provided funding for radio and print advertising, and the Santa Clara County Integrated Waste Management Division provided funding for transit advertising. In addition, the radio station KRTY offered, at no added cost, an "enter-to-win" contest promoting the drop-off locations. Both KRTY and the *San Jose Mercury News* provided free advertising to support this promotion. Listeners/readers were encouraged to participate in the contest by either dropping-off their used fluorescent bulbs at participating stores or by submitting the "pledge to dispose mercury properly" contest entry form available online and within the *San Jose Mercury News*. During the four-week contest period, nearly 400 entries were received for a chance to win tickets to a sporting event.

Details of the outreach campaign are included in the Fall Media Campaign report included within Appendix B-1. Copies of all outreach materials are included within Appendix B-10.

Monitoring and Science

The Santa Clara Basin Watershed Management Initiative (SCBWMI) is serving as the stakeholder forum for the development of the Guadalupe River TMDL Report for Mercury. The Guadalupe River Watershed encompasses parts of San Jose, Los Gatos, Campbell, Monte Sereno and Santa Clara. The Program is a stakeholder in the Guadalupe River TMDL process. The Santa Clara Valley Water District (SCVWD) is taking the lead role in the TMDL development process by solely funding the $900,000 study and serving as Co-Chair of the TMDL Work Group and Stakeholder Group. Program staff is also participating in the TMDL process.

Program staff, along with other Co-permittee staff, have attended work group meetings and reviewed draft technical memoranda developed by the consultant. Water Board staff are currently developing a draft TMDL report. Program staff is participating in work group meetings to discuss the draft TMDL report and implementation plan. Program and Co-permittee staff will continue to participate in the development of the Guadalupe River Watershed TMDL for mercury by attending meetings and reviewing technical results and reports.

The Program continued to provide financial support to the Regional Monitoring Program (RMP), including the Mercury Deposition Network Pilot Study. In addition, Program and Co-permittee staff actively participates in RMP Technical Review Committee (TRC) and Steering Committee (SC) meetings and provides meeting summaries to the Management Committee. Staff reviewed available draft reports, including the 2006 RMP Draft Monitoring Plan.

A Memorandum of Understanding (MOU) regarding development of a Water Quality Attainment Strategy for San Francisco Bay-Delta and Tributaries was entered into by the Water Board, Bay Area Clean Water Agencies (BACWA), and Bay Area Stormwater Management Agencies Association (BASMAA) on August 6, 2001, and includes the development of TMDLs for 303(d) pollutants including mercury. This group is referred to as the Clean Estuary Partnership (CEP). As a member agency of BASMAA, the Program is involved in the development and funding of potential projects for the San Francisco Bay mercury TMDL (mercury TMDL). Program staff has been participating in the CEP technical committee meetings, CEP Board meetings (as needed) and CEP Mercury Risk Reduction Work Group.

In addition, the Program's *Multi-Year Receiving Waters Monitoring Plan* includes collecting and analyzing receiving water samples for mercury. Refer to Section 4- Monitoring Activities for additional details regarding mercury monitoring activities.

In addition, Program staff is tracking the results of the "historic" meeting between the State Air Resources Board and State Water Quality Control Board in February 2006. During the meeting, the idea of cross media (water and air) coordination in the investigation of the aerial deposition of pollutants from air to land was discussed. Once deposited on land, pollutants can enter water bodies through stormwater runoff. The priorities of future work groups will be to identify an inventory of the original sources of various pollutants and develop an action plan to address those pollutants at the source. Future Water Board-Air Board meetings are anticipated.

U.S. Department of Energy (DOE) Office of Building Technology's Vision 2020 Lighting Technology Roadmap

Since the Mercury Plan's first year of implementation, Program staff has been tracking the progress made by the U.S. Department of Energy (DOE) office of Building Technology's Vision 2020 Lighting Technology Roadmap in accordance with Mercury Plan Action IV.F. DOE's Building Technologies Program continues to move forward on their Vision 2020 Roadmap. Progress includes seven strategies to address the challenges of transforming the lighting marketplace and developing new technologies that enhance lighting quality, efficiency and cost effectiveness. There are no significant updates or progress to report in FY 05-06.

EVALUATION OF PROGRAM EFFECTIVENESS AND NEXT STEPS FOR MERCURY PLAN

During FY 05-06, there was considerable progress made on tasks outlined in the Mercury Plan, specifically related to public outreach and progress of regional partnerships. Significant outcomes from the FY 05-06 Work Plan and the primary mercury pollution prevention activities planned for FY 06-07 include:

Guidelines for Reduction and Management of Mercury-Containing Products: In FY 03-04, Co-permittees began strategizing on how to implement the Program's Guidelines for reducing and managing mercury-containing products identified for virtual elimination and began implementation in FY 04-05. Implementation will continue in FY 06-07.

Mercury Pollution Prevention Outreach: The Mercury Pollution Prevention Outreach Work Group successfully completed the implementation of a two-year, two-phase fluorescent light tube recycling campaign in FY 03-04, and continued outreach in subsequent years to support the CoHHW Program's Mercury Reduction Grant.

The FY 05-06 Media Campaign included free promotional print ads, live promotional announcements, web site exposure and a sports event contest package from KRTY, a third party sponsor. Posters, contest boxes and floor decals were featured at participating hardware stores within Santa Clara County. Bus signs were also visible throughout the County and featured a four-week override. Total gross impressions from media advertising were 20,420,100. Nearly 400 Got Bulbs contest entries were received by KRTY, mostly from the web site and the *San Jose Mercury News* advertisement.

During FY 05-06, the CoHHW Program collected 277,000 feet[1] (67,943 pounds) of fluorescent bulbs at 18 retail drop-off locations within Santa Clara County[2]. This is a significant increase

[1] Since fluorescent light bulbs come in different sizes, quantities are reported in terms of the total length (feet) of tubes collected.
[2] Information regarding the collection of mercury containing products (e.g., fluorescent bulbs, thermostats, thermometers and other products) during FY 05-06 obtained from a memorandum *entitled Fiscal Year 2005/2006 HHW Program Update* (dated July 21, 2006). This memorandum was prepared by Rob D'Arcy, Santa Clara County Hazardous Materials Program Manager.

from FY 04-05. During FY 04-05, the CoHHW Program collected 166,000 feet (41,597 pounds) of fluorescent bulbs.

It is estimated that approximately 0.803 kilograms of total mercury was diverted (i.e., discharge to the environment was avoided) to recycling from fluorescent lamps collected by the CoHHW Program[3] in FY 05-06. In addition, the HHW Program also collected 231 mercury-containing thermometers, 425 pounds of elemental mercury (includes thermostats, thermometer and other products) and 51,050 pounds of household batteries during FY 05-06.

In FY 06-07, the Program will continue to conduct advertising to promote the fluorescent bulbs drop-off locations.

Coordination Efforts with Regional Organizations: The Guadalupe Hg Draft TMDL Report, SCBWMI Guadalupe Hg Work Group meetings and Program staff review of several draft products are recent highlights of the Program's coordination efforts with local and regional organizations. Program staff will continue to attend CEP (Clean Estuary Partnership) TMDL meetings, Regional Monitoring Program (RMP) Steering Committee and Technical Review Committee meetings. In addition, Program staff will continue to track the progress of the State Water Board-Air Board meetings.

[3] Based on a 1999 National Electrical Manufacturers Association survey entitled *Environmental Impact Analysis: Spent Mercury-Containing Lamps, January, 2000 (Fourth Edition)*, the average four-foot fluorescent lamp contains about 11.6 milligrams (mg) of mercury. For the sake of estimating the amount of mercury sent for recycling, approximately 69,250 four-foot fluorescent lamps were collected. As a result, 0.803 kilograms of total mercury diverted (i.e., discharge to the environment was avoided) to recycling is a rough estimate.

Table 7-1
Status of FY 05-06 Mercury Pollution Prevention Tasks[1]

Task	Status
I. Municipal Use of Mercury-Containing Products	
I.F. Implement guidelines developed under Action I.E.	**On-going -** Co-permittees began implementation in FY 03-04.
II. Household Hazardous Waste Collection	
II.A. Provide mercury-containing products disposal services for residents and small businesses.	**On-going** - Disposal services are provided by the County HHW Program, Palo Alto Regional Water Pollution Control Plant and the Sunnyvale Materials Recovery and Transfer (SMaRT®) Station.
II.C. Implement guidelines developed under Action II.B.	**On-going -** Co-permittees began implementation in FY 03-04.
II.F. Work with HHW collection agencies to develop and help publicize fluorescent light recycling program.[2]	**Completed/Ongoing –** Began effort in FY 02-03. The Mercury Pollution Prevention Outreach Workgroup collaborated with the Santa Clara CoHHW Program for implementing the outreach component in the Program's two-phase fluorescent light tube (FLT) recycling campaign. The first phase of the campaign, which was developed in FY 02-03, targeted residents. The second phase, completed in FY 03-04, targeted small businesses. The main objective of both phases was to show the negative health and environmental impacts of mercury and the methods available to the public for the proper disposal of FLTs. During FY 04-05 and FY 05-06, the Program conducted outreach to promote the free fluorescent bulb drop off locations provided by the County HHW Program.
III. Monitoring and Science	
III.A. Continue financial support of the Regional Monitoring Program (RMP), including the Mercury Deposition Network Pilot Study and	**On-going** - Program and Co-permittee staffs actively participated in RMP TRC and SC meetings and provided meeting summaries to

[1] Completed Mercury Pollution Prevention Tasks are described in previous Annual Reports (Table 7-1).
[2] Action II.F. is being conducted in conjunction with Public Education and Outreach Actions.

Table 7-1
Status of FY 05-06 Mercury Pollution Prevention Tasks[1]

Task		Status
	the Clean Estuary Partnership (CEP). Continue to actively participate in the RMP Steering Committee (SC) and Technical Review Committee (TRC).	Management Committee. Staff reviewed available reports and provided comments. Draft reports included *2006 Draft RMP Monitoring Plan*. Both Program and Co-permittees' staffs are actively involved with the CEP technical and management committees; and review of proposed Work Plans and study scopes. Program and Co-permittee staffs also participate in the CEP Mercury Work Group. In addition, the City of San Jose continues to chair the CEP technical committee.
	• The City of San Jose will continue to provide in-kind services for the maintenance of the Mercury Deposition Network site near San Jose.	The City of San Jose has continued this activity beyond the December 2005 compliance date and is evaluating whether to continue into FY 06-07 and beyond.
III.B.	Provide financial and staff support for a coordinated regional plan to collect data for the mercury TMDL, as defined in the CEP MOU.	**On-going -** The Program continued to participate in the CEP (see Section 4, Monitoring for a discussion of the CEP (formerly TMDL MOU) activities and accomplishments to date).
IV. Regional, State, and Federal Coordination		
IV.A.	Participate in the activities of the Bay Area Stormwater Management Agencies Association, the California Storm Water Quality Task Force, and the San Francisco Estuary Institute and communicate Program efforts.	**On-going** - Program staff continue to attend BASMAA, CASQA and SFEI RMP meetings (See Internal and External Meetings FY 05-06 attached to the *Review of FY 05-06 Program Management Services* within Appendix A-2).
IV.B.	Collaborate in technical studies to support TMDL development and implementation including the Santa Clara Basin WMI Guadalupe River Mercury TMDL Workgroup.	**On-going** - Program and Co-permittee staffs actively participate in the Guadalupe Mercury TMDL Watershed Work Group and Stakeholder group. Staff reviewed available reports including *Draft TMDL Report*.
IV.E	Support, participate in, and advocate increased regional collaborati	**Ongoing** - The Program will support the RWQCB in collaborating with the BAAQMD but will not directly work with the BAAQMD. The Program supports the RWQCB through participation in the CEP.

Table 7-1
Status of FY 05-06 Mercury Pollution Prevention Tasks[1]

Task	Status
	Mercury air deposition is being addressed regionally. Program staff will continue to track the progress of the State Water Board-Air Board meetings. The first meeting was held in February 2006.
IV.F. Support and track the progress of the U.S. Department of Energy (DOE) Office of Building Technology's Vision 2020 Lighting Technology Roadmap.[3]	**In Progress** - DOE's Building Technologies Program continues to move forward on their Vision 2020 Roadmap. Progress includes seven strategies to address the challenges of transforming the lighting marketplace and developing new technologies that enhance lighting quality, efficiency and cost effectiveness. There are no significant updates or progress to report in FY05-06.
V. Public Education and Outreach	
V.A. Develop various outreach programs to educate target audiences about proper disposal of mercury-containing products and alternative non-mercury containing products. Outreach programs will include, but may not be limited to, the following:	**Completed/Ongoing[4] -** In FY 05-06, the Mercury Pollution Prevention Outreach Work Group continued its mercury pollution prevention outreach. Outreach was coordinated with the County HHW Program's Mercury Grant implementation plan.
• Develop and begin to implement a fluorescent light recycling outreach program to educate residential users and encourage proper disposal of fluorescent lights.	**Completed/Ongoing[4] -** Phase I outreach of the two year, two phase Work Plan was completed in FY 02-03. This phase focused on residential outreach. Additional annual coordination is continuing, as appropriate. In FY 05-06, the County HHW Program continued to develop partnerships retail stores to provide free fluorescent lamps drop-off sites for residents. To Program conducted a media campaign to

[3] DOE's Vision 2020 Lighting Technology Roadmap includes this goal for the year 2020, "Highly efficient, reduced-mercury fluorescent sources will come to market." Sustainable Conservation's September 27, 2000 report entitled *Reducing Mercury Releases from Fluorescent Lamps: Analysis of Voluntary Approaches* concluded that "we do not believe that starting a new collaborative approach with manufacturers to create mercury-free fluorescent lamps is the most effective use of resources at this time." Sustainable Conservation recommends focusing on voluntary recycling of mercury-containing lamps as an alternative approach.

[4] These tasks were marked as Completed and Ongoing since the specific public education and outreach task was completed but outreach is ongoing. Articles will continue to be posted and updated, as appropriate. The Program will continue to assist the CoHHW with public outreach activities as resources allow.

Table 7-1
Status of FY 05-06 Mercury Pollution Prevention Tasks[1]

Task	Status
	promote these drop-off locations (See Section 7 and Appendix B-1 of this Annual Report for additional details).
• Develop and begin to implement a fluorescent light recycling outreach program to educate small businesses and conditionally exempt small quantity generators and encourage proper disposal of fluorescent lights. (For example, the small business outreach program might include coordination with local chapters of the Building Owners and Managers Association [BOMA] or the National Association of Industrial and Office Properties [NAIOP].)	**Completed/Ongoing[4] -** In FY 03-04, the Work Group implemented Phase II of the two-year, two-phase Work Plan. Phase II outreach efforts were focused on small businesses and CESQGs. Additional annual coordination will continue, as appropriate.
• Coordinate with municipal inspectors to integrate mercury outreach to industrial businesses into their existing routine pretreatment, source control, and/or hazardous materials inspection processes	**Ongoing -** Co-permittees began coordination efforts in FY 03-04.
V.B. Develop or adapt existing mercury outreach materials, as needed, for outreach programs.	**Completed/Ongoing[4] -** As part of the Outreach Work Plan for Action V.A, development of materials began in FY 02-03. To date, the following outreach pieces have been developed by the Outreach Work Group: • Two fact sheets for the worldwide web (one for residents and one for businesses); • Two newsletter articles (one for residents and one for businesses); • One press release; • One video public service announcement for broadcast on local city cable channels; • Three newspaper ads, two radio ads, one transit (bus poster) ad;

Table 7-1
Status of FY 05-06 Mercury Pollution Prevention Tasks[1]

Task	Status
	and • Signage (posters and decals) for promoting the fluorescent drop-off locations. All outreach pieces aim to show the negative health and environmental impacts of mercury and the methods available to the public for the proper disposal of FLTs. Copies of all outreach materials developed during FY 05-06 are included within Appendix B-10.
V.C. Attend community events and distribute outreach materials.	**Completed/Ongoing[4] -** As part of the Outreach Work Plan for Action V.A, distribution of outreach materials continued during FY 05-06.

SECTION 8

NEW AND REDEVELOPMENT CONTROL MEASURES

8. NEW AND REDEVELOPMENT CONTROL MEASURES

INTRODUCTION

This section describes the Program's efforts during FY 05-06 to assist Co-permittees to control the impacts of development on stormwater quality and flow through the development project planning, review and approval process. Tasks related to construction inspection are described under Section 2, Co-permittee Guidance, and Section 2, Performance Standards.

BACKGROUND

On October 17, 2001, the Water Board adopted Order 01-119 which amended the Program's Permit Provision C.3. (New and Redevelopment Requirements) to contain significant new requirements. These requirements include:

- Numeric design standards for sizing stormwater treatment controls;
- Limits on increases in peak stormwater discharge rates and/or durations from new or redevelopment sites ("hydromodification") that may result in increased potential for erosion or other adverse impacts in creeks;
- Requirements for operation and maintenance of stormwater controls;
- Requirements for site design and source control measures;
- Definition of a minimum project size, based on amount of impervious surface created, for which the design standards, control measures, peak flow limitations, and maintenance requirements apply;
- Requirements for changes to General Plans and environmental review processes to provide authority to implement the requirements; and
- Reporting requirements.

These requirements are applicable to "Group 1" projects (those with one acre or more of impervious surface) and later to "Group 2" projects (those with 10,000 square feet or more of impervious surface).

To assist Co-permittees in completing and implementing these requirements, Program staff prepared the *Guidance for Work Plan Tasks Related to Implementation of Permit Provision C.3. (New and Redevelopment Requirements)*. This guidance identified proposed actions to meet the requirements of Provision C.3. and whether the actions would be implemented at the Program level, Co-permittee level or both. All of the Program and Co-permittee "start up" tasks have been completed, and Co-permittees are in the ongoing implementation phase.

In February 2003, the Water Board adopted and/or amended the stormwater permits for the Contra Costa, Alameda, and San Mateo countywide stormwater programs with different requirements than those in the Program's permit. The Water Board Executive Officer stated the Board's intention to make all of the permits consistent, and as a result, extended the deadlines for implementation of certain C.3. provisions[1]. In addition, the Program submitted a letter to the Water Board on September 22, 2003 proposing an alternative Group 1 and Group 2 project

[1] Letter to Beau Goldie, SCVURPPP Management Committee Chair, from Loretta K. Barsamian, Executive Officer, California Regional Water Quality Control Board, San Francisco Bay Region, Re: Extension of Specified Deadlines in Order 01-119, May 12, 2003.

definition consistent with the other stormwater programs' permits[2], which was accepted by the Water Board in a letter dated January 29, 2004[3]. On July 20, 2005, the Water Board adopted a Tentative Order[4] (which amended portions of Provision C.3. in Order 01-119) to further conform the permit language to that of the other permits in the region, amend the Group 2 requirements to include a revised alternative Group 2 definition, and incorporate key provisions in the Hydromodification Management Plan (HMP) Report.

The adopted Order No.R2-2005-0035 allows a phased implementation of C.3. at Group 2 projects based on land use and potential for pollution. Group 2A consists of projects under one acre and greater than 10,000 square feet of impervious surface that have one of the following land use categories: gas stations; auto wrecking yards; loading docks or parking lots greater than 10,000 square feet; and other industrial or commercial uses where potential pollutant loading cannot be mitigated by post-construction source control and site design practices. Implementation for Group 2A projects began on October 20, 2005. Group 2B consists of all other land uses in the same size category and implementation for Group 2B began on August 15, 2006.

Order R2-2005-0035 also adopted the key provisions of the Program's HMP Report. The key provisions, including management standard, performance criteria, and applicability criteria, are presented in Attachment A to the Order, and an applicability map is presented in Attachment B. The Order required Co-permittees to begin implementation of the HMP on October 20, 2005.

To summarize, on October 15, 2003, Co-permittees began implementing the C.3. requirements for Group 1 projects (i.e., those projects that included creation or replacement of one acre or more of impervious surface). On October 20, 2005, Co-permittees began implementing the HMP requirements and C.3. requirements for Group 2A, and by August 15, 2006, Co-permittees will be implementing C.3. requirements for all Group 2 projects.

IMPLEMENTATION OF FY 05-06 C.3. TASKS

During FY 05-06, Program efforts were focused on assistance to Co-permittees with C.3. and HMP implementation, conducting training workshops for municipal staff and the development community, and participation with Water Board staff on the development of the new and redevelopment requirements for the Municipal Regional Permit.

Table 8-1 presents the status of the Program's new and redevelopment (C.3.) tasks scheduled for completion in FY 05-06. The table includes tasks outlined in the *FY 05-06 Work Plan*, including some remaining tasks from the original *C.3. Work Plan Guidance* (the numbered tasks) and some new tasks identified for FY 05-06.

Highlights of accomplishments and evaluation of effectiveness of some of the key tasks are provided below.

---

[2] Letter to Loretta Barsamian, Executive Officer, California Regional Water Quality Control Board, San Francisco Bay Region, from Beau Goldie, Chair, SCVURPPP Management Committee, Re: Revised Request for Regional Board Approval of an Alternative "Group 2 Project" Definition, September 22, 2003.

[3] Letter to Beau Goldie, SCVURPPP Management Committee Chair, from Bruce Wolfe, Executive Officer, California Regional Water Quality Control Board, San Francisco Bay Region, Re: Approval of the Proposed Alternate Group 2 Project Definition, January 29, 2004.

[4] Order No. R2-2005-0035, NPDES Permit No. CAS029718, Amendment Revising Order No. 01-119 (Provision C.3., New and Redevelopment Requirements), July 20, 2005.

Ad Hoc Task Group and Work Group Participation

In FY 01-02, the Program formed the C.3. Provision Oversight Ad Hoc Task Group (C3PO AHTG) to oversee, coordinate, and discuss Program guidance on implementation of C.3. tasks. During FY 05-06, the C3PO AHTG continued to meet approximately bimonthly and received updates on C.3. and HMP issues and projects; reviewed fact sheets and updates to C.3. Handbook; helped plan the annual workshop; and shared information on implementation of C.3. The C3PO AHTG provided valuable assistance to Program staff in development of the C.3. implementation tools and continues to be a useful forum for discussion of experience with implementing the C.3. requirements.

A number of work groups were formed to work on specific issues under C.3. The list of AHTG and work group members, and the missions of each group, is provided in Section 2, Table 2-2. During FY 05-06, two work groups were active: the HMP Implementation Phase Work Group and the BMP O&M Verification Work Group.

C.3. Implementation Products

After revisions to Provision C.3 were adopted in July 2005, Program staff updated Chapters 1 and 2 of the SCVURPPP *C.3. Stormwater Handbook* to reflect changes related to Group 2 requirements and the adoption of the HMP. The updated pages are available as inserts to the Handbook on the Program website www.scvurppp.org. The updates include changes to the "Summary of Major Changes to the Development Review Process" table, the development review process flow charts and the C.3.Provisions Fact Sheet, as well as the development of a new HMP Fact Sheet. Copies of the fact sheets are provided within Attachment G-1. Program staff also drafted a Chapter 5 for the Handbook containing a summary of HMP requirements. This chapter is currently being reviewed by the HMP Implementation Work Group. Program staff also updated the Planning Procedures Performance Standard (PPPS) to include the Group 2 and HMP requirements.

In 2004, the Program completed a document entitled *Developments Protecting Water Quality: A Guidebook of Site Design Examples* (Guidebook) that provides information on local projects or areas where innovative design measures which protect water quality have been applied (available at www.scvurppp.org). In FY 05-06, Program staff collected information on approximately ten additional projects installed after the completion of the original Guidebook and are in the process of updating the Guidebook to include these examples.

In 2006, the Program sponsored an awards program for exemplary site designs to protect water quality. This awards program will recognize Santa Clara Valley's public agency and private development community leaders who are solving site design challenges, reducing stormwater pollution and runoff quantity, and meeting the requirements of the NPDES permit. Applications for the awards program will also help provide information on additional site design examples for updating the Guidebook. Awards will be given to one residential, one commercial and one public project including site design measures that reduce the volume and velocity of stormwater runoff, provide stormwater treatment, serve as a visual amenity and can be easily maintained. An Awards Committee will meet in August 2006 to review the submittals. The award winners will be announced by August 31, 2006.

C.3. Workshops

During FY 05-06, the Program conducted one workshop to assist Co-permittees with implementation of Provision C.3. The workshop, entitled *Constructing, Maintaining and Inspecting Stormwater Treatment BMPs*, was held on June 6, 2006 and attracted 117 participants. The workshop was designed to address topics of interest to two audiences: 1) municipal and private planning/engineering staffs and 2) municipal inspectors. The morning sessions presented case studies of design and construction of BMPs at Stanford University and at residential and institutional projects in the City of San Jose, as well as information on design of biofiltration treatment controls. The afternoon sessions focused on how to conduct BMP operation and maintenance inspections and provided information on how to identify vector problems. It also included a case study of lessons learned during inspection of a commercial facility in Sunnyvale. The workshop also featured exhibits for five stormwater control measure vendors. The agenda and evaluation summary for the workshop are presented within Appendix A-7.

Guidance for Treatment BMP Operation and Maintenance Verification Programs

Provision C.3.e of the Program's NPDES permit requires each Co-permittee to implement a stormwater treatment BMP Operation and Maintenance (O&M) Verification Program. To address Provision C.3.e, the BMP O & M Verification Work Group was formed (by the C3PO AHTG) to develop guidance for implementing an O&M verification program. The Work Group consists of Program staff and representatives from the following jurisdictions: Cupertino, Los Gatos, Mountain View, Milpitas, Palo Alto, San Jose, West Valley Communities, Santa Clara Valley Water District, Sunnyvale, Stanford University, and the Santa Clara County Vector Control District.

In FY 02-03 and FY 03-04, Program staff developed (and the Work Group reviewed) a total of eight guidance documents to assist Co-permittees in implementing a BMP O&M Verification Program. Information from these documents was included in Chapter VI of the *C.3. Stormwater Handbook* (May 2004). The memoranda and the Handbook are available at www.scvurppp.org. In FY 04-05, the Program provided assistance to Co-permittees that were setting up verification programs, conducted a training workshop on O& M verification; and continued work on defining database and reporting requirements. Program staff and the BMP O&M Verification Work Group developed an approach to use standardized data fields to track treatment BMPs and relevant inspection results, ensured consistent data collection among Co-permittees, and began developing a data collection form which includes the standardized fields.

During FY 05-06, Program staff and the Work Group completed the "Standard Stormwater Treatment BMP Inspection Data Collection Form" (Attachment G-2) and guidance on what inspection data should be included in future Annual Reports. Co-permittees are expected to use the form or a form with similar standardized fields while conducting BMP O&M verification inspections. The June 2006 C.3. Workshop featured a session for inspectors on how to use the standardized form.

The BMP O&M Verification Work Group continued to coordinate efforts and share information with the Santa Clara County Vector Control District. District staff regularly attends Work Group and C3PO AHTG meetings. The Program provides the Vector Control District a copy of the Annual Report tables that list the locations of BMPs. In addition, Co-permittee inspection staff is instructed to refer problem BMP sites (e.g., those with standing water) to the Vector Control District. The Standard Stormwater Treatment BMP Inspection Data Collection Form includes

fields to indicate when the BMP being inspected appears to provide potential mosquito breeding habitat.

Hydromodification Management Plan

Background

Provision C.3.f. requires the Co-permittees to manage increases in runoff peak flows and volumes from Group 1 development projects through the implementation of a Hydromodification Management Plan (HMP). The following provides a history of the Program's HMP development. All products are available on the Program's website (www.scvurppp.org)

FY 01-02: The HMP Draft Work Plan was developed by the Program's consultant, Geosyntec, in consultation with Program staff and the Santa Clara Valley Water District (SCVWD), and submitted to the Water Board on March 1, 2002. A response to Water Board staff comments received May 14, 2002 and a revised HMP Work Plan was submitted to the Water Board on September 13, 2002.

FY 02-03: The GeoSyntec consultant team was expanded to include Philip Williams & Associates and Balance Hydrologics, Inc. to provide expanded expertise in geomorphology, stream function and hydrologic/hydraulic modeling. The consultant team also recruited a panel of experts to provide outside technical review of HMP Work Plan products[5]. The Program formed an HMP Work Group to start reviewing products developed as part of the Plan. The consultant team developed a watershed assessment methodology and applied it to the first test subwatershed, Lower Silver-Thompson Creek (part of Coyote Creek watershed). The assessment methodology consists of four elements: 1) problem area and reach characterization, 2) geomorphic assessment, 3) hydrologic modeling, and 4) stability assessment.

FY 03-04: The consultant team completed the assessment of two additional watersheds, the Ross Creek Subwatershed (representing the Guadalupe River watershed) and the San Tomas Aquino Creek Subwatershed (representing the characteristics of the western watersheds). The results of these assessments indicated that the methodology works in watersheds with different characteristics and that the watersheds studied are not significantly different to warrant separate hydromodification standards, criteria, and thresholds. Differences between watersheds are accounted for in the assessment methodology.

The Program and the consultant team also completed six technical memoranda describing the technical analyses performed to address key issues for the HMP. These included the range of storm events to be considered for HMP criteria; effectiveness of volume control, discrete storm hydrograph matching, and flow duration control techniques for mitigating hydromodification techniques; and examples of flow duration basin sizing for local projects. The list of technical memoranda completed includes[6]:

- TM #1 — HMP Assessment Methodology (completed in October 2002)
- TM #2 — Exempt Areas (draft incorporated into Chapter 4 of HMP Report)

[5] The expert panel included Brian Bledsoe of Colorado State University, Thomas Dunne of University of California at Santa Barbara and Matt Kondolf of University of California at Berkeley.

[6] Copies of the technical memoranda are available within Appendix C of the HMP Report provided on the Program's website (www.scvurppp.org).

- TM #3 — HMP Standards and Criteria (draft incorporated into Chapter 4 of HMP Report)
- TM #4 — Evaluation of the Range of Storms for HMP Performance Criteria
- TM #5 — Evaluation of Volume Control Effectiveness
- TM #6 — Volume Control Sizing Example and Cost Analysis
- TM #7 — Flow Duration Control Example
- TM #8 — Sizing Flow-Duration Controls for a Small Development Project in San Jose

During FY 03-04, the Program also completed four HMP interim and draft reports, including the *HMP Draft Interim Report, Assessment of the Lower Silver-Thompson Creek Subwatershed (*July 30, 2003), and the *Hydromodification Management Plan, Public Review Draft (*July 9, 2004).

FY 04-05: After the release of the *Hydromodification Management Plan* (*Public Review Draft)*, the Program conducted a series of public meetings (during July and August 2004) to get input from the development community (developers and engineering consulting firms) and other interested parties on the *Public Review Draft*. These meetings also served to update and get input from the Bay Area Stormwater Management Agencies Association (BASMAA) and Santa Clara Basin Watershed Management Initiative (SCBWMI) members on the HMP. Comments received were incorporated into a *Hydromodification Management Plan Report (Revised Public Review Draft)* released on November 4, 2004. After the release of the *Hydromodification Management Plan Report (Revised Public Review Draft)*, one additional public meeting was held.

The Final *Hydromodification Management Plan Report* was completed in March 2005 and approved by the Management Committee for submittal to the Water Board on April 21, 2005.

FY 05-06 Accomplishments

Following submittal of the Final *Hydromodification Management Plan Report*, Water Board staff issued a Tentative Order that adopted the key provisions of the Report. The Tentative Order was approved by the Water Board on July 20, 2005. The Order requires Co-permittees to implement the HMP provisions within three months of adoption (by October 20, 2005).

Implementation of the HMP: To assist Co-permittees with implementation of the approved HMP, the Program formed a HMP Implementation Phase (HIP) Work Group that met several times during FY 05-06. With direction and assistance from the HIP Work Group, Program staff developed the following products during FY 05-06: 1) an HMP fact sheet; 2) a draft update to Chapter V of the *C.3. Stormwater Handbook* that includes the key provisions of the HMP and implementation guidance; 3) and a Request for Qualifications (RFQ) for consulting firms that can design stormwater flow and treatment controls, in order to develop a list of qualified firms for use by Co-permittees and developers. The RFQ was mailed in June 2006. A total of nine firms submitted Statements of Qualifications, and the list was finalized in August 2006. The HIP Work Group also discussed the HMP requirements for several San Jose projects. In addition, Program staff conducted a "HMP 101" workshop for Co-permittee staff that covered the basic principles of hydromodification management. The workshop was conducted for West Valley Communities in Monte Sereno on January 26, 2006 and for other Co-permittees in San Jose on March 27, 2006.

During FY 05-06, the City of San Jose approved one project subject to HMP measures in conformance with City Policy 8-14, and had several Group 1 projects in the conceptual design stage for which HMP requirements will apply. Program staff has helped with the review of flow

control facility designs, and have observed that developers' engineers are following the design guidance provided in the HMP.

The City of San Jose has been implementing the HMP as part of the Smart Growth Strategy in the Evergreen area (eastern edge of San Jose), which addresses the future development of several non-contiguous properties. The City of San Jose, Water District and Program staff have met with the team of consultants representing the property owners and assisted them in evaluating how to meet the HMP requirements for the proposed developments. San Jose staff has also been addressing stormwater and HMP issues in the development of the Coyote Valley Specific Plan. The Land Use Plan Concept for Coyote Valley presented to City Council in January 2005 includes a lake that will be used for flood control and flow control purposes and other site design measures that will help to reduce increases in flow from the development.

Other Co-permittees have had very few Group 1 projects. None were subject to HMP requirements in FY 05-06. However, all Co-permittees have policies and/or ordinances in place requiring the implementation of the HMP, if applicable.

Bay Area Hydrology Model (BAHM): The Program, along with the San Mateo and Alameda County stormwater programs, is jointly funding the development of a tool for simulating pre- and post-project hydrology and automatically sizing flow control facilities to meet HMP requirements. Clear Creek Solutions (CCS), the consulting firm who developed the Western Washington Hydrology Model, has been contracted to develop a Bay Area version, based on the HSPF watershed hydrology model. The regional component of the BAHM is near completion and has been calibrated for Alameda County watersheds. A joint stormwater program demonstration of the Alameda version of the BAHM was conducted on May 19, 2006.

The Program contracted separately with CCS to perform local calibration of the model to two watersheds in Santa Clara Valley. Local calibration is anticipated to be completed by early September 2006, and training workshops on the BAHM will be conducted in fall 2006. The BAHM will include the ability to model common site design and treatment control measures and quantify the reduction in flow duration due to these measures.

The Program recently contracted with GeoSyntec Consultants to conduct studies comparing flow basin sizing using the HEC-HMS (the hydrology model used to develop the SCVURPPP HMP) and HSPF models, in order to provide guidance on model use and sizing procedures and to assist development of the BAHM.

Next Steps

The HMP Report will continue to be improved through lessons learned from implementation experiences and review of approaches proposed by other Bay Area stormwater programs. Chapter 7 of the Final HMP Report, HMP Implementation Guidance, describes the anticipated next steps towards addressing remaining implementation issues, refining the guidance and coordinating with other Bay Area programs and Water Board staff in development of a consistent, regional approach. A list and schedule of next steps is provided in Table 8-2.

Other Tasks

Other tasks that Program staff accomplished during FY 05-06 include the following:

- Program staff participated in the Water Board's New Development Work Group for development of the Bay Area Municipal Regional Permit, the Water Board's Stormwater Subcommittee Workshop, and several other stakeholder meetings in which new development issues were discussed. Program staff also spent significant effort preparing and reviewing work products of the MRP New Development Work Group.
- Program staff gave the following presentations on the permit requirements for new and redevelopment projects and other Program elements:
  - "Hydromodification Management Plan for Santa Clara Valley", presented by Jill Bicknell at the Floodplain Managers Association Conference, Sacramento, September 8, 2005.
  - "Development of a Hydromodification Management Plan for Santa Clara Valley – Guidance for Local Implementation", presented by Jill Bicknell at the Hydromodification Workshop, CASQA Conference, Ontario, CA, October 3, 2005.
  - "Development of a Hydromodification Management Plan for Santa Clara Valley – Guidance for Local Implementation: Part 2", presented by Jill Bicknell at the CASQA Conference, Ontario, CA, October 4, 2005.
- Program staff reported on the Program's C.3. implementation progress at BASMAA New Development Committee meetings.
- Program and some Co-permittee staff attended two meetings (February 8 and April 5, 2006) with other Bay Area stormwater program representatives to discuss consistent strategies for implementation of the HMP.
- Program staff chaired the BASMAA BMP Sizing Tools Work Group, a group overseeing a BASMAA Task of Regional Benefit to develop an automated BMP sizing tool. The Program is helping to fund the project and overseeing the consultant contract. In FY 04-05, Phase 1 of the project, which established a set of design parameters for seven BMPs, was completed. During FY 05-06, Program staff worked with the consultant and work group to develop and approve a scope of work for Phase 2 (development of a web-based design tool), and solicited funding. The scope is currently being revised to adjust to the level of funding available from participating programs.

Evaluation of Effectiveness

The process for working with the Co-permittees to implement C.3. has worked well. As mentioned above, the C3PO AHTG and its work groups have provided valuable assistance to Program staff in development of the C.3. implementation tools. In addition, the C3PO AHTG has also been a useful forum for discussion of development review processes used by the various Co-permittees and sharing of ideas and lessons learned about implementing C.3. requirements.

During FY 05-06, a significant amount of Program and Co-permittee staff time was expended working with Water Board staff on the development of the MRP, including participation in the New Development Work Group, in special BASMAA meetings, and in MRP stakeholder meetings. While this work was important and usually productive, this shifting of resources prevented the Program from making more progress on C.3. and HMP implementation tasks.

The evaluation summary from the Program workshop entitled *Constructing, Maintaining and Inspecting Stormwater Treatment BMPs* is provided within Appendix A-7. This workshop was conducted in response to a request from the Management Committee and previous workshop attendees to follow-up the June 2005 workshop with one that was targeted to maintenance staff with more detail on the actual inspection process. As a result, many inspection staff attended the workshop. Based on the evaluations, the workshop was successful overall and the

expectations of most attendees were met. Comments on the evaluation forms will be used in planning subsequent workshops.

Program staff will continue to work with the Co-permittees and Water Board staff to evaluate the C.3. planning and implementation process and products during future C3PO AHTG meetings and C.3. workshops.

Table 8-1
Status of FY 05-06 C.3. Implementation Tasks

Task	Updated Schedule	Status
C.3.c. Requirements for Group 1 and Group 2 Projects		
c.9. Update guidance manual and performance standards for Group 2 projects as needed.	6/06	**Completed** – The *C.3. Stormwater Handbook* and Planning Procedures Performance Standard (PPPS) were updated to include the most recent Group 2 definition per the adopted Tentative Order (Order R2-2005-0035). *Guidance on Group 2 implementation will assist Co-permittee compliance with regulatory requirements in C.3.c. and C.3.d.*
Other Tasks: Develop model standards and specifications for preferred BMPs.	6/07	**To Be Done –** This task was deferred until FY 06-07 due to staff time needed to participate in work groups for the Municipal Regional Permit (MRP).
Conduct workshop on implementation and design of BMPs, (e.g., bioretention, planter boxes, green roofs, etc.).	6/06	**Completed –** The Program's annual C.3. workshop, held on June 6, 2006 featured presentations covering the design and maintenance of various treatment BMPs, including bioretention, vegetated swales, etc.
Supervise BASMAA project for developing automated BMP sizing/design tool.	6/06; ongoing	**Completed/Ongoing** – During FY 05-06, Program staff chaired a BASMAA work group that selected a consultant to develop the sizing tool, worked with the consultant and work group to develop and approve a scope of work, and solicited funding. The scope is currently being revised to adjust to the level of funding available from participating programs.
Promote/facilitate regional roundtable meetings with SCVURPPP agency staff and other stormwater programs to share information about implementation strategies and experience.	6/06; ongoing	**Completed/Ongoing** – Co-permittees shared information on the implementation of C.3. specific projects at internal meetings of the C.3. Provision Oversight (C3PO) Ad Hoc Task Group (AHTG) and the HMP Implementation Phase (HIP) Work Group. In addition, Program and some Co-permittee staff attended two meetings (February 8 and April 5, 2006) with other Bay Area stormwater program representatives to discuss strategies for implementation of the HMP. Staff also attended a joint stormwater program demonstration of the Bay Area Hydrology Model (May 19, 2006).

Table 8-1, continued
Status of FY 05-06 C.3. Implementation Tasks

Task	Updated Schedule	Status
C.3.e. Operation and Maintenance of Treatment BMPs		
e.6. Report on the Co-permittee's treatment BMPs O&M verification program in each annual report, including organizational structure, evaluation of effectiveness, and planned improvement to the program. Include a list or summary of treatment BMPs inspected during the year, inspection results, and any required follow-up and correction.	Annually	**Completed/Ongoing** – Co-permittees began reporting on their progress with this task in the *FY 03-04 Annual Report*. Since the C.3. implementation start date was October 15, 2003, Co-permittees have few, if any, BMP verification inspections to report because Group 1 projects proposed in FY 03-04 are either not yet constructed or only recently constructed. Program staff helped develop an inspection data collection form (see Appendix G-2), a model database format, and guidance for compilation of data, and will continue to assist Co-permittees with this task. *Guidance on O&M annual reporting assisted Co-permittee compliance with regulatory requirements in C.3.e. and C.3.n.*
Other Tasks: Continue to provide assistance with Co-permittee implementation of BMP O&M verification programs (provide follow-up guidance to Spring 2005 workshop).	6/06	**Completed/Ongoing** – On June 6, 2006, the Program conducted a workshop on the design and maintenance of treatment BMPs and inspection of BMPs to verify maintenance. The afternoon of the workshop was geared toward inspectors and provided information on BMP maintenance needs, what to look for during inspections, and how to use the data collection form. See Section 2 and Appendix A-7 for additional workshop details.

Table 8-1, continued
Status of FY 05-06 C.3. Implementation Tasks

Task	Updated Schedule	Status
C.3.f. Hydromodification Management Plan		
f.2. Develop guidance to the Co-permittees on implementation of the HMP as part of requirements for Group 1 projects that may cause increased erosion or other related impacts: - Fact sheets - *C.3. Stormwater Handbook* update - Workshops	Report completed 4/05; additional guidance 6/06	**Completed/Ongoing** – Guidance on HMP implementation is provided within Chapter 7 of the HMP Report. Additional guidance developed during FY 05-06 includes: 1) C.3. and HMP fact sheets for training Co-permittee staff and outreach to the development community (Appendix G-1); 2) a draft update to Chapter V of the *C.3. Stormwater Handbook* that includes the key provisions of the HMP and implementation guidance; 3) and a "HMP 101" workshop for Co-permittee staff that covered the basic principles of hydromodification management, conducted for West Valley Communities in Monte Sereno on January 26, 2006 and for other Co-permittees in San Jose on March 27, 2006. *Guidance on HMP implementation will assist Co-permittee compliance with regulatory requirements in C.3.f.*
Other Tasks: Continue development of the Bay Area Hydrology Model (BAHM), both regional and local aspects. Continue to develop the approach for quantifying flow control benefits of site design and treatment control measures.	12/06	**In Progress** – The Program participated in the development of the regional component of the BAHM by Clear Creek Solutions (CCS), which is near completion. The Program also contracted with CCS to perform local calibration of the model to two watersheds. Local calibration is anticipated to be completed by early September 2006, and training workshops on the BAHM will be conducted in Fall 2006. The BAHM will include the ability to model common site design and treatment control measures and quantify the reduction in flow duration due to these measures.

Table 8-1, continued
Status of FY 05-06 C.3. Implementation Tasks

Task	Updated Schedule	Status
Conduct additional implementation studies for example sites in Santa Clara Valley.	9/06; ongoing	**In Progress** – The Program recently contracted with GeoSyntec Consultants to conduct studies comparing flow basin sizing using the HEC-HMS and HSPF models, in order to provide guidance on model use and sizing procedures and to assist development of the BAHM.
Continue to coordinate with other Bay Area stormwater programs to work toward a consistent HMP approach for the Bay Area.	Ongoing	**In Progress** -- Program and San Jose staff attended one meeting (February 8, 2006) with other Bay Area stormwater program representatives and one meeting (April 5, 2006) with Water Board and Contra Costa Program staff to discuss strategies for implementation of the HMP and differences between program approaches. Program staff also served on the MRP New Development Work Group and discussed the need for a consistent approach in the MRP. On July 12, 2006, the Contra Costa HMP was adopted by the Water Board, and that HMP contains different provisions than the SCVURPPP HMP. Program staff will continue to work with other Bay Area programs and Water Board staff during FY 06-07 to resolve these differences.

Table 8-1, continued
Status of FY 05-06 C.3. Implementation Tasks

Task	Updated Schedule	Status
f.3. Upon adoption by the Water Board, begin implementation of HMP requirements for Group 1 projects that may cause increased erosion or other related impacts.	10/05	**In Progress** – On July 20, 2005, the Water Board adopted a Tentative Order approving key provisions of the HMP Report (Order R2-2005-0035). The Order requires implementation of HMP requirements by October 20, 2005. In order to implement the HMP, Co-permittees amended their ordinances and policies as needed. San Jose has begun implementation by requiring flow controls in the conceptual planning phases of large development projects. (Other Co-permittees have not had any projects for which the HMP was applicable.) Program staff have assisted with guidance on implementation (see Task f.2.); reviewed several conceptual design submittals to meet HMP requirements for projects in San Jose; and developed a Request for Qualifications for consulting firms that can design stormwater flow and treatment controls, in order to develop a list of qualified firms for use by Co-permittees and developers.
f.4. Provide assistance and input as needed to District study to evaluate potential regional treatment and/or flow control projects.	As needed	**Completed/Ongoing –** Program staff are continuing to review District products and participate in discussions with District and San Jose staffs and developers regarding requirements for the Evergreen Specific Plan Area, Coyote Valley Specific Plan and other major development projects. Program staff has also been participating with District and San Jose staff on an HMP In-Stream Projects Work Group, exploring technical feasibility and financing of in-stream projects to help meet HMP requirements.

Table 8-1, continued
Status of FY 05-06 C.3. Implementation Tasks

Task	Updated Schedule	Status
C.3.g. Waiver and Compensatory Mitigation Program		
g.3 Assist Co-permittees to track and report information on waivers granted, including project name, location, type, percent impervious surface, reasons for and terms of waiver, and the alternative benefit project and completion date.	Each Annual Report	**Completed/Ongoing** – Program staff developed a reporting form for projects granted a waiver and alternative compliance, which is included in Attachment 6 to the Planning Procedures Performance Standards and Attachment VII-3, Part 3 of the *C.3. Stormwater Handbook*. *Guidance on waiver reporting assisted Co-permittee compliance with regulatory requirements in C.3.g.*
C.3.n. Reporting Requirements		
n.1. Provide information described in Table 1 of Provision C.3. in annual reports (Program to provide guidance for each annual report).	Annually	**Completed/Ongoing** – Each June, Co-permittees are provides guidance (within the Program's Annual Report preparation guidance memorandum) on C.3. reporting. Reporting requirements are cross-referenced with Table 1 of Provision C.3. and any comments/direction provided by Water Board staff. Data are reported using Group 1 and 2 reporting forms in the PPPS and Attachment VII-3 of the *C.3. Stormwater Handbook*. *Guidance on annual reporting assisted Co-permittee compliance with regulatory requirements in C.3.n.*
n.2. Assist Co-permittees to collect information and summarize types of pesticide reduction measures required for development projects, and the percentage of projects for which pesticide reduction measures were required.	Annually	**Completed/Ongoing** – Program staff provided guidance for reporting within the memorandum entitled *FY 03-04 Annual Report Preparation Guidance* -dated June 11, 2004. (See Task n.1). This is reinforced in subsequent annual report guidance memoranda provided each June. Data can be recorded on C.3. Summary Data Forms and reported using Group 1 and 2 reporting forms (PPPS and Attachment VII-3 of *C.3. Stormwater Handbook*.) *Guidance assisted Co-permittee compliance with regulatory requirements in C.3.n. and C.9.d.ii.*

Table 8-2

SCVURPPP HMP - Summary of Next Steps

Task[1]	Anticipated Completion Date[2]	Status
1. Develop the following: a. a funding mechanism[3] such that projects can utilize in-stream control options b. a methodology for determining developer contributions based on the stream changes expected to result from changes in project runoff conditions.	6/07 6/07	**In Progress** - District, San Jose, and Program staff have formed a HMP Instream Projects Work Group, and the group has met several times to review funding mechanisms and approaches for identifying and funding instream projects.
2. Work with City/County planning and public works departments and the Water District to determine the timing and method of notifying District staff during the development review process about HMP projects that may need in-stream controls, in a manner that does not unreasonably prolong the review process. Further, look at ways to improve method to provide early communication on Group 1 project reporting.	12/06	**In Progress** – Some Co-permittees already have a process for involving District staff in development project review. SCVURPPP staff will document current practices and develop guidance for other Co-permittees, in consultation with District staff.
3. Facilitate review of District's MDL analysis, both by the Co-permittees and the Expert Panel, and work with the Management Committee to determine the need to integrate some or all of the MDL analyses into implementation of the HMP.	12/06	**In Progress** – The MC authorized budget for review by a member of the Expert Panel and arrangements for the review are being made.
4. Conduct additional studies of implementation of site design, integrated management practices, and/or basins at example development sites in Santa Clara Valley.	6/07	**In Progress** – The Program recently contracted with GeoSyntec Consultants to conduct studies comparing flow basin sizing using the HEC-HMS and HSPF models, in order to provide guidance on model use and sizing procedures and to assist development of the BAHM. This work will be completed in September 2006. Additional studies will be conducted in FY 06-07.
Bay Area Hydrology Model (BAHM) Development Project – Regional Model, Local Calibration, Training	9/06 Fall 2006	**In Progress** – The Program participated in the development of the regional component of the BAHM

[1] Tasks are from Chapter 7 of April 2005 HMP Report. *Tasks in italics have been added.*
[2] All dates depend on availability of resources and cooperation/collaboration of numerous staff from different agencies and may change because of circumstances beyond the control of the Program. The Program periodically updates the Management Committee regarding schedule changes and will transmit updates schedules to Water Board staff.
[3] The intent is to describe a mechanism agreeable to Co-permittees and next steps for implementation.

Table 8-2
SCVURPPP HMP - Summary of Next Steps (continued)

Task[1]	Anticipated Completion Date[2]	Status
		by Clear Creek Solutions (CCS), which is near completion. The Program also contracted with CCS to perform local calibration of the model to two watersheds. Local calibration is anticipated to be completed by early September 2006, and training workshops on the BAHM will be conducted in Fall 2006. The BAHM will include the ability to model common site design and treatment control measures and quantify the reduction in flow duration due to these measures.
5. During implementation of the HMP, obtain feedback/suggestions for further refinement and implementation guidance	As needed/ Ongoing	**In Progress** – The HMP Implementation Work Group has been meeting on a regular basis, and has been an effective forum to share experience with HMP implementation and obtain suggestions for additional HMP guidance. Members of the development community have also attended these meetings. Program staff have had the opportunity to review several conceptual design submittals to meet HMP requirements for projects in San Jose and discussed these with the work group.
6. Coordinate with other Bay Area stormwater programs to work toward a consistent approach for the Bay Area (via participation in development of the Municipal Regional Permit (MRP).	Ongoing until completion of MRP	**In Progress** – Program and San Jose staff attended one meeting (February 8, 2006) with other Bay Area stormwater program representatives and one meeting (April 5, 2006) with Water Board and Contra Costa Program staff to discuss strategies for implementation of the HMP and differences between program approaches. Program staff also served on the MRP New Development Work Group and discussed the need for a consistent approach in the MRP. Since that time, the Contra Costa HMP was adopted by the Water Board on July 12, 2006, and that HMP contains different provisions than the SCVURPPP HMP. Program staff will continue to work with other Bay Area programs and Water Board staff during FY 06-07 to resolve these differences.

Table 8-2
SCVURPPP HMP - Summary of Next Steps (continued)

Task[1]	Anticipated Completion Date[2]	Status
7. Coordinate additional Co-permittee, Bay Area stormwater program, and Water Board staff review process and progress meetings, including: a. The development of a schedule for Bay Area-wide HMP implementation in the upcoming Municipal Regional Permit. *b. Public outreach – HMP updates, workshop* *c. HMP Work Group Meetings*	6/07 Ongoing Ongoing	**In Progress** – See Task 7. HMPs are being adopted individually. Schedule for MRP is unclear. **Completed/Ongoing** – In FY 05-06, the Program completed: a HMP fact sheet for training Co-permittee staff and outreach to the development community; 2) a draft update to Chapter V of the *C.3. Stormwater Handbook* that includes the key provisions of the HMP and implementation guidance; 3) and a "HMP 101" workshop for Co-permittee staff that covered the basic principles of hydromodification management, conducted for West Valley Communities in Monte Sereno on January 26, 2006 and for other Co-permittees in San Jose on March 27, 2006. There have been four meetings of the HMP Implementation Phase Work Group
8. Collect data on the implementation of the HMP at small sites for a period of two years after the start of implementation, and plan to re-evaluate the small site size threshold and approach at that time. *Conduct and document reevaluation.*	9/08 (FY 07-08 AR)	FY 06-07: Define and start data collection process FY 07-08: Continue data collection
9. Make additional refinements per: 1) lessons learned from implementation efforts based on the draft HMP; 2) the need for consistency with HMPs being developed by other Bay Area stormwater programs; and 3) development community, Co-permittee, and Water Board feedback.	Report in ARs beginning with FY 05-06 AR	**In Progress** – See Task 5. Additional refinements will be made pending completion of the BAHM, adoption of the MRP, and continuing input from Co-permittee staff and developers.

SECTION 9

CO-PERMITTEE IND AND IC/ID SUMMARY TABLES

9. CO-PERMITTEE IND AND IC/ID SUMMARY TABLES

INTRODUCTION

On September 7, 2001, the Industrial Inspection Ad Hoc Task Group (Industrial Inspection AHTG) recommended the adoption of Program-wide categories and enforcement actions developed by the Industrial Inspection AHTG. These categories and procedures are described in the *Continuous Improvement of Industrial Reporting Technical Memorandum* and *Continuous Improvement of Illicit Connection/Illegal Dumping Reporting Technical Memorandum.* The Management Committee approved both memoranda as the Program's strategy to implement IND and IC/ID reporting requirements (as required in Permit Provisions C.6.a.i. and ii). The memoranda were included as attachments within the Program's *FY 00-01 Annual Report* and submitted to the Water Board on September 17, 2001. Each Co-permittee began implementing these procedures immediately thereafter. Implementation of the enhanced reporting requirements by the Co-permittees has been very successful as shown in the past four Program annual reports.

In accordance with the Program's *FY 04-05 Work Plan* submitted to the Water Board on March 1, 2004, the Program committed to updating the Industrial/Commercial Discharger Control Program and Illicit Connection/Illegal Dumping Elimination Activities performance standards during FY 04-05. The updates were essentially administrative (e.g., incorporating enhanced reporting requirements and results of Co-permittee evaluations) and were directed at modifying the Program's model performance standards to reflect Management Committee direction and actual Co-permittee implementation. These administrative updates were provided to the Industrial Inspection AHTG for review during January 2005. The Management Committee approved final updated performance standards on February 17, 2005. Final updates were provided within Attachments 2-1 and 2-2 of the Program's *FY 05-06 Work Plan* (dated March 1, 2005) and hereby incorporated into the URMP.

IND and IC/ID summary tables, provided within Appendix H-1, were constructed by Program staff using data submitted from individual Co-permittees. The categories presented within the summary tables are consistent with the strategy provided in both performance dated February 17, 2005. In addition, summary tables represent incidents and/or inspections that occurred between July 1, 2005 and June 30, 2006. Pie charts and a bar graph showing pertinent information found within the IND and IC/ID summary tables are also included within this section. During FY 05-06, the Co-permittees conducted and/or responded to 7651 IND inspections and IC/ID incidents. A summary of IND inspections and IC/ID incidents reported for individual Co-permittees is provided as Appendix H-2. The vast majority (94 percent) of IND inspections conducted during FY 05-06 resulted in no action or level 1 enforcement (verbal or written warnings). Appendix H-1 provides detailed inspection data relating to facility categories and enforcement actions. In addition, the two most common IC/ID incidents during FY 05-06 were miscellaneous incidents and vehicle & equipment leaking. Approximately 52 percent of the IC/ID incidents received verbal or written warnings. Other relevant IC/ID information relating to incident type, incident report source, incident source and enforcement action is also provided within Appendix H-1.

In accordance with the Water Board's letter, *Review of Program's Draft FY 2003-04 Work Plan* dated June 24, 2003, the Program informed the Co-permittees (see FY 02-03 Annual Report Preparation Guidance dated June 18, 2003) that each Co-permitee should independently

evaluate their individual IND and IC/ID inspection data and utilize the results of the analysis to set inspection priorities and gauge program effectiveness. Within the FY 02-03 Annual Report, Co-permittees provided an effectiveness evaluation or analysis of their IND and ICID programs and/or data. This step was performed to address the Water Board's concerns regarding IND reporting procedures.

Mr. Bruce Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: West Valley Community Specific Urban Runoff Management Program
FY 2005-2006 Annual Report

Dear Mr. Wolfe:

This report is submitted by the West Valley Cities of Campbell, Monte Sereno, Saratoga, and the Town of Los Gatos, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2005-2006 in accordance with the West Valley Communities' Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 2004 and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 05-06 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

I. Contents of report;
II. Program highlights and accomplishments;
III. Summary of continuous improvement activities;
IV. Attachments:
    1. Table of Contents
    2. Certification Statement
    3. Acronyms

V. Program Elements:

1. IC/ID Elimination Activities
2. Industrial / Commercial Discharger Control Program
3. Public Agency Activities
    - Storm Drain O & M
    - Street Sweeping
    - Corporation Yard
    - Rural Public Works
4. New Development: Planning Procedures
5. Construction Inspection
6. Public Information & Participation
7. Pesticide Management Activities
8. Mercury Pollution Prevention Activities
9. Copper Action Plan / Nickel Action Plan
10. Trash Inventory and Management
11. Water Quality Monitoring and Watershed Management
12. Training Summaries are provided at the end of each element

Responses to Regional Board staff's comments on the FY 04-05 Annual Report (July 26, 2006 letter) are provided at the beginning of the New Development: Planning Procedures section of each West Valley FY05-06 Annual Report.

Program Highlights and Accomplishments

During FY05-06, the West Valley Communities of Campbell, Los Gatos, Monte Sereno, and Saratoga continued efforts to implement their URMPs to the maximum extent practicable. The activities that were implemented for each element of each Community's URMP are described in Chapter 14 of the Santa Clara Valley Urban Runoff Pollution Prevention Program's URMP. Highlights of the West Valley Communities accomplishments in various program elements are described below.

Industrial/Commercial Discharger Control Program. During FY05-06, the West Valley Communities rewrote their inspection agreement with the Santa Clara County Central Fire District, extending the inspection program for five additional years. This renegotiation allowed the West Valley Communities to update the Fire District's inspection procedures, clarify their reporting requirements for improved follow up and data management, and provide material from the latest Urban Runoff Management Plans (2004) for enhanced inspector training.

Public Information/Participation Program. In FY 05-06, the West Valley Clean Water Program continued to expand its quest for effective public education and outreach. WVCWP pursued media coverage on several topics: safe disposal of E-waste and other mercury-containing products, trash impairment of creeks and the Bay, cleanup and trash assessments by students and parents, and a Saratoga student's Eco-Hero award for his campaign to keep residential pollutants (pesticides and

copper) out of the storm drain. The student's story about his mission and his partnership with WVCWP can be found in the Public Information and Participation section of this report (Attachment 6B).

Nine stories, news briefs, or letters to the editor, were covered by local community newspapers in FY05-06. The most telling article was unsolicited; a Saratoga News cover story appeared about residents deluging City Hall with calls when the funds for household hazardous waste disposal were cut short due to the City's budget shortfall. By March 2006, the City Clerk had received over three hundred calls after funding ended in November and forced a stop to residents' participation in HHW drop-off events. A copy of the article is attached to section 10 – Trash Management & Watershed Management, of Saratoga's Annual Report (Attachment 10G).

The West Valley Clean Water Program strives to maximize student involvement at every opportunity. WVCWP staff developed a fourth-grade presentation script incorporating State standards with messages on pesticides, copper, mercury, household hazardous waste and trash. The new curriculum expands the existing fifth-grade presentation by including both Coastal and Wetlands Enviroscape models. The educational presentation runs for over an hour, and during its debut was extended at the teacher's request, while an entire class of students, teachers and parents at Saratoga Elementary School remained engaged in participation and questions and answers. At least thirty students and parents from the same class spent the following Saturday working with WVCWP staff to tally and categorize trash as they cleaned up the banks of Saratoga Creek.

The WVCWP prioritized education on trash, pesticides, fluorescent bulbs, and E-waste in FY05-06. A Kindergarten script was developed for St. Mary's School in Los Gatos. Two groups of fifteen Kindergartners listened to Clean Water Program messages as they followed the script and "polluted" the water on two Enviroscape models. Immediately following the presentation the teacher and students were motivated to walk the school grounds and collect all the trash they could find for proper disposal.

Illicit Connection and Illegal Dumping Elimination Activities. A primary goal for the West Valley IC/ID Program has been to ensure adequate follow up of all potential urban runoff violations related to restaurants. The West Valley IC/ID Inspector presented a restaurant inspection training session, focused on urban runoff pollution issues, to twenty-two Dept of Environmental Health specialists at the annual (April 18th) meeting coordinated by Cupertino, the County and the WVCWP. This is the second time that the WVCWP Inspector has discussed his restaurant inspection program with DEH specialists in the last three years. Feedback from DEH staff this year was very positive. The presentation was considered to be very helpful and photos from actual inspections especially worthwhile. Training sessions with other agency and municipal staff are effective, evidenced this year when DEH specialists called the West Valley IC/ID Inspector to report IC/ID incidents, outside of, and unrelated to, their regular restaurant inspections. Increased scrutiny by other agency and municipal staff continues to strengthen the program.

Storm Drain Operation and Maintenance. The West Valley Sanitation District (WVSD) completed a major task which will make storm drain cleaning procedures more efficient and the annual SD reports more useful to the WV cities. FY05-06 was the first year that the enhanced storm drain maintenance reports were available to the cities. The reports document the status of each stormdrain and, if applicable, the nature of any problem. The majority of structures were "clean" but a few were noted as having obstructions (e.g. "leaves/paper"). Other descriptors that

are available in the report are: mud/dirt, foreign object, rocks/stone, sand/gravel, etc. All structures, as needed, are cleaned at the time of inspection. The WVSD's report may be used by WV cities to help monitor specific pollutant problems such as trash sites.

C.3 Implementation. In July and August, 2005, an engineering consultant hired by the WVCWP talked with staff in each West Valley city to review any remaining challenges with C.3 implementation. This year the cities made progress in preparing for implementation of BMP O&M verification inspections and HMP requirements. The West Valley Communities were beginning to see the completion of the first Group 1 projects in June 2006. Throughout FY05-06 the cities participated in regular monthly training meetings frequently dominated by discussion of the implementation of C.3. requirements. The BMP O&M Verification Programs were discussed in great detail and minor updates were made in FY05-06 to that section of the West Valley URMPs. The revised standard operating procedures for the BMP O&M Verification Programs were reviewed with the engineering consultant and included as attachments in New Development – Planning Procedures (section 4) of each of the WVC FY05-06 Annual Reports.

To show the spirit of C.3. implementation, two West Valley cities which have not had Group 1 or Group 2 projects to date, have made significant efforts to include swales and runoff control measures on all projects. Saratoga provided copies of drawings to developers to help them visualize the swales with under drains, which the City Engineer recommends. Monte Sereno's City Engineer required drywells, which overflow to vegetated areas, on all residential development projects, except where the ground water level was too high.

Pesticide Activities. By popular demand, the WVCWP held its third West Valley IPM Workshop. This year the WVCWP partnered with the City of San Francisco to hire Frank Rossi, a national expert (from Cornell University) who presented guidelines for managing turf with little or no pesticides. The training included PowerPoint presentations and a field trip to examine Campbell's community athletic field turf. For the past three years the WVCWP IPM workshops have prompted overwhelmingly positive feedback from municipal staff, special district personnel and private golf course superintendents. This year thirty four (34) municipal staff from three West Valley Communities and one Golf Course Superintendent from Los Gatos attended the workshop. Based on the material presented, WVCWP staff wrote a Turf Management Plan, which the four municipalities adopted. The IPM plan is included in the Pesticide Management section of the Annual Report (Attachment 7A).

Mercury Pollution Prevention Activities. In FY05-06, the WVCWP spent significant staff time and resources to offer a way for the public to get involved in reducing the amount of mercury containing waste going to landfill or being disposed of illegally. At the suggestion of the WVCWP, United Datatech recyclers agreed to hold a free TV and computer monitor recycling event in the West Valley. It turned out to be a successful effort to encourage the community to take action and to inform the public of the goals of the West Valley Clean Water Program. The WVCWP hired a PR firm (the one currently being used for the Watershed Watch campaign) to design a newspaper ad and write and submit a press release to local newspapers. As a result at least 6 news briefs, stories, and letters on the topic of hazardous waste and water quality were covered by local newspapers. Over 250 participants enthusiastically dropped off 33,657 lbs. of electronic waste materials in four hours. The event opened up an opportunity to survey the drivers and discuss mercury pollution and proper disposal of fluorescent bulbs and batteries, as people waited in vehicles to go through the line.

Trash Inventory and Management. West Valley volunteers were key partners in trash assessment and management this year. The WVCWP held two annual trash assessment and cleanups at Westmont High near San Tomas Aquino Creek. Campbell and Los Gatos/Monte Sereno each held a successful volunteer event in the Guadalupe Watershed and Saratoga partnered with the WVCWP and a local elementary school to assess and clean up trash along Saratoga Creek in the San Tomas Aquino Watershed. A combined total of over 280 volunteers categorized and picked up 12,078 trash items for a total of 1,532 lbs of trash removed during the four volunteer events where trash tallying was conducted along with cleanup. School presentations helped to promote interest in trash collection and trash management among students, teachers and frequently among parents. The increased participation is testament to the measurable benefits of educational outreach activities.

Continuous Improvement Activities

Illicit Connection and Illegal Dumping Elimination Activities. The IC/ID program continues to work phenomenally well for the West Valley Communities. As a result of having a centralized inspection program and frequent presentations or talks given by the West Valley inspector (at training sessions, workshops or municipal lunch meetings), the overall awareness of the West Valley IC/ID program has increased among other agency staff. Calls from other agencies and municipal staff (inter-departmental) increased from forty-seven (47) reports in FY04-05 to sixty-two (62) reports in FY05-06.

The inspector responded to 98 discharge incidents over the year (see IC/ID section Attachment 1A for the number and types of incidents), and conducted 28 proactive and follow-up inspections. Each of these inspection opportunities adds to the community's knowledge of storm water pollution and prevention issues. As part of the inspection process, the inspector distributes applicable educational materials. The West Valley Clean Water Program Inspector provided 421 brochures and other educational materials to industrial/commercial facilities and residents in FY05-06.

Industrial/Commercial Discharger Control Program. During FY05-06, the three West Valley Communities of Campbell, Los Gatos, and Saratoga continued to implement their Industrial/Commercial Inspection Program. The City of Monte Sereno has no industrial or commercial facilities operating within the City and therefore does not participate in this activity. In Campbell, 296 of 309 facilities were inspected, 109 of 112 facilities were inspected in Los Gatos, and 8 of 8 facilities in Saratoga were inspected. In FY05-06, the West Valley Clean Water Program's Stormwater Inspector continued to conduct proactive investigations targeting vehicle facilities for additional education regarding storm drain issues. In Campbell, Los Gatos, and Saratoga, 16 facilities were visited and notified of urban runoff requirements and the role of the Clean Water Program. All sixteen facilities were found to be in compliance.

Copper and Nickel Outreach Activities. This year the West Valley Clean Water Program's Home page at www.cleancreeks.org was updated to better promote the use of the Car Wash Kit to contain waste water runoff at local fundraisers. The Fire Dept Hazardous Material Specialist, who trains the Industrial/commercial facility inspectors, also requested copies of the Car Wash flyer for distribution to supervisors of local car wash events.

Staff Training. The West Valley Communities place a strong emphasis on training. The Annual Reports reflect this with numerous references to the Staff Training Summaries; these summaries are located at the end of each section in the Annual Reports. In FY 05-06 training was expanded

by use of a video camera to tape various trainings for viewing by additional staff at a later date. The West Valley Clean Water Program will continue to emphasize better communication between WVCWP staff and municipal staff and to host training sessions that are worthy of staff time and convenient to attend.

Thank you in advance for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact me at 408.316.1233.

Very truly yours,

Cheryl C. Donnelly

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2005-2006 ANNUAL REPORT

ILLICIT CONNECTION & ILLEGAL DUMPING ELIMINATION ACTIVITIES

FY 2005-2006 Work Plan Self Evaluation Matrix

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
2004 URMP Perf. Standard	Program	a. ICID Performance Standards Update local URMP to reflect revised Performance Standards. Provide staff training on revisions.	IC/ID Performance Standards were updated as part of the URMP revision in Sept 2004. Standard Operating Procedures (SOPs) were reviewed with Campbell Public Works staff on 9/21/05. No changes to the procedures were deemed necessary in FY05-06.	WVCWP and Sr. Civil Engineer
	URMP	b. Response Program Continue to implement IC/ID Stormwater Discharge Inspector response program and evaluate for continuous improvement.	During FY05-06 the Inspector responded to 32 incident reports, made 5 follow-up inspections, and engaged in 17 proactive inspections targeting restaurants and vehicle shops in the city of Campbell. One IC/ID Inspector conducts a centralized incident response and proactive restaurant and vehicle shop inspection program for four West Valley communities. The Inspector follows up on the reports of all potential violations. This coordinated inspection program works very well and has increased the West Valley Communities' staff awareness of water pollution activities.	WV Inspector
	FY05-06 Work Plan	c. Enhanced Reporting Report on incidents using categories consistent with SCVURPPP Program. Document follow-through to point of resolution or referral for enforcement action (penalty or fine).	The WVCWP Inspector keeps a standardized Access database of all IC/ID response calls and their follow-up through resolution. West Valley's annual data was provided to SCVURPPP for Program-wide analysis.	WV Inspector
	Continuous Improvement Item	d. Restaurant Inspection Program Continue proactive inspection program targeting medium to large-scale restaurants, because of the higher probability that this subset of food handling facilities may contribute to stormwater pollution.	In order to provide standardized data to SCVURPPP seven (7) proactive inspections of medium to large scale restaurants, conducted by the WVCWP IC/ID Inspector, are now reported in the IND section of this report.	WV Inspector

IC/ID Program Evaluation

IC/ID Training

It appears that the Inspector's training meetings and presentations at various West Valley workshops have been effective. Inspectors from Dept of Environmental Health and the Fire Dept have called to report potential urban runoff violations which were observed outside of their scheduled inspections. This is encouraging for West Valley staff who have tried to improve communication and provide relevant training sessions each year.

The West Valley IC/ID Inspector held a Campbell Public Works training meeting on Sept 21, 2005, which focused on encouraging staff to report even minor incidents in order to provide the Inspector with an opportunity to follow up at those sites with the appropriate educational & outreach material. One example of a seemingly innocuous but important incident type is pool water discharges. Campbell Public Works' staff reported at least two (2) pool and spa discharges which is an indication that they are on the lookout for stormdrain issues.

IC/ID Program Background

In March 2001, the four West Valley Communities hired an IC/ID Inspector to improve coordination and tracking of stormwater incidents. In FY01-02, shortly after he was hired, the WVCWP Inspector initiated a pilot to target vehicle shops (and car wash facilities) for additional proactive inspections and education. A total of twenty five facilities in the West Valley communities were initially targeted, with each receiving at least two on site inspections and multiple drive-by inspections. By the end of the year all 25 facilities were found to be in compliance.

In FY02-03, due to its apparent need and success, the vehicle inspection pilot was extended, producing approximately 10 proactive inspections in Campbell during the first full year of implementation. However, all on site inspections were tracked as IC/ID incidents even if the facility was found to be in compliance. At least 16 actual or potential violations were related to vehicle washing or automotive shops that year. Following the vehicle inspection pilot, the West Valley Inspector began a pilot targeting medium to large size restaurants.

The West Valley communities have three primary sources of violations that are being prioritized for inspection and education in order to attain maximum compliance: 1) vehicle/automotive shops, 2) restaurants, 3) and construction sites. Inspection of construction sites is conducted primarily by municipal public works and engineering inspectors. The West Valley Inspector responds to potential construction site violations only when they are observed or reported by citizens, City staff or other agencies.

After FY03-04, during which the West Valley Inspector conducted twenty-one (21) proactive on site vehicle shop visits and forty-four (44) proactive restaurant inspections, SCVURPP requested that West Valley reorganize inspection data to facilitate Program-wide analysis. A separate database was developed by the Program for IND inspections conducted by the West Valley Inspector.

The IND incident data was then reported as part of the IND section of the West Valley annual reports. Therefore accurate trends can only be evaluated for the last two fiscal years, FY04-05 and FY05-06. It is important to note that during the first two or three years of these additional inspections, violations for automotive facilities increased significantly. The West Valley inspector also presented the goals of his Programs to municipal staff at West Valley workshops and to Saratoga City and Los Gatos Town Councils. The relatively high numbers of violations reported was attributed to improved scrutiny and awareness, and more accurate reporting. Restaurant violations saw an increase in reported violations as well. However, now that the two programs have been running for four or five years the numbers of violations have dropped again.

Campbell

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2005-2006 ANNUAL REPORT

Trend Analysis

In FY04-05 eighteen (18) reported incidents were investigated. Two (2) automotive related violations for vehicle and equipment leaking were found. Four (4) accidental spills accounted for the number one IC/ID incident type in Campbell for FY04-05. This was followed by three (3) complaints not found, two (2) non-incidents and one (1) construction site incident.

In FY05-06 the West Valley IC/ID inspector responded to thirty-two (32) reports of potential violations in Campbell. Additionally, he conducted follow up visits to five (5) of these sites to ensure on-going compliance. He continued to conduct proactive vehicle shop and restaurant inspections, particularly to those sites which have had violations in the past. Eight (8) incidents originated from Campbell's primary target, automotive facilities. Four (4) accidental spills were next in frequency. Three (3) of the accidental spills were the result of vehicular accidents. Additionally, one (1) reported incident was caused by a fire and one (1) incident was caused by vandalism. There was one (1) food facility violation caused by a leaking dumpster. There was one (1) construction site violation, which is the typical number for Campbell over the last four years. No noticeable trends were evident other than the need to stay on top of vehicle shops and car washes for continued compliance. (Campbell also seems to have a relatively large number of accidents and accidental spills each year.)

Overall, an improvement in awareness and compliance is evident by the small number of each incident type, and the number of reports that after investigation, turn out not to be violations. The West Valley Inspector will to continue to conduct proactive visits of vehicle shops and restaurants but they will be reported as Industrial Commercial Facility Inspections in the IND section of the annual report.

INDUSTRIAL/COMMERCIAL DISCHARGER CONTROL PROGRAMS

Annual Report FY 2005-2006 Self Evaluation Matrix

Source	Task Source	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
	URMP	a. Joint Inspections of Retail Food Facilities Continue joint inspection program w/ DEH. Approximate number of *food handling* facilities in Campbell is 266. All facilities will be inspected at a minimum once per year. WVCWP IC/ID Inspector will conduct follow-up and distribute BMP materials as needed per DEH referrals. Continue to evaluate data management and reporting for desirable improvements or updates.	In FY05-06, all 266 food-handling facilities in Campbell were inspected; most of them were inspected 2 or 3 times by Santa Clara County Environmental Health Specialists (inspectors). A total of 620 food facility inspections or re-inspections were conducted by DEH in Campbell.	Insp'ns conducted by SCC DEH; Annual Mtg co-ord by WVCWP
	URMP	b. Training & Evaluation Conduct annual joint meeting/train'g w/ Cupertino and SCC DEH to evaluate Inspection Prgm and discuss improvements. Annual meeting per agreement; scheduled for Spring each yr.	On April 18, 2006 the WV Cities, Cupertino and the County conducted an inspector training meeting. The WVCWP Inspector presented a slide show with photos of urban runoff violations that the Clean Water Program encounters. See evaluation below.	WVCWP to co-ord. w/ Cupertino & DEH
	Continuous Improvement Item	d. Restaurant Inspection Program Continue implementation of proactive inspection program targeting medium to large-scale restaurants. First began as a pilot in FY 02-03. *Medium to large-scale* restaurants are defined as, restaurants with 6 or more employees and/or ones that routinely handle large quantities of grease (approx. 57 in Campbell). Restaurants are targeted because of the higher probability that this subset of food handling facilities	Since the West Valley Restaurant Inspection Program's inception in 2002, the WVCWP Inspector has provided at least 235 pro-active inspections for 127 targeted restaurants in the cities of Campbell, Los Gatos and Saratoga. Out of 58 restaurants targeted in Campbell, most have been visited more than one time and almost all are familiar with the West Valley Clean Water Program. In FY 05-06, eight (8) restaurants were inspected pro-actively in Campbell. Two (2) were re-inspections of a restaurant with problems in previous years. All eight inspections revealed clean sites, free of urban runoff violations. Only	WV Inspector

		may contribute to stormwater pollution.	one (1) violation was noted by DEH for a food facility in Campbell and another restaurant was inspected as part of the IC/ID response program for a potential grease interceptor problem, called in by WV Sanitation District staff.	
	URMP	c. Joint Inspections of Ind/Comm Facilities Continue joint inspection program. Approximate number of active facilities in Campbell is 309. The inspection frequency goal for FY05-06 is 100%. The total number of facilities by business category inspected in FY05-06 will be included in the annual report.	In the City of Campbell, 296 commercial / industrial facilities were inspected by the Fire Dept (compared to 285 inspections conducted in FY04-05), meeting 96% of the inspection goal (309). Of the facilities inspected, the Fire Dept found nineteen (19) potential or actual violations and reported eight (8) of those to the WVCWP for follow up. The Fire Dept referred a total of twelve (12) incidents to WVCWP; four were not the result of scheduled inspections but were stormdrain related.	Inspections conducted by SCC Fire
	URMP	d. Training & Evaluation Conduct annual joint meeting/training w/ SCC Fire to evaluate inspection reporting and confirm distribution of materials.	The Fire Dept's annual facility inspection training pertaining to urban runoff requirements was provided to 184 inspectors from May 8th through May 31st 2006. The Inspectors noted that they have plenty of handout materials; West Valley businesses have received all of the educational material during prior inspections. The Fire Dept's Sr Haz Mat Specialist, who provides training to inspectors met with the West Valley Clean Water Prog Mgr and WV Inspector on 3/1/06 to evaluate current procedures and determine revisions for a new Facility Inspection Agreement for FY06-07. A revised inspection form was developed to simplify reporting procedures. Another training meeting between WVCWP Mgr and Fire Dept's Sr. Haz Mat Specialist was held on 5/12/06 to review updated procedures for inclusion in the new Agreement.	Annual Mtg arranged by WVCWP w/ Sr. Haz Mat Specialist

FY 2005-2006 ANNUAL REPORT

Source	Task Source	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
	Continuous Improvement Item	e. Vehicle Shop Inspection Program The West Valley Clean Water Program will continue expansion of vehicle shop inspection program, targeting auto repair facilities in the West Valley area and providing additional education on stormwater, vehicle-washing, issues.	In FY05-06 the West Valley Inspector conducted ten (10) pro-active inspections of vehicle shops in the City of Campbell. He also followed up on automotive shop referrals from the Fire Dept's facility inspections. The follow up inspections reported by the Fire Dept as potential violations have been moved to ICID (section 1) of this report.	WV Inspector
	2001 Annual Review	e. NOI Filers Provide updated list of NOI Filers to SCC Fire.	The list of NOI sites (4 in Campbell) was sent electronically to the Fire Dept on 5-15-2006.	WV Inspector
	URMP	f. Education Distribute BMP materials during routine inspections. Distribute follow up education information for businesses cited for potential stormwater violations.	During FY 05-06, the WVCWP Inspector distributed sixty-two (62) IC/ID and IND brochures and fact sheets in Campbell, as part of his outreach and education program. The Fire Dept also distributes a stormwater compliance packet to new commercial /industrial business owners or management.	SCC Fire; WV Inspector

Industrial/Commercial Program Evaluation

Fire Dept Inspections of Industrial / Commercial Facilities:

Of the 296 facilities inspected by the Fire Dept nineteen (19) potential or actual violations were found and eight (8) of those were reported to the WVCWP for follow up. The list of violations is provided to WVCWP at the end of each fiscal year. The West Valley Inspector will schedule a training meeting with the Fire Dept Haz Mat Specialist in August 2006 to discuss further inspections of sites with reported violations during FY05-06. The sites with previous violations will be prioritized for inspections at the beginning of FY06-07.

After a steady stream of improvements and more communication between Fire Dept and WVCWP staff, the inspection program is prepared for maximum efficiency for the West Valley Cities in FY06-07. When Saratoga was added to the Fire Dept Inspection Agreement for Campbell and Los Gatos (7/1/02) all West Valley facility inspections were coordinated under one umbrella. Monte Sereno does not conduct IND inspections because it has NO industrial or commercial facilities. Since 2001, WVCWP staff has met with Fire Dept staff at least twice a year to discuss standardized reporting, documentation and follow-up.

A new Industrial Commercial Facility Inspection Agreement was signed by the West Valley Cities and the Fire Dept in June 2006.

On March 1, 2006 the WVCWP Manager met with the Santa Clara County Fire Dept, Hazardous Material Specialist, who administers the Agreement for the Fire Dept. The new Agreement was written after reviewing the FY 04-05 Agreement and comparing it to West Valley IC/ID and IND Performance Standards (Revised URMP 2004). The new Agreement, signed in June 2006, covers a five-year period, with annual increases in inspection costs. The Agreement reiterates the importance of referrals to the West Valley Inspector for follow-up. The IND Performance Standard operating procedures are attached to the Agreement as a reference for annual inspector training.

The West Valley Inspector received four referrals from Fire Dept staff in addition to those observed during scheduled inspections. This is good news for the West Valley Inspector who conducts educational follow up on each referral. His pro-active vehicle shop inspection program is designed to supplement Fire Dept facility inspections. Shop owners are made to realize the City's responsibility for making sure that the sites are in compliance with water quality requirements. The Inspector has made a positive impact with his visits and the distribution of educational materials depicting the right way to keep equipment, vehicle parts, and service areas covered, and all vehicle wash water managed properly. In a few cases the Inspector's meetings with vehicle shop owners have led to the facility's purchase of a wastewater capture system (noted in previous annual reports).

Industrial/Commercial Program Evaluation Continued

Annual Food Facility Inspection Training Meeting

On April 18, 2006, twenty-two (22) DEH Consumer Protection Division's Environmental Health Specialists attended a training meeting and slide show presented by the WVCWP Inspector. The evaluation from the Supervising Health Specialist was positive: "Jack's presentation was great, and helpful. I believe that review and reinforcement of what a specialist is to look at during at inspection is always beneficial. Comments from staff were positive, especially regarding the photos." Inspectors were shown photos of typical problems. The importance of reporting all potential West Valley stormwater violations to the West Valley inspector was re-emphasized. Due to increased awareness, DEH inspectors referred at least one potential urban runoff violation, unrelated to food facility inspections, to the WVCWP Inspector this year. Other topics covered at this meeting were:

- Updated contact information;
- How to report urban runoff violations to municipal inspectors to ensure accurate tracking and follow up;
- Feedback on the effectiveness of outreach & educational handouts
- Reminder to distribute pesticide reduction fact sheets called "Don't Set a Table for Pests" to restaurants.

At the beginning of FY 05-06 the West Valley Inspector began a more aggressive effort to alert restaurants to the need for regular grease interceptor maintenance. A strategy meeting between the WVCWP Inspector and the West Valley Sanitation District's Director of Operations resulted in a decision to request a copy of grease interceptor maintenance records. It is not necessary to review the records as long as the facility can produce them. The Sanitation District is notified if the records are not available. At the April 18th training meeting for DEH Inspectors, the West Valley Inspector suggested that Environmental Health Specialists look for grease trap maintenance records during their restaurant inspections.

FY 2005-2006 ANNUAL REPORT

Training Summary: Industrial/Commercial Discharger Control Program

Training Description	Date	Attendees
SCC Fire Dept & WVCWP Training **Topics:** ▪ Evaluate current inspection procedures pertaining to urban runoff requirements ▪ Review NPDES Inspection and data requirements ▪ Develop a revised inspection form to clarify reporting procedures ▪ Determine revisions for a new Facility Inspection Agreement for FY06-07	**March 1, 2006**	**WVCWP (2)** Program Manager Stormwater Discharge Inspector **SCC Fire District (1)** Senior Haz Mat Specialist
SCC Fire Dept & WVCWP Training **Topics:** ▪ Review inspection procedures to include in Facility Inspection Agreement ▪ Determine reporting procedures	**May 12, 2006**	**WVCWP (2)** Program Manager Stormwater Discharge Inspector **SCC Fire District (1)** Senior Haz Mat Specialist
SCC Fire Dept. Training for Inspectors Coordinator: John Justice Multiple Trainings - average of 8 firefighters per Training **Topics**: The Fire Dept's annual staff training was provided to their inspectors through the month of May, 2006. The Inspectors noted that they have plenty of handout materials; most businesses have received all of the educational material during prior inspections. See evaluation below. ▪ Conducting an Industrial Inspection for urban runoff issues ▪ Reporting violations found during Inspections ▪ Filling out Urban Runoff Program inspection forms ▪ Discuss educational materials for distribution during Inspections ▪ Q & A and discussion	**May 8 – 31 2006**	**SCCC Fire District - 184** Senior Deputy Fire Marshall and all field staff Due to staff rotation, any firefighter may be called upon to do inspections; therefore, all firefighters in District received training

Training note:

In FY05-06 Fire Dept Inspector trainings were updated to include material which was covered during SCVURPPP's FY04-05 pre-workshop planning sessions and the end of year Industrial/Commercial and IC/ID Inspection Workshop. Fire Dept staff attended the pre-workshop planning meetings to help determine topics which would be helpful for their in-house inspector training sessions. In June 2005, three (3) SCC Fire District staff and several West Valley municipal staff attended the all day IND & IC/ID Inspection workshop.

PUBLIC AGENCY ACTIVITIES: Operation and Maintenance

FY 2005-2006 Work Plan Self Evaluation Matrix

Source	Task Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Storm Drain Operations and Maintenance				
	2004 URMP	Annual Storm Drain Cleaning Continue contract w/ WVSD. Continue schedule/cycle for inspection and cleaning of storm drain system (two year cycle for residential & one year cycle for commercial/industrial); Public Works staff will clean high leaf drop and other noted areas more frequently and as needed.	West Valley Sanitation District (WVSD) performs systematic storm drain cleaning and inspection annually. Each year half the City's storm drains in residential areas are cleaned and inspected. Arterials and commercial/ industrial areas are done annually. City staff performs additional pro-active cleaning of storm drain inlets and grates before storm season in high leaf drop areas. Engineered treatment BMPs on City parking lots are cleaned at least annually (e.g. oil & debris separator in downtown parking structure on 5/5/06, and filters at Community Center in June 2006).	Sr. Civil Engineer co-ord with WVSD per contract; Pub Works Supt co-ord in-field operations
	2004 URMP	Training - Annual WVSD/ Oper. & Maint. Meeting Annual WVSD / Operations & Maint. Supervisors meeting - evaluate status of annual storm drain cleaning and provide training on maintenance issues.	The annual WV Storm Drain Op & Maint. Supervisor's workshop was held on June 19, 2006. Five (5) Campbell staff attended, including the Public Works Superintendent, and PW Supervisor. Staff from WVSD, WVCWP, and the other WV Communities also participated. Topics included: • Storm Drain Maintenance findings by WVSD • Review of Emergency Response Procedures for SD overflow • Presentation on Street Sweeping for Water Quality • Power Point Presentation on BMPs for Streets, Rural Public Works and Storm Drain Maintenance Round table discussion on all topics	Mtg lead by WVSD and WVCWP; Attended by: PW Supt & PW Spvsr; PW Lead worker and (2) PW Maint workers

	C/I item -Source Control Measure	Storm Drain Stencils or Signage Continue to replace and/or upgrade storm drain stencils or signage on storm drains or catch basins, as needed.	Number of SD inlets is approximately 1,096; most are marked. PW Supt is currently replacing signage in the high-use and downtown areas with thermoplastic stencils. See evaluation below.	Public Works Supt
Street Sweeping/ Pavement Management				
	URMP	a. Street Sweeping Program By contract – residential swept twice monthly; downtown every week; arterials and Commercial/industrial areas once weekly. High leaf drop and other noted areas cleaned more frequently and as needed (i.e., construction zones - swept by responsible party).	The City has two contractors performing sweeping services. The residential and commercial areas are swept with a broom type sweeper and the parking lot and garage areas are swept with vacuum type sweepers. Corp yard is swept on Fridays. Sweeping data includes all types. In heavy leaf drop areas, a front-end loader/dump truck crew removes leaves prior to street sweeping. Residents and businesses are also given large recycling receptacles for yard waste as part of the required solid waste service. Yard waste is not allowed in streets but waste from receptacles is picked up weekly.	Public Works Supt
		b. Street Sweeping Data Collection Collect and review street sweeping data and provide number of curb miles swept and cubic yards of debris quarterly, to SCVURPPP for evaluation of effectiveness.	Street Sweeping data was collected quarterly and provided to the SCVURPPP at the end of the fiscal year. During FY 05-06, Campbell collected **1,142 cubic yards** of **residential** debris from **5,454 curb miles** of streets, and **884 cubic yards** of debris **from 1,807** curb miles of **commercial** and arterial streets. **Total** annual amount of debris recovered by the sweeper was **2,026 cubic yards**. Additionally, **6,609 tons of yard waste was recycled** in Campbell during FY 05-06 via garbage collection services.	Public Works Supt, WVCWP to assist

Campbell

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2005-2006 ANNUAL REPORT

Public Agency Activities: Operations and Maintenance Evaluation

Storm Drain Maintenance: The West Valley Sanitation District (WVSD) finished a major task during FY05-06 which will make storm drain cleaning procedures more efficient and the annual SD reports more useful to the WV cities. Since the project began in FY04-05, WVSD staff have been building a database (using asset mgmt software) that would number the storm drains at upstream and downstream locations and provide the street name. FY05-06 was the first year that the enhanced storm drain maintenance reports, with street names, were available to the cities. WVSD presented them at WVCWP's June 19th workshop. The reports document the status of each stormdrain and, if applicable, the nature of any problem. The majority of structures were "clean" but a few were noted as having obstructions (e.g. "leaves/paper"). Other descriptors that are available in the report are: mud/dirt, foreign object, rocks/stone, sand/gravel, etc. All structures, as needed, are cleaned at the time of inspection. The WVSD's report may be used by WV cities to help monitor POC problems, such as trash sites.

Storm Drain Stencils: The City of Campbell has decided to use thermoplastic storm drain stencils in selected high-use areas and downtown. Feedback from street maintenance staff is positive. "The thermoplastic storm drain stencils have worked out well. They were installed, mostly in the downtown area. They are more durable than painted stencils and they have held their color; a good product for high traffic areas." Staff have also noted that the thermoplastic stencils have lasted through many years of street sweeping passes whereas the older type stencils would have worn and had to be replaced." The fact that they are reflective, which provides visibility at night, and that they can withstand heavy traffic was reason to spend more for stenciling in appropriate areas. The downside of using thermoplastic stencils is the cost (about $250 per stencil, installed). Unlike the metal plates previously installed by the City, they adhere well to coarse and uneven surfaces and do not have sharp edges that bend, creating a potential to injure pedestrians or bicyclists.

Street Sweeping: Campbell's Street Sweeping accounted for 2,026 cubic yards of debris collected in FY05-06, compared with 2,321 cubic yards collected in FY04-05, yet the City swept more miles of street in FY05-06. Yard waste collection (6,609 tons in Campbell for FY05-06) helps reduce the amount of debris picked up by the sweeper because it provides alternative disposal for leaves. The WVC have selected a new contractor to provide garbage & recyclable collection. The new contract will begin in March 2007. Yard waste collection methodology and tracking may change when the current contract with *Waste Management* expires.

The WVCWP Mgr gave a street sweeping presentation at the June 19th West Valley Storm Drain Maintenance workshop, based on a Street Sweeping Workshop held on 5/8/2006 in San Jose. The principal speaker at the 5/8/06 workshop was the editor of Worldsweeper.com. He provided material for the WV training. The Town of Los Gatos purchased a new Street Sweeper and used it for the first time in FY05-06. The Town's Sweeper Operator drove the street sweeper to the WVCWP workshop for viewing and questions by other municipal staff. The Town PW Supt gave a brief talk on why this model of sweeper was selected; "the regenerative air sweeper is certified to generate fewer dust particles. This type of sweeper is required in Southern California, but not yet required in Northern CA.

Training Evaluation: Evaluation forms from the 6/19/06 WVCWP Storm Drain Maintenance Workshop showed that all attendees thought the workshop was "informative and worthwhile." Attendees also requested continued updates on storm drain maintenance and street sweeping practices. Most of those who attended stayed for the optional discussion between cities at the end of the workshop.

Corporation Yard SWPPPs: The City of Campbell along with the other West Valley communities plans to hold a round-table review and discussion of West Valley municipal SWPPPs during FY06-07. The corporation yard SWPPP and standard operating procedures (SOPs) will be evaluated to determine if revisions or additions to the manual are needed. The outcomes from this review and any SWPPP revisions will be reported in next year's annual report.

Response to Comments on
FY04-05 Annual Reports

Campbell:

Comment: On pages 61and 65, Campbell refers to Attachment B of the Annual Report; however, no Attachment B was found. **Please submit Attachment B for inclusion in the Annual Report.**

Response: Attachment B was submitted by email to Sue Ma on 7/27/06 for inclusion in the City's FY04-05 Annual Report. This attachment will also be included as the first document in the Planning Procedures section of Campbell's FY05-06 report, Attachment 4-0 (Response to Comments on FY04-05 Ann Rpt), immediately preceding Campbell's FY05-06 Planning Procedures Self Evaluation Matrix.

Comment: Provision C.3.e. requires that the Annual Report contain "a description of the organization structure of the Discharger's Operation and Maintenance Verification Program." **Please ensure that this information is included in next year's Annual Report**.

Response: The standard operating procedures, which describe the structure and organization for Campbell's BMP O&M Verification Program, are provided as Attachment 4C in the Planning Procedures section of Campbell's FY05-06 Annual Report.

BMP Inspection Program O&M Verification	Permit C.3.e.iii	Report on treatment BMP's O&M verification program. Note organizational responsibility, evaluation of effectiveness, and planned improvement to the program. Include a list or summary of treatment BMPs inspected during the year, inspection results, and any required follow-up and correction.	A total of three (3) projects have entered into BMP O&M agreements, with two occurring in FY '05-'06. These projects are all still in construction, and accordingly, the City has not yet conducted BMP O&M inspections. Once Group 1 and 2A/2B projects are completed, the inspections will be conducted. To perform the inspections, the City has decided to use staff from its Building or Public Works Departments, or an outside consultant. Location and the type of the BMP treatment to be inspected will determine which staff or consultant will perform these inspections. Details of Campbell's BMP O&M Verification Program are provided in the attached standard operating procedures (SOPs) from the City's 2004 Urban Runoff Management Plan.	Sr. Civil Engineer & Engineering Inspectors
Training & Evaluation	FY05-06 Work Plan,	Continue to provide training to inspectors and data managers on O&M verification program. Include evaluation of effectiveness and planned improvement to the program	WVCWP hired a civil engineering consultant to facilitate a meeting with Campbell Public Works & Community Development Dept staff on 8/10/05, to discuss and clarify responsibilities of the City's BMP O&M Verification Program. On 7/19/05, 9/27/05 &11/22/05, Campbell's .Sr. Civil Engineer/Stormwater Rep attended WVCWP training meetings on the BMP O&M Verification Program. Aspects discussed include, requiring BMP O&M through development Conditions of Approval; use of BMP O&M Covenant or Agreement, SCVURPPP BMP O&M Inspection forms; performing inspections, inspection tracking (database vs. spreadsheet); recouping inspection costs, and early HMP implementation opportunities.	Sr. Civil Engineer WVCWP to assist

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2005-2006 ANNUAL REPORT

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
C.3.f Hydromodification Management Plan				
HMP – Hydrograph Modification Mngmt Plan	C.3.f	Implement the HMP, as approved by the Water Board, as part of requirements for Group 1 projects that may cause increased erosion or other related impacts. (Incorporate the HMP Report's standards, in their final state as approved by the Water Board, into the City's project approval process.)	There were no qualifying projects for HMP in FY '05-'06. The City will continue to track regional implementation of the HMP.	Sr. Civil Engineer/ Sr. Planner
Training		Provide incremental training on HMP requirements to City staff via SCVURPPP workshops and/or in-house staff training.	WVCWP hosted an HMP workshop on 1-26-09 in Monte Sereno on the final approved HMP and aspects of implementation. Jill Bicknell, Santa Clara Program staff presented. Campbell's City Engineer and Sr. Civil Engineer/Stormwater Rep attended. On 7/19/05 and 9/27/05, WVCWP held training meetings which included discussion on requirements of the final HMP.	SCVURPPP/ Sr. Civil Engineer Engineering & WVCWP to attend
Reporting	C.3.f.viii	Provide development and implementation status and a summary of projects incorporating HMP measures in the Annual Report	Most of the parcels in Campbell are either exempt from HMP requirements or the land areas are well below the 50 acre HMP "yellow zone" threshold. Consequently, the City does not anticipate any projects in Campbell that will be regulated by the current HMP requirements.	Sr. Civil Engineer
C.3.g Waiver and Compensatory Mitigation Program				
Waiver Program or Alternate Compliance	Permit C.3.g.	Stormwater treatment BMPs will be required on all Group 1 and Group 2 projects. Any proposed alternative compliance must meet Provision C.3.g.vi conditions, and first be approved by the Water Board's Executive Officer.	All applicable projects are implementing C3 requirements without using alternative or offsite compliance measures.	Sr. Civil Engineer Per Reg Water Board's approval

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2005-2006 ANNUAL REPORT

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
Planning Procedures Evaluation				

During FY '05-'06, Campbell Public Works Engineering staff worked closely with other city staff and the WVCWP to clarify how to process Group 1 and Group 2 projects. Staff were especially interested in HMP implementation. Jill Bicknell, Program Assistant Mgr for SCVURPPP conducted a presentation and roundtable discussion with the WV cities on January 26, 2006. Campbell's City Engineer and Sr. Civil Engineer participated.

Two other key issues that received special attention during the year were addressing the need for stormwater treatment BMPs and collecting background data for annual reporting and the BMP O&M Verification Program. In response, the Public Works Department added several additional C.3 related items to its Land Development Submittal Requirements checklist, prepared a Stormwater Management Plan suggested format and revised its *Stormwater Regulation Changes* notice (for developers and contractors). These and several other C.3-related documents were placed on the City's web site.

Evaluation of BMP O&M Inspection & Verification Program

City staff attended several C3PO work group meetings to provide input on the development of SCVURPP's BMP O&M inspection forms. The City has committed to using the finalized forms to facilitate the synthesis of county-wide data. The City's Civil Engineer also participated in WVCWP meetings (9/27/05 & 11/22/06) where three West Valley cities considered BMP inspection tools (in addition to SCVURPPP-generated inspection forms) which might make the inspector's job easier, e.g. possible prioritization list for inspections and a laminated list of information about BMPs for inspectors.

Although no BMP O&M Verification inspections have been required to date, staff in both the Public Works and Community Development Department are continuing to evaluate how improve the efficiency of the verification program. As noted in the Planning Procedures SOPs in the City's URMP, Public Works (Engineering) staff will be available to conduct inspections of stormwater treatments at Group 1 and Group 2 sites. However, depending on the type and location of stormwater BMP treatment to be inspected in the future, Campbell is also prepared to hire an outside civil engineering consultant to perform this task.

Substantive changes to the structure and function of the BMP O&M Verification Program, or other aspect of the City's Planning Procedures element, would trigger changes to the Campbell URMP. These changes would be reported in the annual report supported by submittals of the revised portions of the Planning Procedures Performance Standard.

Attachment 4C

City of Campbell
Standard Operating Procedures
BMP Operation and Maintenance Verification Program
(NPDES Permit Provision C.3.e)

The City of Campbell conducts a BMP Operation and Maintenance (O&M) Verification Program that includes:

a) Requiring legally enforceable agreements or other mechanisms assigning responsibility for O&M of treatment measures;

b) Compiling a list of applicable private and public properties and the responsible operators of stormwater treatment measures at these sites;

c) Inspecting a subset of prioritized treatment measures for appropriate O&M on an annual basis, with appropriate follow-up and correction.

1. On-Going BMP O&M Required

- Owners of Group 1 and Group 2 properties are required to operate and maintain permanent stormwater quality BMPs in perpetuity using a recorded covenant with the City.

- Using a standard condition of approval for development permits, the City notifies developers of applicable projects that the owner(s) will be responsible for BMP O&M.

- Each year, Group 1 and Group 2 project owners must submit proof to the City that they have met the BMP O&M requirements.

2. Permanent BMP O&M Verification Program Responsibilities

- The Public Works Land Development and Environmental Programs staff maintains the tracking system for permanent BMP construction and BMP O&M inspection and enforcement for all Group 1 and 2 Projects.

- BMP treatments will be inspected by a Building Inspector, Public Works Inspector or Consultant, depending on the type and location of BMP treatments to be inspected.

- A Campbell Code Enforcement Officer is responsible for any follow-up with the property owner to ensure compliance.

- The Building Inspector, Public Works Inspector, or Consultant submits a Permanent BMP O&M inspection report for the previous fiscal year to Public Works Land Development and Environmental Programs staff by July 15th of each year.

- The Public Works land Development and Environmental Programs staff is responsible for including BMP O&M inspection data in the Annual Report.

3. BMP O&M Verification Program Record-Keeping

- The City tracks the location, ownership, and inspection status of permanent BMPs at Group 1 and Group 2 properties by collecting an NPDES Permit Provision C.3 Data Form for each of these projects.

- The property owner is required to submit an annual BMP O&M self-certification report to the City.

- The Public Works Land Development and Environmental Programs staff enters information about the sites into the BMP O&M Verification Program spreadsheet.

- It is anticipated that BMP O&M data given in the annual report might be presented similarly to the IND inspection reporting tables, in order to facilitate analysis of Santa Clara Valley inspection and BMP effectiveness trends.

4. Selection of Annual Permanent BMP O&M Inspection Sites

- Since the City anticipates a moderate number of Group 1 and Group 2 projects, initially BMPs at all these properties will be inspected annually by the Building Inspector, Public Works Inspector or Consultant.

- Typically, the annual inspections will begin in March.

- To determine if inspecting BMPs at every applicable site annually is cost-effective, the City will re-evaluate the Campbell BMP O&M inspection program each year, as part of annual report preparation.

- Depending on the total number of Group 1 and Group 2 properties in Campbell, the City may develop criteria for inspection of a subset of these sites, as allowed under NPDES Permit Provision C.3.e.

5. Permanent BMP O&M Pre-Inspection Preparation

- The Building Inspector, Public Works Inspector or Consultant will review the Permanent BMP O&M Verification Program spreadsheet at least two weeks prior to beginning annual inspections.

- The Building Inspector, Public Works Inspector or Consultant will contact each Group 1 and Group 2 site owner/manager by telephone to arrange a mutually agreeable inspection appointment.

- Prior to each site inspection, the Building Inspector, Pubic Works Inspector or Consultant will review the site's Grading and Drainage Plan, including any applicable as-built construction plans, for BMP information, including BMP types and locations. At this time, the site's current BMP O&M self-certification report, any previous inspection reports, and any necessary special procedures shall be reviewed. (e.g., inspection forms, underground confined space entry).

- The Building Inspector, Public Works Inspector, or Consultant will review the applicable CASQA or SCVURPPP BMP fact sheets and other information on the BMP O&M Verification Program that may be useful in addressing questions or comments raised by BMP owners or operators during the inspection.

- Prior to each site inspection, the Building Inspector, Public Works Inspector, or Consultant will assemble the necessary equipment and supplies.

6. Permanent BMP O&M Inspection and Enforcement Procedures

- Upon arriving at the inspection site, Building Inspector, Public Works Inspector, or Consultant will contact the site manager/owner and explain the purpose of the visit.

- Inspection results will be logged in writing using SCVURPPP-generated BMP O&M inspection form.

- If any deficiency is noted during the inspection, the Building Inspector, Public Works Inspector or Consultant will notify the Code Enforcement Officer in writing, including information on location, the nature of violation and any needed follow-up.

- The Code Enforcement Officer will prepare a written Notice of Violation, including a copy of the BMP O&M inspection form, a list of corrective actions needed and a compliance schedule. The City will send this Notice of Violation to the to the Group 1 or Group 2 property owner/manager in a timely manner after the inspection.

- The Building Inspector, Public Works Inspector or Consultant will enter the permanent BMP O&M inspection information, including any violations, into the BMP O&M Verification Program spreadsheet.

- The property owner and, if applicable, the site manager, will be instructed by the Code Enforcement Officer to notify the Public Works Land Development and Environmental Programs Staff within the time period indicated on the Notice of Violation so that the facilities can be re-inspected. The Inspector will complete a

new inspection form, noting whether all recommended maintenance activities have been completed and if any other actions are needed to assure proper operation of the facility.

- If repairs are not undertaken or are not done properly within the time allocated in the compliance schedule, the Building Inspector, Public Works Inspector or Consultant will again refer the matter to the Code Enforcement Officer, who will begin additional enforcement proceedings.

- Once all necessary repairs have been completed, the Building Inspector, Public Works Inspector, or Consultant shall note this in the spreadsheet, including the date work was completed and any other pertinent information (such as if City intervention was required to complete corrective work).

Background Data for BMP Type

The *Standard Stormwater Treatment BMP Inspection Data Collection Form* (Inspection Form) lists twenty stormwater treatment BMP types (see Section III). Inspectors, data entry staff and others who use the Inspection Form can refer to the California Stormwater Quality Association (CASQA) and SCVURPPP Fact Sheets for background information. The CASQA Fact Sheets are numbered (see below) and are located in the CASQA *Stormwater BMP Handbook for New Development and Redevelopment,* as well as SCVURPPP's *C3. Stormwater Handbook*. The SCVURPPP Fact Sheets are also located in the *C3. Stormwater Handbook.* Both Handbooks are available online.

On December 8th WVCWP IC/ID Inspector and Manager attended the Water Board's Construction Site Management and Erosion Control BMPs Workshop and spoke to attendees about the organization of the WVCWP, the need to report all construction and erosion incidents and how trend analysis determines how programs conduct public outreach (to effect behavior changes). Campbell's Sr. Civil Engineer attended the Water Board (SFEP)-sponsored Construction and Erosion Control Workshop on Dec 9th 2005 at Campbell Community Center.	WVCWP to coordinate w/ SCVURPPP; attend by City inspectors, Sr. Civil Engineer
	URMP	Construction Inspections Continue construction site inspections for stormwater issues (i.e., mudtracking, mat'l storage, housekeeping, etc.).	During FY05-06, Campbell staff inspected all construction sites for stormwater issues. Problems related to stormwater requirements were addressed and verbal notices to comply were issued. Compliance was monitored by Staff. Large commercial projects were monitored monthly and were required to be certified by project Civil Engineers for compliance. During **FY05-06** the City of Campbell issued permits for 4 new commercial buildings, 105 new residential units, 50 new non-habitable accessory units, 13 grading permits, 29 demolition permits, 279 residential remodel/additions, and 90 commercial tenant improvements. See attached spreadsheet.	Bldg Official, City Inspectors and Sr. Civil Engineer

West Valley Communities

CAMPBELL

FY 2005-2006 ANNUAL REPORT

Construction Inspection Evaluation

Construction Site evaluation of trends:

FY05-06		Previous Year - FY04-05	
Paint Discharge	1	Grey Water Discharge	1
		Complaint not found (in compliance, saw slurry vacuumed)	0
Total Number of Incidents	1		1

The number of incidents is the same as for the previous year. This year the only incident reported or observed in Campbell was a paint discharge, which was reported by the Fire Dept outside of the Fire Dept staff's regular inspection time. This shows that training on stormwater issues for Fire Dept staff (who are also IND inspectors for WV communities) has been effective. One grey water discharge violation was reported last year in Campbell. The Cities Construction Inspectors handle most of the incidents that can be easily and quickly resolved. However, meeting regularly with Los Gatos construction site inspectors has opened up better communication with municipal staff and effective reporting procedures for follow up by the WVCWP Inspector. The WVCWP Inspector met with Campbell staff (Senior Construction Inspector, Street Maintenance Supervisor, Public Works Superintendent, Senior City Engineer and City Engineer) on Sept 21, 2005 to discuss WVCWP follow up on all stormwater issues. Staff has responded during FY05-06 by providing more information to WVCWP staff on street sweeping, IC/ID incidents and internal training. However, the number of construction/ erosion incidents remains very low. Campbell inspectors say that problems are resolved very quickly because contractors and project managers are quick to comply.

Construction Site Erosion Control Workshops, WVCWP arranged with SFEP to hold the Santa Clara Construction/ Erosion Control Workshop on Dec 8th and 9th in 2005, at Campbell's Community Center. City of Campbell provided the venue so that the workshop could be held after the preparation time for rainy season when inspectors have more time to attend trainings.

The Construction Inspection Program currently works well – Continued public outreach efforts and further training n communication between municipal inspection staff and the WV Stormwater Inspector is planned for FY06-07.

PUBLIC INFORMATION/PARTICIPATION

FY 2005-2006 Work Plan Self Evaluation Matrix

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
A. SCV Program Projects/Support				
	SCV Program PMP (II.A.1)	a. Watershed Education and Outreach Campaign Support multi-year watershed education and outreach campaign.Participate in campaign development and special projects. If funding is available from the SCVURPPP Budget, campaign will include funding for educational programs at the Alviso Ed Center and funding for ZunZun performances in local schools. As SCVURPPP Budget permits, continue establishing partnerships with local recreational attractions to promote watershed messages. See SCVURPPP Project Work Plan for details.	*WEO:*.WVCW Pgm Mgr assists via active participation in WEO Ad hoc Task Group. *Happy Hollow Halloween Event on Sunday 10/30/05* 1 WVCWP staff member & 1 WVCWP volunteer assisted at this event..2 WVCWP mascot costumes were used: a Clapper Rail & a Saltmarsh Harvest Mouse. Wearing the costumes, they handed out educational materials and gave visitors an opportunity to play a watershed Bean Bag Game. The game teaches players to select destinations (stormdrains, sanitary sewers, or hazardous household waste drop-off) for water and other materials or substances. *Home and Garden Show on Saturday and Sunday 5/6/06.* 2 WVCWP staff worked two shifts at the San Jose Convention Center. In addition to program materials WVCWP staff handed out pencils engraved with water pollution prevention messages and the WVCWP website address. Topics of interest were safe fluorescent bulb disposal, safe paint and pesticide disposal; less-toxic gardening methods. Some people were interested in controlling specific pest infestations. A few parents asked if WVCWP would visit	WVCWP staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			their child's classroom to give an Enviroscape presentation WVCWP staff talked to at least 150 visitors to the booth. WVCWP arranged for 2 Program-sponsored Zun Zun assemblies to be presented at Saratoga Elementary School (May 2, 2006). The assemblies were provided to the School as a thank you for Saratoga students' and parents' participation in a Creek Clean-up on April 1st. The school received two (2) vocabulary lists (one for K-2 and one for 3-6) and an information sheet about the assembly content for teachers to refer to. Teachers were asked to familiarize the students with the vocabulary words prior to the assembly. Teachers also questioned students after the assembly to determine what was learned. The results are summarized in the Program's FY05-06 Annual Report.	
	NPDES Permit, PMP (II.A.12)	b. Pesticide User Outreach Project If SCVURPPP Budget allows, provide funding and participate in implementing IPM Store Partnership and Household Chemical Management Projects. Project scope will include items in Program's Pesticide Management Plan based on provision c.9.d. of the Permit for outreach to residents, commercial businesses, and pest control operators.	The WV Clean Water Program Manager participated in the SCVURPPP IPM Ad Hoc Task Group. See SCVURPPP Annual Report for details on accomplishments. See above: *Home and Garden Show on Saturday and Sunday 5/6/06.* *Orchard Supply Hardware store point-of-sale IPM -May 23, 2005* West Valley staff helped the SCV Program and *Our Water Our World* staff to set up Sunnyvale's Orchard Supply Hardware store's gardening aisles with 'shelf talkers' which relay IPM information to customers. Shelf talkers educate the general public on less-toxic methods to control pests and on child- and pet-safe solutions for homes and gardens. *March 22, 2006 Turf Workshop*	WVCWP Staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			Attendees included municipal staff from Campbell, Los Gatos and Saratoga and supervisor for Los Gatos private golf course. School Districts, golf course staff and press were invited. Cornell University Turf Specialist presented latest research in management methods to reduce pesticide use on turf. Evaluation comments included "Great Presentation/Program" and "Learned a Lot!" See "Pesticide Management" section "*Training for Applicators*". Formerly, WVCWP worked directly with the **Summerwinds Garden Center** in Campbell to provide IPM educational materials and to coordinate with Our Water Our World and SCVURPPP activities. In the interest of streamlining activities, SCVURPPP is now working directly with this garden center, and WVCWP is no longer their main contact.	
	NPDES Permit, Provision c.9.c.	c. Mercury Pollution Prevention Outreach This project will encompass local implementation of the Program's Mercury Pollution Prevention Plan including public education on: 1) the effects of mercury in the environment, and 2) products containing mercury and proper disposal of such products	*Fluorescent Lightbulb Recycling Flyer* WVCWP worked to update and improve its flyer created last year, listing local drop-off points (5 hardware stores) which are part of the fluorescent bulb residential drop-off program. Hours and location of stores are listed, along with HHW contact info. The flyer now reminds residents that **it's illegal to put fluorescent bulbs in the trash or home recycling bins**. The flyer was distributed at community events.	WVCWP Staff
		Outreach Event	*January 28, 2006 **Free** Hazardous Waste Recycling Event* - for recycling of TVs, monitors and laptops. Event was	WVCWP Staff to coordinate

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
		Not part of Work Plan – additional activity	sponsored by all four West Valley Cities through West Valley Clean Water Program. The event was held at Los Gatos Municipal Yard, and Los Gatos and Saratoga staff assisted. The event was for West Valley businesses, residents and schools. **Flyers/posters, press releases and an ad were created** for this event noting that E-waste can leach toxic metals (i.e., mercury) into our water, and that by using a responsible recycler we can help prevent export of our waste to foreign dumps where mercury leaches into the environment. (See above row for details on outreach materials). Over 250 cars brought E-waste for recycling. Posters placed around the site highlighted the environmental affects of improper E-waste disposal. One high school coordinated with WVCWP prior to the event, and dropped off pallets of E-waste on the previous day.	

Public Information/Participation Program EVALUATION - *SCV Program Projects/Support*

Zun Zun Assembly: WVCWP received an evaluation courtesy of the School Principal's Assistant: "Yes, it was very much enjoyed by all."The kids learned a lot, now know what a watershed is, understand the environmental issues. The 1st grade teacher was very impressed.... I thought it was very cute. I learned some things too!" The final comment that "I learned some things too!" reinforces what WVC staff have generally found to be true: adults may be more receptive to learning about stormwater issues, and proper behavior, if the messages are funneled through the children.

Mercury Outreach/ E-Waste Recycling Event: WVCWP used a portion of staff time and funds to organize a Free E-Waste Recycling Event for West Valley residents, businesses and schools, and to publicize Mercury issues while doing outreach for the event. The WVC were challenged in trying to decide on a

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
meaningful way to reduce mercury and copper discharges. WVCWP pursued an opportunity to reduce the illegal dumping of televisions and monitors (esp with the increase in sales of flat screen products and the obsolence of many TV and computer monitors). UNITED DATATECH was willing to help the WVC conduct this service at no cost. The television that was pulled out of a Los Gatos creek in December emphasized the importance of this event. The *Los Gatos Weekly* and the *Saratoga News* ran articles about the TV in the creek; these papers, along with the *Campbell Reporter* and the *Los Gatos Daily News*, printed details about the WVCWP event. A January date was chosen, so that residents could dispose of outdated E-waste if they had received new electronic items during the holidays in December. Outreach was conducted during December and January. Outreach included press releases and flyers which were sent to Campbell, Los Gatos and Saratoga Chambers of Commerce and School Districts. This resulted in the information being posted on Chamber and School websites and in electronic e-mails, so that it reached thousands of citizens. Funds were also used to retain a PR firm which worked with WVCWP to develop an eye-catching newspaper ad, and a timely, captivating newspaper article. WVC felt that this outreach money was well-spent in a successful, low-budget media campaign that increased awareness of mercury issues. The outreach included information on mercury toxicity, and the need to prevent mercury (and other E-waste) from landfill dumping, where it can leach into water – both at home or abroad. A strong emphasis was placed on the fact that the event was organized with a responsible recycling firm, which would use appropriate recycling methods for all materials. Residents responded with overwhelmingly positive feedback. Some had been saving monitors and TVs for years. The event was very successful in that over 250 cars brought E-waste, and a high school arranged to bring over pallets of E-waste. Residents want more events like this one, since it makes a difference. WVCWP staff will plan one for FY06-07. (See *Mercury Pollution Prevention Activities* section for further details.)

Public Information/Participation Program EVALUATION – *B. Joint Projects: General Outreach – Materials Distribution*

OUTREACH MATERIALS

The "Grow-It Guide" continues to be the most popular IPM literature. Although WVCWP and the cities/town make available a variety of IPM materials at public places and community events, it is most common for residents to pick up only the Grow-It Guides.

Items for children are also popular. WVCWP continues to search for affordable, fun and informative children's outreach material. The "Kids Guide to Backyard Bugs" is always popular, but supplies are very limited, so these are distributed sparingly. Many more would be taken, if they were available. This year WVCWP evaluated a children's coloring book: "Pest or Pal" – a coloring book with text related to IPM and less-toxic pest management. The item was well-received. However, it is rather high-priced to be given out in large numbers.

WVCWP also purchased numerous copies of a hard bound picture book **"All The Way To The Ocean"** -- depicting how stormdrains carry trash & other pollutants into nearby water bodies. The book was donated to classes which held Enviroscape presentations as a "Thank You". The book will also serve as a means for teachers to introduce the subject to their classes in coming years, prior to the students viewing the Enviroscape. Copies kept at WVCWP can also be loaned to schools and libraries when a book is needed for a Story Time situation.

Efforts were directed to finding an inexpensive, desirable item which people would be happy to pick up at events, and which would reinforce Stormwater messages. WVCWP was also looking for something with its website address, which would be kept around the home so that residents could refer to it in order to be able to reach the website easily. WVC decided on using pencils made of recycled denim (blue) and recycled money (green). Slogans were chosen and printed on the pencils, along with the website address. The pencils proved to be very popular outreach items, and were found to be a good way to keep the subject and the website address in front of people.

Another effective outreach piece was a flyer created to promote new watershed-themed youth programs at Don Edwards Nat'l Wildlife Refuge. Schools in the Campbell School District agreed to pass these out to their students, so that they could be taken home. In June 2006, **8,367** of these were distributed through 6 schools in the District. The Education Center at **Don Edwards subsequently reported a noticeable increase in calls and participation related to youth programs**.

Extensive outreach was conducted concerning the E-Waste Recycling Event in January 2006. Posters were placed in numerous public places and flyers were distributed to Real Estate offices. However, based upon response from those who attended the event, it appears that the overwhelming majority of attendees learned about the event through ads and articles in the local weekly newspapers.

GENERAL OUTREACH				
Source	**WP Task**	**FY05-06 Work Plan Tasks**	**FY 05-06 Accomplishments**	**Responsible Party**
General	NPDES Permit, Provision c.4 and c.9 & PMP (II.A.4.)	b. Participate in Community Events 1) Promote watershed messages by participating in community events (e.g., farmers market, festivals, creeks clean-ups, etc.). 2) Conduct or participate in local activities that are coordinated with the Watershed Education & Outreach campaign (as budget permits). 3) including outreach events targeted at pesticide users.	**1)** *Saratoga Library Story Time Sept. 05:* the Library used a "Rivers" theme for its Story time. WVCWP Coordinated with the library to make Enviroscape presentations at the evening Story time. WVCWP arranged fto have 2 books read, related to watersheds and wildlife in local creeks. The Enviroscape was used to demonstrate runoff issues. Approx. 27 children participated and approx. 21 parents viewed the presentations. Numerous materials were taken. SEE ATTACHMENT PIP 6A FOR A PHOTO OF THE ACTIVITY **2)** *Audubon Wildlife Fair 10-22-06* WVCWP partnered with local Sierra Club chapter & Audubon Society to present a table at Audubon's "Wildlife Education Fair". Table featured: Enviroscape hands-on watershed model demonstrating pesticide pollution in runoff, a display on dangers of diazinon for birds, and IPM materials; Sierra Club distributed California Golden Poppy seeds to promote pest-resistant planting. The Wildlife Fair is held at the Audubon facility along City of Saratoga's northern border. Approx. 25 children participated in the Enviroscape, with over 25 parents watching. Participation was less than previous years due to	WVCWP Staff WVCWP Staff to coordinate with Municipal Staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			the presence of a SCV Water District table with Enviroscape, which attendees saw first, in the flow of traffic. **3)** For participation in Program WEO events, see "**A. SCV Program Projects/Support"** at the beginning of this PIP Section. **4)** *"Tax Free Day" at OSH (bordering Saratoga & Campbell) 10-8-05* Spoke with at least 45 customers and employees (some with family or friends who are not included in this total). Gave out HHW, & IPM Materials (see above). Talked to customers about disposing fluorescent bulbs at HHW or bringing bulbs back to OSH (this site was a partnering drop off location). One elementary school teacher expressed interest in an Enviroscape presentation for 5th grade. **MUNICIPALLY-SPONSORED EVENTS** **CAMPBELL** *Creekside Clean Up* Public Works staff organized and supervised a community creekside Clean-up event at which materials were also distributed. The Clean-up was held in conjunction with "Keep California Beautiful". **CAMPBELL**: Events with Materials Distributed *Arbor Day* Public Works staff organized and supervised an Arbor	

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			Day event at which materials were also distributed. *Neighborhood Meetings* Public Works staff sponsored 2 Neighborhood Meetings at local schools. Stormwater runoff was among the issues discussed, and materials were distributed. **LOS GATOS** *Farmers Market Event 4-9-06* WV Staff and one volunteer presented water quality topics using the Enviroscape model. Fifty people visited the booth. IPM materials and WVCWP Pencils were distributed. **SARATOGA**: Events with Materials Distributed *Building Bridges Event Oct 9, 2005* Saratoga City staff distributed materials at the "Building Bridges" event at West Valley College. Materials concerning HHW, Copper, Mercury and IPM were distributed. *Mustard Walk Feb. 2006* This family event is based upon the Heritage Orchard and serves as an appropriate place to distribute gardening/IPM materials. City staff place decorative baskets with IPM literature for residents to take. Grow-It Guides and WVCWP pencils were the most popular items.

			RESULTING FROM THE PRESS RELEASE **Press releases about the E-waste event were sent to Chambers of Commerce for web-site/newsletter use.** Campbell, Los Gatos and Saratoga Chambers of Commerce received the Press Release; all Chambers included this information on their website or in their newsletter to members. This **flyer/press release also went to local schools**; some featured it on their school website. WVCWP also wrote and sent a **"Thank You/ Letter to the Editor"** concerning the E-Waste event. The letter detailed the importance of proper E-Waste disposal, and listed the # of event participants, etc. The letter was printed in the Los Gatos Weekly Times. OTHER PRESS RELEASES **July 05** Press Releases were sent to 4 local papers concerning an "Eco-Hero Award" to be presented to a Saratoga student at the WVCWP offices during a monthly meeting. (*See "TARGETED OUTREACH – m. Partnering with Students" below, for details*). The event received press coverage from several newspapers, including a 300+ word article in the Saratoga News. SEE ATTACHMENT PIP 6B TO VIEW AN ARTICLE RESULTING FROM THE PRESS RELEASE **Sept. 05**

			Press Release for 9/17/05 Creek Clean-up – e-mailed to Westmont High School 8/30. PR was posted on school website, and included in daily email bulletin. **Oct. 05** In response to a Press Release, the San Jose Mercury News, on 10/15/05, printed an article on a Town of Los Gatos Trash pick-up event, sponsored by a local church. The church had asked Town staff for recommendations on useful volunteer activities, and the litter pick-up was suggested and was a successful event. **March 06:** Press release to gardening columnist for 3 local papers; information on upcoming Less Toxic Turf Management workshop and invitation to attend workshop. **April 06:** In response to a press release, the Saratoga News printed a brief article on the upcoming Creek Clean-up along Saratoga Creek in Saratoga Village. **May 06** Press Release for 5/20/06 Creek Clean-up – e-mailed to Westmont High School. PR was posted on school website, and included in daily email bulletin.	
General	FY05-06 CI Item	f. WVCWP Web-Site Continue to expand and update WVCWP web-site to provide new educational material to the public e.g. on IPM, mercury, trash, copper/nickel & HHW.	• **December 14, 2005** WVCWP created a web "flyer" for a **FREE** TV/monitor/laptop collection event to take place on January 28, 2006. (See A. SCV, c. Mercury Pollution Outreach). The flyer was also placed on municipal websites.	WVCWP Staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			• **Early Spring 2006:** staff changed the "Take Action" page to focus on **less toxic gardening and affect of pesticides** on water quality. The new page highlighted links to "Our Water Our World" website. • Spring 2006: On the WVCWP Home page, staff added a car wash/copper graphic and text. Changes included adding a link to WVCWP's *Car Wash Kit flyer* with info on copper as a water pollutant.	
		Municipal Web-Sites	**Campbell** The City of Campbell created a completely new website in FY 05-06. The Public Works link can now be followed to a full page of links relating to Stormwater, NPDES and C.3 requirements. The page also features links to PDFs of all the "Construction Tri-folds" which list BMPs. In addition, the site has a page on community/creek clean-ups, including statistics from last year's clean-up. **Los Gatos** The Town of Los Gatos created a completely new website in FY 05-06. The Public Works link can now be followed to a full page of links relating to Stormwater, NPDES and C.3 requirements. The site allows users to search for terms such as "Car Washing" or "Draining Pools". This brings up a Stormwater Page which gives instructions on correct behavior for these activities, plus other issues such as Pet Waste, Dirty Water down the Stormdrain, etc. **City of Saratoga**	Municipal Staff

			Saratoga's home page includes links to Household Hazardous Waste disposal advice, and a Street Sweeping Schedule, Map and information.	
PUBLIC PARTICIPATION				
Public Partici-pation	FY05-06 CI Item	g. "Creek Keepers" Program Continue development and promotion of trash monitoring activity. Develop and implement other clean-up activities as feasible.	Promoted through Press Release for 9/17/05 and 5/05 Creek Clean-ups (Coastal Cleanup Day & Nat'l River Cleanup) – e-mailed to Westmont High School. **Trash Monitoring was conducted at 4 different Clean-up events in FY 05-06.** Two Creek Clean-ups were held at an established site: San Tomas Aquino Creek at Westmont High School (which serves Campbell, Los Gatos, Monte Sereno and Saratoga students). Most of the participants are high school students, and they have been proven to be quite receptive to helping with Trash Monitoring. WVCWP sponsored the cleanup and trash monitoring events on 9-17-05 and 5-20-06. To prepare for the event, flyers were distributed to 6 local schools. Students and parents were trained to conduct trash monitoring and told why trash has become a pollutant of concern (POC) for the S.F. Bay area. 9-17-05 – 54 volunteers 5-20-06 – 50 volunteers **One Clean-up was sponsored by the City of Campbell**. WVCWP tried a slightly simplified Monitoring form at this	WVCWP Staff & WVCWP Staff to coordinate with Municipal Staff

TARGETED OUTREACH & SCHOOLS				
Targeted Schools	FY05-06 Work Plan	i. Coordinate Watershed Education with schools Promote awareness of WVCWP through **presentations** in one or more West Valley schools. j. Provide Watershed Education in classrooms Conduct Water Quality Protection education or presentations in local schools, using *Enviroscape* and/or other interactive methods to engage students in Watershed Campaign messages.	**Saratoga Elementary – 4th grade 28 students and two teachers**. On 3-29-06, students participated in an inter-active Enviroscape presentation. WVCWP brought attention to pollutants of concern (trash, mercury, copper, and pesticides) and introduced "take action" steps to help the problem. This year WVCWP developed new curriculum for 4th grade, based on current textbook and State standards. Presentation topics also included: wetlands, stormdrains vs. sanitary drains, pet waste, HHW disposal (paint, pesticides, fertilizers & batteries), and how to report illegal dumping or illegal stormdrain discharges to the WVCWP Inspector. **Grow-It-Guides and Pencils** labeled with stormdrain slogans and the WVCWP website address were distributed to students & teachers. • A 30 min presentation was scheduled, but the teacher requested WVCWP to stay to continue the discussion with the students. • **A "Zun Zun" watershed assembly** was subsequently **presented to 500 students** at the school. • WVCWP donated a picture book to the school called **"All The Way To The Ocean"** depicting how stormdrains carry trash & other pollutants into nearby water bodies. •	WVCWP Staff
Targeted Schools	FY05-06 Work Plan	i. Coordinate Watershed Education with schools	**St. Mary's School– Kindergarten class** **On 6/12/06 30 students and 3 teachers** attended an	WVCWP Staff

Public Information/Participation Program Evaluation

For additional Evaluations, see Sections above***:***

- ***SCV Program Projects/Support*** and
- ***Joint Projects: General Outreach – Material Distribution***

Participation in Community Events: WVCWP staff found its participation in the **Saratoga Library Evening Story Time** to be a very effective means of reaching both parents and children. Librarians and parents expressed appreciation for the opportunity for children to use the Enviroscape. After this event, the Campbell and Los Gatos Libraries were contacted by phone and by e-mail (with photos of the successful Saratoga event). However, WVCWP was not able to elicit similar invitations from these libraries. It is possible that an offer to use the Enviroscape during summer outdoor Reading Program activities would instigate invitations.

At the **Audubon Wildlife Fair** this year, the SCV Water District was also a participant, and also brought an Enviroscape. This diverted visitors who would have participated in WVCWP Enviroscape activities. It is possible that WVCWP will not attend this Wildlife Fair in FY 06-07, in order to avoid duplication of efforts with the SCVWD.

"Tax Free Day" at Orchard Supply Hardware: WVCWP appreciates OSH's permission to approach customers and employees in the store. The event remains an effective means of reach residents, since it allows an opportunity to speak with them personally, and to approach people who are actually buying items (gardening materials, fluorescent bulbs) which are addressed by our outreach materials.

Creek Clean-up Outreach: Many flyers were distributed for the Sept 05 Creek Clean-up. It appeared that these flyers did not really result in volunteers attending the event. There was some response from the Westmont High School website announcement and the Parent/Teacher/Student Assn. 'daily e-mail". It was found that the best response was the result of students learning about the event from a Westmont High Science teacher, who also offered extra credit for students who participate and then write a review. In the future, WVCWP will use less efforts on flyers, and more efforts on working with teachers. For the May 06 Creek Clean-up at the site, a WVCWP spoke with school staff and put minimal efforts into additional outreach. At this event, the turnout was almost exactly the same as the September event – even with minimal additional outreach. This turnout is about the maximum that the site can handle, so it appears there is no need for much outreach beyond working with the school.

Schools Outreach: The new Enviroscape curriculums, developed this year to address Calif. State Standards for Kindergarten and 4th grade, were piloted successfully. Teachers expressed appreciation for the classroom activity, and requested presentations for the next school year. The 4th grade Enviroscape presentation at Saratoga Elementary School was given prior to a Creek Clean-up, which the students were invited to attend. The classroom presentation and

Creek Clean-up were followed by 2 Zun Zun assemblies at the school. Teachers, school administrators and parents all commented that they felt both students and adults had learned new ideas and information, and the school will be more inspired to take notice of its local Saratoga Creek which is only 3 blocks away.

WVCWP also initiated use of a hardbound picture book “All the Way to the Bay” as a means of keeping the Stormwater Pollution subject in teachers’ minds. The book is given as a gift after an Enviroscape presentation. It is hoped that the presence of the book will help stimulate interest in the subject in subsequent years, and among additional teachers.

All West Valley businesses, residents & schools are invited to bring unwanted TVs, monitors and laptops to this FREE recycling event.

January 28, 2006
9 am – 1 pm

41 Miles Ave. – Los Gatos
(Municipal Yard – Near University Ave. & Highway 9)

Here's your chance to act locally, and make an impact globally, while clearing up your clutter in the process! Your support of this event ensures that the hazardous substances in these items will be recycled responsibly to prevent toxic water contamination and air pollution, both locally and in Third World countries.

Brought to you by Campbell, Los Gatos, Monte Sereno and Saratoga through the West Valley Clean Water Program.

Saratoga youth named 'Eco-Hero' award winner by Action for Nature

By Kaustuv Basu

"No Dumping: Flows directly to bay"--almost everyone has seen that sign on a sidewalk.

Saratoga David Marash-Whitman, 13, wanted to learn more about it.

As part of a school project two years ago, he decided to find out more about household pollutants that can damage creeks and the bay.

One of the first people he contacted was Cheri Donnelly, program manager for the West Valley Clean Water Program. She told him about the pollutants that were the most dangerous to the creeks. That project was completed a while ago, while David was at South Peninsula Hebrew Day School.

David has moved to Kehillah Jewish High School since then but he has continued with his mission of educating the public about the dangers of pollutants.

Last month, he won the International Young Eco-Hero Award from Action for Nature, a local ecology group, for his efforts. He is one of several youngsters worldwide chosen for their commitment to protecting the environment.

"I was horrified to learn how toxic residential products like paint-removers and pesticides

can affect creeks," David said.

He said that he advocates his cause whenever he gets a chance. "My next project is to get kids to help clean up the local creeks," he said.

Donnelly said that David does a very professional job when he makes presentations to people. "People have no idea how litter has damaged our creeks," she said.

But advocates such as David are helping, she said.

B. Shimon Schwarzschild, the founder of Action for Nature, said that he is delighted with efforts made by young people all over the world.

"Individuals can make a difference," Scwarzschild said.

Electronic Waste Discovered in Local Creek
Free Recycling Event in Los Gatos Aimed at Preventing Water Pollution

(Los Gatos, CA) – Following recent storms, Los Gatos Town staff pulled a discarded 27" television from a local creek. The culprit remains unknown. While they may have thought this was nothing more than littering, the potential problem for this crime is much bigger. When not recycled or disposed of properly, electronic waste can result in toxic pollution. E-waste leaches lead, mercury, copper and other metals into the groundwater, posing serious health hazards to people and wildlife.

As flat-screen plasma TVs and LCD monitors become more affordable, consumers are replacing conventional cathode ray tube (CRT) TVs and monitors at a rapid pace. Judging by holiday sales and pre-Super Bowl ads, there will soon be many conventional TVs gathering dust – or worse, as we found in a local creek.

To help local residents properly dispose of this waste, the municipalities of Campbell, Los Gatos, Monte Sereno and Saratoga are hosting a FREE recycling event for TVs, computer monitors and laptop computers.

The event will be held in Los Gatos at 41 Miles Avenue (near intersection of University Ave. & Highway 9) on January 28th from 9 a.m. to 1 p.m. The West Valley Clean Water Program (www.cleancreeks.org), the official storm water agency for these 4 municipalities, is partnering with local recycling firm United Datatech Distributors (UDT) for the event.

UDT was selected for their high standards of materials handling. UDT does not export waste to third world countries, where children and laborers seeking salvageable parts are exposed to toxic e-waste which pollutes local water supplies or billows noxious air pollution when burned. UDT also keeps these deadly materials out of our local landfills, where runoff containing hazardous substances can seep into our groundwater.

The issue of littering aside, it is illegal in California to dump TVs and monitors in landfills. Garbage collection for local municipalities prohibits putting these items into residential garbage cans. Instead, these items must be handled by a credentialed recycler, often for a fee. This event is a great way to avoid the fee, get a jump on spring cleaning, and avoid desperate disposal measures.

Free Recycling Event
TV - Monitor - Laptop Recycling in Los Gatos

Quick Facts:

What: FREE Recycling/Collection event
Items Accepted: TVs, Computer Monitors, Laptop Computers (working or not)
When: Saturday, January 28th, 2006
Time: 9 a.m. to 1 p.m.
Where: 41 Miles Ave., Los Gatos (near intersection of University Ave. & Highway 9)
Who is invited: Residents, Businesses, Schools in the South San Francisco Bay Area
Further info at: www.cleancreeks.org or 408.354.5385 (tip line)

- The EPA estimates that Americans discard 2 million tons of electronic waste each year.
- The EPA considers old cathode ray tube TVs and monitors the most hazardous items.
- E-waste leaches mercury, lead, copper, etc. into our ground water.
- Irresponsible recyclers ship e-waste to Third World countries where it pollutes land, air and water, posing serious health risks to residents. Visit www.ban.org for details.
- Support of this event sends a message about ethically responsible recycling practices.
- Information about United Datatech Distributors (UDT) can be found at www.uniteddatatech.com

Creek is no place to dump computers, television sets

By Jennifer McLain

For some, recycling is second nature. But when it comes time to toss out that old TV or computer monitor, there's no such thing as a recycle bin for "e-waste only." Some resolve the problem by throwing the electronics out in the dumpster--forgetting, not realizing or not caring that the toxins in them can eventually seep into groundwater. Others just ignore the "no dumping" signs and cast them in the creek.

"We found a 27-inch TV in the Los Gatos Creek a few weeks ago," said Los Gatos resident Cheri Donnelly, program manager at the West Valley Clean Water Program. The clean water program started in 1994 and is dedicated to preserving and protecting the water in Campbell, Los Gatos, Monte Sereno and Saratoga.

"People are desperate to get rid of their old electronics, but they can't just put them in the landfill because the toxins can get into our groundwater," Donnelly said.

One alternative is to take the old electronics to a free TV-and monitor-recycling event from 9 a.m. to 1 p.m. on Jan. 28 at 41 Miles Ave. in Los Gatos.

The water company is teaming up with United Datatech Distributors and ECS Refining for the event. Donnelly said that unwanted electronics brought to the recycling event will be handled responsibly.

"At a lot of these types of events, people feel giddy and gooey that they are doing the right thing, but what they fail to realize is that a number of these places are shipping these devices to someone else's back yard," said Tom Hogye, vice president and general manager of the distributor and refining company.

Hogye said that some so-called recyclers take the cheapest and not most environmentally sound route, and ship scraps to undeveloped countries while making a profit.

"Even if we are taking care of our country, we certainly don't want to see the waste in Africa and Asia," Donnelly said.

Hogye said that Datatech sends the waste to environmentally sound processors, which are primary and secondary smelters.

It is illegal to dump TVs and monitors in landfills, and since the inception of SB20, the Electronic Waste Recycling Act of 2003, a fund was created for the collection and recycling of certain electronic waste. As of July 1, 2005, plasma televisions and TVs with liquid crystal display screens are classified as e-waste. Each time a consumer buys a new electronic that contains cathode ray tubes (CRT) or has a liquid crystal display, he or she pays a $6 to $10 fee that will cover the collection and recycling of the wastes.

Electronic devices contain a variety of materials, including copper, lead, zinc, arsenic and mercury.

"Mercury is one that our program is highly focused on," Donnelly said. These toxins can enter the groundwater and are hazardous to the health of plants, animals and humans.

It is estimated that Americans discard nearly 2 million tons of electronic waste a year, and among the most hazardous are CRT televisions and monitors.

In general, Donnelly said the Los Gatos community needs to be aware of what is going into its groundwater.

"It's about knowing that what goes into the street drain. If it's dog waste or pesticides, it really is going directly to the Los Gatos Creek and downstream into San Jose," said Donnelly.

For more information about the event or the West Valley Clean Water Program, call 408.354.5385, or visit www.cleancreeks.org.

CASQA Stormwater Conference / Management Workshops **Collaboration & Integration Opportunities for Stormwater Programs** Presenter: Stephen McCord Sr. Engineer, Larry Walker Associates **Topics**: Broad public outreach can benefit multiple permittees with minimal coordination. Major reasons to collaborate in these efforts: ▪ All Phase I and Phase II permittees are required to do it; ▪ There are many activities (including media production, brochures, and websites) that benefit from a consistent, reinforced message. ▪ Consistency, especially to commuters, reinforces the message. ▪ Public Outreach funding is shared ; dollars are used more efficiently ▪ Orange County is an example of a highly functional collaboration among the County as the Principal Permittee and 35 co-permittees to develop and broadcast a consistent message regarding stormwater	**Oct. 4, 2005**	**WVCWP (1)** Program Manager
Nonpoint Source and Stormwater Pollution Education Program **Chicago, IL** Co-sponsored by Chicago Botanic Garden and U.S. EPA. **Sessions**: ▪ Tools and techniques for NPS and Stormwater Education	**Oct 17-20, 2005**	**WVCWP (1)** Program Manager Representing all Cities

	SCVURPPP PMP (I.A.1.)	Summary of Use Track and report use of pesticides on municipally owned property. Report on use of IPM practices.	No Organophosphate pesticides were used by staff or contractors for City of Campbell, Town of Los Gatos, City of Monte Sereno or City of Saratoga in FY 05-06. All pesticide use (by municipal staff and contractors) was tracked and reported to WVCWP, for use in possible future analysis.	WVCWP to coordinate w/ Cmpbl: Sr. Civil Engr/ Public Works Supt/ Bldg Maint. Supvr LG: Parks Supt & Public Works Supervisor MS: City Manager/ Facility Mgr Stga: Parks & Street Maint Supervisor
	SCVURPPP PMP (I.A.3.) PS #3	Implement BMPS and SOPS Continue to Implement standard operating procedures and best management practices for any pesticide use by staff or contractors. Implement IPM practices as BMP when possible.	In August 2004, the West Valley Communities (WVC) revised and updated all sections of their URMPs, including their Pest Management PS. During 05-06, the WVC continued to implement the Pest Management Performance Standard (PMPS). A Pest Specific IPM Plan for "Less Toxic Turf Weed Control" was developed in FY 05-06. "Standard Operating Procedures for Pesticide Management" are being followed by staff and contractors. BMPs in general continue to be effective. WVC work with contractors to find the least-toxic method to treat resistant pest problems.	Cmpbl: Sr. Civil Engr/ Public Works Supt/ Bldg Maint. Supvr LG: Parks Supt & PW Spvsr MS: City Manager Stga: Parks Maint Spvr

			The WVC use reduced-risk pest management in municipal facilities (parks & buildings), while fostering greater IPM awareness by sponsoring local IPM workshops (since 2001) for municipal staff, special districts and Pest Control Operators (PCOs). Staff have attended trainings on IPM (e.g., West Valley Turf Mgmt workshop on 3-22-06) and are implementing IPM practices for control of pests, as practicable. *See "Evaluation" section below for details on IPM implementation.*	
	SCVURPPP PMP (I.A.6.)	Banned Pesticides Inventory If any pesticides have been banned w/in the past FY (per EPA, State &/or local requirements), conduct an agency-wide search of chemical storage area for these pesticides. Properly dispose of these banned substances pursuant to appropriate waste disposal regulations.	All storage areas are cleaned annually, and any pesticides that are no longer legal or no longer used are disposed of according to State regulations. **Campbell:** Storage areas are cleaned quarterly. **Monte Sereno**: does not purchase or store its own pesticides.	Cmpbl: Public Works Supt/ Bldg Maint. Supvr LG: Parks Supt & Public Works Supervisor Saratoga: Parks Maint Supervisor
	SCVURPPP PMP (I.B.1.) PS#5.a	Training for Applicators Ensure that employees who apply pesticides for the agency obtain the appropriate training as required by the County Agricultural Commissioner and the State Department of Pesticide Regulation (DPR)	Any staff and/or contractors who apply pesticides meet all requirements of the County and the State. Parks & Public Works staff attended Annual Safety Training conducted by outside contractor. Training included avoiding drift, and proper disposal. **CAMPBELL:** Due to high staff turnover in 2006, Campbell has received permission from Dept. of Ag to postpone its Safety Training to August 2006, in order to allow all new employees to be in place and to attend.	Cmpbl: Public Works Supt LG: Parks Supt & PW Div Stga: Parks Maint Spvsr

			LOS GATOS: 4/26/06 – 12 employees – presenter: Dennis Merrill, Killroy/ Sensitive Solutions Pest Control **MONTE SERENO:** no employees apply pesticides. In case of the need for pest control, a licensed Pest Control Operator will be called in. **SARATOGA:** 6/27/06 – 14 employees – presenter: Peter Howes. 2 more **Saratoga** employees gained QAC[1] cards through additional training in FY 05-06, enabling them to have a better understanding of pesticides, less-toxic options, and safe usage. [1]QAC - "Qualified Applicator Certificate", a category of the DPR Licensing and Certification Program. To be certified, the applicant must demonstrate specific knowledge on topics such as pesticide application drift problems and prevention, soil and water problems resulting from restricted use pesticides, phytotoxicity, potential for environmental contamination, etc.	
	SCVURPPP PMP (I.B.2.) PS#5.b	Training for Applicators Provide annual training on the appropriate portions of the IPM Policy, SOPs, and BMPs, and the latest IPM techniques to employees within departments responsible for pesticide application.	The West Valley communities, through WVCWP, sponsored a staff-attended IPM Training on Turf on March 22, 2006. Frank Rossi, a national expert (from Cornell University) presented guidelines for managing turf with little or no pesticides. The training included a classroom PowerPoint presentation and a field trip to examine Campbell's community athletic field turf. Additionally, the WVCWP made a video of the workshop (to transfer to CD) for parks maintenance staff to incorporate into future IPM training.	WVCWP to co-ord w/ Cmpbl: Sr. Civil Engr/ Public Works Supt/ Bldg Maint. Supv LG: Parks Supt & PW Div Stga: Parks Maint Supervisor

			Attendees: Campbell – 16 Los Gatos – 7 (Monte Sereno, a strictly residential city, has no Parks/PW Maintenance staff and does not use any pesticides.) Saratoga – 10 100% of attendees who turned in evaluations rated the training as "worth my time to attend", and 22 out of 25 said the training would enable them to change turf management methods to reduce pesticide use. From the training, WVCWP developed a "Turf Management IPM Plan" to be used as a reference for outdoor maintenance staff.	
	SCVURPPP PMP (I.B.3.) PS#5.c	Municipal Staff Education Inform employees who are not authorized and trained to apply pesticides that they cannot use over-the-counter pesticides in or around the workplace.	In July and August of 2005 all WVC staff were reminded, via e-mail, of their municipal IPM policy to avoid using pesticides. It was emphasized that, unless trained and specifically authorized, all employees are prohibited from applying pesticides, including over the counter types.	WVCWP to provide notice and NPDES Reps to send email: Cmpbl: Sr. Civil Engr LG: PW Dir & Eng Div MS: City Manager Stga: PW Analyst
	SCVURPPP PMP (II.A.1.)	Watershed Ed. & Outreach Campaign (WE&O)[1] Attend WEO and IPM work groups and assist with continued implementation of campaign, which targets the general public	WVCWP Program Manager participates in the IPM Ad Hoc Task Group on behalf of the WVC. Project implementation and projects for consideration, which are discussed in the AHTG, are presented to City staff for appropriate follow-through.	WVCWP Staff

		and includes messages about less-toxic pest control and proper disposal. Campaign features South Bay English- and Spanish-language, radio and print ads.	See PI/P Section, "Citizen Participation" & "General Outreach"	
	SCVURPPP PMP (II.A.5.) & (II.A.6)	Community & School Events Identify and attend community/school events; distribute outreach materials regarding less toxic pest control. Community Material Distribution Provide outreach to community through distribution of information via libraries, civic and community centers, and other points of social interest.	Through WVCWP, significant IPM outreach has been incorporated into educational activities and presentations in the local schools. Students have learned about pesticide runoff and the need to use less-toxic pest management strategies. This point is made when they play with the Enviroscape and watch the toxic-colored water (pesticide runoff) flow into the creeks, Bay, wetlands and Ocean where it affects sea otters, fish, wildlife and even people. Grow it guides are provided for students to take home to parents. September 20th 2005, WVCWP staff made a special evening presentation at Saratoga Library's story time for young children when the topic of the week was "water & rivers". Since parents accompanied the children materials for both age groups were given out. **Materials Distribution** For Kids - 29 Our Water Our World picture frame magnets 7 Watershed Watch magnets 31 A Child's Garden coloring books 10 Kids Guide to Backyard Bugs	WVCWP coordinate w/ Cmpbl: Sr. Civil Engr LG: Pub Works staff MS: City Manager Stga: PW Analyst

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2005-2006 ANNUAL REPORT

Pesticide Management Activities Evaluation

PESTICIDE USAGE REDUCTION MEASURES – Pest Specific

CITY OF CAMPBELL

Campbell is implementing IPM in the following situations:

On-going - Yellowjackets:

- Campbell uses traps as the main means of control.
- Parks Maintenance staff tries to clean off picnic tables to prevent attracting wasps and ants.
- If a wasp nest in a tree requires treatment, the PCO uses a non-residual pesticide, and closes the hole in tree so wasps can't return to nest. Parks staff use home insulation spray foam to close the nest/hole; treatment has been successful in preventing return of wasps.
- Staff is evaluating new traps which use pheromone to attract wasps, dry fish to bring them into trap, and soap inside trap, which kills in 5-15 seconds

On-going - Weeds:

- Campbell uses a chipper to create mulch from green waste; this mulch is used for weed control wherever possible.
- Work Furlough labor hand hoes weeds where possible.
- Staff is investigating use of black plastic for 'solar control' of weeds, and determining spots where this would be feasible.
- Staff has been using the tractor with a boom mower for mowing weeds, instead of spraying roadsides and similar areas.

On going - Insects:

- **In 02-03,** Campbell controlled an Ash Whitefly infestation with a natural predator, a minute wasp. Since the wasps were ordered and released, they have continued to suppress the Whitefly population.
- Staff is identifying insects and utilizing IPM when appropriate instead of using insecticides
- Campbell has significantly reduced the spraying of pesticides for infestations of aphid and scale in the Urban forest by employing non-toxic horticultural oils and soaps. Unfortunately, the City has numerous street trees with aphid and scale infestations, and the less-toxic methods, including spraying with ultra-fine oil, have not had a noticeable impact on this pest population. Despite the aphid and scale problem, the City has used NO organophosphate sprays to control the insects and **has implemented a program of injecting the infested trees with a systemic insecticide instead of a spray** (a spray might affect other areas than the targeted site; the systemic chemical stays within the tree). This is in keeping with the City of Campbell IPM Plan. Staff will

continue to investigate less-toxic control methods for aphids and scale insects.

IPM Solutions: City staff have participated in implementation of new County computerized "IPM solutions database input/response", which allows input of a pest problem and a response with IPM solutions. Staff refer to this database as needed.

Building Maintenance: In City buildings, sanitation is being stressed as a means to prevent pest infestations (ants, mice, etc.) so that chemical controls will not be needed.

- The only pesticides used by Campbell's Building Maintenance Dept. and their contractor are an over-the-counter ant insecticide (this is a cyclohexenone derivative, used only as a last resort with certain employees who refuse to work with ants in their work space) and a rat bait (Bromethalin) – also used only as a last resort when traps are unsuccessful.
- Campbell is going to great lengths to avoid using toxic pesticides: In June 2006, the City chose to trap, rather than poison, two skunks that were in Campbell's historic Ainsley Bldg. The City called Animal Control and together they used cat food to draw the skunks to the traps and then forced them into the traps. The skunks sprayed City staff but were safely removed.
- For smaller rodents in buildings, snap traps are used.

RESULTS OF PESTICIDE USE REVIEW FY 05-06:

Campbell has taken a strong stance on pesticide use reduction in recent years, as evidenced by the extensive involvement in IPM training by City staff. The City's PW Superintendent and Parks Supervisor have actively been involved in regional IPM planning meetings and workshops. The Parks Supervisor has been participated in nearly all of the Regional Public Agencies IPM Exchange meetings, including the June 27, 2006 meeting hosted by the Urban Pesticide Pollution Prevention Project (Laura Speare, Project Manager).

The Public Works Superintendent participated in the Tenth Annual Integrated Pest Mgmt Conference at Cal Poly, San Luis Obispo on June 8th and 9th 2006. He attended thirteen hours of training which covered the following: 1) biological control of Insects, 2) weed identification, 3) common diseases of turf, and mechanical control, 4) pest management in landscape, 5) nematodes in ornamental planting, and 6) a palm pest symposium.

FY 2005-2006 ANNUAL REPORT

Field Activities:

Through use of IPM practices Campbell was able to eliminate use of any OP pesticides for the past 4 years, as compared to using 3.7 oz of diazinon for ant control in 01-02. Campbell has decreased it's use of pesticides by using oils and soaps to control aphids and scale in the urban forest.
The City is making an effort to stress prevention (prevent weed growth, prevent pest infestations) where possible. Campbell is moving into use of IPM, mechanical and cultural controls, rather than chemical controls, as much as possible given budget and staff limitations.

Over the past several years, the Public Works Dept. has instituted improved methods of weed control in some parks and roadsides, such as using green waste to make wood chips, used as mulch to prevent weed growth. For the past 2 years, the City has been using its new specialized tractor with boom mower for mowing roadside & park weeds and to avoid spraying.

The City Public Works Dept. has instituted use of more pest resistant trees and shrubs to minimize the need for pesticides; these efforts include removal of certain tree species (such as Tulip and Raywood Ash trees) from the City of Campbell's approved Street Tree List.

IPM Plan
for
"High Use / No Pesticide / Low Budget TURF"

Goals:

- Reduce use of pesticides for weed control through turf management methods which produce healthy turf and discourage weeds.
- Determine weed treatment threshold - the maximum number of weeds that can be tolerated at a site without causing unacceptable damage, hazard, or nuisance.
- Incorporate latest research on less-toxic methods for generating and maintaining healthy turf.
- Train staff annually on newest management practices which encourage healthy turf and discourage weeds
- Develop successful management practices tailored to municipal turf sites, based on site characteristics and horticultural practices applicable to those characteristics (i.e. frequent overseeding for high-traffic areas, amendments to clay soil, etc.)

Tolerance level for weeds:

- Low to zero in public areas

Turf Management facts:

- Turf sites should be tested for chemical and soil characteristics to facilitate optimal decisions on turf management.
- Correct use of soil amendments (compost) along with proper aeration reduces compaction and encourages healthy turf.
- Proper mix of turf types (Kentucky Bluegrass base, rye and fescue overseeding) helps ensure healthy turf in high-traffic areas
- Regular, frequent overseeding is a successful, non-toxic means of reducing weed problems in turf.

Managing Turf to Prevent Weed Problems

MAINTENANCE & MANAGEMENT

Careful management and maintenance are the best means of preventing weed invasions. Many different aspects of turf maintenance can affect weed growth. These include (but are not necessarily limited to) seeding, fertilizing, irrigation, aeration, soil amendments, top-dressing, and mowing. Management, such as choosing the most appropriate grass seed for the turf use, is also very important.

INITIAL STEP: ANALYSIS

If we want to use less pesticides & fertilizers, we need to know more about the biological systems of the turf and weeds/ pests. When we know more about why the weed/ pest is there, we can deal with it better.

Chemical & Physical Analysis

SITE TESTING: It's important to get the site tested. At a minimum, get a **physical analysis** before doing any soil amendment activities. It can even be important to get a breakdown of any sand in the soils: i.e. is it fine sand - which is almost silt, or is it course sand - which has different properties.

A report listing a "sandy loam" could have a sand that's mostly a fine sand. Or what appeared to be silt could also contain clay, which is smaller and has a negative charge.

A **chemical analysis** can help determine if any constituents of an amendment could lead to problem levels of a chemical/mineral, such as phosphorus.

AMENDMENT TESTING: It's also important to get any compost tested – some amendments may contain 20% - 30% clay, which would be detrimental to the site.

⇨ The ratio of Carbon/Nitrogen should be close to, but not more than, 30/1 (i.e. 30 units of Carbon/ 1 unit of Nitrogen).

⇨ The compost needs to have 60-80% organic matter, and should have minimal 'fine particles'.

Use Analysis

Traffic on the turf causes wear, which can result in deteriorating turf and thus presenting an opportunity for weeds to grow.

Wear is abrasion to the grass and compaction of the turf and soil due to the downward pressure of many feet. Compaction will be even worse when there is clay in the soil.

Heavy traffic can also result in a lack of recovery time for the turf; recovery time is needed for the turf to replenish broken stalks and restore turf density.

"WHEN" Does It Get TRAFFIC?

Determine when much of the heavy traffic occurs; i.e. is in the fall due to football and soccer activities? During the fall and winter, turf is slow growing and doesn't regenerate well, which compounds the problem of heavy traffic.

The WV Communities locale has a generally uniform growth pattern due to irrigation – but it still grows more slowly when there is less sunlight (shorter days) and cooler weather. Lots of traffic during the depressed growth periods causes a problem for the turf. This includes intense practice sessions - before an official sports 'season' begins, such as in early Spring, or in Fall, when days are shorter. Timing of your fertilization and seeding is determined by when the traffic falls.

WORK WITH STAKEHOLDERS:

"FIELD ASSESSMENT SPREADSHEETS"

Meeting with users of the fields allows an opportunity to work together to determine thresholds, and helps users to understand the requirements involved in maintaining usable turf.

"Field Assessment Spreadsheets": Use these to meet with sports associations to discuss use of the fields. If the # is greater than 35, you have to re-assess use, consider renovation. A range of 11-20 is pretty good. Engage the people who use the field; work together to make the fields usable within the limitations of the municipal budget and limitations of the turf (soil, climate, etc.). Filling out the sheet together helps users understand what they may have to tolerate, and to work together with municipal staff to set a realistic target.

WHERE is the TRAFFIC?

Where on the fields is help needed most?

For example, the corners of the soccer fields don't get much wear compared to the center. The logical way to save money and labor is to concentrate most of fertilization and other management activities mostly in the center of the field.

Soccer field: center = approx. 40,000 sf

Football field: Between the 20 yd lines, and in between the hash marks = 16,000 sf

A whole field = approx. 80,000 sf. (2 acre field)

These heavily used (center) areas need 3-4x the amount of resources as the corners.

➔ Make 2 applications/year in the corners, 6-8 apps/year in the center

TURF MANAGEMENT

Compaction Management

The 1st line of defense is compaction management. Over-use can cause compaction.

CORING & AERATION:

⇨ The best fields are cored between every month to every 6 weeks. The benefits of coring are short-lived & only last 3-4 weeks, so it must be done frequently.

If it's not possible to core this frequently, it is at least necessary to aerate.

Coring (& aeration) promote:

- nutrient release
- increase in microbial activity
- increase in rooting activity
  - In a sand situation, this will Increase Organic Material coming to surface

During the season when you can't core, use needle tines to get water and air in, in order to improve the environment to allow increased rooting.

Factors in coring:

- Don't core when soil is too wet.
- Need to affect 10-15% of the surface (2-4" spacing of vertical drive machine is better than the 8-10" spacing).
- Use the 8-10" for bringing up soil to create bed for seeding.
- In the center of the field do it every 4-6 weeks, the corners of the field, maybe only once a year, since corners don't have much compaction.

Aeration with "knives"

1 form of aeration is to use an "Aerways" aerator. This uses huge blades, placed on an angle, to cut down through the turf and soil. They cut down 18-20". The Aerways actually shakes the soil. It's good to use it when the soil is dry. By shattering the layers of soil, it doesn't just affect the surface. The shattering will occur more when the soil is dry.

The "Vertidrain" is similar to the Aerway, but the knives are placed at more of an angle. It is recommended to be used a few times a year on high use fields. It has a lever which allows the blades to go down in straight, then kick on the way out; this forces shattering and loosens the whole soil profile.
Outsource: To have a 7 acre site treated with a Vertidrain can cost about $2,000 - $2,500.
When using the Aerways or Vertidrain, the turf is not left with holes in the soil, which can be hard to fill in adequately.

When doing serious amending or seeding, it's necessary to pull out cores so the amendment can replace the cored soil, or so the cored soil can be spread to make a seedbed.

⇨ Once in a while it's important to break up any layer that's being created by using the same length of tines consistently (i.e. use the Vertidrain to shake up the soil profile). One reason that layers need to be broken up is because the layers keep the water from percolating evenly.

Amending / Layering

FOR A CLAY-BASED FIELD:
The first line of defense has to be surface drainage. Water standing on the surface makes the compaction worse. In order to fix a clay soil, it's necessary to create good surface drainage.

Clay subsoils have an infiltration rate of about 0.10 – 0.30" per hour
By composting with the right amount of organic matter, it's possible to increase the infiltration rate by 10 fold, as well as encouraging turf growth with the nitrogen, etc. in the compost.

Creating good surface drainage through coring and amending:
⇨ Mow down to 1"; then core & hollow tine in several different directions; remove the cores, aerate, spread with top dresser 1 time: put it down, brush it in, water it in, then repeat the amendment several days later. It's a weeklong process to do amending. The key is to have a good source of compost.

⇨ One time/year do the amending, and several times per year do the top dressing. After 3-5 years of this, there will be a real improvement in the turf. A good source of compost is needed in order to be able to do this consistently.

However, after 5 - 7 years with compost, you can get phosphorus build-up and runoff, which can affect local drinking water supplies. A solution is to compost for 3-5 years, then stop for a while.

Compost Amendments for establishing turf:
Manure or biosolids compost is the best.
Yard waste is the worst.

Manure is a Biosolid, a combination of Carbon & Nitrogen
The ratio of Carbon/Nitrogen should be less than 30/1 (i.e. 30 units of Carbon/ 1 unit of Nitrogen).

- Microbes/ microorganisms etc. need the carbon to grow and then need the nitrogen. The grass also needs the nitrogen. For example, a 40/1 ratio causes too much growth of microbes and they compete with the grass for the nitrogen (grass will yellow).

- The compost needs to have 60-80% organic matter.
- Need as little 'fine particles' as possible.
- Possible weed problems with manure: have it checked first through testing.

Sand Amendments:
If amending with sand, **don't use pure sand**.
⇨ For each 1" of clay you need 8" of sand. Putting in anything less than that will end up as cement. The bridge differential between the 2 particles causes it to set up as cement.

⇨ The ideal sand size for clay soil is medium to somewhat coarse.
Do test for sodium levels in the sand before purchasing it - with rainfall and irrigation, salts in the sand can leach out. Then, if the sodium level was high, the grass seed won't establish well.

If a salt problem has developed, gypsum can be helpful. However, in general gypsum will not improve the soil – it won't help soil structure.

Putting **sand on top of clay** can improve drainage (create a big crown on the field and cap with 5-6" of sand), BUT a completely different grass-growing environment is needed; this is more appropriate for golf courses than municipal fields. It's not a forgiving environment and it's harder to actually get grass to grow well.

Peat / Sand Amendments:
Peat can be good when it's blended properly with sand, but it's not really cost effective. Peat may be more degraded than compost, whereas a manure compost can reduce the turf's nitrogen demand 30% over 3-5 years.

Mowing

MOWING & DENSITY
⇨ Mow at between 2" & 3". It's important to pick a height and stick with it, i.e. 2" or 3" - not 2" one mowing and 3" the next. Get the mower on a smooth paved area, and measure the blade height with a ruler.

➔ ***Fertilizer Vs. Mowing Frequency***
Increasing the mowing from 1x to 2x per week increases the wear tolerance about 50%. The reason is that increased mowing results in increased density of turf roots.

Fertilizer

FERTILIZER TIMING

⇨ 0.5 - 0.75 lbs of Nitrogen per month, every month can be applied in our area due to the fairly uniform growing season. Cooler weather in conjunction with longer days promotes good root growth. This would be early Spring and late Fall (Feb.-March & Oct.-Nov.).

FERTILIZER CHARACTERISTICS

⇨ A pH between 5 & 8 is okay; the ideal range is between 6 & 7. Elemental sulfur can be used to bring idown the pH, and lime can be used to bring it up.

Slow-release vs. Urea (Ammonium sources of nitrogen):

A comparison was done for Urea vs. Polyon. Polyon is a sustained release fertilizer – one application disperses over the whole season/24 weeks. Polyon saves money on labor for application vs. urea (1 application/season for Polyon = 5 applications/season of urea). Polyon cost 3x as much as urea.

⇨ The study showed that the cost equaled out when applied to @ 30,000 sq ft or more (@$15/hr labor.

➔ Combine a slow release fertilizer, spread over the entire field, with frequent applications of a cheaper regular fertilizer over the high traffic areas.

This system will also mean that the whole field doesn't have to be closed for fertilizing; teams can practice on the areas where sustained-release was applied, when an additional application is being made to the high-traffic areas.

Fertilizer vs. Corn Gluten Meal

For Corn Gluten Meal, the anecdotal evidence says it works well as pre-emergent in ornamentals. Evidence also shows it works well in turf - however, basic fertilizer (ammonium sulfate) does the same thing.

For 10-0-0 fertilizer with some pre-emergent herbicide effects vs. Corn Gluten Meal, the fertilizer has the same results in controlling crabgrass. Since CGM costs 10x as much as regular lawn fertilizer it doesn't appear to be cost-effective.

Seeding/ Overseeding

EFFECTIVENESS OF SEEDING FOR WEED CONTROL

Use of regular, frequent overseeding will make a big difference in maintaining turf density which will help keep weeds out, and will promote a quality turf without pesticides. Overseeding is an effective weed control measure for high-use / low-input fields that need a low cost solution to keep the turf in shape.

If a field starts out with dense turf, it has been shown that putting on any seed on a weekly basis will maintain turf density despite heavy traffic. Studies showed that plots overseeded did much better than those not seeded. In plots not overseeded during heavy use periods, turf density went down to 20%. A year after ending the study, the overseeded area still kept out the crabgrass.

IMPLEMENTATION OF OVERSEEDING

⇨ Anytime seed is being put down, make a phosphorus application.
⇨ The critical point for successful overseeding is regular, appropriate frequency, rather than the amount of seed applied.

Recommended seeds
⇨ ***Coventry Kentucky Blue Grass*** provides a good base turf. Many of the highest quality sports fields have Kentucky Blue Grass base, which is seeded throughout the season, (then overseeded with perennial ryegrass). The Bluegrass rhizomes are necessary to knit the field together. However, it's not effective to overseed frequently with KBG because it takes too long to germinate and establish.

⇨ Ryegrass and Tall Fescue varieties are effective for overseeding:
"Citation" perennial ryegrass
"Jaguar" tall fescue

Frequency/ amount of seeding
During a dry year, 8-10 lbs/1000 sf of overseeding weekly may be necessary in order to get a good density.
⇨ Irrigated fields: During a good year, or with irrigation, only 2 lbs of seed/1000 sf were needed for weekly overseeding to be effective.

⇨ In a study, the turf was drop-seeded weekly. The plots were mowed at a 3" height. They were fertilized in June and September.

FIELD STRUCTURE

Field structure can be used to help facilitate healthy turf growth, for example structural changes which promote good drainage. Bring a drain pipe to the surface in a low spot, have the pipe go to a pipeline so it will drain away standing water in the low spots.

Standing water tends to be a problem where irrigation lines are all hooked up in 1 straight line (1 sprinkler line runs the whole length of the field), so that low & high spots are getting the same amount of water. This may result in enough irrigation for high spots, but with too much for the low spots.

One solution is to "Zone" the irrigation system. It's also better to have it the turf bit on the drier side than too wet. Drier turf is better for preventing disease and promoting rooting.

For soccer fields, changing the structure of the goal mouth area can improve turf growth. The goal mouth gets the most wear, so crown it (about a 2" crown) to promote drainage and help address the wear. Start from outside the goal box to create a crown across the front area.

Crumb rubber can be used as a top dressing on field sidelines, off the playable surface. This protects the growing point and extends the growth period (due to black rubber holding in heat during cold weather).

BUDGETING

If turf is well managed, and use of pesticides can be decreased, then most of the former Pesticides Budget can be spent on labor and seed.

ANNUAL EVALUATION OF EFFECTIVENESS:

Evaluation of effectiveness of turf management for weed control is primarily conducted by visual and site inspections, and customer complaints.

MERCURY POLLUTION PREVENTION ACTIVITES

FY 2005-2006 Work Plan Self Evaluation Matrix

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
	Mercury Plan (I.D.)	Mercury Policy Continue Implementation of mercury policy requiring the virtual elimination of mercury from controllable sources in urban runoff from agency operations.	Campbell adopted its mercury policy in FY 03-04 and continues to implement the policy. Campbell has continued its Battery Recycling Program handled by Building Maintenance Dept. Collection buckets are available in all departments. The City collects all dry cell and wet cell batteries as a service to employees.	Sr. Civil Engineer/Public Works Supt/ Bldg Maint. Supvr
	Mercury Plan (I.E.)	Guidelines Continue implementing the guidelines for the phase-out of mercury-containing products (MCPs). Phase-out will coincide with replacement of MCPs on an as needed basis.	Reduction of mercury-containing products is being implemented. Research on alternatives to mercury-containing products has been conducted and implemented wherever possible.	Sr. Civil Engineer/Public Works Supt/ Bldg Maint. Supvr
	Mercury Plan (II.C.)	Disposal of Mercury Containing Products Track recycling, replacement, and reduction in use of mercury-containing products. If feasible, document quantities of fluorescent lamps from City buildings and departments, which are disposed of at Hazardous Waste Collection facilities in FY 05-06[1].	The City's used fluorescent bulbs were accumulated from Nov. 2004 – March 2006. The following numbers of bulbs were collected and disposed of by the City's HHW contractor. (AERC Recycling Solutions of Hayward, CA). 133- U Shape and compact, 589- 4 foot, 17- 8 foot All mercury-containing items are removed via hazardous waste disposal contractor. City employees put used batteries in recycle bins located throughout city departments for removal by hazardous waste disposal.	Sr. Civil Engineer/Public Works Supt/ Bldg Maint. Supvr WVCWP to report

[1] Tasks for documenting and reporting quantities of mercury-containing products disposed of by city will take into consideration whether it is possible to keep detailed records of each mercury-containing product (fluorescent lamp) disposed of by municipality.

CAMPBELL

	Mercury Plan (V.A.)	Fluorescent Light Recycling Program Continue Implementation of an outreach program to educate small businesses and conditionally exempt small quantity generators about recycling fluorescent lights. Coordinate educational outreach with fluorescent light recycling events sponsored by HHW.	*Fluorescent Light bulb Recycling Flyer* WVCWP updated its flyer created last year, listing local drop-off points (5 hardware stores) which are part of the fluorescent bulb drop-off program. Hours and location of stores are listed, along with HHW contact info. The flyer reminds readers that **it's illegal to put fluorescent bulbs in the trash or in regular recycling bins**. The flyer was distributed at all West Valley community events.	SCVURPPP & WVCWP to co-ord w/ HHW staff
		Develop, advertise & conduct West Valley E-Waste Recycling Event **Additional Task – Not in Workplan**	*January 28, 2006 **Free** Hazardous Waste Recycling Event* - for recycling TVs, monitors and laptops. Event was sponsored by the four West Valley Cities through West Valley Clean Water Program. It was held at Los Gatos Public Works parking lot. Los Gatos & Saratoga and WVCWP (for Campbell & Monte Sereno) staffed the event. West Valley businesses, residents and schools were invited to participate. **WVCWP staff hired and worked with Carl & Manor Ad Agency to create flyers, posters, a press release, and a newspaper ad** to raise awareness in the West Valley communities about E-waste and about the Clean Water Program in general. Ads, articles and flyers relayed the message that E-waste can leach toxic metals (i.e., mercury) into our water, and that by using a responsible recycler we people can help prevent export of our waste to foreign dumps where mercury leaches into the environment. (See above row for details on outreach materials). Over 250 cars brought E-waste for recycling. Posters placed around the site highlighted the environmental affects	

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			of improper E-waste disposal. One high school coordinated with WVCWP prior to the event, and dropped off pallets of E-waste on the previous day. Quantities collected for responsible recycling are listed in the Evaluation below:	

Mercury Pollution Prevention Activities Evaluation

West Valley Communities Developed, Advertised, Sponsored and Staffed the West Valley E-Waste Recycling Event

Much discussion and research went into trying to develop an action that would make a difference in the amount of mercury containing waste going to landfill or being disposed of illegally. The issue of illegal dumping was exemplified by the television that was found dumped in a Los Gatos Creek during the winter season. While the dumping was not necessarily done by a West Valley resident, it served as a good example of the fact that illegal dumping is a problem. This incident was featured in the West Valley Clean Water press release which was written as part of the advertising for the community event. Two local newspapers ran the article and placed it next to the ad that WVCWP Communities ran in each of the local community papers. Residents responded enthusiastically and brought the ad from the paper as if it would be needed to participate in the free event. Many more people noticed the ad than attended the event. WVCWP and West Valley municipal staff interviewed participants as they waited in their cars to make the drop off. Often staff were told that residents were bringing in E-waste belonging to one or more of their neighbors, in addition to their own items. The event was one of WVCWP 's most successful attempts to encourage the community to take action and bring to light the goals of the West Valley Clean Water Program.

Residents & Businesses Joined In

WVCWP made the decision to spend a significant part of WVCWP budget on hiring the Public Relations agency (Carl & Manor) for the Watershed Watch campaign to design a news ad and submit a press release to local papers. (See *PI/P Section - A SCV Program Projects/Support* for details on additional outreach for the event). Even more exciting was that two local businesses, Le Boulanger and Pizza-My Heart supported the community in these efforts by donating breakfast and lunch for all volunteer staff. In a four hour period, over 250 vehicles came to drop off E-waste. The residents were delighted with the event and the most popular question was, “When will you do this again?” At that point WVCWP and municipal staff determined that the WVC would work hard to sponsor another E-waste drop off event in FY06-07. The **Los Gatos Weekly** and **Saratoga News** also printed a short editorial letter from the WVCWP Mgr thanking the residents for their enthusiastic participation, noting that a total of 33,657 pounds of E-waste was collected, and thanking the businesses for their donations and support.

COPPER ACTION PLAN/NICKEL ACTION PLAN

FY 2005-2006 Work Plan Self Evaluation Matrix

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Vehicle Washing Operations	CB-1	Continue to distribute outreach materials on proper vehicle/equipment washing at Municipal counters/Post Offices/Libraries and public events, and post on WVCWP website.	The WVCWP "Car Wash Kit" flyer is now available on the WVCWP website as a PDF. The site's Home page now has a car washing graphic and text which links to the PDF. The PDF can be downloaded and printed by visitors to the site. The "Bay Begins Here" brochure, which contains information on car washing, was distributed at various events. (see PI/P section *B. WVCWP Joint Projects – a. distribute materials*) A car wash was held on Sat. Oct. 1 – materials related to car washing & copper were handed out: --"Washing Cars and Other Vehicles", --"Cars Pollute Water Too!" --"Residential Car Washing" cards.	WVWCP staff
Vehicle Washing Operations	CB-1	Discuss copper impacts; teach proper methods of Car Washing and Pool & Spa drainage through use of Enviroscape watershed model in classroom presentations.	See PI/P section *B. WVCWP Joint Projects -* *b. Participate in Community Events* *j. Provide Watershed Education in classrooms*	WVWCP staff
Vehicle Washing Operations	CB-1	Provide Car Wash Kit & education to charity car wash organizers. Solicit feedback from participants.	A car wash was held on Sat. Oct. 1, 2005 at a Union 76 gas station, located east of Los Gatos on Blossom Hill Rd., S.J. Approximately 75 vehicles were washed. WVCWP Stormwater Discharge Inspector arrived at 7:00	WVWCP staff

WEST VALLEY COMMUNITIES

FY 2005-2006 ANNUAL COPPER (and NICKEL) ACTION PLAN REPORT

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			am, and was there until almost 10:00 am, teaching participants to set up the car wash kit to protect runoff from entering the street or storm drain. The event went on until after 3:00 pm. WVCWP used about 400 ft. of hose and 300 ft. of extension cord. The car wash kit worked extremely well, but it was difficult to set up. Photos were taken which can be used for future classroom presentations. Approximately 35 volunteers participated and saw the Car Wash Kit in use. The Car Wash was sponsored by employees of Advanced Medical Center. Materials handed out: --"Washing Cars and Other Vehicles", --"Cars Pollute Water Too!" --"Residential Car Washing" cards.	
Vehicle Washing Operations	CB-1	Put Car Wash Kit information and proper car washing instructions on WVCWP web site.	The WVCWP website Home page was modified to include a car washing graphic and text. These graphics are links to a PDF of the WVCWP Car Wash Kit flyer which requests car wash event organizers to contact WVCWP. The flyer also includes information on harmful effects of copper: http://www.cleancreeks.org/images_new/carwashweb.pdf	WVWCP staff
Vehicle Washing Operations	CB-1	Within the Planning permit process, require source control measures at facilities that will conduct vehicle/ equipment washing and maintenance activities (consistent with Permit Provision C.3.k).	The WVC did not have any Group 1 projects that would conduct vehicle/equipment washing and maintenance activities.	Planning Dir/ Sr. Planner

WEST VALLEY COMMUNITIES

FY 2005-2006 ANNUAL COPPER (and NICKEL) ACTION PLAN REPORT

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Vehicle Washing	CB-1	Promote improved car washing methods at auto businesses during inspections. Provide info on alternative arrangements for auto businesses with possible compliance problems.	The Stormwater Discharge Inspector distributes several vehicle washing pieces during pro-active inspections and in relation to any actual or suspected IC/ID incident. This means of outreach is very effective and the Inspector is able to answer questions and offer suggestions. One piece used is the WVCWP-created fact sheet, which provides information on wastewater capture systems for automotive facilities. The fact sheet was designed to provide small-scale automotive facilities (those that find installing a full-fledged wash rack cost-prohibitive) with examples of inexpensive treatment technologies and distributor information.	WVWCP ICID Inspector
Vehicle Washing Operations	CB-1	Maintain recommended source controls for vehicle washing at City corporation yard.	Municipal staff continues to follow the suggested practices and to ensure that the Corp Yard systems function correctly.	Pub Works Staff
Vehicle Washing Operations	CB-1	City staff will attend "Mobile Cleaning Workshop" or view training video to review Best Management Practices.	**Campbell:** On April 13, 2006, twenty nine (29) Campbell staff reviewed SWPPP procedures and received training on best management practices (BMPs). Staff viewed the pressure washing video "We Do the Job Right" for mobile pressure washing. John Iaquinto, Public Works Superintendent led the training.	WVWCP ICID Inspector / Pub Works Supt
Industrial Copper Control	CB-3	Continue Industrial Inspection program with Fire Dept., including NOI sites and other industrial sites such as plating and metal finishing facilities, vehicle service facilities, and other permitted sites.	The City has an agreement with the SCC Fire District to conduct urban runoff inspections for machine shops and metal manufacturing facilities. This year efforts were directed at re-negotiating municipal contracts with the SCC Fire District, which was due to expire at the end of FY 05-06. Many meetings were held to ensure that future contracted inspections would provide the	SCVC Fire Dept./ WV ICID Inspector

WEST VALLEY COMMUNITIES

			type of inspections, and related data, necessary for the Stormwater programs. See *IND Section* for inspection details.	
Reducing Traffic Congestion Promoting Alternative Transporta-tion	CB-6/7	Within the Planning permit process encourage and promote best practicable transportation-related design practices and alternative modes of transportation.	The WVC encourage best design practices wherever practicable. These small communities tend not to have large developments conducive to requiring alternative transportation within the permitting process. However, the WVC encourage alternative transportation through other means: Campbell now has 3 stations for Light Rail service linking the City to stops throughout Santa Clara Valley. Service started this FY in August 2005. The City Redevelopment Agency was actively involved in this project. Los Gatos has a project that provided bike racks throughout the commercial campus and bike lockers and shower facilities for employees who will ride their bikes to work at the Netflix HQ bldg (HQ bldg houses approx. 200 employees). The City of Saratoga has been investigating development of a 'rails to trails' project along a Southern Pacific Railroad corridor. The City has held public hearings on the proposal but a resolution has not been reached. The City website encourages biking through its "Bikeways" map, showing where striped bike lanes exist, and classifying bike routes according to safety.	Planning Dir. / Sr. Planner
Reducing Traffic Congestion	CB-6/7	Continue to incorporate and support "Best Practices for Integrating Transportation and Land Use" as documented in the VTA's 2003 Community Design &	These elements remain in the WVCs' General Plans and serve as guiding principles for their Land Use and Transportation development.	Traffic Engineer

WEST VALLEY COMMUNITIES

		Transportation Manual.		
Watershed assessment and protection	CB-8	Implement agreed-upon guidelines & standards developed by the Water Resources Protection Collaborative for watershed protection.	Campbell, Los Gatos and Saratoga have participated in, and invested significant staff time in, the Water Resources Protection Collaborative. All of the West Valley cities have reviewed the "Guidelines and Standards for Land Use Near Streams" and plan to use them in their permitting process.	Planning Dir
Street sweeping & stormdrain O&M	CB-11	See Street Sweeping section (3.B) of this work plan for tasks on data collection and evaluation.		
Street sweeping & stormdrain O&M	CB-11	Implement (as appropriate) identified improvements to current street sweeping and storm drain system O&M programs (within available budgets). Meet with WVSD for stormdrain O&M evaluation.	See Street Sweeping in Public Agency Activities section of this report.	Pub Works Supt. with WVCWP guidance
Outreach on pool, spa maintenance	CB-12	Continue to distribute pool & spa maintenance brochure via agency department counters and public places. As time permits, update WVCWP website with current Pool & Spa maintenance information.	WVC ordered an additional 500 Pool brochures for distribution at Planning & Bldg Dept counters. Municipal staff will provide the brochure to new pool and spa owners. The brochure is also distributed at community events. (see PI/P section *B. WVCWP Joint Projects – a. distribute materials*)	WVCWP with Municipal Staff
Outreach on pool, spa maintenance	CB-12	Continue to distribute pool & spa brochures as part of ICID WVC inspections.	The Inspector provides pool and spa brochures to residents and pool and spa companies as part of his IC/ID Inspection Program.	WV Inspector

WEST VALLEY COMMUNITIES

FY 2005-2006 ANNUAL COPPER (and NICKEL) ACTION PLAN REPORT

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Use of architectural copper	CB-21	Within the Planning permit process, discourage use of copper roofing and gutters.	All WVC discourage copper architecture, with the exception of Los Gatos.	Planning Dir/ Sr. Planner
Nickel Action Plan Tasks				
Control nickel discharge from construction sites	NB-1	Sediment Control: Continue to implement Construction Inspection Performance Standards (see Construction Inspection work plan section).	See Construction section of this report.	Bldg Official/ WVC-ICID Inspector
Control nickel discharge from construction sites	NB-1	Training: Continue to have inspectors attend Regional Board/Program workshops on construction site management and learn latest erosion/sediment control techniques	Campbell hosted the Construction Site and Erosion Control workshop at the Campbell Community Center on Dec 8th & 9th 2005. The WVCWP Mgr, WVCWP Inspector attended for the West Valley communities, and spoke at the workshop about the need for field staff to report any observed sediment discharges to the WVCWP for follow-up.	Bldg Official/ WVC- ICID Inspector

Copper/Nickel Action Plan Evaluation

Car Wash Outreach Evaluation:

Car Washing has been highlighted on the WVCWP home page, the Car Wash Kit flyer was also sent as a PDF to Fire Dept inspectors at their request. The Fire Dept inspects the West Valley industrial and Commercial facilities, and reports incidents in residential areas if they happen to see any violations while out in the field. WVCWP would like to have an all-inclusive, educational copper brochure, which would include car washing, architectural copper and pool draining in one piece. However, the WVCWP has not had the staff or resources to create something like this that would be appropriate for distribution and mailing to residents.

Pool and Spa Brochures:

Each of the West Valley communities (except Monte Sereno) ran out of Pool and Spa brochures and ordered 150 to 200 more to give out at the planning counter and to all new pool and spa owners. WVCWP Pool brochures were sent out to all pool and spa owners during the previous year.

Educational Outreach Evaluation:

The WVCWP will continue to provide outreach on car washing, vehicle maintenance, alternative transportation, and pool maintenance during in-class

WEST VALLEY COMMUNITIES

FY 2005-2006 ANNUAL COPPER (and NICKEL) ACTION PLAN REPORT

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
presentations and outreach at community events. WVCWP incorporated messages about activities that can prevent copper runoff as part of the new Kindergarten and 4th grade Enviroscape curriculum, and as part of its Enviroscape presentations at community events. These presentations have been successful in raising interest in the proper car-washing and pool & spa maintenance. Staff has found that children seem especially receptive to the information about copper and car washing when they participate in the Enviroscape activity. **Street Sweeping:** The WVC continued their street sweeping programs and tracked and reported annual street sweeping data to the Program. The City of Saratoga highlighted street sweeping with a postcard which was sent to all city households. The sweeping company created a color postcard announcing its new contract with the City. The card stressed the importance of street sweeping, provided a map of routes with schedules and asked that cars be moved before 6am on the day of street sweeping. Street sweeping has become very important to residents. If the streets are not swept on schedule City or Town staff receive phone calls to register complaints. The Town of Los Gatos had a resident call on the Fourth of July because it was the regularly scheduled day to sweep but the sweeper did not show up.

TRASH INVENTORY & MANAGEMENT

FY 2005-2006 Work Plan Self Evaluation Matrix

Source	WPActivity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Trash Work Plan	Strategy	Assist Program staff, by participation in Trash Ad Hoc Task Group, in developing a long-term strategy for trash conditions in urban streams and waterways.	The West Valley Clean Water Program Mgr attended the Trash AHTG meetings and provided comments from West Valley Cities. Accomplishments this year included fine tuning electronic reporting forms for KAB drive by monitoring of existing problem areas; revised Urban Rapid Trash Assessment procedures and tally form for categorizing data and determining trends and future management actions.	WVCWP Mgr to attend AHTG and discuss with municipal Reps at WVCWP monthly meetings
Trash Work Plan	Identify and Prioritize Problem Areas	Identify and prioritize management of potential sources that may contribute to trash problem areas in a subset of urban streams and waterways	During FY05-06 all West Valley trash problem areas were monitored (see Trash Problem Area Evaluation Results table attached). Management actions were implemented and evaluated to see what more could be done at specific problem sites. Saratoga's code enforcement officer visited businesses which back up to Saratoga Creek to discuss an illegal dumping problem. WVCWP organized a student-parent participation cleanup event at the Saratoga Creek problem site. WVCWP Mgr contacted Caltrans Assistant Stormwater Coordinator (District Four) about working together to resolve a trash problem at Hwy 17 and Hamilton off ramp, where a new light rail station may have contributed to an increase in pedestrian littering. WVCWP took photos documenting the litter. Caltrans agreed to send a crew out to clean up the site. WVCWP and Caltrans will continue to consider ways to reduce trash at this site.	Sr. Civil Engineer/ Public Works Supt, WVCWP staff to assist

Source	WPActivity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			WVCWP presentations provided to students as part of the Enviroscape Activity feature a trash topic. WVCWP conducted three volunteer cleanup/trash monitoring events in partnership with local schools. Each event is opened with a brief talk on the trash problem facing our creeks and Bay. Volunteers seem to be energized by the chance to make a difference. Two schools conducted trash cleanup events after their classroom presentations.	
Trash Work Plan	Evaluations	Conduct trash evaluations using the RWQCB Rapid Trash Assessment protocol (Version 7.0) and/or the KAB Litter index, in local trash problem areas. Continually revise identified trash problem area list as litter conditions change.	WVCWP staff conducted *Keep America Beautiful (KAB)* assessments at all identified problem areas in the West Valley Communities, for a total of 57 assessments. For details see the Trash Problem Area Activity Reports following this table. Campbell monitored 13 sites, conducting 20 KAB assessments and 3 RTA assessments. Los Gatos monitored 8 sites, conducting 11 KAB assessments. Monte Sereno monitored 5 sites, conducting 15 KAB assessments Saratoga monitored 4 sites, conducting 7 KAB assessments and 1 RTA assessment. One of the sites Saratoga listed as SA04 was actually in San Jose. Site SA04 will be replaced by another site in Saratoga, to be determined by monitoring results in FY06-07.	Campbell Stormwater Rep (Sr. Civil Engineer) and Public Works Supt. WVCWP to assist
Trash Work Plan	Management Practices	Continue identifying and implementing trash control measures, as appropriate, to address trash problem areas.	All West Valley sites were monitored this year. Several new sites were added to the list to be monitored (a couple to be cleaned) in FY06-07, based on documented accumulation of trash in new areas. Some problem areas are in Caltrans jurisdiction. In June 2006, the WVCWP Mgr called Caltrans about cleaning up Freeway on and off ramps in Campbell (Fwy17 & Hamilton).	Sr. Civil Engineer/ Public Works Supt. WVCWP to assist

Campbell ♦ Los Gatos ♦ Monte Sereno ♦ Saratoga

FY 2005-2006 ANNUAL REPORT

Source	WPActivity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Trash Work Plan	Report on Trash Mgmt Practices Implemented	Provide Program staff with City specific information on trash management practices implemented, using standardized reporting format.	Transferred the West Valley citizen participation monitoring data into RTA format for Program's annual report. The WVCWP conducted three trash monitoring events with student and citizen volunteers. The City of Campbell conducted one event on 4/8/06 using the WVCWP tally forms (summary sheets are included in this report for each monitored site). Volunteers were taught how to record and document trash types and quantities.	Sr. Civil Engineer/ Public Works Supt, with WVCWP to coordinate
Citizen Participation	Monitoring/Citizen Participation	Continue to promote citizen participation program to monitor trash in local creeks (element of Creek Keeper's Program).	**WVCWP** and the West Valley communities organized five large clean up events. "Clean A Creek" flyers (announcing the Westmont High cleanup) were distributed to 13 schools in Campbell Union School District for the Sept. 17, 05 event. Fifty (50) volunteers participated – see attached tally sheet for trash collected. **WVCWP** sent a notice to Westmont High for the PTA / daily e-mail bulletin to notify students at Westmont High School of the Clean Up on 5/20/06. Fifty (50) volunteers attended the spring event as well. **Saratoga** and WVCWP staff organized a student-parent participation cleanup event on April 1, 2006 at Saratoga Creek behind restaurants on Big Basin Way. Thirty eight (38) volunteers and staff picked up 38 bags of trash (weighed trash & recyclables totaled about 100 lbs.) Large items discovered included a file cabinet and a water heater which could not be removed by staff or volunteers. Water District (SCVWD) staff met with WVCWP staff and agreed to partner with the City on pick up of the larger items. The steep banks of the creek make retrieval of the items both unsafe and costly. Saratoga Code enforcement alerted businesses to the dumping problem and Saratoga Police started surveillance of the area. **Los Gatos & Monte Sereno** sponsored a successful *Stash the Trash* event on Saturday 10/15/05. Over 350 volunteers monitored and cleaned up trash. About 35 support staff	WVCWP Staff to coordinate

Source	WPActivity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			setup the event and provided breakfast to volunteers. Staff also joined the volunteers in picking up trash. Volunteers started at 9am with many finishing up as late as 2pm. A total of 396 bags (not all full) of trash were picked up. Trash included a bike and a shopping cart (which one team returned to Trader Joe's). Paul Michael at Waste Management garbage collection service provided a large dumpster for the trash. **City of Campbell** held a spring public cleanup event on April 8, 2006, which brought in 145 volunteers for three hours of trash monitoring and cleanup. Volunteers picked up trash from sides of streets, along the railroad tracks, near the creek trails, and from some off-path areas, etc. Approximately 600 lbs of trash and recyclables were collected.	
Citizen Participation	E-Waste Event	Continue to promote citizen participation.	WVCWP and municipal staff co-sponsored an E-waste collection event with Thomas Hogye, Vice President and General Mgr of United Datatech (UDT). UDT guaranteed that the E-waste would be recycled safely and would not be sent to foreign shores. The Town of Los Gatos provided a municipal parking lot as a collection site and municipal staff from two of the West Valley Cities worked the event. Before the event, local Los Gatos and Saratoga community newspapers printed a story about a TV set that was found in Los Gatos creek. A WVCWP ad for the event and the upcoming event. As a way of supporting a clean, healthy environment, two local businesses (Pizza My Heart & Le Boulanger) donated free breakfast and lunch for volunteers who worked the event. A total of 33,657 pounds of E-waste (consisting mostly of televisions and monitors) was collected	WVCWP and Municipal staff

Trash Inventory & Management Evaluation

Dumpster Area Inspections & Education for Local Businesses

The WVCWP Inspector checks the dumpster areas of most of the downtown restaurants in each of the West Valley communities for signs of illegal dumping or debris around open dumpster lids. He provides urban runoff education and IPM (pest management materials) as needed. His method of informal visits and issuing *notices to comply* has helped to reduce the amount of trash-related dumpster violations over the past three years.

Educational Outreach to Students and Teachers in Local Schools

WVCWP staff responded to every opportunity to talk about trash with students in FY05-06. The trash topic is always included in the classroom Enviroscape presentations. This year a Saratoga fourth grade class and their parents partnered with WVCWP to hold a cleanup the week after their classroom Enviroscape presentation; and in June, after a classroom presentation, a Los Gatos Kindergarten took a tour around the school to look for trash and pick up the litter they found. Teachers from both schools have said that they would like the same presentation for their classes next year.

Creek Keeper Events – Volunteer Participation - Trash Identification, Tallying & Pick-up

The WVCWP has been particularly successful (from 2003 to 2006) in recruiting student volunteers for creek cleanups and the task of conducting trash assessments. The WVCWP's method of trash assessment is similar to the RTA method except that it was designed to include trash types that are most often found in West Valley locations and to be simple enough for young students to use. This year data was collected at West Valley events and later transferred to the Program's Rapid Trash Assessment forms so that the monitoring completed by volunteers could be evaluated with other Program data. During FY06-07 WVCWP staff will revise the WVCWP tally forms so that all trash data collected by West Valley volunteers (Creek Keepers) can be submitted to the Program as RTA trash assessments.

General Evaluation

WVCWP staff has noticed that volunteers and on-lookers at local trash tracking and cleanup events show appreciation, enthusiasm and interest. Many people respond positively to getting rid of trash, and are surprised to find out that trash is a problem that may need to be addressed with permits and requirements. As clean up events recur every year and students and other residents volunteer, trash tracking and trash collection is likely to grow in popularity. According to social marketing techniques, to effect behavior change it is more productive to start by targeting the "green" audience for educational outreach and support. "Green" refers to the population that is willing and ready to support the idea and may already be taking some of the desired steps. The "green" audience will grow in numbers as the marketed idea becomes acceptable to a wider population. As acceptance prevails, the "brown" audience (those who are resistant to accepting the change) will be swept into some positive behavior changes by peer pressure. WVCWP is targeting two green audiences for awareness. Most of the volunteers that attend clean ups are part of the "green" population. Besides reaching out to volunteers, WVCWP aims to reach students and make water pollution prevention concepts fun. The students are also a "green" audience because they easily receive and remember what they hear and see and often take the message home or share it with friends. WVCWP cleanup events and classroom presentations have been very successful in helping to change local students' and residents' perspective on trash. In FY06-07 these events will be conducted as often as West Valley budget and staff time will allow.

NEWS

Families clean up the creek

The Saratoga Creek Clean-up Project, sponsored by the city of Saratoga and the West Valley Clean Water Program, is an effort to get children and their parents more involved in the community and the environment. Families with young children are invited to pick up litter from the banks of the Saratoga Creek on April 1 from 10 a.m. to noon. Supplies and snacks will be provided.

Participants will clean up the creek behind downtown businesses between Fourth Street and Highway 9.

A maximum of 30 children can participate, so parents should call to reserve a space.

To participate in the event or for more information, email Sue Persico at persico16@comcast.net, or call 408.867.7323.

PUBLIC WORKS DEPARTMENT
Environmental Division

September 1, 2006

Mr. Bruce Wolfe, Executive Officer
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: City of Cupertino Urban Runoff Management Program
FY 2005-2006 Annual Report

Dear Mr. Wolfe:

This report is submitted by the City of Cupertino, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a.of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2005-2006 in accordance with the City of Cupertino's Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 1997 and updated in October 2000 and September 2004, and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 05-06 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

- A: - Certification Statement
- A1: - Performance Standard Certification Form
- B: - ICID Elimination
- C: - Industrial/Commercial Discharger Control Program
- D: - Public Agency
  - D - 1: Public Streets, Roads & Highways O & M and Rural Roads
  - D - 2: Storm Drain Operation and Maintenance
  - D-3: Corporation Yards Operation and Maintenance
- E: Water Quality Monitoring
- F: Permit Reapplication Process
- G: Trash Inventory and Management

- H: Public Information & Participation
- I: New Development Planning Procedures
- J: Construction Inspection
- K: Pesticide Management
- L: Mercury Pollution Prevention
- M: Copper and Nickel Action Plan
- N: Staff Training Summary Table
- Appendix: Acronyms

There were no comments for Cupertino on the FY 04-05 Annual Report by the Regional Board Staff (letter dated July 26, 2005) that required a response.

Program Highlights and Accomplishments

New Development and Construction Controls (Planning Procedures Performance Standard):

On September 20, 2005, the Cupertino City Council approved revisions to the City's "Stormwater Pollution Prevention and Watershed Protection" ordinance. The revisions became effective October 19, 2005 and are related to Group 2B projects and HMP requirements.

On November 15, 2005, the Cupertino City Council adopted the 2000-2020 General Plan. The revised Plan has augmented sections related to watershed protection and urban runoff quality protection. Polices and strategies related to development projects have been strengthened and new ones added, such as requirements for water course protection; minimizing grading; and storm water quality mitigation measures, specifically reducing impervious surfaces and using pesticide control measures.

No Group 1 or 2A projects were approved during the past fiscal year, however source control and site design best management practices were incorporated into smaller projects.

Mercury:

The Countywide Household Hazardous Waste Program has set up 18 retail stores to serve as fluorescent lamp drop-off centers. This last year the County collected five times the number of feet in bulbs over the previous fiscal year. The City of Cupertino has increased outreach efforts regarding the proper disposal of fluorescent lamps through a new flyer and the City's newsletter, particularly since new regulations regarding universal waste effective February 8, 2006 no longer allow the disposal of these lamps in the trash.

Website:

During FY 05-06, the City modified its web site as part of implementing Group 2A project and HMP requirements. In addition, the Building Division portion of the City's web site now

contains a link to the Pubic Works Department's Storm Water Quality Regulations for Developers and Contractors guidance.

Integrated Pest Management:

In July of 2005, the Rancho Rinconada neighborhood of Cupertino was infested with whiteflies on Modesto Ash trees. The City had many requests for immediate eradication of the pests by spraying. The City chose to use biological controls by releasing parasite wasps and ladybugs into the neighborhood. Staff also advised the residents to avoid washing the sooty-appearing substance secreted by the whiteflies into the storm drain, but to attempt to contain it on their property. There were many phone calls and complaints from residents wanting immediate relief, but the City educated the residents on the most beneficial way of eradicating the whiteflies.

Thank you for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact me at (408) 777-3242.

IC/ID Elimination Activities

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report: General Tasks
Cupertino

P.S. Id.	*Activity*	*FY05-06 Tasks*	*Status / Comments*	*Due Date*	*Responsible Party*
Illicit Connection & Illegal Dumping Elimination Activities					
ICID PS-2	Staff training	Hold annual training for urban runoff inspector and on-call staff.	The NPS Prgm Mgr met with the city's NPS inspector on 3/7/06 for a formal review, as well as meeting on several other occasions, informally. On-call staffs were trained as part of the overall corp yard training held 3/2/06.	3/ 06	Public Works Dept.
ICID PS-4	Field Investigations	NPS inspector annually walks the creeks, watching for evidence of any illegal dumping or illicit connections.	Throughout the Spring, the nonpoint source inspector walked the creeks in Cupertino. No evidence of homeless camps, broken sewer lines, or trash was found.	Ongoing	Public Works Dept.
ICID PS-6	Enhanced reporting requirements	Provide quarterly reports to Program.	Quarterly reports were submitted to Program staff as requested.	Quarterly	Public Works Dept.

Santa Clara Valley Urban Runoff Pollution Prevention Program

Cupertino

P.S. Id.	*Activity*	*FY05-06 Tasks*	*Status / Comments*	*Due Date*	*Responsible Party*
ICID PS-7	Effectiveness Evaluation	Review and evaluate the effectiveness of city efforts.	City staff has examined the data and found a total of 26 incidents where all incidents required some type of enforcement action, and a majority of the actions were verbal notices. The most incidents in one category were 6, from pools/spas/fountains discharge. Almost half of the reporting sources were from citizen complaints and 65% of the incidents took place in residential areas. This may indicate that our outreach is working; citizens recognize illegal discharges and know who to call when they see them. Tracking the information by computer allows city staff to easily identify repeat problem locations from year to year. Again this year, there doesn't appear to be any major pattern emerging in any one category. The inspector educates violators at the time of the incident and distributes educational materials. The city will continue to provide articles in the city newsletter on topics such as the proper way to discharge pool water, soapy carwash water and disposal of car fluids.	7/06	Public Works Dept.

FY 05- 06 Annual Report

Attachment C

Industrial/Commercial Discharger Control Program

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report: General Tasks
Cupertino

P.S. Id.	*Activity*	*FY05-06 Tasks*	*Status / Comments*	*Due Date*	*Responsible Party*
Industrial/Commercial Discharger Control Programs					
IND-PS-3	Coordination with Health Dept.	Continue to hold an annual overview of the restaurant inspection program with the Co. Health Dept.	A training session was held 4/18/06 with the County Health Dept. inspectors along with reps from the WV cities and County on restaurant inspection violations, inspection procedures, tracking, enforcement, data collection, public education materials, grease trap cleaning, bulb disposal and pumper trucks.	5/06	Public Works Dept.
IND PS-3	Check for new industrial businesses.	In Spring '06 the city's Industrial Inspector will review applications for "Tenant Improvements" (TI) in the Building Dept. to determine if any of the businesses on our two light-Industrial streets had changed their operations and should be included in our routine Industrial inspections.	No improvements were found that would require industrial inspections.	Spring 06 Ongoing	Industrial inspector
IND PS-3	Commercial Inspections	The service station inspections will be conducted this year since they were last inspected in FY 03-04. Inspections take place bi-annually.	A total of 33 businesses that included service stations, dry cleaners, and the city corp yard were inspected. The County Health inspectors visited 268 food facilities in Cupertino and conducted 795 inspections. One warning notice was issued. See summary reports immediately following this section.	9/06	Industrial Inspector
IND PS-4	Staff training	Hold annual training for Industrial Inspector.	Training was held on 3/02/06 for the city's industrial inspector focusing on the performance standard, SOPs and reporting.	3/06	Public Works Dept.
IND PS-4	Enhanced reporting requirements	Continue to track all non-compliance, follow-up enforcement actions and final resolutions resulting from inspections. Submit data to the Program quarterly.	There were no inspections in the first 3 quarters since the industrial inspections are so few in number; they are completed typically in the 4th quarter. Completed data was submitted to the Program in 7/06.	Ongoing	Public Works Dept.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report: General Tasks
Cupertino

P.S. Id.	*Activity*	*FY05-06 Tasks*	*Status / Comments*	*Due Date*	*Responsible Party*
IND PS-4	Effectiveness Evaluation	Review and evaluate the effectiveness of city efforts.	One minor concern was found at a gas station regarding oil in a secondary containment vessel and was quickly cleaned up. Otherwise, re-inspections were not necessary. Most of the dry cleaners do not do not have chemicals on-site and are doing the cleaning at other locations. The inspector reports that the gas stations are already highly regulated and inspected frequently by other agencies. Many of the service stations only sell gas and don't have maintenance facilities. County Health Dept. staff reported one violation during their restaurant inspections related to urban runoff.	7/06	Public Works Dept.

Public Streets, Roads, and Highways Operation and Maintenance and Rural Roads

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report: General Tasks
Cupertino

P.S. Id.	*Activity*	*FY05-06 Tasks*	*Status / Comments*	*Due Date*	*Responsible Party*
Public Streets, Roads, and Highways Operation and Maintenance and Rural Roads					
PSRH PS-3	Staff training	Hold annual training for public works, streets division staff and public works supervisors.	Annual training was held on 3/2/06 for the streets, parks maintenance, facilities and other corporation yard staff. There was an opportunity for staff to ask questions about storm water concerns in general and specific PW SOPs. Annual training for Public Works staff: Topics included corporation yard operations and maintenance, vehicle and equipment cleaning, dumping incidents, pest management, and universal waste recycling and disposal.	1/06	Public Works Dept.
PSRH PS-5	Effectiveness Evaluation	Review and evaluate the effectiveness of city efforts.	Many of the topics have been covered previously and the employees are very knowledgeable in those subjects. This year's emphasis was placed on BMP's regarding vehicle and equipment cleaning and safe handling and disposal of universal waste. There was much discussion on the need to dispose of broken fluorescent tubes as hazardous waste. This turned out to be a good topic for training as some employees were unaware of the proper disposal methods.	7/06	Public Works Dept.

Attachment D-2

Storm Drain Operation and Maintenance

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report: General Tasks
Cupertino

P.S. Id.	*Activity*	*FY05-06 Tasks*	*Status / Comments*	*Due Date*	*Responsible Party*
Storm Drain System Operation and Maintenance					
SD PS-1	Storm Drain Maintenance	All tasks are routine and on-going	The City's contractor vacuums all of the storm drain inlets on a 2-year rotating basis. Half of the storm drains are cleaned one year, and the remaining half the following year.	Ongoing	Public Works Dept.
SD PS - 2	Storm Drain Operation and Maintenance	Review and evaluate one BMP, with input from maintenance staff. Evaluate "hot spots" as appropriate.	It is apparent during annual training that corporation yard staff is well aware of the referral and follow-up process between corp yard staff and the city's nonpoint source inspector as this process is reviewed in the training session. The nonpoint source inspector has worked for the city for over 30 years and is well known among the staff. The city has not found any on-going hot spots; the overall storm drain system is working well.	2/06	Public Works dept.
SD-4	Annual training	Hold annual training for staff responsible for the maintenance of the stormdrain system.	Annual training was held on 3/2/06 for the streets, parks maintenance, facilities and other corporation yard staff. There was an opportunity for staff to ask questions about storm water concerns in general and specific PW SOPs. Annual training for Public Works staff: Topics included corporation yard operations and maintenance, vehicle and equipment cleaning, dumping incidents, pest management, and universal waste recycling and disposal.	2/06	Public Works dept.
SD PS-5	Effectiveness Evaluation	Review and evaluate the effectiveness of city efforts.	Storm drain vacuuming provides the benefit of preventing blockage of the drainage system from a build-up of debris and prevents pollutants of all types that have settled into the drains from being flushed into creeks. It is particularly helpful in preventing flooding. This is an ongoing and routine task with little or no changes from year to year.	7/06	Public Works dept.

Cupertino

P.S. Id.	*Activity*	*FY05-06 Tasks*	*Status / Comments*	*Due Date*	*Responsible Party*
Corporation Yard Operation and Maintenance					
PSRH PS-3	Staff training	Hold annual training for corporation yard staff and public works supervisors.	Annual training for Public Works staff: Topics included corporation yard operations and maintenance, vehicle and equipment cleaning, dumping incidents, pest management, and universal waste recycling and disposal.	3/06	Public Works Dept.
PSRH PS-5	Effectiveness Evaluation	Review and evaluate the effectiveness of city efforts.	Corporation yard staff inspects the corporation yard weekly as part of their haz mat inspection. A few minor housekeeping problems were reported throughout the year mostly from vehicle fluid spills. According to the haz mat inspector, these incidents decreased significantly in FY 05-06, possibly due to this year's training.	7/06	Public Works Dept.

Trash Inventory and Management

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report: General Tasks
Cupertino

P.S. Id.	*Activity*	*FY05-06 Tasks*	*Status / Comments*	*Due Date*	*Responsible Party*
Trash Inventory and Management					
Trash Work Plan	Trash areas ID	Annually revise trash problem areas list on an as needed basis.	Completed 12/03. There were no new "hot spots" identified in FY 05-06.	FY 05-06 Ongoing	Public Works Dept.
Trash Work Plan	Trash mgmt practices	Assist Program staff in developing a long-term strategy for trash conditions in urban streams and waterways.	To be developed in FY 06-07	FY 06-07 Ongoing	Public Works Dept.
Trash Work Plan	Trash mgmt practices	Will continue to support Program staff in identifying existing trash management practices.	Information related to recommended management actions and or future trash evaluations is provided within trash problem area activity report. This activity report was submitted to Program staff in June 06.	FY 05-06 Ongoing	Public Works Dept.
Trash Work Plan	Trash documentation	Provide Program staff with documentation regarding trash complaints/incidents as well as an annual data summary report.	Code Enforcement reported 29 calls for service related to unlawful dumping.	FY 05-06 Ongoing	Public Works Dept.
Trash Work Plan	Street sweeping data	Continue to collect street sweeping data and provide data to Program for a street sweeping effectiveness evaluation.	Monthly street sweeping reports for July through June were submitted to the Program for compilation in July 2006.	FY 05-06 Ongoing	Public Works Dept.
Trash Work Plan (New)	Trash evaluations	Conduct trash evaluations in a subset of trash problem areas on an as needed basis using the RWQCB Rapid Trash Assessment protocol (version 7.0) and/or the KAB Litter index.	Trash evaluations were conducted in October 05 and again in June 06. Reports were submitted to the Program for compilation in June 06.	FY 05-06 Ongoing	Public Works Dept.
Trash Work Plan (New)	Trash mgmt practices	Continue implementation of trash control measures, as appropriate, to address trash problem areas within high priority areas.	The City's "hot spots" had little to no trash evident in both rounds of assessments. Most sites are City maintained and get cleaned on a regular basis. The site with the largest trash problem was on private property. In this instance, the City's code enforcement contacted the property manager and notified them to clean the area up.	FY 05-06 Ongoing	Public Works Dept.
Trash Work Plan (New)	Trash mgmt practices	Provide Program staff with information on trash management practices implemented in their jurisdictions, using standardized reporting format.	A report of all assessments and trash management activities was submitted to the program on June 30, 2006.	FY 05-06 Ongoing	Public Works Dept.
	WE&O Outreach	Participate in the WE&O outreach ad hoc group, and two of its subgroups: the Schools outreach group and the IPM group.	The City's environmental programs assistant participated routinely in these groups throughout the year.	Ongoing	Public Works Dept.

Pollution Prevention Program

Trash Problem Area Activity Report
FY 05-06

ID	Date	Watershed	Location	Assessment Tool	Score	Existing Management Actions	Recommended Management Actions and/or Future Evaluations
CU01	10/17/2005	Calabazas Creek	Tantau and Finch Avenues, vacant lot: private property	KAB	1	Very little to no trash observed at this location. Removed existing litter. This location is not near a waterway. Code Enforcement notified property owner in FY 04-05 and trash management activities were implemented.	Site has been monitored for 2 years and is no longer a trash problem area. Recommend that the site be removed from list.
CU02	10/17/2005	Stevens Creek	Homestead and Mary Ave. adjacent to high school; private property	KAB	1	Not in a waterway. Little to no trash observed at this location. Removed existing trash. This lot is monitored by the school janitor.	Site has been monitored for 2 years and is no longer a trash problem area. Recommend that the site be removed from list.
CU03	10/18/2005	Calabazas Creek	Disney Lane near Miller adjacent to Hyde Jr. High; private property	KAB	1	Not in a waterway. Little to no trash observed at this location. Removed existing trash.	Site has been monitored for 2 years and is no longer a trash problem area. Recommend that the site be removed from list.
CU04	10/18/2005	Sunnyvale East	Ann Arbor and Ann Arbor Ct., close to City park; private property	KAB	1	Not in a waterway. Little to no trash observed at this location. Removed existing trash. It appears that most of the trash is from neighboring homes.	Site has been monitored for 2 years and is no longer a trash problem area. Recommend that the site be removed from list.
CU05	10/19/2005	Stevens Creek	Somerset Park owned and maintained by City	KAB	1	Not in a waterway. Little to no trash observed at this location. Removed existing trash. This is a City park maintained by City staff.	Site has been monitored for 2 years and is no longer a trash problem area. Recommend that the site be removed from list.
CU06	10/19/2005	Sunnyvale East	Park Circle East & West, area behind apartments, private property	KAB	2	Not in a waterway. A lot of illegal dumping from neighboring apartment complexes. Removed smaller pieces and notified property managers to remove larger pieces.	Continue to work with landlords and property managers on illegal dumping issues.
CL03	5/3/2006	Stevens Creek	Stevens Creek - McClellan Ranch	RTA	101	Site often cleaned by Park staff and students. Most recent cleaning occurred on 3/18/06	Very little debris was found. Park area is well maintained. Does not appear to collect debris from upstream areas. May be a good reference point.
CL05	5/3/2006	Stevens Creek	Stevens Creek - West Valley Elementary School Bridge crossing	RTA	95	Site is monitored by Stevens and Permanente Watershed Council Streamkeeper volunteer. Litter is collected on a monthly basis from one side of the creek depending on accessibility and creek water levels.	Site is located just below an outfall for West Valley Elementary and nearby residential areas. Monitoring will continue at this site. May consider getting school involved with trash/clean up activities on their grounds.
CU01	6/6/2006	Calabazas Creek	Tantau and Finch Avenues, vacant lot: private property	KAB	1	Very little to no trash observed in this location. Removed existing litter. This location is not in a waterway. Code Enforcement notified property owner in FY 04-05 and trash management activities were implemented.	Site has been monitored for 2 years and is no longer a trash problem area. Recommend that the site be removed from list.
CU02	6/7/2006	Stevens Creek	Homestead and Mary Ave. adjacent to high school; private property	KAB	1	Not in a waterway. Little to no trash observed at this location. Removed existing trash. This lot is monitored by the school janitor.	Site has been monitored for 2 years and is no longer a trash problem area. Recommend that the site be removed from list.
CU03	6/8/2006	Calabazas Creek	Disney Lane near Miller adjacent to Hyde Jr. High; private property	KAB	1	Not in a waterway. Little to no trash observed at this location. Removed existing trash.	Site has been monitored for 2 years and is no longer a trash problem area. Recommend that the site be removed from list.
CU04	6/9/2006	Sunnyvale East	Ann Arbor and Ann Arbor Ct., close to City park; private property	KAB	1	Not in a waterway. Little to no trash observed at this location. Removed existing trash. It appears that most of the trash is from neighboring homes.	Site has been monitored for 2 years and is no longer a trash problem area. Recommend that the site be removed from list.
CU05	6/10/2006	Stevens Creek	Somerset Park owned and maintained by City	KAB	1	Not in a waterway. Little to no trash observed at this location. Removed existing trash. This is a City park maintained by City staff.	Site has been monitored for 2 years and is no longer a trash problem area. Recommend that the site be removed from list.
CU06	6/11/2006	Sunnyvale East	Park Circle East & West, area behind apartments, private property	KAB	2	Not in a waterway. Illegal dumping from neighboring apartment complexes still exists, but less than last assessment. Removed smaller pieces and notified property managers to remove larger pieces.	Continue to work with landlords and property managers on illegal dumping issues.

Cupertino

General Outreach

Activity	Level of Implementation	Evaluation
NPS literature distribution to the general public at city facilities: • Library • City Hall lobby • Quinlan Community Ctr. • Planning/ Building Dept. counter • Backyard Compost workshops	**NPS Prgm. literature:** *Pests Bugging You?, Home Maintenance Tips*, eight construction trifolds, *Blueprint For a Clean Bay* booklet, IPM pest-specific factsheets, *Grow-It!,* pool water brochure (2004 revision), *A Vision For Our Watershed,* **HHW Prgm literature:** HHW brochure (for residents), small business hazardous waste brochure, Diazinon flyer, *Alternatives to Household Chemicals, Mercury and Universal Waste brochure (for residents and businesses)* **Valley Trans. Agency literature**: bus maps and schedules **Air District** and **Rideshare literature:** Spare-the-Air brochures; transportation-alternatives brochures	This material is easily obtained from the agencies or is copied by staff internally. The materials continue to be taken by the public at a pace where a weekly visit to each site is necessary.
Rideshare Week and Bike-to-Work Day: Encourage participation among city employees and the general public	E-mail messages: Email messages to employees in May for Bike-to-Work Day. Cupertino's Bicycle/Pedestrian Commission supports energizer stations at the Quinlan Community Center, Apple Computer, and Hewlett Packard sites. Articles in Scene newsletter: Articles were published in the May city newsletter, the Scene, for Bike-to-Work Day.	The email message, sent out May 11, 2006, serves to remind employees about this environmentally friendly form of transportation and the related activities occurring on Bike-to-Work Day. A few city staff members participate, but most drive as they have other activities or live too far from work. According to our Bicycle and Pedestrian Commission, 74 cyclists stopped by the Quinlan Community Center Energizer Station, 162 riders stopped by the Apple Computer Energizer Station, and 131 riders stopped at the Hewlett Packard site.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report: General Tasks
Cupertino

Activity	Level of Implementation	Evaluation
HHW display at Quinlan Community Center	General HHW display set up 2 wks prior to Cupertino HHW event in 8/27/05. Articles in July Scene newsletter. Articles and ads in the Cupertino Courier and San Jose Mercury News West Valley Section (Cupertino is included in this section)	The County now surveys the HHW customers about how they became aware of the program- and sorts the data by city. In the most recent data available, FY 06-07, residents found out about the program this way: • By calling the garbage company: 40% • By reading the city's newsletter: 25% • From a flyer: 10% • From the City's website: 8% • By calling the City: 7% We can conclude that our city newsletter, the Scene, is a valuable outreach tool. We will continue to buy ads in the local paper and present a display of what typical HHW products can be taken to a HHW event just before our major August HHW event.
NPS literature distribution to residents at Cupertino HHW event	The County's HHW staff distributes the following pieces, at the events, on behalf of the City of Cupertino: Alternatives to Household Chemicals, Santa Clara County HHW brochure, Computer and TV Recycling, and Donation Agency List. An event was held in Cupertino on 8/27/05.	We are assuming that those users of the HHW event are environmentally conscious, and are probably the kind of people who are interested in stormwater related literature.
Audubon Fair; literature provided to Park and Rec staff to distribute at fair.	Pests Bugging You, Alternatives To Household Chemicals, Home Maintenance Tips brochure, and various IPM factsheets distributed on 10/22/05 at McClellan Ranch.	According to the City's naturalist, who staffed the event, 500 attended. Brochures were available to those in attendance.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report: General Tasks
Cupertino

Activity	Level of Implementation	Evaluation
Website: Include NPS information in city's website, especially new IPM website links and new info on Mercury.	The City's environmental division website has a specific section on Pest Management and direct links to the Program's IPM website and new information on Mercury.	Ongoing As the public becomes more accustomed to using websites, this tool becomes a valuable and easy to use method of educating the public.
Watershed Education & Outreach Campaign: Conduct or participate in local activities that are coordinated with the Watershed Education & Outreach campaign. Evaluate the effectiveness of PI/P projects by direct or indirect means, as appropriate.	Staff attends WE&O campaign planning meetings and reviews and critiques work plans and campaign products. The City participated in staffing the Annual Home Show in conjunction with program consultants and staff from other jurisdictions.	The Cities Environmental Program Assistant staffed a 6-hour shift for the Annual Home Show held at the San Jose Convention Center. This past show attracted over 18,000 people. 583 people picked up literature from the Program's booth. Outreach materials distributed included Home Maintenance Tips, County U-Waste Brochure, Safe Medicine Disposal Flyers, Creek Clean-Up Flyers, IPM fact sheets, pencils, Got Bugs Magnets, Activity Books, Kids Guide to Backyard Bugs, Grow It Guide, HHW brochure, and Pools and Spas Brochure.

Newsletter, newspaper articles, ads:

Cupertino Scene articles:

Approx. dates and subjects for submittal to monthly newsletter (mailed to all residents and businesses):

- 7/ 05: draining pool; household haz. waste event; avoiding use of briquette lighter fluid, auto pollution and watersheds, computer recycling
- 9/05: computer recycling, copper in brake pads
- 10/05: disposing fluorescent bulbs & thermometers; recycling used motor oil
- 11/ 05: residents to keep storm drain grates & gutter clean/ city to vacuum storm drain system/warning about not dumping HHW
- air pollution from home fireplaces, including gas rebate program; computer recycling
- 2/ 06: advice on burning wood properly to avoid pollution; computer recycling; HHW disposal
- 3/06: IPM specific fact sheets available; Green Business program (program includes stormwater pollution prevention)
- 4/ 06: fluorescent lights disposal, thermometer exchange and disposal; electronic waste recycling event; pest management, Our Water Our World website; HHW program reminder for spring cleaning, curbside battery recycling
- 5/ 06: IPM pest specific fact sheets available; watch use of soap when washing cars; creek cleanup date set; bike-to-work day, HHW disposal
- 6/ 06: draining pools, cars and water pollution

Evaluation: The Scene, the city's newsletter provides an easy way for staff to inform local residents and businesses about issues of civic concern. The Scene is mailed to 26,000 postal customers – all residences and businesses.

Cupertino Courier articles:

Vegetated Swales in Cupertino Library Parking Lot (2/1/2006)

Article on the countywide Household Hazardous Waste Program disposal event in Cupertino (8/10/2005, 8/24/2005)

Article on leaking vehicles and proper protocol for oil and fluid spills (7/6/05)

Article on Draining Pool Water (7/22/05)

Courier ads:

Household hazardous waste event ads before the August '06 HHW event, Cupertino Mercury Thermometer Exchange Event ads before the April '06 event

S.J. Mercury articles:

Articles and ads in the Mercury are usually submitted by the Program and paid for jointly by the cities.

SJ Mercury ads:

Household hazardous waste event ads for the Aug. '06 HHW event, Apple Computers Earth Day e-waste recycling event ads for the Apr. '06 event

Cupertino

Targeted Outreach

Activity	Level of Implementation	Evaluation
City staff: • Building inspectors • Public Works inspector and plan checker • Planning Dept. planners • NPS inspector (in Public Works) • Corp yard & street dept staff • Public Works staff managing golf course maintenance contract and managing structural pesticide spraying contract • City employees for general info on less-toxic alternatives for their own home use, and info on not using pesticides on the job, if unauthorized (detail in the Pesticide Workplan)	See Training Activities Table, for details about specific trainings. NPS literature distributed, as appropriate E-mails: • Sent 3/14/06 informing employees on how to dispose of batteries properly. • Sent 5/04/06 informing them of less toxic alternatives to pesticides and inviting them to get more info and see display. • Sent 5/11/06 informing them of Bike to Work Day • Sent 4/18/06 informing them of the Shredding and Thermometer Exchange Event • Sent 6/21/06 informing them of Spare the Air Day Display: for city employees set up in May 2006 with the IPM fact sheets.	**General remarks:** Trainings regularly provide an informal forum for staff to discuss any recent concerns about operations. The city believes that employees understand stormwater concerns as evidenced by the number of public incidents reported by staff, the types of informed questions asked by staff, and the tradition of on-going training for many years. **Building Dept:** Focus: performance standard, construction BMPs and source control BMPs, inspection notices. **PW and Planning Plan Checkers:** Focuses: C-3, Group 1, 2A & 2B, HMP Pesticide Control, website information, and MRP. **Corp Yard and Street Dept training:** Focus: Topics included corporation yard operations and maintenance, vehicle and equipment cleaning, dumping incidents, pest management, and universal waste recycling and disposal. In addition, building inspectors, planners, public works inspector and the city's storm water inspector attended Program-sponsored training events.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report: General Tasks
Cupertino

Activity	Level of Implementation	Evaluation
City contractors: Require PCOs, contracted for work on city facilities, to use pest control methods consistent with our IPM policy Require these PCOs to attend training workshops, as appropriate. (See Pesticide workplan for details.)	See "Training Activities" Contract specifications require an IPM approach.	The City's contractor for Blackberry Farm has attended accredited courses through the Continuing Education Center for Pest Management. He maintains his license as a Pest Control Advisor. The City's pest management policy and SOPs are reviewed with the contractor annually for compliance.

Cupertino

Activity	Level of Implementation	Evaluation
Creek cleanup volunteers	*Scene* articles	Article in May '06 *Scene* newsletter .
Nursery customers and staff: Pt-of-sale IPM campaign (2 stores: Yamagami's Nursery and Summer Winds Garden Ctr.)	IPM Partnership trainer. Program IPM factsheets	By EOA staff. Set up by EOA staff and Program contractor in the Spring. This is a very efficient way to be sure the nurseries get uniform and effective training, and up-to–date information on new products.
Auto Repair Shops	Education of shop mgrs. during bi-annual inspections by City Bldg. Dept staff; use Program lit, if necessary	Most auto repair shops comply with the city's stormwater policy. It is rare when the inspector requests any corrections. Auto repair shop inspections are conducted bi-annually and were completed in FY 05-06.
Restaurant education	Restaurant posters are distributed at inspections by County health inspectors, or by city NPS inspector, if responding to problems. County health inspector routinely inspects all restaurants annually, and inspects on an "on-complaint" basis. Additionally, the city's inspector provides a copy of a restaurant worker tri-fold (available in either English, Spanish, Vietnamese, or Chinese) explaining proper restaurant cleaning behavior, as needed. Health Dept. inspectors are now also distributing the recently acquired "Don't Set a Table for Pests" brochure.	The County continues to distribute posters to new restaurants that don't have them. When the city's NPS inspector responds to spills or illegal discharge problems at restaurants, he provides verbal guidance, written violation notices, and often leaves a program brochure, cards or poster. The illustrations on the IC/ID cards are helpful for situations where there is a language barrier. The Chinese version of the tri-fold is helpful in our community, which has a high percentage of Chinese speaking people, and many Chinese restaurants.

Cupertino

Activity	Level of Implementation	Evaluation
Provide info on IPM workshop opportunities to school districts and sanitary district. (See Pesticide Workplan for details.)	IPM sheets. Info on IPM websites	Nareesh Duggal of Santa Clara County contacts these groups as trainings become available. There were no trainings held in FY 05-06, but a date has been set for FY 06-07.
Outreach to local commercial businesses to encourage the use of pest-resistant plants in landscape. Included in Planning Dept. applicant packet (Pesticide Workplan for details.)	Pest-resistant plant list is distributed through the Planning Dept. application packet.	Ongoing

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report: General Tasks
Cupertino

Public Participation

Activity	Communication Vehicle	Goal
Participate in regional creek cleanup event (if creeks in Cupertino need cleaning). Publicize cleanup.	Article submitted to May '06 Scene City did not host a creek cleanup site.	The Water district bought ads in the Courier and mailed out reminders to last year's volunteers. A site is hosted at the Stevens Creek reservoir, adjacent to the city limits. City staff find this to be a more useful use of the volunteers time, as we have not found any creeks in dire need of cleaning in Cupertino

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report: General Tasks
Cupertino

School/Education Outreach

Activity	Communication Vehicle	Goal
Creek Education project available to all 3rd and 3rd/4th teachers in School District: about 82 classes (half are in Cupertino; remaining schools in cities of San Jose, Sunnyvale, Santa Clara, Saratoga, Los Altos). Teachers are trained to teach the creek ed. unit to their own classes, and co-lead creek field trip for students.	Teachers are trained to teach the creek ed. unit to their own classes, and co-lead creek field trip for their students; City's Park & Rec naturalist teaches the teachers. City provides two docents for creek tours. 4-hr training workshops for teachers; 2-wk curriculum for students taught by teachers, w/ half-day creek field trip.	This program is very popular with our school district and the teachers. We started the program in 1995, and continue to refine as needed. During a half hour review of general NPS and creek concepts that precedes the actual creek walk, our docents have the opportunity to observe whether each teacher has, in fact, spent time in the classroom preparing the students for the field trip. Typically, almost all of the students are familiar with the concepts. This past year we had 1728 students participate and ~270 parent helpers.
Respond to school group requests for tours, workshop, field trips, as possible	The city's Park and Rec staff naturalist is now assisting the students of Monta Vista High School to regularly perform water quality monitoring and research in Stevens Creek (the city's principal creek, 2 blocks from the high school).	In general, creek and water quality studies have become more common in schools, without the intervention of the city. However our city's naturalist is well known among local teachers as a science resource, and is often informally drawn into school projects. Since she is the lead docent in our 3rd-grade creek program, she is already very aware of stormwater and watershed issues, and shares that info with the teachers and students.
Continue to encourage 6th -grade teachers in the Cupertino Union School District to attend the Wacky Watershed teacher-training workshops. (Trainings will assist teachers in including watershed curriculum in their science classes.	E-mails and phone calls to the District's science curriculum advisor.	The City's Park and Rec. Naturalist is contacted by the City of San Jose's Water Watershed Staff in regard to upcoming workshops. Tentative plans are being made to host a workshop in Cupertino at McClellan Ranch in FY 06-07.

New Development Planning Procedures

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report: New and Redevelopment Requirements

Cupertino

Activity	Permit Item Source	FY05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
NEW DEVELOPMENT AND CONSTRUCTION CONTROLS – PLANNING PROCEDURES					
C.3.b Development Project Approval Process -- Planning Procedures					
Ordinance Revision	C.3.b.2	Modify existing review policies, procedures, and/or conditions of approval to incorporate C.3 requirements (based on results of tasks under C.3.c. through C.3.m.)	On September 20, 2005, the City Council adopted revisions to the Cupertino Stormwater Pollution Prevention and Watershed Protection ordinance (Chapter 9.18 of the Municipal Code). Changes were related to Group 2A projects and HMP requirements. On June 20, 2006, the City Council adopted further revisions to this ordinance related to Group 2B project requirements. A copy of the revised ordinance may be viewed by following the links to Chapter 9.18 at http://www.cupertino.org/leaving_cupertino/index.asp?Location=http%3A%2F%2Fwww.amlegal.com%2Fcupertino_ca%2F	Group 2 Ordinance Revision 6/06	Public Works
Staff Training	C.3.b.3	Continue to train Cupertino staff in planning, building, and engineering departments on the C.3. provisions as they are refined.	In-house training was given to Planning and Public Work staff on June 14, 2006. Topics included Group 1, 2A, and 2B projects, the HMP, pesticide control measures, the status of the Municipal Regional Permit, and information contained in the stormwater quality pages of the City's website. On December 7, 2005, staff from Public Works Engineering and Planning attended a WMI-sponsored workshop, "How Development Affects Creeks. On March 27, 2006, Public Works civil engineering staff responsible for land development review and the City's Stormwater Quality Consultant attended the SCVURPPP-sponsored "HMP101" training in San Jose.	6/06	Public Works – Environmental Division

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report: New and Redevelopment Requirements

Cupertino

Activity	Permit Item Source	FY05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
			On June 6, 2006, public works inspection staff attended the SCVURPPP workshop on Inspecting Stormwater Treatment BMPs.		
C.3.c. Requirements for Group 1 and Group 2 Projects					
Guidance Manual	C.3.c.4	Review Guidance Manual developed by Program and, if needed, customize for projects likely in Cupertino.	Since October 2005, staff in the City's Public Works Dept. have been using the recently revised Stormwater Pollution Prevention and Watershed Protection ordinance developer/designer guidance. The revised ordinance includes definitions of the applicable projects; numeric sizing criteria; requirements for stormwater management plans and BMP O&M agreements.	Revise Guidance Document 6/06	Public Works Environmental Division
Guidance Manual Update	C.3.c.9	Update Guidance Manual and Performance Standard for Group 2 projects as needed.	Feedback on the SCVURPPP's revised C.3 Guidance Manual was submitted through the Program's C3.PO workgroup, of which the City of Cupertino is an active member. Updating the Planning Procedures Performance Standard was deferred pending the outcome of the Municipal Regional Permit.	6/06	Public Works Environmental Division
C.3.e Operation and Maintenance of Treatment BMPs					
Data Form and Staff Training	C.3.e.1	Log information about treatment BMPs installed at approved Group 1 and 2 projects and maintain a list or database of properties, treatment BMPs, and responsible operators.	Starting in FY '04-'05 and continuing into FY '05-'06, the City's provided feedback on the SCVURPPP-generated draft BMP O&M data forms through the Program's C3.PO workgroup. This feedback was coordinated with the City's Construction Inspector, who is responsible for BMP O&M inspections.	9/06 AR and ongoing	Public Works Environmental Division
BMP O&M Agreement Mechanism	C.3.e.2	Review use of City's BMP O&M and easement agreements and consider modifications, as needed.	Since no Group 1 or Group 2A/2B projects have been approved in Cupertino, review of agreement has been deferred until the agreement is actually used.	9/06 AR and ongoing	Public Works, Planning, City Attorney

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report: New and Redevelopment Requirements

Cupertino

Activity	*Permit Item Source*	*FY05-06 Tasks*	*Status / Comments*	*Due Date (mo/yr)*	*Responsible Party*
BMP Inspection Program	C.3.e.5	Develop local program for inspecting a subset of prioritized treatment BMPs to verify that the responsible party is performing proper O&M.	In FY '05-'06, the City's Construction Inspector was notified that in addition to Group 1 projects, Group 2A projects would also need to be inspected on an annual basis. BMP O&M inspections of Group 2B projects will be added to this Program FY '06-'07. When the time comes, the City will also be using the SCVURPP-developed BMP O&M inspection forms, instead of the inspection forms originally submitted in September 2004 with the Cupertino Performance Standard.	6/06	Public Works Engineering
Reporting	C.3.e.6	Report on the Co-permittee's treatment BMPs O&M verification program in each annual report, including organizational structure, evaluation of effectiveness, and planned improvement to the program. Include a list or summary of treatment BMPs inspected during the year, inspection results, and any required follow-up and correction.	No Group 1 or Group 2A/2B projects have been approved in Cupertino. The Cupertino BMP O&M Verification Program is described in detail in the City's Planning Procedures Performance Standard, which was submitted to the Regional Board in September 2004 with the Cupertino URMP and resubmitted with the FY '04-'05 annual report in Sept. 2005. A copy of this section of the performance standard is attached immediately following this section.	9/06 AR and ongoing	Public Works Environmental and Engineering Divisions
C.3.f Hydromodification Management Plan					
Staff training	C.3.f.3	Upon adoption by the Regional Board, begin implementation of HMP as part of requirements for Group 1 projects that may cause increased erosion or other related impacts. Before adoption, encourage early implementation of likely elements of the HMP where possible.	During FY '05-'06, Public Works staff reviewed conceptual plans for the only two large projects in Cupertino with the idea of encouraging early HMP implementation. One projects was in the "yellow zone" and not large enough to be regulated by the HMP requirements. This project is now up for a voter referendum in fall of 2006. In the case of the other project in the "green zone", the City Council denied the application (The Parks at Monte Vista).	9/06 AR and ongoing	Public Works and Planning

FY 2005-2006 Annual Report: New and Redevelopment Requirements

Cupertino

Activity	*Permit Item Source*	*FY05-06 Tasks*	*Status / Comments*	*Due Date (mo/yr)*	*Responsible Party*
C.3.h Alternative Certification					
Reporting	C.3.h.1	List projects certified by someone other than City staff.	There were no projects submitting Alternative Certification.	9/06 AR and ongoing	Public Works Environmental Division
C.3.j Site Design Measures Guidance and Standards Development					
Standards Revisions	C.3.j.4	Incorporate any revised standards and guidance into local project approval process and "fully implement" the revised standards and guidance.	There were no site design standard revisions in FY '05-'06. This item will be dropped from future work plans.	N.A.	Public Works Environmental Division and Planning
C.3.k Source Control Measures					
Ordinance Revision	C.3.k.	Enhance source control requirements for new and redevelopment projects.	No revisions to the Source Control requirements of the City Code were made in FY '05-'06. These requirements will be reviewed annually to determine if changes are needed.	9/06 AR and ongoing	
Reporting	C.3.k.3	Implement source control measures requirements by including appropriate conditions of approval in Group 1 and 2 projects. Report status and provide examples of application of conditions in annual reports.	Since no Group 1 or Group 2A projects were approved in FY '05-06, there are no examples to report.	9/06 AR and ongoing	Public Works Environmental Division

Cupertino

Activity	*Permit Item Source*	*FY05-06 Tasks*	*Status / Comments*	*Due Date (mo/yr)*	*Responsible Party*
C.3.l Update General Plans					
General Plan Review	C.3.l.1	Review current General Plan policies related to water quality and watershed protection and incorporate additional policies as needed to implement C.3.	The Cupertino City Council adopted the 2000-2020 General Plan on November 15, 2005. Sections related to urban runoff control are found in the Environmental Resources/Sustainability Chapter (Wildlife and Vegetation; Water Resources; Stormwater Runoff) and in the Hillside Protection portion of the Land Use/Community Design Chapter. The Plan may be viewed electronically at http://www.cupertino.org/city_government/departments_and_offices/planning_and_building/general_plan_update/index.asp.	9/06AR	Public Works Environmental Division and Planning
C.3.m Water Quality Review Processes					
CEQA Review	C.3.m.1	Review CEQA initial study checklists and other environmental review documents and modify documents as needed to include questions that sufficiently address water quality impacts of projects.	In FY '05-'06, no changes were made to the City's water quality review process. Any future changes would be reported in the applicable year's annual report.	9/06 AR and ongoing	Public Works Environmental Division and Planning
C.3.n Reporting Requirements					
Reporting	C.3.n.1	Provide information described in Table 1 of Provision C.3. in annual reports.	There were no Group 1 or 2A projects approved in Cupertino during FY '05-'06.	9/06 AR and ongoing information collection	Public Works Environmental Division and Planning

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report: New and Redevelopment Requirements

Cupertino

Activity	*Permit Item Source*	*FY05-06 Tasks*	*Status / Comments*	*Due Date (mo/yr)*	*Responsible Party*
Reporting	C.3.n.4	Collect and report the following for all projects that must implement treatment measures: BMPs, site design, and source control measures used, sizing criteria, O&M responsibility mechanism and responsible party.	There were no Group 1 or 2A projects approved in Cupertino during FY '05-'06.	9/06 AR and ongoing	Planning and Public Works Engineering
Pesticide Control Measures	C.3.n.5	Collect information and report a summary of types of pesticide reduction measures required for development projects and the percentage of projects for which pesticide reduction measures were required.	All projects receive, as part of the application packet, a list of conditions related to reduction of pesticide use, Property Maintenance Fact Sheet, and a Pest Resistant Plant list. Planners were recently reminded in an email and in-house training to include a COA related to pesticide reduction measures to all Group 1 projects. The City did not approve any Group 1 or 2A projects in FY '05-'06.	9/06 AR and ongoing	Planning and Public Works Engineering

City of Cupertino

Reporting Form for Planning Procedures Performance Standard

and Provision C.3.n.i. Reporting Requirements

Part 1

New Development and Significant Redevelopment Projects[1]

Approved During FY 2005-2006

Project Name	Project Type[2]	Site Size (ac. or s.f.)	New Impervious Surface (s.f.)[3]	Area of Land Disturbed (Ac.)[4]	Project Status (Dates Deemed Complete and Approved)	Storm Water Control Measures Included in Project
Private Projects						
NO PROJECTS TO REPORT						
Public Projects						
NO PROJECTS TO REPORT						

[1] Prior to August 15, 2006, list all projects with new impervious surface area greater than 1 acre (43,560 s.f.) (Group 1).

After October 20, 2005, list all projects with new impervious surface area greater than 1acre (Group 1) and projects of certain land uses with new impervious surface greater than 10,000 s.f. (Group 2A) (see July 20, 2005 permit amendment).

After August 15, 2006, list all projects with new impervious surface area greater than 10,000 s.f. (Groups 1 and 2).

[2] Describe project type, as defined in Provision C.3.c.

[3] "New" is defined as impervious surface created, added or replaced.

[4] If the site is a "significant redevelopment", list the area of land disturbance, if information is readily available.

Section 4
STANDARD OPERATING PROCEDURES

This section contains the City of Cupertino standard operating procedures (SOPs) related to managing the stormwater quality impacts of new and redevelopment projects. These SOPs demonstrate that urban runoff requirements related to development approval are incorporated into the development review processes of the Planning and Building Divisions and the Public Works Department. In addition, these SOPs describe how the City ensures continued operation and maintenance (O&M) of permanent BMPs at Group 1 & 2A Projects.

Standard operating procedures are provided for the following stormwater quality review processes:

- Private Development Project Approval - Non-Discretionary Projects[1]
- Private Development Project Approval - Discretionary Projects
- Capital Improvement Project Design and Acceptance
- Encroachment Permit Issuance
- Annual Inspection of Group 1 & 2A Private Development BMPs

[1] Definitions are provided at the end of this document.

STANDARD OPERATING PROCEDURES FOR CUPERTINO'S STORMWATER QUALITY REVIEW PROCESS FOR PRIVATE DEVELOPMENT PROJECTS

The following documents are included in Appendix 'C' of the Planning Procedures Performance Standard:

- CEQA Initial Study Checklist
- Written materials disseminated during the development approval process:
  - Cupertino Notice to Developers and Contractors-Stormwater Regulation Changes
  - Impervious Surface Calculation Worksheet (to determine if development could be a Group 1 & 2A project)
  - Cupertino Permanent BMP matrix (selection by land use)
  - Pesticide Control Measures for Development Projects Hand-Out (based on SCVURPPP model conditions of approval)
  - Cupertino Stormwater Quality Guidelines for Development Projects (guidance on complying with C.3 provisions related to Group 1 & 2A Projects)
  - Cupertino Blueprint for a Clean Bay Plan Sheet (construction BMPs)
- City of Cupertino Standard Conditions of Approval (includes misc. stormwater related items)
- Templates of BMP O&M and easement agreements

Non-Discretionary (Administrative) Private Development Projects

- Building Department plan checkers (in-house or consultants) review non-discretionary projects for the necessary construction and source control BMPs.
- Building Department counter staff attach a copy of the City's "Blueprint for a Clean Bay" sheet to all project plan sets at the time of building permit issuance.

Discretionary Private Development Projects

Preliminary Plans Consultation

The applicant presents the Planning Division with a preliminary project idea. The applicant receives an initial assessment of the idea, finds out which application forms would be necessary and the City's general concerns.

- The application packet includes the City's Notice to Developers and Contractors-Stormwater Regulation Changes (regarding Group 1 & 2A Projects and the State NPDES Construction permit); a hand-out on pesticide control measures; and the City's Permanent BMP Selection Matrix (copies of each given in Appendix 'C').
- If the project is subject to CEQA, the Project Planner fills out the CEQA Initial Study checklist, which includes items related to stormwater concerns.
- As needed, the Planning Division will arrange for additional CEQA compliance documentation, including any environmental assessments and studies, which will be paid for by the developer.
- The Planning Division informs the applicant of any environmental studies that will be needed. City staff are guided at this point in the review process by the City's General Plan provisions that pertain to urban runoff concerns.
- Group 1 & 2A Project applicants are advised to meet with engineers in the Public Works Department to discuss stormwater quality and other related issues, such as if a project will be built in an "unimproved" area (i.e., an area without curbs and gutters), in an area with drainage problems, on a hillside lot, on a lot with a dirt road needing street improvements, or if the ~~a~~ project will require significant grading.

Preliminary Meeting with Public Works

- If the proposed development could be a Group 1 & 2A Project, Public Works Engineering staff give the applicant the City's *Impervious Surface Calculation Worksheet for Projects One Acre of Larger* and explains how to complete this form (copy of worksheet given in Appendix 'C'.
- Public Works staff may recommend design changes to reduce the amount of impervious surface so that the proposed development is not considered a Group 1 & 2A Project.
- The Public Works staff will advise the applicant regarding construction and permanent stormwater BMP requirements.
- Applicants of Group 1 & 2A projects receive a copy of the *City of Cupertino Stormwater Quality Guidelines for Development Projects.* This document includes additional information on selection and design of permanent BMPs, the Stormwater Management Plan submittal and long-term BMP operation and maintenance requirements.
- Public Works Engineering staff tell the applicant if a grading permit and an interim erosion and sediment control plan will be necessary and if street improvements will be required.

Development Application Is Submitted

- An application is submitted to the Planning Division, including 6 copies of the application plan set (which includes the site plan, elevations, floor plans, and preliminary landscaping plan.
- A completed *Impervious Surface Calculation Worksheet for Projects One Acre or Larger* is submitted with the development application. This worksheet is forwarded to Public Works Engineering.
- Group 1 & 2A Project applications must include a Stormwater Management Plan, which is reviewed by Public Works Engineering staff.
- If a grading permit will be necessary, the initial grading plan and the interim erosion and sediment control plan are submitted to the Public Works Department at the same time as the application.
- Staff from City's Public Works Department, the Building and Planning Divisions, the County Fire District and the Sanitary District will review the construction documents for their major concerns. Two weeks after the application is submitted, the applicant meets with staff from these agencies at the Pre-Hearing meeting.

Grading Permits and Erosion and Sediment Control Plans

- Public Works Engineering staff will review the grading plan and the interim erosion and sediment control plan submittals to verify that appropriate construction BMPs are incorporated.
- If street improvements are required, Public Works staff will review the construction plans for appropriate construction and permanent BMPs.
- If the developer's engineer is unclear about how to protect the streets and storm drains during construction, Public Works staff will provide the engineer with copies of specific BMPs from the *ABAG Manual of Standards for Erosion and Sediment Control Measures* or will suggest that the engineer buy a copy of the document.
- In accordance with City Code Section 9.18.120, no grading, or erosion and sediment control permit will be issued for a Group 1 & 2A Project until the Stormwater Management Plan has been reviewed and approved by the Director of Public Works.

Pre-Hearing Meeting

At the Pre-Hearing Meeting, representatives of the Planning and Building Divisions, the Public Works Department, the County Fire District and the Sanitary District formally meet to give their general comments to the applicant.

Environmental Review Committee (ERC)

The ERC (a small review committee made up of key Department heads, a Planning Commissioner, and a City Council member) develop a recommendation, to be presented to the Planning Commission, on the significance of the project's environmental impacts.

Planning Commission Hearing

- The proposed project is presented to the Planning Commission, resulting in a Planning Commission Resolution of denial or approval with Conditions.

- The City's standard Conditions of Approval related to stormwater quality are given in Appendix 'C'. Additional conditions of approval may also be required, depending on the type, size, and location of the proposed development.
- In matters related to stormwater quality, the Planning Commission and Planning staff are generally guided by the city's General Plan, Environmental Resources/Sustainability Element, which contains numerous goals relating to urban runoff pollution control.
- Large, significant development proposals (including most Group 1 & 2A projects) may also be presented for approval before the City Council.

Project "Deemed Complete"

- The Cupertino Planning Division provides the developer with a list of the requirements needed for planning application submittals. This list is the criteria for determining whether an application is complete and ready to be processed.
- The Project Planner will review applications within 30 days of submittal to determine if all required information has been provided and the application can be "deemed complete" and accepted.
- If the application submittal is incomplete, the Project Planner will send a letter to the applicant indicating that the application is "deemed incomplete" and lists the items needed to complete the application.
- If the Planning Division's written determination is not made within 30 days after receipt of the application, under State Law, the application is deemed "complete" and staff proceed with processing the application.
- Once an application is accepted as complete, the City cannot ask for new information, although it may require the applicant to clarify or add to the material provided in the application for clarification purposes.
- Proposed developments that would create or replace 10,000 square feet or more of impervious surface that are deemed complete prior to April 15, 2005 will not be subject to the Group 2 C.3 provisions of the City's Municipal NPDES Storm Water Discharge Permit.

Construction Drawings Submittal-

- Construction drawings for private development projects are submitted to the Building Department. The Building Department is responsible for monitoring all construction aspects of private projects with the exception of required street improvements and the on-site BMPs, which are monitored by the Public Works Engineering Division.
- Street improvement plans are submitted to the Public Works Department.
- At this point, Building Department counter staff provide the applicant with a copy of the City's "Blueprint for a Clean Bay" sheet. The applicant is required to attach a copy of the "Blueprint" sheet to all construction drawings submittals. The Building Department plan checker verifies that the "Blueprint" sheet is attached. If it is not, he/she will call for the sheet to be attached before the Building Department will sign off on the final plans.
- A set of the drawings is provided to the Planning staff responsible for the project to verify that the project continues to abide by the Planning Commission's Conditions of Approval.
- Building Division staff review the construction drawing for source control BMPs.
- Planning staff also review the plans for non-Group 1 & 2A projects for site design BMPs.
- If the proposed development is a Group 1 & 2A Project, Public Works engineering staff receive a set of construction documents and review them for C.3 compliance, including incorporation of treatment

control BMPs designed to the required numeric sizing criteria and consistency with the project's Stormwater Management Plan.

- If landscape plans are required, Planning staff review these for BMPs related to pesticide control measures.
- Construction tri-fold brochures and a copy of "Blueprint for a Clean Bay" booklet are made available to contractors at the planning/building counter.

Final Plan Approval

- Prior to issuance of a building permit for a Group 1 & 2A Project, Public Works Engineering staff will verify that the Stormwater Management Plan has been completed and signed by a Civil Engineer meeting the City's certification requirements, as specified in City Code Section 9.18.140.
- Prior to the issuance of a building permit for a Group 1 & 2A Project, Public Works Engineering staff will verify that the owner(s) of the property have signed a Stormwater Management Facilities Operation and Maintenance Agreement and a Stormwater Management Facility Easement Agreement (copies of templates for these agreements are given in Appendix 'C').

Final Occupancy Certificate

As required by City Code Section 9.18.130, after construction of a Group 1 & 2A Project and prior to the issuance of a building occupancy certificate, Public Works Engineering staff will require the developer's responsible registered civil engineer to inspect the stormwater management facilities, submit a complete set of as-built drawings, and certify on these drawings that:

- The stormwater management facilities were constructed in compliance with the approved plans.
- The Record Drawings show all pertinent constructed dimensions, elevations, shapes, and materials;
- All variations in construction from the approved design plan have been identified, including omissions to and additions from the approved plan; and
- Any changes are in conformance with local, state, or federal regulations.

STANDARD OPERATING PROCEDURES FOR CUPERTINO'S STORMWATER QUALITY REVIEW PROCESS FOR CAPITAL IMPROVEMENT PROJECTS

Project Design and Management

- Most of the City's non-maintenance capital improvement projects (CIPs) are designed using consultants.
- Public Works Department staff act as project managers and are responsible for reviewing plans and specifications and preparing the contract documents for bidding.
- The Public Works Department Project Manager will advise the consultant's design team of any stormwater quality issues at the project's design kick-off meeting.
- The Public Works Project Manager makes sure that the consultant's design team incorporates site design elements and source control measures into the project to avoid post-construction urban runoff problems. The City's Permanent BMP Selection Matrix, the SCVURPPP C.3 Compliance Manual, the "Start at the Source" Design Manual, and the California BMP Handbooks are used as guidance.
- If a CIP is a Group 1 & 2A Project, it is required to meet the stormwater treatment requirements of the City's NPDES Permit, C.3 Provisions.
- Public Works staff attach a copy of the City's Blueprint for a Clean Bay" plan sheet to each set of project plans.
- There is standard stormwater quality compliance contract language for capital improvement projects (a copy of these provisions are included in Appendix 'D'.
- If the CIP is covered under the State NPDES Construction Permit, the Public Works Project Manager will file an NOI.
- If a SWPPP is required, it may be done by the Public Works Project Manager or, by prior arrangement, by the consultant, or, if included in the construction documents, by the CIP contractor.
- If a SWPPP is required, but is written by someone other than City staff (such as the contractor or the design consultant), the Public Works Project Manager reviews it prior to the start of construction.

Project "Deemed Complete"

Any proposed City CIP that would create or replace 10,000 square feet or more of impervious surface would not be subject to the Group 2 C.3 provisions of the City's Municipal NPDES Storm Water Discharge Permit if funding is committed and construction is scheduled by April 15, 2005.

Environmental Review

- Planning and Public Works staff have received training on stormwater issues related to CEQA and are aware of those public projects exempt from the Group 1 & 2A requirements of the City's NPDES Permit, C.3 Provisions.
- If a CIP is not "Categorically Exempt" under CEQA and an Initial Study Checklist is needed, it is prepared by Planning Division staff.
- As needed, the CIP design consulting team would be responsible for preparing additional CEQA compliance documentation, including any environmental assessments and studies.

Project Certification

Upon completion of construction, the consultant's responsible registered civil engineer will inspect the stormwater management facilities, submit a complete set of as-built drawings, and certify on these drawings that:

- The stormwater management facilities were constructed in compliance with the approved plans.
- The Record Drawings show all pertinent constructed dimensions, elevations, shapes, and materials;
- All variations in construction from the approved design plan have been identified, including omissions to and additions from the approved plan; and
- Any changes are in conformance with local, state, or federal regulations.

STANDARD OPERATING PROCEDURES FOR CUPERTINO'S STORMWATER QUALITY REVIEW PROCESS FOR ENCROACHMENT PERMITS

- An encroachment permit is required for non-City construction work in the public right-of-way. The Cupertino Public Works Department issues these permits.
- Public Works Engineering staff review the encroachment permit request and attach the appropriate SCVURPPP construction trifold brochures.
- A copy of the City's "Blueprint for a Clean Bay" plan sheet is also attached to all encroachment permits.

STANDARD OPERATING PROCEDURES FOR CUPERTINO'S PERMANENT BMP OPERATION AND MAINTENANCE INSPECTION PROGRAM

The following are included in Appendix 'E' of the Planning Procedures Performance Standard:

- Permanent BMP Inspection tracking system format (Excel spreadsheet and/or Access database)
- Sample permanent BMP O&M inspection form
- Sample permanent BMP O&M Notice of Violation letter

Selection of Annual Permanent BMP O&M Inspection Sites

- Permanent BMPs at all Group 1 & 2A Project properties will be inspected annually, in March.
- Beginning April 15th 2006, all Group 1 & 2A Project properties will be inspected annually, in March.
- In the future, depending on the total number of Group 1 & 2A properties in Cupertino, the City may develop criteria for inspecting a subset of these sites, as allowed under NPDES Permit Provision C.3.e.

Permanent BMP O&M Inspection Program Responsibilities

- Public Works Engineering Division staff perform development plan review for stormwater quality compliance
- Public Works Engineering Division staff will inform the Public Works Inspector of new Group 1 & 2A Project sites as construction plans for these projects are approved.
- The Public Works Inspector maintains the tracking system for permanent BMP construction and BMP O&M inspection and enforcement for all Group 1 & 2A Projects (using the database format given in Appendix 'E').
- Since the Public Works Inspector will inspect construction of the on-site permanent BMPs at Group Projects and will sign-off on final City-approval for site occupancy, he/she will note when the project is completed in the Access database.
- The Public Works Inspector will submit a Permanent BMP O&M Inspection report for the previous fiscal year using the Access database to the Environmental Programs Manager by July 15th of each year.
- The Environmental Programs Manager will include BMP O&M inspection data in the Annual Report.

Permanent BMP O&M Pre-Inspection Preparation

- The Public Works Inspector will review the Permanent BMP O&M Inspection database at least two weeks prior to beginning annual inspections.
- The Public Works Inspector or Public Works Administrative staff will contact each Group 1 & 2A site owner/manager by telephone to arrange a mutually agreeable inspection appointment.
- Prior to each site inspection, the Public Works Inspector will review the site's Storm Water Management Plan, including any applicable as-built construction plans, for BMP information, including BMP types and locations. At this time, the Inspector will also review the site's current BMP O&M self-certification report, any previous inspection reports, and any necessary special procedures (e.g., inspection forms, underground confined space entry).
- The Public Works Inspector will review the applicable CASQA or SCVURPPP BMP fact sheets and information on the City's BMP Inspection Program, which may be useful in addressing questions or comments raised by BMP owners or operators during the inspection.

- Prior to each site inspection, the Public Works Inspector will assemble the necessary equipment and supplies.

Permanent BMP O&M Inspection and Enforcement Procedures

- Upon arriving at the inspection site, the Public Works Inspector will contact the site manager/owner and explain the purpose of the visit.
- Permanent BMP O&M inspection by the City will be in accordance with the inspection checklist given in Appendix 'E'.
- Inspection results will be logged in writing using the permanent BMP O&M inspection checklist.
- If any deficiency is noted, the Public Works Inspector will document it in writing. The written Notice of Violation will include a copy of the BMP O&M inspection form, including a list of corrective actions needed and a compliance schedule. This Notice will be sent to the Group 1 & 2A property owner/manager within ten working days of an inspection. A sample Notice of Violation is given in Appendix 'E'.
- The Public Works Inspector will enter the permanent BMP O&M inspection information, including any violations, into the Permanent BMP O&M Inspection Access database.
- The Public Works Inspector will notify the Environmental Programs Manager by e-mail of any Group 1 & 2A property with a permanent BMP O&M violation, including information on location, the nature of violation and any needed follow-up.
- The property owner and, if applicable, the site manager, will be instructed to notify the Public Works Inspector within the time period indicated on the Notice of Violation so that the facilities can be reinspected. The inspector will complete a new inspection form, noting whether all recommended maintenance activities have been completed and if any other actions are needed to assure proper operation of the facility.
- If repairs are not undertaken or are not done properly within the time allocated in the compliance schedule, the City will begin enforcement proceedings as provided in City Code Section 9.18.
- Once all necessary repairs have been completed, the Public Works Inspector will note this in the Access database, including the date work was completed and any other pertinent information (such as if City intervention was required to complete corrective work).

STANDARD OPERATING PROCEDURES FOR CUPERTINO'S ANNUAL REPORTING

As required by Permit Provision C.3.n, Cupertino will provide the following information in its annual reports.

- The name or other identifier, type of project, site acreage or square footage, and square footage of new impervious surface on all new development and significant redevelopment projects which meet the Group 1 & 2A definitions of C.3.c. For significant redevelopment projects, the square footage of land disturbance will be reported.

- The treatment BMPs used and numeric sizing criteria employed, the operation and maintenance responsibility mechanism including the responsible party, site design measures used, and source control measures required for projects that must implement treatment measures.

- A summary of the types of pesticide reduction measures required for those new development and significant redevelopment projects to be addressed under C.3.c and the percentage of such new development and significant redevelopment projects for which pesticide reduction measures were required.

Model reporting forms for this information are provided in Appendix 'F'.

Background Data for BMP Type

The *Standard Stormwater Treatment BMP Inspection Data Collection Form* (Inspection Form) lists twenty stormwater treatment BMP types (see Section III). Inspectors, data entry staff and others who use the Inspection Form can refer to the California Stormwater Quality Association (CASQA) and SCVURPPP Fact Sheets for background information. The CASQA Fact Sheets are numbered (see below) and are located in the CASQA *Stormwater BMP Handbook for New Development and Redevelopment,* as well as SCVURPPP's *C3. Stormwater Handbook*. The SCVURPPP Fact Sheets are also located in the *C3. Stormwater Handbook.* Both Handbooks are available online.

<u>CASQA Reference Number</u>
Bioretention TC-32
Drain Insert MP-52
Extended Detention Basin TC-22
Infiltration Basin TC-11
Infiltration Trench TC-10
Media Filter TC-40 and MP-40
Retention/Irrigation TC-12
Vegetated Buffer Strip TC-31
Vegetated Swale TC-30
Vortex Separator MP-51
Water Quality Inlet TC-50
Wet Pond TC-20
Wetland MP-20
Wet Vault MP-50

<u>SCVURPPP Fact Sheets</u> (no identification numbers)
Exfiltration Trench
Hydrodynamic Separator
Planter Boxes
Porous Pavement
Roof Gardens
Underground Detention Systems

Potential Inspection Results with Definitions

If mosquitoes or mosquito larvae are observed within a BMP, report condition to: Santa Clara County Vector Control District, 976 Lenzen Ave., San Jose, CA 95126; phone: 408-792-5010; fax: 408-298-6356; email: timothy.mulligan@deh.co.scl.ca.us; website: www.sccvector.org

ID	Inspection Results	Definitions
I. All BMP Types		
1	No Visible/Apparent Problems	No visible or apparent problems with BMP function. BMP appears to be well-maintained
2	Significant Engineering/Design Flaws	BMP observed to have significant engineering/design flaws which lessen its effectiveness as a stormwater treatment measure.
3	Unauthorized Modifications	Any modification that lessens the effectiveness of the BMP; any modification not authorized by the City, designated agency or other regulatory agency.
4	BMP Destroyed or Eliminated	BMP destroyed, removed or eliminated from property.
5	Trash/Debris Accumulation or Dumping	Trash & debris accumulates within and/or on BMP; trash & debris interferes with proper BMP function; visual evidence of trash/debris dumping.
6	Evidence of Contaminants & Pollution	Evidence or presence of oil, gasoline, contaminants or other pollutants.
7	BMP Access Obstructed	Access to BMP obstructed or limited.
8	Obnoxious Odors	Unpleasant odors within/from the BMP.
9	Fencing - Missing or Broken Bars	Any defect in or damage to the fence or gate that permits easy entry to a facility.
10	BMP Cannot Be Located	BMP cannot be located for inspection.
II. Biofiltration (Bioretention, Vegetated Buffer Strip, Vegetated Swale, Roof Gardens, Planter Boxes)		
	A. General	
11	Uneven or Clogged Flow Spreader	Flow spreader uneven or clogged so that flows are not uniformly distributed across the BMP.
12	Leaking or Malfunctioning Irrigation System	Irrigation system leaking or malfunctioning.
	B. Sediment and Erosion Problems	
13	Sediment Accumulation	Sediment depth exceeds 2 inches on more than 10% of the vegetated treatment area; or sediment interferes with BMP performance.
14	Erosion/Scouring	Eroded or scoured areas due to flow channelization, higher flows, wind or water.
	C. Vegetation Maintenance Issues	
15	Poor Vegetation Coverage	Planted vegetation is sparse or bare or eroded patches occur in more than 10 % of the BMP. Growth of planted vegetation is poor because sunlight does not reach swale.
16	Invasive/Nuisance Vegetation or Weeds	Planted vegetation is excessively tall; nuisance weeds, invasive or noxious vegetation are overgrown; vegetation reduces free movement of water through BMP.
17	Tree/Brush Growth	Growth does not allow maintenance access or interferes with maintenance activity.
	D. Drainage Problems	
18	Standing Water/Excessive Ponding/Soggy Soil	Water is observed within the BMP (between storms) and appears not to drain freely or soil is excessively soggy. Excessive ponding of water within vegetated swale or other BMP.
19	Mosquito Habitat	Suitable habitat exists for mosquito production (e.g., standing water for more than 72 hours in areas accessible to mosquitoes).
20	Clogged or Obstructed Inlets/Outlets	Inlet/outlet clogged or obstructed with sediment and/or debris.
21	Constant Baseflow/Damage	Small quantities of water flow through the vegetated swale, even when it has been dry for weeks, and an eroded, muddy channel has formed in the swale bottom; constant baseflow from irrigation runoff..
III. Detention and Infiltration (Extended Detention Basin, Wet Pond, Wetland, Exfiltration Trench, Infiltration Basin, Infiltration Trench, Retention/Irrigation)		
	A. Vegetation Maintenance Issues	
22	Invasive/Nuisance Vegetation or Weeds	Invasive, nuisance vegetation or weeds are present.
23	Tree/Brush Growth & Hazard Trees	Growth does not allow maintenance access or interferes with maintenance activity; dead, diseased or dying trees; tree growth on berms or emergency spillway >4 feet in height or covering more than 10 % of spillway.
	B. Sediment and Erosion Problems	
24	Sediment Accumulation	Detention BMPs- sediment on pool bottom preventing water flow in/out of the facility. Infiltration BMPs -Sediment in storage areas, rock filters, and pre-settling ponds and vaults preventing infiltration.
25	Erosion	Eroded damage over two inches deep; potential for continued erosion; any erosion on a compacted berm embankment; soil from adjacent areas washes into/on BMP; continued erosion is prevalent.
	C. Animal Pests	
26	Rodent Holes	If facility acts as a dam or berm, any evidence of rodent holes, or any evidence of water piping through dam or berm via rodent holes.
27	Insects (Wasps, Hornets, Bees)	Insects (wasps, hornets, bees) interfere with maintenance activities. Excessive or nuisance levels.
	D. Drainage Problems	
28	Standing Water/Excessive Ponding/Soggy Soil	Water is observed within the BMP (between storms) and appears not to drain freely or soil is excessively soggy. Excessive ponding of water within vegetated swale or other BMP.
29	Mosquito Habitat	Suitable habitat exists for mosquito production (e.g., standing water for more than 72 hours in areas accessible to mosquitoes).
30	Empty Cell	First cell of wet pond does not hold water.
31	Unlevel Berm Surface	Unlevel internal berm dividing wet pond cells

Potential Inspection Results with Definitions

ID	Inspection Results	Definitions
III. Detention and Infiltration (Extended Detention Basin, Wet Pond, Wetland, Exfiltration Trench, Infiltration Basin, Infiltration Trench, Retention/Irrigation) continued		
	E. Unique to Certain BMPs	
32	Uneven or Clogged Flow Spreader	Flow spreader uneven or clogged so that flows are not uniformly distributed across the BMP.
33	Oil Sheen on Water (Wet ponds)	Prevalent and visible oil sheen.
34	Damaged/Missing Bars (Debris Barriers)	Bars are missing, loose, bent out of shape, or deteriorating due to excessive rust.
35	Leaking or Malfunctioning Irrigation System	Irrigation system leaking or malfunctioning.
36	Embankment Settlement Lower Than Design Elevation	Embankment settlement four inches lower than the design elevation.

IV. Structural, Non-landscaped Based (Drain Insert, Hydrodynamic Separator, Media Filter, Porous Pavement, Vortex Separator, Wet Vault, Water Quality Inlet, Underground Detention Systems)		
	A. General	
37	Mosquito Habitat	Suitable habitat exists for mosquito production (e.g., standing water for more than 72 hours in areas accessible to mosquitoes).
38	Access Cover Damaged/Difficult to Remove/Not in Place	Cover cannot be opened, corrosion/deformation of cover; maintenance person cannot remove cover using normal lifting pressure; cover is missing or only partially in place.
39	Deteriorating Paint or Protective Coating	Part or parts that have a rusting or scaling condition and have affected structural adequacy.
40	Locking Mechanism Not Working	Mechanism cannot be opened by one maintenance person with proper tools. Bolts into frame have less than 1/2 inch of thread (may not apply to self-locking lids).
	B. Ineffective Filter Material, Liners and/or Membranes	
41	Sediment Accumulation	Sediment depth exceeds acceptable levels (varies between BMPs)
42	Ineffective Media Insert/Filter Media	Media inset/filter media ineffective in doing intended function and needs to be replaced; filter is beyond the typical average life of product.
43	Rock Lining Out of Place/Missing (Sand Filters)	Soil beneath the rock lining is visible.
44	Visible Liner with Holes or Damaged	Liner is visible and has more than three 1/4-inch holes in it or is damaged.
45	Compromised Membrane or Roof Structure	Membrane or roof structure is compromised by either roots and/or water discharge.
46	Short Circuiting	Flows do not properly enter filter cartridges (media filters); seepage/flows occur along the vault walls and corners (sand filters); Sand eroding near inflow area (sand filters); flows become concentrated over one section of the sand filter rather than disperse (sand filters).
	C. Pipe or Pipe Joint Problems	
47	Damaged Pipes	Any part of the piping that is crushed, deformed, damaged, in need of repair or any other failure to the piping; protective coating is damaged.
48	Missing Debris Barrier/Not Attached to Pipe	Entire barrier is missing or is not attached to pipe.
49	Sediment in Drain Pipes/Cleanouts	Drain pipes and/or cleanouts are full of sediment and/or debris.
50	Joints Between Tanks/Pipe Section	Any openings or voids allowing material to be transported into facility.
51	Tank Pipe Bent Out of Shape	Any part of tank/pipe is bent out of shape more than 10 % of its design shape.
	D. Underground Vaults/Containers, Chambers, Tanks Issues	
52	Sediment Accumulation	Sediment depth exceeds acceptable levels (varies between BMPs), 20 % of the diameter of the pipe/design depth or interferes with proper BMP function.
53	Vault Structure Damage	Vault structures which are observed to have cracks in walls, bottom damage to frame and/or top slab.
54	Damaged Baffles and/or Weir	Baffles which are corroded, cracked, warped and/or showing signs of failure as determined by maintenance person. Weir is observed to be damaged by maintenance person.
55	Access Ladder Damage	Ladder is corroded or deteriorated, not functioning properly, not securely attached to structural wall, missing rungs, has cracks and/or is misaligned.
56	Oil Accumulation (Water Quality Inlet, Vortex Separator)	Oil accumulations that exceed 1-inch at the surface of the water.
57	Blocked, Damaged or Plugged Air Vents	One-half of the cross section of a vent is blocked at any point or the vent is damaged.
	E. Unique to Certain BMPs	
58	Damaged Coalescing Plates (Water Quality Inlet)	Plate media broken, deformed, cracked and/or showing signs of failure.
59	Clogged Porous Pavement	By visual inspection, little or no water flows through pavement during heavy rain storms, usually causing ponding; clogging due to debris, organic matter and sediment.
60	Damaged Internal Walls (Sand Filter Media)	Internal walls are corroded, cracked, warped and/or showing signs of failure as determined by maintenance person.
61	Prolonged Flows (Sand Filter Media)	Sand is saturated for prolonged periods of time (several weeks) and does not dry out between storms due to continuous base flow or prolonged flows from detention facilities.

V. Other		
62	Other	Inspection results which are not defined by one of the listed fields.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report: New and Redevelopment Requirements – Construction Inspection

Cupertino

Activity	Permit Item Source	FY05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
New Development And Construction Controls – Construction Site Inspection					
Inspection Tracking	Const PS-5	City will include a summary of the year's written inspection notices and follow-up actions in each year's annual report.	The City uses a computer database to collect and track compliance activities. The inspection summaries for FY 05-06 are attached immediately following this section.	9/06 AR and ongoing	Public Works Engineering
Staff training	Const PS-6	Hold annual training for building dept. and public works staff.	On Dec. 8, 2005, Public Works Engineering and Building Inspection staff attended Regional Board training on construction site planning and management for compliance with Phase I and II NPDES requirements. On January 10, 2006, in-house training was held for Building inspectors on the Construction Inspection Perf. Stand., construction BMPs, source control BMPs and inspection notices. On June 6, 2006, public works inspection staff attended the SCVURPPP workshop on Inspecting Stormwater Treatment BMPs.	11/05	Public Works Engineering
Contractor/Developer Outreach	PS-8	Provide outreach materials to contractors and developers on construction BMPs and compliance with the State General Construction Activity Storm Water Permit	In Dec. 2005, the City added a link between the Community Development section and the Stormwater Quality Regulation section of its web site. In September 2005, the City's Building Official prepared a hand-out regarding runoff pollution prevention. The hand-out is attached to each building permit and a copy is included at the Building Division section of the Community Development's web site (see attached copy).		Building Division, Public Works Engineering, Information Services

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report: New and Redevelopment Requirements – Construction Inspection

Cupertino

Activity	Permit Item Source	FY05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Effectiveness Evaluation	Const PS-8	Review and evaluate the effectiveness of city efforts.	In 05-06 there were a total of 72 construction inspection incidents reported. This is more than twice as many as the previous year. This is most likely due to extra efforts taken to instruct inspectors to document incidents. One inspector has reported that it can be a challenge to find the appropriate party with which to discuss a violation. For example, you may have a driver delivering landscaping materials that is unaware of BMPs. This concern will be addressed in future trainings. After reviewing the incidents recorded in the database, a continuous improvement task could include more information on how to categorize incidents. Over half of the incidents were reported as “inadequate BMPs”. It may be possible to be more specific after further training.	9/06 AR and ongoing	Public Works Dept.

FY 05- 06 Annual Report

Attachment K

Pesticide Management Activities

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report—Pest Management

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
I. Municipal Pesticide Use ***Goal I.A.*** *Eliminate all unnecessary municipal pesticide use (particularly organophosphate (OP) pesticide use) and implement Integrated Pest Management (IPM) techniques.*				
I.A.1	Track pesticide use on municipally owned property. (PS #9). The results are reported in the AR.	City has collected information on pesticide use from four groups that apply pesticides on city property: • Streets Dept. (on medians) • Parks Dept. (In the parks) • Facilities maintenance (grounds surrounding city buildings) • Golf course All of these departments are submitting copies of the monthly County Ag reports as well as the use form that the city has prepared. This seems to be adequate at this time (with the additional information about the type of pest that is being controlled). No organophosphates pesticides are being used.	Ongoing	Corp Yard Supervisor & Director, Park & Rec
I.A.3	Continue to refine and implement SOPs and BMPs for implementing the IPM policy. (PS #3).	The city has developed pest-specific and location-specific SOPs for pest management operations at city facilities. Any updates take place on an ongoing basis.	Ongoing	Corp Yard Supervisor & Director, Park & Rec
I.A.5	Continue to ensure that any contractor employed to conduct pest control and pesticide application on municipal property engages in pest control methods consistent with the IPM policy adopted by the agency (PS #6).	The city employs two contractors for pest management: 1. RPM Complete Pest Service (for structural and building grounds control): The principal has completed the SOPs that he follows when controlling ants, rats, and cockroaches. His work will continue to be	Ongoing	Corp Yard Supervisor & Director, Park & Rec

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Work Plan—Pest Management

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		monitored by the city's Facilities Supervisor. 2. Professional Turf Management (contractor for maintenance of the golf course grounds). Specific IPM requirements are called out in the contract. Their work will continue to be monitored by the city's Recreation Supervisor at Blackberry Farm Golf Course. Pest-specific SOPs have been jointly established by the contractor, the city's in-house Pest Control Advisor, city Environmental staff, and the city's Recreation Supervisor An overview of SOPs takes place during annual discussions/meetings between city staff and contractors and updates take place on an ongoing basis.		
I.A.6	Conduct annual, city facility search of chemical storage areas for pesticides no longer legal for application, and properly dispose of them. (PS #10)	City staff conducted their annual search and no illegal pesticides were found.	Annually in July	Corp Yard Supervisor & Director, Park & Rec
MM I.A.1.	Document completion of tasks in annual reports. Use pesticide-tracking process to document pesticide use.	A summary report on pesticide use is included, following this document. It compares use in FY 04-05 and FY 05-06.	In 05-06 AR, annually	Corp Yard Supervisor & Director, Park & Rec & Envt'l Div

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Work Plan—Pest Management

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
Goal I.B. *Raise awareness of all municipal employees and train employees who apply pesticides for the municipality about the municipality's IPM Policy and/or IPM techniques as appropriate.*				
I.B.1	Ensure that employees who apply pesticides for the agency obtain the appropriate County Ag and DPR- required training (PS #5a).	Included in "Pest Management Training FY 2005-2006," attached.	Spring 2006, annually	Corp Yard Supervisor & Dir., Park & Rec
I.B.2	Provide annual training on the IPM Policy, SOPs, and BMPs, and the latest IPM techniques to employees within departments responsible for pesticide application (PS #5b).	This was covered in the trainings/meetings held on 2/2/06, 4/13/06, and 5/4/06 with staff. Additionally, affected staff is trained individually by the city's PCA when specific pest problems occur. See "Attachment N" Staff Training Summary Table.	4/06, annually	Corp Yard Supervisor & Director, Park & Rec & Envt'l Div
I.B.3	Annually inform employees who are not authorized to apply pesticides, that they cannot use over-the-counter pesticides in the workplace (PS #5c)	This information was provided via a Citywide email 5/4/06.	6/06	Envt'l Div
MM I.B.1.	Document and evaluate effectiveness of annual staff training.	From discussions with the city PCA and contract PCA, the industry trend is definitely toward IPM, and this is what is discussed in their professional meetings and trainings. In meetings with staff and contractors, they are all well aware of the city's IPM policy and have conveyed examples of IPM practices in the field such as baiting, mulching, and replacing plants with pest resistant plants. Staff continues to work with contractors to improve the flow of info. for reporting and to ensure policies and SOPs are followed as	Annually in AR	Envt'l Div

Santa Clara Valley Urban Runoff Pollution Prevention Program

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
		written.		
II. Public Education and Outreach ***Goal II.A.*** *Increase awareness of IPM so target audiences recall less toxic pest management messages and adopt IPM behaviors. Target audiences include residential pesticide users, professional pest control businesses, customers of professional pest control businesses, pesticide retailers, school districts, and other special districts (PS # 7).*				
II.A.1	Assist with local implementation of the Watershed Education & Outreach (WE&O) Campaign[1], which will target the general public and include messages about less-toxic pest control and proper disposal.	City staff continues to participate in the WE&O group. The city's website has a link to the Watershed Watch campaign website. The Program conducted advertising in 05-06. An RFP was released in July 05 for WE&O contract services beginning in FY 06-07. Carl and Manor Advertising were selected as the new consultant for the group and have begun putting together the FY 06-07 campaign.	Ongoing	Envt'l Div
II.A.2	Assist Prgm in developing simple, effective, targeted messages regarding proper pesticide use and disposal, effects on water quality, and IPM.	Staff continues to review new fact sheets and ads.	Ongoing	Envt'l Div
II.A.4	Identify and attend local community events and distribute outreach material. 1. Distribute literature at Backyard Compost workshops 2. Install an IPM-products and literature display in the Community Ctr. for 2 wks	Literature is stocked and available for compost teachers (5 workshops were scheduled to be held in Cupertino in 05-06. One of the 5 workshops was cancelled due to lack of registration). Staff continues to stock IPM fact sheets at the Community Ctr. and the city library, "Pest Bugging You?" Grow It Guides, and Bay Begins at City Hall.	1. At 5 workshops/yr 2. 5/06	Envt'l Div

[1] Funded by all Co-permittees in FY 01-02

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Work Plan—Pest Management

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
II.A.6	Review existing city web link, on the Cupertino city website, to any IPM website developed by the WE&O campaign.	The city website has a web link to the Watershed Watch campaign website.	Review annually	Envt'l Div
II.A.9	Continue to fund BASMAA Regional Media Relations Campaign[2] featuring pitches to Bay Area media and responses to breaking news on pesticide-related topics.	The Program funds BASMAA baseline projects, including Regional Media Relations Campaign.	Ongoing	N.A.
II.A.10	City staff to provide IPM-related press releases to local media—using Program generated materials if they are developed.	An IPM-related article appeared in the city newsletter, the Scene about pest specific fact sheets available in the May issue.	Annually in Spring, as appropriate	Envt'l Div
II.A.12	Continue to assist with implementation of local components of a "Pesticide User Outreach" project targeting residential and commercial users (see Program FY '04-'05 Work Plan).	City staff will continue to provide support to Program staff for the retail nursery IPM outreach. Includes IPM store partnership; working with County HHW Prgm, and general support of SCVURPPP and BASMAA IPM-related outreach activities.	Ongoing Complete annually	Envt'l Div
II.A.13	Inform local elementary and high school districts, and local sanitary district, of any pertinent opportunities for IPM training.	Nareesh Duggal of Santa Clara County contacts these groups as trainings become available. There were not any trainings held in FY 05-06.	As future workshops are announced	Envt'l Div
II.A.14	Internal outreach on IPM to encourage employees to use IPM techniques away from work: 1. Set up display of less-toxic products and IPM literature at Corporation Yard and City Hall. 2. Distribute IPM fact sheets electronically to city employees through e-mail.	City staff set up a literature display in May for city employees at city hall and the corporation yard. An email was sent to all employees about the display and a link was provided to the IPM fact sheets on the Watershed Watch website on May 4, 2006.	5/06	Envt'l Div

[2] Funded by all Co-permittees each year.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Work Plan—Pest Management

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
MM II.A.1.	Document or estimate numbers of residents reached by outreach efforts and media advertising	Articles in the city's monthly newsletter (The Scene) are reportedly read by 87% of residential households, or about 16,677 households. (The city performs a telephone survey every 3 years). Three articles have been published in the newsletter in FY 05-06. It appears hundreds of each type of IPM fact sheets have been taken from our displays in the Community Center and the City library.	Annually, in AR	Envt'l Div
Goal II.B. *Educate pesticide retailers and consumers about less toxic pest control products and promote the sale of such products.*				
II.B.1	Continue to fund and participate in the BASMAA Regional IPM Partnership	Program funds BASMAA baseline projects, including Regional IPM Partnership.	Ongoing	Envt'l Div
II.B.2	Continue to support the IPM Store Partnership Program.	Two nurseries participate in Cupertino. Nursery employee training provided by Program contractor, Annie Joseph. SCVURPPP staff will provide re-stocking visits.	Annually	Envt'l Div
MM II.B.1.	Assist Program in documenting number of participating stores, materials distributed, employees trained, and cost-effectiveness of the IPM Store Partnership Program.	Will be evaluated by Program staff. Two stores participate in Cupertino; Summerwinds and Yamagami's. Training was conducted for Summerwinds employees 1/31/06 and 2/1/06. Training was conducted for Yamagami's employees 2/1/06.	Annually	Envt'l Div

Santa Clara Valley Urban Runoff Pollution Prevention Program

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
III. Pest Control Operators (PCOs)				
Goal III.A. *Minimize pesticide use by PCOs contracted for structural pest control and landscape maintenance.*				
III.A.4	Require PCOs contracted for municipal applications to use pest control methods consistent with the municipality's IPM policy (through contract specifications). Specifically, require contractors to: a) follow the agency's IPM policy, BMPs, and SOPs; b) provide evidence of current IPM training, when feasible; and c) provide documentation of pesticide use on agency property to the agency in a timely manner (PS#6).	IPM-specific specifications are included in the contract for our city's golf course maintenance contractor (as of Jan '02), An overview of the IPM policy, BMPs and SOPs takes place during annual discussions/meetings between city staff and contractors. The golf course contractor provided a list of training classes, see "Pest Management Training" following this section. The contractor has assured the City that IPM is covered in these seminars and meetings. IPM-specific specifications are included in the contract for our city's golf course maintenance contractor,	Ongoing Golf course employee annual training infosubmitted to the city in July 06	Corp Yard Supervisor & Director, Parks & Rec & Envt'l Div
MM III.A.1.	Document pesticide use by PCOs on municipal property. City will strive, over time, to resolve difficulties associated with reporting use by contractors and leaseholders, and other data collection limitations.	Pesticide use forms have been submitted to the city's Environmental Div for consolidation. See pesticide use report summary, following this section.	In the Annual Report	Corp Yard Supervisor & Director, Park & Rec
Goal III.B. *Require all PCOs to implement Best Management Practices (BMPs).*				
III.B.2	Require PCOs contracted by municipalities to implement BMPs through contract specifications.	See III.A.4, above.	Ongoing	Corp Yard Supervisor & Director, Park & Rec

Santa Clara Valley Urban Runoff Pollution Prevention Program

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
IV. Commercial Businesses				
Goal IV.A. *Determine the extent of commercial business employees' use of pesticides (i.e., pesticide applications not performed by a licensed PCO) and conduct appropriate outreach regarding less toxic pest management.*				
IV.A.2	Assist in implementation of education programs that target commercial businesses, per recommendations developed in Program work plan—with restaurant focus.	Commercial business IPM outreach currently includes: restaurants, retail nurseries, and new development: The Program has provided the County Health Dept. restaurant inspectors with copies of "Don't Set a Table for Pests" brochure that inspectors are distributing to new or remodeled food facilities throughout the County. In Cupertino, outreach to restaurants is performed by County Health inspectors (through an agreement between the City and the Health Dept.) The city's nonpoint source inspector also inspects restaurants as needed and distributes public information as needed. The Program's retail IPM training contractor held trainings for Summerwinds and Yamagami's nurseries in Cupertino. Training was conducted for Summerwinds employees 1/31/06 and 2/1/06. Training was conducted for Yamagami's employees 2/1/06. The Program's Pest-Resistant Plant List is included in the City's development applicant information packet (as of July 2002). .	Ongoing	Envt'l Div

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Work Plan—Pest Management

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
MM IV.A.1.	Document outreach efforts targeting businesses.	The County Health inspectors visited 268 food facilities in Cupertino and conducted 795 inspections. It is assumed, that by providing training, the inspectors know to distribute outreach materials as needed.	In the Annual Report	Envt'l Div
V. Household Hazardous Waste Collection ***Goal V.A.*** *Provide pesticide disposal services through household hazardous waste (HHW) collection programs for all residents and small businesses, and encourage use of these programs.*				
V.A.1	Ensure that adequate pesticide disposal services exist for residents and conditionally exempt small quantity commercial generators.	Adequate services are available; the City participates in the Countywide HHW program.	Ongoing	Envt'l Div
V.A.3	Work with HHW collection agencies to support, enhance, and help publicize programs for proper pesticide disposal (PS #7).	The city is working with the County HHW program on developing and publicizing their programs. See PI/P outreach chart for specific complementary outreach.	Ongoing	Envt'l Div
V.A.5	Provide hazardous waste disposal information to residents, through 3-4 city newsletter articles, 3 ads in local newspaper, flyers at city library, community center, and City Hall.	City uses articles in the city's monthly newsletter, ads in the local newspaper, displays in the community center, and flyers in the library and community center, to advertise the HHW and small business hazardous waste disposal programs. See PI/P chart.	Periodically	Envt'l Div

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Work Plan—Pest Management

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
MM V.A.1.	Document that household hazardous waste collection programs adequately serve residents and businesses and that any exchange programs do not exchange organophosphate or banned pesticides.	The city currently provides enough funding to the County HHW program to service the disposal needs of over 1,000 households (or 5% of the residential households in the city). The county HHW program does not re-distribute any organophosphate or banned pesticides.	Annually	Envt'l Div
VII. New Development ***Goal VII.A*** *Minimize pesticide use at new and redevelopment sites.*				
VII.A.2	Consider pest-resistant landscaping and design features in the design, landscaping, and environmental reviews of proposed development projects. (C.9.d.ii.)	All applicants for a development permit are given information on pesticide-resistant plants. Starting in 6/04, each applicant is also given the SCVURPPP brochure, *Landscape Maintenance Techniques for Pest Reduction*, and the City's list of pesticide control measures (based on the SCVURPPP's model pesticide control conditions of approval) to be incorporated into the site design. City's Permanent BMP Selection Matrix includes reference to pest-resistant plantings.	Ongoing	Envt'l Div & Planning Dept.
VII.A.4	Collect information and report a summary of types of pesticide reduction measures required for development projects and the percentage of projects for which pesticide reduction measures were required. (C.3.n.5)	All projects (100%) are given a copy of the document "Pesticide Control Measures for Development Projects", listing six different control measures. Starting June, 2005 planners include a COA for all Group 1 projects requiring a landscaping plan to include pesticide reduction measures.	In the Annual Report	Envt'l Div & Planning Dept.

Santa Clara Valley Urban Runoff Pollution Prevention Program

Cupertino

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
VIII. Monitoring and Science ***Goal VII.A.*** *Participate in coordinated monitoring efforts to support pesticide TMDL development and implementation.*				
VIII.A.1	Continue financial support of the Regional Monitoring Program (RMP) through city contribution to Program budget.	The city continues to provide financial support through the annual assessment.	Annually	Envt'l Div
X. Review and Revision of Work Plan ***Goal X.A.*** *Implement a work plan that includes appropriate goals, actions, and monitoring mechanisms to reduce pesticide-related toxicity in urban runoff.*				
X.A.1.	Review and continuously improve the goals, actions, and monitoring mechanisms of the work plan considering results of self-evaluations, comments from Regional Board staff and other interested parties, and results of local performance review meetings, if any.	The Pesticide Work Plan has not been revised in FY 05-06 and there were no comments from Regional Board staff.	Annually	Envt'l Div
MM X.A.1.	Revise work plan to include any continuous improvement items. Report on completion of work plan tasks in Annual Report.	No continuous improvement items were identified by the RWQCB for Cupertino.	Annually; submit work plan updates in March. AR submitted in Sept.	Envt'l Div

FY 2005-2006 Annual Report
Cupertino

Pest Management Training 2005-2006

Cupertino employees:

Qualified Applicators Certified

The following Cupertino employees are Qualified Applicators Certified (they are members of the Pesticide Applicators Professional Association, who keeps track of the 20 hours of required training necessary in a two-year period.):
Bill Bridge, Shawn Tognetti, John Bisely, Karl Olsen, Mike Laitila, Chris Mertens, Brian Gathers, Cliff Mabutas, Gordon Jensen, John Hetland, Marc LaBrie, Mike Drake, Peter Arnst, Russ Polito, Mike Loomis, Cindy Martinez, Roger Winslow, Todd Hembree, Brad Alexander, Abe Cariaga, Ralph Garcia, Richard Garcia, Robert Hook, Angel Lopez, Diane Mahan, Jesus Moreno, Theodore Tefft, Peter Terada, Leonard Walton.

Cupertino's Pest Control Advisor

The city's Pest Control Advisor, Diane Mahan, attended the following recent training sessions in FY 05-06. The PCA is a member of the California Association of Pest Control Advisors, who keeps track of the 40 hours of required training necessary in a two-year period.

2/28/06	Target Meeting - Trees
4/04/06	Target Aquatic Class
5/11/06	NCTLL Meeting - Turf
5/16/06	Target Field Day

City contractors:

The city's structural pest control contractor, Keith Reuter, of RPM, attends monthly meetings of the Pest Control Operators Association of CA where discussions of IPM take place. He also attends training to satisfy the Structural Pest Control Board training requirements to maintain his license.

The city's Golf Course maintenance and pest control contractor, Professional Turf Management, has a PCA, Don Naumann, who is required to have 40 hours of training in a two-year period. He has attended the following training sessions.

7/19/05	Golf Course Management
11/14/05	Sustainability for Your Course
12/05/05	IPM & Turfgrass Trends
3/20/06	2006 NCGA/USGA Green Section Meeting
4/10/06	Controlled Release Fertilizer

Pesticide Use Summary FY 05-06

IPM Policy:
On October 7, 2002 the City of Cupertino adopted an IPM policy that calls for city employees and city contractors to use reduced-risk Integrated Pest Management techniques, giving preference to reasonably available non-pesticide alternatives, and reduced-risk pesticides. Each Department, that is responsible for pest control, will develop a plan to ensure the long-term prevention or suppression of pest problems, while reducing or eliminating the need for chemical pest controls (to the maximum extent feasible), with minimum negative impact on human health, non-target organisms, and the environment.

Guidelines for Chemical Treatment:

- If corrective action is necessary, select non-chemical physical and biological treatments before choosing chemical treatments, wherever possible.
- Use products that are included in the City of San Francisco's "Reduced Risk Pesticide List", wherever possible. If a chemical product is not on that list, consult with the city's Pest Control Advisor to discuss its use.
- Favor the use of bait stations over sprayed or broadcasted pesticide applications.
- City staff and city contractors should avoid the use of Toxicity Category I pesticides (the label's signal word is "Danger").
- No products containing Clopyralid, Diazinon or Chlorpyrifos (Dursban) can be used by city staff or a city contractor on city property or property maintained by the city.

SOPs:
Pest-specific and site-specific Standard Operating Procedures have been established for all typical pest control situations.

Availability of data on pesticides used:
Stormwater staff consolidated the pesticide use data. A summary table follows this section.

Changes in city pesticide use:

- The City's Contractor for the golf course at Blackberry Farm reported using gopher traps instead of chemical controls.
- The City's streets department utilized natural biological controls to eradicate a whitefly infestation in Cupertino's Rancho Rinconada neighborhood. Parasite wasps and ladybugs were released into the infested area May '05 to August '06. The infestation no longer exists thanks to these controls.
- The City's Contractor is removing diseased trees in lieu of treating with insecticides.
- In the winter, the City's Contractor is whipping greens to remove dew on days that mowing is not required in order to prevent diseases from forming.
- The City's Contractor is physically removing tulles in lakes instead of using chemicals.
- The City's Contractor is physically removing weeds on greens; no spraying would then be needed.
- The City's Contractor is fertilizing the fairways in order to strengthen the grass plants, which minimizes the amount of herbicides needed.

- The City's Contractor is using larger amounts of organic fertilizers to create a healthier plant and reduce dependency on fungicides.

Continued IPM practices:

- Chlorpyrifos, Clopyralid, and Diazinon are no longer used.
- City does not use copper algaecides in the pond at the golf course.
- The cities contractor is hand-pulling English Daisies on greens only. In FY 04-05 they have virtually eliminated English Daisy growth. Currently we are down to about a dozen total.
- City crews are using less herbicide on school property since installing drip irrigation systems.
- Pentachloronitrobenzene (in Scotts's FFII) (not on the SF list) use will be permitted on the golf course greens in the short-term for pink show mold control. This fungicide is specific to pink snow mold. We currently prefer its limited use to the use of a more broad-spectrum fungicide such as Heritage (on the SF list). Other alternatives will continue to be researched.
- Thiophanate-methyl (on the SF list) (in Scotts ProTurf Systemic Fungicide) may be used for fungus control on the golf course greens against Dollar Spot and works on pink snow mold.
- The Pentachloronitrobenzene and the Thiophanate-methyl are rotated to eliminate pest resistance.
- The golf course contractor will continue to use canola oil instead of petroleum oil as a pesticide sticker.
- Roundup (Glyphosate) (on the SF list) continues to be the pesticide used in the greatest quantity on city property.
- City crews are chipping tree limb trimmings and using for mulch to keep weeds down in parks on dirt areas. In these areas, spraying is not necessary. A new trail is maintained by using all chips from the site, none are disposed.
- The City's Contractor for the golf course at Blackberry Farm reported culturally using organic fertilizers, vertically mowing to break up disease patterns, using less nitrogen so less disease and less watering.
- He is using bark chips and compost for weed control under trees instead of using pre-emergence herbicides as well as using compost with an organic fertilizer on the tees.
- City's Contractor has replaced many Monterey Pine trees on the golf course with native California redwood, because they are pest resistant.
- The City's Contractor reported killing weeds around the lake at the golf course by lowering the water level and using a weed eater.

Annual Product Use, City-wide
FY 05-06

The following table summarizes the use of specific pesticide products on city property in the fiscal years 04-05 and 05-06.

These totals combine data from all Divisions.

Active Ingredient	Target Pest	In SF list?	Locations	FY 04-05	FY 05-06
Aluminum Phosphide:	Rodents	No	Parks	.0363 lbs	
Cyfluthrin:	Ants	Yes	Facilities	3.36 oz	.5 lbs
Deltamethrin	Pests	No	Facilities	.19 oz	
Digliocolamine	Weeds	Yes	Golf		1 lbs
Dithiopyr:	Weeds	No	Medians	3.14 lbs	.376 lbs
Fipronil:	Ants	Yes	Facilities	.36 oz	.438 lbs
Fluridone	Weeds	Yes	Golf		.5 lbs
Glyphosate	Weeds	Yes	Various	138.01 lbs	192.22 lbs
Halosulfuron-methyl	Weeds	No	Golf	1.055 oz.

Cupertino

Program Work Plan Task	Activity	CI Item Source[1]	FY05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Mercury Control Program						
I. Municipal Use of Mercury-Containing Products						
Goal I. Eliminate all unnecessary municipal use of mercury-containing products and establish proper disposal methods for products that cannot be eliminated.						
I.F	Implement guidelines for mercury reduction	C.9.c	Implement guidelines for mercury-containing products reduction and mgmt	Guidelines have been implemented (see next task).	Ongoing	Public Works
I.F.1	Train staff in Mercury spill cleanup	C.9.c	Train corporation yard staff and facilities maintenance staff in correct procedures to clean up: a. A broken fluorescent lamp b. A broken thermometer or thermostat	Annual training was held on 3/2/06 for the streets, parks maintenance, facilities and other corporation yard staff. This workshop featured proper handling of universal waste as well as recycling and disposal protocol.	March 06	
I.F.2	Annual survey of mercury-containing products used by city staff.	C.9.c	City staff to annually report on: a. The number of lamps recycled. b. Any other Hg-containing product that is used by city staff.	City staff has reported a total of 863 fluorescent lamps recycled for FY 05-06. No other mercury containing products were reported.	Report in 05-06 AR	
MMI	Mercury control program	C.9.c	Document completion of tasks in annual reports. Use mercury-containing product reporting guidelines.	1. The city has submitted the "Mercury-Containing Product Survey" results. 2. Cupertino's City Council adopted a policy requiring the virtual elimination of mercury from controllable sources, affecting urban runoff from municipal operations in March 2004. 3. High priority mercury-containing products are no longer in use. The city stormwater staff has discovered city	Annually, In AR	Public Works

Cupertino

Program Work Plan Task	Activity	CI Item Source[1]	FY05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
				maintenance staff is using only low- or no- mercury lamps. No mercury switches or relays are in use. 4. City maintenance staff has followed a specific protocol for disposal of fluorescent tubes. They are collected as universal waste and sent to a recycling facility for mercury recovery. 5. Corp yard staff trained on mercury policy and what to do when a fluorescent tube breaks. 6. E-mail sent to all city employees (4/06) informing them of a free mercury-free thermometer exchange for an old mercury thermometer. 7. Articles were placed in the city newsletter regarding proper disposal of fluorescent tubes and mercury thermometer exchange, October '05 and April '06. Brochures containing info on proper disposal of fluorescent tubes are distributed at city facilities. 8. Countywide HHW program distributes outreach materials re: mercury.		
II. Household Hazardous Waste Collection **Goal II.** Provide mercury-containing products disposal services through household hazardous waste (HHW) collection programs for residents and small businesses, and encourage use of these programs.						
II.B	Mercury control program	C.9.c	Provide mercury-containing products disposal services for residents and small businesses.	The city has provided adequate funding dedicated to provide hazardous waste disposal services for Cupertino residents since 1992. An additional $8,000 was added at the end of the fiscal year for HHW services due to increased demand.	Ongoing

Cupertino

Program Work Plan Task	Activity	CI Item Source	FY05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
II.D	Document products disposed at HHW Program	C.9.c	Implement guidelines for documenting and reporting quantities of mercury-containing products disposed.	See Table 2.	Ongoing, AR	Public Works
III. Monitoring and Science **Goal III.** Participate in coordinated monitoring efforts to support mercury TMDL development and implementation, including assessment of air pollution sources of mercury and concentrations of mercury in sediment.						
III.A	Financial support for RMP.	C.9.c	Assist Prgm to continue to provide financial support for the Regional Monitoring Program (RMP). Support the Prgm's continued participation in the RMP steering committee and technical review committee.	The city supports the RMP and reviews meeting summaries through the Management Committee.	Ongoing	
III.B	Assist Prgm in support of regional monitoring plan	C.9.c	Assist Prgm to provide financial and staff support for a coordinated regional plan to collect data for the mercury TMDL, as defined in the RWQCB/BACWA/BASMAA MOU.	The city supports the mercury TMDL process, being handled at the regional level.	Ongoing

V. Public Education and Outreach **Goal V.** Increase awareness of proper disposal of mercury-containing products and available non-mercury containing alternatives. Target audiences include residential, commercial, and industrial users and municipal employees.						
V.A.	Mercury control program outreach activities:	C.9.c	Assist the Prgm in developing various outreach programs to educate target audiences about proper disposal of mercury-containing products and alternative non-mercury containing products. Outreach programs will include, but may not be limited to, the following subtasks:	Staff participated in the Work Group.	See below.	
V.A.1	Residential – Fluorescent light recycling outreach	C.9.c	Continue our fluorescent light recycling outreach program to educate residential users and encourage proper disposal of fluorescent lights. Primarily articles in the Scene, and fliers in Quinlan Ctr and the Library.	City staff participates in the review of outreach products associated with the Mercury Outreach group. Two articles were placed in the city newsletter regarding proper disposal of fluorescent tubes, October '05 and April '06. Brochures containing info on proper disposal of fluorescent tubes are distributed at city facilities. Mercury Work Group implemented and expanded a residential and small business fluorescent light-recycling program at various hardware stores throughout the County. In 05-06 67,943 pounds of bulbs equaling a total of 277,000 feet were collected.	Ongoing	
V.A.2	Small businesses—Fluorescent light recycling	C.9.c	Continue to assist the Prgm to develop and implement a fluorescent light recycling outreach program to educate small businesses and CESQGs and encourage	The staff has participated in planning sessions about business disposal. Mercury Work Group implemented and expanded a residential and small business	Ongoing

	outreach		proper disposal of fluorescent lights. Publish articles in the Scene, and distribute fliers at the Planning/Building lobby, addressing Universal Waste exemption end dates for CESQGs.	fluorescent light-recycling program at various hardware stores throughout the County.		
V.A 3	Auto shops outreach	C.9.c	Coordinate with city inspectors to integrate mercury outreach into their routine auto repair shop inspections.	Staff prepared a fact sheet about mercury-containing products and proper disposal that was distributed by the industrial inspector during vehicle maintenance facility inspections in 05-06.	Ongoing	
V.A.4	City employees outreach	C.9.c	A. Train corporation yard staff and facilities maintenance staff in correct procedures to clean up mercury containing products: 1. A broken fluorescent lamp 2. A broken thermometer or thermostat B. Send e-mail notice to employees reminding them about spent battery collection bin in copier room.	Corp yard staff was trained on the mercury policy and how to handle the clean up and disposal of a broken fluorescent tube. Email sent to all employees on how to dispose of household batteries (3/14/06)	Ongoing	
V.B	Outreach materials	C.9.c	Assist Prgm to develop or adapt existing mercury outreach materials, as needed, for outreach programs. Submit article to Scene concerning any mercury information made available to city staff.	City staff reviews outreach products that are proposed by the Mercury Outreach AHTG.	Ongoing	
V.C	Community events	C.9.c	Hg outreach materials are distributed by the County HHW Prgm at HHW disposal events, on behalf of the city.	HHW disposal brochures (with fluorescent tubes, thermostats, and thermometers listed) are routinely distributed at the city's library, community center and city hall lobbies and at the countywide HHW events.	Ongoing	
MM V.B	Document and evaluate activities	C.9.c	**Monitoring Mechanism V.B.** In the Annual Report, document and evaluate each outreach activity, including	The countywide HHW program served 24,985 residents during 05-06 and 435 small businesses through 59 events held at	Ongoing

Cupertino

Program Work Plan Task	Activity	FY05-06Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
CB-1. Vehicle Washing Operations					
Goal: Reduce copper discharges from vehicle washing operation.					
CB-1.1	Refer mobile cleaners to training	Refer mobile surface cleaners to SJ POTW service cleaning certification trainings, if any are held.	Referred upon request. No mobile surface cleaning certification trainings were held this last fiscal year in SJ. Mobile surface cleaners were referred to BASMAA online training and recognition program. Mobile surface cleaners who do not have access to web training are referred to certified City of San Jose who has staff who will provide the program on an as requested basis.	Ongoing	Public Works
CB-1.2	Distribute list of trained cleaners	Distribute most recent list of trained mobile cleaners to interested parties, and to city staff who contract for cleaning services.	A list is provided to city corp yard staff for in-house projects and is available to violators in illegal dumping incidents provided by the nonpoint source inspectors. This list is updated based on the list of trained surface cleaners posted on the BASMAA website.	Ongoing	Public Works
CB-1.3	Outreach materials	Continue to distribute Home Maintenance Tips brochure at city facilities and city events (contains general remarks on residential car washing).	See PIP section, General Outreach for distribution plan.	Ongoing	Public Works
CB-1.4	Website for outreach	Update information about copper brake pad dust to the stormwater section of our website, with a link to the SCVURPPP copper brake pad report as needed. Add general information about residential car washing to the city's website.	These changes were made in August 2006 and will be reflected in the FY 06-07 AR.	Review annually Spring 06	Public Works
CB-1.5	Scene article	Add information about copper brake pad dust to the annual article on home car washing in the city's newsletter, the Scene.	Two articles about copper brake pad dust appeared in the city's newsletter in the months of July and Sept. '05.	July, Sept 05 Scene	Public Works
CB-1.6	Non-profit car washes	City provides brochures to non-profits about how to properly conduct a car wash event.	City staff provides this brochure to non-profit organizations planning to have a car wash when requested.	Ongoing	Public Works
CB-1.7	City vehicles	Continue to maintain car wash systems for City vehicles at the corporation yard.	City vehicles are taken to a commercial car wash where the water discharges to the sanitary sewer. Equipment is cleaned	Ongoing	Public Works

Program Work Plan Task	Activity	FY05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
CB-3. Industrial Copper Control *Goal: Control copper in discharges of stormwater from targeted industrial sources*					
CB-3	Industrial inspection program	Continue industrial inspection of vehicle service facilities and other future permitted sites.	The City's inspects the vehicle service facilities once every two years (inspections took place 6/06). See Industrial Inspection section of the annual report.	Ongoing, during normal inspection routine.	Industrial Inspector
CB-6/7. Reducing Traffic Congestion/Promoting Alternative Transportation					
CB-8. Incorporate watershed protection in planning procedures *Goal: Classify and assess watersheds, and improve institutional arrangements for watershed protection*					
CB-8.1	General Plan changes	Revise City's General Plan, as needed, based on recommendations from the *Development Policies Comparison Project* and Provision C.3.I.	The Cupertino City Council adopted the 2000-2020 General Plan on November 15, 2005. Sections related to urban runoff control are found in the Environmental Resources/Sustainability Chapter (Wildlife and Vegetation; Water Resources; Stormwater Runoff) and in the Hillside Protection portion of the Land Use/Community Design Chapter. The Plan may be viewed electronically at http://www.cupertino.org/city_government/departments_and_offices/planning_and_building/general_plan_update/index.asp	9/06 AR	Planning Division

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report: Copper/Nickel Control Program

Cupertino

Program Work Plan Task	Activity	FY05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
CB-8.2	CEQA changes	Review and implement guidance from SCVURPPP and San Jose on addressing water quality in the CEQA review process, as part of C.3.m implementation.	The City will continue to evaluate its CEQA review process. No changes were made in 05-06 since revisions were made at the end of the prior fiscal year. Any future changes will be reported in that year's annual reports.	AR and ongoing	
CB-11. Street sweeping controls & stormdrain system O&M *Goal: Improve street sweeping controls and stormdrain system O&M*					
CB-11.1	Street sweeping	Follow Program guidance regarding the collection and reporting of street sweeping data. Provide data for Annual Report.	Monthly street sweeping reports for 05-06 were submitted to the Program for compilation in July 2006.	Ongoing; Data in 9/06 AR	Public Works
CB-11.2	Evaluate Street sweeping and Stormdrain O&M	Evaluate need for improvement of current street sweeping and storm drain system O&M programs (within available budgets) in FY 04-05 Annual Report.	Streets are swept twice a month, and all catch basins are cleaned on a two year rotating basis and during emergencies as needed. During the heavy leaf fall, certain areas of the city have extra sweeping and leaf pickup. There isn't a build-up of debris or flooding issues that would indicate the need for increased service. The schedule appears to be adequate and is within the city's budget.	9/06 AR	Public Works
CB-12. Pools and Spas *Goal: Control copper discharge from pools and spas*					
CB-12.2	Outreach	• Distribute outreach materials to the public at city facilities. • Place pool information on city stormwater website.	The city distributes the brochure at city facilities, upon request or during related illegal dumping incidents. The brochure is available on the city's website.	Ongoing	Public Works
CB-12.3	Newsletter article	Publish one article/yr. regarding disposal of pool water in city's newsletter.	Two articles were published in the city newsletter, July '05 and June '06.	Ongoing in June	Public Works

FY '04-'05 Annual Report
Training Activities

Co. Health Dept: Annual meeting with Dept of Environmental Health, restaurant inspection program. Topics included violations, inspection procedures, referrals, mercury bulb disposal, grease trap cleaning and pumper trucks.	4/18/06	Arlette Kerley, DEH Supervisor; Cheri Donnelly and Jack Lovell, WV cities Program staff; Lavenia Millar, City of Cupertino stormwater staff.; 20 County DEH inspectors.
Public Works Staff: Development and Water Resources, Making the Connection, Workshop and Walking Tour of the Guadalupe River	5/03/06	Jason Chou, Public Works Dept.
Park & Rec staff; Golf Course contractor: Mtg to review golf course SOPs, permitted pesticides, potential for less-toxic pesticide use.	5/04/06	Mike O'Dowd, Park and Rec Dept.; Don Naumann (Spot Water Management), golf course contractor; Lavenia Millar and Roxan Nasiri, Public Works
Public Works staff that apply pesticides: Target Field Day Seminar	5/16/06	Pesticide Handlers Safety training – training is required for handlers. 21 public works employees attended. (as Qualified Applicators Certified, these employees are required, by the State, to attend 20 hours of training in a 2-year period)
Public Works Engineering and Planning: Constructing, Maintaining and Inspecting Stormwater Treatment BMPs Workshop Inspections (SCVURPPP)	6/6/06	Jason Chou, Lavenia Millar, Kevin Rieden, Public Works; Aki Honda, Planning; Jenny Fire, consultant.
Planning and Public Works staff: Annual training regarding C.3 requirements (Group 1, 2A, 2B, HMP, Pesticide Control), website and municipal regional permit.	6/14/06	Ciddy Wordell, Gary Chao, Aki Honda, Colin Jung, Piu Ghosh, Noren Caliva, Planning; Jason Chou and Lavenia Millar, Public Works - trainer.
City's Pest Control Advisor: As a Pest Control Advisor, this supervisor is required, by the State, to attend 40 hrs. of PCA training in a two-year period.	On-going	Diane Mahan, PW Streets supervisor, and City's PCA, courses include IPM.
City's Golf Course Contractor, Pest Control Advisor: As a Pest Control Advisor, this contractor is required, by the State, to attend 40 hrs. of PCA training in a two-year period.	On-going	Don Naumann, contractor for Blackberry Farm Golf Course, courses include IPM. Attended IPM & Turfgrass Trends 12/5/05

Oakland, CA 94612

SUBJECT: CITY OF LOS ALTOS URBAN RUNOFF MANAGEMENT PROGRAM FY 2005-2006 ANNUAL REPORT

Dear Mr. Wolfe:

This report is submitted by the City of Los Altos, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water National Pollutant Discharge Elimination System (NPDES) Permit (Order No. 01-024). The report summarizes activities performed during FY 2005-2006 in accordance with the City of Los Altos' Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 1997 and updated in October 2000 and September 2004, and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 05-06 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; and 3) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the City of Los Altos Annual Report contains the following sections:

I. Cover Letter

II. Certification Statement

III. Self-Evaluation and Work Plan Completion Matrix:

- IC/ID Elimination Activities
- Industrial/Commercial Discharger Control Program
- Public Agency Activities
  - i. Public Streets, Roads and Highways Operation and Maintenance
  - ii. Corporation Yard Operation and Maintenance
  - iii. Storm Drain System Operation and Maintenance
- New Development and Redevelopment Planning Procedures
- New Development and Redevelopment Construction Inspection
- Pest Management Activities
- Mercury Pollution Prevention Activities
- Other Water Quality and Watershed Management Requirements
  - i. Trash Management
  - ii. Copper Action Plan
  - iii. Nickel Action Plan
- Public Information/Participation
- Annual Report and Work Plan
- Staff Training
- Revised 04/05 Annual Report page pursuant to Board comment

Program Highlights and Accomplishments

During FY 2005-2006 the City of Los Altos continued to implement our Urban Runoff Management Plan (URMP) to the maximum extent practicable. The activities implemented for each element of the City's URMP are described in Chapter 6 of the Santa Clara Valley Urban Runoff Pollution Prevention Program's Urban Runoff Management Plan. Some brief highlights of our many accomplishments during FY 2005/2006 are described below.

The City of Los Altos was fortunate to hire a Public Works inspector at the beginning of the fiscal year. Since the City did not have any public project under construction during the rainy season, we were able to set up a more comprehensive inspection process for the private projects. The city has well over 200 major remodel/rebuilding project that were under construction during the last rainy season. The City sent a letter to each of the property owners and each of their contractors for these projects explaining the necessity of protecting their property from allowing contaminated storm runoff from their property. This letter included detailed suggestions to help prevent erosion of sediments from the site. Prior to the beginning of the rainy season, our inspector visited each one of these sites and reiterated to the contractors what the requirements that city will be expecting to see at their sites. Between mid-October to April, our inspector was

able to visit most all of these sites on a monthly basis. During this time, citations were issued for those that did not have proper controls in place. By the end of the rainy season, the City was able to witness properly maintained erosion controls at most all of private construction sites.

During the fiscal year, the city began initiating the recommendations of its newly adopted Sewer Master Plan. This Plan presents a list of improvements that the city should implement over the next twenty years to keep the system in good condition and help prevent sewer overflows. The first such project was rooting foaming the first 20% of our sewer systems in the areas that was most susceptible to sewer line plugs because of roots in the pipe. This Master Plan has placed the city well ahead of schedule on complying with the Regional Boards Section 13267 letter, which directed every sewer agency in the Bay Area to initiate the preparation of a Sewer System Management Plan and the State's recent requirements for each municipality with a sewer system to prepare a Waste Discharge Requirement (WDR) Plan.

The City of Los Altos is pleased with its maintenance program and compliance with the control of sources of pollution. The City's corporation yard received its 13th consecutive Clean Bay Business certification for having the area in complete compliance with all point source control. The city continues to follow an extensive training program for its staff dealing with the use of pesticides. The City staff always considers the use of safer type of pesticides including making every effort to use alternatives such as the use of mulches for weed control rather than a herbicide.

The City has been one of the leaders in the Bay Area in source control at its development or redevelopment sites. Although the City had no Group 1 or 2A projects during this last fiscal year, staff still incorporates site design source controls and treatment into small private projects as it has now for several years. For example, during the fiscal the city required over 120 new single family projects to contain their drainage on site by having them make every attempt it incorporated site design measures to allow stormwater flow to infiltrate into the ground and then directed over landscaped area prior to discharge in the city's streets and into the city's storm drain system. This helped reduce the flow in the city's system as well as treat the storm water on site prior to any discharge.

Continuous Improvement Activities

The City continues to address challenges encountered in implementation of improvements to its Urban Runoff Management Plan with existing staff. Overall, staff believes that the program is being implemented consistently throughout the City and is effective in reducing pollution of the local creeks. The largest challenge facing the City, as with other cities, is having minimal funding and few staff available for its programs because of its small sales tax base due to the lack of commercial and no industrial businesses in the city. The city must cope with the extra effort that will come with the implementation of Group 2 (Group 2B) development/redevelopment projects that began in August of this

year. In addition, there is the anticipated increase in the level of effort that will be required with the new Regional Permit that the Board plans to adopt during this current fiscal year. The result is that other areas of our operation have been negatively impacted because of the resources required to comply with the new and ever increasing mandates established in our NPDES permit. The city will continue to explore opportunities to help offset the expense required to comply with the increasing permit requirements.

During the fiscal year, the city will be considering implementing the Water Resources Protection Guidelines and Standards for Land Uses Near Stream. The city will need to review appropriate zoning and grading ordinances and consider appropriate changes as required meet the intent of these new guidelines and standards.

In summary, the City continues to be committed to the implementation of its Urban Runoff Management Plan. This has proven again to be a challenge with limited staffing levels, minimal funding availability and increased work effort to comply with the Program. In the coming year the City will continue to strive to increase its level of effort dedicated to the Santa Clara Valley Urban Runoff Pollution Protection Program.

I welcome your review of this Annual Report and any comments that you might have to offer that would help the City improve the managing of the program. If you have any questions regarding the materials submitted, please contact me at (650) 947-2624

Very truly yours,

Larry Lind
Associate Civil Engineer

ILLICIT CONNECTION & ILLEGAL DUMPING ELIMINATION ACTIVITIES

FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
1	Continue to provide training as required on ICID activities	Los Altos will continue to provide information and training to Engineering, Planning, Building Inspection and Public Safety personnel with a focus on new personnel. Each Department holds regular meetings for which the subject of ICIDs is discussed. Staff will be encouraged to attend formal training as it becomes available.	The City of Los Altos continues to provide training to city staff ICID issues. For example, the city sent personnel to SCVURPPP training workshop, " Constructing, Maintaining and Inspecting Stormwater Treatment BMPs," in December at the Quinlan Center in Cupertino. City personnel learned what to look for during stormwater inspections of commercial and industrial facilities.	Community Development & Public Works Department
2	Continue to evaluate and improve response and documentation of illegal dumping activities	Los Altos uses the police department to respond to reports of illegal dumping. Primarily this would be the Code Enforcement Officer during normal working hours. Currently the CEO position is documenting and tracking ICID incidents.	During the FY the city primarily used the police department to respond to reports of illegal dumping and the Engineering Department inspector or engineer as a backup. The police department maintains documentation of those incidents and the engineering department maintains a master list. During FY 05-06, PD recorded three responses that relate to potential illegal dumping. The discharger cleaned up each incident and they were also cited. The sewer maintenance department continues to respond to sewer overflows. The city has a crew on standby 24 hours a day and therefore can respond to these quickly. During FY 05-06, city crews addressed 12 sewer overflows, which were properly cleaned up before entering any storm drain systems. During the FY, the city also increased the emphasis on the assurance that construction sites have property BMPs installed (See Construction Inspection section of the Annual Report)	Public Works Department

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
3	Sanitary Sewer System	Los Altos expects to complete sanitary sewer system master plan and will program system improvement projects identified in the study.	The Sanitary Sewer Master Plan was completed on 1 August 2005. This Plan meets several of the requirements that are mandated by the San Francisco Regional Water Quality Control Board's requirement that each owner of a sewer collection system prepare a Sewer System Management Plan and also with the similar requirements by the State of California in their Water Discharge Requirements. The City has begun implementing the recommendation of the Master Plan. This including the issuing of a Sewer Root Foaming contract in April 2006 and the advertising of another root foaming contract in June 2006 along with the advertising for the televising of the entire sewer system that has yet been televised. The City will continue to raise the rates to fulfill the recommendations of the Master Plan.	Public Works & Community Development Departments
4	Evaluate IC/ID activities in FY 2005-2006 and explore opportunities to increase program effectiveness.	Report results in the FY 2005-2006 Annual Report.	See "ICID Program Evaluation" and "ICID Report Data" below.	Public Works Department

Santa Clara Valley Urban Runoff Pollution Prevention Program

Municipality: City of Los Altos ***Attachment B***

ICID Program Evaluation FY 2005/2006
Overall the program seems to be working very well. It would seem more and more people, as well as contractors, are becoming aware that no discharges, other than storm water, are allowed into the storm drain systems. With the addition of a full time inspector, the city was able to better police this issue, particularly at the over 200 single family construction sites in Los Altos. This increase enforcement was apparent with the increase number of reported events. Most all were at construction sites and were all addressee immediately when notified by the City. Most just needed to be constantly reminded to maintain a properly controlled site. Though the city Police Department still respond to emergencies and address those responses according, most of enforcement responsibility was delegate last FY to the Engineering Department where the inspector is assigned. This seems to allow better follow-up to issues that develop to verify continued compliance and better record keeping. The City of Los Altos continues to implement recommendations from this Sewer Master Plan to minimize overflows. This Master Plan has placed the city in advanced compliance with the State's recently adopted Waste Discharge Requirements (WDR) and the San Francisco Regional Water Quality Control Board's requirement for a Sewer System Management Plan. These mandates are required of every owner of sewer collection systems and the city's Master Plan has placed the city well ahead of the deadlines from each of these mandates. The City continues to struggle with the documentation necessary for any of these incidents. Staff will continue to work with the police department in their documentation and follow-up actions on these incidents.

INDUSTRIAL/COMMERCIAL DISCHARGER CONTROL PROGRAMS

FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
1	Inspection of Vehicle Service Facilities	Los Altos will continue to coordinate and support the program conducted by the Palo Alto Regional Water Quality Treatment Plant. Palo Alto conducts annual inspections of all 14 vehicle service facilities in Los Altos. The City will document and conduct follow-up on any storm water discharge violations identified in these inspections.	In fall of 2005 the City of Palo Alto inspected 14 vehicle service facilities in Los Altos. None were found with any violations and all facilities were given the Clean Bay Business award. During the year, there were no other reports on discharges from any of these facilities.	URP Coordinator

FY 2005-2006 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
2	Inspection of Food Service Facilities	Los Altos will continue to coordinate and support the County of Santa Clara Department of Environmental Health's annual inspections of all 132 food service facilities in the City. The City will document and conduct follow-up on any storm water discharge violations identified in these annual inspections.	During the year Santa Clara County Department of Environmental Health (DEH) conducted 321 individual inspections of 132 food services facilities in Los Altos. During inspections, DEH makes sure that the wastewater is being deposited in the mop sink. DEH reminds the facility of the importance of using the mop sink and instruct them to not put wastewater outside or to wash mats outside. They also inspect and report on the storage of oil, grease and garbage, which is usually exterior to the facility. They provide guidance and proper handling and cleanup of those areas. During the FY 05/06, DEH reported one area of concern. . Follow-up visit showed that the situation had been corrected. In addition during their final inspection of 14 new or remodeled food service facilities in Los Altos, DEH hand out the packet that contains information published by the Santa Clara Valley Urban Runoff Pollution Prevention on the proper BMPs for food service facilities. During the year, the city issued one warning letter to a facility that had dumped or wash something in the back of their facility. Also the city cited a property twice for discharge from a restaurant on the property. Follow up inspections continue.	URP Coordinator & Code Enforcement Officer
3	Inspection of Other Commercial Facilities	Los Altos has very limited Commercial Facilities (and no Industrial facilities), but is prepared to inspect any of these other listed categories of commercial facilities should a complaint be filed and take necessary action if required.	No violations or complaints were filed during the fiscal year.	URP Coordinator & Code Enforcement Officer

Industrial/Commercial Program Evaluation
FY 2005/2006

Only three violations were found during the FY 05/06 inspections, which was properly addressed. This was an increase from FY 04/05 due primarily do personnel available for increase inspection and enforcement It would appear that this program is working well. Biggest reason, obviously, is the lack of industrial/commercial facilities in the city. The city could further increase the frequency of the inspections, but it is difficult to justify since there are no reportable violations or potential violations.

PUBLIC AGENCY ACTIVITIES PUBLIC STREETS, ROADS & HIGHWAY O & M				
FY 2005-2006 Work Plan Self Evaluation Matrix				
Item No.	**Activity**	**FY 05-06 Work Plan Tasks**	**FY 05-06 Accomplishments**	**Responsible Party**
1	BMP for street and road operations and maintenance	Los Altos will continue to assure that BMPs are applied at all of its street maintenance operations. Will evaluate its SOP for this maintenance annually and update as deemed necessary.	Crews are trained to utilizing BMP's from the CASQA Stormwater Best Management Practice Handbook for Municipal Operations. For example, for sawcutting and sidewalk grinding, which is a sizable task for city staff, the SOPs include vacuuming up excessive material and slurry before reaching storm drains. City staff did not find any improvements it could make to SOPs during the fiscal year.	Public Works Maintenance Department
2	BMP training	Los Altos will continue to provide training on an as needed basis to its municipal staff in the use of appropriate BMPs. Will provide monthly discussions with maintenance staff on the implementation of BMPs. Staff will be encouraged to attend any formal training if available.	City maintenance crews receive a wide range of training during the year. See "Staff Training" list at the end for this report of a list of training attended by the various maintenance staff. In addition, maintenance staff meet quarterly to discuss upcoming programs. At these meetings staff are reminded of the implementation of BMPs required for these programs.	Public Works Department
3	Evaluate O&M activities in FY 2004-2005 and explore opportunities to increase program effectiveness.	Report results in the FY 2004-2005 Annual Report.	Public Streets, Roads & Highway O&M Program Evaluation" section below.	URP Coordinator

Municipality: City of Los Altos ***Attachment B***

Public Streets, Roads & Highway O&M Program Evaluation FY 2005/2006
Roads and streets operations follow BMPs for storm water protection. There have been no complaints or incidents of discharge to the storm system due to Street Division operations. Crews completed 49.5 hours in road shoulder work to ensure proper drainage and spent 282 hours during the fall leaf pickup program in support of the annual street sweeping program. Due to past shoulder activities, the level of effort to ensure proper drainage has decreased. They picked up over 235 loads of leaves during this time, which reduced the load that would have entered the storm drain system. The city plans to continue these programs and will continue to evaluate means for improvements.

CORPORATION YARDS O & M

FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
1	Storm Water Pollution Prevention Plan	Los Altos will evaluate and continue to improve the plan as necessary.	During FY 05-06, staff continued to ensure all elements of SWPPP were followed. Silt sacks were inspected quarterly and replaced as needed. Only one replacement was required during the FY as a result of these inspections. Again there were no spills in the Municipal Service Center that required containment.	Public Works Department
2	Evaluate O&M activities in FY 2005-2006 and explore opportunities to increase program effectiveness	Report results in the FY 2005-2006 Annual Report.	See “Corporation Yard O&M Program Evaluation” section below.	URP Coordinator

Corporation Yard O&M Program Evaluation
FY 2005/2006

During FY 05-06, the Municipal Service Center was awarded its 13th Clean Bay Business Certificate. Automotive and shop personnel also passed the Hazardous Material Program compliance inspection by the Santa Clara County Department of Environmental Health. Automotive personnel completed 3314 hours on vehicle maintenance and shop personnel spent 75 hours for regulatory compliance in handling petroleum products and hazardous materials. Crews continue fueling at local gas stations and do not maintain any fueling processes. The two-year-old wash pad has been successful in receiving wastewater and putting it into the sewer system after going through a separator. Regulatory compliance has been maintained in emptying the separator on a quarterly basis and crews continue to utilize of the wash pad for cleaning maintenance equipment. The City feels it yard continues to exceed compliance with all environmental requirements.

PUBLIC AGENCY ACTIVITIES
STORM DRAIN SYSTEM O & M
FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
1	Storm Drain O & M & Training	Los Altos will continue to train staff & implement and improve BMPs and SOP for the storm drain system operation and maintenance activities. Will evaluated its SOP for this maintenance task annually and update as deemed necessary.	Staff followed the guidance in the CASQA Handbook on Municipal Stormwater Best Management Practice for storm drain maintenance. Entire storm drain system was inspected and all catch basins were cleaned where needed. All material was disposed of properly. Maintenance Staff continued to receive annual training as is noted in the training listed at the end of this Annual Report. No updates were deemed necessary for the SOPs.	Public Works Department
2	Reporting of Observed ICID Evidence	Los Altos will continue to train and require staff to notify appropriate personnel when incidents or unusual contaminants are observed during routine maintenance. Eventually this information is forwarded to the Police Department where it will be documented and considered for enforcement.	The City of Los Altos continues to provide guidance and training to their staff personnel. For example, during routine maintenance staff training, field crews are instructed on what illegal discharges are and are told to report them to their supervisor or to the city's Code Enforcement Officer for follow-up action. Once during the fiscal year the sewer flushing crew spotted and reported what appeared to be a resident that was preparing to drain a swimming pool into the street. This allowed the appropriate staff to respond and provide instructions to the resident on the proper disposal of the pool water prior to any releases into the storm drain system.	Public Works Department

Storm Drain System O&M Program Evaluation
FY 2005/2006

O&M activities for storm drain maintenance were very successful this year. Crews were able to clean all of the storm drain system prior to the rainy season and we experienced very little storm drain problems during the rainy season. Staff implemented the method of cleaning and inspecting the storm drain system through the GIS quadrant system (63 quadrants) instead of our 10 maintenance zones. This method improved the work schedule and completeness of this operation.

NEW DEVELOPMENT & REDEVELOPMENT PLANNING PROCEDURES (C.3)

FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
C.3.b Development Project Approval Process **Goal:** To modify Los Altos' development project approval processes, for both private and public development project, to incorporate the requirement of Provision C.3				
1	Continue to train Los Altos staff in planning, building, and engineering division on the latest developments of the C.3. provisions and goals	Los Altos staff has attended Program workshops as they become available.	Private Projects: After evaluating past operations, the Engineering Department has been assigned to work on issue that deal with the City's NPDES permit. Most "large" projects for the city are primary just rebuilds of single-family residences. The Engineering Division reviewed approximately one hundred of these projects during the FY to assure that the design provide property source control measures in accordance with the Permit. During the FY there were neither Group 1 nor any Group 2A projects. Public Projects: As noted in the Staff Training Summary at the end of this Annual Report, Staff involved in the design and review of all Public Projects, as well as Private Projects, attended all Program sponsored training on C.3. During FY 2005/2006 there were no Group 1 or Group 2A public projects implemented by the City.	Community Development & Public Works Department

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
2	Develop new or modify existing review policies, procedures, and/or conditions of approval to incorporate Group 2 requirements	Los Altos will modify documents as necessary for the conversion from Group 1 to Group 2 projects.	Private and Public Projects: In September 2005 The city adopted a municipal code for Group 2A projects. In conjunction, the City modified the conditions of approval and other documents to include the requirements of Group 2A. During FY 2005/2006 the city had no Group 2A projects.	Community Development & Public Works Department
C.3.c Requirements for Group 1 and Group 2 Projects **Goal:** Prepare to require proponents of Group 1 projects to design and implement stormwater treatment BMPs or reduce stormwater pollution of the maximum extent practicable. Participate in development of the proposal for an alternative Group 2 project definition and prepare to implement C.3 requirements for Group 2 projects as needed				
1	Assist Program to conduct analysis of alternative project size and prepare proposal for submittal to Regional Board.	Los Altos will assist the Program as necessary in the evaluation of the data.	The City of Los Altos continues to provide data requested by the Program. Los Altos attends the monthly C.3 Adhoc Committee to assist the Program in analyzing this data. This resulted in the requirement approved for the Group 2A projects and the eventual size for the Group 2 projects.	URP Coordinator
2	Assist Program to update guidance manual and performance standards for Group 2 projects as needed.	Los Altos will assist the Program as necessary to provide the necessary updates.	Los Altos attends the monthly C.3 Adhoc Committee to assist the Program in analyzing this data and assisted the Program in developing the size for Group 2 projects The approval and implementation of the Group 2A projects began in FY 05/06, and the guidance manual and performance standard were revised accordingly.	URP Coordinator

C.3.e. Operation and Maintenance of Treatment BMPs **Goal:** To develop and implement local agency operation and maintenance (O&M) verification programs to help ensure the proper maintenance of stormwater treatment measures on public and private property.				
1	Evaluate procedure for logging information about treatment BMPs installed at any approved Group 1 projects and later for group 2 projects, and for maintaining a list or database of properties, treatment BMPs, and responsible operators.	Los Altos will evaluate its process to monitor treatment BMPs installed with Group 1 projects and later for Group 2 projects.	The City of Los Altos has one Group 1 under construction and is expected to be completed in late 2006. The Engineering Divison is responsible for tracking all Group 1 and Group 2 project, including all inspections and annual reporting. For further information on the organization structure on the operation and maintenance verification program see pages 16 and 17 of the City of Los Altos 2003/2004 Annual Report.	Community Development & Public Works Department
2	Los Altos will review its O&M agreement language as projects become available.	Los Altos will review the procedures and documents and make improvements as deem necessary.	The City of Los Altos has one Group 1 under construction and is expected to be complete in early 2006. The Engineering Division, which is responsible for any project that must comply with the city's storm drain NPDES permit, has been reviewing the maintenance agreement that will eventually be adopted for this project prior to final acceptance by the city. It is anticipated that this agreement may be a model for which the city will utilize for any future Group 1 or Group 2 projects.	Community Development & URP Coordinator

FY 2005-2006 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
C.3.f. Hydromodification Management Plan **Goal:** To manage increases in runoff peak flow and volume for Group 1 projects, where such increases may cause increased erosion of creek beds and banks or related impact, through implementation of a hydromodification management plan (HMP)				
1	Hydromodification Management Plan (HMP)	Upon adoption by the Regional Board, begin implementation of HMP requirements for Group 1 and Group 2 projects that may cause increased erosion or other related impacts. Before adoption, encourage early implementation of likely elements of the HMP where possible. Los Altos will implement HMP as required.	In September 2005 the city of Los Altos adopted an ordinance that requires implementation of the HMP requirements in accordance the City's Permit. Based on the requirements established in the ordinance, the city does not anticipate implementing the HMP for any of its projects, though the city will continue to evaluate all Group 1 or Group 2 projects. During FY 2005/2006 the city has no Group 1 or Group 2 projects.	
C.3.g. Waiver and Compensatory Mitigation Program **Goal:** Establish a program under which a project proponent may request a waiver from treatment BMP requirements due to impracticability, with a provision to provide an equivalent water quality benefit to the same receiving water (that allows participation in regional solutions)				
1	Model Waiver Program.	Continue to assist Program to develop a model waiver program until completed. Los Altos will assist the Program as required to develop a model waiver program	The Program has not made substantive progress on waivers but the city is available to provide assistance as required.	URP Coordinator
2	Model Waiver Program	Continue to evaluate the need for a local waiver program, perform legal review. Los Altos is not anticipating the need for any waiver requests.	Los Altos does not anticipate any need for waivers. During FY 05/06 Los Altos had no need to address the subject.	Community Development & URP Coordinator

FY 2005-2006 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
C.3.k. Source Control Measures **Goal:** Require source control measures for new redevelopment projects to limit pollutant generation, discharge and runoff to the maximum extent practicable.				
1	Source Control Measures.	Los Altos will continue to evaluate Planning Procedures Performance Standard and continue to implementation of source control measures. Los Altos will continue to implement source control regardless of the size of the project.	Private Projects: The City of Los Altos had no Group 1 projects during FY 05/06. The City continues to require that all large development and re-redevelopment projects, which consists primarily single family home rebuilds, to retain storm flow within the property line to maximum extent practicable. During the FY, required the design of approximately 120 single-family home major remodel/rebuild projects to retain and dissipate the stormwater through various methods such as infiltration trenches. Public Projects: During the time frame between July 1, 2005 and June 30, 2006 the city of Los Altos awarded only two small construction projects. None of these projects fell under the definition of a Group 1 project. One project was for root foaming of sanitary sewer lines and the other for patching of city streets. Other than construction BPMs that were applied, these projects did not allow any opportunity to apply such things as source control, etc. However, Los Altos will continue to evaluate Planning Procedures Performance Standard and will implement source control measures on public projects as necessary.	Community Development, Public Works Department & URP Coordinator

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
C.3.m. Water Quality Review Processes				
Goal: To ensure that water quality impacts and appropriate mitigation measures are identified as part of environmental review of proposed projects.				
1	CEQA checklists and other environmental review documents	Review CEQA checklists and other environmental review documents and modify documents as needed to include Group 2 projects Los Altos will review and update its checklist as necessary	The City of Los Altos' current checklist sufficiently addresses water quality impacts for Group 1 and Group 2 projects.	Community Development
C.3.n. Reporting Requirements				
Goal: To meet the Provision C.3. reporting requirements, and plan for anticipated data needs, and begin collecting and tracking required data on development projects as needed.				
1	Provide information described in Table 1 of Provision C.3. in annual reports	Los Altos will provide the necessary information in each of the annual reports.	See "New Development-Planning Procedures Report Data" that follows.	URP Coordinator
2	Continue to collect and report the following for all new and redevelopment Group 1 & 2 projects -- project name, location, type (per C.3.c.), size (ac. Or sq.ft.), and impervious surface area. For redevelopment projects, include area of land disturbance.	Los Altos will summarize the results in the following yearly Annual Report.	See "New Development-Planning Procedures Report Data" that follows.	Community Development, Public Works Department

Los Altos will collect and report the required data and report results in the Annual Report	See "New Development-Planning Procedures Report Data" that follows.	Community Development & URP Coordinator
4	Evaluate C.3 activities in FY 2005-2006 and explore opportunities to increase program effectiveness	Report results in the FY 2005-2006 Annual Report.	See "New Development-Planning Procedures Program Evaluation" that follows	Community Development, Public Works Department & URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: City of Los Altos ***Attachment B***

New Development-Planning Procedures Program Evaluation
FY 2005/2006

Public Projects: During the time frame between July 1, 2005 and June 30, 2006 the City of Los Altos awarded only two construction projects. Neither of these projects fell under the definition of a Group 1 or a Group 2A project. All projects dealt with some kind of repair to facilities. Other than construction BPMs that were applied, these projects did not allow any opportunity to apply such things as source control, etc. However, the City of Los Altos continues to review all public projects with respect to all C.3 requirements. Due to lack of large projects, the city is unable to really evaluate the program as it relates to public projects.

Private Projects: During the time frame between July 1, 2005 and June 30, 2006 the City of Los Altos had no new Group 1 projects or any Group 2A projects. As in the past, the City of Los Altos continues to work with applicants to limit the amount of storm water runoff from private property. Most developers are familiar with these city requirements and the design to retain storm water on site for land disposal is now shown on most designs that are submitted for approval. Though this has been going on for some time, it is nearly impossible to measure the impact on the flows in the city storm drain system. The City of Los Altos initiated action to change its Municipal Code to include the requirements for Group 2B.

Regional Board Comments on New Development-Planning Procedures in FY 2004-2005 Annual Report

Item	RWQCB Comment	City Of Los Altos Response
General	Los Altos has not included a list of acronyms (and their definitions) used in the Annual Report. Please submit a list for inclusion in the Annual Report.	A list of acronyms and their definitions has been provided at the end of this Annual Report.
Provision C.3.e	Provision C.3.e requires that the Annual Report contain "a description of the organization structure of the Discharger's Operation and Maintenance Verification Program. Please ensure that this information is included in next year's Annual Report.	The City of Los Altos felt that this Provision was sufficiently covered on pages 16 and 17 of the 2003/2004 Annual Report (particularly the narrative in item #1 on page 16 of the Annual Report) and that the organization structure did not have to be repeated in subsequent Reports unless it changes. No changes were made in FY 2004/2005. Should there be a need to mention the same in each Annual Report or if more information is needed, the city will comply.

Site Design Measures Guidance and Standards Development Action Summary			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/06)**
Policies to Limit Site Impervious and Incorporate Post-Construction BMPs Into Development Projects			
1. Is the minimum sidewalk width allowed in the community 4 feet or less?	The City of Los Altos has very minimum sidewalks throughout the city. The City standard width is 4 feet unless it can be justified otherwise through usage calculations or to match existing adjacent walkways. Less width would affect ADA requirements. Since Los Altos is built out and will not have any large development, it is anticipated that there is no need to put this in writing.	Public Works (Engineering) & Community Development (Planning)	During FY 05/06 the City of Los Altos did not have any new sidewalks installed mainly because the city is built out and the residents are also resistant to their installation. Los Altos plans to continue to evaluate new sidewalks on a case-by-case basis and provide directions in the form of the conditions of approval. Los Altos has also decided to document the minimum width in their Standard Plans and Specification with is currently being developed by a consultant for the city.
2. Are sidewalks generally sloped so they drain to the front yard or park strip rather than the street?	The City of Los Altos will work with the Program as appropriate. Los Altos will require that sidewalks drain to a soil area on a case-to-case basis. Since Los Altos is built out, and will not have any large development, it is anticipated that most sidewalks will remain as currently constructed.	Public Works (Engineering) & Community Development (Planning)	During FY 05/06 the City of Los Altos did not have any new sidewalk installed mainly because the city is built out and the residents are also resistant to their installation. Los Altos will continue to evaluate new sidewalks on a case-by-case basis for drainage and provide directions in the form of the conditions of approval
3. Are the use of benign roof materials promoted?	Through the design review process, the City reviews building materials, including roof materials, and encourages the use of benign roofing materials such as wood shake or tile. The City has required that project sponsors change roofing materials and/or colors to lessen impacts. During this FY the city will adopt an ordinance to prohibiting copper in roofing systems similar to Palo Alto's ordinance	Community Development (Planning) & Public Works (Engineering)	The City of Los Altos is still evaluating the need for an ordinance prohibiting copper roofing systems. Los Altos feels this can be done without an ordinance and will try and discourage applicants from using copper on their projects.

FY 2005-2006 Annual Report

Municipality: City of Los Altos ***Attachment B***

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/06)**
4. Does the community encourage inclusion of turf play yards or courtyards that also serve as infiltration areas or overflow parking areas?	Yes, they are encouraged on a case-by-case basis, when large projects are proposed. City has copies of BASMAA's Start at the Source to help encourage such ideas. City of Los Altos will provide a link on local website to SCVURPPP and/ BASMAA website containing electronic copy of BASMAA's Start at the Source.	Public Works (Engineering) & Community Development (Planning)	The City of Los Altos continues to maintain a link on its website to SCVURPPP website containing electronic copy of BASMAA's Start at the Source
5. Is the minimum radius allowed for cul-de-sacs less than 35 feet?	Since Los Altos does not expect to have many, if any, new cul-de-sacs, Los Altos plans to take each on a case-by-case basis and provide the minimum radius agreed upon by the appropriate agencies. Los Altos will also continue to work with the program and other jurisdictions regarding this matter. Will review matter with the Santa Clara County Fire Department for their input	Public Works (Engineering)	During FY 05/06 the City of Los Altos did not have any new cul-de-sacs installed mainly because the city is built out. Los Altos will continue to evaluate any new cul-de-sac on a case-by-case basis for requiring a minimum radius as part of the conditions of approval.
6. Are there established design criteria or guidance for swales that can provide stormwater quality treatment (i.e., dry ponds, biofilters, or grass swales)?	City of Los Altos will consider revising the current version of its municipal code this FY by removing the prohibition for the use of reservoirs and simply stating that the device will be subject to approval by the City Engineer to insure flexibility. City of Los Altos will consider any treatment BMP presented in the handbooks on a case-by-case basis.	Public Works (Engineering)	City of Los Altos has not revised its municipal code, but still plans to do so. Los Altos did revise its ordinance to require treatment BMPs on Group 2A projects plans to revise it for the implementation of Group 2B projects.

Municipality: City of Los Altos ***Attachment B***

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/06)**
7. Are model shared parking agreements provided?	The City does not have a model shared parking agreement, but it currently has an existing parking agreement with a local restaurant. Also the City does have a mechanism to allow cooperatively operated parking facilities. The agreements are reviewed on a case-by-case basis by staff and the City Attorney. Also, the City has allowed a business to rent parking spaces in the public parking plaza during the evening to help satisfy their parking requirement.	Public Works (Engineering) & Community Development (Planning)	No further action was required. During FY 05/06 there were no cases where parking agreements became an issue.
8. If mass transit is provided nearby, is the parking ratio reduced?	All multi-family and mixed-use projects are required to provide affordable housing. The City grants development incentives for all projects with affordable housing. Incentives can include a reduction in the amount of parking. When considering a reduction in parking, proximity to mass transit would be a primary consideration	Community Development (Planning)	During FY 05/06 the city did not have any multi-family or mixed-use projects.
9. Is the minimum driveway width specified in the community 9 feet or less (one lane) or 18 feet (two lanes)?	The driveway widths in certain residential districts and commercially operated public parking facilities can be reduced subject to approval of an alternative design by the architectural and site control committee. The City prefers this approach rather than changing the standards because it allows flexibility and it allows the City to determine the appropriate width based on site conditions.	Community Development (Planning)	During FY 05/06 there were no cases where driveway width really became an issue.

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/06)**
Drainage Design Requirements			
1. Does the municipality promote limiting runoff to pre-development levels (e.g. through detention or retention, limits on impervious surface area, etc.)?	The City of Los Altos plans to adopt an ordinance to require developer to comply with Provision C.3 of the NPDES permit, which would limit runoff to pre-development level. As a matter of conditions of approval, Los Altos requires limiting runoff from single-family redevelopment not covered by the permit. It is anticipated that this ordinance will be enacted prior to the implementation of the C3 provisions in Oct 2003.	Public Works (Engineering) & Community Development (Planning)	During FY 05/06 City of Los Altos adopted an ordinance that require developers of Group 2A projects to comply with Provision C.3 of the NPDES permit limiting runoff to pre-development. During FY 05/06 the city did not have any new Group 1 or Group 2A projects. The city continues to limit runoff from all single-family redevelopment.
2. Are there design criteria for stormwater best management practices?	Will review and implement procedures on a case by case basis for projects as they become available like implementing appropriate best management practices shown in the New Development and Redevelopment handbook by CSQA as a matter of conditions of approval.	Public Works (Engineering) & Community Development (Planning)	The City of Los Altos continues to use those BMPs that are defined in California Stormwater Quality Association *Stormwater Best Management Practice Handbook for New Development and Redevelopment*.
Natural Resource Protection/Restoration			
1. Is the minimum buffer width (from top of bank) 75 feet or more in a stream buffer ordinance/policy/guidelines?	The City works with the Santa Clara Valley Water District, and when necessary requires a biotic study, to determine the appropriate buffer for projects adjacent to a creek. Most of the lots in Los Altos adjacent to the creek are residential. Requiring a 75-foot buffer from top of bank is not practical in most cases, as it would render most lots unusable.	Community Development (Planning)	The City of Los Altos is awaiting the final outcome of the Water Resources Protection Collaborative. Until such time, for each project the city will work with the Santa Clara Valley Water District on a case by case basis

Santa Clara Valley Urban Runoff Pollution Prevention Program

Municipality: City of Los Altos ***Attachment B***

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/06)**
2. Does the stream buffer ordinance specify enforcement and education mechanisms?	The City's Environmental Committee continues to discuss appropriate creek protection measures and ways to educate the public. Will obtain and include information from the Marin County Stormwater Pollution Prevention Program efforts on creek side approaches.	Community Development (Planning)	The City of Los Altos is awaiting the final outcome of the Water Resources Protection Collaborative. Until such time, for each project the city will work with the Santa Clara Valley Water District on a case by case basis
3. Is land conservation, impervious cover reduction, or other types of water quality protection a major goal or objective to the open space design guidance?	City staff understands the importance of water quality protection and makes sure impacts are evaluated and appropriate protection measures are included in project approvals as a long-standing city policy on source control. The City adopted a new General Plan in November 2002. This document and current development policies encourages the conservation of natural features	Community Development (Planning)	The City continues to follow its General Plan.
4. Are flexible site design criteria available for developers that preserve open space and utilize cluster design options (e.g., setbacks, road widths, lot sizes)?	The City's approach is to consider road width modifications on a case-by-case basis to determine the appropriate width for the specific site being developed. All new residential streets in the City of Los Altos will be 10 minimum lane widths.	Public Works (Engineering)	There were no new streets being proposed during FY 05/06.

Municipality: City of Los Altos ***Attachment B***

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/06)**
5. Are open space areas encouraged to be consolidated into larger units?	It is City policy to encourage protection of creeks, creek side area and riparian habitat in their natural state while ensuring public safety and preserving valuable natural resources. For example, the City has plans for a bike path along the Hetch-Hetchy right-of-way in conjunction with the development of the Resident Inn/Office Complex on El Camino Real.	Community Development (Planning)	City of Los Altos continues to follow its policy.
6. Does a minimum percentage of open space near sensitive areas have to be managed in a natural condition?	The City continues to work with the Santa Clara Valley Water District and other appropriate agencies to establish buffers near sensitive areas. The appropriate buffer varies based on site conditions. Based on the recommendation of the Santa Clara Valley Water District and a biotic assessment, the City recently required a 25 foot buffer as a condition of approval for a subdivision abutting a creek. The width of the buffer was based on the needs of the site. We prefer this approach to establishing a minimum percentage that may or may not be appropriate for a site. .	Community Development (Planning)	The City of Los Altos is awaiting the final outcome of the Water Resources Protection Collaborative. Until such time, for each project the city will work with the Santa Clara Valley Water District on a case by case basis
7. Does the community encourage minimization of impervious surface areas in recreational open space areas?	The newly adopted General Plan includes policy language that encourages the minimization of impervious surface areas. This policy and requirements in the conditions of approval works well for the City and at this time no additional guidance or policy language is deemed necessary. However, the City will continue to evaluate if addition policy language would be beneficial.	Community Development (Planning)	The City of Los Altos continues to enforce the policy from the General Plan.

Site Design Measures Guidance and Standards Development Action Summary (Cont.)			
Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/06)**
8. Does your municipality encourage distinct low-impervious buffers between cities (e.g., greenbelts, open space, wild land corridors, agricultural areas)?	Given the existing built out environment of the city and the continual housing needs pressure, this is not really practical to create low-impervious buffers between the cities. The westerly and southwesterly borders between Palo Alto, Los Altos Hills and the County is Adobe Creek, and on the easterly border with Sunnyvale is Steven Creek which in itself already serves as a pervious buffer.	Community Development (Planning)	No further action was required.
9. Is there flexibility to meet regulatory or conservation restrictions (density compensations, buffer averaging, transferable development rights, off-site mitigation) offered to developers?	The City recently updated the General Plan. The policies in the General Plan were evaluated and determined to be appropriate for Los Altos.	Community Development (Planning)	The City of Los Altos continues to enforce policies in the General Plan

Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/06)**
Policies to Limit Auto Use/Promote Alternative Transportation			
1. Does the municipality promote comprehensive pedestrian and bike trail corridors through a well-connected network of streets and pathways?	The City of Los Altos completed a citywide Bicycle Transportation Plan in February 2002. The City meets monthly with its Bicycle/Pedestrian Advisory Committee (BPAC) to discuss means to pursue the goals of this Plan and also to improve pedestrian access within the City and into adjacent communities.	Public Works (Engineering)	The City of Los Altos continues to pursue the goals of the Plan with the BPAC, which is a subcommittee of the city's Traffic Commission that was established by City Council. For example, The BPAC is working on the feasibility study to connect the Stevens Creek Trail between Mountain View and Cupertino.
2. Does the municipality promote neighborhood greenbelts with walkways and bike paths?	The City continues to seek opportunities for bikeways and pathways. The City recently awarded a contract as part of the safe routes to school program to install bike improvements along Berry Avenue. Also, the city has obtained easements along the Hetch-Hetchy right-of-way to use the area for a bike path. As opportunities arise, the City will continue to obtain easements in order to complete this plan for the Hetch-Hetchy.	Public Works (Engineering) & Community Development (Planning)	The City continues to seek opportunities for bikeways and pathways. For example, the city recently submitted a grant for the construction for the replacement of Adobe Creek bicycle/pedestrian bridge that connects the City of Palo Alto with Los Altos.
3. Do street standards promote street layouts that reduce overall impervious surface area and/or trip length?	The City Council was concerned that many of the streets in Los Altos that did not have curb and gutters were becoming too wide because the residence were allowed to paved their shoulders. Therefore in November 2001 they passed a shoulder paving policy that restricts the width of the street plus the paved shoulders not to exceed 19 feet from the street centerline and also requires new street trees in the shoulder area as part of any new work. It was hoped that this would promote landscaping further out toward the edge of the streets into the public right of way.	Public Works (Engineering) & Community Development (Planning)	The City of Los Altos continues to enforce the Shoulder Paving Policy established by City Council in November 2001.

Site Design Question	**Proposed Action (9/15/03)**	**Personnel Involved in the Discussion**	**Summary of Action Taken (6/30/06)**
Policies to Promote Regional/Watershed-based Planning and Zoning			
1. Are watershed-based zoning options (e.g. overlay districts, performance zoning, incentive zoning, imperviousness overlay zoning, or planned development zoning) available?	The City's PUD ordinance (Chapter 14.62) allows flexibility from development standards and can be used for this purpose	Community Development (Planning)	No further action was required.

NEW DEVELOPMENT & REDEVELOPMENT CONSTRUCTION INSPECTION

FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
1	Construction Site Inspections	Los Altos will continue to review and revise SOPs and the City's legal authority related to violations as required, as well as conduct and enforce construction site inspections, and identify continuous improvements. Public projects contain contractual provision requiring the use of BMPs. Los Altos will continue to enforce and improve these provisions.	Public Projects: During the time frame between July 1, 2005 and June 30, 2006 the city of Los Altos awarded only two construction projects. Both projects dealt with some kind of repair. Of these, none were under construction during the raining season. Therefore the city had no problem assuring that all proper construction BMPs were in place and properly maintained. Private Projects: During FY 05/06 the city changed its inspection responsibly from the Building Department to the Engineering Department. It was apparent that the heavy workload that the building inspector had did not allow them sufficient time to adequately manage the inspection of construction sites are required by the Performance Standards.	Community Development & Public Works Department

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
2	Construction BMPs and Control Measures	Los Altos will continue to implement BMPs and other storm water requirements developed through the application process. For Public projects, the contract documents will include the necessary BMPs and control measures applicable for each specific project.	Public Projects: During the time frame between July 1, 2005 and June 30, 2006 the city of Los Altos awarded only two construction projects. Both projects dealt with some kind of repair. Of these, none were under construction during the raining season. Therefore the city had no problem assuring that all proper construction BMPs were in place and properly maintained. The City of Los Altos will continue to review this process. Private Projects: Plans of major remodels and rebuilds submitted to the Community Development Department for permitting were reviewed by the Engineering Department to assure that all applicable BMP and Control Measure requirements are being included in the project plans. Prior to the rainy season, the property owner and the contractor for each of the projects under construction in the city were sent a letter providing each with details of the BMPs that were expected to be installed at each location to protect erosion of sediments from their construction site and also informing them that city inspections would be conducted during the rainy systems to assure they are properly installed and maintained. This letter indicated that a citation would be issued for those construction sites that did not install and properly maintain these BMPs.	Community Development & Public Works Department

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
3	Rainy Season Construction Inspections	Los Altos will continue to conduct construction site inspections for adequacy of storm water quality control measures. The sites will be those that have an active permit from the building department and construction at public facilities. Continue to conduct monthly inspections at these sites during wet season. In addition, Los Altos will continue to inspect each site prior to the beginning of the wet season to assure all have adequate storm water quality control measures	Public Projects: During the time frame between July 1, 2005 and June 30, 2006 the city of Los Altos awarded only two construction projects. Both projects dealt with some kind of repair. Of these, none were under construction during the raining season. Therefore the city had no problem assuring that all proper construction BMPs were in place and properly maintained. Private Projects: The City of Los Altos developed a list of over 200 construction projects that had any kind of site work. Except for two, all projects were single-family major remodels or rebuilds. Prior to the rainy season, the property owner and the contractor for each of the projects under construction in the city were sent a letter providing each with details of the BMPs that were expected to be installed at each location to protect erosion of sediments from their construction site and also informing them that city inspections would be conducted during the rainy systems to assure they are properly installed and maintained. This letter indicated that a citation would be issued for those construction sites that did not install and properly maintain these BMPs	Community Development & Public Works Department
4	Staff Training and Educational Material Library.	Los Altos will continue to require inspectors to attend annual workshops and training, as well as providing internal training prior to each rainy	Public/Private Projects: City design engineers and construction and maintenance inspectors attended the December 9. 2005 training at Cupertino on “Construction Site Planning and Management for Compliance with Phase I and Phase II NPDES Requirements”.	Community Development & Public Works Department

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
5	Construction Inspection	Evaluate Inspection activities conducted in FY 2005-2006 and explore opportunities to increase program effectiveness. Report results in the FY 2005-2006 Annual.	See "New Development-Construction Inspection Program Evaluation" section below.	Community Development & Public Works Department

New Development-Construction Inspection Program Evaluation FY 2005-2006

Private Projects: During FY 05/06, the Engineering Department (versus the Building Department during previous years) conducted construction inspections of private projects to assure compliance with the city's storm water permit. This allowed time for a more thorough inspection of the over 200 construction projects in the city. Each project was inspected monthly. Sixteen citations were issued for not installing BMPs or for poorly maintained BMPs on site. But, in general, contractors installed and properly maintained their sites. But it was clear that without constant inspections, BMPs would not be properly maintenance at many sites, let alone even installed. The City will continue with this inspection process during FY 06/07.

Public projects: The city had only two small construction contracts during the year. Both were finished within 2-4 months and none were under construction during the raining season. All construction inspectors are trained in the application of applicable BMPs. For example, catch basins near sites are protected with filter fabric to prevent debris for entering the storm drain system. For public projects, the city has no problem with complying with its permit.

Regional Board Comments on New Development-Construction Inspection in FY 2004-2005 Annual Report

PEST MANAGEMENT
(Provision C.9.d of the Permit)

FY 2004-2005 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Municipal Pesticide Use **Goal 1.A.** Eliminate all unnecessary municipal pesticide uses (particularly organophosphate (OP) pesticide use) and implement Integrated Pest Management (IMP) techniques.				
1	Pesticide Use on Municipally Owned	Continue to track pesticide use on municipally owned property. Los Altos is currently using Excel software to track all pesticide applications. City has long since prohibited the use of OP pesticides. Will report the results of this tracking in the FY 05/06 AR, if necessary	The City continued to record all pesticide application and submit this documentation on a monthly basis to the Santa Clara County Department of Pesticide Regulation. A summary of the pesticide application is summarized at the end of this section. No pesticide violations or other related concerns were reported during the year.	URP Coordinator & Public Works Maintenance Department
2	IPM Policy	Review IPM policy requiring the use of IPM techniques in the agency's operations, minimization of pesticide use. Los Altos Public Works has a written and approved IMP policy. This policy also restricts the use of organophosphate pesticides for every operation. Will continue to implement the policy. Will evaluate the policy annually and improve as deemed necessary.	The city's maintenance department continues to review other control measures before any pesticide applications are utilized in accordance with the IPM policy. Staff provided information on IPM to City staff to educate them about IPM. Staff was successful in utilizing mulch instead of herbicides for the control of weeds as many locations. No improvements have been made to the policy and procedure at this time.	Public Works Maintenance Department

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
3	IPM Standard Operating Procedures (SOPs) and Best Management Practices (BMPs).	Review standard operating procedures (SOPs) and best management practices (BMPs) for implementing the IPM policy.	Public Works has an approved SOP, which is included within the approved IPM policy. This document contains all applicable BMPs and implementing policy. Los Altos continued to implement the SOP during the FY. Staff also continued to review its SOP and during the FY and did not find any need to make any improvements.	URP Coordinator & Public Works Maintenance Department
4	City Pest Control Contractors	Los Altos will continue to review process to ensure that any contractor employed to conduct pest control and pesticide application on municipal property. Los Altos has only two or three contractors used for pesticide application. They are informed annually of Los Altos' IPM Policy.	Los Altos has one primary contractor, but did use two other contractors once during the year. They are provided Los Altos' IPM policy and staff assures that they are following it.	Public Works Maintenance Department
5	Agency Wide Inspection.	Continue to conduct a periodic agency-wide search of chemical storage areas for pesticides no longer legal for application per EPA, State, and/or local requirements, and properly dispose of any such pesticides pursuant to appropriate waste disposal regulations. Los Altos' IMP Policy states that this inspection is conducted biannually.	Maintenance supervisory personnel conduct quarterly facility inspections to identify any improper chemical storage at City buildings on an annual basis. In addition, supervisory personnel continually monitor the various public facilities for improper uses. No unauthorized pesticides were found.	Public Works Maintenance Department
6	Internal IPM Outreach	Continue to conduct internal outreach on less toxic pest control to employees who do not necessarily purchase or apply pesticides during the course of their work (to encourage employees to use IPM techniques away from work). Brochures on less toxic pest control are available for employees in City offices.	Staff sponsored an "Argentine Ant IPM Control" workshop in association with Urban Pesticide Pollution Prevention Project. Other municipalities were invited and sent participants. Staff also attended several other IPM training courses throughout the year as noted in "Staff Training" at the end of this report.	URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
7	Documentation	Document completion of tasks in annual reports. Use pesticide-tracking process to document pesticide use. Los Altos will document municipal pesticide use in the FY 2005/2006 Annual Report.	See the "Summary of Pesticide Usage FY 05/06" at the end of this section.	URP Coordinator
Goal 1.B. Raise awareness of all municipal employees and train employees who apply pesticides for the municipality about the municipality's IPM Policy and/or IPM techniques as appropriate.				
1	Pesticide Applicator Training	Los Altos will continue to ensure that employees who apply pesticides for the agency obtain the appropriate training as required by the County Agricultural Commissioner and the State Department of Pesticide Regulation (DPR). Los Altos employees are trained every January in order to maintain its operator ID number	All Parks Division employees involved with pesticide application receive annual training, like the January training to maintain their operator ID number, in the proper use, handling, mixing, storage, and application of Roundup Pro and Surflan AS (the only two pesticide used by city staff). In January 2006, Parks Division passed Santa Clara County Department of Pesticide Regulation annual inspection including our training documentation.	Public Works Maintenance Department
2	Pesticide Applicator Training	Los Altos will continue to provide annual training on the appropriate portions of the IPM Policy, SOPs, and BMPs, and the latest IPM techniques to employees within departments responsible for pesticide application. Los Altos' IPM Policy states that the City will conduct training at least once a year on Pest Management.	12 Parks Division employees involved with pesticide spraying receive annual training conducted at the Municipal Service Center. Training was conducted by certified spray applicator regarding IPM Policy, BMP's, and SOP's. Training is summarized in the Staff Training list at the end of this Annual Report.	Public Works Maintenance Department

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
3	Employee Training	Los Altos will continue annually to inform employees who are not authorized and trained to apply pesticides that they cannot use over-the-counter pesticides in or around the workplace, consistent with the IPM Policy. Los Altos' IMP Policy states that the City will conduct training at least once a year informing employees of the use of pesticides in the work place.	Staff was unable to conduct formal internal outreach to employees, but supervisor personnel are continually monitor the public spaces and there were unauthorized use of pesticides reported during the fiscal year	Public Works Maintenance Department
4	Pest Management Training.	Los Altos will continue to send staff to a workshop on least-toxic pest control methods and pesticide management BMPs. Staff will attend other applicable training as it becomes available	Parks Division supervisor and staff attended three separate training seminars during the year that dealt with issues of the city's IPM program in addition to two in-house training sessions including one that was hosted by the city and was attended by other agencies. Training is listed in the Staff Training list at the end of this Annual Report.	Public Works Maintenance Department
5	Staff Training	Los Altos will continue to document and evaluate effectiveness of staff training conducted each year in annual reports. Los Altos is required to provide similar documentation to the Santa Clara County Department of Pesticide Regulations. Los Altos will provide the required information in the FY 2004/2005 AR.	The City of Los Altos passed the Santa Clara County Department of Pesticide Regulation annual inspection including our training documentation. No violations for pesticide spraying were issued by DPR and no other concerns from other agencies or residents were received during the fiscal year. It would therefore appear training has been effective.	Public Works Maintenance Department

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Public Education and Outreach **Goal II.A.** Increase awareness of IPM so target audiences recall less toxic pest management messages and adopt IPM behaviors. Target audiences include residential and commercial users, pesticide retailers, municipal employees, and special districts (PS #6)				
1	Watershed Education & Outreach (WE&O) Campaign	Implement the Watershed Education & Outreach (WE&O) Campaign, which will target the general public and include messages about less-toxic pest control and proper disposal. The Campaign will include extensive media campaign with South Bay English- and Spanish- language TV and radio stations. Los Altos will continue to assist this outreach program as required**.**	As documented in the Public Information Participation section of this Annual Report, the City of Los Altos continues to support the Watershed Education & Outreach Campaign.	URP Coordinator
2	BASMAA Regional Media Relations Campaign	Continue to fund BASMAA Regional Media Relations Campaign featuring pitches to Bay Area media and responses to breaking news on pesticide-related topics. Los Altos will continue to fund the Program for BASMAA baseline projects, including Regional Media Relations Campaign.	The City of Los Altos continues to fund and support the efforts of the BASMAA Regional Media Relation Campaign through the Program.	URP Coordinator
3	Pesticide User Outreach	Continue to assist Program with implementation of local components of a "Pesticide User Outreach" project targeting residential and commercial users	The City of Los Altos continues to assist the Program with the implementation of public outreach. For example, based on information provided by the Program, the City of Los Altos hosted a seminar on the use of less toxic methods for the treatment of the argentine ant in March 2006.	URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
4	IPM Outreach	Continue to provide information on less toxic pest control (e.g., IPM techniques, municipal IPM policies, model contract language, training opportunities, etc.) to neighboring special districts (e.g., open space districts, vector control districts, and school districts) as appropriate. Program to assist with materials. Los Altos will distribute applicable information as required	The only neighboring districts are the school district and the City of Los Altos did not provide them information on less toxic pest control. Los Altos would provide assistance to them if necessary.	URP Coordinator
5	Outreach Evaluation	Document or estimate numbers of residents reached by outreach efforts and media advertising. Los Altos will document this outreach effort in its FY 2005/2006 Annual Report	See "FY 05-06 Accomplishments" for Item No. 2 under "Public Information/Participation" section of this report for the accomplishment for this task. It is difficult to say exactly how many residents it reaches though most of the people seem to be interested in reducing the risk from pesticides.	URP Coordinator
Goal II.B. Educate pesticide retailers and consumers about less toxic pest control products and promote the sale of such projects.				
1	BASMAA Regional IPM Partnership	Los Altos will continue to fund and participate in the BASMAA Regional IPM Partnership. Program funds BASMAA baseline projects, including Regional IPM Partnership.	The City of Los Altos still continues to fund and participate, as necessary, in this program. As a benefit of this program, the city is able to receive updated and to replenishes its IPM fact sheets	URP Coordinator

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
2	IPM Store Partnership Program	Los Altos will continue to implement cost-effective elements of the IPM Store Partnership Program, as identified in the work plan developed by the Program. Create and provide fact sheets and other materials to pesticide retailers to facilitate point-of-purchase outreach. Visit stores as necessary to ensure ongoing participation. Los Altos will continue working with the City of Palo Alto on this program.	See "FY 05-06 Accomplishments" for Item No. 2 under "Public Information/Participation" section of this report for the accomplishment for this task.	URP Coordinator
3	IPM Store Partnership Program	Los Altos will continue to assist Program to document number of participating stores, materials distributed and employees trained. Los Altos will continue to assist Palo Alto and will documentation the cost evaluation as required.	The City of Los Altos was available to provide assistance as necessary.	URP Coordinator
Pest Control Operators (PCOs) **Goal III.A.** Minimize pesticide use by PCOs contracted for structural pest control and landscape maintenance.				
1	Municipal PCOs	Continue to have PCOs contracted for municipal applications to use pest control methods consistent with the municipality's IPM policy (through contract specifications).	All pesticide work is done through open purchase order. Contract language was reviewed and it was felt improvement could me made by issuing a "short form" contract versus open purchases order. This would allow the city to provide each contract the specification for application requirements. City will initiate the development of such a document. Parks Supervisor advises contractors of the City of Los Altos IPM program.	Public Works Maintenance Department
2.	Municipal PCOs	Document the pesticide use by the PCOs on municipal property in the Annual Report.	See "Summary of Pesticide Usage FY 05/06" that follows this section of the Annual Report.	URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Goal III.B. Require all PCOs to implement Best Management Practices (BMPs)				
3	Municipal PCO BMPs	Continue to require PCOs contracted by municipalities to implement BMPs through contract specifications.	All pesticide work is done through open purchase order. Contract language was reviewed and it was felt improvement could me made by issuing a "short form" contract versus open purchases order. This would allow the city to provide each contract the specification for application requirements. City will initiate the development of such a document. Parks Supervisor advises contractors of the City of Los Altos IPM program.	Public Works Maintenance Department
4	Documentation.	Document efforts to complete the above actions in the Annual Report	See "Summary of Pesticide Usage FY 05/06" that follows this section of the Annual Report, the Staff Training list at the end of this Annual Report for a list of IPM related training that Staff participated in during FY 05/06, and the program evaluation that follows.	URP Coordinator
Commercial Businesses **Goal IV.A.** Determine the extent of commercial business employees' use of pesticides (I.E., pesticide applications not performed by a licensed PCO) and conduct appropriate outreach regarding less toxic pest management.				
1	Commercial Business Outreach Work Plan.	Assist Program to provide outreach on less toxic pest control to target businesses in the South Bay, as appropriate and cost-effective.	The city of Los Altos continued to assist the Program on outreach to the businesses in the South Bay.	URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Household Hazardous Waste Collection **Goal V.A.** Provide pesticide disposal services through household hazardous waste (HHW) collection programs for all residents and small businesses, and encourage use of these programs.				
1	Small Quantity Commercial Generators.	Continue to ensure that adequate pesticide disposal services exist for residents and conditionally exempt small quantity commercial generators.	The City of Los Altos residents have access to the household hazard waste collection services available through the County Household Hazardous Program. This program includes an appointment-based drop-off at various weekly events held throughout the county including one event held in the City of Los Altos at the Egan School on April 8, 2006. At this event, there were 173 participants from the City of Los Altos, 27 from the Town of Los Altos Hill and 240 from other locations in Santa Clara County.	Public Works Department
2	Pesticide Disposal	Continue to work with HHW collection agencies to support, enhance, and help publicize programs for proper pesticide.	The City of Los Altos attends monthly meetings with the Technical Advisory Committee, which consists of cities in the Santa Clara County. Los Altos is also a member of the HHW subcommittee, which meets quarterly. In conjunction with this committee the city provide technical advice and funding to help support the Santa Clara County Household Hazardous Waste web site.	Public Works Department

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
3	Hazardous Waste Disposal Outreach	Continue to provide hazardous waste disposal information to residents, through distribution of materials (e.g., utility bill insert, city newsletter, community events, etc.) or advertising in local media	HHW collection is advertised in the annual mailer sent out to all solid waste customers of the Los Altos Garbage Company in October 2005 and thru telephone response to queries, and through the County's solid waste website at sscgov.org. The annual household hazardous waste pickup in Los Altos is advertised in the local paper, the Los Altos Town Crier.	Public Works Department
4	Documentation	Document that household hazardous waste collection programs adequately serve residents and businesses (conditionally exempt small quantity generators) in Annual Report	Based on customer feedback at local events, 70% of participants rate the HHW program as "Good" or "Excellent". 96.5% reported they received adequate information when they called the appointment line to schedule their HHW drop-off. Additionally, Los Altos Police Department had no reports of hazardous waste abandoned during the fiscal year.	URP Coordinator
New Development **Goal VI.A.** Minimize pesticide use at new and redevelopment sites.				
1	Pest-resistant Landscaping and Design Features	Los Altos will encourage developers and contractors to consider pest resistant landscaping and design features. Los Altos will report the percentage of new development and redevelopment project for which pesticide reduction measures were required in Annual Report	Private Projects: The City encouraged project applicants to use pest resistant landscaping and have information available for project sponsors to help them achieve this goal. The City of Los Altos had no Group 1 or Group 2A projects during the FY and most all project are rebuilding of or additions to single family residences. The limited commercial projects are typically remodels in the built-out areas of the city and therefore have very limited, if any, existing landscaping. Public Projects: There were no public projects during FY 05/06 that required landscaping.	Community Development Department

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: City of Los Altos ***Attachment B***

Monitoring and Science **Goal VII.A.** Participate in coordinated monitoring efforts to support pesticide TMDL development and implementation.				
1	Regional Monitoring Program (RMP)	Assist in the financial support of the Regional Monitoring Program (RMP)	City of Los Altos provides their share of cost to the Program for this effort.	URP Coordinator
Review and Revision of Work Plan **Goal X.A**. Implement a Work Plan that includes appropriate goals, actions and monitoring mechanisms to reduce pesticide-related toxicity in urban runoff.				
1	Continuous Improvement	Revise work plan and add continuous improvement items.	The City of Los Altos believes that the current workplan submitted in March 2006 fulfills this requirement.	URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: City of Los Altos ***Attachment B***

Pest Management Program Evaluation
FY 2005/2006

The City of Los Altos has a very small pesticide program and we believe we have good control to minimizing pesticides in urban runoff. Improvements could be made in the area of use of more pest resistant landscaping in private projects, but since the city is built out, this extra effort probably would not have much of an impact. The City still could use assistance/information on pest resistant landscaping since staff is not well trained on the development of this type of landscaping.

Staff continues to monitor and comply with Pest Management Program and utilizes IPM policy to determine best procedure for pest control. Through annual training of Maintenance Division personnel on Public Work's IPM policies and practices and following BMP's and SOP's in the safe use and application of pesticides Public Works had no citations or complaints this year. All City pesticide applications are documented with Santa Clara County Department of Pesticide Regulation. All contract spraying was completed with a recommendation from a PCA who was advised of our IPM policy before making a recommendation. We will continue to train Public Works personnel on Public Work's IPM policy

The Household Hazardous Waste program seems to work well. California's AB939 allows jurisdictions to set tipping fees at jurisdiction's landfill's to include a fee to support Household Hazardous Waste collection, and disposal or recycling. Santa Clara County has set this fee at $1.85 / ton of municipal waste. This generates enough revenue for Los Altos resident's HHW disposal costs of $39,160.45, or about 322 households. This funding level is intended to provide "free" disposal of HHW to 3% of the city's households. Actual participation by Los Altos is estimated at 9%, and the City provided augmentation of $51,000 from the Solid Waste Fund in 2005/2006 so that all residents of Los Altos who desire to use the HHW collection program can do so at no direct cost to the resident. The City did not have any abandoned waste this year. There are areas that might need improvement, such as very limited participation by multi-family unit dwellers and families where English is not spoken in the home. Additionally, improved outreach at the State, County, and City level will be needed in the upcoming months to educate residents on disposal options for universal waste, which cannot legally be disposed of in residential garbage after January 2006.

MERCURY POLLUTION PREVENTION PROGRAM
(Provision C.9.c of the Permit)

FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Municipal Use of Mercury-Containing Products				
Goal I. Eliminate all unnecessary municipal use of mercury containing products and establish proper disposal methods for products that cannot be eliminated.				
1	Mercury Policy.	Los Altos will continue to implement its policy for mercury-containing product reduction and management.	The City of Los Altos does not have a written mercury policy policy, but has been managing its usage and disposal for some time. For example, when florescent lights are replaced, the old ones are collected and are periodically manifested to a proper disposal site. Last FY the City of Los Altos had 79 eight-foot tubes and 265 four-foot tubes picked up by a recycling contractor. New lights are low mercury florescent type. From a city operation standpoint these lights are probably the largest and about the only source of mercury.	URP Coordinator
2	Documentation on Mercury Policy	Los Altos will summarize effort for FY 05-06 in the FY 2005-2006 Annual Report	Aside from the fluorescent lighting in most of the city buildings, the only other known mercury sources are mercury thermostats in 5 of 11 city buildings and mercury switches in the cities two sewer pump stations. When the lights burn out, these florescent light tubes are replaced with low mercury tubes. Last FY the City of Los Altos had 79 eight-foot tubes and 265 four-foot tubes picked up by a recycling contractor.	URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Household Hazardous Waste Collection **Goal Ii.** Provide mercury-containing products disposal services through household hazardous waste (HHW) collection programs for residents and small businesses, and encourage use of these programs.				
1	Disposal Services	Continue to provide mercury-containing products disposal services for residents and small businesses.	The City of Los Altos supports the County's HHW program which includes mercury collection and collection of "universal waste" i.e. florescent light tubes that contain mercury. This year, the program added a free collection service for participating retailers who agreed to act as repositories for fluorescent lamps. Both local hardware stores participate, and additionally collect and hold alkaline batteries for turn in to the county-approved contractor for disposal (batteries) and recycling (fluorescent bulbs). The Regional Water Quality Control Plant managed a free thermometer exchange for residents desiring to obtain mercury-free thermometers to replace older thermometers. The HHW collection events also take mercury thermometers, fluorescents, and batteries.	Public Works
2	Documenting and Reporting Guidelines	Continue documenting and reporting quantities of mercury-containing products disposed in Annual Reports.	The City is unable to report on the quantities from the city since it is collected and disposed of aggregately with other Santa Clara County cities by the county's HHW Program	Public Works

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
3	Fluorescent Light Recycling Program	Continue to develop and publicize fluorescent light recycling program. Continue to assist the Program and work with local agencies to develop and publicize fluorescent light recycling program	The city of Los Altos does not have its own fluorescent light-recycling program but works with the Santa Clara County Household Hazardous Waste Program, which offers recycling of these lights. The city now has two hardware stores certified to collect and hold consumer returned fluorescents for recycling by the County's contractor. This program is funded through a grant applied for by the County on behalf of member cities including Los Altos, and has been publicized by posters at the participating hardware stores, and in response to telephone queries. There has been much publicity regarding correct disposal alternatives for fluorescents in the local print media, and the city advertises HHW collection services, the HHW annual collection event and funds a pullout section of the Yellow Pages.	Public Works
Monitoring and Science **Goal III.** Participate in coordinated monitoring efforts to support mercury TMDL development and implementation, including assessment of air pollution sources of mercury and concentrations of mercury in sediment.				
1	Regional Monitoring Program (RMP)	Continue financial support of the Regional Monitoring Program (RMP). Continue to support the RMP steering committee and technical review committee. Continue to support the coordinated regional plan to collect data for the mercury TMDL, as defined in the RWQCB/BACWA/BASMAA MOU.	The City of Los Altos continues to provide financial support for the Regional Monitoring Program. Also the City of Los Altos continues to provide comments as necessary for the program regarding the possibility of a mercury TMDL.	URP Coordinator

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Public Education and Outreach **Goal:** Increase awareness of proper disposal of mercury-containing products and available non-mercury containing alternatives. Target Audiences include residential, commercial and industrial users and municipal employees.				
1	Development of Outreach Material	Los Altos will continue to support the program in the development of outreach materials.	The city of Los Altos supported the Program efforts during the FY to develop partnerships with various retail stores to provide free fluorescent lamps drop-off sites for residents. The city has implemented the service in two of the city's hardware stores.	URP Coordinator
2	Distribution of outreach material	Los Altos will continue to distribute outreach material and document each activity in Annual Report	The City of Los Altos continued to support the program in the development and distribution of various fact sheets, newsletter articles, press releases, newspaper ads, etc.	URP Coordinator

Mercury Pollution Prevention Program Evaluation
FY 2005/2006

Due to the limited amount of mercury products within the city buildings, it is difficult to provide a practical evaluation of this program. The largest and about the only source of mercury within the city's buildings is fluorescent light tubes. During FY 05/06 the City of Los Altos had 79 eight-foot tubes and 265 four-foot tubes picked up by a recycling contractor. The City was able to get two of its hardware stores to begin accepting used fluorescent light tubes from residence. The City continues to review this program to areas of improvements.

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
	Copper Action Plan Tasks			
9	Vehicle Washing Operations (CB-1)	• Continue to distribute outreach materials on proper vehicle/equipment washing at City department counters and public events, and post on City website.	Los Altos continues to dedicate counter space accessible to the public at City Hall for these various brochures like "The Bay Begins at Your Front Door". Los Altos also continues to provide for a link on its web page that the public can also use to access information.	URP Coordinator
		• Continue to submit data regarding vehicle washing outreach activities and effectiveness evaluation in annual reports.	This is difficult for Los Altos to quantify other than to say, from observation; there have been only rare incidents of vehicle washing both during construction operation and residential car washing.	URP Coordinator
		• Continue to require source control measures for Group 1 new development and redevelopment projects that will conduct vehicle/equipment washing and maintenance activities (consistent with Permit Provision C.3.k).	During the FY, Los Altos did not have new Group 1 or Group 2A projects or any project that involved vehicle/equipment washing and maintenance activities.	URP Coordinator
		• Continue to inspect industrial/ commercial facilities, which conduct vehicle/equipment washing activities on-site (this includes auto-related businesses). Ensure that BMPs for vehicle/equipment washing are implemented. Provide an effectiveness evaluation of inspection/compliance with BMPs	All fourteen auto businesses in Los Altos are formally inspected annually. During the year, city staff is aware that these discharges are not allowed and will report such incidents to the Code Enforcement Officer or the URP Coordinator.	URP Coordinator

Other Water Quality & Watershed Management Programs Evaluation FY 2005/2006
Monitoring-The City of Los Altos continues to work with the Program on this task. Since the effort is by the Program, they have provided an evaluation of this task. PCB-Dioxin- The City of Los Altos continues to work with the Program on this task. Since the effort is by the Program, they have provided an evaluation of this task. Watershed Measures- The City of Los Altos continues to work with the Program on this task. Since the effort is by the Program, they have provided an evaluation of this task. Sedimentation- The City of Los Altos continues to work with the Program on this task. Since the effort is by the Program, they have provided an evaluation of this task. Trash Program-The City of Los Altos continues to work with the Program on this issue as a member of its Adhoc committee. The city continued to assess eight previously selected trash problem areas within the city. The city has a program to inspect these areas and conduct any necessary cleanup on at least a monthly basis. Even after this further assessment, it continues to appear that Los Altos may not have the same problems as other city. This may be due to the lack of industrial and commercial areas. The city will continue to be a member of the trash committee and continue to provide support to the Program to further comply with its permit. Copper Action Plan-The city continues to address various tasks as defined by the Action Plan. Due to lack of industrial and commercial areas, this leaves most of the effort to residential areas and to schools. The city continues to discourage the use of exterior copper in their construction. The city continues to have an aggressive street sweeping and storm drain cleaning programs. This may explain why there appears to be a lack of persistent trash problem areas throughout the city. The city continues to address inquiries from pool owners on their discharges. The city has room to improve alternate modes of transportation other than cars by improving its pedestrian access and its bicycle facilities. Both are included in the General Plan and future Capital Improvement Projects. The City of Los Altos also continues to work with the Program on this task. Nickel Action Plan-The primary effort for the city under this Action Plan deals with discharges from construction sites. City inspectors aggressively assure that there is no or minimal discharges from any of its constructions sites. Though the inspectors attend various training sessions, very little, if any, addresses what the nickel sources are that might be coming from construction sites. The City of Los Altos also continues to work with the Program on this task

PUBLIC INFORMATION/PARTICIPATION
(Provision C.4)

FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
1	Distribution of all current Program BMPs and literature	Los Altos will continue to promote and maintain a request line for public information materials. Continue to distribute public information materials to the City libraries, Public Works Engineering help desk, building and planning department desks, at the Municipal Service Center and Chamber of Commerce. Keep records on the usage of this material	The City of Los Altos continued with the distribution of the public information within the various public buildings in the City of Los Altos that promotes the use of less toxic pesticides and other environmental issues include the proper draining of swimming pool water. Los Altos had to discontinue providing this information at its libraries due to the lack of available space. Los Altos also hosted a table at several of its weekly Farmers Market event held during the summer months and provided handouts that deal with environmental issues. The city continues to maintain information on its web page on how residents could help to reduce pollutants into the environment including how to prevent sewer overflows.	URP Coordinator

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
2	IPM Store Partnership	Los Altos will continue participation in IPM Store Partnership Program with the City of Palo Alto by providing funding and participating to supply various outreach information to the two nurseries and the two hardware stores in the City of Los Altos. Monitor effort to realize the goals of this program	The Our Water, Our World (OWOW) program, a partnership between water quality agencies within the Palo Alto service region and local hardware and garden stores, encourages the use of less-toxic gardening techniques and products. Los Altos partner stores are Los Altos Garden Supply, Los Altos Nursery, and Rancho Hardware. During FY 05/06 IPM outreach more specific to Los Altos also included the following activities: • Conducted a Clean Bay Campaign, which appealed to residents to prevent household hazardous waste and pollutant from entering San Francisco Bay. This campaign included a press event with a canoeing trip attended by two members of the Los Altos' Environmental Commission. • With the assistance of EOA staff, kept fact sheets stocked at City Hall and the partner stores; kept shelf talkers at stores updated. • With the assistance of Palo Alto, Los Altos partnered with the City of Los Altos Walgreens store to collect and properly dispose of used pharmaceuticals during the 19th and 20th of May 2006. Almost 100 residents in Los Altos used this opportunity to disposed of there used medications. • Staffed Los Altos Farmers' Market with displays, including IPM issues and proper disposal of used pharmaceuticals, pesticides and other wastes • During September 2005 distributed copies of the *Bay-Friendly Landscaping Guidelines* to Los Altos libraries.	URP Coordinator

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
2 (cont.)	IPM Store Partnership (cont.)	Los Altos will continue participation in IPM Store Partnership Program with the City of Palo Alto by providing funding and supplying various outreach information to the two nurseries and the two hardware stores in the City of Los Altos. Monitor effort to realize the goals of this program (cont.)	• Staffed a display on mosquitoes at the September 2005 Los Altos Wine and Art Fair. • Did a presentation to the City of Los Altos rotary club in April 2006, which dealt with various environmental issues. • Conducted three separate school outreach sessions for the schools in the City of Los Altos. Feedback from these presentation indicated that well over 90% of the students stated they had a better understanding of water pollution prevention and the difference between storm drain/sewer systems.	URP Coordinator
3	Watershed Education & Outreach Campaign.	Los Altos will continue to encourage municipal staff to participate in Watershed Education & Outreach campaign as the events are scheduled	The URP Coordinator continues to monitor the efforts of the Watershed Education & Outreach campaign and the information that they provide. During FY 05/06 this include the South Bay Home and Garden Show and OSH How To Fair both in May.	URP Coordinator
4	Evaluate the effectiveness of PIP projects	Los Altos will continue to review and will attempt to assess the effectiveness of all PIP projects at the local municipal staff level.	See "Public Information/Participation Program Evaluation" section below.	URP Coordinator
5	Web page	Los Altos will continue to maintain URP issues on its city web page.	The city continues to maintain a web page on stormwater issues including links to the SCVWD, BASMAA and SCVURPPP as well as information for the prevention of sewer overflows.	Community Development, Public Works Department
6	Articles in the Communiqué	Los Altos will continue prepare and contribute articles of interest to the City's publication called the Communiqué. The Communiqué is published up to three times annually.	The newsletter is published by the city three times a year and is mailed to every address in the city. Unfortunately this is a rather small newsletter, but the city provided small articles on urban storm water runoff issues. For example, the city published an article on the property owner and contractor responsibility to keep construction site clean.	URP Coordinator

Municipality: City of Los Altos ***Attachment B***

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
7	Storm Drain Stenciling	Los Altos will continue to be point of contact with the City's schools and organization that are interested in stenciling storm drain catch basing. Provide support and materials for each event of which they are typically 3-4 per year	The city utilizes volunteers to install stencils on storm drain catch basins. Unfortunately during FY 05/06, the City of Los Altos had no volunteer groups who provided people that stenciled several storm drain catch basins. The City continued to promote this service.	URP Coordinator

Public Information/Participation Program Evaluation FY 2005/2006

The City of Los Altos believes that distribution of material at Los Altos partner stores each year seems very positive. City stores such as the Los Altos Garden Supply and Los Altos Nursery seem to get more usage of the various facts sheets than those stocked at city hall. This is also true for such events as the city's Farmers Market. Primary reason is the exposure audience is more conducive to these fact sheets than the visitors to city hall.

The pharmaceutical drop off event that was held in May 2006 was very successful. Most people stated that were always looking for means to properly dispose of their used medications and most said that would throw it in the garbage or flush it down the toilet. This event allowed city staff to provide methods to properly dispose of medications including information on the proper location where they could take their medication to in the future.

A summary of the evaluation on the school outreach program in Los Altos showed by 69% of teachers returned a postage paid evaluation postcard, with a cumulative rating of 4.9 out of 5 in both quality of program and clarify of presenter. 99% stated students' understanding of water pollution prevention and the difference storm drain/sewer system had increased.

ANNUAL REPORTS AND WORKPLANS
(Provision C.6)

FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
1	Annual Report (Provision C.6.a)	Los Altos will prepare a FY 04-05 Annual Report documenting the results of each task that was delineated in the FY 04-05 Work Plan and provide update for work accomplished during the FY as necessary. Los Altos will address any comments on the FY 03-04 Annual Report if required.	The Annual Report for FY 04/05 was completed by the City of Los Altos and submitted on September 15, 2005. Comments from the Regional Board were received on the City of Los Altos' FY 03/04 Annual Report and were addressed in the applicable sections of that Annual Report.	Community Development, Public Works Department & URP Coordinator
2	Work Plan (Provision C.6.b)	Los Altos will prepare a FY 06-07 Work Plan that will list tasks as dictated by the City's Discharge Permit that will be accomplished between July 1, 2005 and June 30, 2006.	A draft Work Plan for FY 06/07 was completed by the City of Los Altos and submitted on March 1, 2006.	Community Development, Public Works Department & URP Coordinator
3	City of Los Altos Urban Runoff Management Plan	Los Altos will update its Urban Runoff Management Plan as required based on Model PS developed by the Program or comments from the Regional Board	The City of Los Altos updated is Urban Runoff Management Plan and submitted in on September 1 2004. Subsequent to that, no other updates were necessary.	Community Development, Public Works Department & URP Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2004-2005 Annual Report

Municipality: City of Los Altos ***Attachment B***

New Development-Planning Procedures Program Evaluation FY 2004/2005
Public Projects: During the time frame between July 1, 2004 and June 30, 2005 the City of Los Altos awarded 8 construction projects. None of these projects fell under the definition of a Group 1 or a Group 2 project. All projects dealt with some kind of repair to facilities. Other than construction BMPs that were applied, these projects did not allow any opportunity to apply such things as source control, etc. However, the City of Los Altos continues to review all public projects with respect to all C.3 requirements. Private Projects: During the time frame between July 1, 2004 and June 30, 2005 the City of Los Altos had no new Group 1 projects (nor any Group 2 projects). As a small jurisdiction, the requirements of the program are very difficult for us to implement, though fortunately the City did not have any Group 1 projects during the fiscal year. For many years the City of Los Altos has worked with applicants to limit the amount of storm water runoff from private property. We could use assistance with handouts and other information regarding the program. With limited staff, it is difficult for us to prepare information for the public. We could especially use assistance with the pest resistive landscape information. This is not something our staff is trained to review. If the program could produce information for us, it would be helpful. The City of Los Altos will revise it Municipal Code to include the requirements for Group 2 upon acceptance of the definition for these types of projects.

Note: This page was added to this annual report in response to a comment made by the Regional Board on the City of Los Altos FY 2004/2005 Annual Report.

September 15, 2006

Mr. Bruce Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: Town of Los Altos Hills Urban Runoff Management Program
FY 2005-2006 Annual Report

Dear Mr. Wolfe:

This report is submitted by Town of Los Altos Hills, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2005-2006 in accordance with the Town of Los Altos Hills' Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 1997 and updated in October 2000 and September 2004, and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 05-06 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

I. Contents of report;
II. Program highlights and accomplishments;
III. Summary of continuous improvement activities;
IV. Attachments:
   A. Acronyms/Abbreviations
   B. Certification Statement
   C. Self-Evaluation and Work Plan Completion Matrix
      - IC/ID Elimination Activities
      - Public Streets, Roads and Highways Operation and Maintenance
      - Corporation Yard Operation and Maintenance
      - Rural Public Works Activities
      - Storm Drain System Operation and Maintenance
      - New Development Planning Procedures
      - Construction Inspection

26379 Fremont Road

Fax 650/941-3160

- Pesticide Management Activities
- Mercury Pollution Prevention Activities
- Other Water Quality and Watershed Management Requirements
- Public Information/Participation
- Staff Training Summary Table

Program Highlights and Accomplishments

We feel that the Program continued to be effective in meeting our Program goals. Though there are only twenty one full time staff in the Town of Los Altos Hills, the staff has been working with team effort to implement our URMP and FY 05-06 Work Plan to the maximum extent practicable.

In FY05-06 the Public Works staff has developed a new ordinance to implement C.3. requirements for the Town of Los Altos Hills. The new ordinance has been approved by the City Council in September 2005.

The Town of Los Altos Hills did not encounter any significant problems or incidents during the past year. The Town had 12 incidents of sanitary sewer overflow in FY05-06. Most of the sewer overflow happened on the street and the lands of private property. The surface of the overflow locations were cleaned immediately.

Continuous Improvement Activities

The Town of Los Altos Hills was able to accomplish several of the work plan goals in the past year and anticipates continue to improve in outside staff training, public outreach and increased public awareness of Program goals.

This year Public Works staff inspected 40 construction sites of private development and several public works projects. The pre-rainy season and rainy season inspections were effective in getting construction sites to install proper BMPs. The inspection coverage of the sites was adequate because it focused on the erosion/sediment controls. The Town of Los Altos Hills did not take enforcement actions this year since the contractor followed the instructions or warning of the inspector. The inspector always inspected the sites after each verbal warning to make sure the compliance was achieved. The contractors on Public Works projects have done a good job in erosion/sediment control.

Public Works staff has prepared an article for Town Newsletter to be published in December 2006 about disposal of fluorescent bulbs and used batteries. This is an effective way to reach property owners since all the property owners in the Town receive Town's newsletter by mail each quarter.

Thank you for your review of this Annual Report and welcome any comments that you might have. If you have any questions regarding the materials submitted, please contact Richard Chen at (650) 947-2509.

Very truly yours,

Richard Chen, P.E.
Associate Engineer

Town of Los Altos Hills
FY 2005-2006 ANNUAL REPORT
ATTACHMENT

Performance Standard Completion Certification Statement

"I certify, under penalty of law, that the Town of Los Altos Hills has implemented all elements of the following performance standards, except as described in the Self-Evaluation Matrix in Attachment B of this FY 05-06 Annual Report, according to the policies and procedures described in the Town's Urban Runoff Management Plan dated September 1, 2004.

Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, this information is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

Signature by Duly Authorized Representative:

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Illicit Connection & Illegal Dumping Elimination Activities						
ICID-2	Staff Training	URMP	Conduct annual training for urban runoff inspector and on-call staff.	Urban runoff inspector and on-call staff have attended annual training conducted by the program	On-going	Public Works
			Review and evaluate effectiveness	This year the Town of Los Altos Hills has no reported incidents of construction site wash discharged to the storm drain system. Annual training is very effective way to renew and refresh the requirement of urban runoff inspection	On-going	Public Works
Industrial/Commercial Discharger Control Programs						
	None in the Town of Los Altos Hills					
Public Streets, Roads, and Highways Operation and Maintenance						
PSRH-3	Staff Training	URMP	Conduct annual training for Public Works Maintenance staff.	The training on BMP has been conducted on annual basis	On-going	Public Works
	Street Sweeping	URMP	Sweep streets with catchbasins once a month. Collect the types of street sweeping data and make it available to Program staff.	The selected streets are swept once a month all year round. The entire length of 900 miles have been swept. About 30 CY of material per month was collected from street sweeping.	On-going	Public Works
			Review and evaluate effectiveness	Town's maintenance crew performed street curb, swale, and shoulder cleaning work prior to rainy season and picked up piles of leaves to keep the street drainage system clean.	On-going	Public Works

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Rural Roads						
New	Rural Roads O&M Performance Standards	C.5	Implement the Performance Standards. Sweep streets according to the schedule mentioned in above section.	The Town has incorporated the Performance standards into URMPs.	Annually	Public Works
			Review and evaluate effectiveness	There was no new rural roads designed or constructed this year. The public works construction on rural sites have been inspected to make sure that erosion and sediment controls were maintained.	On-going	Public Works
Storm Drain System Operation and Maintenance						
SD	Storm Drain Maintenance	URMP	All tasks are routine and on-going.	All routine tasks have been conducted continually.	On-going	Public Works
SD	Reporting of Observed ICID Evidence	URMP	Report to Program for the ICID data annually.	Staff has attended annual training which covered storm drain facility maintenance and illicit connection issues. Maintenance crews were trained to call Code Enforcement Officer to report ICIDs.	On-going	Public Works
	Storm Drain Maintenance	URMP	Evaluate and ensure that contractors use appropriate BMPs when conducting such activities as street painting, storm drain O&M, etc.	We have evaluated and ensured that contractors use appropriate BMPs when conducting such activities as street painting, storm drain O&M, etc.	On-going	Public Works
			Review and evaluate effectiveness	Town's storm drain system was inspected and cleaned prior to and during the rainy season. This preventive measure reduced a lot of complaints or emergency calls during the rainy days. All material collected was disposed properly.	On-going	Public Works

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Water Utility Operation and Maintenance						
	Not operated by the Town of Los Altos Hills					
Corporation Yards Operation and Maintenance						
	Staff Training	URMP	Conduct annual training for Public Works Maintenance staff.	The corporation yard in the Town of Los Altos Hills does not perform heavy vehicle and equipment maintenance. The yard has been inspected by the County's Environmental Health Department every two years for material storage.	On-going	Public Works
			Review and evaluate effectiveness	The Town has installed new storm drain pipe across the yard in May 2006 to improve storm drain system in the Yard. The yard only handle light maintenance for the small scale of the equipment and therefore there is no pollution problem.	On-going	Public Works
New Development and Construction Controls -- Planning Procedures (C.3)						
	C.3.c Requirements for Group 1 and Group 2 Projects					
New		C.3.c.9	Update performance standards for Group 2 projects as needed.	Town's ordinance covers Group 2 projects.	Continuous Improvement	Public Works.
	C.3.e Operation and Maintenance of Treatment BMPs					

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
New	Reporting	C.3.e.6	Report on the Co-permittee's treatment BMPs O&M verification program in each annual report, including organizational structure, evaluation of effectiveness, and planned improvement to the program. Include a list or summary of treatment BMPs inspected during the year, inspection results, and any required follow-up and correction.	The Town of Los Altos Hills has developed the Town's verification program for the projects requiring stormwater control measures. The staff in Public Works and Planning Departments has been implementing the program. They conduct pre-final and final inspections on site development projects to ensure that drainage, erosion control and landscaping work comply with the stormwater control measures. The Town does not have Group 1 project during the year.	ongoing	Public Works
			Review and evaluate effectiveness	It is very effective to conduct pre-final and final inspections on site development projects to ensure that drainage, erosion control and landscaping work comply with the stormwater control measures		Public Works
	C.3.f Hydrograph Modification Plan					
New	Reporting	C.3.f	Attend HMP training workshop conducted by the Program to train staff on HMP	Town does not expect to have any group 1 project so HMP is not applicable.	FY05-06	Public Works
	C.3.j Site Design Measures Guidance and Standards Development					

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
New		C.3.j.4	Incorporate any revised standards and guidance into local project approval process and "fully implement" the revised standards and guidance.	**The Public Works staff has developed a new ordinance to implement C.3. requirements for the Town of Los Altos Hills. The new ordinance has been adopted by the City Council in September 2005.** **The ordinance provides legal authority for the Town to implement C.3. requirements.**	In progress, completed by 6/06	Public Works
	C.3.n Reporting Requirements					
New	Collect and report the following for all projects that must implement treatment measures: BMPs, site design, and source control measures used, sizing criteria, O&M responsibility mechanism and responsible party	C.4.n.4	A system will be in place to collect the information in case such a project is proposed	A system is in place to collect the information in case such a project is proposed. Los Altos Hills did not have any Group 1 new development or redevelopment projects in FY 05-06. See Attachment 2 for detail.	ongoing	Public Works
New	Reporting, staff training, review conditions of approval	C.3.n.5	Collect information and report a summary of types of pesticide reduction measures required for development projects, and the percentage of projects for which pesticide reduction measures were required.	Public Works has customized Program's Model conditions of approval for pest-resistant landscaping features and practices and forwarded to Planning Department for review. As applicable, the Town will modify conditions of approval. The staff has attended C3 workshop related to this issue.	In progress, completed by 6/06	Public Works

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
New Development -- Construction Inspection						
Const -6	Staff Training	URMP	Conduct annual training for Public Works staff.	Attended training for Public Works staff conducted by the Program on December 2005.	ongoing	Public Works
Const -5		Program (Revised PS)	Inspect all construction sites before and during rainy season per Performance Standard. Los Altos Hills will include a summary of the year's written inspection notices (for sites with inadequate erosion/sediment controls) and follow-up actions in the FY 05-06 AR.	This year Public Works inspector inspected **40** construction sites of private development and 2 public works construction projects. **14** of the private construction sites appeared to have erosion/sediment control problems prior to the 1st or 2nd inspections.	ongoing	Public Works.
			Review and evaluate effectiveness	The typical problems were that site access roads were not covered by the crushed rocks and the mud were tracked to the streets; the soil stockpiles were not covered by the plastic sheets; and fiber rolls were not installed. After 1st or 2nd inspections and the warnings given to the contractors, the problems on those sites were corrected. Construction inspection before and during rainy season is very effective to correct the inadequate erosion/sediment controls		Public Works
Pest Management Program						
I. Municipal Pesticide Use						
Goal I.A. Eliminate all unnecessary municipal pesticide use (particularly organophosphate (OP) pesticide use) and implement Integrated Pest Management (IPM) techniques.						

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
		MM I.A.1	Document completion of tasks in annual reports. Use pesticide tracking process to document pesticide use.	The contractors hired by the Town monitored and recorded all pesticide use on Town owned property on a monthly basis.	Annually;	Public Works
Goal I.B. Raise awareness of all municipal employees and train employees who apply pesticides for the municipality about the municipality's IPM Policy and/or IPM techniques as appropriate.						
		I.B.3	Periodically (at least annually) inform employees who are not authorized and trained to apply pesticides that they cannot use over-the-counter pesticides in or around the workplace, consistent with the IPM Policy (PS #4c).	The employees are informed annually.	At least Annually	Public Works
II. Public Education and Outreach						
Goal II.A. Increase awareness of IPM so target audiences recall less toxic pest management messages and adopt IPM behaviors. Target audiences include residential and commercial users, pesticide retailers, municipal employees, and special districts. (PS #6)						
		II.A.14	Conduct internal outreach on less toxic pest control to employees who do not necessarily purchase or apply pesticides during the course of their work (to encourage employees to use IPM techniques away from work).	The Town has provided the handouts at the counter regarding the less toxic pest control.	Annually	Public Works
III. Pest Control Operators (PCOs)						
Goal III.A. Minimize pesticide use by PCOs contracted for structural pest control and landscape maintenance.						

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
		III.A.4	Require PCOs contracted for municipal applications to use pest control methods consistent with the municipality's IPM policy (through contract specifications). Specifically, require contractors to: a) follow the agency's IPM policy, BMPs, and SOPs; b) provide evidence of current IPM training, when feasible; and c) provide documentation of pesticide use on agency property to the agency in a timely manner (PS#6).	Town required the Contractors, Clark Pest Control and Earl's Pest Control, to follow the current IPM policy. They received current IPM training and provided documentation of pesticide use on Town property. See Attachment 3 for details. The weed control service is designed using the IPM philosophy to suppress and control the most common weed species. The pesticide usage has not changed over the past year and past few years.	Ongoing	Public Works
Goal III.B. Require all PCOs to implement Best Management Practices (BMPs).						
		III.B.2	Require PCOs contracted by municipalities to implement BMPs through contract specifications. (See Action III.A.4, above.) (PS #6)	The Town has notified Clark Pest Control and Earl's Pest Control to implement BMPs in their contract work in the Town.	Annually	Public Works
		MM III.B.1	Document efforts to complete the above actions.		Annually	Public Works
IV. Commercial Businesses						
	None in Los Altos Hills.		.			
V. Household Hazardous Waste Collection						
Goal V.A. Provide pesticide disposal services through household hazardous waste (HHW) collection programs for all residents and small businesses, and encourage use of these programs.						
		V.A.5	Provide hazardous waste disposal information to residents, through distribution of materials (e.g., utility bill insert, city newsletter, community events, etc.) or advertising in local media	Los Altos Garbage company provided hazardous waste disposal information to residents through garbage bill inserts.	Periodically, at least annually	Public Works

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
VII. New Development						
Goal VII.A Minimize pesticide use at new and redevelopment sites.						
		VII.A.2	Consider pesticide reduction in the design, landscaping, and environmental reviews of proposed development projects. (C.9.d.ii.)		Annually	Public Works
		MM VII.A.1.	Summarize types of pesticide reduction measures required (such as by conditions of approval) for new development and significant redevelopment projects, and the percentage of new development and significant redevelopment projects for which pesticide reduction measures were required. (C.3.n.)	Projects got fact sheet about this subject.	Annually	Public Works
VIII. Monitoring and Science						
X. Review and Revision of Work Plan						
Goal X.A Implement a work plan that includes appropriate goals, actions and monitoring mechanisms to reduce pesticide related toxicity in urban runoff.						
		MM X.A.1.	Revise work plan to include any continuous improvement items. Report on completion of work plan tasks in Annual Report.	There is no continuous improvement items.	Annually; submit work plan updates in March; AR in September	Public Works
			Review and evaluate effectiveness			Public Works
Mercury Pollution Prevention Program						
I. Municipal Use of Mercury Containing Products						
Goal I. Eliminate all unnecessary municipal use of mercury-containing products and establish proper disposal methods for products that cannot be eliminated.						
		I.D	Adopt a mercury policy or ordinance requiring the virtual elimination of mercury from controllable sources in urban runoff from agency operations.	The Town will consider and develop such policy in 06-07.	FY 05-06	Public Works

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source[1]	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
		I.F	Continue implementing the Guidelines for Mercury-Containing Products Reduction and Management.		Annually	Public Works
		MM I	Document completion of tasks in annual reports. Use mercury-containing product reporting guidelines.	The Annual Report summarizes the work completed.	Annually	Public Works
V. Public Education and Outreach						
Goal V. Increase awareness of proper disposal of mercury-containing products and available non-mercury containing alternatives. Target audiences include residential, commercial, and industrial users and municipal employees.						
		V.B	Use existing mercury outreach materials, as needed, for outreach programs.	In September 2004 Public Works staff has published an article in the Town Newsletter about mercury pollution prevention. Materials available at Town Hall	ongoing	Public Works
		V.C	Attend community events and distribute outreach materials.	Los Altos Hills continues to assist Program by providing support.	Annually	Public Works
		MM V.B	In the Annual Report, document and evaluate each outreach activity	See attached PIP Table	Annually	Public Works
			Review and evaluate effectiveness	Publishing article in the Town's newsletter is an effective way to reach property owners since all the property owners receive Town's newsletter each quarter.		Public Works
Other Water Quality and Watershed Management Requirements						
New	Trash Investigation and Plan Development		Provide Program staff with documentation regarding trash complaints/incidents.	Maintenance crew takes care of roadside trash. We have provided the annual data to the Program on trash complaints and incidents.	ongoing	Public Works
			Review and evaluate effectiveness	Maintenance crew has removed roadside trash in a timely manner.		Public Works

Municipality: Los Altos Hills

P.S. Id.	Activity	CI Item Source	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Copper Action Plan Tasks						
CB-1	Vehicle Washing Operations	CAP	• Distribute outreach materials on car washing at Town Hall counter and public events, and post on Town website. • Submit data regarding car washing outreach activities and effectiveness evaluation in annual reports.	The materials have been distributed. The Town of Los Altos Hills does not have commercial vehicle wash operations.	Annually	Public Works
CB-8	Watershed assessment and protection	CAP	• Revise City's General Plan, as needed, at next scheduled update, based on recommendations from the *Development Policies Comparison Project* and Provision C.3.I. • Review and implement guidance from SCVURPPP and San Jose on addressing water quality in the CEQA review process, as part of C.3.m. implementation.	Will check with Planning Department	At next update As Needed	Planning Planning
CB-11	Street sweeping and storm drain O&M		• Follow Program guidance regarding the collection and reporting of street sweeping data. Provide data for Annual Report. • Evaluate need for improvement of current street sweeping program (within available budget) in FY 03-04 Annual Report.	The selected streets were swept on a monthly bases. The trash swept from the streets were tree leaves and branches. The current street sweeping program is effective for the Town of Los Altos Hills.	Annually	Public Works

Municipality: Los Altos Hills

P.S. Id.	*Activity*	*CI Item Source*	*FY 05-06 Tasks*	*Status / Comments*	*Due Date (mo/yr)*	*Responsible Party*
CB-12	Outreach on pool, spa maintenance	CAP	• Distribute outreach materials at local public events; brochures at Town Hall counter; and placement on Town website.	The related materials have been distributed at Town Hall counter.	Annually	Public Works
CB-21	Use of architectural copper	CAP	• Review and study ordinance from Palo Alto and consider feasibility of limiting the use of copper on roofs, in roof shingles, and for gutters.	Architectural copper is allowed to use. The storm drain outlet from the roof usually is discharged to the property landscaped ground 30 feet away from the property line.		Planning
Nickel Action Plan Tasks						
NB-1	Measures to control nickel discharges from construction sites		• Continue to implement Construction Inspection Performance Standards (see Construction Inspection work plan section). • Continue to have inspectors attend Regional Board/Program workshops on construction site management and learn latest erosion/sediment control techniques • Continue to attend Program workshops on post-development stormwater BMPs (C.3.)	Construction Inspection Performance Standards was implemented continuously. Staff attends Regional Board/Program workshops on construction site management. Staff attended Program workshops on post-development stormwater BMPs (C.3.)	Annually	Public Works

Illicit Connection/Illegal Discharges Report Data, Town of Los Altos Hills

Type of Pollutants	Number of Incidents	General Location	Reports by citizens or employees	Follow-up action
Sanitary sewer manhole overflow or main broken	9	On the streets or easement of the private property	Reported by residents.	Town's contractors cleaned the sewer main and stopped the overflow or backup. The contractor also cleaned up the surface area. SSOs were reported to the Regional Water Board.
Sanitary sewer lateral cleanout overflow	3	On the private property	Reported by residents.	Town's contractors rodded the sewer main and stopped the overflow or backup. The contractor also cleaned up the surface area. SSOs were reported to the Regional Water Board.

Town of Los Altos Hills
Reporting Form for Planning Procedures Performance Standard
and Provision C.3.n. Reporting Requirements

Part 1

Significant Development Projects[1]
Reviewed and/or Approved During July, 2005 and June, 2006

Project Name	Project Type[2]	Site Size (ac. or s.f.)	New Impervious Surface (s.f.)[3]	Area of Land Disturbed (Ac.)[4]	Project Status	Storm Water Control Measures Included in Project
Private Projects						
The Town of Los Altos Hills did not have any Group 1 projects in FY 05-06						

[1] List all projects with new impervious surface area greater than 10,000 s.f. (Group 1 and 2 projects – see definition on page 3 of the performance standard).

[2] Describe project type, as defined in Provision C.3.c.

[3] "New" is defined as impervious surface created, added or replaced.

[4] If the site is a "significant redevelopment", list the area of land disturbance.

PI/P Activity[1]	Type of Outreach [2]	Level of Implementation (Description/Dates)	Evaluation of Effectiveness [3]
Town literature distribution	General	The Town continues to check and maintain BMP information brochures at Town Hall. The materials for pickup are: • Watershed Watch Kit • The Bay Begins At Your Front Door • Keeping It All In Tune • Draining Pools & Spas • Pests Bugging You? • Grow It We noticed that refill of brochures is needed because they have been taken away from the site.	The materials are accessible to the public coming to the Town Hall. The outreach is effective. This is reflected by the continued low number of reportable incidences.
Literature provided to distribute at Town's events:	General	LAH 2006 Spring Family Picnic, The brochures include: The Bay Begins at Your Front Door, Watershed Watch Kit, Hazardous Materials in Your Home; Creekside News and others.	Peoples attending the events were interested to pick up those brochures.
Newsletter article and ads	General	We have prepared an article titled Watch out for Mercury Pollution for the Town Newsletters in December 2006 to make public aware of the importance of protecting the watershed.	This is a good communication vehicle to reach the residents. Town's newsletters have been mailed to every property owner and resident in Town.
Inform residents of swimming pool discharge requirements	Targeted	Staffs have provided brochures and information to the swimming pool owners when they called or visit Town	Telephone calls have been received and answered; and materials have been distributed upon request in the last FY.

Town of Los Altos Hills
Table of FY 05-06 PIP Activities

		Hall to ask questions regarding this issue. The brochures are very informative.	
Targeted Outreach for Town staff: Building inspectors and plan checkers, Public Works technicians and engineers, Maintenance staff	Targeted	Internal Training.	See attached table: "Training FY 05-06"
Development Community	Targeted	Literature distribution at Town Hall	Restock as needed, check regularly
Resident Living near creeks	Targeted	Watershed Watch Kit, available at the Town Hall	Restock as needed
Public Participation:			
Participated in regional creek cleanup event.	Citizen Participation	Announced cleanup in Town Crier	Very effective methord
Participate in local activities that are coordinated with the Watershed Education & Outreach Campaign	Citizen Participation	Worked with City of Palo Altos and other cities for the activities of Watershed Education & Outreach Campaign	Very effective method

Mr. Bruce Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: West Valley Community Specific Urban Runoff Management Program
FY 2005-2006 Annual Report

Dear Mr. Wolfe:

This report is submitted by the West Valley Cities of Campbell, Monte Sereno, Saratoga, and the Town of Los Gatos, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2005-2006 in accordance with the West Valley Communities' Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 2004 and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 05-06 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

I. Contents of report;
II. Program highlights and accomplishments;
III. Summary of continuous improvement activities;
IV. Attachments:
    1. Table of Contents
    2. Certification Statement
    3. Acronyms

V. Program Elements:

1. IC/ID Elimination Activities
2. Industrial / Commercial Discharger Control Program
3. Public Agency Activities
    - Storm Drain O & M
    - Street Sweeping
    - Corporation Yard
    - Rural Public Works
4. New Development: Planning Procedures
5. Construction Inspection
6. Public Information & Participation
7. Pesticide Management Activities
8. Mercury Pollution Prevention Activities
9. Copper Action Plan / Nickel Action Plan
10. Trash Inventory and Management
11. Water Quality Monitoring and Watershed Management
12. Training Summaries are provided at the end of each element

Responses to Regional Board staff's comments on the FY 04-05 Annual Report (July 26, 2006 letter) are provided at the beginning of the New Development: Planning Procedures section of each West Valley FY05-06 Annual Report.

Program Highlights and Accomplishments

During FY05-06, the West Valley Communities of Campbell, Los Gatos, Monte Sereno, and Saratoga continued efforts to implement their URMPs to the maximum extent practicable. The activities that were implemented for each element of each Community's URMP are described in Chapter 14 of the Santa Clara Valley Urban Runoff Pollution Prevention Program's URMP. Highlights of the West Valley Communities accomplishments in various program elements are described below.

Industrial/Commercial Discharger Control Program. During FY05-06, the West Valley Communities rewrote their inspection agreement with the Santa Clara County Central Fire District, extending the inspection program for five additional years. This renegotiation allowed the West Valley Communities to update the Fire District's inspection procedures, clarify their reporting requirements for improved follow up and data management, and provide material from the latest Urban Runoff Management Plans (2004) for enhanced inspector training.

Public Information/Participation Program. In FY 05-06, the West Valley Clean Water Program continued to expand its quest for effective public education and outreach. WVCWP pursued media coverage on several topics: safe disposal of E-waste and other mercury-containing products, trash impairment of creeks and the Bay, cleanup and trash assessments by students and parents, and a Saratoga student's Eco-Hero award for his campaign to keep residential pollutants (pesticides and

copper) out of the storm drain. The student's story about his mission and his partnership with WVCWP can be found in the Public Information and Participation section of this report (Attachment 6B).

Nine stories, news briefs, or letters to the editor, were covered by local community newspapers in FY05-06. The most telling article was unsolicited; a Saratoga News cover story appeared about residents deluging City Hall with calls when the funds for household hazardous waste disposal were cut short due to the City's budget shortfall. By March 2006, the City Clerk had received over three hundred calls after funding ended in November and forced a stop to residents' participation in HHW drop-off events. A copy of the article is attached to section 10 – Trash Management & Watershed Management, of Saratoga's Annual Report (Attachment 10G).

The West Valley Clean Water Program strives to maximize student involvement at every opportunity. WVCWP staff developed a fourth-grade presentation script incorporating State standards with messages on pesticides, copper, mercury, household hazardous waste and trash. The new curriculum expands the existing fifth-grade presentation by including both Coastal and Wetlands Enviroscape models. The educational presentation runs for over an hour, and during its debut was extended at the teacher's request, while an entire class of students, teachers and parents at Saratoga Elementary School remained engaged in participation and questions and answers. At least thirty students and parents from the same class spent the following Saturday working with WVCWP staff to tally and categorize trash as they cleaned up the banks of Saratoga Creek.

The WVCWP prioritized education on trash, pesticides, fluorescent bulbs, and E-waste in FY05-06. A Kindergarten script was developed for St. Mary's School in Los Gatos. Two groups of fifteen Kindergartners listened to Clean Water Program messages as they followed the script and "polluted" the water on two Enviroscape models. Immediately following the presentation the teacher and students were motivated to walk the school grounds and collect all the trash they could find for proper disposal.

Illicit Connection and Illegal Dumping Elimination Activities. A primary goal for the West Valley IC/ID Program has been to ensure adequate follow up of all potential urban runoff violations related to restaurants. The West Valley IC/ID Inspector presented a restaurant inspection training session, focused on urban runoff pollution issues, to twenty-two Dept of Environmental Health specialists at the annual (April 18th) meeting coordinated by Cupertino, the County and the WVCWP. This is the second time that the WVCWP Inspector has discussed his restaurant inspection program with DEH specialists in the last three years. Feedback from DEH staff this year was very positive. The presentation was considered to be very helpful and photos from actual inspections especially worthwhile. Training sessions with other agency and municipal staff are effective, evidenced this year when DEH specialists called the West Valley IC/ID Inspector to report IC/ID incidents, outside of, and unrelated to, their regular restaurant inspections. Increased scrutiny by other agency and municipal staff continues to strengthen the program.

Storm Drain Operation and Maintenance. The West Valley Sanitation District (WVSD) completed a major task which will make storm drain cleaning procedures more efficient and the annual SD reports more useful to the WV cities. FY05-06 was the first year that the enhanced storm drain maintenance reports were available to the cities. The reports document the status of each stormdrain and, if applicable, the nature of any problem. The majority of structures were "clean" but a few were noted as having obstructions (e.g. "leaves/paper"). Other descriptors that

are available in the report are: mud/dirt, foreign object, rocks/stone, sand/gravel, etc. All structures, as needed, are cleaned at the time of inspection. The WVSD's report may be used by WV cities to help monitor specific pollutant problems such as trash sites.

C.3 Implementation. In July and August, 2005, an engineering consultant hired by the WVCWP talked with staff in each West Valley city to review any remaining challenges with C.3 implementation. This year the cities made progress in preparing for implementation of BMP O&M verification inspections and HMP requirements. The West Valley Communities were beginning to see the completion of the first Group 1 projects in June 2006. Throughout FY05-06 the cities participated in regular monthly training meetings frequently dominated by discussion of the implementation of C.3. requirements. The BMP O&M Verification Programs were discussed in great detail and minor updates were made in FY05-06 to that section of the West Valley URMPs. The revised standard operating procedures for the BMP O&M Verification Programs were reviewed with the engineering consultant and included as attachments in New Development – Planning Procedures (section 4) of each of the WVC FY05-06 Annual Reports.

To show the spirit of C.3. implementation, two West Valley cities which have not had Group 1 or Group 2 projects to date, have made significant efforts to include swales and runoff control measures on all projects. Saratoga provided copies of drawings to developers to help them visualize the swales with under drains, which the City Engineer recommends. Monte Sereno's City Engineer required drywells, which overflow to vegetated areas, on all residential development projects, except where the ground water level was too high.

Pesticide Activities. By popular demand, the WVCWP held its third West Valley IPM Workshop. This year the WVCWP partnered with the City of San Francisco to hire Frank Rossi, a national expert (from Cornell University) who presented guidelines for managing turf with little or no pesticides. The training included PowerPoint presentations and a field trip to examine Campbell's community athletic field turf. For the past three years the WVCWP IPM workshops have prompted overwhelmingly positive feedback from municipal staff, special district personnel and private golf course superintendents. This year thirty four (34) municipal staff from three West Valley Communities and one Golf Course Superintendent from Los Gatos attended the workshop. Based on the material presented, WVCWP staff wrote a Turf Management Plan, which the four municipalities adopted. The IPM plan is included in the Pesticide Management section of the Annual Report (Attachment 7A).

Mercury Pollution Prevention Activities. In FY05-06, the WVCWP spent significant staff time and resources to offer a way for the public to get involved in reducing the amount of mercury containing waste going to landfill or being disposed of illegally. At the suggestion of the WVCWP, United Datatech recyclers agreed to hold a free TV and computer monitor recycling event in the West Valley. It turned out to be a successful effort to encourage the community to take action and to inform the public of the goals of the West Valley Clean Water Program. The WVCWP hired a PR firm (the one currently being used for the Watershed Watch campaign) to design a newspaper ad and write and submit a press release to local newspapers. As a result at least 6 news briefs, stories, and letters on the topic of hazardous waste and water quality were covered by local newspapers. Over 250 participants enthusiastically dropped off 33,657 lbs. of electronic waste materials in four hours. The event opened up an opportunity to survey the drivers and discuss mercury pollution and proper disposal of fluorescent bulbs and batteries, as people waited in vehicles to go through the line.

Trash Inventory and Management. West Valley volunteers were key partners in trash assessment and management this year. The WVCWP held two annual trash assessment and cleanups at Westmont High near San Tomas Aquino Creek. Campbell and Los Gatos/Monte Sereno each held a successful volunteer event in the Guadalupe Watershed and Saratoga partnered with the WVCWP and a local elementary school to assess and clean up trash along Saratoga Creek in the San Tomas Aquino Watershed. A combined total of over 280 volunteers categorized and picked up 12,078 trash items for a total of 1,532 lbs of trash removed during the four volunteer events where trash tallying was conducted along with cleanup. School presentations helped to promote interest in trash collection and trash management among students, teachers and frequently among parents. The increased participation is testament to the measurable benefits of educational outreach activities.

Continuous Improvement Activities

Illicit Connection and Illegal Dumping Elimination Activities. The IC/ID program continues to work phenomenally well for the West Valley Communities. As a result of having a centralized inspection program and frequent presentations or talks given by the West Valley inspector (at training sessions, workshops or municipal lunch meetings), the overall awareness of the West Valley IC/ID program has increased among other agency staff. Calls from other agencies and municipal staff (inter-departmental) increased from forty-seven (47) reports in FY04-05 to sixty-two (62) reports in FY05-06.

The inspector responded to 98 discharge incidents over the year (see IC/ID section Attachment 1A for the number and types of incidents), and conducted 28 proactive and follow-up inspections. Each of these inspection opportunities adds to the community's knowledge of storm water pollution and prevention issues. As part of the inspection process, the inspector distributes applicable educational materials. The West Valley Clean Water Program Inspector provided 421 brochures and other educational materials to industrial/commercial facilities and residents in FY05-06.

Industrial/Commercial Discharger Control Program. During FY05-06, the three West Valley Communities of Campbell, Los Gatos, and Saratoga continued to implement their Industrial/Commercial Inspection Program. The City of Monte Sereno has no industrial or commercial facilities operating within the City and therefore does not participate in this activity. In Campbell, 296 of 309 facilities were inspected, 109 of 112 facilities were inspected in Los Gatos, and 8 of 8 facilities in Saratoga were inspected. In FY05-06, the West Valley Clean Water Program's Stormwater Inspector continued to conduct proactive investigations targeting vehicle facilities for additional education regarding storm drain issues. In Campbell, Los Gatos, and Saratoga, 16 facilities were visited and notified of urban runoff requirements and the role of the Clean Water Program. All sixteen facilities were found to be in compliance.

Copper and Nickel Outreach Activities. This year the West Valley Clean Water Program's Home page at www.cleancreeks.org was updated to better promote the use of the Car Wash Kit to contain waste water runoff at local fundraisers. The Fire Dept Hazardous Material Specialist, who trains the Industrial/commercial facility inspectors, also requested copies of the Car Wash flyer for distribution to supervisors of local car wash events.

Staff Training. The West Valley Communities place a strong emphasis on training. The Annual Reports reflect this with numerous references to the Staff Training Summaries; these summaries are located at the end of each section in the Annual Reports. In FY 05-06 training was expanded

by use of a video camera to tape various trainings for viewing by additional staff at a later date. The West Valley Clean Water Program will continue to emphasize better communication between WVCWP staff and municipal staff and to host training sessions that are worthy of staff time and convenient to attend.

Thank you in advance for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact me at 408.316.1233.

Very truly yours,

Cheryl C. Donnelly

FY 2005-2006 ANNUAL REPORT

ILLICIT CONNECTION & ILLEGAL DUMPING ELIMINATION ACTIVITIES

FY 2005-2006 Work Plan Self Evaluation Matrix

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
2004 URMP Perf. Standard	Program	a. ICID Performance Standards Implement updated local URMP to reflect revised Performance Standards. Provide staff training on revisions.	IC/ID Performance Standards were updated as part of the URMP revision in Sept 2004. There were no changes made to the Standard Operating Procedures (SOPs) in FY05-06.	SCVURPPP & WVCWP & Engineering Inspectors
	URMP	b. Response Program Continue to implement IC/ID Stormwater Discharge Inspector response program and evaluate for continuous improvement.	During FY05-06 the West Valley Inspector responded to 25 incident reports, made 3 follow-up inspections, and engaged in 5 proactive inspections targeting restaurants and vehicle shops in the town of Los Gatos. One IC/ID Inspector conducts a centralized incident response and proactive restaurant and vehicle shop inspection program for four West Valley communities. The Inspector follows up on all reports of potential violations.	WV Inspector
	FY05-06 Work Plan	c. Enhanced Reporting Report on incidents using categories consistent with SCVURPPP Program. Document follow-through to point of resolution or referral for enforcement action (penalty or fine).	The WVCWP Inspector keeps a standardized Access database of all IC/ID response calls and their follow-up through resolution. West Valley's annual data was provided to SCVURPPP for Program-wide analysis.	WV Inspector
	Continuous Improvement Item	d. Restaurant Inspection Program Continue proactive inspection program tar-geting medium to large-scale restaurants, because of the higher probability that this subset of food handling facilities may contribute to stormwater pollution.	In order to provide standardized data to SCVURPPP one (1) proactive inspection of medium to large scale restaurants, conducted by the WVCWP IC/ID Inspector, is now reported in the IND section of this report.	WV Inspector

Los Gatos

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2005-2006 ANNUAL REPORT

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
	Continuous Improvement Item	e. Vehicle Shop Inspection Program The West Valley Clean Water Program will continue expansion of vehicle shop inspection program (formerly *Auto Body Pilot*) targeting auto repair facilities in the West Valley area and providing additional education on vehicle-washing, stormwater issues.	In order to provide standardized data to SCVURPPP, four (4) proactive inspections of vehicle shops, conducted by the WVCWP IC/ID Inspector, are now reported in the IND section of this report.	WV Inspector
	URMP	f. Education Distribute BMP materials during routine inspections. Distribute follow up education information for businesses cited for potential stormwater violations.	During FY 05-06, the WVCWP Inspector distributed one hundred eleven (111) IC/ID and IND educational materials in Los Gatos, as part of his outreach and inspection program.	SCC Fire & WV Inspector
	Training	g. Training Conduct training & evaluation meeting between Storm Water Discharge Inspector and Town staff, as needed to improve procedures.	Each year the WV Inspector visits a West Valley community to meet with municipal staff and explain the importance of staff being the eyes and ears for the IC/ID response program. Referrals to the WVCWP are encouraged for all incidents including seemingly innocuous ones like pool water discharges. On 4/18/06 the WV IC/ID Inspector led a training meeting and presented a slide show to twenty two (22) Santa Clara County Environmental Health inspectors. The topic was stormwater violations typically found at restaurants and West Valley reporting procedures and follow-up actions. The inspector has also attended various workshops in FY 05-06 related to illegal discharges to the storm drain system (i.e. erosion control (12/8/06), street sweeping (5-8-06) and new development (6-6-06). Type of Incident	**Miscellaneous Incidents**	**Incident Source**	**Report Source**	**Follow-up Action**
• 5 Accidental Spills • 5 Allowable Discharges • 3 Food Facility • 1 Grey Water Discharge • 3 Landscaping Material Dumping • 2 Miscellaneous • 1 Paint Discharge • 1 Pool /Spa/Fountain • 1 Tracking Soil • 1 Vehicle and Equipment Leak • 2 Vehicle Washing **Total 25 Reported** 20 Incidents 5 Non Incidents *note 3 follow up inspections are not included in the above categories	**Breakdown of 2 Miscellaneous Incidents:** • 1 PG&E Cut down Trees, debris in Creek • 1 Underground Storage Tank release	• 2 Public Facility and Utilities • 5 Commercial • 6 Residential • 6 Construction Site • 3 food Facility • 3 Automotive Facility	• 5 Other Agency • 2 Other • 11 Interdepartmental • 5 Citizen Complaint • 2 Illicit Discharge Inspectors	• 12 Verbal Notice • 7 Warning Notice • 8 No Action o 2 follow-up to previous incidents o 5 Allowable discharge o 1 Accidental Spill - Cleaned up right away

IC/ID Program Evaluation

IC/ID Training

It appears that the Inspector's training meetings and presentations at various West Valley workshops have been effective. Inspectors from Dept of Environmental Health and the Fire Dept have called to report potential urban runoff violations which were observed outside of their scheduled inspections. This is encouraging for West Valley staff who have tried to improve communication and provide relevant training sessions each year.

IC/ID Program Background

In March 2001, the four West Valley Communities hired an IC/ID Inspector to improve coordination and tracking of stormwater incidents. In FY01-02, shortly after he was hired, the WVCWP Inspector initiated a pilot to target vehicle shops (and car wash facilities) for additional proactive inspections and education. A total of twenty five facilities in the West Valley communities were initially targeted, with each receiving at least two on site inspections and multiple drive-by inspections. By

the end of the year all 25 facilities were found to be in compliance.

In FY02-03, due to its apparent need and success, the vehicle inspection pilot was extended, producing approximately five proactive inspections in Los Gatos during the first full year of implementation. However, all on site inspections were tracked as IC/ID incidents even if the facility was found to be in compliance. Five actual or potential violations were related to vehicle washing or automotive shops that year. Following the vehicle inspection pilot, the West Valley Inspector began a pilot targeting medium to large size restaurants.

The West Valley communities have three primary sources of violations that are being prioritized for inspection and education in order to attain maximum compliance: 1) vehicle/automotive shops, 2) restaurants, 3) and construction sites. Inspection of construction sites is conducted primarily by municipal public works and engineering inspectors. The West Valley Inspector responds to potential construction site violations only when they are observed or reported by citizens, Town staff or other agencies.

After FY03-04, during which the West Valley Inspector conducted fifteen (15) proactive on site vehicle shop visits and thirty-four (34) proactive restaurant inspections, SCVURPP requested that West Valley reorganize inspection data to facilitate Program-wide analysis. A separate database was developed by the Program for IND inspections conducted by the West Valley Inspector.

The IND incident data was then reported as part of the IND section of the West Valley annual reports. Therefore accurate trends can only be evaluated for the last two fiscal years, FY04-05 and FY05-06. It is important to note that during the first two or three years of these additional inspections, violations for automotive facilities increased significantly. The West Valley inspector also presented the goals of his Programs to municipal staff at West Valley workshops and to Saratoga City and Los Gatos Town Councils. The relatively high numbers of violations reported was attributed to improved scrutiny and awareness, and more accurate reporting. Restaurant violations saw an increase in reported violations as well. However, now that the two programs have been running for four or five years the numbers of violations have dropped again.

Trend Analysis

In FY04-05 forty-eight (48) reported incidents were investigated; thirty-seven (37) were actual violations. The most common incident source was construction sites, which accounted for eleven (11) violations. Seven (7) landscape material dumping incidents accounted for the number one IC/ID incident type reported in Los Gatos in FY04-05. This was followed by six (6) grey water discharges (some categorized as miscellaneous incidents) and four (4) violations for vehicle washing. Three (3) food facility incidents, three (3) tracking soil incidents, and three (3) saw cutting slurry discharges were also reported. Construction related violations (especially if landscaping is included) are clearly the most prevalent type of IC/ID problem facing the Town. A close working relationship between Town staff and the West Valley Inspector accounts for more reporting of these incidents. Nevertheless, smaller construction projects are evident everywhere throughout the Town and most landscaping projects are not required to have permits so they bypass one opportunity the Town has to educate contractors. To achieve maximum compliance by contractors at small construction or landscaping project sites in Los Gatos, the West Valley Inspector will continue to conduct drive-by observations and (where potential violations are noticed) inspections will be conducted, accompanied by verbal notices and construction (educational) brochures.

In FY05-06 the West Valley IC/ID inspector responded to twenty-five (25) reports of potential violations in Los Gatos. Additionally, he conducted follow up visits to three (3) of these sites to ensure on-going compliance. Out of the 25 reports, Los Gatos Public Works staff initiated 11 referrals. The West Valley Inspector continued to conduct proactive vehicle shop and restaurant inspections, particularly at those sites which have had violations in the past. Six (6) reports originated from Los Gatos' primary incident source, construction sites. In addition, three (3) landscape material dumping violations were reported. Five (5) accidental spills

and five (5) allowable discharges were the most commonly reported incident types, but neither of these types of incidents represents an intentional violation. Three (3) automotive facility violations represent one less vehicle related incident than was reported in the previous year. Three (3) food facility violations were also noted but two of the reports were for a grocery store (Safeway) rather than an actual restaurant. Other incident types were: one (1) report of PG & E cutting down a tree near a creek; one (1) underground storage tank release; and one (1) grey water discharge. The only notable trend is the need for continued outreach to contractors on smaller remodel projects as well as outreach and education for landscapers. The problems related to vehicle shops and restaurants have remained manageable at about three (3) violations each year, as long as the proactive inspection programs continue to provide an additional means of education.

Overall, an improvement in awareness and compliance is evident by the small number of each incident type, and the number of reports that after investigation, turn out not to be violations. In FY06-07 the Town plans to update the plan sheet, “Blue Print for a Clean Bay,” to be consistent with the newly revised construction brochures produced by SCVURPPP in FY05-06. This plan sheet is attached to all grading permits. The West Valley Inspector will to continue to conduct proactive visits of vehicle shops and restaurants but they will be reported as Industrial Commercial Facility Inspections in the IND section of the annual report.

Annual Report FY 2005-2006 Self Evaluation Matrix

Source	Task Source	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
	URMP	a. Joint Inspections of Retail Food Facilities Continue joint inspection program w/ DEH. Approximate number of *food handling* facilities in Los Gatos is 160. All facilities will be inspected at a minimum once per year. WVCWP IC/ID Inspector will conduct follow-up and distribute BMP materials as needed per DEH referrals. Continue to evaluate data management and reporting for desirable improvements or updates.	In FY05-06, all 201 food-handling facilities in Los Gatos were inspected; most of them were inspected 2 or 3 times by Santa Clara County Environmental Health Specialists (inspectors). A total of 450 food facility inspections or re-inspections were conducted by DEH in Los Gatos.	Inspections conducted by SCC DEH; Annual Mtg co-ord by WVCWP
	URMP	b. Training & Evaluation Conduct annual joint meeting/train'g w/ Cupertino and SCC DEH to evaluate Inspection Prgm and discuss improvements. Annual meeting per agreement; scheduled for Spring each yr.	On April 18, 2006 the WV Cities, Cupertino and the County conducted an inspector training meeting. The WVCWP Inspector presented a slide show with photos of urban runoff violations that the Clean Water Program encounters. See evaluation below.	WVCWP to co-ord. w/ Cupertino & DEH
	Continuous Improvement Item	c. Restaurant Inspection Program Continue implementation of proactive inspection program targeting medium to large-scale restaurants. First began as a pilot in FY 02-03. *Medium to large-scale* restaurants are defined as, restaurants with 6 or more employees and/or ones that routinely handle large quantities of grease (approx. 48 in Los Gatos).	Since the West Valley Restaurant Inspection Program's inception in 2002, the WVCWP Inspector has provided at least 235 pro-active inspections for 127 targeted restaurants in the cities of Campbell, Los Gatos and Saratoga. Out of 48 restaurants targeted in Los Gatos, most have been visited more than one time and almost all are familiar with the West Valley Clean Water Program. In FY 05-06, one restaurant was inspected pro-actively in Los Gatos, revealing a clean site, free of urban runoff violations. DEH did not report any restaurant violations for FY05-06.	WV Inspector

			However, one grocery store, two apartments and one lodge had food facility violations noted by DEH. The grocery store violation was referred to the WVCWP for follow-up (see IC/ID, section 1 of this report for details).	
	URMP	c. Joint Inspections of Ind/Comm Facilities Continue joint inspection program. Approximate number of active facilities in Los Gatos is 112. The inspection frequency goal for FY05-06 is 100%. The total number of facilities by business category inspected in FY05-06 will be included in the annual report.	In the Town of Los Gatos, 109 commercial / industrial facilities were inspected by the Fire Dept, meeting 97% of the inspection goal (112). Of the facilities inspected, the Fire Dept found three (3) potential or actual violations and reported two (2) of those to the WVCWP for follow up. The Fire Dept referred a one (1) leaking vehicle incident to WVCWP; which was not the result of a scheduled inspection.	Inspections conducted by SCC Fire
	URMP	d. Training & Evaluation Conduct annual joint meeting/training w/ SCC Fire to evaluate inspection reporting and confirm distribution of materials.	The Fire Dept's annual facility inspection training pertaining to urban runoff requirements was provided to 184 inspectors from May 8th through May 31st 2006. The Inspectors noted that they have plenty of handout materials; West Valley businesses have received all of the educational material during prior inspections. The Fire Dept's Sr Haz Mat Specialist, who provides training to inspectors met with the West Valley Clean Water Prog Mgr and WV Inspector on 3/1/06 to evaluate current procedures and determine revisions for a new Facility Inspection Agreement for FY06-07. A revised inspection form was developed to simplify reporting procedures. Another training meeting between WVCWP Mgr and Fire Dept's Sr. Haz Mat Specialist was held on 5/12/06 to review updated procedures for inclusion in the new Agreement.	Annual Mtg arranged by WVCWP w/ Sr. Haz Mat Specialist
	Continuous Improvement Item	e. Vehicle Shop Inspection Program The West Valley Clean Water Program will continue expansion of vehicle shop inspection program, targeting auto repair	In FY05-06 the West Valley Inspector conducted four (4) pro-active inspections of vehicle shops in the Town of Los Gatos. He also followed up on two automotive referrals from the Fire Dept's facility inspections. The follow up	WV Inspector

Los Gatos

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2005-2006 ANNUAL REPORT

Industrial/Commercial Program Evaluation

Fire Dept Inspections of Industrial / Commercial Facilities:

Of the 109 facilities inspected by the Fire Dept three (3) potential or actual violations were found and two (2) of those were reported to the WVCWP for follow up. The list of violations is provided to WVCWP at the end of each fiscal year. The West Valley Inspector will schedule a training meeting with the Fire Dept Haz Mat Specialist in August 2006 to discuss further inspection one Dry Cleaner with a reported violation during FY05-06. The sites that have previous violations will be prioritized for inspections at the beginning of FY06-07.

After a steady stream of improvements and more communication between Fire Dept and WVCWP staff, the inspection program is prepared for maximum efficiency for the West Valley Cities in FY06-07. When Saratoga was added to the Fire Dept Inspection Agreement for Campbell and Los Gatos (7/1/02) all West Valley facility inspections were coordinated under one umbrella. Monte Sereno does not conduct IND inspections because it has NO industrial or commercial facilities. Since 2001, WVCWP staff has met with Fire Dept staff at least twice a year to discuss standardized reporting, documentation and follow-up.

A new Industrial Commercial Facility Inspection Agreement was signed by the West Valley Cities and the Fire Dept in June 2006.

On March 1, 2006 the WVCWP Manager met with the Santa Clara County Fire Dept, Hazardous Material Specialist, who administers the Agreement for the Fire Dept. The new Agreement was written after reviewing the FY 04-05 Agreement and comparing it to West Valley IC/ID and IND Performance Standards (Revised URMP 2004). The new Agreement, signed in June 2006, covers a five-year period, with annual increases in inspection costs. The Agreement reiterates the importance of referrals to the West Valley Inspector for follow-up. The IND Performance Standard operating procedures are attached to the Agreement as a reference for annual inspector training.

The West Valley Inspector received one vehicle washing referral from Fire Dept staff in addition to those observed during scheduled inspections. This is good news for the West Valley Inspector who conducts educational follow up on each referral. His pro-active vehicle shop inspection program is designed to supplement Fire Dept facility inspections. Shop owners are made to realize the City's responsibility for making sure that the sites are in compliance with water quality requirements. The Inspector has made a positive impact with his visits and the distribution of educational materials depicting the right way to keep equipment, vehicle parts, and service areas covered, and all vehicle wash water managed properly. In a few cases the Inspector's meetings with vehicle shop owners have led to the facility's purchase of a wastewater capture system (noted in previous annual reports).

Industrial/Commercial Program Evaluation Continued

Annual Food Facility Inspection Training Meeting

On April 18, 2006, twenty-two (22) DEH Consumer Protection Division's Environmental Health Specialists attended a training meeting and slide show presented by the WVCWP Inspector. The evaluation from the Supervising Health Specialist was positive: "Jack's presentation was great, and helpful. I believe that review and reinforcement of what a specialist is to look at during at inspection is always beneficial. Comments from staff were positive, especially regarding the photos." Inspectors were shown photos of typical problems. The importance of reporting all potential West Valley stormwater violations to the West Valley inspector was re-emphasized. Other topics covered at this meeting were:

- Updated contact information;
- How to report urban runoff violations to municipal inspectors to ensure accurate tracking and follow up;
- Feedback on the effectiveness of outreach & educational handouts
- Reminder to distribute pesticide reduction fact sheets called "Don't Set a Table for Pests" to restaurants.

At the beginning of FY 05-06 the West Valley Inspector began a more aggressive effort to alert restaurants to the need for regular grease interceptor maintenance. A strategy meeting between the WVCWP Inspector and the West Valley Sanitation District's Director of Operations resulted in a decision to request a copy of grease interceptor maintenance records. It is not necessary to review the records as long as the facility can produce them. The Sanitation District is notified if the records are not available. At the April 18th training meeting for DEH Inspectors, the West Valley Inspector suggested that Environmental Health Specialists look for grease trap maintenance records during their restaurant inspections.

FY 2005-2006 ANNUAL REPORT

Training Summary: Industrial/Commercial Discharger Control Program

Training Description	Date	Attendees
SCC Fire Dept & WVCWP Training **Topics:** ▪ Evaluate current inspection procedures pertaining to urban runoff requirements ▪ Review NPDES Inspection and data requirements ▪ Develop a revised inspection form to clarify reporting procedures ▪ Determine revisions for a new Facility Inspection Agreement for FY06-07	**March 1, 2006**	**WVCWP (2)** Program Manager Stormwater Discharge Inspector **SCC Fire District (1)** Senior Haz Mat Specialist
SCC Fire Dept & WVCWP Training **Topics:** ▪ Review inspection procedures to include in Facility Inspection Agreement ▪ Determine reporting procedures	**May 12, 2006**	**WVCWP (2)** Program Manager Stormwater Discharge Inspector **SCC Fire District (1)** Senior Haz Mat Specialist
SCC Fire Dept. Training for Inspectors Coordinator: John Justice Multiple Trainings - average of 8 firefighters per Training **Topics**: The Fire Dept's annual staff training was provided to their inspectors through the month of May, 2006. The Inspectors noted that they have plenty of handout materials; most businesses have received all of the educational material during prior inspections. See evaluation below. ▪ Conducting an Industrial Inspection for urban runoff issues ▪ Reporting violations found during Inspections ▪ Filling out Urban Runoff Program inspection forms ▪ Discuss educational materials for distribution during Inspections ▪ Q & A and discussion	**May 8 – 31 2006**	**SCCC Fire District - 184** Senior Deputy Fire Marshall and all field staff Due to staff rotation, any firefighter may be called upon to do inspections; therefore, all firefighters in District received training

Training note:

In FY05-06 Fire Dept Inspector trainings were updated to include material which was covered during SCVURPPP's FY04-05 pre-workshop planning sessions and the end of year Industrial/Commercial and IC/ID Inspection Workshop. Fire Dept staff attended the pre-workshop planning meetings to help determine topics which would be helpful for their in-house inspector training sessions. In June 2005, three (3) SCC Fire District staff and several West Valley municipal staff attended the all day IND & IC/ID Inspection workshop.

PUBLIC AGENCY ACTIVITIES: Operation and Maintenance

FY 2005-2006 Work Plan Self Evaluation Matrix

Activity	Task Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Storm Drain Operations and Maintenance				
Annual Storm Drain Cleaning	2004 URMP	Continue contract w/ WVSD. Continue schedule/cycle for inspection and cleaning of storm drain system (two year cycle for residential & one year cycle for commercial/industrial); Public Works staff will clean high leaf drop and other noted areas more frequently and as needed.	West Valley Sanitation District (WVSD) performs systematic storm drain cleaning and inspection annually. Half the Town's storm drains are cleaned and inspected each year. Arterials and commercial/ industrial areas are done annually. Town maintenance staff provide additional cleaning in high leaf drop areas and to remove storm debris from all inlets and grates as needed.	Dir PW coordinates contract & Pub Works Maint. Supt coordinates in-field operations
Training - Annual WVSD/ Oper. & Maint. Meeting	2004 URMP	Annual WVSD / Operations & Maint. Supervisors meeting - evaluate status of annual storm drain cleaning and provide training on maintenance issues.	The annual WV Storm Drain Op & Maint. Supervisor's workshop was held on June 19, 2006. Three (3) Los Gatos staff attended, including the Public Works Superintendent, and Sr. Engineering Tech/Stormwater Rep, and the Street Sweeper Operator. Staff from WVSD, WVCWP, and the other WV Communities also participated. Topics included: • Storm Drain Maintenance findings by WVSD • Review of Emergency Response Procedures for SD overflow • Presentation on Street Sweeping for Water Quality • Power Point Presentation on BMPs for Streets, Rural Public Works and Storm Drain Maintenance Round table discussion on all topics	Mtg lead by WVSD & WVCWP; Attend by PW Maint. staff
Storm Drain Stencils or Signage	C/I item -Source Control Measure	Continue to replace and/or upgrade storm drain stencils or signage on storm drains or catch basins, as needed.	The number of SD inlets in the Town is approximately 1,200. Signage is replaced if it becomes worn, or bent (if it is metal). Thermoplastic storm drain stencils are being applied selectively. Thermoplastic stencils can only be	Maint Supt. coordinates field operations WVCWP to assist with purchase of SD stencils

Los Gatos

			installed on flat surfaces and they are expensive (about $250 each installed). However, the Town has decided that the fact that they are reflective, which provides visibility at night, they adhere well to coarse and uneven surfaces and can withstand heavy traffic, was good reason to spend more for stenciling in appropriate areas. Metal plates, previously installed by the WV communities, are no longer applied because they tended to bend over time, exposing sharp edges and therefore creating a potential to injure pedestrians or bicyclists.	
Street Sweeping/ Pavement Management				
Street Sweeping Program	URMP	By contract – residential swept twice monthly; downtown every week; arterials and Commercial/industrial areas once weekly. High leaf drop and other noted areas cleaned more frequently and as needed (i.e., construction zones - swept by responsible party).	This year the Town collected an annual total of 3,049 cubic yards of debris from sweeping 8,130 residential curb miles; and collected 1,089 cubic yards of debris from sweeping 2,948 curb miles of commercial streets. **The annual combined total was 4,138 cubic yards of debris collected from sweeping 11,078 curb miles.** See the Program's report on Street Sweeping for additional data. In addition to street sweeping, all residents and businesses are required to utilize large recycling bins for leaves and other yard waste as part of their trash collection service. Yard waste is not allowed in streets but waste from receptacles is picked up weekly. **A total of 9,250.7 tons of yard waste was recycled** in Los Gatos during FY 05-06.	Street Sweeper Operator and Public Works Assistant
Street Sweeping Data Collection		Collect and review street sweeping data and provide number of curb miles swept and cubic yards of debris quarterly, to SCVURPPP for evaluation of effectiveness.	Street Sweeping data was collected monthly and provided to the SCVURPPP at the end of the fiscal year.	Street Sweeper Operator and Public Works Assistant, WVCWP assists
Training	FY05-06 Work Plan	As needed, provide training meetings, on collection of street sweeping data to appropriate municipal staff.	Training for municipal staff on street sweeping, data requirements and state of the art street sweeping methods, was included at WVCWP's June 19, 2006 Storm Drain	Maintenance Supt to Coordinate, Street Sweeper Operators to

			Operation and Maintenance Supervisors workshop.	attend, WVCWP to assist
Corporation Yard				
SWPPP	URMP	Implement BMPs.	The current BMPs are working effectively and no problems have been encountered. Los Gatos uses a vehicle wash rack system which helps to contain and divert waste water to the sanitary sewer. Runoff does not flow to the storm drain. The sewer connection includes a three stage interceptor. The first stage is cleaned by Town staff and traps mainly leaves and trash. The last two interceptors trap sediment, grease and metals. They are cleaned and pumped quarterly by a hazardous material contractor.	Maintenance Supt, Parks Maintenance Supt and Public Works staff
Staff Training	FY05-06 Workplan	Perform Annual Review and evaluation of BMPs w/ Corp-Yard walk-thru	On June 15, 2006, Town staff, including the PW Supt and the PW Supervisor, reviewed SWPPP procedures and received training on best management practices (BMPs). A tour of the Corp Yard was conducted. Locations of several absorbent stations were pointed out and questions of possible changes to the SWPPP and URMP were raised and discussed.	Attendees: Sr. Engineering Tech/Stormwater Coordinator, Public Works Supervisor and Public Works Superintendent
Rural Public Works Activities				
Rural Public Works Perf Std	URMP	Continue implementation of Rural Public Works Performance Standard	No Rural Public Works construction took place this year. The model Performance Standard has been implemented. SOPs were reviewed and updated as part of the Town's Urban Runoff Management Plan revision in 2004.	Maintenance Supt
Staff Training	FY05-06 Workplan	Train appropriate Public Works staff on the use of current BMPs and SOPs, as noted in the performance standard.	On June 19, 2006, WVCWP held a Storm Drain Maintenance workshop and gave a presentation for street maintenance staff on BMPs for Rural Public Works. The meeting included a round table discussion among staff from all of the West Valley communities. Requirements of the	Public Works Supt, WVCWP assist

			Performance Standard were reviewed and photo slides of BMPs were shown. Three Town PW staff attended, including the Public Works Supt.	

Rural Public Works Program Evaluation

Stormwater BMPs are currently discussed in pre-construction meetings with contractors; the Town inspects all contracted rural public works work in its jurisdiction and ensures the use of stormwater quality and erosion control BMPs. No CIPs involving Rural Public Works were conducted this year. Maintenance work included clearing of shoulders to prevent erosion and debris runoff during the rainy season. When future construction of Rural Public Works takes place, measures will be implemented for erosion prevention

Street Sweeping Comparison for FY04-05 and FY05-06

Fiscal Year 04-05

Los Gatos

FY 2005-2006 ANNUAL REPORT

Public Agency Activities: Operations and Maintenance Evaluation

Storm Drain Maintenance: The West Valley Sanitation District (WVSD) finished a major task during FY05-06 which will make storm drain cleaning procedures more efficient and the annual SD reports more useful to the WV cities. Since the project began in FY04-05, WVSD staff have been building a database (using asset mgmt software) that would number the storm drains at upstream and downstream locations and provide the street name. FY05-06 was the first year that the enhanced storm drain maintenance reports, with street names, were available to the cities. WVSD presented them at WVCWP's June 19th workshop. The reports document the status of each stormdrain and, if applicable, the nature of any problem. The majority of structures were "clean" but a few were noted as having obstructions (e.g. "leaves/paper"). Other descriptors that are available in the report are: mud/dirt, foreign object, rocks/stone, sand/gravel, etc. All structures, as needed, are cleaned at the time of inspection. The WVSD's report may be used by WV cities to help monitor POC problems, such as trash sites.

Street Sweeping: The Town swept more residential miles this year but not as many commercial miles as last year. The Town sweeps the downtown commercial area weekly, and more often as needed. Therefore, the number of commercial curb miles swept will vary from year to year. The annual amount of debris collected from sweeping increased by 1,448 cubic yards. It is possible that the Town's new sweeper is picking up more debris per curb mile. The amount of yard waste collected also increased by about 1,516 tons this year. Regarding yard waste collection, the WVC have selected a new contractor to provide garbage & recyclable collection. The new contract will begin in March 2007. Yard waste collection methodology and tracking may change when the current contract with Waste Management expires.

The WVCWP Mgr gave a street sweeping presentation at the June 19th West Valley Storm Drain Maintenance workshop, based on a Street Sweeping workshop held on 5/8/2006 in San Jose. The principal speaker at the 5/8/06 workshop was the editor of Worldsweeper.com. He provided material for the WV training. The Town of Los Gatos purchased a new Street Sweeper and used it for the first time in FY05-06. The Town's Sweeper Operator drove the street sweeper to the workshop for viewing and questions by other municipal staff. The Town PW Superintendent gave a brief talk on why this model of sweeper was selected. According to the PW Superintendent, this PM10 certified, regenerative air sweeper will generate fewer dust particles. This type of sweeper is required in Southern California, but not yet required in Northern CA.

There are some benefits to cities if they can afford to invest in their own sweepers. Los Gatos' Sweeper Operator sweeps Monday and Friday morning because he knows when and where to sweep, and will adjust his route according to when cars are not parked in the way of the sweeper.

Training Evaluation: Evaluation forms from the 6/19/06 WVCWP Storm Drain Maintenance Workshop showed that all attendees thought the workshop was "informative and worthwhile." Attendees also requested continued updates on storm drain maintenance and street sweeping practices. Most of those who attended stayed for the optional discussion between cities at the end of the workshop.

Corporation Yard SWPPPs: The Town of Los Gatos along with the other West Valley communities plans to hold a round-table review and discussion of West Valley municipal SWPPPs during FY06-07. The corporation yard SWPPP and standard operating procedures (SOPs) will be evaluated to determine if revisions or additions to the manuals are needed. The outcomes from this review and any SWPPP revisions will be reported in next year's annual report.

Town of Los Gatos
Response to Comments on
FY04-05 Annual Reports

Los Gatos:

Comment: On page 69, Los Gatos refers to the "standard conditions of approval" included in the Annual Report, however, they were not included in the report. **Please submit the "standard conditions of approval" for inclusion in the Annual Report.**

Response: The standard conditions of approval were submitted by email to Sue Ma on 7/27/06 for inclusion in the Town's FY04-05 Annual Report. This attachment is also included as the first document in the in the Planning Procedures section of Los Gatos' FY05-06 report (Attachment 4-0). The conditions of approval that relate to stormwater requirements are highlighted in the attachment.

PUBLIC WORKS COMMENTS
TO THE STAFF TECHNICAL REVIEW COMMITTEE
(Date) MEETING

ITEM (copy from Agenda)

PROJECT PLANNER: *

LAST REVIEWED BY DRC: *

DEFICIENCIES:

- Provide table of existing and proposed impervious areas.
- Trash enclosure - cover and provide sanitary sewer connection.

GENERAL COMMENTS:

1. Roof rainwater leaders are to be discharged onto energy dissipaters (splash blocks), which are designed to spread out the rain water so that it enters the landscaped areas as sheet flow. Runoff from the site should not be collected into a pipe system, concentrated, and discharged down slope. Control off-site drainage, flowing on to the site similarly. No improvements shall obstruct or divert runoff to the detriment of an adjacent, down stream or down slope property. Retaining walls shall include provisions for drainage.
2. Final grading plans shall include a complete erosion control plan. Interim erosion control measures, to be carried out during construction and before installation of the final landscaping shall be included. Interim erosion control method shall include, but are not limited to: silt fences, fiber rolls (with locations and details), erosion control blankets, Town standard seeding specification, etc. Grading in the hillside area will not be allowed to be initiated between October 1 and April 15 of any year.

DRAFT CONDITIONS:
TO THE SATISFACTION OF THE DIRECTOR OF PARKS AND PUBLIC WORKS:
(Engineering Division)

1. GRADING PERMIT. A grading permit is required for site grading and drainage. The grading permit application (with grading plans) shall be made to the Engineering Division of the Parks & Public Works Department located at 41 Miles Avenue. The grading plans shall include final grading, drainage, retaining wall location, driveway, utilities and interim erosion control. Grading plans shall list earthwork quantities and a table of existing and proposed impervious areas. Unless specifically allowed by the Director of Parks and Public Works, the grading permit will be issued concurrently with the building permit. The grading permit is for work outside the building footprint(s). A separate building permit, issued by the Building Department on E. Main Street is needed for grading within the building footprint.

a. Retaining wall--top of wall elevations and locations
b. Toe and top of cut and fill slopes

10. EROSION CONTROL. Interim and final erosion control plans shall be prepared and submitted to the Engineering Division of the Parks & Public Works Department. A Notice of Intent (NOI) and Storm Water Pollution Prevention Plan (SWPPP) shall be submitted to the San Francisco Bay Regional Water Quality Control Board for projects disturbing more than one acre. A maximum of two weeks is allowed between clearing of an area and stabilizing/building on an area if grading is allowed during the rainy season. Interim erosion control measures, to be carried out during construction and before installation of the final landscaping shall be included. Interim erosion control method shall include, but are not limited to: silt fences, fiber rolls (with locations and details), erosion control blankets, Town standard seeding specification, filter berms, check dams, retention basins, etc. Provide erosion control measures as needed to protect downstream water quality during winter months. The grading, drainage, erosion control plans and SWPPP shall be in compliance with applicable measures contained in the amended provisions C.3 and C.14 of Order 01-024 of the amended Santa Clara County NPDES Permit.
11. DUST CONTROL. Blowing dust shall be reduced by timing construction activities so that paving and building construction begin as soon as possible after completion of grading, and by landscaping disturbed soils as soon as possible. Further, water trucks shall be present and in use at the construction site. All portions of the site subject to blowing dust shall be watered as often as deemed necessary by the Town, or a minimum of three times daily, or apply (non-toxic) soil stabilizers on all unpaved access roads, parking areas, and staging areas at construction sites in order to insure proper control of blowing dust for the duration of the project. Watering on public streets shall not occur. Streets will be cleaned by street sweepers or by hand as often as deemed necessary by the Town Engineer, or at least once a day. Watering associated with on-site construction activity shall take place between the hours of 8 a.m. and 5 p.m. and shall include at least one late-afternoon watering to minimize the effects of blowing dust. All public streets soiled or littered due to this construction activity shall be cleaned and swept on a daily basis during the workweek to the satisfaction of the Town. Demolition or earthwork activities shall be halted when wind speeds (instantaneous gusts) exceed 25 MPH. All trucks hauling soil, sand, or other loose debris shall be covered.
12. DUST CONTROL (SITES > 4 ACRES).The following measures should be implemented at construction sites greater than four acres in area:
    A. Hydroseed or apply (non-toxic) soil stabilizers to inactive construction areas (previously graded areas inactive for ten days or more).
    B. Enclose, cover, water twice daily or apply (non-toxic) soil binders to exposed stockpiles (dirt, sand, etc.)
    C. Limit traffic speeds on unpaved roads to 15 mph.
    D. Install sandbags or other erosion control measures to prevent silt runoff to public roadways.
    E. Replant vegetation in disturbed areas as quickly as possible.
13. CONSTRUCTION MANAGEMENT PLAN. The Applicant shall submit a construction management plan that shall incorporate at a minimum the Earth Movement Plan, Traffic Control Plan, Project Schedule, site security fencing, employee parking, construction staging area, construction trailer, and proposed outhouse locations.

2. PRECONSTRUCTION MEETING. Prior to issuance of any permit or the commencement of any site work, the general contractor shall:
   a. Along with the project applicant, attend a pre-construction meeting with the Town Engineer to discuss the project conditions of approval, working hours, site maintenance, NPDES requirement (including erosion control) and other construction matters;
   b. Acknowledge in writing that they have read and understand the project conditions of approval, and will make certain that all project sub-contractors have read and understand them prior to commencing work and that a copy of the project conditions of approval will be posted on site at all times during construction.
3. SOILS REPORT. One copy of the soils and geologic report shall be submitted with the grading permit * public improvement application. The soils report shall include specific criteria and standards governing site grading, drainage, pavement design, retaining wall design and erosion control. The reports shall be signed and "wet stamped" by the engineer or geologist, in conformance with Section 6735 of the California Business and Professions Code.
4. SOILS REVIEW. Prior to issuance of any permit, the applicant's soils engineer shall review the final grading and drainage plans to ensure that designs for foundations, retaining walls, site grading, and site drainage are in accordance with their recommendations and the peer review comments. The applicant's soils engineer's approval shall then be conveyed to the Town either by letter or by signing the plans.
5. SOILS ENGINEER CONSTRUCTION OBSERVATION. During construction, all excavations and grading shall be inspected by the applicant's soils engineer prior to placement of concrete and/or backfill so they can verify that the actual conditions are as anticipated in the design-level geotechnical report, and recommend appropriate changes in the recommendations contained in the report, if necessary. The results of the construction observation and testing should be documented in an "as-built" letter/report prepared by the applicants soils engineer and submitted to the Town before final release of any occupancy permit is granted.
6. FISH AND GAME REQUIREMENTS. A "1603" permit shall be obtained for the California Department of Fish and Game for proposed improvements in or near riparian areas within their jurisdiction. A copy of the permit shall be provided to the Parks & Public Works Department before any permits are issued/final * parcel maps are recorded.
7. GENERAL. All public improvements shall be made according to the latest adopted Town Standard Drawings and the Town Standard Specifications. All work shall conform to the applicable Town ordinances. The adjacent public right-of-way shall be kept clear of all job related dirt and debris at the end of the day. Dirt and debris shall not be washed into storm drainage facilities. The storing of goods and materials on the sidewalk and/or the street will not be allowed unless a special permit is issued. The developer's representative in charge shall be at the job site during all working hours. Failure to maintain the public right-of-way according to this condition may result in the Town performing the required maintenance at the developer's expense.
8. GRADING INSPECTIONS. The soils engineer or her/his qualified representative shall continuously inspect all grading operations. The soils engineer shall submit a final grading report before occupancy/Certificate of Completion.
9. SURVEYING CONTROLS. Horizontal and vertical controls shall be set and certified by a licensed surveyor or registered civil engineer qualified to practice land surveying, for the following items:

14. CONSTRUCTION STREET PARKING. No vehicle having a manufacturer's rated gross vehicle weight exceeding ten thousand (10,000) pounds shall be allowed to park on the portion of a street which abuts property in a residential zone without prior approval from the Town Engineer (§ 15.40.070).
15. SITE DRAINAGE. Rainwater leaders shall be discharged to splash blocks. No through curb drains will be allowed.
16. NPDES. On-site drainage systems shall include a filtration device such as a bio-swale or permeable pavement.
17. STORM WATER MANAGEMENT PLAN. A storm water management shall be included with the grading permit application for all Group 1 and Group 2 projects as defined in the amended provisions C.3 of Order 01-024 of the amended Santa Clara County NPDES Permit. The plan shall delineate source control measures and BMP's together with the sizing calculations. The plan shall be certified by a professional pre-qualified by the Town. In the event that storm water measures proposed on the Planning approval differ significantly from those certified on the Building/Grading Permit, the Town may require a modification of the Planning approval prior to release of the Building Permit. The applicant may elect to have the Planning submittal certified to avoid this possibility.
18. SILT AND MUD IN PUBLIC RIGHT-OF-WAY. It is the responsibility of contractor and home owner to make sure that all dirt tracked into the public right-of-way is cleaned up on a daily basis. Mud, silt, concrete and other construction debris SHALL NOT be washed into the Town's storm drains.
19. OUTDOOR TRASH ENCLOSURES. Outdoor trash enclosures shall be covered and area drains connected to the sanitary sewer system shall be provided. Temporary trash enclosures are exempt from this condition.
20. GREASE TRAPS. Meet all requirement of the Santa Clara County Health Department and West Valley Sanitation District for the interception, separation or pretreatment of effluent.
21. GOOD HOUSEKEEPING. Good housekeeping practices shall be observed at all times during the course of construction. Superintendence of construction shall be diligently performed by a person or persons authorized to do so at all times during working hours. The storing of goods and/or materials on the sidewalk and/or the street will not be allowed unless a special permit is issued by the Engineering Division.
22. SITE SUPERVISION. The General Contractor shall provide qualified supervision on the job site at all times during construction.

PARKS CONDITIONS

23. WATER EFFICIENCY. This project is subject to the Town's Water Efficient Landscape Ordinance, Chapter 26, Article IV of the Town Code. A fee of $479 shall be paid when the landscape, irrigation plans and water calculations are submitted for review.
24. IRRIGATION. All newly planted landscaping shall be irrigated by an in-ground irrigation system. Special care shall be taken to avoid irrigation which will endanger existing native trees and shrubs.

PLANNING PROCEDURES

FY 2005-2006 Work Plan Self Evaluation Matrix

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
C.3.a Performance Standard Implementation -- Planning Procedures				
URMP: Planning Proced. Perf Std	C.3.a	Note in Annual Report any updated requirements or revisions to Planning Procedures Performance Standard in Town's URMP to adequately address Provision C.3.	Any changes to the Los Gatos URMP or revisions to its Planning Procedures Performance Standard will be contingent on the content and format of the final Municipal Regional Permit.	Associate Planner & Sr. Engineering Tech
Training	C.3.a.6	Ensure appropriate staff (i.e. planners, engineers and inspectors) are trained on any updates or new requirements specified in the local URMP, either by attendance at the C3PO Ad Hoc Task Group or during internal staff meetings.	The Los Gatos Sr. Engineering Technician and the Associate Planner were active in the C3PO Ad Hoc Task Group during FY '05-'06.	Director of Cmmty Dev / Assoc Planner / Town Engineer
C.3.c. Requirements for Group 1 and Group 2 Projects				
Group 2 Projects	C.3.c.	If needed, revise C.3 guidance documents, ordinances, policies, procedures, and/or conditions of approval to incorporate Group 2 requirements.	In early September 2005, the Sr. Engineering Technician revised the Los Gatos Notice to Developers and Contractors to include requirements for Group 2A and 2B projects. The revised Notice may be viewed electronically at: http://www.town.los-gatos.ca.us/index.asp?NID=953 The Town's BMP O&M covenant was revised in July 2005. The changes were based on a BMP O&M agreement used by the City of Fremont with input from Los Gatos Parks and Public Works staff and a local developer. **A copy of the revised document Stormwater Agreement is attached.**	Dir Cmmty. Dev / Assoc. Planner

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
			The Town's web site was completely renovated in October 2005. The new site has a section on NPDES Regulations, including links to the Town's Notice to Developers and Contractors, the WVCWP web site, and the SCVURPPP web site.	
Training	C.3.c.	Provide training to staff or attend Program workshops on Group 2 requirements, as needed.	On 9/27/05, the Sr. Engineering Technician attended a WVCWP-run training meeting related to implementing Group 2 project requirements.	PW NPDES Coordinator - Dir Cmmty. Dev / Assoc. Planner / WVCWP to Assist
C.3.e Operation and Maintenance of Treatment BMPs				
BMP Inspection Program O&M Verification	Permit C.3.e.iii	Report on treatment BMP's O&M verification program in each annual report. Note organizational responsibility, evaluation of effectiveness, and planned improvement to the program. Include a list or summary of treatment BMPs inspected during the year, inspection results, and any required follow-up and correction.	As a condition of the development permit, owners of Group 1 and 2 projects in Los Gatos are required to enter into a recorded agreement with the Town for on-going operation and maintenance of all permanent on-site BMPs. This obligation runs with the land and is binding on all future owners of these properties. The Town uses a standard condition of development approval to notify developers of this requirement. After the project is completed, the Town Engineering Inspector will perform annual BMP inspections at each Group 1 and Group 2 site. Any enforcement issues would be referred to the Los Gatos Code Enforcement Officer for further action. A total of only one development, a Group 1 Project at 15350 Winchester Blvd, has been subject to the BMP O&M requirements. As a condition of the final occupancy, the developer will enter into a BMP O&M agreement with the	Public Works Engineering staff

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
			Town. This project is still under construction and accordingly, the Town has not yet conducted any BMP O&M inspections. Details of the Los Gatos BMP O&M Verification Program are provided in the attached standard operating procedures from the City's 2004 Urban Runoff Management Plan.	
	FY05-06 Work Plan	Training & Evaluation Continue to provide training to inspectors and data managers on O&M verification program. Include evaluation of effectiveness and planned improvement to the program	On 7/19/05, 9/27/05 &11/22/05, the Town's Sr. Engineering Technician attended WVCWP-run training meetings on the BMP O&M Verification Program. Aspects discussed include requiring BMP O&M through development Conditions of Approval; use of a BMP O&M Covenant; performing inspections, SCVURPPP's BMP O&M inspection form; inspection tracking (database vs. spreadsheet); recouping inspection costs; and early HMP implementation opportunities. The Town's Sr. Engineering Technician, the Associate Civil Engineer, and the Sr. Engineering Inspector attended the SCVURPPP BMP O&M Training on 6/06/06.	Pub Works Engineering staff WVCWP to assist
C.3.f Hydromodification Management Plan				
HMP – Hydrograph Modification Mngmt Plan	C.3.f.	Implement the HMP, as approved by the Water Board, as part of requirements for Group 1 projects that may cause increased erosion or other related impacts. (Incorporate the HMP Report's standards, in their final state as approved by the Water Board, into the Town's project approval process.)	There were no HMP-regulated projects in FY '05-'06. Due to the nature of expected developments, the Town does not expect many projects will be subject to these requirements over the next few years. However, Parks and Public Works staff will continue to track regional implementation of the HMP.	Eng Div & Community Development Planning Div.

Los Gatos

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2005-2006 ANNUAL REPORT

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
Training		Provide incremental training on HMP requirements to Town staff via SCVURPPP workshops and/or in-house staff training.	WVCWP hosted an HMP workshop on 1-26-09 in Monte Sereno on the final approved HMP and aspects of implementation. Jill Bicknell, Santa Clara Program staff presented. The Town's Associate Engineer and Sr. Engineering Technician/Stormwater Rep attended. On 7/19/05 and 9/27/05, WVCWP held training meetings which included discussion on requirements of the final HMP. The Sr. Eng Tech and Associate Planner were also kept up-to-date on the progress of HMP development by attending SCVURPPP's C3PO task group meetings.	SCVURPPP/ Eng Div / Plan. Div.--WVCWP to coordinate
HMP Reporting	C.3.f.viii	In the Annual Report, provide development and implementation status and a summary of projects incorporating HMP measures.	There were no HMP-regulated projects in FY '05-'06. The only Group 1 Project approved to date was exempt from these requirements due to it's relatively small area (see Parts 1 and 2 of the C.3 Reporting Forms for additional information).	Eng Div / Assoc Planner
C.3.g Waiver and Compensatory Mitigation Program				
Waiver Program or Alternate Compliance	Permit C.3.g.	Currently a waiver or alternate compliance program is not offered by the Town. Stormwater treatment BMPs will be required on all Group 1 and Group 2 projects. Any proposed alternative compliance must meet Provision C.3.g.vi conditions, and first be approved by the Water Board's Executive Officer.	All applicable projects must implement C3 requirements without using alternative or off-site compliance measures. The Town does not foresee using a Waiver Program.	Eng Div

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
C.3.h Alternate Certification				
Alternate Certification reporting	(Permit C.3.h)	If alternate certification is used, list the projects certified by someone other than Town staff and mechanism for ensuring that outside certifiers are qualified in the Annual Report.	The Town does not certify C.3 compliance for private projects. The project applicant is responsible for having all stormwater measures certified for adequacy, according to the requirements of Provisions C.3.d & C.3.f and C.3.h. The Town uses the City of Sunnyvale and BASMAA lists of qualified civil engineers to determine who is allowed to certify C.3 compliance for private development projects.	Eng Div
C.3.j Site Design Measures Guidance and Standards Development				
Site Design Measures Guidance and Standards Revision	(Permit C.3.j.)	As feasible, continue to review local site design standards and guidance for potential revisions that would reduce impacts to water quality. Summarize updated status of standards and guidance, if any, in the Annual Report.	On 10/20/05, the Town's Associate Civil Engineer and Sr. Engineering Technician attended a 2 hour APWA webcast presentation on Porous Pavement held in Sunnyvale. On 4/18/06, the Town's Associate Civil Engineer, Senior Engineering Inspector, and Sr. Engineering Technician attended a WVCP-sponsored presentation on Bioretention/Filtration (by Filterra). In January 2006, the Town Council approved several stormwater quality-related amendments to the Municipal Code. The draft of these amendments was prepared by the Town's Associate Planner and described in the FY '04-'05 Annual Report. The goal of these ordinance changes is to reduce the amount of new impervious coverage. This will be done by allowing reduced driveway widths and depths, permeable paving materials, ribbon strip driveways, and breaks in parking lot curbs to encourage on-site runoff percolation. The Town's Director of Parks and Public Works and the Sr. Eng Technician attended regular sub-group meetings of the	Community Development & Public Works Depts

Los Gatos

			Water Resources Collaborative during FY'04-'05 and FY '05 -'06 to help develop an outcome product, "Guidelines and Standards" (for the protecting the riparian corridor). In 2007, Los Gatos staff expect that the Town will adopt SCVWD-based Council policies related to reviewing development projects near streams. The Town will continue to evaluate local site design standards to determine any necessary revisions.	
C.3.k Source Control Measures				
Source Control Measures	Permit C.3.k.	Whenever practicable, stormwater pollutant source control measures are incorporated into all development projects.	The Town continues to evaluate its source control BMP requirements to determine any necessary revisions. One possible code change in FY '06-'07 is to require sanitary sewer clean-outs adjacent to all new pools.	Planning Div staff & Eng Div staff
C.3.l General Plan Update				
General Plan	Permit C.3.l	Revise General Plan, at next planned update, to reflect principles and policies needed to address C.3 requirements.	The Town's General Plan was revised in 2000. No major G.P. updates are planned for several years.	Associate Planner / Cmmty Dev Dir / Pub Works Dir
C.3.m Water Quality Review Processes				
CEQA Review	C.3.m.1	Town will continue to evaluate water quality effects & identify mitigation measures when conducting Environmental Review process for all projects, consistent with the Town's URMP and Program guidance. If applicable, report on updates to the Environmental Review process.	The Town of Los Gatos ensures that the environmental documents required for projects that fall under CEQA review address both significant and cumulative stormwater quality impacts during the life of the project, and specific mitigation measures related to stormwater management. There were no changes to the Town's CEQA review process in FY '05-'06.	Planning Div staff & Eng Div staff

Los Gatos

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2005-2006 ANNUAL REPORT

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
C.3.n Reporting Requirements				
C3 Project Reporting	Permit C.3.n.i. (C.3.c.)	In Annual Report, list Group 1 and Group 2 projects by name. Include location, project type (per C.3.c.), size (ac. or sq. ft.), and impervious surface area. Report square footage of land disturbed for redevelopment projects.	See the attached table given in Part 1 of the Los Gatos New and Redevelopment Projects Reporting Forms.	Sr Engr Tech/ Assoc Planner to collect data
C3 Project Reporting	Permit C.3.n.ii. (C.3.c.)	Report on type of treatment BMPs used, numeric sizing criteria used, O&M inspections and if needed, follow-up actions. Also list site design measures used, and source control measures required.	See the attached table, Part 2 of the Los Gatos New and Redevelopment Projects Reporting Forms.	Eng Div staff to collect data
Pesticide Control Measures Reporting	Permit C.3.n.iii. (C.3.c.)	Summarize the types of pesticide reduction measures required (such as by conditions of approval) for new development and significant redevelopment projects. Summarize the percentage of new development and significant redevelopment projects for which pesticide reduction measures were required.	Los Gatos has an irrigation efficiency ordinance to promote use of less water and minimize runoff that can carry pesticides/fertilizers into local waterways. Town Code 26.40.030– encourages protection and preservation of native species, natural areas, and designs to minimize irrigation runoff. The Town's "Hillside Design Guidelines' limit the amount of non-native plants that can be used in new developments and a pesticide reduction fact sheet is given to all project applicants.	Planning Div /Engineering Div staffs

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
Planning Procedures Evaluation				
City Parks and Public Works staff continue to coordinate very closely with the Community Development Department to ensure that all development projects are conditioned properly for storm water quality requirements. In addition, Parks and Public Works staff assist developers and their design team members with C.3 technical and legal issues (specifically the BMP O&M agreement). Several times during FY '05-'06, Parks and Public Works staff met to discuss how best to manage BMP O&M Verification inspections (to date, none have been needed). The outcome of these discussions was the decision to use Town staff, instead of an outside consultant, to perform these inspections.

Public Projects	**NONE**					

Town of Los Gatos
Standard Operating Procedures and Structural Organization of BMP Operation and Maintenance Verification Program (NPDES Permit Provision C.3.e)

The Town of Los Gatos conducts an operation and maintenance (O&M) verification program that includes: (C.3.e)

a) Compiling a list of private and public properties and responsible operators for all stormwater treatment measures;

b) Inspecting a subset of prioritized treatment measures for appropriate O&M, on an annual basis, with appropriate follow-up and correction;

c) Requiring legally enforceable agreements or other mechanisms assigning responsibility for O&M of treatment measures.

1. BMP O&M Verification Program (Provision C.3.e)

As a condition of the development permit, each owner of a Group 1 project in Los Gatos is required to enter into a recorded agreement with the Town for on-going operation and maintenance of all permanent on-site BMPs. This obligation runs with the land and is binding on all future owners of a Group 1 property. The Town uses a standard condition of development approval to notify developers of this requirement.

The Town keeps records of the location, ownership, and inspection status of permanent BMPs at private and public Group 1 properties by collecting an NPDES Permit Provision C.3 Data Form for each of these projects. The Town sends a copy of these forms to the West Valley Clean Water Program (WVCWP) for annual reporting. The Town maintains a BMP O&M Inspection database.

Once the project is completed, the Town Engineering Inspector will inspect the BMPs at each Group 1 site annually. Any enforcement issues would be referred to the Los Gatos Code Compliance Officer for further action.

Section 2
LEGAL AUTHORITY TO IMPLEMENT

The legal authority of the Town of Los Gatos to implement this program is based upon the following:

Los Gatos Municipal Code (on the Internet at http://www.losgatosca.gov/government/19.html

Chapter 12-Grading Erosion and Sediment Control Ordinance

- 12.40.020–New owners of development sites to be given instructions on BMP O&M requirements.

Permanent BMP Operation and Maintenance

Owners of Group 1 properties are required to operate and maintain permanent on-site BMPs in perpetuity. As a condition of the development permit for these projects, owners must enter into a written, recorded

agreement with the Town to this effect. Each year, these owners must submit proof to the Town that they have met this requirement.

Since the Town anticipates very few Group 1 projects, initially BMPs at all of these properties will be inspected annually by the Engineering Inspector. The Engineering Inspector will refer any enforcement issues to the Town's Code Compliance Division for further action. To determine if inspecting BMPs at every applicable site is cost-effective, the Town will re-evaluate the Los Gatos BMP O&M inspection program each year, as part of annual report preparation.

STANDARD OPERATING PROCEDURES FOR LOS GATOS'S PERMANENT BMP OPERATION AND MAINTENANCE INSPECTION PROGRAM

The Town uses:

- permanent BMP O&M inspection forms
- permanent BMP O&M Notice of Violation letters

Selection of Annual Permanent BMP O&M Inspection Sites

- Permanent BMPs at all Group 1 Project properties will be inspected annually, in January
- Beginning April 15th 2006, all Group 1 and Group 2 Project properties will be inspected annually, in January
- In the future, depending on the total number of Group 1 and 2 properties in Los Gatos, the Town may develop criteria for inspection a subset of these sites, as allowed under NPDES Permit Provision C.3.e.

Permanent BMP O&M Inspection Program Responsibilities

- The Town's Public Works Engineering staff will enter all Group 1 Los Gatos NPDES Permit Provision C.3 Data Forms into a database and submit a copy to the West Valley Clean Water Program (WVCWP). The Town will forward these forms to the WVCWP as they are collected.
- The Town Engineering Inspector will maintain the tracking system for permanent BMP construction and BMP O&M inspection and enforcement for all Group 1 Projects.
- The Town Engineering Inspector will submit a Permanent BMP O&M Inspection report for the previous fiscal year to the WVCWP Manager by July 15th of each year.
- The WVCWP Manager will include BMP O&M inspection data in the Annual Report.

Permanent BMP O&M Pre-Inspection Preparation

- The Town Engineering Inspector will review the Permanent BMP O&M Inspection database at least two weeks prior to beginning annual inspections.
- The Town Engineering Inspector will contact each Group 1 site owner/manager by telephone to arrange a mutually agreeable inspection appointment.
- Prior to each site inspection, the Town Engineering Inspector will review the site's Storm Water Management Plan, including any applicable as-built construction plans, for BMP information, including BMP types and locations. At this time, the Inspector will also review the site's current

BMP O&M self-certification report, any previous inspection reports, and any necessary special procedures (e.g., inspection forms, underground confined space entry).

- The Town Engineering Inspector will review the applicable CASQA or SCVURPPP BMP fact sheets and any other information on the BMP O&M Inspection Program that may be useful in addressing questions or comments raised by BMP owners or operators during the inspection.
- Prior to each site inspection, the Town Engineering Inspector will assemble the necessary equipment and supplies.

Permanent BMP O&M Inspection and Enforcement Procedures

- Upon arriving at the inspection site, Town Engineering Inspector will contact the site manager/owner and explain the purpose of the visit.
- Permanent BMP O&M inspection by the Town Engineering Inspector will be in accordance with the inspection checklists given in Appendix 'C'.
- Inspection results will be logged in writing using the permanent BMP O&M inspection checklist.
- If any deficiency is noted during the inspection, the Town Engineering Inspector will notify the Los Gatos Code Compliance Division in writing, including information on location, the nature of violation and any needed follow-up.
- The Los Gatos Code Compliance Division will prepare a written Notice of Violation including a copy of the BMP O&M inspection form, a list of corrective actions needed and a compliance schedule. The Town will send this Notice of Violation to the to the Group 1 property owner/manager within ten working days of an inspection. A sample Notice of Violation is given in Appendix 'C'.
- The Town Engineering Inspector will enter the permanent BMP O&M inspection information, including any violations, into the Permanent BMP O&M Inspection database.
- The property owner and, if applicable, the site manager, will be instructed by the Town Code Compliance Officer to notify the Town Engineering Inspector within the time period indicated on the Notice of Violation so that the facilities can be reinspected. The Inspector will complete a new inspection form, noting whether all recommended maintenance activities have been completed and if any other actions are needed to assure proper operation of the facility.
- If repairs are not undertaken or are not done properly within the time allocated in the compliance schedule, the Town Engineering Inspector will refer the matter to the Town, which will begin enforcement proceedings as provided in Town Code Section 22.30.040.
- Once all necessary repairs have been completed, the Town Engineering Inspector will note this in the Town's database, including the date work was completed and any other pertinent information (i.e. if Town intervention was required to complete corrective work).

STORMWATER TREATMENT MEASURES
MAINTENANCE AGREEMENT
AT
{Insert project address, tract no., etc.}

This Stormwater Treatment Measures Maintenance Agreement ("Agreement") is entered into this _____ day of _____, 200___ by and between the Town of Los Gatos, a municipal corporation, ("Town") and *{insert name of property owner}* , a _____, (the "Property Owner").

RECITALS

WHEREAS, on October 17, 2001, the Regional Water Quality Control Board, San Francisco Bay Region, adopted Order R2-2001-0119, CAS029718, reissuing the National Pollutant Discharge Elimination System Permit (NPDES) municipal stormwater permit for the Santa Clara Valley Urban Runoff Pollution Prevention Program, for which the Town of Los Gatos is a co-permittee; and

WHEREAS, Provision C.3.e.ii. of this NPDES permit, and as it may be amended or reissued, requires the Town to provide minimum verification and access assurances that all treatment measures shall be adequately operated and maintained by persons and entities responsible for the stormwater treatment measures; and

WHEREAS, Property Owner is the owner of real property commonly known as _____ (the "Property"), and more particularly described in the attached **Exhibit A**, upon which stormwater treatment measures are located or to be constructed, as shown in **Exhibit B** (the "Site Plan"); and

WHEREAS, the Property Owner, its administrators, co-owners, executors, successors, heirs, assigns or any other persons, including any homeowners association (hereinafter collectively referred to as "Property Owner") recognizes that the stormwater treatment measure(s) more particularly described and shown on **Exhibit B**, of which full-scale plans and any amendments thereto are on file with the Engineering Division of the Parks & Public Works Department of the Town of Los Gatos must be installed and maintained as indicated in this Agreement and as required by the NPDES permit.

WHEREAS, the Town and the Property Owner agree that the health, safety and welfare of the citizens of the Town require that the stormwater treatment measure(s) detailed in the Site Plan shall be constructed and maintained on the Property; and

WHEREAS, the Town's Stormwater Management Ordinance, guidelines, criteria and other written directions require that the stormwater treatment measure(s), as shown on the approved Site Plan, be constructed and maintained by the Property Owner.

NOW, THEREFORE, in consideration of the benefit received by the Property Owner as a result of the Town's approval of _____, the Property Owner hereby covenants and agrees as follows:

SECTION 1: CONSTRUCTION OF TREATMENT MEASURES

The on-site stormwater treatment measure(s) shown on the Site Plan shall be constructed or cause to be constructed by the Property Owner in strict accordance with the approved plans and specifications identified for the development and any other requirements thereto which have been approved by the Town in conformance with appropriate Town ordinances, guidelines, criteria and other written direction.

SECTION 2: OPERATION & MAINTENANCE RESPONSIBILITY

This Agreement shall serve as the signed statement by the Property Owner accepting responsibility for operation and maintenance of stormwater treatment measures as set forth in this Agreement until the responsibility is legally transferred to another entity. Before the Property is legally transferred to another entity, the Property Owner shall provide to the Town at least one of the following:

A) A signed statement from the public entity assuming post-construction responsibility for treatment measure maintenance and that the treatment measures meet all local agency design standards; or

B) Written conditions in the sales or lease agreement requiring the buyer or lessee to assume responsibility for operation and maintenance (O&M) consistent with this provision, which conditions, in the case of purchase and sale agreements, shall be written to survive beyond the close of escrow; or

C) Written text in project conditions, covenants and restrictions (CCRs) for residential properties assigning O&M responsibilities to the home owners association for O&M of the treatment measures; or

D) Any other legally enforceable agreement or mechanism that assigns responsibility for the maintenance of treatment measures.

SECTION 3: MAINTENANCE OF TREATMENT MEASURES

The Property Owner shall not destroy or remove the stormwater treatment measures from the Property nor modify the stormwater treatment system in a manner that lessens its effectiveness, and shall, at its sole expense, adequately maintain the stormwater treatment measure(s) in good working order acceptable to the Town and in accordance with the

maintenance plan submitted by the Property Owner and approved by the Town Engineer or his or her designee, attached hereto as **Exhibit C**, and incorporated herein by this reference. This includes all pipes, channels or other conveyances built to convey stormwater to the treatment measure(s), as well as all structures, improvements, and vegetation provided to control the quantity and quality of the stormwater. Adequate maintenance is herein defined as maintaining the described facilities in good working condition so that these facilities continue to operate as originally designed and approved. The maintenance plan shall include a detailed description of and schedule for long-term maintenance activities.

SECTION 4: SEDIMENT MANAGEMENT

Sediment accumulation resulting from the normal operation of the stormwater treatment measure(s) will be managed appropriately by the Property Owner. The Property Owner will provide for the removal and disposal of accumulated sediments. Disposal of accumulated sediments shall not occur on the Property, unless provided for in the maintenance plan. Any disposal or removal of accumulated sediments or debris shall be in compliance with all federal, state and local law and regulations.

SECTION 5: ANNUAL INSPECTION AND REPORT

The Property Owner shall, on an annual basis, complete the Treatment Measure Operation and Maintenance Inspection Report (annual report), attached to this Agreement as **Exhibit D**. The annual report shall include all completed Inspection and Maintenance Checklists for the reporting period and shall be submitted to the Town in order to verify that inspection and maintenance of the applicable stormwater treatment measure(s) have been conducted pursuant to this Agreement. The annual report shall be submitted no later than December 31 of each year, under penalty of perjury, to:

Town of Los Gatos
Engineering Division, Public Works Department
P.O. Box 949
Los Gatos, CA 95031-0949
Attn: Stormwater Reporting

or another member of the Town staff as directed by the Town. The Property Owner shall provide a record of the volume of all accumulated sediment removed from the treatment measure(s) in the annual report. The Property Owner shall conduct a minimum of one (1) annual inspection of the stormwater treatment measure(s) before the wet season. This inspection shall occur between August 1st and October 1st each year. More frequent inspections may be required by the Maintenance Plan, **Exhibit C**. The results of inspections shall be recorded on the Inspection and Maintenance Checklist(s) attached as **Exhibit D**.

SECTION 6: NECESSARY CHANGES AND MODIFICATIONS

At its sole expense, the Property Owner shall make changes or modifications to the stormwater treatment measure(s) and/or the long-term Maintenance Plan, **Exhibit C**, as may be determined as reasonably necessary by the Town to ensure that treatment measures are properly maintained and continue to operate as originally designed and approved.

SECTION 7: ACCESS TO THE PROPERTY

The Property Owner hereby grants permission to the Town; the San Francisco Bay Regional Water Quality Control Board (Regional Board); the Santa Clara County Department of Environmental Health, Vector Control District; and their authorized agents and employees to enter upon the Property at reasonable times and in a reasonable manner to inspect, assess or observe the stormwater treatment measure(s) in order to ensure that treatment measures are being properly maintained and are continuing to perform in an adequate manner to protect water quality and the public health and safety. This includes the right to enter upon the Property when it has a reasonable basis to believe that a violation of this Agreement, the Town's stormwater management ordinance, guidelines, criteria, other written direction, or the Santa Clara Countywide Clean Water Program's NPDES municipal stormwater permit (Regional Board Order R2-2001-0119, and any amendments or re-issuances of this permit) is occurring, has occurred or threatens to occur. The above listed agencies also have a right to enter the Property when necessary for abatement of a public nuisance or correction of a violation of the ordinance guideline, criteria or other written direction. Whenever possible, the Town, Regional Board, or the Vector Control District shall provide reasonable notice to the Property Owner before entering the property.

SECTION 8: FAILURE TO MAINTAIN TREATMENT MEASURES

In the event the Property Owner fails to maintain the stormwater treatment measure(s) as shown on the approved Site Plan or comparable document in good working order acceptable to the Town and in accordance with the maintenance plan incorporated in the Agreement, the Town, and its authorized agents and employees with reasonable notice, may enter the Property and take whatever steps it deems necessary and appropriate to return the treatment measure(s) to good working order, in addition to all other rights and remedies available in law and in equity. Prior notice will not be necessary if emergency conditions require immediate remedial action. This provision shall not be construed to allow the Town to erect any structure of a permanent nature on the Property. It is expressly understood and agreed that the Town is under no obligation to maintain or repair the treatment measure(s) and in no event shall this Agreement be construed to impose any such obligation on the Town.

SECTION 9: REIMBURSEMENT OF TOWN EXPENDITURES

In the event the Town, pursuant to the Agreement, performs work of any nature (direct or indirect), including any reinspections or any actions it deems necessary or appropriate to return the treatment measure(s) in good working order as indicated in Section 8, or expends any funds in the performance of said work for labor, use of equipment, supplies, materials, and the like, the Property Owner shall reimburse the Town, or shall forfeit any required bond upon demand within thirty (30) days of receipt thereof for the costs incurred by the Town hereunder. If these costs are not paid within the prescribed time period, the Town may assess the Property Owner the cost of the work, both direct and indirect, and applicable penalties. Said assessment shall be a lien against the Property, or prorated against the beneficial users of the Property or may be placed on the property tax bill and collected as ordinary taxes by the Town. The actions described in this section are in addition to and not in lieu of any and all legal remedies as

provided by law, available to the Town as a result of the Property Owner's failure to maintain the treatment measure(s).

SECTION 10: INDEMNIFICATION

The Property Owner shall indemnify, hold harmless and defend the Town and its authorized agents, officers, officials and employees from and against any and all claims, demands, suits, damages, liabilities, losses, accidents, casualties, occurrences, claims and payments, including attorney fees claimed or which might arise or be asserted against the Town that are alleged or proven to result or arise from the construction, presence, existence or maintenance of the treatment measure(s) by the Property Owner or the Town. In the event a claim is asserted against the Town, its authorized agents, officers, officials or employees, the Town shall promptly notify the Property Owner and the Property Owner shall defend at its own expense any suit based on such claim. If any judgment or claims against the Town, its authorized agents, officers, officials or employees shall be allowed, the Property Owner shall pay for all costs and expenses in connection herewith. This section shall not apply to any claims, demands, suits, damages, liabilities, losses, accidents, casualties, occurrences, claims and payments, including attorney fees claimed which arise due solely to the negligence or willful misconduct of the Town.

SECTION 11: NO ADDITIONAL LIABILITY

It is the intent of this Agreement to insure the proper maintenance of the treatment measure(s) by the Property Owner; provided, however, that this Agreement shall not be deemed to create or effect any additional liability not otherwise provided by law of any party for damage alleged to result from or caused by storm water runoff.

SECTION 12: PERFORMANCE FINANCIAL ASSURANCE

The Town may request the Property Owner to provide a performance bond, security or other appropriate financial assurance providing for the maintenance of the stormwater treatment measure(s) pursuant to the Town's ordinances, guidelines, criteria or written direction.

SECTION 13: TRANSFER OF PROPERTY

This Agreement shall run with the land and shall be binding upon all heirs, successors, and assigns of Property Owner. The Property Owner further agrees whenever the Property is held, sold, conveyed or otherwise transferred, it shall be subject to this Agreement which shall apply to, bind and be obligatory to all present and subsequent owners of the Property.

SECTION 14: SEVERABILITY

The provisions of this Agreement shall be severable and if any phrase, clause, section, subsection, paragraph, subdivision, sentence or provision is adjudged invalid or unconstitutional by a court of competent jurisdiction, or the applicability to any Property Owner is held invalid, this shall not affect or invalidate the remainder of any phrase, clause, section, subsection, paragraph, subdivision, sentence or provision of this Agreement.

SECTION 15: RECORDATION

This Agreement shall be recorded by the Property Owner, or by the Town by mutual agreement, within five (5) business days, or such time as agreed upon by both parties, after the execution date of this Agreement as stated above among the deed records of the County Recorder's Office of the County of Santa Clara, California at the Property Owner's expense.

SECTION 16: RELEASE OF AGREEMENT

In the event that the Town determines that the stormwater treatment measures located on the Property are no longer required, then the Town, at the request of the Property Owner shall execute a release of this Inspection and Maintenance Agreement, which the Property Owner, or the Town by mutual agreement, shall record in the County Recorder's Office at the Property Owner's expense. The stormwater treatment measure(s) shall not be removed from the Property unless such a release is so executed and recorded.

SECTION 17: EFFECTIVE DATE AND MODIFICATION

This Agreement is effective upon the date of execution as stated at the beginning of this Agreement. This Agreement shall not be modified except by written instrument executed by the Town and the Property Owner at the time of modification. Such modifications shall be effective upon the date of execution and shall be recorded.

SECTION 18: MISCELLANEOUS

a. The interpretation, validity, and enforcement of this Agreement shall be governed by and interpreted in accordance with the laws of the State of California. Any suit, claim, or legal proceeding of any kind related to this Agreement shall be filed and heard in a court of competent jurisdiction in the County of Santa Clara.

b. In the event any legal action is commenced to enforce this Agreement, the prevailing party is entitled to reasonable attorney's fees, costs, and expenses incurred.

Treatment Measure Operation and Maintenance Inspection Report to the Town of Los Gatos, Santa Clara County, California

This report and attached inspection checklists document the inspection and maintenance conducted for the identified stormwater treatment measure(s) subject to the Maintenance Agreement between the Town and the property owner during the annual reporting period indicated below.

I. Property Information:

Property Address or APN:_____

Property Owner:_____

II. Contact Information:

Name of person to contact regarding this report:_____

Phone number of contact person:_____ Email:_____

Address to which correspondence regarding this report should be directed:_____

_____

_____

III. Reporting Period:

This report, with the attached completed inspection checklists, documents the inspections and maintenance of the identified treatment measures during the time period from January 1, 20-- to December 15, 20--.

IV. Treatment Measure Information:

The following stormwater treatment measures (identified treatment measures) are located on the property identified above and are subject to the Maintenance Agreement:

Identifying Number of Treatment Measure	Type of Treatment Measure	Location of Treatment Measure on the Property

V. Sediment Removal

The sediment was removed and disposed of as follows:_____

_____

VI. Inspector Information:

The inspections documented in the attached inspection checklists were conducted by the following inspector(s):

Inspector Name and Title	Inspector's Employer and Address

VII. Statement of Treatment Measure Condition

Based on the inspections documented in the attached checklists, is (are) the treatment measure(s) identified in this report present, functional and being maintained as required by the Maintenance Plan? (Check yes or no.)

____YES ____NO

If "NO", describe problem, proposed solution and schedule of correction:

_____

_____

VIII. Certification:

I hereby certify, under penalty of perjury, that the information presented in this report and attachments is true and complete:

_____ _____

Signature of Property Owner or Other Responsible Party Date

_____

Type or Print Name

_____

Company Name

_____

FY 2005-2006 Work Plan Self Evaluation Matrix

Source	WP Activity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
	URMP	Staff Training Participate in and support SCVURPPP sponsored workshops/ info sessions on erosion control and construction BMPs; support distribution of related materials.	On December 8th the WVCWP IC/ID Inspector and Manager attended the Water Board's Construction Site Management and Erosion Control Workshop and spoke to attendees about the organization of the WVCWP, the need to report all construction and erosion incidents and how trend analysis determines how programs conduct public outreach (to effect behavior changes). On August 31, '05, thirty-three (33) Los Gatos PW staff, including the Town Engineer, the Sr. Engineering building/construction inspector, and PW Supervisor, participated in an in-house construction site and erosion control training session featuring the video "Hold Onto Your Dirt".	SCVURPPP, WVCWP or LG Sr. Engineering Technician to coordinate, Public Works staff to attend
	URMP	Construction Inspections Continue construction site inspections for stormwater issues (i.e., mudtracking, mat'l storage, housekeeping, etc.).	Municipal Code Sec. 12.20.010 et seq., requires erosion and sediment control materials to be onsite by October 1st and in place before October 15th. Once-a-week inspections, and additional inspections during and after every major storm, are carried out by Town Engineering staff on all sites with active grading permits. Building Inspectors note and report to Engineering any active or potential erosion violations on site. Building Inspectors check for proper materials storage and disposal and similar building-related potential pollution problems. This past year the Town had seven (7) construction site or Landscaping related incidents. All incidents were successfully resolved. See attached spreadsheet for details.	Eng Inspectors WV Inspector by referral

Construction Inspection Evaluation

Construction Site Evaluation of Trends:

FY05-06	
Allowable Discharge	1
Accidental Spills	1
Landscape Mat'l Dumping	3
Tracking Soil	2
Total Number of Incidents	7

Previous Year – 04-05	
Tracking Soil	3
Landscape Mat'l Dumping	2
Equipment Cleaning	1
Saw Cutting Slurry	2
Complaint not found (concerned citizens, potential violations)	3
Misc. Incident (3 silt in street; 2 broken water main or valve)	5
Allowable Discharge (water truck emptying water NTC issued	1
Total Number of Incidents	17

Coordinated efforts between the City's building inspectors and the WVCWP Inspector are working well. Potential incidents reported by other agency staff or citizens, are inspected and re-inspected until final resolution is achieved. This year the WVCWP Inspector went out on seven (7) construction or landscaping incident calls. All sites that have been issued a Notice to Comply and been resolved are revisited, pro-actively, during the following year. See the Construction Site Incident table following this section. The number of incidents dropped from seventeen (17) in FY04-05 to seven (7) in FY05-06.

Winchester Avenue Incident resolved with Rain-for-Rent filter and pumping device: The Town of Los Gatos had a group 1 project on Winchester Ave (developer Sun Lakes) that experienced some challenges with mud tracking and muddy runoff during the rainy season. The Town responded immediately and met with the Soils Engineer/erosion control engineer, Development Engineer & company owner, who together determined that they would lease a "Rain-for-Rent" filtering system to allow some dewatering after heavy storms. The filtering treatment was set up and the clean excess water was released slowly. The WVCWP Inspector went out to make sure that it looked like it was working properly. The WVCWP Inspector did not issue an NTC because the developer was agreeable to working on the problem immediately until resolution and was willing to take expensive steps to ensure that the water discharge was completely clean. The Police were made aware of the potential incident and direct contact numbers for the project owner and erosion control engineer were provided to police for after hours watch. The site remained clean for the rest of the year.

Construction Site Erosion Control Training - The Town of Los Gatos held an internal training meeting for construction site inspectors and all thirty-three Public Works staff this year. The video "Hold onto your Dirt" was shown.

The Construction Inspection Program Works Well – Continued public outreach efforts and further training or communication among municipal inspection staff and the WV Stormwater Inspector have served to develop a very coordinated and effective construction site inspection program in Los Gatos.

			their child's classroom to give an Enviroscape presentation WVCWP staff talked to at least 150 visitors to the booth. WVCWP arranged for 2 Program-sponsored Zun Zun assemblies to be presented at Saratoga Elementary School (May 2, 2006). The assemblies were provided to the School as a thank you for Saratoga students' and parents' participation in a Creek Clean-up on April 1st. The school received two (2) vocabulary lists (one for K-2 and one for 3-6) and an information sheet about the assembly content for teachers to refer to. Teachers were asked to familiarize the students with the vocabulary words prior to the assembly. Teachers also questioned students after the assembly to determine what was learned. The results are summarized in the Program's FY05-06 Annual Report.	
	NPDES Permit, PMP (II.A.12)	b. Pesticide User Outreach Project If SCVURPPP Budget allows, provide funding and participate in implementing IPM Store Partnership and Household Chemical Management Projects. Project scope will include items in Program's Pesticide Management Plan based on provision c.9.d. of the Permit for outreach to residents, commercial businesses, and pest control operators.	The WV Clean Water Program Manager participated in the SCVURPPP IPM Ad Hoc Task Group. See SCVURPPP Annual Report for details on accomplishments. See above: *Home and Garden Show on Saturday and Sunday 5/6/06.* *Orchard Supply Hardware store point-of-sale IPM -May 23, 2005* West Valley staff helped the SCV Program and *Our Water Our World* staff to set up Sunnyvale's Orchard Supply Hardware store's gardening aisles with 'shelf talkers' which relay IPM information to customers. Shelf talkers educate the general public on less-toxic methods to control pests and on child- and pet-safe solutions for homes and gardens. *March 22, 2006 Turf Workshop*	WVCWP Staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			Attendees included municipal staff from Campbell, Los Gatos and Saratoga and supervisor for Los Gatos private golf course. School Districts, golf course staff and press were invited. Cornell University Turf Specialist presented latest research in management methods to reduce pesticide use on turf. Evaluation comments included "Great Presentation/Program" and "Learned a Lot!" See "Pesticide Management" section "*Training for Applicators*". Formerly, WVCWP worked directly with the **Summerwinds Garden Center** in Campbell to provide IPM educational materials and to coordinate with Our Water Our World and SCVURPPP activities. In the interest of streamlining activities, SCVURPPP is now working directly with this garden center, and WVCWP is no longer their main contact.	
	NPDES Permit, Provision c.9.c.	c. Mercury Pollution Prevention Outreach This project will encompass local implementation of the Program's Mercury Pollution Prevention Plan including public education on: 1) the effects of mercury in the environment, and 2) products containing mercury and proper disposal of such products	*Fluorescent Lightbulb Recycling Flyer* WVCWP worked to update and improve its flyer created last year, listing local drop-off points (5 hardware stores) which are part of the fluorescent bulb residential drop-off program. Hours and location of stores are listed, along with HHW contact info. The flyer now reminds residents that **it's illegal to put fluorescent bulbs in the trash or home recycling bins**. The flyer was distributed at community events.	WVCWP Staff
		Outreach Event	*January 28, 2006 **Free** Hazardous Waste Recycling Event* - for recycling of TVs, monitors and laptops. Event was	WVCWP Staff to coordinate

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
		Not part of Work Plan – additional activity	sponsored by all four West Valley Cities through West Valley Clean Water Program. The event was held at Los Gatos Municipal Yard, and Los Gatos and Saratoga staff assisted. The event was for West Valley businesses, residents and schools. **Flyers/posters, press releases and an ad were created** for this event noting that E-waste can leach toxic metals (i.e., mercury) into our water, and that by using a responsible recycler we can help prevent export of our waste to foreign dumps where mercury leaches into the environment. (See above row for details on outreach materials). Over 250 cars brought E-waste for recycling. Posters placed around the site highlighted the environmental affects of improper E-waste disposal. One high school coordinated with WVCWP prior to the event, and dropped off pallets of E-waste on the previous day.	

Public Information/Participation Program EVALUATION - *SCV Program Projects/Support*

Zun Zun Assembly: WVCWP received an evaluation courtesy of the School Principal's Assistant: "Yes, it was very much enjoyed by all."The kids learned a lot, now know what a watershed is, understand the environmental issues. The 1st grade teacher was very impressed.... I thought it was very cute. I learned some things too!" The final comment that "I learned some things too!" reinforces what WVC staff have generally found to be true: adults may be more receptive to learning about stormwater issues, and proper behavior, if the messages are funneled through the children.

Mercury Outreach/ E-Waste Recycling Event: WVCWP used a portion of staff time and funds to organize a Free E-Waste Recycling Event for West Valley residents, businesses and schools, and to publicize Mercury issues while doing outreach for the event. The WVC were challenged in trying to decide on a

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
meaningful way to reduce mercury and copper discharges. WVCWP pursued an opportunity to reduce the illegal dumping of televisions and monitors (esp with the increase in sales of flat screen products and the obsolence of many TV and computer monitors). UNITED DATATECH was willing to help the WVC conduct this service at no cost. The television that was pulled out of a Los Gatos creek in December emphasized the importance of this event. The *Los Gatos Weekly* and the *Saratoga News* ran articles about the TV in the creek; these papers, along with the *Campbell Reporter* and the *Los Gatos Daily News*, printed details about the WVCWP event. A January date was chosen, so that residents could dispose of outdated E-waste if they had received new electronic items during the holidays in December. Outreach was conducted during December and January. Outreach included press releases and flyers which were sent to Campbell, Los Gatos and Saratoga Chambers of Commerce and School Districts. This resulted in the information being posted on Chamber and School websites and in electronic e-mails, so that it reached thousands of citizens. Funds were also used to retain a PR firm which worked with WVCWP to develop an eye-catching newspaper ad, and a timely, captivating newspaper article. WVC felt that this outreach money was well-spent in a successful, low-budget media campaign that increased awareness of mercury issues. The outreach included information on mercury toxicity, and the need to prevent mercury (and other E-waste) from landfill dumping, where it can leach into water – both at home or abroad. A strong emphasis was placed on the fact that the event was organized with a responsible recycling firm, which would use appropriate recycling methods for all materials. Residents responded with overwhelmingly positive feedback. Some had been saving monitors and TVs for years. The event was very successful in that over 250 cars brought E-waste, and a high school arranged to bring over pallets of E-waste. Residents want more events like this one, since it makes a difference. WVCWP staff will plan one for FY06-07. (See *Mercury Pollution Prevention Activities* section for further details.)

Public Information/Participation Program EVALUATION – *B. Joint Projects: General Outreach – Materials Distribution*

OUTREACH MATERIALS

The "Grow-It Guide" continues to be the most popular IPM literature. Although WVCWP and the cities/town make available a variety of IPM materials at public places and community events, it is most common for residents to pick up only the Grow-It Guides.

Items for children are also popular. WVCWP continues to search for affordable, fun and informative children's outreach material. The "Kids Guide to Backyard Bugs" is always popular, but supplies are very limited, so these are distributed sparingly. Many more would be taken, if they were available. This year WVCWP evaluated a children's coloring book: "Pest or Pal" – a coloring book with text related to IPM and less-toxic pest management. The item was well-received. However, it is rather high-priced to be given out in large numbers.

WVCWP also purchased numerous copies of a hard bound picture book **"All The Way To The Ocean"** -- depicting how stormdrains carry trash & other pollutants into nearby water bodies. The book was donated to classes which held Enviroscape presentations as a "Thank You". The book will also serve as a means for teachers to introduce the subject to their classes in coming years, prior to the students viewing the Enviroscape. Copies kept at WVCWP can also be loaned to schools and libraries when a book is needed for a Story Time situation.

Efforts were directed to finding an inexpensive, desirable item which people would be happy to pick up at events, and which would reinforce Stormwater messages. WVCWP was also looking for something with its website address, which would be kept around the home so that residents could refer to it in order to be able to reach the website easily. WVC decided on using pencils made of recycled denim (blue) and recycled money (green). Slogans were chosen and printed on the pencils, along with the website address. The pencils proved to be very popular outreach items, and were found to be a good way to keep the subject and the website address in front of people.

Another effective outreach piece was a flyer created to promote new watershed-themed youth programs at Don Edwards Nat'l Wildlife Refuge. Schools in the Campbell School District agreed to pass these out to their students, so that they could be taken home. In June 2006, **8,367** of these were distributed through 6 schools in the District. The Education Center at **Don Edwards subsequently reported a noticeable increase in calls and participation related to youth programs**.

Extensive outreach was conducted concerning the E-Waste Recycling Event in January 2006. Posters were placed in numerous public places and flyers were distributed to Real Estate offices. However, based upon response from those who attended the event, it appears that the overwhelming majority of attendees learned about the event through ads and articles in the local weekly newspapers.

GENERAL OUTREACH				
Source	**WP Task**	**FY05-06 Work Plan Tasks**	**FY 05-06 Accomplishments**	**Responsible Party**
General	NPDES Permit, Provision c.4 and c.9 & PMP (II.A.4.)	b. Participate in Community Events 1) Promote watershed messages by participating in community events (e.g., farmers market, festivals, creeks clean-ups, etc.). 2) Conduct or participate in local activities that are coordinated with the Watershed Education & Outreach campaign (as budget permits). 3) including outreach events targeted at pesticide users.	**1)** *Saratoga Library Story Time Sept. 05:* the Library used a "Rivers" theme for its Story time. WVCWP Coordinated with the library to make Enviroscape presentations at the evening Story time. WVCWP arranged fto have 2 books read, related to watersheds and wildlife in local creeks. The Enviroscape was used to demonstrate runoff issues. Approx. 27 children participated and approx. 21 parents viewed the presentations. Numerous materials were taken. SEE ATTACHMENT PIP 6A FOR A PHOTO OF THE ACTIVITY **2)** *Audubon Wildlife Fair 10-22-06* WVCWP partnered with local Sierra Club chapter & Audubon Society to present a table at Audubon's "Wildlife Education Fair". Table featured: Enviroscape hands-on watershed model demonstrating pesticide pollution in runoff, a display on dangers of diazinon for birds, and IPM materials; Sierra Club distributed California Golden Poppy seeds to promote pest-resistant planting. The Wildlife Fair is held at the Audubon facility along City of Saratoga's northern border. Approx. 25 children participated in the Enviroscape, with over 25 parents watching. Participation was less than previous years due to	WVCWP Staff WVCWP Staff to coordinate with Municipal Staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			the presence of a SCV Water District table with Enviroscape, which attendees saw first, in the flow of traffic. **3)** For participation in Program WEO events, see "**A. SCV Program Projects/Support"** at the beginning of this PIP Section. **4)** *"Tax Free Day" at OSH (bordering Saratoga & Campbell) 10-8-05* Spoke with at least 45 customers and employees (some with family or friends who are not included in this total). Gave out HHW, & IPM Materials (see above). Talked to customers about disposing fluorescent bulbs at HHW or bringing bulbs back to OSH (this site was a partnering drop off location). One elementary school teacher expressed interest in an Enviroscape presentation for 5th grade. **MUNICIPALLY-SPONSORED EVENTS** **CAMPBELL** *Creekside Clean Up* Public Works staff organized and supervised a community creekside Clean-up event at which materials were also distributed. The Clean-up was held in conjunction with "Keep California Beautiful". **CAMPBELL**: Events with Materials Distributed *Arbor Day* Public Works staff organized and supervised an Arbor	

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			Day event at which materials were also distributed. *Neighborhood Meetings* Public Works staff sponsored 2 Neighborhood Meetings at local schools. Stormwater runoff was among the issues discussed, and materials were distributed. **LOS GATOS** *Farmers Market Event 4-9-06* WV Staff and one volunteer presented water quality topics using the Enviroscape model. Fifty people visited the booth. IPM materials and WVCWP Pencils were distributed. **SARATOGA**: Events with Materials Distributed *Building Bridges Event Oct 9, 2005* Saratoga City staff distributed materials at the "Building Bridges" event at West Valley College. Materials concerning HHW, Copper, Mercury and IPM were distributed. *Mustard Walk Feb. 2006* This family event is based upon the Heritage Orchard and serves as an appropriate place to distribute gardening/IPM materials. City staff place decorative baskets with IPM literature for residents to take. Grow-It Guides and WVCWP pencils were the most popular items.

			Press Release for 9/17/05 Creek Clean-up – e-mailed to Westmont High School 8/30. PR was posted on school website, and included in daily email bulletin. **Oct. 05** In response to a Press Release, the San Jose Mercury News, on 10/15/05, printed an article on a Town of Los Gatos Trash pick-up event, sponsored by a local church. The church had asked Town staff for recommendations on useful volunteer activities, and the litter pick-up was suggested and was a successful event. **March 06:** Press release to gardening columnist for 3 local papers; information on upcoming Less Toxic Turf Management workshop and invitation to attend workshop. **April 06:** In response to a press release, the Saratoga News printed a brief article on the upcoming Creek Clean-up along Saratoga Creek in Saratoga Village. **May 06** Press Release for 5/20/06 Creek Clean-up – e-mailed to Westmont High School. PR was posted on school website, and included in daily email bulletin.	
General	FY05-06 CI Item	f. WVCWP Web-Site Continue to expand and update WVCWP web-site to provide new educational material to the public e.g. on IPM, mercury, trash, copper/nickel & HHW.	• **December 14, 2005** WVCWP created a web "flyer" for a **FREE** TV/monitor/laptop collection event to take place on January 28, 2006. (See A. SCV, c. Mercury Pollution Outreach). The flyer was also placed on municipal websites.	WVCWP Staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			• **Early Spring 2006:** staff changed the "Take Action" page to focus on **less toxic gardening and affect of pesticides** on water quality. The new page highlighted links to "Our Water Our World" website. • Spring 2006: On the WVCWP Home page, staff added a car wash/copper graphic and text. Changes included adding a link to WVCWP's *Car Wash Kit flyer* with info on copper as a water pollutant.	
		Municipal Web-Sites	**Campbell** The City of Campbell created a completely new website in FY 05-06. The Public Works link can now be followed to a full page of links relating to Stormwater, NPDES and C.3 requirements. The page also features links to PDFs of all the "Construction Tri-folds" which list BMPs. In addition, the site has a page on community/creek clean-ups, including statistics from last year's clean-up. **Los Gatos** The Town of Los Gatos created a completely new website in FY 05-06. The Public Works link can now be followed to a full page of links relating to Stormwater, NPDES and C.3 requirements. The site allows users to search for terms such as "Car Washing" or "Draining Pools". This brings up a Stormwater Page which gives instructions on correct behavior for these activities, plus other issues such as Pet Waste, Dirty Water down the Stormdrain, etc. **City of Saratoga**	Municipal Staff

TARGETED OUTREACH & SCHOOLS				
Targeted Schools	FY05-06 Work Plan	i. Coordinate Watershed Education with schools Promote awareness of WVCWP through **presentations** in one or more West Valley schools. j. Provide Watershed Education in classrooms Conduct Water Quality Protection education or presentations in local schools, using *Enviroscape* and/or other interactive methods to engage students in Watershed Campaign messages.	**Saratoga Elementary – 4th grade 28 students and two teachers**. On 3-29-06, students participated in an inter-active Enviroscape presentation. WVCWP brought attention to pollutants of concern (trash, mercury, copper, and pesticides) and introduced "take action" steps to help the problem. This year WVCWP developed new curriculum for 4th grade, based on current textbook and State standards. Presentation topics also included: wetlands, stormdrains vs. sanitary drains, pet waste, HHW disposal (paint, pesticides, fertilizers & batteries), and how to report illegal dumping or illegal stormdrain discharges to the WVCWP Inspector. **Grow-It-Guides and Pencils** labeled with stormdrain slogans and the WVCWP website address were distributed to students & teachers. • A 30 min presentation was scheduled, but the teacher requested WVCWP to stay to continue the discussion with the students. • **A "Zun Zun" watershed assembly** was subsequently **presented to 500 students** at the school. • WVCWP donated a picture book to the school called **"All The Way To The Ocean"** depicting how stormdrains carry trash & other pollutants into nearby water bodies. •	WVCWP Staff

Provide Watershed Education in classrooms Conduct Water Quality Protection education or presentations in local schools, using *Enviroscape* and/or other interactive methods to engage students in Watershed Campaign messages.	Enviroscape presentation. Topics included: washing cars, fertilizing, over-watering lawns, pet waste, trash, construction, and reporting illegal discharge to the Stormdrain Inspector. • **Grow-It-Guides and Pencils** labeled with stormdrain slogans and the WVCWP website address were distributed to students & teachers. • WVCWP donated a picture book to the school called **"All The Way To The Ocean"** depicting how stormdrains carry trash & other pollutants into nearby water bodies **Los Gatos High School District (Nova Program)** WVCWP staff made a presentation on watershed protection to high school students. Main topic was preventing leaching of toxic metals (mercury, copper, etc.) into water, through proper disposal of e-wasted. General watershed/stormdrain issues were also discussed. Upcoming free E-Waste Recycling event in Los Gatos was promoted. **Pencils** with watershed messages and WVCWP website address were distributed to the students.	
Targeted Schools	FY05-06 Work Plan	k. Schools Outreach and Watershed Education Continue to incorporate, 5th grade curriculum into WVCWP classroom presentations, consistent with state required education standards to make it more feasible for teachers to use in the classroom. Evaluate effectiveness and	In an effort to widen its appeal to teachers, WVCWP worked to develop Enviroscape-related curriculum for Kindergarten and 4th Grade. On Dec. 14, 2005, WVCWP Pgm Mgr met with City of Sunnyvale Environmental Outreach Program to share and to develop new curriculum. The new curriculum was subsequently used very successfully at Saratoga Elementary School (4th Grade) and St. Mary's School (Kindergarten).	WVCWP Staff

Public Information/Participation Program Evaluation

For additional Evaluations, see Sections above***:***

- ***SCV Program Projects/Support*** and
- ***Joint Projects: General Outreach – Material Distribution***

Participation in Community Events: WVCWP staff found its participation in the **Saratoga Library Evening Story Time** to be a very effective means of reaching both parents and children. Librarians and parents expressed appreciation for the opportunity for children to use the Enviroscape. After this event, the Campbell and Los Gatos Libraries were contacted by phone and by e-mail (with photos of the successful Saratoga event). However, WVCWP was not able to elicit similar invitations from these libraries. It is possible that an offer to use the Enviroscape during summer outdoor Reading Program activities would instigate invitations.

At the **Audubon Wildlife Fair** this year, the SCV Water District was also a participant, and also brought an Enviroscape. This diverted visitors who would have participated in WVCWP Enviroscape activities. It is possible that WVCWP will not attend this Wildlife Fair in FY 06-07, in order to avoid duplication of efforts with the SCVWD.

"Tax Free Day" at Orchard Supply Hardware: WVCWP appreciates OSH's permission to approach customers and employees in the store. The event remains an effective means of reach residents, since it allows an opportunity to speak with them personally, and to approach people who are actually buying items (gardening materials, fluorescent bulbs) which are addressed by our outreach materials.

Creek Clean-up Outreach: Many flyers were distributed for the Sept 05 Creek Clean-up. It appeared that these flyers did not really result in volunteers attending the event. There was some response from the Westmont High School website announcement and the Parent/Teacher/Student Assn. 'daily e-mail". It was found that the best response was the result of students learning about the event from a Westmont High Science teacher, who also offered extra credit for students who participate and then write a review. In the future, WVCWP will use less efforts on flyers, and more efforts on working with teachers. For the May 06 Creek Clean-up at the site, a WVCWP spoke with school staff and put minimal efforts into additional outreach. At this event, the turnout was almost exactly the same as the September event – even with minimal additional outreach. This turnout is about the maximum that the site can handle, so it appears there is no need for much outreach beyond working with the school.

Schools Outreach: The new Enviroscape curriculums, developed this year to address Calif. State Standards for Kindergarten and 4th grade, were piloted successfully. Teachers expressed appreciation for the classroom activity, and requested presentations for the next school year. The 4th grade Enviroscape presentation at Saratoga Elementary School was given prior to a Creek Clean-up, which the students were invited to attend. The classroom presentation and

Creek Clean-up were followed by 2 Zun Zun assemblies at the school. Teachers, school administrators and parents all commented that they felt both students and adults had learned new ideas and information, and the school will be more inspired to take notice of its local Saratoga Creek which is only 3 blocks away.

WVCWP also initiated use of a hardbound picture book “All the Way to the Bay” as a means of keeping the Stormwater Pollution subject in teachers’ minds. The book is given as a gift after an Enviroscape presentation. It is hoped that the presence of the book will help stimulate interest in the subject in subsequent years, and among additional teachers.

All West Valley businesses, residents & schools are invited to bring unwanted TVs, monitors and laptops to this FREE recycling event.

January 28, 2006
9 am – 1 pm

41 Miles Ave. – Los Gatos
(Municipal Yard – Near University Ave. & Highway 9)

Here's your chance to act locally, and make an impact globally, while clearing up your clutter in the process! Your support of this event ensures that the hazardous substances in these items will be recycled responsibly to prevent toxic water contamination and air pollution, both locally and in Third World countries.

Brought to you by Campbell, Los Gatos, Monte Sereno and Saratoga through the West Valley Clean Water Program.

Saratoga youth named 'Eco-Hero' award winner by Action for Nature

By Kaustuv Basu

"No Dumping: Flows directly to bay"--almost everyone has seen that sign on a sidewalk.

Saratoga David Marash-Whitman, 13, wanted to learn more about it.

As part of a school project two years ago, he decided to find out more about household pollutants that can damage creeks and the bay.

One of the first people he contacted was Cheri Donnelly, program manager for the West Valley Clean Water Program. She told him about the pollutants that were the most dangerous to the creeks. That project was completed a while ago, while David was at South Peninsula Hebrew Day School.

David has moved to Kehillah Jewish High School since then but he has continued with his mission of educating the public about the dangers of pollutants.

Last month, he won the International Young Eco-Hero Award from Action for Nature, a local ecology group, for his efforts. He is one of several youngsters worldwide chosen for their commitment to protecting the environment.

"I was horrified to learn how toxic residential products like paint-removers and pesticides

can affect creeks," David said.

He said that he advocates his cause whenever he gets a chance. "My next project is to get kids to help clean up the local creeks," he said.

Donnelly said that David does a very professional job when he makes presentations to people. "People have no idea how litter has damaged our creeks," she said.

But advocates such as David are helping, she said.

B. Shimon Schwarzschild, the founder of Action for Nature, said that he is delighted with efforts made by young people all over the world.

"Individuals can make a difference," Scwarzschild said.

Electronic Waste Discovered in Local Creek
Free Recycling Event in Los Gatos Aimed at Preventing Water Pollution

(Los Gatos, CA) – Following recent storms, Los Gatos Town staff pulled a discarded 27" television from a local creek. The culprit remains unknown. While they may have thought this was nothing more than littering, the potential problem for this crime is much bigger. When not recycled or disposed of properly, electronic waste can result in toxic pollution. E-waste leaches lead, mercury, copper and other metals into the groundwater, posing serious health hazards to people and wildlife.

As flat-screen plasma TVs and LCD monitors become more affordable, consumers are replacing conventional cathode ray tube (CRT) TVs and monitors at a rapid pace. Judging by holiday sales and pre-Super Bowl ads, there will soon be many conventional TVs gathering dust – or worse, as we found in a local creek.

To help local residents properly dispose of this waste, the municipalities of Campbell, Los Gatos, Monte Sereno and Saratoga are hosting a FREE recycling event for TVs, computer monitors and laptop computers.

The event will be held in Los Gatos at 41 Miles Avenue (near intersection of University Ave. & Highway 9) on January 28th from 9 a.m. to 1 p.m. The West Valley Clean Water Program (www.cleancreeks.org), the official storm water agency for these 4 municipalities, is partnering with local recycling firm United Datatech Distributors (UDT) for the event.

UDT was selected for their high standards of materials handling. UDT does not export waste to third world countries, where children and laborers seeking salvageable parts are exposed to toxic e-waste which pollutes local water supplies or billows noxious air pollution when burned. UDT also keeps these deadly materials out of our local landfills, where runoff containing hazardous substances can seep into our groundwater.

The issue of littering aside, it is illegal in California to dump TVs and monitors in landfills. Garbage collection for local municipalities prohibits putting these items into residential garbage cans. Instead, these items must be handled by a credentialed recycler, often for a fee. This event is a great way to avoid the fee, get a jump on spring cleaning, and avoid desperate disposal measures.

Free Recycling Event
TV - Monitor - Laptop Recycling in Los Gatos

Quick Facts:

What: FREE Recycling/Collection event
Items Accepted: TVs, Computer Monitors, Laptop Computers (working or not)
When: Saturday, January 28th, 2006
Time: 9 a.m. to 1 p.m.
Where: 41 Miles Ave., Los Gatos (near intersection of University Ave. & Highway 9)
Who is invited: Residents, Businesses, Schools in the South San Francisco Bay Area
Further info at: www.cleancreeks.org or 408.354.5385 (tip line)

- The EPA estimates that Americans discard 2 million tons of electronic waste each year.
- The EPA considers old cathode ray tube TVs and monitors the most hazardous items.
- E-waste leaches mercury, lead, copper, etc. into our ground water.
- Irresponsible recyclers ship e-waste to Third World countries where it pollutes land, air and water, posing serious health risks to residents. Visit www.ban.org for details.
- Support of this event sends a message about ethically responsible recycling practices.
- Information about United Datatech Distributors (UDT) can be found at www.uniteddatatech.com

Creek is no place to dump computers, television sets

By Jennifer McLain

For some, recycling is second nature. But when it comes time to toss out that old TV or computer monitor, there's no such thing as a recycle bin for "e-waste only." Some resolve the problem by throwing the electronics out in the dumpster--forgetting, not realizing or not caring that the toxins in them can eventually seep into groundwater. Others just ignore the "no dumping" signs and cast them in the creek.

"We found a 27-inch TV in the Los Gatos Creek a few weeks ago," said Los Gatos resident Cheri Donnelly, program manager at the West Valley Clean Water Program. The clean water program started in 1994 and is dedicated to preserving and protecting the water in Campbell, Los Gatos, Monte Sereno and Saratoga.

"People are desperate to get rid of their old electronics, but they can't just put them in the landfill because the toxins can get into our groundwater," Donnelly said.

One alternative is to take the old electronics to a free TV-and monitor-recycling event from 9 a.m. to 1 p.m. on Jan. 28 at 41 Miles Ave. in Los Gatos.

The water company is teaming up with United Datatech Distributors and ECS Refining for the event. Donnelly said that unwanted electronics brought to the recycling event will be handled responsibly.

"At a lot of these types of events, people feel giddy and gooey that they are doing the right thing, but what they fail to realize is that a number of these places are shipping these devices to someone else's back yard," said Tom Hogye, vice president and general manager of the distributor and refining company.

Hogye said that some so-called recyclers take the cheapest and not most environmentally sound route, and ship scraps to undeveloped countries while making a profit.

"Even if we are taking care of our country, we certainly don't want to see the waste in Africa and Asia," Donnelly said.

Hogye said that Datatech sends the waste to environmentally sound processors, which are primary and secondary smelters.

It is illegal to dump TVs and monitors in landfills, and since the inception of SB20, the Electronic Waste Recycling Act of 2003, a fund was created for the collection and recycling of certain electronic waste. As of July 1, 2005, plasma televisions and TVs with liquid crystal display screens are classified as e-waste. Each time a consumer buys a new electronic that contains cathode ray tubes (CRT) or has a liquid crystal display, he or she pays a $6 to $10 fee that will cover the collection and recycling of the wastes.

Electronic devices contain a variety of materials, including copper, lead, zinc, arsenic and mercury.

"Mercury is one that our program is highly focused on," Donnelly said. These toxins can enter the groundwater and are hazardous to the health of plants, animals and humans.

It is estimated that Americans discard nearly 2 million tons of electronic waste a year, and among the most hazardous are CRT televisions and monitors.

In general, Donnelly said the Los Gatos community needs to be aware of what is going into its groundwater.

"It's about knowing that what goes into the street drain. If it's dog waste or pesticides, it really is going directly to the Los Gatos Creek and downstream into San Jose," said Donnelly.

For more information about the event or the West Valley Clean Water Program, call 408.354.5385, or visit www.cleancreeks.org.

	SCVURPPP PMP (I.A.1.)	Summary of Use Track and report use of pesticides on municipally owned property. Report on use of IPM practices.	No Organophosphate pesticides were used by staff or contractors for City of Campbell, Town of Los Gatos, City of Monte Sereno or City of Saratoga in FY 05-06. All pesticide use (by municipal staff and contractors) was tracked and reported to WVCWP, for use in possible future analysis.	WVCWP to coordinate w/ Cmpbl: Sr. Civil Engr/ Public Works Supt/ Bldg Maint. Supvr LG: Parks Supt & Public Works Supervisor MS: City Manager/ Facility Mgr Stga: Parks & Street Maint Supervisor
	SCVURPPP PMP (I.A.3.) PS #3	Implement BMPS and SOPS Continue to Implement standard operating procedures and best management practices for any pesticide use by staff or contractors. Implement IPM practices as BMP when possible.	In August 2004, the West Valley Communities (WVC) revised and updated all sections of their URMPs, including their Pest Management PS. During 05-06, the WVC continued to implement the Pest Management Performance Standard (PMPS). A Pest Specific IPM Plan for "Less Toxic Turf Weed Control" was developed in FY 05-06. "Standard Operating Procedures for Pesticide Management" are being followed by staff and contractors. BMPs in general continue to be effective. WVC work with contractors to find the least-toxic method to treat resistant pest problems.	Cmpbl: Sr. Civil Engr/ Public Works Supt/ Bldg Maint. Supvr LG: Parks Supt & PW Spvsr MS: City Manager Stga: Parks Maint Spvr

			The WVC use reduced-risk pest management in municipal facilities (parks & buildings), while fostering greater IPM awareness by sponsoring local IPM workshops (since 2001) for municipal staff, special districts and Pest Control Operators (PCOs). Staff have attended trainings on IPM (e.g., West Valley Turf Mgmt workshop on 3-22-06) and are implementing IPM practices for control of pests, as practicable. *See "Evaluation" section below for details on IPM implementation.*	
	SCVURPPP PMP (I.A.6.)	Banned Pesticides Inventory If any pesticides have been banned w/in the past FY (per EPA, State &/or local requirements), conduct an agency-wide search of chemical storage area for these pesticides. Properly dispose of these banned substances pursuant to appropriate waste disposal regulations.	All storage areas are cleaned annually, and any pesticides that are no longer legal or no longer used are disposed of according to State regulations. **Campbell:** Storage areas are cleaned quarterly. **Monte Sereno**: does not purchase or store its own pesticides.	Cmpbl: Public Works Supt/ Bldg Maint. Supvr LG: Parks Supt & Public Works Supervisor Saratoga: Parks Maint Supervisor
	SCVURPPP PMP (I.B.1.) PS#5.a	Training for Applicators Ensure that employees who apply pesticides for the agency obtain the appropriate training as required by the County Agricultural Commissioner and the State Department of Pesticide Regulation (DPR)	Any staff and/or contractors who apply pesticides meet all requirements of the County and the State. Parks & Public Works staff attended Annual Safety Training conducted by outside contractor. Training included avoiding drift, and proper disposal. **CAMPBELL:** Due to high staff turnover in 2006, Campbell has received permission from Dept. of Ag to postpone its Safety Training to August 2006, in order to allow all new employees to be in place and to attend. 			LOS GATOS: 4/26/06 – 12 employees – presenter: Dennis Merrill, Killroy/ Sensitive Solutions Pest Control **MONTE SERENO:** no employees apply pesticides. In case of the need for pest control, a licensed Pest Control Operator will be called in. **SARATOGA:** 6/27/06 – 14 employees – presenter: Peter Howes. 2 more **Saratoga** employees gained QAC[1] cards through additional training in FY 05-06, enabling them to have a better understanding of pesticides, less-toxic options, and safe usage. [1]QAC - "Qualified Applicator Certificate", a category of the DPR Licensing and Certification Program. To be certified, the applicant must demonstrate specific knowledge on topics such as pesticide application drift problems and prevention, soil and water problems resulting from restricted use pesticides, phytotoxicity, potential for environmental contamination, etc.	
	SCVURPPP PMP (I.B.2.) PS#5.b	Training for Applicators Provide annual training on the appropriate portions of the IPM Policy, SOPs, and BMPs, and the latest IPM techniques to employees within departments responsible for pesticide application.	The West Valley communities, through WVCWP, sponsored a staff-attended IPM Training on Turf on March 22, 2006. Frank Rossi, a national expert (from Cornell University) presented guidelines for managing turf with little or no pesticides. The training included a classroom PowerPoint presentation and a field trip to examine Campbell's community athletic field turf. Additionally, the WVCWP made a video of the workshop (to transfer to CD) for parks maintenance staff to incorporate into future IPM training.	WVCWP to co-ord w/ Cmpbl: Sr. Civil Engr/ Public Works Supt/ Bldg Maint. Supv LG: Parks Supt & PW Div Stga: Parks Maint Supervisor

		and includes messages about less-toxic pest control and proper disposal. Campaign features South Bay English- and Spanish-language, radio and print ads.	See PI/P Section, "Citizen Participation" & "General Outreach"	
	SCVURPPP PMP (II.A.5.) & (II.A.6)	Community & School Events Identify and attend community/school events; distribute outreach materials regarding less toxic pest control. Community Material Distribution Provide outreach to community through distribution of information via libraries, civic and community centers, and other points of social interest.	Through WVCWP, significant IPM outreach has been incorporated into educational activities and presentations in the local schools. Students have learned about pesticide runoff and the need to use less-toxic pest management strategies. This point is made when they play with the Enviroscape and watch the toxic-colored water (pesticide runoff) flow into the creeks, Bay, wetlands and Ocean where it affects sea otters, fish, wildlife and even people. Grow it guides are provided for students to take home to parents. September 20th 2005, WVCWP staff made a special evening presentation at Saratoga Library's story time for young children when the topic of the week was "water & rivers". Since parents accompanied the children materials for both age groups were given out. **Materials Distribution** For Kids - 29 Our Water Our World picture frame magnets 7 Watershed Watch magnets 31 A Child's Garden coloring books 10 Kids Guide to Backyard Bugs	WVCWP coordinate w/ Cmpbl: Sr. Civil Engr LG: Pub Works staff MS: City Manager Stga: PW Analyst

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2005-2006 ANNUAL REPORT

Pesticide Management Activities Evaluation

PESTICIDE USAGE REDUCTION MEASURES – Pest Specific

TOWN OF LOS GATOS

Los Gatos is implementing IPM in the following situations:

ANTS:
In structures—handled through maintaining sanitary conditions. Employees receive regular memo and e-mail reminders of cleanliness policy. Town contracts with an especially thorough custodial service to help keep facilities sanitary. This has decreased instances of ant invasions.

YELLOWJACKETS:

- Los Gatos uses traps as the main means of control.
- Parks staff uses steam cleaning on picnic tables to prevent attracting wasps & ants.
- If a wasp nest in a tree requires treatment; the PCO uses a non-residual pesticide, & closes the hole in tree so wasps can't return to nest.

WEEDS:

- Los Gatos uses a chipper to create mulch from green waste; this mulch is used for weed control wherever possible.
- Los Gatos has arranged to receive free wood chippings from PG&E tree-trimming contractor. Mulch is used to reduce weed growth on roadsides, median islands, parking lot landscaping and in parks.
- Work Furlough labor hand hoes weeds where possible.
- Staff hand-pull weeds where feasible.
- Los Gatos contracts with Caltrans to mow large areas
- Los Gatos Parks Superintendent is pleased with the Town's new flail mower, purchased during FY05-06 for mowing roadside weeds, rather than spraying.

RODENTS:

- Rats & mice are trapped by contractor (baits used as last resort).
- Gophers & moles are flooded from their burrows using a hose.

INVASIVE SPECIES:

- Various species along Los Gatos Creek are hand-pulled by Native Plant Society volunteers
- Scotch Broom is cut down by Parks staff

West Valley Communities – Los Gatos

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2005-2006 ANNUAL REPORT

SCALE INFESTATION ON TULIP TREES

- Parks staff sprays trees with low concentration detergent & water

Results of Pesticide Use Review FY 05-06:

Los Gatos was able to eliminate use of any OP pesticides in FY 05-06, 04-05, 03-04 and 02-03, (as compared to using .475 oz of diazinon for ant control in FY 01-02) through use of IPM practices and through seeking out less toxic pesticides.

The Town is making an effort to stress prevention (prevent weed growth, prevent pest infestations) where possible. Los Gatos is moving into use of IPM and engineered, rather than chemical, controls as much as possible given budget and staff limitations.

In Town facilities, sanitation is being stressed as a means to prevent pest infestations (ants, mice, etc.) so that chemical controls will not be needed.

Over the past several years, the Public Works Dept. has instituted improved methods of weed control in some parks and roadsides, such as the arrangement for free wood chips which are used as mulch to prevent weed growth; in FY 04-05 LG borrowed a tractor with boom mower from Campbell in order to mow roadside & park weeds and to avoid spraying; during FY05-06 the Town purchased its own flail mower to continue this practice. Volunteers work with the Public Works Dept. to trim back brush along the LG Creek Trail, and to remove invasive species.

IPM Plan
for
"High Use / No Pesticide / Low Budget TURF"

Goals:

- Reduce use of pesticides for weed control through turf management methods which produce healthy turf and discourage weeds.
- Determine weed treatment threshold - the maximum number of weeds that can be tolerated at a site without causing unacceptable damage, hazard, or nuisance.
- Incorporate latest research on less-toxic methods for generating and maintaining healthy turf.
- Train staff annually on newest management practices which encourage healthy turf and discourage weeds
- Develop successful management practices tailored to municipal turf sites, based on site characteristics and horticultural practices applicable to those characteristics (i.e. frequent overseeding for high-traffic areas, amendments to clay soil, etc.)

Tolerance level for weeds:

- Low to zero in public areas

Turf Management facts:

- Turf sites should be tested for chemical and soil characteristics to facilitate optimal decisions on turf management.
- Correct use of soil amendments (compost) along with proper aeration reduces compaction and encourages healthy turf.
- Proper mix of turf types (Kentucky Bluegrass base, rye and fescue overseeding) helps ensure healthy turf in high-traffic areas
- Regular, frequent overseeding is a successful, non-toxic means of reducing weed problems in turf.

For additional information, visit:

http://turf.lib.msu.edu - go to the "Turfgrass Information" file

Managing Turf to Prevent Weed Problems

MAINTENANCE & MANAGEMENT

Careful management and maintenance are the best means of preventing weed invasions. Many different aspects of turf maintenance can affect weed growth. These include (but are not necessarily limited to) seeding, fertilizing, irrigation, aeration, soil amendments, top-dressing, and mowing. Management, such as choosing the most appropriate grass seed for the turf use, is also very important.

INITIAL STEP: ANALYSIS

If we want to use less pesticides & fertilizers, we need to know more about the biological systems of the turf and weeds/ pests. When we know more about why the weed/ pest is there, we can deal with it better.

Chemical & Physical Analysis

SITE TESTING: It's important to get the site tested. At a minimum, get a **physical analysis** before doing any soil amendment activities. It can even be important to get a breakdown of any sand in the soils: i.e. is it fine sand - which is almost silt, or is it course sand - which has different properties.

A report listing a "sandy loam" could have a sand that's mostly a fine sand. Or what appeared to be silt could also contain clay, which is smaller and has a negative charge.

A **chemical analysis** can help determine if any constituents of an amendment could lead to problem levels of a chemical/mineral, such as phosphorus.

AMENDMENT TESTING: It's also important to get any compost tested – some amendments may contain 20% - 30% clay, which would be detrimental to the site.

⇨ The ratio of Carbon/Nitrogen should be close to, but not more than, 30/1 (i.e. 30 units of Carbon/ 1 unit of Nitrogen).

⇨ The compost needs to have 60-80% organic matter, and should have minimal 'fine particles'.

Use Analysis

Traffic on the turf causes wear, which can result in deteriorating turf and thus presenting an opportunity for weeds to grow.

Wear is abrasion to the grass and compaction of the turf and soil due to the downward pressure of many feet. Compaction will be even worse when there is clay in the soil.

Heavy traffic can also result in a lack of recovery time for the turf; recovery time is needed for the turf to replenish broken stalks and restore turf density.

"WHEN" Does It Get TRAFFIC?

Determine when much of the heavy traffic occurs; i.e. is in the fall due to football and soccer activities? During the fall and winter, turf is slow growing and doesn't regenerate well, which compounds the problem of heavy traffic.

The WV Communities locale has a generally uniform growth pattern due to irrigation – but it still grows more slowly when there is less sunlight (shorter days) and cooler weather. Lots of traffic during the depressed growth periods causes a problem for the turf. This includes intense practice sessions - before an official sports 'season' begins, such as in early Spring, or in Fall, when days are shorter. Timing of your fertilization and seeding is determined by when the traffic falls.

WORK WITH STAKEHOLDERS:

"FIELD ASSESSMENT SPREADSHEETS"

Meeting with users of the fields allows an opportunity to work together to determine thresholds, and helps users to understand the requirements involved in maintaining usable turf.

"Field Assessment Spreadsheets": Use these to meet with sports associations to discuss use of the fields. If the # is greater than 35, you have to re-assess use, consider renovation. A range of 11-20 is pretty good. Engage the people who use the field; work together to make the fields usable within the limitations of the municipal budget and limitations of the turf (soil, climate, etc.). Filling out the sheet together helps users understand what they may have to tolerate, and to work together with municipal staff to set a realistic target.

WHERE is the TRAFFIC?

Where on the fields is help needed most?

For example, the corners of the soccer fields don't get much wear compared to the center. The logical way to save money and labor is to concentrate most of fertilization and other management activities mostly in the center of the field.

Soccer field: center = approx. 40,000 sf

Football field: Between the 20 yd lines, and in between the hash marks = 16,000 sf

A whole field = approx. 80,000 sf. (2 acre field)

These heavily used (center) areas need 3-4x the amount of resources as the corners.

➔ Make 2 applications/year in the corners, 6-8 apps/year in the center

TURF MANAGEMENT

Compaction Management

The 1st line of defense is compaction management. Over-use can cause compaction.

CORING & AERATION:

⇨ The best fields are cored between every month to every 6 weeks. The benefits of coring are short-lived & only last 3-4 weeks, so it must be done frequently.

If it's not possible to core this frequently, it is at least necessary to aerate.

Coring (& aeration) promote:

- nutrient release
- increase in microbial activity
- increase in rooting activity
  - In a sand situation, this will Increase Organic Material coming to surface

During the season when you can't core, use needle tines to get water and air in, in order to improve the environment to allow increased rooting.

Factors in coring:

- Don't core when soil is too wet.
- Need to affect 10-15% of the surface (2-4" spacing of vertical drive machine is better than the 8-10" spacing).
- Use the 8-10" for bringing up soil to create bed for seeding.
- In the center of the field do it every 4-6 weeks, the corners of the field, maybe only once a year, since corners don't have much compaction.

Aeration with "knives"

1 form of aeration is to use an "Aerways" aerator. This uses huge blades, placed on an angle, to cut down through the turf and soil. They cut down 18-20". The Aerways actually shakes the soil. It's good to use it when the soil is dry. By shattering the layers of soil, it doesn't just affect the surface. The shattering will occur more when the soil is dry.

The "Vertidrain" is similar to the Aerway, but the knives are placed at more of an angle. It is recommended to be used a few times a year on high use fields. It has a lever which allows the blades to go down in straight, then kick on the way out; this forces shattering and loosens the whole soil profile.
Outsource: To have a 7 acre site treated with a Vertidrain can cost about $2,000 - $2,500.
When using the Aerways or Vertidrain, the turf is not left with holes in the soil, which can be hard to fill in adequately.

When doing serious amending or seeding, it's necessary to pull out cores so the amendment can replace the cored soil, or so the cored soil can be spread to make a seedbed.

⇨ Once in a while it's important to break up any layer that's being created by using the same length of tines consistently (i.e. use the Vertidrain to shake up the soil profile). One reason that layers need to be broken up is because the layers keep the water from percolating evenly.

Amending / Layering

FOR A CLAY-BASED FIELD:
The first line of defense has to be surface drainage. Water standing on the surface makes the compaction worse. In order to fix a clay soil, it's necessary to create good surface drainage.

Clay subsoils have an infiltration rate of about 0.10 – 0.30" per hour
By composting with the right amount of organic matter, it's possible to increase the infiltration rate by 10 fold, as well as encouraging turf growth with the nitrogen, etc. in the compost.

Creating good surface drainage through coring and amending:
⇨ Mow down to 1"; then core & hollow tine in several different directions; remove the cores, aerate, spread with top dresser 1 time: put it down, brush it in, water it in, then repeat the amendment several days later. It's a weeklong process to do amending. The key is to have a good source of compost.

⇨ One time/year do the amending, and several times per year do the top dressing. After 3-5 years of this, there will be a real improvement in the turf. A good source of compost is needed in order to be able to do this consistently.

However, after 5 - 7 years with compost, you can get phosphorus build-up and runoff, which can affect local drinking water supplies. A solution is to compost for 3-5 years, then stop for a while.

Compost Amendments for establishing turf:
Manure or biosolids compost is the best.
Yard waste is the worst.

Manure is a Biosolid, a combination of Carbon & Nitrogen
The ratio of Carbon/Nitrogen should be less than 30/1 (i.e. 30 units of Carbon/ 1 unit of Nitrogen).

- Microbes/ microorganisms etc. need the carbon to grow and then need the nitrogen. The grass also needs the nitrogen. For example, a 40/1 ratio causes too much growth of microbes and they compete with the grass for the nitrogen (grass will yellow).

- The compost needs to have 60-80% organic matter.
- Need as little 'fine particles' as possible.
- Possible weed problems with manure: have it checked first through testing.

Sand Amendments:
If amending with sand, **don't use pure sand**.
⇨ For each 1" of clay you need 8" of sand. Putting in anything less than that will end up as cement. The bridge differential between the 2 particles causes it to set up as cement.

⇨ The ideal sand size for clay soil is medium to somewhat coarse.
Do test for sodium levels in the sand before purchasing it - with rainfall and irrigation, salts in the sand can leach out. Then, if the sodium level was high, the grass seed won't establish well.

If a salt problem has developed, gypsum can be helpful. However, in general gypsum will not improve the soil – it won't help soil structure.

Putting **sand on top of clay** can improve drainage (create a big crown on the field and cap with 5-6" of sand), BUT a completely different grass-growing environment is needed; this is more appropriate for golf courses than municipal fields. It's not a forgiving environment and it's harder to actually get grass to grow well.

Peat / Sand Amendments:
Peat can be good when it's blended properly with sand, but it's not really cost effective. Peat may be more degraded than compost, whereas a manure compost can reduce the turf's nitrogen demand 30% over 3-5 years.

Mowing

MOWING & DENSITY
⇨ Mow at between 2" & 3". It's important to pick a height and stick with it, i.e. 2" or 3" - not 2" one mowing and 3" the next. Get the mower on a smooth paved area, and measure the blade height with a ruler.

➔ ***Fertilizer Vs. Mowing Frequency***
Increasing the mowing from 1x to 2x per week increases the wear tolerance about 50%. The reason is that increased mowing results in increased density of turf roots.

Fertilizer

FERTILIZER TIMING

⇨ 0.5 - 0.75 lbs of Nitrogen per month, every month can be applied in our area due to the fairly uniform growing season. Cooler weather in conjunction with longer days promotes good root growth. This would be early Spring and late Fall (Feb.-March & Oct.-Nov.).

FERTILIZER CHARACTERISTICS

⇨ A pH between 5 & 8 is okay; the ideal range is between 6 & 7. Elemental sulfur can be used to bring idown the pH, and lime can be used to bring it up.

Slow-release vs. Urea (Ammonium sources of nitrogen):

A comparison was done for Urea vs. Polyon. Polyon is a sustained release fertilizer – one application disperses over the whole season/24 weeks. Polyon saves money on labor for application vs. urea (1 application/season for Polyon = 5 applications/season of urea). Polyon cost 3x as much as urea.

⇨ The study showed that the cost equaled out when applied to @ 30,000 sq ft or more (@$15/hr labor.

➔ Combine a slow release fertilizer, spread over the entire field, with frequent applications of a cheaper regular fertilizer over the high traffic areas.

This system will also mean that the whole field doesn't have to be closed for fertilizing; teams can practice on the areas where sustained-release was applied, when an additional application is being made to the high-traffic areas.

Fertilizer vs. Corn Gluten Meal

For Corn Gluten Meal, the anecdotal evidence says it works well as pre-emergent in ornamentals. Evidence also shows it works well in turf - however, basic fertilizer (ammonium sulfate) does the same thing.

For 10-0-0 fertilizer with some pre-emergent herbicide effects vs. Corn Gluten Meal, the fertilizer has the same results in controlling crabgrass. Since CGM costs 10x as much as regular lawn fertilizer it doesn't appear to be cost-effective.

Seeding/ Overseeding

EFFECTIVENESS OF SEEDING FOR WEED CONTROL

Use of regular, frequent overseeding will make a big difference in maintaining turf density which will help keep weeds out, and will promote a quality turf without pesticides. Overseeding is an effective weed control measure for high-use / low-input fields that need a low cost solution to keep the turf in shape.

If a field starts out with dense turf, it has been shown that putting on any seed on a weekly basis will maintain turf density despite heavy traffic. Studies showed that plots overseeded did much better than those not seeded. In plots not overseeded during heavy use periods, turf density went down to 20%. A year after ending the study, the overseeded area still kept out the crabgrass.

IMPLEMENTATION OF OVERSEEDING

⇨ Anytime seed is being put down, make a phosphorus application.
⇨ The critical point for successful overseeding is regular, appropriate frequency, rather than the amount of seed applied.

Recommended seeds
⇨ ***Coventry Kentucky Blue Grass*** provides a good base turf. Many of the highest quality sports fields have Kentucky Blue Grass base, which is seeded throughout the season, (then overseeded with perennial ryegrass). The Bluegrass rhizomes are necessary to knit the field together. However, it's not effective to overseed frequently with KBG because it takes too long to germinate and establish.

⇨ Ryegrass and Tall Fescue varieties are effective for overseeding:
"Citation" perennial ryegrass
"Jaguar" tall fescue

Frequency/ amount of seeding
During a dry year, 8-10 lbs/1000 sf of overseeding weekly may be necessary in order to get a good density.
⇨ Irrigated fields: During a good year, or with irrigation, only 2 lbs of seed/1000 sf were needed for weekly overseeding to be effective.

⇨ In a study, the turf was drop-seeded weekly. The plots were mowed at a 3" height. They were fertilized in June and September.

FIELD STRUCTURE

Field structure can be used to help facilitate healthy turf growth, for example structural changes which promote good drainage. Bring a drain pipe to the surface in a low spot, have the pipe go to a pipeline so it will drain away standing water in the low spots.

Standing water tends to be a problem where irrigation lines are all hooked up in 1 straight line (1 sprinkler line runs the whole length of the field), so that low & high spots are getting the same amount of water. This may result in enough irrigation for high spots, but with too much for the low spots.

One solution is to "Zone" the irrigation system. It's also better to have it the turf bit on the drier side than too wet. Drier turf is better for preventing disease and promoting rooting.

For soccer fields, changing the structure of the goal mouth area can improve turf growth. The goal mouth gets the most wear, so crown it (about a 2" crown) to promote drainage and help address the wear. Start from outside the goal box to create a crown across the front area.

Crumb rubber can be used as a top dressing on field sidelines, off the playable surface. This protects the growing point and extends the growth period (due to black rubber holding in heat during cold weather).

BUDGETING

If turf is well managed, and use of pesticides can be decreased, then most of the former Pesticides Budget can be spent on labor and seed.

ANNUAL EVALUATION OF EFFECTIVENESS:

Evaluation of effectiveness of turf management for weed control is primarily conducted by visual and site inspections, and customer complaints.

More information on this topic is available at:
http://turf.lib.msu.edu - go to the Turfgrass Information file

FY 2005-2006 ANNUAL REPORT

Training Summary: Pesticide Management

TRAINING DESCRIPTION	DATE	ATTENDEES
ANNUAL WEST VALLEY IPM WORKSHOP – Attended by WVCWP, Campbell, Los Gatos, & Saratoga Staff		
West Valley Turf Mgmt Workshop Sponsored by West Valley Communities Presented by Frank Rossi, a national expert from Cornell University A national expert from Cornell University presented a PowerPoint presentation. One hundred percent of attendees who turned in evaluations rated the training as "worth my time to attend", and 22 out of 25 said the training would enable them to change turf management methods to reduce pesticide use **Topics:** ▪ Guidelines for managing turf with little or no pesticides ▪ Field trip to examine Campbell's community athletic field turf Planting to Encourage ▪ From the training, WVCWP developed a "Turf Management IPM Plan" to be used as a reference for outdoor maintenance staff. Training was attended by all Parks Maintenance staff (or presentation was given later to staff). One local private Golf Course Superintendent also attended. The WVCWP made a video of the workshop (to transfer to CD) for parks maintenance staff to incorporate into future IPM training sessions.	March 22, 2006	**Campbell** **City of Campbell (16)** Public Works Park Supervisor Maintenance Staff **Los Gatos (7)** Parks & Forestry Superintendent Public Works Supervisor Parks & Maint Workers **(6)** **Monte Sereno** No parks or medians Under Monte Sereno jurisdiction. **Saratoga (10)** Parks Supervisor Parks Lead Worker Parks Maintenance Workers (8) **Saratoga Country Club (1)** Golf Course Superintendent

MERCURY POLLUTION PREVENTION ACTIVITES				
FY 2005-200 Work Plan Self Evaluation Matrix				
Source	**WP Tasks**	**FY05-06 Work Plan Tasks**	**FY 05-06 Accomplishments**	**Responsible Party**
	Mercury Plan (I.D.)	Mercury Policy Implement mercury policy or ordinance requiring the virtual elimination of mercury from controllable sources in urban runoff from agency operations.	Los Gatos adopted a written mercury policy in FY 03-04 and continues to implement the policy. Los Gatos continued its Battery Recycling Program handled by the Building Maintenance Dept. Collection buckets are available in all departments. The Town collects all dry cell and wet cell batteries	PW Director, PW Supervisor, Sr. Eng Tech and WVCWP to assist
	Mercury Plan (I.F.)	Guidelines Continue implementing the Guidelines for Mercury-Containing Products Reduction and Management The quantities of mercury containing devices disposed of will be reported in the FY 05-06 Annual Report.	Reduction of mercury-containing products is being implemented. Research on alternatives to mercury-containing products has been conducted and implemented wherever possible.	WVCWP to assist Eng Div.
	Mercury Plan (II.D.)	Reporting HHW Disposal Continue documenting and reporting quantities of mercury-containing products disposed of by Town at hazardous waste collection facilities in FY 05-06.	Bins for recycling used batteries are distributed throughout Town departments so that batteries don't end up in the trash. All battery bins are disposed of through HHW. Mercury-containing products (primarily fluorescent bulbs) are removed via a private HHW contractor. The Town disposed of approx.115 U-shaped and compact bulbs, 620 4-ft bulbs, and 50 8-ft. bulbs.	SCVURRPP (guidance), WVCWP to assist Eng Div.
	Mercury Plan (V.A.)	Fluorescent Light Recycling Program Implement an outreach program to educate small businesses and conditionally exempt small quantity generators about recycling fluorescent lights. Coordinate educational outreach with fluorescent light recycling events sponsored by HHW.	*Fluorescent Light bulb Recycling Flyer* WVCWP updated its flyer created last year, listing local drop-off points (5 hardware stores) which are part of the fluorescent bulb drop-off program. Hours and location of stores are listed, along with HHW contact info. The flyer reminds readers that **it's illegal to put fluorescent bulbs in the trash or in regular recycling**	SCVURRPP (guidance), WVCWP to co-ord w/ HHW staff

		Additional Task – Not in Workplan	*January 28, 2006* ***Free*** *Hazardous Waste Recycling Event* The event was sponsored by the four West Valley Cities through West Valley Clean Water Program. It was held at Los Gatos Public Works parking lot. Los Gatos & Saratoga and WVCWP (for Campbell & Monte Sereno) staffed the event. West Valley businesses, residents and schools were invited to participate. **WVCWP staff hired and worked with Carl & Manor Ad Agency to create flyers, posters, a press release, and a newspaper ad** to raise awareness in the West Valley communities about E-waste and about the Clean Water Program in general. Ads, articles and flyers relayed the message that E-waste can leach toxic metals (i.e., mercury) into our water, and that by using a responsible recycler people can help prevent export of toxic waste to foreign dumps where mercury leaches into the environment. Over 250 cars brought E-waste for recycling. Posters placed around the site highlighted the environmental affects of improper E-waste disposal. One high school coordinated with WVCWP prior to the event, and dropped off pallets of E-waste on the previous day. Los Gatos Police provided traffic control and the Town supplied a forklift and driver for the event. Town staff handled set up & clean up as well. Quantities collected for responsible disposal are listed in the Evaluation at the end of this matrix.	

LOS GATOS

FY 2005-2006 ANNUAL REPORT

Mercury Pollution Prevention Activities Evaluation

West Valley Communities Developed, Advertised, Sponsored and Staffed the West Valley E-Waste Recycling Event

Much discussion and research went into trying to develop an action that would make a difference in the amount of mercury containing waste going to landfill or being disposed of illegally. The issue of illegal dumping was exemplified by the television that was found dumped in a Los Gatos Creek during the winter season. While the dumping was not necessarily done by a West Valley resident, it served as a good example of the fact that illegal dumping is a problem. This incident was featured in the West Valley Clean Water press release which was written as part of the advertising for the community event. Two local newspapers ran the article and placed it next to the ad that WVCWP Communities ran in each of the local community papers. Residents responded enthusiastically and brought the ad from the paper as if it would be needed to participate in the free event. Many more people noticed the ad than attended the event. WVCWP and West Valley municipal staff interviewed participants as they waited in their cars to make the drop off. Often staff were told that residents were bringing in E-waste belonging to one or more of their neighbors, in addition to their own items. The event was one of WVCWP 's most successful attempts to encourage the community to take action and bring to light the goals of the West Valley Clean Water Program.

Residents & Businesses Joined In

WVCWP made the decision to spend a significant part of WVCWP budget on hiring the Public Relations agency (Carl & Manor) for the Watershed Watch campaign to design a news ad and submit a press release to local papers. (See *PI/P Section - A SCV Program Projects/Support* for details on additional outreach for the event). Even more exciting was that two local businesses, Le Boulanger and Pizza-My Heart supported the community in these efforts by donating breakfast and lunch for all volunteer staff. In a four hour period, over 250 vehicles came to drop off E-waste. The residents were delighted with the event and the most popular question was, "When will you do this again?" At that point WVCWP and municipal staff determined that the WVC would work hard to sponsor another E-waste drop off event in FY06-07. The **Los Gatos Weekly** and **Saratoga News** also printed a short editorial letter from the WVCWP Mgr thanking the residents for their enthusiastic participation, noting that a total of 33,657 pounds of E-waste was collected, and thanking the businesses for their donations and support.

Quantities of E-Waste collected:

	U/M	WEIGHT	%/Wgt.
COMMODITY			
UW CRT DEVICES-CA	501	24,200	71.90%
Scrap Systems	Pallets	3,733	11.09%
Scrap Batteries	Lbs	360	1.07%

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			am, and was there until almost 10:00 am, teaching participants to set up the car wash kit to protect runoff from entering the street or storm drain. The event went on until after 3:00 pm. WVCWP used about 400 ft. of hose and 300 ft. of extension cord. The car wash kit worked extremely well, but it was difficult to set up. Photos were taken which can be used for future classroom presentations. Approximately 35 volunteers participated and saw the Car Wash Kit in use. The Car Wash was sponsored by employees of Advanced Medical Center. Materials handed out: --"Washing Cars and Other Vehicles", --"Cars Pollute Water Too!" --"Residential Car Washing" cards.	
Vehicle Washing Operations	CB-1	Put Car Wash Kit information and proper car washing instructions on WVCWP web site.	The WVCWP website Home page was modified to include a car washing graphic and text. These graphics are links to a PDF of the WVCWP Car Wash Kit flyer which requests car wash event organizers to contact WVCWP. The flyer also includes information on harmful effects of copper: http://www.cleancreeks.org/images_new/carwashweb.pdf	WVWCP staff
Vehicle Washing Operations	CB-1	Within the Planning permit process, require source control measures at facilities that will conduct vehicle/ equipment washing and maintenance activities (consistent with Permit Provision C.3.k).	The WVC did not have any Group 1 projects that would conduct vehicle/equipment washing and maintenance activities.	Planning Dir/ Sr. Planner

WEST VALLEY COMMUNITIES

FY 2005-2006 ANNUAL COPPER (and NICKEL) ACTION PLAN REPORT

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Vehicle Washing	CB-1	Promote improved car washing methods at auto businesses during inspections. Provide info on alternative arrangements for auto businesses with possible compliance problems.	The Stormwater Discharge Inspector distributes several vehicle washing pieces during pro-active inspections and in relation to any actual or suspected IC/ID incident. This means of outreach is very effective and the Inspector is able to answer questions and offer suggestions. One piece used is the WVCWP-created fact sheet, which provides information on wastewater capture systems for automotive facilities. The fact sheet was designed to provide small-scale automotive facilities (those that find installing a full-fledged wash rack cost-prohibitive) with examples of inexpensive treatment technologies and distributor information.	WVWCP ICID Inspector
Vehicle Washing Operations	CB-1	Maintain recommended source controls for vehicle washing at City corporation yard.	Municipal staff continues to follow the suggested practices and to ensure that the Corp Yard systems function correctly.	Pub Works Staff
Vehicle Washing Operations	CB-1	City staff will attend "Mobile Cleaning Workshop" or view training video to review Best Management Practices.	**Campbell:** On April 13, 2006, twenty nine (29) Campbell staff reviewed SWPPP procedures and received training on best management practices (BMPs). Staff viewed the pressure washing video "We Do the Job Right" for mobile pressure washing. John Iaquinto, Public Works Superintendent led the training.	WVWCP ICID Inspector / Pub Works Supt
Industrial Copper Control	CB-3	Continue Industrial Inspection program with Fire Dept., including NOI sites and other industrial sites such as plating and metal finishing facilities, vehicle service facilities, and other permitted sites.	The City has an agreement with the SCC Fire District to conduct urban runoff inspections for machine shops and metal manufacturing facilities. This year efforts were directed at re-negotiating municipal contracts with the SCC Fire District, which was due to expire at the end of FY 05-06. Many meetings were held to ensure that future contracted inspections would provide the	SCVC Fire Dept./ WV ICID Inspector

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			type of inspections, and related data, necessary for the Stormwater programs. See *IND Section* for inspection details.	
Reducing Traffic Congestion Promoting Alternative Transporta-tion	CB-6/7	Within the Planning permit process encourage and promote best practicable transportation-related design practices and alternative modes of transportation.	The WVC encourage best design practices wherever practicable. These small communities tend not to have large developments conducive to requiring alternative transportation within the permitting process. However, the WVC encourage alternative transportation through other means: Campbell now has 3 stations for Light Rail service linking the City to stops throughout Santa Clara Valley. Service started this FY in August 2005. The City Redevelopment Agency was actively involved in this project. Los Gatos has a project that provided bike racks throughout the commercial campus and bike lockers and shower facilities for employees who will ride their bikes to work at the Netflix HQ bldg (HQ bldg houses approx. 200 employees). The City of Saratoga has been investigating development of a 'rails to trails' project along a Southern Pacific Railroad corridor. The City has held public hearings on the proposal but a resolution has not been reached. The City website encourages biking through its "Bikeways" map, showing where striped bike lanes exist, and classifying bike routes according to safety.	Planning Dir. / Sr. Planner
Reducing Traffic Congestion	CB-6/7	Continue to incorporate and support "Best Practices for Integrating Transportation and Land Use" as documented in the VTA's 2003 Community Design &	These elements remain in the WVCs' General Plans and serve as guiding principles for their Land Use and Transportation development.	Traffic Engineer

		Transportation Manual.		
Watershed assessment and protection	CB-8	Implement agreed-upon guidelines & standards developed by the Water Resources Protection Collaborative for watershed protection.	Campbell, Los Gatos and Saratoga have participated in, and invested significant staff time in, the Water Resources Protection Collaborative. All of the West Valley cities have reviewed the "Guidelines and Standards for Land Use Near Streams" and plan to use them in their permitting process.	Planning Dir
Street sweeping & stormdrain O&M	CB-11	See Street Sweeping section (3.B) of this work plan for tasks on data collection and evaluation.		
Street sweeping & stormdrain O&M	CB-11	Implement (as appropriate) identified improvements to current street sweeping and storm drain system O&M programs (within available budgets). Meet with WVSD for stormdrain O&M evaluation.	See Street Sweeping in Public Agency Activities section of this report.	Pub Works Supt. with WVCWP guidance
Outreach on pool, spa maintenance	CB-12	Continue to distribute pool & spa maintenance brochure via agency department counters and public places. As time permits, update WVCWP website with current Pool & Spa maintenance information.	WVC ordered an additional 500 Pool brochures for distribution at Planning & Bldg Dept counters. Municipal staff will provide the brochure to new pool and spa owners. The brochure is also distributed at community events. (see PI/P section *B. WVCWP Joint Projects – a. distribute materials*)	WVCWP with Municipal Staff
Outreach on pool, spa maintenance	CB-12	Continue to distribute pool & spa brochures as part of ICID WVC inspections.	The Inspector provides pool and spa brochures to residents and pool and spa companies as part of his IC/ID Inspection Program.	WV Inspector

WEST VALLEY COMMUNITIES

FY 2005-2006 ANNUAL COPPER (and NICKEL) ACTION PLAN REPORT

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Use of architectural copper	CB-21	Within the Planning permit process, discourage use of copper roofing and gutters.	All WVC discourage copper architecture, with the exception of Los Gatos.	Planning Dir/ Sr. Planner
Nickel Action Plan Tasks				
Control nickel discharge from construction sites	NB-1	Sediment Control: Continue to implement Construction Inspection Performance Standards (see Construction Inspection work plan section).	See Construction section of this report.	Bldg Official/ WVC-ICID Inspector
Control nickel discharge from construction sites	NB-1	Training: Continue to have inspectors attend Regional Board/Program workshops on construction site management and learn latest erosion/sediment control techniques	Campbell hosted the Construction Site and Erosion Control workshop at the Campbell Community Center on Dec 8th & 9th 2005. The WVCWP Mgr, WVCWP Inspector attended for the West Valley communities, and spoke at the workshop about the need for field staff to report any observed sediment discharges to the WVCWP for follow-up.	Bldg Official/ WVC- ICID Inspector

Copper/Nickel Action Plan Evaluation

Car Wash Outreach Evaluation:

Car Washing has been highlighted on the WVCWP home page, the Car Wash Kit flyer was also sent as a PDF to Fire Dept inspectors at their request. The Fire Dept inspects the West Valley industrial and Commercial facilities, and reports incidents in residential areas if they happen to see any violations while out in the field. WVCWP would like to have an all-inclusive, educational copper brochure, which would include car washing, architectural copper and pool draining in one piece. However, the WVCWP has not had the staff or resources to create something like this that would be appropriate for distribution and mailing to residents.

Pool and Spa Brochures:

Each of the West Valley communities (except Monte Sereno) ran out of Pool and Spa brochures and ordered 150 to 200 more to give out at the planning counter and to all new pool and spa owners. WVCWP Pool brochures were sent out to all pool and spa owners during the previous year.

Educational Outreach Evaluation:

The WVCWP will continue to provide outreach on car washing, vehicle maintenance, alternative transportation, and pool maintenance during in-class

WEST VALLEY COMMUNITIES

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
presentations and outreach at community events. WVCWP incorporated messages about activities that can prevent copper runoff as part of the new Kindergarten and 4th grade Enviroscape curriculum, and as part of its Enviroscape presentations at community events. These presentations have been successful in raising interest in the proper car-washing and pool & spa maintenance. Staff has found that children seem especially receptive to the information about copper and car washing when they participate in the Enviroscape activity. **Street Sweeping:** The WVC continued their street sweeping programs and tracked and reported annual street sweeping data to the Program. The City of Saratoga highlighted street sweeping with a postcard which was sent to all city households. The sweeping company created a color postcard announcing its new contract with the City. The card stressed the importance of street sweeping, provided a map of routes with schedules and asked that cars be moved before 6am on the day of street sweeping. Street sweeping has become very important to residents. If the streets are not swept on schedule City or Town staff receive phone calls to register complaints. The Town of Los Gatos had a resident call on the Fourth of July because it was the regularly scheduled day to sweep but the sweeper did not show up.

TRASH INVENTORY & MANAGEMENT

FY 2005-2006 Work Plan Self Evaluation Matrix

Source	WPActivity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Trash Work Plan	Strategy	Assist Program staff, by participation in Trash Ad Hoc Task Group, in developing a long-term strategy for trash conditions in urban streams and waterways.	The West Valley Clean Water Program Mgr attended the Trash AHTG meetings and provided comments from West Valley Cities. Accomplishments this year included fine tuning electronic reporting forms for KAB drive by monitoring of existing problem areas; revised Urban Rapid Trash Assessment procedures and tally form for categorizing data and determining trends and future management actions.	WVCWP Mgr to attend AHTG and discuss with municipal Reps at WVCWP monthly meetings
Trash Work Plan	Identify and Prioritize Problem Areas	Identify and prioritize management of potential sources that may contribute to trash problem areas in a subset of urban streams and waterways	During FY05-06 all West Valley trash problem areas were monitored (see Trash Problem Area Evaluation Results table attached). Management actions were implemented and evaluated to see what more could be done at specific problem sites. Saratoga's code enforcement officer visited businesses which back up to Saratoga Creek to discuss an illegal dumping problem. WVCWP organized a student-parent participation cleanup event at the Saratoga Creek problem site. WVCWP Mgr contacted Caltrans Assistant Stormwater Coordinator (District Four) about working together to resolve a trash problem at Hwy 17 and Hamilton off ramp, where a new light rail station may have contributed to an increase in pedestrian littering. WVCWP took photos documenting the litter. Caltrans agreed to send a crew out to clean up the site. WVCWP and Caltrans will continue to consider ways to reduce trash at this site.	Sr. Civil Engineer/ Public Works Supt, WVCWP staff to assist

Source	WPActivity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			WVCWP presentations provided to students as part of the Enviroscape Activity feature a trash topic. WVCWP conducted three volunteer cleanup/trash monitoring events in partnership with local schools. Each event is opened with a brief talk on the trash problem facing our creeks and Bay. Volunteers seem to be energized by the chance to make a difference. Two schools conducted trash cleanup events after their classroom presentations.	
Trash Work Plan	Evaluations	Conduct trash evaluations using the RWQCB Rapid Trash Assessment protocol (Version 7.0) and/or the KAB Litter index, in local trash problem areas. Continually revise identified trash problem area list as litter conditions change.	WVCWP staff conducted *Keep America Beautiful (KAB)* assessments at all identified problem areas in the West Valley Communities, for a total of 57 assessments. For details see the Trash Problem Area Activity Reports following this table. Campbell monitored 13 sites, conducting 20 KAB assessments and 3 RTA assessments. Los Gatos monitored 8 sites, conducting 11 KAB assessments. Monte Sereno monitored 5 sites, conducting 15 KAB assessments Saratoga monitored 4 sites, conducting 7 KAB assessments and 1 RTA assessment. One of the sites Saratoga listed as SA04 was actually in San Jose. Site SA04 will be replaced by another site in Saratoga, to be determined by monitoring results in FY06-07.	Campbell Stormwater Rep (Sr. Civil Engineer) and Public Works Supt. WVCWP to assist
Trash Work Plan	Management Practices	Continue identifying and implementing trash control measures, as appropriate, to address trash problem areas.	All West Valley sites were monitored this year. Several new sites were added to the list to be monitored (a couple to be cleaned) in FY06-07, based on documented accumulation of trash in new areas. Some problem areas are in Caltrans jurisdiction. In June 2006, the WVCWP Mgr called Caltrans about cleaning up Freeway on and off ramps in Campbell (Fwy17 & Hamilton).	Sr. Civil Engineer/ Public Works Supt. WVCWP to assist

Campbell ♦ Los Gatos ♦ Monte Sereno ♦ Saratoga

FY 2005-2006 ANNUAL REPORT

Source	WPActivity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Trash Work Plan	Report on Trash Mgmt Practices Implemented	Provide Program staff with City specific information on trash management practices implemented, using standardized reporting format.	Transferred the West Valley citizen participation monitoring data into RTA format for Program's annual report. The WVCWP conducted three trash monitoring events with student and citizen volunteers. The City of Campbell conducted one event on 4/8/06 using the WVCWP tally forms (summary sheets are included in this report for each monitored site). Volunteers were taught how to record and document trash types and quantities.	Sr. Civil Engineer/ Public Works Supt, with WVCWP to coordinate
Citizen Participation	Monitoring/Citizen Participation	Continue to promote citizen participation program to monitor trash in local creeks (element of Creek Keeper's Program).	**WVCWP** and the West Valley communities organized five large clean up events. "Clean A Creek" flyers (announcing the Westmont High cleanup) were distributed to 13 schools in Campbell Union School District for the Sept. 17, 05 event. Fifty (50) volunteers participated – see attached tally sheet for trash collected. **WVCWP** sent a notice to Westmont High for the PTA / daily e-mail bulletin to notify students at Westmont High School of the Clean Up on 5/20/06. Fifty (50) volunteers attended the spring event as well. **Saratoga** and WVCWP staff organized a student-parent participation cleanup event on April 1, 2006 at Saratoga Creek behind restaurants on Big Basin Way. Thirty eight (38) volunteers and staff picked up 38 bags of trash (weighed trash & recyclables totaled about 100 lbs.) Large items discovered included a file cabinet and a water heater which could not be removed by staff or volunteers. Water District (SCVWD) staff met with WVCWP staff and agreed to partner with the City on pick up of the larger items. The steep banks of the creek make retrieval of the items both unsafe and costly. Saratoga Code enforcement alerted businesses to the dumping problem and Saratoga Police started surveillance of the area. **Los Gatos & Monte Sereno** sponsored a successful *Stash the Trash* event on Saturday 10/15/05. Over 350 volunteers monitored and cleaned up trash. About 35 support staff	WVCWP Staff to coordinate

Source	WPActivity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			setup the event and provided breakfast to volunteers. Staff also joined the volunteers in picking up trash. Volunteers started at 9am with many finishing up as late as 2pm. A total of 396 bags (not all full) of trash were picked up. Trash included a bike and a shopping cart (which one team returned to Trader Joe's). Paul Michael at Waste Management garbage collection service provided a large dumpster for the trash. **City of Campbell** held a spring public cleanup event on April 8, 2006, which brought in 145 volunteers for three hours of trash monitoring and cleanup. Volunteers picked up trash from sides of streets, along the railroad tracks, near the creek trails, and from some off-path areas, etc. Approximately 600 lbs of trash and recyclables were collected.	
Citizen Participation	E-Waste Event	Continue to promote citizen participation.	WVCWP and municipal staff co-sponsored an E-waste collection event with Thomas Hogye, Vice President and General Mgr of United Datatech (UDT). UDT guaranteed that the E-waste would be recycled safely and would not be sent to foreign shores. The Town of Los Gatos provided a municipal parking lot as a collection site and municipal staff from two of the West Valley Cities worked the event. Before the event, local Los Gatos and Saratoga community newspapers printed a story about a TV set that was found in Los Gatos creek. A WVCWP ad for the event and the upcoming event. As a way of supporting a clean, healthy environment, two local businesses (Pizza My Heart & Le Boulanger) donated free breakfast and lunch for volunteers who worked the event. A total of 33,657 pounds of E-waste (consisting mostly of televisions and monitors) was collected	WVCWP and Municipal staff

Trash Inventory & Management Evaluation

Dumpster Area Inspections & Education for Local Businesses

The WVCWP Inspector checks the dumpster areas of most of the downtown restaurants in each of the West Valley communities for signs of illegal dumping or debris around open dumpster lids. He provides urban runoff education and IPM (pest management materials) as needed. His method of informal visits and issuing *notices to comply* has helped to reduce the amount of trash-related dumpster violations over the past three years.

Educational Outreach to Students and Teachers in Local Schools

WVCWP staff responded to every opportunity to talk about trash with students in FY05-06. The trash topic is always included in the classroom Enviroscape presentations. This year a Saratoga fourth grade class and their parents partnered with WVCWP to hold a cleanup the week after their classroom Enviroscape presentation; and in June, after a classroom presentation, a Los Gatos Kindergarten took a tour around the school to look for trash and pick up the litter they found. Teachers from both schools have said that they would like the same presentation for their classes next year.

Creek Keeper Events – Volunteer Participation - Trash Identification, Tallying & Pick-up

The WVCWP has been particularly successful (from 2003 to 2006) in recruiting student volunteers for creek cleanups and the task of conducting trash assessments. The WVCWP's method of trash assessment is similar to the RTA method except that it was designed to include trash types that are most often found in West Valley locations and to be simple enough for young students to use. This year data was collected at West Valley events and later transferred to the Program's Rapid Trash Assessment forms so that the monitoring completed by volunteers could be evaluated with other Program data. During FY06-07 WVCWP staff will revise the WVCWP tally forms so that all trash data collected by West Valley volunteers (Creek Keepers) can be submitted to the Program as RTA trash assessments.

General Evaluation

WVCWP staff has noticed that volunteers and on-lookers at local trash tracking and cleanup events show appreciation, enthusiasm and interest. Many people respond positively to getting rid of trash, and are surprised to find out that trash is a problem that may need to be addressed with permits and requirements. As clean up events recur every year and students and other residents volunteer, trash tracking and trash collection is likely to grow in popularity. According to social marketing techniques, to effect behavior change it is more productive to start by targeting the "green" audience for educational outreach and support. "Green" refers to the population that is willing and ready to support the idea and may already be taking some of the desired steps. The "green" audience will grow in numbers as the marketed idea becomes acceptable to a wider population. As acceptance prevails, the "brown" audience (those who are resistant to accepting the change) will be swept into some positive behavior changes by peer pressure. WVCWP is targeting two green audiences for awareness. Most of the volunteers that attend clean ups are part of the "green" population. Besides reaching out to volunteers, WVCWP aims to reach students and make water pollution prevention concepts fun. The students are also a "green" audience because they easily receive and remember what they hear and see and often take the message home or share it with friends. WVCWP cleanup events and classroom presentations have been very successful in helping to change local students' and residents' perspective on trash. In FY06-07 these events will be conducted as often as West Valley budget and staff time will allow.

NEWS

Families clean up the creek

The Saratoga Creek Clean-up Project, sponsored by the city of Saratoga and the West Valley Clean Water Program, is an effort to get children and their parents more involved in the community and the environment. Families with young children are invited to pick up litter from the banks of the Saratoga Creek on April 1 from 10 a.m. to noon. Supplies and snacks will be provided.

Participants will clean up the creek behind downtown businesses between Fourth Street and Highway 9.

A maximum of 30 children can participate, so parents should call to reserve a space.

To participate in the event or for more information, email Sue Persico at persico16@comcast.net, or call 408.867.7323.

September 5, 2006

Mr. Bruce Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: Milpitas Urban Runoff Program
FY 05-06 Annual Report

Dear Mr. Wolfe:

This report is submitted by the City of Milpitas, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water National Pollution Discharge Elimination System (NPDES) Permit (Order No. 01-024). The report summarizes activities performed during FY 05-06 in accordance with the Milpitas Urban Runoff Management Plan (URMP) submitted to the Regional Water Quality Control Board (RWQCB) on March 1, 2005, and the performance standards contained therein. Responses to RWQCB comments on the FY 04-05 Annual Report (July 26, 2006 letter) have been also be included in this Report.

Contents of Report

The goals of this Annual Report are to: 1) document implementation of our FY 05-06 Work Plan during the past fiscal year, 2) evaluate program results for continuous improvement, and 3) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

1. Certification Statement
2. IC/ID Elimination Activities
3. Industrial/Commercial Discharge Control Program
4. Public Agency Activities
    - Public Streets, Roads & Highways O & M, Corp Yard
    - Rural Roads Public Works O & M
    - Storm Drain O & M
    - Water Utility O & M
    - Other Public Agency Activities (parks, ponds etc.)
5. New Development Planning Procedures
6. New Development Construction Activities
7. Public Information and Participation
8. Pest Management Activities
9. Mercury Pollution Prevention Activities
10. Copper Action Plan
11. Nickel Action Plan
12. Trash Inventory and Management
13. Staff Training Summary Table

14. Appendix: Acronyms
15. Response to the Regional Board comments on FY 04-05 Annual Report

Each activity contains a Self-Evaluation Matrix. Many activities have additional, information, including evaluation comments which describe its accomplishments, highlights and effectiveness, and any additional support information.

Main highlights, accomplishments, and observations in FY 05-06:

- The City has amended its Municipal Code to reaffirm enforcement authorities in January 2006.

- The City has developed a Construction Inspection Enforcement Response Plan. This Plan includes newly developed documents such as Construction Inspection Site Visit Enforcement Process Flow Chart, Urban Runoff Contractor Acknowledgement, Notice of Non-Compliance, Stop Work Notice, Emergency Contractor Time and Materials Form, Deficiency Notice, and updated SWPPP Checklist.

- The City has trained its staff on this new Response Plan and other C3 requirements.

- The City has revised contract document specifications to strengthen contractor requirements to perform in compliance with proper urban runoff practices, and to allow the City better tools to enforce contractor compliance with the specifications.

- The City amended the Open Space and Environmental Conservation Element to include more details to bring the plan into conformance with the Permit.

- The City is preparing a list of pre C.3 sites with permanent BMPs. An inspection program will utilize this list to insure that the BMPs are properly maintained over time.

- The City updated its Stormwater C.3 Guidebook in October 2005.

- The City has begun implementation of Group 1 and Group 2A projects pursuant to Permit requirements.

- The Shopping Center Task Force has been successful in assisting restaurants to implement BMPs.

Other accomplishments – Even though Midtown and the N. Main Street Development Projects were deemed complete prior to the relevant implementation dates of C3 requirements, City is still conforming to C3 principles to the extent practical, along with BMPs and SWPPPs. For example the top floor of the parking garage would normally drain into the City storm drain system. However, the entire runoff from the top deck will be directed into a bio-swale along the east edge of the site. Most of the storm water runoff including the initial storm water flow, which tends to be the dirtiest, will be slowed down and filtered through vegetation, grasses and permeable soil prior to entering the pipeline and storm system. Storm drainage from the Library roof will be similarly routed to a bio-swale prior to introduction into the storm system.

Other parts of the project have removed impervious pavement and structures covering nearly 100% of the site, (all of which was recycled to the extent practical) allowing the final project to have more planted areas and more pervious area.

The City has accomplished several important tasks this year. In conclusion, City has trained and kept vigilant to prevent storm water pollution prevention and promote best management practices.

If you have any questions regarding the materials submitted, please contact Paramjit Uppal at (408) 586-3351 or me at (408) 586-3347.

Very truly yours,

Marilyn Nickel

	with restaurants	page H-7	with owners of food facilities to educate operators.	years ago to inspect and meet major retail food stores and restaurants in shopping centers. The Task Force has been declared successful and has moved into the second phase, which is periodic inspection and handing out outreach materials as needed. The Fire Department Inspectors continue to inspect restaurants with grease interceptors every 3 years.		(Darryl Wong, Code Enforcement (Gloria Anaya), Fire Dept. (Patti Joki))
H-6	Effectiveness Evaluation	URMP page H-7	Conduct annual evaluation of the effectiveness of the program	See Evaluation text.	Ongoing	Fire Department (Patti Joki)/ Aparna Chatterjee
H-7	Record Keeping/Reporting	URMP page H-7	Document and report IC/ID incidents using descriptive categories. Maintain records for reporting.	Staff maintains records by completing the Standard Incident Reporting Form. ICID incident reports were submitted electronically to the Program. Reports are also submitted to the RWQCB with the Annual Reports.	Ongoing	Fire Department (Patti Joki)/ Aparna Chatterjee

Evaluation - ICID Elimination Activities

City staff, primarily through the Fire Department (quick response), Building and Engineering Divisions responded to all reported ICID incidents. A summary of ICID incidents is provided in the attached ICID Enhanced Reporting Form. It categorizes each incident under the standard incident types.

All restaurants in Milpitas are inspected every three years by the Fire Department. The last inspection was in FY 05-06. For the next two years, restaurants will be inspected only on the basis of complaints or report of spills. The next inspection is due in 08-09.

The City of Milpitas responds to all the incidents that are reported. Outreach for proper disposal of applicable materials, including vehicle fluids, is provided to the public in all appropriate circumstances. The annual HazMat and Industrial/Commercial inspections, coupled with education and outreach has led to better understanding of ICID elimination activities. In FY 05-06, only 12% of the incidents were caused by illegal dumping or illicit connections. The majority of the incidents, about 88% were due to water line breaks and leaks. We have also made special outreach efforts targeted towards the restaurants.

There were no comments from Regional Board on FY 04-05 Annual Report. The Regional Board has not issued comments on the 06-07 Work Plan.

City of Milpitas
FY 2005-2006 Illicit Connection and Illegal Discharge Report Summary (a) and (c)

ICID Incident Type (b)	Reporting Source					Incident Source								Location Date and Responsible Party	Enforcement Action						Comments
	City Inspector	Inter-Department	Other Agency	Citizen	Other	Resi.	Ind.	Com.	Auto Facility	Food Facility	Const. Site	Public Facility	Other/ Unknown		Verbal (d)	Warning (e)	Adm. (f)	Adm. W/ Penalty or Fine (g)	Criminal (h)	Referral for Enforcement (i)	
Tracking Soil	Ken Brown										x			595 E. Calaveras Blvd. Town Center, 11/11/05 Shapell Industries	x						Tracking soil and surface cleaning discharge in storm drain. Responsible party was directed to install all SWPPP and BMPs for the constrcution site.
Tracking Soil	Jimmy Dutton										x			S. Main St. and Great Mall Dr. 11/23/05 Shames Construction, Inc.		x					Observed construction worker washing down street with a 2" hose causing dirt and muddy water to reach catch basin. Responsible party was directed to cease activity immediately.
Tracking Soil	Don Ayres										x			South Abel St., Terra Serena Construction Site , 1/5/06 KB Homes				x			City inspector observed sediment-laden water being pumped around filtration system and directly into Penitencia Creek. Responsible party was directed to cease activity immediately.
Tracking Soil	S. Giadone										x			595 E. Calaveras Blvd. Town Center, 3/27/06 Shapell Industries				x			Mud and dirt tracked into street, insufficient catch basin protection, missing erosion protection, muddy water entering storm drain, stockpiles uncovered, no rock at ingress/egress, insufficient maintenance of concrete washout areas, failure to properly dispose of AC pipes. Responsible party was directed to follow all SWPPP and BMPs for the construction site.
Tracking Soil	x							x						1601 Dixon Road Newby Island Facility, 4/12/06 Allied Waste Industries		x					Dirt and mud tracked into street and washed into storm drain. Police officer reported it as traffic hazard. Responsible party was directed to clean up and will be installing permanent tire wash system.
Vehicle Equipment Leaking	Paul Inouye							x						136 Ranch Dr., 9/15/05 Antrius Trucking	x						Truck driver hit curb of loading dock and spilled fuel from the tank on the truck. 90 gallons of diesel went into the parking lot, loading dock and storm drain. Fuel was isolated at storm drain by Milpitas Fire. Contacted cleaning company for immediate cleanup from storm drain.
Sanitary spill or leak	Ken Brown									x				1620 Barber Lane 408 570 5470 Brandon's Restaurant	x						Manager agreed to pump out grease trap. Spill was contained from discharging into storm drain.
Misc. Incidents	Gerry Krize										x			Hillview Dr. and Calaveras Blvd., 11/9/05 Duplan Construction Inc.		x					Waddling was damaged due to vehicles entering and exiting site at unapproved locations. Contractor was directed to fence entire site to isolate entrance at approved areas only and replace damaged wadding.
Water Line Breaks	Steve Smith	x	x	x	x							x		throughout the City on various dates, 408 586 2600							A total of 42 service line breaks and 22 main line breaks happened during fiscal year 05/06. In each case where discharge occurred, we followed procedure to remove pollutants and protected creeks.
Saw cutting slurry discharge	Nancy Mendizabal										x			595 E. Calaveras Blvd. Town Center, 12/22/05 Shapell Industries				x			Observed slurry from a trench discharging into storm drain . Materials were tracked into streets on the rear site allowing muddy water to discharge into storm drain. Responsible party was directed to cease activity immediately.

All violations were corrected in timely manner and work was performed satisfaction to City inspectors.

(a) Categories conform to those requested by Program

(b) Incident types include only those which were reported for this period

(c) Reporting person's identity is not provided to protect confidentiality

d) Verbal warning providing information for corrective action

e) Written letter providing information for corrective action

f) Official letter describing requirements and consequences

g) Administrative Action with assessment of fines

h) Legal Action

i) Refer case to agency with enforcement powers

Evaluation - Industrial Commercial Discharge Control Program

During the past reporting period, the Hazardous Materials and Environmental Services Unit continued to implement its comprehensive inspection program. There are 452 permitted facilities that are included in the Fire Department's annual HazMat inspection program. Some of these 452 HazMat facilities, such as badminton court or cell phone towers, generally do not have urban runoff issues to report, and are inspected mainly for safety purposes. Fire Department's HazMat inspectors try to inspect most of the listed HazMat facilities at least once a year. However, due to staffing shortage and the steady increase in the number of new facilities every year, it is not always possible to complete the inspections strictly within the one-year time frame. Restaurants are inspected every three years. A total of 381 inspections were completed in FY 05-06. The inspection reports are summarized in the two attached Enhanced Reporting Forms.

The program's main emphasis is that of education and outreach to prevent illegal discharge. The Fire Department has been inspecting business for hazardous material code compliance since the early 1980's. The Urban Runoff requirements are in essence the same as many Fire Code regulations. Thus, businesses have been "conditioned" to use best management practices for many years. Further, owing to annual inspections, education and outreach, we have seen a remarkable increase in awareness regarding proper storage, transportation, use and disposal of applicable materials. There is also a growing awareness of the importance of protecting the Bay from unauthorized releases.

The inspection process identifies best management practice violations and allows time for compliance. All violations are followed-up and resolved. When the business responsible fails to comply, enforcement action such as issuance of administrative, civil or criminal citations is taken. If a severe violation is observed, such as materials disposed of into a storm drain, then a higher level of enforcement action, such as referral to the City or District Attorney, may be taken. For this past fiscal year, no citation actions were necessary.

There were no comments from Regional Board on FY 04-05 Annual Report. The Regional Board has not issued comments on the 06-07 Work Plan.

EVALUATION – PUBLIC STREETS, ROADS AND HIGHWAYS O& M

The City's contract street sweeping program is conducted by the Maintenance Division of the Public Works Department and funded by the Solid Waste collection program. Residential, arterial, and commercial street sweeping is conducted two times a month. Industrial street sweeping is conducted four times a month. Open space areas and mountain roads that have no curb and gutter are not scheduled for routine sweeping, but are swept on an as-needed basis. Each established sweeping route is swept on the same day of the week. Rural roads are not routinely swept but debris from rural roads is picked up twice a week. On Monday and Friday, debris from the rural roads and the main arterial roads are collected. The City's contractor promptly removes street sweeping material and disposes of nearly all the materials at the Newby Island landfill, and a significant amount of this material is taken to the compost area.

The City places emphasis on street sweeping in the period from early Fall into the Winter months until leaf fall has been completed. During November and December, three primary areas are swept weekly to remove leaves. This practice effectively removes leaves, debris, and other pollutants, which would otherwise be washed into the storm drain system. Additional City crew are called upon to assist in the Fall cleanup.

Since June 21, 2004, the sweeping contractor BFI, now known as Allied Waste Industries, has been doing the street sweeping operation. Statistics on street sweeping activities are kept in a database that is recorded daily by operators of the equipment, and summary reports are generated by the supervisor. The number of curb miles swept and the number of cubic yards of debris picked up are recorded. In FY 05-06, a total of more than 14,899 miles were swept. Debris, amounting to 5,216 cubic yards, was collected. The volume of debris did not include leaves removed. Leaf removal program is implemented in the winter months only.

The City's field crew are trained annually to look for BMP deficiencies in the field on a daily basis. Training is provided through Public Works Maintenance's Safety Program. Quarterly meetings are held to discuss BMP deficiencies and safety issues. BMP deficiencies are forwarded to the field employee's immediate supervisor and a service request is generated (record keeping and documentation) and directed to the appropriate department for resolution.

Milpitas has a highly effective street maintenance program. There are very few complaints. Most of the complaints are promptly responded to ensure customer and community satisfaction.

There were no comments from Regional Board on FY 04-05 Annual Report. The Regional Board has not issued comments on the 06-07 Work Plan.

City of Milpitas

EVALUATION – RURAL PUBLIC WORKS MAINTENANCE AND OPERATION

The rural roads are located in the hillside areas, on the eastern side of Milpitas. There are 138.9 miles of City streets, of which rural roads are only 1.9 miles. Rural roads occupy about 1.4% of the City's total street miles. Typically, open space areas and mountain roads that have no curb and gutter are not scheduled for routine sweeping, but are swept on an as-needed basis. Twice a week, Mondays and Fridays, debris is picked up by hand from the rural roads. These roads are not in the proximity of creeks. The dust swept by wind from these areas would typically accumulate in the City's valley floor areas, and would be removed during routine street sweeping.

The SCVURPP Program has established a definition for rural roads and provided guidelines on performance standard, BMPs and SOPs. The City has adopted the Rural Roads Performance Standard in the 04-05 Work Plan. Since rural roads constitute a very small portion of the City streets, most of the City's efforts are targeted towards maintaining an efficient maintenance and operations program for the City streets.

There were no comments from Regional Board on FY 04-05 Annual Report. The Regional Board has not issued comments on the 06-07 Work Plan.

Evaluation - Storm Drain Operations and Maintenance

- Staff from police, fire, and public works coordinated a recent update to the City's SOP 8-6 titled " Response and Clean-up Guidelines for Hazardous and Non-Hazardous Material Releases including Discharges of Pollutants into Storm Drains and Water Courses (Urban Runoff Pollution Prevention)".

- City staff has completed inspection and cleanup of the City's 78 outfalls and determined that ten needed repairs. Repairs of two were completed in FY 04/05 and remaining eight were completed in FY 05/06. City gain inspected all 78 outfalls in FY 05/06. Three needs repair and will be completed in FY 06/07.

- City staff performed the operation and maintenance tasks of the storm drain system; contractors were not used.

- Staff has not reported any problems with BMPS; no updates are planned at this time.

There were no comments by the Regional Board on the FY 04-05 Annual Report. The Regional Board has not issued comments on the 06-07 Work Plan.

CITY OF MILPITAS

Water Utility Operation and Maintenance – Self Evaluation Matrix

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2005-2006 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
D-1	Inventory	URMP page D-5	Conduct Inventory of all key O & M activities, and identify routine and unplanned non-storm water discharges from these activities.	Last inventory was completed on 9/99. Due to lack of resources, this task was not completed in FY 05/06.	6/07	Public Works Maintenance (Steve Smith)/ Marilyn Nickel
D-4	WUPPP Utility Maintenance SOP	URMP page D-5	Develop WUPPP Utility Maintenance SOP.	Staff performed routine maintenance as needed. SOP is about 75% complete and is scheduled to be finished by June 2007.	6/07	Public Works Maintenance (Steve Smith)/ Marilyn Nickel
D-6	Individualized Training Plan	URMP page D-5	Develop Individualized Training Plan.	Staff received annual training. SOP is about 75% complete and is scheduled to be finished by June 2007.	6/07	Public Works Maintenance (Steve Smith)/ Marilyn Nickel
D-7	Training	URMP page D-5	Develop training program.	Staff is trained quarterly on Water Utility O & M.	6/07	Public Works Maintenance (Steve Smith)/ Marilyn Nickel
D-8	WUPPP	URMP page D-5	Implement pollution control measures identified in the WUPPP to manage chlorine, biocides, and algaecides and prevent erosion and sediments.	Will implement WUPPP upon completion.	6/07	Public Works Maintenance (Steve Smith)/ Marilyn Nickel

Evaluation - Water Utility Operations and Maintenance

- Due to a shortage of staffing resources, we did not take the inventory of key discharges. It is now scheduled for completion by June 2007.
- Contractors were utilized to fix major water line breaks. The first priority is to stop the flow of water. There were no complaints about contractors not following BMPs to fix water line breaks.
- Staff has not reported any problems with BMPS; no updates are planned at this time.

There were no comments by the Regional Board on the FY 04-05 Annual Report. The Regional Board has not issued comments on the FY 06-07 Work Plan.

New Development Planning Procedures – Self Evaluation Matrix

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2005-2006 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
E-C.3b.1	Project approval process	URMP page E17	Assess current stormwater-related requirements in City's development review process, for public and private projects, and identify additional steps or tools required at each stage of the process to meet C.3. Provisions for permanent BMPs, tracking and documentation, inspection, and others.	• Consultant has updated planning intake forms for private projects to reflect new C.3 provisions. • The Milpitas C3 Guidebook 3rd Edition was adopted on October 6, 2005. • City has been implementing requirements for submitting NOI and SWPPP on project size one acre or more since March 2003. • City has provided a C.3 Guidebook to Project Applicants at planning kick-off meetings. • City has developed and implemented a process for entering Group 1 and Group 2 projects into tracking database.	Completed Completed Ongoing Completed and Ongoing Completed	Planning (Dennis Carrington) Utility Engineering (Paramjit Uppal) Land Development (Fariborz Heydari) Design & Construction (Doug DeVries) PW Inspections (Gerry Krize) Building Inspection (Ken Brown) Public Works (Steve Smith)
E-C.3b.2 and E-C.3c.2	Develop new or modify existing review procedures for Group1	URMP page E17 and E18	Develop new or modify existing review policies, procedures, and/or conditions of approval to incorporate Group 1 requirements (based on results of tasks under C.3.c. through C.3.m.)	The Group 1 and Group 2 requirements are shown in the C3 Guidebook. City is implementing C3 requirements for Group 1 and Group 2A and will start Group 2B on August 15, 2006.	Completed	Planning (Dennis Carrington) Utility Engineering (Paramjit Uppal) Land Development (Fariborz Heydari)

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2005-2006 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
E-C.3b.3	Train staff	URMP page E17 and E18	Train City staff in planning, building, and engineering departments on the C3 provisions and goals, the required changes in the approval process, and the use of appropriate tools.	Training sessions were held for relevant staff for the updated Milpitas Stormwater C.3 Guidelines after they were adopted in October 2005. See Staff Training Summary Table for details.	Completed	Planning (Dennis Carrington) Utility Engineering (Paramjit Uppal) Land Development (Fariborz Heydari) Design & Construction (Doug DeVries) PW Inspections (Gerry Krize) Building Inspection (Ken Brown) Public Works (Steve Smith) Fire Department (Patti Joki)
E-C.3b.4 and E-C.3c.3	Develop project approval process workplan and report progress	URMP page E18	Submit work plan for completion of Provision C.3.b. requirements. Identify incremental progress made toward completion of Actions b.1., b.2., and b.3. above in FY 02-03 Work Plan. (For example, completion of "Development Policies Comparison" work sheet.)	Existing policies, ordinances, guidelines have been reviewed to see what C.3 provisions are already covered. The 3rd Edition of the C.3 Guidebook was adopted in October 2005.	Completed	Planning (Dennis Carrington) Utility Engineering (Darryl Wong & Paramjit Uppal) Land Development (Fariborz Heydari)

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2005-2006 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
E-C.3.c.1	Develop Log form to identify Group 1 and Group 2 projects	URMP page E18	Develop and implement a procedure to request and log the type, size, and impervious area of every project (and extent of redevelopment if applicable) for determination of applicability of Group 1 (and later Group 2) requirements.	• City has been collecting impervious surface data from incoming projects since 4/02. • The City has a procedure to maintain a record of every Group 1 and Group 2 (as applicable) project. Staff began implementation of the procedure in 2005.	Completed Ongoing	Planning (Dennis Carrington) Utility Engineering (Darryl Wong & Paramjit Uppal) Design & Construction (Doug DeVries)
E-C.3.c.2	Define "deemed complete"	URMP page E18	Develop a method for determining whether a private project was "deemed complete" by 7/15/03, or documenting that a public project was funded and scheduled for construction by 10/15/03. Required by C.3.c (first paragraph)	City is implementing requirements using "deemed complete" trigger.	Completed	Planning (Dennis Carrington) Utility Engineering (Paramjit Uppal)
E-C.3.c.3	Develop Group 1 workplan and report progress	URMP page E18	Submit work plan for completion of Provision C.3.c. requirements. Identify incremental progress made toward completion of Actions c.1. and c.2. above, and other actions related to Group 1 implementation, in FY 02-03 Work Plan and Group 2 implementation, in FY 03-04 Work Plan. Required by C.3.c.i	The 3rd Edition of the C.3 Guidebook which outlines procedures for City staff and developers was adopted in October 2005.	Completed	Planning (Dennis Carrington) Utility Engineering (Darryl Wong & Paramjit Uppal) Land Development (Fariborz Heydari) Doug DeVries Building Inspection (Ken Brown)
E-C.3.c.4	Site design	URMP	Compile guidance being developed under	The 3rd Edition of the C.3 Guidebook was	Completed	Planning

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2005-2006 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
	guidance	page E19	other elements (i.e., project review procedures, site design measures, source control measures, numeric design criteria, O&M verification, etc.) into one guidance manual for implementation of Group 1 project requirements.	adopted in October 2005 which include requirements for Group 2A and Group 2B. The Guidebook assists developers and the City to conform projects to the C.3 requirements.		(Dennis Carrington) Utility Engineering (Paramjit Uppal)
E-C.3.c.5	Revise model Planning Procedures Performance Standards (PS)	URMP page E19	Revise portions of the model Planning Procedures Performance Standards to incorporate the Group 1 requirements and other C.3. requirements.	No changes were necessary to PS in FY 05-06.	Completed	Program Planning (Dennis Carrington) Utility Engineering (Paramjit Uppal)
E-C.3.c.6	Incorporate PS	URMP page E19	Incorporate revised model Planning Procedures Performance Standards in to local urban runoff management plans.	No changes were necessary to PS in FY 05-06.	Completed	Planning (Dennis Carrington) Utility Engineering (Paramjit Uppal)
E-C.3.c.7	Approach for evaluating an alternative Project size	URMP page E19	Develop approach for evaluating an alternative project size and identify data needs from Co-permittees.	Completed by the Program which resulted in Group 2 projects.	Completed	Program Planning (Dennis Carrington) Utility Engineering (Paramjit Uppal)
E-C.3.c.8	Analysis of alternative project size	URMP page E20	Conduct analysis of alternative project size and prepare proposal for submittal to Regional Board.	Completed by the Program which resulted in Group 2 projects.	Completed	Program Planning (Dennis Carrington)
E-C.3.c.9	Develop work plan for Group 2	URMP page E20	Update guidance manual and performance standards for Group 2 projects as needed.	C.3 Guidebook was updated in October 2005 to include Group 2 requirements.	Completed	Program Planning (Dennis

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2005-2006 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
						Carrington) Utility Engineering (Paramjit Uppal)
E-C.3.d.1	Analyze Rainfall data	URMP page E20	Analyze local rainfall data and develop area-specific volume and flow based design criteria (Program with assistance from SCVWD).	Provided support to Program as needed.	Completed	Program Utility Engineering (Paramjit Uppal) Land Development (Fariborz Heydari)
E-C.3.d.2	Develop guidance	URMP page E20	Develop guidance on appropriate criteria to use for each BMP type.	City has incorporated guidance on BMPs in C.3 Guidebook.	Completed	Program
E-C.3.e.1	Develop logging procedure for O & M verification	URMP page E20	Develop and implement a procedure for logging information about treatment BMPs installed at approved Group 1 projects, and for maintaining a list or database of properties, treatment BMPs, and responsible operators	The City's new computer program database went online in October 2005. Staff is using the database to log information about treatment BMPs installed for both Group 1 and Group 2 projects. All data necessary for O&M verification will be contained in the database. As needed, revisions may be made to the database throughout the year to enhance effectiveness.	Completed Ongoing	Planning (Dennis Carrington) Utility Engineering (Darryl Wong, Pam Lowe & Paramjit Uppal) Land Development (Fariborz Heydari) Design & Construction (Doug DeVries) PW Inspections (Gerry Krize)

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2005-2006 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
						Building Inspection (Ken Brown)
E-C.3.e.2	Develop model language for O & M verification	URMP page E21	Develop model language for documents assigning responsibility to the developer/owner of private projects for O&M of treatment BMPs, or to the appropriate agency for O&M of treatment BMPs at public projects. These documents may include O&M responsibility agreements, written conditions in sales/ lease agreements, use permit conditions, provisions in CC&Rs, etc.	O & M Agreements are addressed in the updated version of the City's Stormwater C.3 Guidebook. The Guidebook is available from the Planning Division, the Engineering Division, or via the City's website.	Completed	Program Planning (Dennis Carrington) Utility Engineering (Paramjit Uppal)
E-C.3.e.3	Adopt model O & M verification procedure	URMP page E21	Adopt model O&M agreement language to meet agency-specific needs and requirements and incorporate into the project review and approval process.	O & M Agreements are addressed in the updated version of the City's Stormwater C.3 Guidebook. The Guidebook is available from the Planning Division, the Engineering Division, or via the City's website.	Completed	Planning (Dennis Carrington) Utility Engineering (Darryl Wong & Paramjit Uppal)
E-C.3.e.4	Develop O & M requirements	URMP page E21	Develop fact sheets on the O&M requirements and frequencies for various BMP types that can be used to educate parties responsible for O&M and attached to O&M agreements. Include fact sheets for pesticide reduction measures related to landscape maintenance.	The City's updated Stormwater C.3 Guidebook references fact sheets contained in the Program's C.3 Stormwater Handbook. The 3rd Edition of the C.3 Guidebook was adopted in October 2005. The Guidebook assists developers and the City to conform their projects to the C.3 requirements. The Guidebook establishes BMP O&M requirements and verification procedures. The Guidebook is available from the Planning Division, the Engineering Division, or via the City's website.	Completed	Program
E-C.3.e.5	Develop inspection program for O & M verification	URMP page E21	Develop local programs for inspection of a subset of prioritized treatment BMPs to verify that proper O&M is being performed	Being developed in tandem with O&M data management effort. See E-C3.e.1.	FY 06/07	Utility Engineering (Darryl Wong

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2005-2006 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
			by the responsible party (Program to assist in defining which BMPs are priority for inspection.)	Planning Staff intern is developing a list of all pre C.3 permanent BMP installations for use in an ongoing inspection program.	10/06	& Paramjit Uppal) and Planning (Dennis Carrington)
E-C.3.e.6		URMP page E21	Report on the Co-permittee's treatment BMPs O&M verification program in each annual report, including organizational structure, evaluation of effectiveness, and planned improvement to the program. Include a list or summary of treatment BMPs inspected during the year, inspection results, and any required follow-up and correction.	No treatment facilities constructed to date. See E-C.3.e.4. The City's new computer database went online in October 2005 to coincide with Group 2 implementation. The database has a reporting component that will summarize treatment BMPs inspected during the year, inspection results, and any follow-up and correction.	FY 06/07 Ongoing	Planning (Dennis Carrington) Utility Engineering (Paramjit Uppal)
E-c.3.f.1	Prepare HMP	URMP page E22	Complete the HMP and required interim products (Program, SCVWD, and City of San Jose have lead role)	• The Regional Board adopted SCVURPPP HMP in July 2005.	Completed	Land Development (Fariborz Heydari), Program Utility Engineering (Darryl Wong & Paramjit Uppal)
E-c.3.f.2	Guidance to implement HMP	URMP page E22	Develop guidance to the Co-permittees on implementation of the HMP as part of requirements for Group 1 projects that may cause increased erosion or other related impacts.	Program to develop guidance (see f.1) City adopted its own C3 Guidebook on September 24, 2003 and updated it in October 2005 to add HMP requirements.	Completed	Program
E-c.3.f.3	Adopt HMP	URMP page E22	Upon adoption by the Regional Board, begin implementation of HMP requirements for Group 1 projects that may cause increased erosion or other related impacts. Before adoption, encourage early implementation of likely elements of the HMP where possible.	City updated its C3 Guidebook in October 2005 to include HMP requirements. HMP workgroup was reformed into a HMP Implementation Phase (HMI) in October 2005. Workgroup will focus on issues and needs of co-permittees and developers for implementing the HMP. City is participating as required.	Completed Ongoing	Land Development (Fariborz Heydari), Utility Engineering (Darryl Wong & Paramjit

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2005-2006 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
						Uppal)
E-c.3.f.4	Peak runoff limitation	URMP page E22	Evaluate potential regional treatment and/or flow control projects	Water District to evaluate this task with Program and City of San Jose assistance. City has completed a preliminary feasibility evaluation of its existing stormwater lagoons to determine if treatment capacities can be made available. Further evaluation is needed.	Completed, further review will be needed if City elects to proceed.	*SCVWD and Program Utility Engineering (Darryl Wong)
E-c.3.g.1	Model Waiver program	URMP page E23	Develop a model waiver program that includes (Required by C.3.g.iii - the legal requirements and mechanisms for implementing the waiver program - criteria for determining impracticability or unfeasibility (technical and financial) - method for evaluating the equivalency of the proposed mitigation criteria for participation in regional facilities requirements for logging project information for reporting purposes	City developed a local waiver program that was approved by the RB in June 2005.	Completed	Program's task Planning (Dennis Carrington) Utility Engineering (Darryl Wong & Paramjit Uppal)
E-c.3.g.2	Local waiver program	URMP page E23	Develop local waiver program, perform legal review, and incorporate waiver provisions in project review process. (If model program has not been adopted by Regional Board, develop interim waiver program per C.3.g.vi.)	City developed a local waiver program that was approved by the RB in June 2005.	Completed	City Attorney Utility Engineering (Darryl Wong) Planning (Dennis Carrington)
E-c.3.g.3	Track information for granted waivers	URMP page E23	Begin tracking information for reporting on waivers granted, including project name, location, type, percent impervious surface, reasons for and terms of waiver, and the alternative benefit project and completion date.	No projects for waiver were requested in FY 05-06.	Completed.	Planning (Dennis Carrington) Utility Engineering (Darryl Wong, Pam Lowe)
E-c.3.h.1	Alternate	URMP	Develop an internal procedure to allow	Requirements for alternative compliance	Completed.	Planning

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2005-2006 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
	compliance	page E24	alternative compliance.	have been included in Stormwater C.3 Guidebook. Consultant has prepared a procedure for alternative compliance.		(Dennis Carrington) City Attorney Utility Engineering (Darryl Wong)
E-C.3.j.1	Develop site design guidance	URMP page E24	Develop and submit a detailed work plan and schedule for review, revision, and implementation of revised site design standards and guidance.	City staff participated on Ad-Hoc committee to develop Site Design Guidance. The 3rd Edition of the C.3 Guidebook was adopted in October 2005. Step 3 of Chapter 3 of the Guidebook addresses Design to Minimize Imperviousness through cluster development, optimizing the site layout, minimizing directly connected impervious area, detaining and retaining runoff throughout the site and through documentation of design.	Completed	Program Planning (Dennis Carrington) Utility Engineering (Paramjit Uppal)
E-C.3.j.2	Adopt site design guidance locally	URMP page E24	Review existing local design standards and guidance, and compare them to the list of areas to address in Provision C.3.j. and other references such as "Start at the Source" and the "Development Policies Comparison" work sheet. Prepare and submit an analysis of local standards, identified opportunities for revision, and proposed revisions.	The 3rd Edition of the C.3 Guidebook was adopted in October 2005. Step 3 of Chapter 3 of the Guidebook addresses Design to Minimize Imperviousness through cluster development, optimizing the site layout, minimizing directly connected impervious area, detaining and retaining runoff throughout the site and through documentation of design.	Completed	Planning (Dennis Carrington) Utility Engineering (Paramjit Uppal)
E-C.3.j.3	Site design guidance	URMP page E25	Oversee completion of and work with the BASMAA work group on the BASMAA project "Using Start at the Source to Comply with Development Standards", which will evaluate how site design measures can be used to meet the numeric design standards in Provision C.3.d.	City staff participated on Ad-Hoc committee to develop model documents. The analysis of the City design standards were submitted to the Program in September of 2003. The 3rd Edition of the C.3 Guidebook was adopted in October 2005. Step 3 of Chapter 3 of the Guidebook addresses Design to Minimize Imperviousness through cluster	Completed	Program

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2005-2006 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
				development, optimizing the site layout, minimizing directly connected impervious area, detaining and retaining runoff throughout the site and through documentation of design.		
E-C.3.j.4	Incorporate Site design guidance into local project approval process	URMP page E25	Incorporate any revised standards and guidance into local project approval process and "fully implement" the revised standards and guidance.	The results of b.2, together with b.1, c.4, c.7 & j.2 were incorporated into the 3rd Edition of the C.3 Guidebook, which was adopted in October 2005.The Guidebook, in Step 3 of Chapter 3 addresses Design to Minimize Imperviousness through cluster development, optimizing the site layout, minimizing directly connected impervious area, detaining and retaining runoff throughout the site and through documentation of design.	Completed	Planning (Dennis Carrington) Utility Engineering (Paramjit Uppal) Land Development (Fariborz Heydari) D & C (Doug DeVries)
E-C.3.k.1	Revise existing PS to include Source Controls requirements	URMP page E26	Revise the current Planning Procedures Performance Standard to include source control requirements (complete as part of Action c.5.). Develop a model list of source control measures (in the form of conditions of approval), based on existing lists used by Co-permittees, examples in Provisions C.3.k. and other references, and include the list as an attachment to the revised performance standard. Products, Required by C.3.k (last paragraph): -- Draft conditions of approval for source control measures - 9/15/02 -- Model revised performance standard – 3/1/03	The revised Guidebook addresses source control requirements in Chapter 3, Step 6 and provides a model list of source control measures in Appendix C including those that must be designed into the project at the outset, and those that comprise operational BMPs activities to be conditioned upon project approval.	Completed	Program
E-C.3.k.2	Revise existing PS	URMP page E26	Incorporate model revised Planning Procedures Performance Standard into local urban runoff management plans including effectiveness & evaluation.	Adopted above PS, and Source Control Measures are being implemented.	Completed	Planning (Dennis Carrington)

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2005-2006 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
E-C.3.k.3	Develop work plan to include Source Control	URMP page E27	Develop a work plan for and begin implementation of source control measures requirements by including appropriate conditions of approval in Group 1 projects. Report status and provide examples of application of conditions in annual reports.	• Began including Conditions of approval (COA) for "Source Control" (City already picks from BMP matrix for all projects). Also included in City's C-3 Guidebook. • Source Control Measures are being implemented and included in Special Conditions of Approval. Also included in City's C.3 Guidebook. • The 3rd Edition of the C.3 Guidebook was adopted in October 2005. The guidebook outlines requirements for submittal of a Stormwater Control Plan with Group 1 and Group 2 projects. Development proposals must incorporate BMPs into project design at the outset, instead of conditioning the project approval after basic project design was already completed. • Beginning 10/6/05, City started requiring submittal of a Stormwater Control Plan with planning application submittal for Group 2A projects, such as plan to incorporate BMPs into project design. In August 2006, City will impose same requirements for Group 2B projects as identified in the C.3 Guidebook. • City staff continues to include conditions of approval, including a condition that project construction plans incorporate the BMPs in the approved Stormwater Control Plan.	Completed Completed Completed Completed Ongoing	Planning (Dennis Carrington) Utility Engineering (Paramjit Uppal)
E-C.3.l.1	Review General Plan (GP)	URMP page E28	Review current GP policies related to water quality and watershed protection and incorporate additional policies as needed to implement C.3 requirements. Refer to	City updated its GP in fall of 2005 to incorporate the permit requirements.	Completed	Planning (Dennis Carrington) Utility

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2005-2006 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
			Provision C.3.l. for examples.			Engineering (Darryl Wong)
E-C.3.m.1	Review CEQA checklist	URMP page E28	Review CEQA initial study checklists and other environmental review documents and modify documents as needed to include questions that sufficiently address water quality impacts of projects (see example questions in Provision C.3.m.)	City, with consultant, reviewed CEQA checklist to address stormwater concerns; no revisions were made.	Completed	Planning (Dennis Carrington)
E-C.3.n.1	Reporting	URMP page E28	Provide information described in Table 1 of Provision C.3. in annual reports	The City's C.3 Guidebook incorporates the Table 1 (of Permit) requirements.	Provided in Annual Reports	Planning (Dennis Carrington) Utility Engineering (Paramjit Uppal) Fire Department (Patti Joki)
E-C.3.n.2	Data management	URMP page E29	Prepare summary of data to be collected to meet C.3. requirements and recommendations for data management (data base fields, stage in review process to request data, etc.)	The database is operational and staff has been trained. See Staff Training Summary Table for details.	Completed	Program
E-C.3.n.3	Reporting	URMP page E29	Collect and report the following for all new and redevelopment projects[1] that are required to meet C.3. Required by C.3.n.1 -- project name, location, type (per C.3.c.), size (ac. or sq. ft.), and impervious surface area. For redevelopment projects, include area of land disturbance.	These projects are shown on the Reporting Form for Significant Development (included in this section).	Annual Report 9/15/06	Planning (Dennis Carrington) Utility Engineering (Paramjit Uppal, Pam Lowe) Land Development

[1] Provision C.3.n. requires this information for all projects which meet the Group 1 and Group 2 definitions. Program staff request that Co-permittees consider collecting this information for all projects (and inform Program staff of their decisions), so that there is sufficient data to conduct the alternative project size analysis. As the approach to the alternative project size analysis is further developed, the data needs will be better defined and communicated to the Co-permittees.

						(Fariborz Heydari) Design & Construction (Doug DeVries) PW (Steve Smith)
E-C.3.n.4	Reporting	URMP page E29	Collect and report the following for all projects that must implement treatment measures: BMPs, site design, and source control measures used, sizing criteria, O&M responsibility mechanism and responsible party for C.3 projects.	These projects are shown on the Reporting Form for Significant Development (included in this section).	Annual Report 9/15/06	Planning (Dennis Carrington) Utility Engineering (Paramjit Uppal) Design & Construction (Doug DeVries)
E-C.3.n.5	Effectiveness Evaluation	URMP page E30	Collect information and report a summary of types of pesticide reduction measures required for C.3 development projects, and the percentage of projects for which pesticide reduction measures were required. (Model conditions of approval for pest resistant landscaping features and practices and a reporting format for pesticide reduction measures are being prepared as part of Actions VII.A.1. and VII.A.4. of the Program's Pesticide Management Plan. Co-permittees are to begin to consider pest-resistant landscaping and design features in the design, landscaping and environmental reviews of development projects in FY 02-03, per Pesticide Management Plan Action VII.A.2.) Required by C.3.n.iii (Model COA 6/02)	Started collecting data – 7/02 Group 1 and Group 2A projects will be reported in next Annual report.	Ongoing	Utility Engineering (Marilyn Nickel) Land Development (Fariborz Heydari) PW (Steve Smith)

Evaluation – New Development Planning Procedures

The Planning, Engineering (Land Development, Design and Construction, Utility Engineering), and Building Divisions have coordinated to integrate the C.3 provisions into the City approval procedures. The City updated its Stormwater C.3 Guidebook in October 2005 to update O & M verification, Hydromodification, Group 2 definition and the waiver program. Staff also updated the Open Space and Environmental Conservation Element as follows:

4.4 Water Quality and Conservation
For water supply, see Section 2.6: Public Utilities and Services.

Urban Runoff (Stormwater) Pollution Prevention

Urban runoff to Bay area creeks and San Francisco Bay contains pollutants that impair aquatic life. Bay fish contain elevated concentrations of mercury, PCBs, and other pollutants harmful to human health.

The California Regional Water Quality Control Board for the San Francisco Bay Region (Water Board) is responsible for enforcing the state's Porter-Cologne Water Quality Act and the Federal Clean Water Act. The Water Board's *Water Quality Control Plan* (Basin Plan) identifies beneficial uses of San Francisco Bay and its tributaries and sets forth criteria and programs for protection of beneficial uses.
The Water Board has issued National Pollutant Discharge Elimination System (NPDES) permits to Bay Area counties, water districts and municipalities. The permits mandate comprehensive programs to reduce urban runoff pollutants to the maximum extent practicable.

Milpitas, 12 other cities and towns in northern Santa Clara County, Santa Clara County, and the Santa Clara Valley Water District are Co-permittees under a single stormwater NPDES permit. The NPDES permit was issued in 1990 and reissued, with additional requirements, in 1995 and 2001.

Milpitas' *Urban Runoff Management Plan* details the City's comprehensive urban runoff pollution prevention program. To implement the plan, the City:

- Inspects municipal storm drains to eliminate illicit discharges and prevent illegal dumping.
- Inspects private industrial and commercial facilities and enforces requirements to implement Best Management Practices (BMPs) to reduce stormwater pollutants.
- Educates the public about stormwater pollution and prevention methods, and encourages public participation in program planning.
- Inspects construction sites and enforces requirements to implement BMPs to control erosion, sedimentation, and pollutants from construction activities.
- Requires applicants for development approvals to incorporate permanent pollution prevention measures into development projects.
- Advocates and employs Integrated Pest Management, an approach to pest management that relies on information about the life cycles of pests and their interaction with the environment. Pest control methods are applied with the most economical means and with the least possible hazard to people, property, and the environment.
- In cooperation with other agencies, monitors the occurrence and effects of stormwater pollutants in receiving waters.

The City has adopted Performance Standards for its pollution prevention activities. These Performance Standards are continuously improved, with an updated Performance Standard, or new Performance Standard, adopted each year.

Milpitas' *Urban Runoff and Watercourse Protection Ordinance* (Title XI, Chapter 16 of the Milpitas Municipal Code) expresses the City's authority to prohibit non-stormwater discharges to storm drains and to require residents and businesses to implement BMPs.

The 2001 reissued permit added more stringent requirements (Provision "C.3") to control runoff and runoff pollutants from new development. Applicable projects[1] must include facilities to treat runoff before it is discharged from the site. The City is required to inspect these facilities and ensure that they are operated and maintained in perpetuity.

In addition, the reissued permit requires the City to manage increases in peak runoff flow and increased runoff volume where necessary to prevent accelerated erosion of creek beds and banks.

In September 2005, the Milpitas Planning Commission agenda included the revision of the *Stormwater C.3 Guidebook* (adopted in September of 2003) to guide staff and applicants when implementing the new requirements.

Water Conservation

Prompted by the recent drought and water shortages, the City in 1993 adopted a Water Efficient Landscapes Ordinance and in 1994 adopted the Water Conservation Ordinance. The Ordinance seeks to promote conservation and efficient use of water by restricting new and rehabilitated landscaping for public agency projects, private commercial and industrial projects, and common-area landscaping in single-family and multifamily subdivisions and planned unit developments to maximum applied water allowances. It also requires preparation of landscape documentation packages for new and rehabilitated landscapes.

Recycled Water

The City of Milpitas desires to conserve potable water supplies and encourages the use of recycled water for appropriate uses. Potable water shall not be used for irrigation if recycled water is available except as specified in the City Municipal Code.

---

[1] Beginning October 15, 2003, the C.3 requirements are applied to projects that add or replace one acre or more of impervious surface. On or before October 20, 2005, the City will implement Group 2A which consists of an impervious area of 10,000 square feet on sites with a gas station, auto wrecking yard, loading docks and surface parking lots containing more than 10,000 square feet or more of impervious surface area, and vehicle or equipment maintenance areas, outdoor handling or storage of waste or hazardous materials, outdoor animal care, outdoor horticultural activities, and various other industrial and commercial uses where potential pollutant loading cannot be satisfactorily mitigated through other post-construction source control and site design practices. All other developments with impervious areas of 10,000 square feet or more will be required to implement C.3 requirements in accordance with the City's NPDES Permit. On or before August 15, 2006, this threshold is reduced to 10,000 square feet of impervious surface for all sites.

Guiding Principles

4.d-G-1. Assure reasonable protection of beneficial uses of creeks and South San Francisco Bay, and protect environmentally sensitive areas.

4.d-G-2. Comply with regulatory requirements pertaining to water quality.

4.d-G-3. Continuously improve implementation of stormwater pollution-prevention activities.

4.d-G-4. Mitigate the effects that land development can have on water quality.

4.d-G-5. Protect and enhance the quality of water resources in the Planning area.

4.d-G-6. Promote conservation and efficiency in the use of water.

Implementing Policies

4.d-P-1. Implement a comprehensive municipal stormwater pollution-prevention program in compliance with requirements of the Water Board's stormwater NPDES permit.

4.d-P-2. Minimize the use of pesticides that may effect water quality.

4.d-P-3. Work cooperatively with other cities, towns, and the Santa Clara Valley Water District to comply with regulations, reduce pollutants in runoff, and protect and enhance water resources in the Santa Clara Basin.

4.d-P-4. Where consistent with other policies, preserve, create, or restore riparian corridors and wetlands. Where possible, set back development from these areas sufficiently to maximize habitat values.

4.d-P-5. Where feasible, conform developments to natural landforms, avoid excessive grading and disturbance of vegetation and soils, retain native vegetation and significant trees, and maintain natural drainage patterns.

4.d-P-6. Where possible, avoid new outfalls to natural or earthen channels.

4.d-P-7. Applicable projects shall minimize directly connected impervious area by limiting the overall coverage of paving and roofs, directing runoff from impervious areas to adjacent pervious areas, and selecting permeable pavements and surface treatments.

4.d-P-8. Applicable projects shall incorporate facilities (BMPs) to treat stormwater before discharge from the site. The facilities shall be sized to meet regulatory requirements.

4.d-P-9. Applicable projects shall control peak flows and duration of runoff where required to prevent accelerated erosion of downstream watercourses.

4.d-P-10. Projects accommodating outdoor activities, including work areas, storage areas or other areas that are potential sources of stormwater pollutants, shall incorporate measures to control those pollutant sources to the maximum extent practicable.

4.d-P-11. Owners and operators of stormwater treatment facilities shall maintain those facilities and ensure they continue to be effective.

4.d-P-12. Construction sites shall incorporate measures to control erosion, sedimentation, and the generation of runoff pollutants to the maximum extent practicable. The design, scope and location of grading and related activities shall be designed to cause minimum disturbance to terrain and natural features. (Title II, Chapter 13 of the Municipal Code includes requirements for control of erosion and sedimentation during grading and construction.)

Required Actions

Milpitas Urban Runoff Management Program
(Details of implementation are in Title XI, Chapter 16 of the Municipal Code and in the Milpitas Urban Runoff Management Plan.)

4.d-A-1. Inspect commercial and industrial facilities and require BMPs.

4.d-A-2. Conduct surveillance and enforcement to reduce illegal dumping to storm drains.

4.d-A-3. Implement BMPs to minimize runoff pollutants during operation and maintenance of streets, roads, storm drains, and water supply mains and facilities.

4.d-A-4. Inspect construction sites and require erosion and sedimentation control and pollution-prevention BMPs.

4.d-A-5. Publicize and promote Integrated Pest Management and use Integrated Pest Management in maintenance of City parks and other facilities.

4.d-A-6. Update the Urban Runoff Management Plan as required in accordance with the Water Quality Control Board's Stormwater NPDES Permit.

Cooperative Efforts to Protect and Enhance Water Quality

4.d-A-7. Support and participate in the Santa Clara Valley Urban Runoff Pollution Prevention Program (SCVURPPP). Through SCVURPPP, support regional organizations and efforts, including the Bay Area Stormwater Management Agencies Association, to monitor and protect water quality in San Francisco Bay and its tributaries.

4.d-A-8. Coordinate with the Santa Clara Valley Water District to plan and implement multi-objective projects to reduce flood hazards, restore stream functions, and provide recreational resources along Berryessa Creek and other Milpitas creeks.

Development Requirements
(Details of implementation are in Title XI, Chapter 16 of the Municipal Code, the Milpitas Urban Runoff Management Plan, and the Milpitas Stormwater C.3 Guidebook.)

4.d-A-9. Provide guidelines to help applicants comply with stormwater requirements for new development.

4.d-A-10. Require developers of applicable projects to submit, with application for planning and zoning approval, a Stormwater Control Plan detailing the required stormwater pollution prevention and flow control measures incorporated into the project.

4.d-A-11. Require developers of applicable projects to prepare and submit, prior to final approval of construction, a Stormwater Control Operation and Maintenance Plan detailing maintenance requirements and methods for the stormwater treatment and flow control facilities incorporated into the project.

4.d-A-12. When conducting environmental reviews of proposed projects, evaluate water quality effects and identify appropriate mitigation measures.

4.d-A-13. Adopt and revise public works standards to minimize the impacts of development on water quality, provided that the new standards would also be consistent with other City policies.

4.d-A-14. Allow access to sites for City inspection of stormwater treatment and flow control facilities.

Staff also participated in program-level C3 Ad Hoc Committees to assist in the process of development of C3 provisions such as O & M Work Group and, Hydromodification Management Plan and the Development Review Process Work Group.

City management has worked with other Co-permittees in the development of a Waiver Program to address site impracticability, smart growth projects, and redevelopment areas pursuant to the Community Redevelopment Law (Health & Safety Code 330000 et. seq.), affordable and senor housing projects and brownfields that was approved by the RWQCB in June 2005. A Smart Growth Project being pursued by the City is the proposed Milpitas Transit Area Specific Plan. The plan proposes a mixed-use Transit Oriented Development in close proximity to the future Montague BART Station and two light rail stations. The project will consist of 7,185 dwelling units, 800,000 square feet of office, 175,000 square feet of hotel and 500,000 square feet of retail.

The City has developed a database to incorporate the O & M verification program. With this database, the City will be able to track all projects with permanent BMPs and their status including an inspection schedule. City staff have been trained to use this database.

A City consultant has also reviewed and provided guidance for preliminary identification and analysis of stormwater management options for the City's Library expansion project in November 2004.

The City is diligently working on meeting C3 requirements.

Response to the Regional Board comments on FY 04-05 Annual Report can be found at the end of this Report. The Regional Board has not issued comments on the FY 06-07 Work Plan.

Additional Information – New Development Planning Procedures

BMP O & M Verification Program – C.3.e: As part of developing and implementing a program to verify that required treatment BMPs are properly maintained over the life of the project, the City has developed a database to track C.3 activities including the Operation and Maintenance Program. In this database, project information such as property address, contact person, responsible party, BMPs installed, BMPs maintenance and inspection frequency required etc. will be entered. The City will also develop criteria to inspect a subset of prioritized treatment measures for appropriate operation and maintenance on an annual basis.

The City has reviewed Program-provided examples of operation and maintenance-related ordinance, policy and agreement language and had formulated language for special conditions, O & M plans and agreements for incorporation into the City's project approval process. The approval process (for Private and Public Projects) is shown below (as requested by the Regional Board on their comments dated July 26, 2006):

C3 Procedure – Private Projects

Function	#	Activity	Description	Lead Section
Planning Approval	1	Inform applicants of C3 requirements	Provide forms: • C3 Data Form • C3 Waiver Form, if applicable. • C3 Alternative Compliance Form, if applicable.	**Planning**
	2	Receive application	Assign Permit # in database.	**Planning♥**
	3	Review applications for completeness	For projects with more than 1 acre (43,560 SF) of new impervious surface area (created, added, or replaced impervious surface, including roof area, streets, and sidewalk). New threshold of 10,000 SF became effective April 15, 2005.	**Planning♥**
	4	Assign conditions of approval for permanent urban runoff controls	Permanent controls to manage storm water volume and quality are mandated. These controls might include detention basins, infiltration areas such as swales, fossil filter inserts at catch basins, etc. To be required in accordance with Hydromodification Management Plan.	**Land Development Engineering♥**
	5	Assign conditions of approval for long-term O&M of permanent controls	a. City oversight to insure proper operation and maintenance occurs is mandated. b. Approve O&M Plan. (O&M Plan not required if project has received C3 waiver.)	**Land Development Engineering♥**

	6	Assign conditions of approval for other C3 elements	a. Pesticide reduction (choose plantings and design landscape to minimize use and runoff of pesticides) b. Source control (includes plumbing several areas to sanitary such as restaurant mat washing, trash enclosures, swimming pools, vehicle wash areas, fire sprinkler test water, etc) c. Site design (includes minimize land disturbance, minimize impervious surface area, minimum impact street and parking lot designs, downspouts to bubble-ups, microdetention at landscapes and cisterns).	**a. Planning♥** **b. Planning♥** **c. Land Development Engineering ♥**
	7	Plan check proposed permanent controls	Perform detailed plan check for hydrology, hydraulically-size detention basins and infiltration areas, fossil filter inserts, etc. Need coordination with SWPPP, erosion control plan, and grading plan. Verify conditions of approval in #4 are met. Plan check for conditions of approval in #5, may include review and recordation of CC&R for O&M responsibility. Plan check for conditions of approval #6a - pesticide measures. Plan check conditions of approval #6b - site design measures. Plan check for conditions of approval #6c - source control measures.	**Land Development Engineering♥**
Construction & Inspection	8	Inspect and accept installation of permanent controls	Inspect construction of detention basins, swales, fossil filter inserts, etc in accordance with plans. Grading, landscape and site drainage would also be inspected.	**Public Works Inspection♥**
Post-Construction	9	Long-term Permanent Controls O&M	Oversee and administer program to insure that controls are annually maintained. Develop and maintain a database, coordinate inspection, and follow up with enforcement issues.	**Utility Engineering♥**

	10	Perform annual inspections of permanent controls	Inspect a subset annually to insure they are operated and maintained appropriately. (Annual inspection not required if project has received C3 waiver.)	**Utility Engineering♥**
	11	Enforce O&M of permanent controls	Issue letters/citations to obtain compliance.	**Utility Engineering♥**
	12	Reporting	Report program status to RWQCB.	**Utility Engineering**

♥ Requires input into C3 PTWin database.

C3 Procedure – Public Projects

Function	#	Activity	Description	Lead Section
Planning Approval	1	Establish project requirements as part of project scope.		
	1a	Assign conditions for design including permanent urban runoff controls to project.	Permanent controls to manage storm water volume and quality are mandated. These controls might include detention basins, infiltration areas such as swales, fossil filter inserts at catch basins, etc. or offsite treatment. Hydromodification Management Plan.	**Design & Construction Engineering or Special Projects♥**
	1b	Assign conditions for long-term O&M of permanent controls to project.	c. City oversight to insure proper operation and maintenance occurs is mandated. d. Develop O&M Plan. (O&M Plan not required if project has received C3 waiver.)	**Design & Construction Engineering or Special Projects ♥**
	1c	Assign conditions for other C3 elements to project.	a. Pesticide reduction (choose plantings and design landscape to minimize use and runoff of pesticides) b. Source control (includes plumbing several areas to sanitary such as restaurant mat washing, trash enclosures, swimming pools, vehicle wash areas, fire sprinkler test water, etc) c. Site design (includes minimize land disturbance, minimize impervious surface area, minimum impact street and parking lot designs, downspouts to bubble-ups, microdetention at landscapes and cisterns).	**Design & Construction Engineering or Special Projects ♥**

	2	Complete application upon CIP approval by City Council	For projects with more than 1 acre (43,560 SF) of new impervious surface area (created, added, or replaced impervious surface, including roof area, streets, and sidewalk). Review for Waiver and Alternative Compliance. Include C3 provisions even if waiver applies. New threshold of 10,000 SF became effective April 15, 2005. Assign Urban Runoff Certification # in database. Complete forms: • C3 Data Form • C3 Waiver Form, if applicable. • C3 Alternative Compliance Form, if applicable.	**Design & Construction Engineering or Special Projects ♥**
	3	Plan check proposed permanent controls	Perform detailed plan check for hydrology, hydraulically-size detention basins and infiltration areas, fossil filter inserts, etc. Need coordination with SWPPP, erosion control plan, and grading plan. Verify scope of work items are met. Plan check for conditions of approval, may include review and recordation of CC&R for O&M responsibility. Plan check for conditions of approval - pesticide measures. Plan check conditions of approval - site design measures. Plan check for conditions of approval - source control measures.	**Design & Construction Engineering or Special Projects ♥**
Construction & Inspection	4	Inspect and accept installation of permanent controls	Inspect construction of detention basins, swales, fossil filter inserts, etc in accordance with plans. Grading, landscape and site drainage would also be inspected.	**Public Works Inspection♥**
Post Construction	5	Long-term Permanent Controls O&M	Oversee and administer program to insure that controls are annually maintained. Develop and maintain a database, coordinate inspection, and follow up with enforcement issues.	**Utility Engineering♥**
	6	Perform annual inspections of permanent controls	Inspect a subset annually to insure they are operated and maintained appropriately.	**Utility Engineering♥**

	7	Enforce O&M of permanent controls	Issue letters/citations to obtain compliance.	**Utility Engineering♥**
	8	Reporting	Report program status to RWQCB.	**Utility Engineering♥**

♥ Requires input into C3 PTWin database.

Site Design Measures Guidance & Standards Development – C.3.j: The City of Milpitas adopted a C.3 Guidebook in 2003 and updated it in 2005. The Stormwater C.3 Guidebook is designed for staff and developer use, outlining planning application submittal requirements, including Site Design Measures to meet development standards for stormwater quality. This Guidebook, which is placed on the city web site, references other standard supporting documents such as BAASMA's design guidance manual for stormwater quality protection Start at the Source electronically.

This Guidebook, in Step 3 of Chapter 3 addresses Design to Minimize Imperviousness through cluster development, optimizing the site layout, minimizing directly connected impervious area, detaining and retaining runoff throughout the site and through documentation of design.

General Plan – C.3.l: The General Plan was amended on January 17, 2006 to better implement the provisions of C.3.

Reporting – C.3.n: Please see attached "Development Projects Table".

Reporting Form for Planning Procedures Performance Standard - Summary Tables / Additional Information

Significant Development Projects1 Reviewed and/or Approved During July 1, 2005 – June 30, 2006

Project Name – D.R. Horton "Centria" condominium development	**Project Description - Multi – Story condominium building with internal parking structures**	**Project Type - Residential**	**Site Size (AC) - 8.2 acres**	New Impervious Surface (AC) – **6.09 acres**	**Project Status (Approval Date) –** Approved by the Planning Commission on May 10, 2006. Grading in 2006 and construction completion expected in 2008.
Site Design. Clustering of buildings, landscape swales in open space	Source Control. Covered trash areas, parking structure, street sweeping by the HOA, sanitary sewer drains for swimming pools. Storm drain system stenciling, landscaped infiltration areas.	Treatment BMPs. Landscape infiltrating BMPs, landscape swales adjacent to pedestrian trails, structural stormwater treatment units, oil-grease separators in parking structures	N**umeric Criteria:** Flow-based criteria is used to design BMPs	O&M Responsibility**:** O & M agreement will require that owner is responsible for keeping record available for inspection on the project site of all inspections and maintenance of the permanent BMPs.	Pesticide Reduction Meas: Pesticide and fertilizer usage will be controlled through usage of a licensed landscape maintenance company. Pest resistance plant material will be used.
Project Name – Piercey Toyota	**Project Description - Automobile Dealership**	**Project Type - Commercial**	**Site Size (AC) – 10 acres**	New Impervious Surface (AC) – **8.12 acres**	**Project Status (Approval Date) –** Approved by the City Council on March 21, 2006. Grading in Fall 2006 and occupancy expected in 2007.
Site Design. The automobile dealership will consist of two buildings and concrete and asphalt paving. Permeable pavements, although feasible, are impractical for this site because of frequent heavy vehicle use and because of the clay soils underlying the general area.	Source Control. On-site drain inlets: Area drains in parking areas have been fitted with filter inserts. Drains will be marked with "No Dumping-Drains to Creek" or similar message. Interior floor drains and car lifts drains will be plumbed to the sanitary sewer. Landscape / outdoor pesticide use: Any native trees, shrubs and ground cover will be preserved to the maximum extent possible. Landscaping will be designed to minimize required irrigation and runoff, to promote surface infiltration, and to minimize the use of fertilizers and pesticides	Treatment BMPs. Runoff is treated by routing to a stormwater treatment BMP (to swales or catch basin filter inserts) sized to treat runoff. The grassy swales used as stormwater treatment are located adjacent to I-880 to the west and along the property line to the north. Both areas are easily accessible from the adjacent paved areas for inspection and maintenance. Inspection and maintenance of catch basin filter inserts that are located throughout the parking areas do not have any restrictions. The grassy swale stormwater treatment facilities are designed	N**umeric Criteria:** Flow-based and Volume-based criteria is used to design BMPs	O&M Responsibility**:** **Proper operation and maintenance of Stormwater Management Facilities will be the responsibility of the property owner in perpetuity. The property owner will be subject to an annual fee (issued by the City's standard fee schedule) to offset the cost of inspecting the site or verifying that stormwater management facilities are being maintained. The applicant will prepare and submit, for the City's review, an acceptable Stormwater Control Operation and Maintenance Agreement before sale,**	Pesticide Reduction Meas: Any native trees, shrubs and ground cover will be preserved to the maximum extent possible. Landscaping will be designed to minimize required irrigation and runoff, to promote surface infiltration, and to minimize the use of fertilizers and pesticides that can contribute to stormwater pollution. Where possible, pest-resistant plants will be selected, especially for locations adjacent to hardscape. Plants will be selected appropriate to site soils, slopes, climate, sun, wind, rain, land use, air

1

	that can contribute to stormwater pollution. Where possible, pest-resistant plants will be selected, especially for locations adjacent to hardscape. Plants will be selected appropriate to site soils, slopes, climate, sun, wind, rain, land use, air movement, ecological consistency, use of recycled water (where applicable), and plant interactions. Refuse area: The area is covered to prevent rainwater from entering dumpsters. Outdoor storage: No outdoor storage of equipment or materials will be allowed at this facility. Vehicle/equipment repair: All vehicle equipment and maintenance is indoors. Vehicle service facility floor drains will connect to a wastewater pretreatment system prior to discharge to the sanitary sewer system, for which an industrial waste water discharge permit must be obtained. Tanks, containers or sinks used for parts cleaning or rinsing will only be connected to the sanitary sewer system as allowed by an industrial waste water discharge permit. Fire sprinklers: Sanitary sewer connections shall be provided to drain fire sprinkler test water. Miscellaneous drain or wash water: Condensate drain lines will discharge to the sanitary sewer system or to landscaped areas. Rooftop mounted equipment will be roofed or covered to prevent pollutants from entering runoff. Roofing, gutters, and trim shall not be copper or other unprotected metal that could leach into runoff. Sidewalks, parking lots and drive aisles: New hardscape areas	in accordance with recommendations in the "Stormwater C.3 Guidebook" and illustrations and specifications in the "California Stormwater BMP Handbook for New Development and Redevelopment". The catch basin filter inserts are designed in accordance with recommendations in the "Stormwater C.3 Guidebook" and manufacturer specifications. Planer curbs at the perimeter of the site at the north and west edge of the pavement area and throughout the majority of the balance of the site are flush with the adjacent paving to minimize impeding the thru-site drainage from a 100-year storm event. Pavement areas that do not drain to grassy swales drain to inlets with filters.		**transfer, or permanent occupancy of the site. The applicant accepts responsibility for maintenance of stormwater management facilities until such responsibility is transferred to another entity.**	movement, ecological consistency, use of recycled water (where applicable), and plant interactions.

	drain to drain inlets with filter inserts. Vehicle and equipment cleaning: A covered car wash facility is provided on-site to wash vehicles. Pavement is concrete and the car washing area is contained so water cannot drain into this area or out of the area by means of a combination of grade breaks and inlet structures (catch basins and or trench drains).				
Project Name – D.R. Horton, The Paragon	**Project Description - 147 unit residential condominium development**	**Project Type - Residential**	**Site Size (AC) – 4.6 acres**	**New Impervious Surface (AC) – 3.87 acres**	**Project Status (Approval Date) –** Approved by the City Council on December November 15, 2005. Grading in fall 2006 and occupancy expected in 2008/09.
Site Design. Since 84% of the site will be impervious with the remaining 16% as landscaped and recreation area, stormwater infiltration will be minimal. Storm water on the site will be drained to landscape areas as feasible and the remaining will drain to storm drain inlets and roof gutters throughout the project site. Runoff generated from the proposed site will be divided into two drainage areas. Storm water generated from on-site drainage for area 1 will be discharged into a new piped storm drainage system leading to a public 21-inch existing storm drain on South Main Street. Drainage area 2 will be drained via a new piped storm drainage system to the public 18-inch existing storm drain on Main Street. Landscape planters and recreation area between the buildings and paved areas help reduce impervious areas for the site. Conventional concrete, asphalt and compacted earth are present at the existing site. Because of the underlying soil type pervious pavements cannot	Source Control. Mark all inlets with the words 'NO DUMPING – DRAINS TO THE BAY". Plumb all parking garage floor drains to the sanitary sewer. Prohibit car washing on site and use an automatic shut off on house to discourage such use. Avid roofing, gutter and trim made of copper or other unprotected metals that may leach into runoff. Plaza, sidewalk and parking lots shall be swept regularly to prevent the accumulation of litter and debris. Debris from pressure washing shall be collected to prevent entry into the storm drain system. Washwater containing any clearing agent or degreaser shall be collected and discharged to the sanitary sewer and shall not be discharged to a storm drain.	Treatment BMPs. Grassy swales and landscaping. Two vortex hydrodynamic separators.	**Numeric Criteria:** Flow-based criteria is used to design BMPs	O&M Responsibility**:** **The owner agrees to provide necessary easements or rights of entry to City of Milpitas Storm Water Ordinance for access and inspection of stormwater BMPs and to make provision of easement or rights of entry a condition of sale. Owner agrees to operate and maintain the hydro dynamic separator connected with the project until a legal incorporation of a homeowners' association or other private entity to be responsible for maintenance, execution of Codes, Covenants, and Responsibilities or other agreement that runs with the land and requires future owners to provide and pay for maintenance of stormwater BMPs, and execution of a Stormwater Management Facilities Operation and Maintenance Agreement and Right of Entry in the form provided by the City. The owner will submit, with the application**	Pesticide Reduction Meas: Standard City of Milpitas requirements: Landscaping will be designed to minimize required irrigation and runoff, to promote surface infiltration, and to minimize the use of fertilizers and pesticides that can contribute to stormwater pollution. Where possible, pest-resistant plants will be selected, especially for locations adjacent to hardscape. Plants will be selected appropriate to site soils, slopes, climate, sun, wind, rain, land use, air movement, ecological consistency, use of recycled water (where applicable), and plant interactions.

be used in this project. Because of the very high-density land use and the in-fill nature of the project, hydrodynamic separators will be incorporated into the project storm drain system to treat runoff from the impervious surfaces. The remaining 0.74 acres (16%) of the project site will have permeable landscape to collect runoff as feasible.				**for building permits, a draft Stormwater Facilities Operation and Maintenance Plan including detailed maintenance requirements and a maintenance schedule. Stormwater pollution control measures require scheduled inspection, maintenance and repair during the construction process and after removal of any temporary control. General landscape maintenance, including pruning and cleanup to insure that BMPs are functional and do not create a nuisance. Hydro Dynamic Separator requires ongoing inspection, annual maintenance and restore or repair.**	
Project Name **Venture Corporation**	**Project Description -** Demolish 125,000 + sq ft industrial building and construct 10 industrial R&D condominium buildings	**Project Type – Industrial**	**Site Size (AC) – 12.02 acres**	**New Impervious Surface (AC)** **0.1668 acres (7,269sf)**	**Project Status (Approval Date) – March 22, 2006. Grading in fall 2006, occupancy expected in 2008/09.**
Site Design. The site design consists of 12 industrial buildings, driveways and 47% of the site (including the lagoon) will be pervious.	Source Control. All storm drain inlets on the site will be painted with "NO DUMPING – DRAINS TO OCEAN". All trash storage areas will be enclosed in a concrete paved enclosure and designed to prohibit run-on from adjoining areas. All trash containers will also include attached lids that exclude rain. The timing and application methods of irrigation have been designed so as to minimize the runoff of excess irrigation water into the storm water conveyance system. All trash enclosures will be designed according to City standards.	Treatment BMPs. CDS Interceptor: Parking and roof areas will be treated by the use of biofiltration swales, the site has been designed to treat over 80% of the project site through the CDS interceptor and the existing lagoon also provides additional treatment. Native plants and drip irrigation systems: In order to minimize post-construction irrigation requirements, the site will be landscaped to the maximum extent possible with native, drought-resistant plants. In addition, irrigation facilities will be designed to keep spray from impervious areas. . Trash enclosures: To avoid having trash and debris from entering into the storm drain system, the trash enclosure areas	N**umeric Criteria:** Flow-based criteria is used to design BMPs	O&M Responsibility**:** The CDS interceptor shall be inspected at the beginning and end of every rainy season. The inspection should consist of visually inspecting for oils and other hydrocarbons on the surface, and sampling for chemical analysis at leas once a year. Sediment buildup shall be removed once every 12 months. The contents should be removed by a professional pumping company engaged in that line of work and familiar with regulations for disposal of such material. The owner will enter into a contract with the city obliging the project proponent to maintain, repair and replace all BMPs as necessary into perpetuity. This includes source control BMPs as	Pesticide Reduction Meas: Standard City of Milpitas requirements: Landscaping will be designed to minimize required irrigation and runoff, to promote surface infiltration, and to minimize the use of fertilizers and pesticides that can contribute to stormwater pollution. Where possible, pest-resistant plants will be selected, especially for locations adjacent to hardscape. Plants will be selected appropriate to site soils, slopes, climate, sun, wind, rain, land use, air movement, ecological consistency, use of recycled water (where applicable), and plant interactions.

		will be paved. No drainage from adjoining areas will be allowed. Enclosures will be walled/covered		applicable.	
Project Name **Public Storage**	**Project Description -** Demolish single-story self storage buildings and replace them with a three-story 88,530 square foot self storage building	**Project Type –** **Self Storage**	**Site Size (AC) –** **4.94 acres**	**New Impervious Surface (AC)** **0.0 acres)**	**Project Status (Approval Date) – July 12, 2006. Demolition in 2006 and completion expected in 2007.**
Site Design. The Public Storage project will remove existing single story storage units and replace them with a 3-story storage building. Net pervious area will be reduced from 203,899 square feet to 199,534 square feet.	Source Control. Landscape maintenance. Refuse disposal for the office building. Prohibition of maintenance and washing of cars on site. Permanent BMP: Roof drains direct the majority of roof water to landscape areas. Area drains within the drive aisles have been fitted with filter inserts, significantly reducing the quality of unfiltered stormwater runoff. Drains will be marked with "No Dumping-Drains to Creek". Interior floor drains will be plumbed to the sanitary sewer. Any native trees, shrubs, and ground cover will be preserved to the maximum extent possible. Landscaping will be designed to minimize required irrigation and runoff, to promote surface infiltration, and to minimize the use of fertilizers and pesticides that can contribute to stormwater pollution. . Plantings for swales will be selected to be appropriate to anticipated soil and moisture conditions. Where possible, pest-resistant plants will be selected, especially for locations adjacent to hardscape. Plants will be selected appropriate to the site soils, slopes, climate, sun, wind, rain, land use, air movement,	Treatment BMPs. Filters will be inspected biannually and the filter medium replaced as needed. Inlet markings will be inspected annually and replaced or renewed as needed. Management will receive stormwater pollution prevention information to be provided by the City. Swales and related structures and features will be inspected and maintained as specified in the Stormwater Control Operation and Maintenance Plan (to be developed and submitted for approval). Drains will be periodically inspected to avoid blockage and overflow. The landscaping contractor contract will state that landscaping is to be maintained using Integrated Pest Management (IPM) principles, with minimal or no use of pesticides. Management will enter into a contract for periodic refuse pick up at the site. Sidewalks, parking lots, and drive aisles shall be swept regularly to prevent accumulation of litter and debris. Debris from pressure washing shall be collected and not allowed to enter the storm drain system. Washwater containing cleaning agents or	**Numeric Criteria:** Flow-based criteria is used to design BMPs.	O&M Responsibility**:** Inspect inlets for channels, exposure of soils, and other evidence of erosion. Inspect inlets for signs of sediment buildup or plugging. Inspect side slopes for evidence of instability or erosion and correct as necessary. Observe soil in the swale and or planter for uniform percolation throughout. If portion of the swale of filter do not drain with 48-hours after the end of a storm, the soil should be tilled and replanted. Remove any debris or accumulations of sediment. Examine the vegetation to insure that it is healthy and dense enough to provide filtering and to protect soils from erosion. Replenish mulch as necessary, remove fallen leaves and debris, prune large shrubs or trees and mow turf areas. Confirm that irrigation is adequate and not excessive. Replace dead plants and remove invasive vegetation. Abate any potential vectors by filling holes in the ground in and around the swale and by insuring that there are no areas where water stands longer than 48-hours following a storm. If mosquito larvae are present and persistent, contact the Santa Clara Vector Control District for information and advice. Mosquito larvicides should be applied only when absolutely necessary and	Pesticide Reduction Meas: Where possible, pest-resistant plants will be selected, especially for locations adjacent to hardscape. The landscaping contractor contract will state that landscaping is to be maintained using Integrated Pest Management (IPM) principles, with minimal or no use of pesticides. Abate any potential vectors by filling holes in the ground in and around the swale and by insuring that there are no areas where water stands longer than 48-hours following a storm. If mosquito larvae are present and persistent, contact the Santa Clara Vector Control District for information and advice. Mosquito larvicides should be applied only when absolutely necessary and then only by a licensed individual or contractor. Standard City of Milpitas requirements: Landscaping will be designed to minimize required irrigation and runoff, to promote surface infiltration, and to minimize the use of fertilizers and pesticides that can contribute to stormwater pollution. Where possible, pest-

	ecological consistency, use of recycled water (where applicable), and plant interactions. No outdoor storage of equipment or materials will be allowed at this facility. Fire sprinkler test and system drain water shall not discharge into the storm drain. Provisions to direct water to the sanitary sewer or landscape or other approved means shall be provided. Sprinkler system design shall include the proposed method for drainage for sprinkler system discharge. Condensate drain lines will discharge to the sanitary sewer system or to landscaped areas. Rooftop mounted equipment will be roofed or covered to prevent pollutants from entering runoff. Roofing, gutter, and trim shall not be copper or other unprotected metal that could leach into runoff. New hardscape areas drain to drain inlets with filter inserts.	degreasers shall be collected and not discharged to a storm drain.		then only by a licensed individual or contractor.	resistant plants will be selected, especially for locations adjacent to hardscape. Plants will be selected appropriate to site soils, slopes, climate, sun, wind, rain, land use, air movement, ecological consistency, use of recycled water (where applicable), and plant interactions.

C3 requirements were developed and information was provided to Developers and contractors.	Ongoing	Engineering and Building Division

Evaluation - New Development Construction Procedures

As a result of Regional Water Quality Control Board inspection of April 2005, the City amended its Municipal Code to reaffirm enforcement authorities in January 2006. City has also developed a Construction Inspection Enforcement Response Plan in March 2006. This Plan includes newly developed documents such as Process Flow Chart, Urban Runoff Contractor Acknowledgement, Notice of Non-Compliance, Stop Work Notice, emergency Contractor Time and Materials Form, Deficiency Notice, updated SWPPP Checklist, and an updated City code. The City will be developing a new Emergency Urban Runoff Contractor List in FY 06-07.

City staff was trained on this new Response Plan and other C3 requirements. City staff has also attended various training classes and workshops for the new regulations.

The Special Project Team also held meetings on regular basis to review the requirements and recommendations of preventing pollution in urban runoff and preventing pollution from entering the storm water system, and to revise the City's "front end" specifications to reflect those principles, along with other construction practices. To that end the City's front-end specifications were revised to strengthen contractor requirements to perform in compliance with proper urban runoff practices, and to allow the City better tools to enforce contractor compliance with the specifications.

Public works and Building inspectors coordinate to inspect and enforce construction related BMPs. They continue to improve developer and contractor understanding of requirements through education and staff's persistence. As noted on the ICID table, staff issued three citations with financial penalties to contractors. Developers and contractors have been increasingly more responsive to Storm Water Pollution Prevention Plan compliance.

There were no comments from the Regional Board on FY 04-05 Annual Report. The Regional Board has not issued comments on the FY 06-07 Work Plan.

CITY OF MILPITAS
PUBLIC INFORMATION/PARTICIPATION-SELF-EVALUATION MATRIX

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2005-2006 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
Public Information / Participation						
I-1	Outreach distribution	URMP Page I-4	Use of reply card on utility bills and Annual Water Quality Report as mechanism to reach residential audience for outreach material. Media advertisements, stencil storm drains, slides at movie theaters.	Pollution prevention literature was distributed at City events and made available at the following City facilities: City Hall, Senior Center, Community Center, Sports Center, Police Department and Fire Department. In addition, information was distributed to all employees. In 05/06 public service announcements were continuously aired on the City's Radio (1620 AM) and Cable TV (CTV 15) stations. Staff updated announcements frequently. Stormwater pollution prevention videos were aired on CTV 15 twice weekly.	Ongoing	Utility Engineering (Aparna Chatterjee)
I-2	Targeted Outreach	URMP Page I-5	Continue education efforts targeted towards residential customers, retail outlets, restaurants, commercial and industrial customers, new development and special interest groups.	Information provided to residential customers based on reply card requests, hotline requests, water bill messages and direct mailing of City publications including the Annual Water Quality Report and the Reusable News. Pollution prevention brochures are distributed with the Finance Department's New Residential Account packet. Information is also provided at City sponsored events. Information on stormwater pollution prevention is mailed by the Utility Billing Section to new commercial, industrial and retail business license applicants. The Fire Department Inspectors distribute outreach materials at the time of inspection. Construction BMPs are provided to contractors and developers by the Building Division. The Milpitas Stormwater C.3 Guidebook was distributed to developers on as needed basis.	Ongoing	Utility Engineering (Aparna Chatterjee)

City Staff attended one point of purchase outreach event at the Milpitas OSH store. Staff encouraged the use of safer garden and pest control products and distributed literature such as Grow It, Control It, and Watershed Watch Kits. IPM information is available on our website. Public Service Announcements were aired on CTV 15 and 1620 AM.	Ongoing	Utility Engineering (Aparna Chatterjee)
I-7	Watershed Education and Outreach	URMP Page I-6	Materials to be distributed as necessary. Pollution prevention videos to be shown on local TV channel.	Distributed Watershed Watch Kits at the City's Harvest Festival, OSH outreach events and brochure racks at City Facilities. MUSD Science Teachers were offered a $150 stipend to attend environmental education workshops. Milpitas helped staff Watershed Watch outreach events whenever possible.	Ongoing	Utility Engineering (Aparna Chatterjee)
I-8	Effectiveness Evaluation	URMP Page I-6	Develop an evaluation procedure to gauge public (contractors, developers) knowledge of program goals, and effectiveness of PIP activities.	See Evaluation text.	Ongoing	Utility Engineering (Aparna Chatterjee)

Evaluation of Public Information / Participation Program Effectiveness

The City measures its outreach effectiveness by the number of outreach activities performed, the quality and quantity of materials distributed, and level of business and citizen participation in city sponsored special events.

In fiscal year 05/06, staff continued to distribute BMP guidelines to residents, developers and contractors during project planning and construction. In addition, staff performed outreach activities by means of direct mailings, literature distribution at City owned facilities, announcements through city media such as the City website, television and radio stations, and placing periodic advertisements in the Recreation Department's Milpitas Connection Magazine (published quarterly) and the Milpitas Post, (a local newspaper published weekly). As a result, we continued to receive a high number of literature request forms and hotline phone calls.

City sponsored events such as the Harvest Festival, the Annual Creek Clean Up event and the County Household Hazardous Waste drop off event continued to draw exceptional public participation and were excellent opportunities to educate and interact with a large number of residents. The city also conducted one IPM outreach event at the local Orchard Supply Hardware store.

The "Learning to be Waterwise" program was implemented in 5th grade class rooms at four elementary schools. The program primarily focuses on water conservation. However, sections on the water cycle, urban runoff pollution prevention, and wastewater treatment are included.

The Kids in creeks program was offered to all elementary school science specialists. The program provides tours of Berryessa Creek. Materials to test water samples, check water flow rates and learn about wildlife are provided by the City. The City of Milpitas also offers a teacher stipend of $150 dollars to encourage participation in environmental education workshops. Teachers were informed of upcoming workshops via newsletters and email announcements.

Summary of Evaluation of Public Information / Participation Program Effectiveness

Activity	Type of Outreach	Level of Implementation	Evaluation of Effectiveness
1. City facility literature distribution	General	Clean It, Grow It, Home Maintenance Tips, Keep Your Pool, Spa and Fountain Copper-free, Help Prevent Pollution of Our Creeks and Bay, Pests Bugging You, and Keeping it All in Tune	➢ 100 of each of these brochures were distributed at City facilities: City Hall, Senior Center, Community Center, Sports Center, Police Department, and Fire Department. ➢ Distributed materials to all permanent and temporary municipal employees. ➢ Distributed calendar/decals for city vehicles.
2. City Cable TV Channel 15	General	Aired public service announcements on the	➢ 10,000 households subscribe to CTV 15. Each TV PSA aired an average of

Activity	Type of Outreach	Level of Implementation	Evaluation of Effectiveness
and Radio 1610 AM		City's Radio (1620 AM) and Cable TV (CTV 15). Topics covered include: Mercury, IPM, Copper, HHW Recycling, Car Care Tips, and Volunteer Opportunities.	30 times per day. Announcements are periodically revised throughout the year. We also ran PSAs on our local radio station at the same frequency. However, we are unable to determine the number of residents reached through this effort. ➢ This year we continued airing pollution prevention videos. 15-30 second spots run in normal rotation at a frequency of 30x/day. The 10-15 minute videos air 2x/Week.
3. City of Milpitas Web site	General	Provide information on Urban Runoff, pollution prevention tips and programs	➢ The website was updated in 05/06 and is accessible to all City employees and 65,000 Milpitas residents. Information was made available throughout the year.
4. City sponsored events	General	Literature distribution and promotional products; pencils, decal calendars, sponges as well as educational displays	➢ Distributed 150 copies of each of the following brochures at City sponsored public events: • HHW Brochures • Grow It's • Pests Bugging You • Brochure Request Forms • Oil Recycling Jugs • Funnels • Pencils • Sponges • No Dumping Calendars ➢ Coordinated with County for the Household Hazardous Waste Drop-off event in June 2006.
5. Milpitas Connection-City of Milpitas Recreation Department Catalog/ Magazine	General	Pollution Prevention Tips (based upon season) along with mail-in coupon for literature	➢ Articles (including a brochure request form) were published in the Milpitas Connection magazine as space was available.
6. Urban Runoff Hotline	General	Maintain hotline # (408) 586-2605 to provide pollution prevention tips	➢ Staff checked the hotline daily and responded to questions and literature requests immediately.

Activity	Type of Outreach	Level of Implementation	Evaluation of Effectiveness
		and receive request for information.	
7. Utility Bill Message and Inserts	General	Provide pollution prevention information.	➢ Pollution prevention messages were submitted and included on bills when space was available.
8. Newsletters and Newspapers	General	Milpitas Post (A local newspaper published weekly), provide advertisements on special topic issues-automotive care, home repair, gardening, street sweeping etc.	➢ Advertisements were placed in the Milpitas Post announcing volunteer opportunities and special events such as Pollution Prevention Week, and the HHW drop off event. All advertisements included pollution prevention messages. ➢ Placed advertisements in the Milpitas yellow pages promoting proper disposal of fluorescent light bulbs.
9. Coordinate National Pollution Prevention Week	General	Distribute literature to the general public, display pollution prevention messages on City's web page, school outreach, residential door-hangers (Joint effort with Public Works, and Solid Waste).	➢ Aired public service announcements on the City's cable television and radio stations. ➢ Placed advertisements in the local newspaper. ➢ Distributed a door hanger containing pollution prevention messages with focus on litter prevention and recycling of mercury containing products, pesticides and other HHW items. ➢ City Council adopted a Proclamation for Pollution Prevention Week.
10.Solid Waste Activities	General	Joint effort with Solid Waste (Household Hazardous Waste Programs), messages in newsletters, etc.	➢ Combined outreach efforts with other departments whenever possible
11. Outreach Distribution	General	Use of reply card on Water Quality Report for residential customers, distribute BMP material and stormwater pollution prevention material to City owned facilities, place and distribute BMP materials at Household Hazardous Waste Collection Event and the Pollution Prevention Week events.	➢ The City received approximately 60 reply cards or information request forms. All calls and information request were answered expeditiously.

Activity	Type of Outreach	Level of Implementation	Evaluation of Effectiveness
12. Residential	Targeted	Mass mailings, City sponsored events	➢ The City's Annual Water Quality Report, including pollution prevention articles and a brochure request from, was mailed to all postal accounts and included in the Finance Department's new account packet.
13. Retail Outlets	Targeted	Regional IPM Store Partnership Program	➢ The local Orchard Supply Hardware Store is participating in the IPM store partnership program. IPM brochures are available in a brochure rack. ➢ City Staff participated in one weekend outreach events at the store. Staff discussed safer pest control options with customers. Watershed Watch Kits, Grow It's and Clean It's were distributed.
14. Commercial/ Industrial Customers	Targeted	Target mailings to vehicle service shops, restaurants etc.	➢ Information was provided on request, during inspections or on as-needed basis ➢ Hazardous Materials inspectors distribute information in the field. ➢ Distributed brochure list with new business license applications and renewals.
15. Special Interest Groups	Targeted	Provide information on request to target groups (garden clubs, auto enthusiasts, pool owners, handymen, construction workers, etc.)	➢ Information was provided on request, during inspections or on as-needed basis ➢ Mailed Rainy Season letter to developers. ➢ Keep your Pool, Spa, or Fountain Copper-Free was distributed to all pool permit applicants.
16. Industrial/Commercial Discharges	Targeted	'Industrial BMPs', 'Mobile Cleaner BMPs', 'Preventing Storm Drain Pollution' and other program material	➢ Information was provided on request, during inspections or on as-needed basis.
17. New Development and Construction	Targeted	'Blueprint for a Clean Bay', 'BASMAA Recyclers and Disposal Services', 'BMPs for the construction industry (8 pamphlets)	➢ Information was provided on request, during inspections or on as-needed basis. ➢ The Milpitas Stormwater C.3 guidebook was distributed to developers as needed. It is also located on the City's website. ➢ Distributed a 24X36 blueprint with construction BMPs with all public and

Activity	Type of Outreach	Level of Implementation	Evaluation of Effectiveness
			private project applications.
18. Illicit connection and illegal dumping elimination	Targeted	IC/ID cards to be distributed to industrial and commercial facilities	➢ Information was provided on request, during inspections or on as-needed basis
19. Pesticide Discharges	Targeted	Training programs for municipal employees, public education and outreach programs for residential and commercial pesticide users and pest control operators	➢ IPM messages were placed on our website, Radio and CTV. ➢ See Staff Training Table. ➢ One point of purchase outreach event was held at the Milpitas OSH store to encourage use of less-toxic pest control products. ➢ IPM articles were placed in various newsletters and newspapers. See numbers 5 and 8 above.
20. Municipal Employee Training	Targeted	Continue employee yearly training on runoff pollution prevention. Maintain Employee awareness through workshops, newsletters and meetings	➢ See Staff Training Table
21.School outreach program	Educational	Involve schools in creek clean up event and the Kids in Creeks education program; stipends to encourage teacher participation in Watershed Education Workshops	➢ 270 students participated in the Kids in Creeks program and were escorted on field trips to Berryessa creek where they performed water quality tests. ➢ 190 volunteers from various schools participated in the annual Creek Clean Up event. A total of 5000 lbs of debris was removed from Berryessa Creek. ➢ The "Learning to Be Waterwise" program, which includes a segment on pollution prevention, was implemented in 5th grade classes at 4 elementary schools. A total of 318 students participated in the program. ➢ The City of Milpitas offered a teacher stipend of $150 to encourage participation in environmental education workshops.
22. Coordinate creek clean up and Household Hazardous Waste disposal	General	Advertise in Milpitas Post, schools, jointly with Santa Clara Valley Water District	➢ Articles were placed in the Milpitas Post. The event announcements also received priority placement on our website.

Activity	Type of Outreach	Level of Implementation	Evaluation of Effectiveness
events		Coordinate for more citizen involvement on City events	
23. Watershed outreach and education	Watershed Outreach and Education	Materials will be distributed as necessary	➢ The City's website contains a link to the Watershed Watch website. ➢ Teacher stipends were offered for participation in the Wacky Watershed Workshops. ➢ The City of Milpitas helped staff Watershed Watch outreach events whenever possible.

There were no comments from Regional Board on FY 04-05 Annual Report. The Regional Board has not issued comments on the 06-07 Work Plan.

No changes are recommended at this time.	Annually	PW Maint Supervisors/ Marilyn Nickel

Evaluation – Pest Management

City staff has applied pesticides for the control of weeds and insects in landscaped areas around city buildings, in parks, in street medians, right-of-way areas, and in city street trees.

In FY 05-06 the City made a conscious effort to address pest management issues with an integrated approach. Pesticide use was incorporated as one management tool along with the application of cultural and mechanical control practices.

There were no comments by the Regional Board on the FY 04-05 Annual Report. The Regional Board has not issued comments on the FY 06-07 Work Plan.

Trash Inventory and Management – Self-evaluation Matrix

Implem. Id.	Activity	Item Source	Tasks Identified in FY 2005-2006 Work Plan	Status / Comments	Due Date (mo/yr)	Responsible Party (Lead)/ Coordinator
T-1	Revise and document existing trash problem areas list	URMP L-5 Page 1	Annually revise trash problem areas list on an as-needed basis. Revisions should be based on trash problem areas surveys and other relevant information.	Staff in Utility Engineering works with Public Works Dept., Neighborhood Services, and Solid Waste Sections to update and maintain a list of trash problem areas in the City. The 12 trash problem areas were inspected in 05-06 and evaluated. The evaluations were reported to the SCVURPPP in June 2006. The list of trash problem areas is expected to change over time as additional information becomes available through future implementation of trash evaluations and management practices. As new information becomes available, staff will be adding them to the list of trash problem areas.	Ongoing	David Gordillo, Steve Smith (Public Works), Ralph Campa (Allied Waste), Gloria Anaya (Neighborhood Services), Aparna Chatterjee (Utility Engineering)
T-2	Trash evaluations using RWQCB tools	URMP L-5 Page 1	Conduct trash evaluations using the RWQCB's Rapid Trash Assessment protocol (Version 1.0) and/or the KAB litter index in a subset of trash problem areas	Staff completed evaluation of 12 trash problem areas using the KAB Litter Index. Results were submitted to SCVURPP in June 2006 and are included in this report in the following table.	Ongoing	Dave Gordillo, Steve Smith (Public Works), Aparna Chatterjee (Utility Engineering)
T-3	Identify and prioritize trash problem areas and sources	URMP L-5 Page 1	Continue identifying and prioritizing trash problem areas in urban streams and waterways and other potential sources that may contribute trash to those areas.	Staff has submitted information on the trash problem areas to the SCVURPP Program, The Program has documented the locations, and converted those into spatial coordinates using a GIS. Maps were generated showing the distribution of trash problem areas	Ongoing	Dave Gordillo, Steve Smith (Public Works), Ralph Campa (Allied Waste), Gloria

				across major Santa Clara Basin Watersheds. Utility Engineering staff will work with the Public Works, Solid Waste and Neighborhood Services and continue to identify high priority trash problem areas.		Anaya (Neighborhood Services), Aparna Chatterjee (Utility Engineering)
T-4	Identify and implement potential control measures	URMP L-5 Page 2	Continue identifying and implementing trash control measures, where practical and feasible, to reduce trash.	Staff will continue its efforts to implement potential control measures.	Ongoing	David Gordillo, Steve Smith (Public Works), Leslie Stobbe (Solid Waste), Gloria Anaya (Neighborhood Services), Aparna Chatterjee (Utility Engineering)
T-5	Standardized Reporting on trash management practices	URMP L-5 Page 2	Provide specific information on trash management practices implemented within the City, using standardized reporting format (to be used for program-wide reporting)	Staff in Public Works, Neighborhood Services, and Solid Waste Sections maintain their own tracking system that enable them to be aware of trash problems in various parts of the City and take appropriate actions. Staff evaluated trash problem areas and submitted results to SCVURPPP in a standardized reporting format. The standard form is included in this report in the following table.	Ongoing	David Gordillo, Steve Smith (Public Works), Leslie Stobbe (Solid Waste), Gloria Anaya (Neighborhood Services), Aparna Chatterjee (Utility Engineering)
T-6	Develop long-term	URMP	Assist Program staff in developing an	Staff will work with the SCVURPPP	Ongoing	David

	strategy	L-5 Page 2	effective strategy for reducing trash conditions in urban streams and waterways.	Program; participate in meetings to provide information to the program.		Gordillo, Steve Smith (Public Works), Leslie Stobbe (Solid Waste), Gloria Anaya (Neighborhood Services), Aparna Chatterjee (Utility Engineering)

Evaluation – Trash Inventory and Management

The City of Milpitas continued to implement the various trash management activities in FY 05-06. In June 2006, we completed an assessment of trash problem areas by using the Keep America Beautiful (KAB) Litter Index tool. The trash problem areas were identified in FY 03-04 by conducting a survey, the Identification and Documentation of Known Trash Problem Areas Survey. The survey was submitted to the SCVURPPP in December 2003.The program compiled information from municipalities and agency staff to identify known trash problem areas that occur in creeks, streets, parks and other land uses within urban areas. Data sources included trash complaint databases, maintenance and operation records, existing list of trash hot spots, employees' knowledge and creek clean-up locations. The Program then converted and mapped the location information of trash problem areas into co-ordinates using the GIS. For FY 05-06 evaluation, the City used the original list of trash problem areas and investigated additional sites based on input from other Departments and Sections. Staff from Utility Engineering visited 12 trash problem areas to determine the status and extent of the problems.

Staff used the KAB Litter Index that rated each site according to the trash observed at the site. The KAB Litter Index ratings are: 1-No litter, 2- slightly littered, 3- Littered, 4-extremely littered. Of the 12 sites, five sites had ratings of 1, two sites had ratings in between 1 and 2, three sites had ratings of 2, and the remaining two sites had ratings between 2 and 3. At each site, staff used a survey and some checklists, such as the 'Windshield Survey', the 'Trash Item Tally Worksheet', and 'Neighborhood Spotters Checklist' to identify the quality and quantity of trash. The results of the survey were then entered into the Trash problem Area Activity Report. This Report was submitted to the SCVURPP Program on June 22, 2006. A copy of the Trash Problem Area Activity Report is enclosed in this 05-06 Annual Report.

The assessment indicated that compared to some of the other cities, the magnitude of our trash problems appears to be far less significant. The City has several trash management activities to encourage trash reduction. These activities include: free household hazardous waste collection program; single stream curbside recycling; unlimited trash collection for single family residents, ten neighborhood clean-ups each spring/summer, biweekly street sweeping; up to six annual free entrance privileges into the Newby Island landfill for disposal of household items, remodeling debris, yard trims; no-cost recycling program for businesses; an annual volunteer creek clean-up event; storm drain operation and maintenance and responding to trash complaints. The Utility Engineering, Public Works and Planning, Recreation and Neighborhood Preservation Departments are responsible for trash management activities and enforcement. The Utility Engineering Division carries out management of solid waste and yard waste recycling including annual promotional campaigns and school projects. Litter control in parks, streets and right-of-way landscaped areas is handled by Public Works. There are several incentive programs such as the Annual Neighborhood Beautification Awards Program for residential and non-residential properties, the Lend-A-Tool Program for residents, businesses, property owners and community groups, the Abandoned Vehicle Abatement Program, and on-premises collection for disabled persons. There are school programs

such as the Bottles & Cans Recycling funded by the Department of Conservation, and the City Recycling & Composting Project at elementary and middle schools.

All complaints are responded to and problems are resolved through discussion with contractor, resident or property owner. City plans to continue its efforts in the future.

There were no comments from Regional Board on FY 04-05 Annual Report. The Regional Board has not issued comments on the 06-07 Work Plan.

Mr. Bruce Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: West Valley Community Specific Urban Runoff Management Program
FY 2005-2006 Annual Report

Dear Mr. Wolfe:

This report is submitted by the West Valley Cities of Campbell, Monte Sereno, Saratoga, and the Town of Los Gatos, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2005-2006 in accordance with the West Valley Communities' Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 2004 and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 05-06 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

I. Contents of report;
II. Program highlights and accomplishments;
III. Summary of continuous improvement activities;
IV. Attachments:
    1. Table of Contents
    2. Certification Statement
    3. Acronyms

V. Program Elements:

1. IC/ID Elimination Activities
2. Industrial / Commercial Discharger Control Program
3. Public Agency Activities
    - Storm Drain O & M
    - Street Sweeping
    - Corporation Yard
    - Rural Public Works
4. New Development: Planning Procedures
5. Construction Inspection
6. Public Information & Participation
7. Pesticide Management Activities
8. Mercury Pollution Prevention Activities
9. Copper Action Plan / Nickel Action Plan
10. Trash Inventory and Management
11. Water Quality Monitoring and Watershed Management
12. Training Summaries are provided at the end of each element

Responses to Regional Board staff's comments on the FY 04-05 Annual Report (July 26, 2006 letter) are provided at the beginning of the New Development: Planning Procedures section of each West Valley FY05-06 Annual Report.

Program Highlights and Accomplishments

During FY05-06, the West Valley Communities of Campbell, Los Gatos, Monte Sereno, and Saratoga continued efforts to implement their URMPs to the maximum extent practicable. The activities that were implemented for each element of each Community's URMP are described in Chapter 14 of the Santa Clara Valley Urban Runoff Pollution Prevention Program's URMP. Highlights of the West Valley Communities accomplishments in various program elements are described below.

Industrial/Commercial Discharger Control Program. During FY05-06, the West Valley Communities rewrote their inspection agreement with the Santa Clara County Central Fire District, extending the inspection program for five additional years. This renegotiation allowed the West Valley Communities to update the Fire District's inspection procedures, clarify their reporting requirements for improved follow up and data management, and provide material from the latest Urban Runoff Management Plans (2004) for enhanced inspector training.

Public Information/Participation Program. In FY 05-06, the West Valley Clean Water Program continued to expand its quest for effective public education and outreach. WVCWP pursued media coverage on several topics: safe disposal of E-waste and other mercury-containing products, trash impairment of creeks and the Bay, cleanup and trash assessments by students and parents, and a Saratoga student's Eco-Hero award for his campaign to keep residential pollutants (pesticides and

copper) out of the storm drain. The student's story about his mission and his partnership with WVCWP can be found in the Public Information and Participation section of this report (Attachment 6B).

Nine stories, news briefs, or letters to the editor, were covered by local community newspapers in FY05-06. The most telling article was unsolicited; a Saratoga News cover story appeared about residents deluging City Hall with calls when the funds for household hazardous waste disposal were cut short due to the City's budget shortfall. By March 2006, the City Clerk had received over three hundred calls after funding ended in November and forced a stop to residents' participation in HHW drop-off events. A copy of the article is attached to section 10 – Trash Management & Watershed Management, of Saratoga's Annual Report (Attachment 10G).

The West Valley Clean Water Program strives to maximize student involvement at every opportunity. WVCWP staff developed a fourth-grade presentation script incorporating State standards with messages on pesticides, copper, mercury, household hazardous waste and trash. The new curriculum expands the existing fifth-grade presentation by including both Coastal and Wetlands Enviroscape models. The educational presentation runs for over an hour, and during its debut was extended at the teacher's request, while an entire class of students, teachers and parents at Saratoga Elementary School remained engaged in participation and questions and answers. At least thirty students and parents from the same class spent the following Saturday working with WVCWP staff to tally and categorize trash as they cleaned up the banks of Saratoga Creek.

The WVCWP prioritized education on trash, pesticides, fluorescent bulbs, and E-waste in FY05-06. A Kindergarten script was developed for St. Mary's School in Los Gatos. Two groups of fifteen Kindergartners listened to Clean Water Program messages as they followed the script and "polluted" the water on two Enviroscape models. Immediately following the presentation the teacher and students were motivated to walk the school grounds and collect all the trash they could find for proper disposal.

Illicit Connection and Illegal Dumping Elimination Activities. A primary goal for the West Valley IC/ID Program has been to ensure adequate follow up of all potential urban runoff violations related to restaurants. The West Valley IC/ID Inspector presented a restaurant inspection training session, focused on urban runoff pollution issues, to twenty-two Dept of Environmental Health specialists at the annual (April 18th) meeting coordinated by Cupertino, the County and the WVCWP. This is the second time that the WVCWP Inspector has discussed his restaurant inspection program with DEH specialists in the last three years. Feedback from DEH staff this year was very positive. The presentation was considered to be very helpful and photos from actual inspections especially worthwhile. Training sessions with other agency and municipal staff are effective, evidenced this year when DEH specialists called the West Valley IC/ID Inspector to report IC/ID incidents, outside of, and unrelated to, their regular restaurant inspections. Increased scrutiny by other agency and municipal staff continues to strengthen the program.

Storm Drain Operation and Maintenance. The West Valley Sanitation District (WVSD) completed a major task which will make storm drain cleaning procedures more efficient and the annual SD reports more useful to the WV cities. FY05-06 was the first year that the enhanced storm drain maintenance reports were available to the cities. The reports document the status of each stormdrain and, if applicable, the nature of any problem. The majority of structures were "clean" but a few were noted as having obstructions (e.g. "leaves/paper"). Other descriptors that

are available in the report are: mud/dirt, foreign object, rocks/stone, sand/gravel, etc. All structures, as needed, are cleaned at the time of inspection. The WVSD's report may be used by WV cities to help monitor specific pollutant problems such as trash sites.

C.3 Implementation. In July and August, 2005, an engineering consultant hired by the WVCWP talked with staff in each West Valley city to review any remaining challenges with C.3 implementation. This year the cities made progress in preparing for implementation of BMP O&M verification inspections and HMP requirements. The West Valley Communities were beginning to see the completion of the first Group 1 projects in June 2006. Throughout FY05-06 the cities participated in regular monthly training meetings frequently dominated by discussion of the implementation of C.3. requirements. The BMP O&M Verification Programs were discussed in great detail and minor updates were made in FY05-06 to that section of the West Valley URMPs. The revised standard operating procedures for the BMP O&M Verification Programs were reviewed with the engineering consultant and included as attachments in New Development – Planning Procedures (section 4) of each of the WVC FY05-06 Annual Reports.

To show the spirit of C.3. implementation, two West Valley cities which have not had Group 1 or Group 2 projects to date, have made significant efforts to include swales and runoff control measures on all projects. Saratoga provided copies of drawings to developers to help them visualize the swales with under drains, which the City Engineer recommends. Monte Sereno's City Engineer required drywells, which overflow to vegetated areas, on all residential development projects, except where the ground water level was too high.

Pesticide Activities. By popular demand, the WVCWP held its third West Valley IPM Workshop. This year the WVCWP partnered with the City of San Francisco to hire Frank Rossi, a national expert (from Cornell University) who presented guidelines for managing turf with little or no pesticides. The training included PowerPoint presentations and a field trip to examine Campbell's community athletic field turf. For the past three years the WVCWP IPM workshops have prompted overwhelmingly positive feedback from municipal staff, special district personnel and private golf course superintendents. This year thirty four (34) municipal staff from three West Valley Communities and one Golf Course Superintendent from Los Gatos attended the workshop. Based on the material presented, WVCWP staff wrote a Turf Management Plan, which the four municipalities adopted. The IPM plan is included in the Pesticide Management section of the Annual Report (Attachment 7A).

Mercury Pollution Prevention Activities. In FY05-06, the WVCWP spent significant staff time and resources to offer a way for the public to get involved in reducing the amount of mercury containing waste going to landfill or being disposed of illegally. At the suggestion of the WVCWP, United Datatech recyclers agreed to hold a free TV and computer monitor recycling event in the West Valley. It turned out to be a successful effort to encourage the community to take action and to inform the public of the goals of the West Valley Clean Water Program. The WVCWP hired a PR firm (the one currently being used for the Watershed Watch campaign) to design a newspaper ad and write and submit a press release to local newspapers. As a result at least 6 news briefs, stories, and letters on the topic of hazardous waste and water quality were covered by local newspapers. Over 250 participants enthusiastically dropped off 33,657 lbs. of electronic waste materials in four hours. The event opened up an opportunity to survey the drivers and discuss mercury pollution and proper disposal of fluorescent bulbs and batteries, as people waited in vehicles to go through the line.

Trash Inventory and Management. West Valley volunteers were key partners in trash assessment and management this year. The WVCWP held two annual trash assessment and cleanups at Westmont High near San Tomas Aquino Creek. Campbell and Los Gatos/Monte Sereno each held a successful volunteer event in the Guadalupe Watershed and Saratoga partnered with the WVCWP and a local elementary school to assess and clean up trash along Saratoga Creek in the San Tomas Aquino Watershed. A combined total of over 280 volunteers categorized and picked up 12,078 trash items for a total of 1,532 lbs of trash removed during the four volunteer events where trash tallying was conducted along with cleanup. School presentations helped to promote interest in trash collection and trash management among students, teachers and frequently among parents. The increased participation is testament to the measurable benefits of educational outreach activities.

Continuous Improvement Activities

Illicit Connection and Illegal Dumping Elimination Activities. The IC/ID program continues to work phenomenally well for the West Valley Communities. As a result of having a centralized inspection program and frequent presentations or talks given by the West Valley inspector (at training sessions, workshops or municipal lunch meetings), the overall awareness of the West Valley IC/ID program has increased among other agency staff. Calls from other agencies and municipal staff (inter-departmental) increased from forty-seven (47) reports in FY04-05 to sixty-two (62) reports in FY05-06.

The inspector responded to 98 discharge incidents over the year (see IC/ID section Attachment 1A for the number and types of incidents), and conducted 28 proactive and follow-up inspections. Each of these inspection opportunities adds to the community's knowledge of storm water pollution and prevention issues. As part of the inspection process, the inspector distributes applicable educational materials. The West Valley Clean Water Program Inspector provided 421 brochures and other educational materials to industrial/commercial facilities and residents in FY05-06.

Industrial/Commercial Discharger Control Program. During FY05-06, the three West Valley Communities of Campbell, Los Gatos, and Saratoga continued to implement their Industrial/Commercial Inspection Program. The City of Monte Sereno has no industrial or commercial facilities operating within the City and therefore does not participate in this activity. In Campbell, 296 of 309 facilities were inspected, 109 of 112 facilities were inspected in Los Gatos, and 8 of 8 facilities in Saratoga were inspected. In FY05-06, the West Valley Clean Water Program's Stormwater Inspector continued to conduct proactive investigations targeting vehicle facilities for additional education regarding storm drain issues. In Campbell, Los Gatos, and Saratoga, 16 facilities were visited and notified of urban runoff requirements and the role of the Clean Water Program. All sixteen facilities were found to be in compliance.

Copper and Nickel Outreach Activities. This year the West Valley Clean Water Program's Home page at www.cleancreeks.org was updated to better promote the use of the Car Wash Kit to contain waste water runoff at local fundraisers. The Fire Dept Hazardous Material Specialist, who trains the Industrial/commercial facility inspectors, also requested copies of the Car Wash flyer for distribution to supervisors of local car wash events.

Staff Training. The West Valley Communities place a strong emphasis on training. The Annual Reports reflect this with numerous references to the Staff Training Summaries; these summaries are located at the end of each section in the Annual Reports. In FY 05-06 training was expanded

by use of a video camera to tape various trainings for viewing by additional staff at a later date. The West Valley Clean Water Program will continue to emphasize better communication between WVCWP staff and municipal staff and to host training sessions that are worthy of staff time and convenient to attend.

Thank you in advance for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact me at 408.316.1233.

Very truly yours,

Cheryl C. Donnelly

IC/ID Program Evaluation

IC/ID Program Background

Monte Sereno is a strictly residential city with about 3,700 residents. It covers 1.5 square miles and is surrounded by the Town of Los Gatos. The only non-residential sites in the City are a public elementary school and City Hall.

The IC/ID reports in the City are primarily related to new or re-development of single family homes and landscaping projects or pool discharges. The Construction Inspection Engineer says that developers and contractors are very eager to maintain a good reputation both with municipal staff and with the residents. If an incident occurs, it is often the result of an accident or it is related to a construction site. The City Engineering Inspector says that all it generally takes is one word from municipal staff and the problem is addressed and resolved immediately.

Trend Analysis

In FY04-05 four (4) potential violations were investigated. Residential and construction sites were the incident sources for three (3) of the reported incidents. One (1) dumping report was not actually in the City's jurisdiction; it was trash noted on a median on Hwy 9, which is in Caltrans jurisdiction, although the City monitors the area because it does not have any other problem trash areas to address. The remaining three incidents were construction related. One involved a painter washing brushes where the runoff flowed to the street. Another was a result of pumping water from a hole dug for a swimming pool after it rained. Finally, a pile of dirt was left in the street during a landscaping job.

In FY05-06 the West Valley IC/ID inspector responded to eleven (11) reports of potential violations in Monte Sereno. Six (6) were considered non-incidents because one (1) was an allowable discharge and five (5) were complaints not found (although one of those was categorized as a miscellaneous incident). One miscellaneous incident was due to a broken sprinkler, which was fixed immediately. Finally the four violations that were given a verbal notice were, two (2) grey water discharges, one (1) landscape material dumping; and one (1) tracking soil discharge.

Overall, Monte Sereno had about the same number of actual violations (4) as it had in FY04-05 (3). The reporting is excellent as the City is small enough to afford frequent drive-by inspections of all residential areas. The Construction Inspectors are aware of each project that has a grading permit and keep a close watch over contractors. Seven out of eleven potential violations were reported by municipal staff to the West Valley Inspector for education and follow up. In FY06-07, new development discharges will remain a primary concern. Significant resources will be dedicated to continuing the effort to educate developers and contractors about erosion control and storm water requirements.

PUBLIC AGENCY ACTIVITIES: Operation and Maintenance

FY 2005-2006 Work Plan Self Evaluation Matrix

Activity	Task Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Storm Drain Operations and Maintenance				
Annual Storm Drain Cleaning	2004 URMP	Continue contract w/ WVSD. Continue schedule/cycle for inspection and cleaning of storm drain system (two year cycle for residential) Contractor, *McKenna Landscape*, will clean high leaf drop and other noted areas more frequently and as needed. Monte Sereno is strictly residential, with a population of approx. 3,800.	WVSD performs systematic storm drain cleaning and inspection of storm drains annually. Because Monte Sereno is much smaller than the other 3 West Valley cities, all of the City's storm drain systems were inspected and cleaned this year. City contracts with Eric McKenna Landscape Maintenance to provide additional cleaning and maintenance in problem spots discovered by or reported by the public	City Manager & City Engineer coordinate with WVSD/ per Agreement;
Training - Annual WVSD/ Storm Drain Oper. & Maint.	FY05-06 Workplan	Annual WVSD Storm Drain Operations & Maint. Supervisors training meeting - evaluate status of annual storm drain cleaning and provide training on other Pub Works maintenance issues.	The annual WV Storm Drain Op & Maint. Supervisor's workshop was held on June 19, 2006. Two (2) Monte Sereno staff attended, including the Assistant Engineer. Staff from WVSD, WVCWP, and the other WV Communities also participated. Topics included: • Storm Drain Maintenance findings by WVSD • Review of Emergency Response Procedures for SD overflow • Presentation on Street Sweeping for Water Quality • Power Point Presentation on BMPs for Streets, Rural Public Works and Storm Drain Maintenance Round table discussion on all topics	Led by WVSD and WVCWP; Attend by two municipal engineers, Hosted by WVCWP
Storm Drain Stencils or Signage	C/I item -Source Control Measure	Continue to replace and/or upgrade storm drain stencils or signage on storm drains or catch basins, as needed.	Assistant City Engineer has continued to share feedback and strategize with the other cities regarding the most effective way to sign storm drain basins. Storm drain catch basins with the City are all appropriately signed. Storm drain	City Manager & Assistant Engineer

Monte Sereno

FY 2005-2006 ANNUAL REPORT

Activity	Task Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			signage is replaced if it becomes worn, or bent (if it is metal). The City primarily uses painted stencils because they are easy to apply, they can be installed on flat surfaces (unlike the thermoplastic stencils) and the savings in staff time and cost of stencils is substantial. The metal plates, previously installed by the WV communities, are no longer applied because they tended to bend over time, exposing sharp edges and therefore creating a potential to injure pedestrians or bicyclists.	
Street Sweeping/ Pavement Management				
Street Sweeping Program	URMP	By contract – residential swept quarterly. High leaf drop and other noted areas cleaned more frequently and as needed (i.e., residential construction zones - swept by responsible party).	This year an annual total of **120.5 cubic yards** of debris was collected by sweeping **157 residential curb miles** in Monte Sereno. The Town of Los Gatos is contracted to sweep City streets. The Town purchased a new sweeper, which was used on Monte Sereno's streets for the first time in FY05-06. In addition to street sweeping, all residents are required to utilize large recycling bins for leaves and other yard waste as part of their trash collection service. Yard waste is not allowed in streets but waste from receptacles was picked up weekly. **A total of 1,376.4 tons of yard waste was recycled** in Monte Sereno during FY 05-06.	By Contract with Town of Los Gatos Street Maintenance Division
Street Sweeping Data Collection		Collect and review street sweeping data and provide number of curb miles swept and cubic yards of debris quarterly, to SCVURPPP for evaluation of effectiveness.	Street Sweeping data was collected quarterly and provided to the SCVURPPP at the end of the fiscal year.	By Contract – with Town of Los Gatos, Town PW Analyst and Sweeper Oper. collect data
Training	FY05-06 Work Plan	As needed, provide training meetings, on collection of street sweeping data to appropriate municipal staff.	As the City's sweeping contractor, Los Gatos staff attended the WVSD/WVCWP workshop on street sweeping, data requirements and state of the art street sweeping methods (June 19, 2006).	Mtg lead by WVSD and WVCWP; Attend by Building Inspector or engineering staff

Monte Sereno

FY 2005-2006 ANNUAL REPORT

Activity	Task Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Corporation Yard				
The City of Monte Sereno does not have a corporation yard. The City does not have any City-owned vehicles.				
Rural Public Works Activities				
Rural Public Works Perf Std	URMP	Continue implementation of Rural Public Works Performance Standard	One Rural Public Works maintenance project took place this year. Work to remove and replace pavement within its existing footprint was performed during dry weather on two streets. Work was performed by combined Town of Los Gatos and Caltrans crews under the supervision of Town Streets Superintendent, Steve Regan. The model Performance Standard is being implemented. BMPs have been reviewed annually with Los Gatos and Monte Sereno staff since they were updated as part of the City's Urban Runoff Management Plan revision in 2004.	City Engineer/ Bldg Official
Staff Training	FY05-06 Workplan	Train appropriate Public Works staff on the use of current BMPs and SOPs, as noted in the performance standard.	On June 19, 2006, WVCWP held a Storm Drain Maintenance workshop and gave a presentation for street maintenance staff on BMPs for Rural Public Works. The meeting included a round table discussion among staff from all of the West Valley communities. Requirements of the Performance Standard were reviewed and photo slides of BMPs for Rural Public Works were shown. Two (2) Monte Sereno engineering staff attended.	City Engineer/ Bldg Official
Rural Public Works Program Evaluation				
The City will rarely have any capital improvement projects (CIPs). All capital improvement projects would be completed by an outside contractor. The City discusses (rural public works) BMPs with outside contractors in the pre-construction meetings. The City inspects contracted rural public works in its jurisdiction and ensures the use of stormwater quality and erosion control BMPs. When construction of Rural Public Works takes place, measures will be implemented for erosion prevention.

Monte Sereno

FY 2005-2006 ANNUAL REPORT

Public Agency Activities: Operations and Maintenance Evaluation

Storm Drain Maintenance: The West Valley Sanitation District (WVSD) finished a major task during FY05-06 which will make storm drain cleaning procedures more efficient and the annual SD reports more useful to the WV cities. Since the project began in FY04-05, WVSD staff have been building a database (using asset mgmt software) that would number the storm drains at upstream and downstream locations and provide the street name. FY05-06 was the first year that the enhanced storm drain maintenance reports, with street names, were available to the cities. WVSD presented them at WVCWP's June 19th workshop. The reports document the status of each stormdrain and, if applicable, the nature of any problem. The majority of structures were "clean" but a few were noted as having obstructions (e.g. "leaves/paper"). Other descriptors that are available in the report are: mud/dirt, foreign object, rocks/stone, sand/gravel, etc. All structures, as needed, are cleaned at the time of inspection. The WVSD's report may be used by WV cities to help monitor POC problems, such as trash sites.

Street Sweeping: The residential streets of Monte Sereno are swept by the Town of Los Gatos by contract. The Town swept sixty fewer residential curb miles in Monte Sereno this year compared to FY04-05, but twice the number of cubic yards of debris was collected (120.5 cubic yards). This is compared to 67 cubic yards of debris collected in FY04-05. The increase in debris picked up for fewer miles was also true for Los Gatos this year. Since Los Gatos sweeps Monte Sereno's streets it is likely that the Town's new sweeper is picking up more debris per curb mile.

Yard waste collection (1,376.4 tons in Monte Sereno for FY05-06) helps reduce the amount of debris picked up by the sweeper because it provides alternative disposal for leaves. The West Valley Communities have selected a new contractor to provide garbage & recyclable collection. The new contract will begin in March 2007. Yard waste collection methodology and tracking may change when the current contract with Waste Management expires.

The WVCWP Mgr gave a street sweeping presentation at the June 19th West Valley Storm Drain Maintenance workshop, based on a Street Sweeping workshop held on 5/8/2006 in San Jose. The principal speaker at the 5/8/06 workshop was the editor of Worldsweeper.com. He provided material for the West Valley training. The Town of Los Gatos purchased a new Street Sweeper and used it for the first time in FY05-06. The Town's Sweeper Operator drove the street sweeper to the WVCWP workshop for viewing and questions by other municipal staff. The Town PW Superintendent gave a brief talk on why this model of sweeper was selected. According to the PW Superintendent, this PM10 certified regenerative air sweeper will generate fewer dust particles than the Town's previous model of sweeper. This type of sweeper is required in Southern California, but not yet required in Northern CA.

There are some benefits to cities if they can afford to invest in their own sweepers. Los Gatos' Sweeper Operator sweeps Monday and Friday morning because he knows when and where to sweep, and will adjust his route according to when cars are not parked in the way of the sweeper.

Training Evaluation: Workshop evaluation forms from the 6/19/06 WVCWP Storm Drain Maintenance training showed that all attendees thought it was "informative and worthwhile." Attendees also requested continued updates on storm drain maintenance and street sweeping practices. Most of those who attended stayed for the optional discussion between cities at the end of the workshop.

Corporation Yard SWPPPs: The West Valley communities have included a task in their FY 06-07 workplans to hold a round table meeting with municipal staff to review and update, if necessary, corporation yard SWPPPs. **Monte Sereno will not participate** because it is a strictly residential city, with a population of about 3,700. The City does not have a corporation yard and is not required to have a SWPPP.

Mngmt Plan		erosion or other related impacts. (Incorporate the HMP Report's standards, in their final state as approved by the Water Board, into the City's project approval process.)	these requirements over the next several years. However, with assistance from the WVCWP, City staff will continue to track regional implementation of the HMP.	
Training		Provide incremental training on HMP requirements to City staff via SCVURPPP workshops and/or in-house staff training.	WVCWP hosted a workshop on the updated HMP in Monte Sereno on 1/26/09. The City Engineer and Associate Planner/City Clerk attended.	SCVURPPP/ Engineering & WVCWP to attend
Reporting	C.3.f.viii	Provide development and implementation status and a summary of projects incorporating HMP measures in each Annual Report.	There were no HMP-regulated projects in Monte Sereno in FY '05-'06.	City Engineer
C.3.g Waiver and Compensatory Mitigation Program				
Waiver Program or Alternate Compliance	Permit C.3.g.	Currently a waiver or alternate compliance program is not offered by the City. Stormwater treatment BMPs will be required on all Group 1 and Group 2 projects. Any proposed alternative compliance must meet Provision C.3.g.vi conditions, and first be approved by the Water Board's Executive Officer.	All applicable projects are required to implement C3 requirements without using alternative or off-site compliance measures. The City does not foresee using a Waiver Program.	City Engineer Per Reg Water Board's approval
C.3.h Alternate Certification				
Alternate Certification reporting	Permit C.3.h	If alternate certification is used, list the projects certified by someone other than City staff and the mechanism for ensuring that outside certifiers are qualified.	Monte Sereno has a consulting civil engineering company on retainer to act as its City Engineer. Civil engineers from this company attend SCVURPPP C.3 training events and perform C.3 compliance reviews for the City. They are responsible for evaluating any Group 1 or Group 2 Project design to ensure it meets NPDES permit requirements.	City Manager/ City Engineer

MONTE SERENO

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2005-2006 ANNUAL REPORT

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
C.3.j Site Design Measures Guidance and Standards Development				
Site Design Measures Guidance and Standards	(Permit C.3.j.)	As feasible, continue to review local site design standards and guidance for possible revisions that would reduce impacts to water quality. Summarize updated status, if any, in the Annual Report.	There were no site design standard revisions in FY '05-'06.	City Manager /Planning Director
C.3.k Source Control Measures				
Source Control Measures	Permit C.3.k.	Whenever practicable, stormwater pollutant source control measures are incorporated into all development projects.	This year, the City required a sanitary sewer c.o. for one new pool installation. In FY '05-'06, there were no revisions to the City's source control BMPs.	City Manager / Planning Director
C.3.l General Plan Update				
General Plan	Permit C.3.l	Revise General Plan, at next planned update, to reflect principles and policies needed to address C.3 requirements.	During FY '05-'06, no changes were made to the City's General Plan. In early FY '06-'07, the City will begin an 18 month General Plan revision review.	City Manager
C.3.m Water Quality Review Processes				
CEQA Review	C.3.m.1	City will continue to evaluate water quality effects & identify mitigation measures when conducting Env Review Process for all projects, consistent with the City's URMP and Program guidance. If applicable, report on updates to the City's Environmental Review process.	There were no changes to the City's CEQA review process in FY '05-'06.	Planning Director

FY 2005-2006 ANNUAL REPORT

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
C.3.n Reporting Requirements				
C3 Project Reporting	Permit C.3.n.i. (C.3.c.)	In Annual Report, list Group 1 and Group 2 projects by name. Include location, project type (per C.3.c.), size (ac. or sq. ft.), and impervious surface area. Report square footage of land disturbed for redevelopment projects	There were no Group 1 or 2 projects approved in Monte Sereno during FY '05-'06.	City Engineer
C3 Project Reporting	Permit C.3.n.ii. (C.3.c.)	Report on type of treatment BMPs used, numeric sizing criteria used, O&M inspections and if needed, follow-up actions. Also list site design measures used, and source control measures required.	There were no Group 1 or 2 projects approved in Monte Sereno during FY '05-'06.	City Engineer
Reporting - Pesticide Reduction Measures	Permit C.3.n.iii.	Summarize the types of pesticide reduction measures required (such as by conditions of approval) for new development and significant redevelopment projects, Summarize the percentage of new development and significant redevelopment projects for which pesticide reduction measures were required.	On all permitted projects, native plants are recommended and plant selection is reviewed as part of the planning approval process.	Planning Dir

Planning Procedures Evaluation

Site Design and Source Control measures are being required on all new development projects via Monte Sereno's "Residential Design Guidelines" and Monte Sereno's Site Development Permit requirements. The City continues to encourage stormwater measure, including flow controls, on all projects. Developers and property owners are receptive to the suggestions, making the process run very smoothly. BMPs used during FY'05-'06 include the following, all part of single-family residential projects:

1. Rocky swales to energy dissipators at two projects: 18020 Saratoga-Los Gatos Road and 18001 Constitution Avenue.
2. Permeable pavement 15143 Via del Sur.
3. Drywells, which overflow to vegetated area, were required (per City Engineer) on all residential development projects, where feasible (except where the ground water level is too high).

Attachment 4A

The City of Monte Sereno
Organization Structure of
BMP Operation and Maintenance Verification Program
(Provision C.3.e)

As a condition of the development permit, each owner of a Group 1 and Group 2 project in Monte Sereno is required, by Municipal Code Section 08.040 to enter into a recorded covenant with the City for on-going operation and maintenance of all permanent on-site BMPs. This obligation runs with the land and is binding on all future owners of a Group 1 and Group 2 property. The City uses submittal requirements for subdivision approval to notify developers of this requirement. (All Group 1 and 2 projects will be subdivisions, since the City is zoned as **strictly residential** and does not have any large municipal projects)

The City keeps records of the location, ownership, and inspection status of permanent BMPs at private and public Group 1 and Group 2 properties by collecting an NPDES Permit Provision C.3 Data Form for each of these projects. The City maintains this information in an Excel spreadsheet.

After the project is completed, the City Engineer will inspect the BMPs at each Group 1 and Group 2 site annually. Any enforcement issues would be referred to the Monte Sereno City Manager for further action.

LEGAL AUTHORITY TO IMPLEMENT

The legal authority of the City of Monte Sereno to implement this program is based upon the following:

Monte Sereno Municipal Code is on the internet at www.montesereno.org/documents/

Monte Sereno's Municipal Code

Title 8 – Public Works

Chapter 8.04	*Storm Water Management and Discharge Control Policies and Guidelines* (ordinance NS-141 adopted on 1/7/04)
8.04.020	Purpose and Intent – Control of discharges to the storm drain system consistent with the City's NPDES Permit
8.04.180	Reduction of pollutants in storm water – controls to minimize long-term, post construction discharge of storm water pollutants from development projects
8.04.190	Ensures proper maintenance of water treatment facilities and source control measures by property owner
8.04.210	Authority to Inspect - Right of City to inspect storm water treatment measures
8.04.230	Enforcement Authority – gives enforcement official any enforcement powers necessary to effectively implement the storm water regulations in this chapter

Background Data for BMP Type

The *Standard Stormwater Treatment BMP Inspection Data Collection Form* (Inspection Form) lists twenty stormwater treatment BMP types (see Section III). Inspectors, data entry staff and others who use the Inspection Form can refer to the California Stormwater Quality Association (CASQA) and SCVURPPP Fact Sheets for background information. The CASQA Fact Sheets are numbered (see below) and are located in the CASQA *Stormwater BMP Handbook for New Development and Redevelopment,* as well as SCVURPPP's *C3. Stormwater Handbook*. The SCVURPPP Fact Sheets are also located in the *C3. Stormwater Handbook.* Both Handbooks are available online.

<u>CASQA Reference Number</u>

CONSTRUCTION INSPECTIONS

FY 2005-2006 Work Plan Self Evaluation Matrix

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
	URMP	Staff Training Participate in and support SCVURPPP sponsored workshops/ info sessions on erosion control and construction BMPs; support distribution of related materials.	On December 8th WVCWP IC/ID Inspector and Manager attended the Water Board's Construction Site Management and Erosion Control Workshop and spoke to attendees about the organization of the WVCWP, the need to report all construction and erosion incidents and how trend analysis determines how programs conduct public outreach (to effect behavior changes).	WVCWP to coordinate w/ SFEP; attend by WVCWP or City Bldg or City Eng inspector
	URMP	Construction Inspections Continue construction site inspections for stormwater issues (i.e., mudtracking, mat'l storage, housekeeping, etc.).	Monte Sereno had approximately 25 active grading permits from October 1, 2005 to April 15, 2006 (all single-family dwellings not part of a larger common development). Municipal Code Section 9.04.120 requires erosion and sediment control materials to be onsite by October 1st and in place before October 15th or a "stop work order" will be issued. Periodic monthly inspections are conducted by the City engineering staff including inspections before, during, and after every major storm event. Sites with potential problems are inspected at least once a week but not more than twice a week. Residents usually call to report an issue if erosion control is not installed correctly. See the construction inspection incident spreadsheet (following this table) for details.	City Engineering Inspectors

MONTE SERENO

FY 2005-2006 ANNUAL REPORT

Construction Inspection Evaluation

Construction Site evaluation of trends:

FY05-06		Previous Year - FY04-05	
Grey Water Discharge	2	Dewatering	1
Miscellaneous (reported but looks okay, no action)	1	Complaint Not Found	2
Tracking Soil	1		
Complaint not found	4	Total Number of Incidents	3
Total Number of Incidents	8		

Incident reporting:

This year the WVCWP Inspector went out on eight (8) construction-related incident calls in Monte Sereno. Four incidents were either not a problem or were in good shape by the time the WV Inspector arrived. Coordinated efforts between the City's Building and Engineering Inspectors and the WVCWP Inspector are working well. Engineering/erosion control inspectors have informed WVCWP that developers/contractors in the City are very eager to protect their good reputation with local residents and City staff. Any mention of a potential violation (verbal notice) from an inspector results in immediate action to comply. Monte Sereno, being small (population about 3,700) and a strictly residential community, has construction sites that are closely scrutinized by neighbors and inspectors. In addition, the WVCWP office is in Monte Sereno, which makes it easy for Clean Water Program staff to keep an eye out for potential problems on the way to and from work. Potential incidents are inspected and re-inspected until final resolution is achieved. (See the Construction Site Incident spreadsheet following this section)

Construction Site Erosion Control Workshops,

WVCWP arranged with SFEP to hold the Santa Clara Construction/ Erosion Control Workshop on Dec 8th and 9th in 2005, at Campbell's Community Center. City of Campbell provided the venue so that the workshop could be held after the preparation time for rainy season when inspectors have more time to attend trainings. Monte Sereno Building and Engineering Inspectors did not attend. However they did attend the SFEP sponsored training in FY04-05.

The Monte Sereno Construction Inspection Program works well:

Monte Sereno construction activities are well monitored and developers generally act responsibly and are aware of stormwater issues. No changes are planned for this program. Monte Sereno has a new engineering Inspector who will meet with the WVCWP staff in FY06-07 to review NPDES permit requirements, the City's Construction Inspection Performance Standard, and the WVCWP IC/ID Inspection Program procedures. Continued public outreach efforts and further training and communication between municipal inspection staff and the WV Stormwater Inspector will help maintain Mont Sereno's success in this area.

	SCV Program PMP (II.A.1)	a. Watershed Education and Outreach Campaign Support multi-year watershed education and outreach campaign.Participate in campaign development and special projects. If funding is available from the SCVURPPP Budget, campaign will include funding for educational programs at the Alviso Ed Center and funding for ZunZun performances in local schools. As SCVURPPP Budget permits, continue establishing partnerships with local recreational attractions to promote watershed messages. See SCVURPPP Project Work Plan for details.	*WEO:*.WVCW Pgm Mgr assists via active participation in WEO Ad hoc Task Group. *Happy Hollow Halloween Event on Sunday 10/30/05* 1 WVCWP staff member & 1 WVCWP volunteer assisted at this event..2 WVCWP mascot costumes were used: a Clapper Rail & a Saltmarsh Harvest Mouse. Wearing the costumes, they handed out educational materials and gave visitors an opportunity to play a watershed Bean Bag Game. The game teaches players to select destinations (stormdrains, sanitary sewers, or hazardous household waste drop-off) for water and other materials or substances. *Home and Garden Show on Saturday and Sunday 5/6/06.* 2 WVCWP staff worked two shifts at the San Jose Convention Center. In addition to program materials WVCWP staff handed out pencils engraved with water pollution prevention messages and the WVCWP website address. Topics of interest were safe fluorescent bulb disposal, safe paint and pesticide disposal; less-toxic gardening methods. Some people were interested in controlling specific pest infestations. A few parents asked if WVCWP would visit	WVCWP staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			their child's classroom to give an Enviroscape presentation WVCWP staff talked to at least 150 visitors to the booth. WVCWP arranged for 2 Program-sponsored Zun Zun assemblies to be presented at Saratoga Elementary School (May 2, 2006). The assemblies were provided to the School as a thank you for Saratoga students' and parents' participation in a Creek Clean-up on April 1st. The school received two (2) vocabulary lists (one for K-2 and one for 3-6) and an information sheet about the assembly content for teachers to refer to. Teachers were asked to familiarize the students with the vocabulary words prior to the assembly. Teachers also questioned students after the assembly to determine what was learned. The results are summarized in the Program's FY05-06 Annual Report.	
	NPDES Permit, PMP (II.A.12)	b. Pesticide User Outreach Project If SCVURPPP Budget allows, provide funding and participate in implementing IPM Store Partnership and Household Chemical Management Projects. Project scope will include items in Program's Pesticide Management Plan based on provision c.9.d. of the Permit for outreach to residents, commercial businesses, and pest control operators.	The WV Clean Water Program Manager participated in the SCVURPPP IPM Ad Hoc Task Group. See SCVURPPP Annual Report for details on accomplishments. See above: *Home and Garden Show on Saturday and Sunday 5/6/06.* *Orchard Supply Hardware store point-of-sale IPM -May 23, 2005* West Valley staff helped the SCV Program and *Our Water Our World* staff to set up Sunnyvale's Orchard Supply Hardware store's gardening aisles with 'shelf talkers' which relay IPM information to customers. Shelf talkers educate the general public on less-toxic methods to control pests and on child- and pet-safe solutions for homes and gardens. *March 22, 2006 Turf Workshop*	WVCWP Staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			Attendees included municipal staff from Campbell, Los Gatos and Saratoga and supervisor for Los Gatos private golf course. School Districts, golf course staff and press were invited. Cornell University Turf Specialist presented latest research in management methods to reduce pesticide use on turf. Evaluation comments included "Great Presentation/Program" and "Learned a Lot!" See "Pesticide Management" section "*Training for Applicators*". Formerly, WVCWP worked directly with the **Summerwinds Garden Center** in Campbell to provide IPM educational materials and to coordinate with Our Water Our World and SCVURPPP activities. In the interest of streamlining activities, SCVURPPP is now working directly with this garden center, and WVCWP is no longer their main contact.	
	NPDES Permit, Provision c.9.c.	c. Mercury Pollution Prevention Outreach This project will encompass local implementation of the Program's Mercury Pollution Prevention Plan including public education on: 1) the effects of mercury in the environment, and 2) products containing mercury and proper disposal of such products	*Fluorescent Lightbulb Recycling Flyer* WVCWP worked to update and improve its flyer created last year, listing local drop-off points (5 hardware stores) which are part of the fluorescent bulb residential drop-off program. Hours and location of stores are listed, along with HHW contact info. The flyer now reminds residents that **it's illegal to put fluorescent bulbs in the trash or home recycling bins**. The flyer was distributed at community events.	WVCWP Staff
		Outreach Event	*January 28, 2006 **Free** Hazardous Waste Recycling Event* - for recycling of TVs, monitors and laptops. Event was	WVCWP Staff to coordinate

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
		Not part of Work Plan – additional activity	sponsored by all four West Valley Cities through West Valley Clean Water Program. The event was held at Los Gatos Municipal Yard, and Los Gatos and Saratoga staff assisted. The event was for West Valley businesses, residents and schools. **Flyers/posters, press releases and an ad were created** for this event noting that E-waste can leach toxic metals (i.e., mercury) into our water, and that by using a responsible recycler we can help prevent export of our waste to foreign dumps where mercury leaches into the environment. (See above row for details on outreach materials). Over 250 cars brought E-waste for recycling. Posters placed around the site highlighted the environmental affects of improper E-waste disposal. One high school coordinated with WVCWP prior to the event, and dropped off pallets of E-waste on the previous day.	

Public Information/Participation Program EVALUATION - *SCV Program Projects/Support*

Zun Zun Assembly: WVCWP received an evaluation courtesy of the School Principal's Assistant: "Yes, it was very much enjoyed by all."The kids learned a lot, now know what a watershed is, understand the environmental issues. The 1st grade teacher was very impressed.... I thought it was very cute. I learned some things too!" The final comment that "I learned some things too!" reinforces what WVC staff have generally found to be true: adults may be more receptive to learning about stormwater issues, and proper behavior, if the messages are funneled through the children.

Mercury Outreach/ E-Waste Recycling Event: WVCWP used a portion of staff time and funds to organize a Free E-Waste Recycling Event for West Valley residents, businesses and schools, and to publicize Mercury issues while doing outreach for the event. The WVC were challenged in trying to decide on a

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
meaningful way to reduce mercury and copper discharges. WVCWP pursued an opportunity to reduce the illegal dumping of televisions and monitors (esp with the increase in sales of flat screen products and the obsolence of many TV and computer monitors). UNITED DATATECH was willing to help the WVC conduct this service at no cost. The television that was pulled out of a Los Gatos creek in December emphasized the importance of this event. The *Los Gatos Weekly* and the *Saratoga News* ran articles about the TV in the creek; these papers, along with the *Campbell Reporter* and the *Los Gatos Daily News*, printed details about the WVCWP event. A January date was chosen, so that residents could dispose of outdated E-waste if they had received new electronic items during the holidays in December. Outreach was conducted during December and January. Outreach included press releases and flyers which were sent to Campbell, Los Gatos and Saratoga Chambers of Commerce and School Districts. This resulted in the information being posted on Chamber and School websites and in electronic e-mails, so that it reached thousands of citizens. Funds were also used to retain a PR firm which worked with WVCWP to develop an eye-catching newspaper ad, and a timely, captivating newspaper article. WVC felt that this outreach money was well-spent in a successful, low-budget media campaign that increased awareness of mercury issues. The outreach included information on mercury toxicity, and the need to prevent mercury (and other E-waste) from landfill dumping, where it can leach into water – both at home or abroad. A strong emphasis was placed on the fact that the event was organized with a responsible recycling firm, which would use appropriate recycling methods for all materials. Residents responded with overwhelmingly positive feedback. Some had been saving monitors and TVs for years. The event was very successful in that over 250 cars brought E-waste, and a high school arranged to bring over pallets of E-waste. Residents want more events like this one, since it makes a difference. WVCWP staff will plan one for FY06-07. (See *Mercury Pollution Prevention Activities* section for further details.)

Public Information/Participation Program EVALUATION – *B. Joint Projects: General Outreach – Materials Distribution*

OUTREACH MATERIALS

The "Grow-It Guide" continues to be the most popular IPM literature. Although WVCWP and the cities/town make available a variety of IPM materials at public places and community events, it is most common for residents to pick up only the Grow-It Guides.

Items for children are also popular. WVCWP continues to search for affordable, fun and informative children's outreach material. The "Kids Guide to Backyard Bugs" is always popular, but supplies are very limited, so these are distributed sparingly. Many more would be taken, if they were available. This year WVCWP evaluated a children's coloring book: "Pest or Pal" – a coloring book with text related to IPM and less-toxic pest management. The item was well-received. However, it is rather high-priced to be given out in large numbers.

WVCWP also purchased numerous copies of a hard bound picture book **"All The Way To The Ocean"** -- depicting how stormdrains carry trash & other pollutants into nearby water bodies. The book was donated to classes which held Enviroscape presentations as a "Thank You". The book will also serve as a means for teachers to introduce the subject to their classes in coming years, prior to the students viewing the Enviroscape. Copies kept at WVCWP can also be loaned to schools and libraries when a book is needed for a Story Time situation.

Efforts were directed to finding an inexpensive, desirable item which people would be happy to pick up at events, and which would reinforce Stormwater messages. WVCWP was also looking for something with its website address, which would be kept around the home so that residents could refer to it in order to be able to reach the website easily. WVC decided on using pencils made of recycled denim (blue) and recycled money (green). Slogans were chosen and printed on the pencils, along with the website address. The pencils proved to be very popular outreach items, and were found to be a good way to keep the subject and the website address in front of people.

Another effective outreach piece was a flyer created to promote new watershed-themed youth programs at Don Edwards Nat'l Wildlife Refuge. Schools in the Campbell School District agreed to pass these out to their students, so that they could be taken home. In June 2006, **8,367** of these were distributed through 6 schools in the District. The Education Center at **Don Edwards subsequently reported a noticeable increase in calls and participation related to youth programs**.

Extensive outreach was conducted concerning the E-Waste Recycling Event in January 2006. Posters were placed in numerous public places and flyers were distributed to Real Estate offices. However, based upon response from those who attended the event, it appears that the overwhelming majority of attendees learned about the event through ads and articles in the local weekly newspapers.

GENERAL OUTREACH				
Source	**WP Task**	**FY05-06 Work Plan Tasks**	**FY 05-06 Accomplishments**	**Responsible Party**
General	NPDES Permit, Provision c.4 and c.9 & PMP (II.A.4.)	b. Participate in Community Events 1) Promote watershed messages by participating in community events (e.g., farmers market, festivals, creeks clean-ups, etc.). 2) Conduct or participate in local activities that are coordinated with the Watershed Education & Outreach campaign (as budget permits). 3) including outreach events targeted at pesticide users.	**1)** *Saratoga Library Story Time Sept. 05:* the Library used a "Rivers" theme for its Story time. WVCWP Coordinated with the library to make Enviroscape presentations at the evening Story time. WVCWP arranged fto have 2 books read, related to watersheds and wildlife in local creeks. The Enviroscape was used to demonstrate runoff issues. Approx. 27 children participated and approx. 21 parents viewed the presentations. Numerous materials were taken. SEE ATTACHMENT PIP 6A FOR A PHOTO OF THE ACTIVITY **2)** *Audubon Wildlife Fair 10-22-06* WVCWP partnered with local Sierra Club chapter & Audubon Society to present a table at Audubon's "Wildlife Education Fair". Table featured: Enviroscape hands-on watershed model demonstrating pesticide pollution in runoff, a display on dangers of diazinon for birds, and IPM materials; Sierra Club distributed California Golden Poppy seeds to promote pest-resistant planting. The Wildlife Fair is held at the Audubon facility along City of Saratoga's northern border. Approx. 25 children participated in the Enviroscape, with over 25 parents watching. Participation was less than previous years due to	WVCWP Staff WVCWP Staff to coordinate with Municipal Staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			the presence of a SCV Water District table with Enviroscape, which attendees saw first, in the flow of traffic. **3)** For participation in Program WEO events, see "**A. SCV Program Projects/Support"** at the beginning of this PIP Section. **4)** *"Tax Free Day" at OSH (bordering Saratoga & Campbell) 10-8-05* Spoke with at least 45 customers and employees (some with family or friends who are not included in this total). Gave out HHW, & IPM Materials (see above). Talked to customers about disposing fluorescent bulbs at HHW or bringing bulbs back to OSH (this site was a partnering drop off location). One elementary school teacher expressed interest in an Enviroscape presentation for 5th grade. **MUNICIPALLY-SPONSORED EVENTS** **CAMPBELL** *Creekside Clean Up* Public Works staff organized and supervised a community creekside Clean-up event at which materials were also distributed. The Clean-up was held in conjunction with "Keep California Beautiful". **CAMPBELL**: Events with Materials Distributed *Arbor Day* Public Works staff organized and supervised an Arbor	

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			Day event at which materials were also distributed. *Neighborhood Meetings* Public Works staff sponsored 2 Neighborhood Meetings at local schools. Stormwater runoff was among the issues discussed, and materials were distributed. **LOS GATOS** *Farmers Market Event 4-9-06* WV Staff and one volunteer presented water quality topics using the Enviroscape model. Fifty people visited the booth. IPM materials and WVCWP Pencils were distributed. **SARATOGA**: Events with Materials Distributed *Building Bridges Event Oct 9, 2005* Saratoga City staff distributed materials at the "Building Bridges" event at West Valley College. Materials concerning HHW, Copper, Mercury and IPM were distributed. *Mustard Walk Feb. 2006* This family event is based upon the Heritage Orchard and serves as an appropriate place to distribute gardening/IPM materials. City staff place decorative baskets with IPM literature for residents to take. Grow-It Guides and WVCWP pencils were the most popular items.

			Press Release for 9/17/05 Creek Clean-up – e-mailed to Westmont High School 8/30. PR was posted on school website, and included in daily email bulletin. **Oct. 05** In response to a Press Release, the San Jose Mercury News, on 10/15/05, printed an article on a Town of Los Gatos Trash pick-up event, sponsored by a local church. The church had asked Town staff for recommendations on useful volunteer activities, and the litter pick-up was suggested and was a successful event. **March 06:** Press release to gardening columnist for 3 local papers; information on upcoming Less Toxic Turf Management workshop and invitation to attend workshop. **April 06:** In response to a press release, the Saratoga News printed a brief article on the upcoming Creek Clean-up along Saratoga Creek in Saratoga Village. **May 06** Press Release for 5/20/06 Creek Clean-up – e-mailed to Westmont High School. PR was posted on school website, and included in daily email bulletin.	
General	FY05-06 CI Item	f. WVCWP Web-Site Continue to expand and update WVCWP web-site to provide new educational material to the public e.g. on IPM, mercury, trash, copper/nickel & HHW.	• **December 14, 2005** WVCWP created a web "flyer" for a **FREE** TV/monitor/laptop collection event to take place on January 28, 2006. (See A. SCV, c. Mercury Pollution Outreach). The flyer was also placed on municipal websites.	WVCWP Staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			• **Early Spring 2006:** staff changed the "Take Action" page to focus on **less toxic gardening and affect of pesticides** on water quality. The new page highlighted links to "Our Water Our World" website. • Spring 2006: On the WVCWP Home page, staff added a car wash/copper graphic and text. Changes included adding a link to WVCWP's *Car Wash Kit flyer* with info on copper as a water pollutant.	
		Municipal Web-Sites	**Campbell** The City of Campbell created a completely new website in FY 05-06. The Public Works link can now be followed to a full page of links relating to Stormwater, NPDES and C.3 requirements. The page also features links to PDFs of all the "Construction Tri-folds" which list BMPs. In addition, the site has a page on community/creek clean-ups, including statistics from last year's clean-up. **Los Gatos** The Town of Los Gatos created a completely new website in FY 05-06. The Public Works link can now be followed to a full page of links relating to Stormwater, NPDES and C.3 requirements. The site allows users to search for terms such as "Car Washing" or "Draining Pools". This brings up a Stormwater Page which gives instructions on correct behavior for these activities, plus other issues such as Pet Waste, Dirty Water down the Stormdrain, etc. **City of Saratoga**	Municipal Staff

			Saratoga's home page includes links to Household Hazardous Waste disposal advice, and a Street Sweeping Schedule, Map and information.	
PUBLIC PARTICIPATION				
Public Partici-pation	FY05-06 CI Item	g. "Creek Keepers" Program Continue development and promotion of trash monitoring activity. Develop and implement other clean-up activities as feasible.	Promoted through Press Release for 9/17/05 and 5/05 Creek Clean-ups (Coastal Cleanup Day & Nat'l River Cleanup) – e-mailed to Westmont High School. **Trash Monitoring was conducted at 4 different Clean-up events in FY 05-06.** Two Creek Clean-ups were held at an established site: San Tomas Aquino Creek at Westmont High School (which serves Campbell, Los Gatos, Monte Sereno and Saratoga students). Most of the participants are high school students, and they have been proven to be quite receptive to helping with Trash Monitoring. WVCWP sponsored the cleanup and trash monitoring events on 9-17-05 and 5-20-06. To prepare for the event, flyers were distributed to 6 local schools. Students and parents were trained to conduct trash monitoring and told why trash has become a pollutant of concern (POC) for the S.F. Bay area. 9-17-05 – 54 volunteers 5-20-06 – 50 volunteers **One Clean-up was sponsored by the City of Campbell**. WVCWP tried a slightly simplified Monitoring form at this	WVCWP Staff & WVCWP Staff to coordinate with Municipal Staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			event. Community volunteers were responsive to filling out the forms. **One Clean-up was sponsored by the City of Saratoga along with WVCWP**. Saratoga Elementary School students and their parents participated in the Clean-up and Trash Monitoring. Due to the students' young age, parents did most of the Trash Monitoring. Participants noted that recording the Trash made them much more aware of the extent of the litter and dumping. 4-1-06 – 48 volunteers See "Trash Management" section for details on Trash Monitoring. Clean-ups and Trash Monitoring were promoted via: **Creek Clean Up Outreach – Westmont 9-17-06** **Calif. Coastal Clean Up Day** PR was posted on Westmont website, and included in the daily e-mail bulletin. 34 Flyers distributed to other local schools for 9/17/05 Cleanup: 1 + school newsletter Blackford Elementary (school will put into their newsletter) 10 – Monroe Middle School 1 -- Sherman Oaks Community school 1 -- Rosemary Elementary 10 -- McKinnon Community school 10 – Del Mar HS

Public Information/Participation Program Evaluation

For additional Evaluations, see Sections above***:***

- ***SCV Program Projects/Support*** and
- ***Joint Projects: General Outreach – Material Distribution***

Participation in Community Events: WVCWP staff found its participation in the **Saratoga Library Evening Story Time** to be a very effective means of reaching both parents and children. Librarians and parents expressed appreciation for the opportunity for children to use the Enviroscape. After this event, the Campbell and Los Gatos Libraries were contacted by phone and by e-mail (with photos of the successful Saratoga event). However, WVCWP was not able to elicit similar invitations from these libraries. It is possible that an offer to use the Enviroscape during summer outdoor Reading Program activities would instigate invitations.

At the **Audubon Wildlife Fair** this year, the SCV Water District was also a participant, and also brought an Enviroscape. This diverted visitors who would have participated in WVCWP Enviroscape activities. It is possible that WVCWP will not attend this Wildlife Fair in FY 06-07, in order to avoid duplication of efforts with the SCVWD.

"Tax Free Day" at Orchard Supply Hardware: WVCWP appreciates OSH's permission to approach customers and employees in the store. The event remains an effective means of reach residents, since it allows an opportunity to speak with them personally, and to approach people who are actually buying items (gardening materials, fluorescent bulbs) which are addressed by our outreach materials.

Creek Clean-up Outreach: Many flyers were distributed for the Sept 05 Creek Clean-up. It appeared that these flyers did not really result in volunteers attending the event. There was some response from the Westmont High School website announcement and the Parent/Teacher/Student Assn. 'daily e-mail". It was found that the best response was the result of students learning about the event from a Westmont High Science teacher, who also offered extra credit for students who participate and then write a review. In the future, WVCWP will use less efforts on flyers, and more efforts on working with teachers. For the May 06 Creek Clean-up at the site, a WVCWP spoke with school staff and put minimal efforts into additional outreach. At this event, the turnout was almost exactly the same as the September event – even with minimal additional outreach. This turnout is about the maximum that the site can handle, so it appears there is no need for much outreach beyond working with the school.

Schools Outreach: The new Enviroscape curriculums, developed this year to address Calif. State Standards for Kindergarten and 4th grade, were piloted successfully. Teachers expressed appreciation for the classroom activity, and requested presentations for the next school year. The 4th grade Enviroscape presentation at Saratoga Elementary School was given prior to a Creek Clean-up, which the students were invited to attend. The classroom presentation and

Creek Clean-up were followed by 2 Zun Zun assemblies at the school. Teachers, school administrators and parents all commented that they felt both students and adults had learned new ideas and information, and the school will be more inspired to take notice of its local Saratoga Creek which is only 3 blocks away.

WVCWP also initiated use of a hardbound picture book “All the Way to the Bay” as a means of keeping the Stormwater Pollution subject in teachers’ minds. The book is given as a gift after an Enviroscape presentation. It is hoped that the presence of the book will help stimulate interest in the subject in subsequent years, and among additional teachers.

All West Valley businesses, residents & schools are invited to bring unwanted TVs, monitors and laptops to this FREE recycling event.

January 28, 2006
9 am – 1 pm

41 Miles Ave. – Los Gatos
(Municipal Yard – Near University Ave. & Highway 9)

Here's your chance to act locally, and make an impact globally, while clearing up your clutter in the process! Your support of this event ensures that the hazardous substances in these items will be recycled responsibly to prevent toxic water contamination and air pollution, both locally and in Third World countries.

Brought to you by Campbell, Los Gatos, Monte Sereno and Saratoga through the West Valley Clean Water Program.

Saratoga youth named 'Eco-Hero' award winner by Action for Nature

By Kaustuv Basu

"No Dumping: Flows directly to bay"--almost everyone has seen that sign on a sidewalk.

Saratoga David Marash-Whitman, 13, wanted to learn more about it.

As part of a school project two years ago, he decided to find out more about household pollutants that can damage creeks and the bay.

One of the first people he contacted was Cheri Donnelly, program manager for the West Valley Clean Water Program. She told him about the pollutants that were the most dangerous to the creeks. That project was completed a while ago, while David was at South Peninsula Hebrew Day School.

David has moved to Kehillah Jewish High School since then but he has continued with his mission of educating the public about the dangers of pollutants.

Last month, he won the International Young Eco-Hero Award from Action for Nature, a local ecology group, for his efforts. He is one of several youngsters worldwide chosen for their commitment to protecting the environment.

"I was horrified to learn how toxic residential products like paint-removers and pesticides

can affect creeks," David said.

He said that he advocates his cause whenever he gets a chance. "My next project is to get kids to help clean up the local creeks," he said.

Donnelly said that David does a very professional job when he makes presentations to people. "People have no idea how litter has damaged our creeks," she said.

But advocates such as David are helping, she said.

B. Shimon Schwarzschild, the founder of Action for Nature, said that he is delighted with efforts made by young people all over the world.

"Individuals can make a difference," Scwarzschild said.

Electronic Waste Discovered in Local Creek
Free Recycling Event in Los Gatos Aimed at Preventing Water Pollution

(Los Gatos, CA) – Following recent storms, Los Gatos Town staff pulled a discarded 27" television from a local creek. The culprit remains unknown. While they may have thought this was nothing more than littering, the potential problem for this crime is much bigger. When not recycled or disposed of properly, electronic waste can result in toxic pollution. E-waste leaches lead, mercury, copper and other metals into the groundwater, posing serious health hazards to people and wildlife.

As flat-screen plasma TVs and LCD monitors become more affordable, consumers are replacing conventional cathode ray tube (CRT) TVs and monitors at a rapid pace. Judging by holiday sales and pre-Super Bowl ads, there will soon be many conventional TVs gathering dust – or worse, as we found in a local creek.

To help local residents properly dispose of this waste, the municipalities of Campbell, Los Gatos, Monte Sereno and Saratoga are hosting a FREE recycling event for TVs, computer monitors and laptop computers.

The event will be held in Los Gatos at 41 Miles Avenue (near intersection of University Ave. & Highway 9) on January 28th from 9 a.m. to 1 p.m. The West Valley Clean Water Program (www.cleancreeks.org), the official storm water agency for these 4 municipalities, is partnering with local recycling firm United Datatech Distributors (UDT) for the event.

UDT was selected for their high standards of materials handling. UDT does not export waste to third world countries, where children and laborers seeking salvageable parts are exposed to toxic e-waste which pollutes local water supplies or billows noxious air pollution when burned. UDT also keeps these deadly materials out of our local landfills, where runoff containing hazardous substances can seep into our groundwater.

The issue of littering aside, it is illegal in California to dump TVs and monitors in landfills. Garbage collection for local municipalities prohibits putting these items into residential garbage cans. Instead, these items must be handled by a credentialed recycler, often for a fee. This event is a great way to avoid the fee, get a jump on spring cleaning, and avoid desperate disposal measures.

Free Recycling Event
TV - Monitor - Laptop Recycling in Los Gatos

Quick Facts:

What: FREE Recycling/Collection event
Items Accepted: TVs, Computer Monitors, Laptop Computers (working or not)
When: Saturday, January 28th, 2006
Time: 9 a.m. to 1 p.m.
Where: 41 Miles Ave., Los Gatos (near intersection of University Ave. & Highway 9)
Who is invited: Residents, Businesses, Schools in the South San Francisco Bay Area
Further info at: www.cleancreeks.org or 408.354.5385 (tip line)

- The EPA estimates that Americans discard 2 million tons of electronic waste each year.
- The EPA considers old cathode ray tube TVs and monitors the most hazardous items.
- E-waste leaches mercury, lead, copper, etc. into our ground water.
- Irresponsible recyclers ship e-waste to Third World countries where it pollutes land, air and water, posing serious health risks to residents. Visit www.ban.org for details.
- Support of this event sends a message about ethically responsible recycling practices.
- Information about United Datatech Distributors (UDT) can be found at www.uniteddatatech.com

Creek is no place to dump computers, television sets

By Jennifer McLain

For some, recycling is second nature. But when it comes time to toss out that old TV or computer monitor, there's no such thing as a recycle bin for "e-waste only." Some resolve the problem by throwing the electronics out in the dumpster--forgetting, not realizing or not caring that the toxins in them can eventually seep into groundwater. Others just ignore the "no dumping" signs and cast them in the creek.

"We found a 27-inch TV in the Los Gatos Creek a few weeks ago," said Los Gatos resident Cheri Donnelly, program manager at the West Valley Clean Water Program. The clean water program started in 1994 and is dedicated to preserving and protecting the water in Campbell, Los Gatos, Monte Sereno and Saratoga.

"People are desperate to get rid of their old electronics, but they can't just put them in the landfill because the toxins can get into our groundwater," Donnelly said.

One alternative is to take the old electronics to a free TV-and monitor-recycling event from 9 a.m. to 1 p.m. on Jan. 28 at 41 Miles Ave. in Los Gatos.

The water company is teaming up with United Datatech Distributors and ECS Refining for the event. Donnelly said that unwanted electronics brought to the recycling event will be handled responsibly.

"At a lot of these types of events, people feel giddy and gooey that they are doing the right thing, but what they fail to realize is that a number of these places are shipping these devices to someone else's back yard," said Tom Hogye, vice president and general manager of the distributor and refining company.

Hogye said that some so-called recyclers take the cheapest and not most environmentally sound route, and ship scraps to undeveloped countries while making a profit.

"Even if we are taking care of our country, we certainly don't want to see the waste in Africa and Asia," Donnelly said.

Hogye said that Datatech sends the waste to environmentally sound processors, which are primary and secondary smelters.

It is illegal to dump TVs and monitors in landfills, and since the inception of SB20, the Electronic Waste Recycling Act of 2003, a fund was created for the collection and recycling of certain electronic waste. As of July 1, 2005, plasma televisions and TVs with liquid crystal display screens are classified as e-waste. Each time a consumer buys a new electronic that contains cathode ray tubes (CRT) or has a liquid crystal display, he or she pays a $6 to $10 fee that will cover the collection and recycling of the wastes.

Electronic devices contain a variety of materials, including copper, lead, zinc, arsenic and mercury.

"Mercury is one that our program is highly focused on," Donnelly said. These toxins can enter the groundwater and are hazardous to the health of plants, animals and humans.

It is estimated that Americans discard nearly 2 million tons of electronic waste a year, and among the most hazardous are CRT televisions and monitors.

In general, Donnelly said the Los Gatos community needs to be aware of what is going into its groundwater.

"It's about knowing that what goes into the street drain. If it's dog waste or pesticides, it really is going directly to the Los Gatos Creek and downstream into San Jose," said Donnelly.

For more information about the event or the West Valley Clean Water Program, call 408.354.5385, or visit www.cleancreeks.org.

FY 2005-2006 ANNUAL REPORT

Pesticide Management Activities Evaluation

PESTICIDE USAGE REDUCTION MEASURES – Pest Specific

CITY OF MONTE SERENO

Results of Pesticide Use Review FY 05-06

Monte Sereno was able to eliminate use of any OP pesticides in particular, and all pesticides in general, for FY 02-03, through FY 05-06, as compared to PCO spraying of 10.3 oz of diazinon for ant control in FY 01-02.

Monte Sereno has controlled pests for the past 4 years through implementation of IPM practices. Monte Sereno's public facilities consist only of a City Hall with less than 4,000 sq. ft.; the lot is approx. ½ acre and there are no City parks.

Roadside weed control is left to homeowners. Ants at City Hall are controlled by keeping surfaces clean, and by wiping ant trails with Windex. The City installed several vinyl windows in the front offices in FY04-05 and has found that these appear to have reduced the number of ants that enter the building. Problem spiders and cobwebs are vacuumed up. Weeds are hand-pulled by the landscaping contractor. In addition, no fertilizer is applied.

Monte Sereno did not contract for any pesticide applications for FY 05-06.

Monte Sereno has been making a dedicated, successful effort to keep City facilities pesticide free.

IPM Plan
for
"High Use / No Pesticide / Low Budget TURF"

Goals:

- Reduce use of pesticides for weed control through turf management methods which produce healthy turf and discourage weeds.
- Determine weed treatment threshold - the maximum number of weeds that can be tolerated at a site without causing unacceptable damage, hazard, or nuisance.
- Incorporate latest research on less-toxic methods for generating and maintaining healthy turf.
- Train staff annually on newest management practices which encourage healthy turf and discourage weeds
- Develop successful management practices tailored to municipal turf sites, based on site characteristics and horticultural practices applicable to those characteristics (i.e. frequent overseeding for high-traffic areas, amendments to clay soil, etc.)

Tolerance level for weeds:

- Low to zero in public areas

Turf Management facts:

- Turf sites should be tested for chemical and soil characteristics to facilitate optimal decisions on turf management.
- Correct use of soil amendments (compost) along with proper aeration reduces compaction and encourages healthy turf.
- Proper mix of turf types (Kentucky Bluegrass base, rye and fescue overseeding) helps ensure healthy turf in high-traffic areas
- Regular, frequent overseeding is a successful, non-toxic means of reducing weed problems in turf.

For additional information, visit:

http://turf.lib.msu.edu - go to the "Turfgrass Information" file

Managing Turf to Prevent Weed Problems

MAINTENANCE & MANAGEMENT

Careful management and maintenance are the best means of preventing weed invasions. Many different aspects of turf maintenance can affect weed growth. These include (but are not necessarily limited to) seeding, fertilizing, irrigation, aeration, soil amendments, top-dressing, and mowing. Management, such as choosing the most appropriate grass seed for the turf use, is also very important.

INITIAL STEP: ANALYSIS

If we want to use less pesticides & fertilizers, we need to know more about the biological systems of the turf and weeds/ pests. When we know more about why the weed/ pest is there, we can deal with it better.

Chemical & Physical Analysis

SITE TESTING: It's important to get the site tested. At a minimum, get a **physical analysis** before doing any soil amendment activities. It can even be important to get a breakdown of any sand in the soils: i.e. is it fine sand - which is almost silt, or is it course sand - which has different properties.

A report listing a "sandy loam" could have a sand that's mostly a fine sand. Or what appeared to be silt could also contain clay, which is smaller and has a negative charge.

A **chemical analysis** can help determine if any constituents of an amendment could lead to problem levels of a chemical/mineral, such as phosphorus.

AMENDMENT TESTING: It's also important to get any compost tested – some amendments may contain 20% - 30% clay, which would be detrimental to the site.

⇨ The ratio of Carbon/Nitrogen should be close to, but not more than, 30/1 (i.e. 30 units of Carbon/ 1 unit of Nitrogen).

⇨ The compost needs to have 60-80% organic matter, and should have minimal 'fine particles'.

Use Analysis

Traffic on the turf causes wear, which can result in deteriorating turf and thus presenting an opportunity for weeds to grow.

Wear is abrasion to the grass and compaction of the turf and soil due to the downward pressure of many feet. Compaction will be even worse when there is clay in the soil.

Heavy traffic can also result in a lack of recovery time for the turf; recovery time is needed for the turf to replenish broken stalks and restore turf density.

"WHEN" Does It Get TRAFFIC?

Determine when much of the heavy traffic occurs; i.e. is in the fall due to football and soccer activities? During the fall and winter, turf is slow growing and doesn't regenerate well, which compounds the problem of heavy traffic.

The WV Communities locale has a generally uniform growth pattern due to irrigation – but it still grows more slowly when there is less sunlight (shorter days) and cooler weather. Lots of traffic during the depressed growth periods causes a problem for the turf. This includes intense practice sessions - before an official sports 'season' begins, such as in early Spring, or in Fall, when days are shorter. Timing of your fertilization and seeding is determined by when the traffic falls.

WORK WITH STAKEHOLDERS:

"FIELD ASSESSMENT SPREADSHEETS"

Meeting with users of the fields allows an opportunity to work together to determine thresholds, and helps users to understand the requirements involved in maintaining usable turf.

"Field Assessment Spreadsheets": Use these to meet with sports associations to discuss use of the fields. If the # is greater than 35, you have to re-assess use, consider renovation. A range of 11-20 is pretty good. Engage the people who use the field; work together to make the fields usable within the limitations of the municipal budget and limitations of the turf (soil, climate, etc.). Filling out the sheet together helps users understand what they may have to tolerate, and to work together with municipal staff to set a realistic target.

WHERE is the TRAFFIC?

Where on the fields is help needed most?

For example, the corners of the soccer fields don't get much wear compared to the center. The logical way to save money and labor is to concentrate most of fertilization and other management activities mostly in the center of the field.

Soccer field: center = approx. 40,000 sf

Football field: Between the 20 yd lines, and in between the hash marks = 16,000 sf

A whole field = approx. 80,000 sf. (2 acre field)

These heavily used (center) areas need 3-4x the amount of resources as the corners.

➔ Make 2 applications/year in the corners, 6-8 apps/year in the center

TURF MANAGEMENT

Compaction Management

The 1st line of defense is compaction management. Over-use can cause compaction.

CORING & AERATION:

⇨ The best fields are cored between every month to every 6 weeks. The benefits of coring are short-lived & only last 3-4 weeks, so it must be done frequently.

If it's not possible to core this frequently, it is at least necessary to aerate.

Coring (& aeration) promote:

- nutrient release
- increase in microbial activity
- increase in rooting activity
  - In a sand situation, this will Increase Organic Material coming to surface

During the season when you can't core, use needle tines to get water and air in, in order to improve the environment to allow increased rooting.

Factors in coring:

- Don't core when soil is too wet.
- Need to affect 10-15% of the surface (2-4" spacing of vertical drive machine is better than the 8-10" spacing).
- Use the 8-10" for bringing up soil to create bed for seeding.
- In the center of the field do it every 4-6 weeks, the corners of the field, maybe only once a year, since corners don't have much compaction.

Aeration with "knives"

1 form of aeration is to use an "Aerways" aerator. This uses huge blades, placed on an angle, to cut down through the turf and soil. They cut down 18-20". The Aerways actually shakes the soil. It's good to use it when the soil is dry. By shattering the layers of soil, it doesn't just affect the surface. The shattering will occur more when the soil is dry.

The "Vertidrain" is similar to the Aerway, but the knives are placed at more of an angle. It is recommended to be used a few times a year on high use fields. It has a lever which allows the blades to go down in straight, then kick on the way out; this forces shattering and loosens the whole soil profile.
Outsource: To have a 7 acre site treated with a Vertidrain can cost about $2,000 - $2,500.
When using the Aerways or Vertidrain, the turf is not left with holes in the soil, which can be hard to fill in adequately.

When doing serious amending or seeding, it's necessary to pull out cores so the amendment can replace the cored soil, or so the cored soil can be spread to make a seedbed.

⇨ Once in a while it's important to break up any layer that's being created by using the same length of tines consistently (i.e. use the Vertidrain to shake up the soil profile). One reason that layers need to be broken up is because the layers keep the water from percolating evenly.

Amending / Layering

FOR A CLAY-BASED FIELD:
The first line of defense has to be surface drainage. Water standing on the surface makes the compaction worse. In order to fix a clay soil, it's necessary to create good surface drainage.

Clay subsoils have an infiltration rate of about 0.10 – 0.30" per hour
By composting with the right amount of organic matter, it's possible to increase the infiltration rate by 10 fold, as well as encouraging turf growth with the nitrogen, etc. in the compost.

Creating good surface drainage through coring and amending:
⇨ Mow down to 1"; then core & hollow tine in several different directions; remove the cores, aerate, spread with top dresser 1 time: put it down, brush it in, water it in, then repeat the amendment several days later. It's a weeklong process to do amending. The key is to have a good source of compost.

⇨ One time/year do the amending, and several times per year do the top dressing. After 3-5 years of this, there will be a real improvement in the turf. A good source of compost is needed in order to be able to do this consistently.

However, after 5 - 7 years with compost, you can get phosphorus build-up and runoff, which can affect local drinking water supplies. A solution is to compost for 3-5 years, then stop for a while.

Compost Amendments for establishing turf:
Manure or biosolids compost is the best.
Yard waste is the worst.

Manure is a Biosolid, a combination of Carbon & Nitrogen
The ratio of Carbon/Nitrogen should be less than 30/1 (i.e. 30 units of Carbon/ 1 unit of Nitrogen).

- Microbes/ microorganisms etc. need the carbon to grow and then need the nitrogen. The grass also needs the nitrogen. For example, a 40/1 ratio causes too much growth of microbes and they compete with the grass for the nitrogen (grass will yellow).

- The compost needs to have 60-80% organic matter.
- Need as little 'fine particles' as possible.
- Possible weed problems with manure: have it checked first through testing.

Sand Amendments:
If amending with sand, **don't use pure sand**.
⇨ For each 1" of clay you need 8" of sand. Putting in anything less than that will end up as cement. The bridge differential between the 2 particles causes it to set up as cement.

⇨ The ideal sand size for clay soil is medium to somewhat coarse.
Do test for sodium levels in the sand before purchasing it - with rainfall and irrigation, salts in the sand can leach out. Then, if the sodium level was high, the grass seed won't establish well.

If a salt problem has developed, gypsum can be helpful. However, in general gypsum will not improve the soil – it won't help soil structure.

Putting **sand on top of clay** can improve drainage (create a big crown on the field and cap with 5-6" of sand), BUT a completely different grass-growing environment is needed; this is more appropriate for golf courses than municipal fields. It's not a forgiving environment and it's harder to actually get grass to grow well.

Peat / Sand Amendments:
Peat can be good when it's blended properly with sand, but it's not really cost effective. Peat may be more degraded than compost, whereas a manure compost can reduce the turf's nitrogen demand 30% over 3-5 years.

Mowing

MOWING & DENSITY
⇨ Mow at between 2" & 3". It's important to pick a height and stick with it, i.e. 2" or 3" - not 2" one mowing and 3" the next. Get the mower on a smooth paved area, and measure the blade height with a ruler.

➔ ***Fertilizer Vs. Mowing Frequency***
Increasing the mowing from 1x to 2x per week increases the wear tolerance about 50%. The reason is that increased mowing results in increased density of turf roots.

Fertilizer

FERTILIZER TIMING

⇨ 0.5 - 0.75 lbs of Nitrogen per month, every month can be applied in our area due to the fairly uniform growing season. Cooler weather in conjunction with longer days promotes good root growth. This would be early Spring and late Fall (Feb.-March & Oct.-Nov.).

FERTILIZER CHARACTERISTICS

⇨ A pH between 5 & 8 is okay; the ideal range is between 6 & 7. Elemental sulfur can be used to bring idown the pH, and lime can be used to bring it up.

Slow-release vs. Urea (Ammonium sources of nitrogen):

A comparison was done for Urea vs. Polyon. Polyon is a sustained release fertilizer – one application disperses over the whole season/24 weeks. Polyon saves money on labor for application vs. urea (1 application/season for Polyon = 5 applications/season of urea). Polyon cost 3x as much as urea.

⇨ The study showed that the cost equaled out when applied to @ 30,000 sq ft or more (@$15/hr labor.

➔ Combine a slow release fertilizer, spread over the entire field, with frequent applications of a cheaper regular fertilizer over the high traffic areas.

This system will also mean that the whole field doesn't have to be closed for fertilizing; teams can practice on the areas where sustained-release was applied, when an additional application is being made to the high-traffic areas.

Fertilizer vs. Corn Gluten Meal

For Corn Gluten Meal, the anecdotal evidence says it works well as pre-emergent in ornamentals. Evidence also shows it works well in turf - however, basic fertilizer (ammonium sulfate) does the same thing.

For 10-0-0 fertilizer with some pre-emergent herbicide effects vs. Corn Gluten Meal, the fertilizer has the same results in controlling crabgrass. Since CGM costs 10x as much as regular lawn fertilizer it doesn't appear to be cost-effective.

Seeding/ Overseeding

EFFECTIVENESS OF SEEDING FOR WEED CONTROL

Use of regular, frequent overseeding will make a big difference in maintaining turf density which will help keep weeds out, and will promote a quality turf without pesticides. Overseeding is an effective weed control measure for high-use / low-input fields that need a low cost solution to keep the turf in shape.

If a field starts out with dense turf, it has been shown that putting on any seed on a weekly basis will maintain turf density despite heavy traffic. Studies showed that plots overseeded did much better than those not seeded. In plots not overseeded during heavy use periods, turf density went down to 20%. A year after ending the study, the overseeded area still kept out the crabgrass.

IMPLEMENTATION OF OVERSEEDING

⇨ Anytime seed is being put down, make a phosphorus application.
⇨ The critical point for successful overseeding is regular, appropriate frequency, rather than the amount of seed applied.

Recommended seeds
⇨ ***Coventry Kentucky Blue Grass*** provides a good base turf. Many of the highest quality sports fields have Kentucky Blue Grass base, which is seeded throughout the season, (then overseeded with perennial ryegrass). The Bluegrass rhizomes are necessary to knit the field together. However, it's not effective to overseed frequently with KBG because it takes too long to germinate and establish.

⇨ Ryegrass and Tall Fescue varieties are effective for overseeding:
"Citation" perennial ryegrass
"Jaguar" tall fescue

Frequency/ amount of seeding
During a dry year, 8-10 lbs/1000 sf of overseeding weekly may be necessary in order to get a good density.
⇨ Irrigated fields: During a good year, or with irrigation, only 2 lbs of seed/1000 sf were needed for weekly overseeding to be effective.

⇨ In a study, the turf was drop-seeded weekly. The plots were mowed at a 3" height. They were fertilized in June and September.

FIELD STRUCTURE

Field structure can be used to help facilitate healthy turf growth, for example structural changes which promote good drainage. Bring a drain pipe to the surface in a low spot, have the pipe go to a pipeline so it will drain away standing water in the low spots.

Standing water tends to be a problem where irrigation lines are all hooked up in 1 straight line (1 sprinkler line runs the whole length of the field), so that low & high spots are getting the same amount of water. This may result in enough irrigation for high spots, but with too much for the low spots.

One solution is to "Zone" the irrigation system. It's also better to have it the turf bit on the drier side than too wet. Drier turf is better for preventing disease and promoting rooting.

For soccer fields, changing the structure of the goal mouth area can improve turf growth. The goal mouth gets the most wear, so crown it (about a 2" crown) to promote drainage and help address the wear. Start from outside the goal box to create a crown across the front area.

Crumb rubber can be used as a top dressing on field sidelines, off the playable surface. This protects the growing point and extends the growth period (due to black rubber holding in heat during cold weather).

BUDGETING

If turf is well managed, and use of pesticides can be decreased, then most of the former Pesticides Budget can be spent on labor and seed.

ANNUAL EVALUATION OF EFFECTIVENESS:

Evaluation of effectiveness of turf management for weed control is primarily conducted by visual and site inspections, and customer complaints.

More information on this topic is available at:

TRAINING DESCRIPTION	DATE	ATTENDEES
ANNUAL WEST VALLEY IPM WORKSHOP – Attended by WVCWP, Campbell, Los Gatos, & Saratoga Staff		
West Valley Turf Mgmt Workshop Sponsored by West Valley Communities Presented by Frank Rossi, a national expert from Cornell University A national expert from Cornell University presented a PowerPoint presentation. One hundred percent of attendees who turned in evaluations rated the training as "worth my time to attend", and 22 out of 25 said the training would enable them to change turf management methods to reduce pesticide use **Topics:** ▪ Guidelines for managing turf with little or no pesticides ▪ Field trip to examine Campbell's community athletic field turf Planting to Encourage ▪ From the training, WVCWP developed a "Turf Management IPM Plan" to be used as a reference for outdoor maintenance staff. Training was attended by all Parks Maintenance staff (or presentation was given later to staff). One local private Golf Course Superintendent also attended. The WVCWP made a video of the workshop (to transfer to CD) for parks maintenance staff to incorporate into future IPM training sessions.	March 22, 2006	**Campbell** **City of Campbell (16)** Public Works Park Supervisor Maintenance Staff **Los Gatos (7)** Parks & Forestry Superintendent Public Works Supervisor Parks & Maint Workers **(6)** **Monte Sereno** No parks or medians Under Monte Sereno jurisdiction. **Saratoga (10)** Parks Supervisor Parks Lead Worker Parks Maintenance Workers (8) **Saratoga Country Club (1)** Golf Course Superintendent

MERCURY POLLUTION PREVENTION ACTIVITES				
FY 2005-2006 Work Plan Self Evaluation Matrix				
Source	**WP Task**	**FY05-06 Work Plan Tasks**	**FY 05-06 Accomplishments**	**Responsible Party**
	Mercury Plan (I.D.)	Mercury Policy Continue Implementation of mercury policy requiring the virtual elimination of mercury from controllable sources in urban runoff from agency operations.	Monte Sereno adopted its mercury policy in FY 03-04 and continues to implement the policy.	Facilities Mgr WVCWP to assist
	Mercury Plan (I.E.)	Guidelines Continue implementing the guidelines for the phase-out of mercury-containing products (MCPs). Phase-out will coincide with replacement of MCPs on an as needed basis.	Reduction of mercury-containing products is being implemented. Research on alternatives to mercury-containing products has been conducted and implemented wherever possible.	Facilities Mgr & WVCWP to assist
	Mercury Plan (II.C.)	Disposal of Mercury Containing Products Track recycling, replacement, and reduction in use of mercury-containing products. If feasible, document quantities of fluorescent lamps from City buildings and departments, which are disposed of at Hazardous Waste Collection facilities in FY 05-06[1].	Monte Sereno City Hall consists of 2 small, residential buildings, so the number of fluorescent bulbs or any mercury-containing products is minimal and opportunities for reduction are limited. Used fluorescent bulbs were collected and saved for recycling from June 2004 through August 2005. During FY05-06 the City disposed of twenty-three (23) 4-foot bulbs via HHW. The City did not replace any fluorescent bulbs in FY05-06. 100% of all mercury-containing items are removed by City staff and taken to HHW or other E-Waste recycling drop-offs. City employees put used batteries in recycle bins located at City Hall, for disposal via hazardous waste disposal.	Facilities. Mgr, Building Inspector

[1] Tasks for documenting and reporting quantities of mercury-containing products disposed of by city will take into consideration whether it is possible to keep detailed records of each mercury-containing product (fluorescent lamp) disposed of by municipality.

	Mercury Plan (V.A.)	Fluorescent Light Recycling Program Continue Implementation of an outreach program to educate small businesses and conditionally exempt small quantity generators about recycling fluorescent lights. Coordinate educational outreach with fluorescent light recycling events sponsored by HHW.	*Fluorescent Light bulb Recycling Flyer* WVCWP updated its flyer created last year, listing local drop-off points (5 hardware stores) which are part of the fluorescent bulb drop-off program. Hours and location of stores are listed, along with HHW contact info. The flyer reminds readers that **it's illegal to put fluorescent bulbs in the trash or in regular recycling bins**. The flyer was distributed at all West Valley community events.	SCVURPPP & WVCWP to coordinate w/ HHW staff
		Develop, advertise & conduct West Valley E-Waste Recycling Event **Additional Task – Not in Workplan**	*January 28, 2006 **Free** Hazardous Waste Recycling Event* for recycling TVs, monitors and laptops. The event was sponsored by the four West Valley Cities through West Valley Clean Water Program. It was held at Los Gatos Public Works parking lot. Los Gatos & Saratoga and WVCWP (for Campbell & Monte Sereno) staffed the event. West Valley businesses, residents and schools were invited to participate. **WVCWP staff hired and worked with Carl & Manor Ad Agency to create flyers, posters, a press release, and a newspaper ad** to raise awareness in the West Valley communities about E-waste and about the Clean Water Program in general. Ads, articles and flyers relayed the message that E-waste can leach toxic metals (i.e., mercury) into our water, and that by using a responsible recycler we people can help prevent export of our waste to foreign dumps where mercury leaches into the environment. (See above row for details on outreach materials).	WVCWP and City Public Works staff

			Over 250 cars brought E-waste for recycling. Posters placed around the site highlighted the environmental affects of improper E-waste disposal. One high school coordinated with WVCWP prior to the event, and dropped off pallets of E-waste on the previous day. Quantities collected for responsible recycling are listed in the Evaluation below.	

Mercury Pollution Prevention Activities Evaluation

West Valley Communities Developed, Advertised, Sponsored and Staffed the West Valley E-Waste Recycling Event

Much discussion and research went into trying to develop an action that would make a difference in the amount of mercury containing waste going to landfill or being disposed of illegally. The issue of illegal dumping was exemplified by the television that was found dumped in a Los Gatos Creek during the winter season. While the dumping was not necessarily done by a West Valley resident, it served as a good example of the fact that illegal dumping is a problem. This incident was featured in the West Valley Clean Water press release which was written as part of the advertising for the community event. Two local newspapers ran the article and placed it next to the ad that WVCWP Communities ran in each of the local community papers. Residents responded enthusiastically and brought the ad from the paper as if it would be needed to participate in the free event. Many more people noticed the ad than attended the event. WVCWP and West Valley municipal staff interviewed participants as they waited in their cars to make the drop off. Often staff were told that residents were bringing in E-waste belonging to one or more of their neighbors, in addition to their own items. The event was one of WVCWP 's most successful attempts to encourage the community to take action and bring to light the goals of the West Valley Clean Water Program.

Residents & Businesses Joined In

WVCWP made the decision to spend a significant part of WVCWP budget on hiring the Public Relations agency (Carl & Manor) for the Watershed Watch campaign to design a news ad and submit a press release to local papers. (See *PI/P Section - A SCV Program Projects/Support* for details on additional outreach for the event). Even more exciting was that two local businesses, Le Boulanger and Pizza-My Heart supported the community in these efforts by donating breakfast and lunch for all volunteer staff. In a four hour period, over 250 vehicles came to drop off E-waste. The residents were delighted with the event and the most popular question was, “When will you do this again?” At that point WVCWP and municipal staff determined that the WVC would work hard to sponsor another E-waste drop off event in FY06-07. The **Los Gatos Weekly** and **Saratoga News** also printed a short editorial letter from the WVCWP Mgr thanking the residents for their enthusiastic participation, noting that a total of 33,657 pounds of E-waste was collected, and thanking the businesses for their donations and support.

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Vehicle Washing Operations	CB-1	Continue to distribute outreach materials on proper vehicle/equipment washing at Municipal counters/Post Offices/Libraries and public events, and post on WVCWP website.	The WVCWP "Car Wash Kit" flyer is now available on the WVCWP website as a PDF. The site's Home page now has a car washing graphic and text which links to the PDF. The PDF can be downloaded and printed by visitors to the site. The "Bay Begins Here" brochure, which contains information on car washing, was distributed at various events. (see PI/P section *B. WVCWP Joint Projects – a. distribute materials*) A car wash was held on Sat. Oct. 1 – materials related to car washing & copper were handed out: --"Washing Cars and Other Vehicles", --"Cars Pollute Water Too!" --"Residential Car Washing" cards.	WVWCP staff
Vehicle Washing Operations	CB-1	Discuss copper impacts; teach proper methods of Car Washing and Pool & Spa drainage through use of Enviroscape watershed model in classroom presentations.	See PI/P section *B. WVCWP Joint Projects -* *b. Participate in Community Events* *j. Provide Watershed Education in classrooms*	WVWCP staff
Vehicle Washing Operations	CB-1	Provide Car Wash Kit & education to charity car wash organizers. Solicit feedback from participants.	A car wash was held on Sat. Oct. 1, 2005 at a Union 76 gas station, located east of Los Gatos on Blossom Hill Rd., S.J. Approximately 75 vehicles were washed. WVCWP Stormwater Discharge Inspector arrived at 7:00	WVWCP staff

WEST VALLEY COMMUNITIES

FY 2005-2006 ANNUAL COPPER (and NICKEL) ACTION PLAN REPORT

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			am, and was there until almost 10:00 am, teaching participants to set up the car wash kit to protect runoff from entering the street or storm drain. The event went on until after 3:00 pm. WVCWP used about 400 ft. of hose and 300 ft. of extension cord. The car wash kit worked extremely well, but it was difficult to set up. Photos were taken which can be used for future classroom presentations. Approximately 35 volunteers participated and saw the Car Wash Kit in use. The Car Wash was sponsored by employees of Advanced Medical Center. Materials handed out: --"Washing Cars and Other Vehicles", --"Cars Pollute Water Too!" --"Residential Car Washing" cards.	
Vehicle Washing Operations	CB-1	Put Car Wash Kit information and proper car washing instructions on WVCWP web site.	The WVCWP website Home page was modified to include a car washing graphic and text. These graphics are links to a PDF of the WVCWP Car Wash Kit flyer which requests car wash event organizers to contact WVCWP. The flyer also includes information on harmful effects of copper: http://www.cleancreeks.org/images_new/carwashweb.pdf	WVWCP staff
Vehicle Washing Operations	CB-1	Within the Planning permit process, require source control measures at facilities that will conduct vehicle/ equipment washing and maintenance activities (consistent with Permit Provision C.3.k).	The WVC did not have any Group 1 projects that would conduct vehicle/equipment washing and maintenance activities.	Planning Dir/ Sr. Planner

WEST VALLEY COMMUNITIES

FY 2005-2006 ANNUAL COPPER (and NICKEL) ACTION PLAN REPORT

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Vehicle Washing	CB-1	Promote improved car washing methods at auto businesses during inspections. Provide info on alternative arrangements for auto businesses with possible compliance problems.	The Stormwater Discharge Inspector distributes several vehicle washing pieces during pro-active inspections and in relation to any actual or suspected IC/ID incident. This means of outreach is very effective and the Inspector is able to answer questions and offer suggestions. One piece used is the WVCWP-created fact sheet, which provides information on wastewater capture systems for automotive facilities. The fact sheet was designed to provide small-scale automotive facilities (those that find installing a full-fledged wash rack cost-prohibitive) with examples of inexpensive treatment technologies and distributor information.	WVWCP ICID Inspector
Vehicle Washing Operations	CB-1	Maintain recommended source controls for vehicle washing at City corporation yard.	Municipal staff continues to follow the suggested practices and to ensure that the Corp Yard systems function correctly.	Pub Works Staff
Vehicle Washing Operations	CB-1	City staff will attend "Mobile Cleaning Workshop" or view training video to review Best Management Practices.	**Campbell:** On April 13, 2006, twenty nine (29) Campbell staff reviewed SWPPP procedures and received training on best management practices (BMPs). Staff viewed the pressure washing video "We Do the Job Right" for mobile pressure washing. John Iaquinto, Public Works Superintendent led the training.	WVWCP ICID Inspector / Pub Works Supt
Industrial Copper Control	CB-3	Continue Industrial Inspection program with Fire Dept., including NOI sites and other industrial sites such as plating and metal finishing facilities, vehicle service facilities, and other permitted sites.	The City has an agreement with the SCC Fire District to conduct urban runoff inspections for machine shops and metal manufacturing facilities. This year efforts were directed at re-negotiating municipal contracts with the SCC Fire District, which was due to expire at the end of FY 05-06. Many meetings were held to ensure that future contracted inspections would provide the	SCVC Fire Dept./ WV ICID Inspector

WEST VALLEY COMMUNITIES

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			type of inspections, and related data, necessary for the Stormwater programs. See *IND Section* for inspection details.	
Reducing Traffic Congestion Promoting Alternative Transporta-tion	CB-6/7	Within the Planning permit process encourage and promote best practicable transportation-related design practices and alternative modes of transportation.	The WVC encourage best design practices wherever practicable. These small communities tend not to have large developments conducive to requiring alternative transportation within the permitting process. However, the WVC encourage alternative transportation through other means: Campbell now has 3 stations for Light Rail service linking the City to stops throughout Santa Clara Valley. Service started this FY in August 2005. The City Redevelopment Agency was actively involved in this project. Los Gatos has a project that provided bike racks throughout the commercial campus and bike lockers and shower facilities for employees who will ride their bikes to work at the Netflix HQ bldg (HQ bldg houses approx. 200 employees). The City of Saratoga has been investigating development of a 'rails to trails' project along a Southern Pacific Railroad corridor. The City has held public hearings on the proposal but a resolution has not been reached. The City website encourages biking through its "Bikeways" map, showing where striped bike lanes exist, and classifying bike routes according to safety.	Planning Dir. / Sr. Planner
Reducing Traffic Congestion	CB-6/7	Continue to incorporate and support "Best Practices for Integrating Transportation and Land Use" as documented in the VTA's 2003 Community Design &	These elements remain in the WVCs' General Plans and serve as guiding principles for their Land Use and Transportation development.	Traffic Engineer

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Use of architectural copper	CB-21	Within the Planning permit process, discourage use of copper roofing and gutters.	All WVC discourage copper architecture, with the exception of Los Gatos.	Planning Dir/ Sr. Planner
Nickel Action Plan Tasks				
Control nickel discharge from construction sites	NB-1	Sediment Control: Continue to implement Construction Inspection Performance Standards (see Construction Inspection work plan section).	See Construction section of this report.	Bldg Official/ WVC-ICID Inspector
Control nickel discharge from construction sites	NB-1	Training: Continue to have inspectors attend Regional Board/Program workshops on construction site management and learn latest erosion/sediment control techniques	Campbell hosted the Construction Site and Erosion Control workshop at the Campbell Community Center on Dec 8th & 9th 2005. The WVCWP Mgr, WVCWP Inspector attended for the West Valley communities, and spoke at the workshop about the need for field staff to report any observed sediment discharges to the WVCWP for follow-up.	Bldg Official/ WVC- ICID Inspector

Copper/Nickel Action Plan Evaluation

Car Wash Outreach Evaluation:

Car Washing has been highlighted on the WVCWP home page, the Car Wash Kit flyer was also sent as a PDF to Fire Dept inspectors at their request. The Fire Dept inspects the West Valley industrial and Commercial facilities, and reports incidents in residential areas if they happen to see any violations while out in the field. WVCWP would like to have an all-inclusive, educational copper brochure, which would include car washing, architectural copper and pool draining in one piece. However, the WVCWP has not had the staff or resources to create something like this that would be appropriate for distribution and mailing to residents.

Pool and Spa Brochures:

Each of the West Valley communities (except Monte Sereno) ran out of Pool and Spa brochures and ordered 150 to 200 more to give out at the planning counter and to all new pool and spa owners. WVCWP Pool brochures were sent out to all pool and spa owners during the previous year.

Educational Outreach Evaluation:

The WVCWP will continue to provide outreach on car washing, vehicle maintenance, alternative transportation, and pool maintenance during in-class

WEST VALLEY COMMUNITIES

FY 2005-2006 ANNUAL COPPER (and NICKEL) ACTION PLAN REPORT

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
presentations and outreach at community events. WVCWP incorporated messages about activities that can prevent copper runoff as part of the new Kindergarten and 4th grade Enviroscape curriculum, and as part of its Enviroscape presentations at community events. These presentations have been successful in raising interest in the proper car-washing and pool & spa maintenance. Staff has found that children seem especially receptive to the information about copper and car washing when they participate in the Enviroscape activity. **Street Sweeping:** The WVC continued their street sweeping programs and tracked and reported annual street sweeping data to the Program. The City of Saratoga highlighted street sweeping with a postcard which was sent to all city households. The sweeping company created a color postcard announcing its new contract with the City. The card stressed the importance of street sweeping, provided a map of routes with schedules and asked that cars be moved before 6am on the day of street sweeping. Street sweeping has become very important to residents. If the streets are not swept on schedule City or Town staff receive phone calls to register complaints. The Town of Los Gatos had a resident call on the Fourth of July because it was the regularly scheduled day to sweep but the sweeper did not show up.

TRASH INVENTORY & MANAGEMENT

FY 2005-2006 Work Plan Self Evaluation Matrix

Source	WPActivity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Trash Work Plan	Strategy	Assist Program staff, by participation in Trash Ad Hoc Task Group, in developing a long-term strategy for trash conditions in urban streams and waterways.	The West Valley Clean Water Program Mgr attended the Trash AHTG meetings and provided comments from West Valley Cities. Accomplishments this year included fine tuning electronic reporting forms for KAB drive by monitoring of existing problem areas; revised Urban Rapid Trash Assessment procedures and tally form for categorizing data and determining trends and future management actions.	WVCWP Mgr to attend AHTG and discuss with municipal Reps at WVCWP monthly meetings
Trash Work Plan	Identify and Prioritize Problem Areas	Identify and prioritize management of potential sources that may contribute to trash problem areas in a subset of urban streams and waterways	During FY05-06 all West Valley trash problem areas were monitored (see Trash Problem Area Evaluation Results table attached). Management actions were implemented and evaluated to see what more could be done at specific problem sites. Saratoga's code enforcement officer visited businesses which back up to Saratoga Creek to discuss an illegal dumping problem. WVCWP organized a student-parent participation cleanup event at the Saratoga Creek problem site. WVCWP Mgr contacted Caltrans Assistant Stormwater Coordinator (District Four) about working together to resolve a trash problem at Hwy 17 and Hamilton off ramp, where a new light rail station may have contributed to an increase in pedestrian littering. WVCWP took photos documenting the litter. Caltrans agreed to send a crew out to clean up the site. WVCWP and Caltrans will continue to consider ways to reduce trash at this site.	Sr. Civil Engineer/ Public Works Supt, WVCWP staff to assist

Source	WPActivity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			WVCWP presentations provided to students as part of the Enviroscape Activity feature a trash topic. WVCWP conducted three volunteer cleanup/trash monitoring events in partnership with local schools. Each event is opened with a brief talk on the trash problem facing our creeks and Bay. Volunteers seem to be energized by the chance to make a difference. Two schools conducted trash cleanup events after their classroom presentations.	
Trash Work Plan	Evaluations	Conduct trash evaluations using the RWQCB Rapid Trash Assessment protocol (Version 7.0) and/or the KAB Litter index, in local trash problem areas. Continually revise identified trash problem area list as litter conditions change.	WVCWP staff conducted *Keep America Beautiful (KAB)* assessments at all identified problem areas in the West Valley Communities, for a total of 57 assessments. For details see the Trash Problem Area Activity Reports following this table. Campbell monitored 13 sites, conducting 20 KAB assessments and 3 RTA assessments. Los Gatos monitored 8 sites, conducting 11 KAB assessments. Monte Sereno monitored 5 sites, conducting 15 KAB assessments Saratoga monitored 4 sites, conducting 7 KAB assessments and 1 RTA assessment. One of the sites Saratoga listed as SA04 was actually in San Jose. Site SA04 will be replaced by another site in Saratoga, to be determined by monitoring results in FY06-07.	Campbell Stormwater Rep (Sr. Civil Engineer) and Public Works Supt. WVCWP to assist
Trash Work Plan	Management Practices	Continue identifying and implementing trash control measures, as appropriate, to address trash problem areas.	All West Valley sites were monitored this year. Several new sites were added to the list to be monitored (a couple to be cleaned) in FY06-07, based on documented accumulation of trash in new areas. Some problem areas are in Caltrans jurisdiction. In June 2006, the WVCWP Mgr called Caltrans about cleaning up Freeway on and off ramps in Campbell (Fwy17 & Hamilton).	Sr. Civil Engineer/ Public Works Supt. WVCWP to assist

FY 2005-2006 ANNUAL REPORT

Source	WPActivity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Trash Work Plan	Report on Trash Mgmt Practices Implemented	Provide Program staff with City specific information on trash management practices implemented, using standardized reporting format.	Transferred the West Valley citizen participation monitoring data into RTA format for Program's annual report. The WVCWP conducted three trash monitoring events with student and citizen volunteers. The City of Campbell conducted one event on 4/8/06 using the WVCWP tally forms (summary sheets are included in this report for each monitored site). Volunteers were taught how to record and document trash types and quantities.	Sr. Civil Engineer/ Public Works Supt, with WVCWP to coordinate
Citizen Participation	Monitoring/Citizen Participation	Continue to promote citizen participation program to monitor trash in local creeks (element of Creek Keeper's Program).	**WVCWP** and the West Valley communities organized five large clean up events. "Clean A Creek" flyers (announcing the Westmont High cleanup) were distributed to 13 schools in Campbell Union School District for the Sept. 17, 05 event. Fifty (50) volunteers participated – see attached tally sheet for trash collected. **WVCWP** sent a notice to Westmont High for the PTA / daily e-mail bulletin to notify students at Westmont High School of the Clean Up on 5/20/06. Fifty (50) volunteers attended the spring event as well. **Saratoga** and WVCWP staff organized a student-parent participation cleanup event on April 1, 2006 at Saratoga Creek behind restaurants on Big Basin Way. Thirty eight (38) volunteers and staff picked up 38 bags of trash (weighed trash & recyclables totaled about 100 lbs.) Large items discovered included a file cabinet and a water heater which could not be removed by staff or volunteers. Water District (SCVWD) staff met with WVCWP staff and agreed to partner with the City on pick up of the larger items. The steep banks of the creek make retrieval of the items both unsafe and costly. Saratoga Code enforcement alerted businesses to the dumping problem and Saratoga Police started surveillance of the area. **Los Gatos & Monte Sereno** sponsored a successful *Stash the Trash* event on Saturday 10/15/05. Over 350 volunteers monitored and cleaned up trash. About 35 support staff	WVCWP Staff to coordinate

Source	WPActivity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			setup the event and provided breakfast to volunteers. Staff also joined the volunteers in picking up trash. Volunteers started at 9am with many finishing up as late as 2pm. A total of 396 bags (not all full) of trash were picked up. Trash included a bike and a shopping cart (which one team returned to Trader Joe's). Paul Michael at Waste Management garbage collection service provided a large dumpster for the trash. **City of Campbell** held a spring public cleanup event on April 8, 2006, which brought in 145 volunteers for three hours of trash monitoring and cleanup. Volunteers picked up trash from sides of streets, along the railroad tracks, near the creek trails, and from some off-path areas, etc. Approximately 600 lbs of trash and recyclables were collected.	
Citizen Participation	E-Waste Event	Continue to promote citizen participation.	WVCWP and municipal staff co-sponsored an E-waste collection event with Thomas Hogye, Vice President and General Mgr of United Datatech (UDT). UDT guaranteed that the E-waste would be recycled safely and would not be sent to foreign shores. The Town of Los Gatos provided a municipal parking lot as a collection site and municipal staff from two of the West Valley Cities worked the event. Before the event, local Los Gatos and Saratoga community newspapers printed a story about a TV set that was found in Los Gatos creek. A WVCWP ad for the event and the upcoming event. As a way of supporting a clean, healthy environment, two local businesses (Pizza My Heart & Le Boulanger) donated free breakfast and lunch for volunteers who worked the event. A total of 33,657 pounds of E-waste (consisting mostly of televisions and monitors) was collected	WVCWP and Municipal staff

Trash Inventory & Management Evaluation

Dumpster Area Inspections & Education for Local Businesses

The WVCWP Inspector checks the dumpster areas of most of the downtown restaurants in each of the West Valley communities for signs of illegal dumping or debris around open dumpster lids. He provides urban runoff education and IPM (pest management materials) as needed. His method of informal visits and issuing *notices to comply* has helped to reduce the amount of trash-related dumpster violations over the past three years.

Educational Outreach to Students and Teachers in Local Schools

WVCWP staff responded to every opportunity to talk about trash with students in FY05-06. The trash topic is always included in the classroom Enviroscape presentations. This year a Saratoga fourth grade class and their parents partnered with WVCWP to hold a cleanup the week after their classroom Enviroscape presentation; and in June, after a classroom presentation, a Los Gatos Kindergarten took a tour around the school to look for trash and pick up the litter they found. Teachers from both schools have said that they would like the same presentation for their classes next year.

Creek Keeper Events – Volunteer Participation - Trash Identification, Tallying & Pick-up

The WVCWP has been particularly successful (from 2003 to 2006) in recruiting student volunteers for creek cleanups and the task of conducting trash assessments. The WVCWP's method of trash assessment is similar to the RTA method except that it was designed to include trash types that are most often found in West Valley locations and to be simple enough for young students to use. This year data was collected at West Valley events and later transferred to the Program's Rapid Trash Assessment forms so that the monitoring completed by volunteers could be evaluated with other Program data. During FY06-07 WVCWP staff will revise the WVCWP tally forms so that all trash data collected by West Valley volunteers (Creek Keepers) can be submitted to the Program as RTA trash assessments.

General Evaluation

WVCWP staff has noticed that volunteers and on-lookers at local trash tracking and cleanup events show appreciation, enthusiasm and interest. Many people respond positively to getting rid of trash, and are surprised to find out that trash is a problem that may need to be addressed with permits and requirements. As clean up events recur every year and students and other residents volunteer, trash tracking and trash collection is likely to grow in popularity. According to social marketing techniques, to effect behavior change it is more productive to start by targeting the "green" audience for educational outreach and support. "Green" refers to the population that is willing and ready to support the idea and may already be taking some of the desired steps. The "green" audience will grow in numbers as the marketed idea becomes acceptable to a wider population. As acceptance prevails, the "brown" audience (those who are resistant to accepting the change) will be swept into some positive behavior changes by peer pressure. WVCWP is targeting two green audiences for awareness. Most of the volunteers that attend clean ups are part of the "green" population. Besides reaching out to volunteers, WVCWP aims to reach students and make water pollution prevention concepts fun. The students are also a "green" audience because they easily receive and remember what they hear and see and often take the message home or share it with friends. WVCWP cleanup events and classroom presentations have been very successful in helping to change local students' and residents' perspective on trash. In FY06-07 these events will be conducted as often as West Valley budget and staff time will allow.

NEWS

Families clean up the creek

The Saratoga Creek Clean-up Project, sponsored by the city of Saratoga and the West Valley Clean Water Program, is an effort to get children and their parents more involved in the community and the environment. Families with young children are invited to pick up litter from the banks of the Saratoga Creek on April 1 from 10 a.m. to noon. Supplies and snacks will be provided.

Participants will clean up the creek behind downtown businesses between Fourth Street and Highway 9.

A maximum of 30 children can participate, so parents should call to reserve a space.

To participate in the event or for more information, email Sue Persico at persico16@comcast.net, or call 408.867.7323.

September 15, 2006

Mr. Bruce Wolfe, RWQCB Executive Officer
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: City of Mountain View's Urban Runoff Management Program
FY 2005-2006 Annual Report

Dear Mr. Wolfe:

This report is submitted by the City of Mountain View, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2004-2005 in accordance with the City of Mountain View's Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 1997 and updated in October 2000, and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 05-06 work plan during the past fiscal year; 2) evaluate program results for continuous improvement;3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

I. Contents of report;
II. Program highlights and accomplishments;
III. Summary of continuous improvement activities;
IV. Attachments:
   A. Certification Statement
   B. Self-Evaluation and Work Plan Completion Matrix
      - ICID
      - IND/COMM Inspections
      - Street, Roads, and Highways
      - Corporation Yards

      - Storm Drain O&M
      - Water Operations
      - New Development Planning Procedures
      - New Development Construction Inspection
      - Pest Management
      - Mercury Pollution Prevention

- Trash Inventory and Management
- Water Quality Monitoring
- PIP
- Staff Training
- Annual Reports and Work Plans

C. List of Acronyms, Abbreviations, and Definitions
D. Pesticide Use Evaluation for FY 05-06

Program Highlights and Accomplishments

The City's Urban Runoff Management Plan URMP describes activities that are implemented to control storm water runoff pollution. During FY 05-06, the City continued efforts to implement its URMP to the maximum extent practicable. Attachment B provides self-evaluation for each element in the City's URMP. Highlights of the City's FY 05-06 URMP accomplishments are listed below:

- The City responded to 80 ICID incidents, which resulted in the issuance of 2 warning notices, 3 administrative actions, and 6 administrative action with a penalty. A total of $2,500 in penalties was collected.
- The City continued its increased restaurant inspection and outreach program, conducting 151 restaurant inspections. This is consistent with the past two years' efforts. The City hired a new inspector in FY 05-06, and will train the inspector to perform the restaurant inspections, which also include fire and life safety inspections.
- The City implemented the enhanced data collection and reporting requirements for the ICID and Industrial inspection programs.
- In addition to the restaurant inspections, the City conducted 79 industrial/commercial inspections and re-inspections (this figure does not include restaurants and hazardous materials facilities) during FY 05-06. This is fewer than past years. The decreased number of inspection was due to fewer automotive inspections, which were not performed because of a shortage of inspection staff. The automotive facilities will all be inspected again in FY 06-07. The City assessed $500 in penalties resulting from the inspection program.
- The City conducted training for streets, parks, water, wastewater, fleet services, facilities personnel.
- The City implemented its PIP program, which included school outreach, publications, and public events, and multi-cultural outreach.
- The City reviewed 107 projects for storm water related items.
- The City implemented its C.3 requirements, which included approval of 6 new projects. These projects included required runoff BMPs.
- The City conducted 131 construction site inspections, issuing 42 written notices, and issuing a $500 administrative penalty.
- The City implemented its IPM Policy and IPM Plan.
- The City utilized a database for tracking pesticide use.

Continuous Improvement Activities

Continuous Improvement Activities

The City is committed to seeking URMP areas for improvement. The current continuous improvement items are listed below:

- The City will continue to implement its enhanced restaurant inspection program.
- The City will inspect all auto service facilities in FY 06-07.
- The City will continue to work to improve implementation of the C.3 requirements, including revisions to include updated Group 2 and HMP requirements, and will seek ways to improve the program.
- The City will continue to evaluate and implement improvements to the IPM Plan, and pesticide management program.

Thank you for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact me at (650) 903-6378.

Very truly yours,

Eric Anderson, Urban Runoff Coordinator

FY 2005-2006 ANNUAL REPORT

Municipality: City of Mountain View

Regional Board Comments on ICID in FY 2004-2005 Annual Report

Item	RWQCB Comment	City of Mountain View Response
ICID rated "Compliance"	No improvement or compliance actions were required.	

ICID Program Evaluation

During FY 05-06, the City responded to 80 ICID incidents, which is similar to past years' results (92 incidents in FY 02-03, 89 incidents in FY 03-04, and 74 incidents in FY 04-05). The breakdown of the types of incidents, potential source, sources of reports, and follow-up and enforcement actions are summarized in the attachment to this section of the annual report. During FY 05-06 the City responded to 6 more incidents than during FY 04-05. Evaluation of the "Incident Type" data showed that the City responded to 3 more accidental spills, and 3 more sanitary sewer overflow incidents in FY 05-06 compared to FY 04-05. The "accidental spills" incidents are mostly vehicle accidents that result in spilled vehicle fluids. The data also shows 3 fewer "abandoned drums" incidents. The remaining incident types were consistent (+/- 1) during FY 04-05 when compared to FY 03-04.

During FY 05-06, the City continued its restaurant inspection program to address restaurant-related ICID incidents. This will be discussed further in the IND section of the annual report.

In response to a number of complaints about abandoned oil containers at apartment buildings, the City developed a one page fact sheet that describes locations to recycle used motor oil. The fact sheet was translated into Spanish and was distributed as necessary. The City will increase distribution of this information in FY 06-07.

Review of the data does not provide useful information regarding the distribution of ICID incidents. The incidents appear to be randomly occurring throughout the City.

FY 2005-2006 ANNUAL REPORT

Municipality: City of Mountain View

Industrial/Commercial Program Evaluation

During FY 05-06, the City implemented its Industrial/Commercial inspection program. The data above summarizes the City's actions. Common types of problems found are spills and leaks, housekeeping, training requirements, secondary containment needs, and for restaurants, washing or housekeeping problems.

During FY 05-06 the City conducted 32 automotive facility inspections, which is lower than past years. During FY 05-06, only automotive facilities that are permitted to discharge to the sanitary sewer were inspected because the City was experiencing a staffing shortage. The inspections evaluated sanitary sewer discharges and storm water issues. During FY 06-07, the City will resume inspections of all automotive facilities as an additional inspector has been hired.

During FY 05-06, the City conducted 151 restaurant inspections. In recent years, the City reorganized a position within the Fire Department, so an inspector was assigned to the Fire and Environmental Protection Division. One of the inspector's responsibilities is to inspect restaurant for fire code issues and environmental issues. This arrangement has resulted in a streamlined restaurant inspection program, and has resulted in a significant increase in restaurant inspections compared to past years.

During FY 04-05, The City collected penalties related to commercial and industrial inspections in the amount of $500.

Public Streets, Roads & Highway O&M Program Evaluation
During FY 05-06, the City's sweeping totals increased compared to FY 04-05, but were similar to past years. A summary of the City's sweeping totals is included with this report. The City also continued to implement the Clean Sweep program, which provides access to streets that are impacted with parked cars, and the annual leaf removal program. Training during FY 05-06 (March 16, 2006) focused on incident response, preventing spills from reaching the storm drain or the sanitary sewer drain, chemical handling, and how to handle abandoned wastes. The Public Services Department's Safety and Training Manager coordinated the training, and the Urban Runoff Coordinator participated in the training presentation. Training in conjunction with the Safety and Training Manager is a good way to present multiple topics to the employees without impacting operations.

Corporation Yard O&M Program Evaluation

During FY 05-06, the City conducted training (March 16, 2006) for all MOC operations and maintenance employees regarding the Environmental Compliance Plan. The training mostly covered hazardous materials issues, such as storage, and incident response, spill mitigation, and reporting.

The City continued its contract for SWPPP inspections and monitoring for the MOC. Quarterly dry weather inspections and monthly wet weather inspections did not result in discoveries of new pollutant sources or new BMPs that may be needed. The recommendation to install a roof over the bulk storage area is still in place. The Annual Report for the MOC SWPPP is available for review upon request.

Rural Public Works Program Evaluation

The City of Mountain View is urbanized, so most of the Rural Public Works Performance Standards do not apply. The standards describing work performed along or across stream channels may be applicable depending on the project. The City's Public Works specifications require contractors to install erosion controls, and City contacts require contractor to obtain the necessary permits for working in and along watercourses.

FY 2005-2006 ANNUAL REPORT

Municipality: City of Mountain View

Storm Drain System O&M Program Evaluation

During FY 05-06, the City's Wastewater Section continued to maintain storm drains by cleaning catch basins using a vacuum truck. The Wastewater Section also stencils storm drains throughout the City. Wastewater conducts preventative maintenance on the City's sanitary sewer system, which reduces sewer overflow incidents. In cases where sewer overflows occur, Wastewater will unplug the sewer, and vacuum the spilled sewage. These incidents are reported in the ICID data. During FY 05-06, the City reports an increased number of sewage overflows from 13 to 16 incidents. This may result from improved reporting rather than an actual increased number of incidents. Wastewater now reports incidents, which were considered minor and un-reportable in the past. Wastewater also responds to other types spill incidents, when needed.

During FY 05-06, the City started developing its Sanitary Sewer Management Plan (SSMP), which provides a comprehensive outline of maintenance activities and enforcement programs to minimize the number of sanitary sewer overflows. The SSMP also outlines the City's overflow response procedure.

Training during FY 04-05 focused on incident response, preventing spills from reaching the storm drain or the sanitary sewer drain, chemical handling, and how to handle abandoned wastes. The Public Services Department's Safety and Training Manager coordinated the training. Training in conjunction with the Safety and Training Manager is a good way to present multiple topics to the employees without impacting operations.

FY 2005-2006 ANNUAL REPORT

Municipality: City of Mountain View

NEW DEVELOPMENT PLANNING PROCEDURES (C.3)

FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
C.3.a Performance Standard Implementation Goal: To modify Mountain View's URMP to include revised model Planning Procedures Performance Standards which incorporate Provision C.3 requirements.				
NDP - all	**a.1.** Incorporate revised model Planning Procedures Performance Standards into local urban runoff management plans.	The City will review the Program-developed model Planning Procedures Performance Standards when completed. If acceptable, the City will incorporate the model Planning Procedures Performance Standard into its Urban Runoff Management Plan.	The Program's model Performance Standard and Supporting Documents for Planning Procedures for New Development and Redevelopment are adopted and included in the City's URMP.	FD
C.3.b Development Project Approval Process Goal: To modify Mountain View's development project approval processes, for both private and public development project, to incorporate the requirement of Provision C.3				
NDP – 1	**b.1.** Assess current stormwater-related requirements in Co-	1) Conditions of Approval will be revised to list Group 2 projects when the deadlines are determined.	1. During FY 05-06, the City's Conditions of Approval were revised to require storm water treatment controls for Group 2A projects.	FD CDD PW

	permittee's development review process, for public and private projects, and identify additional steps or tools required at each stage of the process to meet C.3. requirements.	2) Develop guidance document to assist developers and City staff implement the C.3 requirements.	2. During FY 05-06, the City's guidance document outlining the C.3 requirements was revised to include Group 2A projects.	
NDP – 1	**b.2.** Develop new or modify existing review policies, ordinances, procedures, and/or conditions of approval to incorporate Group 1 requirements (based on results of tasks under C.3.c. through C.3.m.)	Policies, ordinances, procedures, and/or conditions of approval are required to implement the C.3 requirements. Revisions are incorporated as necessary to reflect changing requirements.	In October 2004, the Mountain View City Council adopted a new section (Sec. 35.32.23) of the ordinance, titled "Permanent storm water pollution prevention measures." This ordinance section requires implementation of the C.3 requirements, the City's storm water Quality Guidelines, and inspection and maintenance responsibilities. Standard Operating Procedures are included in the URMP. Conditions of approval modified to require C.3 controls for Group 2A projects. Guidance document outlines C.3 requirements for developers. Guidance document was revised to include Group 2A requirements.	FD CDD PW
NDP - 10	**b.3.** Train Co-permittee staff in planning, building, and engineering departments on the	The City will train Planning, Building, and Engineering staff on all changes to the development review process, and the use of tools, such as check sheets and updated materials. Staff training will be performed either in-house, or as	City staff attended SCVURPPP C.3 training workshop on 6/6/2006 regarding BMP maintenance and inspection. City staff will be trained about group 2 requirements.	FD CDD PW

	C.3. provisions and goals, the required changes in the approval process, and the use of appropriate tools.	part of a Program-wide effort.		
C.3.c Requiremnts for Group 1 and Group 2 Projects Goal: Prepare to require proponents of Group 1 projects to design and implement stormwater treatment BMPs or reduce stormwater pollution to the maximum extent practicable. Participate in development of the proposal for an alternative Group 2 project definition and prepare to implement C.3 requirements for Group 2 projects as needed				
NDP – 12	**c.1.** Develop and implement a procedure to request and log the type, size, and impervious area of every project (and extent of redevelopment if applicable) for determination of applicability of Group 1 (and later Group 2) requirements.	1. An impervious surface data sheet was developed for preliminary information about the types of projects that occur in Mountain View. 2. The impervious surface data collection sheet may be modified for use in the guidance document as a way to determine applicability of the C.3 requirements.	Impervious surface data collection sheets are required to be submitted with the Storm Water Management Plan required by the City's guidance document. Impervious surface calculation sheets may also be required during the Planning review process to determine if the project meets the C.3 threshold.	FD CDD PW
NDP – 12	**c.2.** Develop a method for determining	1. For Group 1 projects, Community Development Applications received on or after October 15, 2003 will be	1. The City determined that group 1 project applications received on or after October 15, 2003 will be subject to C.3 requirements. For	FD CDD PW

	whether a private project was "deemed complete" by 7/15/03, or documenting that a public project was funded and scheduled for construction by 10/15/03.	subject to the City's C.3 implementation program outlined in the guidance document. 2. For public projects, the City will document projects funded and scheduled for construction by 10/15/03, which will be exempted from C.3 requirements.	Group 2A, the date will be October 2005, and for Group 2B, the date will be August 2006. 2. C.3 requirements will be included in public projects that have been funded and are scheduled for construction by 1/15/2004. For Group 2A, the date will be October 2005, and for Group 2B, the date will be August 2006.

SANTA CLARA VALLEY URBAN RUNOFF POLLUTION PREVENTION PROGRAM

FY 2005-2006 ANNUAL REPORT

Municipality: City of Mountain View

Item No.	Activity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
C.3.e. Operation and Maintenance of Treatment BMPs Goal: To develop and implement local agency operation and maintenance (O&M) verification programs to help ensure the proper maintenance of stormwater treatment measures on public and private property.				
NDP – 8	**e.1.** Develop and implement a procedure for logging information about treatment BMPs installed at approved Group 1 projects, and for maintaining a list or database of properties, treatment BMPs, and responsible operators.	The City's Fire and Environmental Protection Division currently maintains a database of facilities that have storm water treatment BMPs. The database is set up to print out annual letters requiring the facility contact to submit proof of BMP maintenance.	The City's existing database will be used to track treatment BMPs.	FD RBF
NDP – 8	**e.2.** Adapt model O&M agreement language to meet agency-specific needs and requirements and incorporate into the project review and	The City will review the model O&M agreement language that will be developed by the Program, and is due 12/02. If acceptable, the O&M agreement language will be incorporated into the project review and approval process as appropriate.	A final O&M agreement has been developed. Completed O&M agreements are required as part of the Storm Water Management Plan review and approval.	FD

	approval process.			
NDP – 8	**e.3.** Develop local programs for inspection of a subset of prioritized treatment BMPs to verify that the responsible party is performing required O&M.	The City will utilize the O&M verification system that is currently in place for treatment BMPs. The current system is to send annual maintenance letters to all facilities with treatment BMPs requiring submittal of maintenance certification. Additionally, treatment BMPs that are considered to be a priority for inspections will be inspected annually.	Inspections will be included in the existing Industrial/Commercial inspection program.	FD
NDP - 12	**e.4.** Report on BMP O&M verification program.	The City will report on the progress of the BMP O&M verification program during the Annual Reporting process. The annual reports will include effectiveness evaluation and planned program improvements.	During FY 05-06, no BMP O&M verification inspections were performed because the projects had not been completed. Some projects were recently completed and will be inspected during FY 06-07.	FD
C.3.f. Hydromodification Management Plan (HMP) Goal: To manage increases in runoff peak flow and volume for Group1 projects, where such increases may cause increases erosion of creek beds and banks or related impacts, through implementation of a HMP.				
NDP – 1	**f.1.** Upon adoption by the Regional Board, begin implementation of HMP requirements for Group 1 projects that may cause	The City will review the HMP requirements. If acceptable, the HMP requirements will be implemented	HMP requirements have been incorporated into the City's C.3 implementation process and into the guidance document.	FD CDD PW

	increased erosion of other related impacts.			
C.3.h. Alternative Certification Goal: To allow a professionally qualified person to certify the adequacy of design of stormwater treatment measures.				
NDP	**h.1.** Alternative certfication	The City will develop an internal procedure to allow alternative certification of the adequacy of design of stormwater treatment measures.	The City's guidance document was revised to include a third-party engineer's certification requirement. Third part engineers are required to certify that the treatment controls designed for the project meet the City's Guidelines and requirements.	FD CDD PW
C.3.g. Waiver and Compensatory Mitigation Program Goal: Establish a program under which a project proponent may request a waiver from treatment BMP requirements due to impracticability, with a provision to provide an equivalent water quality benefit to the same receiving water (that allows participation in regional solutions).				
NDP – 1	**g.1.** Develop local waiver program, perform legal review, and incorporate provisions in project review process	The City will review the model waiver and compensatory mitigation program that will be developed by the Program, and is due 3/03. If acceptable, the waiver and compensatory mitigation program will be incorporated into the project review and approval process as appropriate.	At this time, the City does not have a waiver and compensatory mitigation program since there is not a system to allow for participation in regional solutions. The City will consider a waiver and compensatory mitigation program if a viable opportunity becomes available.	
NDP - 12	**g.2.** Tracking information for reporting on waivers granted, including project data, reasons for and terms of the waiver, and the	If an acceptable waiver and compensatory mitigation program is adopted, the City's Fire and Environmental Protection Division will update the new development tracking database to include the requested waiver information.	Waiver tracking program is not applicable at this time.	

	alternative benefit project and completion date.			
C.3.j. Site Design Measures Guidance and Standards Development Goal: To incorporate site design measures that reduce water quality impacts into local design standards and encourage their use in project designs to meet C.3. requirements.				
NDP – 4	**j.1.** Review existing local design standards and guidance, and compare them to the list of areas to address in Provision C.3.j. and other references such as "Start at the Source" and the "Development Policies Comparison" work sheet. Prepare and submit an analysis of local standards, identified opportunities for revision, and proposed revisions.	1. Review list of recommended site design measures to reduce water quality impacts using references, including the NPDES Permit and "Start at the Source." 2. Compare the list of recommended site design measures with existing City standards and guidance. 3. Identify opportunities for revisions to City standards that will incorporate site design measures to reduce water quality impacts. 4. Prepare and submit an analysis of the revisions proposed to be incorporated into the City's project review process, including schedule for revisions and implementation	The City's C.3 guidance document references site design measures. C.3 guidance manual will include site design measures and standards.	CDD FD

NDP – 4	**j.2.** Incorporate the revised standards and guidance into local project approval process and "fully implement" site design measures and guidance.	The revisions recommended from action j.2. will be incorporated and implemented during FY 04-05.	Site design measures are encouraged during review and comments on project Storm Water Management Plans.	CDD FD
C.3.k. Source Control Measures Goal: Require source control measures for new redevelopment projects to limit pollutant generation, discharge and runoff to the maximum extent practicable.				
NDP – 4	**k.1.** Revise conditions of approval to include the source control measures recommended in Provision C.3.k.	The City will review the model list of source control measures that will be developed by the Program, and is due 9/15/02. If acceptable, the City's Conditions of Approval will be revised to include the required source control measures.	Most source control measures were already included in the Mountain View City Code and listed in the Storm Drain Plan Review Check Sheet. During FY 02-03 (May 2003), the Mountain View City Code and the Storm Drain Check Sheet were also revised to include additional source control measures.	FD

Item No.	Activity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
C.3.l. Update General Plans Goal: Include water quality and watershed protection principles and policies in General Plans to the extent necessary to provide the basis for implementation of the measures required by Provision C.3.				
NDP - 1	**I.1.** Review current	The current City General Plan Policy has been reviewed, and pursuant to	General Plan was reviewed and found to adequately address policies needed to implement Provision C.3.	CA FD

	General Plan policies related to water quality and watershed protection, and incorporate additional policies as shown in C.3.I. as appropriate.	Goal F, Policy 16 of the Environmental Management Chapter is shown to adequately address the principles and policies that are needed to implement Provision C.3.	The pertinent General Plan sections are included in the City's URMP.	
C.3.m. Water Quality Review Processes Goal: To ensure that water quality impacts and appropriate mitigation measures are identified as part of environmental review of proposed projects.				
NDP - 3	**m.1.** Review CEQA initial study checklists and other environmental review documents and modify documents as needed to include questions that sufficiently address water quality impacts of projects.	1. Review and evaluate the examples of CEQA Water Quality Review questions that are listed in C.3.m. 2. Compare the examples in C.3.m. to the City's existing CEQA and other environmental review documents. 3. Revise CEQA and other environmental review documents as necessary.	The City reviewed the example Water Quality Review questions listed in C.3.m, and determined that the City's existing CEQA check list adequately addresses the questions in a manner that is consistent with the SCVURPPP memo, dated October 17, 2003.	FD CDD
C.3.n. Reporting Requirements Goal: To meet the Provision C.3. reporting requirements, and plan for anticipated data needs, and begin collecting and tracking required data on development projects as needed.

FY 2005-2006 ANNUAL REPORT

Municipality: City of Mountain View

NDP – 12	**n.1.** Provide information from Table 1 of Provision C.3 in Annual Reports	Tables will be included in Annual Reports.	See project reporting tables (Part 1 and Part 2) that are included in this report.	CDD PW
NDP - 8	**n.3.** Collect information and report a summary of types of pesticide reduction measures required for development projects, and the percentage of projects for which pesticide controls were required.	The City will continue to review and evaluate pesticide reduction measures for possible implementation. The City currently requires the following pesticide reduction measures for landscaping on new projects: • No steep slopes (>10%) • Use of mulches • Selecting plants appropriate for the climate zone • Irrigation systems that reduce runoff	No new pesticide reduction measures were added during FY 05-06. The Fire and Environmental Protection Division reviewed 22 projects as part of the development review process during FY 05-06. Conditions to reduce pesticide runoff were placed on 16 of the 22 projects.	FD CDD

Regional Board Comments on New Development-Planning Procedures in FY 2004-2005 Annual Report		
Item	**RWQCB Comment**	**City of Mountain View Response**
04-05 Annual Report comments.	1) Include a list of acronyms (and their definitions) used in the Annual Report. 2) Clarify whether the "submittal date" and "application deemed complete date" are one and the same. 3) Approval dates not listed for some projects.	1) The list of acronyms (and their definitions) used in the Annual Report is included with this report as Attachment C. 2) The "submittal date" shown in reporting table - Part 1 indicates the month and year that the project was submitted to the City for Development Review, and does not reflect the deemed complete date. 3) The reporting table – Part 1 is revised to list approval dates for all projects.

New Development-Planning Procedures Program Evaluation

During FY 05-06, the City implemented the C.3 requirements using its existing development review process. Information regarding the requirements is provided to applicants early in the planning process. The City revised its Conditions of Approval, and the C.3 guidance document, titled "Storm Water Quality Guidelines Development Project," to reflect Group 2A requirements. The Fire and Environmental Protection Division places conditions of approval on projects requiring applicants to prepare and submit a Storm Water Management Plan for applicable projects. The information required in the Storm Water Management Plan is listed in the City's Storm Water Quality Guidelines document. The Storm Water Management Plan includes information about the treatment controls that will be installed or used to comply with the requirements. The Plan also describes the O&M requirements. During the plan review phase of the process, building plans and the Storm Water Management Plan are checked to verify that the conditions and requirements are met. Plans are approved and a building permit will be issued when the conditions and requirements are met.

During FY 05-06, the City approved six private Group 1 projects. There were no public Group 1 project, and no Group 2A projects in FY 05-06. Each of the projects includes installation of CDS treatment devices. Some of the projects also incorporate vegetated swales as part of the site's treatment control strategy. Conditions were places on all projects that Maintenance Agreements would be entered and recorded prior to final occupancy. At this time, none of the approved Group 1 projects have been completed, so post-construction O&M and inspection

requirements have not been initiated. Most of the projects in Mountain View are dense, with little landscaping available for infiltration, which is why manufactured treatment devices are typically selected. The City is currently reviewing three additional private Group 1 projects. A summary of the Group 1 projects is listed below.

By October 2005, the City will revise its Storm Water Quality Guidelines to include the Group 2A requirements and the Hydrograph Modification Plan requirements.

The City reviewed 150 projects for potential storm water related impacts and requirements.

SANTA CLARA VALLEY URBAN RUNOFF POLLUTION PREVENTION PROGRAM

FY 2005-2006 ANNUAL REPORT

Municipality: City of Mountain View

New Development-Construction Inspection Program Evaluation

During FY 05-06, the City continued to implement an effective construction inspection program. The City conducted 131 construction site inspections and issued 42 written notices. Most notices were for minor violations with corrective actions. The City issued one Violation Notice, which included a $500 penalty for uncontrolled dewatering discharges from an excavation at a construction site. The majority of the inspections were conducted at small project sites. The City currently has a few moderately sized projects, which are the priority sites for inspections. Most of the construction inspection items identified were housekeeping issues that were corrected, such as sweeping, replacing filters, and adding rock to the construction driveway. Pre-winter inspections were conducted and information was distributed, which seemed to help maintain compliance throughout the winter.

The City will continue to implement its construction inspection program. Pre-winter inspection and information distribution is important for achieving compliance, and will be conducted again in FY 06-07.

PEST MANAGEMENT
(Provision C.9.d of the Permit)

FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Municpal Pesticide Use				
Goal 1.A. Eliminate all unnecessary municipal pesticide use (particularly organophoshate (OP) pesticide use) and implement Integrated Pest Management (IMP) techniques.				
I.A.1	Record Keeping and Tracking	Develop and implement a process for tracking pesticide use on municipally owned property (PS #8). Include in the process reporting and justification for the use of OP pesticides and BMPs employed during OP pesticide use.	Pesticide use tracking database was used during FY 05-06. Pesticide use data for FY 05-06 is available on request.	FD, CSD, SGL, and PCO
I.A.2	IPM Policy	Adopt an IPM policy and/or ordinance requiring the use of IPM techniques in the agency's operations, minimization of pesticide use, and the restricted use of organophosphate pesticides only when their use is justified and adverse water quality impacts are minimized (PS #2).	City's IPM Policy was adopted by the City Council on September 10, 2002.	FD, CSD, SGL
I.A.3	IPM Plan	Develop and implement standard operating procedures (SOPs) and best management practices (BMPs) for implementing the IPM policy. (PS #3).	Final IPM Plan was completed in June 2003. IPM Plan includes SOPs and BMPs. The Plan was implemented during FY 05-06.	FD, CSD, SGL, CM

SANTA CLARA VALLEY URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2005-2006 ANNUAL REPORT

Municipality: City of Mountain View

		BMPs will include special precautions to reduce water quality impacts when applying pesticides.		
I.A.4	Performance Standards	Update local URMPs to incorporate/adapt the model Pest Management Performance Standard, including a description of the legal authority (IPM policy/ordinance, contract language), work plan elements, BMPs, and SOPs needed for implementation. (Program FY 01-02 Work Plan)	Program's Model PS is adopted and included in the City's URMP.	FD
I.A.5	Contract PCOs	Develop and implement a process to ensure that any contractor employed to conduct pest control and pesticide application on municipal property engages in pest control methods consistent with the IPM policy adopted by the agency (PS #5).	City's PCO contract did not go for bid during FY 05-06. City's purchasing Division was notified of the IPM Policy and will be informed that future IPM requirements will be included when new PCO Contract is solicited. IPM Policy and Plan have been provided to the City's PCO contractor.	FD, purchasing
I.A.6	Chemical storage area inspection	Conduct a periodic agency-wide search of chemical storage areas for pesticides no longer legal for application per EPA, State, and/or local requirements, and properly dispose of any such pesticides pursuant to appropriate waste disposal regulations.	During FY 05-06, the Fire Department evaluated City-wide chemical inventories. No OP pesticides were identified.	FD
MM I.A.1	Annual report	Document completion of tasks in annual reports. Use pesticide-tracking process to document pesticide use.	Pesticide use data will be used in the effectiveness evaluation section of the annual report.	FD

FY 2005-2006 ANNUAL REPORT

Municipality: City of Mountain View

Goal 1.B. Raise awareness of all municipal employees and train employees who apply pesticides for the municipality about the municipality's IPM Policy and/or IPM techniques as appropriate.				
I.B.1	Employee Training	Ensure that employees who apply pesticides for the agency obtain the appropriate training as required by the County Agricultural Commissioner and the State Department of Pesticide Regulation (DPR) (PS #4a).	All City pesticide applicators receive training required by the County and State.	CSD, SGL
I.B.2	IPM Training	Provide annual training on the appropriate portions of the IPM Policy, SOPs, and BMPs, and the latest IPM techniques to employees within departments responsible for pesticide application (PS #4b).	Environmental Safety Division personnel attended an IPM workshop in June 2006 Environmental Safety Division personnel and Community Services Managers and Supervisors will attend the Regional IPM training workshop on November.	FD. CSD, SGL
I.B.3	Training	Periodically (at least annually) inform employees who are not authorized and trained to apply pesticides that they cannot use over-the-counter pesticides in or around the workplace, consistent with the IPM Policy (PS #4c).	Departments have been informed to contact the PCO for pest problems. Training conducted by the Safety and Training Manager and the Urban Runoff Coordinator on March 16, 2006 reviewed the Environmental Compliance Plan for the Operations and Maintenance Divisions. This training covered incident response (including spills), chemical handling, emergency response, and handling abandoned waste. The over-the-counter pesticide prohibition was also discussed.	FD, CSD, PS
I.B.4	Training Workshop	Assist with and send staff to a workshop on least-toxic pest control methods and pesticide management BMPs. (Program	Environmental Safety Division personnel attended an IPM workshop in June 2006	NA

		FY 01-02 Work Plan)	Environmental Safety Division personnel and Community Services Managers and Supervisors will attend the Regional IPM training workshop on November.

FY 2005-2006 ANNUAL REPORT

Municipality: City of Mountain View

Item No.	Activity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Public Education and Outreach **Goal II.A.** Increase awareness of IPM so target audiences recall less toxic pest management messages and adopt IPM behaviors. Target audiences include residential and commercial users, pesticide retailers, municipal employees, and special districts (PS #6)				
II.A.1	WE&O Outreach	Assist with local implementation of the Watershed Education & Outreach (WE&O) Campaign[1], which will target the general public and include messages about less-toxic pest control and proper disposal (Program FY 01-02 Work Plan).	The City supports WE&O Outreach through Program participation. The City distributed IPM and less toxic pest control information at various public events, such as the Art and Wine Festival, and Arbor Day Fair. The Community Outreach Coordinator also distributed Pest control fact sheets in English and Spanish.	FD, CM
II.A.10	Local Outreach	Prepare and pitch IPM stories and press releases to local media.	During FY 05-06, the City did not prepare IPM articles.	FD
II.A.12	IPM Outreach	Assist with implementation of local components of a "Pesticide User Outreach" project[2] targeting residential and commercial users (see Program FY 01-02 Work Plan).	City supports this item through Program Participation.	FD
II.A.13	IPM Outreach	Provide information on less toxic pest control (e.g., IPM techniques, municipal IPM policies, model contract language, training opportunities, etc.) to neighboring special districts (e.g., open space districts, vector control districts,	The City did not provide information to neighboring special districts. City supports outreach through regional effort.	FD

[1] Funded by all Co-permittees in FY 01-02.
[2] Funded by all Co-permittees in FY 01-02.

		and school districts) as appropriate		
MM II.A.1	Annual report	Document or estimate numbers of residents reached by outreach efforts and media advertising	Through distribution of IPM materials at community events, the City educated approximately 2,500 residents.	FD
Goal II.B. Educate pesticide retailers and consumers about less toxic pest control products and promote the sale of such projects.				
II.B.1	IPM Otreach	Continue to fund and participate in the BASMAA Regional IPM Partnership[3]. (Program FY 01-02 Work Plan)	City addressed this item through Program participation.	FD
II.B.2	IPM Outreach	Continue to implement cost-effective elements of the IPM Store Partnership Program. Create and provide fact sheets and other materials to pesticide retailers to facilitate point-of-purchase outreach. Visit stores as necessary to ensure ongoing participation. (Program FY 01-02 Work Plan)	The City continued its support of the Our Water Our World program during FY 05-06. Three stores in Mountain View participated in the program.	FD
II.B.3	IPM Outreach	Assist Program to offer IPM training opportunities to pesticide retailer employees through coordination with Master Gardener-taught educational programs.	This item addressed through Program participation.	FD
MM II.B.1	IPM Outreach	Document number of participating stores, materials distributed and employees trained. Evaluate the cost-effectiveness of the IPM Store	Three stores continued participation in the OWOW program. Pest fact sheets, and shelf talkers provided at the stores.	FD

[3] Funded by all Co-permittees in FY 01-02.

		Partnership Program each year		
Pest Control Operators (PCOs) **Goal III.A.** Minimize pesticide use by PCOs contracted for structural pest control and landscape maintenance.				
III.A.4	PCO operations	Require PCOs contracted for municipal applications to use pest control methods consistent with the municipality's IPM policy (through contract specifications). Specifically, require contractors to: a) follow the agency's IPM policy, BMPs, and SOPs; b) provide evidence of current IPM training, when feasible; and c) provide documentation of pesticide use on agency property to the agency in a timely manner (PS#5).	IPM Policy and Plan was provided to the City's contract PCO, Bay Valley Pest. Bay Valley submits records of pesticide applications to the City. Another landscape contractor applies small amounts of category III herbicides in accordance with the City's IPM policy. The contractor has been notified of the IPM policy.	FD
MM III.A.1	Record keeping and tracking	Document pesticide use by PCOs on municipal property	During FY 05-06, records of pesticide applications by Bay Valley were submitted to the City. These records were included in the pesticide database. Pesticide use data for FY 05-06 is available on request. Pesticide use by a landscaping company contracted by the City to perform minor work at public Parks had not been tracked in previous years. The pesticide use was kept, but was not submitted for tracking. The City's pesticide use tracking process was updated to include pesticides applied by the contractor. This is a small amount of pesticide use, and is included in the FY 05-06 pesticide summary.	

ATTACHMENT B

SANTA CLARA VALLEY URBAN RUNOFF POLLUTION PREVENTION PROGRAM

FY 2005-2006 ANNUAL REPORT

Municipality: City of Mountain View

Goal III.B. Require all PCOs to implement Best Management Practices (BMPs)				
III.B.2	PCO Contracts	Require PCOs contracted by municipalities to implement BMPs through contract specifications (see Action III.A.4., PS #5)	PCO contract was not up for renewal during FY 05-06. IPM Policy was provided to City's purchasing Division for inclusion in future contracts.	
MM III.B.1	Reporting	Document efforts to complete the above actions	Purchasing Division was advised of requirement to include IPM in City pest control operations.	FD, FASD

Commercial Businesses				
Goal IV.A. Determine the extent of commercial business employees use of pesticides (I.E., pesticide applications not performed by a licensed PCO) and conduct appropriate outreach regarding less toxic pest management.				
IV.A. 1	Commercial Outreach	Develop and implement education programs that target commercial businesses, per recommendations developed in Program work plan.	No commercial outreach regarding IPM was conducted in FY 05-06. City supports regional outreach efforts.	NA
MM IV.A. 1	Commercial Outreach	Document outreach efforts targeting businesses, as recommended in the work plan to be developed by the Program	No commercial outreach regarding IPM was conducted in FY 05-06. City supports regional outreach efforts.	NA
Household Hazardous Waste Collection				
Goal V.A. Provide pesticide disposal services through household hazardous waste (HHW) collection programs for all residents and small businesses, and encourage use of these programs.				
V.A.1	HHW	Ensure that adequate pesticide disposal services exist for residents and conditionally exempt small quantity	The City participates in the Santa Clara County HHW Program. Businesses are also eligible to participate in the Palo Alto small quantity program.	PW – Solid Waste

		commercial generators.		
V.A.3	HHW	Work with HHW collection agencies to support, enhance, and help publicize programs for proper pesticide disposal (PS #7).	The Public Works Department, Solid Waste Division publicizes HHW information in the Resource newsletter.	PW – Solid Waste
V.A.5	HHW Outreach	Provide hazardous waste disposal information to residents, through distribution of materials (e.g., utility bill insert, city newsletter, community events, etc.) or advertising in local media	HHW information included in the City's Resource newsletter.	PW- Solid Waste
MM V.A.1	Reporting	Document that household hazardous waste collection programs adequately serve residents and businesses and that any exchange programs do not exchange organophosphate or banned pesticides.	The City participates in the Santa Clara County HHW Program. Documentation regarding the ability to serve the residents and the prohibition against exchanging OP pesticides or banned pesticides is available from the County HHW Program.	SC County HHW
New Development **Goal VI.A.** Minimize pesticide use at new and redevelopment sites.				
VII.A.1	New Development	Have appropriate municipal staff coordinate with Program to identify landscaping techniques less likely to attract pests, including a list of pest-resistant plants, and develop model conditions of approval for pest resistant landscaping features and practices. (Required to meet NPDES Permit Provision C.9.d.ii. and Draft Permit	During FY 05-06, the City used planning conditions to minimize irrigation runoff, which also reduces pesticide runoff. Standard condition also directs developers to select appropriate plants for the location and in accordance with the appropriate climate zones.	FD

		Provision C.3.k.)		
VII.A.2	New Development Review	Consider pest-resistant landscaping and design features in the design, landscaping, and environmental reviews of proposed development projects. (NPDES Permit Provision C.9.d.ii.)	During FY 05-06, the City used planning conditions to minimize irrigation runoff, which also reduces pesticide runoff. Standard condition also directs developers to select appropriate plants for the location and in accordance with the appropriate climate zones.	FD
VII.A.3	Training	Train staff responsible for design review on pest-resistant landscaping techniques and model conditions of approval and the importance of minimizing pesticide use in runoff from development sites (NPDES Permit Provision C.9.d.ii.).	No new pesticide reduction conditions were added, so no additional training was conducted.	FD
VII.A.4	Tracking	Develop and propose enhanced reporting format for documenting use of pesticide reduction measures at development sites. (Draft Permit Provision C.3.n.)	No action on this item during FY 05-06.	FD
MM VII.A.1	Reporting	Summarize types of pesticide reduction measures required (such as by conditions of approval) for new development and significant redevelopment projects, and the percentage of new development and significant redevelopment projects for which pesticide reduction measures were required (Draft Permit Provision C.3.n.).	During FY 05-06, the following conditions were required to control irrigation runoff, which also reduces pesticide runoff: 1. Require no steep slopes exceeding 10%; use mulch as cover; plants with low water requirements; appropriate plants for climate zone. 2. Efficient irrigation systems, including; multiprogramable timers; rain shutoff devices; drip irrigation, and flow reducers.	FD

Pest Management Program Evaluation
The City's Pest Management Program evaluation is provided in the attached memo. The Memo will also be included in the City's IPM Plan.

CITY OF MOUNTAIN VIEW
MEMORANDUM

DATE: August 15, 2006

TO: City of Mountain View's IPM Plan

FROM: Eric Anderson, Urban Runoff Coordinator

SUBJECT: Pesticide Use Evaluation for FY 05-06

The purpose of this memo is to provide an evaluation of the City of Mountain View's pesticide use data for the Fiscal Year 2005-2006 (FY 05-06). The City's FY 05-06 pesticide use data will be compared to pesticide use data from Fiscal Year 2002-2003 (FY 02-03), Fiscal Year 2003-2004 (FY 03-04), and Fiscal Year 2004-2005 (FY 04-05) to identify possible trends in the City's pesticide use practices. The comparison and evaluation involve both the types and quantities of pesticides used at City facilities.

The pesticide use data is used to evaluate the City's implementation of its Integrated Pest Management (IPM) Policy, and IPM Plan. The City's IPM Policy was adopted by the City Council on September 10, 2002. The IPM Plan, which outlines the method for implementing the IPM Policy, was completed in June 2003.

The result of this evaluation will be to make recommendations for implementation of the IPM Plan during FY 06-07. This evaluation may also identify barriers to implementation of the IPM Policy and Plan. Pesticide use reports and evaluations are conducted annually. The pesticide use data and the evaluation will be included in Appendix 4 of the IPM Plan. The evaluation will also be included in the City's annual report to the Regional Water Quality Control Board, as required in the City's NPDES storm water permit.

The evaluation includes the following sections:

1. Description of the pesticide use tracking and reporting procedure and an evaluation of the procedure.
2. An evaluation of the use of prohibited pesticides at City facilities during FY 05-06 in comparison to past years.
3. A summary of the pesticide use data for FY 02-03, FY 03-04, FY 04-05, and FY 05-06.
4. A discussion of the pesticide use data for FY 02-03, FY 03-04, FY 04-05, and FY 05-06.
5. A summary and evaluation of overall pesticide use at City facilities.

Pesticide Use Tracking and Reporting Procedure

Data was collected from the Forestry and Roadway Landscaping Division (FRL), Shoreline Golf Links, and the City's contract pest control operators, Bay Valley Pest Control and Valley Crest Landscape Maintenance. FRL monitors and administers pesticide use for both FRL and the Parks Division. FRL and Shoreline Golf Links data were tracked using the required monthly report to the State Department of Pesticide Regulation, which includes the product name, registration number, quantity used, and a general description of the area where the application occurred. Bay Valley Pest Control's use data is tracked using the service invoices, which include the application date, product used, quantity used, target pest, and location.

All of the data is routed to the City's Fire and Environmental Protection Division, where the data is entered into the pesticide use tracking database. The database tracks products, date of application, quantities, and active ingredients applied. A comprehensive summary of pesticide use at City facilities during FY 05-06 was produced and is included in the City's IPM Plan.

During FY 05-06, it was discovered that pesticides applied by a City contract landscape pest control operator, One Source Landscape Maintenance, had not been tracked in past years. The City's pesticide use tracking procedure was modified to include these applications. Meanwhile,Valley Crest Landscape Maintenance's use data (landscape contractor for 05/06) is reported to FRL for tracking and includes the application date, product, and quantity. This data is forwarded to the Fire and Environmental Protection Division for entry into the tracking database, and is included in the FY 05-06 pesticide use summary. Also, during FY 05-06, the City started tracking three category III pesticides that had not been tracked in previous years.

Prohibited Pesticides

The City's IPM Plan specifically prohibits use of the following pesticides: diazinon, chlorpyrifos, chlordane, dieldrin, and DDT. During FY 05-06, the City did not use or store prohibited pesticide products.

Summary of Pesticide Use Data

Summaries of pesticide use for FY 02-03, FY 03-04, FY 04-05, and FY 05-06 are shown in the tables below. Table 1 shows a comparison of the number of different Category I, II, and III pesticides that were used during the past reporting years. Table 2 shows a comparison of the quantity of Category I, II, and III pesticides that were applied during the past three reporting years. The quantities shown in Table 2 include active and inert ingredients. Inert ingredients are typically emulsifiers or carriers that aid in delivery of the active ingredient, which is the material in a pesticide formulation that destroys the

target pest or performs the desired function. Table 3 shows a comparison of the quantity of Category I, II, and III active ingredients that were applied during the past three reporting years.

Table 1 - Number of Different Pesticides Used:

Pesticide Category	Number of Different Pesticides Used			
	FY 02-03	FY 03-04	FY 04-05	FY 05-06
I	1	0	0	1
II	4	8	6	5
III	19	22	22	27
Total	**24**	**30**	**28**	**33**

Table 2 - Quantity of Pesticides Applied:

Pesticide Category	Quantity of Pesticides Applied (Pounds) and Percent Change Compared to FY 04-05 & 3-Year Average						
	FY 02-03	FY 03-04	FY 04-05	3-Year Average	FY 05-06	% Change to Previous Year	% Change to 3-Year Average
I	144	0	0	48	340	-	+600%
II	556	512	265	444	373	+41%	-16%
III	1,777	2,155	3,310	2,414	5,467	+65%	+126%
Total	**2,476**	**2,667**	**3,575**	**2,906**	**6,180**	**+73%**	**+113%**

Table 3 - Quantity of Active Ingredient Applied:

Pesticide Category	Quantity of Active Ingredient Applied (Pounds) and Percent Change Compared to FY 04-05 & 3- Year Average						
	FY 02-03	FY 03-04	FY 04-05	3-Year Average	FY 05-06	% Change to Previous Year	% Change to 3-Year Average
I	88	0	0	29	116	-	+300%

II	235	222	87	181	244	+180%	+35%
III	853	704	990	850	1,228	+24%	+44%
Total	**1,176**	**927**	**1,078**	**1,052**	**1,588**	**+47%**	**+51%**

Category I Pesticide Use:

The IPM Plan bans the use of Category I pesticides at City facilities, except in cases where a pest outbreak poses an immediate threat to public health or significant economic loss will result if the banned product is not applied. Use of a Category I pesticide must be approved by the Community Services Director, or his/her designee.

Shoreline Golf Links

During FY 05-06, 340 pounds of a fungicide, Terracyte, was applied to golf course greens. Application of the category I pesticide was inadvertent. Terracyte had been listed as a category II pesticide, but was re-classified at the beginning of 2006, so it was applied with the assumption that it was listed as a category II pesticide. Review of the product information shows that Terracyte is listed as a category I pesticide due to acute eye hazards, which are mitigated with the use of personal protective equipment. The product does not present a threat to the environment. The potential use of Category I pesticides has not been eliminated as a future option, but is only to be used under certain conditions. Alternatives to the Terracyte product will be evaluated and considered for future use.

Category II Pesticide Use:

The IPM Plan limits the use of Category II pesticides at City facilities. Category II pesticides may be used when a Pest Control Advisor recommends their use after non-chemical controls and Category III pesticides have been ineffective, or when Category II pesticides may be needed to prevent an outbreak that may cause a threat to public health or significant economic loss.

During FY 05-06, five Category II pesticides were applied at City facilities. A discussion of the Category II pesticide use for FY 05-06 is provided below:

Forestry and Roadway Landscaping Division

- During FY 04-05, the Forestry and Roadway Landscaping Division (FRL) applied 139.5 pounds of the insecticide “m-pede,” which is an increase from the 3.7 pounds applied during FY 04-05, but is similar to the amount that was applied during FY 03-04. This product is used to treat aphid infestations, primarily in trees, so amounts used will depend on yearly fluctuations in aphid populations.

Shoreline Golf Links

- During FY 05-06, SGL applied 50 pounds of the algaecide "K-tea," which is an increase from 4.2 pounds applied in FY 04-05, and 12.5 pounds applied in FY 03-04. This product is used to control excessive algae growth in the retention ponds (lakes) at the golf course, so its use is dependent on algae growth conditions.
- During FY 05-06, SGL applied 8.7 pounds of the herbicide "Reward", which is a reduction from the 24 pounds applied in FY 04-05, and an increase from the 3.1 pounds applied in FY 03-04.
- During FY 05-06, SGL applied 33.3 pounds of the fungicide "Banner Maxx." This product was not used the previous two years. Two different fungicides, "Buctril" and "Daconil" had been used in previous years to control fungus on the greens, but were not used in FY 05-06. SGL applied 16.7 and 8.3 pounds, respectively, of "Buctril," and 116.6 and 239.5 pounds, respectively, of "Daconil" during the previous years.
- During FY 05-06, SGL applied 141.6 pounds of "Trimec Plus" to the roughs and fairways, which is an increase from 99.8 pounds applied in FY 04-05, and 47.9 pounds applied in FY 03-04.

Annual variations in the use of the products Banner Maxx, Reward, Buctril, Daconil, Trimec Plus, and Eagle is due to the practice of rotating pesticide use over an annual or multi-year frequency. This is a commonly accepted practice that minimizes the build up of resistance by a pest to a single pesticide. If this practice were not implemented, pesticide use would most likely be higher because additional pesticide applications would be needed after initial applications were shown to be ineffective.

Category III Pesticide Use:

Public Services and Community Services Departments

The IPM Plan promotes the use of less toxic methods for controlling pests at City facilities. If pesticides are needed, Category III pesticides should be used, unless these pesticides are ineffective, or Category I or Category II pesticides are needed to prevent an outbreak that may cause a threat to public health or significant economic loss. During FY 05-06, 27 different category III pesticides were used at City facilities to address specific problems or situations. This is a higher number of different pesticides than used in the past, in part because three products used were previously thought to not be pesticides.

<u>Discussion of Pesticide Use Data</u>

The total amount of pesticides applied during FY 05-06 increased by 2,565 pounds (73% increase) compared to FY 04-05, and increased 3,234 pounds (113%) compared to the 3-year average. The amount of category III pesticides applied during FY 05-06 increased by 2,117 pounds (65% increase) compared to FY 04-05, and increased 3,014 pounds (126% increase) compared to the 3-year average. The amount of category II pesticides

applied during FY 05-06 increased by 108 pounds (41% increase) compared to FY 04-05, and decreased 71 pounds (16% decrease) compared to the 3-year average. The amount of Category I pesticides applied during FY 05-06 increased by 340 pounds compared to no category I applications in FY 04-05, and increased 192 pounds (600% increase) compared to the 3-year average. Last year's pesticide use evaluation report, which compared FY 03-04 and FY 04-05 data, showed a 35% increase in total pesticide use, a 54% increase in category III pesticide use, and a 48% decrease in category II pesticide use.

The total amount of active ingredient applied during FY 05-06 increased by 510 pounds (47% increase) compared to FY 04-05, and increased 536 pounds (51%) compared to the 3-year average. The amount of category III active ingredient applied during FY 05-06 increased by 238 pounds (24% increase) compared to FY 04-05, and increased 378 pounds (44% increase) compared to the 3-year average. The amount of category II active ingredient applied during FY 05-06 increased by 157 pounds (180% increase) compared to FY 04-05, and increased 63 pounds (35% increase) compared to the 3-year average. The amount of Category I active ingredient applied during FY 05-06 increased by 116 pounds compared to no category I applications in FY 04-05, and increased 87 pounds (300% increase) compared to the 3-year average. Last year's pesticide use evaluation report, which compared FY 03-04 and FY 04-05 data, showed a 16% increase in total active ingredient use, a 41% increase in category III active ingredient use, and a 60% decrease in category II pesticide use.

Review of the data for FY 05-06 indicates three factors explaining the increased pesticide usage. The first factor is the discovery that relatively small pesticide usage by the City's landscape contractor, One Source Landscape Maintenance, had not been reported in previous years. This use amounts to 105 pounds of category III pesticides that are reported for FY 05-06, but had not been tracked in previous reports.

The second factor is that three category III pesticides, which had been used in previous years, were not reported until this years report. One of the products is a growth regulator and one is an adjuvant. Growth regulators controls pests by controlling or disrupting the pest's life cycle. Adjuvants are used in combination with pesticides to deliver or disperse the pesticide, but do not control pests by themselves. The City did not consider these to be pesticides, however a review of the State Food and Agricultural Code definition of pesticides shows that these products should be tracked. The third product is used in concealed bait stations and was not tracked since it was not exposed to the environment, but after evaluation of its use, the City started tracking its application. Use of these category III products accounted for 317 pounds of pesticide, and 9 pounds of active ingredient in the pesticide use summary. It is also important to note that FY 05-06 was the first full year that the City maintained two additional median strips. This expansion of service area will continue in FY 06-07, when the City will be responsible for maintaining two new parks.

Tracking uses and products that were not previously reported accounts for over 400 pounds of the total amount of product that is reported for FY 05-06. While this is a

significant amount, it does not fully explain the increased pesticide usage, since the total pesticide use compared to FY 04-05 increased by more than 2,500 pounds. The third factor related to pesticide use increases relates to significant increased use of five pesticides. Three of the pesticides, which were applied to the golf course greens, accounted for a 1,859 pound increase from FY 04-05. Another herbicide used to control weeds at City parks accounted for a 140 pound increase in use from FY 04-05. Increased use of these pesticides was due to weather patterns that occurred during FY 05-06. Early winter rains were followed by warm weather in February 2006, which was followed up by another extended period of rain. This weather pattern extended the growing period for fungus and weeds. Fungicides, which are typically applied once a year, were applied twice due to the wet weather. Lastly, a new ant treatment was used during FY 05-06, which accounted for 333 pounds of total pesticide use. This pesticide is applied in a highly dilute mixture and relies on larger volumes, so the total amount was 150 pounds higher than the amount applied for ant control during the previous year. The active ingredient from the ant pesticide was approximately 2 pounds, which is equivalent to the amount of active ingredient applied the previous year.

During FY 05-06, the City's Category III pesticide use was 88% of the total pesticide use for the year. This is a decrease compared to FY 04-05, when the City's Category III pesticide use was 93 % of the total pesticide use for the year, but higher than FY 03-04 when category III pesticides accounted for 82% of the total pesticide use. The volume of pesticide use is heavily dependent on seasonal variations in pest and weed populations, which are typically the result of regional weather patterns. When pesticides are needed, the City will continue to evaluate and consider the least toxic pesticide solutions. The City will also continue to seek non-chemical solutions to pest incidents. The City's primary IPM technique is to maintain healthy landscape and turf through implementation of effective cultural practices. City staff also utilizes biological and organic controls, such as nematodes in turf areas and mulch around tree basins and planting beds, as well as physical and mechanical controls to help control pest problems.

Recommendations to address pesticide use at City facilities are listed below:

1. Continue to train employees regarding the IPM Plan requirements for using Category I and Category II pesticides.
2. Continue to seek less toxic alternatives to the Category I and Category II pesticides that may be considered for use, although the alternatives are potentially more expensive and/or labor intensive. The City will evaluate alternatives to the Category I pesticide that was used during FY 05-06.
3. Continue to use less toxic products to control pests. If less toxic alternatives are ineffective and the pest outbreak poses a public health or economic threat, propose use of a Category II pesticide, or lastly, a Category I pesticide.
4. Continue to track regional efforts to develop a list of approved pesticides that not only considers acute toxicity, but other factors such as carcinogenicity, reproductive toxicity, and potential groundwater contaminants.
5. Continue to develop program and budget recommendations to implement possible alternatives.

Summary

This report has provided an evaluation of the City of Mountain View's pesticide use data for FY 05-06. Data from FY 05-06 was compared to data from previous years. The comparison and evaluation involved both the types and quantities of pesticides used at City facilities. The total amount of pesticide and the amount of category I, II, and III pesticide use increased from FY 04-05. The majority of increased pesticide use is due to weather-related application of 4 products. Also, increased use is reported due to contractor pesticide use and three products that were not reported in previous years, but were included in this report. The City inadvertently applied a category I pesticide, which had previously been listed as a category II product. The product was listed as a category I pesticide due to eye hazard, and it will be evaluated for possible alternatives. Staff will continue to evaluate and consider alternative or least toxic pesticide solutions for application whenever possible.

MERCURY POLLUTION PREVENTION PROGRAM
(Provision C.9.c of the Permit)

FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
MPP Pro-gram	Adoption of City mercury reduction policy.	The City will adopt a mercury policy in FY 03-04, requiring the virtual elimination of mercury from controllable sources in urban runoff from agency operations.	In June 2004, the City finalized Administrative Instruction No: 16-01, which established a Mercury Control Program. The Mercury Control Program includes: a procedure for the elimination of mercury-containing products to the maximum extent practicable; maximum recycling of fluorescent lights; participation in a household hazardous waste collection program for residential disposal of mercury-containing products; and public outreach.	FD
MP Task I.F	Implement guidelines for mercury-containing products reduction and management	The City will implement measures to reduce the quantity of mercury-containing products, and manage essential mercury-containing products.	No major mercury reduction measures were identified for FY 05-06. Mercury-containing switches will be removed at the time of replacement. Fluorescent lights are hauled for disposal.	PW
MP Task II.D	Documentation and reporting of mercury-containing products disposal	The City will implement measures for documenting and reporting quantities of mercury-containing products disposed.	The City maintained fluorescent light disposal records. During FY 05-06, the City recycled: 704 fluorescent tubes, 400 U-tubes, 94 2' lamps, 16 round 12-lamps, and 392 HID bulbs.	PW

FY 2005-2006 ANNUAL REPORT

Municipality: City of Mountain View

MP Task V.A	Mercury Disposal Outreach	The City will assist with program efforts to provide outreach to educate small business and small quantity generators about fluorescent light recycling programs.	Information about HHW and small business waste disposal programs is included in the City's Resource newsletter, which is mailed to all residents and businesses three time a year.	
MPP Pro-gram	HHW Collection	No specific tasks. City to continue HHW efforts through participation in the Santa Clara County HHW Collection Program.	City continued participation in the Santa Clara County HHW collection program. The City of Mountain View collaborated with the City of Palo Alto to offer fluorescent light and mercury thermometer drop-off services to residents.	PW

Item	RWQCB Comment	City of Mountain View Response
No Comments.	NA	NA

Mercury Pollution Prevention Program Evaluation

During FY 05-06, the City implemented its Mercury Control Program. The Mercury Control Plan establishes a policy for reducing mercury-containing products at City facilities, through identification of mercury-containing parts and devices at City facilities, and the gradual phase-out of those parts and devices. The City supports the County-wide HHW and small quantity generators programs.

COPPER ACTION PLAN/NICKEL ACTION PLAN

FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
CB-1	Vehicle Washing Operations	• Public outreach and education efforts to reduce vehicle wash discharges, including brochure distribution, and mobile cleaners information • Provide car wash kit to charity car wash organizers and educate on the use of the kits. • Inspect auto businesses regarding car wash requirements, and prohibited storm drain discharge. • Continue to maintain car wash systems for City vehicles at the Corp yard and Fire Stations. • Require vehicle wash systems draining to the sanitary sewer as source control measures for projects, where the control is applicable. • Submit data regarding vehicle washing outreach activities and	During FY 05-06, the City provided a car wash kit to local charities conducting car washes. The car wash kit is used to divert car wash water from storm drains. The City also maintained 6 City car wash facilities (2 at the Corporation Yard, and 4 at Fire Stations). The vehicle service facility inspection program verifies that fleet washing water is not draining into the storm drain system. Vehicle facility operators are also notified about vehicle washing requirements, including rental operations. Vehicle BMP information is provided to residents at City outreach facilities, including the Art and Wine Festival, and Arbor Day.	FD

		effectiveness evaluation in annual reports.		
CB-3	Industrial Copper Control	Continue Industrial Inspection program, including NOI sites such as plating and metal finishing facilities, vehicle service facilities, and other permitted sites.	The City conducted its industrial facility inspection program. Details are provided in the Industrial/Commercial Discharges Control Program section of this report. Inspections involve observing outdoor areas where spills or equipment discharges could release pollutants including copper and nickel into the storm drain system.	FD
CB-6/7	Reducing Traffic Congestion/Promoting Alternative Transportation	Review the results of the Development Policies Comparison Project Report, particularly Section VI., Policies to Limit Auto Use/Promote Alternative Transportation, in the Policy, Code, and Ordinance Worksheet, and investigate updating local development rules to promote better transportation-related design practices and alternative modes of transportation.	The City of Mountain View has actively supported public transportation projects including light rail. The City has also promoted transit-oriented development.	Community Development Department
CB-8	Watershed Protection Measures	• General Plan revisions are being reviewed as part of C.3 implementation. Revisions will be considered during the next City-wide GP revision, which currently is not scheduled. • CEQA revisions related to storm water are currently being evaluated as described in the C.3 Work Plan. Guidance from	The General Plan was not revised during FY 05-06. The City's existing CEQA document adequately addresses water quality review issues.	

		SCVURPPP and the City of San Jose addressing water quality review in CEQA will be reviewed and implemented, if acceptable. • HMP implementation will be incorporated upon completion of the document. • Continue C.3 implementation efforts	The City has a condition requiring eligible projects to comply with HMP requirements. The City does not expect HMP projects to be submitted for review. See New Development – Planning Procedures.	
CB-11	Street Sweeping	• City will continue to implement street sweeping program. • City will continue "Clean Sweep" program designed to secure access to heavily impacted streets that have a lot of cars typically parked throughout the day. • Maintain effective street sweeping equipment. • Continue to collect and report street sweeping information including mile swept and material removed for annual reports. • Continue to manage street sweeping solids. • Continue to maintain storm drain catch basins • Attend SCVURPPP training	See Streets and Roads Maintenance Section for more details.	

		workshops, if provided. • Evaluate need for improvement in FY 03-04 annual report.		
CB-12	Copper from Pools and Spas	• City will respond to complaints of pool/spa discharges. • Assist Program development of pool brochure. • City will distribute outreach materials.	The City responded to 1 pool discharge incident. The City supports regional outreach efforts. The Program completed mailing of the new Program pool brochure.	FD
CB-21	Architectural Copper	Review study and ordinance from Palo Alto and consider feasibility of limiting the use of these materials.	The City does not currently limit the use of architectural copper materials. The City reviewed Palo Alto's ordinance and is not planning to ban or limit the use of architectural copper materials at this time.	
NB-1	Discharges from Construction Sites	Continue to implement Construction Inspection Performance Standards and other tasks in Construction Inspection element of the Work Plan.	See the Construction Inspection section of this report for more details.	FD

Other Water Quality & Watershed Management Programs Evaluation

Current trash control efforts include two City-sponsored creek cleanups a year. These cleanup events occurred on Stevens Creek and Permanente Creek. A local organization, Friends of Stevens Creek Trail, with some support from the City also conducted creek cleanups throughout the year. City Community Services Department personnel and Shoreline Park Rangers also patrol Stevens Creek Trail and remove trash as needed. After conducting volunteer creek clean-ups for a number of years, it appears that the amount of trash removed during these events is decreasing.

City Community Services Department employees maintain City parks, including litter removal. City Public Services Department personnel also respond to trash dumping incidents that may occur throughout the City.

The City participated in a collaborative effort with volunteers from the Stevens Creek Watershed Council, and staff from the Water District, to conduct its trash assessments. These assessments were conducted at two sites along Stevens Creek. A summary of those assessments is attached.

Trash Problem Area Evaluation Results FY 05-06

Watershed	ID#	Date	Location of Trash Problem Area	Reported Ownership	Score	Trash Sources	Trash Type	Trash Management Activities	Comments
Baylands	CL01	5/10/06	La Avenida Stevens Creek Trailhead, 100 ft South of island in creek	SCVWD	67 (RTA)	• Upstream, storm drain catchment • Litter – pedestrian • Litter - vehicular	• Plastic/ styrofoam • Miscellaneous • construction	Site is cleaned at least twice per year by volunteers. Park rangers also patrol the location and pick up litter along the trail.	Majority of litter and debris comes from upstream sources.
Steevens Creek	CL02	5/10/06	El Camino Real bridge crossing, 100 ft. north	SCVWD	91 (RTA)	• Upstream, storm drain catchment • Litter - pedestrian	• Plastic/ styrofoam • Miscellaneous • construction	Site is occasionally cleaned up by volunteers. No current management actions in place. Large accumulation of debris on the side of bank downstream of the assessment area.	Site is located below the El Camino bridge and several upstream outfalls. Increased flow compared to past year. Site will be considered for future clean up event, but access is difficult.

PUBLIC INFORMATION/PARTICIPATION (Provision C.4)

FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
General Outreach				
PIP – 1-4	PIP Master Plan – General Outreach	Continue to conduct PIP General Outreach activities.	General outreach activities conducted during FY 05-06 include maintaining brochure stands at City facilities, participating in HHW program, storm drain stenciling, and articles in local publications.	FD
Targeted Outreach				
PIP – 1-4	PIP Master Plan – Targeted Outreach	Continue to conduct PIP targeted outreach activities.	Targeted outreach activities conducted during FY 05-06 include participation in the Clean Bay Business Program, displaying brochures at local auto parts stores, and continuing restaurant outreach. Targeted outreach to restaurants is explained in the Industrial/Commercial section of this report. Three Mountain View stores also participated in the Our Water, Our World Program designed to distribute pesticide alternatives. This is further explained in the Pest Management Section of the report. The City also participated in a pharmaceutical take-back event in FY 05-06. Participation included promoting	FD

			the event and staffing a drop-off location for residents to dispose of unwanted pharmaceutical products.	
PIP – 1-4	Targeted Outreach – Multicultural Outreach	Continue to support the City's multicultural outreach program, which is designed to provide information regarding various topics to non-English speaking people.	During FY 05-06, the multicultural outreach program distributed pollution prevention information at public events. Spanish brochures and fact sheets for vehicle BMPs and pesticide information are distributed through the multi-cultural outreach program.	CM
Educational Programs				
PIP – 1-4	PIP Master Plan – Education Activities	Continue to conduct PIP education activities.	During FY 05-06, the City sponsored a school education and outreach program along with the City of Palo Alto. In total, 20 school presentations were made to 870 students in Mountain View. The presentations were made to 2nd-6th grade groups. A summary of the school outreach program is available upon request. The City also conducted employee training activities, which are summarized in the Staff Training Table.	FD
Citizen Participation				
PIP – 1-4	PIP Master Plan – Citizen Participation	Continue to conduct PIP citizen participation activities.	During FY 05-06, the City sponsored two creek cleanup events, where citizens removed trash and debris from local creeks. The City also staffed information booths at the Mountain View Art and Wine Festival, and the Arbor Day Fair. The primary messages at those events were IPM and pesticide reduction, Mercury reduction, and vehicle sources.	FD

Item	**RWQCB Comment**	**City of Mountain View Response**
No Comments	NA	NA

Public Information/Participation Program Evaluation

General Outreach:

During FY 05-06, articles in the Resource newsletter advertised HHW, creek clean-up, and mercury thermometer drop-off events. The City continued storm drain stenciling activities. The City also displayed BMP brochures at City facilities.

Targeted Outreach:

Vehicle BMP brochures were provided for distribution at local auto parts stores. Three hardware and garden stores in Mountain View also participated in the Our Water, Our World program, which promotes use of less toxic pesticides. As explained in the Industrial Commercial Discharges section of this report, restaurant inspections included distribution of BMP posters. The City also participated in a pharmaceutical take-back program, which allowed residents to drop off unwanted pharmaceutical products. The City also distribute information at public events, such as the Art and Wine Festival, and the Arbor Day Fair. City staff also worked at the Program booth for the Home Show.

The multicultural outreach program seems to be an effective method to provide information in different languages. However, limited multi-language outreach materials are available. The City supports regional efforts to produce multi-language materials.

The City also developed and distributed a fact sheet describing oil recycling options for apartment tenants. This piece was translated into a Spanish language version. The CalTrans video was also played on the Mountain View's Public access television channel.

Education Activities:

The City's participation in the school education program was conducted through funding the Palo Alto Program. Mountain View commends the education consultant, and the City of Palo Alto for developing and implementing an outstanding program, and for educating students in Mountain View about water pollution issues.

A summary of employee training efforts is listed below.

Citizen Participation:

During FY 05-06, the City sponsored two volunteer creek cleanups and supported other cleanup efforts. These events successfully removed litter and debris from local waterways. The City also distributed information at public events. The effectiveness of information distribution at these public events is difficult to describe because a lot of people who visit the information booth are already informed about the issues, and some visitors seem to randomly collect free materials without considering the message.

STAFF TRAINING

Training Title	Attendee(s)	Department of Attendee	Date(s) of Training	Location of Training	Contents of Training
Environmental Compliance Plan, Spill and Emergency Incident Response, Storm Water Pollution Prevention	City staff members from various Divisions	Public Services (water, wastewater, streets, facilities, and fleet services) Community Services (Parks, Forestry, Golf Links)	March 16, 2006	Municipal Operations Center	Spill and Emergency Incident Response. Handling Hazardous Materials and Waste. Storm water pollution prevention.
Regional IPM Conference	Urban Runoff Coordinator, Community Services Manager and Supervisors	Fire Dept., and Community Services	No FY 05-06 training event	San Jose	Integrated Pest Management conference will be in November 2006. City staff will attend the conference.
Turf and Landscape Conference	Urban Runoff Coordinator, Community Services Manager and Supervisors	Fire Dept., and Community Services	February 2, 2006	Santa Clara	IPM session at the NorCal Turf and Landscape conference.
Construction Site Planning	Urban Runoff Coordinator	Fire Department	December 9, 2006	Campbell	Annual construction site training. Urban Runoff Coordinator conducts majority of construction site

					inspections for the City.
CWEA Training Conference	Water Environment Specialist	Fire Department	April 4-7, 2006	Sacramento	Stormwater-related topics mostly about commercial and industrial issues and BMPs.
C.3 Workshop – Conducting Stormwater Treatment BMP Maintenance and Inspections	Urban Runoff Coordinator Water Environment Specialist	Fire Department	June 6, 2006	Cupertino	Workshop describing technical information about storm water treatment BMPS O & M.
IPM training workshop	Urban Runoff Coordinator Water Environment Specialist	Fire Department	June 22, 2006	Santa Cruz	Workshop describing structural and landscape IPM techniques.

Staff Training Evaluation

During FY 05-06, staff received training on a number of topics, including spill response, storm drain pollution prevention, IPM practices, industrial inspections, construction inspections, and stormwater BMP O&M. The City strongly supports regional training efforts for IPM-related issues.

The City continued to train employees about storm water pollution prevention. Storm water pollution prevention training is coordinated and conducted with safety training assemblies, which seems to be a great method for streamlining different training requirements.

Dear Mr. Wolfe:

This report is submitted by the City of Palo Alto, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2005-2006 in accordance with the City of Palo Alto's Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 2004 and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 05-06 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

I. Contents of report;
II. Program highlights and accomplishments;
III. Summary of continuous improvement activities;
IV. Attachments:
   A. Certification Statements
   B. List of Abbreviations and Acronyms
   C. Annual Report
      - IC/ID Elimination Activities
      - Industrial/Commercial Discharger Control Program

- Staff Training Summary Table

Program Highlights and Accomplishments

The City of Palo Alto's Urban Runoff Pollution Prevention Program for FY 2005-06 included several notable accomplishments. The following programs and activities are described in the body of this Annual Report:

- Palo Alto has demonstrated continued leadership in the area of land development review. Staff in the Public Works, Utilities, and Planning Departments have been briefed on the C.3 requirements by the Management Committee representative and have attended Program training workshops. Presentations on C.3 design concepts and requirements have been made to the land development decision makers (Planning Commission, Architectural Review Board, City Council).

  As noted in the attached Annual Report, there were only four permit applications approved during FY 05-06 for Group 1 or Group 2a projects, although there were several additional applications pending as of the end of the year. We have not as yet begun to conduct BMP maintenance verification inspections, since Group 1 projects approved to-date were only recently completed. One maintenance agreements has been executed with the project owner and a second agreement is pending approval, however, and staff is preparing to implement its inspection program in the coming year.

City Public Works and Planning staff members have participated in the Santa Clara Valley Water Resources Protection Collaborative and the development of its Guidelines and Standards (G&S) for Land Uses Near Streams. The City Council approved a resolution of support for the Collaborative's goals on July 18, 2005, pledging to strive to incorporate the G&S into City policies and regulations by February 2007.

The City Council has adopted a revised storm water ordinance that will regulate Group 1 and Group 2 projects and require hydromodification management measures for specified projects. The ordinance took effect for all permit applications deemed complete on or after August 10, 2006. Our progress with incorporating storm water site design measures into our policies and ordinances has been delayed by the slow progress of the comprehensive Zoning Ordinance Update (ZOU). In the mean time, we are continuing our practice of encouraging appropriate construction-stage and post-construction storm water BMPs for all significant development projects.

- Palo Alto Environmental Compliance staff placed an increased focus on the inspection of food service facilities during the past fiscal year. Primary emphasis was placed on verification of proper restaurant grease controls in an attempt to reduce the number of sanitary sewer overflows caused by grease blockages. Inspection locations were prioritized based on spill history and the frequency of other violations. In addition to helping to prevent the overflow of sewage into the storm drain system, the inspection program also focused on the correction of other bad behaviors associated with food service facilities (e.g. floor mat cleaning, dumpster maintenance, etc.).

  Staff attempted to initiate a permit program to regulate discharges from restaurants, but was met with stiff opposition from the chamber of commerce for another layer of regulation. The City is currently considering the implementation of a business license program. If implemented, the business license program would aid staff in maintaining an up-to-date database of food service facilities, which is difficult due to the heavy rate of turnover in the industry.

- Trash management was and will continue to be another high-priority area for City storm water staff. The trash management program has begun to become more institutionalized into the City's routine business processes. Some preliminary trash hot spots have been eliminated based on follow-up inspections, allowing for greater focus on the remaining sites. During the coming year, staff will focus on trash hot spots along San Francisquito Creek, the most ecologically sensitive stream in Palo Alto's jurisdiction. Staff will work to improve the coordination between the City's trash reduction activities and those of volunteer-based organizations like the San Francisquito Watershed Council.

- Palo Alto staff is also working to implement a City-wide contract for structural pest control, based upon the use of Integrated Pest Management (IPM) techniques. Currently, structural pest control activities are performed by various work groups, using multiple pest control firms. Creation of a central pest control contract will provide for financial efficiency and will ensure uniform, consistent implementation of IPM practices by a single firm. The contract specifications will be written by environmental compliance staff knowledgeable in IPM practices.

- City staff has actively participated in many of the Program's Ad Hoc Task Groups (including Watershed Education & Outreach, Trash Management, C.3 Provision Oversight (C3PO), and HMP Implementation Phase (HIP)), the Watershed Management Initiative, and the Water Resources Protection Collaborative, providing valuable input to Program endeavors and keeping informed of the current issues and policies relevant to storm water pollution prevention.

Continuous Improvement Activities

The following is a summary of the key continuous improvement activities to be pursued in the coming year:

Identified Improvement	Status	Schedule for Completion
Implement transition to Group 2 projects for C.3 requirements	Begin enforcement of the revised ordinance making the C.3 requirements applicable to Group 2A&B projects.	August 2006
Review and modify site design measures	Continue to implement changes to the site design measures required by the City's zoning ordinance and other development regulations.	June 2007
Implement the Water Resources Protection Collaborative's Guidelines and Standards for Land Uses Near Streams	Incorporate the G&S into the appropriate zoning & grading ordinances.	February 2007
Stronger focus on inspection of food service facilities	Increase staff allocated to inspection of food service facilities and frequency of inspections in order to reduce sanitary sewer overflows caused by grease blockages and deter other behaviors that create storm water pollution.	June 2007
Improve coordination with volunteer organizations to address trash hot spots	Focus efforts on controlling trash along San Francisquito Creek and make better use of volunteers in the fight against trash by coordinating with the San Francisquito Watershed	June 2007

	Council and other grass root organizations.	
Reduce use of pesticides used for structural pest control	Retain a single contractor for structural pest control Citywide, overseen by a knowledgeable individual and subject to a contract containing strict IPM provisions.	December 2006

Thank you for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact me at (650) 329-2129.

Very truly yours,

Joe Teresi

IC/ID Program Evaluation

We continue to receive illegal dumping reports from the public as well as from City employees. Awareness among City staff has improved over the past several years. Proactive members of the fire department, building inspection, planning code enforcement, street maintenance, storm water collection maintenance, utilities, and wastewater field operations crews have been a consistent source of referrals. This leads us to believe that there are more active observers out in the field each day beyond those employed directly within our program.

Construction activities still dominate the IC/ID incidents and continue to require outreach, education, and enforcement efforts. A large percentage of construction personnel appear to comprehend the rules and regulations about pollution to the storm water system. Aggressive monitoring and enforcement as well as information provided during the planning and permitting process appears to be effective. Problems and issues with dewatering of excavations at construction sites have improved as a result of recent modifications to the planning and building permitting processes that require effective best management practices to be implemented.

The noticeable increase in efforts from our industrial waste staff and the wastewater collection system operations staff regarding identification, prioritization and prevention of sanitary sewer overflows (SSO) has been successful. The increased focus will continue to be applied to the use of source control measures to reduce the amount of blockage-causing grease discharged to the sanitary sewer system by food service facilities and to reduce on-site storage and cleaning issues. The wastewater operations field crews have improved their efforts to 1) identify problem locations in order to prioritize them for more frequent line cleaning, and 2) identify and document non-compliant facilities. Utility crews have also improved the identification of utility vaults that are receiving discharges from food service facilities that are not using effective BMP's in their operations. Due to these improved efforts, the number of SSOs is lower than in previous years.

INDUSTRIAL/COMMERCIAL DISCHARGER CONTROL PROGRAMS

FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
	Food Service Facility Inspections	1. Continue to work with Statewide Fat-Oils-Grease (FOG) work group to develop measures to prevent sanitary sewer blockages caused by FOG discharges by food service facilities. 2. Share information/recommendations from FOG with Program co-permittees. 3. Initiate a discharge permit program for food service facilities.	1. Environmental Compliance Division has increased FOG program efforts by reassigning one industrial waste employee to develop investigation and reporting procedures with the intention of conducting more food service facility inspections in FY 2006-2007. 2. Environmental Compliance Division will continue to host and maintain the Cal FOG website (http://www.calfog.org), which includes a collection of superior outreach materials from around the country. 3. Environmental Compliance Division did not develop a discharge permitting program for food service facilities due to resistance from the local Chamber of Commerce and staff resource constraints. Implementation of a City business license program has been proposed for the City; this would help with the tracking of restaurants and provide another mechanism for distribution of outreach materials. However, the 2006-07 FOG Program will include a substantial increase in the number of restaurant inspections regardless of the status of a business license program.	Public Works Environmental Compliance

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 ANNUAL REPORT

Municipality: City of Palo Alto

			4. Environmental Compliance Division continues to review planning application documents and building plans for compliance with storm water requirements and conditions.	
	Inspection of Facilities	Continue enforcement of new provisions in Sewer Use Ordinance, updated in 2002.	The Environmental Compliance Division continues to work with the Planning and Building Inspection divisions to ensure that all newly-constructed and remodeled facilities meet all requirements. Industrial facilities are inspected for compliance during each pre-treatment inspection.	Public Works Environmental Compliance
	Enhanced Reporting Procedures	1. Prepare Annual Report using enhanced reporting procedures adopted in December 2001. 2. Implement plan for automation of incident reporting.	Semi-annual reporting proceeds with complete and accurate documentation within the data system. The data system has been modified to allow for greater ease of use and additional ways of interpreting and presenting the data. A new data system is currently under development to help improve efficiency and better communications and information sharing between existing data systems.	Public Works Environmental Compliance
	Effectiveness Evaluation	Review and evaluate effectiveness of IND program as part of Annual Report.	See effectiveness evaluation discussion below.	Public Works Environmental Compliance

Industrial/Commercial Program Evaluation

The largest single facility category in FY 05-06 remains Automotive, and the compliance rate for this category remains above 95%. The Automotive category ("Vehicle Service Facilities") has been very thoroughly addressed by the City's Clean Bay Business Program through outreach, positive incentives, inspections, sampling, and enforcement.

Restaurants continue to be one of the more difficult facilities to educate and bring into compliance due to the high employee turnover rates and the lack of employee knowledge of the Palo Alto Municipal Code requirements. The alleys and parking lots behind commercial businesses are prime problem areas. The cleaning of floor mats, tallow bins, dumpsters, equipment and vehicles are key sources of the problem. While the City has made advances in these areas, there is still room for improvement. In addition to commercial inspections, the storm water investigator will proactively inspect these identified problem areas as well. The wastewater operations group has become more proactive in sewer line cleaning and videotaping and will be using the gathered information to drive inspections, corrective actions and enforcement. The Fats-Oils- Grease (FOG) program has been significantly expanded, and we anticipate more frequent and more rigorous inspections with the use of enforcement tools to change attitudes and behaviors.

The storm water inspection of industrial facilities continues to be a solid integrated part of the wastewater inspection program. These inspections help increase awareness at the facilities, and the facility operators have a good understanding of what is expected in order to achieve compliance. As a result, there are relatively few significant storm water issues found during inspections at permitted facilities.

Urban Runoff
Pollution Prevention Program

FY 2005-2006 Monthly Record Keeping Form

Month and Year: 7/1/05 – 6/30/06

Agency: City of Palo Alto

Completed by: David Aro – Manager, Maintenance Operations **Date**: 7/24/06

STREET SWEEPING	Volume of material collected (cubic yards)	Miles swept* (curb miles)
1. Sweeping		
Residential Areas:		
Broom	2424	3472
Regenerative Air	10789	10879
Vacuum	0	0
Commercial Areas:		
Broom	159	683
Regenerative Air	931	2422
Vacuum	0	0
Industrial Areas:		
Broom	174	2082
Regenerative Air	168	503
Vacuum	0	0
Other Areas Swept: (e.g., parking lots, major arterials)		
Broom	126	679
Regenerative Air	203	2422
Vacuum	0	0
TOTAL	14,974	23,142

2. Have there been any changes in your street sweeping program?
(efforts to have parked cars removed, changed sweeping frequency, new equipment, significant downtime, etc.)

We have completed our first year after posting permanent "No Parking" signs during specified sweeping times in the Downtown North area of Palo Alto. We have been authorized to expand the posting of permanent "No Parking" signs in an adjacent congested portion of the Downtown North neighborhood (San Francisquito Creek corridor). Additionally, a resolution was passed by the City Council permitting further expansion of the program into other congested areas of the City. This sign program will be instituted in additional zones over the next three years.

LEAF REMOVAL

Volume of leaves removed by City/Town crews: 2085 **tons** (Note: This figure is a combined figure that includes the weight of the material tabulated above PLUS the leaves collected by our autumn leaf pushing and pickup program. Since all of the material (both street sweeping debris and leaves gathered by leaf pushing trucks) is combined and hauled to the Landfill in garbage compactor trucks, there is no way to provide a separate figure for leaf removal.)

Check box if you have a yard waste collection program: **X** Volume of yard waste collected: 12,919 **tons** (Note: This figure is the total weight of the material collected by the City's yard waste pickup program (includes leaves, grass clippings, tree trimmings, etc.). We do not have the ability to separate out the weight or volume of leaves alone.)

* Report total miles covered by sweepers including areas operated in tandem or repeated.

STREET SWEEPING DATA

See attached sheet for annual street sweeping data.

Public Works Operations staff reports storm water pollution violations to Environmental Compliance staff when violations are observed by field crews or (on rare occasions) reported by residents. Environmental Compliance staff are supportive when violations are reported and take appropriate steps to follow-up with the responsible party to promote future compliance with storm water discharge regulations and BMPs. Ongoing BMPs are reviewed by individual work crews at bi-weekly tailgate meetings and evaluated for effectiveness and potential modification. The street maintenance crew's slurry recovery system & trailer is working well. The system has a long vacuum hose, a powerful motor, and large storage capacity for captured slurry.

Rural Public Works Program Evaluation

The contractor who performs fire road and trail maintenance for the Community Services Department in the City's foothills parkland is well-versed in erosion control techniques. The contractor provides valuable advice to City staff on road and trail maintenance issues.

During the fiscal year, Open Space staff noticed that some construction work performed in the City's Arastradero Open Space Preserve by Utilities Operations crews did not incorporate the Best Management Practices appropriate for this sensitive site. It was discovered that due to a substantial amount of staff turnover, the current crew supervisors were not familiar with the Performance Standard. Open Space staff met with Utilities management to review the requirements of the Performance Standard and to solicit their cooperation. Management staff then

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 ANNUAL REPORT

Municipality: City of Palo Alto

instructed the crew supervisors to comply with the Performance Standard. Open Space staff will continue to monitor the performance of the Utilities crews when they work in the open space preserves. Public Works staff will review the Performance Standard and the appropriate BMP's during annual staff training prior to the 2006-07 rainy season.

Item	RWQCB Comment	City Of Palo Alto Response
N/A	N/A	N/A

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 ANNUAL REPORT

Municipality: City of Palo Alto

Storm Drain System O&M Program Evaluation

STORM DRAIN MAINTENANCE DATA

Number of catch basins cleaned – 2,837 each
Weight of debris removed from catch basins (using hand tools) –39,380 lbs.
Weight of debris removed by vactor truck – 138,080 lbs.
Linear feet of pipeline cleaned by vactor truck – 128,643 lf.
Hours of maintenance on storm water pump stations – 423.5 hours

The weight of debris removed by hand cleaning of storm drain catch basins is available this year because better controls were incorporated on the maintenance crew's disposal practices. The significant decrease in linear footage of storm drain pipeline cleaned by vactor truck (58% decrease over last year) is due to 1) failure of the main water pump on vactor truck , which caused the unit to be out of service for several months, and 2) a significant number of rain events throughout the winter months that reduced our opportunity to hydro flush on those days.

Staff implemented a program to track flooding and ponded water complaints in a computer database. Last year we received 29 complaints of ponded water. Of those, 3 were resolved or corrected by the City, 3 are not resolved because major street construction or major storm drain repairs or reconstruction are needed to correct the situation, and the remaining calls are repeat complaints regarding working storm drain systems like siphons and or private property issues that are not maintained by the City.

Reported concerns to the SCVWD about the lower portion of the Palo Alto Flood Basin tide gate trash racks being blocked and the effect of the obstruction on the tidal flushing inflow and outflow volumes. Reported concerns about sediment accumulation on Matadero Creek downstream of East Bayshore Road and the impact on upstream water levels during routine rain events, including the impact on storm pump station operation and local surface drainage through flap gates in the Matadero Creek drainage basin.

Best Management Practices (BMP's) for contractors continues to be problematic, especially during the first heavy rain events of each year when filter fabric and other Best Management Practices are discovered blocking catch basin inlets causing localized flooding complaints. As construction projects often last many months and the inspection of BMPs is a lower priority item for construction crews, they often ignore maintenance of filter fabric and sand bags. Consequently, City staff is left to discover the abandoned fabric or sand and class 2 materials blocking the catch basin outlets or downstream inside the pipeline. Staff must then remove filter fabric and other damaged sand bags from blocked inlets and clean base rock out of the catch basins. More emphasis is being placed on on-site BMPs such as perimeter straw wattles and stabilized construction entrances that keep sediment on site (rather than trying to capture sediment in the gutter with sand bags).

FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
	Permit Provision C.3.c	1. Modify City's storm water ordinance to include Group 2 projects. 2. Begin enforcement of requirements for Group 2 projects.	1. Ordinance revision was taken to City Council for first reading on June 26, 2006. Ordinance became effective on August 10, 2006. 2. Enforcement began for permit applications deemed complete on or after August 10, 2006.	Public Works Engineering & Planning
	Permit Provision C.3.e	1. Continue inspection of BMP controls to verify maintenance at Group 1 projects on an annual basis. 2. Modify BMP inspection program to incorporate Group 2 projects. 3. Report on BMP maintenance inspections.	1. First Group 1 project was completed in FY 2005-06. Initial BMP inspection was conducted on July 6, 2006. First maintenance verification inspection will take place in FY 2006-07. 2. Ordinance modified to include Group 2 in maintenance inspection program, effective August 10, 2006. 3. No maintenance inspections have been conducted to-date.	Public Works Environmental Compliance
	Permit provision C.3.f	1. Continue participation in development of Program HMP. 2. Develop ordinance changes and/or conditions or approval to comply with HMP. 3. Provide staff training on HMP requirements. 4. Start implementation of HMP	1. Actively participated on Program's HIP Ad Hoc Task Group, addressing HMP implementation issues. 2. HMP requirements incorporated into City Council-approved ordinance, effective October 13, 2005. 3. Training was provided to Public Works and Planning staffs, although the HMP requirements are expected to apply to very few projects in Palo Alto,	Public Works Engineering

		requirements for applicable projects.	due to the built-out nature of the City and the prevalence of lined or tidally-influenced creeks. 4. Implementation of the HMP requirements began October 13, 2005.	
	Permit Provision C.3.j	1. Adopt changes to appropriate ordinances and/or policies based on review of existing local design standards and a comparison to the list of areas to address in Provision C.3.j and other references such as "Start at the Source" and the "Development Policies Comparison" work sheet. 2. Report on ordinance and policy changes as part of Annual Report.	Incorporation of ordinance changes is tied to the pace of the Citywide Zoning Ordinance Update. City Public Works and Planning staff members participated in the Santa Clara Valley Water Resources Protection Collaborative and the development of its Guidelines and Standards (G&S) for Land Uses Near Streams. City Council approved resolution of support on July 18, 2005, pledging to strive to incorporate the G&S into City ordinances and policies by February 2007.	Public Works Engineering & Environmental Compliance, Planning, & Building Inspection
	Permit Provision C.3.m	Report on changes to environmental review process as part of Annual Report.	Planning staff will be taking a report to City Council in Fall 2006 to adopt revised levels of significance for use in environmental assessment of development projects. The revised levels will take into account potential urban runoff impacts.	Planning
	Permit Provision C.3.n	Report on new development and redevelopment projects for which C.3 requirements apply, as part of Annual Report.	See attached matrix.	Public Works Engineering
	Staff Training	Provide annual training to Planning and Public Works Engineering staff.	Provided training to applicable work groups on the storm water regulations as follows: • Planning: October 25, 2005 • PW Engineering development review staff: September 7, 2005	Planning & Public Works Engineering Divisions

			• PW Engineering: October 26, 2005	
	Effectiveness Evaluation	Review and evaluate effectiveness of planning procedures as part of Annual Report.	See effectiveness evaluation discussion below.	Planning & Public Works Engineering Divisions

Regional Board Comments on New Development-Planning Procedures in FY 2004-2005 Annual Report

Item	RWQCB Comment	City Of Palo Alto Response
New Development and Redevelopment Planning Procedures	1. Provide a list of abbreviations and acronyms used in the Annual Report. 2. Provide a description of the City's O&M Verification Program in the FY 05-06 Annual Report. 3. Revise the Group 1 Projects Table to include the "application deemed complete" date and the specific development type for each project.	1. See list of abbreviations and acronyms provided in the Annual Report cover letter. 2. See description of the City's New and Redevelopment O&M Verification Program in the "Program Evaluation" section below. 3. A Group 1 Projects table for FY 2004-05 revised to include the requested information ha been attached to this Annual Report. The Projects table for FY 2005-06 contains the requested information.
TetraTech October 2005 audit report	1. The City should formalize the erosion control and storm water management plan review process.	1. The City's grading permit application form has been revised to reflect all of the information required by the grading ordinance. 2. A grading and erosion control fact sheet has been prepared for applicants. 3. A grading and erosion control plan

		review checklist has been prepared for staff who review development applications. 4. The *Planning Your Land Development Project* booklet will be updated in Fall 2006 to provide updated guidance to applicants for compliance with the latest revisions (August 2006) to the storm water ordinance. 5. A storm water plan checklist will be prepared in Fall 2006 for staff who review development applications.

New Development-Planning Procedures Program Evaluation

All of the elements (revised ordinance, staff training, long-term maintenance agreement, etc.) are in place for the implementation of the C.3 requirements for Group 1 and 2 projects. As reported, only four Group 1 and Group 2a applications were received during the fiscal year, although several additional applications were pending as the year ended. The challenges for the coming year will be accommodating the change to Group 2 requirements (all projects that create or replace 10,000 square feet or more of impervious area), and making changes to site design standards through the City-wide Zoning Ordinance Update and Standard Drawings and Specifications update.

Description of the Organizational Structure of the City of Palo Alto's Operation and Maintenance Verification Program

Legal authority for the City of Palo Alto's Operation and Maintenance (O&M) Verification Program is contained in the Palo Alto Municipal Code. The program is implemented by staff in the Engineering and Environmental Compliance Divisions of the Public Works Department. The enforcement mechanism is a written maintenance agreement, signed by the City and the party responsible for maintenance and then recorded with the Santa Clara County Recorder's Office.

Legal Authority

Palo Alto Municipal Code Chapter 16.11.040 Inspection and maintenance.

(a) The property owner(s), its administrators, successors, or any other persons, including any homeowner's association, shall take all necessary actions to ensure that the permanent stormwater pollution prevention measures and hydromodification management measures are properly maintained so that they continue to operate as originally designed and approved. The maintenance of the control measures shall be in accordance with the terms and conditions of a maintenance agreement and shall be in the form of a covenant running with the land,

environmental mitigation measures, a use permit, enforceable conditions of approval, or other legal agreement. The agreement shall provide access to the extent allowable by law for representatives or agents of city for the purposes of verification of proper operation and maintenance of the specific PSPPM and hydromodification management measures. The agreement shall be recorded in the office of the county recorder, shall remain in force until ownership of the developed property has been transferred, and upon transfer, shall be binding on the new owner(s).

(b) Any property owner that has been required by this chapter to construct or install and maintain permanent stormwater pollution prevention measures and hydromodification management measures shall upon transferring ownership of such property provide the new owners with a current copy of this chapter, and shall inform the new owners in writing of their obligation to properly operate and maintain such PSPPM and hydromodification management measures.

(c) It shall be unlawful to alter, modify or change any components of the permanent stormwater pollution prevention measures or hydromodification management measures without first obtaining the written certification of the city engineer that the requirements of this chapter have been satisfied.

Implementation

Public Works Engineering development review staff requires the execution of a written maintenance agreement as a condition of approval for all Group 1 and 2 development and redevelopment projects. The City Attorney has drafted a standard agreement that is used as the template for the maintenance agreements negotiated with each developer. Final building occupancy is not granted until the agreement is executed.

An inspector in the Public Works Environmental Compliance Division is responsible for periodic maintenance verification inspections of stormwater treatment controls incorporated into approved Group 1 and 2 development and redevelopment projects. The municipal fee schedule contains a fee for these inspections that is charged to the party responsible for maintenance of the storm water control measures. The requirement for the periodic inspections is contained in the standard maintenance agreement and site access for the City inspector is authorized in the Municipal Code.

Item	RWQCB Comment	City Of Palo Alto Response

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 ANNUAL REPORT

Municipality: City of Palo Alto

N/A	N/A	N/A

New Development-Construction Inspection Program Evaluation

The new storm water program inspector was hired at the beginning of the FY 05-06 season and his efforts have improved the organization, inspection, and enforcement of new development construction locations. His experience and existing knowledge of the city, City procedures, and code enforcement activities are vital in the operations of the program. Additional job training will be provided to the inspector to continually improve the program. Proactive inspection levels are back to normal, as well as effective response to complaints and interdepartmental referrals during the non-rainy season.

The storm water inspector used a report generated by the Building Division's Accela Permits program to identify all large sites over 10,000 square feet with substantial earth disturbance work. This process was important in the identification of large construction sites, permit issuance dates, and the status of each permit. Meetings with other Departments and Public Work Divisions were scheduled to introduce the new inspector as well as to remind others of the purpose of the storm water program.

The rainy season started late in the reporting period. The first substantial rains of the season started on December 31. Rainfall was very heavy for the next four months. All sites were inspected on a regular basis.

PUBLIC INFORMATION/PARTICIPATION (Provision C.4)

FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
	Pesticide Outreach	1. Develop, prepare, and distribute appropriate outreach materials (fact sheets, brochures, etc.) regarding proper pesticide use and disposal and IPM techniques. 2. Attend community events and coordinate with local gardening and environmental groups to distribute materials. 3. Conduct residential IPM workshops. 4. Update City's Clean Bay website to provide information about and promote IPM techniques.	1. Ran print ads, movie ads, and one utility insert regarding pesticide use. In addition, held a media event which produced articles in several local papers educating residents about pesticides and other pollutants of concern during *Clean Bay Campaign.* 2. Attended 8 events such as Farmer's Markets, fairs and guest speaker programs. 3. 20 RWQCP service area residents attended less-toxic pest control workshops. 4. Ongoing.	Public Works Environmental Compliance
	Mercury Outreach	Continue public outreach/education on the hazards of mercury-containing products, proper disposal techniques, and alternative products.	Continued thermometer take back at municipal agencies. Partnered with Utilities Department on energy-efficient/no mercury thermostat exchange, collecting 397 pounds of thermostats, and 8,481 pounds fluorescent lamps. Additional ads, utility inserts were done in partnership with SCVURPPP.	Public Works Environmental Compliance

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 ANNUAL REPORT

Municipality: City of Palo Alto

	Copper Outreach	Conduct outreach to Building/Planning staff and to developers on ban of copper roofs and gutters implemented in January 2003.	1. Continued using a stamp on all building permit plan sets approved by the Development Center. to notify residents about the copper ordinance. 2. Continued to contact the Development Center staff to ensure that residents are notified early in the permit process about this requirement.	Public Works Environmental Compliance
	School Outreach	Continue outreach to elementary, middle, and high schools, focusing on pesticides, mercury, and other pollutants of concern (school programs include "What's Bugging You?" and "Mercury: Past and Present")	In 2005-06, the Palo Alto's RWQCP school outreach program reached 3,405 students throughout the service area. All programs include a discussion of stormwater and pollution prevention. • 113 elementary school presentations and tours • 36 middle school presentations (includes hands-on lab) Of the 149 total presentations, 58 were conducted in Palo Alto; 91 in RWQCP partner cities.	Public Works Environmental Compliance
	Vehicle Service Facility Recognition	Continue periodic recognition (newspaper advertisement and promotional materials) of vehicle service facilities that qualify for designation as Clean Bay Businesses.	Vehicle service facilities that qualify as "Clean Bay Businesses" receive promotional materials and are listed in full-page newspaper ads paid for by the RWQCP. Shops that have been Clean Bay Businesses for 10 consecutive years receive a special "Outstanding Achievement" plaque and other recognition materials.	Public Works Environmental Compliance
	Watershed Education and Outreach	1. Develop City PI/P workplan that is coordinated with the Program's Watershed Education and Outreach Campaign. 2. Implement City PI/P workplan.	1. Palo Alto participates in development and evaluation of the Program's Watershed Education and Outreach campaign. The City's PI/P workplan (a component of the annual Clean Bay Plan document) is coordinated with the overall Program and other regional efforts. 2. Completed for FY 05-06. FY 2005-2006 ANNUAL REPORT

Municipality: City of Palo Alto

Regional Board Comments on Public Information/Participation Requirements in FY 2003-2004 Annual Report		
Item	**RWQCB Comment**	**City Of Palo Alto Response**
N/A	N/A	N/A

Public Information/Participation Program Evaluation

Pesticide Outreach: Approximately 600 people have taken Bug Buster workshops to-date. A review of workshop evaluations through 2004 (for all previous years) revealed that 91% said they are more likely to look for less toxic products at local stores featuring the *Our Water Our World* logo. 83% said they are likely to try two or more IPM techniques they learned at the workshop.

Mercury Outreach: See evaluation in Mercury Program Section

Copper Outreach: The ordinance banning copper architectural materials has been effective at eliminating the installation of new copper roofs.

School Outreach: 69% of teachers returned a postage-paid evaluation postcard, with a cumulative rating of 4.9 out of 5 in both quality of program and clarity of presenter. 99% stated students' understanding of water pollution prevention and the difference between storm drain/sewer systems **increased**.

Vehicle Service Facilities: Since inception of this program, the participation has increased to 98% of eligible facilities. Eighty-eight shops have participated in the Clean Bay program for at least 10 years.

Public education challenges include providing effective outreach to non-English speakers in the RWQCP area, finding new and compelling messages to inspire change in English-speaking communities, and establishing new ways to engage the public in trying less toxic pest control methods/products and recycling mercury containing items. RWQCP will continue identifying strategies with partner agencies and its communications consultant for effective outreach to non-English speaking communities via local newsletters, community groups and health centers. Staff also plans to provide additional funds to expand run time of ads produced by WEO campaign that focus on mercury and pesticides. Staff is also participating in the regional dialogue about possible expansion plans for the Bay Friendly Garden Project. This program could potentially provide IPM, composting and other information though regional workshops, replacing the Bug Buster/Less toxic pest control program currently managed by RWQCP in conjunction with solid waste programs in partner cities.

Municipality: City of Palo Alto

	Public Education and Outreach	1. Develop, prepare, and distribute appropriate outreach materials (fact sheets, brochures, etc.) regarding proper pesticide use and disposal and IPM techniques. 2. Attend community events and coordinate with local gardening and environmental groups to distribute materials. 3. Update City's Clean Bay website to provide information about and promote IPM techniques. 4. Contribute to BASMAA Regional Media Relations Campaign and pitch IPM stories to local media. 5. Conduct outreach to employees who do not apply pesticides during the course of their work. 6. Continue to implement IPM Partnership with hardware/garden supply stores in POTW service area. 7. Offer training to employees of IPM Partnership stores in POTW service area. 8. Document and report on number of residents reached through outreach and level of IPM Partnership participation.	1. Ran one Bug Buster Workshop (20 participants); ran bus ads, utility, local newsletter and media print ads advertising *Our Water, Our World* information. 2. Attended 8 different events/speaking engagements which promoted less toxic pest control 3. Ongoing. See www.cleanbay.org 4. Ongoing. 5. Ongoing and will be an extra focus in 2006-07. 6. Ongoing in partnership with EOA. 7. Coordinated through BASMAA. 8. A multi week run of an IPM ad as part of the RWQCP *Clean Bay* campaign ran in five papers in our six-city service area. Ads promoting IPM receive approximately 32,877 gross impressions per ad. Utility inserts reached all Palo Alto residents (approx 18,000 homes)–1 pesticide utility insert.	Public Works Environmental Compliance

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 ANNUAL REPORT

Municipality: City of Palo Alto

	Pest Control Operators	1. Support a regional PCO training and recognition program. 2. Require PCO's contracted for City pest control to comply with City IPM Policy through contract specifications. 3. Document and report on City use of PCO's and their pesticide usage.	1. SCVURPPP contributes to one of the Regional IPM Conferences which provide training to PCOs and agency staff. RWQCP staff continue to help plan UP3 agendas and meetings that assist IPM coordinators in administrative aspects of IPM implementation. 2. Revising contract language is underway and happening incrementally as new contracts are renewed or sent out for bid. A new IPM Scope of Service is being issued this fall. 3. Ongoing as part of the City's annual IPM report.	Public Works Environmental Compliance
	New Development	Document and report on pest-resistant landscaping measures incorporated into land development projects.	No changes in this activity. Emphasis is mainly on outreach and education. Still need to improve the effectiveness of this activity through the coordination of multiple ongoing programs (water conservation, pest management, and Water Resources Protection Collaborative's Guidelines and Standards for Land Uses Near Streams).	Public Works Environmental Compliance and Utilities Water Conservation
	Regional, State, and Federal Coordination	Continue active participation in the Urban Pesticide Committee, BASMAA Pesticide Work Group, UP3, and IPM Partnership to provide input and keep informed on latest pesticide management issues.	Ongoing activities in addition to independent collaboration with other agencies.	Public Works Environmental Compliance

Municipality: City of Palo Alto

Regional Board Comments on Pest Management in FY 2004-2005 Annual Report		
Item	**RWQCB Comment**	**City Of Palo Alto Response**
N/A	N/A	N/A

Pest Management Program Evaluation
The City's use of pesticides associated with ecotoxicity has reduced over time by using IPM strategies. Revised contract specifications, in-house training and pilot projects will continue to further these goals. The challenge in City operations is to keep the many City departments and work groups buying least toxic pesticides and hiring pesticide applicators who can provide IPM services. This effort will be aided in FY 2006-07 by a new Environmental Stewardship group within the City. A subgroup of this new interdepartmental coordination effort will be formed to focus on pesticide use.

Mercury Pollution Prevention Program Evaluation

RWQCP actively participates in SCVURPPP pollution prevention activities, accepts thermostats and thermometers, and provides extensive outreach to schools in its service area. RWQCP staff believe there is a need for regional coordination on product stewardship issues for mercury containing products. Mercury programs continue to be good vehicles to engage the public on. Mercury is both an ecosystem issue and a human health issue. As such, the campaign to remove mercury from the home resonates with parents wanting to protect children from toxics. Therefore, RWQCP staff plan to continue using mercury programs as key public messages, alternating them with other pollutant messages.

FY 2005-2006 ANNUAL REPORT

Municipality: City of Palo Alto

COPPER ACTION PLAN/NICKEL ACTION PLAN
(Provision C.9.a & b of the Permit)

FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
CB-1	Vehicle Washing Operations	• Distribute outreach materials on proper vehicle/equipment washing at City department counters and public events, and post on City web site. • Provide car wash kit to charity car wash organizers and educate on the use of the kits. • Submit data regarding vehicle washing outreach activities and effectiveness evaluation in annual reports. • Require source control measures for Group 1 new development and redevelopment projects that will conduct vehicle/equipment washing and maintenance activities (consistent with Permit Provision C.3.k). • Inspect auto businesses regarding car wash requirements, and prohibited storm drain discharge.	Within CB-1, Paragraphs 1,2,5,6,7 & 8 are ongoing programs which have been run by Palo Alto for a number of years, and which were run again successfully in FY 05-06. Paragraph 3 calls for an effectiveness evaluation regarding vehicle washing outreach. Utility bill stuffers, fliers, and special event displays have been used successfully to promote changes in vehicle washing practices as a means to protect storm water quality. Awareness of this issue has grown over the years, serving as a testament to the outreach program. Palo Alto does not do its own public opinion surveys, but rather relies on regional surveys to quantify and confirm the success of this and other behavior modifications. With respect to paragraph 4, two of the Group 1 projects approved to-date in Palo Alto (multi-family residential developments) include covered vehicle wash areas that are plumbed to the sanitary sewer.	Public Works Environmental Compliance Public Works Environmental Compliance Public Works Environmental Compliance Public Works Engineering Public Works Environmental Compliance

		• Inspect vehicle washing facilities as part of stormwater inspections for industrial and commercial businesses. • Continue to maintain car wash systems for City vehicles at the corporation yard and fire stations. • Encourage municipal staff to use certified mobile cleaners when contracting cleaning services. • Refer mobile cleaners to BASMAA's online training module for education and certification.	With respect to #9, one in-person training was conducted in FY 05-06. Others were done on line.	Public Works Environmental Compliance Public Works Fleet Mgmt. & Fire Dept. Public Works Operations & Facilities Mgmt. Public Works Environmental Compliance
CB-3	Industrial Copper Control	Continue Industrial Inspection program, including NOI sites such as plating and metal finishing facilities, vehicle service facilities, and other permitted sites.	All inspections completed in FY 05-06	Public Works Environmental Compliance
CB-4	Quantify Source Loadings of Copper	• Collect data on potential indicators of copper. • Review data on copper additions to water supply reservoirs (SCVWD & SFWD) and prepare fact sheet for reservoir managers.	These activities were completed, with the exception that the reservoir fact sheet is being deferred to the Bay-Wide Copper Action Plan as it will be much more effective if prepared by all the Bay Area agencies.	Public Works Environmental Compliance

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 ANNUAL REPORT
Municipality: City of Palo Alto

		• Prepare and submit report on potential indicators as part of Clean Bay Plan.		
CB-6/7	Reducing Traffic Congestion/ Promoting Alternative Transportation	• Update the City's Zoning Ordinance, based on the results of the Development Policies Comparison Project Report (particularly Section VI, Policies to Limit Auto Use/Promote Alternative Transportation) to promote better transportation-related design practices and alternative modes of transportation.	No new additions this year	Public Works Engineering & Planning
CB-8	Watershed assessment and protection	• Revise City's General Plan, as needed, at next scheduled update, based on recommendations from the *Development Policies Comparison Project* and Provision C.3.l.	No relevant revisions this year.	Planning
CB-11	Street sweeping and storm drain O&M	• Follow Program guidance regarding the collection and reporting of street sweeping data. Provide data for Annual Report. • Evaluate need for improvement of current street sweeping and storm drain system O&M programs (within available budget) in Annual Report.	Palo Alto continues to exceed minimum street sweeping frequencies. No new program changes.	Public Works Operations

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 ANNUAL REPORT

Municipality: City of Palo Alto

CB-12	Outreach on pool, spa maintenance	• Distribute outreach materials at agency department counters and public places; and placement on City website.	Done	Public Works Environmental Compliance
CB-21	Use of architectural copper	• Perform plan checks for compliance with existing ban on copper on roofs, in roof shingles, and for gutters. • Distribute fact sheet on copper ban at building counter and on web site.	Done	Public Works Environmental Compliance
NB-1	Measures to control nickel discharges from construction sites	• Continue to implement Construction Inspection Performance Standards (see Construction Inspection work plan section). • Continue to have inspectors attend Regional Board/Program workshops on construction site management and learn latest erosion/sediment control techniques • Continue to attend Program workshops on post-development stormwater BMPs (C.3.)	Done	Public Works Environmental Compliance Public Works, Utilities, and Community Services

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 ANNUAL REPORT

Municipality: City of Palo Alto

Copper Action Plan/Nickel Action Plan Program Evaluation
Palo Alto's activities to reduce copper have become institutionalized and continue to be fully implemented. Any large reductions in copper discharges will have to come from copper use reductions in brake pads, construction materials or pesticides. However, copper concentrations in Bay samples continue to be below the established "trigger' value, and therefore the need for such reductions is not immediate.

TRASH INVENTORY & MANAGEMENT PROGRAM

FY 2005-2006 Work Plan Self Evaluation Matrix

Item No.	Activity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
	Trash Investigations and Plan	1. Conduct trash evaluations at selected "hot spot" trash problem areas. 2. Provide Program staff with results of trash evaluations. 3. Modify City's trash control program (and advocate for changes at other agencies), as needed given results of the trash evaluations. 4. Provide Program staff with documentation of changes in trash control practices at problem locations.	1. Two formal trash evaluations completed in summer 2005 and spring 2006. Multiple informal inspections conducted year round. 2. Results posted and forwarded to program staff as required and on-time. 3. Inspections found that list of "hot spots" may be reduced from 20 to 16 based on results. 4. Program staff given documentation of changes in trash control practice at problem locations in order to reduce overall number of "hot spots". 5. Program staff requests use of City of Palo Alto Trash Hotspot Action Plans. 6. Discussion to coordinate efforts of evaluations with National River Cleanup Days for next fiscal year.	Public Works Environmental Compliance

Municipality: City of Palo Alto

Trash Inventory & Management Program Evaluation
This program is making significant progress. A proposed plan to coordinate City of Palo Alto staff and local San Francisquito Watershed Council efforts should improve reporting accuracy and help increase the number of garbage items removed from local creeks and waterways. A new Trash Hotspot Action Plan will be written in the fall of 2006 after the next trash evaluations. Continued joint efforts by local jurisdictions may place more pressure on Caltrans to improve cleaning efforts at freeway on-ramps and off-ramps.

Watershed Management Measures Program Evaluation
The WMI completed several important projects in FY 05-06 and finds itself at a crossroads. Several key participants, most notably the Regional Board, are no longer involved. Since it was largely the Regional Board who called for establishment of the WMI 10 years ago, it is time to think through the future of the WMI. To that end, a series of meetings has been initiated and dubbed the "WMI Revisioning". In the two meetings held thus far, it has become clear that the functions of 6 of the WMI subgroups are essential and must be preserved in some way. The activities and structure of the "Core Group" will be the focus of upcoming meetings, with conclusions to be reached in the first quarter of FY 06-07.

GLOSSARY 165

Executive Summary

The City is required to submit to the Regional Water Quality Control Board (Water Board) an Annual Report that documents the progress of the Urban Runoff Management Plan for the previous fiscal year. The Annual Report is prepared pursuant to provision C.6 of the City's National Pollutant Discharge Elimination System (NPDES) permit for stormwater discharge to the City's storm sewer system.

The Report includes sections for each of the program elements included in the Urban Runoff Management Plan as required in the permit. Each section is comprised of an update on the status of the work plan, an evaluation of various performance elements, responses to Water Board feedback received during the past year, and additional tables or information to demonstrate performance for a program element. Summaries are also provided for the array of outreach activities and municipal training sessions that are included in various program elements.

Most program elements contain requirements that affect more than one City department. The strategy for attaining compliance focuses on three different types of activities that the City conducts:

1) Enforcement and monitoring to detect and respond to incidents of illegal discharge to the storm sewer system;
2) Structural and business process changes to City operations and services; and
3) Education for municipal employees as well as the community at large.

The City also contributes to activities undertaken by the Santa Clara Valley Urban Runoff Pollution Prevention Program (Program) and the Bay Area Stormwater Management Agencies Association (BASMAA); however, this report includes only activities performed by the City. An overview of the year for each program element follows.

Illicit Connection / Illegal Discharge Inspection (ICID)

The City's Environmental Services Department (ESD) responds to complaints regarding illegal discharges or threats of discharge to the storm sewer system. This year, the City responded to more than 792 cases, a slight decrease from last year but well within the five-year average case rate. Residential incidents continue to be most frequent, with vehicle-related sources being most common. Dumping of various materials was also a prevailing source of incidents. ESD responds to all complaints with education and enforcement in partnership to achieve compliance and prevent future incidents. Staff intends to do targeted outreach to four Strong Neighborhood Initiate (SNI) areas that exhibited a high number of residential complaints in FY 06-07 in an effort to educate the residents and reduce the number of complaints.

Storm drain inlet stenciled with hotline number and local creek name

The City continues to conduct targeted outreach in an effort to reduce the number of ICID calls. In FY 05-06 City staff met with the San Pedro Square Business Association, assisting with the planning and implementation of procedures to stop discharges to the storm drain from surface cleaning and leaking trash compactors.

Industrial & Commercial Discharges (IND)

Under this program element, ESD inspects more than 3,500 businesses per year to ensure that proper practices are employed to prevent stormwater pollution. How frequently a business is inspected depends on their potential for contributing pollutants as determined by previous inspection results. This method of assigning inspection frequencies has been effective in focusing limited inspection resources on high priority cases to best protect water quality. 72% of the businesses inspected are found to have no significant stormwater issues and thus do not warrant near-term re-inspection. When issues are identified, education and enforcement are used together to achieve compliance.

FY 05-06 marked the third time in three years that the City experienced a significant spike in the number of business license applications. The total inventory of facilities in the City that are subject to inspection has doubled over the last three years, representing a significant workload challenge. The City began to integrate this increased workload for the short term by prioritizing and phasing initial inspections and shifting resources. Since this increase in workload is expected to continue in subsequent fiscal years, long-term strategies will be explored to fulfill inspection requirements.

FY 05-06 marked the fourth year of implementation of the comprehensive restaurant inspection program and 1,148 facilities were inspected. Staff also conducted a review of the last three years of data in order to assess how the program is working. Based on the data assessment, the City is establishing a Fats, Oils, and Grease (FOG) Inspection Program. This Program will target food service facilities and focus specifically on successfully integrating the sanitary sewer management plan (SSMP) requirements and enhancing the business' general awareness of stormwater issues related to food service facilities.

A City inspector explains stormwater Best Management Practices to a downtown restaurateur

Education remains the primary tool for preventing or stopping practices that may pollute stormwater. In FY 05-06, inspectors distributed almost 9,000 Best Management Practices (BMPs) brochures, fact sheets, posters, and other materials as part of the IND program. Generally, inspectors are being very proactive and distributing BMPs to support educational efforts. For example, businesses that did not have any current

stormwater issues were still given BMPs by inspectors to assist the business in their efforts to keep pollution out of the storm drain system.

New and Redevelopment (NRD)

This program element is driven by the New and Redevelopment provision (also referred to as C.3) of the permit, as amended in October 2001 and again most recently in July 2005. This provision requires that development projects implement controls to address pollutant discharges and increased storm flows for the life of a project. The implementation of the new hydromodification management plan (HMP) requirements began on October 18, 2005.

The City continues to make significant strides implementing this challenging program. The City adopted the Post-Construction Hydromodification Management Policy 8-14 (Policy 8-14) on October 18, 2005. The policy requires the management of development-related increases in peak runoff flow, runoff volume and duration ("hydromodification"), where such hydromodification is likely to cause increased erosion, silt pollutant generation or other impacts to beneficial uses of local rivers, streams and creeks. Techniques for managing hydromodification include detention basins and other landscape measures that infiltrate or hold stormwater flows for controlled release. Policy 8-14 supplements stormwater treatment requirements delineated in Policy 6-29 entitled "Post-Construction Urban Runoff Management."

The City also implemented an expansive training program for both treatment controls and hydromodification to give staff the information and resources needed to effectively guide and review development applications and to design public projects. Among the HMP training highlights were a Green Roof Symposium that focused on green roofs as a stormwater and hydromodification control measure appropriate for small urban infill sites. Additionally City staff from five departments attended both the SCVURPPP and StormCon HMP workshops. Plus, City staff also attended a beta testing demonstration of the Bay Area Hydrology Model (BAHM) software that will greatly simplify the modeling calculations required to comply with the HMP.

The City conducted a pilot inspection program in FY 05-06, and based on those results, revised its Operation and Maintenance Program. The revised program requires inspection of all stormwater treatment and hydromodification measures installed during the first year of operation. Subsequent inspections are based on observed stormwater issues such as improper installation and lack of functionality. This revised program is based on the City's successful IND inspection program.

Porous-paved parking lot: a structural stormwater control

The City continues to find that implementation of stormwater and hydromodification controls are easier for undeveloped, "greenfield" sites, such as Coyote Valley (in southern San Jose) because the land requirements for runoff treatment and

hydromodification measures can be factored into the master plan and accommodated early in the development process. Implementing stormwater treatment and hydromodification controls on smaller, infill sites in a developed urban area is much more difficult given limited land area, the high cost of land, and the City's policies that discourage sprawl and encourage increased densities. These policies have an associated water quality benefit as they reduce traffic congestion and the associated air pollution.

The City continues to emphasize site design and source control as the primary tactics for addressing stormwater on a project-by-project basis. The City has also continued to actively participate in efforts to develop analytical tools and outreach on a regional basis. City staff from a variety of departments continues to provide information about stormwater issues and new requirements to the public and the development community.

Construction Inspection (CON)

The City inspects activities at construction sites to prevent sediment and other pollutants from entering the storm sewer system. Inspectors from Public Works and Building review erosion and sediment controls as part of their routine inspections. Environmental Services supplements this effort with limited inspection and broad enforcement follow-up. These departments also collaborate in providing outreach materials and training to the development community on appropriate best management practices.

In FY 05-06, the City again focused on staff training, hosting and coordinating several training sessions for staff involved in construction inspection. Two trainings were held in October 2005 by City staff for Building and Public Works inspectors. Staff has also attended trainings held by the Santa Clara Valley Urban Runoff Pollution Prevention Program and the Water Board held in December 2005 for inspectors and construction project managers. An additional training was held in January 2006 by City staff for Public Works capital improvement project managers. These focused trainings help project managers and teams ensure erosion and sediment control measures are included on plans and specifications. Trainings have made inspectors more vigilant in identifying and correcting problems at construction sites. Environmental Services staff plans to conduct frequent, short, focused stormwater BMP trainings for all inspection groups during section meetings throughout FY 06-07 to supplement the main fall annual training.

Proper stormdrain protection during construction prevents construction debris and sediment from entering the stormdrain

While inspection efforts are improving, site conditions still show that vigilance is necessary to ensure stormwater issues are addressed. Overall, the need for enforcement increased with 223 verbal warnings, 90 written notices, and 54 administrative citations issued by ESD Watershed Enforcement Inspectors.

Public Streets, Roads, & Highways (PSR)

This program element is pursuant to provision C.2.a of the permit and is one of several that address municipal activities. These program elements essentially consist of best management practices (BMPs) being incorporated into City operations such as street repair. Training plays a key role in ensuring that staff uses the proper techniques during the course of their duties to protect water quality. For FY 05-06, this training was completed in May 2006. Session content centered on review of the Department of Transportation's BMPs and Standard Operating Procedures (SOPs) for O&M activities. Corp Yard Stormwater Pollution Prevention Plan training was integrated into the DOT crew training in FY 05-06. Training content is directed by which work groups are present, and the training curriculum is revised when needed to reflect new practices. On average, 88% of the employees responded that the BMPs taught were appropriate for their work.

Department of Transportation paving crew applying their training along with the pavement

Training was also conducted for Rural Public Works BMPs in accordance with provision C.5, which requires that the City employ proper techniques when conducting maintenance activities in rural areas. This standard is integrated as part of the PSR program element. The City's departments of Parks, Recreation, and Neighborhood Services; General Services; and Transportation are responsible for managing rural public works maintenance and support activities.

The City conducts an extensive Street Sweeping program, involving the sweeping of the central business district; arterials, collectors, and bicycle lanes; and residential streets. Annually, the City sends out a calendar of the street sweeping schedule to each single-family dwelling, and asks neighborhood associations within the City to include reminders in their association newsletters for moving parked vehicles on street sweeping days. The City is continuing to expand the areas in which parking restrictions are required and enforced to improve the effectiveness of the street sweeping program. In FY 05-06, the enforcement area was broadened from 160 to 196 curb miles. The City anticipates expanding the areas in which parking restrictions are required and enforced for street sweeping by approximately 40 curb miles in FY 06-07.

Storm Drain System Operation & Maintenance (SDO)

Storm Drain System Operation and Maintenance is another municipal activity program element implemented in accordance with provision C.2.a of the permit. This program includes key maintenance activities that are conducted to ensure the proper function of the storm sewer system to collect and convey storm runoff. Maintenance staff training was conducted to coincide with that of the PSR program element and was completed in May 2006.

DOT successfully implemented its annual storm drain inlet inspection and cleaning program, cleaning approximately 28,500 inlets. To date, the City has been able to achieve the more comprehensive Tier 2 level of inlet cleaning performance. Due to budget constraints anticipated for FY 06-07, a modified implementation of Tier 2 may be needed. Evaluation of the data collected during inlet cleaning indicates that approximately six percent of the City's storm drain inlets and catch basins had a problem associated with them. The key problems for stormwater protection were cars parked on catch basins; high debris (leaves, lawn clippings, dirt and other natural materials); excessive garbage (paper, bottles, cans, and other man-made waste); and pollution (concrete, antifreeze, oil, paint, etc. that appear to have been intentionally dumped into the inlet or catch basin). Maintenance staff is directed to contact Environmental Enforcement when pollution is identified. Using this information, the City directs resources to known problem areas.

Department of Transportation Vactor crew cleaning out a storm drain inlet

Water Utilities Operations & Maintenance (WUOM)

This program element addresses a municipal activity and is implemented in accordance with provision C.2.a. The program addresses operation and maintenance activities at the City's Municipal Water system. The key tools for implementing this program are the Water Utility Pollution Prevention Plan and staff training to ensure that proper techniques are employed during maintenance activities. The City's training program includes the annual development of a video demonstrating the implementation of BMPs for a specific work function. This year's hydrant-flushing program was the focus of annual evaluation of SOPs and the review found that no changes in the current practice are needed.

Pumps at the Rincon II Pump Station

An inventory of potential water utility discharges must be conducted every three years and included in the Annual Report, as required by the Water Utility Operations & Maintenance Discharge Performance Standard. This inventory is to be performed in each service zone (North San Jose, Evergreen, Edenvale, Coyote, and South Bay Water Recycling), by Municipal Water staff. Municipal Water staff conducted the inventory in March 2006 for all service zones. The findings revealed that current SOPs and BMPs, which are successfully being implemented to reduce and eliminate pollutant discharges to receiving waters, are effective and no changes are needed.

Pesticide Management (PM)

This program element is required pursuant to provision C.9.d. of the permit. The purpose of the Pesticide Management program is to reduce the amount of pesticides in stormwater and landscape runoff. Activities include setting municipal policy, implementing proper techniques when selecting and applying pesticides on City property, staff training, public education, and City participation in regional efforts to influence regulations that affect pesticide management. In 2003, the Council adopted an Integrated Pest Management (IPM) Policy, which calls for municipal operations to incorporate IPM techniques and to reduce, phase-out, and ultimately eliminate the use of pesticides that cause impairment of surface waters.

The City has incorporated the use of IPM techniques for many years. Pesticide use on City property is based upon specific site needs. The decision to use a pesticide is determined by several factors, i.e., site evaluation, accurate identification of the pest, past history, monitoring of thresholds, review of alternative means of control, and selection of the most favorable and effective pesticide. The City also seeks to reduce the need for pesticide usage through alternate actions such as mulching, weed barriers, proper irrigation, and selection of disease resistant plants. In many instances, plant diseases and pest problems are tolerated rather than employing any pesticides. When pesticide use is necessary, the City strives to use products that are less toxic and safer for employees.

In FY 05-06, the City continued data collection and tracking of pesticide applications on City property. While improvements have been made, some data remains incomplete for Facilities and Special Districts. City staff will continue to work with contractors in FY 06-07 to resolve outstanding reporting and data collection issues. Comparative data was reviewed for City staff applications and golf courses. In general, City use of the two most common herbicides (Roundup and Pendulum) decreased despite an increase in total acreage managed. The use of Surflan and Gallery increased, in some cases replacing Pendulum and reducing the need for repeat applications. The use of Karmex decreased substantially in response to concerns about its impact on water quality. The pesticide Drive, containing an active ingredient deemed less toxic to the environment was tested by City staff and found to yield better results in lesser amounts than other products.

Tussock Moth infestation on an oak tree at Williams Street Park

City staff continues to use ongoing and new methods to resolve municipal pest problems with less toxic and non-chemical integrated pest management techniques. PRNS continues to effectively use mulch to alleviate the need for pre-emergent herbicides and reduce water use. PRNS experienced success using biological controls such as wasps to address oak and tussock moths at test locations. The City Arborist has adopted the practice of offering IPM solutions to the callers regarding maintenance of street trees. Also, the arborist is encouraging the use of a disease resistant hybrid palm tree in new Public Works projects rather than the California Fan Palm, which is susceptible to pink rot and requires regular fungicide treatment. Due to its superior environmental practices, including IPM, the Los Lagos

Municipal Golf Course and its superintendent were honored as the Golf Course Superintendents Association of America/Golf Digest (GCSAA) National Public and Overall winners of the 2005 GCSAA/Golf Digest Environmental Leaders in Golf Awards.

New projects to reduce reliance on chemical controls are planned for implementation in FY 06-07. The first project involves the use of predators to control rodent populations in certain parklands. The proposal involves building owl boxes and placing them strategically to entice owls to establish habitat and prey upon the rodents. The second project involves the use of a native grass seed mix to control star thistle weed along trails. Pesticides are typically used in the area proposed for a trial project. DOT-Special Districts will continue to evaluate the gopher pilot project that began in FY 04-05, which uses traps to control gophers rather than pesticides.

In FY 06-07, the City will continue taking a lead role in the planning process as co-host for the 3rd Annual Regional IPM Conference scheduled for November 2006 at the San Jose Convention Center. In FY 05-06, representatives from ESD, DOT, PRNS and GS began serving as conference chair and on various IPM Conference planning subcommittees.

Mercury (M)

This program element is implemented pursuant to provision C.9.c of the permit. The City has continued its efforts to reduce or eliminate mercury discharges in municipal operations. The City purchases low mercury-containing fluorescent lamps. Spent lamps are required to be recycled. In FY 05-06, the City recycled nearly 9,100 feet of mercury-containing lamps. Residential recycling of lamps is accomplished through the City's support of the Santa Clara County's Household & Small Business Hazardous Waste program.

Fluorescent lamps for recycling at the Central Service Yard

February 2006 marked the start of the Universal Waste Rules which require common household products like batteries, thermometers, fluorescent lamps and cathode ray tubes that contain hazardous materials, such as mercury and other heavy metals, to be disposed at approved locations like the County's Household Hazardous Waste site. These products are no longer accepted in curbside trash or recycling receptacles. The City conducted various outreach efforts at both the City and Program levels to alert residents of this change including postings on the City's website and articles in the City's *Curbside Courier* newsletter.

In addition, the City has operated and maintained a National Mercury Deposition Network (MDN) site since January 2000, collecting samples, recording data, and sending both to the national MDN laboratory. The City also continues its support of the San Francisco Bay Regional Monitoring Program, AB 982 TMDL Public Advisory Group, WMI Guadalupe River Mercury TMDL Workgroup, and the Clean Estuary Partnership. The City continues its commitment to

work with the Water Board and stakeholders toward TMDLs that are technically defensible and feasible for implementation.

Copper & Nickel Action Plans (CNAP)

This program element is implemented pursuant to provisions C.9.a and C.9.b of the permit, which incorporate Action Plans for copper and nickel to be implemented based on water quality monitoring results in the South Bay. The action plans include activities for which various agencies or entities assume responsibility. Only activities undertaken at the municipal level for stormwater are included in this report. Such activities have largely been integrated into other ongoing program elements but are reported as a summary for clarity. Copper and Nickel remain among the list of pollutants addressed by general and targeted outreach regarding stormwater pollution prevention.

In the City's Industrial and Commercial Inspection program, key activities have been implemented to address copper either exclusively or among the array of potential pollutants. A fact sheet regarding rooftop sources of copper pollution was again distributed to select industrial facilities. In FY 05-06, the City's Watershed Enforcement Inspectors completed a pilot project that involved inspecting rooftops of select facilities in addition to regular inspection activities. The purpose of this pilot was to evaluate the degree of BMP implementation and the need for additional outreach or enforcement efforts. Results of this project indicate that additional rooftop inspections are not necessary.

The City also continued its "NOI Filers" project. This activity aimed to increase awareness among industrial facilities of their obligations under the State's General Industrial Activities Stormwater Permit (GIASP) by providing them with BMPs and information alerting them to the requirements. Review of this information has already been successfully incorporated into routine inspections and the City reports to the Water Board a list of facilities that have not yet filed under the GIASP.

Trash (TRA)

This program element is implemented pursuant to the Program's Trash Work Plan and provision C.1 of the permit. The purpose of the Trash program is to address litter and illegal dumping that threatens to pollute urban waterways. The impetus for this program was the 2001 Water Board Staff Report recommending that all urban creeks, lakes, and shorelines be placed on a monitoring list due to the threat of trash impairment to water quality. Activities associated with the Trash program since its inception in FY 02-03 include a survey of San Jose's established trash management services and programs and identification of litter hotspots.

Trash assessments based on a trash problem area list continued to be the focus of activity during FY 05-06. The trash problem area list is comprised of Anti-Litter Program sites, parks, and homeless encampments located throughout the City. This year a second round of assessments

was performed at priority hotspots in the Coyote watershed and at all locations in other watersheds. Assessments were performed using standard protocol selected by the Program. The assessments provided information regarding the type and potential sources of trash found in and around urban creeks and offered insight into the effectiveness of existing trash management practices. The trash assessments revealed that existing trash management activities are sufficient at many locations, but that enhancements are needed in others.

Volunteers removing trash from Coyote Creek behind San Jose High Academy

The City continues to try to maximize existing resources to address trash problem areas throughout the City. This year Watershed Enforcement acted as a resource to help address trash problems on privately owned property adjacent to creeks. Enforcement inspectors contact property owners to ensure clean up and/or prevent trash from re-accumulating. In addition, the City established an agreement with the San Jose Conservation Corps to provide clean-up services along creeks to supplement existing clean-up provided by City maintenance. The Conservation Corps removed approximately 70 cubic yards (approximately 7 tons) of trash from the Guadalupe River and Coyote Creek.

This year the City of San José and the Santa Clara Valley Water District (District) continued efforts associated with the Memorandum of Agreement for Trash Prevention and Removal (Trash MOA), which began in FY 04-05. The highlight of Trash MOA activities was the partnered clean-up projects on Coyote Creek. The Trash MOA calls for three partnered clean-up projects each calendar year that are intended to take place at locations that fall outside the normal scope of operations of the City and District. During this reporting period, two partnered clean-up projects occurred in the Coyote Creek Watershed and a third on the Guadalupe River. An estimated total of four tons of debris was removed.

In addition, ESD is investigating structural trash management controls. The City submitted a concept proposal to the State Water Board Consolidated Grants Program for funds to support implementation of a structural trash control pilot program. The grant concept proposal was not invited to the application stage, but City funds were budgeted to support much smaller scale implementation of trash controls (catch basin inserts, inlet bars, or underground separation units) in FY 06-07.

Monitoring (MON)

Monitoring activities required in the stormwater permit are generally implemented in collaboration with other agencies. The City continues to participate in monitoring activities area-wide, including Regional and Program-focused investigation of pollutants and sources of pollutants to the storm drain system. The City also provides input and support to the Program's

Watershed Protection Biologist collecting field data from Coyote Creek

multi-year monitoring program, and reviews work products as various Program-level projects are designed and completed.

Municipal Compliance (MC)

This program element summarizes the City's efforts to train City staff on pollution prevention practices and to ensure that City facilities comply with stormwater requirements. In FY 05-06, the City held over 75 sessions on various topics to ensure that City staff received training on procedures and issues related to stormwater programs. Trainings continued on the implementation of the New and Redevelopment (C.3) requirements with a strong focus on hydromodification measures. Also, the City received several presentations by stormwater product vendors.

To ensure stormwater compliance at City properties, Corporation Yards were routinely inspected for stormwater permit compliance. An annual inspection was conducted at each of the six yards during the first quarter of 2006. Quarterly hazardous material inspections, which include stormwater issues, were also conducted in FY 05-06. A Corporation Yards' Pollution Prevention Team (P2 Team) was formed in December 2004. The responsibilities of the team are to review and update Corp Yard Stormwater Pollution Prevention Plans (SWPPPs), assess the Corp Yards for current stormwater best management practices (BMPs) in use, determine if new BMPs should be included in the SWPPPs, and assist in implementing the SWPPPs (e.g. training). SWPPP revisions for three of the Corp Yards (Mabury, South, and West) were drafted in FY 05-06 and are currently under review. Also, SWPPP training was conducted at all six of the Corp Yards in June 2006. On average, 93% of the employees responded that the BMPs taught were appropriate for their work. The combination of site inspections and the semi-annual meetings appears to be working well. The concerns identified in the Corp Yards' inspection reports are usually minor and resolved swiftly.

Fuelling island at Mabury Corporation Yard

Public Information / Participation (PIP)

This program is implemented in accordance with provision C.4 and includes general outreach, targeted outreach, educational programs, and public participation activities. The City has a robust and broad-based public information and public participation program, utilizing many different outreach methods to best deliver stormwater pollution prevention and watershed protection messages. Conducting outreach to the community and providing opportunities for participation in water quality protection activities are critical to evoking the behavior changes needed to manage stormwater quality. They are also important for garnering the support needed to continue and expand services and programs.

The City participates in and supports a wide variety of stormwater outreach and education activities, including many in collaboration with other local and regional agencies. Highlights for FY 05-06 include: continued stenciling of storm drain inlets throughout the City with the appropriate neighborhood creek name and 945-3000 hotline number; providing access and supplies for multiple creek clean-up sites; training sessions for developers on construction requirements; and conducting four Wacky Watershed teacher training workshops to 40 teachers. Outreach continues to be a vital tool for inspectors, allowing for direct education of polluters and potential polluters. Education is the first step in the City's Enforcement Response Plan. Educating the youth of San José continues to be a priority, with several different programs targeting both students and teachers with watershed education.

Watershed Protection Engineer educating 3rd graders at the Water Wizards Festival

The City also actively supports Program-wide outreach and education activities, including IPM outreach, Mercury outreach, and the Watershed Watch campaign. Coordinating outreach activities with the Program and Bay Area-wide efforts enables the City to deliver some of its pollution prevention message more effectively and at reduced cost.

Permit Reapplication

The City's current NPDES permit was adopted in February 2001 for a five-year period. The permit was amended in October 2001 and July 2005, with both amendments relating to the New and Redevelopment stormwater treatment and hydromodification provision, also known as Provision C.3. The permit has been administratively extended since February 2006, pending the adoption of the Bay Area-wide Municipal Regional Permit.

In late 2005, the Water Board embarked on a multi-stakeholder process to craft an NPDES permit, called the Municipal Regional Permit (MRP) that would apply to all municipal stormwater dischargers in the Bay Area. In the past, NPDES permits were issued separately to Bay Area stormwater programs with staggered adoption dates, which often resulted in uneven and inequitable requirements.

City staff has dedicated numerous hours to participate in work groups convened to help develop performance standards for the Inspection and Outreach components of the new permit. Staff has also participated in the steering and stakeholder meetings convened by Water Board staff. City staff will continue to participate in the MRP process through the Program, BASMAA, and individually as a City. The Water Board is expected to adopt the MRP in 2007.

Conclusion

The City of San José is committed to managing and protecting stormwater quality and dedicates significant resources to a variety of activities designed to address stormwater quality issues. The City actively participates in many local and regional efforts designed to leverage the most value for its resources and citizens. The City strives to be a leader in watershed protection, and continues to meet or exceed its permit-mandated obligations. Future fiscal years will bring new challenges, but the City is actively positioning itself to best meet these challenges and maintain the high quality of service its constituents expect.

Watershed Protection

1. ICID: Illicit Connection / Illegal Discharge Inspection

1.A ICID Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
ICID 1	**Response to Complaints** The City of San José will respond to complaints regarding ICID dumping activities into the storm drain system and will ensure that the activity has ceased or is an allowable discharge**.**			
ICID 1.A	Update database system to track ICID complaint information.	Done FY 02-03	Done FY 02-03.	ESD-WE
ICID 1.B	Document to RWQCB annually the number of ICID complaints that City received, & that activity has ceased or is an allowable discharge.	Annually	Done FY 05-06. See 1.D: *ICID Summary Tables/Additional Information*.	ESD-WE
ICID 1.C	Document to the RWQCB annually follow-up activities from each ICID complaint response. (Table 1 in the Annual Report)	Annually	Done FY 05-06. See 1.D: *ICID Summary Tables/Additional Information*.	ESD-WE
ICID 1.D	Review effectiveness of standard operating procedures for responding to ICID complaints.	Annually	Done FY 05-06. Current procedures are working well.	ESD-WE
ICID 1.D.2	Refine and implement standard operating procedures for responding to ICID complaints/referrals.	Ongoing	Done FY 05-06. Current procedures are working well.	ESD-WE
ICID 1.E	Work with SCVURPPP to refine administrative procedure for providing referrals to the Regional Board.	03/01/05	Pending activity by Program ICID AHTG.	ESD-WE, Program
ICID 1.F	Revise standard operating procedures to incorporate results of ICID 1E.	03/01/05	Pending completion of ICID 1E.	ESD-WE, Program
ICID 2	**Investigations** The City of San José will conduct investigations of high priority areas. High Priority is defined as areas with a high potential for non-stormwater discharges to the City's collection system.			
ICID 2.A	Identify high priority areas, primary types & sources of ICID pollution based on complaints, historical inspection records, inspector knowledge and monitoring information.	Annually	Done FY 05-06. Priority areas based on complaints received. All complaints are investigated.	ESD-WE
ICID 2.A.1	Perform GIS analysis on frequently occurring ICID sources and/or types.	FY 03-04	Done FY 05-06. See 1.D: *ICID Summary Tables/Additional Information*.	ESD-UR
ICID 2.B	Conduct investigations of high priority areas based on ICID 2A.	Ongoing	Done FY 05-06. See 1.D: *ICID Summary Tables/Additional Information*. Additionally, staff conducted outreach efforts in business areas that had consistent ICID complaints.	ESD-WE
ICID 2.C	Document to the RWQCB that high priority areas have been conducted, per Table 2 in revised reporting format.	Annually	Done FY 05-06. See 1.D: *ICID Summary Tables/Additional Information*.	ESD-WE

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
ICID 3	**Inspector Training** The City of San José will ensure that ICID inspectors are adequately trained in inspection procedures, documentation, and enforcement related to stormwater pollution prevention.			
ICID 3.A	Conduct annual training for ICID inspectors.	Annually	Done FY 05-06. See 13.D: *Municipal Employee Training Summary* for details.	ESD-WE
ICID 3.B	Provide and document on-the-job training and other training opportunities, such as inspection workshops.	Annually	Done FY 05-06. See 13.D: *Municipal Employee Training Summary* for details.	ESD-WE
ICID 3.C	Review inspection training protocols to identify new training opportunities, approaches, and materials.	Annually	Done FY 05-06. During annual reviews and during the budget cycle ESD annually reviews the training and material needs for each inspector and the Watershed Enforcement section as a whole.	ESD-WE
ICID 4	**Outreach and Technology Transfer** The City of San José will distribute outreach and technology transfer material containing applicable control measures and/or BMPs to target parties responsible for ICID activities.			
ICID 4.A	Develop and/or modify existing outreach material, as needed, based on report developed under ICID 4B	Ongoing, as needed.	Done FY 05-06. No new or modified outreach materials were identified or developed this fiscal year.	ESD-WE/Marcom
ICID 4.B	Determine need for new outreach and technology transfer material by getting feedback from inspectors regarding 1) continuing problem activities 2) discharge types and 3) monitoring and complaint data, 4) usefulness of existing outreach and technology transfer material.	Ongoing	Done FY 05-06. Feedback from inspectors is collected during regular staff meetings. Needs are identified and responded to as priorities and budget allow. As a result of inspector feedback in FY 05-06 the *Draining Pools and Spas* brochure was reprinted.	ESD-WE and UR
ICID 4.C	Document to RWQCB that outreach technology transfer material and/ or BMPs have been distributed; tracked in Urban Runoff database.	Annually	See 14.D: *PIP Activities* Table for a count of outreach and technology transfer materials distributed as part of inspection activities.	ESD-UR
ICID 4.D	Develop and implement standard operating procedures to gather customer feedback on ICID services.	Development Done FY 02-03 Implementation Ongoing	Done FY 05-06. Customer feedback cards are routinely distributed to ICID complainants. See Section 14 A, Item PIP 2.B 1 for details.	ESD-WE
ICID 5	**SOPs Effectiveness Evaluation** The City of San José's Watershed Enforcement staff will review and evaluate the effectiveness of its SOPs in responding to complaints regarding illicit connections and illegal discharge dumping activities into the storm drain system.			
ICID 5.A	Document and evaluate effectiveness of SOPs.	Annually	Done and ongoing. Outreach was added as a standard element to areas that have consistent ICID reports.	ESD-WE
ICID 5.B	In Annual Report, document and evaluate what worked well and what needs improvement.	Annually	Done FY 05-06. See 1.B: *ICID Program Evaluation*.	ESD-WE

1.B ICID Program Evaluation

Figure 1 illustrates the distribution of ICID incident types for Residential, Commercial, Industrial, Automotive, Food, Construction, and Public facilities. The total number of incidents decreased from 829 last year to 792. This decrease could be attributed to increased awareness and continued targeted outreach efforts. Staff will continue to monitor this trend and assess if there is a correlation with outreach efforts.

Vehicle and equipment leaking is down to 107 incidents from 123 reported last year. This type of incident, however, continues to be the leading incident type investigated in residential areas with residential areas leading the total number of complaints at 357, or 45% of total complaints. The high number of complaints in residential areas as shown in Figure 2 may be explained by the increased residential awareness and the fact that over 34% of the City's land area is used for residential purposes versus 15% for both commercial and industrial uses combined. Open space, roads, baylands and schools generally account for the remaining land area in San Jose.

The number of construction-related incidents remained similar to last year, with 76 reported in FY 05-06 versus 73 in FY 04-05. Staff in ESD, PW and PBCE continues to proactively coordinate efforts to more effectively prevent construction related incidents, particularly tracking soil. Please see CON section for details.

Oil and grease issues continue to be the leading complaint at food facilities. To better address this issue, the City is expanding the current food service facility inspections to more comprehensively address Fats, Oils and Grease (FOG) in FY 06-07. The City's FOG Program will dedicate a trained inspection group that is extremely knowledgeable about Fats, Oils, and Grease to work with food facilities to reduce the number of grease related incidents.

Residential Complaint Geographic Evaluation

In last year's Annual Report, staff committed to doing a geographic analysis of residential complaint data. Staff conducted a complaint analysis according to zip codes and determined that two zip codes, 95116 and 95123, have a higher percentage of complaints than other zip codes. Zip code 95116 straddles a portion of central and east San Jose, and the second, 95123, is located in South San Jose.

Zip code 95116 currently has four active Strong Neighborhood Initiative (SNI) areas, namely Five Wounds Brookwood Terrace (FWBT), Mayfair, Gateway East and East Valley/680 communities. The SNI is a partnership between the City of San Jose, the Redevelopment Agency (RDA) and San Jose's residents and business owners to strengthen the City's neighborhoods by building clean, safe, and strong neighborhoods with independent, capable, and sustainable neighborhood organizations. The increased number of complaints in this zip code could be attributed to the four SNI areas and the fact that residents in SNI areas tend to be more familiar with City programs generally, like the ICID program, than residents in non-SNI areas. Watershed Enforcement and Urban Runoff staff can use these existing SNI forums to actively engage the community in an effort to reduce illegal dumping and vehicle and equipment leaking issues, which continue to be the two leading complaints in residential areas.

The 95123 zip code does not currently have any SNI areas. Staff is evaluating why the number of calls was higher in this area of South San Jose. Staff is also evaluating various methods to target residential outreach in this area again with the intent to focus on illegal dumping and vehicle and equipment leaking issues. Methods being considered include identifying and engaging active neighborhood associations, a zip code specific insert in the San Jose Mercury News, or a zip code wide mailing.

Targeted Outreach

City staff continues to conduct targeted outreach in an effort to reduce the number of ICID incidents. In FY 05-06 City staff conducted the following:

- Met with the San Pedro Square Business Association and planned and implemented procedures to stop discharges to the storm drain from surface cleaning and leaking trash compactors; and
- Attended a joint training meeting with San Jose Water Company (SJW) on their emergency line break procedures.

Significant Clean-ups

Sewage Spill into the Guadalupe River

Watershed Enforcement (WE) received a call from the City's Department of Transportation (DOT) that a contractor broke a sewer line and raw sewage was entering the Guadalupe River. Staff conducted an investigation and determined that RGW, a contractor working for Caltrans, was digging a trench and broke a City sanitary sewer line on Saturday, June 17, 2006. The contractor initially thought they broke an abandoned line and did not report it. Caltrans reported the incident on Monday, June 19, 2006. Raw sewage was flowing into one of their pump stations, then pumped into storm sewer system, and then being deposited into the Guadalupe River. DOT crews plugged the lines and pumped the sewage. WE staff coordinated the pumping and clean-up of the storm lines and Guadalupe River. Caltrans has accepted full responsibility for the incident. The investigation is still ongoing and enforcement actions will be included for this incident.

Grease Spill into the Guadalupe River

Watershed Enforcement received a complaint about sewage in the storm drain. Staff initiated an inspection and determined that it was greasy wash-water from the Crown Plaza hotel located in downtown. Upon further investigation, it was determined that the hotel's grease interceptor had not been pumped out recently and they did not have an approved sanitary sewer clean-out. This caused a sanitary sewer overflow that washed into the storm drain and flowed into the Guadalupe River. DOT crews and private contractors dammed the outfall and pumped the greasy wash-water out of the river. The hotel was issued an Official Warning Notice and an Administrative Citation, and they paid for the clean-up costs. Additionally, they installed an approved clean-out and are required to pump the grease interceptor on a regular basis.

Blue Water in Flint Creek

Watershed Enforcement responded to a complaint of a possible leaking underground storage tank that was turning Flint Creek a bluish color. Inspection staff conducted an investigation and found that NorCal Port-a-Potty Company had a yard nearby. According to NorCal, one of their drums had leaked. Further investigation revealed that there was a storm drain in the yard that was covered with wood and debris. City staff placed absorbent on the spill and dammed up the creek. NorCal hired a contractor to pump out the blue chemical from the Creek. Watershed Enforcement staff assisted City Park Rangers and the California Department of Fish & Game staff to collect samples. NorCal was issued an Official Warning Notice and they paid for all clean-up costs, including the catch basin and storm sewer line.

2. IND: Industrial & Commercial Discharges

2.A IND Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
IND 1	**Notice of Intent (NOI) Filers** The City of San José will conduct inspections of those facilities that have filed an NOI with the State and appear on a list provided by the State.			
IND 1.A	Annually, obtain NOI filer database from State with annual information, review information and identify new NOI facilities for inspection next year.	Annually	Done FY 05-06. List obtained and incorporated in 7/04.	ESD-WE
IND 1.B	Conduct and document initial inspections of NOI Filers within one year using the inspector checklist form to determine exposure and assign a future inspection frequency to each facility accordingly. Document whether the facility had submitted an NOI, and whether a SWPPP and a SWMP were on site.	Ongoing	In FY 05-06 seven new NOI filers were inspected out of a total of 13. The remaining five were inspected in July and August of FY06-07. See 2.D: *IND Summary Tables/Additional Information*.	ESD-WE
IND 1.C	Conduct & document annual inspections of facilities determined to have exposure in accordance with inspection frequency schedule.	Ongoing	Done FY 05-06 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 1.D	Conduct & document inspections of facilities determined to have exposure in accordance with inspection frequency schedule.	Ongoing	Done FY 05-06 and ongoing. See 2.D: *IND Summary Tables/Additional Information*.	ESD-WE
IND 1.E	Maintain the database to track the inspection information from the inspector checklist and to include all NOI filer SIC codes required by the Industrial Activities Stormwater General Permit.	Ongoing	Done FY 05-06 and ongoing.	ESD-WE
IND 2	**Non-Filer Investigations** The City of San José will inspect industrial facilities that may be subject to general permit requirements but are not found on the NOI filer list provided by the State.			
IND 2.A	Identify industrial facilities that conduct activities with the SIC codes listed in the IND SOPs.	Annually	Done July 2005: Determined the Inspection schedule for the year based on the IND SOP.	ESD-WE
IND 2.B	Develop a list of facilities targeted for inspection during upcoming year that may be subject to general permit requirements for NOI based on business licenses, etc.	Annually	Done, July 2005: Determined the Inspection schedule for the year based on the IND SOP.	ESD-WE
IND 2.C	Conduct and document initial inspections of industrial facilities with the SIC codes listed referenced in IND 2A, using the inspector checklist form to document whether the facility "has exposure" or "no washing/no service" facility, whether the facility had submitted an NOI, and whether a SWPPP and a SWMP were on site. Maintain database.	Ongoing	Done FY 05-06 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 2.D	Conduct & document annual inspections of facilities	Ongoing	Done FY 05-06 and ongoing. See 2.D: *IND Summary*	ESD-WE

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
	determined to be Significant Facilities in accordance with implementation schedule. Add the facility to appropriate database(s) and assign an inspection frequency. If the facility inspected is determined to need to file an NOI and is not able to provide an NOI, SWPPP or SWMP, refer to the RWQCB.		*Tables/Additional Information.*	
IND 2.E	Work with the Program's Industrial Inspection Ad Hoc TG on an Administrative procedure for providing referrals to the Regional Board and document providing referrals to the Regional Board for facilities with significant problems.	Pending Implementation by Program	Pending activity by Program IND AHTG.	ESD-WE
IND 3	**City Regulated Facilities** The City of San José will conduct inspections of City Regulated facilities as identified below: Food Service Facilities: 2 or more AOCs* over a rolling three year time period - Every year 1 AOC over a rolling three year time period – Every two (2) years 0 AOCs over a rolling three year time period - Every three (3) years All other City-regulated Facilities: 2 or more AOCs* over a rolling five year time period – Every year 1 AOC over a rolling five year time period – Every two (2) years 0 AOCs over a rolling five year time period but have exposure – Every five (5) years 0 AOCs over a rolling five year time period with no exposure or potential for exposure – No further inspections Facilities for which a referral or ICID complaint is received: As soon as practicable for violations and every year until they meet the above criteria.			
IND 3.A	Determine industrial/commercial facilities identified in the IND SOPs	Annually Q1	Done, July 2005: Determined the Inspection schedule for the year based on the IND SOP.	ESD-WE
IND 3.B	Conduct and document inspections of City Regulated facilities, other than food service facilities, at least once every five (5) years in accordance with the inspection frequency schedule. If determined to have no impact or no potential for pollution, will not be scheduled for future inspection.	Ongoing	Done FY 05-06 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 3.C	Conduct and document inspections of City Regulated food service facilities at least once every three (3) years. Initial approved performance standards require inspections every three years. If determined to have no impact or no potential for pollution, will not be scheduled for future inspection.	Ongoing	Done FY 05-06 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 3.D	Conduct and document inspections for which a referral or complaint was received within five days of complaint received and second inspection within one year.	Ongoing	Done FY 05-06 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 3.E	Develop a database to track the inspection information	Done FY 02-03	Done FY 02-03.	ESD-WE

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
	from the inspector facility inspection report.			
IND 3.E.1	Implement new Environmental Enforcement Data Management System.	Done FY 03-04	Done FY 03-04.	
IND 3.F	Maintain database to track inspection information from inspector facility inspection report and to include new industrial program categories.	Done FY 03-04	Done FY 03-04.	ESD-WE
IND 3.G	For B, C, D, and E, collect information during inspections on the potential for stormwater pollution at City Regulated facilities in order to determine the appropriate inspection frequency for the various facilities.	Ongoing	Done FY 05-06 and ongoing. Areas of Concern (AOC) determine inspection frequency. AOCs are identified during inspection.	ESD-WE
IND 3.H	Develop an inspection frequency plan to track frequency of inspections. Implement & update, as needed, the inspection frequency plan.	Done FY 01-02 Implementation Ongoing Updated as Needed	Done FY 01-02 and ongoing. Areas of Concern (AOC) determine inspection frequency. AOCs are identified during inspection.	ESD-WE
IND 4	**Compliance** The City of San José will conduct industrial/commercial inspections to determine the existence of discharges or threatened discharges, which are illegal under local ordinances. The facility operator will be notified of observed areas of concern to be corrected and/or if official action on violations is necessary, it will take place under local enforcement procedures.			
IND 4.A	Document facilities that have enforcement actions, and the type of enforcement actions, conducted for the existence of discharges or threatened discharges that are illegal under local ordinances.	Ongoing	Done FY 05-06 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 5	**Training** The City of San José will ensure that industrial/commercial inspectors are adequately trained in inspection procedures, documentation, and enforcement related to stormwater pollution prevention.			
IND 5.A	Conduct annual training for IND inspectors.	Annually Q1	Done FY 05-06. See 13.D: *Municipal Employee Training Summary* for details.	ESD-WE
IND 5.B	Maintain a training plan and provide and document on-the-job training and other training opportunities such as industrial/commercial inspection workshops.	Ongoing	Done FY 05-06 and ongoing. See 13.D: *Municipal Employee Training Summary* for details.	ESD-WE
IND 5.C	Review inspection training protocols to identify new training opportunities, approaches, and materials.	Ongoing	Done FY 05-06 and ongoing. See 13.D: *Municipal Employee Training Summary* for details.	ESD-WE
IND 6	**Outreach** The City of San José will help develop and distribute outreach and technology transfer material containing applicable control measures and/or BMPs to industrial/commercial facility operators responsible for IND activities.			
IND 6.A	Identify and list existing outreach and technology transfer material.	Annually	Done FY 05-06. Outreach materials are listed in Appendix A of the City's URMP.	ESD-UR
IND 6.B	Distribute applicable outreach and technology transfer	Distribution	Done FY 05-06 and ongoing. See 14.D: *Outreach*	ESD-UR

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
	material to industrial/commercial facility operators. Document to the RWQCB that outreach and technology transfer material and/or BMPs have been distributed, as needed, to industrial/commercial facility operators.	Ongoing	*Materials Distributed* for a count of outreach and technology transfer materials distributed as part of Inspection activities.	
IND 6.B	Determine usefulness of outreach and technology transfer materials by obtaining feedback from industrial/ commercial facilities. Obtain feedback from inspectors about the effectiveness of existing outreach and technology transfer material.	As Needed	Done FY 05-06. Feedback from inspectors is collected during regular staff meetings. Needs are identified and responded to as priorities and budget allow.	ESD-UR
IND 7	**NOI Filers Effectiveness Evaluation** The City of San José's Watershed Enforcement staff will review and evaluate the effectiveness of its NOI Filers inspections procedures and database tracking system.			
IND 7.A	In the Annual Report document and evaluate the effectiveness of NOI Filers inspection procedures.	Annually	Done FY 05-06. NOI filers are inspected in a similar manner as all facilities. These procedures were updated to include a better mechanism for determining whether a facility needs to file for an NOI if conditional.	ESD-WE
IND 7.B	In the Annual Report document and evaluate the effectiveness of the NOI Filers database tracking system.	Annually	Done FY 05-06. The NOI filer database tracking system identifies whether facilities are conditional or not and includes a special button for indicating if there is any potential for exposure.	ESD-WE
IND 7.C	In the Annual Report document and evaluate what worked well and what needs improvement.	Annually	Done FY 05-06. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE

2.B IND Program Evaluation

The goal of the IND Program Element is to reduce storm drain pollution from commercial and industrial facilities through inspection. The Environmental Enforcement Section of the Watershed Protection Division is primarily responsible for inspecting over 3,500 businesses in San José each year.

Increase in Business License Applications

As shown in Table 2.D, FY 05-06 marked the third time in three years that the City experienced a significant spike in the number of business license applications. The total inventory of facilities in the City that are subject to inspection has doubled over the last three years, from 4,991 facilities in FY 03-04 to 9,229 facilities in FY 05-06, representing a significant workload challenge. The City began to integrate this increased workload for the short term by prioritizing, phasing initial inspections, and shifting resources. The number of facilities inspected has increased from 2,872 in FY 03-04 to 3,506 in FY05-06 and 4,000 facilities are slated for inspection in FY 06-07. Since this increase in workload is expected to continue in subsequent fiscal years, long-term strategies will be explored to fulfill inspection requirements.

Food Service Facility Inspections

FY 05-06 marked the fourth year of implementation of this comprehensive inspection program and 1,148 facilities were inspected. Staff also conducted a review of the last three years of data in order to assess how the program is working. The data showed the following:

- The average number of AOCs (Areas of Concern) found at facilities with any AOCs is approximately two and relatively constant over the last three years.
- The percent of facilities where AOCs are identified increased over the first three years, then seemed to stabilize for the fourth year. This appears to be due to the repeat inspections of facilities that were found in noncompliance in previous years and will be evaluated more closely as this program continues.

- A closer look at facilities with AOCs in the previous year shows that more than half show a decrease in the number of AOCs found at their facility the subsequent year, showing improvement of their performance over time.

In FY 05-06, the City is establishing a Fats, Oils, and Grease (FOG) Inspection Program. This Program will target food service facilities focusing specifically on successfully integrating the sanitary sewer management plan (SSMP) requirements and enhancing the business' general awareness of stormwater issues related to this particular business type.

BMP Distribution

Almost 9,000 Best Management Practice brochures (BMPs) were distributed in FY 05-06, which represents a 40% increase in BMP distribution over last fiscal year. Generally, City Inspectors are being very proactive and distributing BMPs to support educational efforts. For example, businesses that did not have any AOCs were still given BMPs by inspectors to support the business in their efforts and to help ensure that they would be well positioned to keep their number of AOCs at zero. This increase may also be attributed to specific FOG BMPs being tracked individually instead of as a single group, as they were tracked prior to FY 04-05.

2.C IND Response to Water Board Comments

No comments received from Water Board on this Program Element.

2.D IND Summary Tables / Additional Information

IND Summary Tables

OVERALL FACILITY INSPECTION TOTALS	05-06	04-05	03-04	02-03	01-02	DESCRIPTION OF ITEM
Facilities Subject to Inspection in database	9,229	6,164	4,991	3,943	3,924	All facilities in the database that require inspections to meet the performance standard, whether or not they are scheduled for inspection in the current year. This includes both city-regulated and GIASP facilities. This excludes facilities that the City has determined are not subject to future inspection based on a determination that there was no exposure, incorrect SIC, etc.
Facilities Scheduled for Inspection	3,490	3,020	3,022	2,500	1,743	All facilities that were determined to need inspection by existing schedule date and imports from business license, Harris Info, and NOI filers state listing for reporting year.
Facilities Inspected	3,506	3,029	2,872	2,210	1,720	All facilities subject to inspection that were inspected. Also described as number of cases.
Other City Regulated Facilities	85	51	26	30	43	These facilities had an Illicit Connection Illegal Dumping complaint filed against them, so now are scheduled to receive an industrial/commercial inspection as per IND 3D.
Facilities Scheduled for Inspection the following fiscal year	4,000	3,237	3,144	3,132	2,500	All facilities subject to inspection for the following fiscal year.

STATUS OF GIASP IMPLEMENTATION	05-06	04-05	03-04	02-03	01-02	DESCRIPTION OF ITEM
Board Referrals						
New NOI Filers	13	4	20	9	260	Total industrial facilities in San José with new NOI filed according to Water Board Database as of July 2004. Prior to 02-03, data included all Active NOI filers; not just new ones.
New NOI Filers Inspected	7	4	17	9	N/A	Of the facilities referred to the City by the Water Board, the number inspected during the fiscal year.
Inspections						
Potential NOI Facilities	840	746	521	544	N/A	Of the facilities scheduled for inspection during the fiscal year, the number that may be subject to GIASP provisions
Have Filed	52	96	126	110	N/A	Of the facilities inspected, the number that have filed.
SWPPP or SWMP on-site	81	87	149	108	N/A	Per IND 1B and IND 2C, the number of facilities having a SWPPP or SWMP on-site
Need to File	59	90	26	122	98	Of the facilities inspected, the number determined to need to file in accordance with the GIASP. These facilities are listed in 2.D Companies Requiring NOI Based on SIC But Have Not Filed AND Companies Requiring NOI Based on Exposure But Have Not Filed.
Do Not Need to File (Conditional – No NOI required)	451	560	279	164	465	All facilities that were determined to need an inspection per the GIASP with findings of no NOI required.
Closed/Moved Facilities	278	248	521	447	N/A	NOI facilities no longer in operation.

Enforcement Actions Summary

TOTAL ENFORCEMENT ACTIONS TAKEN	05-06	04-05	03-04	02-03	01-02	DESCRIPTION OF ITEM
AOCs	1,821	2,591	2,624	1,790	1,069	Area of concern with a compliance date and any enforcement action activity.
BMPs Distributed	8,912	6,890	5,796	4,267	1,878	Number of BMPs issued as part of Enforcement.
Verbal Warning	1,070	1,280	1,927	753	N/A	Verbal warning providing information for corrective actions. An inspection report accompanies each verbal warning.
Official Warning Notice	366	384	162	77	N/A	Written letter providing information for corrective actions.
Administrative Action with Penalty &/or Fine	5	15	3	3	N/A	Administrative actions, including fines (In San José this is an Administrative Citation.)
Criminal Action	0	0	0	0	N/A	Legal actions
Referral for Enforcement	0	0	0	0	N/A	Refer case to agency with enforcement powers.
Referral for other reason	0	0	0	4	N/A	Refer case to internal or external agency for clean-up, information or jurisdictional reasons.

HIGHEST ENFORCEMENT ACTION TAKEN	05-06	04-05	03-04	DESCRIPTION OF ITEM
No Enforcement Action	1,169	780	835	Cases with no Enforcement Action taken
BMPs Distributed	1,342	939	850	Cases with BMPs Distributed as the highest Enforcement Action to achieve compliance
Verbal Warning	686	1,045	1,064	Cases with Verbal Notice as the highest Enforcement Action to achieve compliance
Warning Notice	306	255	120	Cases with Warning Notice as the highest Enforcement Action to achieve compliance
Administrative Citation	3	10	3	Cases with Administrative Citation as the highest Enforcement Action to achieve compliance
Criminal Action	0	0	0	Cases with Criminal Action as the highest Enforcement Action to achieve compliance
Total	3,506	3,029	2,872	All facilities subject to inspection that were inspected. Also described as number of cases.

INSPECTIONS REQ'D FOR COMPLIANCE	05-06	04-05	03-04	DESCRIPTION OF ITEM
One Inspection	2,807	2,132	2,057	Number of Cases requiring one inspection to achieve compliance
Two Inspections	571	675	535	Number of Cases requiring two inspections to achieve compliance
Three Inspections	96	162	158	Number of Cases requiring three inspections to achieve compliance
Four Inspections	18	45	59	Number of Cases requiring four inspections to achieve compliance
Five Inspections or More	14	15	63	Number of Cases requiring five inspections or more to achieve compliance
No Inspections	0	0	0	Number of Cases requiring zero inspections (These are duplicates and facilities determined to be non-existent by Business List and phone calls)
Total	3,506	3,029	2,872	All facilities subject to inspection that were inspected. Also described as number of cases.

IND Facility Categories for the City of San José

(Developed by AHTG to use for Program-wide Reporting, September 7, 2001 Memo's 17 categories + 3 City categories)

CATEGORY #	PROGRAM CATEGORY	CURRENT AHTG MUNICIPAL CATEGORY	SCHEDULED	ACTUAL
1	Automotive	Automotive sales, engine and body repair, gas stations, car washes, parking, vehicle services	549	524
2	Food Service	Eating and drinking establishments, including cafeterias, delis, bakeries, mobile food	1,202	1,148
3	Paint Facilities	Manufacturing and retailing	1	1
4	Dry Cleaners	Dry cleaners	0	0
5	Cleaning Services	Mobile washers, building cleaning, carpet cleaning	332	376
6	Pesticide Facilities	Manufacturing and retailing; pesticide applicators	8	8
7	Machine Shops	Industrial machinery and equipment	98	101
8	Metal Manufacturing	Metal fabricating, finishing, plating, metal work (40 CFR 413, 433)	72	62
9	Electric/Electrical Components	Manufacturing (40 CFR 469)	206	206
10	Construction/ Building	Retail, trade contractors, construction, landscape and garden businesses	409	467
11	Local Transit; Highway Transport	Electric, Gas and Sanitary Services, Trucking Industries	197	201
12	Recycling yards	Assembling, breaking up, sorting and wholesale distribution of scrap and waste materials. This includes auto wreckers engaged in dismantling automobiles for scrap.	28	25
13	Auto Dismantlers	Dismantling motor vehicles for the purpose of selling parts.	5	4
14	Concrete/Stone/Clay Products	Manufacturing cement, structural clay products, pottery, concrete and gypsum products, cut stone, abrasive and asbestos products, and other products from materials taken principally from the earth in the form of stone, clay and sand.	35	34
15	Corporation Yards	PG&E, Caltrans, School bus, VTA, Municipal	0	0
16	Landfills	Dumps; Garbage collecting, destroying and processing; Landfill; Rubbish collection and disposal.	8	7
17	Wood Furniture & Other Products	Manufacturing finished articles made entirely or mainly of wood or related materials.	36	37
18	Chemical Manufacturing	Manufacturing/producing basic chemicals, chemical products to be used in further manufacture (synthetic fibers, etc.) and finished chemical products to be used for ultimate consumption or as materials or supplies in other industries (such as cosmetics, soaps, fertilizers)	10	9
19	Misc. Manufacturing	Caskets, Furniture, Glass, Jewelry/Precious Metal, Manufacturing Industries-NEC, Medical, Office & Store Fixtures, Paper, Petroleum & Coal, Pharmaceuticals, Rubber & Plastics, Signs, Toys & Sports	112	111
20	Other	**Other includes:** Air Conditioning Services, Amusement Parks, Chiropractors, Commercial Areas, Florist, Hazardous Waste, Laboratories, Laundries, Medical and Dental Labs, Miscellaneous, Petroleum Pipelines, Petroleum Refining, Photographic/Printing, Property Management, Radiologists, Steam Electric Power Generation (per permit), Storage, Veterinarians, Welding/Iron Works, Welding Repair, Winery, and Underground Storage Tanks and unspecified SIC Code.	182	185

3. NRD: New and Redevelopment

3.A NRD Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
NRD 1	**Legal Authority** The City of San José will have adequate legal authority to implement new development control measures, including all applicable requirements of Provision C.3, as part of its development plan review and approval procedures and other appropriate new development and redevelopment permitting procedures (Provision C.3.a.i).			
NRD 1.A	Revise Municipal Code to ensure adequate legal authority to implement new development control measures (C.3.a.i).	As Needed	Done FY 05-06. The City currently has adequate legal authority to implement new development control measures. City Council approved Policy 8-14 entitled Post-Construction Hydromodification Management on October 18, 2005. See 3.B: *NRD Program Evaluation* for details.	PBCE, ESD, PW
NRD 2	**Guidance to Developers** The development community is provided with guidance on post construction measures as early in the application process as possible.			
NRD 2.A.1	Draft necessary revision(s) to Guidance Manual on Selection of Stormwater Quality Control Measures to allow incorporation of hydraulic sizing design criteria and provide to developers.	Done FY 02-03 Ongoing	Done FY 02-03 and ongoing. In FY 05-06 the City contracted with a consultant to further update the City's Guidance Manual on Selection of Stormwater Quality Control Measures to include more detailed guidance related to treatment and hydromodification. In addition, the SCVURPPP C.3 Handbook was updated.	PBCE, ESD, PW, RDA
NRD 2.A.2	Refine Guidance Manual on Selection of Stormwater Quality Control Measures to incorporate HMP measures, as necessary.	Done FY 05-06	Done FY 05-06. SCVURPPP drafted a chapter on HMP to their C3 Handbook. The chapter provides guidance on sizing criteria for HMP measures.	PBCE, ESD, PW, RDA
NRD 2.B	Provide development community with revised information and guidance materials concerning any adopted on site design, building permit requirements and hydraulic sizing design criteria and maintenance requirements for BMPs for stormwater treatment measures.	Done FY 02-03	Done FY 02-03 and ongoing. Revised information is provided by 1) printed status bulletin information sheets distributed by e-mail to the development community and as handouts at public information counter and at developer roundtables; 2) webpage updates; 3) inviting the development community to attend Program workshops and City sponsored Developers' Roundtables; and 4) biweekly meetings with the engineering consulting community. See 14.D: *PIP Activities*.	PBCE, ESD, PW, RDA
NRD 2.B.1	Coordinate with development community on proposed hydraulic sizing criteria for structural stormwater treatment measures and any proposed revisions to Guidance Manual and policy through workshops and regular meetings.	Done FY 02-03	Done FY 02-03. See NRD 2.B. above.	PBCE, ESD, PW, RDA
NRD 2.B.2	Update guidance material regarding maintenance responsibilities for any HMP measures.	Done FY 05-06	Done FY 05-06. SCVURPPP C.3 Handbook Chapter Six includes maintenance guidance that applies to HMP	PBCE, ESD, PW, RDA, Program

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
			measures. In addition, the City updated and revised procedures for BMP O&M Verification Program. See NRD 8 for details.	
NRD 3	**CEQA Requirements** Environmental documents required for those projects that fall under CEQA or NEPA review, such as EIRs, negative declarations, and initial study checklists, will address: 1) Stormwater quality impacts for land development during construction and after construction has been completed (both significant and cumulative); 2) Required permits, and 3) Specific mitigation measures related to stormwater quality.			
NRD 3.A	Review and evaluate the City's Environmental Review procedures to improve the review for water quality impacts and identification of mitigation measures. (Provision C.3.m.)	Done FY 02-03	Done FY 02-03. The City uses the existing Office of Public Research initial study checklist questions. Separate guidance text developed in coordination with the Program for addressing water quality impacts and identification of mitigation measures is posted on the website.	PBCE, ESD, PW, RDA
NRD 3.A.1	Identify areas where new or additional water quality review processes and related documents or checklist questions are needed and propose schedule for revision.	Done FY 02-03	Done FY 02-03. See NRD 3.A.	PBCE, ESD, PW, RDA
NRD 3.A.2	Refine and update areas where new or additional water quality related mitigation measures may be needed.	Done FY 05-06	Done FY 05-06. The Environmental Clearance Application has been updated to include additional steps to allow City Staff more time to review and educate applicants on including treatment and hydromodification measures.	PBCE, ESD, PW, RDA
NRD 3.B.	Report on revisions made to environmental review process.	Done FY 02-03	Done FY 02-03. See NRD 3.A.	PBCE, ESD, PW, RDA
NRD 4	**Project Mitigation Measures and Design Requirements** Developers of projects will be required by the City of San José to mitigate stormwater quality impacts to the maximum extent practicable, through proper site planning and design techniques and/or addition of permanent stormwater quality control measures.			
NRD 4.A	Revise current Policy on Post-Construction Urban Runoff Management as necessary to incorporate minimum BMP requirements for all projects.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA, CAO
NRD 4.B.	Review and modify development permit approval procedures as necessary for adopted revisions.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 4.C	Review the design standards and guidance for opportunities to make revisions that would result in reduced impacts to water quality and summarize how they were incorporated into approval procedures.	Done FY 03-04	Done FY 03-04	PBCE, ESD, PW, RDA
NRD 4.D	Review the existing source control measures contained in site design standards, guidance documents and conditions of approval for opportunities to limit stormwater pollution. (Provision C.3.k.)	Done FY 03-04	Done FY 03-04 in coordination with the Program.	PBCE, ESD, PW, RDA
NRD 4.E	Review General Plan and revise as necessary to	FY 02-03	Done FY 03-04. In FY 05-06, the General Plan was	PBCE

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
	incorporate water quality and watershed protection principles and policies, and summarize revisions made. (Provision C.3.l.)		revised to allow high-density development in North San Jose. EPA research indicates that high-density developments produce less runoff per person than low-density developments and help to protect water quality.	
NRD 4.F	Review the design standards and guidance for opportunities to make revisions that would result in reduced impacts to water quality and summarize how they were incorporated into approval procedures. Such revisions are listed in Provision C.3.j.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 4.F.1	Identify and document existing site design standards and guidance documents and policies.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 4.F.2	Revise Site Design Measures and Standards, if necessary.	Done FY 03-04	Done FY 03-04. City staff continues to work with the engineering community and consultants to explore street right-of-way widths and alternatives to curb and gutter requirements. Treatment BMPs and long-term maintenance solutions are also being discussed. See 4.B: *NRD Program Evaluation* for details. Staff continued to participate in the Water Resources Protection Collaborative workgroup and developed siting and site design standards for projects in proximity to streams and creeks. Stormwater and erosion protection requirements were also considered.	PBCE, ESD, PW, RDA
NRD 5	**Group 1, 2 and HMP Project Requirements** Developers of Group 1, 2, and HMP projects will be required by the City of San José to mitigate stormwater quality impacts to the maximum extent practicable, in conformance with Policies 6-29: • Site design shall include measures to minimize impervious land coverage, maximize infiltration (where appropriate and designed to protect groundwater quality) and provide detention or retention as part of landscaping where feasible (C3.b.i and C.3.j); • Source controls shall be required to limit pollution generation, discharge, and runoff as appropriate (C.3.k), including measures to discourage pesticide use (C.9.d.ii); • Stormwater treatment measures shall be designed in accordance with the numeric design criteria in Provision C.3.d; • Increases in peak runoff flow and volume shall be managed for appropriate projects by implementing the guidance in the Program's Hydromodification Plan (HMP) for the specific stream receiving the discharge, following approval of the HMP by the Water Board (C.3.f).			
NRD 5.A.1	Propose revisions to current Policy 6-29 on Post-Construction Urban Runoff Management as necessary to incorporate hydraulic sizing design criteria.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA, CAO
NRD 5.A.2	Revise current Policy 6-29 on Post-Construction Urban Runoff Management as necessary to incorporate hydraulic sizing design criteria.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA, CAO
NRD 5.A.3	Revise policy as needed for Group 2 implementation	Done FY 04-05	Done FY 04-05. Further modifications to Policy 6-29 to phase in Group 2 in August 2006 were drafted.	PBCE, ESD, PW, RDA, CAO
NRD 5.A.4	Revise policy as needed for HMP implementation.	FY 05-06	Done FY 05-06. Policy 8-14 : Post-Construction	PBCE, ESD, PW, RDA,

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
			Hydromodification Management was approved by Council on October 18, 2005.	CAO
NRD 5.B	Develop list of Annual Reporting requirements from Provision C.3 Design data tracking needs and protocols.	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA, CAO
NRD 5.B.1	Compile a list of new development and redevelopment projects by name, type of project, site acreage, site acreage or square footage, square footage of new impervious surface, treatment BMPs and numeric sizing criteria used for applicable projects. Also, list the source control and pesticide reduction measures.	Annually	Done and ongoing. See Section 3.D: *Significant Development Projects Reviewed and/or Approved During July 1, 2005 – June 30, 2006*.	PBCE, ESD, PW, RDA
NRD 5.C	Revise and update permitted alternatives to numeric sizing through Alternative Measures Program in Policy 6-29.	Done FY 04-05	Done FY 04-05	PBCE, ESD, PW, RDA
NRD 5.C.1	Report to City Council on Alternative Measures Program revisions in Policy 6-29. (Provision C.3.g.)	Done FY 04-05	Done FY 04-05	PBCE, ESD, PW, RDA
NRD 5.C.2	Track name and location of projects in the Alternative Measures Program, project type and size, percent impervious surface, reason for granting waiver, terms of waiver, equivalent benefit provided, alternative treatment project or regional project receiving the benefit and date of completion of the alternative treatment project or regional project (Provision C.3.g).	Annually	None submitted in FY 05-06.	PBCE, ESD, PW, RDA
NRD 5.C.3	Report to City Council on projects approved with numeric sizing alternatives through Alternative Measures Program. (Provision C.3.g.)	Annually	N/A in FY 05-06.	PBCE, ESD, PW, RDA
NRD 5.D	Draft post-construction treatment BMP certification procedures. (Provision C.3.h)	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA
NRD 5.D.1	Track name and location of projects subject to certification (Provision C.3.h)	Annually	Done FY 05-06 and ongoing. See Section 3.D: *Significant Development Projects Reviewed and/or Approved During July 1, 2005 – June 30, 2006*.	PBCE, ESD, PW, RDA
NRD 5.E	Participate on SCVURPPP's Hydromodification Management Plan work group and develop procedures for limiting peak stormwater runoff discharge rates from development projects. (Provision C.3.f.)	Done FY04-05	Done FY 04-05 and ongoing as needed. City staff participated regularly on the Program's Hydromodification Implementation Plan work group. In May, the workgroup participated in beta testing for the Bay Area Hydrology Model (BAHM). The software incorporates user friendly hydrology and hydraulic methods to size and install HMP based measures. Additionally, the City added on 0.5 FTE in PW to focus on HMP implementation, including technical design.	PBCE, ESD, PW, RDA

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
NRD 5.F.1	Review and modify development approval procedures and standard operating procedures as necessary to incorporated requirements for:	N/A	N/A	PBCE, ESD, PW, RDA
NRD 5.F.1	a. Group 1	Done FY 03-04	Done FY 03-04	
NRD 5.F.1	b. Group 2	Done FY 04-05	Done FY 04-05	
NRD 5.F.1	c. HMP	FY 05-06	Done FY 05-06. Staff revised standard operating procedures (SOPs) for Planning, PW Clearance and Building permits, which included guidance on implementing HMP.	
NRD 5.F.2	Update and refine criteria & checklist to aid Department of Planning, Building & Code Enforcement & Department of Public Works planners & engineers in determining whether a development project should be required to incorporate post-construction treatment control measures & their related operation and maintenance requirements.	N/A	N/A	PBCE, ESD, PW, RDA
NRD 5.F.2	a. Group 1	Done FY 03-04	Done FY 03-04	
NRD 5.F.2	b. Group 2	Done FY 04-05	Done FY 04-05	
NRD 5.F.2	c. HMP	Done FY 05-06	SCVURPPP drafted a new chapter in their C.3 Handbook, which included a flow-chart/checklist to guide applicants in selecting and sizing of HMP based measures.	
NRD 5.F.3	Update and refine standard conditions of approval as necessary to ensure proper selection, design of and installation of structural stormwater treatment measures per Provision C.3.b., c., d., as necessary.	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA
NRD 5.F.3	a. Group 1	Done FY 03-04	Done FY 03-04.	
NRD 5.F.3	b. Group 2	Done FY 04-05	Done FY 04-05.	
NRD 5.F.3	c. HMP	Done FY 05-06	Standard Conditions of Approval have been updated to include language pertinent to HMP City Policy 8-14. Projects need to comply with HMP measures depending on their size & the nature of watershed they are located in.	
NRD 5.G	Develop & propose enhanced reporting format for documenting use of pesticide reduction measures at development sites. (Provision C.3.n. & C.9.ii.)	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA
NRD 5.G.1	Based on City's Pesticide Management Plan, establish criteria for tracking percentage of new development projects for which pesticide reduction measures were required & begin tracking. (Provision C.3.n. & C.9.d.ii)	Done FY 03-04 Implementation Ongoing	Done FY 03-04 and ongoing. See 3.D: *NRD Summary Tables / Additional Information.*	PBCE, ESD, PW, RDA
NRD 5.h	Implement any new adopted development conditions of approval, and procedures to developments with significant stormwater pollution potential. (Provision	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
	C.3.b.)			
NRD 6	**Developer Conformance with State Requirements** Developers of projects that disturb a land area of one acre or more are required by the City to demonstrate conformance with the State General Construction Activity Stormwater Permit including filing of NOI, development of a SWPPP, et al.			
NRD 6.A	Include as condition of approval for projects that disturb a land area of one acre or more, a requirement to demonstrate coverage under the State General Construction Activity Stormwater Permit.	Done FY 02-03	Done FY 02-03.	PBCE, PW, RDA
NRD 6.B	Track the projects that contained above condition of approval.	Done FY 02-03 See CON Program Element.	Done FY 02-03 and ongoing.	PBCE, PW, RDA
NRD 7	**Developer Erosion Control Plans** Developers of projects with potential for significant erosion and planned construction activity during the wet season are required by the City of San José to prepare and implement an effective erosion and/or sediment control plan or similar document prior to the start of the wet season.			
NRD 7.A	Include as a condition of approval for applicable projects a requirement to prepare and implement an erosion and sediment control plan.	Done FY 02-03	Done FY 02-03 and ongoing.	PBCE, PW, RDA
NRD 7.B	Track the projects that contained above condition of approval.	Done FY 02-03 See CON Program Element.	Done FY 02-03 and ongoing.	PBCE, PW, RDA
NRD 8	**Operation and Maintenance for Structural Stormwater Controls** Developers of projects that include installation of permanent structural stormwater controls are required by the City of San José to establish and provide a method for operation and maintenance of such structural controls.			
NRD 8.A	Work with SCVURPPP to develop guidance for implementing O&M Program.	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA
NRD 8.B.1	Draft summary of details of operation and maintenance verification program: organizational structure, evaluation, proposed improvements, inspections and follow-up, including criteria for setting priorities. (Provision C.3.e.)	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 8.B.1.b	Conduct pilot inspection program to inspect treatment BMPs that were constructed prior to numeric sizing requirements. The intention of the pilot program is to assess workload impacts, data tracking and collection methods, and funding for O&M programs and to use this information to revise the O&M program	Done FY 05-06	Done FY 05-06. In February 2006, staff inspected constructed projects that included treatment BMPs. These projects were approved prior to numeric sizing requirements; however, staff used this information to develop a revised O&M verification program.	PBCE, ESD, PW, RDA

3.B NRD Program Evaluation

Post-Construction Hydromodification Management Policy 8-14

Policy 8-14 entitled Post-Construction Hydromodification Management was approved by the City Council on October 18, 2005 in response to the Water Board adoption of an amendment to the permit adopted on July 20, 2005. Policy 8-14 is the City's primary implementation tool of hydromodification requirements. The policy requires the management of development-related increases in peak runoff flow, runoff volume and duration ("hydromodification"), where such hydromodification is likely to cause increased erosion, silt pollutant generation, or other impacts to beneficial uses of local rivers, streams and creeks. Policy 8-14 supplements stormwater treatment requirements in Policy 6-29 entitled "Post-Construction Urban Runoff Management," but Policy 8-14 is applied only to a limited part of the City.

The key provisions in the Policy are: 1) General Guidelines, 2) Performance Criteria, and 3) Cost Considerations.

General Guidelines

The Policy establishes the following general guidelines:

- No development related-increases in the erosion potential of the receiving stream over the pre-project (existing) condition, where such increase is likely to impact beneficial uses;
- All projects that create or replace one acre or more of impervious surface area are encouraged to install Post-Construction HCMs (hydromodification control measures);
- Projects which are also required to install post-construction treatment control measures (TCMs) under Policy 6-29 are encouraged to install TCMs with flow control benefits;
- The limitations on the use of infiltration measures and groundwater protection measures contained in Policy 6-29 shall apply to infiltration based HCMs;
- Post-construction HCMs may include a combination of on-site, off-site (same drainage area) and in-stream measures; and
- All post-construction HCMs must be maintained to operate effectively.

Performance Criteria

The Policy establishes three tiers of performance criteria for: 1) large projects on sites greater than 20 acres, 2) smaller projects on sites less than 20 acres, and; 3) impracticability due to cost considerations.

Full Flow Duration Control – For projects located in relatively undeveloped subwatersheds, such as the eastern fringe of the City and Coyote Valley, the Policy requires all projects located on sites equal to or greater than 20 acres to match pre-project erosion potential by controlling both the volume and duration of stormwater runoff—a concept called "flow duration control." Essentially, flow duration control requires the post-project runoff pattern to match the pre-project runoff pattern. Generally, a detention basin or underground vault of some type would be required to meet this criteria and extensive modeling would be required to demonstrate compliance. These same criteria would apply to the largest sites (50 acres and above) in subwatersheds that have a significant level of existing development (90% or greater built out) and 65% or less existing impervious surface area.

Small Projects - The SCVURPPP HMP Final Report and the Permit recognize that it is not practicable for all projects to match pre-project runoff rates. The Policy therefore establishes two other tiers of performance criteria, which apply to "Small Projects" (project site size of less than 20 acres) and projects where matching pre-project runoff rates is found to be "impracticable" because the overall cost of stormwater control measures exceeds 2% of project construction costs.

The Policy requires Small Projects to provide flow control through the use of appropriate site design, source control, and treatment control measures with flow control benefits to the maximum extent practicable, and where available to use off-site and/or in-stream controls for flow control. This criteria would allow Small Projects to use small scale, distributed stormwater management techniques such as bioretention facilities, infiltration trenches, filter strips, vegetated swales and multi-functional landscape areas to achieve treatment and flow reduction and would permit these projects to demonstrate compliance based on a discrete storm event rather than through modeling of the runoff pattern.

Cost Considerations

The Policy establishes both a standard for defining when excessive costs may make compliance impractical, and performance criteria for projects that demonstrate impracticability based on cost. If the combined construction cost of both required HCM and TCM measures exceeds 2% of the project construction cost (excluding land costs), based on cost documentation submitted by the project applicant, the City may determine that compliance with the first two tiers of performance criteria is impracticable. A finding of impracticability does not exempt the project from implementing flow control, however. Where a finding of impracticability based on costs is made, the project must include such HCM control measures on-site and contribute to such in-stream or off-site HCM measures as may be available, to the extent such measures can be provided, along with all required TCMs for 2% or less of project costs.

Exemptions

The Policy incorporates an HMP Map that illustrates how the Performance Criteria apply in different areas of the City. Under the Policy, a project would be exempt from HMP requirements if it meets any of the following conditions:

1) The project does not increase the impervious area of a site. An example would be commercial centers that were constructed prior to current landscape standards that are generally characterized by large surface parking lots, single-story buildings, and limited landscape areas. If these sites redevelop, the projects would be subject to current landscape standards, and consequently the redevelopment is likely to result in less impervious surface than the existing condition.

2) The project discharges to a stream segment that is either tidally influenced or hardened to the Bay. Such projects discharge to areas that are not susceptible to erosive impacts from increases in flows from development. These areas are depicted on the HMP Map attached to the Policy.

3) Projects draining to an underground storm drain that discharges directly to San Francisco Bay.

4) Projects that demonstrate, upon completion of stream-specific and modeling studies that are consistent with the method used in the HMP Report and its supporting technical documents, that there will be no increase in potential for erosion or other adverse impact to beneficial uses to any State Waters.

Revised O&M Verification Program

During FY 05-06 City staff conducted a pilot inspection program of stormwater treatment measures that were designed and constructed prior to the current numeric sizing

requirements. Staff from the Watershed Protection Division inspected and evaluated several sites in San Jose. TCMs inspected included pervious concrete, disconnected downspouts, rocky swales, vegetated swales, and retention basins. The SCVURPPP Standard Stormwater Treatment BMP Inspection Data Collection Form was completed for all project sites. The site inspections showed that these forms can be used effectively in the future to assist inspectors in performing the BMP O&M inspections. This inspection pilot program resulted in updating the City's O&M Verification Program in FY 05-06.

The updated O&M verification program incorporated elements from the Standard Operating Procedures for the City's IND Program. The O&M Program for Post-Construction BMPs requires inspection of all projects constructed the previous fiscal year. This will result in all treatment control measures being inspected their first year of operation. Subsequent inspections are based on the number of Areas of Concern (AOCs) such as improper installation and degree of damage that occurred due to lack of maintenance. This approach is very similar to the City's IND inspection program which works well in prioritizing inspections based on Areas of Concern. In FY 06-07 the EEDMS inspection database will be revised to reflect this program.

Training

The City has spent considerable time this fiscal year educating staff and increasing developers' awareness of C.3 Numeric Sizing Treatment Criteria and Hydromodification measures. City staff also visited several municipalities, both within and outside California, to further investigate new methods for stormwater treatment and flow control.

Green Roof Symposium

To increase awareness of green roofs, the City sponsored a Green Roof Symposium on Tuesday, June 13, 2006. The symposium was held at San José State University. City Councilmember Linda LeZotte opened the symposium. Samples of green roof designs from within and outside California were presented, as well as installation and maintenance of such products. The symposium helped attendees review barriers and opportunities facing green roof implementation, and the group came up with an action plan that proposed activities to facilitate green roof implementation.

Constructing, Maintaining and Inspecting Stormwater Treatment BMPs

SCVURPPP organized this one-day event and City staff participated as attendees and as presenters. Thirty employees from different departments such as ESD, PBCE, PW, DOT, GS and PRNS within the City participated. The City inspectors who attended felt the training would greatly assist in their future inspections.

BAHM Software Demonstration

A demonstration of the Bay Area Hydrology Model Software (Alameda version) occurred on Friday, May 19, 2006 at the San José/Santa Clara Water Pollution Control Plant. Several City staff from ESD, PW, and PBCE attended, along with members from the Santa Clara Valley Water District and other private firms who specialize in the design of hydraulic control structures. The class demonstrated how the software is a user-friendly model to assist designers of HMP facilities.

HMP StormCon

City staff from the departments of ESD, PW, BPCE and DOT attended a workshop entitled "A User-Friendly Hydrograph Modification Management Class" held by StormCON on May 12, 2006 in San Ramon. The interactive workshop illustrated how municipalities in Contra Costa County are requiring land developers to incorporate hydrograph modification management, as well as stormwater treatment, in compliance with the municipalities' updated stormwater National Pollutant Discharge Elimination System (NPDES) permit. Detailed case studies illustrated the Low Impact Development (LID) approaches, standard designs, and other tools the Contra Costa County Clean Water Program has created to help developers and municipal staff comply with the new requirements.

HMP 101

Based on City staff request to learn more about HMP measures, SCVURPPP conducted an entry level training course to introduce the subject to City staff from the departments of ESD, BPCE, and PW. The training was called HMP 101 and occurred on March 27, 2006 at the San José City Hall. The training was well received by staff and a more advanced HMP 201 is being considered for FY 06-07.

WMI-LUS Workshops

In addition to educating City staff and other municipalities in the Bay Area on NPDES permit requirements, the City of San José, in coordination with the Watershed Management Initiative's Land Use Subgroup (LUS) and SCVURPPP, organized two training workshops. The first workshop was entitled "How Creeks Affect Development" and was held on December 7, 2005. The second workshop was entitled "Making the Connection between Development and Water Resources" and was held on May 3, 2006. Protecting creeks and the Bay is a concept that many professional planners, engineers, and developers know about, but many need more background information

and guidance on implementation. Both workshops featured renowned speakers with expertise on the nature of the Santa Clara Basin watersheds as well as site-specific guidance on how developments can protect the watersheds. Both workshops also culminated in creek walks along nearby creeks. One creek walk was centered around a natural section of Coyote Creek and the second focused on an urbanized section of the Guadalupe River. Opportunities and challenges associated with development in these locations were discussed. The creek walks enabled attendees to make the connection between development and the watershed and were aimed at helping attendees to be better stewards of the various watersheds in the City.

One of the presentations, given by Robin Grossinger entitled "Using the Past to Understand the Contemporary Landscape: Emerging Lessons for Environmental Planning." emphasized the changes that happened in the past 100 years in the Santa Clara Basin and highlighted the importance of protecting our watersheds from urban growth. Mr. Ken Kortland of Sherwood Engineers spoke about Stormwater BMPs and treatment control measures using a watershed approach and included examples around the Bay Area, Northern California, and a couple of national and international examples that many attendees found inspirational.

Both workshops were well attended. Between the two workshops attendance exceeded 150. City staff from the departments of PW, PBCE, PRNS, DOT, ESD, and GS attended as well as many professionals from other municipalities, including Water Board staff.

Stormwater Vendor Products
Throughout FY 05-06, City staff from ESD, PBCE, PW, PRNS and DOT were also exposed to various types of stormwater products, which retain, detain, and treat stormwater. Presentations generally lasted about one hour and allowed time for staff to pose questions to the vendors. On two occasions, City staff went into the field with vendors to look at products that were recently installed. Additionally, City staff were exposed to vendor products at StormCon and SCVURPPP trainings.

City Staffing & Cost Implications to Implement Stormwater Treatment and Hydromodification Control Measures

Significant cost increases associated with implementation of the NPDES Permit C.3 provisions, including the HMP, were incurred in FY 05-06, impacting several City departments. Increased staffing costs were incurred for reviewing and commenting on Stormwater Control Plans, EIRs, Initial Studies, and drafting Policy 8-14. In addition, significant staff time was needed for both developing and attending training events. A large number of City staff from various departments is involved in many aspects of stormwater control and ongoing and increased training is anticipated to be necessary to keep staff apprised of the requirements for new and redevelopment. Additionally, staff turnover is high in some departments, which results in the need for ongoing training for new staff.

Where control measures are to be publicly owned and operated, funding sources to cover maintenance costs are still yet to be identified. Funding mechanisms discussed to-date have proven to be quite complex and problematic. City staff continue to investigate funding options. The issue of City maintenance costs continues to be of high importance. Maintenance costs are expected to increase substantially over time as more control measures are installed within the City. ESD has allocated funds in FY 06-07 to hire a consultant to evaluate funding options to address increased maintenance costs due to stormwater treatment and HMP measures. Meanwhile, staff continue to document the time required to implement the C.3 Provision requirements.

The City has also allocated funds in FY 06-07 for contractual support for the development of a Stormwater Treatment and Hydromodification Control Measures Guidance Manual for use by City staff, consultants, and developers.

3.C NRD Response to Water Board Comments

ITEM REFERENCE	WATER BOARD COMMENTS	SAN JOSÉ RESPONSE	CHANGES FOR FY 06-07 (IF APPLICABLE)
	From Water Board comments on FY 04-05 Annual Report: San Jose's Significant Development Projects Table (pages 39-55): We appreciate San Jose including such comprehensive information for each project in this table. The table shows that of the 47 Group 1 projects approved by San Jose, 43 were exempted from installing hydraulically sized stormwater treatment BMPs (Provision C.3.d) because they were deemed complete prior to February 15, 2005, in accordance with San Jose's Policy (adopted 10/03). The remaining four projects were all funded prior to October 15, 2003 and	The City thanks the Water Board for their comments. The City is also pleased with the number of projects installing hydraulically-sized treatment BMPs.	None.

	therefore exempt as well; however, three of them installed treatment BMPs that met the hydraulic sizing criteria in Provision C.3.d. In spite of so many projects being exempted, we are heartened to see that many of the projects did include treatment BMPs (e.g., swales, hydrodynamic devices, detention basins) and not just landscaping. This is evidence that outreach and education efforts are working. With the adoption of San Jose's revised Policy in 2005, we are hopeful that most of the projects reported in next year's Annual Report will have treatment BMPs that meet the requirements of Provision C.3.d.		

3.D NRD Summary Tables / Additional Information

Significant Development Projects[1] Reviewed and/or Approved During July 1, 2005 – June 30, 2006

Project File Number	Project Description	Project Location	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Approval Date)
Private Development Projects						
PD06-024	**Starbuck's Drive Thru & Retail** Planned Development Permit to build 4,681 square feet for retail uses on a 0.63 gross acre site.	West side of South Winchester Boulevard, approximately 550 feet southerly of Stevens Creek Boulevard.	Retail commercial	0.63	0.44	6/21/2006
Site Design: Project involves significant exterior and interior remodel as well as expansion of an unoccupied Burger King restaurant. Parking lot to be completely reconfigured with stormwater from parking, circulation, drive-thru and roof draining to Stormwater Planters for treatment. Parking lot is 14,607 sq.ft. and therefore is a Land Use of Concern.	**Source Control:** Covered trash enclosure, street sweeping, disconnected downspouts, curb cuts to Stormwater Planters and swale in drive-thru lane.	**Treatment BMPs:** Vegetated swale, beneficial landscaping, and stormwater planters.	**Numeric Criteria:** Flow and volume based, deemed complete 4/14/2006. **HMP:** N/A	**O&M Responsibility:** Property owner shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas**: Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD06-006	**Almaden Skylark Townhomes** Planned Development Permit to demolish existing structures and construct 32 single-family attached residential units on a 1.10 gross acre site.	West side of Skylark Drive, at the western terminus of Hummingbird Drive.	Single-family attached residential	1.10	0.79	5/3/2006

[1] Projects that 1) create or replace one acre or more of impervious surface area or 2) effective 5/17/05, create or replace 10,000 square feet or more of impervious surface area and are a Land Use of Concern.

PROJECT FILE NUMBER	PROJECT DESCRIPTION	PROJECT LOCATION	PROJECT TYPE	SITE SIZE (AC)	NEW IMPERVIOUS SURFACE (AC)	PROJECT STATUS (APPROVAL DATE)
SITE DESIGN: Proposed development of 3 story townhomes with the majority built on a landscaped podium parking structure. Project reduces impermeable surface by 28% and provides water retention and treatment on site. Parking is over 10,000 sq.ft. and is a Land Use of Concern.	**SOURCE CONTROL:** Stenciled inlets, bicycle and motorcycle parking areas, and covered trash enclosures.	**TREATMENT BMPS:** Vegetated swales, interlocking unit pavers, tree planting, beneficial landscaping, and mechanical unit.	**NUMERIC CRITERIA:** Flow based, deemed complete 1/17/2006. **HMP:** N/A	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**PESTICIDE REDUCTION MEAS:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD06-001	**Monterey Road Trumark Condominiums** Planned Development Permit to construct 72 single-family attached residences on a 2.93 gross acre site.	East side of Monterey Highway, approximately 600 feet southerly of Umbarger Road.	Single-family attached residential	2.93	1.42	4/12/2006
SITE DESIGN: Project consists of 72 single-family attached residential units in six buildings four of which are clustered around four common private spaces with community buildings accessed by pedestrian patios. Vehicular access is provided via a private street with private drives providing access to individual garages. Ten vegetated swales provide the primary on-site treatment.	**SOURCE CONTROL:** Stenciled inlets, covered trash enclosures, street sweeping, and disconnected downspouts.	**TREATMENT BMPS:** Vegetated swales and beneficial landscaping including tree planting.	**NUMERIC CRITERIA:** Flow based, deemed complete 1/3/2006. **HMP:** N/A	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**PESTICIDE REDUCTION MEAS:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD05-094	**Almaden Walk** Planned Development Permit to construct 56 single-family attached residences on a 2.33 gross-acre site.	East side of Almaden Road, approximately 150 feet north of Canoas Garden Avenue.	Single-family attached residential	2.33	1.57	6/7/2006
SITE DESIGN: Three story, single-family attached residential development with buildings clustered around shared pedestrian patios and private drives. Both cobbled and vegetated bioswales used for	**SOURCE CONTROL:** Stenciled inlets, covered trash enclosure, street sweeping, and disconnected downspouts.	**TREATMENT BMPS:** Cobbled and vegetated swales, mechanical unit, tree planting, beneficial landscaping, interlocking unit pavers, and underground detention basin.	**NUMERIC CRITERIA:** Flow based, deemed complete 12/19/2005. **HMP:** N/A	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**PESTICIDE REDUCTION MEAS:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are	

Project File Number	Project Description	Project Location	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Approval Date)
stormwater treatment along with a mechanical unit.					posted on the City website.	
PD05-087	**Hitachi Campus & Santa Teresa Village** Master Planned Development Permit to allow the demolition of existing buildings and the construction of a new public street network to allow the future construction of a residential, commercial, and industrial project on an approximately 332 gross acres.	Area generally bounded by Cottle Road, Monterey Highway, Highway 85 and Manassas Road.	Mixed-use transit village	332	220	6/2/2006
Site Design: While this permit covers only new roads, the Storm Water Management Master Plan for Hitachi estimates that ultimate build-out of the site will create 220 acres of impervious surface resulting in 66% impervious surface for the project site an increase of 12% (40 acres) over previous impervious surface. Plan includes two detention basins to meet water quality and quantity (HMP) standards.	**Source Control:** Stenciled inlets, covered trash enclosures, street sweeping, parking structures, disconnected downspouts, bicycle and motorcycle parking areas provided.	**Treatment BMPs:** Detention basins, mechanical units, vegetated swales, media filters, tree planting, beneficial landscaping, and interlocking unit pavers.	**Numeric Criteria:** Flow and volume based, deemed complete 11/18/2005. **HMP:** Required. Two detention basins.	**O&M Responsibility:** Property owners and Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas**: Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD05-084	**Citation Homes' Autumnvale Towns** Planned Development Permit to demolish existing structures and construct up to 104 single-family attached residential units on a 4.0 gross acre site.	Northeast corner of Autumnvale Drive and Trade Zone Boulevard.	Single-family attached residential	4.00	2.8	3/1/2006
Site Design: Project represents a 35% increase in impervious surface. Project consists of 12 buildings of single-family attached townhomes 3 stories tall including private parking garages on the first level. The units are split between those that face pedestrian patios and those that face existing public streets. Parking is	**Source Control:** Stenciled inlets, covered trash enclosures, street sweeping, and disconnected downspouts.	**Treatment BMPs:** Curb cuts for runoff from at-grade parking to grassy swales, mechanical unit, tree planting, beneficial landscaping, and turf blocks for emergency vehicle access (EVA).	**Numeric Criteria:** Flow and volume based, deemed complete 11/14/2005. **HMP:** N/A	**O&M Responsibility:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas**: Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	

PROJECT FILE NUMBER	PROJECT DESCRIPTION	PROJECT LOCATION	PROJECT TYPE	SITE SIZE (AC)	NEW IMPERVIOUS SURFACE (AC)	PROJECT STATUS (APPROVAL DATE)
accessed by a private loop road. A total of 200 trees for the project are designed to act as on site treatment along with grassy swales.						
H05-054	**Alum Rock Plaza** Site Development Permit to demolish an existing structure and construct a 6,007 square-foot commercial building on a 0.48 gross acre site.	North side of Alum Rock Avenue, approximately 260 feet westerly of King Road.	Retail commercial	0.48	0.4	3/23/2006
SITE DESIGN: This small, one story retail commercial plaza includes an 11,441 sq.ft. parking lot (55% of the total site); which makes it a Land Use of Concern.	**SOURCE CONTROL:** Covered trash enclosure plumbed to sanitary, stenciled inlets, street sweeping, and disconnected downspouts.	**TREATMENT BMPS:** Underground stormwater storage system and inlet filters.	**NUMERIC CRITERIA:** Volume based, deemed complete 11/8/2005. **HMP:** N/A	**O&M RESPONSIBILITY:** Property owner shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**PESTICIDE REDUCTION MEAS**: Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD05-082	**Samaritan Drive Summerhill Homes** Planned Development Permit to construct 202 single-family residences, consisting of 86 detached and 116 attached units, on a 13.4 gross-acre site and a minimum one-acre park.	Northeast corner of Samaritan Drive and Clydelle Avenue.	Single family attached and detached residential	13.4	6.68	6/23/2006
SITE DESIGN: Existing site is an industrial building surrounded by parking. New development of single-family detached and attached units clustered around shared pedestrian patios and common private drives with a public park centrally located on the site represents a 40% reduction in impervious surface on the site.	**SOURCE CONTROL:** Stenciled inlets, covered trash enclosures, street sweeping, and disconnected downspouts.	**TREATMENT BMPS:** Vegetated swales, tree planting, beneficial landscaping, interlocking unit pavers, and roof drains to landscaped areas.	**NUMERIC CRITERIA:** Flow based, deemed complete 11/2/2005. **HMP:** N/A	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**PESTICIDE REDUCTION MEAS**: Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD05-068	**North 9th Street at Taylor Residential Development** Planned Development Permit to demolish existing structures and construct 44 single-family detached residences on a 2.85 gross acre site.	East side of North Ninth Street between Taylor Street and Jackson Street.	Single-family detached residential	2.85	1.71	12/13/2005

Project File Number	Project Description	Project Location	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Approval Date)
Site Design: Existing site is 93% impervious. Project will reduce impervious surface by 33%. Single-family detached housing clustered around shared pedestrian patios and drives.	**Source Control:** Stenciled inlets.	**Treatment BMPs:** Swales and mechanical unit, beneficial landscaping, and tree planting.	**Numeric Criteria:** Flow based, deemed complete 9/22/2005. **HMP:** N/A	**O&M Responsibility:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD05-065	**Quinn Retail Center** Planned Development Permit to construct a 33,555 square foot neighborhood commercial center on a 2.51 gross acre site.	East side of Senter Road, approximately 200 feet northwesterly of Quinn Avenue.	IP	2.51	2.18	6/14/2006
Site Design: Retail shopping center represents a 13% reduction in impervious surface.	**Source Control:** Stenciled inlets, covered trash enclosures, and disconnected downspouts.	**Treatment BMPs:** Vegetated swales and beneficial landscaping.	**Numeric Criteria:** Flow based, deemed complete 9/9/2005. **HMP:** N/A	**O&M Responsibility:** Property owner shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD05-062	**Curci Court Homes** Planned Development Permit to construct 46 single-family attached residences on a 2.2 gross acre site.	Southeast corner of Curci Drive and St Elizabeth Drive.	Single-family attached residential	2.2	1.47	4/7/2006
Site Design: Project of 46 attached, 3 story single-family homes clustered around shared pedestrian patios and drives. Bioretention filter gardens are located in pedestrian patios.	**Source Control:** Stenciled inlets and disconnected downspouts.	**Treatment BMPs:** Tree planting, interlocking unit pavers, bioretention filter, beneficial landscaping, and mechanical units.	**Numeric Criteria:** Flow based, deemed complete 9/1/2005. **HMP:** N/A	**O&M Responsibility:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
H05-042	**Kim's Plaza** Site Development Permit for an approximately 13,821 sq.ft., 2-story retail/office building on a 0.88 gross acre site.	Northwest corner of Story Road and McLaughlin Avenue.	Retail commercial and office plaza	0.88	0.7	3/15/2006
Site Design: Site was previously a gas station. Project is 80%	**Source Control:** Disconnected downspouts, street sweeping, and	**Treatment BMPs:** Two infiltration ponds and inlet filters with oil separators.	**Numeric Criteria:** Volume and flow based, deemed	**O&M Responsibility:** Property owner shall maintain treatment measures in	**Pesticide Reduction Meas:** Pesticide reduction is done through education and	

Project File Number	Project Description	Project Location	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Approval Date)
impervious and includes two infiltration ponds for treatment of roof and parking lot runoff. Parking lot is approximately 20,119 sq.ft. and therefore is a Land Use of Concern. The two story retail and office plaza includes a 4,400 sq.ft. second floor patio with 6 planters.	stenciled inlets.	complete 8/30/2005. **HMP:** N/A.	conformance with Section 20.95.120 of the Zoning Ordinance.		outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
H05-037	**The Heritage Mixed Use Tower** Site Development Permit to construct a residential and commercial building for a total of approximately 505,000 square feet, which includes approximately 203 attached residential units and 11,180 square feet of commercial uses in a 23-story high-rise stru	Northeast corner of Market & San Salvador Streets.	High-rise Residential Mixed-use in Downtown Core Area	1.02	1.02	1/6/2006
Site Design: A 23-story mixed use project consisting of residential, retail, and enclosed parking (6-stories, 1 below grade). An outdoor plaza for the residents is located on the 5th floor.	**Source Control:** Stenciled inlets, cover trash enclosures, covers and drains for loading docks and maintenance bays, swimming pool drains to sewer.	**Treatment BMPs:** Tree planting, mechanical unit, and inlet filters.	**Numeric Criteria:** Flow based, deemed complete 8/18/2005. **HMP:** N/A	**O&M Responsibility:** Property owner shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD05-058	**The Plant** Planned Development Permit to construct approximately 615,571 sq.ft. commercial buildings for retail/office uses on a 55.4 gross acre site.	Northwest corner of Curtner Avenue and Monterey Highway (formerly GE).	Retail commercial shopping center	55.4	14.13	6/7/2006
Site Design: Previously GE site was approximately 90-100% impervious. The Plant is a commercial retail and office center that includes a park area and PG & E substation. Landscaped area is 472,927 sq.ft., parking and other hardscaped areas are 1,290,549 sq.ft., and office	**Source Control:** Stenciled inlets, covered trash enclosures, and street sweeping.	**Treatment BMPs:** Tree planting, beneficial landscaping, mechanical units, and inlet filters.	**Numeric Criteria:** Flow based, deemed complete 8/4/2005. **HMP:** N/A	**O&M Responsibility:** Property owner shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	

Project File Number	Project Description	Project Location	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Approval Date)
and retail buildings are 638,340 sq.ft.						
CP05-046	**Hostetter Costco** Conditional Use Permit to allow the construction of an approximately 146,843 square foot wholesale facility, including the off-sale of alcoholic beverages and a gasoline station on a 12.49 gross acre site.	Northwest corner of Hostetter Road and Automation Parkway.	Retail Commercial Wholesale and gas station	13.55	11.17	6/1/2006
Site Design: The proposed commercial structure and gas station represents a 20% increase in impervious surface over the existing use. Landscaping at a ratio similar to the demolished industrial structure has been located throughout the site to collect stormwater runoff and some of the existing landscape has been retained.	**Source Control:** Stenciled inlets, covered trash enclosures, surface sweeping, canopy over gas station area, tire center storage and installation area fully enclosed within main structure.	**Treatment BMPs:** Landscape strips as vegetated swales and mechanical unit.	**Numeric Criteria:** Flow based, deemed complete 7/29/2005. **HMP:** N/A	**O&M Responsibility:** Property owner shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas**: Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD05-056	**Lewis Road Residential** Planned Development Permit to construct 75 single-family attached and 5 single-family detached residences on a 5.65 gross acres site.	Northwesterly side of Lewis Road approximately 210 feet southwesterly of Garden Avenue.	Single-family attached residential	5.65	2.31	5/3/2006
Site Design: Medium high density residential development of 5 single family detached units and 75 single family attached units in groups of 5 to 13 units clustered around shared private access drives and landscaped patios. Project includes vegetated swales, permeable paving surfaces, and infiltration swales. Parking areas (8,330 sq.ft.) and driveways (3,690 sq.ft.) are interlocking unit pavers.	**Source Control:** Stenciled inlets, covered trash enclosures, street sweeping, and disconnected downspouts.	**Treatment BMPs:** Vegetated swales, infiltration swales, tree planting, beneficial landscaping, and interlocking unit pavers.	**Numeric Criteria:** Flow based, deemed complete 7/27/2005. **HMP:** N/A	**O&M Responsibility:** Property owner shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas**: Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	

Project File Number	Project Description	Project Location	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Approval Date)
H05-034	**Campisi Retail Center** Site Development Permit to construct a 9,789 square foot building for commercial uses on a 0.61 gross acre site.	Northwest corner of The Alameda and North Morrison Avenue.	Retail commercial	0.61	0.56	11/30/2005
Site Design: Previously a vacant site, this project includes 13,217 sq.ft. of parking, a Land Use of Concern. Small commercial stores are located close to sidewalk consistent with the character of this neighborhood business district. Parking is located in the rear. Site is 93% impervious.	**Source Control:** Stenciled inlets, street sweeping, and disconnected downspouts.	**Treatment BMPs:** Mechanical unit.	**Numeric Criteria:** Flow based, deemed complete 7/12/2005. **HMP:** N/A	**O&M Responsibility:** Property owner and Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD05-045	**Oakwood Apartments Expansion** Planned Development Permit to construct 84 single-family attached residences on a 1.6 gross acres site.	Southeast corner of Blackford Avenue and Saratoga Avenue.	Multi-family attached residential	1.6	1.27	9/28/2005
Site Design: Expansion of existing apartment complex adding 3 three-story apartment buildings (23,280 sq.ft.) and new parking lot (29,758 sq.ft.) representing a 62% increase in impervious surface on the site.	**Source Control:** Covered trash enclosures, stenciled inlets, and disconnected downspouts.	**Treatment BMPs:** Turf block and grass crete pavers, seven vegetated swales, and inlet filters.	**Numeric Criteria:** Flow based, deemed complete 6/22/2005. **HMP:** N/A	**O&M Responsibility:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD05-044	**Pestana Homes** Planned Development Permit request to allow 98 single-family attached residences on a 4.8 gross acre site.	Northwest corner of Old Oakland Road and Rock Avenue.	Single-family attached residential	4.8	2.82	12/22/2005
Site Design: Project consist of 98 single-family attached residential units in 3-story 6-, 7-, 8-, and 9-plex buildings around a large common open space area used for recreation and stormwater control management through swales	**Source Control:** Stenciled inlets, covered trash enclosures, street sweeping, bicycle and motorcycle parking areas provided, and disconnected downspouts.	**Treatment BMPs:** Vegetated swales, interlocking unit pavers, turf track grass road pavers, bioretention filters, and infiltration basin.	**Numeric Criteria:** Flow and volume based, deemed complete 6/16/2005. **HMP:** N/A	**O&M Responsibility:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	

Project File Number	Project Description	Project Location	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Approval Date)
at the perimeter and an infiltration basin at the center of larger grass area. Tufftrack grassroad pavers are used for EVA and interlocking unit pavers are used for parking and pedestrian areas.						
CP05-034	**Story Road Home Depot** Conditional Use Permit to replace an existing building with new construction of a building of 114,700 square feet and garden center of 34,768 square feet for retail commercial uses on a 12.85 gross acre site.	Northeast corner of Story Road and McGinness Avenue.	Retail commercial	12.85	12.21	3/24/2006
Site Design: Site is an existing big box retail store in a shopping center adjacent to a channelized creek. The existing structure will be demolished and replaced with a Home Depot with a garden center and reconfigured parking lot with new landscaping placed on the perimeter of the site especially near the creek.	**Source Control:** Stenciled inlets, covered trash enclosures, and street sweeping.	**Treatment BMPs:** Vegetated swale, mechanical unit, tree planting, and beneficial landscaping.	**Numeric Criteria:** Flow based, deemed complete 6/9/2005. **HMP:** N/A	**O&M Responsibility:** Property owner shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas**: Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD05-041	**Willow Glen patio** Planned Development Permit to construct 206 single-family attached residences on a 8.75 gross acre site.	Westerly side of Meridian Avenue, northerly of Foxworthy Avenue.	Single-family attached residential	8.75	4.84	9/19/2005
Site Design: Existing commercial shopping center is nearly 100% impervious. Project of 206 single-family attached housing units clustered around shared pedestrian and vehicular access roads and paths. 55,452 sq.ft. of impervious pavement and concrete drains to bioswales	**Source Control:** Stenciled inlets, street sweeping, parking structure drains to sanitary, bicycle and motorcycle parking areas provided.	**Treatment BMPs:** Bioswales, tree planting, beneficial landscaping, mechanical unit, and grass crete pavers for EVA area.	**Numeric Criteria:** Flow based, deemed complete 6/7/2005. **HMP:** N/A	**O&M Responsibility:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas**: Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	

Project File Number	Project Description	Project Location	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Approval Date)
for filtration.						
PD05-035	**Virginia Terrace Residential Townhomes** Planned Development Permit to construct 147 single-family attached residences on a 3.69-gross acre site.	Generally bounded by East Virginia Street to the north, south 6th Street to the east, Martha Street to the south, and South 5th Street to the west.	Single-family attached residential	3.69	3.43	8/15/2005
Site Design: Project represents a 15% increase in impervious surface over previous use. Project consists of 147 single-family attached 2.5 to 3-story townhomes over landscaped podium parking.	**Source Control:** Parking structure with filters plumbed to sanitary, disconnected downspouts, bicycle and motorcycle parking areas provided inside podium,	**Treatment BMPs:** Beneficial landscaping including trees both on the podium and at grade and one mechanical unit.	**Numeric Criteria:** Flow and volume based, deemed complete 5/19/2005. **HMP:** N/A	**O&M Responsibility:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas**: Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD05-032	**Modern Ice** Planned Development Permit to construct 202 single-family attached residences on a 9.6 gross acre site.	Northeast corner of Berryessa Road and Oakland Road.	Single-family attached residential	9.6	5.15	7/22/2005
Site Design: Existing site near 100% impervious historic industrial site. Proposed project of 202 units clustered around shared pedestrian and vehicular private circulation paths. Site also includes 1.24 acre public park with a vegetated swale on its perimeter. Pedestrian paths and surface parking use interlocking unit pavers and pervious pavement.	**Source Control:** Stenciled inlets, covered trash enclosures, street sweeping.	**Treatment BMPs:** Vegetated swales, interlocking unit pavers, tree planting, disconnected downspoiuts, beneficial landscaping, and pervious paving.	**Numeric Criteria:** Flow based, deemed complete 5/2/2005. **HMP:** N/A	**O&M Responsibility:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas**: Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD05-024	**Gold Street Office Building** Planned Development Permit to allow a 24,237 square foot office building on a 2.25 gross acre site.	Westerly side of Gold Street approximately 150 feet southerly of the Guadalupe River.	Office building	2.25	1.33	7/6/2005
Site Design: Project consists of a new 2-story office building surrounded by parking and landscaping. 92% of	**Source Control:** Stenciled inlets and street sweeping.	**Treatment BMPs:** Detention basin, vegetated swales, interlocking pavers, and inlet filters.	**Numeric Criteria:** Flow based, deemed complete 3/21/2005. **HMP:**	**O&M Responsibility:** Property owner shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning	**Pesticide Reduction Meas**: Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the	

Project File Number	Project Description	Project Location	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Approval Date)
stormwater runoff from this project is being treated on site. Control measures include 3 bioswales and 1 mechanical unit. Interlocking pavers are used for a 2,600 sq.ft. patio area in landscape area adjacent to the public utility easement.		N/A	Ordinance.		Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD05-017	**Embedded Way** Planned Development Permit to allow indoor recreational uses in an existing industrial building on approximately 16.4 gross-acre site.	Southwest corner of Hellyer Avenue and Embedded Way.	Indoor Commercial Recreation	16.4	11.5	8/18/2005
Site Design: Reuse of existing structure. Project results in no new impervious surface. Revegetation of buffer zone between parking area and Coyote Creek County Parkway. Vegetated swale between Embedded Way and front parking area. A permit from SCVWD was required for work adjacent to Coyote Creek.	**Source Control:** Stenciled inlets, covered trash enclosures, and street sweeping.	**Treatment BMPs:** Vegetated swales and catch basin inserts.	**Numeric Criteria:** N/A, deemed complete 2/14/2005. **HMP:** N/A	**O&M Responsibility:** Property owner shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD05-015	**Cherry Acres KB Homes Residential Development** Planned Development Permit request to allow grading only for 91 single-family attached residences on a 4-gross acre site.	Northwest corner of King Road and Mabury Road.	Single-family attached residential	4.0	4.09	7/20/2005
Site Design: Existing site is 54% impervious. Project consists of 91 single-family attached residents, 2-stories over garage, clustered around a small common open space/pedestrian patio area with access to private garages provided by a private	**Source Control:** Stenciled inlets, covered trash enclosures, street sweeping, and disconnected downspouts.	**Treatment BMPs:** Bioswale.	**Numeric Criteria:** N/A, deemed complete 2/11/2005. **HMP:** N/A	**O&M Responsibility:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	

PROJECT FILE NUMBER	PROJECT DESCRIPTION	PROJECT LOCATION	PROJECT TYPE	SITE SIZE (AC)	NEW IMPERVIOUS SURFACE (AC)	PROJECT STATUS (APPROVAL DATE)
loop road.						
PD05-013	**Campbell Avenue Residential Development** Planned Development Permit to construct up to 104 single-family detached residences on a 7.63 gross acre site.	North side of Campbell Avenue approximately 1,000 feet east of Newhall Street.	Single-family detached residential	7.63	5.05	9/6/2005
SITE DESIGN: Existing site is 95% impervious. Development of 104 single family detached units with landscaped patios and pool with community room represents a 31% reduction of impervious surface. Units are 2 and 3 stories detached units clustered around pedestrian patios and private access drives.	**SOURCE CONTROL:** Stenciled inlets, covered trash enclosures, street sweeping, and disconnected downspouts.	**TREATMENT BMPS:** Vegetated swales, tree planting, and beneficial landscaping.	**NUMERIC CRITERIA:** N/A, deemed complete 2/8/2005. **HMP:** N/A	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**PESTICIDE REDUCTION MEAS**: Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
CP04-114	**Monterey/ Pullman Retail Center** Conditional Use Permit to construct 15,000 square feet for retail commercial uses and allow a drive through use on a 1.35 gross acre site.	West side of Monterey Road, 250 feet southerly of Lewis Road.	Retail Commercial Center	1.35	1.17	8/15/2005
SITE DESIGN: Existing site is 100% impervious. Redevelopment of this site from industrial to 15,000 sq.ft. of retail commercial uses including one drive-thru restaurant reduces impervious surface by 14% largely due to perimeter beneficial landscaping and tree plantings throughout the site.	**SOURCE CONTROL:** Stenciled inlets and covered trash enclosures.	**TREATMENT BMPS:** Beneficial landscaping, tree planting, and mechanical unit.	**NUMERIC CRITERIA:** N/A, deemed complete 12/17/2004. **HMP:** N/A	**O&M RESPONSIBILITY:** Property owner shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**PESTICIDE REDUCTION MEAS**: Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
H04-050	**San Jose Condominium (Almaden Tower)** Site Development Permit to allow construction of approximately 646,597 square feet in a 22-story building, which includes 330 residential units, 208,996 square foot parking garage, and approximately 8,000 square foot retail commercial use on a 1.42 gross.	Southwest corner of Carlysle Street and Notre Dame Avenue.	High-rise Residential in Downtown Core Area	1.42	1.42	9/30/2005

Project File Number	Project Description	Project Location	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Approval Date)
Site Design: This project is a 22-story residential tower with 5-stories of parking (3 below grade and 2 above grade) that covers the entire site so no infiltration is possible. Instead the project uses a mechanical unit. Previously the site was also entirely paved resulting in a 0% increase in impervious surface.	**Source Control:** Stenciled inlets, covered trash enclosures, parking structure drains, bicycle and motorcycle parking areas provided.	**Treatment BMPs:** Mechanical unit, street and roof deck tree plantings, and interlocking unit pavers.	**Numeric Criteria:** N/A, deemed complete 10/6/2004. **HMP:** N/A	**O&M Responsibility:** Property owner and Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
H04-036	**McKee Green Plaza** Site Development Permit to construct 17,000 square feet of commercial use on a 1.38 gross acre site.	West side of North White Road, approximately 300 feet south of McKee Road.	Retail commercial and office plaza	1.38	1.10	1/12/2006
Site Design: Two story retail commercial and office plaza with parking lot on the sides and rear.	**Source Control:** Covered trash enclosure, stenciled inlets, and street sweeping.	**Treatment BMPs:** Beneficial landscaping including some tree planting.	**Numeric Criteria:** N/A, deemed complete 8/4/2004. **HMP:** N/A	**O&M Responsibility:** Property owner shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD03-079	**Del Monte KB Homes** Planned Development Permit to construct 383 single family attached residences on a 12.4 gross acre site.	North and south side of Auzerais Avenue between Sunol Street and Los Gatos Creek.	Single family attached residential	12.4	10.01	2/15/2006
Site Design: Site is adjacent to Los Gatos Creek. Riparian setback established at 30 feet from top of bank. Development to be transit oriented with two light rail stations opened and operating	**Source Control:** Stenciled inlets, parking structures, and riparian buffer.	**Treatment BMPs:** Vegetated swales, tree planting, beneficial landscaping, and inlet filters.	**Numeric Criteria:** N/A, deemed complete 12/17/2003. **HMP:** N/A	**O&M Responsibility:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
PD02-057	**Valley Christian School Playground Improvements** Planned Development Permit to allow the construction of two	Easterly terminus of Skyway Drive, east side of Monterey	Playground improvements.	52.68	9.81	6/29/2005

Project File Number	Project Description	Project Location	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Approval Date)
	paved, play areas and associated improvements (including new landscaping and fencing) at an existing private school on a 52.68 gross acre site.	Road.				
Site Design: The project involves minimized new impervious surface area by adding approximately 30,000 square feet of impervious surface where outdoor courts currently exist.	**Source Control:** Street sweeping.	**Treatment BMPs:** Beneficial landscaping and inlet filters.	**Numeric Criteria:** N/A, deemed complete 8/12/2002. **HMP:** N/A	**O&M Responsibility:** Property owner shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**Pesticide Reduction Meas:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
Public Development Projects						
CIP 1980	**Fire Station #34** New Fire Station of approx.11,500 sq.ft. to be constructed on approx. 1 acre of land.	Las Plumas Ave. near Nipper Ave.	Institutional	1.03	0.86	4/26/2006
Site Design: Site currently serves as a storage yard called Las Plumas Warehouse. The project improves existing site conditions by installing pervious landscapes on 16% of the 1.03 Acers site. Project provides treatment of runoff via stormfilter device and surrounds project with swales and trench drains to treat runoff.	**Source Control:** Landscaping, stenciled inlets, and street sweeping.	**Treatment BMPs:** Vegetated swale, mechanical unit, and trench drains.	**Numeric Criteria:** N/A - Funded prior to 10/15/03, but sized to treat 0.2 in/hr flow intensity. **HMP:** N/A	**O&M Responsibility:** Treatment measures are maintained by City during routine maintenance.	**Pesticide Reduction Meas:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	
CIP 4204	**Fire Station #25** The first construction package for the Fire Station No. 25 - Relocate project. Installing earthwork to elevate the building pad of the proposed new Station No. 25 ten feet out of the flood plain & relocation of an existing sewer line.	2125 Wilson Way	Institutional	2.62	0.95	4/14/2006
Site Design: Project was elevated 10 ft above ground to avoid groundwater level and Guadalupe River Food Zone.	**Source Control:** A stormwater filter device installed in washing trucks areas, stenciled inlets, and street sweeping.	**Treatment BMPs:** Vegetated swale, disconnected downspouts, mechanical unit, curb openings, and decomposed	**Numeric Criteria:** N/A - Funded prior to 10/15/03, but sized to treat 0.2 in/hr flow intensity.	**O&M Responsibility:** Treatment measures are maintained by City during routine maintenance.	**Pesticide Reduction Meas:** Pesticide reduction is done through education and outreach. Development Activity Map

Standard Operating Procedure
BMP O&M VERIFICATION PROGRAM

Overview

The City of San Jose's New and Redevelopment (NRD) Post-Construction BMP Operation and Maintenance Verification Program is a multi-department effort. The Departments of Environmental Services (ESD), Public Works (PW), and Planning, Building & Code Enforcement (PBCE) work together to verify that maintenance of Post-Construction BMPs is conducted as required by Provision C.3 of the stormwater permit. The key components of this program include BMP Tracking, Inspection, Enforcement and Follow Up, and Reporting.

PBCE is responsible for BMP Tracking and supports escalated enforcement if needed to achieve compliance. ESD's Watershed Enforcement Section is responsible for receiving BMP Tracking information, conducting inspections on a subset of BMPs, and performing enforcement and follow up as needed. ESD's Urban Runoff Section is responsible for compiling program data and reporting results annually to the Water Board.

BMP Tracking

Information on BMPs required by Provision C.3 is collected throughout the development review process. Final information on BMPs is available to inspectors when construction is complete.

Table 1: Procedure for BMP Data Tracking and Compilation

STEP	RESPONSIBILITY	ACTION
1	PBCE – Planning Division Planners	1. Collect and document information on BMPs for all projects that requires C.3 Treatment Devices, which are usually listed on the Stormwater Control Plan Sheet (SCP) of the submitted design plan set. Information must include description of BMP, location, BMP owner, responsible party for maintenance or any available contact info, O&M requirement mechanism, and any additional conditions imposed related to BMP O&M.
2	PW – TD&S – Urban Runoff Coordinator	2. Track projects with Stormwater Control Plan that have been issued Grading Permits.
3	PBCE – Building Division – Plan Check Engineer/ Urban Runoff Coordinator	3. Compile annually (each July) and provide to ESD a data file of all BMPs and projects which have been issued Certificate of Occupancy during the previous fiscal year.

Inspection

ESD selects sites for inspection based on a list of constructed sites obtained from Urban Runoff Coordinator in the Building Division and based on AOCs of previously inspected sites. All projects constructed during the previous fiscal year are inspected; inspections and follow up procedures are consistent with the City's Industrial and Commercial Discharges (IND) Program.

Table 2 summarizes the procedure for inspection of BMPs under this program. The Watershed Enforcement Section of the Watershed Protection Division has one environmental inspector assigned to inspect new development projects.

Table 2: Procedure for BMP Inspection

STEP	RESPONSIBILITY	ACTION
1	ESD – WE – Senior Environmental Inspector	1. Assign all projects issued Certificate of Occupancy for initial inspections. 2. Assign other inspections based on AOC Frequency Schedule in Table 5.
2	ESD – WE – Environmental Inspector (EI)	1. Prior to inspections, inspectors fill out the SCVURPPP Standard Stormwater Treatment BMP Inspection Data Collection Form. ➢ Collect all background information on the site initially submitted by PBCE. ➢ Review online data for site plans/asbuilt drawings. ➢ Collect maintenance standards from on line sources or city manuals for maintenance fact sheets of the specific BMP listed on plan. ➢ Check site for previous inspection results. ➢ Check for necessary procedures such as underground confined space entry. 2. If ownership changed, update contact information.
3	ESD – WE – EI	Perform visual inspection of treatment BMP by following the SCVURPPP Standard Stormwater Treatment BMP Inspection Data Collection Form and refer to SCVURPPP Table labeled "Potential Inspection Results"; fill out one form per site for all relevant BMPs inspected. ➢ If immediate threat to storm sewer system or creek follow Watershed Enforcement Response Plan (WERP) listed in Chapter 4 Appendix C of the Watershed Enforcement Training and Procedures Manual to find appropriate citation type and amount. ➢ If BMP is functional and maintained, record inspection result. Distribute BMP Maintenance Fact Sheets from C.3 Handbook or CASQA Manual and schedule follow-up inspection if necessary. ➢ If BMP is non-functional, record result and continue to Table 3.

Enforcement and Follow Up

Table 3 summarizes the enforcement procedures for BMP Inspections. ESD's Watershed Enforcement is the first tier of enforcement with PBCE Code Enforcement involved to employ the land use permit as the basis for enforcement.

Table 3: Enforcement Procedure for BMP

STEP	RESPONSIBILITY	ACTION
1	ESD – WE – Environmental Inspector (EI)	1. Issue Official Warning Notice including description of violation, corrective actions required and compliance date. 2. Re-inspect after compliance date. a. If violation is corrected, deadfile case and follow Reporting Procedures b. If violation continues, proceed to Step 2
2	ESD – WE – EI	1. Within 48 hours, refer violation via e-mail to Code Enforcement Administrator including the following: a. Field Inspection Notes b. Official Warning Notice c. Planning Permit Condition Violation Number d. Digital picture of initial violation and re-inspection

STEP	RESPONSIBILITY	ACTION
		e. Signed Photo Evidence Affidavit f. Recommended Compliance Timeline
3	PBCE – CE – Code Enforcement Administrator (CEA)	1. Within 24 hours, review referral for completeness. Contact EI if indicated. 2. If complete, open case in Code Enforcement System (CES) within 24 hours. 3. Within 48 hours, Issue Compliance Order to Responsible Person(s) including compliance date. Send an electronic copy to EI.
4	ESD – WE – EI	1. After compliance date, re-inspect for compliance. a. If compliance is achieved, advise CEA to deadfile case in CES. Follow reporting requirements. b. If compliance is not achieved, document violation (See Step 2) and notify CEA.
5	PBCE - Code Enforcement Administrator (CEA)	1. Within 5 working days, develop Notice of Hearing and notify Responsible Person(s). 2. Schedule issue before the Appeals Hearing Board (AHB). 3. Notify EI to attend AHB to provide testimony.

Reporting

Table 4 summarizes the reporting procedures for the O&M Verification Program for BMPs. The Environmental Inspector logs the inspection information on both the SCVURPPP Standard Stormwater Treatment BMP Inspection Data Collection Form and enters inspection results in a city designated database.

Table 4: Reporting Procedure

STEP	RESPONSIBILITY	ACTION
1	ESD – WE – Environmental Inspector	1. Log inspection information using SCVURPPP Standard Stormwater Treatment BMP Inspection Data Collection Form. 2. Transfer inspection data to EEDMS Database.
2	ESD – UR	1. Collect data from EE. 2. Compile all inspection information annually and report in NRD Summary Tables of the Annual Report.

Table 5: Area of Concern (AOC) Frequency Inspection Table

City Regulated Facilities The City of San Jose will conduct inspections of New and Redevelopment Projects as identified below:	
All New and Redevelopment Projects:	2 or more AOCs over a five year period – inspect every year 1 AOC over a five year period – inspect every two years 0 AOC over a five year period – inspect every five years
Facilities for which a referral or ICID complaint is received:	As soon as practicable for violations every year until they meet the above criteria.

Sample Types of AOC's:

			CHECK
	Not working/ Failed	Example: Significant Engineering Design Flaws such as it was misplaced by construction workers, water is not draining to it.	
	Removed	Example: Home Owner Association (HOA) covered vegetation with impervious surface.	
	Inoperable/ Damaged	Examples: ➢ Wrong type of vegetation ➢ Eroded sides ➢ Plants were not maintained mowed or irrigated ➢ Trash/ Debris ➢ Obnoxious Odors ➢ Sediment accumulations ➢ Clogged or obstructed inlets ➢ Soggy soil/ standing water ➢ Mosquito habitat

List of Acronyms:

AOC:	Area of Concern
AHB:	Appeals Hearing Board
BMP:	Best Management Practice
CEA:	Code Enforcement Administrator
CES:	Code Enforcement System
EEDMS:	Environmental Enforcement Data Management System
EI:	Environmental Inspector
ESD:	Environmental Services Department
ESD-Senior:	Senior Environmental Engineer in the Department
ICID:	Illicit Connection, Illegal Dumping
IND:	Industrial and Commercial Discharges
PBCE:	Public Building Code Enforcement
PW:	Public Works
SCP:	Stormwater Control Plan Sheet
UR:	Urban Runoff
WE:	Watershed Enforcement Section

4. CON: Construction Inspection

4.A CON Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
CON 1	**Site Housekeeping** The City ensures through a construction inspection program that construction contractors properly store, use, and dispose of construction materials, chemicals, and wastes at construction sites and prevent illicit discharges to storm drains and watercourses.			
CON 1.A	Track & document incidents of housekeeping issues at construction sites	Ongoing	Done FY 05-06 and ongoing. Inspectors from ESD, PW, and PBCE Building continued to track and document incidents of housekeeping issues at construction sites during FY 05-06 and these records are on file for review. At the private development projects, PW inspectors found housekeeping issues at 80 of 107 sites inspected. The same issues that were found and reported in FY 04-05 were found in FY 05-06. Issues included no cover on dirt stockpile/dumpsters, inadequate inlet protection, maintenance of rock construction entrances, maintenance of perimeter protection, improper installation of perimeter protection, tracking of dust and mud on public streets. At City Facilities Architectural Services projects, PW inspectors found housekeeping issues at 22 sites.	PBCE-Bldg, PW, ESD-WE
CON 2	**Local Ordinance** For development projects with significant erosion potential and planned construction activity during the wet season, the City ensures, through a construction inspection program, that erosion and/or sediment control measures are implemented in accordance with local ordinances and project conditions of approval and maintained as needed during construction.			
CON 2.A	Maintain a program for identifying and conditioning projects with significant erosion potential and planned wet season activity.	Ongoing	Done FY 05-06 and ongoing. ESD, PW, and PBCE - Building inspectors continued to implement a construction inspection program for identifying and conditioning projects with significant erosion potential and planned wet season activity. PW (TDS) inspected approximately 107 active construction sites, PBCE Building inspected approximately 2,500 sites, and ESD Watershed Enforcement inspected approximately 77 sites with 418 total inspections.	PW, PBCE-Bldg
CON 2.B	Identify ordinance changes needed to conduct inspections.	As Needed	Done FY 05-06. No changes to existing ordinances were required.	PW, ESD-WE, PBCE-Bldg
