Group 2 projects.	URP Coordinator
2	Assist Program to update guidance manual and performance standards for Group 2 projects as needed.	Los Altos will assist the Program as necessary to provide the necessary updates.	Los Altos attends the monthly C.3 Adhoc Committee to assist the Program in analyzing this data and assisted the Program in developing an alternative project size for Group 2 projects The approval and implementation of the Group 2 projects is expected to begin in FY 05/06. Therefore, in turn, the guidance manual and performance standard will be revised accordingly.	URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
C.3.e. Operation and Maintenance of Treatment BMPs **Goal:** To develop and implement local agency operation and maintenance (O&M) verification programs to help ensure the proper maintenance of stormwater treatment measures on public and private property.				
1	Evaluate procedure for logging information about treatment BMPs installed at any approved Group 1 projects and later for group 2 projects, and for maintaining a list or database of properties, treatment BMPs, and responsible operators.	Los Altos will evaluate its process to monitor treatment BMPs installed with Group 1 projects and later for Group 2 projects. Los Altos does not expect to have any Groups 1 or 2 projects during FY 2004-2005.	The City of Los Altos has one Group 1 under construction and is expected by complete in early 2006. The city has a process in place to inspect this and any other Group 1 or Group 2 projects.	Community Development & Public Works Department
2	O&M agreements	Los Altos will review the procedures and documents regarding its O&M agreements and make improvements as deem necessary.	The City of Los Altos has one Group 1 under construction and is expected by complete in early 2006. The city has a draft agreement to have the property owner conduct maintenance on the storm water treatment facilities, which will be implemented pending project completion.	Community Development & URP Coordinator
3	Inspection program of a subset of prioritized treatment BMPs	Los Altos will review the procedures and documents and make improvements as deem necessary for its inspections of Group 1 projects to verify that the responsible party is performing proper O&M.	Once the inspection program has been implement, Los Altos will review the process and make improvements as necessary. The City of Los Altos has one Group 1 under construction and is expected by complete in early 2006	Community Development & URP Coordinator
4	Evaluation of the treatment BMPs O&M verification	A report on the City of Los Altos' Treatment BMPs Operation and Maintenance Verification program will be included in the Annual Report	The City of Los Altos has one Group 1 under construction and is expected by complete in early 2006 therefore there is nothing to report.	Community Development & URP Coordinator

FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
C.3.f. Hydromodification Management Plan **Goal:** To manage increases in runoff peak flow and volume for Group 1 projects, where such increases may cause increased erosion of creek beds and banks or related impact, through implementation of a hydromodification management plan (HMP)				
1	Hydromodification Management Plan (HMP)	Upon adoption by the Regional Board, begin implementation of HMP requirements for Group 1 projects that may cause increased erosion or other related impacts. Before adoption, encourage early implementation of likely elements of the HMP where possible.	This plan was not complete by the end of FY 04/05. Based on the definition in the Permit and further clarification used in the current draft at that time, Los Altos would be exempt from the implementation of this Plan since the City is greater than 90% built out, will also meet the definition of an "in-fill" project and most all are single family homes. City of Los Altos will still review each project to verify if it needs to comply with the HMP. However, Los Altos has been providing BMPs for years on their single-family developments, which reduce flows from the site.	
C.3.g. Waiver and Compensatory Mitigation Program **Goal:** Establish a program under which a project proponent may request a waiver from treatment BMP requirements due to impracticability, with a provision to provide an equivalent water quality benefit to the same receiving water (that allows participation in regional solutions)				
1	Model Waiver Program.	Los Altos will continue to assist the Program as required to develop a model waiver program.	The Program has not made substantive progress on waivers but the city is available to provide assistance as required.	URP Coordinator
2	Model Waiver Program	Los Altos is not anticipating supporting any waiver requests. However, we will adopt the model waiver program if it becomes necessary in the future. If the Regional Board has not adopted model waiver program, the City of Altos, we will develop a local program per C.3.g.vi if necessary.	Los Altos' position is that we do not anticipate any need for waivers. During FY 04/05 Los Altos had no need to address the subject.	Community Development & URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
C.3.j. Site Design Measures Guidance and Standards Development **Goal:** To incorporate site design measures that reduce water quality impacts into local design standards and encourage their use in project designs so as to meet the requirements of C.3				
1	Review existing local design standards and guidance.	Continue to review existing local design standards and guidance. Incorporate any revised standards and guidance into local project approval process and "fully implement" the revised standards and guidance. In the September 2004 Annual Report, Los Altos will summarize the review, analysis, and adoption of changes to local standards and guidance.	See the "Site Design Measures Guidance and Standards Development Action Summary" that follows this section.	Community Development, Public Works Department & URP Coordinator

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
C.3.k. Source Control Measures **Goal:** Require source control measures for new redevelopment projects to limit pollutant generation, discharge and runoff to the maximum extent practicable.				
1	Source Control Measures.	Los Altos will continue to evaluate Planning Procedures Performance Standard and continue to implementation of source control measures.	Private Projects: The City of Los Altos had no Group 1 projects during FY 04/05. The City has long required source control on all projects. For example, the new 15,000 square foot building for the new Elephant Pharmacy that was approved during the FY was required to install a covered refuge storage area that did not discharge to the storm drain system. Public Projects: During the time frame between July 1, 2004 and June 30, 2005 the city of Los Altos awarded eight construction projects. None of these projects fell under the definition of a Group 1 project. All projects dealt with some kind of repair to facilities such as street pavements, sidewalks, and curb and gutter. Other than construction BPMs that were applied, these projects did not allow any opportunity to apply such things as source control, etc. However, Los Altos will continue to evaluate Planning Procedures Performance Standard and the implementation of source control measures on public projects as necessary.	Community Development, Public Works Department & URP Coordinator
C.3.m. Water Quality Review Processes **Goal:** To ensure that water quality impacts and appropriate mitigation measures are identified as part of environmental review of proposed projects.				
1	CEQA checklists and other environmental review documents	Review CEQA checklists and other environmental review documents and modify documents as needed to include Group 2 projects. Los Altos will review and update its checklist as necessary	The City of Los Altos' current checklist sufficiently addresses water quality impacts.	Community Development

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
C.3.n. Reporting Requirements **Goal:** To meet the Provision C.3. reporting requirements, and plan for anticipated data needs, and begin collecting and tracking required data on development projects as needed.				
1	Provide information described in Table 1 of Provision C.3. in annual reports	Los Altos will provide the necessary information in each of the annual reports.	See "New Development-Planning Procedures Report Data" that follows for Group 1 projects.	URP Coordinator
2	Section 3.C.n.i	Los Altos will continue to collect the following for all new and redevelopment projects -- project name, location, type (per C.3.c.), size (ac. Or sq.ft.), and impervious surface area. For redevelopment projects, include area of land disturbance and summarize in the Annual Report.	See "New Development-Planning Procedures Report Data" that follows.	Community Development, Public Works Department
3	Section 3.C.n.ii.	Los Altos will continue to collect the following for all projects that must implement treatment measures: BMPs, site design, and source control measures used, sizing criteria, O&M responsibility mechanism and responsible party and summarize in the Annual Report	See "New Development-Planning Procedures Report Data" that follows.	Community Development & URP Coordinator
4	Evaluate C.3 activities	Evaluate C.3 activities in FY 2004-2005 and explore opportunities to increase program effectiveness. Report results in the FY 2004-2005 Annual Report.	See "New Development-Planning Procedures Program Evaluation" that follows	Community Development, Public Works Department & URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

New Development-Planning Procedures Program Evaluation FY 2004/2005
Public Projects: During the time frame between July 1, 2004 and June 30, 2005 the City of Los Altos awarded 8 construction projects. None of these projects fell under the definition of a Group 1 or a Group 2 project. All projects dealt with some kind of repair to facilities. Other than construction BPMs that were applied, these projects did not allow any opportunity to apply such things as source control, etc. However, the City of Los Altos continues to review all public projects with respect to all C.3 requirements. Private Projects: During the time frame between July 1, 2003 and June 30, 2004 the City of Los Altos had no new Group 1 projects (nor any Group 2 projects). As a small jurisdiction, the requirements of the program are very difficult for us to implement, though fortunately the City did not have any Group 1 projects during the fiscal year. For many years the City of Los Altos has worked with applicants to limit the amount of storm water runoff from private property. We could use assistance with handouts and other information regarding the program. With limited staff, it is difficult for us to prepare information for the public. We could especially use assistance with the pest resistive landscape information. This is not something our staff is trained to review. If the program could produce information for us, it would be helpful. The City of Los Altos will revise it Municipal Code to include the requirements for Group upon acceptance of the definition for these types of projects.

Santa Clara Valley Urban Runoff Pollution Prevention Program

Site Design Measures Guidance and Standards Development Action Summary			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/05)**
Policies to Limit Site Impervious and Incorporate Post-Construction BMPs Into Development Projects			
1. Is the minimum sidewalk width allowed in the community 4 feet or less?	The City of Los Altos has very minimum sidewalks throughout the city. The City standard width is 4 feet unless it can be justified otherwise through usage calculations or to match existing adjacent walkways. Less width would affect ADA requirements. Since Los Altos is built out and will not have any large development, it is anticipated that there is no need to put this in writing.	Public Works (Engineering) & Community Development (Planning)	During FY 04/05 the City of Los Altos did not have any new sidewalks installed mainly because the city is built out and the residents are also resistant to install. Los Altos plans to continue to evaluate new sidewalks on a case-by-case basis and provide directions in the form of the conditions of approval
2. Are sidewalks generally sloped so they drain to the front yard or park strip rather than the street?	The City of Los Altos will work with the Program as appropriate. Los Altos will require that sidewalks drain to a soil area on a case-to-case basis. Since Los Altos is built out, and will not have any large development, it is anticipated that most sidewalks will remain as currently constructed.	Public Works (Engineering) & Community Development (Planning)	During FY 04/05 the City of Los Altos did not have any new sidewalk install mainly because the city is built out and the residents are also resistant to install them. Los Altos will continue to evaluate new sidewalks on a case-by-case basis for drainage and provide directions in the form of the conditions of approval
3. Are the use of benign roof materials promoted?	Through the design review process, the City reviews building materials, including roof materials, and encourages the use of benign roofing materials such as wood shake or tile. The City has required that project sponsors change roofing materials and/or colors to lessen impacts. During this FY the city will adopt an ordinance to prohibiting copper in roofing systems similar to Palo Alto's ordinance	Community Development (Planning) & Public Works (Engineering)	The City of Los Altos is still evaluating the need for an ordinance prohibiting copper roofing systems. Los Altos feels this can be done without an ordinance, as there are very few requests for this type of roofing system. Los Altos would provide directions in the form of the conditions of approval

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/05)**
4. Does the community encourage inclusion of turf play yards or courtyards that also serve as infiltration areas or overflow parking areas?	Yes, they are encouraged on a case-by-case basis, when large projects are proposed. City has copies of BASMAA's Start at the Source to help encourage such ideas. City of Los Altos will provide a link on local website to SCVURPPP and/ BASMAA website containing electronic copy of BASMAA's Start at the Source.	Public Works (Engineering) & Community Development (Planning)	The City of Los Altos continues to maintain a link on its website to SCVURPPP website containing electronic copy of BASMAA's Start at the Source
5. Is the minimum radius allowed for cul-de-sacs less than 35 feet?	Since Los Altos does not expect to have many, if any, new cul-de-sacs, Los Altos plans to take each on a case-by-case basis and provide the minimum radius agreed upon by the appropriate agencies. Los Altos will also continue to work with the program and other jurisdictions regarding this matter. Will review matter with the Santa Clara County Fire Department for their input	Public Works (Engineering)	During FY 04/05 the City of Los Altos did not have any new cul-de-sacs install mainly because the city is built out. Los Altos will continue to evaluate any new cul-de-sac on a case-by-case basis for requiring a minimum radius as part of the conditions of approval.
6. Are there established design criteria or guidance for swales that can provide stormwater quality treatment (i.e., dry ponds, biofilters, or grass swales)?	City of Los Altos will consider revising the current version of its municipal code this FY by removing the prohibition for the use of reservoirs and simply stating that the device will be subject to approval by the City Engineer to insure flexibility. City of Los Altos will consider any treatment BMP presented in the handbooks on a case-by-case basis.	Public Works (Engineering)	City of Los Altos has not revised its municipal code, but still plans to do so. Los Altos did revise its ordinance to require treatment BMPs on Group 1 projects plans to revise it for the implementation of Group 2 projects.

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/05)**
7. Are model shared parking agreements provided?	The City does not have a model shared parking agreement, but it currently has an existing parking agreement with a local restaurant. Also the City does have a mechanism to allow cooperatively operated parking facilities. The agreements are reviewed on a case-by-case basis by staff and the City Attorney. Also, the City has allowed a business to rent parking spaces in the public parking plaza during the evening to help satisfy their parking requirement.	Public Works (Engineering) & Community Development (Planning)	No further action was required. During fiscal year 04/05 there were no cases where parking agreement became an issue.
8. If mass transit is provided nearby, is the parking ratio reduced?	All multi-family and mixed-use projects are required to provide affordable housing. The City grants development incentives for all projects with affordable housing. Incentives can include a reduction in the amount of parking. When considering a reduction in parking, proximity to mass transit would be a primary consideration	Community Development (Planning)	During fiscal year 04/05 the city did not have any multi-family or mixed-use projects.
9. Is the minimum driveway width specified in the community 9 feet or less (one lane) or 18 feet (two lanes)?	The driveway widths in certain residential districts and commercially operated public parking facilities can be reduced subject to approval of an alternative design by the architectural and site control committee. The City prefers this approach rather than changing the standards because it allows flexibility and it allows the City to determine the appropriate width based on site conditions.	Community Development (Planning)	During fiscal year 04/05 there were no cases where driveway width really became an issue.

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/05)**
Drainage Design Requirements			
1. Does the municipality promote limiting runoff to pre-development levels (e.g. through detention or retention, limits on impervious surface area, etc.)?	The City of Los Altos plans to adopt an ordinance to require developer to comply with Provision C.3 of the NPDES permit, which would limit runoff to pre-development level. As a matter of conditions of approval, Los Altos requires limiting runoff from single-family redevelopment not covered by the permit. It is anticipated that this ordinance will be enacted prior to the implementation of the C3 provisions in Oct 2003.	Public Works (Engineering) & Community Development (Planning)	The City of Los Altos adopted an ordinance that require developers of Group 1 projects to comply with Provision C.3 of the NPDES permit limiting runoff to pre-development. During FY 04/05 the city did not have any new Group 1 projects. The city continues to limit runoff from all single-family redevelopment.
2. Are there design criteria for stormwater best management practices?	Will review and implement procedures on a case by case basis for projects as they become available like implementing appropriate best management practices shown in the New Development and Redevelopment handbook by CSQA as a matter of conditions of approval.	Public Works (Engineering) & Community Development (Planning)	The City of Los Altos continues to use those BMPs that are defined in California Stormwater Quality Association *Stormwater Best Management Practice Handbook for New Development and Redevelopment*.
Natural Resource Protection/Restoration			
1. Is the minimum buffer width (from top of bank) 75 feet or more in a stream buffer ordinance/policy/guidelines?	The City works with the Santa Clara Valley Water District, and when necessary requires a biotic study, to determine the appropriate buffer for projects adjacent to a creek. Most of the lots in Los Altos adjacent to the creek are residential. Requiring a 75-foot buffer from top of bank is not practical in most cases, as it would render most lots unusable.	Community Development (Planning)	The City of Los Altos is awaiting the final outcome of the Water Resources Protection Collaborative. Until such time, for each project the city will work with the Santa Clara Valley Water District on a case by case basis

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/05)**
2. Does the stream buffer ordinance specify enforcement and education mechanisms?	The City's Environmental Committee continues to discuss appropriate creek protection measures and ways to educate the public. Will obtain and include information from the Marin County Stormwater Pollution Prevention Program efforts on creek side approaches.	Community Development (Planning)	The City of Los Altos is awaiting the final outcome of the Water Resources Protection Collaborative. Until such time, for each project the city will work with the Santa Clara Valley Water District on a case by case basis
3. Is land conservation, impervious cover reduction, or other types of water quality protection a major goal or objective to the open space design guidance?	City staff understands the importance of water quality protection and makes sure impacts are evaluated and appropriate protection measures are included in project approvals as a long-standing city policy on source control. The City adopted a new General Plan in November 2002. This document and current development policies encourages the conservation of natural features	Community Development (Planning)	The City continues to follow its General Plan.
4. Are flexible site design criteria available for developers that preserve open space and utilize cluster design options (e.g., setbacks, road widths, lot sizes)?	The City's approach is to consider road width modifications on a case-by-case basis to determine the appropriate width for the specific site being developed. All new residential streets in the City of Los Altos will be 10 minimum lane widths.	Public Works (Engineering)	There were no new streets being proposed during FY 04/05.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/05)**
5. Are open space areas encouraged to be consolidated into larger units?	It is City policy to encourage protection of creeks, creek side area and riparian habitat in their natural state while ensuring public safety and preserving valuable natural resources. For example, the City has plans for a bike path along the Hetch-Hetchy right-of-way in conjunction with the development of the Resident Inn/Office Complex on El Camino Real.	Community Development (Planning)	City of Los Altos continues to follow its policy.
6. Does a minimum percentage of open space near sensitive areas have to be managed in a natural condition?	The City continues to work with the Santa Clara Valley Water District and other appropriate agencies to establish buffers near sensitive areas. The appropriate buffer varies based on site conditions. Based on the recommendation of the Santa Clara Valley Water District and a biotic assessment, the City recently required a 25 foot buffer as a condition of approval for a subdivision abutting a creek. The width of the buffer was based on the needs of the site. We prefer this approach to establishing a minimum percentage that may or may not be appropriate for a site. .	Community Development (Planning)	The City of Los Altos is awaiting the final outcome of the Water Resources Protection Collaborative. Until such time, for each project the city will work with the Santa Clara Valley Water District on a case by case basis
7. Does the community encourage minimization of impervious surface areas in recreational open space areas?	The newly adopted General Plan includes policy language that encourages the minimization of impervious surface areas. This policy and requirements in the conditions of approval works well for the City and at this time no additional guidance or policy language is deemed necessary. However, the City will continue to evaluate if addition policy language would be beneficial.	Community Development (Planning)	The City of Los Altos continues to enforce the policy from the General Plan.

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/05)**
8. Does your municipality encourage distinct low-impervious buffers between cities (e.g., greenbelts, open space, wild land corridors, agricultural areas)?	Given the existing built out environment of the city and the continual housing needs pressure, this is not really practical to create low-impervious buffers between the cities. The westerly and southwesterly borders between Palo Alto, Los Altos Hills and the County is Adobe Creek, and on the easterly border with Sunnyvale is Steven Creek which in itself already serves as a pervious buffer.	Community Development (Planning)	No further action was required.
9. Is there flexibility to meet regulatory or conservation restrictions (density compensations, buffer averaging, transferable development rights, off-site mitigation) offered to developers?	The City recently updated the General Plan. The policies in the General Plan were evaluated and determined to be appropriate for Los Altos.	Community Development (Planning)	The City of Los Altos continues to enforce policies in the General Plan

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/05)**
Policies to Limit Auto Use/Promote Alternative Transportation			
1. Does the municipality promote comprehensive pedestrian and bike trail corridors through a well-connected network of streets and pathways?	The City of Los Altos completed a citywide Bicycle Transportation Plan in February 2002. The City meets monthly with its Bicycle/Pedestrian Advisory Committee (BPAC) to discuss means to pursue the goals of this Plan and also to improve pedestrian access within the City and into adjacent communities.	Public Works (Engineering)	The City of Los Altos continues to pursue the goals of the Plan with the BPAC, which is a subcommittee of the city's Traffic Commission that was established by City Council.
2. Does the municipality promote neighborhood greenbelts with walkways and bike paths?	The City continues to seek opportunities for bikeways and pathways. The City recently awarded a contract as part of the safe routes to school program to install bike improvements along Berry Avenue. Also, the city has obtained easements along the Hetch-Hetchy right-of-way to use the area for a bike path. As opportunities arise, the City will continue to obtain easements in order to complete this plan for the Hetch-Hetchy.	Public Works (Engineering) & Community Development (Planning)	The City continues to seek opportunities for bikeways and pathways.
3. Do street standards promote street layouts that reduce overall impervious surface area and/or trip length?	The City Council was concerned that many of the streets in Los Altos that did not have curb and gutters were becoming too wide because the residence were allowed to paved their shoulders. Therefore in November 2001 they passed a shoulder paving policy that restricts the width of the street plus the paved shoulders not to exceed 19 feet from the street centerline and also requires new street trees in the shoulder area as part of any new work. It was hoped that this would promote landscaping further out toward the edge of the streets into the public right of way.	Public Works (Engineering) & Community Development (Planning)	The City of Los Altos continues to enforce the Shoulder Paving Policy established by City Council in November 2001.

Regional Board Comments on New Development-Planning Procedures in FY 2003-2004 Annual Report		
Item	**RWQCB Comment**	**City Of Los Altos Response**
Provision C.3.n.	Because of the variability in detail and the fact that some Co-permittees did not include enough information, Board staff has developed the attached "templates" (see Tables 1 and 2 and accompanying instructions) for you to report on Group 1 and 2 projects in next year's Annual Report. These templates were based in part on Sunnyvale and San Jose's tables. A Group 1 project that submits an application during the reporting period must be added to Table 1. Once a project is included in Table 1, the project cannot be removed from Table 1 until construction is completed. Hence, some projects may be reported in several consecutive Annual Reports and each year, pertinent information for those projects shall be updated to reflect their status at the time the Annual Report is written. Status updates shall include changes in approval/construction dates, and in source control, design, and/or treatment BMPs proposed or built onsite and/or offsite. The same criteria for inclusion and updating of Group 2 projects apply to Table 1.	The City of Los Altos will work with the Program to provide a format to include all appropriate information in our next Annual Report.
Provision C.3.n.iii	The column "Pesticide Reduction Measures Included in Project" refers to specific measures/methods that are included in a project to reduce pests, weeds, and disease prone plants (and hence the need for pesticides and herbicides). The column entries should include such measures as using only pest-resistant plants in the landscaping, installing screens on any vents outside of the buildings, and providing a minimum separation of trees from roofs to prevent migration of pests into homes.	The City of Los Altos will work with the Program to provide a format to include all appropriate information in our next Annual Report.
Provision C.3.n.	Please include a map in the Annual Report that shows the locations of **all** Group 1 projects listed in Table 1. Please ensure that this map is of a large enough scale so that major highways and roads are legible on the map and new projects can be added easily every year.	In our next Annual Report, the City of Los Altos will include a map of the city showing the locations of all Group 1 and Group 2 projects.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item	RWQCB Comment	City Of Los Altos Response
Page 16 of Annual Report	Text states that "at the end of FY 03/04 Los Altos was reviewing preliminary conceptual design on two potential Group 1 Projects. Please clarify whether these projects had submitted applications to the Planning Department at the end of FY 03-04. If so, please include these two projects in the table on page 34.	The city of Los Altos was reviewing two preliminary projects that were under considerations by developers. The city allows developer to do this prior to submitting formal planning applications. This is why they were not included on the list. It is also worth noting that during this preliminary stage, the city informs the developer of the C3 requirements that are delineated in our municipal codes. During FY 04-05 one of these projects were submitted (prior to April 15, 2005), but it was determined during the application review that this project had less than one acre of new plus replaced impermeable surface and therefore not a Group 1. The other project application has not yet been submitted.
Page 20 of Annual Report	Text states that Los Altos "had one project of 1 acre approved." However, the table on page 34 lists one project, Whole Food Store, as creating 81,801 ft^2 (~1.9 acres) on a 2.44-acre site. If there is an additional project of 1 acre, please provide information for it on page 34. If not, please correct the typographical error on one of these pages.	The narrative on page 20 should have said, "has one project that created greater than one acre of new plus replacement impermeable surface." This project was the Whole Foods Store that was listed on page 34 of the Annual Report. Sorry about the confusion.

NEW DEVELOPMENT & REDEVELOPMENT CONSTRUCTION INSPECTION

FY 2004-2005 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
1	Construction Site Inspections	Los Altos will continue to review and revise SOPs and the City's legal authority related violations as required, as well as conducts and enforces construction site inspections, and identifies continuous improvements. Public projects contain contractual provision requiring the use of BMPs. Los Altos will continue to enforce and improve these provisions.	Public Projects: During the time frame between July 1, 2004 and June 30, 2005 the city of Los Altos awarded eight construction projects. All projects dealt with some kind of repair to facilities such as street pavements, sidewalks, and curb and gutter. Of these, none were under construction during the raining season. Therefore the city had no problem assuring that all proper construction BMPs were in place and properly maintained. Private Projects: A City of Los Altos Standard Operating Procedure is given to owner/contractors throughout the wet season. A spreadsheet database is used for tracking all monthly inspections during the wet season. Seventy-four inspection sites considered a probable source for storm water preventative measures were observed, eight correction notices or stop work orders were written, thirty-seven preventive maintenance procedures observed and all violations corrected whether written or discussed.	Community Development & Public Works Department

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
2	Construction BMPs and Control Measures	Los Altos will continue to implement and review the effectiveness of construction BMPs and other storm water requirements developed through the application process. For Public projects, the contract documents will include the necessary BMPs and control measures applicable for each specific project.	Public Projects: During the time frame between July 1, 2004 and June 30, 2005 the city of Los Altos awarded eight construction projects. All projects dealt with some kind of repair to facilities such as street pavements, sidewalks, and curb and gutter. Of these, none were under construction during the raining season. Therefore the city had no problem assuring that all proper construction BMPs were in place and properly maintained. The City of Los Altos will continue to review this process. Private Projects: Plans submitted to the Community Development Department for permitting are reviewed for all applicable BMP and Control Measure requirements. The plans examiners work with various members of City staff to ensure that all aspects of these requirements are met. All daily inspections performed include verification of the following, as applicable to each site: site access covered with gravel, waddle material and control of site water run off, concrete washout areas, storm drains protected with appropriate material, drainage socks for ground water discharge piping installed and swales created and or other preventative measures assured as necessary.	Community Development & Public Works Department

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
3	Rainy Season Construction Inspections	Los Altos will continue to conduct construction site inspections for adequacy of storm water quality control measures. The sites will be those that have an active permit from the building department and construction at public facilities. Continue to conduct monthly inspections at these sites during wet season. In addition, Los Altos will continue to inspect each site prior to the beginning of the wet season to assure all have adequate storm water quality control measures.	Public Projects: During the time frame between July 1, 2004 and June 30, 2005 the city of Los Altos awarded eight construction projects. All projects dealt with some kind of repair to facilities such as street pavements, sidewalks, and curb and gutter. Of these, none were under construction during the raining season. All sites are inspected daily. Though outside of our jurisdiction, the city did spend time to monitor school projects to assure they applied complied with their SWPPP and applied BMPs to prevent sediment from entering onto the city streets and into the city's storm drain system. Private Projects: The same detailed project tracking as discussed above will be conducted through FY 05/06. All daily inspections performed (approx. 1750 per 3 month period) include verification of the following, as applicable to each site: site access stabilization, waddle material and control of site water run off, concrete washout areas, storm drains protected with appropriate material, drainage socks for ground water discharge piping installed and swales created and or other preventative measures assured as necessary.	Community Development & Public Works Department
4	Staff Training and Educational Material Library.	Los Altos will continue to require inspectors to attend annual workshops and training, as well as providing internal training prior to each rainy season.	Public Projects: City design engineers and construction inspectors attended the November 9. 2004 training at Brisbane on "Construction Site Planning and Management for Compliance with Phase I and Phase II NPDES Requirements". Private Projects: Building Inspectors briefings are conducted with inspectors on a monthly basis. The most up to date materials from the recent URPPP training seminar is provided for each inspectors office for study and review with the public.	Community Development & Public Works Department

5	Construction Inspection	Evaluate Inspection activities in FY 2004-2005 and explore opportunities to increase program effectiveness	See "New Development-Construction Inspection Program Evaluation" section below.	Community Development & Public Works Department

New Development-Construction Inspection Program Evaluation FY 2004-2005

Private Projects: All construction projects are evaluated and maintained at the start of all projects. An updated database is created for all construction projects at the start of the rainy season beginning on October 1. This database is updated at each subsequent field inspection. Interdepartmental communications with Planning, Engineering, Police and Code Enforcement are then implemented as needed to emphasize complete water quality protection measures. Annual seminars are attended when they are available from the district Water Quality Board and all new requirements reviewed. Briefings with regard to Best Management Practice measures that can be improved and/or that work best are discussed on a monthly basis. This process is not completely effective, as building inspectors are not only tasked with performing close to 600 inspections per month but also to perform the pre rain inspection. Typically time does not permit for adequate storm water inspections, as this is not the primary focus of the Building Division. The City is working to attempt to improve the inspection, but this involved additional staffing which is difficult to fund under the city's current budget constrains.

Public projects: The city had only eight small construction contracts during the year. All were finished within 3-4 months and none were under construction during the raining season. All construction inspectors are trained in the application of applicable BMPs. For example, catch basins near sites are protected with filter fabric to prevent debris for entering the storm drain system. For public projects, the city has no problem with complying with its permit.

PEST MANAGEMENT
(Provision C.9.d of the Permit)

FY 2004-2005 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Municipal Pesticide Use **Goal 1.A.** Eliminate all unnecessary municipal pesticide uses (particularly organophosphate (OP) pesticide use) and implement Integrated Pest Management (IMP) techniques.				
1	Pesticide Use on Municipally Owned	Los Altos will continue to track pesticide use on municipally owned property (PS #8). Will report the results of this tracking in the FY 04/05 AR.	The City continued to record all pesticide application and submit this documentation on a monthly basis to the Santa Clara County Department of Pesticide Regulation. A summary of the pesticide application is summarized at the end of this section. No pesticide violations or other related concerns were reported during the year.	URP Coordinator & Public Works Maintenance Department
2	IPM Policy	Los Altos Public Works has a written and approved IMP policy. Will continue to implement the policy. Will evaluate the policy annually and improve as deemed necessary.	IPM policy was reviewed and other control measures considered before any pesticide application was utilized. Staff provided information on IPM to City staff to educate them about IPM. No improvements have been made to the policy and procedure at this time.	Public Works Maintenance Department

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
3	IPM Standard Operating Procedures (SOPs) and Best Management Practices (BMPs).	Public Works has a written and approved an SOP, which is included within the approved IMP policy. This document contains all applicable BMPs for implementing policy. Los Altos will continue to implement the SOP. Will evaluate the SOP annually and improve as deemed necessary	Staff attended training on BMP's for Landscape Maintenance, Irrigation work and Pesticide applications in accordance with its SOP. Staff continued to review its SOP and during the FY did not find any need to make any improvements.	URP Coordinator & Public Works Maintenance Department
4	City Pest Control Contractors	Los Altos will continue to review process to ensure that any contractor employed to conduct pest control and pesticide application on municipal property.	Staff reviews the IPM and BMP's with three PCO's. Staff will be working to improve the contract language for pesticide applications as necessary during the FY.	Public Works Maintenance Department
5	Agency Wide Inspection.	Continue to conduct a periodic agency-wide search of chemical storage areas for pesticides no longer legal for application per EPA, State, and/or local requirements, and properly dispose of any such pesticides pursuant to appropriate waste disposal regulations.	Maintenance supervisory personnel conduct facility inspections to identify any illegal chemical storage at City buildings on an annual basis. No unauthorized pesticides were found.	Public Works Maintenance Department
6	Internal IPM Outreach	Continue to conduct internal outreach on less toxic pest control to employees who do not necessarily purchase or apply pesticides during the course of their work (to encourage employees to use IPM techniques away from work).	Staff was unable to conduct internal outreach to employees due to high workload.	URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
7	Documentation	Document completion of tasks in annual reports. Use pesticide-tracking process to document pesticide use.	See the "Summary of Pesticide Usage F04/05" at the end of this section.	URP Coordinator
Goal 1.B. Raise awareness of all municipal employees and train employees who apply pesticides for the municipality about the municipality's IPM Policy and/or IPM techniques as appropriate.				
1	Pesticide Applicator Training	Los Altos will continue to ensure that employees who apply pesticides for the agency obtain the appropriate training as required by the County Agricultural Commissioner and the State Department of Pesticide Regulation (DPR).	All Parks Division employees involved with pesticide application receive annual training in the proper use, handling, mixing, storage, and application of Roundup Pro and Surflan AS (the only two pesticide used by city staff). The last training was completed on June 2005 as noted on the Staff Training list at the end of the Annual Report. Parks Supervisor conducted training in-house. In January 2005, Parks Division passed Santa Clara County Department of Pesticide Regulation annual inspection including our training documentation.	Public Works Maintenance Department
2	Pesticide Applicator Training	Los Altos will continue to provide annual training on the appropriate portions of the IPM Policy, SOPs, and BMPs, and the latest IPM techniques to employees within departments responsible for pesticide application.	12 Parks Division employees involved with pesticide spraying receive annual training conducted at the Municipal Service Center. Training was conducted by certified spray applicator regarding IPM Policy, BMP's, and SOP's. Training is summarized in the Staff Training list at the end of this Annual Report. The last in-house training was conducted in May 2005.	Public Works Maintenance Department
3	Employee Training	Los Altos will continue annually to inform employees who are not authorized and trained to apply pesticides that they cannot use over-the-counter pesticides in or around the workplace, consistent with the IPM Policy.	Staff was unable to conduct internal outreach to employees due to high workload.	Public Works Maintenance Department

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
4	Pest Management Training.	Los Altos will continue to send staff to a workshop on least-toxic pest control methods and pesticide management BMPs. Staff will attend other applicable training as it becomes available.	Parks Division supervisor and staff attended nine separate training seminars during the year that dealt with issues of the city's IPM program in addition to three in-house training sessions. All training is listed in the Staff Training list at the end of this Annual Report.	Public Works Maintenance Department
5	Staff Training	Document and evaluate effectiveness of staff training conducted each year in annual reports.	The City of Los Altos passed the Santa Clara County Department of Pesticide Regulation annual inspection including our training documentation. No violations for pesticide spraying were issued by DPR and no other concerns from other agencies or residents were received during the fiscal year. It would therefore appear training has been effective.	Public Works Maintenance Department
Public Education and Outreach **Goal II.A.** Increase awareness of IPM so target audiences recall less toxic pest management messages and adopt IPM behaviors. Target audiences include residential and commercial users, pesticide retailers, municipal employees, and special districts (PS #6)				
1	Watershed Education & Outreach (WE&O) Campaign	Continue to support the Watershed Education & Outreach (WE&O) Campaign, which will target the general public and include messages about less-toxic pest control and proper disposal. The Campaign will include extensive media campaign with South Bay English- and Spanish- language TV and radio stations.	As documented in the Public Information Participation section of this Annual Report, the City of Los Altos continues to support the Watershed Education & Outreach Campaign.	URP Coordinator
2	BASMAA Regional Media Relations Campaign	Continue to fund BASMAA Regional Media Relations Campaign featuring pitches to Bay Area media and responses to breaking news on pesticide-related topics.	The City of Los Altos continues to fund BASMAA Regional Media Relation Campaign through the Program.	URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
3	Pesticide User Outreach	Continue to assist Program with implementation of local components of a "Pesticide User Outreach" project targeting residential and commercial users.	The City of Los Altos continues to assist the Program with the implementation of public outreach. This would include such things as public events where brochures such as IPM fact sheets, "Grow It!" guide, "Pests Bugging You?", and "Backyard Bugs" are distributed.	URP Coordinator
4	IPM Outreach	Continue to provide information on less toxic pest control (e.g., IPM techniques, municipal IPM policies, model contract language, training opportunities, etc.) to neighboring special districts (e.g., open space districts, vector control districts, and school districts) as appropriate	The only neighboring districts are the school district and the City of Los Altos did not provide them information on less toxic pest control. Los Altos would provide assistance to them if necessary.	URP Coordinator
5	Outreach Evaluation	Document or estimate numbers of residents reached by outreach efforts and media advertising.	A booth was staffed at seven of the city's farmer's market and approximately 40-50 people each time asked questions and were provided assistance. Three of the four hardware/garden supply stores in Los Altos carry the facts sheets. It is difficult to say exactly how many residents is reaches, but they are constantly restocking the various sheets.	URP Coordinator

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Goal II.B. Educate pesticide retailers and consumers about less toxic pest control products and promote the sale of such projects.				
1	BASMAA Regional IPM Partnership	Continue to fund and participate in the BASMAA Regional IPM Partnership.	The City of Los Altos still continues to fund and participate, as necessary, in this program.	URP Coordinator
2	IPM Store Partnership Program	Continue to implement cost-effective elements of the IPM Store Partnership Program, as identified in the work plan developed by the Program. Create and provide fact sheets and other materials to pesticide retailers to facilitate point-of-purchase outreach. Visit stores as necessary to ensure ongoing participation. Los Altos will continue working with the City of Palo Alto on this program.	See “FY 04-05 Accomplishments” for Item No. 2 under “Public Information/Participation” section of this report for the accomplishment for this task.	URP Coordinator
3	IPM Store Partnership Program	Continue to assist Program to document number of participating stores, materials distributed and employees trained. Evaluate the cost-effectiveness of the IPM Store Partnership Program each year	The City of Los Altos was available to provide assistance as necessary.	URP Coordinator

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Pest Control Operators (PCOs) **Goal III.A.** Minimize pesticide use by PCOs contracted for structural pest control and landscape maintenance.				
1	Municipal PCOs	Continue to require PCOs contracted for municipal applications to use pest control methods consistent with the municipality's IPM policy (through contract specifications).	All pesticide work is done through open purchase order. Contract language will be reviewed this year and updated as necessary. Parks Supervisor advises contractors of the City of Los Altos IPM program.	Public Works Maintenance Department
2.	Municipal PCOs	Document the pesticide use by the PCOs on municipal property in the Annual Report.	See "Summary of Pesticide Usage FY 04/05" that follows this section of the Annual Report.	URP Coordinator
Goal III.B. Require all PCOs to implement Best Management Practices (BMPs)				
3	Municipal PCO BMPs	Continue to require PCOs contracted by municipalities to implement BMPs through contract specifications.	All pesticide work is done through open purchase order. Contract language will be reviewed this year and updated as necessary. Parks Supervisor advises contractors of the City of Los Altos IPM program.	Public Works Maintenance Department
4	Documentation.	Los Altos will continue to documents its efforts in the Annual Report	See "Summary of Pesticide Usage FY 04/05" that follows this section of the Annual Report, the Staff Training list at the end of this Annual Report for a list of IPM related training that Staff participated in during FY 04/05, and the program evaluation that follows.	URP Coordinator

FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Commercial Businesses **Goal IV.A.** Determine the extent of commercial business employees' use of pesticides (I.E., pesticide applications not performed by a licensed PCO) and conduct appropriate outreach regarding less toxic pest management.				
1	Commercial Business Outreach Work Plan.	Assist Program to provide outreach on less toxic pest control to target businesses in the South Bay, as appropriate and cost-effective. Program to develop outreach material to target businesses.	The city of Los Altos assisted the Program in the development of the poster for new and remodeled restaurants that was provided to the County. The city of Los Altos also assisted the program in providing education and outreach to the hardware and nurseries in the city.	URP Coordinator
Household Hazardous Waste Collection **Goal V.A.** Provide pesticide disposal services through household hazardous waste (HHW) collection programs for all residents and small businesses, and encourage use of these programs.				
1	Small Quantity Commercial Generators.	Continue to insure that adequate pesticide disposal services exist for residents and conditionally exempt small quantity commercial generators.	The City of Los Altos residents have access to the household hazard waste collection services available through the County Household Hazardous Program. This program includes an appointment-based drop-off at various weekly events held throughout the county including one event held in the City of Los Altos at the Egan School on April 30.	Public Works Department
2	Pesticide Disposal	Continue to work with HHW collection agencies to support, enhance, and help publicize programs for proper pesticide disposal.	The City of Los Altos attends monthly meetings with the Technical Advisory Committee, which consists of cities in the Santa Clara County. Los Altos is also a member of the HHW subcommittee, which meets quarterly. In conjunction with this committee the city provide technical advice and funding to help support the Santa Clara County Household Hazardous Waste web site.	Public Works Department

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
3	Hazardous Waste Disposal Outreach	Continue to provide hazardous waste disposal information to residents, through distribution of materials (e.g., utility bill insert, city newsletter, community events, etc.) or advertising in local media	HHW collection is advertised in the annual mailer sent out to all solid waste customers of the Los Altos Garbage Company and thru telephone response to queries, and through the County's solid waste website at sscgov.org. The local event in Los Altos is advertised in the local paper, the Los Altos Town Crier.	Public Works Department
4	Documentation	Document that household hazardous waste collection programs adequately serve residents and businesses (conditionally exempt small quantity generators) Annual Report	Based on customer feedback at local events, 70% of participants rate the HHW program as "Good" or "Excellent". 96.5% reported they received adequate information when they called the appointment line to schedule their HHW drop-off. Additionally, Los Altos Police Department had no reports of hazardous waste abandoned during the fiscal year.	URP Coordinator
New Development **Goal VI.A.** Minimize pesticide use at new and redevelopment sites.				
1	Pest-resistant Landscaping and Design Features	Los Altos will continue to encourage pest-resistant landscaping and design features in the design, landscaping, and environmental reviews of proposed development projects. Los Altos will report the percentage of new development and redevelopment project for which pesticide reduction measures were required in Annual Report	Private Projects: The City encourages projectapplicants to use pest resistant landscaping and have information available for project sponsors to help them achieve this goal. The City of Los Altos had no Group 1 projects during the FY and most all project are rebuilding of or additions to single family residences. The limited commercial projects are typically remodels in built out areas that have very limited, if any, existing landscaping. Public Projects: There were no public projects during FY 04/05 that required landscaping. The Public Works Engineering maintains a list of pest resistant landscaping and proper landscaping methods and during the project design and review process for public projects; the city will evaluate this list for any projects that require landscaping.	Community Development Department

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Monitoring and Science **Goal VII.A.** Participate in coordinated monitoring efforts to support pesticide TMDL development and implementation.				
1	Regional Monitoring Program (RMP)	Assist in the financial support of the Regional Monitoring Program (RMP).	City of Los Altos provides their share of cost to the Program for this effort.	URP Coordinator
Review and Revision of Work Plan **Goal X.A**. Implement a Work Plan that includes appropriate goals, actions and monitoring mechanisms to reduce pesticide-related toxicity in urban runoff.				
1	Continuous Improvement	Revise work plan and add continuous improvement items.	The City of Los Altos believes that the current workplan submitted in March 2004 fulfills this requirement.	URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Pest Management Program Evaluation
FY 2004/2005

The City of Los Altos has a very small pesticide program and therefore we believe we have a good control on pesticides in urban runoff. Improvements could be made in the area of use of more pest resistant landscaping in private projects, but since the city is built out, this extra effort probably would not have much of an impact. The City still could use assistance/information on pest resistant landscaping since staff is not well trained on the development of this type of landscaping.

Staff continues to monitor and comply with Pest Management Program and utilizes IPM policy to determine best procedure for pest control. Through annual training of Maintenance Division personnel on Public Work's IPM policies and practices and following BMP's and SOP's in the safe use and application of pesticides Public Works had no citations or complaints this year. All City pesticide applications are documented with Santa Clara County Department of Pesticide Regulation. All contract spraying was completed with a recommendation from a PCA who was advised of our IPM policy before making a recommendation. We will continue to train Public Works personnel on Public Work's IPM policy

The Household Hazardous Waste program seems to work well. California's AB939 allows jurisdictions to set tipping fees at jurisdiction's landfill's to include a fee to support Household Hazardous Waste collection, and disposal or recycling. Santa Clara County has set this fee at $1.85 / ton of municipal waste. This generates enough revenue for Los Altos resident's HHW disposal costs of $39,160.45, or about 322 households. This funding level is intended to provide "free" disposal of HHW to 3% of the city's households. Actual participation by Los Altos is estimated at 9%, and the City provided augmentation of $51,000 from the general fund in 2004/2005 so that all residents of Los Altos who desire to use the HHW collection program can do so at no direct cost to the resident. The City did not have any abandoned waste this year. There are areas that might need improvement, such as very limited participation by multi-family unit dwellers and families where English is not spoken in the home. Additionally, improved outreach at the State, County, and City level will be needed in the upcoming months to educate residents on disposal options for universal waste, which cannot legally be disposed of in residential garbage after January 2006.

MERCURY POLLUTION PREVENTION PROGRAM
(Provision C.9.c of the Permit)

FY 2004-2005 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Municipal Use of Mercury-Containing Products				
Goal I. Eliminate all unnecessary municipal use of mercury containing products and establish proper disposal methods for products that cannot be eliminated.				
1	Mercury Policy.	Los Altos will continue to implement its policy for mercury-containing product reduction and management.	The City of Los Altos does not have a written mercury policy policy, but has been managing its usage and disposal for some time. For example, when florescent lights are replaced, the old ones are collected and are periodically manifested to a proper disposal site. Last FY the City of Los Altos manifested 96 eight-foot tubes and 1164 four-foot tubes to the Santa Clara County Hazardous Waste Recycling and Disposal Program. New lights are low mercury florescent type. From a city operation standpoint these lights are probably the largest and about the only source of mercury.	URP Coordinator
2	Documentation on Mercury Policy	Los Altos will report the documentation in Annual Reports.	Aside from the fluorescent lighting in most of the city buildings, the only other known mercury sources are mercury thermostats in 5 of 11 city buildings and mercury switches in the cities two sewer pump stations. When they burn out, these florescent light tubes are replaced with low mercury tubes. The old tubes are manifested for proper disposal. Last FY the City of Los Altos manifested 96 eight-foot tubes and 1164 four-foot tubes to the Santa Clara County Hazardous Waste Recycling and Disposal Program.	URP Coordinator

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Household Hazardous Waste Collection **Goal Ii.** Provide mercury-containing products disposal services through household hazardous waste (HHW) collection programs for residents and small businesses, and encourage use of these programs.				
1	Disposal Services	Continue to provide mercury-containing products disposal services for residents and small businesses.	The City of Los Altos supports the Sunnyvale Smart Station HHW program which includes mercury collection and collection of "universal waste" i.e. florescent light tubes that contain mercury.	Public Works
2	Documenting and Reporting Guidelines	Continue documenting and reporting quantities of mercury-containing products disposed. Los Altos will report the documentation in Annual Reports.	Aside from the fluorescent lighting in most of the city buildings, the only other known mercury sources are mercury thermostats in 5 of 11 city buildings and mercury switches in the cities two sewer pump stations. When they burn out, these florescent light tubes are replaced with low mercury tubes. The old tubes are manifested for proper disposal. Last FY the City of Los Altos manifested 96 eight-foot tubes and 1164 four-foot tubes to the Santa Clara County Hazardous Waste Recycling and Disposal Program	Public Works
3	Fluorescent Light Recycling Program	Continue to develop and publicize fluorescent light recycling program. Continue to assist the Program and work with local agencies to develop and publicize fluorescent light recycling program	The city of Los Altos does not have its own fluorescent light-recycling program but works with the Sunnyvale Smart Station, which offers recycling of these lights. The city continues to develop a local disposal location. Tentative agreement has been reached with a local hardware store to offer the same service for city residence.	Public Works

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Monitoring and Science **Goal III.** Participate in coordinated monitoring efforts to support mercury TMDL development and implementation, including assessment of air pollution sources of mercury and concentrations of mercury in sediment.				
1	Regional Monitoring Program (RMP)	Continue financial support of the Regional Monitoring Program (RMP). Continue to support the RMP steering committee and technical review committee. Continue to support the coordinated regional plan to collect data for the mercury TMDL, as defined in the RWQCB/BACWA/BASMAA MOU	The City of Los Altos continues to provide financial support for the Regional Monitoring Program. Also the City of Los Altos continues to provide comments as necessary for the program regarding the possibility of a mercury TMDL.	URP Coordinator
Public Education and Outreach **Goal:** Increase awareness of proper disposal of mercury-containing products and available non-mercury containing alternatives. Target Audiences include residential, commercial and industrial users and municipal employees.				
1	Development of Outreach Material	Los Altos will continue to support the program in the development of outreach materials.	The city of Los Altos supported the Program efforts during the FY to develop partnerships with various details stores to provide free fluorescent lamps drop-off sites for residents. The city is working to have one of the city's hardware stores to offer that service.	URP Coordinator
2	Distribution of outreach material	Los Altos will continue to distribute outreach material and document each activity in Annual Report	The City of Los Altos continued to support the program in the development and distribution of various fact sheets, newsletter articles, press releases, newspaper ads, etc. These out reach pieces aim to show the negative health and environmental impacts of mercury. The city also included a short note about this issue in its quarterly citywide newsletter.	URP Coordinator

Mercury Pollution Prevention Program Evaluation FY 2004/2005
Due to the limited amount of mercury products within the city buildings, it is difficult to provide a practical evaluation of this program. The largest and about the only source of mercury within the city's buildings is fluorescent light tubes. During FT 04/05 the City of Los Altos manifested 96 eight-foot tubes and 1164 four-foot tubes to the Santa Clara County Hazardous Waste Recycling and Disposal Program. The City continues to review this program to areas of improvements.

OTHER WATER QUALITY AND WATERSHED MANAGEMENT REQUIREMENTS

FY 2004-2005 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
1	5 Year Monitoring Plan & FY 04-05 Monitoring Plan (Provision C.7.b)	Los Altos will continue to support the Program in the development on these Plans.	The City of Los Altos continues to support the Program's efforts in their monitoring of streams and waterways in the Santa Clara Valley. The City reviewed and approved the Programs work during FY 04-05.	URP Coordinator
2	Watershed Measures (Provision C.10)	Los Altos will continue to work with the WMI Land Use Subgroup and Program staff	The City of Los Altos continues to monitor the activities by the WMI Land Use Subgroup and Program staff.	URP Coordinator
3	PCB & Dioxin Plans (Provision C.9.e)	Los Altos will continue to monitor that sampling events and is prepared to conduct "hot spot" investigations, if deemed necessary.	The City of Los Altos continued to monitor the program. No "hot spot" investigations by the city were necessary during the FY.	URP Coordinator

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
4	Control Program for Sediment (Provision C.9.f.iii)	Los Altos will work with the Program to develop a plan and time schedule to identify the most effective approach and schedule for conducting a watershed analysis and management practice assessment for the high priority reaches of creeks identified in the report entitled "SCVURPPP - IDENTIFICATION OF CREEKS POTENTIALLY IMPAIRED BY SEDIMENT FROM ANTHROPOGENIC ACTIVITIES (Permit Provision C.9.f.iii)." The approach and schedule will be coordinated with the efforts of the SCVWD and STOPPP relative to San Francisquito Creek per permit provision C9f.i and ii.	The City of Los Altos is a member of the committee dealing with this issue. Los Altos continues to assist the Program. For example, Los Altos recently provided comments on the final version of the Steven Creek Limiting Factors Analysis study. Will continue similar type of support as the Program continues with these evaluations..	URP Coordinator
5	Street Sweeping	Los Altos will continue to evaluate how it documents waste from this operation and provide available information to the Program	See the “Copper Action Plan Task” in this section of the Annual Report	Public Works

Trash Management				
6	Trash Evaluation	City of Los Altos will use Program guidance to develop a strategy to conduct trash evaluation with the city as applicable. This will include an evaluation in a subset of identified trash problems areas.	The City of Los Altos is a member of the Trash AHTG working on the development of the Trash Program. Through this task group, the City of Los Altos has assisted the Program during FY 04/05 to facilitate documentation and evaluation of existing task management practice. This includes discussion, review and approval in determining the best approach to set up the program. Los Altos provided the program with a list of our "hot spots".	URP Coordinator
7	Trash Problem Areas	City of Los Altos will identify and begin implementation or refinement of trash control measures, as appropriate to address trash problem areas within high priority areas.	During FY 04/05 the City of Los Altos inspected each of its eight identified hot spots twice. Data is summarized at the end of this "Trash Management" section. The preliminary evaluation of the results of these inspections is summarized in the "Other Water Quality & Watershed Management Programs Evaluation".	URP Coordinator
8	Trash Performance Standards	Los Altos will work with the Program to review existing performance standards relevant to trash management and identify potential revisions to these standards, as appropriate.	The City of Los Altos is a member of the Trash AHTG working on the development of the Trash Program. Through this task group, the City of Los Altos has assisted the Program during FY 04/05 appropriate to review existing performance standard. During the FY, this was limited to developing and documenting the data on the trash hot spots from the various co-permittees.	URP Coordinator

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
	Copper Action Plan Tasks			
9	Vehicle Washing Operations (CB-1)	• Continue to distribute outreach materials on proper vehicle/equipment washing at City department counters and public events, and post on City website.	Los Altos dedicates counter space accessible to the public at City Hall for these various brochures like "The Bay Begins at Your Front Door". Los Altos also provides for a link on its web page that the public can also use to access information.	URP Coordinator
		• Continue to submit data regarding vehicle washing outreach activities and effectiveness evaluation in annual reports.	This is difficult for Los Altos to quantify other than to say, from observation; there have been a reduced number of incidents of vehicle washing both during construction operation and residential car washing.	URP Coordinator
		• Continue to require source control measures for Group 1 new development and redevelopment projects that will conduct vehicle/equipment washing and maintenance activities (consistent with Permit Provision C.3.k).	During the FY, Los Altos did not have new Group 1 projects or any project that involved vehicle/equipment washing and maintenance activities.	URP Coordinator
		• Continue to inspect auto businesses regarding car wash requirements, and prohibited storm drain discharge.	All seventeen auto businesses in Los Altos are formally inspected annually. During the year, city staff is aware that these discharges are not allowed and will report such incidents to the Code Enforcement Officer or the URP Coordinator.	URP Coordinator
		• Continue to inspect vehicle-washing facilities as part of stormwater inspections for industrial and commercial businesses.	Other than the auto businesses discussed above, Los Altos does not have any other vehicle washing facilities except the municipal wash rack which is included in the annual auto business inspects discussed above and the school corporation yard which is outside the city's jurisdiction and is not inspected.	URP Coordinator

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
		• Continue to maintain car wash systems for City vehicles at the corporation yard/ • Continue to encourage municipal staff to use certified mobile cleaners when contracting cleaning services.	All city vehicles are washed either at this facility or at a commercial car wash. Fire Stations in the Los Altos are under the County's jurisdiction. All cleaning operations are conduct by the Municipal staff and they all have been certified by the BASMAA training.	Public Works Public Works
10	Industrial Copper Control (CB-3)	Continue Industrial Inspection program for vehicle service facilities and any other related industrial facilities.	In fall of 2004 the City of Palo Alto inspected 17 vehicle service facilities in Los Altos. None were found with any violations and all facilities were given the Clean Bay Business award. During the year, there were no other reports on discharges from any of these facilities. The CB-3 of the Copper Action Plan was primarily directed toward such facilities as circuit board manufactures or similar facility, however there no such facilities in Los Altos	URP Coordinator
11	Reducing Traffic Congestion/ Promoting Alternative Transportation (CB-6/7)	Complete the implementation of results from the Development Policies Comparison Project Report, particularly Section VI, Policies to Limit Auto Use/Promote Alternative Transportation, in the Policy, Code, and Ordinance Worksheet, as applicable.	The City of Los Altos continued to implement the actions noted in the FY 03/04 Annual Report under "Site Design Measures Guidance and Standards Development Action Summary". For example Los Altos has develop several projects that would further promote bicycling in the city which were submitted for budgeting considerations**.**	Community Development & URP Coordinator
12	Watershed assessment and protection (CB-8)	• Continue to implement guidance from SCVURPPP and San Jose on addressing water quality in the CEQA review process, as part of C.3.m. implementation. • Continue to participate in the Water Resources Protection Collaborative and recommend to council implementation of agreed upon guidelines and standards for watershed protection.	The Community Development department feels that the current check list for CEQA issues are inclusive of the issues facing the city's Group 1 and Group 2 projects. This City of Los Altos continues to attend and participate in the monthly meeting of the Collaborative.	Community Development Public Works & Community Development

Other Water Quality & Watershed Management Programs Evaluation FY 2004/2005

Monitoring-The City of Los Altos continues to work with the Program on this task. Since the effort is by the Program, they have provided an evaluation of this task.
PCB-Dioxin- The City of Los Altos continues to work with the Program on this task. Since the effort is by the Program, they have provided an evaluation of this task.
Watershed Measures- The City of Los Altos continues to work with the Program on this task. Since the effort is by the Program, they have provided an evaluation of this task.
Sedimentation- The City of Los Altos continues to work with the Program on this task as a member of the Sediment Committee. Since the effort is by the Program, they have provided an evaluation of this task.
Trash Program-The City of Los Altos is in the initial stages of this program. The city has selected and has conducted assessment of eight trash problem areas within the city. The city has a program to inspect these areas and conduct any necessary cleanup on at least a monthly basis. It would appear from the preliminary results of this assessment that Los Altos does not have the same problems as other city. This may be due to the lack of industrial and commercial areas. The city will continue to be a member of the trash committee and continue to provide support to the Program to further comply with its permit.
Copper Action Plan-The city continues to address various tasks as defined by the Action Plan. Due to lack of industrial and commercial areas, this leaves most of the effort to residential areas and to schools. Virtually no private project had a requirement for the use of exterior copper in their construction. The city continues to have an aggressive street sweeping program, which is apparent by the lack of trash throughout the city. The city continues to address inquiries from pool owners on their discharges. The city has room to improve alternate modes of transportation other than cars by improving its pedestrian access and its bicycle facilities. Both are included in the General Plan and future Capital Improvement Projects. The City of Los Altos also continues to work with the Program on this task.
Nickel Action Plan-The primary effort for the city under this Action Plan deals with discharges from construction sites. City inspectors aggressively assure that there is no or minimal discharges from any of its constructions sites. Though the inspectors attend various training sessions, very little, if any, addresses what the nickel sources are that might be coming from construction sites. The City of Los Altos also continues to work with the Program on this task

PUBLIC INFORMATION/PARTICIPATION
(Provision C.4)

FY 2004-2005 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
1	Distribution of all current Program BMPs and literature	Los Altos will continue to promote and maintain a request line for public information materials. Continue to distribute public information materials to the City libraries, Public Works Engineering help desk, building and planning department desks, at the Municipal Service Center and Chamber of Commerce. Keep records on the usage of this material	The City of Los Altos continued with the distribution of the public information within the various public buildings in the City of Los Altos that promotes the use of less toxic pesticides. Los Altos also hosted a table at several of its weekly Farmers Market event held during the summer months. The City of Los Altos did its own mailing of the new pool brochure sending the mailing ourselves allowed the city to highlight, in a city cover letter, our municipal code along with the city's point of contact for any questions or issues. As a result, the city received several inquiries by residents during the fiscal year requesting clarification on the proper disposal of pool water. The city added information on its web page on how residents could help to prevent sewer overflows.	URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
2	IPM Store Partnership	Los Altos will continue participation in IPM Store Partnership Program with the City of Palo Alto by providing funding and participating to supply various outreach information to the two nurseries and the two hardware stores in the City of Los Altos. Monitor effort to realize the goals of this program	The Our Water, Our World (OWOW) program, a partnership between water quality agencies within the Palo Alto service region and local hardware and garden stores, encourages the use of less-toxic gardening techniques and products. Los Altos partner stores are Los Altos Garden Supply, Los Altos Nursery, and Rancho Hardware. During FY 04/05 IPM outreach more specific to Los Altos also included the following activities: • Provided a DVD of the revised "Healthy Home and Garden Less-Toxic Pest Control" to Los Altos Public Library • With the assistance of EOA staff, kept fact sheets stocked at City Hall and the partner stores; kept shelf talkers at stores updated. • Staffed the OWOW booth at the regional horticultural tradeshow and IPM conference • With OWOW consultant, talked to Los Altos Garden Club (105 persons) and provided IPM handouts • Gave talk on encouraging beneficial insects at Los Altos Senior Center's "Bugs' Day Lunch" and provided IPM handouts (~100 persons) • Staffed seven Los Altos Farmers' Market displays, including three on IPM and two (using Toxics Toss beanbag game) on proper disposal of pesticides and other wastes; IPM fact sheets and disposal wheel as handouts [also one Farmers' Market on green cleaning, with Clean It! handout and one on pharmaceuticals disposal, with event flier handout]	URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
3	Watershed Education & Outreach Campaign.	Los Altos will continue to encourage municipal staff to participate in Watershed Education & Outreach campaign as the events are scheduled	The URP Coordinator continues to monitor the efforts of the Watershed Education & Outreach campaign and the information that they provide. During FY 04/05 this campaigned addressed over 1000 students in the City of Los Altos on various subject matters such as "Microbes in Sewage" or "Who Dirtied the Bay".	URP Coordinator
4	Evaluate the effectiveness of PI/P projects	Los Altos will continue to review and will attempt to assess the effectiveness of all PI/P projects at the local municipal staff level.	See "Public Information/Participation Program Evaluation" section below.	URP Coordinator
5	Web page	Los Altos has plans to add URP issues to its web page.	This year the City of Los Altos added link to address the issue of preventing sanitary sewer overflows. This include a link to the Association of Bay Area Governments program on their sewer prevention program and a link to a document on what residents can to do to help the city prevent sewer overflows.	Community Development, Public Works Department & URP Coordinator
6	Articles in the Communiqué	Los Altos will continue to prepare and contribute articles of interest to the City's publication call the Communiqué. The city tries to have this published up to three times annually.	The newsletter is published by the city three times a year and is mailed to every address in the city. Unfortunately this is a rather small newsletter, but the city will provide a small article on urban storm water runoff issues. For example, in the Spring 2005 issue, the city published an article on the subject of "Easy ways you can help protect our local watershed" which included such suggestion as regularly maintaining your car to avoid leaks of auto fluids, never pouring oil or other automotive fluids into a storm drain or onto the ground.	URP Coordinator
7	Storm Drain Stenciling	Los Altos will continue to be the point of contact with the City's schools and organization that are interested in stenciling storm drain catch basins. Provide support and materials for each event of which they are typically 3-4 per year.	During FY 04/05, the City of Los Altos had two volunteer groups who provided people that stenciled several storm drain catch basins. The City continued to promote this service.	URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

Public Information/Participation Program Evaluation
FY 2004/2005

Management of Los Altos partner stores each year seems more positive about the program. Los Altos Garden Supply and Los Altos Nursery, the stores with more shelf space for garden products, are carrying a significantly higher proportion of organic and pelleted fertilizers and less-toxic or other alternative products. Los Altos has one hardware store that has resisted in participating in the program and the city needs to work with this business to persuade them to carry the brochures.

The SCVURPPP program staff and Palo Altos continue to the restocking of fact sheets at the Los Altos stores and City Hall during FY 04-05

The educational aspect of the various programs continues to have an impact. This is very apparent with the following letter that was published in November 9th issue of the Los Altos Town Crier:

"Watch what goes into storm drains
I am a ninth grader at Monta Vista High School. In my biology class, we received information about helping conserve our natural resources and protecting our creeks and Bay. This inspired me to help educate other people about rescuing the environment we live in. One thing many people are misinformed about is where our water goes inside the home versus where it goes out in the street. All the drains inside your house go to the same place: the wastewater treatment plant. Here it is purified with chemicals and is filtered, before flowing out to the bay. The water from the storm drain outside on the curb is treated very differently. Anything and everything that goes down that drain, whether it be solid or liquid, flows directly into your local creek, where it eventually gets to the San Francisco Bay. This water is in no way whatsoever treated. Ever wonder why your creek or Bay is so filthy and polluted? Now you have the answer. Any pesticides or fertilizers used for people's plants can easily run into the storm drain, and drain to the bay. Any oil that drips from a car can easily run down your driveway and into the storm drain, which drains into the bay. If you see anybody putting anything they're not supposed to down the storm drain, tell them to please stop. This can have a big impact on the quality of our water."

ANNUAL REPORTS AND WORKPLANS
(Provision C.6)

FY 2004-2005 Work Plan Self Evaluation Matrix

Item No.	Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
1	Annual Report (Provision C.6.a)	Los Altos will prepare a FY 03-04 Annual Report documenting the results of each task that was delineated in the FY 03-04 Work Plan and provide update for work accomplished in Fy03/04 as necessary. Los Altos will address any comments on the FY 02-03 Annual Report	The Annual Report for FY 03/04 was completed by the City of Los Altos and submitted on September 15, 2004. Comments from the Regional Board were received on the City of Los Altos' FY 02/03 Annual Report and are addressed in the applicable sections of that Annual Report. Comments on the FY 03/04 are addressed in this Annual Report.	Community Development, Public Works Department & URP Coordinator
2	Work Plan (Provision C.6.b)	Los Altos will prepare a FY 05-06 Work Plan that will list tasks as dictated by the City's Discharge Permit that will be accomplished between July 1, 2005 and June 30, 2006.	A draft Work Plan for FY 05/06 was completed by the City of Los Altos and submitted on March 1, 2005.	Community Development, Public Works Department & URP Coordinator
3	City of Los Altos Urban Runoff Management Plan	Los Altos will update its Urban Runoff Management Plan as required	The City of Los Altos updated is Urban Runoff Management Plan and submitted in on September 1 2004. Subsequent to that, no other updates were necessary.	Community Development, Public Works Department & URP Coordinator

Regional Board Comments on The City of Los Altos' FY 2003-2004 Annual Report	
RWQCB Comment	**City Of Los Altos Response**
Every Co-permittee should number the pages of their respective sections sequentially, from the first to the last page. For example, if your section contains 30 pages of text, tables, and figures, then the pages should be numbered "1" through "30" sequentially. We commend Los Altos, Mountain View, and San Jose for already following the numbering scheme discussed in this section; because of this, we are able to reference specific page numbers for our comments in Attachment A.	The City of Los Altos appreciates your commendation for this aspect of our Annual Report. We understand the need for page numbers as it also helps us keep track of the information.
Every Co-permittee should include a list of acronyms and their definitions in their respective sections.	The City of Los Altos will review our next Annual Report for acronyms and provide definitions as appropriate.
For FY 2004-05, please submit three hard copies and one electronic copy (on CD) of the Annual Report, in its entirety	The City of Los Altos provided three hard copies and an electronic copy of our Annual Report to the Program for their submittal of the consolidated Annual Report.

Note: See text of this Annual Report for responses to comments made on specific sections

LOS ALTOS HILLS
CALIFORNIA

September 15, 2005

Mr. Bruce Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: Town of Los Altos Hills Urban Runoff Management Program
FY 2004-2005 Annual Report

Dear Mr. Wolfe:

This report is submitted by Town of Los Altos Hills, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2004-2005 in accordance with the Town of Los Altos Hills' Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 1997 and updated in October 2000 and September 2004, and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 04-05 work plan during the past fiscal year; 2) evaluate program results for continuous improvement;3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

I. Contents of report;
II. Program highlights and accomplishments;
III. Summary of continuous improvement activities;
IV. Attachments:
   A. Certification Statement
   B. Self-Evaluation and Work Plan Completion Matrix
      - IC/ID Elimination Activities
      - Public Streets, Roads and Highways Operation and Maintenance
      - Corporation Yard Operation and Maintenance
      - Rural Public Works Activities
      - Storm Drain System Operation and Maintenance
      - New Development Planning Procedures
      - Construction Inspection
      - Pesticide Management Activities

- Mercury Pollution Prevention Activities
- Other Water Quality and Watershed Management Requirements
- Public Information/Participation
- Staff Training Summary Table

Program Highlights and Accomplishments

We feel that the Program continued to be effective in meeting our Program goals. Though there are about twenty full time public agency staff in the Town of Los Altos Hills, the staff has been working with team effort to implement our URMP and FY 04-05 Work Plan to the maximum extent practicable.

In FY04-05 the Public Works staff has developed a new ordinance to implement C.3. requirements for the Town of Los Altos Hills. The new ordinance has been introduced to the City Council in August 2005. It is expected to be approved in September 2005.

The Town of Los Altos Hills did not encounter any significant problems or incidents during the past year. The Town had three incidents of construction site wash discharged to the creek or street. The responsible parties cleaned up the discharge after the Town staff made the requests.

Continuous Improvement Activities

The Town of Los Altos Hills was able to accomplish several of the work plan goals in the past year and anticipates continue to improve in outside staff training, public outreach and increased public awareness of Program goals.

This year Public Works staff inspected 66 construction sites of private development and several public works projects. The pre-rainy season and rainy season inspections were effective in getting construction sites to install proper BMPs. The inspection coverage of the sites was adequate because it focused on the erosion/sediment controls. The Town of Los Altos Hills did not take enforcement actions this year since the contractor followed the instructions or warning of the inspector. The inspector always inspected the sites after each verbal warning to make sure the compliance was achieved. The contractors on Public Works projects have done a good job in erosion/sediment control.

In September 2004 Public Works staff has published an article in the Town Newsletter about mercury pollution prevention. This is an effective way to reach property owners since all the property owners receive Town's newsletter each quarter.

Thank you for your review of this Annual Report and welcome any comments that you might have. If you have any questions regarding the materials submitted, please contact Richard Chen at (650) 941-7222.

Very truly yours,

Richard Chen, P.E.
Associate Engineer

P.S. Id.	Activity	CI Item Source[1]	FY 04-05 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
New		C.3.j.4	Incorporate any revised standards and guidance into local project approval process and "fully implement" the revised standards and guidance.	In FY04-05 the Public Works staff has developed a new ordinance to implement C.3. requirements for the Town of Los Altos Hills. The new ordinance has been introduced to the City Council in August 2005. It is expected to be approved in September 2005. It will provide legal authority for the Town to implement C.3. requirements.	9/15/04	Public Works
	C.3.n Reporting Requirements					
New		C.4.n.4	Collect and report the following for all projects that must implement treatment measures: BMPs, site design, and source control measures used, sizing criteria, O&M responsibility mechanism and responsible party.	A system is in place to collect the information in case such a project is proposed. Los Altos Hills did not have any Group 1 new development or redevelopment projects in FY 04-05. See Attachment 2 for detail.	ongoing	Public Works
New	Reporting, staff training, review conditions of approval	C.3.n.5	Collect information and report a summary of types of pesticide reduction measures required for development projects, and the percentage of projects for which pesticide reduction measures were required.	Public Works has customized Program's Model conditions of approval for pest-resistant landscaping features and practices and forwarded to Planning Department for review. As applicable, the Town will modify conditions of approval. The staff has attended C3 workshop related to this issue.	ongoing	Public Works
New Development -- Construction Inspection						
Const -6	Staff Training	URMP	Conduct annual training for Public Works staff.	Annual training for Public Works staff will be conducted by the Program on December 2005.	ongoing	Public Works

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 04-05 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Const -5		Program (Revised PS)	Inspect all construction sites before and during rainy season per Performance Standard. Los Altos Hills will include a summary of the year's written inspection notices (for sites with inadequate erosion/sediment controls) and follow-up actions in the FY 04-05 AR.	This year Public Works inspector inspected **66** construction sites of private development and 2 public works construction projects. **19** of the private construction sites appeared to have erosion/sediment control problems prior to the 1st or 2nd inspections.	ongoing	Public Works.
			Review and evaluate effectiveness	The typical problems were that site access roads were not covered by the crushed rocks and the mud were tracked to the streets; the soil stockpiles were not covered by the plastic sheets; and fiber rolls were not installed. After 1st or 2nd inspections and warning given to the contractors, the problems on those sites were corrected. Construction inspection before and during rainy season is very effective to correct the inadequate erosion/sediment controls		Public Works
Pest Management Program						
I. Municipal Pesticide Use						
Goal I.A. Eliminate all unnecessary municipal pesticide use (particularly organophosphate (OP) pesticide use) and implement Integrated Pest Management (IPM) techniques.						
		MM I.A.1	Document completion of tasks in annual reports. Use pesticide tracking process to document pesticide use.	The contractors hired by the Town monitored and recorded all pesticide use on Town owned property on a monthly basis.	Annually;	Public Works
Goal I.B. Raise awareness of all municipal employees and train employees who apply pesticides for the municipality about the municipality's IPM Policy and/or IPM techniques as appropriate.						

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 04-05 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
		I.B.3	Periodically (at least annually) inform employees who are not authorized and trained to apply pesticides that they cannot use over-the-counter pesticides in or around the workplace, consistent with the IPM Policy (PS #4c).	The employees are informed annually.	At least Annually	Public Works
II. Public Education and Outreach						
Goal II.A. Increase awareness of IPM so target audiences recall less toxic pest management messages and adopt IPM behaviors. Target audiences include residential and commercial users, pesticide retailers, municipal employees, and special districts. (PS #6)						
		II.A.14	Conduct internal outreach on less toxic pest control to employees who do not necessarily purchase or apply pesticides during the course of their work (to encourage employees to use IPM techniques away from work).	The Town has provided the handouts at the counter regarding the less toxic pest control.	Annually	Public Works
III. Pest Control Operators (PCOs)						
Goal III.A. Minimize pesticide use by PCOs contracted for structural pest control and landscape maintenance.						
		III.A.4	Require PCOs contracted for municipal applications to use pest control methods consistent with the municipality's IPM policy (through contract specifications). Specifically, require contractors to: a) follow the agency's IPM policy, BMPs, and SOPs; b) provide evidence of current IPM training, when feasible; and c) provide documentation of pesticide use on agency property to the agency in a timely manner (PS#6).	Town required the Contractors, Clark Pest Control and Earl's Pest Control, to follow the current IPM policy. They received current IPM training and provided documentation of pesticide use on Town property. See Attachment 3 for details.	Ongoing	Public Works
Goal III.B. Require all PCOs to implement Best Management Practices (BMPs).						
		III.B.2	Require PCOs contracted by municipalities to implement BMPs through contract specifications. (See Action III.A.4, above.) (PS #6)	The Town has notified Clark Pest Control and Earl's Pest Control to implement BMPs in their contract work in the Town.	Annually	Public Works

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 04-05 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
		MM III.B.1	Document efforts to complete the above actions.		Annually	Public Works
IV. Commercial Businesses						
	None in Los Altos Hills.		.			
V. Household Hazardous Waste Collection						
Goal V.A. Provide pesticide disposal services through household hazardous waste (HHW) collection programs for all residents and small businesses, and encourage use of these programs.						
		V.A.5	Provide hazardous waste disposal information to residents, through distribution of materials (e.g., utility bill insert, city newsletter, community events, etc.) or advertising in local media	Los Altos Garbage company provided hazardous waste disposal information to residents through garbage bill inserts.	Periodically, at least annually	Public Works
VII. New Development						
Goal VII.A Minimize pesticide use at new and redevelopment sites.						
		VII.A.2	Consider pesticide reduction in the design, landscaping, and environmental reviews of proposed development projects. (C.9.d.ii.)		Annually	Public Works/Planning
		MM VII.A.1.	Summarize types of pesticide reduction measures required for new development and significant redevelopment projects, and the percentage of new development and significant redevelopment projects for which pesticide reduction measures were required. (C.3.n.) Provide education.	Projects got fact sheet about this subject.	Annually	Public Works
VIII. Monitoring and Science						
X. Review and Revision of Work Plan						
Goal X.A Implement a work plan that includes appropriate goals, actions and monitoring mechanisms to reduce pesticide related toxicity in urban runoff.

		MM X.A.1.	Revise work plan to include any continuous improvement items. Report on completion of work plan tasks in Annual Report.	There is no continuous improvement items.	Annually; submit work plan updates in March; AR in September	Public Works
			Review and evaluate effectiveness			Public Works
Mercury Pollution Prevention Program						
I. Municipal Use of Mercury Containing Products						
Goal I. Eliminate all unnecessary municipal use of mercury-containing products and establish proper disposal methods for products that cannot be eliminated.						
		I.D	Adopt a mercury policy or ordinance requiring the virtual elimination of mercury from controllable sources in urban runoff from agency operations.	Town has conducted thermometer exchange program for the Town residents.	Annually	Public Works
		I.F	Implement guidelines developed under Action I.e.		Annually	Public Works
		MM I	Document completion of tasks in annual reports. Use mercury-containing product reporting guidelines (to be developed under Action I.E.)	The Annual Report summarizes the work completed.	Annually	Public Works
V. Public Education and Outreach						
Goal V. Increase awareness of proper disposal of mercury-containing products and available non-mercury containing alternatives. Target audiences include residential, commercial, and industrial users and municipal employees.						
		V.B	Use existing mercury outreach materials, as needed, for outreach programs.	In September 2004 Public Works staff has published an article in the Town Newsletter about mercury pollution prevention. Los Altos Hills continues to assist Program by providing support.	ongoing	Public Works
		V.C	Attend community events and distribute outreach materials.	Los Altos Hills continues to assist Program by providing support.	Annually	Public Works

Copper Action Plan Tasks						
CB-1	Vehicle Washing Operations	CAP	• Distribute outreach materials on car washing at Town Hall counter and public events, and post on Town website. • Submit data regarding car washing outreach activities and effectiveness evaluation in annual reports.	The materials have been distributed. The Town of Los Altos Hills does not have commercial vehicle wash operations.	6/04	Public Works
CB-8	Watershed assessment and protection	CAP	• Revise City's General Plan, as needed, at next scheduled update, based on recommendations from the *Development Policies Comparison Project* and Provision C.3.I. • Review and implement guidance from SCVURPPP and San Jose on addressing water quality in the CEQA review process, as part of C.3.m. implementation.	The Planning Department was informed to review study and ordinance from Palo Alto and consider feasibility of limiting the use of copper on roofs, in roof shingles, and for gutters.	At next update As Needed	Planning Planning
CB-11	Street sweeping and storm drain O&M		• Follow Program guidance regarding the collection and reporting of street sweeping data. Provide data for Annual Report. • Evaluate need for improvement of current street sweeping program (within available budget) in FY 04-05 Annual Report.	The selected streets were swept on a monthly bases. The trash swept from the streets were tree leaves and branches. The current street sweeping program is effective for the Town of Los Altos Hills.	6/04	Public Works

Richard,

Our Weed control service is designed using the IPM philosophy to suppress and control the most common weed species. This application combines different materials to create a weed barrier and control existing weeds. Each application, we will treat resistant weeds and reapply the weed barrier as necessary. The frequency of service depends on the types of weeds present and the varieties of trees, shrubs or landscaping that is located on the areas to be treated.

Town of Los Altos Hills
Table of FY 04-05 PIP Activities

PI/P Activity[1]	Type of Outreach [2]	Level of Implementation (Description/Dates)	Evaluation of Effectiveness [3]
Town literature distribution	General	The Town continues to check and maintain BMP information brochures at Town Hall. The materials for pickup are: • Watershed Watch Kit • The Bay Begins At Your Front Door • Keeping It All In Tune • Keep Pool/Spa Water Out Of Storm Drains, Streets and Creeks • Pests Bugging You? • Grow It We noticed that refill of brochures is needed because they have been taken away from the site.	The materials are accessible to the public coming to the Town Hall. The outreach is effective. This is reflected by the continued low number of reportable incidences.
Literature provided to distribute at Town's events:	General	LAH 2005 Spring Family Picnic, The brochures include: The Bay Begins at Your Front Door, Watershed Watch Kit, Hazardous Materials in Your Home; Creekside News and others.	Peoples attending the events were interested to pick up those brochures.
Newsletter article and ads	General	We have published an article titled "Mercury-Is there Mercury Lurking in Your Home?" in the Town Newsletters to make public aware of the importance of protecting the watershed.	This is a good communication vehicle to reach the residents. Town's newsletters have been mailed to every property owner and resident in Town.
Inform residents of swimming	Targeted	Staffs have provided brochures and	Telephone calls have been received

Town of Los Altos Hills
Table of FY 04-05 PIP Activities

pool discharge requirements		information to the swimming pool owners when they called or visit Town Hall to ask questions regarding this issue. The brochures are very informative.	and answered; and materials have been distributed upon request in the last FY.
Targeted Outreach for Town staff: Building inspectors and plan checkers, Public Works technicians and engineers, Maintenance staff	Targeted	Internal Training.	See attached table: "Training FY 04-05"
Development Community	Targeted	Literature distribution at Town Hall	Restock as needed, check regularly
Resident Living near creeks	Targeted	Watershed Watch Kit, available at the Town Hall	Restock as needed
Public Participation:			
Participated in regional creek cleanup event.	Citizen Participation	Announced cleanup in Town Crier	Very effective methord
Participate in local activities that are coordinated with the Watershed Education & Outreach Campaign	Citizen Participation	Worked with City of Palo Altos and other cities for the activities of Watershed Education & Outreach Campaign	Very effective method

		provide information for it on page 34. If not, please correct the typographical error on one of these pages.	
Los Altos Hills	**Compliance Status**	**Comments**	
New Development	conditional compliance	• In response to our comments on last year's Annual Report (FY02-03), Los Altos Hills submitted a discussion of its approval process for all new and redevelopment projects. Los Altos Hills also stated it is "working on adopting an ordinance to provide legal authority to implement C.3. requirements." This year's Annual Report provides no update on the status of this task. We are concerned that Los Altos Hills lacks the legal authority to implement Provision C.3. as required by the Permit. Although Los Altos Hills may not have Group 1 projects, it most certainly will have Group 2 projects; therefore proper legal authority is mandatory. **Within 8 weeks of the date of this correspondence, please submit to the Executive Officer a status report on Los Altos Hills's legal authority (or lack thereof) to implement Provision C.3. requirements.** • Los Altos Hill states that because of its rural setting, treatment BMPs will consist of site design measures in landscaping only. This may be the case but Provision C.3.e. explicitly requires that Los Altos Hills establish and implement an operation and maintenance verification program for all treatment BMPs installed for Group 1 and Group 2 projects. Los Altos Hills must develop its verification program and report on it in next year's Annual Report. All the information required in Provision C.3.e. must be included in this discussion.	Currently the Town of Los Altos Hills utilizes Municipal Code and Design Guideline to minimize erosion and higher rates of runoff for site development and public works projects. The Municipal Code and Design Guideline frame the legal authority for handling of storm water issues. The new and redevelopment projects in the Town of Los Altos Hills are all single family residence. Construction of one single-family home is exempted from Provision C.3. The Town of Los Altos Hills does not have Group 1 and Group 2 projects. Town' new Director of Public Works, Henry Louie, came on board on May 2, 2005. We have drafted an ordinance to provide legal authority to implement C.3. requirements. Henry will work with the City Council to adopt the ordinance. The Town of Los Altos Hills has developed the Town's verification program for the projects requiring stormwater control measures. The staff in Public Works and Planning Departments has been implementing the program. They conduct pre-final and final inspections on every site development projects to ensure that drainage, erosion control and landscaping work comply with the stormwater control measures.

Mr. Bruce Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: West Valley Community Specific Urban Runoff Management Program
FY 2004-2005 Annual Report

Dear Mr. Wolfe:

This report is submitted by the West Valley Cities of Campbell, Monte Sereno, Saratoga, and the Town of Los Gatos, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2004-2005 in accordance with the West Valley Communities' Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 2004 and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 04-05 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

Table of Contents
Cover Letter
Certification Statements
List of Acronyms

Program Elements:

1. IC/ID Elimination Activities
2. Industrial / Commercial Discharger Control Program
3. Public Agency Activities
    - Storm Drain O & M
    - Corporation Yards & Street Sweeping

- Rural Public Works

4. New Development: Planning Procedures
5. Construction Inspection
6. Public Information & Participation
7. Pesticide Management Activities
8. Mercury Pollution Prevention Activities
9. Copper Action Plan / Nickel Action Plan
10. Trash Inventory & Management
11. Water Quality Monitoring & Permit Re-application

No comments regarding the West Valley Communities FY03-04 Annual Report require a response, as listed in the San Francisco Bay Regional Water Quality Control Board letter to Mr. Dave Chesterman dated April 8, 2005.

Program Highlights and Accomplishments

During FY04-05, the West Valley Communities of Campbell, Los Gatos, Monte Sereno, and Saratoga continued efforts to implement their URMPs to the maximum extent practicable. The activities that were implemented for each element of each Community's URMP are described in Chapter 14 of the Santa Clara Valley Urban Runoff Pollution Prevention Program's URMP. Highlights of the West Valley Communities accomplishments in various program elements are described below.

Industrial/Commercial Discharger Control Program. During FY04-05, the three West Valley Communities of Campbell, Los Gatos, and Saratoga continued to implement their Industrial/Commercial Inspection Program. The goal is that all identified facilities will be inspected each year. The City of Monte Sereno has no industrial or commercial facilities operating within the City and therefore does not participate in this activity. In Campbell, 285 of 311 facilities were inspected (92%), 104 of 113 facilities were inspected (92%) in Los Gatos, and 8 out of 8 facilities in Saratoga were inspected (100%). Inspection reports by facility type and noted violations are included in the IND section of the Program Annual Report. Discharge violations decreased slightly over the past year from 25 to 20 facilities. Of the 20 violations, 13 were auto repair facilities. The West Valley Clean Water Program began a pilot program to target auto repair facilities during FY 01-02 with additional inspections and education. The pilot inspection program was instrumental in getting two automotive facilities to install car wash waste water capture systems. Each facility is given an initial on-site inspection with multiple drive-by inspections. All facilities inspected were in compliance by the end of the fiscal year. This is once more a testament to the benefits of increased scrutiny and education. Due to the success of this targeted outreach to and inspection of auto repair facilities, the pilot was adopted permanently as the West Valley Auto Shop Inspection Program. The procedures and accomplishments were shared with co-permittees in a presentation given by the West Valley Inspector at SCVURPPP's Industrial & Commercial Inspector training on April 5, 2005.

Public Information/Participation Program. In FY 04-05, the West Valley Clean Water Program continued to expand its quest for effective public education and outreach. WVCWP pursued media coverage on six topics: safe disposal of mercury-containing products, household hazardous waste, copper pollution prevention, creek clean-up events, trash cleanup and monitoring by students, a student's science project and his campaign to keep residential pollutants (pesticides and copper) out of the storm drain. Six stories were covered by local community newspapers in FY04-05, including a Saratoga News cover story about local students cleaning up and monitoring trash. The WVCWP was advertised on national television on 10-7-04. CNN interviewed David Marash-Whitman, a student who found the West Valley Clean Water Program via its website. David, at age 12, worked with WVCWP to determine the scope of his award-winning science project, "Ecotoxicology of Stormwater Pollution in our Aquatic Communities." David was chosen as one of top 40 Young Scientists and traveled to Washington D.C. to compete in Discovery Channel's "Challenge". David continues volunteer for the West Valley Clean Water Program and will be mentioned again in the annual report for FY05-06. WVCWP has been pleased to receive extensive media coverage in these stories, which would be beyond its budget scope if purchased as advertising space.

In FY 04-05 a new *Mercury* page was uploaded to *Cleancreeks.org*, two creek cleanup events were advertised on the Home page and new links were added to the *Links* page. A few months into FY 03-04, the West Valley Clean Water Program changed its website host in order to optimize tracking ability for the web site, www.cleancreeks.org. In the twenty-one month period ending on June 30th 2005, visitors averaged about 141 views per month totaling 2,962 Web Page views. This was a substantial increase from the website's 30 hits during its first month of operation.

The West Valley Clean Water Program strives to maximize student involvement at every opportunity. Staff developed a script incorporating fresh messages on pesticides, copper, mercury and trash for its new Coastal Enviroscape and revised the script for the Uplands & Wetlands Enviroscape model. Offering a second Enviroscape station allows West Valley Clean Water staff to teach 20 students every 25 minutes, rather than 10 students. The two fifth grade classes who tried this requested the same presentations for next year. The second Enviroscape allowss staff to elaborate on topics that would initiate changes in behavior. Messages apparently stuck with the students: while participating at a soil infiltration station, a student told the science docent not to empty the waste water near the storm drain.

Illicit Connection and Illegal Dumping Elimination Activities. The IC/ID program is working phenomenally well for all four West Valley Communities. The inspector not only responded to 82 discharge incidents over the year (see the IC/ID section for the number and types of incidences), but conducted 105 proactive and follow-up inspections. Each of these inspection opportunities adds to the business community's knowledge of storm water pollution and prevention issues. As part of the inspection process, the inspector distributes appropriate educational materials. Significantly, the West Valley Clean Water Program's Stormwater Inspector provided 790 brochures and other educational materials to industrial and commercial facilities in FY04-05.

C.3 Implementation. In July and August, 2004 the West Valley Clean Water Program updated all sections of each municipal URMP. A consultant met with staff in each city to review any remaining challenges with C.3 implementation. This year the cities each made progress in preparing for upcoming requirements such as HMP and Group 2 deadlines. In fact, the cities were each prepared to implement requirements on all tiers of Group 2 projects by April 15, 2005.

Pesticide Activities. The most realistic way to implement pesticide management is to provide meaningful training to municipal staff and the public. The WVCWP, in FY03-04 and FY 04-05 utilized significant staff time and resources to offer in-depth, hands-on workshops on specific pests and beneficial predators. WVCWP staff researched speakers, selecting presenters who could offer the optimum learning experience. In FY03-04 more than twenty attendees participated and gave positive feedback. In FY 04-05, thirty-seven municipal staff and stakeholders, such as school district personnel, golf course superintendents and pest control contractors attended; 15 earned Continuing Education Credits at the workshop.

Each of the four municipalities adopted two new Integrated Pest Management plans, one on armored scales and one on soft scales. Additionally, the West Valley Clean Water Program and the Program collaborated on events with a former partner, *Summer Winds Garden Center* in Campbell and began to promote a partnership with *Orchard Supply Hardware,* bordering Saratoga and Campbell. Customers were enthusiastic about IPM samples and materials handed out by WVCWP staff at the OSH "Tax-Free Day" events. The store responded positively to these efforts, which complement their goal of personalized customer service.

Continuous Improvement Activities

Public Information/Participation. The West Valley Clean Water Program received feedback from schools indicating that teachers are inundated with paper promotional products. At the end of FY 04-05 the WVCWP produced a CD/DVD music video/slide show of volunteers, especially featuring students, at local creek cleanup and trash monitoring events. The CD was dubbed with music, including the words: "With my own two hands I can change the world." While WVCWP has not obtained permission to use the music or all of the photos at this point, the CD has already entertained a few students and teachers. Schools will continue to be a primary focus of the West Valley Clean Water Program's outreach efforts over the coming year. In FY 05-06 The West Valley Clean Water Program will enhance its relationship with school teachers, principals and students to involve more participation in trash monitoring and school cleanup events.

Staff Training. The West Valley Communities place a strong emphasis on training. The Annual Reports reflect this with numerous references to the Staff Training Summaries; these Summaries are located at the end of each Element section in the Annual Reports. In FY 05-06 training will be expanded by use of a video camera to tape various trainings, so that additional staff can later receive the same information.

In July and August, 2004 the West Valley Clean Water Program updated all sections of each municipal URMP. In the Streets Maintenance and Storm Drain Maintenance sections, at least two continuing improvement items were identified: efficient training on community-specific storm water BMPs was needed for <u>all</u> maintenance staff. WVCWP held two round-table trainings in January 2005 and in June 2005, where a consultant provided presentations on streets, parks, and rural public works BMPs that were applicable to the West Valley Communities.

By Agreement, storm drain maintenance for the West Valley Communities has been handled by the West Valley Sanitation District since the late 1990s. In the course of updating the URMPs some potential gaps were identified due to an assumed understanding of the Agreement. All staff agreed that they wanted an opportunity to clarify the roles of each signatory to the Agreement. In June 2005, the West Valley Clean Water Program offered a forum for this discussion as part of the annual Storm Drain Supervisor's meeting. A consultant gave a slide show on BMPs for storm drain maintenance and for rural public works, and facilitated a discussion of the Agreement that left everyone on the same page as far as understanding the terms. The West Valley Clean Water Program will continue to prioritize better communication between WVCWP staff and municipal staff and to host effective workshops that are convenient for staff to attend.

Thank you for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact me at 408.354.4734.

Very truly yours,

Cheryl C. Donnelly

ILLICIT CONNECTION & ILLEGAL DUMPING ELIMINATION ACTIVITIES

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	Work Plan Activity	Work Plan Tasks	Accomplishments	Responsible Party
Update Perf. Standard	ICID Performance Standards	Work with Program staff to update Performance Standards, via Ad hoc task group & Management Committee participation. As available, review and provide comments on the applicability of the updated performance standards.	Los Gatos and WVCWP staff updated the IC/ID PS in the Town's URMP (Sept 2004). The Town's Sr. Engineering Technician attended a training discussion, led by the WVCWP Manager, to review the completed revisions to the IC/ID PS on 2-8-05.	SCVURPPP; WVCWP Inspector and Manager Municipality to assist
URMP	Response Program	Continue implementation of response program	During FY04-05, the WVCWP inspector responded to 48 reports of potential or actual stormwater violations in the Town of Los Gatos. Out of 48 inspections 37 were actual incidents. Potential incidents are reported to WVCWP by SCC Fire Dept, the SCV Water District, SCC DEHS, citizens, and WVCWP or municipal staff.	WVCWP Inspector
Work Plan	Enhanced Reporting	Report on incidents using expanded categories consistent with SCVURPPP Program. Document follow-through to point of resolution or referral for enforcement action (penalty or fine).	FY04-05 is the first year that the WVCWP Inspector has kept 2 databases for inspections. When the WVCWP Inspector first started in FY01-02, he responded to incident reports. Over the next two years he piloted and then implemented two proactive inspection programs, the Restaurant Inspection Program and the Vehicle Shop Inspection Program. With the broadened number and type of inspections, the SCVURPPP Program found it necessary to separate the WVCWP's data in the existing IC/ID database (FY03-04) into two databases (FY04-05). 1. The IC/ID database contains reported incidents or incidents noted by the Inspector during his daily drive-bys. 2. The IND database consists of incidents that are discovered as a result of the Inspector's pro-active	WVCWP Inspector

			inspections related to his Restaurant Program or his Vehicle Body Shop Program.	
CI Item	Restaurant Inspection Program	Continue implementation of inspection program, targeting medium to large-scale restaurants as per FY 03 - 04 Annual Report. *Medium to large-scale* is defined as, restaurants with 6 or more employees and/or restaurants that routinely handle large quantities of grease	In order to keep reporting data consistent with the other Co-permittees Program-wide, procedural revisions were made to data reporting for WVCWP's Restaurant Inspection Program. Pro-active restaurant inspections are now considered an IND task and are reported in the IND / Commercial Inspection section of Los Gatos' report.	WVCWP Inspector
CI Item	Auto Shop Inspection Program	The West Valley Clean Water Program will continue expansion of the auto body pilot targeting auto repair facilities in the West Valley area and providing additional inspection and education on storm water issues.	In order to keep reporting data consistent with the other Co-permittees Program-wide, procedural revisions were made to data reporting for WVCWP's Vehicle Shop Inspection Program. Pro-active vehicle shop inspections are now considered an IND task and are reported in the IND / Commercial Inspection section of Los Gatos' report.	WVCWP Inspector
URMP	Education	Distribute BMP materials during routine inspections. Distribute follow up education information for businesses cited for potential stormwater violations.	During FY04-05, the WVCWP Inspector distributed three hundred twenty-three (323) IC/ID and IND brochures and fact sheets in Los Gatos, as part of his outreach and education program. The Fire Dept hands out a stormwater compliance packet to new commercial /industrial business owners or management.	SCC Fire and WVCWP Inspector
Work Plan comments RWQCB	Staff Training	WVCWP Inspector to conduct round table training & evaluation meetings with Town staff.	The Inspector continues to conduct informal round table meetings with municipal public works and building inspectors. In Los Gatos we have seen a big improvement in coordination between staff resulting in timely inspections and reporting. Los Gatos' Sr. Engineering Technician participated in WV training meetings on 2-8-05 and 4-26-05 where the Inspector discussed a positive break-through (car wash kit being used by citizens) and a review of the IC/ID inspection program.	Sr Engineering Technician, Pub Works and Building Inspectors WVCWP Inspector to co-ord

Los Gatos

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Los Gatos Illegal Connection/ Illegal Dumping Incidents

Type of Incident 04-05	Incident Source	General Location	Report Source	Follow-up Action
• 2 Dumping Hazardous • 5 Vehicle Wash • 6 Grey Water • 1 Allowable Discharge • 2 Equipment Cleaning • 7 Landscape Materials • 2 Miscellaneous • 2 Water Line Break • 3 Tracking Soil • 1 Dumpster Discharge • 1 Sanitary Spill • 2 Paint Discharge • 1 Dumping Non-Hazardous • 2 Saw Cut Slurry **Total 37**	• 5 Commercial • 4 Auto Facilities • 14 Construction Sites • 3 Food Service • 1 Other / Unknown • 2 PublicFacilities & Utilities	• 14 Commercial • 23 Residential	• 7 Citizen Complaint • 21 Interdepartmental • 7 Other Agency • 2 Inspector	• 17 Verbal Notice • 13 Educational • 7 Written Notice Incident Status • 37 Resolved

IC/ID Program Evaluation

Implementation of IC/ID Performance Standards

WVCWP further implemented enhanced reporting standards by splitting the IC/ID database into two separate databases. The IC/ID database contains reported incidents or incidents noted by the Inspector during his daily drive-bys. The IND database consists of incidents that are discovered as a result of the Inspector's pro-active inspections related to his Restaurant Program or his Vehicle Body Shop Program.

IC/ID Evaluation Of Trends

Los Gatos reported a very high number of IC/ID calls for inspections and a high number of incidents both in FY03-04 (42) and in FY04-05 (48). Town staff has met with the WVCWP Inspector frequently during FY04-05 and it is likely that the improved communication is bringing in more calls. The number of businesses and residents that are being educated also has gone up with the number of inspections and incidents. Some of the incidents are reported by WVCWP staff from potential problems that are seen on the way to the WVCWP office (travel through Los Gatos is necessary to reach the office).

The recent separation of IC/ID and IND data makes it difficult to comment on trends over the past 2 years. While there were 48 IC/ID inspections in the Town of

Los Gatos in FY04-05, thirty-seven (37) were actual incidents. Out of thirty seven (37) incidents in the Town, the most common incident source (for 17 of the violations) was *construction sites*, compared with FY03-04 when the most common incident source (12 out of 42) was also *construction sites.*

The Incident types most commonly found in FY04-05 are compared below with the most commonly found incidents from FY03-04.

FY 04-05 IC/ID Incidents

Most commonly found Incident Types FY04-05

- 7 landscape materials
- 6 grey water
- 4 vehicle washing
- 3 tracking soil

FY 03-04 IC/ID Incidents

Most commonly found Incident Types FY03-04

- 5 Pool-Spas-Fountains
- 4 Landscape Material Dumping
- 4 Unhardened Cement
- 4 Tracking Soil
- 4 Vehicle Washing
- 4 Dumping Non Hazardous

Note: The WVCWP Inspector's notes show that for several incidents *No Action* was listed as the enforcement action. There are three possible definitions for *No Action* in his records. 1) The Fired Dept reported the incident and took action, such as putting down absorbent; 2) the incident was corrected immediately and the Inspector provided some education or educational materials; or 3) *No Action* was taken because it was a *non-incident* or an *accident* where the person causing the problem was already informed. This also may account for *no action required* on many incident referrals. The Fire Dept inspector gives a copy of the potential violation notice to the facility owner. When the WVCWP inspector arrives to conduct the follow up inspection, the owner has had a chance to complete additional cleanup or repairs.

Procedural Changes for Reporting

One half-time IC/ID Inspector serves the four West Valley communities. The inspector follows up on all reports of potential incidents, including ones observed during his routine drive-bys. His pro-active investigations of restaurants & vehicle shops may lead to further need for education or enforcement. SOPs are discussed and adjusted each year, usually right after compiling the Annual Report. During data evaluation it becomes obvious which changes are necessary.

It is important to have standardized categories, but it has resulted in some awkward reporting modifications (splitting the IC/ID incident data base) for WVCWP staff. Previously all WVCWP inspections were included in one table, making it easier to identify trends. In the West Valley some of the IND program is part of the IC/ID program. Some of the pro-active IND inspections lead to a discovery of a violation. Then the incident is processed in exactly the same way as an IC/ID incident. This creates likelihood for mislabeled data or duplicate reporting. WVCWP staff is working on clearer internal procedures for categorization.

WVCWP Pro-Active Vehicle Shop and Restaurant Inspections are reported in the IND section of this report.

LOS GATOS

IC/ID Inspections Annual Report FY0405

Accidental Spills

#	ICID Date	Contact Name	Incident Address	Report Source	Incident Source	Incident Type	Enforcement Action	Notes - 1	Incident - Status	Follow-up Notes	Compliance Date
1	11/17/2004	Testarossa Vineyards	300 A College Av., Los Gatos	Interdepartmental	Commercial	Accidental spills	Verbal Notice	Valve/diverter not fully closed due to rocks and dirt. Wine residue was going into SD. Valve cleaned and is now working properly.	Incident - Resolved	All OK now.	17-Nov-04

Dumping

#	ICID Date	Contact Name	Incident Address	Report Source	Incident Source	Incident Type	Enforcement Action	Notes - 1	Incident - Status	Follow-up Notes	Compliance Date
1	8/4/2004	Amir Pejham	171 Westhill, Los Gatos	Interdepartmental	Residential	Landscape material dumping	Verbal Notice	Tracking soil. Landscape mat'ls in street. Cleaned up right away.	Incident - Resolved	All OK now.	04-Aug-04
2	8/10/2004	Western Way Landscape	271 Coronet Way, Los Gatos	Interdepartmental	Residential	Landscape material dumping	Warning Notice	Landscape materials, compost, in street. Contractor cleaned up. NTC# 1660 issued.	Incident - Resolved	OK now.	10-Aug-04
3	10/21/2004	Craig McClellan	103 Vista de Monte	Interdepartmental	Construction Sites	Landscape material dumping	Warning Notice	Remove all soil from gutter area. Issued NTC#1667.	Incident - Resolved	All OK now.	21-Oct-04
4	10/28/2004	residence	208 Montclaire Rd., Los Gatos	Citizen Complaints	Residential	Dumping - hazardous	No Action	Cheri called me. Resident had placed 6 fluorescent light tubes in trash. I went right out, talked to the resident, took them to HHW approved drop off site, Ace Hardware on Almaden Expy, SJ for recycling.	Incident - Resolved	All taken care of.	28-Oct-04
5	11/9/2004	Residence	225 Montclair Rd., Los Gatos	Citizen Complaints	Residential	Landscape material dumping	Verbal Notice	Digging near SD. Left pile of dirt in street. Told them to cover.	Incident - Resolved	All OK now.	09-Nov-04
6	11/22/2004	Residence	980 Cherrystone Ct., Los Gatos	Interdepartmental	Residential	Landscape material dumping	Warning Notice	Remove all dirt and debris from street. Sweep and vacuum. NTC#1751 issued. All work completed.	Incident - Resolved	All OK now.	22-Nov-04
7	1/19/2005	Residence	211 Old Adobe Rd., Los Gatos	Interdepartmental	Construction Sites	Landscape material dumping	No Action	New driveway. Landscaping in front.Pile of dirt in street. Told them to clean up before end of day. Went by later. All OK.	Incident - Resolved	All OK.	19-Jan-05
8	1/31/2005	Residence	982 Cherrystone , Los Gatos	Interdepartmental	Residential	Landscape material dumping	No Action	Landscaping materials in street. I went out right away. They are putting in flagstone. Pile of sand in street. Told them to clean up street and to cover pile of sand. All OK.	Incident - Resolved	All OK.	31-Jan-05
9	3/11/2005	Storm Drain	167 Villa Av., Los Gatos	Interdepartmental	Residential	Dumping – non-hazardous	No Action	2x4 pieces of wood in SD. Called Chuck in Pub. Works to remove. May cause a blockage.	Incident - Resolved	All taken care of.	11-Mar-05

Grey Water Discharge

#	ICID Date	Contact Name	Incident Address	Report Source	Incident Source	Incident Type	Enforcement Action	Notes - 1	Incident - Status	Follow-up Notes	Compliance Date
1	5/16/2005	Emmanuel Convalescent Hospital	371 Los Gatos Blvd., Los Gatos	Citizen Complaints	Commercial	Grey water discharge	Verbal Notice	Citizen called DEH that waste water in buckets was being dumped out back to SD. I talked with Roland, in charge of housekeeping, said they dump all waste water in sink. I asked him to please talk with his people just to be sure.	Incident - Resolved	Looks OK.	16-May-05

Paint Discharge

#	ICID Date	Contact Name	Incident Address	Report Source	Incident Source	Incident Type	Enforcement Action	Notes - 1	Incident - Status	Follow-up Notes	Compliance Date
1	9/24/2004	residence	16385 Peacock Ln., Los Gatos	Other agency	Residential	Paint discharge	No Action	Washing paint brushes in Ross Creek. All OK when I got there. No one home. Left bus. Card and brochure.	Incident - Resolved	All OK now.	24-Sep-04
2	6/21/2005	Almendra Creek	Area of Tait & Bachman, Los Gatos	Other	Other/unknown	Paint discharge	No Action	White substance, looks like paint, in creek. All gone when we got there. Could not find source. Went back on 06-22-05. All OK. SCVWD working on creek. They will call me if more problems.	Incident - Resolved	All OK now.	21-Jun-05

INDUSTRIAL/COMMERCIAL DISCHARGER CONTROL PROGRAMS

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	Work Plan Activity	FY 04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
URMP Perf. Standards	Commercial/ Industrial Performance Standards	Work with Program staff to revise Performance Standards, via Ad hoc task group & Management Committee participation. As available, review and provide comments on the applicability of the new performance standards.	Los Gatos has implemented the Program's model Revised IND Performance Standard. The Town's Sr. Engineering Technician / Stormwater Rep attended a discussion led by the WVCWP Manager on the newly approved IND PS at the WVCWP meeting on March 8, 2005.	SCVURPPP; WVCWP Manager and Inspector; and Inspectors from SCC Fire Dept
URMP	DEH Inspections of Retail Food Facilities	Continue joint inspection program w/ DEH. Approximate number of *food handling* facilities in Los Gatos is 160. All facilities will be inspected at a minimum once per year. WVCWP Discharge Inspector will conduct follow-up and distribute BMP materials as needed per DEH referrals. Continue to evaluate data management and reporting for desirable improvements or updates.	In FY 04-05, 196 food-handling facilities were inspected at least once in the Town of Los Gatos by DEH, Consumer Protection Division inspectors. DEH Provides additional inspections at most food service locations on a pro-active basis. During FY 04-05 the number of DEH food facility inspections and re-inspections totaled 336 in Los Gatos.	Insp'ns conducted by SCC DEH; Annual Mtg co-ord by WVCWP
Work Plan comments RWQCB	Food Facility Inspection Training & Evaluation	Conduct annual joint meeting/training w/ Cupertino & SCC DEH to evaluate program and confirm distribution of materials. Annual meeting per agreement; typically scheduled for Spring each yr.	The Annual training took place at the WVCWP office on April 27, 2005. The inspection packet letter and BMP checklist were updated at this meeting to give to restaurant owners and managers. See Evaluation section.	WVCWP to co-ord. w/ Cupertino, DEH and County of SC
CI Item	WVCWP Restaurant Inspection Program	Continue implementation of inspection program, targeting medium to large-scale restaurants. *Medium to large-scale* is defined as, restaurants with 6 or more employees and/or restaurants that	This task was originally part of the WVCWP IC/ID Inspector's Restaurant Pilot and was reported in the IC/ID section of Los Gatos' FY 03-04 Annual Report. In FY 04-05 the WVCWP Inspector visited (9) restaurants in the Town of Los Gatos. Six restaurants were in compliance	WV Inspector

		routinely handle large quantities of grease.	See evaluation below.	
URMP	Fire Dept Inspections of Designated IND Facilities	By Agreement with the Fire Dept, continue joint inspection program. Number of facilities identified commercial / industrial facilities in Los Gatos is 113. The inspection frequency goal for FY 04-05 is 100%. The total number of facilities by business category inspected in FY 04-05 will be included in the annual report.	In the Town of Los Gatos, 104 facilities were inspected, meeting 92% of the inspection goal. Of the 104 facilities inspected 1 was closed (no longer in business). The Fire Dept referred three (3) potential violations to the WVCWP. The DEH referred one (1) violation to the WVCWP for follow up.	Insp'ns conducted by SCC Fire
Work Plan comments RWQCB	Fire Dept Inspector Training and WVCWP/ Fire Dept Meeting & Evaluation	SCC Fire to conduct annual industrial, commercial inspection training of inspectors. WVCWP to arrange joint meeting/training w/ SCC Fire to evaluate inspection reporting and confirm distribution of materials.	Los Gatos' Senior Engineering Technician attended the SCVURPPP Workshop, "*Conducting Stormwater Inspections of Industrial and Commercial Facilities",* which was held in Cupertino on April 5, 2005. The Fire Dept's Sr Haz Mat Specialist, who administers the inspection Agreement between the Fire Dept and the WV cities and provides training to inspectors, attended this training with two Haz Mat specialists. The Fire Dept's annual staff training was provided to their inspectors during June, 2005. The Inspectors noted that they have plenty of handout materials; most businesses have received all of the educational material during prior inspections. See evaluation below.	Annual Mtg arranged by WVCWP w/ Sr. Haz Mat Specialist
CI Item	WVCWP Vehicle Shop Inspection Program	The West Valley Clean Water Program will continue expansion of the Vehicle Shop Inspection Program, targeting auto repair facilities in the West Valley area and providing additional inspection and education on storm water issues.	The Inspector conducted 18 inspections of various vehicle shops in the Town of Los Gatos. Two (2) automotive inspections were the result of referrals from the Fire Dept and one (1) was the result of a citizen call. The West Valley Inspector's Vehicle Shop Inspection Program accounted for fifteen (15) pro-active inspections, ten of which involved restaurants that had storm water violations in the past. Only one violation, on 4-13-05 at Preferred Image Auto Body, turned up as a result of proactive inspections. See evaluation below.	WV Inspector

Los Gatos

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

2001 Perform. Review	NOI Filers	Provide updated list of NOI Filers to SCC Fire.	The list of NOIs, including one (1) site in Los Gatos, was sent electronically to the Fire Dept on 7-30-2004. Three sites are listed with a Los Gatos address on the State's Industrial Permit list. However, two are not in the Town of Los Gatos; one is on Bear Creek Road in Santa Cruz County and the other is in the unincorporated area of the County of SC. There have been no new industrial NOIs added to the list since 2001.	WV Inspector

Industrial/Commercial Program Evaluation

Dept of Env Health Consumer Protection Division Inspections

It is important to note that DEH Inspectors look at all facilities that handle food. While gas station snack bars, *See's* candy stores, and video rental stores are not necessarily where we will find most stormwater violations, it does provide a helpful broad-ranged first look at commercial facilities.

Annual Food Facility Inspection Training Meeting

Alternately each year, the objective of this meeting is 1) to train and get feedback from DEH inspectors or 2) for inspection program administrators to review and adjust procedures as necessary. In FY 04-05, two of DEH Consumer Protection Division's Supervising Health Specialists, Cupertino's Environmental Programs Manager, the County of SC's NPS Coordinator, the WVCWP Manager, the WVCWP Inspector, and the Director of Operations from the WV Sanitation District (WVSD), participated in a very productive meeting. Peter Sevcik, of the WVSD, initiated a discussion on the District's Fats, Oils, and Grease (FOG) Program. During a round table discussion participants suggested ways to incorporate FOG objectives into existing restaurant inspections. It was generally agreed that inspectors could, at a minimum, ask restaurants for grease trap cleaning records. Based on the records being readily available or not, the inspectors could refer a food facility to the municipal inspector for follow-up. In the West Valley this referral would go to the WVCWP Inspector. The WVCWP Inspector met with Sanitation District staff following the DEH meeting to gain more background information on implementing the FOG Program.

Other topics and action items at this meeting included

- updating the introductory letter and BMP check list for restaurant owners;
- a review of inspection procedures with discussion on glitches in the system and possible resolutions;

- a review of the effectiveness of outreach & educational handouts and the inclusion of pesticide reduction fact sheets specifically for restaurants,
- a discussion on training needs for inspectors in FY 05-06,
- updated contact information.

As a result of this meeting, DEH, Consumer Protection Division's Supervising Health Specialist agreed to implement revised annual reporting procedures to ensure accurate tracking and follow-up for potential and actual violations. This implementation will strengthen coordination between DEH and municipal staff.

The Inspection Program for West Valley Communities continues to run more efficiently each year. The key reasons for this are believed to be 1) increased communication with other agency staff and 2) industrial & commercial facility owners who are becoming accustomed to NPDES requirements (BMPs) and the WVCWP Inspector's frequent educational visits.

West Valley Restaurant Inspection Program

The West Valley IC/ID Inspector continues to manage the West Valley Restaurant Inspection Program, by visiting a selected subset of mid-to large-size facilities in each WV community every year. This year nine (9) restaurants were visited in the Town of Los Gatos. These visits provide an opportunity to educate restaurant owners and managers on the Town's NPDES requirements and to introduce the West Valley Clean Water Program.

DEH inspectors or supervisors meet annually with the WVCWP Inspector and Manager to review stormwater quality concerns and objectives. DEH Inspectors refer potential violations to the WV Inspector. Once a food facility has been at risk for a violation, the WVCWP Inspector will revisit the facility until all potential and actual problems have been resolved. After resolution, the facility will remain on the Inspector's list to be re-checked a minimum of once annually depending on the nature of the incident.

Food Facility Inspections Evaluation

During FY 04-05 there were three (3) IND food facility violations which resulted in a verbal warning being issued. Two were related to dumpster areas one improper washing of dumpster area and the other a sprinkler problem which allowed water to run over dumpster area and into storm drain. The third incident concerned a drain that is not sufficient to handle food scraps. Although all three were resolved, they will be re-checked to ensure compliance.

One incident was noted by DEH inspectors and will be inspected in FY 05-06. Another three (3) food facility incidents were reported in the IC/ID database. Of the three from IC/ID, one incident involved washing mats outside, and one dumpster area was dirty and lids were left open. The remaining incident was a plumbing problem; which was reported to WVCWP by the facility owner's environmental consultant. The facility was closed, and a plumber corrected the problem before the facility was reopened.

In FY 04-05, the food facility incidents from both databases and the DEH referral totaled seven (7) incidents. Compared to Los Gatos' total number of food facility incidents from FY 03-04, nine (9), the data shows a small (22%) improvement.

Reporting on Food Facility Trends and Addressing Grease Problems

Evaluating trends is difficult for FY 04-05, since the IC/ID database has been split. The IND database does not have a field for *incident type*. Violations are tracked by the less-specific category, *facility type.* The trends in the number of violations are not as easy to show when the *incident type* is not tracked. One possible solution for this reporting problem is to move all pro-active inspections, which involve a violation, to the IC/ID database. *Incident type* is a field in the IC/ID database. For FY 04-05 comparisons were made based on incidents reported in both the IND and IC/ID sections.

Two food facility incidents in Los Gatos, a drain not sufficient for food scraps on 9-14-2004, and a sewer backup on 11-3-2004 were problems related to grease. Three of the West Valley Communities that have food facilities are aware that food facility grease is a problem that must be addressed. To help combat the grease challenge surrounding food facilities, the WVCWP has noted a procedural addition to the checklist for all future pro-active inspections. Restaurants will be required to present grease trap cleaning records to the WVCWP inspector. If a facility does not have available cleaning records, the site will be referred to the West Valley Sanitation District Dir of Operations for follow up inspection(s).

Feedback on Program-Wide Standardized Reporting Categories

One comment from West Valley staff on the standardized reporting categories is that a separate *incident type* category for *secondary containment* would be useful. During pro-active investigations for West Valley Municipalities, secondary containment problems are relatively common.

Industrial/ Commercial Inspector Training Sponsored by SCVURPPP

The first joint WVCWP/Fire Dept meeting for FY 04-05 was held on August 6, 2004. As a result of this meeting the Sr Haz Mat Specialist revised the FD's referral form for potential violations to include only the data required by the inspector and the WVCWP (for reporting purposes). This form will be discussed and may be edited again at the annual meeting in FY 05-06. The WVCWP Manager and Inspector work closely with the Sr. Haz Mat Specialist each year to review procedures for West Valley inspections and make adjustments as needed.

In order to benefit from the Program's all day workshop addressing industrial and commercial inspections, a Haz Mat specialist, and the WVCWP Inspector and Manager, participated in early planning meetings to select topics which addressed specific questions or concerns for the West Valley Program. The WVCWP inspector gave his presentation on the ***Body Shop/Vehicle Repair Shop Program in West Valley Communities***. The Sr. Haz Mat Specialist coordinates inspector training each year; this year he held sessions starting in June 2005, allowing him to incorporate material from the Program's workshop. The Program's workshop was successful in answering most of the questions which had not been resolved during prior WVCWP meetings with the Sr. Haz Mat Specialist. Los Gatos' Stormwater Rep went to the workshop to gain a better understanding of the Town's joint inspection program and how it is coordinated between three agencies.

West Valley Vehicle Shop Inspection Program

The West Valley IC/ID Inspector continues to manage the West Valley Vehicle Shop Inspection Program by visiting a selected subset of vehicle facilities in each WV community every year. This program mirrors the restaurant inspection program and results in the same benefits. In FY 04-05 (18) automotive shops were inspected in the Town of Los Gatos seven (7) were pro-active and seven (7) were follow-up inspections concerning a previous violation. Of those fourteen (14), one (1) verbal warning was given concerning a need for *secondary containment*. The Fire Dept referred two (2) automotive sites to the WVCWP, both were

cleaned up by the time the WVCWP Inspector went to the site. One (1) citizen complaint turned out not to be an actual violation; and one (1) violation was discovered by the WVCWP Inspector on a routine drive by inspection. The violation (*car washing*) was resolved with a verbal warning.

Included in Los Gatos' IC/ID data, were four (4) incidents involving *vehicle washing*; all were resolved but will be on the list to be rechecked. A total of six (6) actual *automotive* related violations occurred in Los Gatos during FY 04-05 compared to seven (7) *automotive* incidents in FY 03-04 (4 *vehicle washing,* 2 *vehicle equipment leaking*, and 1 *vehicle repair*). This demonstrates a minor improvement in the number of automotive incidents. It is worth noting that, out of seven re-inspections, only one had remaining issues.

LOS GATOS

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

PUBLIC AGENCY ACTIVITIES: OPERATION AND MAINTENANCE
Storm Drain Operations and Maintenance

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	Work Plan Activity	Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
URMP	Annual Storm Drain Cleaning	Continue contract w/ WVSD. Continue schedule/cycle for cleaning and maintenance of storm drain system	WVSD performs systematic storm drain cleaning and inspection annually which covers half the Town's storm drain system each year. Town Maintenance staff clean as needed due to high leaf drop or storm debris. No problems encountered. WVSD has begun implementation of a GIS map with numbered stormdrains to facilitate monitoring. City staff performs additional pro-active cleaning of storm drain inlets and grates before storm season in high leaf drop areas. High leaf drop and other noted areas cleaned more frequently and as needed.	Dir PW co-ord contract with WVSD Street Maintenance Superint. co-ord field operations
CI Item	Thermoplastic Storm Drain Stenciling	Continue to evaluate thermo-plastic storm drain stencils on curbless storm drains. Observe deterioration, durability, practicality, & cost effectiveness.	On April 26, 2005 Los Gatos ordered 30 additional thermoplastic stencils to use in selected areas. See Evaluation section below.	co-ord contract with WVCWP Inspector Street Maint Superint. co-ord field operations
URMP	Annual Storm Drain O&M Training	Annual WVSD / Operations & Maint. Supervisors meeting - evaluate status of annual storm drain cleaning and provide training on maintenance issues.	The WV Storm Drain Op & Maint. Supervisor's workshop was held June 2, 2005. The Town Engineer attended, along with staff from WVSD, WVCWP, and the other WV Communities. Topics included: • Clarification/ review of roles and tasks of City and WV Sanitation District staff to prevent gaps • Review of Emergency Response Procedures for SD overflow	Mtg lead by WVSD; Attend by PW Maint. Div staff; Hosted by WVCWP

			• Power Point Presentation review of BMPs for Streets, Rural Public Works and Storm Drain Maintenance • Working together to proactively prevent storm drain problems due to Fats, Oils and Grease (FOG) See details in *Evaluation* at end of this section and Staff Training table attached in this section	

Storm Drain Operations and Maintenance Evaluation

Storm Drain Stencils: the Town ordered 30 more thermoplastic storm drain stencils this year to have on hand for use in selected areas. The Town has decided that the fact that they are reflective, which provides visibility at night, and can withstand heavy traffic was reason enough to spend more for stenciling in appropriate areas. Unlike the metal plates previously installed by the Town, they adhere well to coarse and uneven surfaces, have not peeled, and do not have sharp edges that bend, creating a potential to injure pedestrians or bicyclists.

SDOM Training: WV Storm Drain Op & Maint Supervisor's workshop was held June 2, 2005. The cities participated in a round table discussion and compared maintenance practices. WV Sanitation staff distributed a summary of maintenance activities completed for each city, showcasing the District's new automated system for tracking inspections. WVSD can print out a history of the debris they've found in a storm drain line. This will be useful if history shows that the same lines have debris during each cycle. The cities/town may want to increase maintenance for those spots/lines to an annual rather than biennial schedule. The WVSD report also includes a list of construction deficiencies such as missing bike straps etc. Additional TV tracking of potential problem areas may be conducted by the WVSD at the request and cost of the city.

SD Op & Maint: Photos were passed around at the SD maintenance workshop on June 2, 2005, of debris that was pulled out of the SD lines in the early 90's when WVSD began cleaning the cities' storm drains. Now the work is primarily preventative maintenance and the program is running smoothly. All other aspects of the storm drain operation and maintenance program are working well.

STREET SWEEPING/ PAVEMENT MANAGEMENT

Source	Work Plan Activity	Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
URMP	Street Sweeping Program	By contract – residential, arterials and commercial areas swept monthly. High leaf drop and other noted areas cleaned more frequently and as needed (i.e., construction zones - swept by responsible party).	This year the Town collected an annual total of 1,745 cubic yards of debris from sweeping 6,913 residential curb miles; and collected 942.5 cubic yards of debris from sweeping 3,420 curb miles of commercial streets. **The annual combined total was 10,333 curb miles swept and 2,690**	

			cubic yards of debris collected. See the Program's report on Street Sweeping for additional data. In addition to street sweeping, all residents and businesses are required to utilize large recycling bins for leaves and other yard waste as part of their trash collection service. Yard waste is not allowed in streets but waste from receptacles is picked up weekly. **A total of 7,735 tons of yard waste was recycled** in Los Gatos during FY 04-05.	
NPDES Permit	Street Sweeping Data Collection	Review types of street sweeping data currently collected and provide data to SCVURPPP.	Los Gatos kept detailed street sweeping records. Monthly data was collected and provided to the Program at end of the fiscal year.	Street Sweeper and Public Works Assistant
Work Plan comments RWQCB	Staff Training	Provide training meetings, on collection of street sweeping data, to appropriate municipal staff.	Collection on the specific requirements and need for Street Sweeping Data was covered at the June 2, 2005 SDOM workshop.	

Street Sweeping/ Pavement Management Evaluation

Street Sweeper's Door Hangers Help Construction Inspection Staff: Los Gatos' Sr. Engineering Technician/ Stormwater Rep created a two-sided door hanger that street sweeping staff can place on a property owner's front door. One side addresses yard waste left in the gutter, which is not allowed in Los Gatos. Another side addresses construction debris. The street sweeper writes down the address where a door hanger has been distributed; the address is later entered into the permit tracking database. As a result several construction projects which didn't have building permits were discovered when the info didn't match the database.

New Street Sweeper The Town is in the process of purchasing a new, regenerative air, street sweeper. The sweeper is certified to generate fewer dust particles. This type of sweeper is required in Southern California, but not yet required in Northern CA. More water on surface eliminates material from floating around in atmosphere. Sweeper was on order for June, 2005 delivery.

CORPORATION YARD

Source	Work Plan Activity	Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
URMP	SWPPP	Implement SWPPP and appropriate BMPs.	Staff continued to implement the Town's SWPPP and BMPs, which are reviewed annually during the Corp Yard Walk-thru training.	Sr Engineering Technician

URMP	Staff Training	Annual Review and evaluation of SWPPP w/ Corp-Yard walk-thru	On September 21, 2005 Los Gatos' Sr Engineering Technician held the annual staff SWPPP review and Corp Yard Walk-Thru. Attendees included: Senior Engineering Technician, Senior Engineering Inspector, Senior Maintenance Worker, Park Service Officer	Sr Engineering Technician

Corporation Yard Evaluation

Staff is aware of the SWPPP. Feedback is that BMPs have become part of every day procedures. For more on staff training see the Public Agency Staff Training Table (attached).

Town's NPDES Coordinator/Sr. Engr. Tech. found that the previously-held Corporation Yard walk-throughs with entire department were not effective because it was too difficult to contain such a large group in an informal setting. In '04-'05, the walk-through was held with the members of the Parks & Public Works Department's Safety Committee. This was an improvement, but information needed to be given to more people. In 0'5-'06, the proposal is to do quarterly walk-throughs with the various divisions within the Public Works Department, and focus on each division's areas of responsibility.

RURAL PUBLIC WORKS ACTIVITIES

Source	Work Plan Activity	Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Rural PW PS[1]	Performance Standard	Continue implementation of Rural PW PS[1]	The model Performance Standard has been implemented. Current SOPs were updated in August 2004 as part of the Town's revised Urban Runoff Management Plan, submitted in September 2004.	Municipality, WVCWP assist
Rural PW PS	Hold Training meetings	Train appropriate Public Works staff on the use of current BMPs and SOPs, as noted in the performance standard.	On January 25, 2005, at a monthly Pub Works meeting, twenty Los Gatos staff including, Parks & Public Works Director, Public Works Supervisor, Parks & Forestry Supervisor, Sr Engineering Inspector, Engineering Inspector, and (15) Parks & Public Works Maintenance	Municipality, WVCWP assist

[1] Rural Public Works Maintenance and Support Performance Standard.

			Workers, were given a presentation by Jenny Fire, P.E.. Requirements were reviewed on the use of BMPs for local Rural Public Works. For more information see Pub Agency Staff Training Table attached to the end of this section.	

Rural Public Works Program Evaluation

Stormwater BMPs are currently discussed in pre-construction meetings with contractors; the Town inspects all contracted rural public works work in its jurisdiction and ensures the use of stormwater quality and erosion control BMPs. No CIPs involving Rural Public Works were conducted this year. Maintenance work included clearing of shoulders to prevent erosion and debris runoff during the rainy season. When future construction of Rural Public Works takes place, measures will be implemented for erosion prevention

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

PLANNING PROCEDURES

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	Work Plan Activity	Work Plan Tasks	Accomplishments	Responsible Party
C.3.b Development Project Approval Process -- Planning Procedures				
Implement Ordinance, Policy or COAs	Permit C.3.b, C.3.c.i and C.3.c.ii	Expand C.3 Implementation Ordinance, Policy, Procedures and Conditions of Approval will be implemented on all Group 2 projects to incorporate the requirements of provision C.3.	Los Gatos' Municipal Code states that all new development and redevelopment projects are subject to the requirements of the Town's current NPDES permit. Due to protracted negotiations regarding the Group 2 definition, the Town decided to require C.3 compliance for Group 1 and *all* Group 2 projects, in accordance with Permit CAS029718 (as it stood before Order R2-2005-00035 was adopted on 7-20-05). This Town requirement went into effect on April 15, 2005 for Group 1 and Group 2 projects not deemed complete prior to that date. (See Notice to Developers and Contractors (Attachment A).	Associate Planner
C.3.c. Requirements for Group 1 and Group 2 Projects				
URMP: Planning Procedures Performance Std	C.3.c.6.	Continue implementation of Planning Procedures to comply with revised (FY03-04) Performance Standard in local URMP.	In August 2004, the Town revised and updated all sections of its URMP, with a special focus on providing more specific details to the Town's Planning Procedures PS. Additional sections on BMP O&M Inspection and Verification were added to this PS. During 04-05, Los Gatos continued to implement the PPPS.	Associate Planner
C.3.e Operation and Maintenance of Treatment BMPs				
BMP Inspection Program O&M Verification	Permit C.3.e	Implement local inspection program for treatment BMPs on all Group 1 and Group 2 projects, to verify that proper O&M is being performed by the responsible party.	Los Gatos did not give final approval for any Group 1 or Group 2 projects in FY 04-05.	Sr. Eng Tech. & Eng Inspector

LOS GATOS

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Source	Work Plan Activity	Work Plan Tasks	Accomplishments	Responsible Party
BMP O&M Verification Program Reporting	Permit C.3.e.iii	Operation & Maint. Verification Reporting In Annual Report, provide a description of organizational structure; evaluation of program effectiveness; summary of any planned improvements; and list of results for all treatment BMPs inspected in FY03-04 and 04-05.	As a condition of the development permit, each owner of a Group 1 project in Los Gatos is required to enter into a recorded agreement with the Town for on-going operation and maintenance of all permanent on-site BMPs. This obligation runs with the land and is binding on all future owners of a Group 1 property. The Town uses a standard condition of development approval to notify developers of this requirement. Once the project is completed, the Town Engineering Inspector will inspect the BMPs at each Group 1 site annually. Any enforcement issues would be referred to the Los Gatos Code Enforcement Officer for further action.	Sr. Eng Tech. & Eng Inspector WV Staff to write report
	Work Plan	Training & Evaluation Train inspectors and data managers on O&M verification program. Include evaluation of effectiveness and planned improvement to the program	The Senior Engineering Technician, Engineering Inspector, and Associate Civil Engineer attended the SCVURPPP Workshop titled "Conducting Stormwater Treatment BMP Maintenance and Inspections" on June 9, 2005. The WVCWP Manager and WVCWP Inspector also attended the training and video-taped most of the presentations for WV municipal staff who could not attend. WVCWP staff has had a few delays in transferring the video to DVD for distribution. DVDs are expected to be made and distributed to WVCs during FY05-06. See Staff Training table for other training sessions (Attachment B).	Sr. Eng Tech. & Eng Inspector
C.3.f Hydromodification Management Plan				
Hydromodification Management Plan	C.3.f. (C.3.f.viii)	Review and provide comments on the HMP products.	The Town's Associate Planner and the Senior Engineering Technician attend all of SCVURPPP's C3 Provision Oversight meetings. Therefore Town staff have participated in the periodic review, and offered comments on the development, of the HMP. The Town also provided mapping data to determine percent of build out and imperviousness within its local sub-watersheds.	Asst Eng & Eng Div & Assoc Planner WVCWP to assist

LOS GATOS

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Source	Work Plan Activity	Work Plan Tasks	Accomplishments	Responsible Party
Hydromodification Management Plan	(C.3.f.viii.5 and C.3.f.i. and C.3.c.i.)	Implement HMP, which shall include the requirements of Provision C.3.f. Prior to approval of the HMP by the Regional Board, encourage early implementation measures likely to be included in the HMP. Summarize the Progress of incorporating treatment measures, in the Annual Report.	The HMP had not yet been approved by the Water Board in FY04-05.	Asst Eng & Eng Div & Assoc Planner
	FY04-05 Work Plan, RWQCB comments	Training Attend Program workshops on HMP and provide in-house training as appropriate.	On 2-4-05 the Town's Sr. Eng Technician attended a WV round table discussion / training on likely HMP requirements and exemptions and possible methods for early implementation. The Sr. Eng Tech and Associate Planner were also kept up-to-date on the progress of HMP development by attending SCVURPPP's monthly C3PO task group meetings. Town staff will attend SCVURPPP sponsored workshop(s) on the approved HMP during FY05-06.	SCVURPPP ; Senior Engineering Technician, Associate Planner, and WVCWP Mgr
C.3.g Waiver and Compensatory Mitigation Program				
Waiver Program Staff training and reporting	C.3.g.3 (Permit C.3.g.v.)	If a waiver & compensatory mitigation program is adopted, document in each annual report, all waivers granted according to permit provision C.3.c.g for Group 1 and Group 2 projects. Include: project name, location, type, percent impervious surface, reasons for and terms of waiver, and the alternative benefit project and completion date.	Waiver program was not adopted during FY 04-05 and none is anticipated in the near future. All Group 1 and Group 2 Projects must meet NPDES requirements for stormwater treatment measures.	Public Works Director to adopt Pgm, Asst Eng to collect data & WVCWP to report
C.3.h Alternate Certification				
Alternate Certification reporting	(Permit C.3.h)	If alternate certification is used, list the Group 1 and Group 2 projects certified by someone other than City Staff.	The Town will not be certifying C.3 compliance for private projects. The City requires the project applicant to be responsible for having all stormwater measures certified for	Associate Civil Engineer and Sr. Eng Tech

Source	Work Plan Activity	Work Plan Tasks	Accomplishments	Responsible Party
			adequacy, according to the requirements of Provisions C.3.d & C.3.f and C.3.h. The City will require proof that each certifier has been adequately trained on BMP design for water quality. The Public Works Department is in the process of developing a list of consultants approved to certify BMP selection and design. No alternate certifications were required, since there were no Group 1 or Group 2 projects approved in Los Gatos during FY 04-05.	WVCWP to report
C.3.j Site Design Measures Guidance and Standards Development				
Site Design Measures Guidance and Standards Revision	(Permit C.3.j.)	Implement revised local site design standards and guidance, according to Permit C.3.j. by 9/15/04 (Report on progress in Sept. '04 AR) Reference: • Town's 9/15/03 submittal labeled *Site Design Standards and Guidance Review,* from SCVURPPP (on CD); • "Development Policies Comparison Report" worksheet, from SCVURPPP (on CD, 4/2003); • Notes and information from the SCVURPPP Site Design Dialogues & Workshop (FY03-04)	The Town submitted a response to SCVURPPP's recommendations in the "Development Policies Comparison Worksheet" in September 2003. The Town's submittal of an updated implementation status using the format of the *Site Design Standards and Guidance Review* was included in the Planning Procedures section of the FY03-04 Annual Report. See Evaluation below regarding work on Municipal Code Revisions that will improve site design options for stormwater quality. The Town is also helping to fund and plan the community project to create bike paths on Hwy 9, running through Los Gatos, Monte Sereno and Saratoga. The paths will open up an inviting alternative to vehicular transportation. The Town's Sr. Eng Technician attended monthly sub-group meetings of the Water Resources Collaborative during FY04-05 to help develop an outcome product," Guidelines and Standards" (for the protecting the riparian corridor).	Associate Planner SCVURPPP (guidance)

LOS GATOS

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Source	Work Plan Activity	Work Plan Tasks	Accomplishments	Responsible Party
C.3.k Source Control Measures				
Implementation of Source Control Measures	C.3.k.3 (Permit C.3.k. last paragraph)	Implement source control measures requirements by including appropriate conditions of approval in Group 1 and 2 projects. Stormwater pollutant source control measures will be encouraged for projects of all sizes where practicable.	No changes to source control requirements in FY04-05.	Associate Planner
C.3.m Water Quality Review Processes				
CEQA Review	C.3.m.1	Dischargers shall evaluate water quality effects & identify mitigation measures when conducting Env Review Process for all projects. Report on changes to the Environmental Review process, if any.	The Town of Los Gatos ensures that the environmental documents required for projects that fall under CEQA review address both significant and cumulative stormwater quality impacts during the life of the project, and specific mitigation measures related to stormwater management. There were no changes to the CEQA review process in FY '04-'-05.	Associate Planner
C.3.n Reporting Requirements				
Source Control Measures Reporting	Permit C.3.n.i. (C.3.c.)	Reporting on Source Control Measures Use the Planning Procedures Performance Standard Reporting Form to provide detail in annul reports, on implementation of Source Control Measures for all Group 1 & Group 2, new and redevelopment projects: --project name, location, type (per C.3.c.), size (ac. or sq.ft.), and impervious surface area. For redevelopment projects, include area of land disturbance.	The Town did not give final approval to any Group 1 or Group 2 projects during FY 04-05.	Associate Planner & Sr. Eng Technician to collect data WVCWP to prepare report
Treatment Measures Reporting	Permit C.3.n.ii. (C.3.d. & C.3.e.)	Reporting on Treatment Measures For projects that must implement treatment	The Town did not give final approval to any Group 1 or Group 2 projects during FY 04-05.	Associate Planner & Sr. Eng Technician

Source	Work Plan Activity	Work Plan Tasks	Accomplishments	Responsible Party
		measures, report which treatment BMPs were used and numeric-sizing criteria employed, the operation and maintenance responsibility mechanism including responsible party, site design measures used, and source control measures required.		to collect & provide data WVCWP to prepare report
Pesticide Control Measures Reporting	Permit C.3.n.iii.	Reporting on Pesticide Reduction Measures Collect information and report a summary of types of pesticide reduction measures required for development Group 1 & Group 2 projects and the percentage of projects for which pesticide reduction measures were required.	Los Gatos has an irrigation efficiency ordinance to promote use of less water and minimize runoff that can carry pesticides/fertilizers into local waterways. Town Code 26.40.030– encourages protection and preservation of native species, natural areas, and designs to minimize irrigation runoff. The Town's "Hillside Design Guidelines' limit the amount of non-native plants that can be used in new developments and a pesticide reduction fact sheet is given to all project applicants.	Associate Planner & Sr. Eng Technician to collect data. WVCWP to report
C.3 Training & Evaluation				
Staff Training	FY03-04 Work Plan, RWQCB comments	Training Train appropriate staff (i.e. planning, building, and engineering divisions) on new policies, procedures, & C3 provision requirements listed above (may include SCVURPPP workshops).	The Town's Senior Engineering Technician, Engineering Inspector, and Associate Civil Engineer attended SCVURPPP's workshop titled "Conducting Stormwater Treatment BMP Maintenance and Inspections" on June 9, 2005. The Sr. Eng. Tech also attended a WV round table discussion with the other West Valley Community Reps to review guidance on implementing the BMP O&M Verification Program (2/4/05). See Staff Training table for other training sessions (Attachment B).	Associate Planner & Sr. Eng Technician WVCWP & SCVURPPP, as appropriate
Planning Procedures Evaluation				
The Town's planning staff has found SCVURPPP and WVCWP training on C3 requirements useful in trying to incorporate changes benefiting stormwater quality into the project approval process. During FY 04-05, the Associate Planner drafted several amendments to the Town Code, which would result in reduced impervious				

Source	Work Plan Activity	Work Plan Tasks	Accomplishments	Responsible Party

coverage, e.g. reducing driveway widths and depths, allowing permeable paving materials, ribbon strip driveways, and breaks in parking lot curbs to allow for drainage. These amendments went to the Town's General Plan Committee in June 2005 for review. During FY 05-06 the proposed revisions should be going to the Planning Commission and eventually to the Town Council.

Conditions of Approval, Reviews, & Meetings Ensure Incorporation of C.3 Requirements

During '04-'05, the Engineering Division of the Parks and Public Works Department revised the standard Conditions of Approval to comply with new C3 requirements. The advantage of being a small municipality is that the standard conditions can be modified for each project. In addition to the standard Conditions of Approval, we also have a master Technical Review Report that is used as the basis for the review of all projects. This procedure helps to ensure that all requirements are included. The standard Conditions of Approval are included with this report.

On large or complex projects, staff usually meets with the developer and/or their engineer about various engineering aspects of the project, including all C3 requirements.

A copy of each week's Technical Review Agenda is sent to various outside agencies such as the County Fire Department and County Health Department. The developer is required to provide enough copies of the development plans for these agencies also. If those agencies feel that they need to review the project, they will come to the Town's Community Development Department to obtain a copy of the plans. Their comments are given to the developer at the weekly Technical Review Meeting. Several Town departments and outside agencies provide us with conditions of approval that are included in the final report to the Planning Commission/Town Council and made a part of the approval of the project.

Trish Duarte, Sr. Engineering Technician

Evaluation of BMP O&M Inspection & Verification Program

Although each WV municipality has assigned staff to conduct storm water treatment BMP O&M verification inspections, the biggest challenge, for the Town of Los Gatos will be to find staff time to carry out the inspections. At the West Valley follow up session to the Program's workshop on BMP O&M Verification, Campbell's Sr Civil Engineer asked the WVCWP Manager to look into an alternative means of conducting West Valley BMP O&M inspections. He was interested in finding a consultant to work for all of the West Valley Communities on an "as-needed" schedule to perform annual inspections. The consultant would have sufficient engineering experience to recognize potential maintenance problems on treatment BMPs and be well-trained in stormwater quality requirements. Monte Sereno is not interested in participating because they have sufficient Engineering staff to meet the City's inspection needs. However, Los Gatos and the other WV municipalities may be interested in jointly hiring a consultant to perform inspections and write inspection reports, especially during FY 06-07, as Group 1 projects are completed and become due for annual inspections. The WVCWP Manager, agreed to work toward a resolution to this challenge; the topic of hiring a consultant will be considered during a round-table discussion among the WV Stormwater Reps in September or October 2005.

LOS GATOS

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Town of
Los Gatos

NOTICE
to
Developers & Contractors

State of California

STORMWATER REGULATION CHANGES

This Notice is to inform you of changes to existing **Stormwater Quality Regulations.**

NPDES Construction General Permit

As a result of recent state regulatory actions, effective immediately, all construction projects **disturbing an area of one (1) acre** or more are required to comply with:

State of California
"General National Pollutant Discharge Elimination System (NPDES) Permit
for Discharges Associated with Construction Activities"
("Construction General Permit")

The size threshold for this permit had previously been 5 acres of disturbed land.

Compliance with this permit requires ALL of the following:

- Submitting a Notice of Intent (**NOI**) and pay an annual payment during the project's construction period to: **State Water Resources Control Board – see website below for fee schedule**
- Preparation of a Storm Water Pollution Prevention Plan (**SWPPP**)
- Use of Town Approved Best Management Practices (**BMP**s) to control storm water runoff
- BMP inspection and maintenance by applicant to determine adequacy and maintenance
- File a Notice of Termination upon completion of construction

For copies of the Construction General Permit, the NOI, and additional permit information, consult the State Water Resources Control Board web site at:

http://www.swrcb.ca.gov/stormwtr/construction.html

STORMWATER QUALITY REGULATIONS

Amended Development Project BMP Requirements

In order to comply with the town's State-issued **NPDES permit, No. 01-119**, Los Gatos and 14 other public agencies in the Santa Clara Valley are required to place additional Conditions of Approval related to storm water quality control on certain development projects. **As of April 15, 2005, non-exempt projects creating or replacing 10,000 sq. ft. or more of impervious surface**, including roof area, **must incorporate design, control, and engineered treatment measures** to prevent pollutants from being washed into creeks and streams by stormwater runoff from new and re-development sites.

Conditions of approval will include the use and maintenance of BMPs for site design and storm water treatment, which must be designed per approved numeric sizing criteria. General guidance on the selection and implementation of BMPs and Stormwater Management Plans can be found on the California Stormwater Quality Association (CASQA) website at www.cabmphandbooks.com and C.3. Stormwater Handbook – May 2004, available at www.scvurppp.org (Link to "Reports & Products 2003-2004" and "Guidance Manual."

Town of
Los Gatos

Each project will also require a Certification of the required Engineered Stormwater Management Plan, in compliance with Council Policy.

Owners of properties with treatment BMPs will be required to certify on-going operation and maintenance on an annual basis.

DEVELOPMENT & CONSTRUCTION
Construction Inspections

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
	URMP	Staff Training Participate in and support SCVURPPP sponsored workshops/ info sessions on erosion control and construction BMPs; support distribution of related materials.	The Town's Senior Engineering Technician attended the Water Board's Construction Site Management and Erosion Control BMPs Workshop on October 12, 2004. The WVCWP IC/ID Inspector and Manager also attended the training and purchased the videos, "**Hold onto your Dirt**" and "**Keep it Clean**", to use in follow-up training sessions with municipal staff. See Staff Training Table –Construction Inspection, for details.	Eng Div staff, WV Inspector & Pgm Mgr to attend
	URMP	Construction Inspections Continue construction site inspections for stormwater issues (i.e., mudtracking, mat'l storage, housekeeping, etc.).	Municipal Code Sec. 12.20.010 et seq., requires erosion and sediment control materials to be onsite by October 1st and in place before October 15th. Once-a-week inspections, and additional inspections during and after every major storm, are carried out by Town Engineering staff on all sites with active grading permits. Building Inspectors note and report to Engineering any active or potential erosion violations on site. Building Inspectors check for proper materials storage and disposal and similar building-related potential pollution problems. Sites with potential problems are inspected at least once a week but not more than twice a week. During 04-05 the Town and WVCWP IC/ID Inspector reported a total of 17 construction site related incidents. Ultimately, all incidents were successfully resolved.	Eng Div staff, & WV Inspector to assist with education on minor violations

			For Inspector's notes see Construction Inspection Incident table (attached). Also, see Evaluation section below.	
	Program	Construction Inspection Performance Standard Implement revisions to the Construction Inspection Performance Standards (e.g., documenting and reporting enforcement actions and implementing process for graduated levels of enforcement).	The Town implemented the Program's enhanced reporting standards in previous years. Increased communication among WV CWP IC/ID Inspector and Town inspectors has resulted in more coordinated, pro-active, inspections and more education for developers and residents. In July and August, as part of revising the Town's URMP (submitted to the Water Board in 9/04), WVCWP and Los Gatos staff updated the documentation of SOPs in the Town's Construction Inspection Performance Standards. Recently added to the URMP for convenient reference, were the Water Board's Performance Review questions for the Town (from December 2003), and Los Gatos' responses. This addition took place after the Sept 2004 URMP submittal.	Asst Eng & Eng Inspectors WV Inspector by referral

Construction Inspection Evaluation

Construction Site Evaluation of Trends:

FY04-05		Previous Year - 03-04	
Tracking Soil	3	Tracking Soil (dirt runoff from landscape & sprinkler)	3
Landscape Mat'l Dumping	2	Landscape Mat'l Dumping (3 listed; 1 was follow-up on NTC)	2
Equipment Cleaning	1	Unhardened Cement (plaster, stucco, concrete slurry)	4
Saw Cutting Slurry	2	Misc Incidents (sediment; cement & const. debris)	2
Complaint not found (concerned citizens, potential violations)	3		
Misc. Incident (3 silt in street; 2 broken water main & broken valve)	5		
Allowable Discharge (water truck emptying water NTC issued	1		
Total Number of Incidents	17		11

Generally the number of incidents has remained about the same for the past 2 years. The increase from 11 to 17 is misleading. This year, out of five (5) miscellaneous incidents, 2 were from accidents (a water main brake and the second from a broken valve). In addition 3 of inspections resulting from calls turned out not to be violations; instead they were reports from concerned citizens regarding potential violations. Not surprisingly, 3 *Tracking Soil* incidents represent one

of the most common types of violations for the Town during both FY03-04 and FY04-05. Silt runoff, classified as miscellaneous type incidents, was responsible for 3 miscellaneous incidents compared with 2 miscellaneous incidents reported in the previous year.

Over all, the number of actual incidents has remained about the same. For the second consecutive year, Inspectors from the Town met regularly with the WVCWP Inspector to compare notes on construction sites and other IC/ID incidents around the Town. The increased communication has promoted a heightened awareness among staff regarding which areas or sites need to be watched more carefully. More familiarity with the potential problem sites or problem individuals, also leads to more efficient patrolling of the area. WVCWP and Town staff will continue to educate contractors and visit sites as frequently as possible. It was noted amongst inspectors that many construction related incidents are the result of smaller jobs (new driveways etc) that do not need a permit. Public outreach to residents and educational visits from the WVCWP Inspector will continue to reduce the number of residential violations.

The Town and the WVCWP have successfully used door hangers to encourage citizens to report anything they notice (other than storm water) in the streets or gutters. During FY 01-02, the WVCWP developed a door hanger to educate residents using a “neighborhood” approach, “Dumping Into Storm Drains Is Illegal…and it has occurred in your neighborhood.” The door hanger has been helpful in soliciting citizen involvement on a number of occasions. This year the Stormwater Rep for Los Gatos developed an additional Town door hanger (more details in the Street Sweeping section evaluation) for use by the street sweeper when encountering yard waste or residential construction debris in the sweeper’s path. Local residents have responded to this type of education with various calls and their vigilance has been helpful.

Fees to cover Inspection costs Los Gatos has imposed fees on developers for stormwater compliance. Extra “Permit” fees pay for inspectors. Most of the Town’s costs for stormwater quality are generated from construction or remodeling inspections and compliance, i.e. installation of a granite counter has to be inspected to ensure saw slurry does not get into the stormdrain. Inspections are not optional for the Town and these fees help meet the cost. (from Minutes - 10/6/05 WV training/ meeting)

Challenges to attending Construction Site Erosion Workshops, October is the worst month to attend a construction / erosion control workshop. Construction inspectors are rushing to meet the October 15th deadline to be prepared for the rainy season. Los Gatos may not be able to send staff if they are working 24 hours a day in order to finish preparations. Construction / Erosion workshops in October and November are not practical for West Valley municipal staff. Resolution – WVCWP arranged with a Planner from the SF Estuary Project to hold the Santa Clara Construction/ Erosion Control Workshop on Dec 8, 2005, at Campbell Community Center. In addition the Town has arranged with developers to provide two field trip training sites for the upcoming workshop.

The Construction Inspection Program Works Well – Continued public outreach efforts and further training or communication among municipal inspection staff and the WV Stormwater Inspector have served to develop a very coordinated and effective construction site inspection program.

Construction Site Inspections Annual Report FY0405

#	ICID Date	Contact Name	Incident Address	Report Source	Incident Type	Enforcment Action	Inspector Notes	Incident - Status	Follow-up Notes	Compliance Date
1	8/4/2004	O.S. Construction	917 Blossom Hill Rd., Los Gatos	Interdepartmental	Tracking soil	Verbal Notice	Residential. Tracking soil. Cleaned up gutter area by the end of day.	Incident - Resolved	All OK.	04-Aug-04
2	8/4/2004	Shvigilo Paving	14675 Winchester Blvd., Los Gatos	Interdepartmental	Tracking soil	Verbal Notice	Commercial. Soil tracking.	Incident - Resolved	Contractor cleaned up gutter and street.	04-Aug-04
3	8/5/2004	Fisher Middle School	Roberts Rd., Los Gatos	Interdepartmental	Saw cutting slurry discharge	Warning Notice	Saw cut slurry. NTC #1659 issued.	Incident - Resolved	Contractor cleaned up slurry from surface.	05-Aug-04
4	8/11/2004	Residence, BRW Construction	272 Old Adobe Rd., Los Gatos	Citizen Complaints	Equipment cleaning	Verbal Notice	Contractor washing equipment in street. Cheri called it in. I went right out. Had him clean up.	Incident - Resolved	All AOK.	11-Aug-04
5	10/7/2004	Sanco Pipeline at residence	15047 Los Gatos Blvd., Los Gatos	Interdepartmental	Allowable discharge	Warning Notice	Water truck emptying into SD. All taken care of. NTC #1666 issued.	Incident - Resolved	All OK now.	07-Oct-04
6	10/20/2004	Residence	15971 Stephanie Ln., Los Gatos	Other agency	Misc. incidents	Warning Notice	Drywall material stored in street. In case of rain, bags would leak and be a problem. Chuck Hart also went out and took care of problem. He issued NTC#1603. All OK now.	Incident - Resolved	All OK now.	20-Oct-04
7	10/21/2004	Craig McClellan	103 Vista de Monte	Interdepartmental	Landscape material dumping	Warning Notice	Remove all soil from gutter area. Issued NTC#1667.	Incident - Resolved	All OK now.	21-Oct-04
8	10/21/2004	Vladimir M. Const. at residence	16051 Winterbrook Rd., Los Gatos	Interdepartmental	Misc. incidents	Warning Notice	Construction site runoff. Silty water in gutter. Cleaned up immediately. NTC# 1602 issued by Chuck.	Incident - Resolved	All OK now.	21-Oct-04
9	10/28/2004	residence	across from 322/320 Bella Vista, Los Gatos	Interdepartmental	Misc. incidents	No Action	PG&E trenching operation hit a water main. Gyser caused water and silt to run down curb and gutter. Vacuum truck on site vacuuming up silt and water. All OK now.	Incident - Resolved	All OK now.	28-Oct-04
10	11/17/2004	Residence	272 Old Adobe Rd., Los Gatos	Citizen Complaints	Misc. incidents	Verbal Notice	New driveway and walkway being installed. Silt runoff in gutter. Work almost completed. No more runoff. I made them clean gutter all the way to SD. Went back on 11-18-04. All OK.	Incident - Resolved	All OK now.	17-Nov-04
11	12/7/2004	Los Gatos-Saratoga High School District	17421 Farley Rd.W., Los Gatos	Citizen Complaints	Tracking soil	Verbal Notice	Cameron Colson emailed pictures. Sandbags around SD had been run over and broken. Went right out. Had them clean up around SD and place new sandbags. Also, roadway cleaned up mud and dirt due to construction.	Incident - Resolved	Went back on 12-10-04 and 12-13-04. Much improved. All cleaned up. New sandbags around SD. Took pictures.	07-Dec-04
12	12/10/2004	Jewish Commun. Ctr.	Oka Rd. off Lark Av., Los Gatos	Citizen Complaints	Complaint not found	No Action	Cameron Colson emailed pictures. Went right out. Construction site for new building. Very clean for a construction site. Nothing wrong. Took pictures. Chuck Hart, L.G., also went out. Reached same conclusion, looks good. Nothing wrong.	Non-Incident	AOK.	10-Dec-04
13	12/18/2004	Los Gatos Creek	10 Monroe Ct., Los Gatos	Citizen Complaints	Complaint not found	No Action	Concern about pesticide being used to clear ivy may get into creek. Trish thinks they mean herbicide. Project has not been approved. Nothing has been used for ivy removal.	Non-Incident	Cameron Colson came out to discuss this with her. No problem right now. Project not yet approved.	18-Dec-04
14	1/19/2005	Residence	211 Old Adobe Rd., Los Gatos	Interdepartmental	Landscape material dumping	No Action	New driveway. Landscaping in front.Pile of dirt in street. Told them to clean up before end of day. Went by later. All OK.	Incident - Resolved	All OK.	19-Jan-05
15	1/21/2005	San Jose Water Co.	in front of 235 Wedgewood Av., Los Gatos	Other agency	Misc. incidents	Verbal Notice	Lisa called me. SJ Water is repairing a broken valve. Sediment with water going into SD. I had them block off the SD. I called George Garcia. Lisa said she would notify the Reginal Board.	Incident - Resolved		21-Jan-05
16	2/25/2005	Bldg. under construction	Winchester Blvd. adjacent to Hwy 85	Interdepartmental	Complaint not found	No Action	Citizen called in regard to soil tracking. George went right out. No problem. I agree.	Incident - Resolved	All AOK.	25-Feb-05
17	4/6/2005	WVSD	Bachman @ Tait, Los Gatos	Interdepartmental	Saw cutting slurry discharge	Verbal Notice	Saw cutting "slobber" dumped in SD. SD must be cleaned. All Ok now.	Incident - Resolved	All Ok now.	06-Apr-05

Training Summary: Construction Inspection FY 03-04

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Note:

In order to prevent redundancy, the PI/P table has been created as one table for all four WV Communities.

Activities sponsored by an individual community are noted where appropriate.

PI/P activities for the WVC tend to be attended by residents from several WV communities, and many of the PI/P tasks are handled by WVCWP for all communities at once. In addition, a number of schools serve residents from more than one community.

A. SCV Program Projects/Support				
SCV Program PMP (II.A.1)	General Outreach	a. Watershed Education and Outreach Campaign Support multi-year watershed education and outreach campaign. WVCW Pgm Mgr assists via WEO Ad hoc Task Group. Participate in campaign development and special projects. Campaign will include funding for educational programs at the Alviso Ed Center and funding for ZunZun performances in local schools. Continue establishing partnerships with local recreational attractions to promote watershed messages. (i.e. Happy Hallow Zoo and Bonfante Gardens) See SCVURPPP Project Work Plan for details.	WV Communities (WVC) support the multi year Watershed Education Outreach (WEO) campaign. Program Mgr is active in the WEO AHTG and in the Schools & Youth Education Outreach Subgroup. **Zun Zun Assemblies** Letters and emails were sent to several local WVC Elementary schools informing them about the free sponsored ZunZun Assemblies available to their students. All schools which participated received two (2) vocabulary lists (one for K-2 and one for 3-6) and an information sheet about the assembly content for teachers to refer to. Teachers were asked to familiarize the students with the vocabulary words prior to the assembly. Three (3) WVC schools participated in the assembly. Castlemont Elementary, Campbell **742 students**	WVCWP Staff

NPDES Permit, PMP (II.A.12)	Targeted Outreach	b. Pesticide User Outreach Project Provide funding and participate in implementing IPM Store Partnership and Household Chemical Management Projects. Project scope will include items in program's Pesticide Management Plan based on provision c.9.d. of the Permit for outreach to residents, commercial businesses, and pest control operators.	WVCWP continues to partner with the ***Summer Winds Nursery*** in Campbell in educating the general public on less-toxic methods to control pests. This year a seminar was held for all employees (Feb. 2nd) with speaker Annie Joseph. Topics included less toxic pest management and child and pet-safe solutions for homes and gardens. Employees will be able to relay this information to their customers.	WVCWP Staff
CI, Discretionary Project	Educational Outreach	c. Schools Outreach and Watershed Education Continue a pilot study on Wacky Watershed's, 6th - 8th grade curriculum, consistent with state required education standards and current watershed campaign messages. Evaluate effectiveness and appeal by providing training to teachers and soliciting their evaluations.	In previous years, WVCWP made numerous attempts to meet with 6th - 8th grade science teachers concerning "Wacky Watersheds" but did not receive responses. WVCWP then took a new approach which has proven very successful: since the **Calif. 5th grade** curriculum addresses "Keeping Water Clean" and "Pollutants Travel" in its Water Unit, WVCWP developed an Enviroscape-based 5th grade curriculum addressing these topics. Wacky Watersheds' messages have been incorporated into this curriculum. One rotation station features the Wacky Watersheds video "It's Wet, It's Wild, It's Water". WVCWP gained teacher invitations to present this curriculum to five different 5th grade classes in FY 04-05 (appx. 145 students participated). **Teachers' evaluations state** "Thanks for coming!" and consider that the program *"very much"* helped students learn about watersheds, learn to avoid residential runoff	WVCWP Staff

URMP	Targeted Outreach	2.B.a Distribute materials Provide pesticide management materials to: 1) nurseries and hardware stores for distribution at point-of-sale; 2) pest control operators and landscapers, and 3) municipal employees.	Summer Winds Garden Center in Campbell maintains an IPM materials literature holder for which WVCWP provides some of the outreach material. 50 Grow-It Guides were distributed here in FY 04-05; distribution was delayed by the store's recent change in management, and changing requests for type of display rack (floor vs. wall-mounted). Orchard Supply Hardware (bordering Saratoga & Campbell) allowed WVCWP to place an IPM basket display "Grow-It Guides" in their checkout area; 50 Grow-It Guides & 20 "A Child's Garden" coloring books were part of the display. Pest Control Contractors and Landscape Contractors for all WVC were contacted with information/invitations for the March 2005 free IPM training sponsored by WVC through WVCWP. CEUs for Pesticide Applicators and Nursery Professionals were offered. 1 Pest Control Contractor and 1 independent Landscape Contractor attended.

EVALUATION

IPM Materials: The "Soil Matters" 32 page booklet was very-well received by the AgroEcology science class at Los Gatos High school, and will be kept as class reference material and incorporated into the curriculum for that class.

The "Grow-It Guide" continues to be the most popular IPM literature. Although WVCWP and the cities/town make available a variety of IPM materials at public places and community events, it is most common for residents to pick up only the Grow-It Guides. Among the IPM fact sheets, residents seem most interested in the Roses sheet and the Beautiful Lawns sheet.

Items for children are also popular – see 2.B.k "Coordinate Watershed Education with schools" below. One of the most popular items has been the "Our Water Our World" picture frame magnet. While the magnet doesn't give actual IPM advice, it features the web site address, and it is hoped that residents will visit the web site (partially funded by SCVURPPP) as it is an excellent resource. The "Kids Guide to Backyard Bugs" is always popular, but supplies are very limited, so these are distributed sparingly. Many more would be taken, if they were available.

WVCWP has had the most success in providing IPM material to the Master Gardeners classes at the Campbell Community Center, since these supplement the instructor's information, and attendees have an interest in gardening (see Pesticide Mgmt Section for details). It appears that there would be an interest in at least basic IPM info in any of the gardening classes in this series. In FY 05-06 a more concerted effort will be made to get some IPM materials to each of these classes, rather than just distributing to the Pest Management class, as was done this year.

In the WVC, it appears that quite a bit of residential landscape care is handled by very small landscape businesses. WVCWP continues to search for a means of reaching residents who use these services and who could request a change in pesticide use from their contractors. Discussions with Licensed PCOs indicate that residents call them after the small (probably unlicensed) contractors spray a variety of chemicals without successful results. This means that not only are residents resorting to pesticide spraying, they are ending up with more spraying than is actually needed, if the work was initially done correctly. It would be helpful to have material which could simply and quickly educate residents on this matter.

Household Hazardous Waste / Copper – Nickel / Mercury / *Other:*

Staff created a variety of flyers this year focusing on Mercury, especially the need to recycle Fluorescent Light Bulbs – See" New Creations by WVCWP" below for details.

WVCWP staff created a colorful outreach piece related to Copper (aimed at Car Wash Fundraisers --see" New Creations by WVCWP" below), but see a need for a general piece on Car Washing which would explain the reasons to avoid car wash runoff into storm drains. This would be especially helpful if the appearance appealed to a high school/ young adult age group who might be likely to wash at home rather than using a car wash. In addition, staff usually receive questions about copper water pipes when trying to explain the copper/brake pad/water pollution issue. Based on this, and the same questions related to architectural copper, it appears that some sort of outreach piece on copper would be useful. Staff have not yet found any outreach pieces which would serve as good models on these subjects, but will continue looking into possibilities. The Car Wash Kit flyer will be distributed to schools in FY 05-06.

EVALUATION

The Stormwater Discharge Inspector has found that the best outreach item for restaurants is the “Good Cleaning Practices for Restaurants poster, which incorporates 6 pictures of proper cleaning BMPs. The piece is 12”x36” and can be hung either horizontally or vertically; the paper has a greaseproof coating. Unfortunately, WVCWP only has 8 of these left, and they have been distributed very sparingly, depending upon need and interest. SCVURPPP does not have any available on request. The poster was originally part of a 6 piece packet. WVCWP will investigate whether there might be any means/interest/funding for re-printing the poster alone.

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
The Discharge Inspector also sees a need for a simple piece on Car Washing which would explain the reasons to avoid car wash runoff into storm drains (as discussed above in "Materials Distribution – HHW/ Copper-Nickel"). Los Gatos has had good results with a doorhanger carried by the streetsweeper. When evidence of potential runoff pollution problems are encountered (such as grass clippings in the gutter) the resident receives notification/education through use of the doorhanger.				
New Creations by WVCWP / WVCWP Materials Distribution				
	General Outreach	.B.a WVCWP: Creation of new outreach materials **not part of Work Plan – additional activity**	**Created "With Your Own 2 Hands" – digital music video/ slide show** This DVD highlights Creek Clean-up volunteers and water pollution prevention. It shows *Creek Keepers Volunteers* with trash grabbers and clipboards as they clean creek sites and conduct trash monitoring, along with the creeks' natural beauty, and creek trash problems. WVCWP created this piece as outreach to encourage participation in Creek Clean-ups and to increase awareness of the problems of trash in creeks. WVCWP is discussing potential methods of having teachers and youth group leaders view the video to encourage schools/ scout troops, etc. to partner with WVCWP in Creek Clean-ups. This activity was chosen as an alternative to creation of a WVCWP newsletter this year (see 2.B.h below). The show was created at no extra cost, using existing computer software and existing photos from WVCWP

		activity	The flyer directs residents to contact WVCWP for free use of the Car Wash Kit whenever a fundraiser car wash will be conducted. The flyer is available at Municipal offices for residents who might ask about any necessary permits for their fundraiser. WVCWP has also initiated distribution of the flyer to schools. See Copper Section Attachment A	

EVALUATION

The new curriculums for the 2 Enviroscapes appeared to appeal to the students; students remained very engaged when they participated in their 2nd Enviroscape station and no one expressed any frustration that the 2 presentations were similar. Staff worked hard to create activities that would be unique to each model, and also to stress a few similar but important points in both models. WVCWP will continue to use the 2 presentations together when space at a school allows for this.

WVCWP continues to discuss creation of some type of material which could be distributed to classrooms when the Enviroscape is presented. However, since students bring home so many papers from school, it is felt that any piece would need to appear unique. While the calendar produced last year was unique, useful and popular, the current budget situation does not allow for printing of new calendars each year, and has never allowed for printing enough for the calendars to be 'take home' material.

The curriculum on infiltration and pesticide pollution, created for the Ground Water Flow Model, was a very effective teaching tool, according to the High School Science teacher. The presentation has been requested for the 05-06 school year.

The Mercury Warning flyer (see "Mercury Ad – Attachment A" in Mercury Section) was handed out with an article on Mercury & Autism, reprinted from the LA Times. Residents appeared to be very interested in both pieces. 15 of each were printed for a trial at Los Gatos Beautiful; all were taken, and many more could have been distributed.

The Car Wash Kit flyers were created to meet a need for getting this information to the public. The Town of Los Gatos web site's Public Works page had some of this information, and WVCWP has received a number of calls based upon this page. The flyer was created as a means to easily get the information to schools; it has also been posted in municipal offices. It generated a call from one Los Gatos school district, which is now looking into setting up its own car wash kit. It will be distributed widely in FY 05-06 and will be posted on the WVCWP web site.

URMP, PMP (II.A.4.)	General Outreach	b. Participate in Community Events Promote watershed messages by participating in community events (e.g., farmers market, festivals, creeks clean-ups, etc.). Conduct or participate in local activities that are coordinated with the Watershed Education & Outreach campaign, including outreach events targeted at pesticide users.	WVCWP partnered with the local Sierra Club chapter & Audubon Society to feature a table at Audubon's annual October "Wildlife Education Fair". The table featured: the Enviroscape hands-on watershed model demonstrating various types pollution in runoff, a display on dangers of diazinon for birds, and IPM materials. The Sierra Club distributed California Golden Poppy seeds to promote pest-resistant planting. Attendance at the fair was a bit lower this year, due to rain. However, the table attracted appx. 25 children, some of whom stayed for 2-3 presentations. Parents watched the presentations from behind their children. The City of Campbell conducted outreach through its Arbor Day activity (April 19th) and Community Clean Up Day (April 23rd – 95 participants) and distributed a variety of materials, including IPM & HHW. The Town of Los Gatos conducted outreach through its Farmer's Market /Los Gatos Beautiful Celebration (April 2005). WVCWP staffed booths at the event and distributed a variety a materials. The City of Saratoga conducted outreach through its Building Bridges event (October 2004) and its Mustard Walk (Feb. 2005). A variety of materials was distributed by City staff at both events. WVCWP organized a Creek Clean-up Event with Sacred Heart School in Saratoga (students from all WVC). Appx 60 students and 5 parents participated. The beginning of	WVCWP Staff

FY99-00 Annual Report, PMP (II.A.10)	d. Press Releases	WVCWP will prepare press releases, feature articles and/or PSAs for local media on topics such as proper disposal of HHW, pesticides, copper, mercury and trash.	The WVC Trash Monitoring/Creek Clean-up program received excellent press coverage due to a Press Release submitted to the Saratoga News weekly paper. An extensive article on the clean-up ran on the front page, coinciding with Earth Day April 2005. The article highlighted WVCWP's Trash Monitoring activities, schoolyards as 'Trash Hot Spots', the problems of trash flowing to the SF Bay, the Clean Water Act and more. It included student interviews and photos. (See Trash Management Section for a reprint of this article). A Press Release/Article on mercury toxicity, fluorescent light disposal, and the upcoming HHW WV Drop-off event, was submitted to the SJ Mercury News and the 3 WV weekly newspapers. Several papers shortened the article	WVCWP Staff

			and ran it (October 2004). A Press Release/Article on a Saratoga student's award-winning Residential Runoff/ "No Dumping-Flows to Creek" science project was submitted to the SJ Mercury News and the 1 WV weekly newspaper. The SJ Mercury shortened the article and ran it (October 2004). WVC received national TV coverage in relation to the above article. The press release had been sent in reference to the student and his project appearing on the television news channel "CNN", as a winner in a national science contest. The student appeared on CNN with a large version of the WVCWP stormdrain stencil and a version of his science project "No Dumping – Flows to Creek". A Press Release on the upcoming IPM Training for WVC Parks staff, and the WVC focus on use of IPM, was submitted to the gardening columnist for 3 WV weeklies (March 2005). Two "Letters to the Editor" concerning architectural copper were submitted to 2 local weekly papers in response to a letter from the 'Copper Development Assn'. The Saratoga News weekly printed an article on local vineyards' efforts to meet Water Quality regulations by preventing erosion and pesticide runoff (a conference on the issue was held at a Saratoga Vineyard).

Public Information/Participation Program Evaluation

Educational Outreach

The West Valley Clean Water Program will continue to build on the success of the existing public education program, with one of the main activities being outreach through schools.

WVCWP piloted 2 new programs for public schools this year: A "Coastal Watershed" Enviroscape (to supplement the "Uplands Watershed") and a Ground Water Pollution Model activity & curriculum.

WVCWP purchased a new and different (Coastal) *Enviroscape* specifically for targeting students. New outreach materials and activities were developed for this model. It was piloted with a middle school class as 1 of 3 stations relating to "Keeping Water Clean" & "Pollutants Travel". Students appeared to enjoy the opportunity to use the 2 different Enviroscapes, and to learn about different issues with each. The teacher expressed appreciation for an excellent program. It is anticipated that this system (3 stations using 1 video and 2 Enviroscapes) will be the standard WVCWP presentation for 5th grade students.

The WVCWP's Enviroscape/ Water Unit presentation in general is well-received and appears to be an effective educational tool. Students participated enthusiastically in these hands-on activities. Students came up with very good pollution solutions and identified their local watershed at the end of the presentations.

From the Youth Science Institute, WVCWP borrowed a Ground Water Flow Model. It was piloted in a 5th grade classroom and a high school science classroom. It appeared to fit best into the high school science class. An activity and curriculum were developed, focusing on pesticide pollution of groundwater. The new 32 page booklet "Soil Matters" served as an excellent supplement to the presentation. Topics from the presentation were included in the year-end final exam.

West Valley Communities

PUBLIC INFORMATION/PARTICIPATION

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party

The high school teacher expressed appreciation for an excellent classroom activity, and requested a presentation for the coming year. YSI requested copies of the curriculum, and will use it with the model when appropriate; they mentioned that they did not currently have a high school level curriculum to use with the model.

Focusing on schools, teachers and students has proven to be a successful means of conveying information about Stormwater Pollution and Pollution Prevention. The calendar created by WVCWP in FY 03-04 continued to provide an attractive & fun method of keeping Stormwater pollution messages in the public eye throughout the year – calendars are hanging in classrooms, teachers' lounges, Senior Citizen Centers, Community Centers and municipal offices; a new message is displayed each month.

Creek Clean-Up/ Trash Monitoring Outreach

In terms of generating student participation in Creek Clean-ups, WVCWP will try 2 new avenues in FY 05-06. Participation at the spring Westmont High Cleanup was low because the information did not get from the school secretary to the person handling the "morning announcements". WVCWP has found 2 ways to inform the students more directly: the PTSA at Westmont High School will be contacted in order to post the information on their web site. The information will also be featured in the school's daily "e-mail bulletin". Contact names have already been obtained for this. In addition, Creek Clean-up flyers will be distributed to other schools in the area. The new music video "With Your Own 2 Hands" will also be a means of generating interest; WVCWP is investigating ways of letting teachers know about the video.

Additional evaluations have been included in several sections of the PI/P Table above.

Outreach on Pollutants of Concern

Additional outreach information is presented in specific Sections, such as the Copper Section, the Mercury Section and the Pesticide Management Section, within this report.

Note: **In order to prevent redundancy, the PI/P table has been created as one table for all four WV Communities;** activities sponsored by an individual community are noted where appropriate. PI/P activities for the WVC tend to be attended by residents from several WV communities, and many of the PI/P tasks are handled by WVCWP for all communities at once. In addition, a number of schools serve residents from more than one community.

			Outreach"	
	PMP Plan (II.A.6.)	Web Site Update and publicize web sites to promote IPM and reduce pesticide use.	WVCWP created 2 direct links from its website "Clean Creeks.org" to IPM Fact Sheets in PDF format on the Program's *Watershed Watch* website. Town of Los Gatos web site gives instructions for proper disposal of insecticides: (http://www.town.los-gatos.ca.us/services/4k.html)	WVCWP Staff
	PMP Plan (II.A.7.)	Coordinate with the Master Gardeners program Use their services to train residents. Provide IPM training and information on water quality impacts of pesticide use to Master Gardeners as needed.	1 local UC Extension staff member attended the WVCWP IPM Workshop in March 2005. Campbell's Master Gardener teacher registered, but had a family emergency so received the training materials at a later date. Master Gardeners conducted 6 gardening classes for local residents, at Campbell Commty Ctr, incorporating IPM, including 1 on Pest Management for over 40 WV residents. WVCWP coordinated with these classes to provide IPM outreach materials to class participants. Approximately **45** students received 10 different materials (= 450 IPM pieces distributed); extra materials were available for class members to share with friends/neighbors.	WVCWP Staff

Stormwater representatives were advised to deliver handout materials and provide additional review to appropriate municipal staff.	Associate Planner WVCWP to assist

Pesticide Management Activities Evaluation

Pest Specific IPM Plans for Armored Scale and Soft Scale were developed in FY 04-05. This is consistent with the WVC strategy of developing 2 Pest Specific Plans per year to help incorporate IPM into municipal pest control procedures. Staff received training in some of these methods at the annual WVCWP IPM Training, and at a LG staff training for those who were unable to attend the WVCWP workshop.

Los Gatos

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party

Los Gatos is implementing IPM in the following situations:

PESTICIDE USAGE REDUCTION MEASURES – Pest Specific

ANTS: In structures—handled through maintaining sanitary conditions. Employees receive regular memo and e-mail reminders of cleanliness policy. Town contracts with an especially thorough custodial service to help keep facilities sanitary. This has decreased instances of ant invasions.

YELLOWJACKETS: Los Gatos uses traps as the main means of control.

Parks staff uses steam cleaning on picnic tables to prevent attracting wasps & ants.

If a wasp nest in a tree requires treatment; the PCO uses a non-residual pesticide, & closes the hole in tree so wasps can't return to nest.

WEEDS:

Los Gatos uses a chipper to create mulch from green waste; this mulch is used for weed control wherever possible.

Los Gatos has arranged to receive free wood chippings from PG&E tree-trimming contractor. Mulch is used to reduce weed growth on roadsides, median islands, parking lot landscaping and in parks. In 04-05 Los Gatos spread over 4,000 cubic yds of chips.

Work Furlough labor hand hoes weeds where possible.

Staff hand-pull weeds where feasible.

Los Gatos contracts with CalTrans to mow large areas

Los Gatos borrows a tractor with boom mower from Campbell, especially useful for mowing roadside weeds, rather than spraying weeds.

RODENTS:

Rats & mice are trapped by contractor (baits used as last resort).

Gophers & moles are flooded from their burrows using a hose.

INVASIVE SPECIES:

Various species along Los Gatos Creek are hand-pulled by Native Plant Society volunteers

Los Gatos

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Scotch Broom is cut down by Parks staff				
SCALE INFESTATION ON TULIP TREES				
Parks staff sprays trees with low concentration detergent & water				

Results of Pesticide Use Review FY 04-05:

Los Gatos was able to eliminate use of any OP pesticides in FY 04-05, 03-04 and 02-03, as compared to using .475 oz of diazinon for ant control in FY 01-02 through use of IPM practices and through seeking out less toxic pesticides.

The Town is making an effort to stress prevention (prevent weed growth, prevent pest infestations) where possible. Los Gatos is moving into use of IPM and engineered, rather than chemical, controls as much as possible given budget and staff limitations.

In Town facilities, sanitation is being stressed as a means to prevent pest infestations (ants, mice, etc.) so that chemical controls will not be needed.

Over the past several years, the Public Works Dept. has instituted improved methods of weed control in some parks and roadsides, such as the arrangement for free wood chips which are used as mulch to prevent weed growth; in FY 04-05 LG began borrowing a tractor with boom mower from Campbell in order to mow roadside & park weeds and to avoid spraying. Volunteers work with the Public Works Dept. to trim back brush along the LG Creek Trail, and to remove invasive species.

FY 2004-2005 ANNUAL REPORT

Section 1.01 MERCURY POLLUTION PREVENTION ACTIVITES

Section 1.02

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
	Mercury Plan (I.D.)	Mercury Policy Implement mercury policy or ordinance requiring the virtual elimination of mercury from controllable sources in urban runoff from agency operations.	Los Gatos adopted a written mercury policy in FY 03-04 and continues to implement the policy. Los Gatos has continued its Battery Recycling Program handled by the Building Maintenance Dept. Collection buckets are available in all departments. The Town collects all dry cell and wet cell batteries.	WVCWP to assist Eng Div.
	Mercury Plan (I.F.)	Guidelines Continue implementing the Guidelines for Mercury-Containing Products Reduction and Management. The quantities of mercury containing devices disposed of will be reported in the FY 04-05 Annual Report.	Guidelines are being implemented; extensive reduction of mercury-containing products is limited by a lack of alternatives. Research on alternatives to mercury-containing products has been conducted and implemented when possible, but few alternatives have been found.	WVCWP to assist Eng Div.
	Mercury Plan (II.D.)	Reporting HHW Disposal Continue documenting and reporting quantities of mercury-containing products disposed of by Town buildings and departments at hazardous waste collection facilities in FY 04-05.	Although tracking quantities of mercury products disposed of by the Town over the past year is not required by the Permit, the Town did initiate attempts to track quantities. However, it was found that it was too costly in terms of staff time, especially with current staffing cutbacks. 100% of all mercury-containing items are removed via a private HHW contractor. Bins for recycling used batteries are distributed throughout Town departments so that batteries don't end up in the regular trash.	SCVURRPP (guidance), WVCWP to assist Eng Div.
	Mercury Plan (V.A.)	Fluorescent Light Recycling Program Implement an outreach program to	The Town of Los Gatos conducted extensive outreach for the Oct. 2004 WV HHW free drop-off event. Over 100 flyers were printed and distributed to residents and	SCVURRPP (guidance), WVCWP to co-ord w/ HHW staff

		educate small businesses and conditionally exempt small quantity generators about recycling fluorescent lights. Coordinate educational outreach with fluorescent light recycling events sponsored by HHW.	employees by placing flyers throughout the Town offices. The flier was displayed in the: ▪ Police Dept, ▪ Town Library, ▪ Town Clerk's office, ▪ Community Development office, ▪ Engineering Counter ▪ Parks & Public Works Admin. building, ▪ PPW lunchroom **100 Fliers** were placed at these locations for distribution, (except for the PPW lunchroom) The HHW Flier was also posted on the Town web-site. A WVCWP-created display was placed at the Los Gatos Library. The display included: ▪ a small, color poster ▪ flyer advertising the WV HHW Drop-off in Saratoga ▪ HHW brochures ▪ "Keep Your Family Safe from Mercury" flyers 15 each of 2 new Mercury flyers were distributed at the LG Beautiful Celebration. Flyers for the Apple Computer's free April Earth Day Electronic Waste Recycling event were also distributed. See PI/P "Materials Distribution" Section. "Claire Water" cartoon strip on recycling Fluorescent Lights and items with Mercury was printed in "Los Gatos Vista" newsletter. Articles on Proper disposal of Electronic Waste and a Thermometer Exchange also appeared in the	

			Vista. Small Business Outreach was investigated by contacting the LG Chamber of Commerce. WVCWP was told that the on-line Chamber newsletter can be used to distribute a short informational mercury disposal article to businesses in the future. Advertising on proper Mercury disposal was handled through placement of a “Mercury” ad. Space was purchased in the 3 weekly newspapers serving the West Valley. The Mercury ad ran 2 times in each of the 3 newspapers. When the ad was printed out as a flyer and distributed at Los Gatos Beautiful booth, it was very well-received – residents appeared to find the graphic appealing, and the information to be useful. See Mercury Attachment A. A Press Release/Article on mercury toxicity, fluorescent light disposal, and the upcoming HHW WV Drop-off event, was submitted to the SJ Mercury News and the 3 WV weekly newspapers. Several papers shortened the article and ran it (October 2004). WVCWP’s website was revised to include a Mercury link on the home page. The link connects to a new Mercury web page which includes information on free local fluorescent light disposal, free cell phone recycling and mercury and runoff pollution. See Mercury Attachment B. See PI/P Section for additional outreach related to Mercury	

LOS GATOS

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Mercury Pollution Prevention Activities Evaluation

All WVC have participated in several trainings/round table discussions about mercury policies and mercury product disposal in WVCWP meetings. All WVC have procedures in place to ensure safe disposal of mercury-containing products. When municipal staff purchase or replace mercury-containing products, they select products that contain less mercury.

The WVC have also conducted extensive outreach on Mercury issues in FY-4-05. Outreach was conducted through web sites, distribution of a variety of information at various sites, classroom presentations, municipal newsletter articles, and newspaper advertising.

Outreach has included posting a small mercury poster on the WVCWP website home page, linked to a page devoted to mercury issues, including assorted recycling information. The Town of Los Gatos web site featured an informational flyer on Electronic Waste and encouraged recycling at the Apple Computer Drop-off event April 23rd.

WVCWP has also incorporated discussion of mercury and fluorescent light bulbs into the 5th grade classroom interactive presentations; the topic seems to generate strong interest from teachers and the students – reference to fluorescent lights usually causes students to look up at their overhead lights, and they make an immediate connection about behavior changes that can be included in their lives.

Additional outreach information is listed in the PI/P Section of this report.

Would you eat it?

MER-CU-RY

A **poisonous** heavy silver-white metallic chemical obtained from the mineral cinnabar, used in:

- **Fluorescent light bulbs**

FY 2004-2005 ANNUAL REPORT

COPPER ACTION PLAN/NICKEL ACTION PLAN

FY 2004-2005 Work Plan Self Evaluation Matrix

Activity	Source	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Vehicle Washing Operations	CB-1	Continue to distribute outreach materials on proper vehicle/equipment washing at Municipal counters/Post Offices/Libraries and public events, and post on WVCWP website.	WVCWP created a *Car Wash Kit flyer* to inform residents of the need to use the Kit for Car Wash fund-raisers. The flyer is posted at the City offices; it will be distributed to schools in FY05-06. The flyer incorporates information on the Municipal Code for Stormwater, and information on copper's affect on aquatic life. (see Copper Attachment A) A brochure on proper vehicle washing was distributed at car wash fundraisers by the Stormwater Discharge Inspector, in conjunction with instructing on use of the Car Wash Kit.	WVWCP staff
Vehicle Washing Operations	CB-1	Partner with Nova High School teacher & students to make presentations to Campbell, Los Gatos and Saratoga High School classes, topics will include car washing and proper draining of Pools & Spas.	This year, car washing, pool draining and copper issues were incorporated into WVCWP's Enviroscape presentations given to 5th graders at Foothill Elementary School and Rolling Hills Middle School. Appx. 150 students learned about sources of copper, copper's affect on aquatic life, draining pools to sanitary sewer outlets (photos of an outlet were shown) and proper car washing.	WVWCP staff
Vehicle Washing Operations	CB-1	Provide car wash kit & education to charity car wash organizers. Provide educational brochures/materials where applicable. Track and document occasions for use in Annual Report.	The WVCWP Inspector set up the Car Wash Kit at 4 Car Wash Fundraisers in the WVC in FY 04-05. He provided instruction on how to use it and explained the need to keep car wash water out of storm drains. <u>July 28, 2004 Muscular Dystrophy Adult Support Group fundraiser Car Wash</u> held at Ace Hardware in Los Gatos (bordering Campbell). FY 2004-2005 ANNUAL REPORT

Activity	Source	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
			Oct. 30, 2004 Student Exchange Program & Italian Club of LG High School fundraiser Car Wash held at Van Meter School, LG Blvd. 20 students participated; appx. 95 vehicles were washed. April 2005 – LG Union School Dist. Education Foundation - fundraiser Car Wash held at Van Meter Elem. School, LG. April 2005 – Girl Scout Troop 630 Los Gatos - fundraiser Car Wash held at Union 76 gas station at Blossom Hill Rd., LG. 50 copies each of "Cars Pollute Too" and "Washing Cars" were distributed during car wash events.	
Vehicle Washing Operations	CB-1	Submit data regarding vehicle washing outreach activities. Provide an effectiveness evaluation in Annual Reports.	The Stormwater Discharge Inspector distributes several vehicle washing pieces during pro-active inspections and in relation to any actual or suspected IC/ID incident. This means of outreach is very effective and the Inspector is able to answer questions and offer suggestions. See "Inspect Auto Businesses" below. WVCWP staff created a *Car Wash Kit* outreach flyer, including reference to each WVC's Municipal Code for Stormwater and information on copper's toxicity to aquatic life. The flyer is available at the respective municipal offices. 50 copies each of "Cars Pollute Too" and "Washing Cars" were distributed during car wash events. See "Evaluation" below.	WVWCP staff
Vehicle Washing Operations	CB-1	Require source control measures for Group 1 new development and redevelopment projects that will conduct vehicle/equipment washing and maintenance activities (consistent with	The WVC did not have any new Group 1 projects that would conduct vehicle/equipment washing and maintenance activities during FY 04-05.	WVCWP staff w/ Municipal Staff

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Activity	Source	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
		Permit Provision C.3.k).		
Vehicle Washing	CB-1	Inspect auto businesses regarding car wash requirements, and prohibited storm drain discharge.	The WVCWP Inspector conducted 18 pro-active auto repair and vehicle facility shop inspections in Los Gatos (Monte Sereno and Saratoga have no auto service businesses). He distributed his fact sheet, providing information on wastewater capture systems to automotive facilities. The fact sheet was designed to provide small-scale automotive facilities (those that find installing a full-fledged wash rack cost prohibitive) with examples of inexpensive treatment technologies and distributor information. Problems at shops in previous years generally appear to have been corrected, due to Inspector's outreach efforts.	WVWCP ICID Inspector
Vehicle Washing Operations	CB-1	Maintain and inspect car wash systems for City vehicles at the corporation yard	Staff continue to follow the suggested practices and to ensure that the Corp Yard systems function correctly. Monte Sereno does not have a Corp Yard or City vehicles.	WVWCP ICID Inspector / Pub Works Supt
Vehicle Washing Operations	CB-1	Encourage municipal staff to attend SCVURPPP's "Mobile Cleaning Workshop".	Saratoga staff attended a BMP training at the Maintenance Supervisors Assn. meeting; Los Gatos staff received BMP training through WVCWP and a consultant in FY 04-05 (see Training Summary – Public Agency Activities). Monte Sereno does not have a Corp Yard or City vehicles.	WVWCP ICID Inspector / Pub Works Supt/ Bldg Maint Supvr
Industrial Copper Control	CB-3	Continue Industrial Inspection program, including NOI sites and other industrial sites such as plating and metal finishing facilities, vehicle service facilities, and other sites.	The WVC have an agreement with the SCC Fire District to conduct urban runoff inspections for machine shops and metal manufacturing facilities. 4 of these types of facilities are in Los Gatos and were inspected this year; there were no violations. ▪ 1 out of 1 Machine Shop ▪ 2 out of 2 Misc. Mfg	SCVC Fire Dept./ WV ICID Inspector

			1 out of 1 Welding/Iron Monte Sereno and Saratoga have no industry which fall into these categories. See CB-1 "Inspect auto businesses" above for vehicle service facilities. See IND Section	
Reducing Traffic Congest'n Promoting Alternative Transport-ation	CB-6/7	Complete revision of and implement revised development site design standards related to transportation per Permit Provision C.3.j Encourage and promote better transportation-related design practices and alternative modes of transportation.	The WVC endorse and support Santa Clara Valley Transportation Authority's *Best Practice Principles* for integrating public transportation and land use[1]. Principles promote: designing for pedestrians i.e. public connection to paths and sidewalks and tree covered sidewalks which provide comfortable pedestrian spaces. Providing a diverse mix of land use and focusing growth around transit stops reduces the need for residents to drive.	WVCWP w/ Municipal Staff
Water-shed assessm't and protection	CB-8	Revise City's General Plan, as needed, at next scheduled update, based on recommendations from the *Development Policies Comparison Project* and Provision C.3.l.	Where practicable, recommendations from the *Development Policies Comparison Project* will be considered in the WVC's next General Plan revisions. Town of Los Gatos' next revision is scheduled for 2010. Monte Sereno is currently working on a General Plan revision. Saratoga is starting work on a General Plan revision.	Community Dev. Dir.
Water-shed assessm't and protection	CB-8	Continue to implement guidance from SCVURPPP on addressing water quality in the CEQA review process, as part of C.3.m. implementation.	The WVC have adopted the CEQA review guidance from SCVURPPP, as documented in the June 2004, *C.3 Stormwater Handbook*, to address water quality as part of the C.3.m implementation.	Municipal Staff

West Valley Communities
Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Activity	Source	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Water-shed assessm't and protection	CB-8	Participate in the Water Resources Protection Collaborative and implement any agreed upon guidelines and standards for watershed protection.	The WVC have staff attending the Collaborative on a regular basis (with the exception of Monte Sereno which has part-time staff in the City Engineering Dept.). All WVC provide data as requested by the Collaborative and are working to implement any guidelines which may be established.	Municipal Staff
Street sweeping & stormdrain O&M	CB-11	Continue following Program guidance regarding the collection and reporting of street sweeping data. Provide data in accordance with schedule for Annual Report.	WVC staff and contractors have worked closely with WVCWP to collect all necessary street sweeping data. Street Sweeping data was collected and was provided to the SCVURPPP at the end of FY 04-05 for all street sweeping activities. The Town of Los Gatos is currently placing a different employee in the street sweeping staff position; the City of Saratoga is working on the bidding process for a new contractor: all new staff will be trained on gathering the required data.	WVCWP staff w/ Municipal Staff
Street sweeping & stormdrain O&M	CB-11	Implement (as appropriate) identified improvements to current street sweeping and storm drain system O&M programs (within available budgets). Provide effectiveness evaluation in FY 04-05 Annual Report.	The street sweeping program is effective in that efficient, predictable routes are maintained, and sweeping days do not conflict with trash pickup days. Street sweeping information/schedules are available on WVC websites. Los Gatos is improving its street sweeping program with the purchase of new street sweeping equipment. A variety of street sweepers were tested in order to determine which could best handle the Town's requirements. Monte Sereno's street sweeping is handled by Los Gatos. Saratoga is undertaking a bidding process for a new street sweeping contractor and envisions a need to increase the budget in order to maintain the current level of service. Annual evaluation of maintenance for the WVC's storm drain system is conducted at the annual storm drain operations and maintenance supervisor's (superintendent's) meeting.	WVCWP staff w/ Municipal Staff

			See Public Agency Activities – "Street Sweeping and Storm Drain O&M" Sections.	
Outreach on pool, spa maint'nce	CB-12	Continue to distribute outreach materials at local public events; brochures at agency department counters and public places; and placement on WVCWP website.	All municipal offices have the new Pool Draining brochure available for residents. Street maintenance staff in Los Gatos and Saratoga carry the Pool Draining brochure for distribution as needed. WVCWP is currently designing a "Copper" page for the web site which will include the Car Wash Kit flyer and the Pool brochure. The Town of Los Gatos' web site "Public Works page" includes 2 paragraphs of information on proper pool draining.	WVCWP staff w/ Municipal Staff
Outreach on pool, spa maint'nce	CB-12	Continue to distribute outreach materials and brochures as part of ICID WVC inspections.	See CB-1 "Submit data regarding vehicle washing outreach activities" above.	WV Inspector
Use of architect-ural copper	CB-21	Encourage limiting use of copper on roofs, in roof shingles, and for gutters.	WVCs discourage the use of architectural copper. The Town of Los Gatos requested, and received, a briefing paper from WVCWP on for Town Planning reference. The paper covered the history of copper issues in the South Bay, and current standards and recommendations. The Planning Commission refers to this when dealing with building project applicants. Monte Sereno: City staff discourages the use of architectural copper in the planning and design stages. If an applicant desires architectural copper, Planning & Engineering staff point out the water quality issues and suggest use of alternatives. The City of Saratoga does not allow the use of	Municipal staff

Copper/Nickel Action Plan Evaluation

Car Wash Outreach Evaluation:

The Car Wash Kit for car wash fundraising events has been a success; it was used at 4 events in FY 04-05 year and is estimated to have prevented runoff from several hundred cars. The WVCWP's newly-created Car Wash Kit flyer will be distributed through more avenues in FY 05-06, in an effort reach potential users and to reduce car wash event discharges.

The Car Wash Kit flyer was posted at municipal offices in spring 2005, but WVCWP has not yet received calls from any groups resulting from the flyer. All calls so far have been triggered by car wash information on the Town of Los Gatos Public Works web page. In Summer and Fall of FY 05-06, the flyer will be distributed to schools in WVC, in hopes of increasing public awareness of the Car Wash Kit. The flyer will also be posted on the WVCWP website.

Since car washes are sometimes held at gas stations and churches, some form of efficient outreach to these locations is also being discussed. The best approach might be to contact youth sports teams and scout groups, who may hold car washes but perhaps aren't affiliated with a school. In FY 04-05, WVCWP began assembling a *Scouts and Sports Team Contacts* list; in FY05-06, additional contacts will be added and staff will investigate means of distributing the flyer to the appropriate contact people.

Copper Outreach Evaluation:

The WVCWP will continue to provide outreach on car washing, vehicle maintenance, alternative transportation, and pool maintenance during in-class presentations and partnerships with teachers and students in local schools. WVCWP incorporated messages about activities that can prevent copper runoff as part of the 5th grade Enviroscape curriculum.

The WVCs continued their street sweeping programs and were able to collect accurate data for submittal for FY 04-05.

The WVCWP Inspector's Vehicle Shop Inspection Program continues to be a strong addition to efforts to reduce copper runoff from car washing. See IND

West Valley Communities
Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Activity	Source	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Section. www.cleancreeks.org , offers a *Take Action* page which encourages people to: •Take cars to a commercial car wash (where the dirty water will flow to a Treatment Plant), or wash it on a non-paved surface. •Drain pools and spas into a sanitary sewer outlet, NEVER into a street •Drive less! Walk, ride a bike or a bus, or carpool. WVCWP is working on design of a "Copper" page for its website, featuring outreach pieces on residential car washing, use of the Car Wash Kit, and pool draining. The Town of Los Gatos web site features excellent outreach material on car washing and pool draining, along with general information on avoiding stormwater runoff pollution. The site's link to the WVCWP site and the WV Stormwater Inspector's e-mail allows LG residents to easily contact WVCWP concerning car wash fundraiser events. This has triggered implementation of the Car Wash Kit at 4 car washes in FY 04-05; use of the kit avoided runoff pollution from several hundred cars and allowed for education of numerous residents during the car wash activities.

Protect Our Creeks during your next

Car Wash
Fundraising Event

Anyone organizing a **Car Wash Event**
in *Campbell, Los Gatos, Monte Sereno or Saratoga*
is directed to borrow the **Free Car Wash Kit** from
West Valley Clean Water Program *(WVCWP)*

The *State Water Board* requires municipalities to prevent Car Wash Event runoff from flowing into Storm Drains.

Town Code Section 22.30.015(a) & (b)

All Car Wash Events should use the ***Car Wash Kit***, which keeps runoff out of Storm Drains.

To schedule pick-up & training on use of the Car Wash Kit,
e-mail WVCWP at: inspector@cleancreeks.org or phone 408-354-5385

- Copper is toxic to aquatic life - and it washes off of brake pads
- Oil, coolant & other pollutants are also carried in car wash runoff
- The Car Wash Kit drains runoff into the Sanitary Sewer lines, rather than into the Storm Drains (which flow untreated into our creeks)

TRASH INVENTORY & MANAGEMENT

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Trash Work Plan	Strategy and Goals	Use Program guidance to develop a strategy to conduct trash evaluations in watersheds.	The WVCWP Manager and Inspector participated in the Program's Trash Ad Hoc Group and developed goals for the West Valley Communities, which the WVCs approved in FY 03-04. These goals include: • Prioritizing inspections for trash dumpster areas at local restaurants. See IND – Restaurant Inspection Program of each municipality's annual report. • Educate local businesses about the need for dumpster cleanliness and encourage BMPs • Evaluate trash condition of urban creeks through drive-by monitoring and when feasible, rapid trash assessments. • Educate local teachers, students and principals by featuring trash problems and solutions in our interactive school presentations. • Evaluating the progress made on goals in each Ann Rpt	WVCWP to coordinate, WV Stormwater Reps to provide municipal input and feedback
Trash Work Plan	Evaluations	Conduct trash evaluations in a subset of trash problem areas.	The WVCWP staff conducted the following KAB litter index assessments for the identified problem spots for each WV community during FY04-05. See attached reports for detail. For: • Campbell's thirteen (13) identified problem areas, 23 assessments were conducted. • Los Gatos' eight (8) identified problem areas, 12 assessments were conducted. • Monte Sereno's one (1) identified problem areas, 3 assessments were conducted. • Saratoga's four (4) identified problem areas, 6	WVCWP to sponsor events Municipality to identify problem areas

			assessments were conducted. The WVCWP also sponsored three (3) trash cleanup events, where citizen volunteers performed monitoring which is very similar to the Water Board's RTA method.	
Trash Work Plan	Identify Control Measures & Begin Implementation	Identify and begin implementation of trash control measures, as appropriate, to address trash problem areas within high priority areas	The West Valley Cities have successfully implemented all of the strategic trash goals listed in item 1 above.	Municipal Storm Reps to determine Strategic Goals and WVCWP to assist with implementation
Trash Work Plan	Report on Trash Mgmt Practices Implemented	Provide Program staff with information on trash management practices implemented, using standardized reporting format.	Program staff was provided with all trash assessment information for FY 04-05 except for the data that was collected as part of the WVCWP citizen participation program, *Creek Keepers*, mentioned below.	WVCWP Staff
FY01-02 Work Plan	Monitoring/Citizen Participation	Continue to promote citizen participation program to monitor trash in local creeks (element of *Creek Keeper's* Program).	Three public participation events were held in FY04-05 for trash cleanup and monitoring near local creeks. All three event sites were near schools so that WVCWP staff efforts would accomplish three things. 1) Trash monitoring 2) Creek area cleanup and 3) teaching students about a citizen's responsibility to keep trash out of our watersheds. The method used by volunteers at these events resembles the RTA method closely enough that it is possible to take individual trash assessment forms from the participants and put the data almost directly into the RTA forms. Lack of staff time prevented WVCWP from transferring all the data for FY04-05. However data was transferred to the RTA format for the site on Wildcat Creek. See the Program's Trash Activities report. Also see attached data sheets, and the press release for the Wildcat Creek event, and the front-page story from the Saratoga Community Newspaper (Silicon Valley Community Newspaper Group) 4-27-05.	WVCWP Staff

FY04-05 Work Plan, RWQCB comments	Training	Conduct PI/P training meetings on implementation of volunteer creek and school site clean ups. Evaluate effectiveness of volunteer trash monitoring and success of clean-up events	On July 16, 2004, the WVCWP Manager and the half-time Public Outreach Assistant attended the following workshop: Regional Board Trash Rapid Assessment Training Presenters: Water Board Staff for the session on the Rapid Trash Assessment method; (RTA); and SCVURPP Program Staff for the session on the Keep America Beautiful (KAB) method of assessment	WVCWP Staff

Trash Inventory & Management Evaluation

The West Valley Communities have made good progress on each of their strategic goals for trash reduction.

Prioritizing Dumpster Area Inspections & Educating local businesses

The WVCWP Inspector patrols the downtown areas of each community to look for signs of illegal dumping or debris from dumpsters (especially those with open lids) and providing educational chats as needed. Monte Sereno is the exception; being strictly residential, the City does not have many dumpsters. See the IND and ICID section of this report for details.

Evaluate the Trash Condition of Urban Creeks by conducting Drive-by Monitoring of Identified Problem Areas

WVCWP staff conducted *Keep America Beautiful Litter Index* method assessments at all identified problem areas in the West Valley Communities, for a total of 44 assessments. Some new potential problem areas were identified and other, like the *Los Gatos Creek Trail,* which is cleaned up monthly by a local group of University Women, will not remain on the list. Although it is very heavily traveled it is also constantly monitored by residents. WVCWP staff finds that once the patrolling or monitoring has become routine (especially using the simple KAB method) the task is relatively easy to accomplish. WVCWP staff is becoming more familiar with the local watersheds, which makes it easier to identify areas which present potential problems.

Conduct Educational Outreach to Students and Teachers in Local Schools

WVCWP staff will respond to every opportunity to partner with schools and teachers on educating the students. The WVCWP has been particularly successful, in FY 04-05 and F Y03-04 in recruiting student volunteers for creek cleanups and the task of creek monitoring. The WVCWP's own method of trash assessing is very similar to the RTA method except that it is simplified for young students and for the needs the West Valley area. Refer to the combined results of the trash monitoring at three volunteer events, attached. WVCWP events during FY 04-05 all took place in the San Tomas Aquino Watershed. This is partly because choosing a site and recruiting volunteers is time intensive, and it becomes easier as the site is established and volunteers are more familiar with the site and the routine procedures for the event. Sacred Heart School next to Wildcat Creek contacted WVCWP this year to see if staff would sponsor another creek cleanup event. In FY05-06 WVCWP staff will investigate other areas in the West Valley to try to establish an on-gong site in the Guadalupe Watershed (the other West Valley Watershed).

Saratoga Gardening Guerillas

A group of Saratoga Volunteers have been cleaning the streets and sidewalks of the City (sometimes on hands and knees) for the last year. See article attached.

Volunteers met with a hurdle when the Saratoga decided that the City would be liable for the safety of the citizens while they were working. This demonstrates the enthusiasm of the volunteers in West Valley Communities and the set backs that the WVCWP sometimes encounters in encouraging and accepting citizen volunteer services. See attached article (*Gardening Guerillas)* from the Silicon Valley Community Newspaper, *Saratoga News.* Having to walk this fine line is a part of any idea which involves citizens working on municipal property e.g., students applying storm drain stencils or participants in a creek cleanup (especially if volunteers intend to enter the creek to facilitate the cleanup) or even a participation in a holiday parade (public outreach). The WVCWP tries to take advantage of every public participation opportunity without leaving the Municipality vulnerable to potential liability issues.

Los Gatos

Guadalupe River							
ID #	**Date**	**Location of Trash Problem Areas**	**Assessment Tool**	**Score**	**Trash Sources**	**Evaluation Results**	**Comments**
LG01	6/14/2005	Los Gatos creek trail; along the whole creek in Los Gatos	KAB	1	Litter (homeless)	A group of university women volunteers cleans the creek trail monthly. Efforts are very noticeable.	Trail and creek very pristine
LG02	11/23/2004	Hicks road between Camden Ave & Shannon Rd	KAB	2	Illegal dumping-not in waterway	This site was listed because of a dumping incident in December 2003. Thirty motorcycle tires were dumped. Town collected and recycled tires. Will continue to monitor.	Lots of paper and plastic found along the roadside. It appears to be dumping or motorist trash.
LG02	3/23/2005	Hicks road between Camden Ave & Shannon Rd	KAB	1	Illegal dumping-not in waterway	Site was found litter free. It may have been just picked up. Will continue to monitor.	No trash found.
LG02	6/14/2005	Hicks road between Camden Ave & Shannon Rd	KAB	3.5	Illegal dumping-not in waterway	Found an abundant amount of litter. Will continue to monitor and collect information from Town staff.	Location is about 30 miles from Guadalupe dump – so it is a problem area. Very dirty along roadside. Litter debris (e.g., cups and food wrappers) were found.
LG03	6/14/2005	Kennedy road from Los Gatos Blvd to Shannon Rd	KAB	2.5	Litter (motorists)	Town picks up twice per month.	Litter along the roadside found. Litter includes beverage containers and food wrappers.
LG04	6/14/2005	Shannon Road from Los Gatos Blvd to Hicks Road	KAB	3.5	Trash accumulation (windborne, motorist)	Town picks up twice per month.	Roadside is littered with motorist trash. Very windy narrow road.
LG05	6/14/2005	Blossom Hill road from Short Rd to Harwood	KAB	3	Trash accumulation (windborne, motorist)	Town picks up twice per month.	Motorist trash observed along the roadside. Trash includes beverage containers, plastic bags and food wrappers.
LG06	6/14/2005	Town of Los Gatos parking lots (9); on Main St. near Monte-Bello and Park Ave	KAB	1	Litter (Homeless, motorist dumping etc)	Town picks up trash 1 – 2 times per week.	Parking lots were very clean. It appears that it may have been just cleaned.

Estimate Length of creek section in miles, i.e. 1/10 mile, 1/8 mile: ¾ Mile

Number of bags of trash collected: 38

Weight of recyclable trash: 100

Weight of non-recyclable trash: 400

Fifty (50) Volunteer Participants

1. Describe the stretch of creek monitored using descriptors of boundaries such as landmarks or cross streets. San Tomas Aquino Creek near 4805 Westmont Ave. to McCoy (near San Tomas Aquino Rd) San Jose w/ Campbell address; Cleanup covered some of the school fields.
2. What types of trash were most commonly found? Paper, broken glass, plastic food waste,
3. List the most unusual items found. 30 ft. long metal pole and lawn chair, volleyball, golf ball, *Frisbee*, homework, sweater, milk jug, wire, rags, chair
4. Rate from one to five how dirty or clean the creek was, with one being pristine clean.

West Valley Press Release April 19, 2005 – Trash

From: Cheri Donnelly [mailto:cheri.westvalley@comcast.net]
Sent: Tuesday, April 19, 2005 1:38 PM
To:'ltoth@svcn.com'
Subject: Sacred Heart Students Clean a Creek April 20th

Hi Lisa,

Sacred Heart School children and a few parent volunteers will be cleaning Wildcat Creek, behind their school grounds on Wednesday afternoon (April 20) from 1 to 2:30 pm. They have a **permit from the SCV Water District** to open the normally locked gate and pick up debris that came to the creek from the school lunch/ field area, the streets, or from other yards.

We are beginning to see the spring weather and notice that trash has settled in the creeks. We first approached Sacred Heart's Principal two years ago to see if she would allow the West Valley Clean Water Program staff to enter the creek area behind the school and pick up the trash that volunteers couldn't get to on National River (Creek) Clean up Day.

The Principal not only invited us onto the property but allowed us to hold a watershed assembly at the school to encourage the students to volunteer for the cleanup event. We were surprised when 80 students and parents turned out for the creek protection event. The principal confided to us that in preparation for Clean Water staff's visit to their school, the students combed the school grounds for trash a few days prior to the creek cleanup event.

School grounds and their surrounding areas are well known among creek and Bay environmentalists as a major source of beverage-container and food-wrapper trash. All of which ends up in our local creeks, streams and finally the Bay. We might look around the West Valley and say we don't have a trash problem but all our upstream food and beverage debris is carried by heavy rains to an unmanageable buildup of trash that is choking creeks in downstream areas.

This year the school called us to request that we help them sponsor another cleanup event. We are delighted to provide the gloves and trash bags and guidelines to keep this a safe event. The SCV Water District staff came out and cleared a path to prevent the students from coming into contact with poison oak. After the event the Water District will haul away the bags of collected trash.

We have cute photos of the previous event if you are interested. The student volunteers are from grades K-8. About 45 students have signed up thus far. I wish every school would celebrate Earth Day this way.

Best Regards,

Cheri Donnelly, Program Manager

Education

Sacred Heart School seventh-graders Lynn Vo (left) and Lucija Stimach participate in a Wildcat Creek cleanup day on April 20 behind the school grounds.

Students doing something about litter

By Lisa Toth

Students at Sacred Heart School may be litterbugs, but they're doing something about it.

More than 65 students in grades four to eight volunteered to clean up Wildcat Creek, which runs behind the Saratoga school's grounds. They were permitted by the Santa Clara Valley Water District to open a normally locked gate to gain access to the creek and they worked for more than two hours on April 20.

The zealous students, parent volunteers and representatives from the sponsoring organization, West Valley Clean Water Program, picked up debris that had been blown into the creek from the school lunch area, streets and school yard. The garbage had been carried into the creek by winter rain storms.

"It's gross," said seventh-grader Elizabeth Carte, picking up trash near the fence line of

the school property. "This shows you how the trash grows. One little piece from everyone becomes a big amount."

Armed with clipboards and pencils, students tracked each piece of trash they picked up, such as random bolts and screws or more common potato chip bags, candy wrappers and beverage containers.

The creek monitoring trash activity will help water program officials determine where the majority of the trash comes from and what behaviors are contributing to the trash. The students were also given gloves, bags for recyclable items and long-handled grippers to pick up hard-to-reach rubbish.

Parent volunteer Georgia Ellenikiotis, the school's Christian service commissioner, said the students received two community service hours for the activity. Each grade level is required to complete a different amount of community service, which includes activities such as playing bingo with senior citizens, assisting at homeless shelters or organizing food drives. Even though the creek cleanup was optional, Ellenikiotis said she was pleased the event had a high turnout. This was the school's third year participating in the creek cleanup event.

"It's fun to be cleaning up with all your friends," said Marianne Gera, a seventh-grader who also serves as the safety and ecology commission officer for the school. "It's helping the environment instead of trashing it."

Before beginning the trash cleaning expedition, students were instructed by Cheri Donnelly, West Valley Clean Water Program's manager, about safety rules, how to avoid poison oak and how to not disrupt the creek's natural habitat. She also showed students photographs of concentrated levels of garbage that can accumulate farther downstream if not prevented or remedied through volunteer cleanup efforts.

Wildcat Creek flows into the San Tomas Aquino Creek and then into Moffet Channel. From there, the water travels through Guadalupe Slough before entering the lower San Francisco Bay, according to Donnelly.

"It's an eye opener for these kids to realize what comes from their own backyard--plastic straws, food wrappers, chip bags, snack bags, bottle caps, water bottles," Ellenikiotis said.

Before the students were allowed to go through the locked gate and head down the steel embankment to access the creek, they had to comb the grounds and collect all the trash that had piled up along the fence line. Kathy Ottenberg, an assistant with the water program, said she hoped the students would take away a sense of responsibility and awareness about not littering in Saratoga.

"We're all partners of the larger community, and our actions and caring about the creek do make a difference," she said. "The creek is part of their campus, but they probably

don't notice it on a daily basis."

Marianne pointed out that much of the trash on the school campus and in the creek was the result of carelessness. She added that the school has implemented a recycling program in the classrooms, and classes are also required to periodically clean up the school yard. Sacred Heart students have been studying topics in their science classes like erosion, pollution and how animals can be affected by trash. In addition, the creek cleanup day also tied into national river cleanup day coming up on May 21 and fell close to Earth Day on April 22.

Donnelly also stressed the importance of the creek cleanup as a savings for taxpayers. In the Los Angeles area, a severe trash problem has resulted in the need for costly filters and trash inserts in storm drain pipes to catch the trash before it can run downstream, she said.

While Santa Clara County isn't listed as having an impaired trash problem and isn't being required to use such filters, representatives like Donnelly are preparing for the possibility of it occurring. The county must adhere to Clean Water Act standards.

"School grounds and their surrounding areas are well-known among creek and Bay environmentalists as a major source of beverage container and food wrapper trash, which ends up in our local creeks, streams and finally the Bay," Donnelly said. "We might look around the West Valley and say we don't have a trash problem, but all of our upstream food and beverage debris is carried by heavy rains to an unmanageable buildup of trash that is choking creeks in downstream areas."

Donnelly added she wished everyone would celebrate Earth Day like Sacred Heart students--by not being litterbugs.

Gardening Guerillas do their work in jungles of downtown Saratoga

By Kaustuv Basu

They call themselves the Gardening Guerillas. And it's the mission of these guerillas to clean the sidewalks of downtown Saratoga, get rid of weeds, plant flowers and make the area more attractive to visitors.

Leading the group is Jill Hunter, planning commissioner and president of the Saratoga Business Development Council, recently renamed the Saratoga Village Development Council.

Hunter and her team meet at a downtown coffee shop once a week.

On the rain-drenched morning of March 29, only a handful of people showed up at the International Coffee Exchange for the weekly meeting.

"This is only the beginning. The rain has kept people away," said Hunter.

She hopes that as news about the group spreads, more and more people will sign up.

"Some people have told me that they do not like our name. We might call ourselves the Saratoga Gardeners," Hunter said.

Armed with some improvised garden shears, Hunter and Dr. John Marian of Big Basin Chiropractic walked around, talking to business owners and pulling overgrown weeds and plants from flowerbeds near the sidewalk. They were

joined by Dorothy, Marian's mother.

In a few weeks, the guerillas will be wearing matching aprons as they walk about downtown Saratoga. Other plans include decorating some of the Village alleyways with arches. "We might buy some overhanging flower-pots," Hunter said.

Hunter has ambitious plans for the Village. "It's easy to criticize the city or knock the Village. My first priority is to have no negativity," she said.

Barely an hour before the meeting at the International Coffee Exchange, Hunter had presided over the meeting of the Saratoga Business Development Council, at which the group decided to rename itself the Saratoga Village Development Council and concentrate on business development in downtown Saratoga.

At the meeting, Hunter said that the group would soon request the city to put up a sign near Highway 85 that indicated a historic downtown with shops and restaurants in the vicinity.

Bill Cooper of the Bella Saratoga restaurant said that he hopes to have some of the faded American flags removed from the Village and replace them with spring flags.

"I know that the city has spring flags available," he said.

Cooper is working with other Village merchants so that they can ask the city to fund the Village shuttle program again. The program started last year and took concert-goers from the Village to Montalvo for free for those dining at a city restaurant or staying at a Village hotel.

For more information on the Gardening Guerillas, call Jill Hunter at 408.741.1213.

Gardeners cleaning up Village, but city council has concerns

By Kaustuv Basu

The Saratoga Gardeners, a group of volunteers who have been gathering in the Village every week to clean sidewalks and plant flowers, have run into a hurdle.

At its meeting on April 20, the Saratoga City Council asked Jill Hunter to register her group of volunteers with the city or ask the Saratoga Chamber of Commerce for help.

Hunter is the chairwoman of the Saratoga Village Development Council and also serves on the city's planning commission.

"We're asking them to do this because of liability issues," said Mayor Kathleen King.

King also said since the Village sidewalks are owned by Caltrans, they might also decide to ask for some liability insurance.

"We love what you are doing in the Village. But SVDC is like an unincorporated club. It is a legal non-entity. And all of you are working on public property," said Vice Mayor Norman Kline.

Kline said it would not be advisable for the Saratoga Gardeners to hang flower pots from poles or work on alleyways until some kind of liability insurance was guaranteed.

Councilwoman Ann Waltonsmith suggested that the Saratoga Gardeners try to find common cause with the Chamber. "It might be too cumbersome to work with the city," she said.

After the meeting, Hunter said that she will try to work out an amicable solution that will please everyone.

"We are getting some momentum," she said.

Hunter said almost 20 volunteers have attended the meetings, held every Tuesday morning at the International Coffee Exchange in downtown Saratoga.

"A lady from Beijing who was visiting Saratoga donated $100 to us when she saw us on our hands and knees cleaning the Village sidewalks," Hunter said.

She asked the council if it would be possible to install a sign near the Saratoga Avenue exit of Highway 85 that indicated the presence of a historic downtown in the area.

At the meeting, Hunter also said turning on the sprinklers and watering spigots in the Village would help the new shrubs and plants. The sprinklers in the Village have not been used for many years.

John Cherbone, the city's public works director, said some of the sprinkler nozzles might need some upgrading. "They should work. We can fund it as long as the cost is below $5,000," he said.

In other city business, the council directed staff to review the parking standards downtown.

"We have very strict parking rules in the Village. We need to loosen them up," Kline said.

Kline, who with King is part of the Village ad-hoc committee, said relaxing parking requirements might stimulate more business activity in the downtown.

Businesses on Big Basin Way have to buy parking spaces depending on their gross floor areas. For example, restaurants are required to buy one space for each 75 square feet of gross floor area.

Lori Tinfow, assistant city manager, said that the matter would come up for a public hearing soon.

City volunteers were honored at the April 20 council meetings as part of the Saratoga Volunteer Appreciation Week. More than 127 residents volunteered for the city between July 2004 and April 2005 and worked a total of 5,118 hours.

CITY OF MILPITAS

455 EAST CALAVERAS BOULEVARD, MILPITAS, CALIFORNIA 95035-5479 • www.ci.milpitas.ca.gov

September 8, 2005

Mr. Bruce Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: Milpitas Urban Runoff Program
FY 04-05 Annual Report

Dear Mr. Wolfe:

This report is submitted by the City of Milpitas, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water National Pollution Discharge Elimination System (NPDES) Permit (Order No. 01-024). The report summarizes activities performed during FY 04-05 in accordance with the Milpitas Urban Runoff Management Plan (URMP) submitted to the Regional Water Quality Control Board (RWQCB) on March 1, 2004, and the performance standards contained therein. Responses to RWQCB comments on the FY 03-04 Annual Report were submitted to the Board on April 12, 2005 (copy attached).

Contents of Report

The goals of this Annual Report are to: 1) document implementation of our FY 04-05 Work Plan during the past fiscal year, 2) evaluate program results for continuous improvement, and 3) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

1. Certification Statement
2. IC/ID Elimination Activities
3. Industrial/Commercial Discharge Control Program
4. Public Agency Activities
    - Public Streets, Roads & Highways O & M, Corp Yard
    - Rural Roads Public Works O & M
    - Storm Drain O & M
    - Water Utility O & M
    - Other Public Agency Activities (parks, ponds etc.)
5. New Development Planning Procedures
6. New Development Construction Activities
7. Public Information and Participation
8. Pest Management Activities
9. Mercury Pollution Prevention Activities
10. Copper Action Plan
11. Nickel Action Plan

12. Trash Inventory and Management
13. Staff Training Summary Table

Each activity contains a Self-Evaluation Matrix, Evaluation comments which describe its accomplishments, highlights and effectiveness, and any additional support information.

Main highlights, accomplishments, and observations in FY 04-05:

- The City hired a consultant who reviewed and provided guidance for preliminary identification and analysis of stormwater management options for the City's library expansion project in November 2004.
- The City developed a C3 waiver program which was approved by the RWQCB in June 2005.
- The City hired a consultant to update the City General Plan, Pesticide Reduction and Stormwater BMP O & M Guidance sections of the City's Stormwater C.3 Guidebook. The Guidebook was reissued on February 23, 2005.
- The City's consultant developed a database to track O & M verification Program. With this database, City will be able to track all projects with permanent BMPs and their status including inspection data. In April 2005, City staff was trained on how to use this database.
- City also participated in the development of Hydromodification Management Plan (HMP).
- The City's Planning and Engineering Departments began review of the first C3 project.

Thank you for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact Paramjit Uppal at (408) 586-3351 or me at (408) 586-3345.

~~Very~~ truly yours,

Darryl Wong
Utility Engineer

Subject: Response to Milpitas Urban Runoff Program FY 03-04 Annual Report Comments

Dear Ms. Lee:

Thank you for providing comments on the City of Milpitas FY03-04 Annual Urban Runoff Program Report and for suggesting improvements for the next Annual Report. We have provided specific responses to the comments below in bold.

- Comment 1: Milpitas is currently developing an O&M Verification Program database that will include property address, contact person, responsible party, installed BMPs, O&M requirements, post-construction, inspection results, and other pertinent information on permanent C.3 treatment BMPs. We concur with this comprehensive approach and will be including these items in the O&M reporting template that we will develop in the near future. **Comment is noted. We have completed the programming for the database system and have begun staff training on the use of the system.**

- Comment 2: The Reporting Form for Significant Development Projects does not include the residential portion of the Elmwood Project. Please include details of the residential portion in Table 1 of next year's Annual Report. Also, please include any other portions/phases of the Elmwood Project, if applicable (following our guidelines for inclusion in Table 1). **The residential portion of the Elmwood Project was deemed completed prior to the implementation date of the C.3 Group 1 and was therefore not included in the table. Commercial portion of the Elmwood Project has not been submitted to the City yet. We will include commercial portion of this project when/if applicable in our future reports.**

- The "Storm Water Control Measures Included in Project" column of the Reporting Form for Significant Development Projects should list *post*-construction BMPs, not construction BMPs. **We made this same comment on last year's Annual Report. Please ensure that post-construction BMPs are reported in Table 1 next year.** The public projects listed on Milpitas's Reporting Form have no post-construction BMPs and it is unclear when the applications for these projects were submitted and when they were approved. Even though two of these projects have been completed, please include all three public

General Information: 408.586.3000

projects in next year's Annual Report in Table 1. **We appreciate the observation. We had included both construction and post-construction BMP information in the table. In future tables, we will limit the information to post-construction C.3 BMPs.**

If you have any questions regarding our responses or intent, please contact Paramjit Uppal at (408) 586-3351 or me at (408) 586-3345.

Regards,

Darryl Wong

CITY OF MILPITAS
Illicit Connection & Illegal Dumping Elimination (ICID) Activities – Self-Evaluation Matrix

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2004-2005 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
H-1	Service Requests	URMP page H-5	Review existing service requests (SOP 7-1)	To be reviewed by Code Enforcement. This task could not be implemented in FY 04-05 due to staffing and budget limitations. It would be reviewed whenever resources are available.	6/2006	Code Enforcement)/ Gloria Anaya/ Marilyn Nickel/ Aparna Chatterjee
H-2	Record Tracking and Evaluation	URMP page H-6	Hand-held devices to record inspection details. Data from the devices will be transferred to an inspection database that tracks inspection activity. The purpose is to enhance service to the customer and elimination of duplication of effort by capturing inspection outcome in the field.	Devices became available in 2004. Currently, devices are being used only for HazMat inspection. Later, when funds become available, the devices could be used for ICID reporting.	6/2006	Fire Department (Patti Joki)/ Information Services
H-3	Utility Maintenance SOP on storm drain inspections	URMP page H-6	Revise Utility Maintenance SOP. The SOP will describe efforts for storm drain and outfall inspection, coordination and referral activities if suspicious materials are found.	To be revised by Utility Maintenance	6/2006	Utility Maintenance (Steve Smith)/ Aparna Chatterjee
H-4	Field Investigation, reporting and recording of SWID	URMP page H-6	Train staff, determine known SWID locations, implement SWID inspection, and develop process for reporting and record keeping.	There are no SWIDs on City's or SCVWD's records. In the future, City will report any SWIDs that are found within the City to SCVWD, using referral cards.	Completed	URMP Coordinator (Darryl Wong)/ Aparna Chatterjee
H-5	Additional efforts with restaurants	URMP page H-6	Develop pollution prevention partnership with owners of facilities to educate operators.	Expand efforts to educate food service sites regarding discharges. A special Task force consisting of Haz. Mat. Leads (Fire Dept.), Code Enforcement Staff, Planning Staff and Utility engineering Staff, was formed with the goal of addressing urban runoff pollution prevention at restaurants and retail establishments. The task force will continue inspecting retail food stores and restaurants in shopping centers. The Fire Department Inspectors will also continue to inspect restaurants with grease interceptors every three years.	6/2005 and on-going	URMP Coordinator (Darryl Wong)

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2004-2005 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
H-6	Effectiveness Evaluation	URMP page H-7	Conduct annual evaluation of the effectiveness of the Program. Report the results of the evaluation in the Annual Report. Identify items for continuous improvement.	Completed. Evaluation of program effectiveness was included in the Annual Report.	Completed.	Fire Department (Patti Joki) / Aparna Chatterjee

Evaluation - ICID Elimination Activities

The City staff, primarily through the Fire Department (quick response) and Utility Maintenance Staff responded to IC/ID incidents. A summary of ICID incidents is provided in the attached ICID Enhanced Reporting Form. It categorizes each incident under the standard incident types. There was one vehicle and equipment leaking incident, two accidental spills from the Commercial and Industrial establishments, one food facility oil and grease discharge, one waste water line break at commercial facilities, one miscellaneous unknown incident referred to the Santa Clara Valley Water District, forty-two water service line breaks and sixteen water main leaks.

All restaurants in Milpitas are inspected every three years by the Fire Department. The last inspection was in FY 02-03. In FY 04-05, restaurants were inspected only on the basis of complaints or report of spills. The next inspection is due in 2005-06.

The City of Milpitas responds to all the incidents that are reported. Outreach for proper disposal of applicable materials, including vehicle fluids, is provided to the public in all appropriate circumstances. The annual inspection, coupled with education and outreach has led to better understanding of ICID elimination activities. In FY 04-05, only 9% of the incidents were caused by illegal dumping or illicit connections. The majority of the incidents, about 91%, were due to water line breaks and leaks. We have also made special outreach efforts targeted towards the restaurants. We will continue these efforts in the future.

There were no comments from Regional Board's on FY 03-04 Annual Report.

City of Milpitas
FY 2004-2005 Illicit Connection and Illegal Discharge Report Summary (a) and (c)

ICID Incident Type (b)	Reporting Source					Incident Source								Location Date and Responsible Party	Enforcement Action						Comments
	City Inspector	Inter-Department	Other Agency	Citizen	Other	Resi.	Ind.	Com.	Auto Facility	Food Facility	Const. Site	Public Facility	Other/ Unknown		Verbal (d)	Warning (e)	Adm. (f)	Adm. W/ Penalty or Fine (g)	Criminal (h)	Referral for Enforcement (i)	
Vehicle Washing				x		x								Resident -1228 Moonlight Way, 5/20/2005		x					Citizen reported neighbor was regulary washing a muddy offroading vehicle in the street in front of their home. An advisory letter was mailed to the tenant.
Vehicle Equipment Leaking	Phillip Dye			x									x	200 Block of Smithwood Drive 8/18/2004	x						Owner stated he recently changed transmission fluid in the vehicle and that one of the transmission seals was leaking. Engine provided absorball to clean up spill. Vehicle owner was instructed to use a drip pan to catch remaining fluid leaks.
Accidental Spill	Edward Garcia			x				x						Home Depot 1177 Great Mall Drive, 15/5/2004	x						Cleaned spill with absorbent material and picked up contaminated material for disposal on site with Home Depot's hazardous materials recovery buckets.
Food Facility Oil & Grease Discharge		x								x				Abel Plaza 72 S. Abel Ave 1/25/2005	x	x					Issued warning notice. Requested Restaurant manager to clean spill immediately, verified clean up and provided outreach materials.
Sanitary Spill or Leak	Paul Inouye				x		x							Solectron Corporation 677 Gibraltar Drive 3/23/2005	x						Waste water line break near ramp area. Spill was cleaned by Solectron personnel. Solectron will seal and coat around the ramp area.
Misc. Incidents	Patricia Joki			x									x	Berryessa Creek near I 680, 5/4/2005						x	Received complaint of dead fish in Berryessa Creek. Referred incident to SCVWD who was aware of the situation.
Misc. Incidents				x		x								1/24/2005 - 623 Carlsbade. Hoan Au		x					Received complaint that resident rinsed construction debris off of their driveway and into street. Sent written warning and Home Repair and Remodeling BMPs.
Water Line Breaks	Steve Smith	x	x	x	x							x		throughout the City on various dates							A total of 42 service line breaks and 16 main line breaks happened during fiscal year 04/05. In each case where discharge occurred, we followed procedure to protect creeks and removed pollutants.

(a) Categories conform to those requested by Program

(b) Incident types include only those which were reported for this period

(c) Reporting person's identity is not provided to protect confidentiality

d) Verbal warning providing information for corrective action

e) Written letter providing information for corrective action

f) Official letter describing requirements and consequences

g) Administrative Action with assessment of fines

h) Legal Action

i) Refer case to agency with enforcement powers

CITY OF MILPITAS
Industrial/Commercial Discharger Control Programs - Self-Evaluation Matrix

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2004-2005 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
B-1	Field Inspection/Reporting of SWIDs	URMP page B-6	Determine known SWID locations, develop process for reporting, train staff, and implement.	There are no SWIDs on City or Santa Clara Valley Water District's (SCVWD) records. In the future, City will report any SWIDs found within the City to SCVWD, using the standard referral card.	Completed	URMP Coordinator (Darryl Wong) Aparna Chatterjee
B-2	Violation documentation	URMP page B-6	Review of existing SOP to determine if additional elements should be incorporated.	Urban Runoff Enforcement Process Flowchart has been created by Utility Engineering in September 2003. A copy of the Flowchart is enclosed in the 2004-2005 Urban Runoff Management Plan (Chapter 9, Section H, Exhibit b-11).	Completed	Fire Department (Patti Joki)/ Aparna Chatterjee
B-3,4	Effectiveness evaluation	URMP page B-6	Conduct annual evaluation of the effectiveness of the Program.	Evaluation of program effectiveness is included in this Annual report.	Completed	Fire Department (Patti Joki)

Evaluation - Industrial Commercial Discharge Control Program

During the past reporting period, the Hazardous Materials and Environmental Services Unit continued to implement its comprehensive inspection program. Out of the Fire Department 442 permitted facilities that are included in the annual inspection program, 337 inspections were conducted in 2004-05 (21 of these are NOI filers). The inspection reports are summarized in the two attached Enhanced Reporting Forms.

The program's main emphasis is that of education and outreach to prevent illegal discharge. The Fire Department has been inspecting business for hazardous material code compliance since the early 1980's. The Urban Runoff requirements are in essence the same as many Fire Code regulations. Thus, businesses have been "conditioned" to use best management practices for many years. Further, owing to annual inspections, education and outreach, we have seen a remarkable increase in awareness regarding proper storage, transportation, use and disposal of applicable materials. There is also a growing awareness of the importance of protecting the Bay from unauthorized releases.

The inspection process identifies violations and allows time for compliance. All violations are followed-up and resolved. When the business responsible fails to comply, enforcement action such as issuance of administrative, civil or criminal citations is taken. If a severe violation is observed, such as materials disposed of into a storm drain, then a higher level of enforcement action, such as referral to the City or District Attorney, may be taken. For this past fiscal year, no citation actions were necessary.

.

Response to Regional Board's Comments on FY 03-04 Annual Report

There were no comments from Regional Board.

EVALUATION – PUBLIC STREETS, ROADS AND HIGHWAYS O& M

The City's contract street sweeping program is conducted by the Maintenance Division of the Public Works Department and funded by the Solid Waste collection program. Residential, arterial, and commercial street sweeping is conducted two times a month. Industrial street sweeping is conducted four times a month. Open space areas and mountain roads that have no curb and gutter are not scheduled for routine sweeping, but are swept on an as-needed basis. Each established sweeping route is swept on the same day of the week. Rural roads are not routinely swept but debris from rural roads is picked up twice a week. On Monday and Friday, debris from the rural roads and the main arterial roads are collected. The City's contractor promptly removes street sweeping material and disposes nearly all of the materials at the BFI landfill, and a significant amount of this material is taken to the compost area.

The City places emphasis on street sweeping in the period from early Fall into the Winter months until leaf fall has been completed. During November and December, three primary areas are swept weekly to remove leaves. This practice effectively removes leaves, debris, and other pollutants, which would otherwise be washed into the storm drain system. Additional City crew are called upon to assist in the Fall cleanup.

Beginning June 21, 2004, new sweeping contractor BFI has been doing the street sweeping operation. Statistics on street sweeping activities are kept in a database that is recorded daily by operators of the equipment, and summary reports are generated by the supervisor. The number of curb miles swept and the number of cubic yards of debris picked up are recorded. However, we could not include the November 2004 data in this year's Annual report as the records were misplaced. In FY 04-05, a total of more than 13,775 miles were swept. Debris, amounting to over 3,019 cubic yards, was collected. The volume of debris did not include leaves removed. The City does not keep track of the volume of leaves collected as leaf bags are picked up by solid waste garbage trucks.

The City's field crew are trained annually to look for BMP deficiencies in the field on a daily basis. Training is provided through Public Works Maintenance's Safety Program. Quarterly meetings are held to discuss BMP deficiencies and safety issues. BMP deficiencies are forwarded to the field employee's immediate supervisor and a service request is generated (record keeping and documentation) and directed to the appropriate department for resolution.

Milpitas has a highly effective street maintenance program. There are very few complaints. Most of the complaints are promptly responded to ensure customer and community satisfaction.

Response to Regional Board's Comments on 03-04 Annual Report

There were no comments from the Regional Board.

EVALUATION – RURAL PUBLIC WORKS MAINTENANCE AND OPERATION

The rural roads are located in the hillside areas, on the eastern side of Milpitas. There are 138.9 miles of City streets, of which rural roads are only 1.9 miles. Rural roads occupy about 1.4% of the City's total street miles. Typically, open space areas and mountain roads that have no curb and gutter are not scheduled for routine sweeping, but are swept on an as-needed basis. Twice a week, Mondays and Fridays, debris is picked up by hand from the rural roads. These roads are not in the proximity of creeks. The dust swept by wind from these areas would typically accumulate in the City's valley floor areas, and would be removed during routine street sweeping.

The SCVURPP Program has established a definition for rural roads and provided guidelines on performance standard, BMPs and SOPs. The City has adopted the Rural Roads Performance Standard in the 04-05 Work Plan but has not been able to finalize and implement the BMPs and SOPs. Since rural roads constitute a very small portion of the City streets, most of the City's efforts are targeted towards maintaining an efficient street sweeping program for the City streets. The City has plans to finalize the BMPs and SOPs for rural roads based on the Program's guidelines and implement them in the future. Staff will be trained after the BMPs and SOPs are developed.

Response to Regional Board's Comments

Evaluation - Storm Drain Operations and Maintenance

- Staff from police, fire, and public works coordinated a recent update to the City's SOP 8-6 titled " Response and Clean-up Guidelines for Hazardous and Non-Hazardous Material Releases including Discharges of Pollutants into Storm Drains and Water Courses (Urban Runoff Pollution Prevention)".

- City staff has completed inspection and cleanup of the City's 78 outfalls and determined that 10 needed repairs. Repairs of two were completed in FY 04-05, with the remaining eight scheduled for completion in FY 05-06.

- City staff performed the operation and maintenance tasks of the storm drain system; contractors were not used.

- Staff has not reported any problems with BMPS; no updates are planned at this time.

No comments from Regional Board regarding FY 03-04 Annual Report.

Evaluation -Water System Operations and Maintenance

- Due to a shortage of staffing resources, we did not take the inventory of key discharges in 2002. It is now scheduled for completion by September 2005.
- Contractors were utilized to fix major water line breaks. The first priority is to stop the flow of water. There were no complaints about contractors not following BMPs to fix water line breaks.
- Staff has not reported any problems with BMPS; no updates are planned at this time.

(Model conditions of approval for pest resistant landscaping features and practices and a reporting format for pesticide reduction measures are being prepared as part of Actions VII.A.1. and VII.A.4. of the Program's Pesticide Management Plan. Co-permittees are to begin to consider pest-resistant landscaping and design features in the design, landscaping and environmental reviews of development projects in FY 02-03, per Pesticide Management Plan Action VII.A.2.) Required by C.3.n.iii (Model COA 6/02)	Started collecting data – 7/02 Group 1 projects are shown in the Summary Table of Significant Projects.	Ongoing	Utility Engineering (Marilyn Nickel) Land Development (Fariborz Heydari) PW (Steve Smith)

Evaluation - New Development Planning Procedures

The Planning, Engineering (Land Development, Design and Construction, Utility Engineering), and Building Divisions have coordinated to integrate the C.3 provisions into the City approval procedures. The City updated its Stormwater C3 Guidebook in February 2005 and is planning to update again in FY 05-06 to update O & M verification, Hydromodification, Group 2 definition, Waiver Program and any other requirements as necessary. Staff also participated in program-level C3 Ad Hoc Committees to assist in the process of development of C3 provisions such as O & M Work Group and, Hydromodification Management Plan. Development Review Process Work Group.

City management has worked with other Copermittees in the development of a Waiver Program to address site impracticability, Smart Growth Projects including Transit Village Projects, and redevelopment project areas adopted pursuant to the Community Redevelopment Law (Health & Safety Code 330000 *et seq*), affordable and Senior Housing Projects and Brownfields which was approved by the RWQCB in June 2005. The Smart Growth Project Area is identified to include those areas within the City's planned redevelopment area and/or within a quarter mile radius of existing or planned transit stations.

The City has developed a database to incorporate the O & M verification Program. With this database, the City will be able to track all projects with permanent BMPs and their status including inspection schedule. City staff have been trained to use this database.

City consultant has also reviewed and provided guidance for preliminary identification and analysis of stormwater management options for the City's library expansion project in November 2004.

The City is diligently working on meeting C3 requirements.

Weaknesses and help needed at the Program or Regional Board level – The City would appreciate if the Regional Board would consider combining the Annual Report and Work Plan to avoid duplication of information.

Response to Regional Board's Comments on FY 03-04 Annual Report and during Performance Review: See letter dated April 12, 2005.

Additional Information – New Development Planning Procedures

BMP O & M Verification Program – C.3.e: As part of developing and implementing a program to verify that required treatment BMPs are properly maintained over the life of the project, the City has developed a database to track C.3 activities including the Operation and Maintenance Program. In this database, project information such as property address, contact person, responsible party, BMPs installed, BMPs maintenance and inspection frequency required etc. will be entered. The City will also develop criteria to inspect a subset of prioritized treatment measures for appropriate operation and maintenance on an annual basis.

The City has reviewed Program-provided examples of operation and maintenance-related ordinance, policy and agreement language and had formulated language for special conditions, O & M plans and agreements for incorporation into the City's project approval process.

Site Design Measures Guidance & Standards Development – C.3.j: The City of Milpitas adopted a C.3 Guidebook in 2003 and updated it in 2005. The Stormwater C.3 Guidebook is designed for staff and developer use, outlining planning application submittal requirements, including Site Design Measures to meet development standards for stormwater quality. This Guidebook, which is placed on the city web site, references other standard supporting documents such as BAASMA's design guidance manual for stormwater quality protection Start at the Source electronically.

This Guidebook, in Step 3 of Chapter 3 addresses Design to Minimize Imperviousness through cluster development, optimizing the site layout, minimizing directly connected impervious area, detaining and retaining runoff throughout the site and through documentation of design.

General Plan – C.3.l: The General Plan text is targeted to be amended by December 2005 pending staff availability to better implement the provisions of C.3.

Reporting – C.3.n: Please see attached "Development Projects Table".

Reporting Form for Planning Procedures Performance Standard - Summary Tables / Additional Information

Significant Development Projects[1] Reviewed and/or Approved During July 1, 2004 – June 30, 2005

Public Projects – No significant development projects approved in this fiscal year.					
Private Projects -					
PROJECT NAME - HUMANE SOCIETY OF SILICON VALLEY	**PROJECT DESCRIPTION – REQUEST FOR CONSTRUCTION OF A NEW 47,990 SQ. FT. MULTI-PURPOSE ANIMAL FACILITY WITH ASSOCIATED SITE IMPROVEMENTS INCLUDING THE REMOVAL OF 13 PROTECTED TREES, ANCILLARY RETAIL SHOP, DOG PARK, PARKING MODIFICATIONS & COMAPCT PARKING, LOCATED IN THE AMES INDUSTRIAL PARK AT 901 AMES AVE**	**PROJECT TYPE - COMMERCIAL**	**SITE SIZE (AC) - 4.86 ACRES**	**NEW IMPERVIOUS SURFACE (AC) - 148,975 SQ. FT.**	**PROJECT STATUS (APPROVAL DATE) - Deemed complete April 25, 2004. Have reviewed first submittal of construction plans 1/3/05.**
SITE DESIGN: Reduce impermeable surface area through provision of a major vegetative filter area in the dog park in the southeast portion of the project. Decomposed granite portions of parking areas will provide infiltration in parking areas. Roof	**SOURCE CONTROL:** Covered trash containers. Stenciled inlets. Street sweeping. Landscaping with native and drought tolerant species. Irrigations systems that utilize automatic controllers to prevent over watering.	**TREATMENT BMPS:** Several treatment BMPs ranging from catchment areas to treatment areas showed in the Stormwater Control Plan would treat all runoff before it enters the storm water system. Each BMP has been designed to be larger than the minimum surface area	**NUMERIC CRITERIA:** N/A	**O&M RESPONSIBILITY: HUMANE SOCIETY OF SILICON VALLEY -** An O&M agreement is required prior to building permit issuance will contain an BMP Maintenance Plan that will address responsibility for operation and maintenance of the BMPs. Landscaping	**PESTICIDE REDUCTION MEAS:** Landscape maintenance shall minimize use of pesticides to maximum extent practical.

[1] Projects that create or replace one acre or more of impervious surface area.

downspouts will drain to landscape areas to greatest extent possible. All roof drainage and parking lot drainage will be treated in BMPs located in multiple bio-swales around the site at ground elevation.		requirement.		filter swales and strips shall be irrigated throughout the dry season. Irrigation will be of sufficient quantity and frequency to allow plants to thrive. Landscape maintenance shall minimize use of pesticides to maximum extent practical. Plants will be selected and replaced, and soils amended, as necessary to maintain soil structure and filtering capabilities for all storm water swales and filter strip areas. General landscaping maintenance, including pruning and cleanup, will insure that the BMPs are kept in a good and functional condition at all times. .	
PROJECT NAME – FAIRFIELD MILPITAS MIDTOWN APARTMENTS	**PROJECT DESCRIPTION - MULTI – STORY APARTMENT BUILDING WITH INTERNAL PARKING STRUCTURES**	**PROJECT TYPE - COMMERCIAL**	**SITE SIZE (AC) - 8.2 ACRES**	NEW IMPERVIOUS SURFACE (AC) - **5.9 ACRES**	**PROJECT STATUS (APPROVAL DATE) -** Deemed complete on May 20, 2005 **& have submitted Grading Plans 7/8/05.**
Clustering of buildings, landscape swales in open space	Covered trash areas, parking structure, street sweeping, sanitary sewer drains for	Landscape infiltrating BMPs, landscape swales adjacent to pedestrian trails, structural	N/A	O & M agreement will require that owner is responsible for keeping record available for inspection on	Pesticide and fertilizer usage will be controlled through usage of a licensed landscape

(Utility Engineering – Paramjit Uppal)

Evaluation - New Development Construction Procedures

The City of Milpitas has notified all developers and contractors who do work in the City to file a Notice of Intent (NOI) and annual payment of $700 to the State Water Resources Control Board, prepare a Storm Water Pollution Prevention Plan, and use best management practices (BMPs) to control storm water runoff quality for all Group 1 projects.

The building inspection staff has attended various training classes and workshops for the new regulations.

Public Works Inspector Section has set up a file for the SWPPP and C3 in our general filing system. Additionally, each individual CIP project has a SWPPP file. Approval is required prior to issuing of project a Notice to Proceed. The section has also established a database to track all projects and complaints during the year.

Public works and Building inspectors coordinate to inspect and enforce construction related BMPs. They continue to improve developer and contractor understanding of requirements through education and staff's persistence. Developers and contractors have been increasingly more responsive to Storm Water Pollution Prevention Plan compliance.

No comments from the Regional Board regarding FY 03-04 Annual Report.

CITY OF MILPITAS
PUBLIC INFORMATION/PARTICIPATION-SELF-EVALUATION MATRIX

Public Information / Participation						
I-1	Outreach distribution	URMP Page I-4	Use of reply card on utility bills and Annual Water Quality Report as mechanism to reach residential audience for outreach material Media advertisements, stencil storm drains, slides at movie theaters)	Pollution prevention literature was distributed at City events and available at the following City facilities: City Hall, Senior Center, Community Center, Sports Center, Police Department and Fire Department. In addition, information was distributed to all employees. In 04/05 public service announcements were continuously aired on the City's Radio (1620 AM) and Cable TV (CTV 15) stations. Staff updated announcements frequently. Stormwater pollution prevention videos were aired on CTV 15 twice weekly. The City of Milpitas website included a page on Pollution Prevention which was updated periodically. A series of Claire Water cartoons were published bi-weekly in the Milpitas Post, a local newspaper published weekly.	Ongoing	Utility Engineering (Aparna Chatterjee)
I-2	Targeted Outreach	URMP Page I-4	Continue education efforts targeted to restaurants	Information provided to residential customers based on reply card requests, hotline requests, water bill messages and direct mailing of City publications including the Annual Water Quality Report and the Reusable News. Pollution prevention brochures are distributed with the Finance Department's New Residential Account packet. Information is also provided at City sponsored events. Information on stormwater pollution prevention is mailed by the Utility Billing Section to new commercial, industrial and retail business license applicants. The Fire	Ongoing	Utility Engineering (Aparna Chatterjee)

				Department Inspectors distribute outreach materials at the time of inspection. Regular meetings of the BFI/Shopping Center Task Force continued throughout 04/05. The task force worked with individual business to resolve urban runoff issues and distributed Best Management Practices for Restaurant and Retail Establishments on an as needed basis. BMP's are available in four languages (English, Spanish, Chinese, and Vietnamese). The Fire Department Inspectors also distribute restaurant outreach materials at the time of inspection. Construction BMPs are provided to contractors and developers by the Building Division. The Milpitas Stormwater C.3 Guidebook was updated and distributed to developers on as needed basis. The guidebook is also available on our web site. A letter was sent to all developers and contractors in October notifying them about measures to be taken to prevent sediment erosion into storm drains prior to the rainy season. Pollution Prevention articles were included in the City of Milpitas Newsletter distributed to all postal accounts on a quarterly basis. *Keep Your Pool, Spa and Fountain Copper Free* was distributed to all pool permit applicants.

			toxic choices.	Staff encouraged the use of safer garden and pest control products and distributed literature such as Grow It, Control It, Watershed Watch Kits, and HHW brochures. IPM information is available on our website. Public Service Announcements were aired on CTV 15 and 1620 AM.		(Aparna Chatterjee)
I-7	Watershed Education and Outreach	URMP Page I-5	Materials to be distributed as necessary. Pollution prevention videos to be shown on local TV channel.	Distributed Watershed Watch Kits at the City's Harvest Festival, OSH outreach events and brochure racks at City Facilities. MUSD Science Teachers were offered a $150 stipend to attend environmental education workshops. Milpitas helped staff Watershed Watch outreach events whenever possible.	6/2005	Utility Engineering (Aparna Chatterjee)
I-8	Effectiveness Evaluation	URMP Page I-5	Develop an evaluation procedure to gauge public (contractors, developers) knowledge of program goals, and effectiveness of PIP activities.	Random surveys of industry and contractors methods will be performed. Completion of this task is now scheduled for June 2006 due to staffing shortages.	6/2005	Utility Engineering (Aparna Chatterjee)

Evaluation of Public Information / Participation Program Effectiveness

The City measures its outreach effectiveness by the number of outreach activities performed, the quality and quantity of materials distributed, and volume of citizen and business participation in city sponsored special events.

In fiscal year 04/05, staff continued to distribute BMP guidelines to residents, developers and contractors during project planning and construction. In addition, staff performed outreach activities by means of direct mailings, literature distribution at City owned facilities, announcements through city media such as the City website, television and radio stations, and placing periodic advertisements in the Recreation Department's Milpitas Connection Magazine (published quarterly), City of Milpitas Newsletter (published quarterly) and the Milpitas Post, (a local newspaper published weekly). As a result, we continued to receive a high number of literature request forms and hotline phone calls.

City sponsored events such as Global Village event, Fall Harvest Festival, Annual Creek Clean Up event and the County Household Hazardous Waste drop off event continue to draw exceptional public participation and are excellent opportunities to educate and interact with a large number of residents. The city also conducted two IPM outreach events at the local Orchard Supply Hardware store.

The "Learning to be Waterwise" program was implemented in 5th grade class rooms at three elementary schools. The program primarily focuses on water conservation. However, sections on the water cycle, urban runoff pollution prevention, and wastewater treatment are included. Some teachers supplemented this program with trips to the Alviso Education Center or neighborhood creeks.

The Kids in creeks program was offered to all elementary school science specialists. The program provides tours of Berryessa Creek . Materials to test water samples, check water flow rates and learn about wildlife are provided by the City.

The City of Milpitas offers a teacher stipend of $150 dollars to encourage participation in environmental education workshops. Teachers were informed of upcoming workshops and assemblies via newsletters, direct mailing and email announcements. Approximately 3460 students (50% of the K-8 population) were reached through various school education programs.

Summary of Evaluation of Public Information / Participation Program Effectiveness

Activity	Type of Outreach	Level of Implementation	Evaluation of Effectiveness
1. City facility literature distribution	General	The Bay Begins At Your Front Door (including Spanish and Vietnamese), Clean It, Grow It, Home Maintenance Tips, Keep Your Pool, Spa and	➢ 160 of each of these brochures were distributed at City facilities: City Hall, Senior Center, Community Center, Sports Center, Police Department, and Fire Department. ➢ Distributed materials to all permanent

Activity	Type of Outreach	Level of Implementation	Evaluation of Effectiveness
		Fountain Copper-free, Help Prevent Pollution of Our Creeks and Bay, Pests Bugging You, Be the Solution to Stormwater Pollution, and Keeping it All in Tune	and temporary municipal employees. ➢ Distributed calendar/decals for city vehicles.
2. City Cable TV Channel 15 and Radio 1610 AM	General	Aired public service announcements on the City's Radio (1620 AM) and Cable TV (CTV 15). Topics covered include: Mercury, IPM, Copper, HHW Recycling, Report Illegal Dumping, Car Care Tips, and Volunteer Opportunities. We also began airing pollution prevention videos including "Stormwater Pollution" and "H2O TV".	➢ 10,000 households subscribe to CTV 15. Each TV PSA aired an average of 30 times per day. Announcements are periodically revised throughout the year. We also ran PSAs on our local radio station at the same frequency. However, we are unable to determine the number of residents reached through this effort . ➢ This year we continued airing pollution prevention videos. 15-30 second spots run in normal rotation at a frequency of 30x/day. The 10-15 minute videos air 2x/Week.
3. City of Milpitas Web site	General	Provide information on Urban Runoff, pollution prevention tips and programs	➢ The website was revised in 04/05 and is accessible to all 650 city employees and 65,000 Milpitas residents. Information was made available throughout the year.
4. City sponsored events	General	Literature distribution and promotional products; pencils, decal calendars, sponges as well as educational displays	➢ Distributed 200 copies of each of the following brochures at City sponsored public events: • HHW Brochures • Grow It's • Control It's • Pests Bugging You • Brochure Request Forms • Watershed Watch Kits • The Bay Begins • Oil Recycling Jugs • Funnels • Pencils • Sponges • No Dumping Calendars

Activity	Type of Outreach	Level of Implementation	Evaluation of Effectiveness
			➢ Coordinated with County for the Household Hazardous Waste Drop-off event in June 2005..
5. Milpitas Connection-City of Milpitas Recreation Department Catalog/ Magazine	General	Pollution Prevention Tips (based upon season) along with mail-in coupon for literature	➢ Articles (including a brochure request form) were published in the Milpitas Connection magazine as space was available.
6. Urban Runoff Hotline	General	Maintain hotline # (408) 586-2605 to provide pollution prevention tips and receive request for information	➢ Staff checked the hotline daily and responded to questions and literature requests immediately.
7. Utility Bill Message and Inserts	General	Provide pollution prevention information	➢ Pollution prevention messages were submitted and included on bills when space was available.
8. Newsletters and Newspapers	General	Milpitas Post (A local newspaper published weekly), provide advertisements on special topic issues-automotive care, home repair, gardening, street sweeping etc.	➢ A series of Claire Water comic strips featuring pollution prevention messages were published bi-weekly in the Milpitas Post, a local newspaper with a weekly circulation of 20,000 ➢ Advertisements were placed in the Milpitas Post announcing volunteer opportunities and special events such as Pollution Prevention Week, and the HHW drop off event. All advertisements included pollution prevention messages. ➢ Placed advertisements in the Milpitas yellow pages promoting proper disposal of fluorescent light bulbs. ➢ In September 2004 a wrap with HHW information was included as part of the City's pollution prevention week activities.
9. Coordinate National Pollution Prevention Week	General	Distribute literature to the general public, display pollution prevention messages on City's web page, school outreach, residential door-hangers (Joint effort with Public Works, and Solid Waste	➢ Aired public service announcements on the City's cable television station and radio station. ➢ Placed advertisements in the local newspaper. ➢ Distributed a door hanger containing pollution prevention messages with focus on litter prevention and recycling

Activity	Type of Outreach	Level of Implementation	Evaluation of Effectiveness
			of mercury containing products, pesticides and other HHW items. ➢ City Council adopted a Proclamation for Pollution Prevention Week.
10.Solid Waste Activities	General	Joint effort with Solid Waste (Household Hazardous Waste Programs), messages in newsletters, etc.	➢ Combined outreach efforts with other departments whenever possible
11. Outreach Distribution	General	Use of reply card on Water Quality Report for residential customers, distribute BMP material and stormwater pollution prevention material to City owned facilities, place and distribute BMP materials at Household Hazardous Waste Collection Event and the Pollution Prevention Week events.	➢ The City received approximately 85 reply cards or information request forms. All calls and information request were answered expeditiously.
12. Residential	Targeted	Mass mailings, City sponsored events	➢ A residential mercury education brochure was developed in FY 04/05 and will be distributed in FY 05/06. ➢ The City's Annual Water Quality Report, including pollution prevention articles and a brochure request from, was mailed to all postal accounts and included in the Finance Department's new account packet.
13. Retail Outlets	Targeted	Regional IPM Store Partnership Program	➢ The local Orchard Supply Hardware Store is participating in the IPM store partnership program. IPM brochures are available in a brochure rack. ➢ City Staff participated in two weekend outreach events at the store. Staff discussed safer pest control options with customers. Watershed Watch Kits, Control It's, Grow It's, Clean It's, and HHW brochures were distributed.
14. Commercial/ Industrial Customers	Targeted	Target mailings to vehicle service shops, restaurants etc.	➢ A Commercial/Industrial mercury education brochure was developed in FY 04/05 and will be distributed in FY 05/06. ➢ Regular meetings of the BFI/Shopping

Activity	Type of Outreach	Level of Implementation	Evaluation of Effectiveness
			Center Task Force continued throughout 04/05. The task force was developed with the goal of forming cooperative relationships with property owners and business tenants to resolve a variety of issues including urban runoff. Urban Runoff BMP's for Restaurant and Retail establishments translated in English, Chinese Vietnamese, and Spanish, were mailed to tenants and property owners on an as needed basis. ➢ Information was provided on request, during inspections or on as-needed basis ➢ Hazardous Materials inspectors distribute information in the field. ➢ Distributed brochure list with new business liscence applications ➢ Mailed brochure list with business liscence renewal forms.
15. Special Interest Groups	Targeted	Provide information on request to target groups (garden clubs, auto enthusiasts, pool owners, handymen, construction workers, etc.)	➢ Information was provided on request, during inspections or on as-needed basis ➢ Distributed a 24X36 blueprint with construction BMPs with all public and private project applications. ➢ Mailed Rainy Season letter to developers. ➢ Keep you Pool, Spa, or Fountain Copper-Free was distributed to all pool permit applicants.
16. Industrial/Commercial Discharges	Targeted	'Industrial BMPs', 'Mobile Cleaner BMPs', 'Preventing Storm Drain Pollution' and other program material	➢ Information was provided on request, during inspections or on as-needed basis
17. New Development and Construction	Targeted	'Blueprint for a Clean Bay', 'BASMAA Recyclers and Disposal Services', 'BMPs for the construction industry (8 pamphlets)	➢ Information was provided on request, during inspections or on as-needed basis ➢ The Milpitas Stormwater C.3 guidebook was updated in 04/05. The guidebook was placed on our website and distributed to developers as needed.
18. Illicit	Targeted	IC/ID cards to be	➢ Information was provided on request,

Activity	Type of Outreach	Level of Implementation	Evaluation of Effectiveness
connection and illegal dumping elimination		distributed to industrial and commercial facilities	during inspections or on as-needed basis
19. Pesticide Discharges	Targeted	Training programs for municipal employees, public education and outreach programs for residential and commercial pesticide users and pest control operators	➢ IPM messages were placed on our website, Radio and CTV. ➢ See Staff Training Table. ➢ Two point of purchase outreach events were held at the Milpitas OSH store to encourage use of less-toxic garden care and pest control products. ➢ IPM articles were placed in various newsletters and newspapers. See numbers 5 and 8 above.
20. Municipal Employee Training	Targeted	Continue employee yearly training on runoff pollution prevention. Maintain Employee awareness through workshops, newsletters and meetings	➢ See Staff Training Table
21.School outreach program	Educational	Involve schools in creek clean up event and the Kids in Creeks education program; stipends to encourage teacher participation in Watershed Education Workshops	➢ Pollution prevention messages and volunteer opportunity announcements were periodically placed in weekly school newsletters. ➢ A total of ten Earth Capades assemblies were conducted at 5 elementary and middle schools. Approximately 2,800 students participated in these environmental education assemblies. ➢ 400 students participated in the Kids in Creeks program and were escorted on field trips to Berryessa creek where they performed water quality tests. ➢ 200 volunteers from various schools participated in the annual Creek Clean Up event. The event focused on Redwood Drainage Channel, Tularcitos Creek, Calera Creek and Wrigley Creek. A total of 8480 lbs of debris was removed. ➢ The "Learning to Be Waterwise" program, which includes a segment on pollution prevention, was implemented in 5th grade classes at 3 elementary schools. A total of 260 students participated in the program.

Activity	Type of Outreach	Level of Implementation	Evaluation of Effectiveness
			➢ Information on IPM workshops and training sessions was forwarded to MUSD staff. A financial incentive was offered to encourage participation and attendance. ➢ The City of Milpitas offered a teacher stipend of $150 to encourage participation in environmental education workshops.
22. Coordinate creek clean up and Household Hazardous Waste disposal events	General	Advertise in Milpitas Post, schools, jointly with Santa Clara Valley Water District Coordinate for more citizen involvement on City events	➢ Articles were placed in the Milpitas Post and school newsletters. The event announcements also received priority placement on our website.
23. Watershed outreach and education	Watershed Outreach and Education	Materials will be distributed as necessary	➢ A link to the Watershed Watch Web site was added to the City's web page. ➢ Watershed Watch Kits were distributed at City sponsored events and IPM outreach events at the Milpitas OSH store. ➢ Teacher stipends were offered for participation in the Wacky Watershed Workshops. ➢ The City of o Milpitas helped staff Watershed Watch outreach events whenever possible.

Evaluation – Pest Management

City staff has applied pesticides for the control of weeds and insects in landscaped areas around city buildings, in parks, in street medians, right-of-way areas, and in city street trees.

In FY 04-05 the City made a conscious effort to address pest management issues with an integrated approach. Pesticide use was incorporated as one management tool along with the application of cultural and mechanical control practices.

Since the adoption of the City's Integrated Pest Management policy to phase out the use of Category I and Category II pesticides, the use of Category II pre-emergent herbicide Oxadiazon was eliminated in FY 04-05. The replacement Category III pre-emergent Isoxaben was used exclusively this year.

Other products that have been eliminated include Alkylarpolyoxyethylene, Phosphoric Acid, Diurin, Suofometuron Methyl, Aluminum phosphide, Nonlyphenoxy polyethoxy ethanols, and Chlorsulfuron.

A summary showing the volume used by active ingredient is attached. The total volume of pesticides applied was reduced by 36% in FY 04/05.

There were no comments from the Regional Board on FY 03-04 Annual Report.

Summary of Pesticide Use

Form	Target Pest Code	Active Ingredient	2001-02 Total (lbs)	2002-03 Total (lbs)	2003-2004 Total (Lbs)	2004-2005 Total (Lbs)

T-4	Potential control measures	2-3-2004 SCVURP PP's Trash Project Summary	Coordinate with the Program to develop guidance on the implementation of potential control measures and evaluation criteria needed to address problem areas	Staff will work with the Program to develop guidance on the implementation of potential control measures and evaluation criteria needed to address problem areas. During this year's assessment, staff determined that the City does not have significant trash problems, barring a few locations, owing to several trash management activities and control measures. The City will revise the problem areas annually and continue to make annual assessments.	Completed & On-going	Dennis Cuciz, Steve Smith (Public Works), Leslie Stobbe (Solid Waste), Gloria Anaya (Neighborhood Services), Aparna Chatterjee (Utility Engineering)
T-5	Standardized Reporting	2-3-2004 SCVURP PP's Trash Project Summary	Develop a standardized reporting format for documenting and evaluating trash management and monitoring activities	Staff has reported the findings of the March 2005 assessment of trash problem areas on a standard reporting form, the Trash Problem Area Activity Report, that was developed by the Program, and submitted it to the Program. The report includes locations, discussion of the original problem and findings of the assessment. A copy of the Report is included.	Completed & On-going on an annual basis	Aparna Chatterjee (Utility Engineering)

Evaluation – Trash Inventory and Management

The City of Milpitas continued to implement the various trash management activities in FY 04-05. In March 2005, we completed assessment of trash problem areas by using the Keep America Beautiful Litter Index tool. The Trash problem areas were identified in FY 03-04 by conducting a survey, the Identification and Documentation of Known Trash Problem Areas Survey. The survey was submitted to the SCVURPP Program in December 2003. The program compiled information from municipalities and agency staff to identify known trash problem areas that occur in creeks, streets, parks and other land uses within urban areas. Data sources included trash complaint databases, maintenance and operation records, existing list of trash hot spots, employees' knowledge and creek clean-up locations. The Program then converted and mapped the location information of trash problem areas into co-ordinates using the GIS. The City used the list of trash problem areas that was compiled by the Program for completing the assessment in FY 04-05. City staff visited the 12 trash problem areas that were identified in the 03-04 survey to determine the extent of the problems. Staff used the KAB Litter Index that rated each site according to the trash observed at the site. The KAB Litter Index ratings are: 1-No litter, 2- slightly littered, 3- Littered, 4- extremely littered. Of the 12 sites, two sites had ratings between 3 and 2, three sites had ratings of 2, one site had ratings of 1.5 and the remaining six sites had ratings of 1. At each site, staff used a survey and a checklist called the 'Windshield Survey' and 'Neighborhood Spotters Checklist' to identify the quality and quantity of trash. The results of the survey were then entered into the Trash problem Area Activity Report. This Report was submitted to the Program on March 23, 2005, along with a map of the trash problem areas.

The City has several trash management activities. These activities include household hazardous waste collection, curb-side recycling, litter pick-up, street sweeping, free trash drop-off days, an annual volunteer creek clean-up event, storm drain operation and maintenance and responding to trash complaints. The Utility Engineering, Public Works and Planning, Recreation and Neighborhood Preservation Departments are responsible for trash management activities and enforcement. The Utility Engineering Division carries out management of solid waste and yard waste recycling including annual promotional campaigns and school projects. Litter control in parks, streets and right-of-way landscaped areas is handled by Public Works. There are several incentive programs such as household disposal at the Newby Island landfill with up to six visits per year for residential customers, free recycling services for commercial customers, Annual Neighborhood Beautification Awards Program for residential and non-residential properties, the Lend-A-Tool Program for residents, businesses, property owners and community groups, the Abandoned Vehicle Abatement Program, and other volunteer programs such as the Adopt-A-Spot Program and the Garbage Container Collection Services Program for disabled persons. There are school programs such as the Bottles and Cans Recycling funded by the Department of Conservation, and the City Recycling and Composting Project at elementary and middle schools.

All complaints are responded to and problems are resolved through discussion with contractor, resident or property owner. City plans to continue its efforts in the future.

There were no comments from Regional Board on FY 03-04 Annual Report.

Evaluation – Staff Training

During FY 04-05, the Planning, Engineering (Land Development, Design and Construction, Utility Engineering), Building Divisions, and Public Works Maintenance Staff attended training sessions conducted by the URPPP including sessions on Construction Site Planning & Management for Compliance with phase 1 and Phase 11 NPDES Requirements, Conducting Stormwater Inspections of Industrial and Commercial Facilities, and Conducting Stormwater Treatment BMP Maintenance and Inspections. A detailed list of sessions is identified in Staff Training Summary Table. In addition, as part of the C3 implementation program, Engineering and Planning staff was also trained on C3 Database Management developed by a City hired contractor.

In addition, Public Works Maintenance Staff attended routine and recurring in-house briefing on proper pesticide and herbicide use, and best management practices.

Mr. Bruce Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: West Valley Community Specific Urban Runoff Management Program
FY 2004-2005 Annual Report

Dear Mr. Wolfe:

This report is submitted by the West Valley Cities of Campbell, Monte Sereno, Saratoga, and the Town of Los Gatos, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2004-2005 in accordance with the West Valley Communities' Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 2004 and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 04-05 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

Table of Contents
Cover Letter
Certification Statements
List of Acronyms

Program Elements:

1. IC/ID Elimination Activities
2. Industrial / Commercial Discharger Control Program
3. Public Agency Activities
    - Storm Drain O & M
    - Corporation Yards & Street Sweeping

- Rural Public Works

4. New Development: Planning Procedures
5. Construction Inspection
6. Public Information & Participation
7. Pesticide Management Activities
8. Mercury Pollution Prevention Activities
9. Copper Action Plan / Nickel Action Plan
10. Trash Inventory & Management
11. Water Quality Monitoring & Permit Re-application

No comments regarding the West Valley Communities FY03-04 Annual Report require a response, as listed in the San Francisco Bay Regional Water Quality Control Board letter to Mr. Dave Chesterman dated April 8, 2005.

Program Highlights and Accomplishments

During FY04-05, the West Valley Communities of Campbell, Los Gatos, Monte Sereno, and Saratoga continued efforts to implement their URMPs to the maximum extent practicable. The activities that were implemented for each element of each Community's URMP are described in Chapter 14 of the Santa Clara Valley Urban Runoff Pollution Prevention Program's URMP. Highlights of the West Valley Communities accomplishments in various program elements are described below.

Industrial/Commercial Discharger Control Program. During FY04-05, the three West Valley Communities of Campbell, Los Gatos, and Saratoga continued to implement their Industrial/Commercial Inspection Program. The goal is that all identified facilities will be inspected each year. The City of Monte Sereno has no industrial or commercial facilities operating within the City and therefore does not participate in this activity. In Campbell, 285 of 311 facilities were inspected (92%), 104 of 113 facilities were inspected (92%) in Los Gatos, and 8 out of 8 facilities in Saratoga were inspected (100%). Inspection reports by facility type and noted violations are included in the IND section of the Program Annual Report. Discharge violations decreased slightly over the past year from 25 to 20 facilities. Of the 20 violations, 13 were auto repair facilities. The West Valley Clean Water Program began a pilot program to target auto repair facilities during FY 01-02 with additional inspections and education. The pilot inspection program was instrumental in getting two automotive facilities to install car wash waste water capture systems. Each facility is given an initial on-site inspection with multiple drive-by inspections. All facilities inspected were in compliance by the end of the fiscal year. This is once more a testament to the benefits of increased scrutiny and education. Due to the success of this targeted outreach to and inspection of auto repair facilities, the pilot was adopted permanently as the West Valley Auto Shop Inspection Program. The procedures and accomplishments were shared with co-permittees in a presentation given by the West Valley Inspector at SCVURPPP's Industrial & Commercial Inspector training on April 5, 2005.

Public Information/Participation Program. In FY 04-05, the West Valley Clean Water Program continued to expand its quest for effective public education and outreach. WVCWP pursued media coverage on six topics: safe disposal of mercury-containing products, household hazardous waste, copper pollution prevention, creek clean-up events, trash cleanup and monitoring by students, a student's science project and his campaign to keep residential pollutants (pesticides and copper) out of the storm drain. Six stories were covered by local community newspapers in FY04-05, including a Saratoga News cover story about local students cleaning up and monitoring trash. The WVCWP was advertised on national television on 10-7-04. CNN interviewed David Marash-Whitman, a student who found the West Valley Clean Water Program via its website. David, at age 12, worked with WVCWP to determine the scope of his award-winning science project, "Ecotoxicology of Stormwater Pollution in our Aquatic Communities." David was chosen as one of top 40 Young Scientists and traveled to Washington D.C. to compete in Discovery Channel's "Challenge". David continues volunteer for the West Valley Clean Water Program and will be mentioned again in the annual report for FY05-06. WVCWP has been pleased to receive extensive media coverage in these stories, which would be beyond its budget scope if purchased as advertising space.

In FY 04-05 a new *Mercury* page was uploaded to *Cleancreeks.org*, two creek cleanup events were advertised on the Home page and new links were added to the *Links* page. A few months into FY 03-04, the West Valley Clean Water Program changed its website host in order to optimize tracking ability for the web site, www.cleancreeks.org. In the twenty-one month period ending on June 30th 2005, visitors averaged about 141 views per month totaling 2,962 Web Page views. This was a substantial increase from the website's 30 hits during its first month of operation.

The West Valley Clean Water Program strives to maximize student involvement at every opportunity. Staff developed a script incorporating fresh messages on pesticides, copper, mercury and trash for its new Coastal Enviroscape and revised the script for the Uplands & Wetlands Enviroscape model. Offering a second Enviroscape station allows West Valley Clean Water staff to teach 20 students every 25 minutes, rather than 10 students. The two fifth grade classes who tried this requested the same presentations for next year. The second Enviroscape allowss staff to elaborate on topics that would initiate changes in behavior. Messages apparently stuck with the students: while participating at a soil infiltration station, a student told the science docent not to empty the waste water near the storm drain.

Illicit Connection and Illegal Dumping Elimination Activities. The IC/ID program is working phenomenally well for all four West Valley Communities. The inspector not only responded to 82 discharge incidents over the year (see the IC/ID section for the number and types of incidences), but conducted 105 proactive and follow-up inspections. Each of these inspection opportunities adds to the business community's knowledge of storm water pollution and prevention issues. As part of the inspection process, the inspector distributes appropriate educational materials. Significantly, the West Valley Clean Water Program's Stormwater Inspector provided 790 brochures and other educational materials to industrial and commercial facilities in FY04-05.

C.3 Implementation. In July and August, 2004 the West Valley Clean Water Program updated all sections of each municipal URMP. A consultant met with staff in each city to review any remaining challenges with C.3 implementation. This year the cities each made progress in preparing for upcoming requirements such as HMP and Group 2 deadlines. In fact, the cities were each prepared to implement requirements on all tiers of Group 2 projects by April 15, 2005.

Pesticide Activities. The most realistic way to implement pesticide management is to provide meaningful training to municipal staff and the public. The WVCWP, in FY03-04 and FY 04-05 utilized significant staff time and resources to offer in-depth, hands-on workshops on specific pests and beneficial predators. WVCWP staff researched speakers, selecting presenters who could offer the optimum learning experience. In FY03-04 more than twenty attendees participated and gave positive feedback. In FY 04-05, thirty-seven municipal staff and stakeholders, such as school district personnel, golf course superintendents and pest control contractors attended; 15 earned Continuing Education Credits at the workshop.

Each of the four municipalities adopted two new Integrated Pest Management plans, one on armored scales and one on soft scales. Additionally, the West Valley Clean Water Program and the Program collaborated on events with a former partner, *Summer Winds Garden Center* in Campbell and began to promote a partnership with *Orchard Supply Hardware,* bordering Saratoga and Campbell. Customers were enthusiastic about IPM samples and materials handed out by WVCWP staff at the OSH "Tax-Free Day" events. The store responded positively to these efforts, which complement their goal of personalized customer service.

Continuous Improvement Activities

Public Information/Participation. The West Valley Clean Water Program received feedback from schools indicating that teachers are inundated with paper promotional products. At the end of FY 04-05 the WVCWP produced a CD/DVD music video/slide show of volunteers, especially featuring students, at local creek cleanup and trash monitoring events. The CD was dubbed with music, including the words: "With my own two hands I can change the world." While WVCWP has not obtained permission to use the music or all of the photos at this point, the CD has already entertained a few students and teachers. Schools will continue to be a primary focus of the West Valley Clean Water Program's outreach efforts over the coming year. In FY 05-06 The West Valley Clean Water Program will enhance its relationship with school teachers, principals and students to involve more participation in trash monitoring and school cleanup events.

Staff Training. The West Valley Communities place a strong emphasis on training. The Annual Reports reflect this with numerous references to the Staff Training Summaries; these Summaries are located at the end of each Element section in the Annual Reports. In FY 05-06 training will be expanded by use of a video camera to tape various trainings, so that additional staff can later receive the same information.

In July and August, 2004 the West Valley Clean Water Program updated all sections of each municipal URMP. In the Streets Maintenance and Storm Drain Maintenance sections, at least two continuing improvement items were identified: efficient training on community-specific storm water BMPs was needed for <u>all</u> maintenance staff. WVCWP held two round-table trainings in January 2005 and in June 2005, where a consultant provided presentations on streets, parks, and rural public works BMPs that were applicable to the West Valley Communities.

By Agreement, storm drain maintenance for the West Valley Communities has been handled by the West Valley Sanitation District since the late 1990s. In the course of updating the URMPs some potential gaps were identified due to an assumed understanding of the Agreement. All staff agreed that they wanted an opportunity to clarify the roles of each signatory to the Agreement. In June 2005, the West Valley Clean Water Program offered a forum for this discussion as part of the annual Storm Drain Supervisor's meeting. A consultant gave a slide show on BMPs for storm drain maintenance and for rural public works, and facilitated a discussion of the Agreement that left everyone on the same page as far as understanding the terms. The West Valley Clean Water Program will continue to prioritize better communication between WVCWP staff and municipal staff and to host effective workshops that are convenient for staff to attend.

Thank you for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact me at 408.354.4734.

Very truly yours,

Cheryl C. Donnelly

Monte Sereno

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

ILLICIT CONNECTION & ILLEGAL DUMPING ELIMINATION ACTIVITIES

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	Work Plan Activity	Work Plan Tasks	Accomplishments	Responsible Party
Update Perf. Standard	ICID Performance Standards	Work with Program staff to update Performance Standards, via Ad hoc task group & Management Committee participation. As available, review and provide comments on the applicability of the updated performance standards.	Monte Sereno and WVCWP staff updated the IC/ID PS in the City's URMP (Sept 2004).	SCVURPPP, WVCWP Inspector & WVCWP Manager Municipality to assist
URMP	Response Program	Continue implementation of response program	During FY 04-05, the WVCWP inspector responded to 4 reports of potential or actual stormwater violations in the City of Monte Sereno. He also made pro-active visits to two different sites (cleared lots) where single family dwellings will be built. Potential incidents are reported to WVCWP by SCC Fire Dept, the SCV Water District, and SCC DEHS, citizens, and WVCWP or Municipal staff.	WV Inspector
Work Plan	Enhanced Reporting	Report on incidents using expanded categories consistent with SCVURPPP Program. Document follow-through to point of resolution or referral for enforcement action (penalty or fine).	Although the WVCWP Inspector made changes to his incident tracking procedures and database during FY 04-05, Monte Sereno was not affected because the City does not have any industrial or commercial areas. Program categories are working smoothly for reporting and evaluating trends.	WV Inspector
URMP	Education	Distribute BMP materials during routine residential inspections.	During FY 04-05, the WVCWP Inspector distributed twenty-one (21) IC/ID informational materials in Monte Sereno, as part of his outreach and education program.	WVCWP Inspector
Work Plan comments RWQCB	Staff Training	WVCWP Inspector to conduct informal training & evaluation meetings with City staff.	The Inspector has started conducting informal round table meetings with municipal public works and building inspectors. In Los Gatos we have seen a big improvement in coordination between staff resulting in timely inspections	Building Inspector, and Assistant Engineer with WVCWP Inspector to co-ord

			and reporting. Saratoga's Associate Engineer participated in WV training meetings on 2-8-05 where the Inspector discussed a positive break-through (car wash kit being used by citizens) and a review of the IC/ID inspection program.	

ICID Report Data

Type of Incident 04-05	Incident Source	General Location	Report Source	Follow-up Action
• 1 Dewatering • 1 Dumping Non-Hazardous • 1 Landscape Materials • 1 Paint Discharge **Total 4**	• 1 Construction Site • 1 Other / Unknown • 2 Residential	• 4 Residential	• 2 Interdepartmental • 2 Citizen Complaint	• 3 Educational • 1 Verbal Notice Incident Status • 4 Resolved

IC/ID Program Evaluation

IC/ID Evaluation Of Trends

Out of four (4) reported incidents in Monte Sereno, one incident was actually not within the City's jurisdiction. On Hwy 9 (Cal Trans' responsibility) a pile of debris had been dumped after it had evidently been cleared from a ditch. This was during the rainy season (1-27-05). Los Gatos Public Works came out and cleared it.

There was one paint discharge violation where hired painters were seemingly washing brushes in the back yard and red water was flowing to the storm drain. WVCWP Inspector talked to the contractors and pointed out how the City has staff that patrols the area watching out for this kind of incident. He asked them to be especially careful to keep all liquids out of the storm drain and to rinse paint brushes in a sink or into lawn. The Fire Dept's Sr. Haz Mat Specialist also went out and talked to the contractors. He says workers seemed uneasy about the inspections the incident had initiated and thought that they wouldn't try rinsing paint materials outside again.

Two other incidents were related to construction. Landscaping material was left piled in the street and at another site a hole dug for a swimming pool was being pumped into the street. The Building Inspector for the City went out and told them they had to stop and the WVCWP Inspector suggested they drain the water to a dirt area.

The data shows about a 56% improvement in the number of incidents occurring in Monte Sereno during FY 04-05, compared to nine (9) various construction/ landscaping related incidents during FY 03-04. Monte Sereno Engineers are out regularly during rainy season patrolling the City (total land size is 1/5 sq miles).

Between their inspections and those conducted by the WVCWP Inspector I think that contractors probably expect one staff person or another to be stopping by from time to time. City and WVCWP staff keep an eye on any work that is going on in the City. The West Valley Clean Water Program office is located at Monte Sereno City Hall, next to the post office. Many residents visit the post office on a regular basis. WVCWP staff has taken advantage of several opportunities to educate residents as they find their way into the WVCWP office while looking for the post office.

Solution for Pool and Spa Discharges

One very likely discharge in the City is from pools and spas. The WVCWP Inspector discovered one solution in Saratoga to a rash of incidents relating to emptying / cleaning pools. His answer was to find at least one service maintenance company, whose staff provides pool maintenance. The Inspector visited the Manager bringing brochures and a little education for the staff. The combination of distributing door hangers to the residents explaining the incident that recently affected their neighborhood, and providing education to the employee's manager seems to have worked in resolving the problem. When Monte Sereno has incidents of this nature, WVCWP will respond with what seems to have worked in Saratoga.

Saratoga's Story

The WVCWP Inspector responded to pool water discharge calls five times between August 24th and October 27th in 2004. The incidents were each similar. By the time the Inspector arrived at the site, no one was there and the discharge was stopped. Each time he responded to a pool water call, he would knock on the door but nobody would answer. Then he would distribute the WVCWP door hangers, "Dumping into Storm Drains is Illegal…and it has occurred in your neighborhood." After checking the *Pool and Spa Water* box on the back of the door hanger, the Inspector would put it under door mats up and down the street. Saratoga has an ordinance against hanging door hangers in residential areas.

When he responded to the fourth pool water discharge call, the Inspector found a pool maintenance employee leaving the site. He issued an NTC (*Notice to Comply)* and noticed that the employee drove a truck from *Aqua Blu Pools*. Two weeks later the Inspector went out on another call and found a different pool maintenance employee driving a truck from the same pool maintenance company. The Inspector looked up the address for the company (in San Jose) and drove to the business office with about five Pool & Spa brochures. He told the Manager about the problem and that the City of Saratoga has staff on the watch for such incidents. The Manager agreed to deliver the brochures to the maintenance staff and tell them to use a sanitary sewer clean-out. Saratoga (predominately residential) will most likely continue to turn up more pool & spa discharges but after the Inspector's visit to the business office, there weren't any more reports of that type through the end of FY 04-05.

Note: The WVCWP Inspector's notes show that for several incidents *No Action* was listed as the enforcement action. There are three possible definitions for *No Action* in his records. 1) The Fired Dept or other agency reported the incident and took action, such as putting down absorbent; 2) the incident was corrected immediately and the Inspector provided some education or educational materials; or 3) *No Action* was taken because it was a *non-incident* or an *accident* where the person causing the problem was already informed. This also can account for referrals from other agencies being listed as *No Action;* The Fire Dept or other agency inspector gives a copy of the potentia*l violation notice* to the facility owner/ manager. When the WVCWP inspector arrives to conduct the follow up inspection, the owner has had time to complete cleanup or repairs to bring the facility into compliance.

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

PUBLIC AGENCY ACTIVITIES: OPERATION AND MAINTENANCE
Storm Drain Operations and Maintenance

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
URMP	a. Annual Storm Drain Cleaning	Continue contract w/ WVSD. Continue schedule/ annual cycle for cleaning storm drain system.	WVSD performs systematic storm drain cleaning and inspection annually. Because Monte Sereno is much smaller than the other 3 West Valley cities, all of the City's storm drain systems were inspected and cleaned this year. City contracts with McKenna Landscaping for additional and emergency cleaning as needed due to high leaf drop or storm debris. No problems encountered. This maintenance cycle and additional cleaning for problem areas is working well.	City Mgr co-ord contract
CI Item	b. Thermoplastic Storm Drain Stenciling	Continue installation of thermo-plastic storm drain stencils on all curbless storm drains.	Continued to monitor the resiliency of storm drain stencils on curbless storm drains. While two of the West Valley cities purchased and installed additional thermo-plastic stencils this year, Monte Sereno did not. (See evaluation section). During monthly WVCWP training sessions the Assistant City Engineer has continued to share feedback and strategize with the other cities regarding the most effective way to sign storm drain basins. Storm drain catch basins with the City are all appropriately signed.	WVCWP co-ord w/ municipality
URMP	Storm Drain O&M Training	Annual Training on street maintenance BMPs and annual storm drain cleaning.	The WV Storm Drain Op & Maint Supervisor's workshop was held June 2, 2005. Monte Sereno's Assistant City Engineer attended, along with staff from WVSD, WVCWP, and the other WV Communities.	Mtg led by WVSD; Attend by Asst City Engineer; Hosted by WVCWP

MONTE SERENO

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Storm Drain Operations and Maintenance Evaluation

Storm Drain Stencils On-going monitoring of thermoplastic stencils has shown that they are not superior enough in quality to merit their large additional expense. This is especially true now, while municipalities are dealing with severe staff shortages due to budget cuts. The difficulty of installation is also a consideration; they require a two-step application process, and the use of torching equipment. On the positive side, the City notes that the thermo-plastic stencils are durable in heavy traffic and are reflective, which provides visibility at night. Unlike the metal plates previously installed by the City, they adhere well to coarse and uneven surfaces, have not peeled, and do not have sharp edges that bend, creating a potential to injure pedestrians or bicyclists.

The City did not purchase and apply additional stencils this year as 2 other West Valley cities did, because most of the City's curbless drains already have thermo-plastic stencils. Staff time needed for application was also a deterrent. The City will continue to use painted stencils. However, in high traffic areas or where warranted, more thermo-plastic stencils may be purchased and applied on curbless drains as needed. Spanish and Vietnamese painted stencils may be added next year in areas of high residential construction work. The WVCs will pilot other means of storm drain signage as products are available and cost allows.

Storm Drain Op & Maint Training: One focus of the annual workshop was to review Municipal and District responsibilities to clearly define the roles of each agency & verify that every aspect of SD maintenance is being covered. The Workshop included a customized presentation for the WVCs by Jenny Fire, P.E. on BMPs for Storm Drain Maintenance, Street Maintenance and Rural Public Works. The cities participated in a round table discussion and compared maintenance practices. WV Sanitation staff distributed a summary of maintenance activities completed for each city, showcasing the District's new automated system for tracking inspections. WVSD can print out a history of the debris they've found in a storm drain line. This will be useful if history shows that the same lines have debris during each cycle. The cities/town may want to increase maintenance for those spots/lines to an annual rather than biennial schedule. The WVSD report also includes a list of construction deficiencies such as missing bike straps etc. Additional TV tracking of potential problem areas may be conducted by the WVSD at the request and cost of the city.

Photos were passed around at the SD maintenance workshop on June 2, 2005, showing debris that was pulled out of the SD lines in the early 90's when WVSD began the biennial cleaning cycle. Now the work is primarily preventative maintenance and the program is running smoothly. All other aspects of the storm drain operation and maintenance program are working well.

FY 2004-2005 ANNUAL REPORT

Street Sweeping/ Pavement Management				
Source	**03-04 Work Plan Activity**	**FY03-04 Work Plan Tasks**	**FY 03-04 Accomplishments**	**Responsible Party**
URMP	a. Street Sweeping Program	Continue schedule/ cycle for street sweeping (residential is monthly, by contract).	Monte Sereno has 28 miles of curbed street, all residential. Streets are swept on a quarterly schedule. The City contracts with the Town of Los Gatos for streetsweeping using a regenerative air sweeper. City contracts with McKenna Landscaping for additional leaf removal if necessary. This year an annual total of 217 curb miles were swept and 67 cubic yards of debris was collected with the following breakdown. See evaluation at end for explanation of dates swept. **July** 2, 2004 - **25 miles** swept; **5 cu yds** debris collected. **Nov** 15-12, 2004 – **76 miles** swept; **15 cu yds** debris collected **Jan** 14 – 15, 2005 – **48 miles** swept; **15 cu yds** debris collected. **Apr** 22, 2005 – **12 miles** swept; **5 cu yds** debris collected **Jun** 17-27, 2005 – **52 miles** swept; **25 cu yds** debris collected In addition to street sweeping, all residents and businesses are required to utilize large recycling bins for leaves and other yard waste as part of their trash collection service. A total of **1,020 tons of yard waste was recycled** by Waste Management Disposal Co. from residents in Monte Sereno during FY 04-05.	City Mgr co-ord contract
STREET SWEEPING/ PAVEMENT MANAGEMENT EVALUATION				
Street sweeping data collection was more carefully tracked this year. The streets are generally swept quarterly in September, December, March and June.				

MONTE SERENO

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

However, the schedule for FY 2004/2005 was off due to the sweeper being "down" some of the time. Monte Sereno was swept in July, Nov, Jan, April and June for FY 2004/2005. Monte Sereno has no commercial roads; all roads serve low-density, low-traffic residential areas.

CORPORATION YARD

Monte Sereno does not have a Corporation Yard; City Hall consists of two buildings plus parking lot, on less than 1 acre. All streetsweeping and street operations and maintenance work is handled by contractors.

Rural PW PS[1]	Rural PW PS	Performance Standard Continue implementation of Rural PW PS[1]	The model Performance Standard has been implemented. Current SOPs were updated in August 2004 as part of the City's revised Urban Runoff Management Plan, submitted in September 2004.	Municipality, WVCWP assist
Rural PW PS	Work Plan task	Hold Training meetings for appropriate Public Works staff on the use of current BMPs and SOPs, as noted in the performance standard.	Monte Sereno's Assistant Engineer attended a training meeting in Los Gatos, which included a Public Works presentation for the Town staff by Jenny Fire, P.E. Requirements were reviewed on the use of BMPs for local Rural Public Works. For more information see Pub Agency Staff Training Table at end of this section.	Municipality, WVCWP assist
Rural PW PS	Rural PW PS	Evaluate the effectiveness of Rural PW PS implementation and report on it in the FY04-05 Annual Rpt	No Rural Public Works construction took place this year. When future construction of Rural Publics Works takes place, measures will be implemented for erosion prevention and sediment control:	Municipality, WVCWP assist

Rural Public Works Program Evaluation

Stormwater BMPs are discussed in pre-construction meetings with contractors; the City inspects all contracted rural public works in its jurisdiction and ensures the use of stormwater quality and erosion control BMPs.

Potential erosion and sedimentation problems on existing rural roads include sloughing of banks above roadway onto road surface, and erosion of banks below roadway surface, due to run-off from surface of roadway. These problems will be reviewed for improvement if/when any upgrade takes place on an existing road.

MONTE SERENO

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

PLANNING PROCEDURES

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	Work Plan Activity	Work Plan Tasks	Accomplishments	Responsible Party
C.3.b Development Project Approval Process -- Planning Procedures				
Implement Ordinance, Policy or COAs	Permit C.3.b and C.3.c	Expand C.3 Implementation Ordinance, Policy, Procedures and Conditions of Approval will be implemented on all Group 2 projects to incorporate the requirements of provision C.3.	Monte Sereno's Municipal Code states that all new development and redevelopment projects are subject to the requirements of the City's current NPDES permit. Due to protracted negotiations regarding the Group 2 definition, the City decided to require C.3 compliance for Group 1 and *all* Group 2 projects, in accordance with Permit CAS029718 (as it stood before Order R2-2005-00035 was adopted on 7-20-05). This City requirement went into effect on April 15, 2005 for Group 1 and Group 2 projects not deemed complete prior to that date. (See Notice to Developers and Contractors (Attachment A).	City Mgr and City Engineer
C.3.c. Requirements for Group 1 and Group 2 Projects				
URMP: Planning Procedures Performance Std	C.3.c.6.	Continue implementation of Planning Procedures to comply with revised (FY03-04) Performance Standard in local URMP.	The model Planning Procedures Performance Standards, approved by the Water Board during FY 03-04, were reviewed by City staff; SOPs were updated and re-incorporated into the Monte Sereno's 2004 URMP in August 2004.	City Mgr; SCVURPPP guidance; WVCWP assist w/ URMP revisions
C.3.e Operation and Maintenance of Treatment BMPs				
BMP Inspection Program	Permit C.3.e	Implement local inspection program for treatment BMPs on all projects, to verify that proper O&M is being performed by the responsible party. (Program to assist in	As a condition of the development permit, each owner of a Group 1 project in Monte Sereno is required, by Municipal Code Section 08.040 to enter into a recorded covenant with the City for on-going operation and maintenance of all	City Engineer/Inspector and Assistant Engineer/Inspector

MONTE SERENO

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Source	Work Plan Activity	Work Plan Tasks	Accomplishments	Responsible Party
O&M Verification		defining which BMPs are priorities for inspection).	permanent on-site BMPs. This obligation runs with the land and is binding on all future owners of a Group 1 property. The City uses submittal requirements for subdivision approval to notify developers of this requirement. (All Group 1 and 2 projects will be subdivisions, since the City is zoned as strictly residential and does not have any large municipal projects).	
	Work Plan	Training & Evaluation Train inspectors and data managers on O&M verification program. Include evaluation of effectiveness and planned improvement to the program	The City Building Inspector attended the SCVURPPP Workshop titled "Conducting Stormwater Treatment BMP Maintenance and Inspections" on June 9, 2005. The Assistant City Engineer also attended a meeting with the WVCWP manager to review guidance on implementing the Verification Program (2/4/05). Monte Sereno has not yet had, nor does it anticipate any Group 1 or Group 2 projects in FY 05-06. Therefore, at the earliest, inspection of treatment measures would begin during FY 07-08.	City Mgr, City Bldg Inspector and City Engineer/ Asst Engineer
C.3.f Hydromodification Management Plan				
Hydromodification Management Plan	C.3.f. (C.3.f.viii)	Review and provide comments on the HMP products.	Monte Sereno, via the WVCWP Manager, participated in the periodic review, and offered comments on the development, of the HMP. The City also provided mapping data to determine percent of build-out and imperviousness within its local sub-watersheds, San Tomas Aquino and Guadalupe.	City Mgr WVCWP to assist
	(C.3.f.viii.5 and C.3.f.i. and C.3.c.i.)	Implement HMP, which shall include the requirements of provision C.3.f. Prior to approval of the HMP by the Regional Board, encourage early implementation measures likely to be included in the HMP. Summarize the Progress of incorporating treatment measures, in Annual Reports.	The HMP had not yet been approved by the Water Board during FY04-05. However, Monte Sereno restricts runoff from major new and redevelopment projects and required detention or retention measures (e.g. dry wells) on projects during FY04-05. See significant projects listed in evaluation below.	City Mgr, City Engineer, Assistant Engineer

MONTE SERENO

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Source	Work Plan Activity	Work Plan Tasks	Accomplishments	Responsible Party
	FY04-05 Work Plan, RWQCB comments	Training Attend Program workshops on HMP and provide in-house training as appropriate.	On 2-4-05 City Assistant Engineer attended a WV round table discussion / training on likely HMP requirements and exemptions and possible methods for early implementation. City staff will attend SCVURPPP sponsored workshop(s) on the approved HMP during FY05-06.	SCVURPPP; City Mgr or Engineering Staff; WVCWP to attend
C.3.g Waiver and Compensatory Mitigation Program				
Waiver Program Staff training and reporting	C.3.g.3 (Permit C.3.g.v.)	If a waiver & compensatory mitigation program is adopted, document in each annual report, all waivers granted according to permit provision C.3.c.g for Group 1 and Group 2 projects. Include: project name, location, type, percent impervious surface, reasons for and terms of waiver, and the alternative benefit project and completion date.	Waiver program was not adopted during FY 04-05 and none is anticipated in the near future. All Group 1 and Group 2 Projects must meet NPDES requirements for stormwater treatment measures.	City Mgr
C.3.h Alternate Certification				
Alternate Certification reporting	(Permit C.3.h)	If alternate certification is used, list the Group 1 and Group 2 projects certified by someone other than City Staff.	The City requires the project applicant to be responsible for having all stormwater measures certified for adequacy, according to the requirements of Provisions C.3.d & C.3.f and C.3.h. The City will require proof that each certifier has been adequately trained on BMP design for water quality. No alternate certifications were required since there were no Group 1 or Group 2 projects approved in Monte Sereno in FY 04-05.	City Mgr/ Planner WVCWP to report
C.3.j Site Design Measures Guidance and Standards Development				
Site Design Measures Guidance and	(Permit C.3.j.)	Implement revised local site design standards and guidance, according to Permit C.3.j. by 9/15/04 (Report on progress in Sept. '04 AR)	The City submitted a response to SCVURPPP's recommendations in the "Development Policies Comparison Worksheet" in September 2003.	City Mgr/ Planner SCVURPPP (guidance)

MONTE SERENO

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Source	Work Plan Activity	Work Plan Tasks	Accomplishments	Responsible Party
Standards Revision		Reference: • City's 9/15/03 submittal labeled *Site Design Standards and Guidance Review,* from SCVURPPP (on CD); • "Development Policies Comparison Report" worksheet, from SCVURPPP (on CD, 4/2003); • Notes and information from the SCVURPPP Site Design Dialogues & Workshop (FY03-04)	The City's submittal of an updated implementation status using the format of the *Site Design Standards and Guidance Review* was included in the Planning Procedures section of the FY03-04 Annual Report. Progress during FY 04-05 includes working to secure a $1.9 million grant to work with Cal Trans on putting bicycle paths along Hwy 9 (Saratoga-Los Gatos Road) in Monte Sereno, Los Gatos and Saratoga. The planning and engineering phase of the project will probably begin in October 2005. In addition, the City Engineer participated in the Water Resources Collaborative during FY04-05 and the City Manager/ Planning Director plans to bring the approved *Guidelines and Standards* to Council as soon as they are finalized.	
C.3.k Source Control Measures				
Implementation of Source Control Measures	C.3.k.3 (Permit C.3.k. last paragraph)	Implement source control measures requirements by including appropriate conditions of approval in Group 1 and 2 projects. Stormwater pollutant **source control measures** will be encouraged for projects of all sizes where practicable.	Source control measures for development projects are required through City Code Section 8.04.180-B.1, Reduction of Pollutants in Storm Water. No changes to source control requirements in FY04-05.	City Mgr/ Planner
C.3.m Water Quality Review Processes				
CEQA Review	C.3.m.1	Dischargers shall evaluate water quality effects & identify mitigation measures when conducting Env Review Process for all projects. Report on changes to the Environmental Review process, if any.	The City of Monte Sereno ensures that the environmental documents required for projects that fall under CEQA review address both significant and cumulative stormwater quality impacts during the life of the project, and specific mitigation measures related to stormwater management.	City Mgr/ Dir of Planning

Source	Work Plan Activity	Work Plan Tasks	Accomplishments	Responsible Party
			The City Manager/Planning Director prepares the CEQA Initial Study checklists for private development and City projects using a checklist format revised to include recommendations from the Regional Water Quality Control Board and SCVURPP related to Provision C.3.m stormwater requirements. There were no changes to the City's environmental review during FY04-05.	
C.3.n Reporting Requirements				
Source Control Measures Reporting	Permit C.3.n.i. (C.3.c.)	Reporting on Source Control Measures Use the Planning Procedures Performance Standard Reporting Form to provide detail in annul reports, on implementation of Source Control Measures for all Group 1 & Group 2, new and redevelopment projects: --project name, location, type (per C.3.c.), size (ac. or sq.ft.), and impervious surface area. For redevelopment projects, include area of land disturbance.	No changes to source control requirements in FY04-05.	City Mgr/ Planner to collect data WVCWP to prepare report
Treatment Measures Reporting	Permit C.3.n.ii. (C.3.d.and C.3.e.)	Reporting on Treatment Measures For projects that must implement treatment measures, report which treatment BMPs were used and numeric-sizing criteria employed, the operation and maintenance responsibility mechanism including responsible party, site design measures used, and source control measures required.	If Group 1 or Group 2 projects were built in Monte Sereno, all stormwater treatment BMPs would be inspected annually by the City Engineer or Assistant Engineer. A hard copy file of the inspection forms and results will be kept for each project. Also, the Assistant City Engineer will keep a list of Group 1 and Group 2 projects in an electronic format, including the stormwater BMPs and annual inspection results. Since Monte Sereno is made up of 99% single family dwellings, and is purely residential, the list of SW treatment	City Mgr/ Planner to collect data WVCWP to prepare report

MONTE SERENO

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Source	Work Plan Activity	Work Plan Tasks	Accomplishments	Responsible Party
			inspections may start out with only 1or 2 sites and remain that size indefinitely.	
Pesticide Control Measures Reporting	Permit C.3.n.iii.	Reporting on Pesticide Reduction Measures Collect information and report a summary of types of pesticide reduction measures required for development Group 1 & Group 2 projects and the percentage of projects for which pesticide reduction measures were required.	SCVURPPP Landscape Maintenance Techniques for Pest Reduction, containing design guidance for landscaping is handed out during the development approval process. Monte Sereno's Municipal Code 10.08.050, Section B.5, requires the use of native vegetation in landscaping. There is also a standard condition of approval calling for the use of pesticide control measures as part of landscape planning and design. These measures apply to all development projects.	City Mgr/ Planner provide data. WVCWP to report
C.3 Training & Evaluation				
Work Plan, RWQCB comments	Training	Train appropriate staff (i.e. planning, building, and engineering divisions) on new policies, procedures, & C3 provision requirements listed above (may include SCVURPPP workshops).	The City's Building Inspector attended SCVURPPP's BMP O&M training on 6-9-05 to become familiar with BMP inspection requirements and proper implementation. Training on C.3 implementation requirements takes place on a regular basis between the City Manager/ Planning Director and City Engineers during routine staff meetings.	City Mgr, WVCWP & SCVURPPP, as appropriate

MONTE SERENO

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Planning Procedures Evaluation

Site Design and Source Control measures are being required on all new development projects via Monte Sereno's "Residential Design Guidelines" and Monte Sereno's Site Development Permit requirements. The City continues to encourage stormwater measure, including flow controls, on all projects. Developers and property owners and developers are receptive to the suggestions, making the process run very smoothly. BMPs used during FY04-05 include the following, all part of single-family residential projects:

1. Rocky swale at 18211 Bancroft
2. Permeable pavement at 17990 Daves Avenue
3. Gravel-paved driveway at Becky Lane – the gravel-paved driveway, consists of gravel with plastic cells or rings that give it a stronger structure. The voids between the gravel will allow water to infiltrate. If covered with a layer of gravel so the plastic rings are not exposed, it's not bad looking.
4. 15965 Grandview Ave – Received Bldg and Grading permits 9/3/04, incorporated a vegetated swale per recommendations from the Development and Technical Review.
5. 16330 Greenwood Lane – Received Bldg and Grading permits 10/20-/05, minimized impervious surface and incorporated a vegetated swale per recommendations from the Development and Technical Review.

NOTICE
to
Developers & Contractors

State of California
STORMWATER REGULATION CHANGES

This Notice is to inform you of changes to existing **Stormwater Quality Regulations**

NPDES Construction General Permit

As a result of recent state regulatory actions, effective immediately, all construction projects **disturbing an area of one (1) acre** or more are required to comply with:

State of California
"General National Pollutant Discharge Elimination System (NPDES) Permit for Discharges Associated with Construction Activities" ("Construction General Permit")

The size threshold for this permit had previously been 5 acres of disturbed land.

Compliance with this permit requires ALL of the following:

- Applicant to submit a Notice of Intent (**NOI**) and pay an annual fee during the project's construction period to :**State Water Resources Board – see website below for fee schedule**
- preparation of a Storm Water Pollution Prevention Plan (**SWPPP**)
- use of City Approved Best Management Practices (**BMP**s) to control storm water runoff,
- Daily BMP inspection and maintenance by applicant to determine adequacy and maintenance

For copies of the Construction General Permit, the NOI, and additional permit information consult the State Water Resources Control Board web site at:

http://www.swrcb.ca.gov/stormwtr/construction.html

STORMWATER QUALITY REGULATIONS
Amended Development Project BMP Requirements

1. In order to comply with the City's State-issued **NPDES permit, No. 01-119**, Monte Sereno & other public agencies in the Santa Clara Valley are required to place additional Conditions of Approval related to storm water quality control on certain development projects. **As of April 15, 2005, non-exempt projects creating or replacing 10,000 sq. ft. or more of impervious surface**, including roof area, **must incorporate design, control, and engineered treatment measures** to prevent pollutants from being washed into creeks and streams by stormwater runoff from new and re-development sites.
2. Conditions of approval will include the use and maintenance of BMPs for site design and storm water treatment, which must be designed per approved numeric sizing criteria. Owners of properties with treatment BMPs will be required to certify on-going operation and maintenance.
3. Fill out impervious surface data form
4. Design criteria for BMPs:
   Flow control formula or volume control formula- use:

   CASQA Storm Water BMP Handbook (www.cabmphandbooks.com)

   and C.3 Stormwater Handbook - May 2004 (www.scvurppp.org) -- link to:

   "Reports & Products 2003-2004", find "Guidance Manual"

MONTE SERENO

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

CONSTRUCTION INSPECTIONS

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
	URMP	Staff Training Participate in and support SCVURPPP sponsored workshops/ info sessions on erosion control and construction BMPs; support distribution of related materials.	On October 12, 2004, the City Building Inspector and Assistant City Engineer attended the Water Board's Construction Site Management and Erosion Control BMPs Workshop.	City staff to attend WVCWP to co-ord w/ SCVURPPP
	URMP	Construction Inspections Continue construction site inspections for stormwater issues (i.e., mudtracking, mat'l storage, housekeeping, etc.).	Monte Sereno had approximately 25 active grading permits from October 1, 2004 to April 15, 2005 (all single-family dwellings not part of a larger common development). In early fall, letters were mailed to property owners and contractors reminding them that Municipal Code Section 9.04.120 requires erosion and sediment control materials to be onsite by October 1st and in place before October 15th or a "stop work order" will be issued. Periodic monthly inspections are conducted by the City Engineering staff including inspections before, during, and after every major storm event. Sites with potential problems are inspected at least once a week but not more than twice a week. Citizens will call if erosion control is not installed correctly. See the Evaluation Section below, and the attached Construction Inspection Incident Table, for information on enforcement actions taken in FY '04-'05.	City Mgr & Const Insp / Eng Staff

MONTE SERENO

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

	Program	Construction Inspection Performance Standard Implement revisions to the Construction Inspection Performance Standards (e.g., documenting and reporting enforcement actions and implementing process for graduated levels of enforcement).	In summer 2004, as part of revising Monte Sereno's URMP, WVCWP and Monte Sereno staff updated the documentation of SOPs in the City's Construction Inspection Performance Standard. The Water Board's Performance Review questions for Monte Sereno, from December 2003, and the City's responses were added to the URMP for reference. This addition took place after the Sept 2004 URMP submittal	City Mgr & City Inspectors & WV Insp by referral

Construction Inspection Evaluation

Construction Site evaluation of trends:

FY04-05		Previous Year - 03-04	
Dewatering	1	Tracking Soil	2
Complaint not found	2	Grey Water Discharge	1
		Landscape Material Dumping	1
Total Number of Incidents	1		4

Potential incidents reported by other agency staff or citizens are inspected and re-inspected by the WV Inspector through to final resolution. This year, the WVCWP Inspector went out on 3 potential incident reports. See the Construction Site Inspection table following this section.

The number of incidents was down from the previous year. Dewatering accounted for 1 incident during FY '04-'05 and 2 reports were actual non-incidents. Last year, Monte Sereno reported two tracking soil incidents; one pile of dirt was in the street from a resident filling in a pool and one mixer of stucco was leaking water into the street. Monte Sereno is physically a small City (1.5 sq miles), so it is easy to patrol and provide education as needed. Having only one incident to report may be an accurate representation of the level of cooperation by developers and contractors working for property owners within the City. See the Construction Site Incidents Table following this section.

Challenges to attending Construction Site Erosion Workshops, October is the worst month to attend a construction/erosion control workshop. Construction inspectors are, at that time, rushing to meet Monte Sereno's October 15th deadline to be prepared for the rainy season. Construction /Erosion workshops in October and November are not practical for WV municipal staff. Resolution – WVCWP arranged with a Planner from the SF Estuary Project to hold the Santa Clara Construction/Erosion Control Workshop on Dec 8, 2005, at Campbell's Community Center.

The Monte Sereno Construction Inspection Program works well – Continued public outreach efforts and further training and communication between municipal inspection staff and the WV Stormwater Inspector will serve to strengthen the Program.

MONTE SERENO
Construction Site Inspections Annual Report FY0405

#	ICID Date	Contact	Incident Address	Report Source	Incident Type	Enforcment Action	Inspector's Notes	Incident - Status	Follow-up Notes	Compliance Date
1	12/30/2004	resident	15116 Via Lomita, Monte Sereno	Interdepartmental	Dewatering	No Action	Lisa, MS, called me. Resident was pumping water from hole dug for pool directly to a SD. Howard Bell, MS, went out. Made them stop. Told them to pump it to a dirt area on site. I also went out. They were gone. All AOK.	Incident - Resolved	See findings. All OK now.	30-Dec-04

FY 2004-2005 ANNUAL REPORT

Note:

In order to prevent redundancy, the PI/P table has been created as one table for all four WV Communities.

Activities sponsored by an individual community are noted where appropriate.

PI/P activities for the WVC tend to be attended by residents from several WV communities, and many of the PI/P tasks are handled by WVCWP for all communities at once. In addition, a number of schools serve residents from more than one community.

A. SCV Program Projects/Support				
SCV Program PMP (II.A.1)	General Outreach	a. Watershed Education and Outreach Campaign Support multi-year watershed education and outreach campaign. WVCW Pgm Mgr assists via WEO Ad hoc Task Group. Participate in campaign development and special projects. Campaign will include funding for educational programs at the Alviso Ed Center and funding for ZunZun performances in local schools. Continue establishing partnerships with local recreational attractions to promote watershed messages. (i.e. Happy Hallow Zoo and Bonfante Gardens) See SCVURPPP Project Work Plan for details.	WV Communities (WVC) support the multi year Watershed Education Outreach (WEO) campaign. Program Mgr is active in the WEO AHTG and in the Schools & Youth Education Outreach Subgroup. **Zun Zun Assemblies** Letters and emails were sent to several local WVC Elementary schools informing them about the free sponsored ZunZun Assemblies available to their students. All schools which participated received two (2) vocabulary lists (one for K-2 and one for 3-6) and an information sheet about the assembly content for teachers to refer to. Teachers were asked to familiarize the students with the vocabulary words prior to the assembly. Three (3) WVC schools participated in the assembly. Castlemont Elementary, Campbell **742 students**	WVCWP Staff

NPDES Permit, PMP (II.A.12)	Targeted Outreach	b. Pesticide User Outreach Project Provide funding and participate in implementing IPM Store Partnership and Household Chemical Management Projects. Project scope will include items in program's Pesticide Management Plan based on provision c.9.d. of the Permit for outreach to residents, commercial businesses, and pest control operators.	WVCWP continues to partner with the ***Summer Winds Nursery*** in Campbell in educating the general public on less-toxic methods to control pests. This year a seminar was held for all employees (Feb. 2nd) with speaker Annie Joseph. Topics included less toxic pest management and child and pet-safe solutions for homes and gardens. Employees will be able to relay this information to their customers.	WVCWP Staff
CI, Discretionary Project	Educational Outreach	c. Schools Outreach and Watershed Education Continue a pilot study on Wacky Watershed's, 6th - 8th grade curriculum, consistent with state required education standards and current watershed campaign messages. Evaluate effectiveness and appeal by providing training to teachers and soliciting their evaluations.	In previous years, WVCWP made numerous attempts to meet with 6th - 8th grade science teachers concerning "Wacky Watersheds" but did not receive responses. WVCWP then took a new approach which has proven very successful: since the **Calif. 5th grade** curriculum addresses "Keeping Water Clean" and "Pollutants Travel" in its Water Unit, WVCWP developed an Enviroscape-based 5th grade curriculum addressing these topics. Wacky Watersheds' messages have been incorporated into this curriculum. One rotation station features the Wacky Watersheds video "It's Wet, It's Wild, It's Water". WVCWP gained teacher invitations to present this curriculum to five different 5th grade classes in FY 04-05 (appx. 145 students participated). **Teachers' evaluations state** "Thanks for coming!" and consider that the program *"very much"* helped students learn about watersheds, learn to avoid residential runoff	WVCWP Staff

URMP	Targeted Outreach	2.B.a Distribute materials Provide pesticide management materials to: 1) nurseries and hardware stores for distribution at point-of-sale; 2) pest control operators and landscapers, and 3) municipal employees.	Summer Winds Garden Center in Campbell maintains an IPM materials literature holder for which WVCWP provides some of the outreach material. 50 Grow-It Guides were distributed here in FY 04-05; distribution was delayed by the store's recent change in management, and changing requests for type of display rack (floor vs. wall-mounted). Orchard Supply Hardware (bordering Saratoga & Campbell) allowed WVCWP to place an IPM basket display "Grow-It Guides" in their checkout area; 50 Grow-It Guides & 20 "A Child's Garden" coloring books were part of the display. Pest Control Contractors and Landscape Contractors for all WVC were contacted with information/invitations for the March 2005 free IPM training sponsored by WVC through WVCWP. CEUs for Pesticide Applicators and Nursery Professionals were offered. 1 Pest Control Contractor and 1 independent Landscape Contractor attended.

EVALUATION

IPM Materials: The "Soil Matters" 32 page booklet was very-well received by the AgroEcology science class at Los Gatos High school, and will be kept as class reference material and incorporated into the curriculum for that class.

The "Grow-It Guide" continues to be the most popular IPM literature. Although WVCWP and the cities/town make available a variety of IPM materials at public places and community events, it is most common for residents to pick up only the Grow-It Guides. Among the IPM fact sheets, residents seem most interested in the Roses sheet and the Beautiful Lawns sheet.

Items for children are also popular – see 2.B.k "Coordinate Watershed Education with schools" below. One of the most popular items has been the "Our Water Our World" picture frame magnet. While the magnet doesn't give actual IPM advice, it features the web site address, and it is hoped that residents will visit the web site (partially funded by SCVURPPP) as it is an excellent resource. The "Kids Guide to Backyard Bugs" is always popular, but supplies are very limited, so these are distributed sparingly. Many more would be taken, if they were available.

WVCWP has had the most success in providing IPM material to the Master Gardeners classes at the Campbell Community Center, since these supplement the instructor's information, and attendees have an interest in gardening (see Pesticide Mgmt Section for details). It appears that there would be an interest in at least basic IPM info in any of the gardening classes in this series. In FY 05-06 a more concerted effort will be made to get some IPM materials to each of these classes, rather than just distributing to the Pest Management class, as was done this year.

In the WVC, it appears that quite a bit of residential landscape care is handled by very small landscape businesses. WVCWP continues to search for a means of reaching residents who use these services and who could request a change in pesticide use from their contractors. Discussions with Licensed PCOs indicate that residents call them after the small (probably unlicensed) contractors spray a variety of chemicals without successful results. This means that not only are residents resorting to pesticide spraying, they are ending up with more spraying than is actually needed, if the work was initially done correctly. It would be helpful to have material which could simply and quickly educate residents on this matter.

Household Hazardous Waste / Copper – Nickel / Mercury / *Other:*

Staff created a variety of flyers this year focusing on Mercury, especially the need to recycle Fluorescent Light Bulbs – See" New Creations by WVCWP" below for details.

WVCWP staff created a colorful outreach piece related to Copper (aimed at Car Wash Fundraisers --see" New Creations by WVCWP" below), but see a need for a general piece on Car Washing which would explain the reasons to avoid car wash runoff into storm drains. This would be especially helpful if the appearance appealed to a high school/ young adult age group who might be likely to wash at home rather than using a car wash. In addition, staff usually receive questions about copper water pipes when trying to explain the copper/brake pad/water pollution issue. Based on this, and the same questions related to architectural copper, it appears that some sort of outreach piece on copper would be useful. Staff have not yet found any outreach pieces which would serve as good models on these subjects, but will continue looking into possibilities. The Car Wash Kit flyer will be distributed to schools in FY 05-06.

EVALUATION

The Stormwater Discharge Inspector has found that the best outreach item for restaurants is the “Good Cleaning Practices for Restaurants poster, which incorporates 6 pictures of proper cleaning BMPs. The piece is 12”x36” and can be hung either horizontally or vertically; the paper has a greaseproof coating. Unfortunately, WVCWP only has 8 of these left, and they have been distributed very sparingly, depending upon need and interest. SCVURPPP does not have any available on request. The poster was originally part of a 6 piece packet. WVCWP will investigate whether there might be any means/interest/funding for re-printing the poster alone.

The Discharge Inspector also sees a need for a simple piece on Car Washing which would explain the reasons to avoid car wash runoff into storm drains (as discussed above in "Materials Distribution – HHW/ Copper-Nickel"). Los Gatos has had good results with a doorhanger carried by the streetsweeper. When evidence of potential runoff pollution problems are encountered (such as grass clippings in the gutter) the resident receives notification/education through use of the doorhanger.				
New Creations by WVCWP / WVCWP Materials Distribution				
	General Outreach	.B.a WVCWP: Creation of new outreach materials **not part of Work Plan – additional activity**	**Created "With Your Own 2 Hands" – digital music video/ slide show** This DVD highlights Creek Clean-up volunteers and water pollution prevention. It shows *Creek Keepers Volunteers* with trash grabbers and clipboards as they clean creek sites and conduct trash monitoring, along with the creeks' natural beauty, and creek trash problems. WVCWP created this piece as outreach to encourage participation in Creek Clean-ups and to increase awareness of the problems of trash in creeks. WVCWP is discussing potential methods of having teachers and youth group leaders view the video to encourage schools/ scout troops, etc. to partner with WVCWP in Creek Clean-ups. This activity was chosen as an alternative to creation of a WVCWP newsletter this year (see 2.B.h below). The show was created at no extra cost, using existing computer software and existing photos from WVCWP

			creek clean-ups.	
	Educational Outreach	.B.a WVCWP: Creation of new outreach materials **not part of Work Plan – additional activity**	**Created Ground Water Pollution Lesson – High School level** Distributed to Los Gatos High School Science teachers and Youth Science Institute staff (see 2.B.k "Coordinate Watershed Education with schools")	WVCWP Staff
	Educational Outreach	.B.a WVCWP: Creation of new outreach materials **not part of Work Plan – additional activity**	**Created 5th Grade Science – Water Curriculum "Pollutants Travel" & "Keeping Water Clean"** – 2x 20 minute presentations, 1 for Coastal Region Watershed Model, 1 for Upland Region Watershed Model. (see 2.B.k "Coordinate Watershed Education with schools")	WVCWP Staff
	General Outreach	.B.a WVCWP: Creation of new outreach materials **not part of Work Plan – additional activity**	**Created Pet Waste Pollution Poster** WVCWP was able to arrange for a free digital/ printable poster with WVCWP logo through "Earth 911". The poster has a humorous, eye-catching look and WVCWP has been using it with good response during school Enviroscape presentations. Text includes: "If you think picking up dog poop is unpleasant, try drinking it… Pet Waste washes into storm drains, polluting our rivers, lakes and drinking water sources. Get the scoop." Staff is discussing additional means of putting the poster to use, and obtaining posters on other topics.	
	General	.B.a WVCWP: Creation of new outreach	**Created "HHW – Mercury" Display:**

	Outreach	materials **not part of Work Plan – additional activity**	Color posters highlighting fluorescent light bulbs as HHW were created and attached to 3 tier literature racks. Flyers advertising the free WV HHW Drop-off event were created; these also highlighted proper disposal for Mercury products. Additional material in the displays included the SC County HHW brochure, and WVCWP's "Keep Your Family & Water Safe from Mercury". At least 1 display was placed in each WV community at a library &/or community center or post office.	
	General Outreach	.B.a WVCWP: Creation of new outreach materials **not part of Work Plan – additional activity**	**Created 2 new Mercury Flyers (from Mercury Ad and Mercury article – LA Times)** **"Would You Eat It?"** highlights dangers of mercury in the environment, sources of mercury and where to recycle products (list of local participating hardware stores), and fish to avoid due to mercury contamination. An article from the LA Times (detailing a recent study on mercury in the environment and links to autism) was reprinted and distributed with the Would You Eat It? flyer. These were well-received when distributed at the LG Farmers' Market. All 15 were taken and more could have been given out, if available.	
	Targeted Outreach	.B.a WVCWP: Creation of new outreach materials **not part of Work Plan – additional**	**Created Car Wash Kit Flyers** WVCWP created a Flyer for each City/Town, including reference to the relevant Municipal Code for Stormwater.	WVCWP Staff

		activity	The flyer directs residents to contact WVCWP for free use of the Car Wash Kit whenever a fundraiser car wash will be conducted. The flyer is available at Municipal offices for residents who might ask about any necessary permits for their fundraiser. WVCWP has also initiated distribution of the flyer to schools. See Copper Section Attachment A	

EVALUATION

The new curriculums for the 2 Enviroscapes appeared to appeal to the students; students remained very engaged when they participated in their 2nd Enviroscape station and no one expressed any frustration that the 2 presentations were similar. Staff worked hard to create activities that would be unique to each model, and also to stress a few similar but important points in both models. WVCWP will continue to use the 2 presentations together when space at a school allows for this.

WVCWP continues to discuss creation of some type of material which could be distributed to classrooms when the Enviroscape is presented. However, since students bring home so many papers from school, it is felt that any piece would need to appear unique. While the calendar produced last year was unique, useful and popular, the current budget situation does not allow for printing of new calendars each year, and has never allowed for printing enough for the calendars to be 'take home' material.

The curriculum on infiltration and pesticide pollution, created for the Ground Water Flow Model, was a very effective teaching tool, according to the High School Science teacher. The presentation has been requested for the 05-06 school year.

The Mercury Warning flyer (see "Mercury Ad – Attachment A" in Mercury Section) was handed out with an article on Mercury & Autism, reprinted from the LA Times. Residents appeared to be very interested in both pieces. 15 of each were printed for a trial at Los Gatos Beautiful; all were taken, and many more could have been distributed.

The Car Wash Kit flyers were created to meet a need for getting this information to the public. The Town of Los Gatos web site's Public Works page had some of this information, and WVCWP has received a number of calls based upon this page. The flyer was created as a means to easily get the information to schools; it has also been posted in municipal offices. It generated a call from one Los Gatos school district, which is now looking into setting up its own car wash kit. It will be distributed widely in FY 05-06 and will be posted on the WVCWP web site.

URMP, PMP (II.A.4.)	General Outreach	b. Participate in Community Events Promote watershed messages by participating in community events (e.g., farmers market, festivals, creeks clean-ups, etc.). Conduct or participate in local activities that are coordinated with the Watershed Education & Outreach campaign, including outreach events targeted at pesticide users.	WVCWP partnered with the local Sierra Club chapter & Audubon Society to feature a table at Audubon's annual October "Wildlife Education Fair". The table featured: the Enviroscape hands-on watershed model demonstrating various types pollution in runoff, a display on dangers of diazinon for birds, and IPM materials. The Sierra Club distributed California Golden Poppy seeds to promote pest-resistant planting. Attendance at the fair was a bit lower this year, due to rain. However, the table attracted appx. 25 children, some of whom stayed for 2-3 presentations. Parents watched the presentations from behind their children. The City of Campbell conducted outreach through its Arbor Day activity (April 19th) and Community Clean Up Day (April 23rd – 95 participants) and distributed a variety of materials, including IPM & HHW. The Town of Los Gatos conducted outreach through its Farmer's Market /Los Gatos Beautiful Celebration (April 2005). WVCWP staffed booths at the event and distributed a variety a materials. The City of Saratoga conducted outreach through its Building Bridges event (October 2004) and its Mustard Walk (Feb. 2005). A variety of materials was distributed by City staff at both events. WVCWP organized a Creek Clean-up Event with Sacred Heart School in Saratoga (students from all WVC). Appx 60 students and 5 parents participated. The beginning of	WVCWP Staff

FY99-00 Annual Report, PMP (II.A.10)	d. Press Releases	WVCWP will prepare press releases, feature articles and/or PSAs for local media on topics such as proper disposal of HHW, pesticides, copper, mercury and trash.	The WVC Trash Monitoring/Creek Clean-up program received excellent press coverage due to a Press Release submitted to the Saratoga News weekly paper. An extensive article on the clean-up ran on the front page, coinciding with Earth Day April 2005. The article highlighted WVCWP's Trash Monitoring activities, schoolyards as 'Trash Hot Spots', the problems of trash flowing to the SF Bay, the Clean Water Act and more. It included student interviews and photos. (See Trash Management Section for a reprint of this article). A Press Release/Article on mercury toxicity, fluorescent light disposal, and the upcoming HHW WV Drop-off event, was submitted to the SJ Mercury News and the 3 WV weekly newspapers. Several papers shortened the article	WVCWP Staff

			and ran it (October 2004). A Press Release/Article on a Saratoga student's award-winning Residential Runoff/ "No Dumping-Flows to Creek" science project was submitted to the SJ Mercury News and the 1 WV weekly newspaper. The SJ Mercury shortened the article and ran it (October 2004). WVC received national TV coverage in relation to the above article. The press release had been sent in reference to the student and his project appearing on the television news channel "CNN", as a winner in a national science contest. The student appeared on CNN with a large version of the WVCWP stormdrain stencil and a version of his science project "No Dumping – Flows to Creek". A Press Release on the upcoming IPM Training for WVC Parks staff, and the WVC focus on use of IPM, was submitted to the gardening columnist for 3 WV weeklies (March 2005). Two "Letters to the Editor" concerning architectural copper were submitted to 2 local weekly papers in response to a letter from the 'Copper Development Assn'. The Saratoga News weekly printed an article on local vineyards' efforts to meet Water Quality regulations by preventing erosion and pesticide runoff (a conference on the issue was held at a Saratoga Vineyard).

Public Information/Participation Program Evaluation

Educational Outreach

The West Valley Clean Water Program will continue to build on the success of the existing public education program, with one of the main activities being outreach through schools.

WVCWP piloted 2 new programs for public schools this year: A "Coastal Watershed" Enviroscape (to supplement the "Uplands Watershed") and a Ground Water Pollution Model activity & curriculum.

WVCWP purchased a new and different (Coastal) *Enviroscape* specifically for targeting students. New outreach materials and activities were developed for this model. It was piloted with a middle school class as 1 of 3 stations relating to "Keeping Water Clean" & "Pollutants Travel". Students appeared to enjoy the opportunity to use the 2 different Enviroscapes, and to learn about different issues with each. The teacher expressed appreciation for an excellent program. It is anticipated that this system (3 stations using 1 video and 2 Enviroscapes) will be the standard WVCWP presentation for 5th grade students.

The WVCWP's Enviroscape/ Water Unit presentation in general is well-received and appears to be an effective educational tool. Students participated enthusiastically in these hands-on activities. Students came up with very good pollution solutions and identified their local watershed at the end of the presentations.

From the Youth Science Institute, WVCWP borrowed a Ground Water Flow Model. It was piloted in a 5th grade classroom and a high school science classroom. It appeared to fit best into the high school science class. An activity and curriculum were developed, focusing on pesticide pollution of groundwater. The new 32 page booklet "Soil Matters" served as an excellent supplement to the presentation. Topics from the presentation were included in the year-end final exam.

PUBLIC INFORMATION/PARTICIPATION

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party

The high school teacher expressed appreciation for an excellent classroom activity, and requested a presentation for the coming year. YSI requested copies of the curriculum, and will use it with the model when appropriate; they mentioned that they did not currently have a high school level curriculum to use with the model.

Focusing on schools, teachers and students has proven to be a successful means of conveying information about Stormwater Pollution and Pollution Prevention. The calendar created by WVCWP in FY 03-04 continued to provide an attractive & fun method of keeping Stormwater pollution messages in the public eye throughout the year – calendars are hanging in classrooms, teachers' lounges, Senior Citizen Centers, Community Centers and municipal offices; a new message is displayed each month.

Creek Clean-Up/ Trash Monitoring Outreach

In terms of generating student participation in Creek Clean-ups, WVCWP will try 2 new avenues in FY 05-06. Participation at the spring Westmont High Cleanup was low because the information did not get from the school secretary to the person handling the "morning announcements". WVCWP has found 2 ways to inform the students more directly: the PTSA at Westmont High School will be contacted in order to post the information on their web site. The information will also be featured in the school's daily "e-mail bulletin". Contact names have already been obtained for this. In addition, Creek Clean-up flyers will be distributed to other schools in the area. The new music video "With Your Own 2 Hands" will also be a means of generating interest; WVCWP is investigating ways of letting teachers know about the video.

Additional evaluations have been included in several sections of the PI/P Table above.

Outreach on Pollutants of Concern

Additional outreach information is presented in specific Sections, such as the Copper Section, the Mercury Section and the Pesticide Management Section, within this report.

Note: **In order to prevent redundancy, the PI/P table has been created as one table for all four WV Communities;** activities sponsored by an individual community are noted where appropriate. PI/P activities for the WVC tend to be attended by residents from several WV communities, and many of the PI/P tasks are handled by WVCWP for all communities at once. In addition, a number of schools serve residents from more than one community.

		assist with continued implementation of campaign, which targets the general public and includes messages about less-toxic pest control and proper disposal. Campaign features South Bay English- and Spanish-language, radio and print ads.	which are discussed in the AHTG, are presented to City staff for appropriate follow-through See PI/P Section, "Citizen Participation" & "General Outreach"	
	PMP Plan (II.A.4.) PMP Plan (II.A.5.)	Community Events Identify and attend community events and distribute outreach materials regarding less toxic pest control. Community Groups Coordinate with local community groups and distribute information via libraries, civic and community centers, and other points of social interest.	WVCWP partnered with local Sierra Club chapter & Audubon Society to feature a table at Audubon's "Wildlife Education Fair" (located on the border between Saratoga & Cupertino). Table featured: Enviroscape hands-on watershed model demonstrating pesticide pollution in runoff, a display on dangers of diazinon for birds, and IPM materials; Sierra Club distributed California Golden Poppy seeds to promote pest-resistant planting. IPM materials were distributed other local events which may be attended by MS residents: the "Mustard Walk" (Saratoga City Hall & Heritage Orchard, Feb. 2005); "Building Bridges" event (WV Cmmty College, Oct. 2004); Los Gatos Beautiful Celebration (April 2005), Orchard Supply Garden Center "No Tax Days" (Saratoga/Campbell, Oct. 2004); Campbell Arbor Day (April 2005). Through WVCWP, much IPM outreach has been directed at educational activities in the local schools. Students learn about pesticide runoff and the need to use less-toxic pest management strategies. See PI/P Section, "Citizen Participation" & "General Outreach"	City Mgr to assist WVCWP Staff
	PMP Plan	Web Site	WVCWP created 2 direct links from its website "Clean	WVCWP Staff

	(II.A.6.)	Update and publicize web sites to promote IPM and reduce pesticide use.	Creeks.org" to IPM Fact Sheets in PDF format on the Program's *Watershed Watch* website.	
	PMP Plan (II.A.7.)	Coordinate with the Master Gardeners program Use their services to train residents. Provide IPM training and information on water quality impacts of pesticide use to Master Gardeners as needed.	1 local UC Extension staff member attended the WVCWP IPM Workshop in March 2005. Campbell's Master Gardener teacher registered, but had a family emergency so received the training materials at a later date. Master Gardeners conducted 6 gardening classes for local residents, at Campbell Commty Ctr, incorporating IPM, including 1 on Pest Management for over 40 WV residents. WVCWP coordinated with these classes to provide IPM outreach materials to class participants. Approximately **45** students received 10 different materials (= 450 IPM pieces distributed); extra materials were available for class members to share with friends/neighbors.	WVCWP Staff
	PMP Plan (II.A.9.)	Media Relations Continue to fund BASMAA Regional Media Relations Campaign[2] featuring pitches to Bay Area media and responses to breaking news on pesticide-related topics	See PI/P Section "General Outreach"	WVCWP Staff
	PMP Plan (II.A.10.)	Media Relations Prepare and pitch IPM stories and press releases to local media, as appropriate.	Gardening Columnist for 3 local weekly papers received a press release/invitation to attend the March 2005 WVCWP IPM Workshop on "IPM for Pests of Trees & Shrubs". San Jose Mercury News (9/24/0)4 printed an article on the Master Gardeners' classes for local residents at	WVCWP Staff

			Gatos School District staff at WVCWP's March IPM training in accordance with DPR certification requirements. (see Training Summary for additional information)	
	PMP Plan (II.A.14.)	Conduct internal IPM outreach Target staff who do not necessarily purchase or apply pesticides during the course of their work (to encourage employees to use IPM techniques away from work). Email announcements as appropriate & display IPM materials at City Hall.	IPM material is available for pick-up by employees at City Hall.	City Mgr to distribute as appropriate/ WVCWP to provide material
	PMP Plan (II.B.2.)	IPM Partnership Program Provide IPM fact sheets and other materials to pesticide retailers to facilitate point-of-purchase outreach. Visit stores as necessary to determine ongoing participation. Document material distribution.	WVCWP coordinates IPM point-of-purchase displays with Summerwinds Garden Center in Campbell. WVCWP investigated purchase of a wall-mounted holder for fact sheets, as per Summerwinds' request. Summerwinds decided to re-institute use of their floor-based literature rack. WVCWP then re-supplied the IPM materials. WVCWP staff distributed IPM material at Orchard Supply Hardware Store special event (bordering Campbell). See PI/P Section "General Outreach"	WVCWP Staff
	PMP Plan (III.A.1)	Pest Control Operators Develop a database of licensed structural and landscape maintenance PCOs.	Monte Sereno is a strictly residential city; there are no Pest Control Operators based in Monte Sereno. As part of WVCWP, MS joined in a general overview of Pest Control Operators based within the WVC. This showed that approximately 75% of them are based in the City of Campbell. Those based in Campbell have been compiled into a list. Discussion is underway concerning database development (information fields). Additional local PCOs	WVCWP

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
			will be determined and placed in the database, along with Campbell PCO data, during FY05-06	
	PMP Plan (III.A.4)	PCO Training/Reporting Document the numbers of PCOs receiving IPM training; pesticide use by PCOs; and implementation of BMPs, through contract specifications on municipal property.	Monte Sereno's Pest Control Contractor and Landscaping Contractor were unable to attend the IPM training due to other business commitments. Pesticide use by PCOs is reported annually to WVCWP. PCOs are required to operate according to the Pesticide Management Standard Operating Procedures and Monte Sereno IPM Policy.	City Mgr to assist WVCWP
	PMP Plan (III.B.2) PS#6	Municipal contractor's (PCOs) Require PCOs contracted by municipality to implement BMPs through contract specifications	PCOs are required to operate according to the Pesticide Management Standard Operating Procedures and Monte Sereno IPM Policy.	City Mgr WVCWP to assist
	PMP Plan (IV.A.2.)	Commercial Business Education Continue ICID Inspector's education program that targets commercial businesses. Distribute *Don't Set a Table for Pests.* Document efforts.	Although MS has no commercial businesses, as part of WVCWP it sponsors outreach. WVCWP Inspector distributes outreach material *("Don't Set a Table for Pests")* when conducting Restaurant Inspection Pilot visits; **66** were given to restaurant management staff (in Campbell, Los Gatos & Saratoga) in FY04-05. **66** brochures which include pesticide reduction in landscaping info ("*Water Quality Protection Guidelines for Food Handling Facilities"*) were distributed by the WV Inspector.	WVCWP Staff
	PMP Plan (V.A.)	HHW Collection Ensure that adequate pesticide disposal services exist for residents and conditionally exempt small quantity	Pesticide disposal services are handled by SC County Household Hazardous Waste. 		be conducted with City staff responsible for environmental reviews of new development projects.	appropriate municipal staff. WV Program Manager reviewed the training with MS Assistant Engineer, who was unable to attend the original meeting.	

Pesticide Management Activities Evaluation

Pest Specific IPM Plans for Armored Scale and Soft Scale were developed in FY 04-05. **This is consistent with the WVC strategy of developing 2 Pest Specific Plans per year to help incorporate IPM into municipal pest control procedures.**

Results of Pesticide Use Review FY 04-05

Monte Sereno was able to eliminate use of any OP pesticides in particular, and all pesticides in general, for FY 02-03, FY 03-04 and FY04-05, as compared to PCO spraying of 10.3 oz of diazinon for ant control in FY 01-02.

Monte Sereno has controlled pests for the past 3 years through implementation of IPM practices. Monte Sereno's public facilities consist only of a City Hall with less than 4,000 sq. ft.; the lot is appx. ½ acre and there are no City parks. Roadside weed control is left to homeowners. Ants at City Hall are controlled by keeping surfaces clean, and by wiping ant trails with soapy water; citrus-based spray is used if necessary. Weeds are hand-pulled by the landscaping contractor.

Monte Sereno has been making a dedicated, successful effort to keep City facilities pesticide free.

Section 1.02

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
	Mercury Plan (I.D.)	Mercury Policy Implement mercury policy or ordinance requiring the virtual elimination of mercury from controllable sources in urban runoff from agency operations.	Monte Sereno was operating on an administrative Mercury policy and adopted a formal mercury policy in Fall 2004: Monte Sereno City Hall continues to implement the policy.	WVCWP to assist Eng Div.
	Mercury Plan (I.F.)	Guidelines Continue implementing the Guidelines for Mercury-Containing Products Reduction and Management The quantities of mercury containing devices disposed of will be reported in the FY 04-05 Annual Report.	Guidelines are being implemented; extensive reduction of mercury-containing products is limited by a lack of alternatives. Research on alternatives to mercury-containing products has been conducted and implemented when possible, but few alternatives have been found. Monte Sereno City Hall consists of 2 small, former residential buildings, so the number of fluorescent bulbs or any mercury-containing products is minimal and opportunities for reduction are limited.	WVCWP to assist Eng Div.
	Mercury Plan (II.D.)	Reporting HHW Disposal Continue documenting and reporting quantities of mercury-containing products disposed of by City buildings and departments at hazardous waste collection facilities in FY 04-05.	Although tracking quantities of mercury products disposed of by the City over the past year is not required by the Permit, the City did initiate attempts to track quantities. However, it was found that it was too costly in terms of staff time, especially due to being short-staffed for part of FY 04-05. 100% of all mercury-containing items are taken to HHW or other E-Waste recycling drop-offs.	SCVURRPP (guidance), WVCWP to assist Eng Div.
	Mercury Plan (V.A.)	Fluorescent Light Recycling Program Implement an outreach program to	A WVCWP-created display was placed at the Monte Sereno Post Office/City Hall. The display included:	SCVURRPP (guidance), WVCWP to co-ord w/ HHW staff

		educate small businesses and conditionally exempt small quantity generators about recycling fluorescent lights. Coordinate educational outreach with fluorescent light recycling events sponsored by HHW.	▪ a small, color poster ▪ flyer advertising the WV HHW Drop-off in Saratoga ▪ HHW brochures ▪ "Keep Your Family Safe from Mercury" flyers See PI/P "Materials Distribution" Section. Small Business Outeach will not be conducted in Monte Sereno as the City is strictly residential. Advertising on proper Mercury disposal was handled through placement of a "Mercury" ad. Space was purchased in the 3 weekly newspapers serving the West Valley. The Mercury ad ran 2 times in each of the 3 newspapers. When the ad was printed out as a flyer and distributed at the Los Gatos Beautiful booth, it was very well-received – residents appeared to find the graphic appealing, and the information to be useful. See Mercury Attachment A. A Press Release/Article on mercury toxicity, fluorescent light disposal, and the upcoming HHW WV Drop-off event, was submitted to the SJ Mercury News and the 3 WV weekly newspapers. Several papers shortened the article and ran it (October 2004). WVCWP's website was revised to include a Mercury link on the home page. The link connects to a new Mercury web page which includes information on free local fluorescent light disposal, free cell phone recycling and mercury and runoff pollution. See Mercury Attachment B. See PI/P Section for additional outreach related to Mercury	

Mercury Pollution Prevention Activities Evaluation

All WVC have participated in several trainings/round table discussions about mercury policies and mercury product disposal in WVCWP meetings. All WVC have procedures in place to ensure safe disposal of mercury-containing products. When municipal staff purchase or replace mercury-containing products, they select products that contain less mercury.

The WVC have also conducted extensive outreach on Mercury issues in FY-4-05. Outreach was conducted through web sites, distribution of a variety of information at various sites, classroom presentations, municipal newsletter articles, and newspaper advertising.

Outreach has included posting a small mercury poster on the WVCWP website home page, linked to a page devoted to mercury issues, including assorted recycling information.

WVCWP has also incorporated discussion of mercury and fluorescent light bulbs into the 5th grade classroom interactive presentations; the topic seems to generate strong interest from teachers and the students – reference to fluorescent lights usually causes students to look up at their overhead lights, and they make an immediate connection about behavior changes that can be included in their lives.

Additional outreach information is listed in the PI/P Section of this report.

COPPER ACTION PLAN/NICKEL ACTION PLAN

FY 2004-2005 Work Plan Self Evaluation Matrix

Activity	Source	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Vehicle Washing Operations	CB-1	Continue to distribute outreach materials on proper vehicle/equipment washing at Municipal counters/Post Offices/Libraries and public events, and post on WVCWP website.	WVCWP created a *Car Wash Kit flyer* to inform residents of the need to use the Kit for Car Wash fund-raisers. The flyer is posted at the City offices; it will be distributed to schools in FY05-06. The flyer incorporates information on Municipal Codes for Stormwater, and information on copper's affect on aquatic life. Since Monte Sereno does not have schools or businesses within its own borders, the Car Wash flyer for Los Gatos, with the LG Town Code, is most relevant to Monte Sereno residents and is made available to them. See Copper Attachment A A brochure on proper vehicle washing was distributed at car wash fundraisers by the Stormwater Discharge Inspector, in conjunction with instructing on use of the Car Wash Kit.	WVWCP staff
Vehicle Washing Operations	CB-1	Partner with Nova High School teacher & students to make presentations to Campbell, Los Gatos and Saratoga High School classes, topics will include car washing and proper draining of Pools & Spas.	This year, car washing, pool draining and copper issues were incorporated into WVCWP's Enviroscape presentations given to 5th graders at Foothill Elementary School and Rolling Hills Middle School. Appx. 150 students learned about sources of copper, copper's affect on aquatic life, draining pools to sanitary sewer outlets (photos of an outlet were shown) and proper car washing.	WVWCP staff
Vehicle Washing Operations	CB-1	Provide car wash kit & education to charity car wash organizers. Provide educational brochures/materials where applicable. Track and document occasions for use in Annual Report.	The WVCWP Inspector set up the Car Wash Kit at 4 Car Wash Fundraisers in the WVC in FY 04-05. He provided instruction on how to use it and explained the need to keep car wash water out of storm drains. July 28, 2004 Muscular Dystrophy Adult Support Group	WVWCP staff

			fundraiser Car Wash held at Ace Hardware in Los Gatos (bordering Campbell). Also: Oct. 30, 2004 Student Exchange Program & Italian Club of LG High School fundraiser Car Wash held at Van Meter School, LG Blvd. 20 students participated; appx. 95 vehicles were washed. April 2005 – LG Union School Dist. Education Foundation - fundraiser Car Wash held at Van Meter Elem. School, LG. April 2005 – Girl Scout Troop 630 Los Gatos - fundraiser Car Wash held at Union 76 gas station at Blossom Hill Rd., LG. 50 copies each of "Cars Pollute Too" and "Washing Cars" were distributed during car wash events.	
Vehicle Washing Operations	CB-1	Submit data regarding vehicle washing outreach activities. Provide an effectiveness evaluation in Annual Reports.	While Monte Sereno is strictly residential, MS contributes to funding the WVCWP Stormwater Discharge Inspector. The Stormwater Inspector distributes several vehicle washing pieces during pro-active inspections and in relation to any actual or suspected IC/ID incident. This means of outreach is very effective and the Inspector is able to answer questions and offer suggestions. See "Inspect Auto Businesses" below. WVCWP staff created a *Car Wash Kit* outreach flyer, including reference to each WVC's Municipal Code for Stormwater and information on copper's toxicity to aquatic life. The flyer is available at the respective municipal offices. 50 copies each of "Cars Pollute Too" and "Washing Cars" were distributed during car wash events.	WVWCP staff

			See "Evaluation" below.	
Vehicle Washing Operations	CB-1	Require source control measures for Group 1 new development and redevelopment projects that will conduct vehicle/equipment washing and maintenance activities (consistent with Permit Provision C.3.k).	The WVC did not have any new Group 1 projects that would conduct vehicle/equipment washing and maintenance activities during FY 04-05.	WVCWP staff w/ Municipal Staff
Vehicle Washing	CB-1	Inspect auto businesses regarding car wash requirements, and prohibited storm drain discharge.	The WVCWP Inspector conducted 18 pro-active auto repair and vehicle facility shop inspections in Los Gatos (Monte Sereno and Saratoga have no auto service businesses). He distributed his fact sheet, providing information on wastewater capture systems to automotive facilities. The fact sheet was designed to provide small-scale automotive facilities (those that find installing a full-fledged wash rack cost prohibitive) with examples of inexpensive treatment technologies and distributor information. Problems at shops in previous years generally appear to have been corrected, due to Inspector's outreach efforts.	WVWCP ICID Inspector
Vehicle Washing Operations	CB-1	Maintain and inspect car wash systems for City vehicles at the corporation yard	Monte Sereno does not have a Corp Yard or City vehicles.	WVWCP ICID Inspector / Pub Works Supt
Vehicle Washing Operations	CB-1	Encourage municipal staff to attend SCVURPPP's "Mobile Cleaning Workshop".	Monte Sereno does not have a Corp Yard or City vehicles.	WVWCP ICID Inspector / Pub Works Supt/ Bldg Maint Supvr

Measures to control nickel discharge from construc-tion sites	NB-1	Training: Continue to attend Program sponsored or other workshops on post-development stormwater BMPs (C.3.)	In March 2005 WVCWP staff attended a variety of trainings at the CWEA Workshop; this information was provided to WVC Stormwater Reps at WVCWP meetings. In June 2005, staff attended "Conducting Stormwater Treatment BMP O&M Verification Inspections" Sponsored by SCVURPPP. 2 Monte Sereno Building & Engineering staff See Training Summary –New & Re-Development	WVCWP staff w/ Municipal Staff / WVCWP ICID Inspector

West Valley Communities
Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2004-2005 ANNUAL REPORT

Activity	Source	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party

Copper/Nickel Action Plan Evaluation

Car Wash Outreach Evaluation:

The Car Wash Kit for car wash fundraising events has been a success; it was used at 4 events in FY 04-05 year and is estimated to have prevented runoff from several hundred cars. The WVCWP's newly-created Car Wash Kit flyer will be distributed through more avenues in FY 05-06, in an effort reach potential users and to reduce car wash event discharges.

The Car Wash Kit flyer was posted at municipal offices in spring 2005, but WVCWP has not yet received calls from any groups resulting from the flyer. All calls so far have been triggered by car wash information on the Town of Los Gatos Public Works web page. In Summer and Fall of FY 05-06, the flyer will be distributed to schools in WVC, in hopes of increasing public awareness of the Car Wash Kit. The flyer will also be posted on the WVCWP website.

Since car washes are sometimes held at gas stations and churches, some form of efficient outreach to these locations is also being discussed. The best approach might be to contact youth sports teams and scout groups, who may hold car washes but perhaps aren't affiliated with a school. In FY 04-05, WVCWP began assembling a *Scouts and Sports Team Contacts* list; in FY05-06, additional contacts will be added and staff will investigate means of distributing the flyer to the appropriate contact people.

Copper Outreach Evaluation:

The WVCWP will continue to provide outreach on car washing, vehicle maintenance, alternative transportation, and pool maintenance during in-class presentations and partnerships with teachers and students in local schools. WVCWP incorporated messages about activities that can prevent copper runoff as part of the 5th grade Enviroscape curriculum.

The WVCs continued their street sweeping programs and were able to collect accurate data for submittal for FY 04-05.

www.cleancreeks.org , offers a *Take Action* page which encourages people to:

•Take cars to a commercial car wash (where the dirty water will flow to a Treatment Plant), or wash it on a non-paved surface.

•Drain pools and spas into a sanitary sewer outlet, NEVER into a street

•Drive less! Walk, ride a bike or a bus, or carpool.

WVCWP is working on design of a "Copper" page for its website, featuring outreach pieces on residential car washing, use of the Car Wash Kit, and pool draining.

The Town of Los Gatos web site, which is referred to by Monte Sereno residents for a variety of information, features excellent outreach material on car washing and pool draining, along with general information on avoiding stormwater runoff pollution. The site's link to the WVCWP site and the WV Stormwater Inspector's e-mail allows LG residents to easily contact WVCWP concerning car wash fundraiser events. This has triggered implementation of the Car Wash Kit at 4 car

West Valley Communities
Santa Clara Valley Urban Runoff Pollution Prevention Program

Activity	Source	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
washes in FY 04-05; use of the kit avoided runoff pollution from several hundred cars and allowed for education of numerous residents during the car wash activities.				

Protect Our Creeks during your next

Car Wash

Fundraising Event

Anyone organizing a **Car Wash Event**
in *Campbell, Los Gatos, Monte Sereno or Saratoga*
is directed to borrow the **Free Car Wash Kit** from
West Valley Clean Water Program *(WVCWP)*

The *State Water Board* requires municipalities to prevent Car Wash Event runoff from flowing into Storm Drains.

Town Code Section 22.30.015(a) & (b)

All Car Wash Events should use the ***Car Wash Kit***, which keeps runoff out of Storm Drains.

To schedule pick-up & training on use of the Car Wash Kit,
e-mail WVCWP at: inspector@cleancreeks.org or phone 408-354-5385

- Copper is toxic to aquatic life - and it washes off of brake pads
- Oil, coolant & other pollutants are also carried in car wash runoff
- The Car Wash Kit drains runoff into the Sanitary Sewer lines, rather than into the Storm Drains (which flow untreated into our creeks)

TRASH INVENTORY & MANAGEMENT

FY 2004-2005 Work Plan Self Evaluation Matrix

Source	04-05 Work Plan Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Trash Work Plan	Strategy and Goals	Use Program guidance to develop a strategy to conduct trash evaluations in watersheds.	The WVCWP Manager and Inspector participated in the Program's Trash Ad Hoc Group and developed goals for the West Valley Communities, which the WVCs approved in FY 03-04. These goals include: • Prioritizing inspections for trash dumpster areas at local restaurants. See IND – Restaurant Inspection Program of each municipality's annual report. • Educate local businesses about the need for dumpster cleanliness and encourage BMPs • Evaluate trash condition of urban creeks through drive-by monitoring and when feasible, rapid trash assessments. • Educate local teachers, students and principals by featuring trash problems and solutions in our interactive school presentations. • Evaluating the progress made on goals in each Ann Rpt	WVCWP to coordinate, WV Stormwater Reps to provide municipal input and feedback
Trash Work Plan	Evaluations	Conduct trash evaluations in a subset of trash problem areas.	The WVCWP staff conducted the following KAB litter index assessments for the identified problem spots for each WV community during FY04-05. See attached reports for detail. For: • Campbell's thirteen (13) identified problem areas, 23 assessments were conducted. • Los Gatos' eight (8) identified problem areas, 12 assessments were conducted. • Monte Sereno's one (1) identified problem areas, 3 assessments were conducted. • Saratoga's four (4) identified problem areas, 6	WVCWP to sponsor events Municipality to identify problem areas

			assessments were conducted. The WVCWP also sponsored three (3) trash cleanup events, where citizen volunteers performed monitoring which is very similar to the Water Board's RTA method.	
Trash Work Plan	Identify Control Measures & Begin Implementation	Identify and begin implementation of trash control measures, as appropriate, to address trash problem areas within high priority areas	The West Valley Cities have successfully implemented all of the strategic trash goals listed in item 1 above.	Municipal Storm Reps to determine Strategic Goals and WVCWP to assist with implementation
Trash Work Plan	Report on Trash Mgmt Practices Implemented	Provide Program staff with information on trash management practices implemented, using standardized reporting format.	Program staff was provided with all trash assessment information for FY 04-05 except for the data that was collected as part of the WVCWP citizen participation program, *Creek Keepers*, mentioned below.	WVCWP Staff
FY01-02 Work Plan	Monitoring/Citizen Participation	Continue to promote citizen participation program to monitor trash in local creeks (element of *Creek Keeper's* Program).	Three public participation events were held in FY04-05 for trash cleanup and monitoring near local creeks. All three event sites were near schools so that WVCWP staff efforts would accomplish three things. 1) Trash monitoring 2) Creek area cleanup and 3) teaching students about a citizen's responsibility to keep trash out of our watersheds. The method used by volunteers at these events resembles the RTA method closely enough that it is possible to take individual trash assessment forms from the participants and put the data almost directly into the RTA forms. Lack of staff time prevented WVCWP from transferring all the data for FY04-05. However data was transferred to the RTA format for the site on Wildcat Creek. See the Program's Trash Activities report. Also see attached data sheets, and the press release for the Wildcat Creek event, and the front-page story from the Saratoga Community Newspaper (Silicon Valley Community Newspaper Group) 4-27-05.	WVCWP Staff

FY04-05 Work Plan, RWQCB comments	Training	Conduct PI/P training meetings on implementation of volunteer creek and school site clean ups. Evaluate effectiveness of volunteer trash monitoring and success of clean-up events	On July 16, 2004, the WVCWP Manager and the half-time Public Outreach Assistant attended the following workshop: Regional Board Trash Rapid Assessment Training Presenters: Water Board Staff for the session on the Rapid Trash Assessment method; (RTA); and SCVURPP Program Staff for the session on the Keep America Beautiful (KAB) method of assessment	WVCWP Staff

Trash Inventory & Management Evaluation

The West Valley Communities have made good progress on each of their strategic goals for trash reduction.

Prioritizing Dumpster Area Inspections & Educating local businesses

The WVCWP Inspector patrols the downtown areas of each community to look for signs of illegal dumping or debris from dumpsters (especially those with open lids) and providing educational chats as needed. Monte Sereno is the exception; being strictly residential, the City does not have many dumpsters. See the IND and ICID section of this report for details.

Evaluate the Trash Condition of Urban Creeks by conducting Drive-by Monitoring of Identified Problem Areas

WVCWP staff conducted *Keep America Beautiful Litter Index* method assessments at all identified problem areas in the West Valley Communities, for a total of 44 assessments. Some new potential problem areas were identified and other, like the *Los Gatos Creek Trail,* which is cleaned up monthly by a local group of University Women, will not remain on the list. Although it is very heavily traveled it is also constantly monitored by residents. WVCWP staff finds that once the patrolling or monitoring has become routine (especially using the simple KAB method) the task is relatively easy to accomplish. WVCWP staff is becoming more familiar with the local watersheds, which makes it easier to identify areas which present potential problems.

Conduct Educational Outreach to Students and Teachers in Local Schools

WVCWP staff will respond to every opportunity to partner with schools and teachers on educating the students. The WVCWP has been particularly successful, in FY 04-05 and F Y03-04 in recruiting student volunteers for creek cleanups and the task of creek monitoring. The WVCWP's own method of trash assessing is very similar to the RTA method except that it is simplified for young students and for the needs the West Valley area. Refer to the combined results of the trash monitoring at three volunteer events, attached. WVCWP events during FY 04-05 all took place in the San Tomas Aquino Watershed. This is partly because choosing a site and recruiting volunteers is time intensive, and it becomes easier as the site is established and volunteers are more familiar with the site and the routine procedures for the event. Sacred Heart School next to Wildcat Creek contacted WVCWP this year to see if staff would sponsor another creek cleanup event. In FY05-06 WVCWP staff will investigate other areas in the West Valley to try to establish an on-gong site in the Guadalupe Watershed (the other West Valley Watershed).

Saratoga Gardening Guerillas

A group of Saratoga Volunteers have been cleaning the streets and sidewalks of the City (sometimes on hands and knees) for the last year. See article attached.

Volunteers met with a hurdle when the Saratoga decided that the City would be liable for the safety of the citizens while they were working. This demonstrates the enthusiasm of the volunteers in West Valley Communities and the set backs that the WVCWP sometimes encounters in encouraging and accepting citizen volunteer services. See attached article (*Gardening Guerillas)* from the Silicon Valley Community Newspaper, *Saratoga News.* Having to walk this fine line is a part of any idea which involves citizens working on municipal property e.g., students applying storm drain stencils or participants in a creek cleanup (especially if volunteers intend to enter the creek to facilitate the cleanup) or even a participation in a holiday parade (public outreach). The WVCWP tries to take advantage of every public participation opportunity without leaving the Municipality vulnerable to potential liability issues.

West Valley Press Release April 19, 2005 – Trash

From: Cheri Donnelly [mailto:cheri.westvalley@comcast.net]
Sent: Tuesday, April 19, 2005 1:38 PM
To:'ltoth@svcn.com'
Subject: Sacred Heart Students Clean a Creek April 20th

Hi Lisa,

Sacred Heart School children and a few parent volunteers will be cleaning Wildcat Creek, behind their school grounds on Wednesday afternoon (April 20) from 1 to 2:30 pm. They have a **permit from the SCV Water District** to open the normally locked gate and pick up debris that came to the creek from the school lunch/ field area, the streets, or from other yards.

We are beginning to see the spring weather and notice that trash has settled in the creeks. We first approached Sacred Heart's Principal two years ago to see if she would allow the West Valley Clean Water Program staff to enter the creek area behind the school and pick up the trash that volunteers couldn't get to on National River (Creek) Clean up Day.

The Principal not only invited us onto the property but allowed us to hold a watershed assembly at the school to encourage the students to volunteer for the cleanup event. We were surprised when 80 students and parents turned out for the creek protection event. The principal confided to us that in preparation for Clean Water staff's visit to their school, the students combed the school grounds for trash a few days prior to the creek cleanup event.

School grounds and their surrounding areas are well known among creek and Bay environmentalists as a major source of beverage-container and food-wrapper trash. All of which ends up in our local creeks, streams and finally the Bay. We might look around the West Valley and say we don't have a trash problem but all our upstream food and beverage debris is carried by heavy rains to an unmanageable buildup of trash that is choking creeks in downstream areas.

This year the school called us to request that we help them sponsor another cleanup event. We are delighted to provide the gloves and trash bags and guidelines to keep this a safe event. The SCV Water District staff came out and cleared a path to prevent the students from coming into contact with poison oak. After the event the Water District will haul away the bags of collected trash.

We have cute photos of the previous event if you are interested. The student volunteers are from grades K-8. About 45 students have signed up thus far. I wish every school would celebrate Earth Day this way.

Best Regards,

Cheri Donnelly, Program Manager

Education

Sacred Heart School seventh-graders Lynn Vo (left) and Lucija Stimach participate in a Wildcat Creek cleanup day on April 20 behind the school grounds.

Students doing something about litter

By Lisa Toth

Students at Sacred Heart School may be litterbugs, but they're doing something about it.

More than 65 students in grades four to eight volunteered to clean up Wildcat Creek, which runs behind the Saratoga school's grounds. They were permitted by the Santa Clara Valley Water District to open a normally locked gate to gain access to the creek and they worked for more than two hours on April 20.

The zealous students, parent volunteers and representatives from the sponsoring organization, West Valley Clean Water Program, picked up debris that had been blown into the creek from the school lunch area, streets and school yard. The garbage had been carried into the creek by winter rain storms.

"It's gross," said seventh-grader Elizabeth Carte, picking up trash near the fence line of

the school property. "This shows you how the trash grows. One little piece from everyone becomes a big amount."

Armed with clipboards and pencils, students tracked each piece of trash they picked up, such as random bolts and screws or more common potato chip bags, candy wrappers and beverage containers.

The creek monitoring trash activity will help water program officials determine where the majority of the trash comes from and what behaviors are contributing to the trash. The students were also given gloves, bags for recyclable items and long-handled grippers to pick up hard-to-reach rubbish.

Parent volunteer Georgia Ellenikiotis, the school's Christian service commissioner, said the students received two community service hours for the activity. Each grade level is required to complete a different amount of community service, which includes activities such as playing bingo with senior citizens, assisting at homeless shelters or organizing food drives. Even though the creek cleanup was optional, Ellenikiotis said she was pleased the event had a high turnout. This was the school's third year participating in the creek cleanup event.

"It's fun to be cleaning up with all your friends," said Marianne Gera, a seventh-grader who also serves as the safety and ecology commission officer for the school. "It's helping the environment instead of trashing it."

Before beginning the trash cleaning expedition, students were instructed by Cheri Donnelly, West Valley Clean Water Program's manager, about safety rules, how to avoid poison oak and how to not disrupt the creek's natural habitat. She also showed students photographs of concentrated levels of garbage that can accumulate farther downstream if not prevented or remedied through volunteer cleanup efforts.

Wildcat Creek flows into the San Tomas Aquino Creek and then into Moffet Channel. From there, the water travels through Guadalupe Slough before entering the lower San Francisco Bay, according to Donnelly.

"It's an eye opener for these kids to realize what comes from their own backyard--plastic straws, food wrappers, chip bags, snack bags, bottle caps, water bottles," Ellenikiotis said.

Before the students were allowed to go through the locked gate and head down the steel embankment to access the creek, they had to comb the grounds and collect all the trash that had piled up along the fence line. Kathy Ottenberg, an assistant with the water program, said she hoped the students would take away a sense of responsibility and awareness about not littering in Saratoga.

"We're all partners of the larger community, and our actions and caring about the creek do make a difference," she said. "The creek is part of their campus, but they probably

don't notice it on a daily basis."

Marianne pointed out that much of the trash on the school campus and in the creek was the result of carelessness. She added that the school has implemented a recycling program in the classrooms, and classes are also required to periodically clean up the school yard. Sacred Heart students have been studying topics in their science classes like erosion, pollution and how animals can be affected by trash. In addition, the creek cleanup day also tied into national river cleanup day coming up on May 21 and fell close to Earth Day on April 22.

Donnelly also stressed the importance of the creek cleanup as a savings for taxpayers. In the Los Angeles area, a severe trash problem has resulted in the need for costly filters and trash inserts in storm drain pipes to catch the trash before it can run downstream, she said.

While Santa Clara County isn't listed as having an impaired trash problem and isn't being required to use such filters, representatives like Donnelly are preparing for the possibility of it occurring. The county must adhere to Clean Water Act standards.

"School grounds and their surrounding areas are well-known among creek and Bay environmentalists as a major source of beverage container and food wrapper trash, which ends up in our local creeks, streams and finally the Bay," Donnelly said. "We might look around the West Valley and say we don't have a trash problem, but all of our upstream food and beverage debris is carried by heavy rains to an unmanageable buildup of trash that is choking creeks in downstream areas."

Donnelly added she wished everyone would celebrate Earth Day like Sacred Heart students--by not being litterbugs.

Gardening Guerillas do their work in jungles of downtown Saratoga

By Kaustuv Basu

They call themselves the Gardening Guerillas. And it's the mission of these guerillas to clean the sidewalks of downtown Saratoga, get rid of weeds, plant flowers and make the area more attractive to visitors.

Leading the group is Jill Hunter, planning commissioner and president of the Saratoga Business Development Council, recently renamed the Saratoga Village Development Council.

Hunter and her team meet at a downtown coffee shop once a week.

On the rain-drenched morning of March 29, only a handful of people showed up at the International Coffee Exchange for the weekly meeting.

"This is only the beginning. The rain has kept people away," said Hunter.

She hopes that as news about the group spreads, more and more people will sign up.

"Some people have told me that they do not like our name. We might call ourselves the Saratoga Gardeners," Hunter said.

Armed with some improvised garden shears, Hunter and Dr. John Marian of Big Basin Chiropractic walked around, talking to business owners and pulling overgrown weeds and plants from flowerbeds near the sidewalk. They were

joined by Dorothy, Marian's mother.

In a few weeks, the guerillas will be wearing matching aprons as they walk about downtown Saratoga. Other plans include decorating some of the Village alleyways with arches. "We might buy some overhanging flower-pots," Hunter said.

Hunter has ambitious plans for the Village. "It's easy to criticize the city or knock the Village. My first priority is to have no negativity," she said.

Barely an hour before the meeting at the International Coffee Exchange, Hunter had presided over the meeting of the Saratoga Business Development Council, at which the group decided to rename itself the Saratoga Village Development Council and concentrate on business development in downtown Saratoga.

At the meeting, Hunter said that the group would soon request the city to put up a sign near Highway 85 that indicated a historic downtown with shops and restaurants in the vicinity.

Bill Cooper of the Bella Saratoga restaurant said that he hopes to have some of the faded American flags removed from the Village and replace them with spring flags.

"I know that the city has spring flags available," he said.

Cooper is working with other Village merchants so that they can ask the city to fund the Village shuttle program again. The program started last year and took concert-goers from the Village to Montalvo for free for those dining at a city restaurant or staying at a Village hotel.

For more information on the Gardening Guerillas, call Jill Hunter at 408.741.1213.

Gardeners cleaning up Village, but city council has concerns

By Kaustuv Basu

The Saratoga Gardeners, a group of volunteers who have been gathering in the Village every week to clean sidewalks and plant flowers, have run into a hurdle.

At its meeting on April 20, the Saratoga City Council asked Jill Hunter to register her group of volunteers with the city or ask the Saratoga Chamber of Commerce for help.

Hunter is the chairwoman of the Saratoga Village Development Council and also serves on the city's planning commission.

"We're asking them to do this because of liability issues," said Mayor Kathleen King.

King also said since the Village sidewalks are owned by Caltrans, they might also decide to ask for some liability insurance.

"We love what you are doing in the Village. But SVDC is like an unincorporated club. It is a legal non-entity. And all of you are working on public property," said Vice Mayor Norman Kline.

Kline said it would not be advisable for the Saratoga Gardeners to hang flower pots from poles or work on alleyways until some kind of liability insurance was guaranteed.

Councilwoman Ann Waltonsmith suggested that the Saratoga Gardeners try to find common cause with the Chamber. "It might be too cumbersome to work with the city," she said.

After the meeting, Hunter said that she will try to work out an amicable solution that will please everyone.

"We are getting some momentum," she said.

Hunter said almost 20 volunteers have attended the meetings, held every Tuesday morning at the International Coffee Exchange in downtown Saratoga.

"A lady from Beijing who was visiting Saratoga donated $100 to us when she saw us on our hands and knees cleaning the Village sidewalks," Hunter said.

She asked the council if it would be possible to install a sign near the Saratoga Avenue exit of Highway 85 that indicated the presence of a historic downtown in the area.

At the meeting, Hunter also said turning on the sprinklers and watering spigots in the Village would help the new shrubs and plants. The sprinklers in the Village have not been used for many years.

John Cherbone, the city's public works director, said some of the sprinkler nozzles might need some upgrading. "They should work. We can fund it as long as the cost is below $5,000," he said.

In other city business, the council directed staff to review the parking standards downtown.

"We have very strict parking rules in the Village. We need to loosen them up," Kline said.

Kline, who with King is part of the Village ad-hoc committee, said relaxing parking requirements might stimulate more business activity in the downtown.

Businesses on Big Basin Way have to buy parking spaces depending on their gross floor areas. For example, restaurants are required to buy one space for each 75 square feet of gross floor area.

Lori Tinfow, assistant city manager, said that the matter would come up for a public hearing soon.

City volunteers were honored at the April 20 council meetings as part of the Saratoga Volunteer Appreciation Week. More than 127 residents volunteered for the city between July 2004 and April 2005 and worked a total of 5,118 hours.

Fire Department • Fire and Environmental Protection Division • 1000 Villa Street • Mountain View, CA 94041-1295
650-903-6378 • FAX 650-903-6122

September 15, 2005

Mr. Bruce Wolfe, RWQCB Executive Officer
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: City of Mountain View's Urban Runoff Management Program
FY 2004-2005 Annual Report

Dear Mr. Wolfe:

This report is submitted by the City of Mountain View, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2004-2005 in accordance with the City of Mountain View's Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 1997 and updated in October 2000, and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 04-05 work plan during the past fiscal year; 2) evaluate program results for continuous improvement;3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

I. Contents of report;
II. Program highlights and accomplishments;
III. Summary of continuous improvement activities;
IV. Attachments:
   A. Certification Statement
   B. Self-Evaluation and Work Plan Completion Matrix
      - ICID
      - IND/COMM Inspections
      - Street, Roads, and Highways
      - Corporation Yards
      - Rural Public Works
      - Storm Drain O&M
      - Water Operations
      - New Development Planning Procedures
      - New Development Construction Inspection
      - Pest Management
      - Mercury Pollution Prevention

- Copper/Nickel
- Trash Inventory and Management
- Water Quality Monitoring
- PIP
- Staff Training
- Annual Reports and Work Plans

Program Highlights and Accomplishments

The City's Urban Runoff Management Plan URMP describes activities that are implemented to control storm water runoff pollution. During FY 04-05, the City continued efforts to implement its URMP to the maximum extent practicable. Attachment B provides self-evaluation for each element in the City's URMP. Highlights of the City's FY 04-05 URMP accomplishments are listed below:

- The City responded to 74 ICID incidents, which resulted in the issuance of 4 warning notices, and 1 administrative action with a penalty. A total of $600 in penalties was collected.
- The City continued its increased restaurant inspection and outreach program, conducting 192 restaurant inspections. This is an increase from 17 restaurant inspections conducted in FY 02-03, and 166 in FY 03-04.
- The City implemented the enhanced data collection and reporting requirements for the ICID and Industrial inspection programs.
- In addition to the restaurant inspections, the City conducted 196 industrial/commercial inspections and re-inspections (this figure does not include restaurants and hazardous materials facilities) during FY 04-05. The City assessed $850 in penalties resulting from the inspection program.
- The City conducted training for streets, parks, water, wastewater, fleet services, facilities personnel.
- The City implemented its PIP program, which included school outreach, publications, and public events, and multi-cultural outreach.
- The City reviewed 150 projects for storm water related items.
- The City implemented its C.3 requirements, which included approval of 9 projects, which included required runoff BMPs.
- The City conducted 148 construction site inspections, issuing 20 written notices.
- The City implemented its IPM Policy and IPM Plan.
- The City utilized a database for tracking pesticide use.
- Parks, forestry, and golf course staff received IPM training.

Continuous Improvement Activities

The City is committed to seeking URMP areas for improvement. The current continuous improvement items are listed below:

- The City will continue to implement its enhanced restaurant inspection program.
- The City will continue to work to improve implementation of the C.3 requirements, including revisions to include updated Group 2 and HMP requirements, and will seek ways to improve the program.

- The City will continue to evaluate and implement improvements to the IPM Plan, and pesticide management program.

Thank you for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact me at (650) 903-6378.

Very truly yours,

Eric Anderson, Urban Runoff Coordinator

cc. Sue Ma, RWQCB

Regional Board Comments on ICID in FY 2003-2004 Annual Report

Item	RWQCB Comment	City of Mountain View Response
ICID rated "Compliance"	No improvement or compliance actions were required.	

ICID Program Evaluation

During FY 04-05, the City responded to 74 ICID incidents, which is less than past years' results (92 incidents in FY 02-03 and 89 incidents in FY 03-04). The breakdown of the types of incidents, potential source, sources of reports, and follow-up and enforcement actions are summarized in the attachment to this section of the annual report. During FY 04-05 the City responded to 15 fewer incidents than during FY 03-04. Evaluation of the "Incident Type" data showed that the City responded to 11 fewer accidental spills, 3 fewer oil and grease incidents, and 5 fewer saw cutting incidents in FY 04-05. The "accidental spills" incident type are mostly vehicle accidents that result in spilled vehicle fluids. Conversely, the City responded to 5 more sanitary sewer spills during FY 04-05 compared to FY 03-04. The remaining incident types were consistent (+/- 1) during FY 04-05 when compared to FY 03-04.

The total number of incidents from food facility activity declined slightly from FY 03-04, but due to high turnover rate in restaurant employees, the City continued to target food facilities as potential source. During FY 04-05, the City continued its restaurant inspection program to address restaurant-related ICID incidents. This will be discussed further in the IND section of the annual report.

The City responded to 2 concrete discharge incidents during FY 04-05, which is consistent with the 2 incidents that occurred in FY 03-04.

Review of the data does not provide useful information regarding the distribution of ICID incidents. The incidents appear to be randomly occurring throughout the City.

Regional Board Comments on Industrial/Commercial Inspection in FY 2003-2004 Annual Report

Item	RWQCB Comment	City of Mountain View Response
IND rated "compliance."	No improvement or compliance actions were required.	

Industrial/Commercial Program Evaluation

During FY 04-05, the City implemented its Industrial/Commercial inspection program. The data above summarizes the City's actions. Common types of problems found are spills and leaks, housekeeping, training requirements, secondary containment needs, and for restaurants, washing or housekeeping problems. Discrepancies between the problems found and resolved were addressed in the FY 03-04 Annual Report. In summary, the discrepancies relate to scheduling of compliance dates outside of the reporting period, and some facilities failing to complete employee training. During FY 04-05, 23 automotive facilities failed to complete the training.

During FY 04-05, the City continued its restaurant inspection program. The City reorganized a position within the Fire Department, so an inspector was assigned to the Fire and Environmental Protection Division. One of the inspector's responsibilities is to inspect restaurant for fire code issues and environmental issues. This arrangement has resulted in a streamlined restaurant inspection program, and has resulted in a significant increase in restaurant inspections compared to past years.

During FY 04-05, The City assessed penalties in the amount of $850.

The City's Fire and Environmental Protection Division is currently short-staffed, so inspection duties will be prioritized to industrial waste pretreatment facilities, and facilities and industrial/commercial types with the greatest potential to contribute to storm water pollution.

Municipality: City of Mountain View

Public Streets, Roads & Highway O&M Program Evaluation

During FY 04-05, the City's sweeping totals were lower compared to FY 03-04. A summary of the City's sweeping totals is included with this report. The main reduction in overall sweeping mileage occurred from August through December, and was the result of equipment problems and redistribution of staff resources during the affected period. The reduced sweeping mileage was not significant. The City also continued to implement the Clean Sweep program, which provides access to streets that are impacted with parked cars.

Training during FY 04-05 (February 17, 2005) focused on incident response, preventing spills from reaching the storm drain or the sanitary sewer drain, chemical handling, and how to handle abandoned wastes. The Public Services Department's Safety and Training Manager coordinated the training. Training in conjunction with the Safety and Training Manager is a good way to present multiple topics to the employees without impacting operations.

Corporation Yard O&M Program Evaluation

During FY 04-05, the City conducted training for all MOC operations and maintenance employees regarding the Environmental Compliance Plan. The training mostly covered hazardous materials issues, such as storage, and incident response, spill mitigation, and reporting.

The City continued its contract for SWPPP inspections and monitoring for the MOC. Quarterly dry weather inspections and monthly wet weather inspections did not result in discoveries of new pollutant sources or new BMPs that may be needed. The recommendation to install a roof over the bulk storage area is still in place. The roof would prevent runoff of some sediment. The Annual Report for the MOC SWPPP is available for review upon request.

Rural Public Works Program Evaluation

The City of Mountain View is urbanized, so most of the Rural Public Works Performance Standards do not apply. The standards describing work performed along or across stream channels may be applicable depending on the project. The City's Public Works specifications require contractors to install erosion controls, and City contacts require contractor to obtain the necessary permits for working in and along watercourses.

Storm Drain System O&M Program Evaluation

During FY 04-05, the City's Wastewater Section continued to maintain storm drains by cleaning catch basins using a vacuum truck. The Wastewater Section also stencils storm drains throughout the City. Wastewater conducts preventative maintenance on the City's sanitary sewer system, which reduces sewer overflow incidents. In cases where sewer overflows occur, Wastewater will unplug the sewer, and vacuum the spilled sewage. These incidents are reported in the ICID data. During FY 04-05, the City reports an increased number of sewage overflows from 8 to 13 incidents. This may result from improved reporting rather than an actual increased number of incidents. Wastewater now reports incidents, which were considered minor and un-reportable in the past. Wastewater also responds to other types spill incidents, when needed.

Training during FY 04-05 focused on incident response, preventing spills from reaching the storm drain or the sanitary sewer drain, chemical handling, and how to handle abandoned wastes. The Public Services Department's Safety and Training Manager coordinated the training. Training in conjunction with the Safety and Training Manager is a good way to present multiple topics to the employees without impacting operations.

NEW DEVELOPMENT PLANNING PROCEDURES (C.3)

FY 2004-2005 Work Plan Self Evaluation Matrix

Item No.	Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
C.3.a Performance Standard Implementation Goal: To modify Mountain View's URMP to include revised model Planning Procedures Performance Standards which incorporate Provision C.3 requirements.				
NDP - all	**a.1.** Incorporate revised model Planning Procedures Performance Standards into local urban runoff management plans.	The City will review the Program-developed model Planning Procedures Performance Standards when completed. If acceptable, the City will incorporate the model Planning Procedures Performance Standard into its Urban Runoff Management Plan.	The Program's model Performance Standard and Supporting Documents for Planning Procedures for New Development and Redevelopment are adopted and included in the City's URMP.	FD
C.3.b Development Project Approval Process Goal: To modify Mountain View's development project approval processes, for both private and public development project, to incorporate the requirement of Provision C.3				
NDP – 1	**b.1.** Assess current stormwater-related requirements in Co-	1) Review development review process to identify steps or tools required to comply with C.3 requirements. Recommend modifications to the	1. The C.3 requirements are implemented using the City's existing development review process. Conditions of approval have been modified to require the controls, and guidance documents	FD CDD PW

	permittee's development review process, for public and private projects, and identify additional steps or tools required at each stage of the process to meet C.3. requirements.	development project approval process to comply with C.3. 2) Develop guidance document to assist developers and City staff implement the C.3 requirements.	have been modified or developed. 2. Guidance document is used to explain the requirements to developers. The Guidance document outlines the information that is required in the Storm Water Management Plan (SWMP) submitted with building plans. The SWMP includes the required BMPs, sizing information, O&M, and other details, which are reviewed by the City. The guidance document will be revised to reflect Group 2 requirements.	
NDP – 1	**b.2.** Develop new or modify existing review policies, ordinances, procedures, and/or conditions of approval to incorporate Group 1 requirements (based on results of tasks under C.3.c. through C.3.m.)	Upon completion of the b.1 tasks listed above, the City will begin the process of developing or modifying policies, procedures, and/or conditions of approval to implement Group 1 and Group 2 requirements.	In October 2004, the Mountain View City Council adopted a new section (Sec. 35.32.23) of the ordinance, titled "Permanent storm water pollution prevention measures." This ordinance section requires implementation of the C.3 requirements, the City's storm water Quality Guidelines, and inspection and maintenance responsibilities. Standard Operating Procedures are included in the URMP. Conditions of approval modified to require C.3 controls. Guidance document outlines C.3 requirements for developers. Guidance document will be revised to update Group 2 requirements.	FD CDD PW
NDP - 10	**b.3.** Train Co-permittee staff in planning,	The City will train Planning, Building, and Engineering staff on all changes to the development review process, and	City staff attended SCVURPPP C.3 training workshop on 6/9/2005 regarding BMP maintenance and inspection.	FD CDD

	building, and engineering departments on the C.3. provisions and goals, the required changes in the approval process, and the use of appropriate tools.	the use of tools, such as check sheets and updated materials. Staff training will be performed either in-house, or as part of a Program-wide effort.		PW
C.3.c Requiremnts for Group 1 and Group 2 Projects Goal: Prepare to require proponents of Group 1 projects to design and implement stormwater treatment BMPs or reduce stormwater pollution to the maximum extent practicable. Participate in development of the proposal for an alternative Group 2 project definition and prepare to implement C.3 requirements for Group 2 projects as needed				
NDP – 12	**c.1.** Develop and implement a procedure to request and log the type, size, and impervious area of every project (and extent of redevelopment if applicable) for determination of applicability of Group 1 (and later Group 2) requirements.	1. An impervious surface data sheet was developed for preliminary information about the types of projects that occur in Mountain View. 2. The impervious surface data collection sheet may be modified for use in the guidance document as a way to determine applicability of the C.3 requirements.	Impervious surface data collection sheets are required to be submitted with the Storm Water Management Plan required by the City's guidance document. Impervious surface calculation sheets may also be required during the Planning review process to determine if the project meets the C.3 threshold.	FD CDD PW

ATTACHMENT B

Item No.	Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
C.3.e. Operation and Maintenance of Treatment BMPs Goal: To develop and implement local agency operation and maintenance (O&M) verification programs to help ensure the proper maintenance of stormwater treatment measures on public and private property.				
NDP – 8	**e.1.** Develop and implement a procedure for logging information about treatment BMPs installed at approved Group 1 projects, and for maintaining a list or database of properties, treatment BMPs, and responsible operators.	The City's Fire and Environmental Protection Division currently maintains a database of facilities that have storm water treatment BMPs. The database is set up to print out annual letters requiring the facility contact to submit proof of BMP maintenance.	The City's existing database will be used to track treatment BMPs.	FD RBF
NDP – 8	**e.2.** Adapt model O&M agreement language to meet agency-specific needs and requirements and incorporate into the project review and	The City will review the model O&M agreement language that will be developed by the Program, and is due 12/02. If acceptable, the O&M agreement language will be incorporated into the project review and approval process as appropriate.	A final O&M agreement has been developed. Completed O&M agreements are required as part of the Storm Water Management Plan review and approval.	FD

	approval process.			
NDP – 8	**e.3.** Develop local programs for inspection of a subset of prioritized treatment BMPs to verify that the responsible party is performing required O&M.	The City will utilize the O&M verification system that is currently in place for treatment BMPs. The current system is to send annual maintenance letters to all facilities with treatment BMPs requiring submittal of maintenance certification. Additionally, treatment BMPs that are considered to be a priority for inspections will be inspected annually.	Inspections will be included in the existing Industrial/Commercial inspection program.	FD
NDP - 12	**e.4.** Report on BMP O&M verification program.	The City will report on the progress of the BMP O&M verification program during the Annual Reporting process. The annual reports will include effectiveness evaluation and planned program improvements.	At this time there are no completed projects with treatment BMPs that have been installed due to the C.3 requirement (Group 1) projects, so no inspections of the treatment BMPs have been performed. FY 05-06 should be the first year to report BMP O&M results.	FD
C.3.f. Hydromodification Management Plan (HMP) Goal: To manage increases in runoff peak flow and volume for Group1 projects, where such increases may cause increases erosion of creek beds and banks or related impacts, through implementation of a HMP.				
NDP – 1	**f.1.** Upon adoption by the Regional Board, begin implementation of HMP requirements for Group 1 projects that may cause	The City will review the HMP requirements. If acceptable, the HMP requirements will be implemented	HMP requirements will be incorporated into the City's C.3 implementation process and into the guidance document.	FD CDD PW

	increased erosion of other related impacts.			
C.3.h. Alternative Certification Goal: To allow a professionally qualified person to certify the adequacy of design of stormwater treatment measures.				
NDP	**h.1.** Alternative certfication	The City will develop an internal procedure to allow alternative certification of the adequacy of design of stormwater treatment measures.	Alternative Certification was discussed for inclusion in the City's Guidance Manual. The City is strongly considering including the alternative certification in the Guidance Manual.	FD CDD PW
C.3.g. Waiver and Compensatory Mitigation Program Goal: Establish a program under which a project proponent may request a waiver from treatment BMP requirements due to impracticability, with a provision to provide an equivalent water quality benefit to the same receiving water (that allows participation in regional solutions).				
NDP – 1	**g.1.** Develop local waiver program, perform legal review, and incorporate provisions in project review process	The City will review the model waiver and compensatory mitigation program that will be developed by the Program, and is due 3/03. If acceptable, the waiver and compensatory mitigation program will be incorporated into the project review and approval process as appropriate.	At this time, the City does not have a waiver and compensatory mitigation program since there is not a system to allow for participation in regional solutions. The City will consider a waiver and compensatory mitigation program if a viable opportunity becomes available.	
NDP - 12	**g.2.** Tracking information for reporting on waivers granted, including project data, reasons for and terms of the waiver, and the alternative benefit	If an acceptable waiver and compensatory mitigation program is adopted, the City's Fire and Environmental Protection Division will update the new development tracking database to include the requested waiver information.	Waiver tracking program is not applicable at this time.	

	project and completion date.			
C.3.j. Site Design Measures Guidance and Standards Development Goal: To incorporate site design measures that reduce water quality impacts into local design standards and encourage their use in project designs to meet C.3. requirements.				
NDP – 4	**j.1.** Review existing local design standards and guidance, and compare them to the list of areas to address in Provision C.3.j. and other references such as "Start at the Source" and the "Development Policies Comparison" work sheet. Prepare and submit an analysis of local standards, identified opportunities for revision, and proposed revisions.	1. Review list of recommended site design measures to reduce water quality impacts using references, including the NPDES Permit and "Start at the Source." 2. Compare the list of recommended site design measures with existing City standards and guidance. 3. Identify opportunities for revisions to City standards that will incorporate site design measures to reduce water quality impacts. 4. Prepare and submit an analysis of the revisions proposed to be incorporated into the City's project review process, including schedule for revisions and implementation	Interim C.3 guidance document references site design measures. C.3 guidance manual will include site design measures and standards.	CDD FD

Municipality: City of Mountain View

NDP – 4	**j.2.** Incorporate the revised standards and guidance into local project approval process and "fully implement" site design measures and guidance.	The revisions recommended from action j.2. will be incorporated and implemented during FY 04-05.	Site design measures are encouraged during review and comments on project Storm Water Management Plans.	CDD FD
C.3.k. Source Control Measures Goal: Require source control measures for new redevelopment projects to limit pollutant generation, discharge and runoff to the maximum extent practicable.				
NDP – 4	**k.1.** Revise conditions of approval to include the source control measures recommended in Provision C.3.k.	The City will review the model list of source control measures that will be developed by the Program, and is due 9/15/02. If acceptable, the City's Conditions of Approval will be revised to include the required source control measures.	Most source control measures were already included in the Mountain View City Code and listed in the Storm Drain Plan Review Check Sheet. During FY 02-03 (May 2003), the Mountain View City Code and the Storm Drain Check Sheet were also revised to include additional source control measures.	FD

Item No.	Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
C.3.l. Update General Plans Goal: Include water quality and watershed protection principles and policies in General Plans to the extent necessary to provide the basis for implementation of the measures required by Provision C.3.				
NDP - 1	**I.1.** Review current	The current City General Plan Policy has been reviewed, and pursuant to	General Plan was reviewed and found to adequately address policies needed to implement Provision C.3.	CA FD

	General Plan policies related to water quality and watershed protection, and incorporate additional policies as shown in C.3.I. as appropriate.	Goal F, Policy 16 of the Environmental Management Chapter is shown to adequately address the principles and policies that are needed to implement Provision C.3.	The pertinent General Plan sections are included in the City's URMP.	
C.3.m. Water Quality Review Processes Goal: To ensure that water quality impacts and appropriate mitigation measures are identified as part of environmental review of proposed projects.				
NDP - 3	**m.1.** Review CEQA initial study checklists and other environmental review documents and modify documents as needed to include questions that sufficiently address water quality impacts of projects.	1. Review and evaluate the examples of CEQA Water Quality Review questions that are listed in C.3.m. 2. Compare the examples in C.3.m. to the City's existing CEQA and other environmental review documents. 3. Revise CEQA and other environmental review documents as necessary.	The City reviewed the example Water Quality Review questions listed in C.3.m, and determined that the City's existing CEQA check list adequately addresses the questions in a manner that is consistent with the SCVURPPP memo, dated October 17, 2003.	FD CDD
C.3.n. Reporting Requirements Goal: To meet the Provision C.3. reporting requirements, and plan for anticipated data needs, and begin collecting and tracking required data on development projects as needed.

Regional Board Comments on New Development-Planning Procedures in FY 2003-2004 Annual Report		
Item	**RWQCB Comment**	**City of Mountain View Response**
04-05 Annual Report comments.	RWQCB requested a clarification/discussion regarding the City's Impervious Surface Data sheet.	City submitted a response to the RWQCB comment stating that the data sheet is used to determine if projects are required to comply with C.3. Data sheet is also required in Storm Water Management Plans, which are required in the City's C.3 guidance document.

New Development-Planning Procedures Program Evaluation

During FY 04-05, the City implemented the C.3 requirements using its existing development review process. Information regarding the requirements is provided to applicants early in the planning process. The Fire and Environmental Protection Division places conditions of approval on projects requiring applicants to prepare and submit a Storm Water Management Plan for applicable projects. The information required in the Storm Water Management Plan is listed in the City's Storm Water Quality Guidelines document. The Storm Water Management Plan includes information about the treatment controls that will be installed or used to comply with the requirements. The Plan also describes the O&M requirements. During the plan review phase of the process, building plans and the Storm Water Management Plan are checked to verify that the conditions and requirements are met. Plans are approved and a building permit will be issued when the conditions and requirements are met.

During FY 04-05, the City approved seven private Group 1 projects and two public Group 1 projects. Each of the projects includes installation of CDS treatment devices. Some of the projects also incorporate vegetated swales as part of the site's treatment control strategy. Conditions were places on all projects that Maintenance Agreements would be entered and recorded prior to final occupancy. At this time, none of the approved Group 1 projects have been completed, so post-construction O&M and inspection requirements have not been initiated. Most of the projects in Mountain View are dense, with little landscaping available for infiltration, which is why manufactured treatment devices are typically selected. The City is currently reviewing three additional private Group 1 projects. A summary of the Group 1 projects is listed below.

By October 2005, the City will revise its Storm Water Quality Guidelines to include the Group 2A requirements and the Hydrograph

Modification Plan requirements.

The City reviewed 150 projects for potential storm water related impacts and requirements.

Municipality: City of Mountain View

New Development-Construction Inspection Program Evaluation

During FY 04-05, the City continued to implement an effective construction inspection program. The City conducted 148 construction site inspections and issued 20 written notices. All notices were for minor violations with corrective actions, and no penalties were levied. The majority of the inspections were conducted at small project sites. The City currently has a few moderately sized projects, which are the priority sites for inspections. During FY 03-04, the City did not have many larger projects, so inspections were focused on much smaller projects, which resulted in a larger number of inspections. The focus changed during FY 04-05, to prioritze inspection of the larger sites that began construction, which resulted in a lower priority on smaller sites. Most of the construction inspection items identified were housekeeping issues that were corrected, such as sweeping, replacing filters, and adding rock to the construction driveway. Pre-winter inspections were conducted and information was distributed, which seemed to help maintain compliance throughout the winter.

The City will continue to implement its construction inspection program. Pre-winter inspection and information distribution is important for achieving compliance, and will be conducted again in FY 05-06. .

PEST MANAGEMENT
(Provision C.9.d of the Permit)

FY 2004-2005 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 03-04 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Municpal Pesticide Use				
Goal 1.A. Eliminate all unnecessary municipal pesticide use (particularly organophoshate (OP) pesticide use) and implement Integrated Pest Management (IMP) techniques.				
I.A.1	Record Keeping and Tracking	Develop and implement a process for tracking pesticide use on municipally owned property (PS #8). Include in the process reporting and justification for the use of OP pesticides and BMPs employed during OP pesticide use.	Pesticide use tracking database was used during FY 04-05. Pesticide use data for FY 04-05 is available on request.	FD, CSD, SGL, and PCO
I.A.2	IPM Policy	Adopt an IPM policy and/or ordinance requiring the use of IPM techniques in the agency's operations, minimization of pesticide use, and the restricted use of organophosphate pesticides only when their use is justified and adverse water quality impacts are minimized (PS #2).	City's IPM Policy was adopted by the City Council on September 10, 2002.	FD, CSD, SGL
I.A.3	IPM Plan	Develop and implement standard operating procedures (SOPs) and best management practices (BMPs) for implementing the IPM policy. (PS #3).	Final IPM Plan was completed in June 2003. IPM Plan includes SOPs and BMPs. The Plan was implemented during FY 04-05.	FD, CSD, SGL, CM

ATTACHMENT B

SANTA CLARA VALLEY URBAN RUNOFF POLLUTION PREVENTION PROGRAM

FY 2004-2005 ANNUAL REPORT

Municipality: City of Mountain View

		BMPs will include special precautions to reduce water quality impacts when applying pesticides.		
I.A.4	Performance Standards	Update local URMPs to incorporate/adapt the model Pest Management Performance Standard, including a description of the legal authority (IPM policy/ordinance, contract language), work plan elements, BMPs, and SOPs needed for implementation. (Program FY 01-02 Work Plan)	Program's Model PS is adopted and included in the City's URMP.	FD
I.A.5	Contract PCOs	Develop and implement a process to ensure that any contractor employed to conduct pest control and pesticide application on municipal property engages in pest control methods consistent with the IPM policy adopted by the agency (PS #5).	City's PCO contract did not go for bid during FY 04-05. City's purchasing Division was notified of the IPM Policy and will be informed that future IPM requirements will be included when new PCO Contract is solicited. IPM Policy and Plan have been provided to the City's PCO contractor.	FD, purchasing
I.A.6	Chemical storage area inspection	Conduct a periodic agency-wide search of chemical storage areas for pesticides no longer legal for application per EPA, State, and/or local requirements, and properly dispose of any such pesticides pursuant to appropriate waste disposal regulations.	During FY 04-05, the Fire Department evaluated City-wide chemical inventories. No OP pesticides were identified.	FD
MM I.A.1	Annual report	Document completion of tasks in annual reports. Use pesticide-tracking process to document pesticide use.	Pesticide use data will be used in the effectiveness evaluation section of the annual report.	FD

ATTACHMENT B

SANTA CLARA VALLEY URBAN RUNOFF POLLUTION PREVENTION PROGRAM

FY 2004-2005 ANNUAL REPORT

Municipality: City of Mountain View

Goal 1.B. Raise awareness of all municipal employees and train employees who apply pesticides for the municipality about the municipality's IPM Policy and/or IPM techniques as appropriate.

I.B.1	Employee Training	Ensure that employees who apply pesticides for the agency obtain the appropriate training as required by the County Agricultural Commissioner and the State Department of Pesticide Regulation (DPR) (PS #4a).	All City pesticide applicators receive training required by the County and State.	CSD, SGL
I.B.2	IPM Training	Provide annual training on the appropriate portions of the IPM Policy, SOPs, and BMPs, and the latest IPM techniques to employees within departments responsible for pesticide application (PS #4b).	City Community Services Department Managers and Supervisors met on June 9, 2005 to discuss IPM Plan implementation, including record keeping. Shoreline Golf Links Managers and Supervisors attended IPM training discussing IPM at golf courses on June 1, 2005. Community Services Managers and Supervisors attended the Regional IPM training workshop on June 14, 2005.	FD. CSD, SGL
I.B.3	Training	Periodically (at least annually) inform employees who are not authorized and trained to apply pesticides that they cannot use over-the-counter pesticides in or around the workplace, consistent with the IPM Policy (PS #4c).	Departments have been informed to contact the PCO for pest problems. Training conducted by the Safety and Training Manager on February 17, 2005 reviewed the Environmental Compliance Plan for the Operations and Maintenance Divisions. This training covered incident response (including spills), chemical handling, emergency response, and handling abandoned waste.	FD, CSD, PS

FY 2004-2005 ANNUAL REPORT

Municipality: City of Mountain View

Item No.	Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Public Education and Outreach **Goal II.A.** Increase awareness of IPM so target audiences recall less toxic pest management messages and adopt IPM behaviors. Target audiences include residential and commercial users, pesticide retailers, municipal employees, and special districts (PS #6)				
II.A.1	WE&O Outreach	Assist with local implementation of the Watershed Education & Outreach (WE&O) Campaign[1], which will target the general public and include messages about less-toxic pest control and proper disposal (Program FY 01-02 Work Plan).	The City supports WE&O Outreach through Program participation. The City distributed IPM and less toxic pest control information at various public events, such as the Art and Wine Festival, and Arbor Day Fair. The Community Outreach Coordinator also distributed Pest control fact sheets in Spanish.	FD, CM
II.A.10	Local Outreach	Prepare and pitch IPM stories and press releases to local media.	During FY 04-05, the City did not prepare IPM articles.	FD
II.A.12	IPM Outreach	Assist with implementation of local components of a "Pesticide User Outreach" project[2] targeting residential and commercial users (see Program FY 01-02 Work Plan).	City supports this item through Program Participation.	FD
II.A.13	IPM Outreach	Provide information on less toxic pest control (e.g., IPM techniques, municipal IPM policies, model contract language, training opportunities, etc.) to neighboring special districts (e.g., open space districts, vector control districts,	The City did not provide information to neighboring special districts. City supports outreach through regional effort.	FD

[1] Funded by all Co-permittees in FY 01-02.

		and school districts) as appropriate		
MM II.A.1	Annual report	Document or estimate numbers of residents reached by outreach efforts and media advertising	Through distribution of IPM materials at community events, the City educated approximately 2,500 residents.	FD
Goal II.B. Educate pesticide retailers and consumers about less toxic pest control products and promote the sale of such projects.				
II.B.1	IPM Otreach	Continue to fund and participate in the BASMAA Regional IPM Partnership[3]. (Program FY 01-02 Work Plan)	City addressed this item through Program participation.	FD
II.B.2	IPM Outreach	Continue to implement cost-effective elements of the IPM Store Partnership Program. Create and provide fact sheets and other materials to pesticide retailers to facilitate point-of-purchase outreach. Visit stores as necessary to ensure ongoing participation. (Program FY 01-02 Work Plan)	The City continued its support of the Our Water Our World program during FY 04-05. Three stores in Mountain View participated in the program.	FD
II.B.3	IPM Outreach	Assist Program to offer IPM training opportunities to pesticide retailer employees through coordination with Master Gardener-taught educational programs.	This item addressed through Program participation.	FD
MM II.B.1	IPM Outreach	Document number of participating stores, materials distributed and employees trained. Evaluate the cost-effectiveness of the IPM Store	Three stores continued participation in the OWOW program. Pest fact sheets, and shelf talkers provided at the stores.	FD

[3] Funded by all Co-permittees in FY 01-02.

		Partnership Program each year		
Pest Control Operators (PCOs) **Goal III.A.** Minimize pesticide use by PCOs contracted for structural pest control and landscape maintenance.				
III.A.4	PCO operations	Require PCOs contracted for municipal applications to use pest control methods consistent with the municipality's IPM policy (through contract specifications). Specifically, require contractors to: a) follow the agency's IPM policy, BMPs, and SOPs; b) provide evidence of current IPM training, when feasible; and c) provide documentation of pesticide use on agency property to the agency in a timely manner (PS#5).	IPM Policy and Plan was provided to the City's contract PCO, Bay Valley Pest. Bay Valley submits records of pesticide applications to the City.	FD
MM III.A.1	Record keeping and tracking	Document pesticide use by PCOs on municipal property	During FY 04-05, records of pesticide applications by Bay Valley were submitted to the City. These records were included in the pesticide database. Pesticide use data for FY 04-05 is available on request.	
Goal III.B. Require all PCOs to implement Best Management Practices (BMPs)				
III.B.2	PCO Contracts	Require PCOs contracted by municipalities to implement BMPs through contract specifications (see Action III.A.4., PS #5)	PCO contract was not up for renewal during FY 04-05. IPM Policy was provided to City's purchasing Division for inclusion in future contracts.	
MM III.B.1	Reporting	Document efforts to complete the above actions	Purchasing Division was advised of requirement to include IPM in City pest control operations.	FD, FASD

Commercial Businesses

Goal IV.A. Determine the extent of commercial business employees use of pesticides (I.E., pesticide applications not performed by a licensed PCO) and conduct appropriate outreach regarding less toxic pest management.

IV.A.1	Commercial Outreach	Develop and implement education programs that target commercial businesses, per recommendations developed in Program work plan.	No commercial outreach regarding IPM was conducted in FY 04-05. City supports regional outreach efforts.	NA
MM IV.A.1	Commercial Outreach	Document outreach efforts targeting businesses, as recommended in the work plan to be developed by the Program	No commercial outreach regarding IPM was conducted in FY 04-05. City supports regional outreach efforts.	NA

Household Hazardous Waste Collection

Goal V.A. Provide pesticide disposal services through household hazardous waste (HHW) collection programs for all residents and small businesses, and encourage use of these programs.

V.A.1	HHW	Ensure that adequate pesticide disposal services exist for residents and conditionally exempt small quantity commercial generators.	The City participates in the Santa Clara County HHW Program. Businesses are also eligible to participate in the Palo Alto small quantity program.	PW – Solid Waste
V.A.3	HHW	Work with HHW collection agencies to support, enhance, and help publicize programs for proper pesticide disposal (PS #7).	The Public Works Department, Solid Waste Division publicizes HHW information in the Resource newsletter.	PW – Solid Waste
V.A.5	HHW Outreach	Provide hazardous waste disposal information to residents, through distribution of materials (e.g., utility bill insert, city newsletter, community events, etc.) or advertising in local	HHW information included in the City's Resource newsletter.	PW- Solid Waste

		media		
MM V.A.1	Reporting	Document that household hazardous waste collection programs adequately serve residents and businesses and that any exchange programs do not exchange organophosphate or banned pesticides.	The City participates in the Santa Clara County HHW Program. Documentation regarding the ability to serve the residents and the prohibition against exchanging OP pesticides or banned pesticides is available from the County HHW Program.	SC County HHW
New Development **Goal VI.A.** Minimize pesticide use at new and redevelopment sites.				
VII.A.1	New Development	Have appropriate municipal staff coordinate with Program to identify landscaping techniques less likely to attract pests, including a list of pest-resistant plants, and develop model conditions of approval for pest resistant landscaping features and practices. (Required to meet NPDES Permit Provision C.9.d.ii. and Draft Permit Provision C.3.k.)	During FY 04-05, the City used planning conditions to minimize irrigation runoff, which also reduces pesticide runoff. Standard condition also directs developers to select appropriate plants for the location and in accordance with the appropriate climate zones.	FD
VII.A.2	New Development Review	Consider pest-resistant landscaping and design features in the design, landscaping, and environmental reviews of proposed development projects. (NPDES Permit Provision C.9.d.ii.)	During FY 04-05, the City used planning conditions to minimize irrigation runoff, which also reduces pesticide runoff. Standard condition also directs developers to select appropriate plants for the location and in accordance with the appropriate climate zones.	FD
VII.A.3	Training	Train staff responsible for design review on pest-resistant landscaping techniques and model conditions of approval and the importance of	No new pesticide reduction conditions were added, so no additional training was conducted.	FD

		minimizing pesticide use in runoff from development sites (NPDES Permit Provision C.9.d.ii.).		
VII.A.4	Tracking	Develop and propose enhanced reporting format for documenting use of pesticide reduction measures at development sites. (Draft Permit Provision C.3.n.)	No action on this item during FY 04-05.	FD
MM VII.A.1	Reporting	Summarize types of pesticide reduction measures required (such as by conditions of approval) for new development and significant redevelopment projects, and the percentage of new development and significant redevelopment projects for which pesticide reduction measures were required (Draft Permit Provision C.3.n.).	During FY 04-05, the following conditions were required to control irrigation runoff, which also reduces pesticide runoff: 1. Require no steep slopes exceeding 10%; use mulch as cover; plants with low water requirements; appropriate plants for climate zone. 2. Efficient irrigation systems, including; multiprogramable timers; rain shutoff devices; drip irrigation, and flow reducers.	FD

Item No.	Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
Monitoring and Science **Goal VII.A.** Participate in coordinated monitoring efforts to support pesticide TMDL development and implementation.				
VII.A.1	Monitoring	Continue financial support of the Regional Monitoring Program (RMP) (FY 01-02 Program budget line item for $150,000). (Program FY 01-02 Work Plan)	Item addressed through Program participation.	FD

Municipality: City of Mountain View

Review and Revision of Work Plan

Goal X.A. Implement a Work Plan that includes appropriate goals, actions and monitoring mechanisms to reduce pesticide-related toxicity in urban runoff.

X.A.1	Work Plan	Review and continuously improve the goals, actions, and monitoring mechanisms of the work plan considering results of self-evaluations, comments from Regional Board staff and other interested parties, and results of local performance review meetings if any.	City's Work Plan was submitted to the Regional Board.	FD
X.A.1	Work Plan	Revise work plan and add continuous improvement items.	No actions for this item.	FD

MERCURY POLLUTION PREVENTION PROGRAM
(Provision C.9.c of the Permit)

FY 2004-2005 Work Plan Self Evaluation Matrix

Item No.	Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
MPP Pro-gram	Survey of City-used Mercury	Complete mercury survey that describes mercury-containing products used by the City.	Survey was completed and submitted. This item will be removed from future Work Plans and Annual Reports	PW FD PSD
MPP Pro-gram	Adoption of City mercury reduction policy.	The City will adopt a mercury policy in FY 03-04, requiring the virtual elimination of mercury from controllable sources in urban runoff from agency operations.	In June 2004, the City finalized Administrative Instruction No: 16-01, which established a Mercury Control Program. The Mercury Control Program includes: a procedure for the elimination of mercury-containing products to the maximum extent practicable; maximum recycling of fluorescent lights; participation in a household hazardous waste collection program for residential disposal of mercury-containing products; and public outreach.	FD
MP Task I.F	Implement guidelines for mercury-containing products reduction and management	The City will implement measures to reduce the quantity of mercury-containing products, and manage essential mercury-containing products.	No major mercury reduction measures were identified for FY 04-05. Mercury-containing switches will be removed at the time of replacement. Fluorescent lights are hauled for disposal.	PW
MP Task II.D	Documentation and reporting of mercury-containing	The City will implement measures for documenting and reporting quantities of mercury-containing products disposed.	The City maintained fluorescent light disposal records. During FY 04-05, the City recycled: 716 fluorescent tubes, 211 U-tubes, 30 2' lamps, and 7 round 12-lamps.	PW

	products disposal			
MP Task V.A	Mercury Disposal Outreach	The City will assist with program efforts to provide outreach to educate small business and small quantity generators about fluorescent light recycling programs.	Information about HHW and small business waste disposal programs is included in the City's Resource newsletter, which is mailed to all residents and businesses three time a year.	
MPP Pro-gram	HHW Collection	No specific tasks. City to continue HHW efforts through participation in the Santa Clara County HHW Collection Program.	City continued participation in the Santa Clara County HHW collection program. The City of Mountain View collaborated with the City of Palo Alto to offer fluorescent light and mercury thermometer drop-off services to residents.	PW

Item	RWQCB Comment	City of Mountain View Response
No Comments.	NA	NA

Mercury Pollution Prevention Program Evaluation

During FY 04-05, the City implemented its Mercury Control Program. The Mercury Control Plan establishes a policy for reducing mercury-containing products at City facilities, through identification of mercury-containing parts and devices at City facilities, and the gradual phase-out of those parts and devices. The City supports the County-wide HHW and small quantity generators programs.

Other Water Quality & Watershed Management Programs Evaluation

Current trash control efforts include two City-sponsored creek cleanups a year. These cleanup events occurred on Stevens Creek and Permanente Creek. A local organization, Friends of Stevens Creek Trail, with some support from the City also conducted creek cleanups throughout the year. City Community Services Department personnel and Shoreline Park Rangers also patrol Stevens Creek Trail and remove trash as needed. After conducting volunteer creek clean-ups for a number of years, it appears that the amount of trash removed during these events is decreasing.

City Community Services Department employees maintain City parks, including litter removal. City Public Services Department personnel also respond to trash dumping incidents that may occur throughout the City.

The City participated in a collaborative effort with volunteers from the Stevens Creek Watershed Council, and staff from the Water District, to conduct its trash assessments. These assessments were conducted at two sites along Stevens Creek. A summary of those assessments is attached.

Item No.	Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
General Outreach				
PIP – 1-4	PIP Master Plan – General Outreach	Continue to conduct PIP General Outreach activities.	General outreach activities conducted during FY 04-05 include maintaining brochure stands at City facilities, participating in HHW program, storm drain stenciling, and articles in local publications.	FD
Targeted Outreach				
PIP – 1-4	PIP Master Plan – Targeted Outreach	Continue to conduct PIP targeted outreach activities.	Targeted outreach activities conducted during FY 04-05 include participation in the Clean Bay Business Program, displaying brochures at local auto parts stores, and continuing restaurant outreach. Targeted outreach to restaurants is explained in the Industrial/Commercial section of this report. Three Mountain View stores also participated in the Our Water, Our World Program designed to distribute pesticide alternatives. This is further explained in the Pest Management Section of the report.	FD
PIP – 1-4	Targeted Outreach – Multicultural	Continue to support the City's multicultural outreach program, which is designed to provide information	During FY 04-05, the multicultural outreach program distributed pollution prevention information at public events. Spanish brochures and fact sheets for vehicle	CM

	Outreach	regarding various topics to non-English speaking people.	BMPs and pesticide information are distributed through the multi-cultural outreach program.	
Educational Programs				
PIP – 1-4	PIP Master Plan – Education Activities	Continue to conduct PIP education activities.	During FY 04-05, the City sponsored a school education and outreach program along with the City of Palo Alto. In total, 16 school presentations were made to 330 students in Mountain View. The presentations were made to 2nd-6th grade groups. A summary of the school outreach program is available upon request. The City also conducted employee training activities, which are summarized in the Staff Training Table.	FD
Citizen Participation				
PIP – 1-4	PIP Master Plan – Citizen Participation	Continue to conduct PIP citizen participation activities.	During FY 04-05, the City sponsored two creek cleanup events, where citizens removed trash and debris from local creeks. The City also staffed information booths at the Mountain View Art and Wine Festival, and the Arbor Day Fair. The primary messages at those events were IPM and pesticide reduction, Mercury reduction, and vehicle sources.	FD

Item	**RWQCB Comment**	**City of Mountain View Response**
No Comments	NA	NA

Public Information/Participation Program Evaluation

General Outreach:

During FY 04-05, articles in the Resource newsletter advertised HHW, creek clean-up, and mercury thermometer drop-off events. The City continued storm drain stenciling activities. The City also displayed BMP brochures at City facilities.

Targeted Outreach:

Vehicle BMP brochures were provided for distribution at local auto parts stores. Three hardware and garden stores in Mountain View also participated in the Our Water, Our World program, which promotes use of less toxic pesticides. As explained in the Industrial Commercial Discharges section of this report, restaurant inspections included distribution of BMP posters.

The multicultural outreach program seems to be an effective method to provide information in different languages. However, limited multi-language outreach materials are available. The City supports regional efforts to produce multi-language materials.

Education Activities:

The City's participation in the school education program was conducted through funding the Palo Alto Program. Mountain View commends the education consultant, and the City of Palo Alto for developing and implementing an outstanding program, and for educating students in

Mountain View about water pollution issues.

A summary of employee training efforts is listed below.

Citizen Participation:

During FY 04-05, the City sponsored two volunteer creek cleanups and supported other cleanup efforts. These events successfully removed litter and debris from local waterways. The City also distributed information at public events. The effectiveness of information distribution at these public events is difficult to describe because a lot of people who visit the information booth are already informed about the issues, and some visitors seem to randomly collect free materials without considering the message.

Conducting Stormwater Inspections of Industrial and Commercial Facilities	Urban Runoff Coordinator Fire and Environmental Compliance Inspector	Fire Department	4/5/2005	Cupertino	Commercial and Industrial facility inspections, BMPs, record keeping, and case studies. Urban Runoff Coordinator presented at the training seminar.
C.3 Workshop – Conducting Stormwater Treatment BMP Maintenance and Inspections	Urban Runoff Coordinator	Fire Department	6/9/2004	Cupertino	Workshop describing technical information about storm water treatment BMPS O & M.

Staff Training Evaluation

During FY 04-05, staff received training on a number of topics, including spill response, storm drain pollution prevention, IPM practices, industrial inspections, construction inspections, and stormwater BMP O&M. The City strongly supports regional training efforts for IPM-related issues.

The City continued to train employees about storm water pollution prevention. Storm water pollution prevention training is coordinated and conducted with safety training assemblies, which seems to be a great method for streamlining different training requirements.

Dear Mr. Wolfe:

This report is submitted by the City of Palo Alto, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2004-2005 in accordance with the City of Palo Alto's Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 2004 and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 04-05 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

I. Contents of report;
II. Program highlights and accomplishments;
III. Summary of continuous improvement activities;
IV. Attachments:
   A. Certification Statements
   B. Annual Report
      - IC/ID Elimination Activities
      - Industrial/Commercial Discharger Control Program
      - Public Agency Activities

- Sediment Control Measures
- Staff Training Summary Table

Program Highlights and Accomplishments

The City of Palo Alto's Urban Runoff Pollution Prevention Program for FY 2004-05 included several notable accomplishments. The following programs and activities are described in the body of this Annual Report:

- Palo Alto has demonstrated continued leadership in the area of land development review. Staff in the Public Works, Utilities, and Planning Departments have been briefed on the C.3 requirements by the Management Committee representative and have attended Program training workshops. Presentations on C.3 design concepts and requirements have been made to the land development decision makers (Planning Commission, Architectural Review Board, City Council).

  As noted in the attached Annual Report, there were only two permit applications approved during FY 04-05 for projects with new or replacement impervious area in excess of one acre, although there were several additional applications pending as of the end of the year. We have not as yet begun to conduct BMP maintenance verification inspections, since the two approved Group 1 projects are still under construction. There are maintenance agreements pending with the project owners, however, and staff is preparing to implement its inspection program in the coming year.

City Public Works and Planning staff members participated in the Santa Clara Valley Water Resources Protection Collaborative and the development of its Guidelines and Standards (G&S) for Land Uses Near Streams. The City Council approved a resolution of support for the Collaborative's goals on July 18, 2005, pledging to strive to incorporate the G&S into City policies and regulations by February 2007.

The City Council has adopted a revised storm water ordinance that will regulate Group 2A projects and require hydromodification management measures for specified projects. The ordinance will take effect for all permit applications deemed complete on or after October 13, 2005. Our progress with incorporating storm water site design measures into our policies and ordinances has been delayed by the slow progress of the comprehensive Zoning Ordinance Update (ZOU). The single-family residential zoning code was updated this year; other zoning classifications (including commercial, industrial, and multi-family residential) are expected to be modified during the coming year. In the mean time, we are continuing our practice of encouraging appropriate construction-stage and post-construction storm water BMPs for all significant development projects.

- Palo Alto's street sweeping program provides an exceptional level of service to the community and provides effective pollutant removal. Residential streets are swept every week, and commercial districts are swept three times weekly. Palo Alto also has a high level of participation in its residential yard trimmings pick-up program, which includes curbside pick-up of leaves, grass clippings, and tree trimmings. In FY 04-05, 2205 tons of material was collected through street sweeping and 9667 tons of residential yard trimmings were collected. After assessing our trash hot spots this year, we will be looking at innovative ways (including closer coordination with other responsible agencies such as Caltrans and the Valley Transportation Agency) to reduce the amount of trash at these locations in the coming year.

- Palo Alto's pest management program continues to be a model for other agencies. Working closely with departmental staff and City contractors and vendors, we have achieved a significant reduction in the use of pesticides at City parks and facilities. The message of integrated pest management and use of less-toxic alternatives reached an audience of 70 persons throughout the Regional Water Control Plant (RWQCP) service area through this year's Bug Buster workshops. RWQCP staff played a significant role in planning the 2005 Regional IPM Conference, which drew a large number of pest control operators (PCO).

- The City of Palo Alto has a solid Public Information/Participation program, regularly reaching out to the public in a variety of ways – events, public displays, presentations, direct mailings, utility flyers, newspaper ads, cable TV shows, and an extensive web site. We also have a well-received school outreach program, featuring a hands-on lab

experience for middle schoolers and a week-long "sewer science" program for high school students. The program reached 4,370 students in the POTW service area during FY 04-05. The *Our Water, Our World* campaign is an effective means of promoting integrated pest management throughout the region, with its extensive series of fact sheets and brochures, in-store displays, training of garden/hardware store employees, and outreach advertising.

- City staff has actively participated in many of the Program's Ad Hoc Task Groups (including Watershed Education & Outreach, Trash Management, San Francisquito Creek Sediment Study, C.3 Provision Oversight, Hydrograph Modification Management Plan (HMP), and O&M Inspection and Verification), the Watershed Management Initiative, and the Water Resources Protection Collaborative, providing valuable input to Program endeavors and keeping informed of the current issues and policies relevant to storm water pollution prevention.

Continuous Improvement Activities

The following is a summary of the key continuous improvement activities to be pursued in the coming year:

Identified Improvement	Status	Schedule for Completion
Implement transition to Group 2A projects for C.3 requirements	Begin enforcement of the revised ordinance making the C.3 requirements applicable to Group 2A projects.	October 2005
Implement Hydromodification Management Plan (HMP) requirements	Begin enforcement of the revised ordinance making the HMP requirements applicable to specified Group 1 projects.	October 2005
Review and modify site design measures	Continue to implement changes to the site design measures required by the City's zoning ordinance and other development regulations.	June 2006
Implement the Water Resources Protection Collaborative's Guidelines and Standards for Land Uses Near Streams	Begin to incorporate the G&S into the appropriate zoning & grading ordinances.	February 2007
Provide training for the new storm water inspector (Construction, IC/ID)	Long-tenured storm water inspector retired in FY 2004-05. Need to provide training for new employee.	Fall 2005 and ongoing
Address trash hot spots	Implement innovative techniques to reduce trash at identified hot spots, including closer coordination with Caltrans and the Valley Transportation Agency.	June 2006
Implement recommendations	After receiving the TetraTech	June 2006

Implement recommendations generated by the TetraTech audit	After receiving the TetraTech audit report on Palo Alto's urban runoff program, we will implement appropriate measures to respond to the audit findings and recommendations for improvement.	June 2006

Thank you for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact me at (650) 329-2129.

Very truly yours,

Joe Teresi

IC/ID Program Evaluation

We continue to receive illegal dumping reports from the public as well as from City employees. Awareness among City staff has improved over the past several years. Proactive members of the fire department, building inspection, street maintenance, storm water collection maintenance, and wastewater field operations crews have been a consistent source of referrals. This leads us to believe that there are more active observers out in the field each day beyond those employed directly within our program.

Although construction activities still dominate the IC/ID incidents they do appear to be less frequent, and a larger percentage of construction personnel appear to have already received the storm water pollution prevention message. Aggressive monitoring and enforcement as well as information provided during the planning and permitting process appears to be effective. There has, however, been an increase in problematic de-watering incidents. This appears to be caused by the significant upward trend in the number of private residences constructing larger, new homes with basements as well as the addition of basements to existing homes. This has also led to some long-term dewatering issues. We have addressed this within the planning and building permitting processes and believe that we now have effective solutions in place.

There has been a noticeable increase in efforts from our industrial waste staff and the wastewater collection system operations staff regarding identification, prioritization and prevention of sanitary sewer overflows (SSO). Increased focus will continue to be applied to the use of source control measures to reduce the amount of blockage-causing grease discharged by food service facilities to the sanitary sewer system and to reduce on-site storage and cleaning issues. The wastewater operations field crew has stepped up efforts for the identification of hot spots for increased line cleaning and identification and documentation of non-compliant facilities. This has been driven by new management in the operations staff (the former manager of the industrial waste inspection program is now managing the wastewater collection system maintenance staff) as well as the Regional Board's new SSO reporting requirements and the pending collection system maintenance plan requirements. The number of SSOs has been lower than in previous years due to these efforts.

INDUSTRIAL/COMMERCIAL DISCHARGER CONTROL PROGRAMS

FY 2004-2005 Work Plan Self Evaluation Matrix

Item No.	Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
	Food Service Facility Inspections	1. Continue to work with Statewide Fat-Oils-Grease (FOG) work group to develop measures to prevent sanitary sewer blockages caused by FOG discharges by food service facilities. 2. Work with the Bay Area Pollution Prevention Program (in cooperation with the FOG work group) to develop BMPs and outreach materials for food service facilities. 3. Share information/recommendations from FOG with Program co-permittees. 4. Develop web site with BMP information for food service facility owners. 5. Establish protocol for Electric	1. City of Palo Alto continues to play an active role in the statewide Fat-Oils-Grease work group. 2. The City hosts and maintains the CalFOG website (http://www.calfog.org), which includes a collection of superior outreach materials from around the country. 3. The City discusses concerns with the Program co-permittees as they arise and during regular RWQCP Partners meetings. We send copies of all outreach materials and modify them as requested for the co-permittees. The City relies on the CalFOG website to share resources with the co-permittees. 4. The City has documents available on http://www.city.palo-alto.ca.us/cleanbay/grease.html and also relies on the CalFOG website to share resources with food service facilities. 5. Electric Utilities staff now have direct	Public Works Environmental Compliance

		Utilities staff to report illegal discharges to underground utility vaults from food service facilities.	communications with and access to the wastewater collection system operations team as well as Environmental Compliance staff. It has been decided that no more formal protocol beyond these communications is needed.	
	Inspection of Facilities	Continue enforcement of new provisions in Sewer Use Ordinance, updated in 2002.	The City has worked with the planning and building inspection divisions to ensure that all newly-constructed and remodeled facilities meet all requirements. Industrial facilities are inspected for compliance during each pretreatment inspection. Non-permitted facilities have received information but have not proven to be an easily reachable audience.	Public Works Environmental Compliance
	Enhanced Reporting Procedures	Prepare Annual Report using enhanced reporting procedures adopted in December 2001.	Semi-annual reporting relies on the complete and accurate documentation within the data system. The data system has been modified to allow for greater ease of use and additional ways of interpreting the data.	Public Works Environmental Compliance
	Effectiveness Evaluation	Review and evaluate effectiveness of IND program as part of Annual Report.	See effectiveness evaluation discussion below.	Public Works Environmental Compliance

Municipality: City of Palo Alto

Industrial/Commercial Program Evaluation

The largest single facility category in FY 04-05 remains Automotive and the compliance rate for this category remains above 95%. The Automotive category (more accurately, "Vehicle Service Facilities") has been very thoroughly addressed by the City's Clean Bay Business Program through outreach, positive incentives, inspections, sampling, and enforcement. The Program will be continued due to the high compliance rate that it is achieving.

Restaurants continue to be one of the more difficult facilities to educate and bring into compliance. The alleys and parking lots behind commercial businesses are prime problem areas. Tallow bins, dumpsters, equipment and vehicles are key sources. While the City has made advances in these areas, there is still room for improvement. In addition to commercial inspections, this will become an increased area of proactive inspections by the storm water investigator. The wastewater operations group has also become more proactive in sewer line cleaning and videotaping and will be using the gathered information to drive inspections, corrective actions and enforcement. The Fats-Oils-Grease (FOG) program will receive more attention in the coming years and we anticipate more frequent and more rigorous inspections.

The storm water inspection of industrial facilities has become solidly integrated into the wastewater inspection program and awareness at the facilities has come into line with that expectation. As a result, there are relatively few storm water issues found during inspections at permitted facilities.

Public Streets, Roads & Highway O&M Program Evaluation

STREET SWEEPING DATA

See attached sheet for annual street sweeping data.

Public Works Operations staff reports storm water pollution violations to Environmental Compliance staff when violations are observed by field crews or (on rare occasions) reported by residents. Environmental Compliance staff are supportive when violations are reported and take appropriate steps to follow-up with the responsible party to promote future compliance with storm water discharge regulations and BMPs. Ongoing BMPs are reviewed by individual work crews at bi-weekly tailgate meetings and evaluated for effectiveness and potential modification. For example, crews no longer use base rock to fill the bags used to create protective dams around catch basins. They found that the bags had a tendency to break when using base rock (with the rock material then sometimes spilling into the catch basin being "protected"), and so have switched back to using sand in the bags. The slurry recovery system & trailer purchased last year for use by the street maintenance crew is working well. The new system has a longer vacuum hose, a more powerful motor, and more storage capacity for captured slurry.

Urban Runoff
Pollution Prevention Program

FY 2004-2005 Monthly Record Keeping Form

Month and Year: 7/1/04 – 6/30/05

Agency: City of Palo Alto

Completed by: David Aro, Supervisor – Public Works **Date**: 7/7/05

STREET SWEEPING	Volume of material collected (cubic yards)	Miles swept* (curb miles)
1. Sweeping		
Residential Areas:		
Broom	1,092	3,277
Regenerative Air	10,002	10,939
Vacuum	0	0
Commercial Areas:		
Broom	231	901
Regenerative Air	762	2,065
Vacuum	0	0
Industrial Areas:		
Broom	205	2,020
Regenerative Air	160	500
Vacuum	0	0
Other Areas Swept: (e.g., parking lots, major arterials)		
Broom	137	739
Regenerative Air	185	1,277
Vacuum	0	0
TOTAL	12,774	21,718

2. Have there been any changes in your street sweeping program?
(efforts to have parked cars removed, changed sweeping frequency, new equipment, significant downtime, etc.)

- After a successful trial period, in March 2005 we posted permanent NO PARKING signs in a congested portion of the Downtown North neighborhood to prohibit parking for one hour a week on street sweeping day in order to conduct a more thorough sweeping of the streets in this area.

LEAF REMOVAL

Volume of leaves removed by City/Town crews: 2,205 TONS (Note: This figure is a combined figure that includes the weight of the material tabulated above PLUS the leaves collected by our autumn leaf pushing and pickup program. Since all of the material (both street sweeping debris and leaves gathered by leaf pusher trucks) is combined and hauled to the landfill in garbage compactor trucks, there is no way to provide a separate figure for leaf removal.)

Leaves bagged by residents and picked up by your City/Town: 9,667 TONS (Note: This figure is the total weight of the material collected by the City yard trimmings pickup program (this includes leaves, grass clippings, tree trimmings, etc.) We do not have the ability to separate out the weight or volume of leaves alone.)

Check box if you do not have a leaf removal program other than routine street sweeping: ☐

* Report total miles covered by sweepers including areas operated in tandem or repeated.

	Staff Training	Conduct annual staff training for Municipal Service Center (MSC) employees.	Training conducted in several sessions to different work groups (Public Works Operations, Water-Gas-Wastewater Operations, Electric Operations, Parks Maintenance) during the early winter of FY 04-05.	Public Works Environmental Compliance & MSC staff.
	Facility inspection	Conduct annual inspection of Municipal Service Center facility to identify any remedial actions required to protect storm water quality.	Annual facility inspection conducted on September 30, 2004. Inspections were also conducted in preparation for the Tetratech audit on April 14th and 27th. See summary of findings in evaluation section below.	Public Works Engineering & Environmental Compliance & MSC staff.

Regional Board Comments on Corporation Yard O&M in FY 2003-2004 Annual Report

Item	RWQCB Comment	City Of Palo Alto Response
N/A	N/A	N/A

Corporation Yard O&M Program Evaluation

The Municipal Service Center (MSC) yard and facilities were in relatively good shape with the following items requiring some attention.

Utilities Storage Area: a container of biopolymer viscosifier was moved to a covered location.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 ANNUAL REPORT

Municipality: City of Palo Alto

Utilities Asphalt Patching: The waste diesel/asphalt emulsion drum area needs better housekeeping. There was an open drum with waste that needed to be labeled, closed, and placed into secondary containment. There was an old, unlabeled, black, 5-gallon tote that needed to be identified, labeled and either disposed of or moved to secondary containment. There was an unlabeled pesticide type sprayer that needed to be identified, labeled and either disposed of or moved to secondary containment.

Paint/Stencil Area: This cleanliness of the area was better than in the past. The stencils and paint storage areas were covered and generally clean. However, the paint shop should be reminded to keep the area swept and minimize paint chips and run-off from the area as much as practical. The preference is to move the operation indoors.

Natural Gas Compressor: There were some oily areas within the enclosure. The drain collection bucket needed to be placed in secondary containment and the oily area cleaned.

SWPPP: Should be updated and made more specific to different operations within the MSC.

Spills: Conduct regular inspections for automotive and equipment spills and leaks.

All of the recommended corrective actions have been taken. The SWPPP for the Municipal Service Center will be updated during FY 05-06.

Rural Public Works Program Evaluation
The Best Management Practices included in the Performance Standard worked well during the first season of implementation. The contractor who performs fire road and trail maintenance for the Community Services Department in the City's foothills parkland is well-versed in erosion control techniques. The contractor provides valuable advice to City staff on road and trail maintenance issues.

PUBLIC AGENCY ACTIVITIES
STORM DRAIN SYSTEM O & M

FY 2004-2005 Work Plan Self Evaluation Matrix

Item No.	Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
	Storm Drain System Operations and Maintenance	Palo Alto Public Works Operations staff are continuing to implement all the elements of the Storm Drain System Operations and Maintenance Performance Standard, as contained in the City's Urban Runoff Management Plan, on an ongoing basis.	Inspected and cleaned 2712 catch basins to remove debris before it enters the Bay. Flushed 313,414 linear feet of storm drain pipelines and vacuumed up the debris. Reported a number of potential discharge violations to Environmental Compliance Division for remedy and follow-up.	Public Works Operations
	Staff Training	Provide annual training to Public Works Operations storm drain maintenance crews.	Storm drain maintenance crew attended annual pollution prevention training presented by Environmental Compliance staff.	Public Works Operations
	Effectiveness Evaluation	Review and evaluate effectiveness of SD operations and maintenance program as part of Annual Report.	See effectiveness evaluation discussion below.	Public Works Operations

Regional Board Comments on Storm Drain System O&M in FY 2003-2004 Annual Report

Item	RWQCB Comment	City Of Palo Alto Response
N/A	N/A	N/A

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 ANNUAL REPORT

Municipality: City of Palo Alto

Storm Drain System O&M Program Evaluation

STORM DRAIN MAINTENANCE DATA

Number of catch basins cleaned – 2,712 each
Weight of debris removed from catch basins (using hand tools) – unknown (see note below)
Weight of debris removed by vactor truck – 140,900 lbs.
Linear feet of pipeline cleaning by vactor truck – 313,414 lf.
Hours of maintenance on storm water pump stations – 323 hours

The weight of debris removed by hand cleaning of storm drain catch basins is unknown because a staff member from another City department mistakenly cleared debris from the drying bunker. The weight was likely similar to FY 03-04 (18,000 lbs.)

The significant increase in linear footage cleaned by vactor truck (43% increase over last year) is due to better experience with the new Vaccon truck. and its superior capabilities (larger water reservoir, higher pressure water jet, etc.).

Reported our concerns regarding Best Management Practices for contractors using sand bags filled with base rock materials as not a preferred method. Construction projects often last many months and the bags rot in the sunlight during the non-rainy season. BMP inspection is a lower priority item for construction crews, and they often ignore the sand bags once placed. Consequently, City Staff is left to remove damaged sand bags from blocked inlets and clean base rock out of the catch basins. More emphasis is being placed on BMPs such as perimeter straw wattles and stabilized construction entrances that keep sediment on site (rather than trying to capture sediment in the gutter with sand bags).

Water System O&M Program Evaluation
Water crews continue to employ best management practices to dechloraminate potable water prior to discharge to gutters and storm drains and to control pollutant discharges during construction/maintenance activities. Employed innovative technique to decholraminate water during emptying of potable water storage reservoir (placed large bag of ascorbic acid tablets in storm drain and drained the reservoir slowly in order to dechloraminate the discharge). Despite a staff shortage in the Water-Gas-Wastewater Operations crew, there were no significant problems encountered in implementation of this program element during the past year.

NEW DEVELOPMENT
PLANNING PROCEDURES (C.3)
FY 2004-2005 Work Plan Self Evaluation Matrix

Item No.	Activity	FY04-05 Work Plan Tasks	FY 04-05 Accomplishments	Responsible Party
	Permit Provision C.3.c	1. Modify City's storm water ordinance to include Group 2 projects. 2. Begin enforcement of requirements for Group 2 projects.	1. Deadline for Group 2A compliance was postponed by the Regional Board until October 20, 2005. Ordinance revision was taken to City Council for first reading on August 8, 2005. Ordinance effective date will be October 13. 2. Enforcement will begin for permit applications deemed complete on or after October 13, 2005.	Public Works Engineering & Planning
	Permit Provision C.3.e	1. Continue inspection of BMP controls to verify maintenance at Group 1 projects on an annual basis. 2. Modify BMP inspection program to incorporate Group 2 projects. 3. Report on BMP maintenance inspections.	1. No Group 1 projects have been completely constructed as of June 30, 2005. First projects will be subject to inspection in Winter 05-06. 2. Ordinance modified to include Group 2A in maintenance inspection program, effective October 13, 2005. 3. No maintenance inspections have been conducted to-date.	Public Works Environmental Compliance
	Permit provision C.3.f	1. Continue participation in development of Program HMP. 2. Develop ordinance changes and/or conditions or approval to comply with HMP. 3. Provide staff training on HMP requirements.	1. Actively participated on Program's HMP Ad Hoc Task Group; chaired Exempt Areas work group. Provided GIS data to Program to assist in development of HMP applicability maps. 2. HMP requirements incorporated into City Council-approved ordinance, to take effect October 13, 2005. 3. Staff training will be provided in FY 05-06, although	Public Works Engineering

		4. Start implementation of HMP requirements for applicable projects.	the HMP requirements are expected to apply to very few projects in Palo Alto, due to the built-out nature of the City and the prevalence of lined or tidally-influenced creeks. 4. Implementation of the HMP requirements will begin effective October 13, 2005.	
	Permit Provision C.3.j	1. Adopt changes to appropriate ordinances and/or policies based on review of existing local design standards and a comparison to the list of areas to address in Provision C.3.j and other references such as "Start at the Source" and the "Development Policies Comparison" worksheet. 2. Report on ordinance and policy changes as part of Annual Report.	Incorporation of ordinance changes is tied to the pace of the Citywide Zoning Ordinance Update. So far, only the Single-Family Residential zoning code has been modified. Changes included 1) a requirement that 60% of the front yard setback of single-family residential parcels remain pervious, provided that all sites may have an impervious 16' x 20' driveway and an impervious 4' x 20' walkway, and 2) allowing the use of pervious materials for residential driveways. City Public Works and Planning staff members also participated in the Santa Clara Valley Water Resources Protection Collaborative and the development of its Guidelines and Standards (G&S) for Land Uses Near Streams. City Council approved resolution of support on July 18, 2005, pledging to strive to incorporate the G&S by February 2007.	Public Works Engineering & Environmental Compliance, Planning, & Building Inspection
	Permit Provision C.3.m	Report on changes to environmental review process as part of Annual Report.	Palo Alto has not yet revised its CEQA guidance documentation. This is a task that is needed regardless of the C.3 regulations, as the existing CEQA guidelines are outdated and inadequate. The guidance from SCVURPP and San Jose will be considered when the CEQA guidelines are updated by Planning.	Planning
	Permit Provision C.3.n	Report on new development and redevelopment projects for which C.3 requirements apply, as part of Annual Report.	See attached matrix.	Public Works Engineering

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 ANNUAL REPORT

Municipality: City of Palo Alto

	Staff Training	Provide annual training to Planning and Public Works Engineering staff.	Provided training to applicable work groups on the storm water regulations as follows: • Planning: November 10, 2004 • Building Inspection: October 29, 2004 • PW Engineering: November 17, 2004 • Utilities Engineering: November 18, 2004 • Environmental Compliance: July 29 2004	Planning & Public Works Engineering Divisions
	Effectiveness Evaluation	Review and evaluate effectiveness of planning procedures as part of Annual Report.	See effectiveness evaluation discussion below.	Planning & Public Works Engineering Divisions

Regional Board Comments on New Development-Planning Procedures in FY 2003-2004 Annual Report

Item	RWQCB Comment	City Of Palo Alto Response
N/A	N/A	N/A

New Development-Planning Procedures Program Evaluation

All of the elements (revised ordinance, staff training, long-term maintenance agreement, etc.) are in place for the implementation of the C.3 requirements. As reported, only two applications with impervious area > one acre were received during the fiscal year, although several additional applications were pending as the year ended. The challenges for the coming year will be incorporating the new HMP requirements, accommodating the change to Group 2A requirements, and making changes to site design standards through the City-wide Zoning Ordinance Update and Standard Drawings and Specifications update.
