	determined to be Significant Facilities in accordance with implementation schedule. Add the facility to appropriate database(s) and assign an inspection frequency. If the facility inspected is determined to need to file an NOI and is not able to provide an NOI, SWPPP or SWMP, refer to the Water Board.		*Tables/Additional Information.*	
IND 2.E	Work with the Program's Industrial Inspection Ad Hoc TG on an Administrative procedure for providing referrals to the Regional Board and document providing referrals to the Regional Board for facilities with significant problems.	Pending Implementation by Program	Pending activity by Program IND AHTG.	ESD-WE
IND 3	**City Regulated Facilities** The City of San José will conduct inspections of City Regulated facilities as identified below: Food Service Facilities: 2 or more AOCs* over a rolling three year time period - Every year 1 AOC over a rolling three year time period – Every two (2) years 0 AOCs over a rolling three year time period - Every three (3) years All other City-regulated Facilities: 2 or more AOCs* over a rolling five year time period – Every year 1 AOC over a rolling five year time period – Every two (2) years 0 AOCs over a rolling five year time period but have exposure – Every five (5) years 0 AOCs over a rolling five year time period with no exposure or potential for exposure – No further inspections Facilities for which a referral or ICID complaint is received: As soon as practicable for violations and every year until they meet the above criteria.			
IND 3.A	Determine industrial/commercial facilities identified in the IND SOPs	Annually Q1	Done, July 2006: Determined the Inspection schedule for the year based on the IND SOP.	ESD-WE
IND 3.B	Conduct and document inspections of City Regulated facilities, other than food service facilities, at least once every five (5) years in accordance with the inspection frequency schedule. If determined to have no impact or no potential for pollution, will not be scheduled for future inspection.	Ongoing	Done FY 06-07 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 3.C	Conduct and document inspections of City Regulated food service facilities at least once every three (3) years. Initial approved performance standards require inspections every three years. If determined to have no impact or no potential for pollution, will not be scheduled for future inspection.	Ongoing	Done FY 06-07 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 3.D	Conduct and document inspections for which a referral or complaint was received within five days of complaint received and second inspection within one year.	Ongoing	Done FY 06-07 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 3.E	Develop a database to track the inspection information	Done FY 02-03	Done FY 02-03.	ESD-WE

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
	from the inspector facility inspection report.			
IND 3.E.1	Implement new Environmental Enforcement Data Management System.	Done FY 03-04	Done FY 03-04.	
IND 3.E.2	Prepare draft data inspection tables to review data trends and to facilitate timely evaluation of the data.	Q3, FY 06-07	Done FY 06-07	ESD-WE
IND 3.F	Maintain database to track inspection information from inspector facility inspection report and to include new industrial program categories.	Done FY 03-04	Done FY 03-04.	ESD-WE
IND 3.G	For B, C, D, and E, collect information during inspections on the potential for stormwater pollution at City Regulated facilities in order to determine the appropriate inspection frequency for the various facilities.	Ongoing	Done FY 06-07 and ongoing. Areas of Concern (AOC) determine inspection frequency. AOCs are identified during inspection.	ESD-WE
IND 3.H	Develop an inspection frequency plan to track frequency of inspections. Implement & update, as needed, the inspection frequency plan.	Done FY 01-02 Implementation Ongoing Updated as Needed	Done FY 01-02 and ongoing. Areas of Concern (AOC) determine inspection frequency. AOCs are identified during inspection.	ESD-WE
IND 4	**Compliance** The City of San José will conduct industrial/commercial inspections to determine the existence of discharges or threatened discharges, which are illegal under local ordinances. The facility operator will be notified of observed areas of concern to be corrected and/or if official action on violations is necessary, it will take place under local enforcement procedures.			
IND 4.A	Document facilities that have enforcement actions, and the type of enforcement actions, conducted for the existence of discharges or threatened discharges that are illegal under local ordinances.	Ongoing	Done FY 06-07 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 5	**Training** The City of San José will ensure that industrial/commercial inspectors are adequately trained in inspection procedures, documentation, and enforcement related to stormwater pollution prevention.			
IND 5.A	Conduct annual training for IND inspectors.	Annually Q1	Done FY 06-07. See 13.D: *Municipal Employee Training Summary* for details.	ESD-WE
IND 5.B	Maintain a training plan and provide and document on-the-job training and other training opportunities such as industrial/commercial inspection workshops.	Ongoing	Done FY 06-07 and ongoing. See 13.D: *Municipal Employee Training Summary* for details.	ESD-WE
IND 5.C	Review inspection training protocols to identify new training opportunities, approaches, and materials.	Ongoing	Done FY 06-07 and ongoing. See 13.D: *Municipal Employee Training Summary* for details.	ESD-WE
IND 6	**Outreach** The City of San José will help develop and distribute outreach and technology transfer material containing applicable control measures and/or BMPs to industrial/commercial facility operators responsible for IND activities.			
IND 6.A	Identify and list existing outreach and technology	Annually	Done FY 06-07. Outreach materials are listed in Appendix	ESD-UR

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
	transfer material.		A of the City's URMP.	
IND 6.B	Distribute applicable outreach and technology transfer material to industrial/commercial facility operators. Document to the Water Board that outreach and technology transfer material and/or BMPs have been distributed, as needed, to industrial/commercial facility operators.	Distribution Ongoing	Done FY 06-07 and ongoing. See 14.D: *Outreach Materials Distributed* for a count of outreach and technology transfer materials distributed as part of Inspection activities.	ESD-UR
IND 6.B	Determine usefulness of outreach and technology transfer materials by obtaining feedback from industrial/ commercial facilities. Obtain feedback from inspectors about the effectiveness of existing outreach and technology transfer material.	As Needed	Done FY 06-07. Feedback from inspectors is collected during regular staff meetings. Needs are identified and responded to as priorities and budget allow.	ESD-UR
IND 7	**NOI Filers Effectiveness Evaluation** The City of San José's Watershed Enforcement staff will review and evaluate the effectiveness of its NOI Filers inspections procedures and database tracking system.			
IND 7.A	In the Annual Report document and evaluate the effectiveness of NOI Filers inspection procedures.	Annually	Done FY 06-07. NOI filers are inspected in a similar manner as all facilities. These procedures were updated to include a better mechanism for determining whether a facility needs to file for an NOI if conditional.	ESD-WE
IND 7.B	In the Annual Report document and evaluate the effectiveness of the NOI Filers database tracking system.	Annually	Done FY 06-07. The NOI filer database tracking system identifies whether facilities are conditional or not and includes a special button for indicating if there is any potential for exposure.	ESD-WE
IND 7.C	In the Annual Report document and evaluate what worked well and what needs improvement.	Annually	Done FY 06-07. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE

2.B IND Program Evaluation

The goal of the IND Program Element is to reduce storm drain pollution from commercial and industrial facilities through inspection. The Environmental Enforcement Section of the Watershed Protection Division is primarily responsible for inspecting almost 4,000 businesses in San José each year.

As shown in Table 2.D, FY 06-07 marked the return to a normal growth rate of City business license applications. Additionally, after extensive data review of the City's EEDMS database, the total number of facilities subject to inspection was corrected. The elimination of duplicate business licenses and closed businesses within the database brought the total facilities subject to inspection in FY 06-07 to 8,936. Even so, the total inventory of facilities in the City subject to inspection has more than doubled over the last five years, from 3,943 facilities in FY 02-03 to 8,936 facilities in FY 06-07, representing a tremendous workload challenge. The City successfully integrated the increased workload for the short term by prioritizing, phasing initial inspections, and shifting or adding resources. The number of facilities inspected in one fiscal year has increased from 2,872 in FY 03-04 to 3,930 in FY 06-07, and 4,469 facilities are slated for inspection in FY 07-08. In FY 07-08, the City will add two environmental inspector positions to assist in meeting the current workload, and future resource needs will be continually assessed.

Food Service Facility Inspections

FY 06-07 marked the first year for the City's new Fats, Oils, and Grease (FOG) Inspection Program, in which 1,849 facilities were inspected. Though the City has conducted comprehensive restaurant inspections over the past four years as part of IND, the new FOG Program dedicates specific resources and staff to inspect

stormwater practices solely at food service facilities. This Program focuses particularly on integrating the sanitary sewer management plan (SSMP) requirements and enhancing the business' general awareness of storm water issues related to food service facilities.

BMP Distribution

Over 10,600 Best Management Practice brochures (BMPs) were distributed in FY 06-07, an increase of 19% from FY 05-06. City Inspectors are very proactive in distributing BMPs to support educational efforts. For example, businesses that did not have any Areas of Concern (AOCs) were still given BMPs by inspectors to support the business in their efforts and to help ensure that they would be well positioned to keep their number of AOCs at zero.

2.C IND Response to Water Board Comments

No comments received from Water Board on this Program Element.

2.D IND Summary Tables / Additional Information

IND Summary Tables

Overall Facility Inspection Totals	06-07	05-06	04-05	03-04	02-03	Description of item
Facilities Subject to Inspection in database	8,936	9,229	6,164	4,991	3,943	All facilities in the database that require inspections to meet the performance standard, whether or not they are scheduled for inspection in the current year. This includes both city-regulated and GIASP facilities. This excludes facilities that the City has determined are not subject to future inspection based on a determination that there was no exposure, incorrect SIC, etc.
Facilities Scheduled for Inspection	3,929	3,490	3,020	3,022	2,500	All facilities that were determined to need inspection by existing schedule date and imports from business license, Harris Info, and NOI filers state listing for reporting year.
Facilities Inspected	3,930	3,506	3,029	2,872	2,210	All facilities subject to inspection that were inspected. Also described as number of cases.
Other City Regulated Facilities	67	85	51	26	30	These facilities had an Illicit Connection Illegal Dumping complaint filed against them, so now are scheduled to receive an industrial/commercial inspection as per IND 3D.
Facilities Scheduled for Inspection the following fiscal year	4,469	4,000	3,237	3,144	3,132	All facilities subject to inspection for the following fiscal year.

Status of GIASP Implementation	06-07	05-06	04-05	03-04	02-03	Description of item
Board Referrals						
New NOI Filers	14	13	4	20	9	Total industrial facilities in San José with new NOI filed according to Water Board Database as of July 2004. Prior to 02-03, data included all Active NOI filers; not just new ones.
New NOI Filers Inspected	14	7	4	17	9	Of the facilities referred to the City by the Water Board, the number inspected during the fiscal year.
Inspections						
Potential NOI Facilities	864	840	746	521	544	Of the facilities scheduled for inspection during the fiscal year, the number that may be subject to GIASP provisions
Have Filed	45	52	96	126	110	Of the facilities inspected, the number that have filed.
SWPPP or SWMP on-site	82	81	87	149	108	Per IND 1B and IND 2C, the number of facilities having a SWPPP or SWMP on-site
Need to File	35	59	90	26	122	Of the facilities inspected, the number determined to need to file in accordance with the GIASP. These facilities are listed in 2.D Companies Requiring NOI Based on SIC But Have Not Filed AND Companies Requiring NOI Based on Exposure But Have Not Filed.
Do Not Need to File (Conditional – No NOI required)	508	451	560	279	164	All facilities that were determined to need an inspection per the GIASP with findings of no NOI required.
Closed/Moved Facilities	276	278	248	521	447	NOI facilities no longer in operation.

Enforcement Actions Summary

TOTAL ENFORCEMENT ACTIONS TAKEN	06-07	05-06	04-05	03-04	02-03	DESCRIPTION OF ITEM
AOCs	2,263	1,821	2,591	2,624	1,790	Area of concern with a compliance date and any enforcement action activity.
BMPs Distributed	10,655	8,912	6,890	5,796	4,267	Number of BMPs issued as part of Enforcement.
Verbal Warning	1,402	1,070	1,280	1,927	753	Verbal warning providing information for corrective actions. An inspection report accompanies each verbal warning.
Official Warning Notice	500	366	384	162	77	Written letter providing information for corrective actions.
Administrative Action with Penalty &/or Fine	9	5	15	3	3	Administrative actions, including fines (In San José this is an Administrative Citation.)
Criminal Action	0	0	0	0	0	Legal actions
Referral for Enforcement	0	0	0	0	0	Refer case to agency with enforcement powers.
Referral for other reason	0	0	0	0	4	Refer case to internal or external agency for clean-up, information or jurisdictional reasons.

HIGHEST ENFORCEMENT ACTION TAKEN	06-07	05-06	04-05	03-04	DESCRIPTION OF ITEM
No Enforcement Action	1,438	1,169	780	835	Cases with no Enforcement Action taken
BMPs Distributed	1,216	1,342	939	850	Cases with BMPs Distributed as the highest Enforcement Action to achieve compliance
Verbal Warning	858	686	1,045	1,064	Cases with Verbal Notice as the highest Enforcement Action to achieve compliance
Warning Notice	410	306	255	120	Cases with Warning Notice as the highest Enforcement Action to achieve compliance
Administrative Citation	8	3	10	3	Cases with Administrative Citation as the highest Enforcement Action to achieve compliance
Criminal Action	0	0	0	0	Cases with Criminal Action as the highest Enforcement Action to achieve compliance
Total	3,930	3,506	3,029	2,872	All facilities subject to inspection that were inspected. Also described as number of cases.

INSPECTIONS REQ'D FOR COMPLIANCE	06-07	05-06	04-05	03-04	DESCRIPTION OF ITEM
One Inspection	2,907	2,807	2,132	2,057	Number of Cases requiring one inspection to achieve compliance
Two Inspections	779	571	675	535	Number of Cases requiring two inspections to achieve compliance
Three Inspections	192	96	162	158	Number of Cases requiring three inspections to achieve compliance
Four Inspections	39	18	45	59	Number of Cases requiring four inspections to achieve compliance
Five Inspections or More	13	14	15	63	Number of Cases requiring five inspections or more to achieve compliance
No Inspections	0	0	0	0	Number of Cases requiring zero inspections (These are duplicates and facilities determined to be non-existent by Business List and phone calls)
Total	3,930	3,506	3,029	2,872	All facilities subject to inspection that were inspected. Also described as number of cases.

IND Facility Categories for the City of San José

(Developed by AHTG to use for Program-wide Reporting, September 7, 2001 Memo's 17 categories + 3 City categories)

CATEGORY #	PROGRAM CATEGORY	CURRENT AHTG MUNICIPAL CATEGORY	SCHEDULED	ACTUAL
1	Automotive	Automotive sales, engine and body repair, gas stations, car washes, parking, vehicle services	459	458
2	Food Service	Eating and drinking establishments, including cafeterias, delis, bakeries, mobile food	1,788	1,788
3	Paint Facilities	Manufacturing and retailing	3	3
4	Dry Cleaners	Dry cleaners	12	12
5	Cleaning Services	Mobile washers, building cleaning, carpet cleaning	295	295
6	Pesticide Facilities	Manufacturing and retailing; pesticide applicators	9	9
7	Machine Shops	Industrial machinery and equipment	89	90
8	Metal Manufacturing	Metal fabricating, finishing, plating, metal work (40 CFR 413, 433)	61	64
9	Electric/Electrical Components	Manufacturing (40 CFR 469)	160	161
10	Construction/ Building	Retail, trade contractors, construction, landscape and garden businesses	381	384
11	Local Transit; Highway Transport	Electric, Gas and Sanitary Services, Trucking Industries	297	297
12	Recycling yards	Assembling, breaking up, sorting and wholesale distribution of scrap and waste materials. This includes auto wreckers engaged in dismantling automobiles for scrap.	26	26
13	Auto Dismantlers	Dismantling motor vehicles for the purpose of selling parts.	-	-
14	Concrete/Stone/Clay Products	Manufacturing cement, structural clay products, pottery, concrete and gypsum products, cut stone, abrasive and asbestos products, and other products from materials taken principally from the earth in the form of stone, clay and sand.	28	27
15	Corporation Yards	PG&E, CalTrans, School bus, VTA, Municipal	-	-
16	Landfills	Dumps; Garbage collecting, destroying and processing; Landfill; Rubbish collection and disposal.	4	4
17	Wood Furniture & Other Products	Manufacturing finished articles made entirely or mainly of wood or related materials.	32	32
18	Chemical Manufacturing	Manufacturing/producing basic chemicals, chemical products to be used in further manufacture (synthetic fibers, etc.) and finished chemical products to be used for ultimate consumption or as materials or supplies in other industries (such as cosmetics, soaps, fertilizers)	1	1
19	Misc. Manufacturing	Caskets, Furniture, Glass, Jewelry/Precious Metal, Manufacturing Industries-NEC, Medical, Office & Store Fixtures, Paper, Petroleum & Coal, Pharmaceuticals, Rubber & Plastics, Signs, Toys & Sports	129	129
20	Other	**Other includes:** Air Conditioning Services, Airports, Amusement Parks, Chiropractors, Commercial Areas, Florist, Hazardous Waste, Laboratories, Laundries, Medical and Dental Labs, Miscellaneous, Petroleum Pipelines, Petroleum Refining, Photographic/Printing, Property Management, Radiologists, Steam Electric Power Generation (per permit), Storage, Veterinarians, Welding/Iron Works, Welding Repair, Winery, Underground Storage Tanks, unspecified SIC Codes, and SIC Codes that were found to be misclassified upon inspection.	155	150

3. NRD: New and Redevelopment

3.A NRD Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
NRD 1	**Legal Authority** The City of San José will have adequate legal authority to implement new development control measures, including all applicable requirements of Provision C.3, as part of its development plan review and approval procedures and other appropriate new development and redevelopment permitting procedures (Provision C.3.a.i).			
NRD 1.A	Revise Municipal Code to ensure adequate legal authority to implement new development control measures (C.3.a.i).	As Needed	The City currently has adequate legal authority to implement new development control measures.	PBCE, ESD, PW
NRD 2	**Guidance to Developers** The City will provide developers with information and guidance materials on site design guidelines, building permit requirements, and BMPs for stormwater pollution prevention, as appropriate for the type of project and location.			
NRD 2.A.1	Draft necessary revision(s) to Guidance Manual on Selection of Stormwater Quality Control Measures to allow incorporation of hydraulic sizing design criteria and provide to developers.	Done FY 02-03	Done FY 02-03 and ongoing. During FY 06-07, the City contracted with RBF Consulting to develop a C.3 Stormwater Control Plan Design Guidelines Manual. The intent of this manual is to provide more detailed guidance to developers, project managers, and project engineers working in San Jose's jurisdiction on the selection, design, implementation, and maintenance of stormwater treatment BMPs. In addition, the City participated in the Program's effort to update the "Developments Protecting Water Quality - A Guidebook of Site Design Examples." The City submitted four different examples of public and private development projects that have successfully incorporated stormwater treatment design features.	PBCE, ESD, PW, RDA
NRD 2.A.2	Refine Guidance Manual on Selection of Stormwater Quality Control Measures to incorporate HMP measures, as necessary.	Done FY 05-06	Done FY 05-06.	PBCE, ESD, PW, RDA
NRD 2.B	Provide development community with revised information and guidance materials concerning any adopted on site design, building permit requirements and hydraulic sizing design criteria and maintenance requirements for BMPs for stormwater treatment measures.	Done FY 02-03	Done FY 02-03 and ongoing. In FY 06-07, revised information was provided by 1) printed status bulletin information sheets distributed by e-mail to the development community, as handouts at public information counter and at Developer's Roundtable Meetings; 2) Webpage updates; 3) inviting the development community to attend Program workshops and City sponsored Developers' Roundtable meetings. In addition, City staff coordinated with BASMAA members and the Program to develop C.3 treatment BMP sizing software.	PBCE, ESD, PW, RDA

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
NRD 2.B.1	Coordinate w/development community on proposed hydraulic sizing criteria for structural stormwater treatment measures, HMP criteria and any proposed revisions to Guidance Manual and policy through workshops and regular meetings.	Done FY 02-03	Done FY 02-03. See NRD 2.B. above.	PBCE, ESD, PW, RDA
NRD 2.B.2	Update guidance material regarding maintenance responsibilities for any HMP measures.	Done FY 05-06	Done FY 05-06.	PBCE, ESD, PW, RDA, Program
NRD 3	**CEQA Requirements** The City will ensure that environmental documents required for those projects that fall under CEQA and NEPA review address both significant and cumulative stormwater quality impacts during the life of the project, and relevant permit requirements. These documents include EIRs, negative declarations and initial study checklists (C.3.m).			
NRD 3.A	Review and evaluate the City's Environmental Review procedures to improve the review for water quality impacts and identification of mitigation measures. (Provision C.3.m.)	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA
NRD 3.A.1	Identify areas where new or additional water quality review processes and related documents or checklist questions are needed and propose schedule for revision.	Done FY 02-03	Done FY 02-03. See NRD 3.A.	PBCE, ESD, PW, RDA
NRD 3.A.2	Refine and update areas where new or additional water quality related mitigation measures may be needed.	Done FY 05-06	Done FY 05-06.	PBCE, ESD, PW, RDA
NRD 3.B.	Report on revisions made to environmental review process.	Done FY 02-03	Done FY 02-03. See NRD 3.A.	PBCE, ESD, PW, RDA
NRD 4	**Project Mitigation Measures and Design Requirements** The City will encourage developers of all projects subject to design review under its development plan review and approval procedures to consider incorporating appropriate source control and site design measure that minimize stormwater pollutant discharges to the maximum extent practicable.			
NRD 4.A	Revise current Policy on Post-Construction Urban Runoff Management as necessary to incorporate minimum BMP requirements for all projects.	Done FY 03-04	Done FY 03-04 and ongoing. In FY 06-07, Council revised Policy 6-29, entitled "Post-Construction Urban Runoff Management", to expand implementation of treatment control measures and meet all numeric sizing criteria.	PBCE, ESD, PW, RDA, CAO
NRD 4.B.	Review and modify development permit approval procedures for adopted revisions as necessary.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 4.C	Review the design standards and guidance for opportunities to make revisions that would result in reduced impacts to water quality and summarize how they were incorporated into approval procedures.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 4.D	Review the existing source control measures contained in site design standards, guidance documents and conditions of approval for opportunities to limit stormwater pollution. (Provision C.3.k.)	Done FY 03-04	Done FY 03-04 in coordination with the Program.	PBCE, ESD, PW, RDA

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
NRD 4.E	Review General Plan and revise as necessary to incorporate water quality and watershed protection principles and policies, and summarize revisions made. (Provision C.3.l.)	Done FY 03-04 Ongoing	Done FY 03-04 and ongoing. In FY 06-07, the City began revising the 2020 General Plan. Titled "Envision San Jose 2040," the update will incorporate environmental protection and sustainability into all the elements of the General Plan.	PBCE
NRD 4.F	Review the design standards and guidance for opportunities to make revisions as necessary that would result in reduced impacts to water quality and summarize how they were incorporated into approval procedures. Such revisions are listed in Provision C.3.j.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 4.F.1	Identify and document existing site design standards and guidance documents and policies.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 4.F.2	Revise Site Design Measures and Standards, as necessary.	Done FY 03-04	Done FY 03-04 and ongoing. In FY 06-07, City staff continued to work with the engineering community and consultants to explore street widths and alternatives to curb and gutter requirements. Treatment BMPs and long-term maintenance solutions were discussed as well. Staff continued to participate in the Water Resources Protection Collaborative. The Water Resources Protection Manual was completed in FY 06-07, which includes various design guides for working in and around streams and creeks.	PBCE, ESD, PW, RDA
NRD 5	**Group 1, 2 and HMP Project Requirements** On October 15, 2003, the City began phased implementation of hydraulically sized stormwater treatment measures in conformance with Policy 6-29 beginning with projects that create or replace one acre or more of impervious surface area and are considered Land Uses of Concern. On February 15, 2005, all projects that created or replaced one acre or more of impervious surface were required to hydraulically size stormwater treatment measures. On May 17, 2005, the threshold changed to include all projects that created or replaced 10,000 sq. ft. impervious surface and are a Land Use of Concern. Effective August 15, 2006, all projects that create or replace 10,000 sq. ft. or more of impervious surface were required to include hydraulically sized stormwater treatment measures. On October 18, 2005, all projects that met the criteria described in Policy 8-14 were required to manage increases in runoff flow, volume and duration. The following is a brief summary of the Best Management Practices that are required in all development projects: • Site design shall include measures to minimize impervious land coverage, maximize infiltration (where appropriate and designed to protect groundwater quality) and provide detention or retention as part of landscaping where feasible (C3.b.i and C.3.j); • Source controls shall be required to limit pollution generation, discharge, and runoff as appropriate (C.3.k), including measures to discourage pesticide use (C.9.d.ii); • Stormwater treatment measures shall be designed in accordance with the numeric design criteria in Policy 6-29 (Provision C.3.d); A. Increases in runoff flow, volume and duration shall be managed in accordance with Policy 8-14 (Provision C.3.f). (HMP) for the specific stream receiving the discharge, following approval of the HMP by the Water Board (C.3.f).			
NRD 5.A.1	Propose revisions to current Policy 6-29 on Post-Construction Urban Runoff Management as necessary to incorporate hydraulic sizing design criteria.	Done FY 03-04	Done FY 03-04 and ongoing. In FY 06-07, Council revised Policy 6-29, entitled "Post-Construction Urban Runoff Management", to expand implementation of treatment control measures and meet hydraulic sizing criteria.	PBCE, ESD, PW, RDA, CAO

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
NRD 5.A.2	Revise current Policy 6-29 on Post-Construction Urban Runoff Management as necessary to incorporate hydraulic sizing design criteria.	Done FY 03-04	Done FY 03-04 and ongoing. See NRD 5.A.1	PBCE, ESD, PW, RDA, CAO
NRD 5.A.3	Revise policy as needed for Group 2 implementation	Done FY 04-05	Done FY 04-05 and ongoing. In FY 06-07, Council revised Policy 6-29 to require that all applicable projects meeting the 10,000 sq. ft. threshold implement hydraulically-sized post-construction TCMs.	PBCE, ESD, PW, RDA, CAO
NRD 5.A.4	Revise policy as needed for HMP implementation.	Done FY 05-06	Done FY 05-06.	PBCE, ESD, PW, RDA, CAO
NRD 5.B	Develop a list of Annual Reporting requirements from Provision C.3 Design data tracking needs and protocols.	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA, CAO
NRD 5.B.1	Compile a list of new development and redevelopment projects by name, type of project, site acreage or square footage, square footage of new impervious surface, treatment BMPs and numeric sizing criteria used for applicable projects. Also, list the source control and pesticide reduction measures.	Annually	Done FY 06-07. See Section 3.D: *Applicable Projects Reviewed and/or Approved During July 1, 2006 – June 30, 2007*.	PBCE, ESD, PW, RDA
NRD 5.B.2	Update existing data collection software for private projects to enable tracking of all projects with treatment or HMP measures.	FY 06-07	In progress during FY 06-07. Funding was approved and contract negotiation began with Computer Systems Design Corporation (CSDC) for updates to the Amanda database to help track implementation of stormwater control measures.	PBCE, ESD, PW, RDA
NRD 5.C	Revise and update permitted alternatives to numeric sizing through Alternative Measures Program in Policy 6-29.	Done FY 04-05	Done FY 04-05.	PBCE, ESD, PW, RDA
NRD 5.C.1	Report to City Council on Alternative Measures Program revisions in Policy 6-29. (Provision C.3.g.)	Done FY 04-05	Done FY 04-05.	PBCE, ESD, PW, RDA
NRD 5.C.2	Track name and location of projects in the Alternative Measures Program, project type and size, percent impervious surface, reason for granting waiver, terms of waiver, equivalent benefit provided, alternative treatment project or regional project receiving the benefit and date of completion of the alternative treatment project or regional project (Provision C.3.g).	Annually	None submitted in FY 06-07.	PBCE, ESD, PW, RDA
NRD 5.C.3	Report to City Council on projects approved with numeric sizing alternatives through Alternative Measures Program. (Provision C.3.g.)	Annually	N/A in FY 06-07.	PBCE, ESD, PW, RDA
NRD 5.D	Draft post-construction treatment BMP certification procedures. (Provision C.3.h)	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA

NRD 9.C	Begin tracking required data on public projects subject to Provision C.3. hydraulic sizing criteria requirements for Annual Report.	Done FY 03-04 Ongoing	Done FY 03-04 and ongoing.	PBCE, PW, RDA
NRD 9.C.1	Modify the existing data collection software for public projects to track new Capitol Improvement Projects with stormwater treatment and/or HMP measures.	FY 06-07	In progress during FY 06-07. The City is implementing a stormwater data tracking feature in the data collection software used by CIP project managers.	PW
NRD 9.D	Monitor development of City's Green Building program for opportunities to discourage architectural use of copper in development projects (Prov. C.9.a.) and to incorporate urban runoff considerations.	Done FY 02-03 Ongoing	Done FY 02-03 and ongoing. ESD has a dedicated LEED accredited staff person who reviews projects and advises City staff on Green Building materials and techniques, including discouraging architectural use of copper. Council updated the Green Building Policy on March 6, 2007 to require LEED Silver on all municipal buildings over 10,000 sq. ft. with a goal of achieving Gold or Platinum.	PBCE, ESD, PW, RDA
NRD 10	**City Staff Training**			

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
	The City will provide training at least annually to its planning, building, and public works staff on planning procedures, policies, design guidelines, and BMPs for stormwater pollution prevention (C.3.a.vi).			
NRD 10.A	Provide training to Planning and Public Works staff on planning procedures, policies, design guidelines, and BMPs for stormwater pollution prevention. (Provision C.3.a.vi.)	Ongoing	Ongoing. In FY 06-07, City staff met regularly to share information and resources on planning procedures, policies, design guidelines, and BMPs for stormwater pollution prevention. In addition, several training events were conducted to educate staff on how to meet new requirements by implementing stormwater pollution prevention strategies. See 13.D: *Municipal Employee Training Summary* and 3.B: *NRD Program Evaluation* for details.	PBCE, ESD, PW, RDA
NRD 10.B	Provide training to Redevelopment Agency and Department of Transportation staff on planning procedures, policies, design guidelines, and BMPs for stormwater pollution prevention. (Provision C.3.a.vi.)	Ongoing	Ongoing. In FY 06-07, City staff met regularly to share information and resources on planning procedures, policies, design guidelines, and BMPs for stormwater pollution prevention. In addition, several training events were conducted to educate staff on how to meet new requirements by implementing stormwater pollution prevention strategies. See 13.D: *Municipal Employee Training Summary* and 3.B: *NRD Program Evaluation* for details.	PBCE, ESD, PW, RDA, DOT
NRD 10.C	Revise the training protocol to incorporate any newly adopted Provision C.3. Permit requirements and related revised procedures.	As Needed	As Needed. In coordination with the Program.	PBCE, ESD, PW, RDA
NRD 10.D	Train staff responsible for design review on pest-resistant landscaping techniques and model conditions of approval and the importance of minimizing pesticide use in runoff from development sites. (Provision C.3.n. and Provision C.9.d.ii)	Ongoing	Ongoing. In FY 06-07, training was provided to planning staff on pest-resistant planting techniques. See 13.D: *Municipal Employee Training Summary* for details.	PBCE, ESD, PW, RDA
NRD 11	**Development Plan Review and Approval Procedures Effectiveness Evaluation** The City of San José will review and evaluate the effectiveness of its development plan review and approval procedures.			
NRD 11.A	Evaluate and incorporate any needed improvements in review and approval process.	Annually	Annually. See 3.B: *NRD Program Evaluation*.	PBCE, ESD, PW, RDA
NRD 11.B	Document and evaluate what worked well and what needs improvement.	Annually	Annually. See 3.B: *NRD Program Evaluation*.	PBCE, ESD, PW, RDA

3.B NRD Program Evaluation

The City made considerable strides in implementing the NRD program element in FY 06-07 while experiencing more than a thirty-seven percent increase in projects implementing stormwater BMPs and TCMs. Notably, of the FY 06-07 projects reported in 3.D: NRD Summary Table/Additional Information, approximately 30% achieved a net reduction in impervious surface area. This accomplishment was achieved largely through policies and planning principles that discourage sprawl and encourage effective and efficient development/redevelopment. Additional achievements discussed below include expanded implementation of the Post-Construction Urban Runoff Management Policy 6-29, training of City staff, increased coordination with the development community, and the receipt of four site design awards for exemplary development projects.

Policy

Policy 6-29 Revision

Policy 6-29 is the City's primary policy tool for executing stormwater requirements and was updated in August of 2006. This revision includes a reduction of the threshold of impervious surface area for regulated projects from 1 acre down to 10,000 square feet and implementation of Post-Construction BMPs and TCMs with specific numeric sizing requirements. This policy revision also updated the Policy definition of "Other Unenumerated Land Uses of Concern," eliminated the Policy definitions of "Land Uses of Concern" and "Major Project," and added a Policy definition of "Applicable Project." In addition, this policy revision made a technical clarification regarding the exclusion of roof area from the project square footage calculation (when downspouts are disconnected) when determining whether numerically sized Treatment Control Measures are required.

Parkland Dedication and Park Impact Ordinances Revision

The City's Parkland Dedication and Park Impact Ordinances (PDO/PIO), originally adopted in 1998 to help meet the demand for new neighborhoods and community parkland generated by the development of new residential subdivisions, were revised in October of 2006. These ordinance revisions included a provision to allow partial PDO/PIO credits for stormwater facilities that are also designed to be of public recreational value when they are not actively being used for stormwater treatment and detention. With this change, the City is seeking to increase its inventory of neighborhood and community serving parkland, improve water quality, and prevent erosion in creeks and rivers. This new provision provides flexibility for developers and City staff to consider the implementation of stormwater facilities in dual use neighborhood and community parks when appropriate. However, maintenance funding remains a key concern as routine parks maintenance is faced with severe budget constraints.

Green Building Policy Revision

The City's Green Building Policy, originally adopted in 2001, was revised in March of 2007 and includes new provisions requiring Leadership in Energy and Environmental Design (LEED) Silver level certification on all municipal buildings over 10,000 square feet with a goal of achieving Gold or Platinum. These green building principles include enhanced use of stormwater TCMs, appropriate site design and source control BMPs, and hydromodification management. The implementation of this policy will result in more municipal facilities with stormwater treatment and flow control. This policy encourages green building in the private sector and the City is working on developing incentives.

Awards

The City received the following four awards from the Santa Clara Valley Urban Runoff Pollution Prevention Program (SCVURPPP) in October of 2006:

- Exemplary Residential Project with Site Design Features: Willow Glen Reflections
- Exemplary Small Site Project with Site Design Features: Alum Rock Branch Library
- Exemplary Institutional Project with Site Design Features: Congregation Sinai
- Exemplary Large Site Project with Site Design Features: Tully Community Branch Library and Ball Fields

While these projects were not required to numerically size TCMs and provide 100 percent treatment, staff were successful at promoting the voluntary incorporation of stormwater treatment measures. All four projects were featured in "Development Protecting Water Quality: A Guidebook for Site Design Examples" produced by SCVURPPP.

Training

The City continues its commitment to educating staff and increasing developers' awareness of C.3 numeric sizing treatment criteria and hydromodification measures. City staff also attended numerous training events to learn new strategies in stormwater treatment and flow control.

Porous Concrete, by Dr. Brian Shackle

To increase awareness of porous concrete, the City assisted SCVURPPP in hosting a training event on September 21, 2006 at the City of San José. Dr. Brian Shackel, a professor in the School of Civil and Environmental Engineering from the University of New South Wales in Sydney, Australia, presented a lecture on porous concrete to about 60 City staff, staff from other municipalities, and consultants. The lecture covered the environmental aspects, maintenance, and design criteria of permeable pavers. Additionally, specialized software was distributed to participants to assist with treatment area calculations.

BAHM Software Demonstration

The Program coordinated a demonstration of the BAHM software on November 13, 2006. Twenty-one City staff from ESD, PW, and PBCE attended, along with 29 participants from the Santa Clara Valley Water District and private firms that specialize in the design of hydraulic control structures in the City of San José. This event demonstrated a new, user-friendly model to assist designers of HMP facilities.

Watershed Management Initiative—Land Use Subgroup Workshop

The City planned and participated in a December 6, 2006 walking tour of the Don Edwards National Wildlife Refuge in partnership with the Watershed Management Initiative Land Use Subgroup. Participants, including 24 City planners and ESD staff, learned about interactions between urban activities and natural habitats, salt marshes, freshwater discharges, and landscaping with native plants.

Bioretention Design Criteria, by Larry Coffman

Several City staff from PW, PBCE, and ESD participated in this training workshop on January 17, 2007 in Sunnyvale, CA. The training facilitated discussion on bioretention BMPs and addressed questions regarding the effectiveness and maintenance of bioretention devices.

Stormwater Vendor Products

Throughout FY 2006-2007, City staff from ESD, PBCE, PW, PRNS, and DOT were exposed to various stormwater products, including a media filter, erosion control application, and a bioretention system. Presentations generally lasted about one hour, allowing time for staff to question the vendors. City staff were exposed to vendor products at several training events as well.

Stormwater Treatment: How it Works, by Dr. Gary Minton

Five City staff from PBCE, PW, and ESD participated in this comprehensive, two-day course on May 2-3, 2007 in San Mateo. Dr. Minton provided technical guidance on the selection and design of treatment BMPs and presented data regarding the effectiveness and cost of common BMPs.

SCVURPPP C.3 Workshop

Several City staff from PBCE, PW, and ESD participated in SCVURPPP's annual C.3 workshop, entitled "Implementing Stormwater Requirements in New and Redevelopment Projects" on June 14, 2007 in Cupertino, CA.

O&M Verification Program

The City continued a pilot inspection program in FY 06-07. All projects constructed to-date were approved prior to numeric sizing requirements, and this pilot provides important experience and training for City staff. Based on the O&M Verification Program, revised in FY 05-06 (see 3.D: *NRD Tables/Additional Information*), City staff inspected 20 BMPs at 12 different sites utilizing the Program's standard inspection data collection form. BMPs inspected include the following: vegetated swale, porous

pavement, exfiltration trench, and extended detention basin. The City recognizes that as numerically-sized BMPs are installed, additional resources and coordination among departments will be necessary to ensure appropriate installation, operation and maintenance, and overall functionality of BMPs.

Implications of C.3 Implementation

With a significant increase (more than thirty-seven percent) in the number of applicable projects implementing stormwater BMPs and TCMs in FY 06-07, several departments incurred notable cost increases associated with implementation. Increased staffing costs were incurred for reviewing and commenting on Stormwater Control Plans, EIRs, Initial Studies, and revising Policy 6-29. In addition, significant staff time was dedicated for both developing and participating in training opportunities. Since a large number of City staff from various departments are involved in many aspects of C.3 implementation, ongoing and increased training will be necessary to keep staff apprised of C.3 requirements.

With an increasing number of development projects regulated by C.3 in San José, staff in ESD, PW, and PBCE were challenged to ensure 100 percent compliance for every development project. One instance was identified where a project was designed to provide stormwater treatment to 96 percent of the site when it was required to provide 100 percent treatment. City staff are working with the developer and property owner to provide 100 percent treatment. As corrective action is taken, the process will be evaluated to help achieve 100 percent compliance on all future applicable projects.

Where control measures are to be publicly owned and operated, the identification of funding sources is an ongoing challenge. Funding mechanisms discussed to date prove to be quite complex and maintenance costs are expected to increase substantially as more control measures are installed within the City. The issue of City maintenance costs continues to be of high importance and staff continues to investigate funding options.

While site design and source control techniques continue to be important tools for reducing the impacts of development on stormwater, the City made important efforts to emphasize Low Impact Development (LID), appropriate selection of landscape-based TCMs, and effective operation and maintenance of BMPs. In addition, the City allocated funding in FY 06-07 for contractual support to develop a C.3 Stormwater Control Plan Design Guidelines Manual for City staff, consultants, and developers. These efforts, in concert with policies designed to discourage sprawl and reduce environmental impacts, will continue to be implemented to ensure full compliance of the Stormwater Permit and protect water quality.

3.C NRD Response to Water Board Comments

Item Reference	Water Board Comments	San José Response	Changes for FY 07-08 (if applicable)
Water Board comments on FY 05-06 Annual Report:	We commend all the Co-permittees on providing more detailed and comprehensive information in the reporting tables for the New and Redevelopment Section of the Annual Report. In particular, the column headings and table entries provided in the "Significant Development Projects Tables" satisfy the majority of reporting elements that are proposed for Provision C.3. of the Administrative Draft of the MRP. We commend those Permittees that have performed O&M inspections during the reporting period, such as the cities of San José and Sunnyvale. In particular, we commend San José for conducting a pilot inspection program of stormwater treatment measures constructed prior to the current numeric sizing requirements and making appropriate changes to its O&M inspection program based on these inspections. We also commend Sunnyvale for its O&M inspections and particularly for the reporting of these inspections in the Annual Report. The information provided in Sunnyvale's Attachment E, Table 2, is consistent with the inspection information we are proposing (under Provision C.3.e. of the MRP) to be reported in each Permittee's Annual Report. We recognize that the work and leadership of the SCVURPPP Program and Permittees in implementing the O&M requirements will provide a valuable resource to all the other Permittees in our Region.	The City thanks the Water Board for their comments. The City is pleased with the results of our pilot O&M inspection program, which utilized the Program's inspection data collection form. The City looks forward to transitioning from the pilot program as hydraulically-sized treatment BMPs are constructed and require inspection.	None.

3.D NRD Summary Tables / Additional Information

Applicable Projects[1] Reviewed and/or Approved During July 1, 2006 – June 30, 2007

Private Projects							
PROJECT NAME: Santana Row Mixed Use Mid-Rise Tower (8B) **PROJECT DESCRIPTION:** Planned Development Permit to construct 238 residential units (Building 8B) at Santana Row on a 4.10 gross acre site.	**PROJECT FILE & MAP NUMBER:** PD05-066 (and AD07-412) (See Private Projects Map, No. 1)	**PROJECT LOCATION:** Southwest corner of Olin Avenue and Hatton Street. **WATERSHED:** San Tomas		**PROJECT TYPE:** Residential: Mixed-use.	**SITE SIZE (AC):** 4.10	**NEW IMPERV. AREA (SQFT):** 178,378	**NET IMPERV. AREA (SQFT):** 0
SITE DESIGN: This eight and nine story building features four levels of parking that has one level below-grade and the rest at or above grade with retail spaces wrapped around the outside. This project incorporates motorcycle and bicycle parking areas.	**SOURCE CONTROL:** Stenciled inlets and covered trash enclosures.	**TREATMENT BMPS:** Media filtration unit.	**NUMERIC CRITERIA:** Yes, flow based. **HMP:** Not requiered, but media filtration unit provides some HMP benefits. **DEEMED COMPLETE:** 09/19/05 **APPROVED:** 1/31/2007 (and 4/17/07)	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: The Lord's Baptist Church **PROJECT DESCRIPTION:** Planned Development Permit to construct 14 single-family detached residences and a public park on a 2.66 gross acre site.	**PROJECT FILE & MAP NUMBER:** PD05-067 (See Private Projects Map, No. 2)	**PROJECT LOCATION:** South side of Fleming Avenue, approximately 1,032 feet southeast of Alum Rock Avenue. **WATERSHED:** Coyote		**PROJECT TYPE:** Residential: Single-family detached.	**SITE SIZE (AC):** 2.66	**NEW IMPERV. AREA (SQFT):** 47,916	**NET IMPERV. AREA (SQFT):** 29,901

[1] Projects that create or replace 10,000 square feet or more of impervious surface area.

Private Projects

SITE DESIGN: This project proposes 14 single-family detached houses on substandard size lots (minimum 3,500 square feet) for a density of 8.6 dwelling units to that acre. Density is low due to the public park where 3 existing well established trees are being preserved. This project incorporates disconnected downspouts and tree preservation.	**SOURCE CONTROL:** Stenciled inlets.	**TREATMENT BMPS:** Media filtration unit and swales.	**NUMERIC CRITERIA:** Yes, flow based. **HMP:** Encouraged, but not required. Media filtration unit and swales provide some HMP benefits. **DEEMED COMPLETE:** 09/21/05 **APPROVED:** 11/17/06	**O&M RESPONSIBILITY:** City shall maintain treatment control measures installed in public streets. Private yard landscaping and maintainance is the responsibility of the homeowner.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Grandview Terrace **PROJECT DESCRIPTION:** Planned Development Permit to construct 45 single-family attached residences on a 2.0 gross acre site.	**PROJECT FILE & MAP NUMBER:** PD05-074 (See Private Projects Map, No. 3)	**PROJECT LOCATION:** Northeast corner of North Capitol Avenue and Grandview Drive. **WATERSHED:** Coyote		**PROJECT TYPE:** Residential: Single-family attached.	**SITE SIZE (AC):** 2.00	**NEW IMPERV. AREA (SQFT):** 51,727	**NET IMPERV. AREA (SQFT):** 46,686
SITE DESIGN: The proposed development of 3-story townhomes are at a density of 23.1 dwelling units per acre on the Capitol Expressway Transit Corridor. Because the soil type is Silt Loam and groundwater depth ranges from 50 to 100 feet for this site, bioretention filter and vegetated swales were able to be used for water quality on approximately a third of the site with the rest of the site being filtered by a mechanical unit. This project incorporates disconnected downspouts, beneficial landscaping, interlocking unit pavers and a bicycle parking area.	**SOURCE CONTROL:** Stenciled inlets.	**TREATMENT BMPS:** Vegetated swale, biorentention, and a mechanical unit.	**NUMERIC CRITERIA:** Yes, flow and volume based. **HMP:** Encouraged, but not required. Biorentention unit and swales provide some HMP benefits. **DEEMED COMPLETE:** 10/20/05 **APPROVED:** 01/12/07	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Messina Gardens (781 N. Capitol Avenue) **PROJECT DESCRIPTION:** Planned Development Permit to construct	**PROJECT FILE & MAP NUMBER:** PD05-075 (See Private Projects Map, No. 4)	**PROJECT LOCATION:** Southwest corner of Capitol Avenue and Mabury Road. **WATERSHED:**		**PROJECT TYPE:** Residential: Single-family attached.	**SITE SIZE (AC):** 8.66	**NEW IMPERV. AREA (SQFT):** 377,230	**NET IMPERV. AREA (SQFT):** 354,596

Private Projects							
89 multi-family attached residential units.		Coyote					
SITE DESIGN: The first of two permits to develop land on previous private open space (Messina farmland). This permit is for 89 single-family attached residential 3-story townhomes on 8.66 of the 10.9 gross acres for a density of 10.2 DU/AC. Soil type (silt loam) and groundwater depth (50-100 feet below grade) made several landscaped-based source control and treatment measures possible in addition to a media filtration device. This project incorporates disconnected downspouts and pervious pavement.	**SOURCE CONTROL:** Stenciled inlets.	**TREATMENT BMPS:** Mechanical unit and biorentention units.	**NUMERIC CRITERIA:** Yes, flow and volume based. **HMP:** Encouraged, but not required. Biorentention unit provides some HMP benefits. **DEEMED COMPLETE:** 10/20/05 **APPROVED:** 07/21/06	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: 305 San Antonio Court **PROJECT DESCRIPTION:** Planned Development Permit to construct 86 affordable multi-family attached residential units on a 2.19 gross acre site.	**PROJECT FILE & MAP NUMBER:** PD05-078 (See Private Projects Map, No. 5)	**PROJECT LOCATION:** East side of Highway 101, at the western terminus of San Antonio Court. **WATERSHED:** Coyote		**PROJECT TYPE:** Residential: Multi-family attached.	**SITE SIZE (AC):** 2.19	**NEW IMPERV. AREA (SQFT):** 49,004	**NET IMPERV. AREA (SQFT):** 40,812
SITE DESIGN: This infill development proposes to maximize this site by providing podium parking and an onsite private park for this family friendly development. Density for this project is 39 dwelling units per acre. This project incorporates disconnected downspouts.	**SOURCE CONTROL:** Stenciled inlets and a covered trash enclosure.	**TREATMENT BMPS:** Vegetated swales.	**NUMERIC CRITERIA:** Yes, flow based. **HMP:** Encouraged, but not required. Swales provide some HMP benifits. **DEEMED COMPLETE:** 10/24/05 **APPROVED:** 07/14/06	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	

Private Projects

Project Name:	Project File & Map Number:	Project Location:	Project Type:	Site Size (Ac):	New Imperv. Area (SqFt):
Oak Knoll (Nakashima Property) **Project Description:** Planned Development Permit to allow the construction of 25 single-family detached residences on a 14.8 gross acre site.	PD05-088 (See Private Projects Map, No. 6)	West side of San Felipe Road approximately 300 feet southerly of Yerba Buena Road. **Watershed:** Coyote	Residential: Single-family detached.	14.80	127,840

Site Design:	Source Control:	Treatment BMPs:	Numeric Criteria:	O&M Responsibility:	Pesticide Reduction Measures:
Development of 2-story single-family detached houses with attached 2-car garages. The project includes a 7.5 acre riparian planting area with total onsite restoration of 1.14 acres to mitigate encroachment into the 100-foot riparian setback from Thompson Creek. This project incorporates beneficial landscaping, disconnected downspouts and tree planting.	Stenciled inlets.	Swales and mechanical units.	Yes, flow based. **HMP:** Encouraged, but not required. Swales provide some HMP benifits. **Deemed Complete:** 11/21/05 **Approved:** 03/28/07	Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	Pesticide reduction is done through education and outreach. The SCVURPPP C3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.

Project Name:	Project File & Map Number:	Project Location:	Project Type:	Site Size (Ac):	New Imperv. Area (SqFt):	Net Imperv. Area (SqFt):
2135 Oakland Road **Project Description:** Planned Development Permit to construct 53 multi-family attached residences on a 2.82 gross acres site.	PD05-089 (See Private Projects Map, No. 7)	West side of Oakland Road, approximately 550 feet north of Rock Avenue. **Watershed:** Coyote	Residential: Single-family attached.	2.82	58,638	19,971

Site Design:	Source Control:	Treatment BMPs:	Numeric Criteria:	O&M Responsibility:	Pesticide Reduction Measures:
The development of 3-story single-family attached townhomes on a formerly industrial site. The project includes a shared private drive and uses interlocking pavers for guest parking areas and 100% landscape-based treatment control measures. This project incorporates disconnected downspouts, tree planting, beneficial landscaping and interlocking unit pavers.	Stenciled inlets.	Vegetated swales and bioretention units.	Yes, flow and volume based. **HMP:** Encouraged, but not required. Swales and bioretention units provide some HMP benefits. **Deemed Complete:** 11/28/05	Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.

Private Projects							
			APPROVED: 08/18/06				
PROJECT NAME: FMC/Arcadia Parking & Office **PROJECT DESCRIPTION:** Planned Development Permit to allow the construction of commercial development and a parking garage.	**PROJECT FILE & MAP NUMBER:** PD06-008 (See Private Projects Map, No. 8)	**PROJECT LOCATION:** Northwest corner of Coleman Avenue and Newhall Street. **WATERSHED:** Guadalupe		**PROJECT TYPE:** Commercial: Parking structure and office building	**SITE SIZE (AC):** 20.68	**NEW IMPERV. AREA (SQFT):** 191,228	**NET IMPERV. AREA (SQFT):** -149,556
SITE DESIGN: Proposed 6-story parking structure with 1-story office building attached surrounded by parking lot and landscaping. The existing condition of the site was primarily paved and impervious; this project decreases impervious suface area and incorporates disconnected downspouts.	**SOURCE CONTROL:** Stenciled inlets and mult-story covered parking.	**TREATMENT BMPS:** Vegetated swales and a mechanical unit.	**NUMERIC CRITERIA:** Yes, flow based. **HMP:** Encouraged, but not required. Swales provide some HMP benefits. **DEEMED COMPLETE:** 01/24/06 **APPROVED:** 01/11/07	**O&M RESPONSIBILITY:** Property owner shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: 1470 North 4th Street **PROJECT DESCRIPTION:** Planned Development Permit to demolish an existing building and construct 100 multi-family residences on a 0.75 gross acre site.	**PROJECT FILE & MAP NUMBER:** PD06-011 (See Private Projects Map, No. 9)	**PROJECT LOCATION:** East side of North 4th Street, approximately 600 feet northerly of Gish Road. **WATERSHED:** Guadalupe		**PROJECT TYPE:** Residential: Multi-family attached (Affordable).	**SITE SIZE (AC):** 0.75	**NEW IMPERV. AREA (SQFT):** 28,037	**NET IMPERV. AREA (SQFT):** -2,094
SITE DESIGN: Proposed development of a 9-story, multi-family affordable housing building with parking on the first two floors and a living greenroof. This project decreases impervious suface area and provides water retention (greenroof) and treatment via mechanical units on site. This project incorporates bicycle and motorcycle parking areas.	**SOURCE CONTROL:** Stenciled inlets and covered trash enclosures.	**TREATMENT BMPS:** Green living roof and a mechancial unit.	**NUMERIC CRITERIA:** Yes, volume and flow based. **HMP:** Encouraged, but not required. Green Roof provides some HMP benefits. **DEEMED COMPLETE:** 04/11/06	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	

Private Projects							
			APPROVED: 06/27/07				
PROJECT NAME: Fruitdale Residential Dwelling Units **PROJECT DESCRIPTION:** Planned Development Permit to construct 91 multi-family residential units on a 1.87 gross acre site.	**PROJECT FILE & MAP NUMBER:** PD06-016 (See Private Projects Map, No. 10)	**PROJECT LOCATION:** Northeast corner of Fruitdale Avenue and Southwest Expressway. **WATERSHED:** Guadalupe		**PROJECT TYPE:** Residential: Multi-family attached.	**SITE SIZE (AC):** 1.87	**NEW IMPERV. AREA (SQFT):** 67,931	**NET IMPERV. AREA (SQFT):** -13,526
SITE DESIGN: Below grade/podium parking that incorporated disconnected downspouts. In addition, this infill development is multi story family development near a light rail station with a density of 45.9 dwelling units to the acre with only 26 at-grade parking spaces. This project incorporates tree planting, beneficial landscaping, and disconnected downspouts and decreases impervious suface area below the one acre threshold in place at the time.	**SOURCE CONTROL:** Stenciled inlets and covered trash enclosures.	**TREATMENT BMPS:** N/A	**NUMERIC CRITERIA:** Not required. **HMP:** Encouraged, but not required. **DEEMED COMPLETE:** 02/09/06 **APPROVED:** 09/28/06	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Stevens Creek European **PROJECT DESCRIPTION:** Planned Development Permit to allow incidental auto service and detail uses in a new approximately 8,000 square foot building, in addition to the existing commercial, automobile dealership, and parking uses currently permitted on a 1.46 gross acre site.	**PROJECT FILE & MAP NUMBER:** PD06-023/ PD06-055 (See Private Projects Map, No. 11)	**PROJECT LOCATION:** Southwest corner of Ardis Avenue and Stevens Creek Boulevard. **WATERSHED:** San Tomas		**PROJECT TYPE:** Commercial: Retail/ auto service.	**SITE SIZE (AC):** 1.46	**NEW IMPERV. AREA (SQFT):** 46,159	**NET IMPERV. AREA (SQFT):** 1,160

Private Projects							
SITE DESIGN: Together these permits were approved to demolish three existing single-family detached homes for the purpose of expanding an existing auto dealership and service establishment. This project incorporates tree planting and beneficial landscaping.	**SOURCE CONTROL:** Stenciled inlets and a covered trash enclosure.	**TREATMENT BMPS:** Mechanical unit.	**NUMERIC CRITERIA:** Yes, flow based. **HMP:** Not requiered. **DEEMED COMPLETE:** 10/06/06 **APPROVED:** 01/14/07	**O&M RESPONSIBILITY:** The developer/owner shall operate and maintain the storm vaults per the manufacturers operation and maintenance manual, in conformance with the San José Building Code (San José Municipal Code, Title 17, Chapter 17.04). Owner/Site Manager to keep track of maintenance and inspection schedule for swales/treatment features on the site.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: The Plaza at Messina Gardens **PROJECT DESCRIPTION:** Planned Development Permit to allow 110 single-family attached residential units in a podium building on a 2.24 gross acre site.	**PROJECT FILE & MAP NUMBER:** PD06-029 (See Private Projects Map, No. 12)	**PROJECT LOCATION:** Northeast corner of Baton Rouge Drive and Cedarville Lane. **WATERSHED:** Guadalupe		**PROJECT TYPE:** Residential: Multi-family attached.	**SITE SIZE (AC):** 2.24	**NEW IMPERV. AREA (SQFT):** 48,413	**NET IMPERV. AREA (SQFT):** 48,413
SITE DESIGN: Project is infill development of part of Messina farmland with 110 units at a density of 58.1 dwelling units to the acre. Units are built on parking podium. Fire access/pedestrian path uses turfblock to provide area for disconnected downspouts from part of the podium roof to infiltrate.	**SOURCE CONTROL:** Podium parking, a covered trash enclosure, and stenciled inlets.	**TREATMENT BMPS:** Mechanical unit and pervious pavers.	**NUMERIC CRITERIA:** Yes, flow and volume based. **HMP:** Encoraged, but not required. **DEEMED COMPLETE:** 05/26/06 **APPROVED:** 01/12/07	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Coyote Creek Homes (Lucretia Avenue) **PROJECT DESCRIPTION:** Planned Development Permit to construct 23 single-family detached residences on a 1.83 gross acre site.	**PROJECT FILE & MAP NUMBER:** PD06-030 (See Private Projects Map, No. 13)	**PROJECT LOCATION:** Northwest corner of Lucretia Avenue and Phelan Avenue. **WATERSHED:** Coyote		**PROJECT TYPE:** Residential: Single-family detached.	**SITE SIZE (AC):** 1.83	**NEW IMPERV. AREA (SQFT):** 44,620	**NET IMPERV. AREA (SQFT):** 31,771

Private Projects						
SITE DESIGN: Project to demolish 5 structures and redevelop with 23 single-family detached homes. Residential density is 14.02 dwelling units per acre. Soil type (silt loam) and groundwater depth (10 to 20 feet) allow for landscape-based treatment control measures on this site. This project incorporates shared driveways and disconnected downspouts.	**SOURCE CONTROL:** Stenciled inlets and a covered trash area.	**TREATMENT BMPS:** Vegetated swales.	**NUMERIC CRITERIA:** Yes, flow based. **HMP:** Encouraged, but not required. Swales provide some HMP benefits. **DEEMED COMPLETE:** 06/08/06 **APPROVED:** 02/16/07	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Hitachi Global Storage Technologies **PROJECT DESCRIPTION:** Phase 1 Improvements Master Planned Development Permit to allow the re-configuration of an existing campus industrial facility including revisions to the site circulation, and the installation of new landscaping, fencing and associated improvements on a 160.6 gross acre site.	**PROJECT FILE & MAP NUMBER:** PD06-032 (PD05-087) (See Private Projects Map, No. 14)	**PROJECT LOCATION:** Area generally bounded by Cottle Road, Monterey Highway, Highway 85 and Manassas Road. **WATERSHED:** Guadalupe	**PROJECT TYPE:** Industrial.	**SITE SIZE (AC):** 160.60	**NEW IMPERV. AREA (SQFT):** 5,614,113	**NET IMPERV. AREA (SQFT):** 6,000
SITE DESIGN: Removal and replacement of existing infrastructure and landscaping represents only a 0.2% increase in impervious surface. Total impervious surface is 5,614,113 square feet or 128.9 acres to provide landscaping, circulation and infrastructure for a 332 acre site. New circulation provides clear access paths to current and planned public transportation stations and pedestrian-oriented commercial development. This project incorporates disconnected downspouts and beneficial landscaping.	**SOURCE CONTROL:** Stenciled inlets.	**TREATMENT BMPS:** Detention basin, vegetated swales, and mechanical units.	**NUMERIC CRITERIA:** Yes, flow and volume based. **HMP:** Required. 2 detention basins provide HMP benefits. **DEEMED COMPLETE:** 06/19/06 **APPROVED:** 08/21/06	**O&M RESPONSIBILITY:** Public streets will be maintained by the City of San José . Private streets/drives (future phases of development) will be maintained by homeowners association in conformance with Section 20.95.120 of the Zoning Ordinance.	**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Evergreen Village Square **PROJECT DESCRIPTION:**	**PROJECT FILE & MAP NUMBER:** PD06-036	**PROJECT LOCATION:** Area bounded by Classico Avenue, Cortona Avenue, Ruby Avenue, and		**PROJECT TYPE:** Commercial: Retail and office.	**SITE SIZE (AC):** 3.30	**NEW IMPERV. AREA (SQFT):** 93,270	**NET IMPERV. AREA (SQFT):** 93,270

Private Projects						
Planned Development Permit to construct two, two-story commercial and office buildings totaling approximately 36,500 gross square feet on a 3.3 gross acre site.	(See Private Projects Map, No. 15)	Village Square. **WATERSHED:** Coyote				
SITE DESIGN: Evergreen Village Square is part of the Smart Growth project Evergreen East Hills Vision Strategy area. Village Square is the radial center of a larger mixed residential development where pedestrian-oriented commercial and office uses are located. Five media filtration units and disconnected downspouts to pervious pavement areas are the primary source and treatment control measures used on this project site adjacent to Fowler Creek. All parking and buildings associated with this project maintain a significant setback from the creek. This project incorporates disconnected downspouts, a plaza area that discharges to pervious pavement, tree planting and beneficial landscaping.	**SOURCE CONTROL:** Stenciled inlets.	**TREATMENT BMPS:** Media filtration unit.and pervious pavement.	**NUMERIC CRITERIA:** Yes, flow and volume based. **HMP:** Encouraged, but not required. Pervious pavement provides some HMP benifits. **DEEMED COMPLETE:** 07/24/06 **APPROVED:** 04/06/07	**O&M RESPONSIBILITY:** The developer/owner shall operate and maintain the bioretention units per the manufacturers operation and maintenance manual, in conformance with the San José Building Code (San José Municipal Code, Title 17, Chapter 17.04). Owner/Site Manager to keep track of maintenance and inspection schedule for treatment features on the site.	**PESTICIDE REDUCTION MEASURES**: Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Coyote Valley Research Park Phase B **PROJECT DESCRIPTION:** Master Planned Development Permit to allow up to approximately 916,000 square feet of campus industrial and research and development on a 35.7 gross acre site.	**PROJECT FILE & MAP NUMBER:** PD06-041 (See Private Projects Map, No. 16)	**PROJECT LOCATION:** East side of Santa Teresa Boulevard approximately 1,750 feet north of Bailey Avenue. **WATERSHED:** Coyote	**PROJECT TYPE:** Master Plan: Industrial/ Research and Development.	**SITE SIZE (AC):** 35.70	**NEW IMPERV. AREA (SQFT):** 790,468	**NET IMPERV. AREA (SQFT):** 790,468
SITE DESIGN: The Master Plan for this site proposes to use self-treating landscape areas and large bioretention drainage areas covered with pervious pavement systems to treat on site runoff in combination with mechanical units in the public right-of-way. Bioretention areas are divided into two categories: those that treat roof runoff and those that treat parking runoff. This project incorporates disconnected downspouts and pervious pavement.	**SOURCE CONTROL:** Stenciled inlets.	**TREATMENT BMPS:** Bioretention cells/filters and mechanical units.	**NUMERIC CRITERIA:** Yes, flow and volume based. **HMP:** Required. Creek improvements provide HMP benefits. **DEEMED COMPLETE:** 08/15/06	**O&M RESPONSIBILITY:** Maintenance of the proposed bioretention cells shall be the responsibility of the property owner. Maintenance of the proposed mechanical units shall be the responsibility of the City of San Jose. All of the proposed units are located within the public street rights-of-way.	**PESTICIDE REDUCTION MEASURES**: Pesticide reduction is done through education and outreach. The SCVURPPP C3 Handbook and the Landscape Maintenance Techniques for Pest Reduction Fact Sheet are posted on the City website.	

Private Projects							
			APPROVED: 06/18/07				
PROJECT NAME: Village Square Homes (Formerly Lou's Village) **PROJECT DESCRIPTION:** Planned Development Permit to allow demolition of an existing restaurant and mixed use building and construction of 11 live-work units and 84 single-family attached residential units, and associated site improvement on a 5.02 gross acre site.	**PROJECT FILE & MAP NUMBER:** PD06-042 (See Private Projects Map, No. 17)	**PROJECT LOCATION:** North side of West San Carlos Street, 650 feet westerly of Meridian Avenue. **WATERSHED:** Guadalupe		**PROJECT TYPE:** Residential: Single-family attached and live-work units.	**SITE SIZE (AC):** 5.02	**NEW IMPERV. AREA (SQFT):** 211,092	**NET IMPERV. AREA (SQFT):** 155,161
SITE DESIGN: This multi-story building incorporates pervious pavers and pavement, shared driveways, and disconnected downspouts on site.	**SOURCE CONTROL:** Stenciled inlets.	**TREATMENT BMPS:** Vegetated swales and mechanical units.	**NUMERIC CRITERIA:** Yes, flow based. **HMP:** Encouraged, but not requiered. Swales provide some HMP benefits. **DEEMED COMPLETE:** 08/15/06 **APPROVED:** 10/25/06	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Paula Villas **PROJECT DESCRIPTION:** Planned Development Permit to demolish 3 existing single-family residences and remove 10 trees to construct 15 single-family attached residential units on a 0.69 gross acre site.	**PROJECT FILE & MAP NUMBER:** PD06-046 (See Private Projects Map, No. 18)	**PROJECT LOCATION:** South side of Paula Street, approximately 160 feet easterly of Meridian Way. **WATERSHED:** Guadalupe		**PROJECT TYPE:** Residential: Single-family attached.	**SITE SIZE (AC):** 0.69	**NEW IMPERV. AREA (SQFT):** 20,822	**NET IMPERV. AREA (SQFT):** 20,400

Private Projects

Site Design:	Source Control:	Treatment BMPs:	Numeric Criteria:	O&M Responsibility:	Pesticide Reduction Measures:
Proposed development of 2 and 3 story townhomes (21 dwelling units/acre) with a mixture of 1-car and 2-car tandem garages with narrow drives off of a common drive. This project incorporates tree planting and beneficial landscaping.	Stenciled inlets and covered trash enclosures.	Mechanical unit with oil baffle.	Yes, flow based. **HMP:** Encouraged, but not requiered. **Deemed Complete:** 08/29/06 **Approved:** 12/20/06	Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.	Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.

Project Name:	Project File & Map Number:	Project Location:	Project Type:	Site Size (Ac):	New Imperv. Area (SqFt):	Net Imperv. Area (SqFt):
Coyote Valley Research Park Fire Station #32 **Project Description:** Planned Development Permit to allow construction of a 7,700 square feet fire station, training tower and other ancillary uses on a 1.12 gross acre site.	PD06-050 (See Private Projects Map, No. 19)	Northwesterly corner of Bailey Avenue and Santa Teresa Boulevard. **Watershed:** Coyote	Institutional: Fire station	1.12	16,295	16,295

Site Design:	Source Control:	Treatment BMPs:	Numeric Criteria:	O&M Responsibility:	Pesticide Reduction Measures:
Because maintenance of this future fire station will be the responsibility of the City, the majority of runoff from the site will be filtered on-site but some will be allowed to flow to the public-right of way and be treated by mechanical units before discharging to a Fischer Creek bypass channel. This project incorporates tree planting, beneficial landscaping and disconnected downspouts.	Covered trash enclosures and stenciled inlets.	Mechanical units.	Yes, flow based. **HMP:** Encouraged, but not requiered. **Deemed Complete:** 09/22/06 **Approved:** 04/25/07	The City of San José is responsible for the maintenance of the underground mechanical units for this site.	Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.

Project Name:	Project File & Map Number:	Project Location:	Project Type:	Site Size (Ac):	New Imperv. Area (SqFt):	Net Imperv. Area (SqFt):
Page Street Condos **Project Description:** Planned Development Permit to demolish two existing two-family dwelling units and construct seven single-family attached residences and associated site improvements on a 0.4 gross acre site.	PD06-053 (See Private Projects Map, No. 20)	East side of Page Street, approximately 200 feet southerly of Douglas Street. **Watershed:** Guadalupe	Residential: Single-family attached.	0.40	12,022	9,450

Private Projects							
SITE DESIGN: This infill development proposes to maximize this site by demolishing two single-family detached homes and building seven single-family attached townhomes in its place for a density of 16.7 dwelling units to the acre. Units share a common drive. This project incorporates disconnected downspouts.	**SOURCE CONTROL:** Stenciled inlets.	**TREATMENT BMPS:** Vegetated swales.	**NUMERIC CRITERIA:** Yes, flow based. **HMP:** Encouraged, but not requiered. Swales provide some HMP benefits. **DEEMED COMPLETE:** 10/04/06 **APPROVED:** 05/04/07	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Calderon Tires **PROJECT DESCRIPTION:** Planned Development Permit to allow the construction of approximately 15,000 square feet of commercial uses on a 0.59 gross acre site.	**PROJECT FILE & MAP NUMBER:** PD06-054 (See Private Projects Map, No. 21)	**PROJECT LOCATION:** Southwest corner of Alum Rock Avenue and McCreery Avenue. **WATERSHED:** Coyote		**PROJECT TYPE:** Commercial: Retail.	**SITE SIZE (AC):** 0.59	**NEW IMPERV. AREA (SQFT):** 19,214	**NET IMPERV. AREA (SQFT):** 9,000
SITE DESIGN: Commercial retail development for a tire sales and installation business with second floor offices uses. Site increases impervious surfaces but upholds smart growth principles by intensifying uses on this redevelopment site. This project incorporates disconnected downspouts and pervious pavement.	**SOURCE CONTROL:** Stenciled inlets.	**TREATMENT BMPS:** Vegetated swale and a mechanical unit.	**NUMERIC CRITERIA:** Yes, flow based. **HMP:** Encouraged, but not required. Swales provide some HMP benefits. **DEEMED COMPLETE:** 10/05/06 **APPROVED:** 06/27/07	**O&M RESPONSIBILITY:** The developer/owner shall operate and maintain the storm vaults per the manufacturers operation and maintenance manual, in conformance with the San José Building Code (San José Municipal Code, Title 17, Chapter 17.04). Owner/Site Manager to keep track of maintenance and inspection schedule for swales/treatment features on the site.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Leigh Avenue Homes **PROJECT DESCRIPTION:** Planned Development Permit to construct 23 single-family detached residences on a 1.68 gross acre site.	**PROJECT FILE & MAP NUMBER:** PD06-058 (See Private Projects Map, No. 22)	**PROJECT LOCATION:** Southeast corner of Foxworthy and Leigh Avenues. **WATERSHED:** Guadalupe		**PROJECT TYPE:** Residential: Single-family detached.	**SITE SIZE (AC):** 1.68	**NEW IMPERV. AREA (SQFT):** 40,095	**NET IMPERV. AREA (SQFT):** -32,967

Private Projects							
SITE DESIGN: Former medical/office building surrounded by parking and some landscaping will be replaced with 23 single-family detached homes at a density of 13.7 dwelling units to the acre. Groundwater depth of 50 to 100 feet below grade and silt loam soil make this an ideal site for landscape-based treatment control measures. This project decreases impervious suface area and incorporates tree planting and beneficial landscaping.	**SOURCE CONTROL:** Stenciled inlets and a covered trash enclosure.	**TREATMENT BMPS:** Vegetated swales.	**NUMERIC CRITERIA:** Yes, flow based. **HMP:** Encoraged, but not requiered. Swales provide some HMP benefits. **DEEMED COMPLETE:** 10/19/06 **APPROVED:** 02/16/07	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Silver Creek Valley Road Retail Center **PROJECT DESCRIPTION:** Planned Development Permit to construct three buildings for a total of 24,000 square feet for commercial uses on a 2.18 gross acre site.	**PROJECT FILE & MAP NUMBER:** PD06-060 (See Private Projects Map, No. 23)	**PROJECT LOCATION:** Southeasterly side of Silver Creek Valley Road, and at the south terminus of Fontanoso Way. **WATERSHED:** Coyote		**PROJECT TYPE:** Commercial: Retail.	**SITE SIZE (AC):** 2.18	**NEW IMPERV. AREA (SQFT):** 82,518	**NET IMPERV. AREA (SQFT):** 82,518
SITE DESIGN: Commercial retail development on a previously vacant site. This project incorporates disconnected downspouts and beneficial landscaping.	**SOURCE CONTROL:** A covered trash enclosure and stenciled inlets.	**TREATMENT BMPS:** Vegetated swales.	**NUMERIC CRITERIA:** Yes, flow based. **HMP:** Encouraged, but not requiered. Swales provide some HMP benefits. **DEEMED COMPLETE:** 11/01/06 **APPROVED:** 04/25/07	**O&M RESPONSIBILITY:** Property owner shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: The Lands of Klassen at Oakland and Rock Avenue **PROJECT DESCRIPTION:** Planned Development Permit to demolish an existing commercial building and two	**PROJECT FILE & MAP NUMBER:** PD06-061 (See Private Projects Map, No. 24)	**PROJECT LOCATION:** North side of Rock Avenue, approximately 450 feet westerly of Oakland Road. **WATERSHED:** Coyote		**PROJECT TYPE:** Residential: Single-family attached.	**SITE SIZE (AC):** 1.02	**NEW IMPERV. AREA (SQFT):** 28,420	**NET IMPERV. AREA (SQFT):** -3,800

Private Projects							
garage structures, and to construct 18 single-family attached residences on a 1.02 acre site.							
SITE DESIGN: Former industrial/commercial site almost entirely paved will be redeveloped with single-family attached housing for a density of 18.4 DU/acre. While soil type is ideal for landscape-based treatment control measures, the groundwater depth on the site is in the range of 0 to 10 feet below grade. This project decreases impervious suface area and incorporates disconnected downspouts to landscape areas with subdrains to a media filtration unit.	**SOURCE CONTROL:** Stenciled inlets.	**TREATMENT BMPS:** Media filtration unit.	**NUMERIC CRITERIA:** Yes, flow based. **HMP:** Encouraged, but not requiered. **DEEMED COMPLETE:** 11/02/06 **APPROVED:** 04/25/07	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Montecito Vista Urban Village **PROJECT DESCRIPTION:** PD05-077 was an approval for the site plan only. PD06-062 is the Planned Development Permit to (1) effectuate the entire PDC06-034 zoning district, (2) provide grading and stormwater details for the entire zoning area, and (3) provide landscaping and architecture details for the two northernmost residential areas (the Siena area which includes 53 and Savona which includes 40 residential units) on an approximately 29.5 gross acre site. The zoning allows for up to 969 residential units, a public park, and 18,000 square feet of commercial space. Pending Planned Development Permit Amendments will provide clearance for the construction of additional units and changes to the Stormwater Control Plan necessary based on unit type changes.	**PROJECT FILE & MAP NUMBER:** PD06-062 (PD05-077) (See Private Projects Map, No. 25)	**PROJECT LOCATION:** Southwest corner of Monterey Road and Goble Lane. **WATERSHED:** Coyote		**PROJECT TYPE:** Residential/ Commercial: Mixed-use.	**SITE SIZE (AC):** 29.5	**NEW IMPERV. AREA (SQFT):** 488,367	**NET IMPERV. AREA (SQFT):** -668,151

Private Projects							
SITE DESIGN: Montecito Vista Urban Village implements several site design, source control and treatment control measures that allow this previously industrial and mobilehome park site to decrease impervious surface. The perimeter EVA is pervious pavement. Units area a mixture single-family attached and multi-family attached units with approximately 22,140 square feet of pervious pavement and disconnected downspouts to common landscape areas for infiltration. The village also includes private open space and a public park, pedestrian paseos, bicycle and motorcycle parking areas, podium parking and some retail/commercial space to discourage car use.	**SOURCE CONTROL:** Stenciled inlets.	**TREATMENT BMPS:** Vegetated swales, a stormwater treatment pond, and media filtration units.	**NUMERIC CRITERIA:** Yes, flow and volume based. **HMP:** Encouraged, but not requiered. Swales and pond provide some HMP benefits. **DEEMED COMPLETE:** 11/02/06 **APPROVED:** 11/28/06	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: San José Water Company New Storage Building **PROJECT DESCRIPTION:** Planned Development Permit for industrial uses on a 1.76 gross acres site.	**PROJECT FILE & MAP NUMBER:** PD06-065 (See Private Projects Map, No. 26)	**PROJECT LOCATION:** East side of Will Wool Drive approximately 400 feet north of Quinn Avenue. **WATERSHED:** Coyote		**PROJECT TYPE:** Industrial: Materials storage.	**SITE SIZE (AC):** 1.76	**NEW IMPERV. AREA (SQFT):** 57,025	**NET IMPERV. AREA (SQFT):** 10,200
SITE DESIGN: San José Water Company project to have a materials storage facility. Site runoff is 100% landscape-based treatment including bermed and walled outdoor storage areas that discharge to vegetated swales. This project incorporates disconnected downspouts.	**SOURCE CONTROL:** Stenciled inlets and a bermed material storage area.	**TREATMENT BMPS:** Vegetated swales.	**NUMERIC CRITERIA:** Yes, flow based. **HMP:** Encouraged, but not required. Swales provide some HMP benefits. **DEEMED COMPLETE:** 11/16/06 **APPROVED:** 03/21/07	**O&M RESPONSIBILITY:** Owner/Site Manager to keep track of maintenance and inspection schedule for swales/treatment features on the site.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: IBM **PROJECT DESCRIPTION:**	**PROJECT FILE & MAP NUMBER:** PD06-066 (See Private	**PROJECT LOCATION:** Northerly side of Bailey Avenue approximately 5,000 feet westerly of Santa Teresa Boulevard.		**PROJECT TYPE:** Industrial.	**SITE SIZE (AC):** 0.98	**NEW IMPERV. AREA (SQFT):** 42,622	**NET IMPERV. AREA (SQFT):** 42,622

Private Projects							
Planned Development Permit to allow the construction of an approximately 110-space parking lot for an existing campus industrial facility.	Projects Map, No. 27)	**WATERSHED:** Coyote					
SITE DESIGN: Expansion of an existing parking facility will discharge runoff to existing infiltration basins that provide flood management benefits for the larger site.	**SOURCE CONTROL:** Stenciled inlets.	**TREATMENT BMPS:** Infiltration basins.	**NUMERIC CRITERIA:** Yes, volume based. **HMP:** Encouraged, but not required. Basins provide some HMP benefits. **DEEMED COMPLETE:** 11/21/06 **APPROVED:** 04/25/07	**O&M RESPONSIBILITY:** Owner/Site Manager to keep track of maintenance and inspection schedule for swales/treatment features on the site.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Merril Gardens at Willow Glen **PROJECT DESCRIPTION:** Planned Development Permit to construct a four story 98-unit Residential Care and Service Facility (Senior Assisted Living) above an below grade parking facility on a 1.21 gross acre site.	**PROJECT FILE & MAP NUMBER:** PD06-070 (See Private Projects Map, No. 28)	**PROJECT LOCATION:** Along the southern side of Curci Drive and at the intersection of Curci Drive and Meridian Avenue. **WATERSHED:** Guadalupe		**PROJECT TYPE:** Residential: Care & service facility.	**SITE SIZE (AC):** 1.21	**NEW IMPERV. AREA (SQFT):** 38,584	**NET IMPERV. AREA (SQFT):** 16,575
SITE DESIGN: This residential care and service facility has no at-grade parking. All parking is below grade with the 98 units built on top of the podium. Due to the size and density of the site, beneficial landscape areas and a media filtration unit combine to provide treatment control for the site. This project incorporates tree planting and disconnected downspouts.	**SOURCE CONTROL:** Stenciled inlets.	**TREATMENT BMPS:** Media filtration unit.	**NUMERIC CRITERIA:** Yes, flow based. **HMP:** Encouraged, but not required. **DEEMED COMPLETE:** 12/15/06 **APPROVED:** 04/18/07	**O&M RESPONSIBILITY:** Owner/Site Manager to keep track of maintenance and inspection schedule for swales/treatment features on the site.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	

Private Projects							
PROJECT NAME: 1179 Campbell Avenue **PROJECT DESCRIPTION:** Planned Development Permit to allow demolition of existing buildings and construction of 36 single-family detached residential units on a 2.67 gross acre site.	**PROJECT FILE & MAP NUMBER:** PD07-027 (See Private Projects Map, No. 29)	**PROJECT LOCATION:** Southwesterly side of Campbell Avenue 950 ft northwesterly of Newhall Street. **WATERSHED:** Guadalupe		**PROJECT TYPE:** Residential: Single-family detached.	**SITE SIZE (AC):** 2.67	**NEW IMPERV. AREA (SQFT):** 75,070	**NET IMPERV. AREA (SQFT):** -36,864
SITE DESIGN: Development of 2- and 3-story single family detached homes built on a formerly industrial site. This project decreases impervious suface area. Due to extremely shallow groundwater depth (2-3 feet in some places) and soil and groundwater contamination on neighboring sites, landscape-based solutions were not an option. Project uses 5 mechanical units, one in each of its drainage areas to treat water before discharging. This project incorporates disconnected downspouts for overland flow.	**SOURCE CONTROL:** Stenciled inlets.	**TREATMENT BMPS:** Inlet filters and mechanical units.	**NUMERIC CRITERIA:** Yes, flow based. **HMP:** Encouraged, but not required **DEEMED COMPLETE:** 03/26/07 **APPROVED:** 06/27/07	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Kentwood Townhomes **PROJECT DESCRIPTION:** Planned Development Permit to construct 56 single-family attached residences, one detached residence and 8,000 square feet of retail space on a 4.2 gross acres site.	**PROJECT FILE & MAP NUMBER:** PD07-042 (See Private Projects Map, No. 30)	**PROJECT LOCATION:** Area generally bounded by Kentwood Avenue, Highway 85 and S. De Anza Blvd. Additional APNs: 359-35-024, 359-35-026, 359-35-020, 359-35-025, 359-35-026. **WATERSHED:** Calabazas		**PROJECT TYPE:** Residential & Commercial: Mixed-use.	**SITE SIZE (AC):** 4.20	**NEW IMPERV. AREA (SQFT):** 114,998	**NET IMPERV. AREA (SQFT):** 8,712
SITE DESIGN: Mixed use development of attached townhomes, single-family detached homes and retail commercial space. Project's residential density is 16 dwelling units per acre. This project incorporates disconnected downspouts.	**SOURCE CONTROL:** Stenciled inlets.	**TREATMENT BMPS:** Vegetated swales and media filtration unit.	**NUMERIC CRITERIA:** Yes, flow based. **HMP:** Encouraged, but not requiered. Swales provide some HMP benefits. **DEEMED COMPLETE:** 05/01/07	**O&M RESPONSIBILITY:** Homeowners Association shall maintain treatment measures in conformance with Section 20.95.120 of the Zoning Ordinance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	

Private Projects							
			APPROVED: 06/27/07				
PROJECT NAME: Greenwaste Recovery Recycling Center **PROJECT DESCRIPTION:** SP06-024 allowed for the expansion of operations at the Green Waste Recovery Facility from 935 tons per day to 2000 tons per day for the processing of recyclables and compostable waste on this site. SP06-094 is a Special Use Permit to construct a 43,200 square foot building at the same location on a 6.05 gross acre site. This project decreases impervious suface area	**PROJECT FILE & MAP NUMBER:** SP06-094 (and SP06-024) (See Private Projects Map, No. 31)	**PROJECT LOCATION:** North side of Charles Street approximately 750 feet westerly of Oakland Road. **WATERSHED:** Guadalupe		**PROJECT TYPE:** Industrial: Recycling facility.	**SITE SIZE (AC):** 6.05	**NEW IMPERV. AREA (SQFT):** 257,913	**NET IMPERV. AREA (SQFT):** -354
SITE DESIGN: The approval of SP06-024 allowed to the expansion of recycling activities at this site. SP06-094 is a related permit to construct a nearly one acre warehouse to conduct the recycling uses. The permit also covered site improvements to landscaping and parking areas. A CDS unit will be installed to treat runoff from 97.8% of the site. The project reduces the amount of impervious surface area.	**SOURCE CONTROL:** Covered trash enclosures and stenciled inlets.	**TREATMENT BMPS:** Media filtration unit.	**NUMERIC CRITERIA:** Yes, flow based. **HMP:** Encouraged, but not requiered. **DEEMED COMPLETE:** 11/1/2006 **APPROVED:** 6/27/07	**O&M RESPONSIBILITY:** Owner/Site Manager to keep track of maintenance and inspection schedule for swales/treatment features on the site.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Service Street Warehouse **PROJECT DESCRIPTION:** Site Development Permit to demolish all existing structures and construct approximately 21,504 square foot building for warehouse and office uses on an approximately 1.10 gross acre site.	**PROJECT FILE & MAP NUMBER:** H05-052 (See Private Projects Map, No. 32)	**PROJECT LOCATION:** North side of Service Street, 160 feet easterly of Old Oakland Road. **WATERSHED:** Coyote		**PROJECT TYPE:** Commercial: Office space.	**SITE SIZE (AC):** 1.10	**NEW IMPERV. AREA (SQFT):** 36,821	**NET IMPERV. AREA (SQFT):** -10,070
SITE DESIGN: This industrial site was previously entirely paved. Redevelopment of the site includes new landscape areas with shallow ponds, a vegetated swale, a biofiltration area, and disconnected downspouts. This project reduces the impervious suface area below	**SOURCE CONTROL:** Covered recycling bins and stenciled inlets.	**TREATMENT BMPS:** Vegetated swale and biofiltration units.	**NUMERIC CRITERIA:** Not required. **HMP:** Encouraged, but not requied. Swales provide some HMP	**O&M RESPONSIBILITY:** Owner/Site Manager to keep track of maintenance and inspection schedule for BMPs and treatment features on the site.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted

Site Design: Permeable paver system is used to reduce imperviousness of new 10,000 square foot parking lot. This project incorporates tree planting, beneficial landscaping and permeable pavers.	**Source Control:** Stenciled inlets.	**Treatment BMPs:** Pervious pavers.	**Numeric Criteria:** Volume based. **HMP:** Encouraged, but not required. Pervious pavers provide some HMP benefits. **Deemed Complete:** 6/27/2005 **Approved:** 1/11/07	**O&M Responsibility:** Owner/Site Manager to keep track of maintenance and inspection schedule for swales/treatment features on the site.	**Pesticide Reduction Measures:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.

Public Projects							
Project Name: Fire Station No. 12 **Project Description:** Fire station consist of a two-story, 6,200 square foot station with two bays.	**Project File & Map Number:** CIP 1982 (See Public Projects Map, No. 1)	**Project Location:** At the corner of Cahalan Avenue and Calero Avenue. **Watershed:** Coyote		**Project Type:** Insitutional.	**Site Size (Ac):** 0.60	**New Total Impr. Area (SqFt):** 6,326	**Net Impr. Area (SqFt):** N/A
Site Design: Minimized directly connected impervious surface and includes beneficial landscaping.	**Source Control:** N/A	**Treatment BMPs:** Vegetative swale and mechanical unit.	**Numeric Criteria:** N/A **HMP:** Encouraged, but not required. Swales provide some HMP benefits. **Funded:** Prior to 10/15/03 **Design Complete:** 8/31/2006	**O&M Responsibility:** Treatment measures are maintained by City during routine maintenance.		**Pesticide Reduction Measures:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
Project Name: Fire Station No. 17 **Project Description:** Relocated Public Safety Bond-funded fire station to be constructed.	**Project File & Map Number:** CIP 2197 (See Public Projects Map, No. 2)	**Project Location:** Corner of Blossom Hill and Coniston Way. **Watershed:** Coyote		**Project Type:** Institutional.	**Site Size (Ac):** 0.60	**New Total Impr. Area (SqFt):** 6,300	**Net Impr. Area (SqFt):** N/A

Public Projects							
SITE DESIGN: Minimized directly connected impervious surface, multi-story building minimized overall impervious surface, curb cuts to surrounding landscape, and disconnected downspouts to landscape pocket splash blocks.	**SOURCE CONTROL:** Covered fuel area and direct wash area to underground storm wash down filter.	**TREATMENT BMPS:** Trench drain and a mechanical unit.	**NUMERIC CRITERIA:** N/A **HMP:** Encouraged, but not required. **FUNDED:** Prior to 10/15/03 **DESIGN COMPLETE:** 7/7/2006	**O&M RESPONSIBILITY:** Treatment measures are maintained by City during routine maintenance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Santa Teresa Branch Library **PROJECT DESCRIPTION:** Replacement of an existing branch library to a 22,000 sq. ft. facility with a parking lot.	**PROJECT FILE & MAP NUMBER:** CIP 1317 (See Public Projects Map, No. 3)	**PROJECT LOCATION:** 290 International Circle. **WATERSHED:** Coyote		**PROJECT TYPE:** Institutional.	**SITE SIZE (AC):** 1.56	**NEW TOTAL IMPR. AREA (SQFT):** 57,250	**NET IMPR. AREA (SQFT):** N/A
SITE DESIGN: Minimized directly connected impervious surface, disconnected downspouts, tree preservation, bicycle parking, and proximity to transit.	**SOURCE CONTROL:** N/A	**TREATMENT BMPS:** Mechanical unit and vegetative swales.	**NUMERIC CRITERIA:** Not required, but sized to include flow based treatment. **HMP:** Encouraged, but not required. Swales provide some HMP benefits. **FUNDED:** Prior to 10/15/03 **DESIGN COMPLETE:** 6/4/2007	**O&M RESPONSIBILITY:** Treatment measures are maintained by City during routine maintenance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Roosevelt Community Center - Package II **PROJECT DESCRIPTION:** The scope of work on this park includes a new 30,000 sq. ft. community center, parking, site improvements and landscaping. The City of San José Environmental Services Department donated funds to help the park install eco-friendly features. For example, an	**PROJECT FILE & MAP NUMBER:** CIP 1442 (See Public Projects Map, No. 4)	**PROJECT LOCATION:** 901 East Santa Clara Street. **WATERSHED:** Coyote		**PROJECT TYPE:** Institutional.	**SITE SIZE (AC):** 13.72	**NEW TOTAL IMPR. AREA (SQFT):** 83,400	**NET IMPR. AREA (SQFT):** N/A

Public Projects							
educational art exhibit treats stormwater and illustrates the shape of the Coyote Watershed.							
SITE DESIGN: Even though the total size of the site was 13.72 acres, only 2.96 acres were disturbed. The project minimizes directly connected impervious surfaces, preserves natural areas and trees, features a multi-story building and includes bicycle parking. Additional site design features include effeciant irrigation using recycled water, beneficial landscaping with curb cuts, disconnected downspouts with overflow drains to planters and art pieces.	**SOURCE CONTROL:** Covered trash and storage areas.	**TREATMENT BMPS:** Vegetated swales, trench drains, pervious concrete and extended detention basins.	**NUMERIC CRITERIA:** Not required, but sized to include flow and volume based treatment. **HMP:** Encouraged, but not required. Swales, pervious concrete and basins provide some HMP benefits. **FUNDED:** Prior to 10/15/03 **DESIGN COMPLETE:** 8/21/2006	**O&M RESPONSIBILITY:** Treatment measures are maintained by City during routine maintenance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Happy Hollow Park & Zoo Phase II **PROJECT DESCRIPTION:** The scope of work includes feasibility, design and construction of the approximately 12 acres of renovation to the attractions and zoo area and improve approx. 4 acres of new zoo and new pedestrian bridge. The total 16.5 acre park including a pedestrian bridge, 12 buildings (ticket booths, education, administration, retail, concessions, guest services, animal commisary, animal health care, barn and 2 restrooms), 7 green roofs, small animal exhibits, animal petting exhibit, childrens attractions and rides, party areas, refurbishment of a signature ride, fencing, paving and walkways, service areas, renovation of existing features landscape and irrigation and signage.	**PROJECT FILE & MAP NUMBER:** CIP 2920 (See Public Projects Map, No. 5)	**PROJECT LOCATION:** Happy Hollow Park & Zoo at Story and Senter Roads in Kelley Park. **WATERSHED:** Coyote		**PROJECT TYPE:** Recreational	**SITE SIZE (AC):** 16.50	**NEW TOTAL IMPR. AREA (SQFT):** 185,000	**NET IMPR. AREA (SQFT):** N/A

Public Projects							
SITE DESIGN: Minimized directly connected impervious surface, preserved natural areas, storm water management system, pervious asphalt concrete paving, narrow streets/driveways, bicycle parking, native mitigation planting, maintenance and monitoring, and LEED certification. Additional site design features include roof runoff controls, grading, and use of recycled irrigation water and toilet water.	**SOURCE CONTROL:** Alternative building material, abatement of asbestos and lead containing materials, and covered outdoor storage.	**TREATMENT BMPS:** Vegetated swales, mechanical unit, trench drain, seven green roofs, and porous concrete.	**NUMERIC CRITERIA:** Not required, but sized to include flow and volume based treatment. **HMP:** Encouraged, but not required. Swales, green roofs and porous concrete provide HMP benefits. **FUNDED:** Prior to 10/15/03 **DESIGN COMPLETE:** 5/31/2007	**O&M RESPONSIBILITY:** Treatment measures are maintained by City during routine maintenance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Central Service Yard, Phase II **PROJECT DESCRIPTION:** The project is to design and construct a shop/maintenance, a fleet maintenance and a vehicle wash facility and finish an existing building at 1661Senter Rd. to accommodate relocaing the Main Yard services to the Central Service Yard.	**PROJECT FILE & MAP NUMBER:** CIP 0684 (See Public Projects Map, No. 6)	**PROJECT LOCATION:** 1661 Senter Road. **WATERSHED:** Coyote		**PROJECT TYPE:** Institutional	**SITE SIZE (AC):** 22.00	**NEW TOTAL IMPR. AREA (SQFT):** 322,344	**NET IMPR. AREA (SQFT):** N/A
SITE DESIGN: Even though the total size of the site was 22 acres, only 7.40 acres were disturbed. Minimized directly connected impervious surface and bicycle parking. Project is a design-built process.	**SOURCE CONTROL:** Used recycled water for vehicle washing areas with overflow to sanitary sewer, covered parking, covered trash enclosures and stenciled inlets.	**TREATMENT BMPS:** Vegetated swales and a mechanical unit.	**NUMERIC CRITERIA:** Not required, but sized to include flow based treatment. **HMP:** Encouraged, but not required. Swales provide some HMP benefits. **FUNDED:** Prior to 10/15/03 **DESIGN COMPLETE:** 3/21/2007	**O&M RESPONSIBILITY:** Treatment measures are maintained by City during routine maintenance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	

Public Projects							
PROJECT NAME: Willow Glen Branch Library **PROJECT DESCRIPTION:** New 13,338 sq. ft. branch library which replaces an existing 8,330 sq. ft. library on the same site. The total area of the project site is 1.0 acre.	**PROJECT FILE & MAP NUMBER:** CIP 1320 (See Public Projects Map, No. 7)	**PROJECT LOCATION:** 1157 Minnesota Ave., San José, CA. **WATERSHED:** Guadalupe		**PROJECT TYPE:** Institutional	**SITE SIZE (AC):** 1.00	**NEW TOTAL IMPR. AREA (SQFT):** 42,748	**NET IMPR. AREA (SQFT):** N/A
SITE DESIGN: Project includes pavers at exterior areas, LEED Certified, tree conservation, bicycle parking, effecient irregation, disconnected downspouts, curb cuts and flush curbs surrouning landscape.	**SOURCE CONTROL:** N/A	**TREATMENT BMPS:** Vegetated swales.	**NUMERIC CRITERIA:** N/A **HMP:** Encouraged, but not required. Swales provide some HMP benefits. **FUNDED:** Prior to 10/15/03 **DESIGN COMPLETE:** 9/1/2006	**O&M RESPONSIBILITY:** Treatment measures are maintained by City during routine maintenance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	
PROJECT NAME: Pearl Avenue Branch Library **PROJECT DESCRIPTION:** New 13,884 sf branch library which replaces an existing 7,111 sf library on the same site. The total area of the project site is 1.14 acre.	**PROJECT FILE & MAP NUMBER:** CIP 1314 (See Public Projects Map, No. 8)	**PROJECT LOCATION:** 4270 Pearl Avenue. **WATERSHED:** Guadalupe		**PROJECT TYPE:** Institutional	**SITE SIZE (AC):** 1.14	**NEW TOTAL IMPR. AREA (SQFT):** 35,660	**NET IMPR. AREA (SQFT):** N/A
SITE DESIGN: Project features proximity to transit, bicycle parking, and disconnected downspouts with splash boxes.	**SOURCE CONTROL:** N/A	**TREATMENT BMPS:** Infiltration basins with imported soil in parking median and sides of parking, vegetated swale with central cobble stone path and perforated subdrain system.	**NUMERIC CRITERIA:** N/A **HMP:** Encouraged, but not required. Swales and basins provide HMP benefits. **FUNDED:** Prior to 10/15/03 **DESIGN COMPLETE:** 8/1/2006	**O&M RESPONSIBILITY:** Treatment measures are maintained by City during routine maintenance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	

Public Projects							
PROJECT NAME: Luna Park **PROJECT DESCRIPTION:** Turnkey Park that is a portion of a greater land development project.	**PROJECT FILE & MAP NUMBER:** PD05-032 (See Public Projects Map, No. 9)	**PROJECT LOCATION:** Old Berryessa and Oakland Road. **WATERSHED:** Coyote		**PROJECT TYPE:** Recreational	**SITE SIZE (AC):** 9.60	**NEW TOTAL IMPR. AREA (SQFT):** 313,632	**NET IMPR. AREA (SQFT):** N/A
SITE DESIGN: This 1.2 acre park will collect and treat runoff from a 9.6 acre development that includes Modern Ice residential development. The park minimizes directly connected impervious surface areas, incorporates beneficial landscaping, bicycle racks, effecient irrigation and recycled water.	**SOURCE CONTROL:** Stenciled inlets.	**TREATMENT BMPS:** Vegetated swales and infiltration trenches.	**NUMERIC CRITERIA:** Yes, flow based. **HMP:** Encouraged, but not required. Swale provides some HMP benefits. **FUNDED:** 7/22/2005 **DESIGN COMPLETE:** 5/22/2007	**O&M RESPONSIBILITY:** Treatment measures are maintained by City during routine maintenance.		**PESTICIDE REDUCTION MEASURES:** Pesticide reduction is done through education and outreach. The SCVURPPP C.3 Handbook and the Landscape Maintenance Techniques for the Pest Reduction Fact Sheet are posted on the City website.	

Private Projects Map

Public Projects Map

Standard Operating Procedure
BMP O&M VERIFICATION PROGRAM

Overview

The City of San Jose's New and Redevelopment (NRD) Post-Construction BMP Operation and Maintenance Verification Program is a multi-department effort. The Departments of Environmental Services (ESD), Public Works (PW), and Planning, Building & Code Enforcement (PBCE) work together to verify that maintenance of Post-Construction BMPs is conducted as required by Provision C.3 of the stormwater permit. The key components of this program include BMP Tracking, Inspection, Enforcement and Follow Up, and Reporting.

PBCE is responsible for BMP Tracking and supports escalated enforcement if needed to achieve compliance. ESD's Watershed Enforcement Section is responsible for receiving BMP Tracking information, conducting inspections on a subset of BMPs, and performing enforcement and follow up as needed. ESD's Urban Runoff Section is responsible for compiling program data and reporting results annually to the Water Board.

BMP Tracking

Information on BMPs required by Provision C.3 is collected throughout the development review process. Final information on BMPs is available to inspectors when construction is complete.

Table 1: Procedure for BMP Data Tracking and Compilation

STEP	RESPONSIBILITY	ACTION
1	PBCE – Planning Division Planners	1. Collect and document information on BMPs for all projects that requires C.3 Treatment Devices, which are usually listed on the Stormwater Control Plan Sheet (SCP) of the submitted design plan set. Information must include description of BMP, location, BMP owner, responsible party for maintenance or any available contact info, O&M requirement mechanism, and any additional conditions imposed related to BMP O&M.
2	PW – TD&S – Urban Runoff Coordinator	2. Track projects with Stormwater Control Plan that have been issued Grading Permits.
3	PBCE – Building Division – Plan Check Engineer/ Urban Runoff Coordinator	3. Compile annually (each July) and provide to ESD a data file of all BMPs and projects which have been issued Certificate of Occupancy during the previous fiscal year.

Inspection

ESD selects sites for inspection based on a list of constructed sites obtained from Urban Runoff Coordinator in the Building Division and based on AOCs of previously inspected sites. All projects constructed during the previous fiscal year are inspected; inspections and follow up procedures are consistent with the City's Industrial and Commercial Discharges (IND) Program.

Table 2 summarizes the procedure for inspection of BMPs under this program. The Watershed Enforcement Section of the Watershed Protection Division has one environmental inspector assigned to inspect new development projects.

Table 2: Procedure for BMP Inspection

STEP	RESPONSIBILITY	ACTION
1	ESD – WE – Senior Environmental Inspector	1. Assign all projects issued Certificate of Occupancy for initial inspections. 2. Assign other inspections based on AOC Frequency Schedule in Table 5.
2	ESD – WE – Environmental Inspector (EI)	1. Prior to inspections, inspectors fill out the SCVURPPP Standard Stormwater Treatment BMP Inspection Data Collection Form. ➢ Collect all background information on the site initially submitted by PBCE. ➢ Review online data for site plans/asbuilt drawings. ➢ Collect maintenance standards from on line sources or city manuals for maintenance fact sheets of the specific BMP listed on plan. ➢ Check site for previous inspection results. ➢ Check for necessary procedures such as underground confined space entry. 2. If ownership changed, update contact information.
3	ESD – WE – EI	Perform visual inspection of treatment BMP by following the SCVURPPP Standard Stormwater Treatment BMP Inspection Data Collection Form and refer to SCVURPPP Table labeled "Potential Inspection Results"; fill out one form per site for all relevant BMPs inspected. ➢ If immediate threat to storm sewer system or creek follow Watershed Enforcement Response Plan (WERP) listed in Chapter 4 Appendix C of the Watershed Enforcement Training and Procedures Manual to find appropriate citation type and amount. ➢ If BMP is functional and maintained, record inspection result. Distribute BMP Maintenance Fact Sheets from C.3 Handbook or CASQA Manual and schedule follow-up inspection if necessary. ➢ If BMP is non-functional, record result and continue to Table 3.

Enforcement and Follow Up

Table 3 summarizes the enforcement procedures for BMP Inspections. ESD's Watershed Enforcement is the first tier of enforcement with PBCE Code Enforcement involved to employ the land use permit as the basis for enforcement.

Table 3: Enforcement Procedure for BMP

STEP	RESPONSIBILITY	ACTION
1	ESD – WE – Environmental Inspector (EI)	1. Issue Official Warning Notice including description of violation, corrective actions required and compliance date. 2. Re-inspect after compliance date. a. If violation is corrected, deadfile case and follow Reporting Procedures b. If violation continues, proceed to Step 2
2	ESD – WE – EI	1. Within 48 hours, refer violation via e-mail to Code Enforcement Administrator including the following: a. Field Inspection Notes b. Official Warning Notice c. Planning Permit Condition Violation Number d. Digital picture of initial violation and re-inspection

STEP	RESPONSIBILITY	ACTION
		e. Signed Photo Evidence Affidavit f. Recommended Compliance Timeline
3	PBCE – CE – Code Enforcement Administrator (CEA)	1. Within 24 hours, review referral for completeness. Contact EI if indicated. 2. If complete, open case in Code Enforcement System (CES) within 24 hours. 3. Within 48 hours, Issue Compliance Order to Responsible Person(s) including compliance date. Send an electronic copy to EI.
4	ESD – WE – EI	1. After compliance date, re-inspect for compliance. a. If compliance is achieved, advise CEA to deadfile case in CES. Follow reporting requirements. b. If compliance is not achieved, document violation (See Step 2) and notify CEA.
5	PBCE - Code Enforcement Administrator (CEA)	1. Within 5 working days, develop Notice of Hearing and notify Responsible Person(s). 2. Schedule issue before the Appeals Hearing Board (AHB). 3. Notify EI to attend AHB to provide testimony.

Reporting

Table 4 summarizes the reporting procedures for the O&M Verification Program for BMPs. The Environmental Inspector logs the inspection information on both the SCVURPPP Standard Stormwater Treatment BMP Inspection Data Collection Form and enters inspection results in a city designated database.

Table 4: Reporting Procedure

STEP	RESPONSIBILITY	ACTION
1	ESD – WE – Environmental Inspector	1. Log inspection information using SCVURPPP Standard Stormwater Treatment BMP Inspection Data Collection Form. 2. Transfer inspection data to EEDMS Database.
2	ESD – UR	1. Collect data from EE. 2. Compile all inspection information annually and report in NRD Summary Tables of the Annual Report.

Table 5: Area of Concern (AOC) Frequency Inspection Table

	City Regulated Facilities The City of San Jose will conduct inspections of New and Redevelopment Projects as identified below:
All New and Redevelopment Projects:	2 or more AOCs over a five year period – inspect every year 1 AOC over a five year period – inspect every two years 0 AOC over a five year period – inspect every five years
Facilities for which a referral or ICID complaint is received:	As soon as practicable for violations every year until they meet the above criteria.

Sample Types of AOC's:

			CHECK
	Not working/ Failed	Example: Significant Engineering Design Flaws such as it was misplaced by construction workers, water is not draining to it.	
	Removed	Example: Home Owner Association (HOA) covered vegetation with impervious surface.	
	Inoperable/ Damaged	Examples: ➢ Wrong type of vegetation ➢ Eroded sides ➢ Plants were not maintained mowed or irrigated ➢ Trash/ Debris ➢ Obnoxious Odors ➢ Sediment accumulations ➢ Clogged or obstructed inlets ➢ Soggy soil/ standing water ➢ Mosquito habitat	
Also see SCVURPPP Stormwater Treatment BMP Inspection Data Form			

List of Acronyms:

AOC:	Area of Concern
AHB:	Appeals Hearing Board
BMP:	Best Management Practice
CEA:	Code Enforcement Administrator
CES:	Code Enforcement System
EEDMS:	Environmental Enforcement Data Management System
EI:	Environmental Inspector
ESD:	Environmental Services Department
ESD-Senior:	Senior Environmental Engineer in the Department
ICID:	Illicit Connection, Illegal Dumping
IND:	Industrial and Commercial Discharges
PBCE:	Public Building Code Enforcement
PW:	Public Works
SCP:	Stormwater Control Plan Sheet
UR:	Urban Runoff
WE:	Watershed Enforcement Section

4. CON: Construction Inspection

4.A CON Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
CON 1	**Site Housekeeping** The City ensures through a construction inspection program that construction contractors properly store, use, and dispose of construction materials, chemicals, and wastes at construction sites and prevent illicit discharges to storm drains and watercourses.			
CON 1.A	Track and document incidents of housekeeping issues at construction sites	Ongoing	Done FY 06-07 and ongoing. ESD, PW, and PBCE Building inspectors tracked and documented incidents of housekeeping issues at construction sites during FY 06-07 and these records are on file for review. ESD inspectors documented housekeeping issues at 40 sites, PW inspectors documented housekeeping issues at 76 sites, and Building inspectors documented housekeeping issues at 44 sites. Approximately 347 total housekeeping issues were found, with some sites having multiple issues. ESD inspectors documented 91 housekeeping issues, PW inspectors documented 131 housekeeping issues, and Building inspectors documented 125 issues. PW New Development staff found similar housekeeping issues this FY compared to last FY. Issues included no cover on dirt stockpile/dumpsters, inadequate inlet protection, maintenance of rock construction entrances, maintenance of perimeter protection, improper installation of perimeter protection, and tracking of dust and mud on public streets. PW Engineering and Construction Services staff found improper inlet protection, improper wash down of pavement or sidewalks, improper saw cutting operations, inadequate cover on stockpiles and/or dumpsters, tracking of mud on streets, and improper gutter cleaning.	PBCE-Bldg, PW, ESD-WE
CON 2	**Local Ordinance** For development projects with significant erosion potential and planned construction activity during the wet season, the City ensures, through a construction inspection program, that erosion and/or sediment control measures are implemented in accordance with local ordinances and project conditions of approval and maintained as needed during construction.			
CON 2.A	Maintain a program for identifying and conditioning projects with significant erosion potential and planned wet season activity.	Ongoing	Done FY 06-07 and ongoing. ESD, PW, and PBCE Building inspectors continued to implement a construction inspection program for identifying and conditioning projects with significant erosion potential and planned wet season activity. PW conducted 81 pre-wet season active construction site	PW, PBCE-Bldg

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
			inspections, PBCE Building conducted 181 pre-wet season site inspections, and ESD Watershed Enforcement conducted 56 pre-wet season site inspections. A total of 318 pre-rainy season site inspections were conducted, which includes repeat visits to the same site.	
CON 2.B	Identify ordinance changes needed to conduct inspections.	As Needed	No changes to existing ordinances were required in FY 06-07.	PW, ESD-WE, PBCE-Bldg
CON 3	**Construction Inspection Frequency** The City inspects construction sites for adequacy of stormwater control measures. The frequency of inspections for active sites is at least once per month, or more frequently based on size of project, site conditions, precipitation, & project's potential impact on stormwater quality.			
CON 3.A	Maintain and update SOPs for construction inspection program.	As Needed	Done FY 06-07. SOPs were maintained and implemented for construction inspections. No updates were required.	PW, ESD-WE, PBCE-Bldg
CON 3.B	Document inspections of active construction sites.	Ongoing	Done FY 06-07. ESD, all PW Divisions, and PBCE Building inspectors documented inspections of active construction sites in San Jose that were subject to inspection during FY 06-07. These records are on file for review. PW inspected approximately 290 active construction sites and ESD Watershed Enforcement inspected approximately 71 sites. The total number of inspections (including repeat inspections to same site) completed by ESD was approximately 267. PW conducted approximately 486 inspections. In addition to the inspections listed above, PBCE Building inspectors incorporate stormwater inspections into their routine building inspections. Outcomes are documented only if stormwater issues are observed. 732 issues were documented out of the over 30,000 inspections PBCE – Building conducted in FY 06-07.	PW, ESD-WE, PBCE-Bldg
CON 3.C	Evaluate the effectiveness of the construction inspection program and make improvements, as necessary.	Annually	Done FY 06-07. The coordination meetings amongst PBCE - Building, ESD, and Public Works inspectors continue to be a valuable tool to maintain and improve communication and coordination amongst inspectors in all three departments. Meetings were held 10/20/2006, 1/31/2007, and 4/24/2007 amongst the citywide supervisors to discuss erosion and sediment control construction inspections, tracking data, and sharing information. Citywide trainings were given on erosion and sediment control activities at construction sites for PBCE Building, Public Works, and Environmental Services construction inspectors on October 11, 2006 and October 12, 2006. Approximately 100 inspectors attended.	PW, ESD-WE, PBCE-Bldg

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
			BMP topics were discussed at PW and Building inspector staff meetings throughout the year. Short one topic BMP trainings were held several times during the wet season in the various construction inspection work groups. Approximately 136 PW and PBCE inspectors attended one or more of the 20 training sessions. Training continues to be an effective tool for informing inspectors of what to look for on construction sites. See Section 13.D: *Municipal Employee Training Summary*. ESD Watershed Enforcement inspectors continue to attend pre-construction meetings for public projects where they distribute and discuss erosion and sediment control BMPs with contractors and Public Works project staffs. These meetings help educate contractors on available BMPs to implement at construction sites.	
CON 4	**Wet Season Preparation** Prior to the beginning of the wet season each year, the City inspects all sites requiring erosion and/or sediment control plans, to ensure that measures have been taken to minimize erosion and discharges of sediment from disturbed areas.			
CON 4.A	Review and revise procedures for construction inspection staff regarding wet season construction requirements.	As Needed	Done FY 06-07. Procedures for wet season preparation were reviewed and found to be adequate with no changes identified. Building inspection staff discussed the revised construction inspection procedures for building inspectors during the October 11 and October 12, 2006 erosion & sediment control annual training for inspectors.	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD
CON 4.B	Document pre-season inspection of construction sites to ensure adequate implementation of winterizing BMPs prior to the wet season.	Ongoing	Done FY 06-07 and ongoing. The City documented pre-season inspection of construction sites to ensure adequate implementation of winterizing BMP prior to the wet season was done. PW (all divisions) inspectors conducted 81 pre-wet season inspections, PBCE Building inspectors conducted 181 pre-season inspections, and ESD Watershed Enforcement inspectors conducted 56 pre-season inspections. A total of 318 pre-wet season inspections, which includes repeat visits to the same site, occurred before the official start of the rainy season (October 15, 2006).	PW-CFAS, PW-ECS, PW-TDS
CON 5	**Inspection and Site Evaluation Follow-up** Construction sites with inadequate erosion/sediment controls are given verbal and/or written notice of the inadequacies, according to the City's enforcement procedures, and followed up with action(s) commensurate with the risk of pollutants entering City storm drains or waterways. Written notices and follow-up actions are tracked and summarized in the City's Annual Report to the Regional Board.			
CON 5.A	Implement SOPs for follow-up actions and graduated levels of enforcement for construction sites.	Ongoing	Done FY 06-07 and ongoing. SOPs for follow-up actions and graduated levels of enforcement for construction sites	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg,

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
			were implemented.	ESD
CON 5.B	Track and summarize notices and follow-up actions for annual reports.	Annually	Done FY 06-07. Public Works (all divisions) issued 158 verbal warnings, 21 official warning notices, and referred 6 cases to ESD for enforcement. PBCE Building issued 70 verbal warnings, 125 official warning notices, and referred 18 cases to ESD. ESD Watershed Enforcement issued 134 verbal warnings, 32 official warning notices, and 5 administrative actions with penalty and/or fine.	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD
CON 5.B.1	Use revised erosion and sediment control checklist to better track warnings and required corrections given to construction site managers.	FY 06-07 Annually	Done FY 06-07. The form that was developed and used by all Public Works (TDS) inspectors in FY 05-06 to address issues related to construction site inspections was revised in FY 06-07. The revised form includes additional columns to track BMPs installed, additional guidance for checking wattles, and a "resolved" column to record whether or not an issue has been corrected. See CON 4.D for a copy of the revised form.	PW-TDS
CON 6	**Municipal Training** The City provides training annually to its construction inspection staff on inspection procedures, documentation, and enforcement related to stormwater pollution prevention. All inspectors receive training on the latest construction-related stormwater pollution prevention techniques and appropriate follow up actions at least once every two years. The City keeps documentation that inspectors have received training.			
CON 6.A	Develop an annual training plan for construction inspection program.	Annually, Q1	Done FY 06-07. See 13.D: *Municipal Employee Training Summary.*	ESD, PW, PBCE-Bldg
CON 6.B	Conduct annual training	Ongoing	Done FY 06-07. See 13.D: *Municipal Employee Training Summary.*	ESD, PW, PBCE-Bldg
CON 6.C	Track and document that inspectors have received training.	Annually	Done FY 06-07. See 13.D: *Municipal Employee Training Summary.*	ESD-UR
CON 6.D	Evaluate the training curriculum and frequency, and improvements, as necessary.	Annually	Done FY 06-07. The training curriculum and frequency were satisfactory. Staff identified the need for additional training on stormwater BMPs and conducted this training for all inspection groups during section meetings throughout FY 06-07 to supplement the main Fall training. Also see Section 13.D: *Municipal Employee Training Summary*.	ESD, PW, PBCE-Bldg
CON 6.D.1	Conduct additional stormwater BMP training for all inspection groups during section meetings throughout FY 06-07 to supplement the main Fall training.	FY 06-07 Ongoing	Done FY 06-07. See CON 3.C, CON 6.D, and 13.D: *Municipal Employee Training Summary.*	ESD-UR, ESD-WE
CON 6.E	Hold coordination meetings for Building, ESD, and Public Works	Ongoing	Done FY 06-07 and ongoing. See CON 3.C.	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD-WE, ESD-UR
CON 7	**Outreach** The City provides outreach materials to contractors, developers, and municipal staff on construction BMPs and compliance with the State General Construction Activity Stormwater Permit.			

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
CON 7.A	Review outreach and technology transfer materials and make improvements, as necessary	Annually, Q4	Done FY 06-07. Construction BMP information blueprints and tri-folds in English, Spanish, and Vietnamese were distributed as needed in trainings, inspections, and are on permanent display in City Hall. See 14.D: *Outreach Materials Distributed* for details.	ESD, PW, PBCE-Bldg
CON 7.A.1	Reprint revised Dewatering from Construction Sites and In-Ground Utilities Maintenance Projects brochure.	FY 06-07 As Needed	Deferred to FY 07-08 to include any additional requirements from the MRP.	ESD-UR
CON 7.B	Conduct outreach sessions to development community.	Annually	Done FY 06-07. See 14.D: *PIP Activities* for details.	ESD, PW, PBCE-Bldg, Program
CON 7.C	Document outreach to development community.	Annually	Done FY 06-07. DPW and ESD inspectors continued to distribute BMPs to the development community during construction site inspections. Outreach materials were also given to development community representatives at training sessions and at permit service counters. See 14.D: *PIP Activities* and 14.D: *Outreach Materials Distributed* or details.	ESD-UR
CON 7.D	Evaluate outreach program and make improvements, as necessary.	Annually	Done FY 06-07. The City's outreach program continues to make improvements as needed. With inspections, meetings, and training sessions, the outreach for this program element includes significant face-to-face contact. Inspectors also distribute materials to developers and contractors as part of inspection. In FY 06-07, 150 signs were produced and will be posted at public projects during construction before the start of the rainy season in FY 07-08. This is part of a pilot program to give citizens an opportunity to notify project managers to address stormwater issues promptly. The City will review key BMP materials and make changes as needed in FY 07-08.	ESD, PW, PBCE-Bldg
CON 7.D.1	Print and distribute revised "Clean Bay Blueprint" to developers and City inspectors.	FY 06-07	Done FY 06-07. See 14.D: *Outreach Materials Distributed* for details.	ESD, PW, PBCE-Bldg
CON 7.D.2	Explore the use of construction site signs to alert site employees and the public of stormwater pollution prevention message and 945-3000 hotline information.	FY 06-07	Done FY 06-07 and ongoing. Signs were produced in FY 06-07 and will be piloted at select construction sites in FY 07-08. Evaluation of the pilot will occur after the signs are installed.	ESD, PW, PBCE-Bldg
CON 8	**Public Works Projects** The City will develop and implement a process to ensure that contractors hired to construct public works projects have adequate erosion control plans and use appropriate Best Management Practices (BMPs) adopted by the Department of Public Works.			
CON 8.A	Conduct training for Public Works capital improvement project staff (Architectural Engineering Design & Construction and Streets, Bridges & Sewers Design and Construction) on contract language, standard	Annually	Done FY 06-07. Training was developed and conducted on 03/28/07. See 13.D: *Municipal Employee Training Summary.* Name change from Architectural Engineering Design & Construction and Streets, Bridges & Sewers	PW-CFAS, PW-ECS, PW-TDS, ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
	specifications, & enforcement.		Design and Construction to City Facilities Architectural Services, Roads and Bridges, and Engineering and Construction Services.	
CON 8.B	Track the number of Public Works projects with these requirements.	Annually	Done FY 06-07. Tracked number of Public Works capital improvement projects to ensure erosion and sediment control language was included. Records are on file.	PW-CFAS, PW-ECS, PW-TDS
CON 9	**Construction Inspection Effectiveness Evaluation** The City of San José will review and evaluate effectiveness of its construction inspection SOPs and BMPs.			
CON 9.A	Evaluate and incorporate any needed improvements in construction inspection SOPs and BMPs.	Annually	Done FY 03-04. No changes required for FY 06-07.	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD-WE, ESD-UR
CON 9.B	Document and evaluate what worked well and what needs improvement.	Annually	Done FY 06-07. The communications and cooperation amongst Public Works, PBCE Building, and ESD Watershed Enforcement worked well. The citywide construction inspector's trainings held October 11-12, 2006, the monthly citywide construction supervisors meetings, and the training for all inspection groups during section meetings throughout FY 06-07 to supplement the main fall training played a big part in this improvement. The City will continue to conduct the inspector's training and hold supervisors meetings in FY 07-08. PW (TDS) inspectors continue to observe housekeeping problems at private development sites. Some of the problems included no cover on dirt stockpile/dumpsters, inadequate inlet protection, inadequate maintenance of rock construction entrances, inadequate maintenance of perimeter protection, and tracking of dust and mud on public streets. PW Engineering and Construction Services staff found improper inlet protection, improper wash down of pavement or sidewalks, improper saw cutting operations, inadequate cover on stockpiles and/or dumpsters, tracking of mud on streets, and improper gutter cleaning. City inspectors will continue to work with developers to ensure effective BMPs are implemented to prevent these housekeeping issues. Staff identified the need for additional training on stormwater BMPs, and will continue to conduct this training for all inspection groups during section meetings throughout FY 07-08 to supplement the main fall training.	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD-WE, ESD-UR
CON 9.B.1	Expand the number of sites with an inspector of record to capture more of the Type 1 and Type 2 sites (per	Ongoing	Done FY 06-07 and ongoing. PBCE Building Inspectors estimated they expanded the number of sites with an	PBCE-Bldg

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
	Public Work's designation)		inspector of record to capture more of the Type 1 and Type 2 sites (per Public Work's designation) as follows: a) 44 Type 1 sites and b) 125 Type 2 sites.	

4.B CON Program Evaluation

Several things worked well during the construction inspection process for FY 06-07. First, City inspectors and project managers attended several training sessions to improve their knowledge of erosion and sediment control practices. One-hundred PBCE Building, Public Works, and Environmental Enforcement inspectors attended a two-day annual training conducted by a consultant and City staff on 10/11/06 and 10/12/06. In December 2006, City staff attended trainings held by the Santa Clara Valley Urban Runoff Pollution Prevention Program and the Water Board for construction inspectors and project managers. In addition, approximately 32 CIP Public Works capital improvement project managers attended training in March 2007. This training help project managers and teams ensure erosion and sediment control measures are included on plans and specifications. The City also conducted short, focused stormwater BMP trainings for all inspection groups during their section meetings to supplement the main fall annual trainings. More than 150 Public Works and PBCE Building Inspectors and technical staff attended one or more of these 20 training sessions.

Second, Public Works made further revisions to the Erosion Control Report so that it is easier to use and the inspectors can better track the warnings. In the past, inspectors would issue a verbal warning to a site and then revisit the site later to see if the violation was corrected, but would not always fully document how the violation was corrected. In order to avoid this problem, the report will be kept until the problem has been resolved and the resolution has been documented. The revised report includes additional columns to track if BMPs were installed, additional guidance on checking wattles, and a "resolved" column to record whether or not an issue has been corrected. See CON 4.D for a copy of the revised form.

Third, the continued coordination meetings between construction supervisors of Public Works, PBCE Building, and Environmental Enforcement have helped improve communications between the three groups regarding erosion and sediment control activities at public and private construction sites. And while improved communication has helped improve inspection efforts, site conditions still show that continued attention is necessary to ensure stormwater issues are addressed. City staff will continue their commitment to quickly identify and correct areas of concern at constructions sites, thus reducing the need for elevated enforcement response and monetary penalties.

Based on evaluating the construction inspection program, staff has also identified several improvements for FY 07-08. The City began a pilot program to place "Protect the Bay – No Mud on the Street" signs on active construction sites, to see how successfully it works. This is part of a pilot program to give citizens an opportunity to notify project managers to address stormwater issues promptly. The City will evaluate this program and possibly expand it to other municipal construction project sites during FY 07-08.

Additionally, City staff plans to continue the short, focused stormwater BMP trainings for all inspection groups during their section meetings throughout FY 07-08 to supplement the main fall annual trainings. The City has also allocated funds in FY 07-08 for contractual support for two Construction Stormwater BMP Training Workshops for City staff. The City will also review key BMP materials and make changes as needed in FY 07-08.

4.C CON Response to Water Board Comments

No comments received from Water Board on this Program Element.

4.D CON Summary Tables / Additional Information

Permits for Significant Development Projects[1] Reviewed and/or Approved July 1, 2006 – June 30, 2007

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Department of Public Works, Airport Division						
Public Projects						
Renzel Airfield Improvements 2005 1661 Airport Boulevard	Taxiway Y	35 Ac	35 Ac	Completed	Standard Construction Best Management Practices (BMPS) including sediment and erosion control	Silt fencing, sandbags, filter fabric, etc.
North Concourse Project 1661 Airport Boulevard	Terminal	7.5 Ac	3.9 Ac	Ongoing	Standard Construction Best Management Practices (BMPS) including sediment and erosion control	Silt fencing, sandbags, filter fabric, etc.
Department of Public Works, Transportation & Development Services Division						
Private Projects						
Grading for KFC/A&W Project (PW # 3-00216 - Issued 08/17/06) East Side Of South Bascom Avenue, approximately 350 feet North of Camden Avenue	Non-Residential	0.54	0.54	Project accepted	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for SCVWD Water Quality Laboratory (PW # 3-01503 - Issued 10/17/06) East side of Almaden Expressway, approximately 540 feet southerly of Blossom Hill Road	Non-Residential	14.75	3.40	Construction completed	Stabilized construction entrance, inlet protection & sandbag barrier	Planning/grading permits, Follow SWPPP & Erosion Control Plan
Grading for Non-Residential Project (PW # 3-02020 - Issued 06/07/07) Southeast Corner of Coleman Avenue and Aviation Way	Non-Residential	6.18	6.18	On-going grading	Stabilized construction entrance, inlet protection, sediment basin & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for "The Plant" Commercial Development (Pw # 3-02172 - Issued 10/12/06) Northwest corner of Curtner Avenue and Monterey Highway	Non-Residential	58.40	55.40	Grading completed. Under construction	Stabilized construction entrance, inlet protection, fiber rolls & sediment basin	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for Excavation for Sports Complex for the Harker School (Pw # 3-02186 - Issued 06/08/07) Northeast Corner of Highway 280 and Saratoga Avenue	Non-Residential	10.33	7.00	Construction not started	Stabilized construction entrance, inlet protection, silt fencing, sediment barrier, concrete wash-out & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training

[1] Projects that have conditions created by land disturbance activities that require a grading permit, as defined by local ordinance, or by discharges of stormwater runoff over areas with erodable soils.

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Grading for Story Road Retail Site - Previous HP Warehouse (Pw # 3-02560 - Issued 09/20/06) North side of Story Road approximately 720 feet southwesterly of McLaughlin Avenue	Non-Residential	19.60	19.60	On-going grading	Stabilized construction entrance, inlet protection, fiber rolls & concrete wash-out	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for Tract No. 9850 - 34 Single-family detached residences (Pw # 3-02972 - Issued 12/11/06) South side of Rock Avenue, approximately 800 feet Westerly of Oakland Avenue	Residential	4.08	4.08	On-going grading	Stabilized construction entrance, inlet protection & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for Tract No. 9903 (Pw # 3-03364 - Issued 05/25/07) Southeast corner of Foxworthy and Leigh Avenues	Residential	1.67	1.67	Grading completed. Under construction	Plan under design	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading Remediation to remove underground tanks and return site to pre-existing conditions. (Pw # 3-03438 - Issued 06/04/07) Southwest corner of Meridian Avenue and Foxworthy Avenue (Chevron Usa Inc)	Non-Residential	0.35	0.35	On-going grading	Standard BMPs	Planning/grading permits, Follow BMPs
Replace existing natural turf soccer field, football field, and baseball field areas with new synthetic turf field for an existing secondary school (PW # 3-04527 - Issued 07/14/06) North and south sides of West Hedding Street, approx. 350 feet westerly of Stockton Avenue	Non-Residential	8.15	4.82	Construction completed	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract no. 9884 - 11 live-work units and 84 single-family attached residential units. (former Lou's Village) (PW # 3-04718 - Issued 02/02/07) north side of West San Carlos Street, 650 feet westerly of Meridian Avenue	Residential	4.95	4.95	On-going grading	Stabilized construction entrance, inlet protection, fiber rolls & concrete wash-out	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for Quinn Center (PW # 3-05646 - Issued 02/09/07) 620 Quinn Avenue	Non-Residential	2.40	1.20	Construction not started	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract no. 9870 - 53 multi-family attached residences (PW # 3-05843 - Issued 12/22/06) West side of Oakland Road, approximately 550 feet north of Rock Avenue	Residential	2.82	2.82	On-going grading	Standard BMPs	Planning/grading permits, Follow BMPs

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Grading for 202 SFD (PW # 3-06269 - Issued 08/18/06) Northeast corner of Samaritan Drive and Clydelle Avenue	Residential	11.70	11.70	Grading completed. Under construction	Stabilized construction entrance, inlet protection, silt fencing, fiber rolls & concrete wash-out	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for 59 SRO (PW # 3-06356 - Issued 06/04/07) West side of South 9th Street, approximately 90 feet southerly of East William Street	Residential	0.34	0.34	Construction not started	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Home Depot at Story Rd (PW # 3-06485 - Issued 11/29/06) Northeast corner of Story road and Mcginness Avenue (Home Depot)	Non-Residential	11.90	11.90	On-going grading	Stabilized construction entrance, inlet protection & silt fencing	Planning/grading permits, Follow SWPPP & Erosion Control Plan
Grading for Non-Residential Project (PW # 3-06557 - Issued 12/13/06) Northwest corner of Hostetter Road and Automation Parkway (Costco Wholesale)	Non-Residential	12.49	12.49	On-going grading	Stabilized construction entrance, inlet protection & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for retail commercial center (Pw # 3-06604 - Issued 01/24/07) southeast corner of North King Road and Mabury Road	Non-Residential	0.44	0.44	On-going grading	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract no. 9801 - 22 story residential high-rise (PW # 3-06653 - Issued 06/05/07) Northeast corner of Market & San Salvador Streets	Residential	1.02	1.02	Construction not started	Stabilized construction entrance, inlet protection & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for Phase 1 to demolish 52,000 sf retail and construct 40,118 sf of retail (PW # 3-07005 - Issued 06/12/07) Northeast corner of Old Tully Road and Monterey Highway	Non-Residential	4.11	2.29	Construction not started	Stabilized construction entrance, inlet protection, fiber rolls & concrete wash-out	Planning/grading permits, Follow SWPPP & Erosion Control Plan
FHC Parking Lot Reconfiguration - Kaiser Santa Teresa (PW # 3-07311 - Issued 03/13/07) Northeast corner of Santa Teresa Blvd. and Cottle Road	Non-Residential	2.46	0.34	Construction completed	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Non-Residential Project (PW # 3-07714 - Issued 02/23/07) East side of Senter Road, approximately 200 feet northwesterly of Quinn Avenue	Non-Residential	2.66	2.66	Grading completed. Under construction	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for New townhouse project (PW # 3-08120 - Issued 04/13/07) West side of Bundy Avenue approximately 65 feet northerly of Adra Avenue	Residential	0.27	0.27	On-going grading	Standard BMPs	Planning/grading permits, Follow BMPs

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Grading for Parking Lot, Cadence Office Building 10 (PW # 3-08243 - Issued 04/02/07) Northerly corner of Montague Expressway and Trimble Road	Non-Residential	27.00	13.68	On-going grading	Stabilized construction entrance, inlet protection & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for medical office parking lot (PW # 3-09446 - Issued 08/04/06) West side of Ciro Avenue approximately 400 feet south of Forest Avenue	Non-Residential	0.23	0.23	Project accepted	Standard BMPs	Planning/grading permits, Follow BMPs
Remediation for surface soil slippage (PW # 3-09509 - Issued 04/30/07) Silver Creek Valley Rd and San Felipe Rd (btwn), 1100' s/o Hillstone Dr	Non-Residential	3.61	0.33	On-going grading	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract no. 9926 - 18 single-family attached residences (PW # 3-09753 - Issued 06/19/07) North side of Rock Avenue, approximately 450 feet westerly of Oakland Road	Residential	1.02	1.02	On-going grading	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for new building (pw # 3-10059 - issued 09/18/06) North side of East Gish Road approximately 300 feet westerly of Oakland Road	Non-Residential	7.20	0.33	On-going grading	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract no. 9879 (PW # 3-12305 - Issued 03/05/07) West side of Boynton Avenue, approximately 520 feet northerly of Akron Way	Residential	0.27	0.27	On-going grading	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for 2268 Will Wool Drive (PW # 3-12558 - Issued 06/07/07) East side of Will Wool Drive approximately 400 feet north of Quinn Avenue	Non-Residential	1.76	1.50	Construction not started	Stabilized construction entrance & inlet protection	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for Sweet Tomatoes at San Jose Market Center (PW # 3-12873 - Issued 03/12/07) West side of Coleman Street, approximately 250 feet south of Seymour Street	Non-Residential	0.42	0.35	On-going grading	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract 9830 (PW # 3-13012 - Issued 12/14/06) Northwesterly side of Lewis Road approximately 210 feet southwesterly of Garden Avenue	Residential	5.65	5.65	Grading completed. Under construction	Stabilized construction entrance, inlet protection & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for church site (PW # 3-13192 - Issued 05/25/07) 1397 West Hedding Street	Non-Residential	1.18	0.26	Grading completed. Under construction	Standard BMPs	Planning/grading permits, Follow BMPs

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Grading for Non-Residential Project (PW # 3-13199 - Issued 03/07/07) East side of Francis Avenue, approximately 450 feet southerly of Patt Avenue	Non-Residential	1.13	1.13	On-going grading	Stabilized construction entrance, inlet protection & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for Rollin Ice site (PW # 3-13305 - Issued 08/03/06) Southwest corner of Hellyer Avenue and Embedded Way	Non-Residential	16.40	7.30	On-going grading	Stabilized construction entrance, inlet protection & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan
Grading for a new 9-car garage within 50 feet of top of back of SCVWD creek (PW # 3-13473 - Issued 10/23/06) South side of Margaret Street approximately 240 feet easterly of South 15th Street	Residential	0.14	0.14	Grading completed. Under construction	Stabilized construction entrance & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for residential project (PW # 3-13839 - Issued 03/21/07) Northeast corner of Fruitdale Avenue and Southwest Expressway	Residential	1.86	0.99	On-going grading	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for one single family detached residence (PW # 3-14038 - Issued 04/24/07) 6971 Hollow Lake Way	Residential	3.20	0.67	Grading completed. Under construction	Stabilized construction entrance, inlet protection, silt fencing, fiber rolls & concrete wash-out	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for one single family detached residence (PW # 3-14049 - Issued 11/01/06) East side of Hollow Lake Way, approximately 500 feet south of Quail Crest Way	Residential	0.58	0.37	Construction completed	Stabilized construction entrance, silt fencing & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for Hitachi demolition (PW # 3-14641 - Issued 07/26/06) Area generally bounded by Cottle Road, Monterey Highway, Highway 85 and Manassas Rd	Residential	110.00	110.00	On-going grading	Stabilized construction entrance, inlet protection & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for future new public streets and public parks (PW # 3-14641 - Issued 10/27/06) Area generally bounded by Cottle Road, Monterey Highway, Highway 85 and Manassas Rd	Residential	154.00	44.80	On-going grading	Stabilized construction entrance, inlet protection, fiber rolls & tire wash area	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Grading for the Industrial Core (PW # 3-14641 - Issued 10/27/06) Area generally bounded by Cottle Road, Monterey Highway, Highway 85 and Manassas Rd	Non-Residential	158.33	7.25	On-going grading	Stabilized construction entrance, inlet protection & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for a parking lot (PW # 3-15301 - Issued 06/12/07) North side of Bassett Street, approximately 800 feet west of Terraine Street	Non-Residential	0.55	0.20	Construction not started	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract 9826 (PW # 3-15694 - Issued 8/29/2006) Northeast corner of East Julian Street and North First Street	Residential	0.63	0.63	Grading completed. Under construction	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for new SFD (PW # 3-15891 - Issued 03/26/07) South terminus of Cortona Court approximately 520 feet southerly of Cortona Drive	Residential	0.44	0.34	Grading completed. Under construction	Stabilized construction entrance, inlet protection, fiber rolls & concrete wash-out	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for Residential Project (PW # 3-15963 - Issued 01/09/07) East side of Meridian Way 30 feet southerly of Paula Street	Residential	1.67	1.67	On-going grading	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for two phases: Savona and Siena sites (PW # 3-16147 - Issued 11/29/06) Southwest corner of Monterey Road and Goble Lane	Residential	5.55	5.55	Grading completed. Under construction	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for 19 single family detached residences (PW # 3-16360 - Issued 10/02/06) Falcon Court	Residential	3.34	3.34	Grading completed. Under construction	Stabilized construction entrance, inlet protection & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for Edenvale Supportive Housing Project (PW # 3-16400 - Issued 09/06/06) East side of Monterey Highway, approximately 950 feet northerly of Blossom Hill Road	Residential	0.45	0.45	On-going grading	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract 9531 - Phase 1 - lots 86-93 (PW # 3-16566 - Issued 03/15/07) North side of Aborn Road, approximately 1000 feet east of Altamara Avenue	Residential	2.10	2.10	On-going grading	Stabilized construction entrance, inlet protection & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Grading for Phase II Tract 9531 (PW # 3-16566 - Issued 05/07/07) North side of Aborn Road approximately 1000 feet east of Altamara Avenue	Residential	13.00	10.80	On-going grading	Stabilized construction entrance, inlet protection & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan
Grading for one story retail building (PW # 3-16604 - Issued 06/06/07) Southwest corner of McKee Road and Vista Avenue	Non-Residential	0.36	0.36	Construction not started	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract 9725 - 10 unit subdivision (PW # 3-16690 - Issued 10/10/06) Southeast corner of South 2nd Street and East Virginia Street	Residential	0.40	0.40	Grading completed. Under construction	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract 9730 Emerald Heights - 6 new SFR detached (PW # 3-16701 - Issued 07/21/06) South side of Mount Pleasant Road approximately 250 feet northerly of Marten Avenue	Residential	0.72	0.63	Construction not started	Stabilized construction entrance, inlet protection, fiber rolls & concrete wash-out	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for Tract 9811 - Stonebridge Court (PW # 3-16719 - Issued 01/12/07) Westerly terminus of Delmas Avenue and Dorothy Avenue	Residential	0.91	0.70	Grading completed. Under construction	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract no. 9881 - 12 townhomes (PW # 3-16740 - Issued 01/16/07) Southeast side of Tierra Encantada Way approximately 150 feet east of McCreery Avenue	Residential	0.51	0.51	Grading completed. Under construction	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Kim's Plaza (PW # 3-16775 - Issued 12/12/06) 1145 Story Road	Non-Residential	0.84	0.84	On-going grading	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract no. 9837 - 10 SFD (PW # 3-16789 - Issued 01/17/07) West side of Delmas Avenue, approximately 170 feet north of Dorothy Avenue	Residential	0.89	0.89	Construction not started	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Residential project (PW # 3-16804 - Issued 09/08/06) East side of Page Street, approximately 460 feet northerly of Chiechi Avenue	Residential	0.25	0.25	On-going grading	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for 56 single-family attached residences (PW # 3-16828 - Issued 11/28/06) East side of Almaden Road across from the intersection with Malone Road	Residential	2.33	2.33	Grading completed. Under construction	Stabilized construction entrance, inlet protection, silt fencing & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Grading for Tract no. 9840 - 89 multi-family attached residential units (PW # 3-16843 - Issued 11/01/06) Southwest corner of Capitol Avenue and Mabury Road	Residential	10.00	6.40	On-going grading	Stabilized construction entrance, inlet protection, straw wattles, sediment basin & hydroseeding	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for Tract no. 9828 - 4 sfr-detached (PW # 3-16844 - Issued 09/25/06) North side of Villa Avenue, 150 feet easterly of Myrtle Street	Residential	0.37	0.37	Grading completed. Under construction	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract no. 9855 (PW # 3-16851 - Issued 01/25/07) West side of Curtiss Avenue, approximately 350 feet southerly of Willow Street	Residential	0.39	0.39	Grading completed. Under construction	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for 5 SFA units (PW # 3-16857 - Issued 10/24/06) South side of Curtner Avenue, approximately 250 feet westerly of Joseph Avenue	Residential	0.34	0.34	Grading completed. Under construction	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract no. 9890 - 14 SFD (PW # 3-16888 - Issued 04/20/07) South side of Fleming Avenue, approximately 1,032 feet southeast of Alum Rock Avenue	Residential	2.66	2.35	On-going grading	Stabilized construction entrance, inlet protection, sedimnt trap & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for Tract no. 9863 - Grandview Terrace, 46 multi-family units (PW # 3-16901 - Issued 11/16/06) northeast corner of North Capitol Avenue and Grandview Drive	Residential	1.96	1.96	On-going grading	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for water tank (PW # 3-16921 - Issued 08/30/06) East side of Little Orchard Street	Non-Residential	5.20	0.35	Construction completed	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for one new single family residence on a vacant lot (PW # 3-16929 - Issued 07/13/06) West side of Pleasant Crest Drive, approximately 180 feet northerly of West View Drive	Residential	0.56	0.20	On-going grading	Stabilized construction entrance, inlet protection, fiber rolls & concrete wash-out	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
On-site grading associated with construction of 2 SFA and 2 SFD (PW # 3-16937 - Issued 03/16/07) West side of South Cypress Avenue, approximately 400 feet southerly of Stevens Creek Boulevard	Residential	0.21	0.21	On-going grading	Standard BMPs	Planning/grading permits, Follow BMPs

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Grading of new lot created by 2 lot subdivision (PW # 3-16938 - Issued 10/03/06) southeast corner of Garden Avenue and Southside Drive	Residential	0.32	0.32	Construction not started	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract no. 9856 - 5 single family homes (PW # 3-16945 - Issued 12/18/06) Southeast corner of New Jersey Avenue and Harris Avenue	Residential	0.72	0.30	On-going grading	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract no. 9895 - 16 lot subdivision (PW # 3-16961 - Issued 03/08/07) South side of Paula Street, approximately 160 feet easterly of Meridian Way	Residential	0.71	0.75	On-going grading	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Non-Residential Project (PW # 3-16981 - Issued 09/22/06) West side of South 10th Street, approximately 550 feet northerly of Burke Street	Non-Residential	3.92	0.19	Grading completed. Under construction	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for 24,000 sf of commercial buildings (PW # 3-16982 - Issued 05/14/07) Southeasterly side of Silver Creek Valley Road, and at the south terminus of Fontanoso Way	Non-Residential	2.18	2.18	On-going grading	Stabilized construction entrance, inlet protection, sediment barrier & fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/consultant/contract or attend PW Erosion/ Sediment Control Training
Grading for 9,900 sf retail building (PW # 3-18113 - Issued 05/14/07) Southeast corner of West Alma Avenue and Almaden Expressway	Non-Residential	0.58	0.58	Construction not started	Standard BMPs	Planning/grading permits, Follow BMPs

5. PSR: Public Streets, Roads, & Highways

5.A PSR Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
PSR 1	**Implementation of BMPs** The City of San José will implement Best Management Practices (BMPs) for street, road, and highway operation and maintenance (O&M) activities to reduce pollutants in stormwater and eliminate illicit discharges to the maximum extent practicable.			
PSR 1.A	Develop additional BMPs, as needed, when new O&M tasks are instituted.	As Needed	No additional BMPs were developed in FY 06-07.	DOT, ESD
PSR 1.B	Develop SOPs based on BMPs.	As Needed	No new SOPs were written for PSR and SDO elements.	DOT, ESD
PSR 1.C	When new BMPs and SOPs are developed, integrate BMPs and SOPs into training program.	As Needed	Done FY 06-07. See PSR 1.C.1	DOT, ESD
PSR 1.C.1	Include SOPs listed in PSR 1.D.1 and developed in FY 05-06 into the FY 06-07 training program.	FY 06-07	Done FY 06-07. SOPs listed in PSR 1.D.1 were included in the FY 06-07 training program.	ESD
PSR 1.D	Staff will review current PSR and SDO BMPs and SOPs. The annual training sessions with staff will be used as an opportunity to evaluate the effectiveness of BMPs and SOPs. BMPs and SOPs will be updated as indicated by the review.	Done FY 04-05 Annually	Done FY 06-07. The current review in the annual training indicated that no new SOPs are necessary.	DOT, ESD
PSR 1.D.1	Revise or write the following SOPs: • Sidewalk/Plaza Maintenance: Cleaning, concrete installation and replacement, surface removal and repair; • Bridge and Structure Maintenance: Painting and paint removal, repair work, and graffiti removal; • Median and Road Embankment Maintenance; • Storm Drain Inlet Cleaning; • Storm Drain Line Cleaning; • Management of Storm Drain System Solid Waste; • Pump Station Inspection and Cleaning; • Drainage Ditch Cleaning.	Done FY 05-06	Done FY 05-06.	DOT, ESD, PRNS
PSR 1.D.2	Include a check box on the WE ICID inspection report form to indicate whether the responsible party in a stormwater complaint is a City employee.	FY 06-07 Ongoing	Due to technical requirements, it was not feasible to include a check box in the WE ICID inspection report form in FY 06-07. This task will be carried over into the FY 07-08 work plan. Inspectors will track this information manually and forward the information to the ESD-UR section for appropriate action.	ESD
PSR 1.D.3	In response to stormwater complaints involving a City employee conducting PSR and SDO O&M activities, the	FY 06-07 Ongoing	Done FY 06-07. No complaints involving City employees conducting PSR and SDO O&M activities were received.	DOT, GS, PRNS, ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
	supervisor for the City employee involved in the complaint will be notified.			
PSR 2	**Contractor Use of BMPs** The City of San José will develop and implement a process to ensure that contractors employed to perform street, road, and highway O&M activities use appropriate BMPs per URMP.			
PSR 2.A	Train contract managers for public street, road, and highway O&M contracts on related stormwater BMPs annually.	Annually	Done FY 06-07. Contract manager training was held on 6/26/07.	DOT, ESD
PSR 2.A.1	Include a check box on the WE ICID inspection report form to indicate whether the responsible party in a stormwater complaint is a City contractor.	FY 06-07 Ongoing	Due to technical requirements, it was not feasible to include a check box in the WE ICID inspection report form in FY 06-07. This task will be carried over into the FY 07-08 work plan. Inspectors will track this information manually and forward the information to the ESD-UR section for appropriate action.	ESD
PSR 2.A.2	In response to stormwater complaints involving City contractors conducting PSR and SDO O&M activities, the contract manager for the City contract involved in the complaint will be notified.	FY 06-07 Ongoing	Done FY 06-07. The City received no complaints regarding contractors conducting PSR O&M activities for the City. See 5.B: PSR *Program Evaluation* for summary of complaint.	DOT, GS, PRNS, ESD
PSR 2.B	Develop standard contract language for PSR maintenance activities.	Done FY 05-06	Done FY 05-06.	DOT, ESD
PSR 2.B.1	Send letters to City contractors conducting PSR and SDO O&M activities with a reminder to use appropriate BMPs while conducting their work.	FY 06-07	Not completed in FY 06-07. A letter was drafted In July 2007 and will be mailed to City contractors conducting PSR and SDO O&M activities in August 2007.	DOT, GS, PRNS, ESD
PSR 3	**City Staff Annual Training** The City of San José will provide annual training to its municipal staff in the use of appropriate BMPs. The City will also provide a mechanism for obtaining feedback from staff on the implementation and effectiveness of the BMPs and Control Measures.			
PSR 3.A	Identify training goals, such as improving the focus of the training on the specific BMPs used by a section; integrating new BMPs, if any; etc.	Annually	Done FY 06-07. DOT crew supervisors chose 2-3 BMPs specific to their particular crew's work for the focus of this year's annual training.	DOT, ESD
PSR 3.B	Identify training opportunities (which could include tailgate meetings and other existing training).	Annually, Q4	Done FY 06-07. Training opportunities were identified throughout the year for various City departments.	DOT, ESD
PSR 3.C	Create or revise training modules for affected City staff and contractors.	As needed	Done FY 06-07. The DOT crew training was revised to focus on the 2-3 BMPs chosen by each supervisor for their particular crew.	DOT, ESD
PSR 3.C.1	Add specific components from DOT Electrical Crew training module to the general DOT Street Crew training module. These components include: asphalt/concrete removal, concrete installation and repair, and mercury lamp recycling and/or disposal.	Done FY 05-06	Done FY 05-06.	ESD
PSR 3.D	Create or revise collateral material based on training modules.	As needed	Done FY 06-07. Training presentations were revised based on the BMPs chosen for each particular crew.	DOT, ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
PSR 3.E	Schedule training with affected supervisors.	Annually	Done FY 06-07. DOT inlet cleaning crews training was scheduled with supervisors in August 2006. RPW training was scheduled in September 2006 for Park Rangers. Training for DOT street maintenance crews was scheduled with supervisors in May 2007.	DOT, ESD
PSR 3.E.1	Develop and implement a new training module specifically for DOT electrician staff.	Done FY 04-05	Done FY 04-05.	DOT, ESD
PSR 4	**Notification of Public Agencies** The City of San José will inform other parties (e.g., CalTrans, the County of Santa Clara, and public utilities) conducting street, road, and highway O&M activities within its jurisdiction of the requirements to implement pollutant reduction BMPs and Control Measures in stormwater to the maximum extent practicable and eliminate illicit discharges.			
PSR 4.A	Identify conditions under which another agency will be notified regarding relevant stormwater requirements.	Done FY 02-03	Done prior to FY 02-03. The City notifies other agencies conducting street, road, and highway O&M activities within its jurisdiction of the requirements to implement BMPs and Control Measures on a complaint driven basis. When a complaint is received, a Watershed Enforcement Inspector investigates the complaint and educates the agency on proper BMPs and Control Measures; a citation is issued if necessary. For each complaint the City received involving other agencies in FY 06-07, Watershed Enforcement investigated the complaint and educated the agency contacts on proper BMPs and control measures to be used when conducting PSR O&M activities within the City. In FY 06-07, the City also sent letters to other agencies - see PSR 4.A.2.	ESD
PSR 4.A.1	Include a check box on the WE ICID inspection report form to indicate whether the responsible party in a stormwater complaint is another agency.	FY 06-07	Due to technical requirements, it was not feasible to include a check box in the WE ICID inspection report form in FY 06-07. This task will be carried over into the FY 07-08 work plan. Inspectors will track this information manually and forward the information to the ESD-UR section for appropriate action.	ESD
PSR 4.A.2	The City will send letters to other agencies that conduct PSR O&M activities within its jurisdiction informing them of the requirement to implement appropriate BMPs and control measures while conducting their work.	FY 06-07	Done FY 06-07. A letter was sent on June 29, 2007 to other agencies that conduct PSR O&M activities within the City's jurisdiction informing them of the requirement to implement appropriate BMPs and control measures while conducting their work.	ESD-WE
PSR 5	**BMP Effectiveness Reviews** As part of the annual review process, the City of San José will review and evaluate the effectiveness of its BMPs in reducing pollutants in stormwater and eliminating illicit discharges. The review and evaluation will include input from the municipal maintenance staff that implement the BMPs.			
PSR 5.A	Draft procedure for annual effectiveness reporting, including sub-procedures for gathering feedback from affected supervisors and for modifications to BMPs and	Done FY 01-02	Done FY 01-02.	DOT, ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
	SOPs as necessary.			
PSR 5.A.1	Review procedures for annual effectiveness evaluation. Consider obtaining feedback from supervisors on how to assess BMP effectiveness and the use of training sessions with staff as an opportunity to evaluate BMPs and SOPs.	Annually	Done FY 06-07. The annual DOT Stormwater BMP and SOP training was conducted in June 2007. Both DOT crews and supervisors attended the training conducted in June. PSR & SDO BMPs and SOPs were reviewed and feedback was requested during the training sessions. Written evaluations for the training were also distributed. Feedback received from both sources indicated that the existing BMPs and SOPs are effective and no modifications were necessary in FY 06-07. See 5.B: *PSR Program Evaluation* for the summary of training evaluation data.	DOT, ESD
PSR 5.B	Conduct evaluation of BMPs and SOPs.	Annually	Done FY 06-07. Eight SOPs were reviewed – revisions will be made in FY 07-08 according to comments received.	DOT, ESD
PSR 5.C	Expand parking restriction signage and enforcement for street sweeping by 40 curb miles.	FY 06-07	Done FY 06-07. The parking restriction signage and enforcement for street sweeping was expanded by 43 curb miles.	DOT
PSR 5.D	Collect street sweeping data: volume and/or weight of debris collected, curb miles swept, and estimated percentage of leaves in yard trimmings collection program.	Ongoing [See CNAP CB-11]	Done FY 06-07 and ongoing. The volume and/or weight of street sweeping debris collected, curb miles swept, and estimated percentage of leaves in yard trimmings collection program were collected.	DOT, ESD
PSR 6	**Rural Public Works Maintenance and Support Activities** The City will extend its control measure strategy for PSR to address water quality impacts resulting from public works maintenance and support activities in rural areas.			
PSR 6.A	Identify City-owned properties that are applicable (under the RPW performance standard).	Ongoing	Done FY 06-07 and ongoing. A list of rural roads within the City was compiled. See 5.D: *PSR Summary Tables / Additional Information* for the list of rural roads within San Jose. The list was manually compiled by using storm sewer maps, the Santa Clara County Street Guide and Directory (2004 Edition), and field inspection of a list of potential rural roads. Some of the rural roads listed have portions that are within City limits and portions that are in Unincorporated Areas. In FY 07-08, it will need to be determined exactly which portions of these roads fall within the City's limits.	ESD, PRNS, DOT, GS
PSR 6.A.1	Re-evaluate the feasibility of using GIS information to identify additional applicable properties, if any.	Done FY 05-06	Done FY 05-06. First evaluated in FY 03-04, the use of GIS information for identifying additional applicable rural public works facilities was found infeasible using available data and resources. No changes specific to criteria used to identify rural public works facilities have been made in the GIS information collected by the City, therefore it was	PRNS, GS, DOT, ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
			still not feasible to use this information to identify additional applicable properties in FY 05-06.	
PSR 6.B	Develop or adapt Standard Operating Procedures (SOPs) and Best Management Practices (BMPs) for rural public works activities.	Done FY 03-04	Done FY 03-04.	PRNS, GS, DOT, ESD
PSR 6.C	Provide annual training on appropriate SOPs/BMPs to City staff that perform rural public works operations and maintenance activities. Incorporate SOPs/BMPs evaluation into annual training.	Annually	Done FY 06-07. RPW training was conducted for PRNS staff September 20, 2006. Total attendance for the training session was 16.	PRNS, GS, DOT, ESD
PSR 6.C.1	Evaluate the RPW training schedule in order to coordinate more efficiently with PRNS staff schedules.	FY 06-07	Done FY 06-07.	PRNS, ESD
PSR 6.D	Through contract specifications, require contractors hired by the City to use appropriate SOPs/BMPs when performing rural public works construction or maintenance.	Done FY 05-06	Done FY 05-06.	PRNS, GS, DOT, ESD
PSR 6.E	Annually conduct an evaluation of the effectiveness of the rural public works program, report the results in the Urban Runoff Annual Report. Identify items for continuous improvement.	Annually	Done FY 06-07. The RPW BMP and SOP training was conducted in September 2006. Feedback was requested during the training, and evaluations were distributed. The feedback indicated that no modifications to the BMPs and SOPs were necessary. See 5.B: *PSR Program Evaluation* for the summary of training evaluation data.	PRNS, GS, DOT, ESD

5.B PSR Program Evaluation

Training

The City of San José provides annual training to its municipal staff in the use of appropriate BMPs. The City also provides a mechanism for obtaining feedback from staff on the implementation and effectiveness of the BMPs and Control Measures. Annual municipal staff training was held in June 2007 for the PSR and SDO program elements. Participants were given an evaluation form to fill out. Of the 179 staff that participated in the training, 115 evaluations were completed and returned. Results of the completed evaluations are summarized below and show an improvement in staff response in all areas over last year's results:

- 91% responded that the training subjects taught are appropriate to their work;
- 96% responded that the BMPs/SOPs described match their work practices;
- 97% responded that the training adequately described the relationship of BMPs/SOPs to compliance with the City's Stormwater NPDES permit;
- 97% responded that the training adequately explained how they, City staff, can help the City maintain compliance with the Stormwater NPDES permit; and
- 98% responded that the training adequately explained a SWPPP.

SOPs listed in PSR 1.D.1 and SDO 1.D.1 were included in the FY 06-07 DOT crew training. In addition, surface cleaning training was conducted on April 6, 2007 for City staff and City contractors that perform surface cleaning at City facilities.

The City's control measure strategy for PSR also addresses water quality impacts resulting from public works maintenance and support activities in rural areas. Training was held in September 2006. Participants were generally positive about the content and relevance of the training session to their work. Of the 16 staff that participated in the training, 5 evaluations were completed and returned. Results of the completed evaluations are summarized below:

- 100% responded that the training subjects taught are appropriate to their work;
- 100% responded that the BMPs/SOPs described match their work practices;
- 100% responded that the training adequately described the relationship of BMPs/SOPs to compliance with the City's Stormwater NPDES permit; and
- 100% responded that the training adequately explained how they, City staff, can help the City maintain compliance with the Stormwater NPDES permit.

The RPW training schedule was re-evaluated in FY 06-07 in order to coordinate more efficiently with PRNS staff schedules.

Contractor Use of BMPs

In FY 06-07, no complaints were received involving a City of San José contractor conducting PSR or SDO O&M activities. A letter was drafted in July 2007 and will be mailed to City contractors conducting PSR and SDO O&M activities in August 2007.

Informing Other Agencies

In past years, the City of San José has informed other parties (e.g., CalTrans, the County of Santa Clara, public utilities) conducting street, road, and highway O&M activities within its jurisdiction of the requirements to implement pollutant reduction BMPs and control measures in stormwater to the maximum extent practicable and eliminate illicit discharges on a complaint driven basis. When a complaint is received, a Watershed Enforcement Inspector investigates the complaint and educates the agency on proper BMPs and Control Measures, and issues a citation if necessary. This method continued to be used in FY 06-07, in addition to letters which were sent by the City to public agencies that conduct PSR O&M activities within the City's jurisdiction informing them of the requirement to implement appropriate BMPs and control measures while conducting their work.

BMP Effectiveness Review

As part of the annual review process, the City of San José reviews and evaluates the effectiveness of its BMPs in reducing pollutants in stormwater and eliminating illicit discharges. The review and evaluation includes input from the municipal maintenance staff that implements the BMPs. BMP effectiveness is evaluated using staff feedback gathered from training sessions. See training evaluation above.

Street Sweeping Program

The City conducts an extensive Street Sweeping program, involving the sweeping of the central business district; neighborhood business district; arterials, collectors, and bicycle lanes; and residential streets. Annually, the City sends out a calendar of the residential street sweeping schedule to each single-family dwelling, and asks neighborhood associations within the City to include reminders in their association newsletters for moving parked vehicles on street sweeping days. The City is continuing to expand the areas in which parking restrictions are required and enforced to improve the effectiveness of the street sweeping program. In FY 06-07, the enforcement area was broadened from 196 to 239 curb miles. The City anticipates expanding the areas in which parking restrictions are required and enforced for street sweeping by approximately 20 curb miles in FY 07-08. In FY 06-07, approximately 35,694 cubic yards of debris were collected during all street-sweeping operations.

5.C PSR Response to Water Board Comments

No comments received from Water Board on this Program Element.

5.D PSR Summary Tables / Additional Information

Parks Included in the Rural Public Works Performance Standard

Name of Park	Location	Acreage	Type of Park
Almaden Lake Park	Almaden Expwy & Coleman	64.9	Regional
Alum Rock Park	Alum Rock & Penitencia Creek	718.0	Regional
Emma Prusch Farm Park	Story & King	43.5	Regional
Guadalupe River Park	Between Hwy 880 and 280 along Guadalupe River in downtown San José	205.0	Regional
Kelley Park	Senter & Story	138.0	Regional
Lake Cunningham Park/Raging Waters	Capitol & Tully	202.0	Regional
Montgomery Hill Park	Yerba Buena & Murillo	59.6	Neighborhood
Overfelt Gardens	Education Park & McKee	32.6	Regional

Rural Roads within the City of San Jose

Name of Road	Comments
Bailey Avenue	Only a portion of Bailey Road is rural - west of Santa Teresa Avenue to McKean Road.
Casa Loma Road	Casa Loma Road starts at McKean Road and heads west to Rancho Canada del Oro Open Space Preserve. It has no curbs, gutters, or storm drains. A small creek is in the vicinity of the road.
Coyote Creek Golf Course Drive	Coyote Creek Golf Course Drive is a small portion of road leading from the Hwy 101 west bound off ramp to the Coyote Creek Golf Course. It has no curbs, gutters, or storm drains.
Fleming Avenue	Only a portion of Fleming Avenue is rural - east of Morrie Drive. No curb, gutter, or storm drain is on the end portion of the avenue.
Grand Boulevard	Only a portion of Grand Boulevard is rural - at Los Esteros Road (north of Spreckles Avenue) as it goes to the Don Edwards San Francisco Bay National Wildlife Refuge Environmental Education Center.
Hicks Road	Most of Hicks Road south of Guadalupe Mines Road to City limits has no curbs, gutters or storm drains. Hicks Road meanders in and out of the City limits.
Los Esteros Road	Most of Los Esteros Road has no curbs, gutters, or storm drains. Curbs and gutters are on the road in front of the San Jose/Santa Clara Water Pollution Control Plant Administration Building.
McKean Road	Only a portion of McKean Road is rural - south of Bailey Avenue to City limits.
Metcalf Road	East of Hwy 101 as the road goes up into the hills. Small portions of Metcalf Road have an asphalt curb. Portions of Metcalf Road are in the City limits and portions are in Unincorporated Area.
Monterey Road	Only portions of Monterey Road are rural. Most of Monterey Road between Live Oak Ave. and Forsum Road has no curbs, gutters, or storm drains. There are some curbs, gutters and storm drains at the intersection of Palm Avenue and also at the Bailey Avenue interchange.
San Felipe Road	Only portions of San Felipe Road are rural. San Felipe Road between Aborn Road and Early Morning Court has curbs, gutters and storm drains. Portions of San Felipe Road after Early Morning Court and to the City limits have an asphalt curb on one side and no curb, gutter or storm drains on the other side.
Santa Teresa Boulevard	Only a portion of Santa Teresa Boulevard is rural - south of Bailey Avenue to City limits.

Name of Road	Comments
Sierra Road	Only a portion of Sierra Road is rural – as the road goes up into the east hills. Portions of Sierra Road are in the City limits and portions are in Unincorporated Area.
Sweigert Road	Only a portion of Sweigert Road is rural - northeast of Geist Road there is no curb, gutter, or storm drain as Sweigert Road goes up hill toward private drives.
Zanker Road	Only a portion of Zanker Road is rural - north of the Hwy 237 off ramp to Los Esteros Rd. has no curbs and gutters except in front of the San Jose/Santa Clara Water Pollution Control Plant Environmental Services Building.

6. SDO: Storm Drain System Operation & Maintenance

6.A SDO Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
SDO 1	**O&M BMP Implementation** The City of San José will implement best management practices (BMPs) for the storm drain system operation and maintenance (O&M) to reduce pollutants in stormwater to the maximum extent practicable. Specific BMPs for each type of O&M activity are those listed in the City's Urban Runoff Management Plan (URMP).			
SDO 1.A	Develop additional BMPs, as needed, when new O&M tasks are instituted (including structural controls if necessary).	As Needed	Done FY 06-07. No additional BMPs were developed in FY 06-07.	DOT, ESD
SDO 1.B	Develop SOPs based on BMPs.	As Needed	Done FY 06-07. No new SOPs were written for PSR and SDO elements.	DOT, ESD
SDO 1.C	When new BMPs and SOPs are developed, integrate BMPs and SOPs into training program.	As Needed	Done FY 06-07. See SDO 1.C.1	DOT, ESD
SDO 1.C.1	Include SOPs listed in SDO 1.D.1 and developed in FY 05-06 into the FY 06-07 training program.	FY 06-07	Done FY 06-07. SOPs listed in SDO 1.D.1 were included in the FY 06-07 training program.	ESD
SDO 1.D	Staff will review current PSR and SDO BMPs and SOPs. The annual training sessions with staff will be used as an opportunity to evaluate the effectiveness of BMPs and SOPs. BMPs and SOPs will be updated as indicated by the review.	Done FY 04-05 Annually	Done FY 06-07. The current review in the annual training indicated that no new SOPs are necessary.	DOT, ESD
SDO 1.D.1	Revise or write the following SOPs: • Sidewalk/Plaza Maintenance: Cleaning, concrete installation and replacement, surface removal and repair; • Bridge and Structure Maintenance: Painting and paint removal, repair work, and graffiti removal; • Median and Road Embankment Maintenance; • Storm Drain Inlet Cleaning; • Storm Drain Line Cleaning; • Management of Storm Drain System Solid Waste; • Pump Station Inspection and Cleaning; • Drainage Ditch Cleaning. See PSR 1.D.1.	Done FY 05-06	Done FY 05-06.	DOT, ESD, PRNS
SDO 1.D.2	Include a check box on the WE ICID inspection report form to indicate whether the responsible party in a stormwater complaint is a City employee.	FY 06-07 Ongoing	Due to technical requirements, it was not feasible to include a check box in the WE ICID inspection report form in FY 06-07. This task will be carried over into the FY 07-08 work plan. Inspectors will track this information	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
			manually and forward the information to the ESD-UR section for appropriate action.	
SDO 1.D.3	In response to stormwater complaints involving a City employee conducting PSR and SDO O&M activities, the supervisor for the City employee involved in the complaint will be notified.	FY 06-07 Ongoing	Done FY 06-07. No complaints involving City employees conducting PSR and SDO O&M activities were received.	DOT, GS, PRNS, ESD
SDO 2	**Problem Tracking and Process Improvement** The City of San José will develop and implement processes for tracking problem areas and ensuring that appropriate BMPs and SOPs will be implemented for storm drain operation and maintenance activities.			
SDO 2.A	Implement an annual inspection and cleaning work plan to achieve a Tier II level review.	Ongoing	Done FY 06-07 and ongoing. The FY 06-07 Storm Inlet Cleaning Program was conducted October 2006-February 2007. For inlet cleaning, DOT schedules and implements the inspection and cleaning schedule annually. To date, the City has been able to achieve a Tier 2 level review with a modified implementation timeframe. In FY 07-08, the City's intent is to continue the Tier 2 level review. However, due to resource constraints, the extended window for implementation of Tier 2 may be needed. In FY 06-07, 28,900 inlets were inspected and, if needed, cleaned.	DOT
SDO 2.B	Evaluate criteria for collecting data from City field personnel for the purposes of determining Problem Areas.	As Needed	Done FY 06-07. A new data collection procedure was developed for "car on catch basin" in FY 05-06. The "car on catch basin" procedure was abandoned in FY 06-07 because it proved to be too cumbersome and difficult for crews to track effectively. However, crews continue to track the number of catch basins which have cars parked over them. See 6.B: *SDO Program Evaluation* for proposed changes.	DOT, ESD
SDO 2.C	Revise documentation and problem area reporting procedure, if necessary, to improve reporting performance. Documentation to include frequency, nature, and type of recurring problem. Include coordination of data from ICID and Storm Drain Management System data sources. Include analysis of data to identify trends for targeting solutions.	As Needed	Done FY 06-07. DOT and ESD staff revised the Storm Inlet Cleaning data collection form in September 2006, prior to the crew training.	DOT, ESD
SDO 2.D	Produce Problem Area report.	Annually	Done FY 06-07. FY 06-07 Storm Inlet Cleaning Program Problem Area Report was produced by DOT staff in March 2007.	DOT
SDO 2.E	Address Problem Areas through ICID enforcement/ education activities, additional BMP development, program development or retrofit.	As Needed	Done FY 05-06.	DOT, ESD
SDO 2.E.1	Explore purchasing additional vactor trucks.	FY 06-07	Done FY 06-07. See 5.B: PSR *Program Evaluation* for	DOT

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
			details.	
SDO 3	**Contractor Use of BMPs** The City will develop and implement, as needed, a process to ensure that contractors employed to perform storm drain O&M activities use the appropriate BMPs.			
SDO 3.A	Train contract managers for SDO O&M contracts on related stormwater BMPs.	Annually	Done FY 06-07. Contract manager training was held on 6/26/07. The City received no complaints regarding contractors conducting SDO O&M activities for the City. See 5.B: PSR *Program Evaluation* for summary of complaint.	DOT, ESD
SDO 3.A.1	Include a check box on the WE ICID inspection report form to indicate whether the responsible party in a stormwater complaint is a City contractor.	FY 06-07 Ongoing	Due to technical requirements, it was not feasible to include a check box in the WE ICID inspection report form in FY 06-07. This task will be carried over into the FY 07-08 work plan. Inspectors will track this information manually and forward the information to the ESD-UR section for appropriate action.	ESD
SDO 3.A.2	In response to stormwater complaints involving City contractors conducting PSR and SDO O&M activities, the contract manager for the City contract involved in the complaint will be notified.	FY 06-07 Ongoing	Done FY 06-07. The City received no complaints regarding contractors conducting SDO O&M activities for the City. See 5.B: *PSR Program Evaluation* for summary of complaint.	DOT, GS, PRNS, ESD
SDO 4	**Staff Training and BMP Feedback** The City of San José will provide annual training to its municipal staff in use of appropriate BMPs and/or Control Measures. The City will also provide a mechanism for obtaining feedback from staff on implementation and effectiveness of BMPs and Control Measures.			
SDO 4.A	Provide training prior to the rainy season.	Annually, Q4	Done FY 06-07. Training conducted on October 3, 2006 for inlet cleaning crews; on September 20, 2006 for Park Rangers; and June 2007 for DOT crews.	DOT, ESD
SDO 4.B	Create or revise training modules for affected City staff.	As Needed	Done FY 06-07. Training presentations were revised based on the BMPs chosen for each particular crew.	DOT, ESD
SDO 4.B.1	Improve the focus of the training on the specific BMPs used by a section.	As Needed	Done FY 06-07. The DOT crew training was revised to focus on the 2-3 BMPs chosen by each supervisor for their particular crew.	DOT, ESD
SDO 4.B.2	Provide specific training to inlet cleaning crews on IMSPAR data collection in advance of inlet cleaning program implementation.	Annually	Done FY 06-07. DOT Storm Inlet Cleaning Program crew training was conducted on October 3, 2006.	DOT, ESD
SDO 4.B.3	Add specific components from DOT Electrical Crew training module to the general DOT Street Crew training module. These components include: asphalt/concrete removal, concrete installation and repair, and mercury lamp recycling and/or disposal.	Done FY 05-06	Done FY 05-06.	ESD
SDO 4.C	Produce schedule for training.	Annually	Done FY 06-07. DOT inlet cleaning crews training was scheduled with supervisors in August 2006. Training for DOT street maintenance crews was scheduled with supervisors in May 2007.	DOT, ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
SDO 5	**Data Analysis** As part of the annual review process, the City of San José will evaluate data regarding cleaning activities and unusual flows observed during inspection. The review and evaluation will include consideration of storm drain structural retrofit.			
SDO 5.A	Draft procedure for annual review and evaluation of data.	Done FY 01-02	Done FY 01-02.	DOT, ESD
SDO 5.A.1	Collect data on the amount of materials removed during inlet cleaning.	Done FY 04-05 Annually	Done FY 06-07. Data was collected, by DOT crews, on the amount and type of materials removed during the FY 06-07 Storm Inlet Cleaning Program.	DOT, ESD
SDO 5.B	Implement annual data review and identify follow-up actions as appropriate.	Annually	Done FY 06-07. The FY 06-07 Storm Inlet Cleaning Program Problem Area data was reviewed and follow-up actions were identified. See 6.B: *SDO Program Evaluation*.	DOT, ESD
SDO 5.B.1	Re-evaluate how follow up is conducted by crews when "cars on catch basins" is identified on the IMSPAR report, in order to better understand to what extent parked cars are a barrier to cleaning.	FY 06-07	Done FY 06-07. A new procedure was introduced in FY 05-06 for when crews encountered a car on a catch basin during the storm inlet cleaning program. Crews were to note on their data collection sheet that a car was parked over a catch basin, and therefore the catch basin could not be cleaned. If the crew was able to go back to the catch basin at a later time in an attempt to inspect and clean the catch basin again, they were to record it on the data collection sheet for each time they went back. If they were finally able to clean the catch basin, that was to be recorded on the data collection sheet also. The "car on catch basin" procedure was abandoned in FY 06-07 because it proved to be too cumbersome and difficult for crews to track effectively. However, crews continue to track the number of catch basins which have cars parked over them.	DOT, ESD
SDO 5.B.2	Evaluate "cars on catch basins" data to see if it can be used as one of the factors in determining where future posted signage for street sweeping restrictions will be installed.	FY 06-07	Done FY 06-07. DOT and ESD staff evaluated the possibility of using cars on catch basin data as one of the criteria in determining where future posted signage for street sweeping restrictions will be installed. Because crews continue to track the number of catch basins which have cars parked over them, It is feasible to use the data as one of the criteria.	DOT, ESD
SDO 5.B.3	Evaluate how to integrate the results of the IMSPAR report, regarding garbage and high debris, into scheduling additional cleaning.	Annually	Done FY 06-07. Some additional cleaning was conducted in FY 06-07.	DOT, ESD
SDO 5.B.4	Re-evaluate use of hand held devices to collect data during storm drain inlet cleaning and potentially other maintenance activities.	FY 07-08	N/A.	DOT, ESD
SDO 6	**BMP Effectiveness Reviews**			

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
	As part of the annual review process, the City of San José will review and evaluate the effectiveness of its BMPs in reducing pollutants in stormwater and eliminating illicit discharges.			
SDO 6.A	Review with supervisors to get feedback and information on how to assess BMP effectiveness.	As Needed	Done FY 06-07. DOT supervisors attended annual training. Evaluations were distributed to elicit information on BMP and SOP effectiveness. Feedback received indicates that the BMPs and SOPs are effective.	DOT, ESD
SDO 6.B	Use annual training sessions with staff as an opportunity to evaluate the effectiveness of BMPs & SOPs.	Annually	Done FY 06-07. The annual DOT Stormwater BMP and SOP training was conducted in June 2007. Both DOT crews and supervisors attended the training conducted in June. PSR & SDO BMPs and SOPs were reviewed and feedback was requested during the training sessions. Written evaluations for the training were also distributed. Feedback received from both sources indicated that the existing BMPs and SOPs are effective and no modifications were necessary in FY 06-07. See 5.B: *PSR Program Evaluation* for the summary of training evaluation data.	DOT, ESD

6.B SDO Program Evaluation

Training

The City of San José provides annual training to its municipal staff in use of appropriate BMPs. The City also provides a mechanism for obtaining feedback from staff on implementation and effectiveness of BMPs and Control Measures. See 5.B: PSR Program Evaluation, Training for results for combined PSR & SDO training. SOPs listed in PSR 1.D.1 and SDO 1.D.1 were included in the FY 06-07 DOT crew training. In addition, surface cleaning training was conducted on April 6, 2007 for City staff and City contractors that perform surface cleaning at City facilities.

Annual staff training was held in October 2006 for the Storm Drain Inlet Cleaning Program. Participants were given an evaluation form to fill out. Of the 13 staff that participated in the training, 8 evaluations were completed and returned. Results of the completed evaluations are summarized below:

- 100% responded that the training subjects taught are appropriate to their work;
- 100% responded that the training adequately explained how to fill out the storm inlet cleaning data collection form;
- 100% responded that the training adequately described the need for complete and consistent inlet location information;
- 100% responded that the training adequately explained how they, City staff, can help the City maintain compliance with the Stormwater NPDES permit.

Storm Inlet Cleaning Program Data Review

As part of the annual review process, the City of San José evaluates data regarding cleaning activities and unusual flows observed during inspection. The review and evaluation includes consideration of storm drain structural retrofit. The City reviews data on cleaning activities via the Infrastructure Maintenance Division Storm Drain System Problem Area Report (IMSPAR). The data collection criteria developed in FY 04-05 for the Storm Inlet Cleaning program continued to work well. This was the third year that quantifiable data was collected by the inlet cleaning crews. In FY 06-07, the data collection form used check boxes for identifying each problem type. This made

it easier for crews to record multiple problems at one inlet. Evaluation of the FY 06-07 IMSPAR data indicates that approximately 5.5% of the City's storm drain inlets and catch basins had a problem associated with them. The key problems for urban runoff were:

1. Cars parked over catch basins (~1.8%) – crews could not reach the catch basin to clean it. During review, the City considered options for minimizing parked cars but concluded that sign posting would be cost prohibitive at this time. Currently staff return to these catch basins at least once for subsequent cleaning attempts.

2. High Debris (~1.3%) – debris (leaves, lawn clippings, dirt and other natural materials) in excess of 3 feet deep in catch basin.

3. Garbage (~0.7%) – volume of garbage (paper, bottles, cans, and other man-made waste) in excess of a full grocery bag.

4. Illicit pollution (~0.0%) – materials such as concrete, antifreeze, oil, paint, etc. that appear to have been intentionally dumped into the catch basin. Maintenance staff are directed to contact Environmental Enforcement when this issue is identified.

5. Other problems encountered included roots, construction, silt sacks, and no access to catch basin (grate could not be opened due to other reasons beside cars over the grate).

In FY 05-06, ESD evaluated the proposal to employ hand held devices to collect data during catch basin cleaning and potentially other maintenance activities. With current budget and staffing constraints within DOT, employing hand held devices was not found to be feasible. The proposal will be re-evaluated in FY 07-08.

In FY 06-07, DOT conducted a resource and effectiveness study of its personnel and equipment primarily in sanitary sewer operation and maintenance, benchmarking the results against other cities throughout the state. Given the recently adopted procedures for sanitary overflows and the impacts from both the SSMP and the MRP, DOT appealed for both additional equipment and the filling of vacant positions in the sewer programs. The documentation efforts enabled DOT to acquire $1M in funding in FY 07-08 for the purchase of 4 vactor trucks. DOT has also received permission to fill most of the vacant maintenance positions in the sewer programs in FY 07-08.

BMP Effectiveness

As part of the annual review process, the City of San José reviews and evaluates the effectiveness of its BMPs in reducing pollutants in stormwater and eliminating illicit discharges. BMP effectiveness is evaluated using staff feedback gathered from training sessions. See *5.B PSR Program Evaluation, BMP Effectiveness Review* for results.

6.C SDO Response to Water Board Comments

No comments received from Water Board on this Program Element.

7. WUOM: Water Utilities Operations & Maintenance

7.A WUOM Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
WUOM 1	**Inventory of O&M Activities** The City of San José's Municipal Water System will conduct an inventory of all-key operations and maintenance activities, and identify routine and unplanned non-stormwater discharges from these activities. This inventory will be conducted every three years and evaluated at least once a year.			
WUOM 1.A	Review current procedures for operations and maintenance.	Annually	Done FY 06-07. The current procedures have been reviewed and no change is recommended at this time.	ESD-Muni
WUOM 1.B	Three-year update of list.	3/31/09 Every 3 years	Done 3/06. Next inventory not due until 3/09.	ESD-Muni
WUOM 2	**Implementation of WUPPP** The City of San José's Municipal Water System will implement the pollution control measures identified in the Water Utility Pollution Prevention Plan (WUPPP) to manage chlorine, biocides, and algaecides and prevent erosion and sedimentation.			
WUOM 2.A	Implement WUPPP/Report on activities	Ongoing	Done FY 06-07. WUPPP was implemented in 2000. Muni Water staff and their contractors comply with the BMPs and SOPs included in the WUPPP.	ESD-Muni
WUOM 3	**Staff Training and Contractor WUPPP Compliance** The City of San José's Municipal Water System will conduct annual training for municipal staff and coordinate WUPPP elements with water utility project planning, including WUPPP elements (BMPs, conditions, specifications, etc., in contract and services agreements).			
WUOM 3.A	Implement training program.	Annually, Q2	Done 12/13/06. See 13.D: *Municipal Employee Training Summary.*	ESD-Muni
WUOM 4	**WUPPP Effectiveness Evaluation** The City of San José's Municipal Water System will evaluate the effectiveness of the WUPPP annually. Maintain accurate documentation and revise the WUPPP as necessary.			
WUOM 4.A	Evaluation effectiveness of program.	Annually, Q4	Done on 12/13/06. Muni Water has developed an evaluation program, which includes evaluating one of the SOPs annually. See 9.B: *WUOM Program Evaluation.*	ESD-Muni

7.B WUOM Program Evaluation

The City's Municipal Water System evaluation process consists of reviewing one SOP or BMP from start to finish on an annual basis. This effort is combined with a training program in which Muni Water staff creates a training video of the SOP or BMP being reviewed. Staff and others involved in the process then view the video for training. The paperwork process (checklist for that BMP) is discussed and then the forum is opened up for discussion. Individuals who perform the activity share their thoughts on what works and what does not work. The facilitator (typically, a designated supervisor) writes down the comments and suggestions. When appropriate, the SOP or BMP is revised to incorporate the results of the discussion.

For FY 06-07, Muni Water conducted an evaluation of the Water Meter Testing Program. This evaluation took place on 12/13/06. A training video was made in accordance with the SOP outlined in the "Water Utility Operation and Maintenance Discharge Pollution Prevention Plan." Staff and a responsible representative of Muni Water's contractor attended the training session and viewed the video. After viewing the video, staff discussed the pros and cons of the procedure. Staff found the procedures to be satisfactory and effective for meeting the goals of the URMP. No changes were recommended at this time.

Contractor performance for Muni Water is monitored by staff inspection. If the contractor fails to follow BMPs, the Muni Water inspector on the job will notify the contractor. In addition, Muni Water may receive complaints from other parties; however, this is not typical since the inspector usually resolves issues right away.

7.C WUOM Response to Water Board Comments

No comments received from Water Board on this Program Element.

7.D WUOM Tables / Additional Information

No additional information on this Program Element.

8. PM: Pesticide Management

8.A PM Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
PM 1	**Integrated Pest Management** The City will adopt an Integrated Pest Management (IPM) policy and/or ordinance requiring use of IPM techniques in the agency's operations; and, minimization of pesticide use, particularly organophosphate and copper-based pesticides, by agency staff and contractors.			
PM 1.A	Develop a City IPM policy for inclusion in Pesticide Management Plan.	Done FY 02-03	Done FY 02-03.	ESD
PM 2	**Pesticide Management Plan** The City will develop and implement a Pesticide Management Plan with the goals of minimizing pesticide use and reducing the amount of pesticides in stormwater and landscape runoff to the maximum extent practicable.			
PM 2.A	Draft a City of San José Pesticide Management Plan.	Done FY 01-02	Done FY 01-02.	ESD
PM 2.B	Publish City Pesticide Management Plan in URMP.	Done FY 01-02	Done FY 01-02.	ESD
PM 3	**IPM SOPs and BMPs** The City will develop and implement standard operating procedures (SOPs) and best management practices (BMPs) for implementing the IPM Policy			
PM 3.A	Develop SOPs and BMPs for implementing IPM policy with provisions that will reduce water quality impacts from pesticide use.	Done FY 01-02	Done FY 01-02.	GS, DOT, ESD
PM 3.B	For each type of pest problem identified, seek model SOPs and BMPs from published literature.	Done FY 01-02	Done FY 01-02.	GS, DOT, ESD
PM 3.C	Incorporate or develop appropriate IPM measures into City SOPs and BMPs.	Done FY 02-03	Done FY 02-03.	GS, DOT, ESD
PM 3.C.1	Pilot the use of additional IPM techniques, e.g., for weed control.	FY 06-07	Done FY 06-07 and ongoing. See 8.B: *PM Program Evaluation.*	GS, DOT, ESD, PRNS
PM 3.D	Update City URMP to incorporate model Pest Management Performance Standard, including description of legal authority (IPM policy and contract language), work plan elements, BMPs, and SOPs needed for implementation.	Done FY 02-03	Done FY 02-03.	ESD
PM 3.E	Review and update City SOPs and BMPs as appropriate.	As Needed	The Pesticide Management Committee determined that no updates were required for FY 06-07.	GS, DOT, ESD, PRNS
PM 3.F	Develop Approved Pesticide List for applications on City property.	FY 06-07	In progress FY 06-07 and ongoing. The Pesticide Management Committee developed a list in draft form.	PRNS, DOT, GS, ESD
PM 3.F.1	Revise SOPs and BMPs to reflect use of Approved Pesticide List.	FY 06-07	Done FY 06-07 and ongoing. The Pesticide Management Committee determined that no updates were required for FY 06-07.	PRNS, DOT, GS, ESD
PM 4	City Employee Training			

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
	The City will ensure that employees receive pest management training by implementing the following: 1. Employees who apply pesticides for the City will obtain the appropriate training as required by County Agricultural Commissioner and State Department of Pesticide Regulation (DPR); 2. Employees within departments responsible for pesticide application will receive annual training on appropriate portions of City IPM Policy, SOPs, and BMPs, and latest IPM techniques; 3. Employees who are not authorized to apply pesticides will be annually trained not to use over-the-counter pesticides at workplace, consistent with IPM Policy. 4. Annual internal outreach will be conducted to employees, who do not necessarily purchase or apply pesticides during their course of work, on less toxic pest control and to encourage employees to use IPM techniques away from work.			
PM 4.A	Ensure that employees who apply pesticides for the agency obtain appropriate training required by County Agricultural Commissioner and State Department of Pesticide Regulation.	Annually	Done FY 06-07. DOT, GS, and PRNS staff received safety training in April 2007 on the specific pesticides used during the course of their work. Training meets State DPR requirements. Additional training is done throughout the year for new employees prior to using pesticides or if new pesticides, which were not covered in the annual training, are introduced. Training is provided annually. See 13.D: *Municipal Employee Training Summary* for summary of attendance.	GS, DOT, PRNS
PM 4.B	Provide annual training on IPM Policy, SOPs, and BMPs, and latest IPM techniques to employees within departments responsible for pesticide application.	Annually	Done FY 06-07. Training for DOT, GS and PRNS staff was held in April 2007. Training topics included safety, City IPM Policy, SOPs, and BMPs, and IPM techniques. This message was also communicated in the SWPPP, PSR/SDO, and RPW municipal compliance trainings. See 13.D: *Municipal Employee Training Summary* for summary of attendance.	GS, DOT, ESD, PRNS
PM 4.C	Annually inform employees who are not authorized /trained to apply pesticides not to use over-the-counter pesticides at the workplace, consistent with IPM Policy.	Ongoing	Done FY 06-07. Notification that untrained staff members are not to utilize over-the-counter pesticides in the workplace was provided at the training and in a May 2007 staff notice to City facility managers.	GS, DOT, ESD, PRNS
PM 4.D	**Monitoring Mechanism I.B.1.** Document and evaluate effectiveness of staff training conducted each year in annual report.	Annually	Done FY 06-07. The training required for certificates and licenses is reviewed and approved for Continuing Education Units (CEUs) by the Department of Pesticide Regulation (DPR) – this ensures it is valuable and effective for applicators. In FY 06-07, an evaluation/survey for class participants was used for IPM training conducted in April 2007. The results were compiled and will be used to implement improvements for the next training. See 8.B: *PM Program Evaluation for a summary of evaluation results.*	GS, DOT, ESD, PRNS
PM 4.D.1	Update class evaluation/survey for IPM training classes conducted by City staff.	As Needed	Done FY 06-07. The appropriate updates were made to the evaluation form to reflect content of training.	GS, DOT, ESD, PRNS
PM 4.E	Public Education and Outreach Task II.A.14 Conduct internal outreach on less toxic pest control to	Annually	Done FY 06-07. The summer issue of the *ESD Connections* newsletter featured an article on IPM.	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
	employees who do not necessarily purchase or apply pesticides during the course of their work (to encourage employees to use IPM techniques away from work).			
PM 5	**Contractor Pesticide Management Requirements** The City will develop and implement a process to ensure that contractors employed to conduct pest control and pesticide application on municipal property engage in pest control methods consistent with City IPM Policy. Specifically, the City will require contractors to: ▪ follow City IPM policy, BMPs, and SOPs; ▪ provide evidence of current IPM training, when feasible ▪ provide documentation of pesticide use on City property to the City in a timely manner.			
PM 5.A	Ensure that contractors employed to conduct pest control/pesticide application on municipal property engage in methods consistent with City IPM policy.	Ongoing	Done FY 06-07.	GS, DOT, ESD, PRNS, PW, RDA
PM 5.B	Review and update a list of all contractors employed by the City who perform pesticide application work.	Annually	Done FY 06-07. The contractor list was updated and new information fields were added to record information regarding contract term.	GS, DOT, ESD, PRNS, PW, RDA
PM 5.C	Implement a procedure to provide to each contractor a copy of the City's IPM policy.	Done FY 02-03	Done FY 02-03.	GS, DOT, ESD, PRNS, PW
PM 5.D	City will supply copies of pest specific BMPs and SOPs to contractors. Contractors will self certify their compliance with the City SOPs and BMPs.	Ongoing	Done FY 06-07.	GS, DOT, ESD
PM 5.E	Require through contract specifications that PCOs contracted for municipal applications use pest control methods consistent with City's IPM Policy. Specifically, require contractors to: a) follow City IPM policy, BMPs and SOPs; b) provide evidence of current IPM training, when feasible; and c) provide documentation of pesticide use on City property to the City in a timely manner.	Ongoing	Done FY 06-07.	GS
PM 5.E.1	City will develop standard content for PCO contracts.	Done FY 04-05	Done FY 04-05.	GS, DOT, ESD, PRNS
PM 5.E.2	City will implement standard content for PCO contracts.	Done FY 05-06 Ongoing	Done FY 06-07.	GS, DOT, ESD, PRNS
PM 5.F	Invite contractors to participate in City training sessions on pesticide management.	FY 05-06 Ongoing	Done FY 06-07.	GS, DOT, PRNS
PM 5.G	**Monitoring Mechanism III.A.1.** Document number of PCOs receiving presentations and/or training on pesticide use by PCOs on municipal property.	Annually	Done FY 06-07.	GS, ESD
PM 6	**Pesticide Management Outreach** The City will identify in annual work plan outreach activities it will conduct consistent with Program Pesticide Management Plan. Work plan elements will address outreach to residential and commercial pesticide users, pesticide retailers, and special districts. Information will be provided on less-toxic pest control practices, proper disposal of pesticides, and the City's own IPM practices, as applicable.			

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
PM 6.A	Increase awareness of target audiences regarding proper pesticide use, disposal methods, water quality impacts, and less toxic pest management messages. Target audiences include commercial and residential pesticide users, pesticide retailers, municipal employees, and special districts.	Ongoing	Done FY 06-07. The City participates in the Our Water Our World (OWOW) campaign, and the Program's Watershed Watch campaign. Both campaigns deliver IPM messages. In addition, the City published an article in the BOMA Byline newsletter with IPM information for businesses. See 14.D*: PIP Activities* for more details.	ESD
PM 6.B	Prepare IPM stories and press releases to local media.	As Needed	Done FY 06-07. OWOW ads were placed in multiple publications. See Program Annual Report and 14.D*: PIP Activities* for details.	ESD
PM 6.C	In conjunction with Program, City will provide information on less toxic pest control (e.g., IPM techniques, municipal IPM policies, model contract language, training opportunities, etc.) to neighboring special districts (e.g., VTA, sanitary and utility districts, open space districts, vector control districts, and school districts) as appropriate.	As Needed	Done FY 06-07.	ESD
PM 6.D	Create and provide fact sheets and materials to pesticide retailers to facilitate point-of-purchase outreach to support IPM Store Partnership Program.	Ongoing	Done FY 06-07 through Program and BASMAA's OWOW Campaign. See Program Annual Report and 14.D*: PIP Activities* for details.	ESD
PM 6.E	**Monitoring Mechanism:** Document or estimate numbers of residents reached by outreach efforts, including events, web promotion, municipal employee outreach, and media advertising. Monitor responses to outreach efforts by documenting calls to the Program's general and watershed campaign hotlines.	Annually	Done FY 06-07. See Program Annual Report and 14.D*: PIP Activities* for evaluation of outreach activities.	ESD
PM 6.F	Co-host regional IPM conference to promote implementation of IPM practices in municipal operations in the City and Bay Area region.	FY 06-07	Done FY 06-07. The City co-hosted the 3rd Annual Regional IPM Conference, which attracted over 400 attendees from area municipalities and organizations. See 8.B: *PM Program Evaluation* for details.	ESD, PRNS, DOT, GS
PM 6.G	**Monitoring Mechanism IV.A.1.** Document outreach efforts targeting businesses, recommended in the work plan, to be developed by the Program. Implement evaluation component of the work plan.	Annually	Done FY 06-07. See Program Annual Report and 14.D*: PIP Activities* for details.	ESD
PM 7	**HHW Pesticide Disposal** The City will coordinate with household hazardous waste (HHW) collection agencies to support, enhance, and help publicize programs for proper pesticide disposal.			
PM 7.A	Work with HHW collection agencies to support, enhance, and publicize programs for pesticide disposal.	Ongoing	Done FY 06-07 and ongoing. This work is done at the Program level. See Program Annual Report for details.	ESD
PM 7.B	Ensure that adequate pesticide disposal services exist for residents and conditionally exempt small quantity commercial generators.	Annually	Done FY 06-07. Adequate pesticide disposal services exist through the County's Household Hazardous Waste and Conditionally Exempt Small Quantity Generators programs. No San José customers were turned away and appointments were scheduled in a timely manner.	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
PM 7.C	Provide hazardous waste disposal information to residents, through distribution of materials (e.g., utility bill insert, city newsletter, community events, etc.) or advertising in local media.	Ongoing	Done FY 06-07 and ongoing. Hazardous waste disposal information is provided on the City's website along with a link to the Santa Clara County HHW Program's website. The City's Integrated Waste Management (IWM) outreach includes the Santa Clara County HHW Program's hotline.	ESD
PM 7.D	**Monitoring Mechanism V.A.1.** Document that HHW collection programs adequately serve residents and businesses and that exchange programs do not exchange organophosphate or banned pesticides.	Annually	Done FY 06-07. The Santa Clara County HHW Program managed 1,250 lbs of diazinon and Dursban as well as over 210,900 lbs of other pesticides. There was no wait in order to schedule an appointment and no customers were turned away. The HHW Program does not exchange organophosphate or banned pesticides.	ESD
PM 8	**City Pesticide Use Tracking** The City will develop and implement a process for tracking pesticide use on municipally-owned property.			
PM 8.A	Develop and implement a pilot pesticide tracking process for Diazinon and Chlorpyriphos products.	Done FY 01-02	Done FY 01-02.	GS, DOT, ESD
PM 8.B	Track pesticide use on municipally owned property. Include reporting and justification for use of OP pesticides and BMPs employed during OP pesticide use.	Ongoing	Done FY 06-07 and ongoing. Neither the City nor its contractors purchased, used, or wrote recommendations for the use of OP pesticides on municipal property. Contracts for structural pest control include requirements for reporting and justification of use of OP pesticides and BMPs employed during OP pesticide use in the contract specifications.	GS, DOT, ESD
PM 8.B.1	Evaluate feasibility of implementing electronic data management system for pesticide use.	Done FY 04-05	Done FY 04-05.	GS, DOT, ESD
PM 8.B.2	Implement electronic data management system for tracking pesticide use on City property.	Done FY 04-05 and Ongoing	Done FY 06-07. A database was used to track pesticide use on municipal property by City staff and contractors.	GS, DOT, ESD
PM 8.C	**Monitoring Mechanism I.A.1.** Document completion of tasks in annual reports. Use pesticide tracking process to document pesticide use.	Annually	Done FY 06-07. Monthly pesticide use reports submitted by contractors were compiled and reviewed. See 8.B: *PM Program Evaluation.*	GS, DOT, ESD, PRNS, PW
PM 9	**City Pesticide Inventory Search** The City will conduct periodic Citywide search of its chemical inventory for pesticides no longer legal for application per EPA, State, and/or local requirements. These pesticides, if found, will be properly disposed pursuant to appropriate waste disposal regulations.			
PM 9.A	Conduct Citywide search of chemical storage areas for pesticides no longer legal for application per EPA, State, and/or local requirements. Properly dispose of any such pesticides pursuant to appropriate waste disposal regulations.	Annually	Done FY 06-07. PRNS and DOT conducted search in May 2007. No expired pesticides were found.	GS,DOT, PRNS
PM 10	**Pesticide Management Plan / IPM Policy Review** As part of annual reporting process, the City will review and evaluate, with input from municipal staff, the effectiveness of its Pest Management Plan and IPM Policy in achieving the goals of the Plan to the maximum extent practicable.			
PM 10.A	Review and continuously improve goals, actions, and	Annually	Done FY 06-07. See 8.B: *PM Program Evaluation.*	GS, DOT, ESD, PRNS,

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
	monitoring mechanisms of the work plan considering results of self-evaluations, comments from Water Board staff and other interested parties, and results of local performance review meetings, if any.			PW
PM 10.B	**Monitoring Mechanism IX.A.1.** Complete revised work plan that incorporates continuous improvement items, and report on completion of work plan tasks.	Annually	Done FY 06-07 (between 07-08 Work Plan and this Annual Report).	GS, DOT, ESD, PRNS, PW
PM 10.C	**Monitoring Mechanism VII.A.1.** Summarize types of pesticide reduction measures required (such as by conditions of approval) for new development and significant redevelopment projects, and percentage of new development/ significant redevelopment projects for which pesticide reduction measures were required. (Draft Permit Provision C.3.n.)	Annually	Done FY 06-07. See NRD 5.G in *Work Plan Self Evaluation Matrix*.	PW, ESD

8.B PM Program Evaluation

Integrated Pest Management

The City continues to apply current and new less toxic and non-chemical Integrated Pest Management (IPM) techniques to resolve municipal pest problems. FY 06-07 highlights include:

- DOT staff in Special Assessment Districts continues to power wash or scrape tussock moth cocoons from plum and live oak trees, where tussock moths used to defoliate the trees. By removing cocoons using mechanical IPM methods, DOT staff eliminates the need to use pesticide spray applications.
- While many City park sites have not suffered from oak tussock moths due to biological control by parasitic wasps, several City parks sites experience tussock moth infestations too severe to be controlled by mechanical or biological methods. This year, however, injection pesticides at a pilot park site replaced overhead spraying of infested trees. The injection method not only controlled the tussock moths but also resulted in less pesticide drift and run-off potential.
- In light of a Stipulated Injunction and Order in which USEPA agreed to withdraw certain authorizations for use of 66 specified active pesticide ingredients in California red-legged frog habitat, City staff mapped the final critical habitat areas specified in the Order and, in those areas, halted the use of pesticides containing any of the 66 listed active ingredients. PRNS staff also trialed a new herbicide in an effort to seek alternatives to pesticide active ingredients listed on the Stipulated Injunction and Order.
- PRNS and DOT staff continue to use mulch to help alleviate the need for pre-emergent herbicides and to reduce water use.
- Alum Rock Park staff placed flapper lids on all outdoor garbage cans to help limit food sources for ground squirrels.
- To encourage natural predatory control of gophers, the City purchased over 30 barn owl houses. Eight barn owl boxes were placed in City parks in FY 06-07, and further box placement and monitoring will continue in FY 07-08 in an effort to reduce reliance on chemical controls throughout the City.
- To encourage bats to roost in the City and prey on mosquitoes, the City purchased eight bat boxes to place in Community Gardens and two to place in DOT Special Assessment Districts. In FY 06-07, four of the bat boxes had been placed, and the remainder will be mounted in early FY 07-08. The hope is that mosquito control by bats will result in less pesticide use as well as a reduced human health risk of West Nile Virus.

- In FY 06-07, the City secured a contractor to provide grazing services at City sites. This contract will allow the City to pilot grazing by goats and/or sheep at City sites in the future as a pesticide-free vegetation management tool. The first site(s) will be grazed during the summer of FY 07-08 and may include Municipal Water Resources sites, DOT sites, and PRNS sites.

IPM Conference

The City co-hosted the 3rd Annual Regional IPM Conference which occurred at the McEnery Convention Center in San Jose on November 14th, 2006. City staff members from ESD, PRNS, GS, and DOT served as members of the Planning and Organizing Committee and as the Conference chair. The City invited all of its contracted pest control operators (PCOs) and landscape maintenance professionals to the conference, and many attended. In total, the conference was attended by over 400 representatives from diverse organizations and governments throughout the Bay Area and beyond.

Approximately 119 conference attendees submitted a conference evaluation, and the results show that:

- 93% of attendees felt the keynote speakers were good, very good, or excellent;
- 91% rated the overall quality of the conference as good, very good, or excellent; and
- 82% thought the educational materials were good, very good, or excellent.

Conference attendees reported that they particularly enjoyed speaker session topics about developing IPM programs in municipalities, the historical ecology of watersheds, abiotic plant disorders, and chemical controls in IPM. For future IPM conferences, attendees requested to see more content on alternatives to toxic chemicals in pest management, innovative IPM techniques, and the impact of pesticides on water quality.

Data Tracking

The City's pesticide tracking database was developed and implemented in FY 04-05. In the FY 05-06 Annual Report, City applications of pesticides did not include data from DOT's Special Assessment Districts nor from PCOs contracted for City facilities due to data inaccuracies and/or unavailability. In FY 06-07 the City was able to work with the contractors to collect the appropriate data, resulting in inclusion of pesticide usage data from DOT Special Assessment Districts and PCOs for City facilities in this year's analysis. The tracking database was able to incorporate pesticide use data from Municipal Water Resources reservoirs, wells, and pump stations as well this year. With this additional information, FY 06-07 pesticide use tracking captures a much wider picture of pesticide use in City operations than in previous reporting years. In turn, FY 06-07 total pesticide usages for City applications are not directly comparable to previous fiscal years' usage numbers. Pesticide data tracking for golf courses in FY 06-07 was consistent to prior years; therefore, the usage numbers for golf courses over time are directly comparable and are presented as such. The City will strive to continue collecting pesticide use data from all City sources into the future, which will increase the availability of accurate and comparable data.

Pesticide Use

This section highlights changes in usage of certain pesticides applied by City staff and Golf Course management staff. The discussion focuses on the products used in largest quantities for City applications and Golf courses. Highlights include:

- City applications of Karmex (diuron) continued to decrease in FY 06-07 in response to concerns about its impact on water quality.
- Use of chlorothalonil increased in both the City and golf courses due to an increased occurrence of fungi.
- City applications of oxadiazon decreased this year in response to its known reproductive toxicity and carcinogenic effects (CA Prop 65 List).
- Golf course applications of mancozeb continued to decrease in FY 06-07 in response to its known carcinogenic effects (CA Prop 65 List).
- SpeedZone (2,4-D, 2-Ethylhexyl Ester; 2,4-D, Isooctyl Ester; & Carfentrazone-Ethyl) was used more widely in FY 06-07 in City parks for broadleaf weed control, while glyphosate products were used the most frequently for weed control.

Overall, pesticide usage at golf courses decreased significantly from FY 05-06 to FY 06-07.

Training

In April 2007, City staff held its annual training for staff responsible for applying pesticides. Participants were given an evaluation form to complete. Of the 124 staff that participated in the training, 53 evaluations were completed and returned. Results of the completed evaluations are indicated below and will serve as a guide for improving the training next year.

- 88% thought that the training subjects taught are appropriate to their work;
- 83% thought the training adequately described the City's IPM policy;
- 86% thought that the BMPs/SOPs described match their work practices;
- 94% thought that the training adequately described the relationship of BMPs/SOPs to compliance with the City's Stormwater NPDES permit; and
- 84% thought that the training adequately explained how they, City staff, could help the City maintain compliance with the Stormwater NPDES permit.

8.C PM Response to Water Board Comments

No comments received from Water Board on this Program Element.

8.D PM Summary Tables / Additional Information

9. M: Mercury

9.A M Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
M 1	**Municipal Use of Mercury –Containing Products** The City will eliminate all unnecessary municipal use of mercury-containing products and establish proper disposal methods for products that cannot be eliminated.			
M 1.A	Implement SCVURPPP guidelines for mercury-containing product reduction and management. These guidelines include a schedule for the timely phase-out of mercury-containing products identified for virtual elimination as well as reporting requirements, possibly to track recycling, replacement, and reduction in use of mercury-containing products.	Ongoing	Done FY 06-07 and ongoing. See 9.D: *Mercury-Containing Product Management Practices* for a listing of the City's management strategies. In FY 06-07, the City expanded its municipal alkali and rechargeable battery recycling program to all City facilities. Thirteen major facilities have collection directly from the vendor, the rest of the facilities deliver batteries collected at their site to a central collection point. See 9.B. *Program Evaluation* for details.	ESD, GS
M 1.A.1	Collect and dispose of mercury-containing lamps generated in City-owned facilities	Ongoing	Done FY 06-07 and ongoing. The City purchases low mercury fluorescent lamps, and recycled more than 61,000 feet (11.5 miles) of mercury-containing lamps in FY 06-07 through its Lamp Recycling Program.	ESD, GS
M 1.A.2	Identify other mercury-containing products for virtual elimination, phase-out and/or proper disposal.	Annually, As Needed	Done FY 06-07. The City phased out the use of its lamp crusher for the disposal of low-pressure sodium lamps in FY 05-06, and dismantled the crusher in FY 06-07. Low-pressure sodium lamps do not contain mercury, but they are a Universal Waste, so they are recycled accordingly. The removal of the crusher removes the potential for mercury-containing lamps to be accidentally crushed and disposed of improperly. See 9.D: *Mercury Containing Product Management Practices* for a listing of actions the City is taking.	ESD, GS
M 1.B	Monitoring Mechanism I. Document completion of tasks in annual reports. Use mercury-containing product reporting guidelines.	Annually	Done FY 06-07. See 9.D*: Mercury Containing Product Management Practices* for a summary of management options identified and/or implemented to date.	ESD
M 2	**Household Hazardous Waste Collection** The City will provide mercury-containing product disposal services through household hazardous waste (HHW) collection programs for residents and small businesses and encourage the use of these programs.			
M 2.A	Provide mercury-containing product disposal services for residents and small businesses.	Ongoing	Done FY 06-07 and ongoing. The City supports the County of Santa Clara Department of Environmental Health's (DEH) Household and Small Business Hazardous Waste program and the in-store take-back program for Universal Wastes.	ESD-IWM

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
			County DEH hosts weekly household and small business hazardous waste collection events. This service allows residents and small businesses in the county to properly dispose of their hazardous wastes, including mercury-containing products. In FY 06-07 this program provided service for 26,953 residents, an 8% increase over last year. In addition, 418 small businesses were served, including local government agencies, Goodwill Industries, and the Salvation Army. County wide, the program collected 65,860 pounds of household batteries (a 30% increase over last FY) and 1,170 pounds of elemental mercury (up from 425 pounds last FY). 65,860 pounds of household batteries were collected at HHW events and at the 49 retail/community drop-off locations throughout Santa Clara County. See the County Annual Report for details.	
M 2.B	Work with Program and HHW collection agencies to develop and help publicize the fluorescent light recycling program.	Ongoing	Done FY 06-07 and ongoing. The City supports the County of Santa Clara Department of Environmental Health's (DEH) Household and Small Business Hazardous Waste Program. In FY 06-07 the County collected 353,694 feet (88,423 pounds) of lamps. This is a marked increase from last FY's 277,000 feet (67,943 pounds) total. The City and the Program also worked with the County to publicize its fluorescent tube drop-off program. The Program developed and implemented the "Watch Out for Mercury Pollution!" media campaign designed to encourage residents to take their spent fluorescent lamps to any of 30 drop-off locations in Santa Clara County (up from 18 last FY).	ESD, Program
M 3	**Monitoring and Science** The City will participate in coordinated monitoring efforts to support mercury TMDL development and implementation, including assessment of air pollution sources of mercury and concentrations of mercury in sediment.			
M 3.A	Continue financial support of the Regional Monitoring Program (RMP), including the Mercury Deposition Network Pilot Study. Continue to actively participate in the RMP steering committee and technical review committee.	Ongoing	Done FY 06-07 and ongoing. The City continues to support the RMP financially. The City provided in-kind services from December 2000 through December 2006, operating the Mercury Deposition Network station #CA72. (See M 3.B). The City continues to participate on the RMP steering committee, chairs the technical committee, and serves on the Sources, Pathways, and Loadings workgroup.	ESD
M 3.B	The City of San José will continue to provide in-kind services for the maintenance of the Mercury Deposition Network site near San José.	12/31/2006	Done FY 06-07. The City has operated and maintained the National Mercury Deposition Network site #CA72 since December 2000. The City collected samples, recorded	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
			data, and sent both the samples and data to the national MDN contract laboratory for analysis. The City also sent records to SFEI for inclusion in SF Bay RMP analyses. Weekly sample collection and data reporting continued through December 2006. Information on the National MDN program (including pictures of collection apparatus) can be found at: http://nadp.sws.uiuc.edu/mdn/. The City chose to continue this activity beyond the December 2004 compliance date, and ceased activities after December 2006 following discussions with SFEI staff.	
M 4	**Regional, State, and Federal Coordination** Actively participate in regional, state, and federal coordination efforts to achieve a reduction in the amount of mercury in urban runoff and air emissions.			
M 4.A	Collaborate in technical studies to support TMDL development and implementation including the Santa Clara Basin WMI Guadalupe River Mercury TMDL Workgroup, RMP, and the CEP.	Ongoing	Done FY 06-07 and ongoing. The City participates in and supports programs to reduce mercury in stormwater runoff and air emissions, including the San Francisco Bay Regional Monitoring Program, National Mercury Deposition Network, AB 982 TMDL Public Advisory Group, WMI Guadalupe River Mercury TMDL Workgroup, and the Clean Estuary Partnership.	ESD
M 4.B	Support and participate in WMI Watershed Action Plan implementation.	Ongoing	Done FY 06-07 and ongoing. The Watershed Management Initiative (WMI) continues to work on implementing the Watershed Action Plan, through the actions of its subgroups and cooperative efforts with other collaborative groups, such as the Water Resources Protection Collaborative, the Habitat Conservation Plan, and the Fisheries and Aquatic Habitat Conservation Effort.	ESD
M 5	**Public Education and Outreach** Increase awareness of proper disposal of mercury-containing products and available non-mercury containing alternatives. Target audiences include residential, commercial, and industrial users and municipal employees.			
M 5.A	Coordinate with Program and HHW collection agencies to develop and implement a mercury-containing product outreach program to educate a selected target audience as well as encourage the proper use of the disposal of mercury-containing products.	Ongoing	Done FY 06-07 and ongoing. The Program maintains mercury-related information for residents on the MyWatershedWatch.org website. See Program Annual Report for details. Mercury and Household Hazardous Waste messages were also included at the Home Show event. See 14.D: *PIP Activities.* City staff attended Program-HHW Work Group meetings. The purpose of this work group is to identify areas where HHW and Stormwater messages and activities align and to enhance collaboration between the two programs. See the Program Annual Report for details.	ESD, Program, County HHW
M 5.B	Coordinate with municipal inspectors to integrate	Ongoing	Done FY 06-07 and ongoing. Provided proper handling	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
	mercury outreach into the existing routine pretreatment, source control, and/or hazardous materials inspection processes of industrial businesses.		and disposal information for mercury-containing products to businesses attending the Industrial Users Academy. See 14.D: *PIP Activities.* Inspectors also distribute the County's Universal Waste brochure for businesses as needed.	
M 5.C	Attend community events and distribute outreach materials. (See Attachment A: Outreach Activities Summary)	Ongoing	Done FY 06-07 and ongoing. Messages regarding proper disposal of fluorescent tubes are included whenever the Household Hazardous Waste program is promoted, e.g. the Home Show. See 14.D: *PIP Activities* for details.	ESD
M 5.D	Monitoring Mechanism V.B**.** document and evaluate each outreach activity, including the target audience and number of residents and/or businesses reached.	Annually	See Program report and 14.D: *PIP Activities* for evaluation of outreach activities.	ESD, Program

9.B M Program Evaluation

In FY 06-07, the City focused its virtual elimination policy activities on the collection and disposal of batteries and mercury-containing lamps, with the goal of reducing the impact of mercury from City operations. The City purchases and encourages the use of low mercury fluorescent lamps in City facilities. The City recycled more than 61,000 feet of mercury-containing lamps in FY 06-07 through its recycling programs. Numbers reported in FY 05-06 were underestimated. That year, it was reported that just over 9,100 feet of mercury-containing lamps were recycled, when in fact 39,176 feet were recycled. Questions regarding mercury content and alternative products are part of the City's Request for Quotation (RFQ) forms.

Along with lamps, the City worked to expand battery recycling in City facilities. Battery recycling is implemented at all facilities (approximately 100), making it easier for municipal employees to lawfully dispose of spent batteries. The batteries are collected as Universal Waste and hauled offsite by an outside contractor – thirteen facilities have collection directly from the vendor, the rest of the facilities have to bring batteries collected at their site to a central collection point. From May 2006 to May 2007, 6,520 pounds of alkali and rechargeable batteries were collected and properly recycled.

The City, in conjunction with BAPPG, hosted three mercury thermometer take-back events for City residents in FY 06-07. 1,116 mercury-containing thermometers were collected at three City-sponsored events, and disposed of appropriately. This equates to 1,016 grams (2.3 pounds) of mercury removed from the environment. More thermometer exchange events will take place in San José as well as the Water Pollution Control Plant Service Area in FY 07-08.

FY 06-07 showed a remarkable increase in the number of fluorescent lamps turned in to the thirty drop-off stores in Santa Clara County for recycling. 353,694 Feet (88,423 pounds) of lamps were collected and disposed of properly, up from 277,000 feet (67,943 pounds) in FY 05-06. This increase in collection can be attributed, in part, to the consistent outreach and education done by the City, the Program, and the County Household Hazardous Waste program. The City will continue to support the Watershed Watch campaign along with its fluorescent lamp recycling messages in FY 07-08.

The City has operated and maintained a National Mercury Deposition Network (MDN) site from January 2000 through December, 2006. City Staff collected samples, recorded data, and sent both the samples and data to the national MDN laboratory. This represents a two-year extension of the City's original commitment to this activity. Support was discontinued after discussion with SFEI staff. The City continues its commitment to work with the Water Board and stakeholders toward TMDLs that are technically defensible and feasible for implementation. City staff participates in mercury TMDL efforts by providing comments on the Bay-wide Mercury TMDL Report and Basin Plan Amendment, and serves as the WMI Watershed Assessment and Monitoring Subgroup representative to the Guadalupe Mercury TMDL project. The City expects to actively participate in the development and implementation of both TMDLs in FY 06-07. In addition, the City supports SCVURPPP, CEP, RMP, BASMAA and BACWA as these agencies conduct technical studies to address uncertainties regarding mercury in the watershed.

9.C M Response to Water Board Comments

Comments were not received from the Water Board on this Program Element.

9.D M Summary Tables / Additional Information

Mercury-Containing Product Management Practices

Mercury-Containing Products	Not Found	MO #1: Replace with Alternative	MO #2: Alternative upon Failure	MO #3: Reduce Use	MO #4: Recycle	MO #5: Hazardous Waste	Comments
LAMPS:							
Compact Source Lamp					I		Recycled through City's Lamp Recycling Program
Spectral Lamp	NF						
Fluorescent Lamp (Tubes)		I			I		Replacing existing lamps with low Hg lamps upon failure. All lamps are recycled through City's Lamp Recycling Program.
Metal halide Lamp					I		Recycled through City's Lamp Recycling Program
High pressure sodium Lamp					I		Recycled through City's Lamp Recycling Program
Mercury Vapor Lamps					I		Recycled through City's Lamp Recycling Program
Cold Cathode Lamp	NF						
Neon Lamp	NF						
Ultra-violet Lamp					I		
THERMOSTAT PROBES (ALSO KNOWN AS FLAME SENSORS OR GAS SAFETY VALVES):							
Furnaces					B		Implementation in progress
Water heaters					B		Implementation in progress
Ranges, ovens					B		Implementation in progress
Space heaters					B		Implementation in progress
TILT SWITCHES AND RELAYS:							
Tilt Switches at WPCP					I		
Public Works Material Testing Lab							
Thermometers					B		Implementation in progress
Other Mercury-containing materials					B		Implementation in progress
WPCP LAB MATERIALS							
Thermometers	NF						WPCP Lab uses alcohol-based thermometers and other traditionally mercury-containing apparatus
Mercury-containing Samples						I	Spent samples treated as Hazardous Waste and picked up by hauler every 2-3 months

Status Key:
No Action: No action identified for implementation
ID: Actions have been identified; implementation has not begun
B: Began process of implementation
I: Management option identified has been fully implemented
NF: product was not found in municipal inventory to date

Management Options Key:
MO #1: Replace with an alternative product when the product is identified, if an alternative exists.
MO #2: Replace upon failure, with an alternative product if an alternative exists.
MO #3: Reduce the use where possible
MO #4: Recycle when no longer in use
MO #5: When appropriate, dispose of as hazardous waste

10. CNAP: Copper / Nickel Action Plans

10.A CNAP Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
CB-1	**Vehicle Washing Operations**			
CB-1.A	Have member of San José team trained to lead mobile cleaners certification seminar.	As needed	Done FY 06-07 and ongoing. City staff available to train as needed.	ESD
CB-1.B	Support Program in hosting mobile cleaners certification seminar.	FY 06-07	Done FY 06-07. Companies desiring training are directed to the BASMAA online training program, and offered a live training if they desire one. The City hosted a training on April 6, 2007 for City staff and contractors who do surface cleaning work. See 10.B: *CNAP Program Evaluation* and 13.D: *Municipal Employee Training Summary*.	ESD
CB-1.B.1	Promote list of certified mobile cleaning service providers.	Ongoing	Done FY 06-07 and ongoing. A link to the database of BASMAA-trained Recognized Mobile Surface Cleaners is posted on the City's website.	ESD
CB-1.C	Distribute coupons in support of Program partnership with Western Car Wash Association.	As needed, dependant on Program activities	Done FY 06-07. The Watershed Watch campaign partnered with Classic Car Wash to offer discounted car wash services thru the end of December 2007 to customers using their Watershed Watch card, which is available for free download on www.MyWatershedWatch.org.	Program, ESD
CB-3	**Industrial Discharges**			
CB-3.A	Continue Distribution of information regarding copper from roof vents.	Ongoing	Done FY 06-07 and ongoing. Information is available on ESD website, and for Watershed Inspectors to distribute. The Roof Vent BMP was also distributed to 101 pertinent Industrial Users in San José, along with a cover letter informing businesses of the potential for roof runoff at their facilities. See 14.D: *PIP Activities Tables* for details	ESD
CB-3.A.1	Continue rooftop inspections. Evaluate efforts and need for any additional effort.	12/31/2005	Done FY 05-06.	ESD
CB-3.B	Mail NOI Package: information on the GIASP and how to comply, to targeted industrial facilities.	6/30/2006	Done FY 06-07. See CB-3.A.	ESD
CB-8	**Watershed Assessments and New Development**			
CB-8.A	See NRD section for details on San José implementation of C.3 permit provisions.		See NRD section for details on San José implementation of C.3 permit provisions.	
CB-11	**Street Sweeping and Storm System O&M**			
CB-11.A	Track quantitative data on the tons of material removed and disposed and other relevant street sweeping program data.	Annually	Done FY 06-07. Residential street sweeping frequency is once per month. In FY 06-07, the area in which parking restrictions are enforced was again broadened to 239 curb	ESD-IWM, DOT

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
			miles, up from 196 curb miles in FY 05-06. In FY 06-07, approximately 35,694 cubic yards of debris were collected during all street-sweeping operations. See 5.B: *PSR Program Evaluation* for more information on street sweeping activities. The City also has a comprehensive storm sewer inlet cleaning program, where a Vactor removes debris from all of the City's inlets. In FY 06-07, approximately 442 cubic yards of debris were removed, down from 1,355 cubic yards in FY 05-06. See 6.A*: SDO Work Plan Self Evaluation Matrix* for details.	
CB-12	**Pools and Spas**			
CB-12.A	Distribute outreach materials at events, public counters, and post on City website.	Ongoing	Done FY 06-07. See 14.D: *PIP Activities Tables* for details	ESD
CB-12.B	Provide guidance to residents on disposal alternatives for pool and spa water.	Ongoing	Done FY 06-07. Residents who call for guidance are told to dispose of their pool and spa water in their sanitary sewer clean-out.	ESD
CB-21	**Architectural use of copper**			
CB-21.A	Continue to discourage architectural use of copper during Planning application review.	Ongoing	Done FY 06-07 and ongoing. As projects undergo review, comments discouraging architectural use of copper in development projects are given. Projects have been revised to reduce the use of copper and direct runoff to landscaped areas. See NRD 9.	PBCE-Planning
CB-21.B	Continue to monitor progress of San José Green Building program to identify opportunities for discouraging architectural use of copper.	Ongoing	Done FY 06-07 and ongoing. ESD has a dedicated LEED-accredited staff person who reviews public projects and advises City staff on Green Building materials and techniques, including discouraging architectural use of copper.	PBCE-Planning ESD-UR
NB-1	**Discharges from Construction Sites**			
NB-1.A	See NRD and CON program elements for activities that address erosion control.	Ongoing	Ongoing. See NRD and CON program elements for activities that address erosion control.	

10.B CNAP Program Evaluation

Measures to control copper discharges that require implementation at the municipal level have been integrated into ongoing City activities identified in the IND and NRD sections of the URMP. Copper and Nickel also remain among the list of pollutants addressed by general and targeted outreach regarding stormwater pollution prevention. Additionally, the City provides the monitoring and data analysis used to evaluate water quality trigger levels associated with the Copper and Nickel Action Plans for the South Bay. The City's South Bay Monitoring Program collects samples from 12 stations monthly in the Lower South San Francisco Bay, and compares dry season indicator station means to trigger levels originally set out in the Copper/Nickel action plan. To date, the project has collected over 1500 samples for analysis of dissolved copper and nickel.

The City continued its NOI Filers Project in FY 06-07. Select facilities were contacted and encouraged to comply with the State's General Industrial Activities Stormwater Permit (GIASP). The contact letter included a checklist to help determine if the facility needed to be covered by the GIASP, a flow chart detailing the development and implementation of a SWPPP, and a reprint of a previously published Tributary Tribune article with information about the GIASP and the Stormwater Enforcement Act of 1998 (AB 2019). The City sent the contact package to 101 facilities in San José. These facilities were selected based on the following criteria:

- Facilities listed in Watershed Enforcement's Industrial and Commercial database (EEDMS).
- Facilities with a GIASP Category of 8 or 10 (Based on SIC Code)
- Facilities documented by Watershed Enforcement Inspectors as either needing to file NOI or no determination made. (Facilities identified as not needing to file or found to have already filed were not contacted.)

The contact package was sent out to all facilities with the above criteria AND with the SIC code identified in the 1998 *Industrial Stormwater Quality Monitoring Pilot Project*.

Watershed Enforcement Inspectors are trained in GIASP requirements. They evaluate each facility for applicability of the GIASP, and make recommendations to the facility owners/operators based upon their findings. These activities are fully integrated into the standard operating procedures for Watershed Enforcement inspections. Facilities found to need to file are reported to the Water Board annually in the City's URMP Annual Report. See 2.D: *Companies Requiring NOI Based on SIC But Have Not Filed* and 2.D: *Companies Requiring NOI Based on Exposure But Have Not Filed* for this information.

On April 6, 2007 the City hosted a Mobile Surface Cleaner Training for City employees and contractors who perform surface cleaning services for the City. Thirty-six City employees and contractors attended the training, took the quiz, and received their two-year recognition. See 13.D: *Municipal Employee Training Summary*.

10.C CNAP Response to Water Board Comments

No comments received from the Water Board on this Program Element.

10.D CNAP Summary Tables / Additional Information

11. TRA: Trash

11.A TRA Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
TRA 1	**Inventory, Document and Evaluate Trash Management Practices**			
TRA 1.A	Complete Program survey of existing trash management practices.	Done FY 02-03	Done FY 02-03.	ESD
TRA 2	**Document and Map Known Trash Problem Areas**			
TRA.2.A	Identify data sources and information showing the location of known trash problem areas (e.g., trash complaints/incidents and eradication efforts.)	Done FY 03-04	Done FY 03-04.	ESD
TRA 2.B	Compile trash problem location data/information and submit to Program for conversion to coordinates for GIS mapping.	Done FY 03-04	Done FY 03-04.	ESD
TRA 2.C	Revise and update documentation (list of locations, maps, etc.) of known trash problem areas.	As Needed	No updates were required in FY 06-07.	ESD
TRA 3	**Conduct Trash Evaluations**			
TRA 3.A	Work with Program to select trash evaluation methodology.	Done FY 03-04	Done FY 03-04.	ESD
TRA 3.B	Assist Program with planning and organizing of training workshop for municipal staff.	Done FY 03-04	Done FY 03-04.	ESD
TRA 3.C	Participate in the trash evaluation methodology training workshop.	Done FY 04-05	Done FY 04-05.	ESD
TRA 3.D	Conduct trash evaluations and submit to Program staff:	--	--	ESD
TRA 3.D.1	Coyote Watershed	Done FY 04-05	Done FY 04-05.	ESD
TRA 3.D.2	Remaining San José locations	Done FY 05-06	Done FY 05-06.	ESD
TRA 3.E	Continue trash evaluations in high-priority areas to track changes over time.	Ongoing	Done FY 06-07 and ongoing. Trash evaluations were performed at 9 of the 10 high-priority locations in San José identified in FY 05-06's Annual Report. One hotspot, Coyote Creek at Watson Park, was not re-assessed this year because the site is still closed for remediation. Trash evaluations at high-priority sites will continue in FY 07-08. See 11.D: *Trash Problem Area Activity Report.*	ESD
TRA 4	**Develop Standardized Documentation and Reporting Format**			
TRA 4.A	Work with Program to develop a reporting format to document trash management activities in Annual Reports.	Done FY 03-04	Done FY 03-04.	ESD
TRA 5	**Document and Analyze Evaluation Results; Identify and Prioritize Trash Problem Areas**			

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
TRA 5.A	Assist Program staff with the documentation and analysis of trash evaluation results.	Ongoing	Done FY 06-07 and ongoing. The City submitted trash assessment data to Program.	ESD
TRA 5.B	Identify high-priority trash areas using trash evaluation results:	--	--	ESD
TRA 5.B.1	Coyote Watershed	Done FY 04-05	Done FY 04-05.	ESD
TRA 5.B.2	Remaining San José locations	Done FY 05-06	Done FY 05-06.	ESD
TRA 6	**Identify and Implement Trash Management Practices**			
TRA 6.A	Identify reasonable trash management practices to address high=-priority areas (in TRA 5B).	Ongoing	Done FY 06-07 and ongoing. See 11.D: *Trash Problem Area Activity Report.*	ESD, PRNS, GS, DOT
TRA 6.B	Implement or refine trash management practices at high-priority areas to the maximum extent practicable.	Ongoing	Done FY 06-07 and ongoing. The City continued support of Friends of Coyote Creek and their annual clean-up that takes place at a high priority areas on the Coyote Creek. The City partnered with the Water District to clean up three locations with significant trash accumulations on Coyote Creek and one on Los Gatos Creek this fiscal year as part of a memorandum of agreement. The City continues to support the Anti-Litter Program, which has more than 3,100 volunteers participating in litter removal throughout the City. See 14.D.: *PIP Activities* for more information on litter-related Citizen Involvement activities.	ESD, PRNS, GS, DOT
TRA 6.C	Document and report implementation of trash management actions.	Ongoing	Done FY 06-07 and ongoing. See 11.D: *Trash Problem Area Activity Report*.	ESD
TRA 6.D	Provide Program with information on trash management practices implemented on standardized reporting format.	Annually	Done FY 06-07. Reviewed and provided comments on the Trash Problem Area Activity Report Form developed by the Program.	ESD
TRA 6.E	Provide Program with trash assessment data forms.	Annually	Done FY 06-07 and ongoing. The City submitted trash assessment data to Program.	ESD
TRA 7	**Review and Update Performance Standards and Develop Long-Term Strategy for Trash Management**			
TRA 7.A	Assist with the review and update of existing standards that address BMPs or control measures relevant to trash management.	TBD by Program	See Program Annual Report for details.	ESD
TRA 7.B	Assist Program staff in developing a long-term strategy for trash conditions in urban streams and waterways.	Ongoing	Done FY 06-07 and ongoing. Staff participated in Trash AHTG meetings in which discussions began regarding a long-term strategy.	ESD
TRA 8	**Implement a Pilot Demonstration Project**			
TRA 8.A	Assist Program in implementing a pilot project to address trash conveyed through the storm drain system.	FY 06-07	Done FY 06-07 and ongoing. The City has worked closely with the Program and other co-permitteest to coordinate two structural trash pilot projects in the Santa Clara Basin. These pilots are scheduled to begin in FY 07-08.	ESD, DOT, PW
TRA 8.B	Begin piloting the use of structural controls to prevent trash from entering the storm sewer system.	FY 06-07	Done FY 06-07 and ongoing. The City hired a contractor to manufacture and install 50 inlet trash screens in select	ESD, DOT, PW

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
			pilot locations in the City. Installation will occur in fall of 2007.	
TRA 8.C	Pursue grant funding to support installation of structural controls for trash management.	Ongoing	Done FY 06-07. No grants for this type of work were found.	ESD, DOT, PW

11.B TRA Program Evaluation

In FY 06-07 the City continued to perform trash problem area assessments, supported City and community trash clean-up efforts, and evaluated the need and effectiveness of additional trash management activities for future implementation.

Initial trash assessments were performed at the nine assessment sites identified in last year's Annual Report as needing additional assessment. Seven of these assessments were completed using the Keep America Beautiful (KAB) Litter Index, since the Urban Rapid Trash Assessment (URTA) was infeasible due to access limitations and safety concerns. In general, trash assessments revealed that existing trash management activities are sufficient. Scores for some locations, however, indicated that some additional efforts are needed to control trash. Only two of the seven sites assessed using the KAB methodology earned an average score of 3 (littered) or 4 (extremely littered), indicating a modest need for improvement. In FY 07-08, the City will work with Program staff to refine Trash Assessment activities and identify new assessment sites based on potential to generate litter, hotspot data, and anecdotal knowledge of problem areas. See 11.D: *Trash Problem Area Activity Report* for assessment data.

Enhanced Trash Management Practices

The City continues to maximize existing resources to address trash problem areas throughout the City. This year the City of San José and the Santa Clara Valley Water District (District) continued efforts associated with the Memorandum of Agreement for Trash Prevention and Removal (Trash MOA) executed in FY 04-05. Partnered clean-up projects on Coyote Creek and Los Gatos Creek were the highlight of FY 06-07 activities. The Trash MOA calls for three partnered clean-up projects each calendar year that are intended to take place at locations that fall outside the normal scope of operations of the City and District. During this reporting period, three partnered clean-up projects occurred on Coyote Creek and one on Los Gatos Creek. An estimated total of 16.03 tons of debris was removed, a four-fold increase from the last year's partnered clean-ups. Over half of the debris was pulled from one of the sites, demonstrating why it was a priority for the City and District's efforts.

The City's Anti-litter Program has over 3,100 Pick Up San José volunteers, a 10% increase in the number of volunteers cleaning litter from City streets, parks, and waterways. Pick Up San José volunteers and one-day clean-up event volunteers collected 2,118 bags of litter in FY 06-07. The Anti-litter program also has 136 of its 150 Litter Hot Spots 'adopted' and volunteers have collected 2,016 bags of litter from these sites. In total, 4,134 bags of litter were collected and disposed of, which is estimated to be over 60 tons of litter removed from San José's watersheds. In addition, the Anti-litter Program eliminated eight illegal dumpsites, using clean-up and enforcement to discourage additional dumping at these sites.

ESD met with Redevelopment Agency staff to look into the feasibility of piloting dual-purpose storm drain inlet hoods in the downtown core. These inlet hoods would have both trash exclusion capabilities and a pre-cast 'No Dumping' message. Unfortunately, these devices are cost-prohibitive and would require lengthy technical evaluation to determine their impact on flood control before they could be installed. The City has tabled this idea and is focusing on different structural trash control methodologies.

In FY 05-06 DOT piloted new catch basin grates as part of an Americans with Disabilities Act street retrofit in downtown San José neighborhoods. In addition to providing a firm surface for wheelchairs, walkers, crutches and the like, the catch basins prevent large pieces of trash from entering the storm drain. DOT monitored the catch basins to evaluate increased maintenance and whether the grates aggravate flooding. Unfortunately, these grates collect so much litter and debris on their surfaces as to cause localized flooding after even minor rain events. Many of these grates will be removed and replaced with a more efficient flood control option.

In FY 07-08, the City will continue to identify ways to enhance existing trash management practices, including the piloting of structural trash controls like catch basin inserts. In addition, the City intends to complete production on public education materials designed to educate the public on the impact of litter on the condition of urban creeks.

11.C TRA Response to Water Board Comments

No comments were received from the Water Board on this Program Element.

11.D TRA Summary Tables / Additional Information

Trash Problem Area Activity Report

#	Date	Site ID	Watershed	Location	Assessment Method	Score	Existing Trash Management Action	Recommended Management Actions and/or Future Evaluations
1	6/15/07	SJ02	Guadalupe	Blackford High School (Boynton Ave between Blackford & Underwood)	KAB[2]	1.5	Monthly street sweeping, as well as being on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	Site was mostly clean, except for a sudden increase in trash in front of apartment complex on corner of Underwood. Contact Code Enforcement to get that part of the site cleaned. One additional assessment is recommended to ensure that the site's litter levels do no increase.
2	6/13/07	SJ07	Coyote	Penitencia Creek at Creekland Cir	RTA[3]	104	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	Creek and banks were clean. Existing trash management practices appear to be sufficient. Future assessment not recommended.
3	6/13/07	SJ14	Guadalupe	Old Almaden Rd from Capitol Expwy to Foxworthy	KAB	3	Monthly street sweeping, as well as being on the Anti-Litter Program list. Part of the site is part of the District's Adopt-a-Creek program	Trash appears to be vehicle-generated. Recommend site for semi-annual creek clean-ups. Future assessment recommended.
4	6/15/07	SJ15	Guadalupe	E side of Camden Av between Guadalupe Mines Rd and Vista Loop	KAB	1	Monthly street sweeping, as well as being on the Anti-Litter Program list. Part of the site is part of the District's Adopt-a-Creek program	Trash appears to be vehicle-generated, and minimal. Future assessment not recommended.
5	6/15/07	SJ19	Guadalupe	Camden Av between Coleman and Camden Village Cir	KAB	2	Monthly street sweeping, as well as being on the Anti-Litter Program list. Part of the site is part of the District's Adopt-a-Creek program	Trash appears to be vehicle-generated and wind-borne. Recommend site for semi-annual creek clean-ups. Future assessment is not recommended.
6	6/15/07	SJ23	Coyote	Yerba Buena Creek at Evergreen Park	RTA	80	Park Maintenance staff maintains the park on a regular basis.	Trash appears to have blown in from adjacent park, and littered by park users in the dry creek bed and on pedestrian bridge. Future assessment is recommended.
7	6/13/06	SJ27	Coyote	Coyote Creek between Berryessa Rd and Mabury Road	KAB	2.5	Creek access was too limited, so assessment done on street. No trash management actions apparent.	The fence on the vacant lot on the corner of Mabury and Commercial acts as a wind dam which collects litter. Contact property owner to remove litter. Future assessment is recommended.

[2] Keep America Beautiful (KAB) Litter Index ratings are: 1-No litter, 2- slightly littered, 3- Littered, 4- extremely littered
[3] Rapid Trash Assessment (RTA) scores range from 0 (worst) to 120 (best). Scores are expressed above as overall numeric score/quantity of trash counted

#	DATE	SITE ID	WATERSHED	LOCATION	ASSESSMENT METHOD	SCORE	EXISTING TRASH MANAGEMENT ACTION	RECOMMENDED MANAGEMENT ACTIONS AND/OR FUTURE EVALUATIONS
8	6/13/06	SJ28	Coyote	Coyote Creek at Julian Street Bridge	KAB	3	San Jose High Academy cleans adjacent banks on National River Clean-up Day and Coastal Clean-up Day. Friends of Coyote Creek clean watercourse and banks once a year.	Natural vegetation frequently creates a dam at this site. No additional management actions recommended. Future assessment is recommended.
9	6/13/06	SJ30	Coyote	Coyote Creek at Upper Penitencia (confluence adjacent to Flea Market), on Berryessa Rd.	KAB	1	Flea Market staff cleans the parking lot and creek banks regularly. Area appeared cleaner than in previous assessments.	No additional management actions recommended. A periodic communication with the Flea Market Management may help. One additional assessment is recommended, to see if litter levels remain constant.

MON 3.A	Identify sampling sites based on land use, and suitability of the site for data collection.	Done 6/97	Done, prior to FY 01-02.	ESD
MON 3.B	Train staff on sampling procedures, protocols and safety measures.	Done 9/97	Done, prior to FY 01-02.	ESD
MON 3.C	Collect representative samples from first effective rainfall and every opportune rainfall event of the season.	Done 4/98 through 4/00	Done, prior to FY 01-02.	ESD
MON 3.D	Analyze each season's data to characterize runoff constituents.	Done 6/98 through 6/00	Done, prior to FY 01-02.	ESD
MON 3.E	Provide screen of analysis to further identify location and extent of pollutants for source control and outreach efforts.	Done 7/98 through 6/00	Done, prior to FY 01-02.	ESD
MON 3.F	Based on analysis, provide information for targeting sampling.	Done 12/02	Done FY 02-03.	Program
MON 3.G	Compare results with other sites, regional monitoring efforts, trends and other data to provide indication of relative magnitude of pollutant problem.	Done 9/02	Done FY 02-03.	Program

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
MON 3.H	Explore modeling approaches to characterize water quality in the watershed and target additional monitoring efforts.	Done 9/02	Done FY 02-03.	Program
MON 3.I	Provide data to SCVURPPP Program as part of 5-Year Monitoring Program.	Report 6/02	Done FY 02-03.	ESD

12.B MON Program Evaluation

Monitoring activities are conducted effectively at the Program level with participation from City staff to support collaboration with the Water Board (through the CEP) and to provide technical review of Program products. The City participated in a Program-wide survey of relevant municipal policies and practices that might serve to reduce dioxin emissions. These included activities relating to multiple potential source types such as fireplace and wood-burning appliances, diesel use, pesticide use, and paper use. The City supplied information to the Program in support of this effort. The City has existing wood burning and wood burning appliance ordinances in place that effectively reduce the potential for atmospheric dioxin release. In addition, the City has begun use of biofuel blends for diesel vehicles that also serve to reduce the potential for dioxin emissions.

The City continues to participate actively in SCVURPPP monitoring program field activities whenever they are conducted within the City's jurisdiction. Moreover, City staff assist in regional monitoring studies within its jurisdiction such as the Guadalupe loads study and the Prop. 319-funded stormwater sediment characterization study currently being done by SFEI.

12.C MON Response to Water Board Comments

No comments received from Water Board on this Program Element.

12.D MON Summary Tables / Additional Information

No tables or additional information.

13. MC: Municipal Compliance

13.A MC Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
MC 1	**Municipal Training** Municipal Training is a critical function of the City's NPDES Permit. Municipal compliance is dependent on the level and quality of the training provided.			
MC 1.A	Identify training needs.	Annually	Done FY 06-07. Short focused BMP trainings on erosion and sediment control activities at construction sites for Public Works and Building inspectors were identified as training needs.	ESD-UR
MC 1.A.1	Conduct training for City staff and City contractors that perform surface cleaning at City facilities.	FY 06-07 As Needed	Done FY 06-07. Training was conducted on April 6, 2007. Prior to the training, the City received a stormwater complaint involving a City contractor conducting surface cleaning at a City facility; the contract manager was notified and the job was shut down until appropriate BMPs were in place.	DOT, GS, ESD
MC 1.B	Develop curricula.	As Needed	Done FY 06-07 for training noted in MC 1.A.	ESD-UR
MC 1.C	Conduct training.	Ongoing	Done FY 06-07. See 13.D: *Municipal Employee Training Summary*.	ESD-UR
MC 1.D	Evaluate municipal training program and make improvements as needed.	Annually	Done FY 06-07. The City conducted municipal training for all required Program Elements. Evaluation forms were handed out, collected and reviewed by instructors. This information will be used to make improvements as needed.	ESD-UR
MC 2	**Municipal Facilities Assessment and Compliance** Municipal facilities are required to comply with stormwater regulations. Efforts to reduce contaminated discharges from City facilities must be similar to those required of private businesses. While many elements for permit compliance are in place, the City requires a systematic approach to City facilities compliance at the level of effort required in the URMP.			
MC 2.A	Conduct Corp Yard assessments and inspections.	Annually	Done FY 06-07. Annual Corporation Yard inspections were conducted in the first quarter of 2007. Three Hazardous Material inspections at each of the Corp Yards and Municipal Garage, which include stormwater issues, were conducted over the course of FY 06-07.	ESD-UR, GS, DOT
MC 2.A.1	Conduct Citywide meeting to discuss Hazardous Material, Safety, and Stormwater issues for City corporation yards (up to two times per year).	Annually	Done FY 06-07. A Citywide Hazardous Materials Management meeting was conducted on June 26, 2007. The meeting was conducted in order to prioritize the hazardous material, safety, and stormwater issues staff will focus on for the Corp Yards in FY 07-08.	GS, ESD, DOT, Fire, Police
MC 2.A.2	Revise Corporation Yard inspection form.	Done FY 05-06 As Needed	Done FY 05-06. No revision to the form was necessary in FY 06-07.	ESD-UR

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
MC 2.B	Review Municipal Facilities SWPPPs.	Annually	Done FY 06-07. See MC 2.B.1.	ESD-UR, GS, DOT
MC 2.B.1	Fully revise the five (5) remaining Corporation Yard SWPPPs (using the Main Yard revised SWPPP pilot process as a template).	6/30/07	Done FY 06-07. SWPPP revisions for last two of the Corp Yards (Central and Municipal Garage) were drafted in FY 06-07 and are currently out for review and comment. The City anticipates completion of full revisions for these two Corp Yard SWPPPs within the next month.	ESD-UR, GS, DOT
MC 2.C	Conduct SWPPP training at City corporation yards.	Annually	Done FY 06-07. SWPPP training sessions were conducted at the Corp Yards in June 2007.	ESD-UR, GS, DOT

13.B MC Program Evaluation

Training

During FY 06-07, the City conducted municipal training for all required Program Elements. See 13.D: Municipal Employee Training Summary. Attendees for these trainings complete evaluation forms and turn them into the instructors (These forms are later entered in to a tracking database.) Instructors review this information to see where they can improve the training.

Highlights of FY 06-07 trainings included:

a) Fats, Oil, and Grease Training, held for new ESD inspectors 10/06;

b) Inspection Techniques, held for new ESD Inspectors1/07-6/07;

c) Fats, Oil, Grease, and Industrial Discharge Training, held for new ESD Inspectors 4/07-6/07;

d) Administrative Citations & ICID Training, held for ESD Inspectors 6/07;

e) Post Construction BMPs: Basis, Swales, and Bioretention Units, held for Building and Plumbing Inspectors 1/07;

f) New and Redevelopment Provisions of the Storm Water Permit, held for San Jose State University students 2/07;

g) During Construction of Permanent BMPs: Basins, Swales, Bioretention, and Mechanical Units, held for Engineering and Construction Services 4/07;

h) During Construction of Permanent BMPs: Basins, Swales, Bioretention, and Mechanical Units, held for the Airport 4/07;

i) Implementing Storm Water Requirements in New Development and Redevelopment Projects, held 6/07; and

j) Erosion and Sediment Control BMP focused trainings (20 sessions) held for Public Works and Building inspectors 11/06-4/07.

Municipal Facilities

Annual Corporation Yard stormwater inspections were completed in the first quarter of 2007.

In FY 06-07 City staff conducted three Hazardous Material inspections at each of the Corp Yards and Municipal Garage, which also include stormwater issues, over the course of the year. A City-wide meeting to discuss hazardous materials, safety, and stormwater issues was held on June 26, 2007. These regular meetings have proven to be effective in improving the coordination between GS staff, ESD staff, and Corp Yard representatives. The combination of an annual stormwater assessment inspection, including stormwater concerns in the hazardous material inspections, and the Citywide Hazardous Material Management meetings, which include stormwater issues,

continues to be working well. The concerns in the Corp Yard inspection reports are usually minor and resolved swiftly; concerns that are more significant are less frequently noted as the program is becoming part of the institution of the Corp Yards.

Corp Yard SWPPP training was held in June 2007 for the GS and PRNS Corp Yard staff. Participants were given an evaluation form to fill out. Of the 92 staff that participated in the training, 71 evaluations were completed and returned. Results of the completed evaluations are summarized below:

- 90% responded that the training subjects taught are appropriate to their work;
- 91% responded that the BMPs/SOPs described match their work practices;
- 94% responded that the training adequately described the relationship of BMPs/SOPs to compliance with the City's Stormwater NPDES permit;
- 92% responded that the training adequately explained how they, City staff, can help the City maintain compliance with the Stormwater NPDES permit; and
- 96% responded that the training adequately explained a SWPPP.

SWPPP revisions for two of the Corp Yards (Central and Municipal Garage) were drafted in FY 06-07 and are currently out for review and comment. The City anticipates completion of full revisions for these two Corp Yard SWPPPs within the next month.

13.C MC Response to Water Board Comments

14. PIP: Public Information / Public Participation

14.A PIP Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
PIP 1	**General Outreach** The City of San José will promote general citizen awareness of what a watershed is, the functions of the storm drain system, pathways and sources of urban runoff pollution to the South Bay watershed, and behaviors that adversely affect water quality.			
PIP 1.A	Participate in WMI Outreach, and coordinate WMI outreach with Watershed Watch and Program efforts.	Ongoing	Done FY 06-07 and ongoing. City staff supported the coordination of WMI and Program messages in the Watershed Watch campaign through the WEO AHTG. See 14.D: *PIP Activities.*	ESD, WMI, Program
PIP 1.A .1	Participate in Watershed Watch campaign.	Ongoing	Done FY 06-07 and ongoing. City staff assists with planning and implementation through WEO AHTG and serves as the AHTG's chair. See the Program Annual Report for a complete campaign annual report.	ESD, Program
PIP 1.B	Identify, support, and participate in appropriate community events to increase general public awareness.	Ongoing	Done FY 06-07 and ongoing. See 14.D: *PIP Activities.*	ESD
PIP 1.B.1	Work with the Watershed Watch Events work group.	Ongoing	Done FY 06-07 and ongoing. Watershed Watch events are discussed and coordinated through the WEO AHTG. City staff assists with staffing tables at events. See the Program Annual Report for details concerning Watershed Watch events.	ESD, Program
PIP 1.C	Give presentations upon request that focus on stormwater messages to elementary through college grade levels, neighborhood groups, etc.	As Needed	Done FY 06-07 and ongoing. See 14.D: *PIP Activities.*	ESD
PIP 2	**Targeted Outreach** The City of San José will develop and implement targeted residential outreach and education campaigns based on high priority pollutants to effectively reduce pollutant-causing behaviors and promote Best Management Practices.			
PIP 2.A	Identify general residential practices that contribute to stormwater pollution. Identify reasonable alternatives to pollutant causing behavior.	N/A	Done FY 06-07. Messages are addressed through the Watershed Watch Campaign.	ESD, Program
PIP 2.A.1	Review surveys and applicable reports.	Ongoing	Done FY 06-07 and ongoing. Target audiences have been based on the Program survey and are documented in the Watershed Watch strategy. San José tailors its outreach to compliment Program and regional outreach efforts, which include periodic surveys to evaluate products and outcomes. See the Program Annual Report for details.	ESD
PIP 2.A.2	Meet with inspectors to discuss and document	Ongoing	Done FY 06-07 and ongoing. Staff involved in outreach	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
	residential outreach needs.		attend Inspectors' meetings and trainings and keep in contact with Inspectors on a regular basis. Outreach needs are identified and incorporated into work plans accordingly.	
PIP 2.A.3	Prepare reports identifying residential outreach needs and tasks.	Annually	Done FY 06-07. Outreach staff submits a report to Watershed Protection Management on projected outreach needs and recommendations.	ESD
PIP 2.B	Identify ICID practices and target audience(s) contributing to pollution.	N/A	Done FY 06-07. ICID Feedback cards are regularly distributed to complainants who provide contact information. How complainants hear about ICID services is also tracked.	ESD
PIP 2.B.1	Review ICID reports.	Ongoing	Done FY 06-07 and ongoing. 56 ICID Complaint feedback cards were distributed to complainants, and 15 were returned. 15 Responses do not make up a sufficient amount to perform a meaningful analysis of service, so the City will evaluate this program as well as how complainants are classified and make changes in FY 07-08. How complainants heard about ICID services is tracked. See 1.D: *Complainant Source Summary* for details.	ESD
PIP 2.B 2	Meet with ICID inspectors to discuss and document outreach needs.	Ongoing	Done FY 06-07 and ongoing. Staff involved in outreach attend Inspectors' meetings and trainings and keep in contact with Inspectors on a regular basis. Outreach needs are identified and incorporated into work plans accordingly.	ESD
PIP 2.B.3	Prepare reports identifying ICID outreach needs and tasks.	Annually	Done FY 06-07. Outreach staff submits a report on projected outreach needs and recommendations and incorporate report findings into work plans accordingly.	ESD
PIP 2.C	Promote selected residential and ICID messages through local and regional activity (e.g. Program PIP, BASMAA PIP, BAPPG, Media Relations, etc).			
PIP 2.C.1	Report targeted residential and ICID outreach activity.	Annually	Done FY 06-07. See 14.D: *PIP Activities.*	ESD
PIP 2.C.2	Participate in the Program's Pesticide and Mercury ad hoc task groups.	Ongoing	Done FY 06-07 and ongoing. City staff participated in AHTG and collaborated with regional Household Hazardous Waste efforts that focused on reducing pesticide use and the proper disposal of spent fluorescent lamps. See the Program Annual Report for details.	ESD, Program
PIP 3	**Educational Programs** The City of San José will support and/or develop and implement educational programs designed to increase youth understanding and appreciation of the South Bay watershed.			
PIP 3.A.	Support, develop and implement school and youth education programs.	N/A	Done FY 06-07 and ongoing. See 14.D: *FY 06-07 San José School Outreach* for details.	
PIP 3.A.1	Participate in the WEO programs and Schools and Youth Work groups.	Ongoing	Done FY 06-07 and ongoing. City staff participated in developing schoolwork plans and activities for the Urban	ESD, Program

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 06-07 STATUS	RESPONSIBLE PARTY
			Runoff Program and Watershed Watch campaign. City Staff participated in both the WEO Ad Hoc Task Group and Schools and Youth Work group meetings, and served as Chair of both groups. Direct implementation takes place through the Urban Runoff Program staff and the Watershed Watch contractor. Through the City's Youth Watershed Education Team (YWET), staff collaborated to update and promote the City's middle school curriculum.	
PIP 3.A.2	Participate in the Alviso Education Center work group.	Ongoing	Done FY 06-07 and ongoing. City staff participated in work group meetings. Program Staff administered the SCVURPPP Ed Center Grant. See the Program Annual Report for details.	ESD, Program
PIP 3.A.3	Participate in City Education programs such as the Youth Watershed Education Team, Rangers in Schools, etc.	Ongoing	Done FY 06-07 and ongoing. See 14.D: *FY 06-07 San José School Outreach* for details.	ESD
PIP 4	**Citizen Participation** The City of San José will support and/or develop and implement citizen involvement programs designed to increase citizen understanding and appreciation of the South Bay watershed.			
PIP 4.A	Support and/or develop involvement opportunities for San José residents			
PIP 4.A.1	Participate in creek Clean-ups on a bi-annual basis through in-kind staff support for the Creek Connections Action Group.	N/A	Done FY 06-07. Coordinated internally with PRNS and Friends of Coyote Creek; and externally with the Creek Connections Action Group.	ESD, PRNS
PIP 4.A.1.a	Fall creek Clean-up.	Annually, Q1	Done FY 06-07. See 14.D: *PIP Activities.*	ESD, PRNS
PIP 4.A.1.b	Spring creek Clean-up.	Annually, Q4	Done FY 06-07. See 14.D: *PIP Activities.*	ESD, PRNS
PIP 5	**Outreach Evaluation** The City of San José will evaluate its Outreach efforts for effectiveness.			
PIP 5.A	Implement selected evaluation tools.	N/A	See 14.B: *PIP Program Evaluation*.	ESD
PIP 5.A.1	Work with Program, WMI, and Watershed Watch AHTG to Plan for the Program's Watershed watch campaign follow–up survey.	Triennially FY 06/07	Done 06-07 and continued into FY 07-08. The Watershed Watch campaign launched an online survey asking residents to evaluate the effectiveness of the FY 06-07 media campaign and display their knowledge of stormwater and watershed issues. Results of this survey will be reported in the Program Annual Report.	ESD, Program
PIP 5.A.2	Report on survey and evaluation activity during the report period	Annually	See PIP 5.A.1	ESD
PIP 5.B	Annually review, modify and report on outreach plans based on effectiveness results.	n/a	Done FY 06-07. Work plans are evaluated and modified as needed based on evaluation results.	ESD
PIP 5.B 1	Produce a written report on the effectiveness of outreach activities conducted in the prior fiscal year.	Annually	Done FY 06-07. See 14.D: *PIP Activities.*	ESD

14.B PIP Program Evaluation

San Jose's outreach strategy is implemented on three levels: Local (City-wide), Program (County-wide), and Regional (Bay Area-wide).

Local target audiences are based on program, survey and focus group work conducted by the City and the Program. Local outreach is conducted to address time-constrained and/or local (San José only) issues. Local strategies and tactics are documented in the Outreach Strategies submitted annually to the City's budget office. When possible, San José tailors its local outreach to compliment/coordinate with Program (countywide) and regional outreach efforts. Short-term tactic and strategy success is evaluated case-by-case using a variety of mechanisms. Public opinion surveys evaluate long-term outcomes in attitudes and behavior.

County-wide target audiences are based on survey and focus group work conducted through the Program and, when appropriate, the City. The City's County-wide outreach delivers stormwater and watershed messages to residential and business audiences in the Santa Clara Basin. Strategies and tactics are documented in the Watershed Watch strategy. The City advocates for and facilitates the coordination of Countywide outreach with Regional outreach workgroups. Short-term tactic and strategy success is evaluated case-by-case using a variety of mechanisms. Public opinion surveys evaluate long-term outcomes in attitudes and behavior.

Regional target audiences, messages, and projects are identified through a variety of processes conducted by the various regional workgroups. San Jose's regional audiences are specific subsets of the general business and residential audiences that occur in San José, but may also be universal in the Bay Area. Messages focus on about specific behaviors or increasing awareness related to stormwater and watershed issues (e.g. Pest Control Operators for IPM messages; restaurants for Fats, Oils and Grease (FOG)). Strategies and tactics for these audiences are proposed and implemented through the Regional workgroups, and they are documented in the work plans of the various groups. Short–term tactic and strategy success is evaluated and reported case-by-case using a variety of mechanisms (e.g. the Regional Media Relations workgroup's measures). For some projects (e.g. OWOW, Regional Ad Campaign) public opinion surveys evaluate long-term outcomes in attitudes and behavior.

With approximately 29,000 storm drain inlets and the potential for more stringent inlet marking requirements in the MRP, the City evaluating its storm drain inlet marking activities and exploring alternatives and strategies to maintain the City's inlet markings in an efficient and cost-effective manner. In FY 07-08, the City will pilot thermoplastic inlet markings in two targeted ZIP codes based on the elevated number of ICID complaints received in these areas in FY 05-06. This pilot will be evaluated in FY 07-08 and beyond.

FY 06-07's targeted efforts focused on proper disposal of universal and hazardous wastes, IPM, construction-generated pollutants, trash, and general pollution prevention. At the local level, San José has been able to successfully direct a variety of messages to a wide array of audiences through publishing articles in newsletters, hosting trainings and workshops, attending events targeting specific audiences, direct mailing, and collaborative efforts at the Regional level. The City also focused on training employees in general pollution prevention and awareness issues, so they in turn can educate the public they interact with as well as apply the lessons to their own work tasks. Targeted outreach supplements tasks done in other elements of the URMP, such as Illicit Connection/Illegal Dumping, the Industrial/Commercial Dischargers, Construction Inspection, Pesticide Management, Mercury, and the Copper and Nickel Action Plans.

The City works though a variety of mediums to distribute BMPs to residents and business owners. The total number of BMPs distributed in FY 06-07 is 93,424, which includes BMPs disseminated by ICID, IND, and CON inspectors; City staff at outreach events; and self-serve BMPs downloaded from the City's website. The total number of FY 06-07 BMPs is nearly double the FY 05-06 total. This increase is due in part to the launching of a new City stormwater website as well as increased City participation in outreach events, but largely it can be attributed to a new tracking methodology in place that more accurately measures the distributed BMPs.

Citizen Participation activities are a potent method for getting residents out into the Watershed and engendering stewardship. The City participated in three Clean-up events, as well as a Bike to Work Day, designed to promote participation and stewardship in the citizens of San José. Tying Clean-up events to pre-existing events such as Coastal Clean-up Day and the Great American Pick-up is a good way to maximize promotion. Advertising paid for by regional entities is useful for raising awareness locally. The City also organized regular participation activities through the Adopt-A-Park, Adopt-A-Trail, Anti-litter Volunteers, and Volunteer San José programs. Through these programs, thousands of San José residents are taking an active role in watershed stewardship.

Education continues to be a vital component of San Jose's pollution prevention plan. The City actively contributes to education both as a City and through the Program. San José commits significant resources to youth education with the goal of instilling a sense of stewardship for the environment. San José employs both in-class education and train-the-trainer approaches to Outreach. In-class presentations are more expensive per student reached, but lend themselves better to evaluation. Train-the-trainer has the potential to reach many more students, but it is extremely difficult to measure the effectiveness of this potential. Youth Watershed Education Grants provide funding for groups and educators to implement their own programs that accomplish the City's education goals.

FY 06-07 saw the start of the City's Go Green Schools Program. Go Green Schools fosters recycling and environmental stewardship in a parent- and community-driven process, and supplies grants to schools to help them achieve their green goals. The City connects schools with free recycling supplies and other green resources, and encourages them to take up Go Green at the level the school chooses, whether it be recycling or environmental curriculum, green purchasing, or other green practices.

14.C PIP Response to Water Board Comments

Comments were not received from the Water Board on this Program Element.

14.D PIP Summary Tables / Additional Information

PIP Activities Table

Outreach Type:

❍ = General Outreach **◎ = Targeted Outreach** **✋ = Citizen Involvement** **✎ = Education**

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 06-07 STATUS	EVALUATION
Att. A.1	Storm Sewer Stenciling Evaluation	❍	FY 05-06 was the fourth and final year of a 4-year contract to re-stencil all the public right-of-way storm drain inlets in the City of San José. Approximately 28,440 inlets were completed during the four-year interval. In FY 06-07, future stenciling options were evaluated for cost, feasibility, durability, and ability to meet potential MRP requirements. The City is piloting Thermoplastic stencils in the 95116 and 95123 ZIP codes, and explored piloting pre-cast inlet hoods in the downtown core, but they were too cost-prohibitive.	Storm drain stencils are placed in locations that are highly visible to residents. Including the neighborhood creek name gives residents specific information about how their actions tie into the local environment. Areas in the 95116 and 95123 ZIP codes were chosen for the Thermoplastic pilot due to the higher number of ICID calls from those ZIP codes in FY 05-06. The results of this pilot will be evaluated once the stencils have been in place for a few months, and then years.
PIP 1 PIP 2.C PM 6.A M 2.B Att. A.20	Water Awareness Web Page	❍	The ESD web page highlights several water issues, including watershed stewardship, pollution prevention, storm drain vs. sanitary sewer, IPM, household hazardous waste, automotive fluids, the Anti-Litter Program, etc. Links to MyWatershedWatch.org, and the County's Household Hazardous Waste program are included.	The Water Awareness web page is updated with seasonally pertinent information about a variety of water-related issues. A total of 2,088 visits (up from 1,259 in FY 05-06 and 473 in FY 04-05) were recorded on the City's Water Awareness web page in FY 06-07.
PIP 1 Att. A.20	Website Revisions	❍	May 15, 2007. The City launched a newly revised stormwater website. The site includes information on various stormwater permit elements, resources for businesses and residents, and links to key City departments implementing stormwater requirements as well as local and regional pages of interest.	The site will be updated on a regular basis with pertinent information for both residential and commercial audiences. See 14.D.: *Outreach Materials Distributed* for website downloads and page visits.

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 06-07 STATUS	EVALUATION
PM 6.A PIP 1.A.1 PIP 2.C Program	Watershed Watch Sign at Happy Hollow Park and Zoo	❍	An Interpretive Sign, installed in FY 03-04, features a photo montage of beneficial uses of creeks and the Bay, along with four pollution-prevention messages: keep your car tuned to avoid oil leaks, avoid pesticide use (especially before rains), proper disposal of household hazardous wastes, and no dumping into storm drains.	In FY 06-07, 355,859 visitors attended Happy Hollow Park and Zoo; a 12% increase over last FY. The sign is located at the bottom of the entrance walkway into the Zoo. Every visitor to the zoo passes by the sign entering and leaving. In FY 07-08 the Park and Zoo will start a construction project to renovate and green several buildings, which may impact attendance numbers in the short-term.
PIP 1.B	San José Grand Prix	❍	July 28-30, 2006. Downtown race with televised public service announcements on litter prevention aired on 7 large screen monitors around the track, and 30 small screen monitors located in suites.	The estimated attendance figures 155,934 for the entire weekend.
PIP 1.B Att. A.3	Festival in the Park at San Tomas Park (Council District 1)	❍	September 9, 2006. Free council district event with entertainment and community resources.	Distributed pollution prevention information at community resource booth. Estimated 800 residents attended.
PIP 1.B Att. A.3	Community Festival (Council District 2)	❍	September 16, 2006. Free council district event with entertainment and community resources.	Distributed pollution prevention information at the community resource booth. Estimated 5,000 residents attended.
PIP 1.B Att. A.3	Fiesta Patrias Parade & Festival	❍	September 17, 2007. Parade and festival hosted by American G.I. Forum of San José to celebrate Mexican heritage.	Distributed Spanish and English pollution prevention information at the community resource booth. Estimated 30,000 attendees.
PIP 1.B Att. A.3	Almaden Art and Wine Festival	❍	September 17, 2006. Free council district event with entertainment and community resources.	Distributed pollution prevention information at the community resource booth. Estimated 20,000 residents attended.
PIP 1.B Att. A.3	San José Library Public Lecture Series - Topic: The Conscious Consumer: Personal Care Products - The Human Health Risks and Environmental Impacts of Personal Care Products	❍	September 30, 3006. Effects of personal care products on the aquatic environment and human health. It was stressed why understanding and addressing this issue is important. Alternative products that are available were mentioned. Finally, there was a demonstration on what to look for when choosing a product so you can reduce your risks and ecological footprint.	Distributed fact sheets and other pollution prevention information.
PIP 1.A.1 PIP 1.B. Att. A.3	Pumpkins in the Park at Discovery Meadow	❍	October 7, 2006. Watershed Watch booth with games and Pollution Prevention information. San José re-entered its Scarecrow with Anti-Litter messages.	See the Program Annual Report for details.
PIP 1.B Att. A.3	Day in the Park (Council District 8)	❍	October 7, 2006 at Lake Cunningham Park. Free council district event with entertainment and community resources.	Distributed pollution prevention information at the community resource booth. Estimated 6,000 residents attended.
PIP 1.B Att. A.3	50 Years Back and 50 Years Forward: San José/Santa Clara Water Pollution Control Plant 50th	❍	October 14, 2006 at the San José/Santa Clara Water Pollution Control Plant. Event invited the public to tour the WPCP and get information on sanitary and stormwater pollution prevention.	Had poster board displays on pollution prevention topics and distributed outreach materials to approximately 400 attendees.

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 06-07 STATUS	EVALUATION
	Anniversary			
PIP 1 Att. A.2	Our City Forest Newsletter Article	❍	November 2006. Article on back page of newsletter titled "Spare the Fish, the Bay, and your health" discussing the role of storm drains and creek/bay pollution, explains the difference between storm and sanitary sewers, directs readers not to put anything, specifically organics (grass clippings, leaves, etc) into storm drains, and includes the City's hotline for reporting dumping into the storm drain.	Our City Forest publishes its newsletter monthly, both online and in print. One version or the other (based on preference) goes out to about 10,000 subscribers.
PIP 1.B	Earth Day celebration at Children's Discovery Museum	❍	April 9-13, 2007 at the Children's Discovery Museum. Environmental resources and activities for museum patrons.	Ran an educational activity and distributed pollution prevention information at the resource booth.
PIP 1.B Att. A.3	Earth Day Celebration at SJSU Environmental Resource Center	❍	April 18, 2007 at San José State University. Earth Day resource fair for SJSU students, residents, and local businesses	Distributed pollution prevention information at the community resource booth.
PIP 1.B Att. A.3	Senior Walk at Valley Fair Mall	❍	April 27, 2007. Free event for residents, which focused on community resources. Distributed general pollution prevention materials.	30% of the estimated 100 attendees expressed interest in "Our Water Our World" fact sheets, which highlight less-toxic methods on how to grow a garden, control pests and plant diseases.
PIP 1.B Att. A.3	Spring in Guadalupe Gardens	❍	April 28, 2007. The City of San Jose had a table with information on how to "green" your home, HHW, Recycle Plus, Watershed Management, South Bay Water Recycling, energy conservation, water conservation, green construction practices, waste water treatment, green business, and home composting.	Good event to interact with residents. Information on Ants and Household Hazardous Waste were the hot topics.
PIP 1.B Att. A.3	Regional Thermometer Exchanges	❍	May 12, 16 and June 16, 2007. Collection event for residents to exchange their mercury-containing fever thermometer for a non-mercury digital thermometer free of charge. Information on safe methods for Household Hazardous Waste disposal and other related pollution prevention methods were provided.	1,116 mercury-containing thermometers were collected and disposed of appropriately. This results in 1,016 grams (2.3 pounds) of mercury removed from the environment. More thermometer exchange events will take place in the WPCP service area, including San José, in FY 07-08.
PIP 1.B Att. A.3	CommUnity Resource Fair	❍	June 3 in the Rotunda at City Hall. Free event for residents.	Distributed pollution prevention information at community resource booth. Estimated 7,000 residents attended.
PIP 1.B Att. A.3	Cleaning Products: Human Health & Environmental Impacts	❍	June 27, 2007 at the Martin Luther King Jr. Library. Information on how to reduce the risks and ecological footprint associated with household cleaning products, presented by a City Biologist.	Distributed fact sheets and other pollution prevention information, as well as had alternative products on display.

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 06-07 STATUS	EVALUATION
Overall Evaluation of General Outreach Activities		❍	San Jose's General Outreach focused on attending more community events, and revising the City's website. Both were used to disseminate information to the public. Downloads from the City's website increased substantially this fiscal year compared to last, and the City attended a wider variety of community events compared to last FY. The City continues to reach out to the general public at selected community events that the Watershed Watch Campaign does not attend. These events are good venues to reach San Jose citizens, providing more extensive outreach to residents.	
IND 6 CON 7	Storm Sewer Stenciling	◎: Commercial	The City provided approximately 34 stencils to 29 developers and 45 stencils to 16 private businesses for stenciling approximately 595 storm drain inlets in FY 06-07. In addition, 163 stencils were given to City Corporation Yards, local schools, and commercial and industrial businesses.	Storm drain stencils are placed in locations that are highly visible to residents and customers of businesses. Including the neighborhood creek name gives residents and customers specific information about how their actions tie in to the local environment. Developers are required as a condition of the permitting process to stencil all storm drain inlets on a development. ESD inspectors give out "No Dumping! Flows To Bay" stencils to commercial and industrial businesses so that they can stencil storm drain inlets on their property.
IND 6 CB-1.B.	Mobile Surface Cleaner Training Workshops	◎: Commercial	Training available upon request.	Training available upon request. Companies requesting training are first referred to BASMAA's online training, and offered live training if the online version does not meet their needs.
IND 6	Tributary Tribune	◎: Industrial	Newsletter published for permitted industrial dischargers in the Water Pollution Control Plant tributary area. The Summer 2006 Tribune contained an article on the DTSC's ban on Mercury-added switches and relays. Readers were directed to the DTSC website for more info.	The Tributary Tribune was distributed three times in FY 06-07. It goes to every permitted industrial discharger in the San Jose/Santa Clara Water Pollution Control Plant tributary area (approximately 330 businesses and 500 contacts). A 2004 survey of Industrial Users found that not all persons at these facilities were aware of receiving the newsletter and/or received the newsletter. The City modified the contact list to include all applicable persons at each facility, which increased the number of contact s on the mailing list to more than 1100. Tributary Tribune web pages generated 3,456 views, with the previous years' issues generating most of the views.
ICID 4 IND 6	Dental Office Mailing	◎: Dental Offices	Sent a direct mailing that included a cover letter, Best Management Practices for Dental Amalgam, and a survey on disposal practices.	1,285 dental offices reached.
PIP 1	Resource to International Environmental Agencies	◎	Throughout the year, hosted international guests on San Jose Environmental Programs, providing technical information and program implementation.	San Jose's Environmental Services hosts as many as six groups annually. Presentations cover Integrated Waste, Watershed Protection and Sustainability.
NRD 8 M 5 CB-1 PIP 2.C Att. A.10	*BOMA Byline* Newsletter Articles	◎: Facilities Managers	The City submitted four articles to the BOMA Byline newsletter with pollution prevention messages designed for facility managers: August '06: *Water Efficient Toilets And Outdoor Conservation Can Save You Money*	The Building Operators and Managers Association Silicon Valley chapter publishes the *BOMA Byline* monthly. The *BOMA Byline* serves the counties of Santa Clara, Santa Cruz, San Benito, Monterey and San Luis Obispo.

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 06-07 STATUS	EVALUATION
Att. A.11			November '06 *Universal Waste Update* February '07: *Cleaning Your Buildings While Ensuring Pollutants Are Kept Out of Our Creeks* June/July '07: *Stormwater Treatment BMPs: What you need to know about operation and maintenance*	
CB-1 PIP 2.C Att. A.10 Att. A.11	IFMA Newsletter Articles	◎: Facilities Managers	The City submitted one article to the IFMA quarterly newsletter with pollution prevention messages designed for facility managers: Spring '07: *Cleaning Your Buildings While Ensuring Pollutants Are Kept Out of Our Creeks*	The International Facility Managers Association's Silicon Valley Chapter publishes its newsletter quarterly. The newsletter serves the Silicon Valley chapter containing 835 members, which makes it one of the largest chapters in IFMA's worldwide network.
CON 7.B. Att. A.6	Conduct outreach sessions to development community	◎: Developers	August 23, 2006. Department of Public Works & ESD staff conducted training on erosion and sediment control for private developers of type 2 projects.	29 private developers of type 2 projects and two City staffers attended. Four topics were covered: overview of City's Stormwater NPDES Permit, overview of erosion and sediment control requirements in the City, discussion of lessons learned, and the City's Watershed Enforcement procedures.
CON 7.B. Att. A.6	Permeable Block Paving & Industrial Concrete Paving Seminar: A Focus On Concrete Paver Technology	◎: Planners, Construction Industry, Municipal Employees	September 21, 2006 at San José City Hall. Training seminar on the General, Permeable and Industrial Applications of porous concrete pavers.	See 3.B: *NRD Program Evaluation* and 13.D: *Municipal Employee Training Summary for FY 06-07* for details.
PM 6 Att. A.3 Att. A.10	Regional IPM Conference	◎: Municipal employees, School Districts	November 14, 2006 at the San José Convention Center.	Over 400 people attended from many diverse organizations - including industry, government, and local homeowners. San Jose co-hosted the conference, with City staff serving as conference chair. See 8.B: *PM Program Evaluation* for more information.
CON 7.B. Att. A.6	Conduct outreach sessions to development community	◎:, Contractors	Seven pre-construction meeting for various projects. Department of Public Works & ESD staff conducted training on erosion and sediment control for private developers	These sessions were not sufficiently documented in FY 06-07 adequately evaluate the effectiveness of these sessions. Documentation will improve in FY 07-08.
Att. A.2 Att. A.3 Att. A.11	BOMA Membership Luncheon Presented by BOMA Silicon Valley, in cooperation with the City of San José Environmental Services Department and the U.S. Green Building Council, Northern California Chapter	◎: Facilities Managers, Green Building Developers and Remodelers	February 2, 2007 at San José City Hall rotunda. Topic: Public – Private Partnerships in Developing and Managing Green Buildings. Panelists were John Stufflebean, Director City of San José Environmental Services Department, George Denise, RPA, CPM, FMA, General Manager, Cushman & Wakefield @ Adobe; and Sharon Refvem, LEED AP, Architect and Immediate Past President, U.S. Green Building Council, Northern	Approximately 100 people attended. Distributed pertinent materials at a poster table on display at the luncheon.

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 06-07 STATUS	EVALUATION
			California Chapter.	
CON 7.B. Att. A.6	Outreach to Santa Clara District of the Associated General Contractors of California	◎: Contractors Association	February 8, 2007. Urban Runoff and Watershed Enforcement staff presented erosion and sediment control training to the Santa Clara District of the Associated General Contractors of California.	40 attendees. The presentation was well-received. Distributed Clean Bay Blueprint and Watershed 6-message pens.
IND 6 PM 6.A. M 5.B CB-3 PIP 2 Att. A.5	Industrial Users Academy	◎: Industrial	April 19, 2007. The Industrial User Academy is an all-day training workshop for permitted industrial users in the San Jose/Santa Clara Water Pollution Control Plant tributary area. Attendees received training on the Pretreatment Program, wastewater discharge permit applications, permit issuance & conditions, and the Inspection Program. They also completed Self Monitoring Reports, Enforcement, Sampling, and Storm-water Guidelines.	The academy was well attended by 27 representatives (22 of which completed an evaluation) from 17 permitted industries in the tributary area. An exit survey was administered and it showed that all of the attendees went away with greater knowledge of the subject matter. 100% Have a better understanding of the storm water and inspection programs, 96% went away with a greater understanding of permit issuance and conditions, and 96% gained more knowledge on enforcement reporting and surveillance methods. 100% Agreed that the workshop was useful and that they would attend again.
NRD 2 CON 7.B	Residential Green Building Summit	◎: Developers, Builders, Architects	June 7, 2007. Speakers provided information on incorporating green building practices, which include urban runoff practices, were focused on multi-family residential, high-rise housing, and production homes.	Over 170 attendees. Distributed Construction BMPs and WMI Vision brochures and Watershed Images Surveys. Event was sold out over one week in advance. .Based on attendance, interest in building green appeared to be high.
PIP 2 Att. A.6	Acterra Business Environmental Awards	◎: Facilities Managers, Green Building Developers and service providers	June 7, 2007. Hosted a table and provided information on Green Building, PG&E Energy incentives programs, and the Watershed Management Initiative.	Over 150 attendees. Distributed Commercial and Light Industrial storm drain pollution prevention information. Learned that real estate sales persons are promoting green buildings and green features as a positive sales point.
IND 6 PIP 2	Cooling Tower Workshop	◎: Building Managers	June 15, 2007. Speakers provided information on industrial recycled water use and distributed information on preventing storm drain pollution and WMI Vision brochures.	Over 80 attendees. Distributed Commercial and Light Industrial storm drain pollution prevention information..
IND 6 ICID 4 CB-3.B	GIASP NOI Outreach	◎: High potential Cu and Ni dischargers	June 2007. Distributed Roof Vent BMP, NOI Checklist, SWPPP Flow Chart, along with a contact letter informing select businesses that they may be subject to the State General Activities Stormwater Permit (GIASP.)	Cover letter and roof vent BMP fact sheet sent to 101 facilities, based upon their SIC code. Seven SIC codes were targeted based on the recommendations from the 1997 Industrial Stormwater Pollution Pilot.
PIP 1 PIP 2.C M 5.A CB-11	Curbside Courier web page and newsletter	◎: Residential	Web page and newsletter focused on solid waste issues. Newsletter mailed to city recycling customers. The Fall 2006 issue contained an article about the proper way to recycle used motor oil at the curb, to prevent spills and stormwater	Courier published twice a year as a Recycle Plus utility bill insert. The Curbside Courier reaches approximately 185,000 single-family households. Additionally, the Curbside Courier was published online, with a total of 4,505 downloads in FY 06-07: 1,675 English versions, 1,689 Spanish versions, and 1,141

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 06-07 STATUS	EVALUATION
			pollution. The Spring 2007 issue contained a reminder to move vehicles on street sweeping day, an article about not disposing of HHW in the garbage & recycling bins (using HHW service instead), and listed both National River Clean-up Day and the Great American Litter Pick-up in the upcoming events sidebar.	Vietnamese versions.
PM 6.A PIP 2.C Att. A.7	Create and provide fact sheets and materials to pesticide retailers to facilitate point-of-purchase outreach to support IPM Store Partnership Program	◎: Consumers	There are nine stores in San José participating in the IPM store partnership. This work is done at the Program level. See the Program Annual Report for details.	This work is done at the Program level. See the Program Annual Report for details.
PM 6.A PIP 2.C	OWOW Fleas fact sheets at Animal Services Center	◎: Pet owners	Started in April 2006. The OWOW Fact sheet for Fleas, in both English and Spanish, is available in the Animal Services Center's literature racks. Additionally, a fact sheet is placed in every adoption package for pets adopted from the center.	Center estimates 300 pet adoptions per month.
PM 6 M 5 PIP 1 PIP 2.C Att. A.2	Regional Media Relations	◎	Concepts pitched include: pesticides, FOG (fats, oils and grease), mercury fever thermometer exchanges, and less-toxic lawn care. Placements include media outlets that serve San Jose residents, including the San José Mercury News, the Associated Press, KGO-AM, KLIV-AM, KCBS-AM, KSJO-AM, KLLC-FM, and other local-serving print, as well as web and radio outlets.	Regional partnership and coordination of media relations allows cities to pool their messages and resources into one consistent effort. Overall, 37 calendar listings, articles, broadcast and on line stories were covered by the media in FY 06-07, including 2 print articles, 15 radio stories, 14 web stories and 6 letters to the editor placements (including hard copy and web placements). There were no wire stories or television coverage this year. Public service announcements were pursued as well this year and resulted in 6 placements overall. See the Regional Media Relations Campaign Final Report for full details.
PIP 2 Att. A.3	Compost Bin Workshops and Sales	◎: Residents	July 5, August 12, September 6, September 9, October 14, November 4, 2006 and February 10, March 10, April 14, May 12, and June 16, 2007. Workshop to teach residents how to compost, and sale of bins at a discount to City residents.	692 people attended the compost bin workshops and two vermicomposting classes in FY 06-07, with 535 compost bins sold.
ICID 2.A.2 ICID 4 PIP 2.C Att. A.8 Att. A.21	ICID Outreach to Targeted Areas	◎: Residents in 95116 and 95123	The City analyzed FY 05-06's ICID data and discovered a concentration of the two highest complaint types, vehicle & equipment leaking and illegal dumping, in the 95116 and 95123 ZIP codes.	See below

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 06-07 STATUS	EVALUATION
ICID 2.A.2 ICID 4 PIP 2.C Att. A.8 Att. A.21	Five Wounds/Brookwood Terrace SNI NAC Meeting	◎: residents in 95116	October 2006. ESD presented and distributed info on P2, watershed awareness, the difference between storm and sanitary sewers, and who to call if dumping occurs.	Community members were very knowledgeable of their local creek, were very receptive to the information presented, and had a wide variety of questions about what the City does for watershed protection.
ICID 2.A.2 ICID 4 PIP 2.C Att. A.8 Att. A.21	East Valley/680 Communities SNI NAC Meeting	◎: residents in 95116	January 18, 2007. ESD presented and distributed info on P2, watershed awareness, the difference between storm and sanitary sewers, and who to call if dumping occurs.	18 People attended: 10 from the community, 5 from the Police Department, 2 from the City Manager's Office, and 1 from ESD. Community members knew which creek was in their neighborhood, and were very receptive to the information presented.
ICID 2.A.2 ICID 4 PIP 2.C Att. A.8 Att. A.21	Gateway East SNI NAC Meeting	◎: Residents in 95116	June 26, 2007. ESD presented and distributed info on P2, watershed awareness, the difference between storm and sanitary sewers, and who to call if dumping occurs.	19 People attended from the community and City offices. Community members knew which creek was in their neighborhood, and were very receptive to the information presented. Information in Spanish was especially useful, and well received.
ICID 2.A.2 ICID 4 PIP 2.C Att. A.8 Att. A.21	Mayfair SNI NAC Meeting	◎: Residents in 95116	June 28, 2007. ESD presented and distributed info on P2, watershed awareness, the difference between storm and sanitary sewers, and who to call if dumping occurs.	12 People attended from the community and City offices. Community members knew which creek was in their neighborhood, and were passionate about protecting their community, and very receptive to the information presented. Information in Spanish was especially useful, well-received, and additional information in Spanish was requested.
ICID 2.A.2 ICID 4 PIP 2.C Att. A.8 Att. A.21	Blossom Hill Homes Association Newsletter	◎: Residents in 95123	June 2007. The Blossom Hill Homes Association ran an article about stormdrain pollution and tips for it's residents, including moving vehicles on street sweeping day, use of HHW services, IPM practices, picking up pet waste, keeping vehicles in tune, and volunteering for adopt-a-park and other trash management activities.	The Blossom Hill Homes Association Newsletter goes to 391 households/units.
PM 6.A PIP 1 Att. A.3	The 4th Annual Walk 'N Wag	◎: Dog Owners	August 19, 2006 at Kelley Park. Educational and entertainment event for dogs and their owners	Included IPM information on fleas in the 'doggie bag' given to each participant. An estimated 500 participants received doggie bags.
PM 6.A PIP 1 Att. A.3	Bark in the Park	◎: Dog Owners	September 16, 2006 at Williams Street Park. Educational and entertainment event for dogs and their owners	Distributed pollution prevention information at community resource booth. Estimated 10,000 residents attended.

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 06-07 STATUS	EVALUATION
PIP 1 Att. A.3	Earth Day Event	◎: St. Julie's parishioners and community members	April 22, 2007 at St. Julie's Church. Eco Focus at Home & Work - Reuse, Recycle, Reduce, Respect (transportation, energy, waste, food & clothing, Green Building, community & natural resources)	Estimated 800 attendees.
PM 6.A PIP 1 Att. A.3	Cisco Earth Day	◎: Cisco Employees	April 24, 2007. "Eco-Focus at Home and at Work" employee event. ESD displayed information on wastewater and storm water pollution prevention practices, proper household hazardous waste disposal, less-toxic alternatives to household products, and energy conservation.	Employees were very enthusiastic to learn about pollution prevention. Among the educational pieces available, the following were most popular: Grow-It and Clean-It Guides, County Mercury brochures, and energy saving tips. More than 200 employees visited the display.
PM 6.A, M 2.B, M 5.A, PIP 1.A.1, PIP 2.C, Atts. A.3, A.9, A.10	Home and Garden Show	◎: Home owners	April 27-29, 2007. San José provided booth space. Booth staffed by SCVURPPP staff, co-permittees, and San José staff. Provided IPM and Household Hazardous Waste information.	See Program Annual Report for details.
Att. A.2	Santa Clara Basin Watershed Management Initiative (WMI) Retreat	◎: WMI stakeholders	June 7, 2007. Stakeholder retreat held at the Sanborn County Park Youth Hostel. The WMI is a collaborative of more than 25 stakeholders who coordinate efforts for sustainable watershed.	Approximately 25 attendees focused on the group's past successes and generated an elaborate discussion about the future of the organization.
PM 6.A PIP 1 Att. A.3	NEC Electronics America: Environmental Day for Employees	◎: NEC Electronics America employees	June 21, 2007. This event's purpose was to provide a fun and informative event for employees to gather ideas about ways to protect and preserve the environment both at home and at work. Provided general pollution prevention information that focused on the following areas: ▪ Difference between Storm and Sanitary Sewer Systems ▪ Value of Recycled Water ▪ Value of the Treatment Plant	About 300 employees participated. It was a fun and interactive event; employees exhibited lots of interest for the topics and materials that were being distributed. The County's Household Hazardous Waste Program brochure and the Clean-It and Grow-It Guides were a hit.
PIP 2.A CB 11 TRA 6	The Guide to Garbage and Recycling in San José	◎: Residential	Booklet with recycling information for residents. Also included information on Electronic Waste, Universal Waste, Street Sweeping, leaking vehicles, Anti-Litter Program, and general Storm Drain Pollution Prevention tips.	Guide distributed to approximately single-family and multi-family households in FY 05-06 and FY 06-07. The booklet is also available online for viewing and downloading.
PIP 2.C M.5	Mercury Outreach	◎	San José and Program staff assisted County with Mercury-related outreach for the County's Universal Waste grant activities. City staff also	See Program Annual Report for details.

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 06-07 STATUS	EVALUATION
Att. A.9			distributed the County's 2 mercury/universal waste brochures in City literature racks and at City events.	
Overall Evaluation of Targeted Outreach activities		◎	FY 06-07's targeted efforts focused on proper disposal of universal and hazardous wastes, IPM, construction-generated pollutants, trash, and general pollution prevention. At the local level San José has been able to successfully direct a variety of messages to a wide array of audiences through publishing articles in newsletters, hosting trainings and workshops, attending events targeting specific audiences, direct mailing, and collaborative efforts at the Regional level. The City also focused on training employees on general pollution prevention and awareness issues, so they in turn can educate the public they interact with as well as apply the lessons to their own work tasks. Targeted outreach supplement tasks have been done in other elements of the URMP, such as Illicit Connection/Illegal Dumping, the Industrial/Commercial Dischargers, Construction Inspection, Pesticide Management, Mercury, and the Copper and Nickel Action Plans.	
PIP 4.A.1.a Att. A.12	Coastal Clean-up Day	✋	September 16, 2006. Promoted event in the ESD newsletter and on the City web site.	Approximately 1,100 volunteers. Over 22,000 pounds of trash and 5,500 pounds of recyclables removed. Volunteers were surveyed after the event. See the Santa Clara Valley Water District's Annual Report for details.
PIP 1.B PIP 2.C PIP 4.A	Great American Pick Up	✋	May 19, 2007. ESD, PRNS, DOT, City Manager's Office, Mayor's Office, SJPD, City Attorney's Office, and external agencies planned & coordinated event in San José.	There were 30 clean-up sites, 3 per Council District, a three-fold increase in the number of City sites. 301 volunteers picked up 254 bags of litter; both of which were decreases from the previous year. National River Clean-up Day occurring the same day and time competed with this event for volunteers.
PIP 4.A.1.b Att. A.13	National Rivers Clean-up Day	✋	May 19, 2007. Promoted event in the ESD newsletter, the Great American Litter Pick-up flyer, the Curbside Courier newsletter, and on the City web site.	553 volunteers at 20 sites. Over 29,000 pounds of trash and 9,800 pounds of recyclables removed. 13 out of 20 clean-up sites in the County in San José. Volunteers surveyed after the event. See the Santa Clara Valley Water District's Annual Report for details.
PIP 1.B PIP 4.A Att. A.3	National Bike to Work Day (BTWD)	✋	May 17, 2007. City hosted one "energizer station" with drinks, promotional items and information to give out to bikers.	An estimated 300 people rode by or stopped at the City-sponsored energizer station, similar to last year's turn-out. The Countywide estimate for all bike commuters on BTWD is 27,000; a dramatic increase compared to last year's 15,000-20,000. Throughout the nine-county Bay Area, an estimated 108,000 bicyclists rode that day, more than double last years' turn-out. Both stormwater and air quality benefit from the reduced number of cars on the road. Encouraging people to use alternative modes of transportation highlights this benefit and encourages public participation.
PIP 4.A Att. A.8	Anti-Litter Program	✋	The purpose of the Anti-Litter Program (ALP) is to further beautify San José by preventing graffiti and litter through community involvement, eradication, and enforcement. ALP provides free clean-up supplies to volunteers, designates litter hot spots for adoption, does school outreach with	In FY 06-07, the ALP has 3,143 Pick Up San José volunteers on the rolls, a 12% increase over last FY. Participants picked up 4,134 bags; an estimated 124,000 pounds of litter removed from the City's streets, parks, creeks, and neighborhoods. As of June 2007, 136 of the 150 Litter Hot Spots have been adopted, and eight illegal dumpsites were eliminated.

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 06-07 STATUS	EVALUATION
			anti-litter messages, and hosts special clean-up events like the Great American Pick-up.	
PIP 4.A Att. A.8	Adopt-A-Park and Adopt-A-Trail		Adopt-A-Park is citywide volunteer program that recruits and trains residents to assist in the general care and maintenance of neighborhood trails, neighborhood/regional parks, and open spaces in San José.	The City's Adopt-a-Park program has over 2,300 volunteers organized into 267 groups that have adopted 164 of the 170 parks eligible for adoption. The Adopt-a-Trail program is still new, with 7 of 35 eligible trails adopted.
Overall Evaluation of Citizen Participation Outreach Activities			Citizen participation activities are a potent method for getting residents out into the Watershed and engendering stewardship. The City participated in three Clean-up events, as well as a Bike to Work Day, designed to promote participation and stewardship in the citizens of San José. Tying Clean-up events to pre-existing events such as Coastal Clean-up Day and the Great American Pick-up is a good way to maximize promotion. Advertising paid for by regional entities is useful for raising awareness locally. The City also organized regular participation activities through the Adopt-A-Park, Adopt-A-Trail, Anti-Litter Volunteers, and Volunteer San José programs. Through these programs, thousands of San José residents are taking an active role in watershed stewardship.	
PIP 3.A.3 Att. A.18	Youth Watershed Education Grants (YWEG)		Eleven grants awarded in FY 06-07 cycle. Four schools and seven non-profits received grants. A total of $39,330 was given in grants ranging from $1,000 to $5,000.	This year's cycle saw similar demand for funds and number of proposals as in the last two FYs. The City dedicated many hours to working with several of the grantees to refine their grant proposals to maximize their educational goals and the City's goals of educating youth on watershed issues and pollution prevention. Grant Projects are ongoing, and will be evaluated at the end of the grant cycle.
PIP 3.A.3	YWEG Grantee Training		February 7, 2007. Grant cycle kick-off training and networking meeting for all the Grantees.	The City repeated this session for grantees, to give them an opportunity to meet and share ideas and resources, to hear from a past grantee, and to learn and ask questions about reporting and evaluating. Grantees anecdotally said the meeting was well worth their time.
PIP 1.C PIP 3.A.3 Att. A.15	Wacky Watersheds Workshops		October 2006 and June 26, 2007. The October workshop presented South Bay Water Connections curriculum to educators as an elective course at UCSC Extension. The June workshop presented the South Bay Water Connections curriculum to middle school educators attending the Partnership for Student Success in Science workshop held by San José State University.	10 participants at October's 2-day workshop at UCSC Extension. 8 submitted evaluations. All rated the workshop's materials as good or excellent. 24 participants at June's workshop session. All 24 submitted evaluations, and all 24 rated the material as good or excellent.
PIP 3.A	San José Go Green Schools Initiative		The San José Go Green Schools Program fosters school recycling and environmental stewardship in a parent and community driven process based on the Go Green Initiative of Pleasanton. The City encourages schools to Go Green and connects them to free recycling supplies, mini-grants, site	The Go Green Schools steering committee has diverse members representing City, School, and Community organizations all dedicated to helping schools Go Green. 54 schools in San José have received SJGGS services, and 9 have officially signed up as Go Green Schools in FY 06-07. The City awarded 39 grants totaling $43,000 to 38 schools to help them get their Go Green

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 06-07 STATUS	EVALUATION
			assessments, and other green resources.	Schools programs started. Each school is unique and poses different challenged to going green, but the City is dedicated to helping schools not only green their operations, but educating their students and communities about environmental issues.
PIP 3.A	San José Go Green Schools Conference		October 14, 2006. Half-day workshop at the Camden Community Center (a green-retrofitted former high school) with lectures and break-out sessions describing different free green resources for teachers, and success stories from other Go Green schools.	Over 100 teachers, parents, students and other schools and community representatives attended. 44 Evaluations submitted, with 84% of respondents rating the overall conference as good or excellent. 20 Indicated they wanted their schools to go green, and 12 availed themselves of the free vermicomposting bins and worms.
PIP 1.B PIP 1.C PIP 3.A.3 Att. A.16	Water Awareness Program		Presentations focusing on Pollution Prevention. *It's Wet It's Wild It's Water!* Curriculum distributed to teachers. See 14.D: *FY 06-07 San José School Outreach* for details.	419 People reached. 224 Students in targeted grades 5-7 reached. 6 Survey forms returned. All rated the program as excellent or good.
PIP 3.A.1	ZunZun Presentations		See Program Annual Report for details.	See Program Annual Report for details.
PIP 3	Cupertino School District Field Trip Bussing		Paid for bussing for four San José schools in the Cupertino Union School District and to bus 3rd graders to local creeks as part of Cupertino's 3rd Grade Creek Education Program.	See Cupertino Annual Report for details.
PIP 1.B PIP 1.C PIP 3.A.3 Att. A.17	Slow the Flow		Grant to Don Edwards Environmental Education Center at Alviso to host 9 different types of events: special events, interpretive programs, teacher orientation, field trips, in-class presentations, outreach presentations, workshops, special visits and interpretive displays.	This program reached an estimated 16,000 students and adults in the SJ/SC WPCP Tributary area in FY 06-07. This was accomplished through field trips, weekend programs, special events, outreach events, and classroom presentations. Additionally, visitors can view the interpretive displays at the Environmental Education Center. From a presentation standpoint, the program continues to get very high evaluations from both teachers and students. Almost 40% of those attending are repeat customers. From a content standpoint between 91 and 100% of those questioned in exit exams recalled key messages of the presentations. Exit polling shows that 92% will use at least one water conservation activity at home. This year a new evaluation method was tested. Students were asked to show key message retention via picture form. Instead of writing the answer, they had to draw the concept. This approach is showing interesting promise.
PIP 1.B PIP 1.C PIP 3.A.	Water Wizard Festival		May 25, 2007. Water education festival for 3rd graders. The purpose of the festival was to increase the awareness of the importance of water and promote stewardship of water as a resource. ESD taught 3 activities related to the City's mission concerning water and watershed	300 students from 4 San José public schools. Pre- and post-testing of each student showed knowledge increases in most areas: Down 1% in knowing that the water we use at home affects our rivers (64% to 63%) Up 2% in knowing Polluted water is not good to drink (89% to

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 06-07 STATUS	EVALUATION
			issues. The messages taught were: Pollution Prevention Difference between Storm and Sanitary Sewer Systems Value of Recycled Water Value of the Treatment Plant Importance of Soil & the Value of Composting	91%) Up 2% in knowing all living things need water (88% to 90%) Up 21% in knowing that we live in a watershed (49% to 71%)
Overall Evaluation of Education Outreach Activities			Education continues to be a vital component of San Jose's pollution prevention plan. The City actively contributes to education both as a City and through the Program. San José commits significant resources to youth education with the goal of instilling a sense of stewardship for the environment. San José employs both in-class education and train-the-trainer approaches to Outreach. In-class presentations are more expensive per student reached, but lend themselves better to evaluation. Train-the-trainer has the potential to reach many more students, but it is extremely difficult to measure the effectiveness of this potential. Youth Watershed Education Grants provide funding for groups and educators to implement their own programs that accomplish the City's education goals. FY 06-07 saw the start of the City's Go Green Schools Program. Go Green Schools fosters recycling and environmental stewardship in a parent and community driven process, and supplies grants to schools to help them achieve their green goals. The City connects schools with free recycling supplies and other green resources, and encourages them to take up Go Green at the level the school chooses, whether it be recycling or environmental curriculum or green purchasing or other green practices.	

FY 06-07 San José School Outreach

Program & Description	Contractor	Type of Program	Target Grade	Location	School Name	School Location	# events held	# students reached	Evaluation Included?
Bussing for Creek Program Bussing for San José students participating in Cupertino's 3rd grade creek program.	City of Cupertino	Teacher Training, Field Trip	3	See Cupertino data for details	De Vargas Elementary, Dilworth Elementary, Meyerholz Elementary, and Murdock-Portal Elementary.	San José	See Cupertino data	See Cupertino data	See Cupertino data
Youth Watershed Education Grant Grant program for the SJ/SC WPCP Tributary Area that focuses on: supporting watershed projects for youth education; curriculum development; field trips; adoption and implementation of watershed-based curricula; teacher or youth leader-training.	None	Other	K-12	Various	Directly: Del Mar High School, Toyon Elementary, and two to Hacienda Elementary. Indirectly: seven grantees worked with youth from various schools in the WPCP tributary area.	Multiple locations	11	2,140 (est.)	Yes
Wacky Watersheds Workshops Focus: hands-on training to explore the concepts of water use, wastewater treatment, pollution prevention and watershed protection.	(Partnered with RAFT and SJSU)	Teacher Training	K-12	RAFT Lawson MS	Multiple schools	Multiple locations	2	40 Teachers	Yes

Program & Description	Contractor	Type of Program	Target Grade	Location	School Name	School Location	# events held	# students reached	Evaluation Included?
Water Awareness Program Also known as Rangers in Schools: classroom presentation + distribution of "It's Wet It's Wild It's Water!" curriculum. Presentations also done at selected community events.	San José Park Rangers	Presentation	5-7th, but reached as young as 3rd and as old as 6th.	San José	K.R. Smith Elem., Galarza Elem., West Valley Elem., Dahl Elem., Taylor Elem., Escuela Popular, Orchard Elem., Girl Scouts, and Almaden Lake Park.	San José	16	419	Surveys given to teachers
San José Go Green Schools Program Fosters school recycling and environmental stewardship in a parent and community driven process	None	Other	K-12	Various	Multiple schools	San José	54 schools helped, 9 officially signed up	Unknown	Yes
San José Go Green Schools Mini-grants Grants up to $2,000 for schools to start a campus program to Go Green.	None	Grant		Various	Multiple schools (38 total)	San José	39	Unknown	Yes
Save Green with Go Green: San José Go Green Schools Summit Half-day workshop at the Camden Community Center with lectures and break-out sessions describing different free Green resources for teachers and success stories from other Go Green schools	None	Workshop	K-12	Camden Community Center.	Multiple schools	San José	1	Unknown	Yes
Water Wizard Festival May 25, 2007. Water education festival for three hundred 3rd grade classes. Purpose: to increase the awareness of the importance of water and promote stewardship of water as a resource. ESD taught 1 lesson at three booths (each booth taught 100 students) related to our mission concerning water and watershed issues. The messages taught were: Pollution Prevention (P2), Difference between Storm and Sanitary Sewer Systems (DSS), Value of Recycled Water (RW), Value of Treatment Plant (TP), and Importance of Soil and the Value of Composting.	Guadalupe River Park and Gardens, SCVWD, and Audubon Society.	Presentation	3	Guadalupe River Park and Gardens.	Willow Glen Elementary, Seven Trees Elementary, DeVargas Elementary, and Meyer Elementary.	San José	1	300	Yes
Slow the Flow In-class presentations, field trips, teacher training, and more. Students explore the concepts of water use, wastewater treatment, habitat protection using Zoology, Life Science, Integrated Science, Chemistry, Physical Science, Environmental Science, Biology, Engineering, and Marine Science.	Don Edwards SF Bay National Wildlife Refuge	Presentation, Field Trip, Teacher Training, and Other.	5-12	Alviso Environmental Education Center	See below	n/a	120 (not counting display visits)	Est. 16, 000 students and adults. PRP B.	Participate in permit development and negotiation processes.	Ongoing	Done FY 06-07 and ongoing. San Jose staff have participated and will continue to participate in the MRP process through the Program, BASMAA, and individually as a City.	ESD

15.B Permit Reapplication Preparation Evaluation

The City's current NPDES permit was adopted in February 2001 for a five-year period. The permit was amended in October 2001 and July 2005, with both amendments relating to the New and Redevelopment stormwater treatment and hydromodification provision, also known as Provision C.3. The permit has been administratively extended since February 2006, pending the adoption of the Bay Area-wide Municipal Regional Permit.

In late 2005, the Water Board embarked on a multi-stakeholder process to craft an NPDES permit, called the Municipal Regional Permit (MRP), that would apply to all municipal stormwater dischargers in the Bay Area. In the past, NPDES permits were issued separately to Bay Area stormwater programs with staggered adoption dates, which often resulted in uneven and inequitable requirements.

City staff has dedicated numerous hours analyzing MRP drafts, briefing stakeholders, and preparing responses to the drafts. Staff has also participated in the steering and stakeholder meetings convened by Water Board staff. City staff will continue to participate in the MRP process through the Program, BASMAA, and individually as a City. The Water Board is expected to adopt the MRP in 2008.

15.C Permit Reapplication Preparation Response to Water Board Comments

No comments received from Water Board on this Program Element.

Oakland, CA 94612

Subject: City of Santa Clara Urban Runoff Management Program
FY 2006–2007 Annual Report

Dear Mr. Wolfe:

This report is submitted by City of Santa Clara in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2006-2007 in accordance with the City of Santa Clara's Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 1997 and updated in January 2004, and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 04-05 Work Plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

- Certification Statement
- IC/ID Elimination Activities
- Industrial/Commercial Discharger Control Program
- Public Agency Activities
    - Public Streets, Roads and Highways O&M (including Corporation Yards)
    - Rural Public Works O&M
    - Storm Drain O&M
    - Water Utility O&M
- New Development Planning Procedures
- Construction Inspection
- Public Information and Participation
- Pesticide Management Activities
- Mercury Pollution Prevention Activities
- Copper Action Plan/Nickel Action Plan
- Trash Inventory and Management
- Staff Training Summary Table
- Performance Standard Certification Statement

Program Highlights and Accomplishments

The City of Santa Clara has been active in the Program elements and very active at the Co-permittee element level. IC/ID activity reported 223 incidents, down from 237 last year. IND/COM inspections totaled 225. Construction inspections totaled 837 (31 SWPPP inspections and 788 windshield inspections). There were 53 construction element violations as compared to 31 violations from the previous fiscal year

Analyzing / detection of trends at the Co-permittee level continues to improve with each Annual Report. The City is alert to the various reporting information that is collected and has developed a history of adapting its resources to minimize storm water pollution.

The City continues to retain EOA Inc. to assist with the planning and implementation of the C.3. Provisions. The assistance provided by EOA has been valuable in supporting staff on site specific C.3. Provision questions.

Continuous Improvement Activities

The City of Santa Clara takes pride in our Urban Runoff Management Program and the quality of storm water. In the IC/ID element it was identified, as in past years, that concrete contractors are the primary violators. To address this continuing problem, the City has not only continued its focus on the industry, but has increased education efforts to the residents hiring these contractors. The IND/COM element continues to be dynamic in identifying industries with reoccurring violations. To this end, the City has identified, as in past years, automotive and food service facilities. The City's goal is to reduce storm water pollution to the maximum extent practicable through education, targeted inspection on identified hot spots and if necessary, through vigorous enforcement of our Storm Drain Ordinances.

The City has assumed an aggressive stance with repeat violation facilities by issuing Pre-Citation / Administrative Citations instead of repetitive violation notices. Violation notices and citations, as are warranted by the situation, continue to be implemented in increasing numbers as the City of Santa Clara establishes a database of repeat offenders.

Thank you for your review of this FY 06-07 Annual Report. If you have any questions regarding the materials submitted, please contact Rick Mauck at 408-615-2099.

Richard J. Mauck

FY 06-07 Annual Report

IC/ID Elimination Activities

CITY OF SANTA CLARA
FY 2006-07ANNUAL REPORT
ICID ELIMINATION ACTIVITIES

1. **What type of incident causes the most problem?**

   The type of incident that causes the most compliance issues are cement related washouts from smaller concrete and masonry contractors. Cement related incidents totaled 84 out of 223 (refer to page 4 "breakdown of top six violators for level of enforcement action"). Enforcement actions and BMPs are continuously distributed to cement related contractors due to the high rate of violations. The potential reason for this problem is unlicensed contractors and the belief that these individuals do not stress to their employees storm water protection.

2. **Is a particular location or source a large part of the problem?**

   The locations where most of these types of incidents occurred were in residential neighborhoods. Residential cement related incidents total 84 out of 223 total incidents (see attached chart titled "ICID Elimination Activities Violation Percentage").

3. **Might it be getting better or worse?**

   Residential cement related incidents totaled 84 in FY 06-07 compared to 107 in FY 05-06. It appears that the problem is improving somewhat. Increased contractor education is the main reason attributed for the improvement.

4. **What might be the causes?**

   Cement related incidents still continue to be the largest violation in terms of percentage, despite the slight improvement in FY 06-07. The cement related businesses, given their transient nature, are either not receiving the outreach or are not passing the information on to all their employees. Unlicensed contractors further compound the issue because the permit process is often not completed, circumventing the distribution of BMP material.

CITY OF SANTA CLARA
FY 2006-07 ANNUAL REPORT
ICID ELIMINATION ACTIVITIES

5. **What, if anything, will you do differently next year?**

In FY 2006-07, the City featured an article in the City newspaper (mailed to all residents and businesses quarterly) concerning cement in storm drains. The article was designed to educate our residents who hire cement related contractors. The article is featured on our City website (http://www.ci.santa-clara.ca.us/pub_works/urban_runoff_prevention.html). It is unlikely that the additional effort, over what is already occurring, will better educate all cement related contractors. In spite of storm drain inlets having the "NO Dumping" stencils, and through word-of-mouth not to dump into storm drains, the best solution is to continue to educate our residents.

City of Santa Clara

FY 06-07 Annual Report

Industrial/Commercial Discharger Control Program

CITY OF SANTA CLARA
FY 2006-07 ANNUAL REPORT
INDUSTRIAL/COMMERCIAL DISCHARGE CONTROL PROGRAM

The City of Santa Clara's Industrial/Commercial Discharge element has become well-established and efficient in monitoring and enforcing the businesses of concern within the City. The City's NPS Inspector has several years experience working with the many elements of the City's storm water pollution prevention program. Continuity in this position has provided greater efficiency, better communication within other departments and the insight to identify trends over time.

During the FY 2006-07, the City's NPS Inspector conducted a total of 225 IND/COM mandatory and non-mandatory inspections (see attached chart titled "FY 06/07 IND/COM Number of Inspections by Category") as compared to 249 inspections in FY 05-06. Seventy-seven mandated inspections including re-inspections were conducted for FY 2006-07. Mandated inspection facilities are typically inspected bi-annually or sooner, as determined by SIC code or previous compliance issues. Non-mandated inspections required in the FY 06-07 Work Plan vary from year to year. For example, in the FY 2003 Work Plan there were ten facility categories inspected resulting in 202 mandated and non-mandated inspections. In the FY 06-07 Work Plan there were 8 facility categories inspected with 225 inspections. The inspections conducted at these facilities resulted in a total number of violations detailed in the following graph. Note that the total number of inspections includes both initial inspections and re-inspections as necessary to confirm compliance.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2006-07 ANNUAL REPORT

FY 06-07 IND/COM
MANDATED AND NON-MANDATED OCCURING VIOLATIONS AS COMPARED TO NO VIOLATIONS

Note: A non-mandatory inspection is an inspection that occurs at a facility type designated in the current work plan. A mandatory inspection is the result of a pre-determined inspection frequency based upon SIC code.

A total of 114 violations were found in FY 06-07. Seven of those violations were found during mandatory inspections and 63 violations during non-mandatory inspections.

All IND/COM violations in the City of Santa Clara received follow up inspections and were corrected timely as dictated by conditions. All IND/COM inspections conducted in the City are documented on a Non-Point Source IND/COM inspection sheet and kept on file.

When violations are found during inspections, proper BMPs are distributed and a follow up inspection is conducted. When a violation is minor, a letter stating that corrective action has been completed from the facility contact person with supporting dated pictures is an acceptable means of compliance.

Refer to the table on the following page for detail of the type of violations found for each respective category.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM FY 2006-07 ANNUAL REPORT

FY 2006-07
STATUS OF INSPECTIONS AND VIOLATIONS BY FACILITY CATEGORY (Includes Re-Inspections)

Mandatory Inspections

Category	Description	Status/Common Violations Found	# of Inspections	# of Violations
8	**Metal Manufacturing:**	Improper waste oil storage and improper storm drain inlet protection.	4	3
9	**Electric/ Components:**	Expired storm water permit, improper wastewater disposal, and improper waste oil storage.	1	0
11	**Local Transit:**	Wastewater improperly disposed of, waste oil storage, and poor housekeeping .	4	3
13	**Auto Dismantlers:**	Improper waste oil/battery storage, poor housekeeping, and improper parts storage.	3	0
14	**Concrete Products:**	Improper material storage.	1	0
17	**Other:**	Poor housekeeping.	4	1
Non Mandatory Inspections				
1	**Automotive Facilities:**	Improper hazardous waste storage	148	44
3	**Paint Facilities:**	Improper Hazardous waste and paint storage.	59	19
		Total	**224**	**114**

For FY 2005-06 and prior years, the violation to inspection ratio of the automotive facilities (specifically dismantlers), and food service facility categories had the highest number of violations and repetitive violations. There are five automotive dismantlers in the City. Three facilities were inspected in 2006-07 and had 0 violations. The automotive facility category has been an ongoing enforcement problem, prompting the City to increase enforcement on repeat violators by increasing/accelerated enforcement actions which has resulted in a substantial drop in the violation percentage in FY 2006-07 for a total of 129 inspections with 22 violations. The other two facilities will be inspected early this fiscal year.

This year and prior year inspection/violation data has shown that the majority of facilities with reoccurring violations continue poor storm water practices despite prior education. For these facilities, warnings are not effective and as a result pre-citations and administrative citations have been increasingly used. Pre-citation and administrative citations demand their attention and in many cases result in monetary damages. Through the issuance of pre-citations and administrative citations, NPS inspectors have had prompt violation correction and less reoccurring violations as compared to FY 2005-06.

The City will continue to target facilities in our yearly workplan that have the highest rate of violations.

FY 06-07 IND/COM
Percentage of Facilities With Violations Requiring Re-Inspections

* Reflects facilities needing re-inspections. All re-inspections may not have been conducted.

FY 06-07 IND/COM
Number of Inspections by Facility Category

Total number of Industrial/Commercial Inspections including Re-inspections: 225

Rural Public Works Operation and Maintenance

Rural roads within the City are the responsibility of the Parks Department. One exception is the creek trails that have been/are being constructed along San Tomas-Aquino Creek. Reach 1 (Hwy 237 to Agnew) was completed in early 2004 and Reach 2 (Agnew to Scott Blvd.) was completed in early 2006. Reach 3 (Scott Boulevard to Monroe Street) should be completed in 2008. These improvements, as they are completed, are/will be maintained by the Street Department.

As with other elements, City staff is knowledgeable of applicable BMP's and are educated on Storm Water Pollution Prevention BMP's as needed. For current and future contracted projects, BMP's are contractual required and enforced by on-site inspectors and/or Storm Water Inspectors.

General Comment: The City has a total park area of 187.5 acres, 39,375 linear feet of 8-foot wide trails, 21,600 linear feet of 12-foot wide golf trails, nearly 3 miles of paved creek trails and 1.25 acres of concrete lined ponds/fountains.

City of Santa Clara

FY 06-07 Annual Report

Public Streets, Roads, and Highways Operation and Maintenance

CITY OF SANTA CLARA
FY 2006-07 ANNUAL REPORT
PUBLIC AGENCY ACTIVITIES

Public Streets, Roads & Highways Operation and Maintenance

The Street Department is responsible for the maintenance of approximately 240 miles of streets within the City of Santa Clara. It should be noted that the following streets are not within the jurisdiction of the City:

- Central Expressway (County)
- Lawrence Expressway (County)
- San Tomas Expressway (County)
- El Camino Real (State)

In addition, some boundary streets are shared with other jurisdictions – most notably Stevens Creek Boulevard (primarily with San Jose). BMP's observed include, but are not limited to, protection of storm drain inlets, collection of sawcut slurry and routine sweeping of City streets. Contractors completing work within the City streets are contractually required to follow BMP's. Street Department staff is trained to report poor contractor activity to the Non Point Source Fire Inspectors and/or the Storm Drain Foreperson.

BMP effectiveness has been good mainly due to a constant City presence and contractual responsibilities. Staff and City contractors are well educated on BMP use. The City policy on residential street sweeping is bi-weekly guaranteed (typically done every week), industrial/commercial sweeping is done every 18-20 days. This is not a change over previous years activities.

Sweeping

The City of Santa Clara employs (3) full-time Street Sweeper Operators to sweep all of its streets, which consist of 401 residential route miles and 181 industrial route miles. The City utilizes three Schwarze A7000 regenerative air sweepers as its front-line sweepers. A Schwarze

A4000 regenerative air sweeper and a Johnston suction sweeper serve as back-ups. The regenerative sweepers are very effective at collecting fine sediments.

Residential streets are scheduled to be swept the day following the assigned garbage/recycling collection day. Residential streets are swept on a weekly basis about 80% of the time. The City guarantees bi-weekly residential street sweeping. Residential streets were swept on a bi-weekly basis 100% of the time in FY 2006-07. The City relies upon voluntary cooperation from residents to remove their vehicles from the street on their assigned street sweeping day. There are some areas in the City that are often parked in and cannot be swept. The Street Department posts temporary "No Parking" signs in these areas a few times a year to efficiently clean the gutterline.

The City has twenty-four (24) industrial routes that are swept on a continuous basis. Each Street Sweeper Operator is responsible for eight (8) routes. Each operator completes one industrial route, prior to sweeping the assigned residential route for the day. Industrial routes are typically swept 1.5 times per month. In total, 26,354 miles of sweeping occurred in fiscal year 2006-07 as compared to 28,023 miles in fiscal year 2005-06 and 7,124 yards of debris was collected. This included both residential and industrial sweeping. The industrial sweeping route map is attached for reference.

The City, beginning in fiscal year 2003-04, no longer hires contractors to perform street sweeping services during leaf season or to cover employee-scheduled absence due to budgetary constraints.

Leaf Collection

Typically, November marks the beginning of the Leaf Collection Program. For this program, the City utilizes two leaf vacuums (10 yard boxes) that are manned by a 2-man crew covering 10 routes. This program typically, depending on weather, operates for 2 months and is done in

conjunction to the normal street sweeping operation. For fiscal year 2006-07, this program collected 3,249 cubic yards as compared to 2,893 cubic yards in fiscal year 2005-06. Ground crews manually rake leaves around obstacles, allowing the leaf vacuums easier access to the leaves. Litter is generally removed prior to vacuuming. Leaves collected are treated as green waste at the landfill.

Residents also deposit leaves in their green waste container. It is not possible to distinguish between the types of green waste collected (branches, lawn clippings and leaves). For reference, 10,483 tons of green waste was picked up in fiscal year 2006-07.

City of Santa Clara

FY 06-07 Annual Report

Storm Drain Operation and Maintenance

CITY OF SANTA CLARA
FY 2006-07ANNUAL REPORT
PUBLIC AGENCY ACTIVITIES

Storm Drain System Operation and Maintenance:

1. Which BMP's were evaluated formally or informally this year?

- BMP's for Storm Drain System Operation and Maintenance have become well established and are routinely used by the Storm Drain Division. Most efforts of the Storm Drain Division are focused on line/inlet cleaning and support of any clean-up efforts required of IC/ID and construction events. Placing of "No Dumping – Flows To Bay" identification markers are part of the Storm Drain Division responsibilities. For greater effectiveness, placards are enameled metal. This Division also is first response support for hazardous materials spills. For these efforts, BMP's to isolate the event may be unique for each situation. All Storm Drain Divison personnel are trained in confined space to implement BMP's as required.

2. Does your process for tracking hot spots appear to be working?

- Yes, Storm Drain personnel carry plat books that map out the entire City of Santa Clara's storm drainage system. Hot spots are indicated on these maps, periodically monitored and coordinated with the Fire Department (Hazardous Materials Unit) as events occur.

3. What were your major hot spots during the fiscal year, and how has that changed from previous years?

- The City's major hot spots were locations that received significant localized flooding during major storm events. Maintenance crews are well trained to respond and maintain those locations. There were few areas of localized flooding for FY 2006-07.

4. What evidence do you have that contractors are/aren't fully implementing BMP's?

- Storm drain inlets and catch basins are cleaned twice yearly. Debris collected from those structures indicates the type of activity causing the build-up. As indicated in the IC/ID element, cement contractors continue to be the major contractor causing violation. Overall, contractor violation events are recognized and cleaned up before entering the Storm Drain System. In instances where this is not the case, all efforts are made to track the debris back to the violator for enforcement action.

5. Which agencies and/or staff are receiving training and which are not?

- The City's Street Maintenance and Storm Drain Maintenance Divisions are trained on maintenance of the storm drain system and any illegal dumping into the storm drain. Please refer to the staff training summary table at the back of this report. City Utility Departments (Water, Sewer & Electric) have also been trained that only rainwater is to go down the drain. In addition, the Parks and Public Works Departments have also received stormwater related training. When substances other than rainwater is observed, these departments are outstanding in reporting the event to the Storm Water Division.

6. What feedback has staff given about the effectiveness of BMP's?

- The implementation of BMP's has become standard operating procedure. Current efforts have been to increase effectiveness/ease of use for the BMP's. It has been noted that the most effective BMP's start at the source. Inspectors focus on these BMP's first and look at downstream BMP's as secondary protection – not as a substitution of a BMP upstream.

A Vactor Clean Out Station has been constructed at Highway 237 and Lafayette Street. The site has storm and sanitary clean out facilities. Each facility utilizes a sand/gravel media prior to a sedimentation tank for dewatering the debris bunker. This facility continues to work very well.	Complete	Street Dept.

City of Santa Clara

FY 06-07 Annual Report

Water Utility Operation and Maintenance

CITY OF SANTA CLARA
FY 2006-07 ANNUAL REPORT
PUBLIC AGENCY ACTIVITIES

Water Utility Operation and Maintenance

The Water/Sewer Department is responsible for maintenance of City's water distribution system. Key O&M activities, potentially affecting storm water quality, include line flushing, hydrant exercising and water meter testing. These scheduled activities have all discharges tested and treated (if needed) prior to release. Contractors working for the Water Department are contractually required to follow BMP's. Water Department staff report poor contractor activity to the Non Point Source Inspectors and/or the Storm Drain Foreperson.

The effectiveness of the Water Department in minimizing storm water pollution is good. Required staff has been trained in testing/treating of planned discharges. Only emergency/unscheduled discharges go without treatment. For these events, the storm drains are protected as quickly as possible and the discharge stopped.

City of Santa Clara

FY 06-07 Annual Report

New Development Planning Procedures

City of Santa Clara
FY 2006-2007 Annual Report
NEW DEVELOPMENT PLANNING PROCEDURES

1. Self-Evaluation Matrix (based on C.3. FY 06-07 Work Plan) -- enclosed

2. NDC Summary Table – Mandatory C.3. Projects -- Significant Projects Reviewed and/or Approved During July 1, 2006 through June 30, 2007 -- enclosed

3. Response to Water Board Comments on the New Development Section of the FY 05-06 Annual Report: No response needed.

4. Evaluation of This Element

The focus of effort in this element of the City's urban runoff program during FY 06-07 included continued implementation of the C.3. provisions for Group 1 and 2 projects and the program for tracking and inspecting BMP operation and maintenance (O&M).

There were six Group 2 projects and no Group 1 projects approved this year. Description of the site design, source control and treatment control requirements for these projects are provided in the enclosed NDC Summary Tables. The City also encouraged site design measures (e.g., parking lot, driveway, and roof drainage routed to landscaping) at other sites that were below the Group 2 size threshold.

The City of Santa Clara is well prepared to implement C.3. site design, source control, and treatment requirements for Group 1 and 2 projects. Staff have implemented changes to the development application review process, and have incorporated these changes into the Standard Operating Procedures of the Planning Procedures Performance Standard in the City's URMP. A number of tools and forms have been developed to assist City staff with C.3. implementation.

In 2005, the City participated in an MS4 Program Evaluation conducted by Tetra Tech and Water Board staff that focused on implementation of the C.3. provisions and other program elements. For the New Development Program Element, there were no potential permit violations or major program deficiencies noted. The City was commended for:

1) Developing detailed guidance for developers and plan reviewers to implement the C.3. provisions;
2) Encouraging developers to consider alternatives to traditional stormwater management, such as low-impact development practices and reduction in impervious surfaces.

Recommendations included:

3) The City should develop a protocol to ensure that landscaped BMPs are being built and maintained as designed (**This was incorporated into the BMP O&M verification inspection program in FY 06-07**);
4) To ensure that the C.3 requirements are being applied consistently, the City should ensure that the C.3. guidance materials, especially the checklist designed for use by city planners when reviewing submissions, are used for each project **(This is currently being done.)**

More detailed information about the City's accomplishments on C.3.-related tasks during FY 06-07 are provided in the Self-Evaluation Matrix.

NEW DEVELOPMENT PLANNING PROCEDURES						
P.S. I.D.	**Activity**	**C.3. Work Plan Task**	**FY 2006-07 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
PPPS 5.	Group 2 Projects	c.9.	Prepare to require proponents of Group 2 projects to design and implement stormwater treatment BMPs to reduce stormwater pollution to the maximum extent practicable.	**Completed/Ongoing –** In July 2005, the Water Board adopted Order R2-2005-0035 that amended Provision C.3.c. to require implementation of Group 2A projects by October 20, 2005 and Group 2B projects by August 15, 2006. City staff began applying interim requirements for Group 2 projects in April, 2005 (the original implementation date) and began applying full requirements on Oct. 20, 2005. There were 6 Group 2 projects approved in FY 06-07.	Ongoing	Planning Dept.
PPPS 8.c.	BMP O&M Agreement Mechanism	e.3	Adapt model O&M agreement language to meet agency-specific needs and requirements and incorporate into the project review and approval process.	**Completed** – City staff developed a Stormwater Treatment Measures Inspection and Maintenance Agreement form, including an Annual Inspection Report form to be used by the property owner, and completed legal review of the documents. Having a maintenance agreement (or equivalent) is a condition of approval for all projects requiring treatment and/or hydromod BMPs.	Completed Draft 6/05; Final 8/05	Planning and Street Depts.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2006-07 ANNUAL REPORT

NEW DEVELOPMENT PLANNING PROCEDURES						
P.S. I.D.	**Activity**	**C.3. Work Plan Task**	**FY 2006-07 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
PPPS 8.b.	BMP Inspection Program	e.5	Develop local programs for inspection of a subset of prioritized treatment BMPs to verify that proper O&M is being performed by the responsible party.	**Completed/Ongoing** – City staff have integrated information about BMPs into their current data management approach for tracking development applications (i.e., the City's electronic permit system called Tidemark). Group 1 and Group 2 projects are tracked, as well as projects where incorporation of BMPs is voluntary. The City developed a process by which the BMP information is extracted and provided to the Street Dept. for the inspection program.	Program develop-ment completed 6/05 Program ongoing	Planning and Street Dept.

City of Santa Clara - NDC Summary Tables / Additional Information– Mandatory C.3 Projects

Significant Development Projects Reviewed and/or Approved During July 1, 2006 – June 30, 2007

Project File Number	Project Description	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Complete/ Approval)
PLN2005-05463	3421 Homestead Road Rezone from Single Family Residential to PD/ to allow new construction of 14 detached single family homes in conjunction with the demolition of an existing single family residence.	Residential	0.94 acres	0.58 acres	PCC: 06/19/06 CC: 08/22/06

Site Design:	Source Control:	Treatment BMPs:	Numeric Criteria:	O&M Responsibility:	Pesticide Reduction Meas:
Replacement of existing building, driveway and parking and landscaped areas with 14 new residences, surface parking and landscaping; common open space landscaping.	Disconnected downspouts directed to landscape areas; Construction BMP's for runoff and dust control. Litter control. Stenciled stormwater catch basins.	Landscape swales for surface runoff treatment. (open curb) Sweeping of surface parking area. Flow attenuation by use of open vegetated swales and natural depressions. Bubble-up roof drain emitters in landscape areas	Existing is 5% impervious; new development will be approximately 67%. New development volume-based BMP controls required to treat runoff from 0.58 ac	HOA is responsible to maintain landscape drainage areas and records for inspection per City O&M agreement to be completed prior to occupancy.	Use of landscape species that minimize irrigation, pesticide and fertilizer application.

PLN2006-05702	1701 Lawrence Road Rezone, Variances and Tentative Subdivision Map for nine attached townhome units and one common lot. Existing structures are to be demolished.			Residential	0.50 acre	0.17 acre	PCC: 06/12/06 CC: 08/29/06
Site Design:	**Source Control:**	**Treatment BMPs:**	**Numeric Criteria:**	**O&M Responsibility:**		**Pesticide Reduction Meas:**	
Remove existing buildings and open paved parking area; including landscaping and trees and construct 9 attached townhomes.	Minimize surface parking areas; Gutters to spill into landscape areas. Trash areas covered.	Hydrodynamic Separator installed near Lawrence Road frontage. Landscape swales in common and private yard areas for infiltration of runoff onsite, Sweeping of surface parking area. Design flow (Q) = 0.01CFS	Existing lot coverage is approximately 3,000 square feet or 13.5 percent. Proposed lot coverage is approximately 10,100 square feet or 45 percent.	HOA responsible to maintain landscape drainage areas and Hydrodynamic Separator.		Use of landscape species that minimize irrigation, pesticide and fertilizer application.	

PLN2006-05758	3625 Pruneridge Avenue Rezone from Neighborhood Commercial to Planned Development for the construction of eight attached townhomes. Existing one story (2,000 square feet) commercial building is to be demolished.			Residential	0.34 acres	0.25 acres	PCC: 08/14/06 CC: 002/06/07
Site Design:	**Source Control:**	**Treatment BMPs:**	**Numeric Criteria:**	**O&M Responsibility:**		**Pesticide Reduction Meas:**	
Replacement of existing building, driveway and parking and landscaped areas with 8 new residences, surface parking and landscaping; common open space landscaping.	Disconnected downspouts directed to landscape areas; Construction BMP's for runoff and dust control. Litter control. Stenciled catch basins.	Landscape swales for surface runoff treatment. (open curb) Sweeping of surface parking area. Flow attenuation by use of open vegetated swales and natural depressions.	Existing is site is 100% impervious; new development will be approximately 75%, a decrease of 25%	HOA is responsible to maintain landscape drainage areas and records for inspection per City O&M agreement to be completed prior to occupancy.		Use of landscape species that minimize irrigation, pesticide and fertilizer application.	

Project File Number	Project Description	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Complete/ Approval)
PLN2006-05946	3445-3465 Lochinvar Avenue Rezone from Public/Quasi-Public to allow construction of 30 new apartment units for Teacher Housing.	Residential	1.35 acre	0.72	PCC: 04/30/07 CC: 06/05/07

Site Design:	Source Control:	Treatment BMPs:	Numeric Criteria:	O&M Responsibility:	Pesticide Reduction Meas:
Remove existing City dogpark (open field) which abuts the existing Phase 1 40-unit teacher housing project.	Minimize surface parking areas; Gutters to spill into landscape areas. Trash areas covered.	A large 2,911 square foot bioswale if to be constructed along the perimeter of the site. This 1.35 acres is a portion of the 26.55 acre Curtis School site. Design flow is 2.05CFS	Existing site is an open field used as a City dogpark. Site is to be constructed with approximately 53 percent impervious coverage or approximately 0.72 acre.	The 30 apartment units are to be used as rental units. The property management will be responsible to maintain the landscape drainage areas per City O&M agreement to be completed prior to occupancy.	Use of landscape species that minimize irrigation, pesticide and fertilizer application.

Project File Number	Project Description	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Complete/ Approval)
PLN2007-06279	4650 Old Ironsides Road Conversion of Existing Office Building to Data Center and other outdoor site improvements, including replacing parking lot, landscape areas and new outdoor equipment yard.	Industrial	6.5 acres	0.9 acres	PCC: None ARC: 02/27/07

Site Design:	Source Control:	Treatment BMPs:	Numeric Criteria:	O&M Responsibility:	Pesticide Reduction Meas:
Replacement of existing building, driveway and parking and landscaped areas with new Data Center, replacement of parking lot, landscape areas and new outdoor equipment area. Bubble-up roof drain emitters in landscape areas	Disconnected downspouts directed to landscape areas; Construction BMP's for runoff and dust control. Litter control. Stenciled stormwater catch basins.	Bioretention area of 1,200 square feet. Sweeping of surface parking area. Flow attenuation by use of open vegetated swales and natural depressions.	Existing pervious surfaces 1.9 acres on the site and 5.1 acres of impervious surface. New pervious surfaces as 1.7 acres on the site and 5.6 acres of impervious surface. Total disturbed area is 0.9 acres, which is 17% of the total proposed impervious area. Therefore sizing for the BMP shall be for improved areas only. Flowrate 0.13CFS	HOA is responsible to maintain landscape drainage areas and records for inspection per City O&M agreement to be completed prior to occupancy.	Use of landscape species that minimize irrigation, pesticide and fertilizer application.

Project File Number	Project Description	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Complete/ Approval)
PLN2005-05237	42850 Augustine Drive Replacement of Existing McDonald's Restaurant/Drive-thru	Industrial	1.32 acres	0.688 acres	PCC: 08/08/05 ARC:09/07/05

Source Control:	Site Design:	Treatment BMPs:	Numeric Criteria:	O&M Responsibility:	Pesticide Reduction Meas:
Replacement of existing building, driveway, parking and landscaped areas with replacement of existing McDonald's Restaurant/Drive-thru. Downspouts directed to landscape areas; Construction BMP's for runoff and dust control. Litter control. Stenciled stormwater catch basins.	Replacement of existing building, driveway and parking and landscaped areas with new restaurant, replacement of parking lot, landscape areas and new outdoor equipment area.	Modified original design of the BMP grassy swale to conform the design principles for Vegetated Swales (BMP TC-30). Grading scheme is designed to allow the site runoff to sheet-flow into the swales along the entire contact perimeter with the paved parking areas. A portion of the drive-thru aisle has been redesigned to direct the runoff into the adjacent grassy swale. Cross-sectional area of the swales has been increased and the cobble flowline has been replaced with grassy vegetation to increase vegetated contact surface area of the swale. The grate elevation for the drain inlets within the swales has been raised approximately 6-inches above the bottom of the swale. This will create detention basin thereby increasing the contact time for treatment of the runoff.	Shed area is 1.134 (acres/Impervious Area is 0.688 acres/Pervious Area is 0.446 acres.	Owner is responsible to maintain landscape drainage areas and records for inspection per City O&M agreement to be completed prior to occupancy. Swales should be monitored for debris and littler, as well as sedimentation accumulation.	Use of landscape species that minimize irrigation, pesticide and fertilizer application.

Notes:

PCC means Project Clearance Committee, a staff committee charged with deeming an application complete
CC means City Council, which granted project approval
HOA means Homeowner Association

City of Santa Clara

FY 06-07 Annual Report

Construction Inspection

CITY OF SANTA CLARA
FY 2006-07 ANNUAL REPORT
CONSTRUCTION INSPECTION

1. **Do pre-rainy season inspections appear effective in getting all construction sites to install proper BMP's before October 15?**

Pre-rainy season inspections have been effective in enforcing construction site SWPPP's prior to October 15 by insuring compliance before the first rain. The City inspected 24 sites both prior and after to October 15th. These 24 sites were the total number of sites under construction prior and after October 15 that were considered to have the greatest potential to pollute. Each site for these inspections was given a copy of the construction inspection form and proper/adequate BMP usage (see attached form) was confirmed. If a site had a violation, depending on prior enforcement, the most applicable notice was issued with a re-inspection for compliance occurring timely.

2. **Do you think your inspection coverage of construction sites is adequate: why or why not?**

The City has very adequate coverage of construction sites. All construction sites are inspected before, during and after the rainy season. In addition, due to the limited number of construction sites, each are inspected during and after major rain events. For FY 2006-07 there was a total of 837 inspections conducted at 24 sites. On average 27 inspections were completed per construction site.

Inspections include pre-rainy season SWPPP review, pre-rain event, rain event, and post rain event. All inspections are documented on an inspection form. Pre-rain SWPPP inspections include the review of site-specific SWPPP requirements. These inspections ensure that BMP's required of the SWPPP are timely implemented on site. Pre-rain event, rain event, and post rain event inspections are supplemented by windshield inspections. For windshield inspections the inspector drives through and around the site, already being knowledgeable of the SWPPP requirements and confirms BMP compliance. Typically, windshield survey inspections for proper BMP implementation are not documented on an inspection form unless a violation is found. Individual windshield surveys and inspections are recorded on a construction site spreadsheet. When no violations are discovered, only the date of the inspection is entered.

CITY OF SANTA CLARA
FY 2006-07 ANNUAL REPORT
CONSTRUCTION INSPECTION

City employees not normally responsible for inspections, such as building inspectors, are knowledgeable of our storm water program and report any violations they may see directly to the Non Point Source Inspector. City Building Department inspectors are trained regarding proper storm water practices and contact the NPS Inspector as violations occur or most appropriately, prior to discharge. NPS inspectors also attend preconstruction meetings for City projects to inform the contractor that the City will be inspecting the site for proper storm water BMP management.

3. **Did your City take an unusually large or small number of enforcement actions this year, and what are the possible reasons?**

In FY 2005-06 the City conducted 37 SWPPP inspections and 915 windshield inspections, for a total of 952 inspections. A SWPPP inspection is where the SWPPP site is reviewed and a walk-through inspection takes place. There were 68 violations in FY 05-06. In FY 2006-07 the City conducted 31 SWPPP inspections and 788 windshield inspections, for a total of 819 inspections. There were 53 violations in FY 06-07. The number of violations was down slightly mainly due to a smaller number of inspections.

4. **How are verbal warnings followed up to determine whether compliance is achieved?**

Verbal and written warnings are given for all violations and are followed up by a re-inspection of the site. Any time a warning is given, a follow up inspection was always conducted. If the violation was not corrected, a written violation or pre-citation notice was issued. Weekly windshield inspections are conducted during the rainy season and include inspections of all areas of concern. If a violation was found, the site construction superintendent was notified immediately and a full SWPPP inspection was conducted. A total of 31 SWPPP inspections of 21 construction sites were conducted. For these twenty-one sites, a total of 20 re-inspections were required and completed.

CITY OF SANTA CLARA
FY 2006-07 ANNUAL REPORT
CONSTRUCTION INSPECTION

5. Are there specific contractors who need repeated warnings?

Yes, there have been some contractors that have required repeated warnings. If a verbal warning was given to a contractor and the potential violation was not corrected, a violation notice was issued. If the violation was corrected and a different violation is found during a later inspection, a pre-citation notice was issued. If the contractor continues to be out of compliance, administrative citations are issued. Escalating enforcement occurred several times at the 4730 Snead Drive building project. For this site, 2 administrative citations, 1 pre-citation and 1 violation notice were issued within a short period of time. Both the 2 administrative citations and one pre-citation were found during windshield inspections.

6. Are the contractors on Public Works projects doing a good job in erosion/sediment control?

Contractors engaged in public works projects are contractually required to follow all appropriate BMP's. Engineering Department-Field Services Division personnel are fully aware of our URMP program and do not hesitate to notify a Non Point Source Fire Inspector as violations are seen. For most projects, inspectors are able to identify potential discharges prior to there being an event. Non-Point Source Inspectors also attend pre-construction meeting with contractors to educate them on storm water issues.

7. Are BMP's being used in your City adequately, or do you see a lot of substandard controls like sand bags and hay bails?

BMP's are being used adequately within the City. All twenty-one-construction sites had the required BMP's in place either before or immediately after inspection per their approved Storm Water Pollution Prevention Plans. The prompt issuance of violations and reinspections for compliance has insured that all BMP's are in place. No hay bales or sand bags were used as a primary source of storm water protection. The City is no longer using the "Earth-Moving Activities" Brochures that advocate the use of hay

bales. (2002 Performance Review Comment). The type of BMP's the City encourages include those that stress controlling erosion at the source - for example, stabilizing dirt slopes, covering stockpiles of materials, proper storage of materials and education. Protection of inlets alone is not considered adequate.

8. Does outreach to contractors or City staff need to be improved?

The City continuously educates and monitors City staff and contractors regarding storm water pollution prevention protection. This in part is completed by frequent inspections and distribution of BMP pamphlets specifying construction storm water protection. Improvement can always be made and additional emphasis has been given to make sure contractors, when applying for permits, are given all applicable BMP information.

CITY OF SANTA CLARA
FY 2006-07 ANNUAL REPORT
CONSTRUCTION INSPECTION

FY 05-06 and 06-07 Construction Inspection Comparison

Initial inspections of construction sites are done with the site superintendent and the SWPPP is reviewed. If a violation is found, the appropriate enforcement action is given to the superintendent and frequent re-inspections as are necessary are conducted to eliminate further violations. The City's NPS inspector and Storm Drain Foreperson perform at a minimum a windshield inspection before, during, and after a rain event. Any violations found are documented on an inspection form or the date is logged on an Excel spreadsheet if no violation is found.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2006-07 ANNUAL REPORT

CONSTRUCTION INSPECTION – NEW DEVELOPMENT						
Performance Standard Identification	**Activity**	**Continuous Improvement Source Item**	**FY 2006-07 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
CSI 1	Construction Inspections	2004 URMP	Develop and implement a Field Inspector checklist for inspection of storm water pollution prevention requirements.	To date, Building Inspectors refer storm water issues to the Non-Point Source Fire Inspectors and/or the Storm Drain Foreperson. The referral system is working well. Building Inspectors typically do not check for a SWPPP but will forward problems they see to the Street Dept. Prior/during construction the Street Dept. is inspecting the site for storm water/SWPPP compliance.	Ongoing	Street Dept. Planning Dept. Building
CSI 1	Construction Inspections	2004 URMP 2005-06 Workplan	Improve coordination with Building Department to require efficient updating of active construction sites.	Some minor projects are ongoing without the knowledge of the Non-Point Source Inspector and are found by chance. This is not acceptable to this element. A list of all sites is sent to Non-Point Source inspectors quarterly from Planning.	Ongoing	Street Dept. Planning Dept. Building
CSI 2	Wet Weather Inspection	2004 URMP	Inspect construction sites during weather events.	In FY 06-07 there were 31 SWPPP inspections made on 21 sites prior to the wet weather events, and 788 windshield inspections were conducted during wet weather events.	Ongoing	Street Dept.

Complete Ongoing	Street Dept.

City of Santa Clara

FY 06-07 Annual Report

Public Information and Participation

CITY OF SANTA CLARA
FY 2006-07 ANNUAL REPORT
PUBLIC INFORMATION AND PARTICIPATION

The City of Santa Clara provides information to the public during mandatory and non-mandatory inspections, IC/ID events, public events and providing BMP literature for distribution at City facilities. Measuring the effectiveness of how this information is used by the public is difficult.

In past Annual Reports our IND/COM and IC/ID elements have analyzed the number of repeat violations. The City has seen repeat violations as an indicator of poor education (not utilizing BMP information). This is open to interpretation. Some industries/businesses are volatile by nature, have high employee turnover and/or are improperly managed. These are all considerations that affect BMP education effectiveness.

Public events are a great opportunity to distribute BMP literature and interact directly with citizens in an informal way. Although a large number of BMP pamplets are distributed, they are received by a public that may or may not be a target audience. As a result, BMP effectiveness can only be inferred.

The City of Santa Clara is committed to educating its businesses and residents in stormwater pollution prevention. Our participation in program activities will continue, as will our commitment to identify problem businesses for specialized inspection/distribution of specific BMP's.

CITY OF SANTA CLARA
SCHEDULED PIP EVENTS*

EVENT	DATE
All City Picnic	July 4, 2006
Camellia Show	February 24 & 25, 2007
Citywide Clean Up Campaign	March 12 thru April 5, 2007
Art and Wine Festival	September 16 & 17, 2006
Free Disposal Days	September 17, 2006 & January 7, 2007
Arbor Day/Earth Day	April 27, 2007
Fish Derby	April 28, 2007
Household Hazardous Waste Events	Continuous (64 events held in FY 2006-07; 2,175 participants)

***Each event has a purpose separate than PIP, however many of the events produce an outstanding opportunity for Staff to set up interactive games for children, a visual computer display for adults and to distribute BMPs.**

N/A	General Activity	FY 06-07 Work Plan FY 02-03 RWQCB Work Plan	Continue general outreach activities at public events and targeted outreach during ICID and industrial / commercial discharge compliance monitoring.	Attachment A indicates the public activities that the City coordinates. Staff is present at these activities to promote general storm water pollution prevention. General and industry specific BMPs are presented. Targeted outreach for FY 06-07 was automotive facilities. BMPs were distributed specifically to these business types. These targeted outreach efforts are substantially complete. Since July 1, 2006, 148 automotive facilities, 59 paint, 4 metal manufacturing facilities, 1 electric/electric component facility, 4 local transit/highway transport facilities, 3 auto dismantlers, 1 concrete/stone/clay product facility, and 4 other (category 17) facilities have been inspected. Theses numbers also include reinspections.	Ongoing	Street Dept Fire Dept.

Effort is put into analyzing IC/ID and other element data to find relationship, if any, of incidents versus outreach accomplished.	Ongoing	Street Dept.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2006-07 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Libraries: Central & Mission Branch, Community Centers & various locations throughout the City.	General / Educational	BMP's: Bay Begins at Your Front Door, Pest Bugging You?, Clean It!, Grow It!, Home Maintenance Tips, Home Repair & Maintenance, Pool/Spa, Painting, and Concrete and Mortar Application. Distribution continuously.	Works well in terms of numbers distributed; difficult to measure effectiveness. Provides good exposure to Storm Water Pollution Prevention, but does not provide the opportunity for interaction.
New Resident Information	General	City calendar and annual report distributed – contains information on City meetings and events for the year. Provided yearly.	Mailed to approx. 48,000 residents and businesses. 4,000 more were distributed in other ways. Well received for general information. Informs residents of upcoming events (Disposal Days, Household Hazardous Waste Drop Offs, etc.). Includes suggestion/comment card that allows for feedback, but very few returned last year.
Public Events	General	City staff helped staff booth at the San Jose Home and Garden Show on Saturday, April 28, 2007.	Event provided an excellent opportunity to educate the public about the County-wide HHW program. Good match between message and event.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2006-07 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Household Battery Disposal Information on TV/computer monitor disposal Fluorescent bulbs and batteries	General	Fall 2006 issue articles in City newspaper, Inside Santa Clara, about the County HHW program,curbside battery pickup provided by Mission Trail Waste Systems and battery drop off locations at all City Fire Stations. Fall 2006 article in City newspaper listed City Street Department phone number for information on disposal computer or television monitors. County based public education groups sponsored bus advertisements and a Comcast Cable television commercial that educated residents to use retail recycling partners to recycle their bulbs and batteries.	Well-received program. Residents comment on convenience factor Increased requests for "battery bucket" pickup at Fire Stations. Many requests for referrals to companies who will take monitors at televisions at no charge. SB20 monies have made the "covered electronic device" market lucrative, so there are plenty of recyclers in the area taking these items at no charge from residents. Program was effective, the Countywide HHW collected more fluorescent bulbs and batteries from local retail recycling partners between January and April 2007 than ever before.
Storm Drain Maintenance update & URPPP tips, hints, offer for info.	General / Educational	Fall 2006 issue of Inside Santa Clara gave clear instructions on how to dispose of fall leaves. All raked leaves are to be placed in Clean Green containers provided by Mission Trail Waste Systems- leaving gutters/storm drains free of debris. Spring 2007 article in City newspaper, Inside Santa Clara, "Keep Construction Debris Out of Storm Drain"	Mission City Scenes sent to approx. 48,000 residents in their utility bill. Timed for wet weather. Does help reduce number of blocked storm drains due to clogged leaves, debris, etc. Phone number for the Street Department is listed to provide additional information. Many calls are received. Inside Santa Clara sent to approx 48,000 residents and businesses.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2006-07 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Street Sweeping Leaf Vac Program	General	February 2006 utility bill insert, Mission City Scenes, article. Provided yearly. "Falling Leaves" article in Fall 2006 issue of Inside Santa Clara.	Approx. 48,000 residents. Provides residents with information on street sweeping schedule so they are able to remove cars from the street on street sweeping days. Compliance and phone calls to the Street Department are increased after article appears.
Camellia Show	General / Educational	Advertised in December and January 2006 utility bill insert, Mission City Scenes and Winter 2006, Inside Santa Clara. February 24th & 25th, 2007	Approx. 375 attended. Article in Utility insert. Brochures "Grow It, Pests, Pool, Home Maintenance" distributed at show. Audience shows interest in the above BMPs –good match of PIP activity and information provided.
City Clean-Up Campaign	General / Educational	March 12 thru April 5, 2007 Spring 2007 article in City newspaper, Inside Santa Clara Distributed info regarding proper disposal & alternative uses to pesticides & household cleaners.	Total of 8,282 tons gross weight collected with a significant amount of hazardous materials also collected. Very effective in terms of removing potential storm water pollution from the City and increasing awareness.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2006-07 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Free Disposal Days	General	September 17, 2006 and January 7, 2007	Total of 250 residents participated in the September event, and 236 in January. Effective in terms of removing potential storm water pollution from the City. Very well received by residents.
Arbor Day	General / Educational	Article in March 2007 utility bill insert, Mission City Scenes and Spring 2007, Inside Santa Clara. April 27, 2007 Public presentation. Magician with environmentally based program along with school participation. School age related educational materials.	Approximately 1,383 students, teachers & volunteers attended. URPPP display booth appropriate for this age group. Temporary tattoos designed for the URPPP program new this year. Very well received. Great opportunity to reach large number of school-age children. Assembly and teacher packets are very well received. Good response from the children at the water pollution booth demonstration.

FY 2006-07 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
URPPP info City Web Page	General / Educational	Article advertising web page in June utility bill insert, Mission City Scenes Information on the Fire Department's Hazardous Materials Division, Household Hazardous Waste Drop Off Days, Free Disposal Days, and Urban Runoff Pollution Prevention. Internet - Continuous	"Hits" continue but difficult to measure effectiveness.
Distributed via educational letters prompted by complaint	Targeted / Educational	Home Maintenance Tips; Home Repair & Remodeling; Pool/Spa Water; Landscape, Gardening, and Pool Maintenance; Painting & Application of Solvents & Adhesives; Roadwork & Paving; Earth Moving Activities; Heavy Equipment Operation; Fresh Concrete & Mortar Application; General Construction & Site Supervision; The Bay Begins at Your Front Door!; Blueprint for a Clean Bay; San Francisco Bay Area Recyclers & Disposal Services for Construction Sites Continuous	Distributed 247 + BMP's. Effectiveness is good – repeat offenders are greatly reduced. Information is directed to individual residents/contractors. This may have more of an impact. Accelerated rate of administrative action has increased compliance.

City of Santa Clara

FY 06-07 Annual Report

Pesticide Management Activities

CITY OF SANTA CLARA
FY 2006-07 ANNUAL REPORT
PESTICIDE MANAGEMENT ACTIVITIES

The Parkways & Boulevards Division and the Parks Department staff have been using tighter matting mulches to prevent weeds in FY 06-07. In addition, better timing of pre-emergence application has occurred to achieve the goal of post-emergence herbicide reduction. Drip systems have been installed at various locations throughout the City. This improvement has improved water management and reduced the potential for weed growth.

The Parkways & Boulevards Division and the Parks Department staff have been trained to recognize plants that have become infested with pests and trim off of infected areas before a condition worsens to a point that requires chemical treatment. Our pesticide application methods include soil drenching, soil injection, and fertilizing with fertilizers that contain systemic pesticides. These practices reduce the need for overhead spraying and keep the pesticide on site without the possibility of drift or run-off. We are always looking for safer, less toxic materials that are effective to replace more harmful chemicals. The City has encouraged all landscape personnel to participate in pesticide management activities by observing and contributing their thoughts with the goal to have a continuously improved pesticide management plan.

CITY OF SANTA CLARA
FY 2006-07 ANNUAL REPORT
PESTICIDE MANAGEMENT ACTIVITIES

FY 06-07 PESTICIDE USE REPORTING

The Parkways & Boulevards / Tree Division is made up of 17 full-time positions. Of these positions we have 2 PCA's (Pest Control Advisor) and 14 QAC's (Qualified Applicator Certificates). The Parks Department has 3 PCA's and 34 QAC's currently on staff. The Parkways & Boulevards Division also has 7 positions that are filled with seasonal employees.

It is our goal from our yearly pesticide/IPM training and continuing education scales we attend each year that we practice the least toxic solutions for our situations. All of our pesticide cardholders are required to attend 40 hours of continuing education every 2 years, and our QAC's, 20 hours of continuing education. Along with our full time employees, our seasonal employees receive our yearly pesticide/IPM training. This training includes all product labeling, MSDS, safety information leaflets, health safety issues, and city-adopted procedures for their Integrated Pest Management Program.

The City Pesticide Management Program continuously evaluates our spray techniques and the products we use. There are 21 chemicals currently in the Parkways and Boulevards inventory. This number is down from 24 from the previous year. Of the 21 chemicals being used, 14 showed a decrease from the previous year, 7 showed a slight increase, and 6 were not used. The Parks Department used 12 chemicals in 2006-07.

The P & B Division is continuing to practice the least toxic application to control rodents, insects, and disease. Gopher traps are being scented with garlic along with rat traps being bated with peanut butter.

Overhead spraying still occurs, but whenever possible the use of soil injection and soil drenching is the preferred method. Timely applications have shown to be safer and have longer residual affects for the plant material. This year we have decreased the size of our soil injection

program (Merit), to test the longevity of this particular product. The tree division has also been developing a new program of releasing beneficial insects in selective tree species. The Tree Division released 925, 000 parasitic wasps (Aphytis Melinis) in the City tulip trees to help combat soft scale. In addition to the parasitic wasps, the Tree Division has also released 1000 Lindorus Lopanthae (scale predator) in selective areas. These types of beneficial releases have a slow mode of action, and are continuously evaluated for their effectiveness.

Tree chippings produced by the Tree Division are continuing to be spread throughout the city to help reduce the weed population. This practice also has a water conservation benefit, along with putting nutrients back into the soil from the decomposing manner.

Performance Standard Identification	**Activity**	**Continuous Improvement Source Item**	**FY 2006-07 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
P.S. #6	Procedures for Contractors	2004 URMP 2006-07 Workplan	Require PCOs contracted for municipal applications to use pest control methods consistent with the municipality's IPM policy (through contract specifications). Require contractors to: (a) follow the agency's IPM policy, BMPs, and SOPs; (b) provide evidence of current IPM training, when feasible; and (c) provide documentation of pesticide use on agency property to the agency in a timely manner.	All City Contractors are required to follow the IPM policy.	Ongoing	Street Dept. Parks Dept.
P.S. #7	Outreach to Other Users	2004 URMP 2006-07 Workplan	Work with Program on outreach efforts and with City newspaper / cable station to outreach IPM goals.	The City participates in Program efforts and actively collects/educates residents about pesticide collection during the Annual Cleanup Campaign and household hazardous waste collection events.	Ongoing	Street Dept.

City of Santa Clara

FY 06-07 Annual Report

Mercury/Copper/Nickel Pollution Prevention Activities

CITY OF SANTA CLARA
FY 2006-07 ANNUAL REPORT
MERCURY/COPPER/NICKEL POLLUTION PREVENTION ACTIVITIES

Copper

The City of Santa Clara has in previous workplans aggressively inspected automotive facilities and metal plating facilities. This occurred in FY 2001-02, FY 2002-03 and FY 2006-07 for automotive and FY 2002-03, FY 2004-05, and FY 2005-06 for metal plating. These facilities are inspected at least once every two years due to their SIC code but inspection frequencies are accelerated if repetitive violations are found. Automotive Facilities not inspected in FY 2006-07 are the targeted facility type for FY 2007-08. Our street sweeping program mandates bi-weekly sweeping of all residential streets. Industrial routes are swept on a continuous basis. Use of architectural copper is discouraged and is being eliminated from design in new public buildings.

Nickel

The City of Santa Clara, through our construction inspection element, has documented construction best management practices activity within the City for many years. In FY 2006-07, 51 construction inspections occurred on 22 sites. Inspectors also conducted 788 windshield inspections of all construction sites. Emphasis has been on increasing enforcement actions to gain compliance.

Mercury

The collection of thermostats, household batteries and fluorescent bulbs has skyrocketed since DTSC banned universal waste from landfills. The Countywide HHW Program has partnered

with several retail businesses to accept fluorescent bulbs and batteries from the public. The Countywide HHW Program then collects the bulbs and batteries from the retail establishments and recycles them along with waste collected at drop-off events. The City is pursuing Extended Producer Responsibility (EPR) initiatives to remove mercury from the waste stream and to encourage producers to make a less toxic product.

Performance Standard Identification	**Activity**	**Continuous Improvement Source Item**	**FY 2006-07 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
MCNP P.S. #2	Municipal Use of Mercury Containing Products AKA- Prioritization of Mercury / Copper / Nickel Products	Order No. 01-024 2004 URMP 2006-07 Workplan	Develop a process to survey the types of mercury-containing products used by City departments. Identify appropriate municipal personnel to conduct survey. For those products with a potential to enter storm water runoff, identify possible alternatives or proper disposal procedures.	Building Maintenance Department requires all mercury containing products to be properly disposed. Mercury containing products are stored in the Street Corporation Yard hazmat shed. A certified hazardous waste contractor cleans the shed on a quarterly basis.	Ongoing	Street Dept. Building Maintenance
MCNP P.S. #3	Municipal Use of Mercury Containing Products AKA- Identify Management Options	Order No. 01-024 2004 URMP 2006-07 Workplan	Follow Performance Standards in identifying management option for mercury-containing products reduction. These standards include a schedule for the timely phase-out of mercury-containing products identified for virtual elimination as well as reporting requirements, replacement, and reduction in use of mercury-containing products.		Ongoing	Street Dept.

MCNP P.S. #3 (CB-3)	Household Hazardous Waste Collection	Order No. 01-024 2004 URMP	Provide mercury-containing products disposal services for residents and small businesses. The City began collecting household batteries from single-family residences curbside on July 1, 2006 and has drop-off locations located at its 10 Fire Stations for multi-family residents. The Countywide HHW Program has partnered with retailers to accept fluorescent bulbs and batteries from the public.	There were 64 Household Hazardous Waste collection events in FY 2006-07. 2,175 Santa Clara residents attended HHW drop-off events in FY 06-07. The Countywide HHW Program is continually working to bring more retail establishments into the program.	Ongoing	Street Dept. Fire Dept.
MCNP P.S. #3	Household Hazardous Waste Collection	Order No. 01-024 2004 URMP	Develop guidelines for documenting and reporting quantities of mercury-containing products disposed of by City.	Documentation is currently being conducted under Dept. of Toxic Substance Control Form 303, submitted annually by the County on behalf of the City.	Complete Ongoing	Street Dept.

MCNP	Watershed assessment and protection	2004 URMP	Revise City's General Plan, as needed, at next scheduled update, based on recommendations from the *Development Policies Comparison Project* and Provision C.3.l. Review and implement guidance from SCVURPPP and San Jose on addressing water quality in the CEQA review process, as part of C.3.m. implementation.	Current general plan determined effective with current language.	Complete	Planning Dept. Street Dept.
MCNP Overall Commitment	Monitoring and Science	Order No. 01-024 2004 URMP 2006-07 Workplan	Provide financial and staff support for a coordinated regional plan to collect data for the mercury TMDL, as defined in the RWQCB / BACWA / BASMAA.	Work with Program	Ongoing	Street Dept.

City of Santa Clara

FY 06-07 Annual Report

Trash Inventory and Management

CITY OF SANTA CLARA
FY 2006-07 ANNUAL REPORT
TRASH INVENTORY AND MANAGEMENT

In the City of Santa Clara the NPS inspector and/or Storm Drain Foreperson and/or Solid Waste Foreperson respond to trash complaints. Other City personnel may respond to initial response, depending on the nature of the event.

A trash "hot spot" list was generated based on the data received from complaints and catch basin cleaning crew findings. A survey was conducted using the KAB litter index and documented on a spreadsheet two times in FY 06-07. This information is updated every year. Locations that appear on our "hot spot" list on more than one occasion receive further investigation to find a source of the litter. Facilities and/or persons that can be found responsible for the trash receive a violation notice for a first offence, pre-citation notice for the second, and administrative citation for the third. If no source is found and the trash is on private property the property owner may be held responsible for clean up and the City will pick it up if its in the public right of way. Regardless of the source, trash is typically picked up within one week or sooner depending on the potential to enter the storm drain.

Attached is the table of the City's trash "hot spots" relative to the watershed affected if the trash entered the storm drain system.

Staff Training Summary Table

CITY OF SANTA CLARA
FY 2006-07 ANNUAL REPORT

Staff Training Summary

Fifty City staff attended storm water pollution training in FY 06-07. Eleven staff persons attended multiple training in storm water pollution prevention. The list of actual training events is contained in the legend of workshops in the notes section beneath the Staff Training Table.

Most employees felt that the trainings offered were relevant to their day-to-day jobs and was helpful. The City of Santa Clara will continue to provide storm water pollution prevention training to its employees via seminars conducted by outside consultants and in-house training provided by Street Department personnel.

WEST VALLEY CLEAN WATER PROGRAM

September 15, 2007

Mr. Bruce Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: West Valley Communities Urban Runoff Management Program
FY 2006-2007 Annual Report

Dear Mr. Wolfe:

This report is submitted by the West Valley Cities of Campbell, Monte Sereno, Saratoga, and the Town of Los Gatos, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2006-2007 in accordance with the West Valley Communities' Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 2004 and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 06-07 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

I. Attachments:

11. Water Quality Monitoring and Watershed Management

Training Summaries are provided at the end of each element

PROGRAM HIGHLIGHTS AND ACCOMPLISHMENTS

During FY06-07, the West Valley Communities of Campbell, Los Gatos, Monte Sereno, and Saratoga continued efforts to implement their URMP to the maximum extent practicable. The activities that were implemented for each element of each Community's URMP are described in Chapter 14 of the Santa Clara Valley Urban Runoff Pollution Prevention Program's URMP. Highlights of the West Valley Communities accomplishments in various program elements are described below.

Preparation for the Municipal Regional Permit (MRP)

The proposed Municipal Regional Permit was the focus of a large amount of staff time for WVCWP and West Valley cities' municipal staff throughout FY 06-07. Numerous meetings, discussions and training related to the upcoming MRP took place. All staff endeavored to participate meaningfully during this important phase of MRP development. This included analysis of proposed requirements, discussion of feasibility of implementing those requirements within municipal budget limitations, and attempting to develop useful feedback to help move this process forward. In the May 2007 version of the Draft MRP, the WVCs were pleased to see some revisions which reflected the feedback that had been provided to Water Board staff.

Illicit Connection and Illegal Dumping Elimination Activities

The WVCWP Stormwater Discharge Inspector ("Inspector") coordinates all follow-up, reporting, and education related to illegal discharges to the storm drain system and responses to facility inspection referrals. To provide a better understanding of the WVCWP Inspector's role and to evaluate and confirm response procedures, the WVCWP Inspector and WVCWP Program Manager have held and attended meetings with Santa Clara County Dept of Environmental Health (regarding food facility inspections) and SCC Fire Dept (regarding industrial and commercial inspections) and municipal staff (regarding incident reports and construction inspections). The increase in communication has facilitated a system of referrals and follow-up that is working phenomenally well for the West Valley Cities. Every potential incident is investigated during resolution, and after compliance has been achieved. All facilities that were inspected for a potential violation and were subsequently brought into compliance are prioritized for at least one pro-active inspection the following year.

Public Agency Activities: Storm Drain Operation & Maintenance

The West Valley Sanitation District (WVSD) conducts inspections and cleaning of half of the West Valley Cities' storm drain system each year, except for Monte Sereno, where storm drain structures are inspected and cleaned annually. FY06-07 was the second year that WVSD

provided enhanced annual reports to the cities on their inspection and maintenance activities. The reports are generated from a database of numbered storm drain structures with corresponding street names. The number of pounds and types of debris removed during the inspection cycle is also reported.

In FY 06-07, the WV cities reviewed the second year's data, and were pleased to find that at least 65% of the structures in each city, where the system is inspected on a two-year cycle, were found to be free of debris such as leaves, paper, dirt, rocks, sand etc. and therefore, did not require any cleaning.

In Campbell, 584 out of 888 structures (66%) were clean and only 40 structures required a two-man cleaning crew. In Los Gatos 1,197 out of 1,575 structures (76%) were clean and only 49 structures required a two-man cleaning crew. In Monte Sereno 172 out of 365 structures (47%) were clean. Twenty-four structures required a two-man cleaning crew and of those, 19 were impacted by mud and dirt. Monte Sereno's storm drain system will remain, as it has been, on an annual inspection and cleaning program. In Saratoga 1,566 out of 2,182 structures (72%) were found clean and only 40 structures required a two-man cleaning crew.

The data shows that the biennial inspection cycle is more than adequate for most of West Valley's storm drain inlets and structures, as evidenced by the number of structures that are found clean on a 2-year cleaning cycle. It is therefore important to the West Valley cities to continue the current maintenance cycle in lieu of using limited resources on more frequent and unnecessary inspections. The information provided in the WVSD annual reports will facilitate the effective prioritization of appropriate locations and structures for more frequent annual inspections and cleaning. The WVSD reports were distributed at the annual Storm Drain workshop on 6-20-07 and will be reviewed by WV cities as they determine future management actions for stormdrain maintenance and for other activities such as trash management.

Planning Procedures & New Development

During FY 06-07, the West Valley communities devoted extensive time to reviewing and analyzing the proposed Municipal Regional Permit (MRP), especially regarding proposed C.3 revisions. These efforts led to an invitation to Water Board staff to attend one of the West Valley monthly meetings. The WVCs were pleased with the subsequent meeting on Dec. 19, 2006. WVCs were represented by decision-making staff (two Public Works Directors, one City Attorney) who appreciated the opportunity to speak directly with Water Board staff. In the spirit of reaching consensus, municipal decision-makers were able to inquire about the intent of proposed requirements, and to put forward ideas for feasible means of implementing the MRP, within the municipal framework. West Valley municipal staff came away with a greater understanding of the Water Board's objectives, and greater clarity on possible implementation of the related proposed requirements.

Public Information/ Participation

A broadened direction in PI/P this year involved partnering with a local non-profit environmental education program: Environmental Volunteers (EVs). The EV program trains docents to provide free environmental education activities in K-8 classrooms. WVCWP staff attended numerous trainings to become qualified EV docents. WV staff then led classroom presentations with other EV docents, and were able to incorporate new watershed-related messages into the educational activities. Overall, WVCWP staff reached 168 students directly through classroom presentations in FY 06-07.

Pesticide Management Activities

In FY 06-07, the WVCWP Manager, and other Co-permittees from SCVURPPP's IPM Ad Hoc Task Group, responded to a presentation and public outreach suggestion from Sunnyvale staff. The WVCWP manager invested time in evaluating and helping to lay the groundwork for instituting a new outreach program related to pesticide management. For the past several years, the Clean Water Program has been investigating ways to educate yard-maintenance workers. Finding a relevant means of contact has proven to be difficult, especially since many are not fluent in English. The "Green Gardener" program, offered in both Spanish and English, was developed to reach the small landscaping businesses, which are prevalent in the West Valley cities. The program (www.greengardener.org) has been successfully implemented in Santa Cruz and Santa Barbara counties. Via telephone conferences, the experienced agencies offered feedback and guidance to help the SCVURPPP set up a similar educational program in Santa Clara Valley. The curriculum, offered as adult education courses with hands-on training activities, teaches landscape maintenance practices that incorporate pollution prevention principles (IPM). At the end of FY06-07, the IPM AHTG held meetings to discuss applying for DPR grant money to set up a local program through Metropolitan Adult Education Program (MAEP).

Public Information/ Participation and Public Agency Activities

The Town of Los Gatos promoted a new outreach event to the public in May 2007. The "Public Works Week Corporation Yard Tour" drew in over **100** students, teachers and parents from local schools. The tour participants viewed Public Works and stormwater displays. Municipal staff demonstrated to the students the purpose and details of operation for the vehicles and machines, including the Town's new regenerative-air street-sweeper. Display tables were set up by spokespersons representative of a variety of agencies and departments, including the Street Sweeper, the Code Enforcement Officer, Park Service Officers and the Clean Water Program Manager. Visitors received a brief presentation about watersheds, viewed a model of a storm drain and learned where to recycle hazardous materials. Emphasis was placed on prevention of litter and illegal dumping. This event helped Los Gatos successfully generate support and understanding among residents for the Town's watershed protection issues.

These highlights help to demonstrate the West Valley Communities' commitment to implementing the requirements outlined in the Urban Runoff Management Plans.

Thank you for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact me at 408.354.4734.

Very truly yours,

Cheryl C. Donnelly

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
2004 URMP Perf. Standard	Program	IC/ID Performance Standards Implement updated local URMP to reflect revised Performance Standards. Provide staff training on revisions.	IC/ID Performance Standards were updated as part of the URMP revision in Sept 2004. There were no changes made to the Standard Operating Procedures (SOPs) in FY06-07.	WVCWP Mgr & WVCWP IC/ID Inspector
	URMP	Response Program Continue to implement IC/ID Stormwater Discharge Inspector response program and evaluate for continuous improvement.	During FY 06-07 the West Valley Inspector responded to 16 incident reports in Saratoga. One half time IC/ID Inspector conducts a centralized incident response and proactive restaurant and vehicle shop inspection program for four West Valley communities. The Inspector follows up on all reports of potential violations. This coordinated inspection program works very well and has increased the West Valley Communities' staff awareness of water pollution activities.	WV Inspector
	FY06-07 Work Plan	Enhanced Reporting Report on incidents using categories consistent with SCVURPPP Program. Document follow-through to point of resolution or referral for enforcement action (penalty or fine).	The WVCWP Inspector keeps a standardized Microsoft Access database of all IC/ID response calls and their follow-up through resolution. West Valley's annual data was provided to SCVURPPP for Program-wide analysis.	WV Inspector
	URMP	Education Distribute BMP materials during routine inspections. Distribute follow up education information for businesses cited for potential stormwater violations.	During FY 06-07, the WVCWP Inspector distributed twenty-one (21) educational materials in Saratoga, as part of his outreach and inspection program.	WV Inspector

IC/ID Program Evaluation

IC/ID Training

The Inspector's training meetings and presentations at various West Valley workshops have been effective. Inspectors from Dept of Environmental Health and the Fire Dept have called to report potential urban runoff violations which were observed outside of their scheduled inspections. This is encouraging for West Valley staff who have tried to improve communication and reporting, and provide relevant training sessions each year.

Trend Analysis

Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2006-2007 ANNUAL REPORT

In FY04-05 eleven (11) reported incidents were investigated. Residential and construction sites were the only two incident sources for all reported violations. Five (5) pool and spa discharges accounted for the number one IC/ID incident type reported in Saratoga in FY04-05. This was followed by two (2) tracking soil incidents and two (2) cement related discharges (concrete residue and unhardened cement). Pool and Spa incidents were clearly the most prevalent type of IC/ID problem being reported in the City. The remaining incident types (1 saw cut slurry and 1 vehicle/equipment leaking) were related to residential construction or remodeling projects. No other meaningful conclusions were noted.

In FY05-06 the West Valley IC/ID inspector responded to twenty-one (21) reports of potential violations in Saratoga. Out of the 21 reports, ten (10) were the result of interdepartmental referrals and six (6) were the result of citizen complaints. In FY05-06, Six (6) pool and spa discharges were the most commonly reported incident types. Three (3) incidents were not found and one (1) was an allowable discharge. Three (3) inspections were related to illegal dumping. Two (2) equipment cleaning discharges were reported, one from a food facility and the other from a construction site. One incident was related to an oil and grease discharge which overflowed from a cleanout near three restaurants. This confirms the importance of educating restaurant owners on the need for regular grease trap maintenance. Additionally, two (2) accidental spills and one (1) hydraulic line break were reported. Other incident types were: one (1) grey water discharge, and one (1) miscellaneous construction incident. A notable trend was that Saratoga has a substantial number of pool discharges and construction related incidents.

In FY06-07 the West Valley IC/ID inspector responded to sixteen (16) reports of potential violations in Saratoga. Out of the 16 reports, eight (8) were the result of interdepartmental referrals and three (3) were the result of citizen complaints. The trend in 06-07 did not indicate any commonly reported incident types. Two (2) incidents were not found and two (2) were allowable discharge. In FY 05-06, a notable trend in Saratoga was the substantial number of pool discharges (6) and construction related incidents (6). In 06-07, there was significant reduction in these types of incidents; only one (1) pool and spa discharge, and three (3) construction site related incidents.

Overall, Saratoga experienced a decrease in the number of incidents. Since the beginning of the West Valley Inspector's proactive restaurant inspection program there have been only a few restaurant violations, but it is clear that grease and oil are a threat to the cleanliness of the downtown area as well as to the nearby storm drains. The West Valley Inspector will continue to be proactive in this area. The City of Saratoga ordered more Pool and Spa brochures to display at the City Planner's counter and to give to new pool & spa owners. Residential awareness of pool discharge problems has shown good results. The West Valley Inspector will continue with these inspections and to provide educational brochures.

Illegal Dumping and Dumpster Problem Area

Adjacent to Saratoga Creek, there is a site that is prioritized for frequent drive-by inspections. It is fairly hidden by trees and other vegetation. After an initial inspection it was determined that periodic dumping was occurring from a parking lot which backs up to a steep, well-hidden, stretch of creek bank. Saratoga Police and City Code Enforcement responded by putting the site on watch and visiting each of the surrounding businesses with warning notices. Due to the types of trash found it is not believed that the businesses are responsible for the dumping. The dumpster area on the West Valley Inspector's watch contributes to the trash problem. This area was a special creek clean up site in FY 05-06.

		quantities of grease (approx. 20 in Saratoga).	06-07, fourteen (14) restaurants were inspected pro-actively. All fourteen inspections revealed clean sites, free of urban runoff violations. No violations were noted by DEH for food facilities in Saratoga.	
	Restaurant Inspection Program – Continuous Improvem't item	d. Support West Valley Sanitation District's Fats, Oils and Grease Program Expand scope of restaurant inspections to focus on grease trap maintenance. During pro-active visits, the WVCWP Inspector will look at grease trap cleaning records. Any food facility without records will be referred to the West Valley Sanitation District for follow up.	WVCWP manager and Inspectors met with DEH representatives to re-emphasize the importance of tracking grease maintenance records. WVCWP Inspector continued to alert restaurants about regularly maintaining grease interceptors and the need for record keeping.	Inspections conducted by SCC Fire
	URMP	f. Joint Inspections of Ind/Comm Facilities Continue joint inspection program. Approximate number of facilities in Saratoga is 8. The inspection frequency goal for FY06-07 is 100%. The total number of facilities by business category inspected in FY06-07 will be included in the annual report.	In the City of Saratoga, eight (8) commercial / industrial facilities were inspected by the Fire Dept, meeting 100% of the inspection goal. Of the facilities inspected, the Fire Dept found one potential or actual violations.	Inspections conducted by SCC Fire
	URMP	g. Training & Evaluation Conduct annual joint meeting/training w/ SCC Fire to evaluate inspection reporting and confirm distribution of materials. Determine training topics, if needed, on the renegotiated West Valley Inspection Agreement dated June 2006.	The Fire Dept's annual facility inspection training pertaining to urban runoff requirements was provided to 183 inspectors from May 10 th through July 6th 2007. The Inspectors noted that they have plenty of handout materials; West Valley businesses have received all of the educational material during prior inspections. The Fire Dept's Sr Haz Mat Specialist, who provides training to inspectors met with the West Valley Clean Water Prog Mgr and WV Inspector on 4/5/07 to evaluate current	Annual Mtg w/ WVCWP & Sr. HazMat Specialist/ IND Inspectors

Industrial/Commercial Program Evaluation

Fire Dept Inspections of Industrial / Commercial Facilities:

Of the 8 facilities inspected by the Fire Dept one potential or actual violation was found. Since the number of violations was significantly low, the sites with previous violations noted as a result of enforcement response calls from the IC/ID report will be prioritized for inspections at the beginning of FY 07-08.

After a steady stream of improvements and more communication between Fire Dept and WVCWP staff, the inspection program is prepared for maximum efficiency for the West Valley Cities in FY07-08. When Saratoga was added to the Fire Dept Inspection Agreement for Campbell and Los Gatos (7/1/02) all West Valley facility inspections were coordinated under one umbrella. Monte Sereno does not conduct IND inspections because it has NO industrial or commercial facilities. Since 2001, WVCWP staff has met with Fire Dept staff at least twice a year to discuss standardized reporting, documentation and follow-up.

An ICID follow-up inspection was conducted at one of Saratoga's problem sites, Classic Car Wash. The secondary containment was broken but replaced. During FY 05-06 they installed a waste water capture system to take care of vehicle wash water flowing to the storm drain.

Industrial/Commercial Program Evaluation Continued

Annual Food Facility Inspection Training Meeting

On April 30, 2007, DEH representatives met with the WVCWP Manager and Inspector. The importance of reporting all potential West Valley stormwater violations to the West Valley inspector was re-emphasized. Other topics covered at this meeting were (1) Updated contact information (2) How to report urban runoff violations to municipal inspectors to ensure accurate tracking and follow up (3) Feedback on the effectiveness of outreach and educational handouts (4) Reminder to distribute pesticide reduction fact sheets called “Don’t Set a Table for Pests” to restaurants.

During FY 06-07 the West Valley Inspector continued a more aggressive effort to alert restaurants to the need for regular grease interceptor maintenance and record keeping. The WVCWP Inspector and the West Valley Sanitation District’s Director of Operations continue to have discussions regarding grease interceptor maintenance records and related issues. The Sanitation District is notified if the records are not available. At the April 30th meeting, the West Valley Inspector again suggested that Environmental Health Specialists look for grease trap maintenance records during their restaurant inspections.

PUBLIC AGENCY ACTIVITIES: Operation and Maintenance

FY 2006-2007 Work Plan Self Evaluation Matrix

Activity	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
Storm Drain Operations and Maintenance				
Annual Storm Drain Cleaning	2004 URMP	Annual Storm Drain Cleaning Continue contract w/ WVSD. Continue schedule/cycle for inspection and cleaning of storm drain system (two year cycle for residential & one year cycle for commercial/industrial); Public Works staff will clean high leaf drop and other noted areas more frequently and as needed.	West Valley Sanitation District (WVSD) performs systematic storm drain cleaning and inspection annually. Half the City's storm drains are cleaned and inspected each year. Approximately 2,182 structures were inspected and cleaned, as needed. Seventy-two percent were found to be clean. City crews assist contracted street sweeper by providing additional cleaning in high leaf drop areas and removal of storm debris from all inlets and grates as needed.	WVCWP coordinate with PW Admin Analyst and WVSD per contract; Pub Works Supt coord in-field operations
Training - Annual WVSD/ Oper. & Maint. Meeting	2004 URMP	Training - Annual WVSD/ Oper. & Maint. Meeting Annual WVSD / Operations & Maint. Supervisors meeting - evaluate status of annual storm drain cleaning and provide training on maintenance issues. Rural public works BMPs and SOPs may be reviewed as part of the annual WVCWP Street Maintenance Supervisors meeting.	The annual WV Storm Drain Op & Maint. Supervisor's workshop was held on June 20, 2006. Four (4) Saratoga staff attended, including both the Street Maint Spvsr and the Parks Maint Spvsr. Staff from WVSD, WVCWP, and all other WV Communities also participated. Topics included: • WVSD Storm Drain structure cleaning & debris findings for each city (will be used to help identify additional trash problem areas) • Review of Emergency Response Procedures for SD overflow • Street sweeping for water quality including capture of fine particulate matter • Power Point Presentation on S/D cleaning and maintenance requirements and existing practices Round table discussion on all topics	WVCWP and WVSD provided training; Streets Spvsr and PW staff attended

Saratoga

FY 2006-2007 ANNUAL REPORT

Activity	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
Storm Drain Stencils or Signage	C/I item -Source Control Measure	Storm Drain Stencils or Signage Continue to replace and/or upgrade storm drain stencils or signage on storm drains or catch basins, as needed. Stencils will be replaced with the type of stencil best suited for the location	Saratoga's storm drain signage is replaced if it becomes worn, or bent (if it is metal). The City primarily uses painted stencils. See evaluation at the end of this section.	Street Maint Supervisor
Trash Reduction	Trash Reduction Activities	Trash Reduction Public Works Maintenance Division will provide additional cleanup in trash problem spots discovered by staff or reported by the public.	During inspection and cleaning of storm drain structures, WVSD staff notes catch basins that require additional cleaning. The data will be helpful in locating trash problem areas by storm drain location.	WVSD, WVCWP and, PW Analyst provide evaluation results; Streets Supervisor coordinates in-field operations
Street Sweeping/ Pavement Management				
Street Sweeping Program	URMP	a. Street Sweeping Program By contract – residential and arterials are swept monthly. High leaf drop and other noted areas cleaned more frequently and as needed (i.e., construction zones - swept by responsible party).	The City has a contractor to conduct sweeping services. An Air Bear, vacuum type sweeper is used for areas that are conducive to picking up fine particulates and a broom type sweeper is used in other areas. All residents and businesses are required to utilize large recycling bins for leaves and other yard waste as part of their trash collection service. In Addition, city staff performs pro-active leaf pick up before and during storm season in high leaf drop areas. In FY06-07 crews collected 200 cubic yards of yard waste.	Street Maint Supervisor
Street Sweeping Data Collection	NPDES Permit	b. Street Sweeping Data Collection Collect and review street sweeping data and provide number of curb miles swept and cubic yards of debris to WVCWP for each Annual Report. Solicit feedback from Street Sweeping staff on effectiveness of the program.	Street Sweeping data was collected and provided to the SCVURPPP at the end of the fiscal year. See the three-year comparison table in the evaluation section (below), for curb miles swept, debris collected and yard waste recycled.	Street Maint Supervisor; Public Works Analyst WVCWP to coordinate

Saratoga

FY 2006-2007 ANNUAL REPORT

Activity	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
Training	FY06-07 Work Plan, RWQCB comments	c. Training As needed, provide training meetings on collection of street sweeping data to appropriate municipal staff.	Training for municipal staff on street sweeping data collection requirements and preferred sweeping methods, was provided at WVCWP's June 20, 2007, Storm Drain Operation and Maintenance workshop.	Street Maint Supervisor PW Analyst & WVCWP to assist
Corporation Yard				
SWPPP	URMP	a. SWPPP Review Sponsor a training meeting for Stormwater Reps and Public Works Maintenance staff to review and evaluate the municipal Storm Water Management Pollution Protection Plan (SWPPP).	On Jan 27, 2007, Saratoga's Public Works Analyst met with WV Reps to evaluate corporation yard BMPs and discuss potential revisions to the Cities' SWPPPs. Saratoga's SWPPP was revised in FY04-05. The City's current standard operating procedures and BMPs are working effectively.	Streets Maint Supervisor & WVCWP
Staff Training	URMP	b. Staff Training Provide annual training on BMPs in Storm Water Pollution Prevention Plan w/ Corp-Yard walk-thru	On April 12, 2007 Saratoga's street and park maintenance staff (18 employees) reviewed the City's SWPPP procedures and received training on best management practices (BMPs). A tour of the Corp Yard was conducted. Locations of several absorbent stations were pointed out.	Streets Maint Supervisor
Rural Public Works Activities				
Training	FY06-07 Work Plan	Appropriate staff will receive annual training on the use of current BMPs and SOPs, as noted in the performance standard. BMPs and SOPs may be reviewed as part of the annual WVCWP Street Maintenance Supervisors meeting.	No Rural Public Works construction took place this year. The model performance standard has been adopted. SOPs were updated as part of the Town's Urban Runoff Management Plan revision in 2004.	Public Works Maint Div. w/ City Engineer
Staff Training	Rural PW PS	Evaluate training materials to determine whether there is a need to obtain or develop additional educational tools (e.g. a video CD) for maintenance staff and for outreach to contractors.	WVCWP staff developed a short PowerPoint presentation consisting of Rural Public Works standards and BMPs for staff training. The presentation slides are sufficient at this time. The West Valley Cities have very few rural public works projects. If staff or municipal contractors begin to construct more of RPW projects, WVCWP staff will take photographs of the site and BMPs to use for training.	WVCWP

FY 2006-2007 ANNUAL REPORT

Street Sweeping Totals for FY04-05 through FY06-07		
Curb Miles Swept		
FY04-05	**FY05-06**	**FY06-07**
Residential **2,520 curb miles** swept **Commercial & Arterials** **780 curb miles** swept **Annual Combined Total** **3,300 curb miles swept**	Missing 1 month's data (July 2005) due to change in contractors **Residential** **2,310 curb miles** swept **Commercial & Arterials** **715 curb miles** swept **Annual Combined Total** **3,025 miles curb miles swept**	**Residential** **2,520 curb miles** **Commercial & Arterials** **780 curb miles** **Annual Combined Total** **3,300 miles curb miles**
Debris Collected		
FY04-05	**FY05-06**	**FY06-07**
Residential & Commercial & Arterials The residential & commercial cubic yards of debris were **not available** because it was not tracked separately in FY04-05. **Annual Combined Total** **705 cubic yards** of debris collected	Missing 1 month's data (July 2005) due to change in contractors **Residential** **521.5cubic yards** of debris collected **Commercial & Arterials** **108 cubic yards** of debris collected **Annual Combined Total** **629.5 cubic yards** of debris collected	**Residential** **615 cubic yards** **Commercial & Arterials** **160 cubic yards** **Annual Combined Total** **775 cubic yards**
Yard Waste Recycled		

FY04-05: An annual total of **10,939 tons** of yard waste was picked up by garbage collection service during FY 04-05.

FY05-06: An annual total of **10,771.5 tons** of yard waste was picked up by garbage collection service during FY 05-06.

FY06-07 Residents and businesses recycled 5,957.66 tons of yard waste using Waste Management garbage collection service from July '06 to the end of January '07. In March the West Valley Cities changed contractors; the total amount of yard waste recycled using West Valley Collection and Recycling from 3/1 to 6/30 2007 was reported as 3,924 tons for a combined **total of 9,881.66 tons.** City crews also picked up 200 cubic yards of leaves and tree debris.

Public Agency Activities: Operations and Maintenance Evaluation

Storm Drain Maintenance: In FY06-07, West Valley Sanitation District (WVSD) provided its second enhanced annual report to the cities on storm drain cleaning. Since June 2006 the reports have listed the structures that were inspected and cleaned with the maintenance crew's findings. Approximately 2,182 structures were inspected and cleaned, as needed. Of those, 1,566 or 72% did not have any debris and were noted as "clean". Only fifteen structures contained *significant* amounts of debris (over 50 lbs.). Only one of the structures that contained significant debris had the type of material removed categorized as leaves and paper. Nine structures were impacted by mud/dirt, three contained construction material and two had rock/stone debris. The WVSD inspection reports are generated from a database of numbered storm drain locations with the street names. It is possible to locate the street on a map and target specific audiences and specific locations for additional public outreach. The WVSD reports were distributed at the annual Storm Drain workshop on 6-20-07 and will be reviewed by WV cities as they determine future management actions for trash problem areas.

Storm Drain Stencils: Saratoga's storm drain signage is replaced if it becomes worn, or bent (if it is metal). The City primarily uses painted stencils because they are easy to apply, they can be installed on horizontal surfaces (unlike the thermoplastic stencils) and the savings in staff time and cost of stencils is substantial. The metal plates, previously installed by the WV communities, are no longer applied because they were problematic. The Streets Supervisor considers new methods and materials for storm drain signage as they are introduced to the market. He is willing to pilot new plaques or signage materials if they are deemed practicable based on his experience and the results of previous West Valley pilots. Santa Clara County staff asked the WVCs for a recommendation on where to purchase metal plaques similar to those previously installed by the West Valley Cities. West Valley reported that municipal staff have discontinued application of the metal plaques because the sharp edges have a potential to get caught in street sweepers and bend, creating a potential to injure pedestrians or bicyclists. Replacing the plaques was also a problem. When plaques came loose or were removed, concrete chunks crumbled from the curb with the screws (used for attaching the plaques) making replacement in the same spot impossible.

Street Sweeping: The City collected 775 cubic yards of debris in FY06-07, 145.5 cubic yards more than the amount of debris collected in FY05-06. In FY05-06 one month's worth of data was not tracked because the City changed contractors. FY06-07 miles swept are the same as the number of curb miles swept in FY04-05.

The Town of Los Gatos provided training to all the West Valley Cities by presenting their new Street Sweeper at a WVCWP workshop in June 2006. The Town's PW Superintendent answered questions from other municipal staff about cost and maintenance and gave a brief talk on why this model of sweeper was selected. The regenerative air sweeper is certified to pick up more, and generate fewer, small particles, which account for 5% to 7% of the material on the average street but contain over 60% of the pollutants targeted by EPA under the Clean Water Act. (Statistics were provided by Ranger Kidwell-Ross, speaker for World Sweeper.com at a street sweeping workshop held on 5-8-06 in San Jose).

Yard Waste - Curbside Collection and Recycling: The West Valley yard waste recycling program reduces the amount of debris that gets into the storm drain, since leaves are collected in oversized bins rather than being stored in the street. In FY06-07, the total yard waste collected was down sharply from the previous two years for all West Valley cities. The reason for the decrease is not apparent without reviewing the data collected for the previous years and the garbage collection companies' tracking methods. There are a few factors that would contribute to the drop. 1) The data for February 2007 was not reported for West Valley cities due to a change in service contractors; 2) There might be a significant difference in methods used by the two different contractors to collect data; 3) City crews provide some additional, unscheduled leaf and tree limb removal, which is not tracked. 4) The annual weather might be a consideration because yard waste collection is determined by the amount of debris residents generate from yard maintenance and tree trimming. Some years have stormier weather producing more fallout from trees and a greater need to dispose of branch material. The new garbage & recycling company will be asked about their methods of

tracking yard waste collection. The cities may request monthly totals to see if more consistent year-end totals can be obtained.

Training Evaluation: The WVCWP Storm Drain Maintenance Workshop (6/20/07) drew more staff participation this year. Municipal staff evaluated the workshop as having "good information that needs to be presented to City Council." Another response noted that "City law enforcement needs to attend the workshops". It was also suggested that San Jose Water Company attend our trainings since the water company crews have been noticed using improper storm drain protection methods when working on their pipelines. Attendees wanted to know "how to educate the public to get them on our side?" It was evident that BMPs are being used by municipal staff but there was some frustration among street and park maintenance workers because they don't have enough authority to convince residents and private contractors to keep pollutants from reaching the storm drain system. The WVCWP Inspector offered his card to all attendees and requested that they report any incidents to him for immediate follow-up. One challenge is to catch the violator in the act of allowing pollutants into the storm drain system. By the time the incident, or the result of the incident, is seen it is often too late to stop it. The maintenance crews are generally called to clean up spills. Attendees requested continued updates on the MRP requirements for storm drain maintenance and street sweeping practices. Several of the attendees stayed after the workshop for additional discussion among the cities.

Corporation Yard SWPPPs: The City of Saratoga along with the other West Valley communities held a round-table review and discussion of West Valley municipal SWPPPs on Jan 27, 2007. The corporation yard SWPPP and standard operating procedures (SOPs) were evaluated to determine if revisions or additions to the manuals were needed. Saratoga, having recently updated its SWPPP, was only required to update The City's responsible party contact information for staff whose job titles had changed.

Rural Public Works: Stormwater BMPs are currently discussed in pre-construction meetings with contractors; the City inspects all contracted rural public works in its jurisdiction and ensures the use of stormwater quality and erosion control BMPs. No capital improvement projects involving Rural Public Works were conducted this year. When future construction of Rural Public Works takes place, measures will be implemented for erosion prevention.

FY 2006-2007 Work Plan Self Evaluation Matrix

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
Planning Procedures				
	Provision C.3	Participate in Provision C.3 Oversight Ad Hoc Task Group (C3PO AHTG) to stay updated on current issues, respond to Program or RWQCB requests, and exchange questions, ideas or experiences, related to C.3 implementation with other Co-permittees.	WVCWP Manager participated in the C3PO AHTG meetings to present summarized information at West Valley monthly meetings and encourage feedback, as appropriate, from West Valley Co-permittee's.	City Eng, WVCWP Mgr
	New Municipal Regional Permit	Provide input as requested, to help determine the requirements for the new Municipal Regional Permit.	On Dec, 19, 2006, Saratoga's Pub W Analyst, the City Engineer and the City Attorney's designated NPDES compliance specialist, attended an MRP West Valley meeting where a round table discussion was held with municipal decision makers and Water Board staff to address the challenges of the upcoming MRP requirements and explore revisions that would make the requirements feasible for implementation.	City Eng, Pub Works Analyst, & WVCWP Mgr
C.3.c. Requirements for Group 1 and Group 2 Projects				
Group 2 Projects	C.3.c.	As needed, revise guidance documents, website, procedures, and/or conditions of approval to incorporate Group 2b project requirements for August 2006 implementation.	C.3 guidance for all WV cities was revised and posted prior to 8/15/06 to include Group 2b projects.	City Eng, PW Analyst, & WVCWP Mgr

Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2006-2007 ANNUAL REPORT

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
Training	C.3.c.	Provide training to staff or attend Program workshops on Provision C.3 requirements.	Saratoga PW Analyst, the City Engineer and a building inspector attended SCVURPPP's C.3 workshop on June 14, 2007. Public Works Staff also attended monthly West Valley training meetings on 8-1-06, 2-27-07, 11-28-07 and 12-19-07. Implementation of current and proposed C.3 requirements were reviewed and discussed	City Eng, PW Analyst, & WVCWP Mgr
C.3.e Operation and Maintenance of Treatment BMPs				
BMP Inspection Program O&M Verification	Permit C.3.e.iii	Report on O&M verification program in each annual report. Note organizational responsibility, evaluation of effectiveness, and planned improvements. Include a list or summary of treatment BMPs inspected during the year, inspection results, and any required follow-up and correction.	The City has not had any Group 1 or Group 2 projects to inspect. However, Saratoga has implemented standard operating procedures for ongoing BMP O&M inspections. The procedures are documented in the City's URMP and were attached to the City's previous annual report. In FY06-07 Saratoga created forms for the project applicant to complete and municipal planners or the City Engineer to verify. The *Stormwater Treatment Measure Details* form includes a check box to indicate that the applicant has prepared, signed and recorded the necessary covenant for ongoing maintenance and operation of stormwater treatment measures. The check box also conveys that the applicant has ensured that responsible public agency staff will have access to inspect the structured stormwater measures in perpetuity.	Public Works Analyst and City Engineer
Training	Work Plan	<u>Training & Evaluation</u> Continue to provide training to inspectors and data managers on O&M verification program. Discuss evaluation of effectiveness and planned improvement to the program	On March 5, 2007, the WVCWP Manager and Stormwater Discharge Inspector attended SCVURPPP's BMP O&M meeting to review the co-permittee's use of standardized inspection forms and the collection of required information for the database. County Vector Control staff was present to discuss how agencies would provide immediate information on types and locations of built treatment measures so that Vector Control would be able to document and inspect potential problem areas to prevent the spread of	City Eng, Pub Works Inspectors, PW Analyst, WVCWP Mgr

			West Nile Virus. Saratoga PW Analyst, the City Engineer and a building inspector attended SCVURPPP's June 14, 2007 workshop which included training on conducting BMP O&M Inspections. Detailed aspects of the verification program were reviewed at WV's monthly meetings (8-1-06 & 3-27-07).	
C.3.f Hydromodification Management Plan				
HMP – Hydrograph Modification Mngmt Plan	Permit Prov. C.3.f	Continue implementing the HMP as part of requirements for qualified Group 1 projects that may cause increased erosion or other related impacts.	Saratoga implemented the HMP for Group 1 projects on Oct 20, 2005. In FY06-07 Saratoga's PW Analyst and the City Attorney's NPDES Specialist produced development worksheets for Planning, Engineering staff to review with private developers. The worksheets include the criteria for HMP requirements and the specifics for HMP implementation.	City Engineer
Training		Provide incremental training on HMP requirements to City staff via SCVURPPP workshops and/or in-house staff training.	To stay informed of the most recent HMP developments, the City Engineer attends SCVURPPP HMP trainings and the WVCWP Mgr participates in the C3PO AHTG meetings. Proposed revisions to the HMP were reviewed during the West Valley Communities' round table discussions regarding the administrative drafts of the MRP in November '06 and in June '07.	SCVURPPP/ City Eng / WVCWP to coordinate
Reporting	C.3.f.viii	Provide development and implementation status and a summary of projects incorporating HMP measures to WVCWP staff for Annual Report.	City of Saratoga did not have any projects which meet the criteria for required HMP implementation during FY06-07.	City Engineer
C.3.g Waiver and Compensatory Mitigation Program				
Waiver Program or Alternate Compliance	Permit C.3.g.	Provide information on any projects allowed to implement alternative compliance measures during FY06-07.	All Group 1 and Group 2 projects are required to implement C3 requirements. Currently, the City does not offer an alternate compliance option to developers.	City Engineer

Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2006-2007 ANNUAL REPORT

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
C.3.h Alternate Certification				
Alternate Certification reporting	Permit C.3.h	List the projects certified by someone other than municipal staff and mechanism for ensuring that outside certifiers are qualified in the Annual Report.	The project applicant is responsible for having all stormwater measures certified for adequacy, according to the C.3 requirements. The City uses lists approved by the City of Sunnyvale and BASMAA to determine which civil engineers are qualified and allowed to certify C.3 compliance for private development projects. Saratoga did not approve any Group 1 or Group 2 projects for construction or grading in FY06-07.	City Engineer
C.3.j Site Design Measures Guidance and Standards for Development				
Site Design Measures Guidance and Standards	(Permit C.3.j.)	Summarize the status of revision and implementation of site design standards and guidance related to watershed protection. Provide Summary to WVCWP for Annual Report	The City Council adopted the Guidelines and Standards developed by the Santa Clara Valley Water Resources Protection Collaborative on May 2, 2007. To ensure consistent implementation of optimum site designs by developers, Saratoga created a new Data Form to track all projects, and new Development Worksheets for Planning and Engineering staff to review with project applicants. The worksheets include a checklist of requirements and suggested site design, source control and pesticide reduction measures. In addition, the City obtained *Track It* software from the SCV Water District which provides planners and engineers with a flag on all parcels that are adjacent to creeks. The City continues to provide the developer/design team with technical guidance, relying often on the use of BMPs from the *Start at the Source* manual. Swales with sub-drains are required on projects, wherever feasible. The current zoning regulations require a minimum setback of 50 ft from the top of a protected creek bank. Applicants are referred to the Santa Clara Water District to have District staff review development projects where creek	Plans Examiner, Comm Dev Dir, Sr. Planner & PW Analyst

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
			setbacks are less than 50ft.	
C.3.k Source Control Measures				
Source Control Measures	Permit C.3.k.	Incorporate stormwater pollutant source control measures on all development projects.	Source control measures are encouraged and required, where appropriate, on all permitted development projects. The City's new worksheet provides examples of source control measures and documentation of implementation.	Plans Examiner, City Engineer
C.3.l General Plan Update				
General Plan	Permit C.3.l	Revise General Plan, at next planned update, to reflect principles and policies needed to address C.3 requirements.	During FY06-07 the City completed approximately 18 months of research to prepare for updates to the City's General Plan. The City dedicated significant staff resources to include language in the General Plan that will clarify goals and guidance to attain water quality benefits as part of the development project approval process. Saratoga's General Plan was approved on June 6, 2007. An Excerpt from the General Plan is attached at the end of this section.	Public Works Analyst Community Dev. Dir. City Attorney Public Works Dir. WVCWP Mgr.
C.3.n Reporting Requirements				
C3 Project Reporting	Permit C.3.n.i. (C.3.c.)	Report on Group 1 and Group 2 projects that received final approval for construction during FY06-07. List project name, location, project type, size, and sq. footage of impervious surface area.	No projects in the Group 1 or 2 categories were approved or submitted this year.	City Eng & PW Analyst provide data to WVCWP staff
C3 Project Reporting	Permit C.3.n.ii.	For Group 1 and Group 2 projects, report type of treatment BMPs used, numeric sizing criteria used, O&M inspections, and any follow-up actions. Note site design measures used, and source control measures required.	No projects in the Group 1 or 2 categories were approved or submitted this year.	City Eng & PW Analyst provide data to WVCWP staff
Reporting - Pesticide	NPDES Permit Provision	For Group 1 and Group 2 projects, describe the types of pesticide reduction measures	As part of the Group 1 and Group 2 project approval process, a Planner informs applicants that the City is	City Eng & PW Analyst provide data to WVCWP

Reduction Measures	C.3.n.iii	required. Give the percentage of new development and significant redevelopment projects for which pesticide reduction measures were required.	implementing a "Pesticide Management Plan." Applicants must review and comply with BMPs contained in the informational document *Landscape Maintenance Techniques for Pest Reduction*, provided to them and reviewed as part of a check-off list within the City's new *Development Worksheet*. As a condition of approval, applicants must not allow fertilizers or pesticides to be washed to the storm drains or to be buried in soil during construction. Applicants must reuse, recycle or properly dispose of these products as hazardous waste. Saratoga's General Plan, approved 6-6-07, states that the use of native draught-tolerant vegetation will be a condition of approval for projects that include prospective landscaping, whenever feasible.	staff

Planning Procedures Evaluation

Public Works staff continue to coordinate very closely with the Community Development Department to ensure that all development projects are conditioned properly for storm water quality requirements. In addition, Public Works staff assists developers and their design team members with C.3 technical and legal issues (specifically bio-swale design and the BMP O&M agreement). For projects requiring bio-swales, the Associate Engineer provides the developer with design drawings. The City has received positive feedback from developers, who appreciate knowing exactly what the City wants and seeing detailed examples.

Public Works and Building staff made the decision to use City Engineering staff, instead of an outside consultant, to perform BMP O&M Verification inspections (to date, none have been needed).

Group 1 and Group 2 Projects - The City of Saratoga requires developers to design and implement the following measures to reduce stormwater pollution to the maximum extent practicable.

a. Site design shall include measures to minimize impervious land coverage, maximize infiltration (where appropriate and designed to protect groundwater quality), and provide detention or retention as part of landscaping where feasible;

b. Source controls shall be required to limit pollution generation, discharge, and runoff as appropriate, including measures to discourage pesticide use;

c. Stormwater treatment measures shall be designed in accordance with the numeric design criteria in Provision C.3.d;

d. Continued operation and maintenance of BMP treatments shall be ensured by the developer and future property owners by legal covenant and continued O&M of BMP treatments shall be inspected by Saratoga Engineering staff.

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party

e. Increases in peak runoff flow and volume shall be managed for appropriate projects by implementing the guidance in the Program's Hydromodification Management Plan (HMP) for the specific stream receiving the discharge~~.~~

Pesticide Reduction

1. Where feasible, landscaping shall be designed and operated to treat storm water runoff by incorporating elements that collect, detain and infiltrate runoff. In areas that provide detention of water, plants that are tolerant of saturated soil conditions and prolong exposure to water shall be specified.
2. Pest resistant landscaping plants shall be considered for use throughout the landscaped area, especially along any "hardscaped" area.
3. Plant materials selected shall be appropriate to site specific characteristics such as soil type, topography, climate, amount and timing of sunlight, prevailing winds, rainfall, air movement, patterns of land use, ecological consistency and plant interactions to ensure successful establishment.
4. Existing native trees, shrubs, and ground cover shall be retained and incorporated into the landscape plan to the maximum extent possible.
5. Proper maintenance of landscaping, with minimal pesticide use, shall be the responsibility of the property owner.

Scenic Open Space Resources

Goal OSC 6: Preserve the hillside lands in their natural condition and inherent natural beauty.

Policy OSC 6.1: Through the Land Use Element and Zoning Ordinance, designate lands in the hillier portions of the Saratoga Planning Area for open space- managed resource production, which allows very low-density residential uses while maintaining a significant amount of open space.

Policy OSC 6.2: Public use and enjoyment of the unincorporated hillside areas for recreational purposes shall be encouraged through direct or indirect public land acquisition, encouraging both private and public recreational uses. Appropriate regulation of privately held lands to obtain maximum use of open space resources, such as the establishment of trail and open space easements, should be consistent with conservation of the natural environment.

Policy OSC 6.3: Future land uses within the western hillside or any Sphere of Influence expansion area shall be reviewed by the City through the development review process to ensure consistency both with existing patterns of land use in the unincorporated hillside areas, and with the City's desire to maintain the area as predominantly open space and rural.

Implementation:

OSC.6.a. The City shall continue to use the design review and subdivision entitlement process to ensure that all development proposals are designed in a manner that meets goals and policies for preservation of hillsides.

Responsible Agency: Community Development/Planning Commission
Funding Source: Development Fees
Time Frame: Ongoing
Related Policies: 6.1, 6.2, 6.3

Goal OSC 7: Preserve and protect existing view sheds, view corridors, and scenic open spaces.

Policy OSC 7.1: Future land use proposals within the western hillside area shall be reviewed by the City through the development review and environmental review processes to ensure that improvements blend in with the natural environment. Criteria shall include but not be limited to the use of unobtrusive colors, controlled grading, limited disruption of natural vegetation, use of structural height limits, and structural design and density guidelines. Special consideration should be given to the eventual development of a canopy effect of tree growth.

Implementation:

OSC.7.a. The City shall continue to use the design review and environmental review process to ensure that development proposals in the hillsides are compatible with the natural environment.

Responsible Agency: Community Development/Planning Commission
Funding Source: Development Fees
Time Frame: Ongoing
Related Policies: 7.1

Agricultural Resources

Goal OSC 8: Encourage preservation of land uses for open space and agriculture.

Policy OSC 8.1: In evaluating future land uses, efforts shall be made to maintain agricultural lands as a component of open space and to preserve the rural and agricultural heritage of Saratoga. The City shall discourage the cancellation of Williamson Act contracts.

Policy OSC 8.2: Encourage land owners to enter into new Williamson Act Contracts.

Implementation:

OSC.8.a. The City shall continue to apply the Agricultural Preserve Open Space Overlay District on lands that are under Williamson Act Contracts and generally discourage the removal of this classification.

Responsible Agency: Community Development Dept/Planning Commission
Funding Source: N/A
Time Frame: Ongoing
Related Policies: OSC 8.1

OSC.8.b. The City shall inform its property owners through its Website and information handouts of the property tax reduction benefits of placing lands under Williamson Act contract for preservation of agriculture and open space lands.

Responsible Agency: Community Development Dept/Planning Commission
Funding Source: N/A
Time Frame: Ongoing
Related Policies: OSC 8.2

Watershed Protection and Water Quality

Goal OSC 9: Protect existing watercourses in the community and enhance water quality in surface and subsurface water sources.

Policy OSC 9.1: Retain surface watercourses in their natural condition to the greatest extent possible.

Policy OSC 9.2: Concentrate development in those portions of the community least susceptible to soil erosion and minimize grading and the introduction of impervious surfaces. Where appropriate, consider the use of on-site detention or retention basins to minimize stormwater runoff from sites.

Policy OSC 9.3: Implement land use controls to protect watershed lands on the upper elevations of hillsides.

Implementation:

OSC.9.a. The City shall coordinate review of development projects adjacent to watercourses with the Santa Clara Valley Water District and other applicable agencies.

Responsible Agency: Community Development Department/Planning Commission
Funding Source: Development Fees
Time Frame: Ongoing
Related Policies: OSC 9.1

OSC.9.b. The City shall ensure erosion control measures are required with each development project as part of the development approval process.

Responsible Agency: Community Development Department/Planning Commission
Funding Source: Development Fees
Time Frame: Ongoing
Related Policies: OSC 9.1, 9.2, 9.3

OSC.9.c. Amend the Zoning Ordinance and standard conditions of approval to require that all new developments are in compliance with stormwater pollution prevention best management practices.

Responsible Agency: Community Development Department
Funding Source: General Fund
Time Frame: FY 2008-2009
Related Policies: OSC 9.1 - 9.3

Water Supply

Goal OSC 10: Maximize efficiencies in the use of the City's water supply.

Policy OSC 10.1: Implement water conservation provisions of the San Jose Water

Company's Urban Water Management Plan.

OSC.10.a. The City shall inform applicants of water conservation provisions and require that all new development proposals be in compliance with the water conservation provisions of the San Jose Urban Water Management Plan.

Responsible Agency: Community Development Department/Planning Commission
Funding Source: Development Fees
Time Frame: Ongoing
Related Policies: OSC 10.1

OSC.10.b. The City shall require as part of the conditions of development approval that native drought-tolerant vegetation be used in proposed landscaping, whenever feasible.

Responsible Agency: Community Development Department/Planning Commission
Funding Source: Development Fees
Time Frame: Ongoing
Related Policies: OSC 10.1

Biological Resources

Goal OSC 11: Protect and enhance sensitive vegetative and wildlife habitat in the Saratoga Planning area.

Policy OSC 11.1: Minimize development that would encroach into important wildlife habitats, limit or restrict normal range areas, or restrict access to water food or shelter. This includes limitations on the installation of barrier fencing in hillside areas.

Policy OSC 11.2: Through the development and CEQA process, preserve, protect, and maintain riparian habitats and creek corridors. This includes requiring biological surveys of parcels of land that could contain sensitive species or their habitats prior to allowing development on these parcels.

Policy OSC 11.3: The design of parking lots shall be evaluated for opportunities to reduce large continuous expanses of asphalt and to promote the establishment of visually interesting and aesthetically pleasing parking lots.

Policy OSC 11.4: The City should provide information and assistance to the public in the preservation and care of native trees whose existence can be threatened by environmental stress and development.

Policy OSC 11.5: Mature vegetation shall be preserved wherever possible.

Implementation:

OSC.11.a. The City shall continue to utilize the design review and environmental review process for all development applications to ensure that projects are designed in a manner that minimizes disruption to important wildlife, riparian and plant habitats.

Responsible Agency: Community Development Department/Planning Commission
Funding Source: Development Fees
Time Frame: Ongoing
Related Policies: OSC 11.1, 11.2, 11.5

OSC.11.b. The City shall continue to require that all projects conform to the City's Tree Ordinance.

Responsible Agency: Community Development Department/Planning Commission
Funding Source: Development Fees
Time Frame: Ongoing
Related Policies: OSC 11.3, 11.4, 11.5

Arbor Resources

Goal OSC 12: Support appropriate management for sustaining the health and increasing the extent of arbor resources in the City. The specific vision is to increase overall tree cover,

tree health and consequent tree benefits in an equitable, cost beneficial and sustainable manner.

Policy OSC 12.1: Development projects should include the preservation of protected trees and other significant trees. Any adverse affect on the health and longevity of native oak trees, protected or other significant trees should be avoided through appropriate design measures and construction practices. When tree preservation is not feasible, individual development projects shall include appropriate tree replacement as approved by the City.

Policy OSC 12.2: Trees used for new or replacement plantings should be selected primarily for low water use characteristics.

Policy OSC 12.3: To further protect and enhance the City's arbor resources built on the City's Tree Regulations, the City should continue its support of tree protection programs.

Policy OSC 12.4: It is the City's policy that forested lands in the City's Sphere of Influence shall be managed to maximize environmental protection and to discourage logging to the maximum extent possible, consistent with proper fire protection standards and practices.

Implementation:

OSC.12: The City shall continue to require that all development projects conform to the City's Tree Ordinance. The preservation of existing trees shall be ensured through the collection of security deposits.

Responsible Agency: Community Development Department/Planning Commission
Funding Source: Development Fees
Time Frame: Ongoing
Related Policies: OSC 12.1, 2.2

Goal OSC 13: The preservation of native and other plant species indicative of Saratoga's cultural heritage shall be given priority over development and provide for the perpetuation of such species.

Policy OSC 13.1: To further preserve the City's inventory of arbor resources, the City should encourage owners to consider formal designation of heritage trees.

Policy OSC 13.2: The City shall encourage public knowledge, understanding and appreciation of the City's past and foster civic and neighborhood pride and sense of identity based upon the recognition and use of the City's heritage resources, particularly as it relates to the designation and preservation of heritage trees. This can be done by publicizing information about heritage trees and the benefits of designation of heritage trees on the City's Website.

Policy OSC 13.3: Fire safety shall be an important consideration when evaluating the preservation of native vegetation.

Implementation:

OSC.13.a. Continue to utilize the design review process, Historic Preservation Ordinance and Tree Ordinance to ensure preservation of significant arbor resources.

Responsible Agency: Community Development Department/Heritage Preservation Commission /Planning Commission
Funding Source: Development Fees
Time Frame: Ongoing
Related Policies: OSC.13.1,13.2,13.3

Cultural Resources

Goal OSC 14*:* Through coordination with and implementation of other related General Plan

CONSTRUCTION INSPECTIONS

FY 2006-2007 Work Plan Self Evaluation Matrix

Source	WP Task	Work Plan Tasks	Accomplishments	Responsible Party
	URMP	Staff Training Participate in and support RWQCB and Program sponsored workshops on erosion control and construction BMPs; support distribution of related materials.	On 12-5-2006 the WVCWP Stormwater Discharge Inspector and Manager attended the attended the SCVURPPP's Construction Site Management and Erosion Control Workshop.	WVCWP to coordinate w/ SCVURPPP & Municipal Construction Inspectors
	URMP	Construction Inspections Continue construction site inspections for stormwater issues (i.e., dirt tracking, mat'l storage, housekeeping, erosion control, etc.).	During FY 06-07, Saratoga's Building Department issued over 1500 permits for various construction activity. City Building Inspectors attempt to ensure that all construction projects are compliant with the BMPs and guidelines specified in the City's Construction Inspection Performance Standard. Of those 1500 construction permits, roughly 280 required close monitoring by City Inspectors. These included 19 stand alone grading projects, 28 new single family dwellings and 127 significant additions to single family dwelling. That number (280) also includes swimming pools, various demolitions, basement additions and other significant remodeling/renovations to structures in Saratoga. It should be noted that Saratoga Inspectors also pay close attention to projects that don't require City approved Permits such as landscaping projects and driveway installations. Projects that were problematic received daily drive-by spot checks by City inspectors. Projects that were clearly well controlled were inspected at least every 2 weeks during the rainy season. See attached spreadsheet.	Pub Works Building Official & Const/Eng Inspectors WV Inspector by referral

FY 2006-2007 ANNUAL REPORT

Construction Inspection Evaluation

Construction Site evaluation:

FY 05-06		FY 06-07	
Allowable Discharge – listed as Complaint Not Found	0	Accidental Spills	0
Grey Water Discharge	1	Allowable Discharge	0
Complaint not found (Citizen reported - Looks okay to inspector)	1	Grey Water Discharge	1
Misc. Incident (Site a mess – resolved - cleaned up per inspection)	1	Pools & Spas Discharge	1
	3	Slurry Discharge	1
			3

The Construction Inspection Program is working phenomenally well due to coordinated efforts between the City's building inspectors and the WVCWP Inspector and Manager. Potential incidents reported by other agency staff or citizens, are inspected and re-inspected until resolution is achieved. This year the WVCWP Inspector responded to five (5) construction-related incident calls for Saratoga. One call was due to an accident and was dealt with appropriately by the property owner. One call turned out to be an allowable discharge. Three separate actual incidents involved grey water, pool construction, and slurry discharges. The number of incidents is the about the same as for previous years: four (4) in FY04-05, three (3) in FY05-06 and three (3) illegal incidents in FY06-07. Generally the most common incident in Saratoga is not related to construction, but to pool drainage. However, the City made a concentrated effort in FY05-06 to distribute pool brochures to all new owners in addition to the mail-out to all pool owners in FY04-05. The pool brochure is also on display at the City's planning counter. The City's efforts appear to have made a difference. Saratoga's only pool incident in FY06-07 did not have anything to do with pool draining. Saratoga's inspectors are always on the lookout for stormwater concerns. They continue to educate the contractors and visit the sites often. Public Outreach to residents and educational visits from the WVCWP Inspector will help to maintain a limited number of contractor violations.

Construction Site & Erosion Control Training – On June 27, 2007, a construction inspection training meeting was held for Saratoga inspectors. This meeting was planned for fall of 2006 but was postponed until Saratoga hired a new building inspector in April 2007. The Construction Inspection Training Table is attached to this section During FY06-07 the WVCWP Mgr made it a priority to provide additional training on construction inspection requirements and to encourage self evaluations of municipal inspection programs. Several WV meetings and municipal training sessions were held to discuss BMPs, URMP requirements and documentation of inspection activities. Early in FY06-07 it was determined that inspectors would benefit from a review of documentation requirements. Continued public outreach efforts and further training and communication among municipal inspection staff and WVCWP staff have served to develop a coordinated and effective construction inspection program in Saratoga.

Additional Efforts by Saratoga Staff in implementation of Construction Inspection Standards:
In FY06-07 Saratoga's Stormwater Rep forwarded an email to The City's Building Official and construction inspectors about a best management

practice to prevent dirt tracking called Dura Deck panels. The Building Official and inspectors are often asked by developers about new tools to help keep a site buttoned up and in compliance. Saratoga's inspectors asked the developer of a single family home on a large hillside property if he was interested in trying the Dura Deck panels. The inspectors were hopeful that the panels would ensure the prevention of dirt tracking. The panels, after some adjustments to how they were set up, were successful. WVCWP staff went to visit the site and take photos of the Dura Deck panels. The site turned out to be a model of well chosen BMPs matched with perfect implementation and set up. WVCWP Manager used the photos in PowerPoint presentations for training municipal inspectors on stormwater issues and in school presentations to show students how construction sites should look if they are to protect water quality. Saratoga inspectors were asked if all of their sites developers were this responsible. They said that most of the developers in the City were aware of Saratoga's scrutiny of permitted sites and most were anxious to comply with all regulations. The Public Works Analyst did write a letter of commendation to the developer of the site that had pilot-tested the Dura Deck panels to thank the company for exceptional compliance with City's requirements and their willingness to try new products to help protect water quality. The letter went to Mehus Construction about the job site on Sunset Drive in Saratoga.

The City would like to update the plan sheet, *Blueprint for a Clean Bay.* With the new State General Permit expected in 2007, the update of *Blueprint for a Clean Bay* will be considered for FY07-08, but will be contingent upon the amount of staff time needed for review and implementation of the new MRP.

A. SCV PROGRAM - PROJECTS/SUPPORT				
	NPDES Permit, Provision C.4,	Watershed Education and Outreach Campaign Help to develop/implement the 2nd multi-year watershed education and outreach campaign. Participate in campaign development and special projects, e.g. community events. Campaign will include funding for educational programs at the Alviso Ed Center and funding for ZunZun performances in local schools.	WVCW Pgm Mgr assists via participation in the Watershed Education and Outreach Ad Hoc Task Group. WVC helped plan and implement the Watershed Watch campaign aimed at IPM and Mercury Pollution Prevention. These topics were chosen based on feedback from the March 2006 Focus Group. *Watershed Watch Media Campaign* The FY06-07 campaign featured ongoing IPM and Mercury ads in community newspapers. The WV communities, (along with 3 other cities and the County Integrated Waste Mgmt Division) contributed additional funds (totaling $17,535 in all) toward media buys. WVCWP regularly provide staff support for Program outreach events: *Pumpkins in the Park Event on Saturday October 14,2006* 2 WVCWP staff members worked the Watershed Watch booth at the Pumpkins in the Park event. This event was held on Oct 14 at Discovery Meadow in front of the Children's Discovery Museum. Guadalupe River Parks and Garden (GRPG) volunteers helped oversee the stormwater bean bag game which gives children an opportunity to choose appropriate methods for disposing	WVCWP staff

			commonly-generated waste. WVCWP staff spoke with residents and gave them recycled money pencils engraved with the WVCWP website address. *Home and Garden Show on Sunday 4/29/2007.* 3 WVCWP staff members worked two shifts at the San Jose Convention Center. In addition to distributing informational materials, WVCWP staff handed out gutter getters, *What You Don't Know About Mercury* brochures from HHW, "The Original Earth-Friendly Pest Control" flyswatters, pencils engraved with Household Hazardous Waste website and phone number and mercury-free thermometers, among other give-away-products. WVCWP spoke with at least **211** people. Attendees showed interest in less-toxic gardening methods. Some people were interested in controlling specific pest infestations. Other topics included safe fluorescent bulb disposal, and safe paint and pesticide disposal.	
	NPDES Permit, Provision C.4, C.9 & Pest Mgt Plan (PMP)	Pesticide User Outreach Project Continue to provide funding and to participate in Our Water Our World IPM Store Partnership. Project scope will include items in Program's Pesticide Management Plan based on provision c.9.d of the Permit for outreach to residents, commercial businesses, and pest control operators.	The WV Clean Water Program Manager participated in the SCVURPPP IPM Ad Hoc Task Group and provided staff for all of the Program's public outreach events. WVCWP also provided additional funding for the local IPM media campaign. The FY 06-07 WW Campaign adopted a top-of-mind-awareness or frequency-based approach to media, running ongoing consistent IPM ads in community newspapers *Summerwinds Garden Center* Campbell, March 19, 2007 WVCWP staff met with Summerwinds staff and provided **200 Grow it Guides** for distribution to Garden Center	WVCWP staff

			customers. *Summerwinds Garden Center* Campbell has "Less Toxic Products" displays WVCWP staff have met annually with staff at this store for a number of years, and have attended the Summerwinds' Our Water Our World (OWOW) Partnership training. *IPM Store Partnership **Training** - Summerwinds (Campbell store) June 5, 2007* The WV Communities provide funding for this training through SCVURPPP. For Summerwinds Campbell, appx. 8 store employees attended the June 5th training. Staff also attended the Summerwinds-California kick-off event, with IPM training, on Feb. 6, 2007	
	NPDES Permit, Provision C.9.c.	Mercury Pollution Prevention Outreach Participate in the Program's Mercury Pollution Prevention Outreach Work Group and conduct local implementation of the Program's Mercury Pollution Prevention Plan including public education on: 1) negative health and environmental impacts of mercury, and 2) proper disposal of products containing mercury.	The FY 06-07 Campaign adopted a top-of-mind-awareness or frequency-based approach to media, running ongoing consistent **Mercury ads** in community newspapers. WVCWP provided additional media campaign funding. See Task a. (above). *Mercury Thermometer Exchange Event_4/28/2007* Held in conjunction with the WVC E-Waste Recycling Event. WVCWP purchased **200 digital solar thermometers** to provide WV residents with **mercury-free, battery-free** thermometers. This also served as a means to publicize the goal of using mercury-free products in general. *City of Campbell Thermometer Exchange May 19, 2007* Held annually in conjunction with the City's Community Clean Up Day. Three thermometers were brought in to be	WVCWP Staff in partnership with SCC HHW Campbell PW sponsored Campbell's Thermometer Exchange

			exchanged at the 06-07event.	
	WVCWP Public Service Event	*Public Outreach Event*	***Free** E-Waste Recycling Event April 28,2007* Recycling of TVs, monitors and all office electronics. The event was sponsored by the four West Valley Cities through the *Clean Water Program*. It was held at the City of Saratoga's North Campus, on Prospect Road in Saratoga. The event was for West Valley businesses, residents and schools. However, it was open to the general public (CA residents). A Banner and Flyers were created. WV staff **distributed 123 flyers** for posting at 67 businesses from April 10th to the 24th. **270 E-Waste Event flyers** were taken home by private-school students in Saratoga, where WVCWP staff gave two classroom presentations. The event was also advertised via notices on municipal web sites. **170 cars** brought E-waste for recycling. Staff greeted drivers and surveyed them on behaviors associated with improper E-waste disposal. Give-away-items were provided to encourage participants to use convenient drop-off locations at partnering hardware and home improvement stores.	WVCWP Staff coordinated with municipal staff

Public Information/Participation Program EVALUATION - *SCV Program Projects/Support*

Pesticide User Outreach - STORE PARTNERSHIP:

Managers of Summerwinds Garden Center in Campbell have shown their interest in less toxic products. In fall of 2006 Summerwinds' store management chose to participate in the IPM store partnership displays being introduced at two other gardening stores. A consultant representing SCVURPPP's Watershed Watch and OWOW campaigns worked with the Campbell store to increase shelf space and display exposure for the promotion of less-toxic products. Sales of less-toxic

West Valley Communities

products rose by a noticeable percentage in FY06-07 (exact figures are not given, as the store does not wish this information to be publicized).

Mercury Pollution Prevention Outreach – THERMOMETER EXCHANGE:

This regional thermometer event was organized by the Bay Area Pollution Prevention Group (BAPPG). The "Spring Thermometer Exchange" program was advertised on www.baywise.org . Twenty Bay Area agencies were supported with clear guidance and an extensive advertising campaign, including ads in the San Jose Mercury News and the San Francisco Chronicle. The WVCWP Manager previously considered holding an event but rejected the idea because of concerns that it might not be feasible with the limited staff resources for West Valley public outreach events. The Manager heard about the BAPPG event a little late, through discussion at a Watershed Watch ad-hoc task group meeting. The outcome was that a regionally organized thermometer exchange was relatively easy to staff and implement locally. Since FY06-07 was the first year of this specific partnership, some agencies, including WVCWP, ended up with events scheduled a few days prior to the commencement of the advertising campaign. The West Valley Clean Water Program is now a member of the BAPPG and on the regional BayWise website: http://www.baywise.info/index.cfm?fuseaction=links&categoryID=8F785744-40CA-38F9-55F3387AE0E4551C In the future the West Valley thermometer exchanges will be coordinated with BAPPG events to take advantage of regional exposure and advertising. The BAPPG event summary is attached at the end of this report section.

Mercury Outreach - E-WASTE RECYCLING EVENT:

WVCWP designated staff time and funds to organize a Free E-Waste Recycling Event for West Valley residents, businesses and schools, and to publicize safe and legal disposal of Mercury and Copper-containing items. As a follow-up to WV's very successful 2006 "TV and Monitor Collection Event", WVCWP responded to residents' requests and delivered a similar, broader **all-product E-Waste Event** in April 2007. The event was held at a centrally-located and easily-accessible site - City of Saratoga's North Campus.

The WV cities found that a free E-Waste recycling event provides a meaningful way to effect behavior change, while providing a platform for conducting community outreach and education on this topic. Outreach resulted in completed surveys from **170** drivers and discussion with each driver (and most passengers) about disposal of hazardous waste.

The WVCWP advertised the event by distributing flyers and painting a large banner for the site. The *Los Gatos Weekly*, the *Saratoga News,* and the *Campbell Reporter* also carried Calendar section notices about the event. A strong emphasis was placed on the use of a responsible recycling firm. By using a responsible recycler we help prevent export of our waste to foreign dumps where mercury leaches into the environment. The results of surveys taken during the event showed that the banner was probably the most effective form of outreach among the 4 different outreach techniques mentioned. Attendees learned about the event via:

62 via banner - 33 via flyer - 28 via websites – 13 via newspaper - 19 via "other", which in most cases was specifically stated as "my wife" (15 – no response). The "my wife" answer provides some insight as to which target audience may be a good catalyst for behavior change in the West Valley communities.

			community event banner, and written or email responses to public inquiries and calls.	
General	CI Item	WVCWP Website Revisions While promoting the website, continue to expand and update the site with new educational material and up-to-date topics for the public on HHW, pest management, and other pollutant reduction e.g. mercury, trash, & copper /nickel	WVCWP posts information about Trash Cleanups for National River Clean Up Day and Coastal Clean Up Day on the *Cleancreeks.org* Home page to announce these events. Mercury and Copper issues were featured prior to the April E-waste event. The "Take Action" page was revised to include links to the UC Davis IPM site for residents interested in less toxic pest control. In addition, the page now highlights the question of home and garden chemicals' safety, with links to sites on toxicity information. During FY06-07, WVCWP staff developed drafts for new versions of the "About Us" page, to feature NPDES and stormwater information, and the "Take Action" page, to offer a variety of ideas and links leading visitors to useful next-step information. Work on the new website pages is planned for FY 07-08, but is contingent upon the amount of staff time that will be available after negotiating and preparing for implementation of the new MRP requirements.	WVCWP Staff
CITIZEN PARTICIPATION				
Public Partici-pation	Trash Monitoring Work Plan	Creek Clean-ups Continue implementation of trash monitoring activity during Creek Clean-ups. Conduct a minimum of two clean-up events (i.e. on Coastal Clean-up Day and National Rivers Day).	**Trash Monitoring was conducted at 4 different Clean-up sites in FY 06-07.** See *Trash Management* (Section #10) for results. Two of the creek clean-ups were held at an established site: San Tomas Aquino Creek next to Westmont High School (which serves Campbell, Los Gatos, Monte Sereno	WVCWP Staff & WVCWP Staff to coordinate with Municipal Staff

West Valley Communities

			and Saratoga students). WVCWP sponsored creek cleanup and trash monitoring events on 9-16-06 and 5-19-07. High school student volunteers have proven to be receptive to helping with Trash Monitoring. Students and other volunteers were trained to conduct trash monitoring and told why trash has become a pollutant of concern (POC) for the S.F. Bay area. **A third Clean-up was sponsored by WVCWP in partnership with Sacred Heart Elementary/Middle School** 4/18/07 Saratoga. The school is in Saratoga, but serves students from all WVCs. Students and parents participated in the Clean-up and Trash Monitoring. Prior to the event, 4th and 5th grades participated in Enviroscape watershed model demonstrations, where trash issues were discussed in great depth. **City of Campbell sponsored one Clean-up**. This event was held as part of the "Great American Pickup Day" (May 19, 2007). It was well promoted regionally and via the City's website and Public Works staff. About sixty volunteers participated and worked on a variety of sites, including sites along Los Gatos Creek Trail, the railroad tracks next to Winchester Blvd. and short Freeway stretches, picked up by volunteers under the supervision of Caltrans staff. Due to the scattered nature of the sites for this event, WVCWP used slightly simplified monitoring methods. Community volunteers were agreeable to tracking and estimating trash and filling out the forms.	

West Valley Communities

Santa Clara Valley Urban Runoff Pollution Prevention Program

			WVCWP conducted a survey with all participants to find out where they would dispose of fluorescent bulbs and gave everyone an HHW information booklet which lists places to "drop off" used hazardous items (including fluorescent bulbs). Also conducted a Mercury fever thermometer exchange, providing 26 digital solar thermometers to participants.	
TARGETED OUTREACH & SCHOOLS				
Targeted Schools	Expand Outreach to Teachers and Students	Schools Outreach: Watershed Ed. Curriculum Continue to build on 5th grade curriculum for WVCWP classroom watershed presentations, consistent with state required education standards. Expand outreach efforts by developing scripts based on state standards, or text books, for other grade levels in response to teacher interest. Evaluate effectiveness and appeal by soliciting teachers' & students' evaluations.	WVCWP staff made outreach presentations to two 5th grade classes, one 4th grade class, one 2nd-3rd grade class and 2 Kindergarten classes. Student's retention of stormdrain messages and recommended steps to protect their watershed was measured by developing a quiz for 4th and 5th grade students. The Science teacher administered the quiz three weeks after the classes participated in the watershed activity. Responses showed that sixty-five out of sixty-eight students were able to correctly list two actions that they would take to protect their local watersheds. Two sample quizzes with students' responses are included after the evaluation at the end of this report section. Development of an appropriate script for Kindergarten students was a focus of the 06-07 outreach efforts. The interactive presentations developed for the Kindergarten classes were well-received by teachers and students.	WVCWP Staff

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 06-07 ANNUAL REPORT

Source	WP Task	FY06-07 Work Plan Tasks	FY 06-07 Accomplishments	Responsible Party
			song to help students remember the stages of the Water Cycle and the concept of Runoff. All students learned the words to the song with enthusiasm. The presentation emphasized evaporation, condensation, precipitation, transpiration, absorption, percolation, run-off, aquifer, groundwater, water table and the understanding that the amount of water on Earth now is the same amount there has always been and the same amount there always will be. After the presentation students were asked to place water words on the water cycle board in the correct location; **all students gave correct responses.** *Sacred Heart Private School, Saratoga* - Presentations *for* 4th and 5th grade Science classes on *3-28-07* **68 students** participated in Enviroscape watershed presentations to learn about reduction of pesticides, proper car washing, erosion control, litter prevention and trash cleanup, safe disposal of mercury products and using HHW for household hazardous waste. West Valley Staff customized curriculum to meet the Science teacher's needs (correlated to state standards for appropriate grade). Pencils engraved with the Clean Water Program's website and stormdrain slogans were distributed to students & teachers. Water vocabulary words (i.e. watershed, runoff, stormdrain, wetlands, pollutants and household hazardous waste) were written on the white board and emphasized throughout the presentation. Three weeks after the presentation sixty-eight students completed a watershed quiz developed by WVCWP staff. Sample quizzes with student responses are provided after the evaluation at the

			end of this section. *St. Mary's School, Los Gatos,* Kindergarten on *5-21-07* For this class of **30 Kindergartners**, the students were split into 2 groups. One group identified storm drains and used trash grabbers and gloves to pick up debris around the school yard. The second group participated in an Enviroscape activity whereby students added pollutants to the watershed, used sprayers to make rain and witnessed the effect that runoff has on the wildlife that live in and around the wetlands and the Bay. The Enviroscape watershed model activity showed children how daily behaviors can contribute to pollution in our local creeks and the Bay. Solutions to pollution were offered and reviewed during a wrap-up question period. West Valley staff built on last year's first-time experience presenting to a Kindergarten class, by redeveloping the script to make it more appropriate for kindergarteners. *Allen at Steinback School, San Jose 5-25-07* Kindergarten This class of **24 students** participated in the same activities as those described above for St. Mary's School.	
Targeted Schools	Expand Outreach to Teachers and Students	General Schools Outreach	**City of Campbell – Arbor Day Event** 4-26-07 This event was open to the general public. Arbor Day events were held at two schools with the intention of engaging teachers, students and parents. Campbell was honored for 25 years of Arbor Day events, and chose to celebrate via tree planting events at Capri Elementary and Rosemary Elementary.	City of Campbell PW staff

West Valley Communities

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 06-07 ANNUAL REPORT

Source	WP Task	FY06-07 Work Plan Tasks	FY 06-07 Accomplishments	Responsible Party
			The Celebration included members of the City Council, Park and Recreation Commission, city and school district staff and approximately **300 students**. Campbell's Parks Maintenance Supervisor, who is well-trained in IPM, spoke about the City's Urban Trees program. The program offered an opportunity for everyone to become acquainted with the City's success in tree care and the benefits of trees for our air and water.	
Targeted Schools	Expand Outreach to Teachers and Students	General Schools Outreach	**Town of Los Gatos – Public Works Week Corp Yard/ Stormwater Tour** held on 5-23-07 This event was open to the general public, but was targeted at schools, with extensive outreach planned for teachers and students. The outreach was successful and resulted in at least **96** students viewing stormwater-related displays and equipment: *Rolling Hills Middle School (serving Campbell, LG, Saratoga)* 58 - 6th graders, with 4 parents and teachers *Hillbrook Elementary School, Los Gatos* 38 - 2nd graders, with 10 parents and teachers Along with Public Works staff, the event also involved 4 Town of Los Gatos officials: The Town Manager, Mayor, Vice Mayor and 2 Parking & Transportation Commissioners. The event involved a tour of the Public Works	Town of Los Gatos Public Works staff WVCWP Program Manager

Source	WP Task	FY06-07 Work Plan Tasks	FY 06-07 Accomplishments	Responsible Party
			maintenance yard and educational presentations at various tables staffed by PW employees and WVCWP Program Manager. Public Works staff showed students how to operate the various vehicles and machines. Tables were staffed with spokespersons representative of a variety of agencies and departments, e.g. the Street Sweeper, the Code Enforcement Officer, Los Gatos – Monte Sereno Police and Park Service Officers. Display tables showcased give-away-items, educational materials and stormdrain maintenance and protection activities. The WVCWP Manager staffed a Stormwater table displaying the watershed model, photos of litter in the creeks, and a storm drain model to show the difference between a sewer drain and a storm drain. Students received a brief presentation about watersheds and stormwater pollution, with an emphasis on litter, which students can help to prevent. Students went home with "goody bags" containing brochures showing drop-off locations for safe disposal of mercury products, Watershed Watch tattoos, and WVCWP pencils with stormwater messages and the WVCWP website address.	
Targeted Schools	Expand Outreach to Teachers and Students	General Schools Outreach	City of Saratoga staff and WVCWP worked with a Boy Scout (Eagle Scout candidate) to develop a "*Manual for E-Waste Recycling Events*" for general use, and to help any group wanting to hold an E-Waste event at City of Saratoga's North Campus site. WVCWP staff and City of Saratoga PW staff worked with this Scout to integrate knowledge he had gained from his	WVCWP Manager City of Saratoga PW staff

TARGETED OUTREACH				
Targeted Business	URMP	Mercury Pollution Prevention Plan Obtain or develop outreach material for distribution by IND Inspectors on Mercury Pollution Prevention and the proper disposal of fluorescent lights and batteries.	A new HHW information booklet, *What You Don't Know About Mercury May be Harmful to Your Health,* which lists places to "drop off" used hazardous items (including fluorescent bulbs) is being distributed. The IND inspectors said that businesses are very familiar with fluorescent bulb disposal requirements. WVCWP staff employed other public venues and events to distribute the information.	WVCWP w/ Sr. Haz Mat Specialist
Targeted Business	Permit Provision C.4	Education Distribute BMP materials during routine inspections of food facilities and automotive businesses. Discuss relevant educational material with businesses cited for potential stormwater violations.	During FY06-07, WVCWP supported West Valley Sanitation District (WVSD) staff by continuing an outreach strategy to report restaurants that have failed to use effective grease control BMPs. The WVCWP Inspector requests a copy of the restaurant's latest grease trap cleaning records. If the food facility does not have cleaning records or an invoice, the business is referred to the WV Sanitation District for follow up. The WVSD also provides an outreach poster to the business. This very effective poster emphasizes the importance of using BMPs and conducting good housekeeping and maintenance procedures.	SCC Fire; WV Inspector coordinate with WVSD
Reporting	NPDES Permit, Provision C.4	Evaluation/ Reporting Document or estimate (when possible) numbers of residents, students, municipal staff etc. reached by outreach efforts. Report number of calls, website hits and circulation or readership for newspapers or newsletters.	Events *September 16, 2006 Coastal Clean-up Day* – 40 student volunteers (via contact with staff at local high school) *April 18, 2007 Sacred Heart/ Wildcat Creek*– 42 students & parents *May 19, 2007, Nat'l River Clean-up Day* – 19 volunteers Families of over 1500 Westmont High School students	WVCWP Staff

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 06-07 ANNUAL REPORT

Source	WP Task	FY06-07 Work Plan Tasks	FY 06-07 Accomplishments	Responsible Party
Public Information/Participation Program EVALUATION – WVCWP PROJECTS				

Outreach – MATERIALS DISTRIBUTION:
The "Grow It Guide" (laminated, "fan-out" guide about less toxic controls for garden pests) has been one of the most popular outreach items among WVC's residents, both in general, and among the Garden Centers. However, WVCWP's supply of these items is running low. These are expensive to print, and are only reasonably priced when ordered in extremely large quantities. In FY 07-08, SCVURPPP intends to coordinate a bulk printing of Grow It Guides: this will facilitate increased distribution of this outreach piece at local West Valley events and venues.

Outreach – MEDIA BUYS FOR EVENT PUBLICITY:
In FY 05-06, WVCWP spent several thousand dollars to promote a free WVC E-Waste event; approximately 250 cars came through the event. Many of the drivers showed up with the news ad in hand. For FY 06-07, WVCWP chose to test less expensive methods of outreach and monitor the results. The 06-07 event was held at a different location, and three similar local events were offered by other agencies within the same month. Therefore, it's not possible to weigh the public response equally. However, the 06-07 E-Waste event did receive a respectable number of cars (170 drivers) even though no money had been spent on newspaper ads. According to the survey, the banner hanging at the site, prior to and during the event, was responsible for bringing in about 35% to 40% of the participants. WVCWP will continue to investigate reasonable and effective methods for advertising local events.

Outreach – PRESS RELEASE COVERAGE:
In the past, the WVC benefited from extensive media coverage in their local papers, which were delivered weekly to residents: the *Campbell Reporter*, the *Los Gatos Weekly Times* (also covered Monte Sereno), and the *Saratoga News*. All of these papers had been operating under the umbrella of "Silicon Valley Community Newspapers" (SVCN) and WVCWP staff had well-established contacts with SVCN staff. Unfortunately, a few of the reporters who enjoyed WVCWP's schools and outreach stories, and with whom WVCWP staff had developed a trusted working relationship, are no longer with the paper. During FY 06-07, all the SVCN papers were caught up in a process of acquisitions and mergers; this interfered with access to local reporters and coverage was limited for the WVCWP.

Targeted Outreach -- SCHOOLS: At Sacred Heart School, 68 students from a 4th grade and a 5th grade class participated in Enviroscape presentations. Emphasis was placed on relevant vocabulary. Three and a half weeks after the presentation, WVCWP Program Manager provided a watershed quiz for the teacher. Students completed the quiz as homework to evaluate their understanding and retention of watershed concepts. Students were asked to name two activities that they would do to help keep our creeks and Bay healthy. Sixty-eight students completed the watershed activity quiz. Sixty-five listed two activities that they would do to keep our local creeks and Bay healthy. Six students answered all eight questions correctly. Thirty-nine students said they would prevent litter or pick up trash. Six students will plant trees, plants, and flowers, (reduce impervious surface). One student would plant the "right kind" of plants (native plants). Three students would not wash cars in the driveway. Four students will pick up pet waste. Two students will put only water in the stormdrain. One

student (according to the quiz answer) will "reduce toxic chemical use and control pests naturally". **Targeted Outreach -- PARTNERING WITH OTHER ENVIRONMENTAL SCHOOLS OUTREACH PROGRAMS:** The WVCWP Public Outreach Coordinator and Program Intern completed *Environmental Volunteers' (*EV) docent training in August and Sept. of 2006. West Valley staff volunteer as EV docents to promote natural science education and to provide Bay Area students (and teachers) with insights from an urban runoff perspective. This docent training also serves to broaden staff's knowledge for WVCWP classroom watershed presentations.

Project Summary

In May – July 2007, the Bay Area Pollution Prevention Group (BAPPG) coordinated a regional collection event for mercury thermometers and other mercury-containing devices. Together, 20 participating agencies and organizations collected **4,264** thermometers, 21 thermostats and 16 pounds of bottled elemental mercury at **30 one-day and ongoing events**. The BAPPG coordinated this regional effort, building capacity on how to conduct an exchange, organizing and developing regional advertising and outreach materials, developing a regional website and phone number with all event dates, hours and location.

The BAPPG coordinated with the Media Relations Committee of the Bay Area Clean Water Agencies and Bay Area Stormwater Agencies Association to develop press releases and a media kit. In addition, the BAPPG worked with the Media Relations consultant, O'Rorke for paid radio and newspaper advertising.

Follow up Questions from the

Classroom Watershed Activity

For questions 1- 5 please make a √ checkmark by the correct answer or answers.

1. A **Watershed** is

   a. A reservoir to store rainwater for use in times of dry weather or drought

   -1 b. All the creeks and streams that flow into the Bay or ocean

   c. All the land area that drains into a particular creek or body of water

2. **Runoff** is a word that describes

   a. The water that overflows from a clogged storm drain during heavy rains

   b. All of the rain, melting snow, and sprinkler water, that is not absorbed or infiltrated into the ground before it reaches the creeks or Bay

   c. Neither of the above

3. A **Storm Drain** helps to protect neighborhoods from flooding during heavy rains. In Santa Clara Valley the water that goes into a storm drain

   a. flows through a pipe system to a water treatment plant for removal of pollutants such as, pet waste, car oil, paint, exhaust particles, brake pad dust, car-wash water, pesticides, fertilizers and litter before it is released into the Bay

   b. flows directly into our local creeks and eventually into the San Francisco Bay

   c. can be found in a home in a bathtub, a kitchen sink, or in a toilet

-1 4. **Most water pollution is now caused by**

   a. industries or big manufacturing businesses

   b. some of people's every day activities

5. **Fluorescent bulbs** save energy and contain mercury. **When they burn out**

   a. put them carefully in the recycle bin

   b. Check (Santa Clara County Household Hazardous Waste) at www.hhw.org to find many safe, legal drop-off locations.

6. **Other than recycling, write down two more things that you will DO or NOT DO to help keep our creeks and Bay healthy for aquatic life and for people.**

   reduce toxic cemical use

   control pests naturaly

Thank you for keeping our Creeks clean!

		Not in Work Plan – additional task undertaken	Sunnyvale staff presented to the IPM AHTG the idea of establishing a Green Gardener Program in Santa Clara Valley (see also Training Table for details). Oct. 12, 2006 through June 2007, WVCWP Pgm Mgr attended meetings and worked on implementation of this training program within Santa Clara County. The work has involved laying the groundwork for instituting this program, which is expected to achieve start-up in 2007-2008. This program targets an audience that WVC have found to be difficult to reach. The training and certification is aimed at yard maintenance businesses who appear to handle the bulk of yard activities in the WV. The Green Gardener certification course will be offered through local Adult Education Centers to provide IPM training for landscape maintenance workers based on similar successful programs in Santa Barbara and Santa Cruz counties.	WVCWP staff

West Valley Communities

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2006-2007 ANNUAL REPORT

Pesticide Management Activities Evaluation

PESTICIDE USAGE REDUCTION MEASURES – Pest Specific

CITY OF CAMPBELL

Campbell is implementing IPM in the following situations:

1) On-going - Yellowjackets:

- Campbell uses traps as the main means of control.
- Parks Maintenance staff tries to clean off picnic tables to prevent attracting wasps and ants.
- If a wasp nest in a tree requires treatment, the PCO uses a non-residual pesticide, and closes the hole in tree so wasps can't return to nest. Parks staff use home insulation spray foam to close the nest/hole; treatment has been successful in preventing return of wasps.
- Staff is evaluating new traps on an ongoing basis which use pheromone to attract wasps, dry fish to bring them into trap, and soap inside trap, which kills in 5-15 seconds

2) On-going - Weeds:

- Campbell uses a chipper to create mulch from green waste; this mulch is used for weed control wherever possible.
- Work Furlough labor hand hoes weeds where possible.
- Staff is investigating use of black plastic for 'solar control' of weeds on an ongoing basis, and determining spots where this would be feasible.
- Staff has been using the tractor with a boom mower for mowing weeds, instead of spraying roadsides and similar areas.

3) On going - Insects:

- In 02-03**,** Campbell controlled an Ash Whitefly infestation with a natural predator, a minute wasp. Since the wasps were ordered and released, they have continued to suppress the Whitefly population.
- Staff is identifying insects and utilizing IPM when appropriate instead of using insecticides. No new insects were identified in FY 06-07.

- Campbell has significantly reduced the spraying of pesticides for infestations of aphid and scale in the Urban forest by employing non-toxic horticultural oils and soaps.

Unfortunately, the City has certain species of street trees with aphid and scale infestations, and the less-toxic methods, including spraying with ultra-fine oil, have not had a noticeable impact on this pest population.

Despite the aphid and scale problem, the City has used NO organophosphate sprays to control the insects and **has implemented a program of injecting the infested trees with a systemic insecticide instead of a spray** (a spray might affect other areas than the targeted site; the systemic chemical stays within the tree). This is in keeping with the City of Campbell IPM Plan.

Staff will continue to investigate less-toxic control methods for aphids and scale insects on an ongoing basis.

3) Gopher Control: The City has implemented a policy of using mechanical traps for gophers instead of baits thus further reducing the use of pesticides.

4) IPM Solutions: City staff have participated in implementation of new County computerized "IPM Solutions Database Input/Response", which allows input of a pest problem and a response with IPM solutions. Staff refer to this database as needed.

RESULTS OF PESTICIDE USE REVIEW FY 06-07:

Campbell has taken a strong stance on pesticide use reduction in recent years, as evidenced by the extensive involvement in IPM training by City staff. The City's PW Superintendent and Parks Supervisor have actively been involved in regional IPM planning meetings and workshops.

Field Activities:

→ Through use of IPM practices Campbell was able to eliminate use of any OP pesticides for the past 5 years, (as compared to using 3.7 oz of diazinon for ant control in 01-02). Campbell has decreased its use of pesticides by using oils and soaps to control aphids and scale in the urban forest.

→ The City is making an effort to stress prevention (prevent weed growth, prevent pest infestations) where possible. Campbell is moving into use of IPM, mechanical and cultural controls, rather than chemical controls, as much as possible given budget and staff limitations.

→ Over the past several years, the Public Works Dept. has instituted improved methods of weed control in some parks and roadsides, such as using green waste to make wood chips, used as mulch to prevent weed growth. For the past 3 years, the City has been using its new specialized tractor with boom mower for mowing roadside & park weeds and to avoid spraying.

→ The City Public Works Dept. has instituted a policy of moving towards installation of more pest resistant trees and shrubs to minimize the need for pesticides; these efforts include removal of certain tree species (such as Tulip and Raywood Ash trees) from the City of Campbell's approved Street Tree List.

TOWN OF LOS GATOS

Los Gatos is implementing IPM in the following situations:

YELLOWJACKETS:

- Los Gatos uses traps as the main means of control.
- Parks staff uses steam cleaning on picnic tables to prevent attracting wasps & ants.

WEEDS:

- Los Gatos uses a chipper to create mulch from green waste; this mulch is used for weed control wherever possible.
- Los Gatos continues to arrange to receive free wood chippings from PG&E tree-trimming contractor. Mulch is used to reduce weed growth on roadsides, median islands, parking lot landscaping and in parks.
- Staff hand-pull weeds where feasible.
- Los Gatos purchased a flail mower to mow weeds in large areas.

RODENTS:

- Rats & mice are trapped by contractor (baits used as last resort).

INVASIVE SPECIES:

- Various species along Los Gatos Creek are hand-pulled by Native Plant Society volunteers.
- Scotch Broom is cut down by Parks staff and volunteers supervised by staff.

SCALE INFESTATION ON TULIP TREES

- Parks staff sprays trees with low concentration detergent & water

RESULTS OF PESTICIDE USE REVIEW FY 06-07:

→ Los Gatos staff has eliminated the use of any OP pesticides for the past 5 years (and in preceding years minimal OPs were used: such as .475 oz of diazinon for ant control in FY 01-02). Avoidance of OP use has been achieved through use of IPM practices and through seeking out less-toxic pesticides.

→ The Town is making an effort to stress prevention (prevent weed growth, prevent pest infestations) where possible. Los Gatos is moving into use of IPM and engineered, rather than chemical, controls as much as possible given budget and staff limitations.

→ In Town facilities, sanitation is being stressed as a means to prevent pest infestations (ants, mice, etc.) so that chemical controls will not be needed.

→ Over the past several years, the Public Works Dept. has instituted improved methods of weed control in some parks and roadsides, such as the arrangement for free wood chips which are used as mulch to prevent weed growth.

→ Los Gatos invested in purchase of a flail mower for staff to use in mowing weeds in large areas.

→ Volunteers work with the Public Works Dept. to trim back brush along the LG Creek Trail, and to remove invasive species.

CITY OF MONTE SERENO

The City of Monte Sereno has extremely limited City property – less than ¼ acre total of landscaped area. A landscaping contractor cares for City property, and is instructed to avoid use of pesticides. When gopher damage appears, the gophers are trapped. Weeds are hand-pulled.

CITY OF SARATOGA

Saratoga is implementing IPM in the following situations:

APHIDS:

2 trees with aphid problems were treated by injecting with a systemic pesticide to reduce to reduce environmental impact. The trees are located downtown with lots of foot traffic, where dripping was a problem, but the injections were able to manage the problem.

YELLOWJACKETS:

Saratoga uses traps as the main means of control.

Parks staff tries to clean off picnic tables every Monday to prevent attracting wasps & ants. The Parks Dept. purchased and installed 18 plastic tables (to replace existing wooden tables); the new tables are easier to keep clean and therefore attract fewer wasps.

No new nests were observed this year and NO Wasp Spray was used.

WEEDS:

Mulch spread last year has continued to be effective in FY 06-07 for weed control. *Last year Saratoga used free mulch from tree service contractor; this mulch is used for weed control wherever possible. Wood chips were dumped and spread as mulch on the unlandscaped medians on Fruitvale Ave (a major arterial)*. This action resulted in NO spraying on a half mile stretch of median which would otherwise be a problem area.

The Street Maintenance Dept. hired a landscape company to cut down roadside weeds twice this year instead of spraying; this cut pesticide applications from 4 to 2 for that task.

Hand hoeing/pulling of weeds is used where possible. Weekly walk-through with lots of hand weeding; Round-up is used when weeds begin to get out of control, such as springtime – the emphasis is on catching the problem early in an attempt to avoid having to spray larger areas later.

RODENTS:

A contractor is engaged to trap rodents in order to avoid poisonous baits; this is done when there is an outbreak of a number of rodents at once. A PCO was hired to use baits in areas where trapping failed. No pesticides were used within City Parks for mole / squirrel / gopher control. A Contractor (Ken Fuson) was hired to trap all reported invasions where turf or landscaping plants where threatened. The contractor sets up a cordoned off area using Macabee traps.

MEDIAN LANDSCAPING:

Policy is to install pest resistant shrubs and landscaping and avoid high-maintenance, low-pest resistance turf and greenery.

West Valley Communities

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2006-2007 ANNUAL REPORT

MICROSPRAY IRRIGATION:

Microspray irrigation systems have been installed in the Heritage Orchard and computerized irrigation systems are used in medians, to reduce any possible runoff which could carry pesticides. Installations are on-going as budget allows; 50% are now computerized. Main medians on major arterials have all been completed.

Two more Electronically Timed controllers were added to City landscaping to monitor water usage and avoid runoff. Nozzles continue to be modified to optimize spray.

RESULTS OF PESTICIDE USE REVIEW FY 06-07:

The City is making an effort to stress prevention (prevent weed growth, prevent pest infestations) where possible. Saratoga is using IPM and engineered, rather than chemical, controls as much as possible given budget and staff limitations.

Over the past several years, the Public Works Dept. has worked on landscape design and improved irrigation systems which will reduce need for pesticide/herbicide use, and reduce any potential runoff which could carry pesticides.

Natural insect controls include use of traps for wasp control, and soapy water for ant control.

Through these types of efforts, Saratoga is progressively reducing chemical pesticide use.

PESTICIDE USAGE BY CONTRACTORS

City of Saratoga FY 06-07

Saratoga - Pesticides used by Contractors on City property July 1, 2006 thru June 30, 2007

City of Saratoga FY 06-07

Revolver	432-1266	2.34% Foramsulfuron	128 oz	*grasses*
Dupont Direx 4L	352- 678-AA	40% Diuron	36 oz	*Broadleaf weed, grasses*
Lesco Prosecutor	524-535-AA-10404	2.9% Of Diquat Dibromide --- 73.3% Of Glyphosate, Monoammonium Salt	74 oz	*Broadleaf weed, grasses*
Turflon Ester	62719-258-AA	61.6% of Triclopyr, Butoxyethyl Ester	21 oz	*Broadleaf weed, grasses*

** Diazinon was applied on the recommendation of Saratoga's Pest Control Contractor to resolve a very difficult situation. An aphid infestation has been destroying 10 deodar cedars (cedrus deodara), about 50 -60 feet tall, in the median of a street which receives extensive car, foot, and bicycle traffic (in front of the Community College, Community/Senior Center, Middle School and Library). Due to the setting, concerns about public safety developed. In addition, the PCO's opinion was that these large trees would be lost unless diazinon was used to control the aphids. The deeply furrowed bark of this species makes it difficult to treat with less-toxic approaches. After the last application (7/06), the infestation subsided and the trees have survived.

MERCURY POLLUTION PREVENTION ACTIVITES

FY 2006-2007 Work Plan Self Evaluation Matrix

Source	WP Task	Work Plan Tasks	Accomplishments	Responsible Party
Mercury Plan (I.D.)	Mercury Policy	Continue Implementation of municipal mercury policy requiring the virtual elimination of mercury from controllable sources in urban runoff from agency operations.	Saratoga adopted a mercury elimination policy during FY 03-04 and has continued to phase out mercury containing products, with the exception of fluorescent bulbs.	Facilities / Street Maint. Supervisors
Mercury Plan (I.E.)	Guidelines for Hg Containing Products Reduction	Continue implementing phase-out of mercury-containing products (MCPs). Phase-out will coincide with replacement of MCPs on an as needed basis. Provide municipal staff with a reminder notice.	Reduction of mercury-containing products is being implemented. Research on alternative products has been conducted through the WVCWP and non-mercury or low-mercury replacements are being used wherever feasible e.g., thermostats and fluorescent bulbs. Saratoga's Facilities Manager noted that three thermostats containing mercury were removed and replaced with non-mercury-containing thermostats during a remodel. The thermostats were turned over to the City's hazardous waste recycler. (4-23-07)	Facilities / Street Maint. Supervisors
Mercury Plan (II.B.)	Disposal Services	Provide Mercury Containing Product Disposal Services to Residents and Small Businesses	Provided through funding and participation in County HHW program for residents and small businesses	Pub Works Director/ City Manager also PW Admin Analyst
Mercury Plan (II.C.)	Disposal of Mercury Containing Products	Track recycling, replacement, and reduction in use of mercury-containing products. If feasible, document quantities of fluorescent lamps (from City buildings and departments) which are disposed of at hazardous waste collection facilities in FY 06-07.	The City collected and disposed 127, four-ft fluorescent bulbs (total 508 ft.) and 52 compact fluorescent bulbs in FY06-07. The Facilities Manager used Onyx Environmental Services for safe disposal. Since Saratoga generates a small quantity of fluorescent bulbs the Facility Manager plans to use the drop off site at Orchard Supply Hardware (OSH) in the future. OSH is a partner of HHW that provides safe collection and recycling for Santa Clara Valley residents and small businesses.	Facilities Supervisor
Mercury	Fluorescent Light	Continue participation in the Mercury Ad	The WVCWP Manager helped develop local campaigns and	SCVURPPP & WVCWP

Plan (II.F)	Recycling Program	Hoc Task Group and support on-going implementation of an outreach program to educate small businesses and conditionally exempt small quantity generators about recycling fluorescent lights.	outreach messages through SCVURPPP's Mercury Ad Hoc Task Group. WVCWP staff helped publicize the partnership with stores that provide convenient fluorescent bulb drop-off sites for local residents and small businesses.	to coordinate w/ HHW staff
Mercury Plan (II.F and V.C.)	Work with HHW Collection Agencies	Help publicize fluorescent light recycling program. Coordinate educational outreach with fluorescent light recycling events sponsored by HHW.	WVCWP staff distributed HHW drop-off information to Bay Area residents at several community events and surveyed local public attitudes and behavior to evaluate the success or need for outreach efforts. Disposal of fluorescent bulbs was covered in classroom presentations. PIP efforts are noted in the evaluation at the end of this section and in the Public Information & Participation section of this report.	WVCWP staff conducts public outreach and coordinates with WV Stormwater Rep

Mercury Pollution Prevention Activities Evaluation

On April 28, 2007 a Free Hazardous Waste Recycling Event and **Mercury Thermometer Exchange** was sponsored by the West Valley cities. The City of Saratoga provided a convenient and very visible venue. WVCWP hired additional staff to help greet drivers and raise awareness in the local communities about the *Clean Water Program* and about proper disposal of mercury containing products. *What you Don't Know About Mercury* brochures, provided by HHW, relayed the message that mercury containing products such as fluorescent bulbs, batteries and fever thermometers can leach mercury (a neuron-toxin) into our landfill and ground water, and that by using a responsible drop-off location people can help keep mercury out of our creeks and the Bay. Recycled money pencils, printed with contact information for HHW were given to drivers as a gift for taking a survey. Most participants were interested and responded positively to receiving information with phone numbers and addresses of store partners that serve as collection sites.

Drivers of 170 cars brought their used electronics for recycling to the E-waste collection on 4-28-07. WVCWP and HHW representatives were there to greet the cars and survey the participants about how they would currently dispose of fluorescent bulbs. The survey showed that 59 drivers thought it was okay to throw fluorescent bulbs in the trash, 14 would put them in a recycle bin, 41 would either not use fluorescent bulbs or did not know the safest way to dispose of them, and 56 respondents were committed to the practice of taking fluorescent bulbs to a designated store or HHW drop-off location.

COPPER ACTION PLAN/NICKEL ACTION PLAN

FY 2006-2007 Work Plan Self Evaluation Matrix

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
Vehicle Washing Operations	CB-1	Continue to distribute outreach materials on proper vehicle/equipment washing at Municipal counters/Post Offices/Libraries and public events, and post on WVCWP website.	The WVCWP "Car Wash Kit" flyer is available on the WVCWP website as a PDF. The site's Home page, www.cleancreeks.org displays a car wash graphic which links to the PDF. The printable flyer includes information on harmful effects of copper: http://www.cleancreeks.org/imagesnew/carwashweb.pdf Los Gatos' website offers a stormwater page that gives car-washing advice and take-action-type tips for water quality: http://www.town.los-gatos.ca.us/index.asp?NID=922	WVWCP staff
Vehicle Washing Operations	CB-1	Discuss copper impacts; teach proper methods of Car Washing and Pool & Spa drainage through use of Enviroscape watershed model in classroom presentations.	WVCWP's classroom presentations are scripted to include hands-on activities so that students can watch pollutants such as copper, from car-washing activities flow directly to the habitat of aquatic life. In addition to recommending the use of commercial car-wash facilities, WVCWP encourages washing on a gravel or lawn area where wash water is captured and infiltrated. The Inspector talks to students about car wash fundraisers and offers to help them set up the WVCWP car-wash kit prior to the event.	WVWCP staff
Vehicle Washing Operations	CB-1	Provide Car Wash Kit & education to charity car wash organizers. Solicit feedback from participants.	The WVCWP Stormwater Discharge Inspector is available to provide guidance on use of the WVCWP car-wash kit for local fundraising events. He usually attends the events to offer guidance and to help publicize the *West Valley Clean Water Program*. The kit uses about 400 ft. of hose and 300 ft. of extension cord. The car wash kit works extremely well, but can be difficult to set up. Photos of the kit in action are used for	WVWCP staff

WEST VALLEY COMMUNITIES

FY 2006-2007 ANNUAL COPPER (and NICKEL) ACTION PLAN REPORT

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
			classroom presentations.	
Vehicle Washing Operations	CB-1	Within the Planning permit process, require source control measures at facilities that will conduct vehicle/ equipment washing and maintenance activities (consistent with Permit Provision C.3.k).	The WVC did not have any regulated projects in FY06-07 that would conduct vehicle/equipment washing and maintenance activities.	Community Dev Directors and Planners
Vehicle Washing	CB-1	Promote improved car washing methods at auto businesses during inspections. Provide info on alternative arrangements for auto businesses with possible compliance problems.	The Stormwater Discharge Inspector distributes vehicle washing outreach materials during pro-active inspections and in relation to any actual or suspected vehicle washing incident. The Inspector is able to answer questions and offer suggestions with the help of visuals. A WVCWP-created fact sheet provides information on wastewater capture systems for automotive facilities. The fact sheet was designed to provide small-scale automotive facilities (those that find installing a full-fledged wash rack cost-prohibitive) with examples of inexpensive treatment technologies and distributor information. This method of outreach has been very effective.	WVWCP ICID Inspector
Vehicle Washing Operations	CB-1	Maintain recommended source controls for vehicle washing at City corporation yard.	Municipal staff follow best management practices and continue to ensure that vehicle wash systems in the Corp Yards prevent wash water runoff.	Pub Works Staff
Vehicle Washing Operations	CB-1	City staff will be familiar with Mobile Surface Cleaning BMPs or review the training video offered by BASMAA.	Municipal staff viewed the training video in 2006. They are familiar with the BMPs. To accommodate new-hires the WVCWP will provide a showing of the BASMAA video in FY07-08.	WVWCP ICID Inspector / Pub Works Supt
Industrial Copper Control	CB-3	Continue Industrial Inspection program with Fire Dept., including NOI sites and other industrial sites such as plating and metal finishing facilities, vehicle service facilities,	The City has an agreement with the SCC Fire Dept to conduct urban runoff inspections for machine shops and metal manufacturing facilities. Annual meetings are held between the WVCWP Manager and Inspector and the Fire	SCVC Fire Dept./ WV ICID Inspector WVCWP Manager

WEST VALLEY COMMUNITIES

FY 2006-2007 ANNUAL COPPER (and NICKEL) ACTION PLAN REPORT

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
		and other permitted sites.	Dept Haz Mat Specialist to ensure excellent communication and prompt follow-up to potential and actual violations. See Industrial Inspection (Section #2) of this report.	
Reducing Traffic Congestion Promoting Alternative Transporta-tion	CB-6/7	Within the Planning permit process encourage and promote best practicable transportation-related design practices and alternative modes of transportation.	The West Valley communities encourage best design practices wherever practicable. These small communities tend not to have large developments conducive to requiring alternative transportation within the permitting process. However, the cities and the Town encourage alternative transportation through other means: **Campbell** now has 3 stations for Light Rail service linking the City to stops throughout Santa Clara Valley. The City Redevelopment Agency was actively involved in this project. Campbell also provides bicycles for employees to ride while at work. Furthermore, the City supported *Bike to Work Day* on 5-19-07 by sending an email to all employees encouraging them to take advantage of the opportunity to ride a bike to work and to stop off at energizer stations such as the one at Whole Foods in Campbell for free beverages, snacks and encouragement. **Los Gatos** approved a large development project (Netflix campus**)** that provided bike racks throughout the commercial campus and bike lockers and shower facilities for employees who will ride their bikes to work. (approx. **260** employees). A future light rail station is also planned adjacent to this site. **Saratoga** Planners and Engineers work with project owners during the permitting process to encourage them to designate a portion of their site, if feasible and appropriate, for open space and walking trails. The City website encourages biking through its *Trail and Bike* maps, showing where striped bike lanes exist, and classifying bike routes according to safety. Pedestrian/equestrian trail maps are	Municipal Planners, Community Development Directors and Civil Engineers

WEST VALLEY COMMUNITIES

FY 2006-2007 ANNUAL COPPER (and NICKEL) ACTION PLAN REPORT

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
			posted to encourage walking as an alternative means of transportation. Link to all maps: http://www.saratoga.ca.us/trail_and_bike_maps.html **Monte Sereno, Los Gatos and Saratoga** are working on a shared project to develop bike paths along Hwy 9. The paths will increase safety and encourage more bicyclists to travel between the main downtown areas of these cities. In addition, the second phase of the project has been initiated which includes a pedestrian path along Highway 9.	
Reducing Traffic Congestion	CB-6/7	Continue to incorporate and support "Best Practices for Integrating Transportation and Land Use" as documented in the VTA's 2003 Community Design & Transportation Manual.	These elements remain in the WVCs' General Plans and serve as guiding principles for their Land Use and Transportation development.	Traffic Engineer
Watershed assessment and protection	CB-8	Implement agreed-upon guidelines & standards developed by the Water Resources Protection Collaborative for watershed protection.	Campbell, Los Gatos and Saratoga have participated in, and invested significant staff time in, the Water Resources Protection Collaborative. Two of the West Valley cities, Los Gatos and Saratoga, adopted the "Guidelines and Standards" in FY06-07 and Campbell and Monte Sereno will adopt them in FY07-08.	Community Development Directors and City Managers
Street sweeping & stormdrain O&M	CB-11	See Street Sweeping tasks on data collection and evaluation.	The West Valley communities conduct street sweeping in residential areas and more frequent sweeping in commercial areas. Sweeping data is collected and noted in Public Agency Activities (Section # 3) of this report.	
Street sweeping & stormdrain O&M	CB-11	Implement (as appropriate) identified improvements to current street sweeping and storm drain system O&M programs (within available budgets). Meet with WVSD for stormdrain O&M evaluation.	Storm Drain Maintenance and Street Sweeping are evaluated in Public Agency Activities (Section #3) of this report.	Pub Works Supt. with WVCWP guidance

WEST VALLEY COMMUNITIES

FY 2006-2007 ANNUAL COPPER (and NICKEL) ACTION PLAN REPORT

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
Street sweeping /stormdrain O&M	CB-11	Ensure that contractor maintains effective street sweeping equipment.	The West Valley cities do not hesitate to change sweeping contractors if the equipment being used does not measure up to municipal standards. The Town of Los Gatos recently purchased a new regenerative air sweeper.	Pub Works Maintenance Superintendents and Supervisors and Director of Pub Works
Outreach on pool, spa maintenance	CB-12	Continue to distribute pool & spa maintenance brochure via agency department counters and public places. As time permits, update WVCWP website with current Pool & Spa maintenance info.	WVCs distributed an additional 500 Pool brochures at Planning & Bldg Dept counters during FY06-07.	WVCWP with Municipal Staff
Outreach on pool, spa maintenance	CB-12	Continue to distribute pool & spa brochures as part of ICID WVC inspections.	The Inspector provides Pool & Spa brochures to residents and pool and spa companies as part of his IC/ID Inspection Program.	WV Inspector
Use of architectural copper	CB-21	Within the Planning permit process, discourage use of copper roofing and gutters.	All WV cities discourage copper architecture with the exception of Los Gatos, which is drafting a Residential Design Guideline that will seek to discourage architects and homeowners from using copper by informing them of its environmental implications. The Guideline will be finalized during FY 07-08.	Planning Dir/ Sr. Planner
Green Building	CB-21	Distribute outreach or expand website to promote Green Building principles. Provide examples of Green Building principles that were implemented.	All WVCs encourage and adhere to Green Building practices. The Cities plan to continue emphasizing green building principals in FY07-08. Los Gatos' website provides Green Building suggestions: http://www.town.los-gatos.ca.us/index.asp?NID=1213 Saratoga's website lists Alternative Building Materials http://www.saratoga.ca.us/pdf/SD-21Alt.bldg.materials.pdf	Planning Dir/ Sr. Planner
E-Waste Disposal	Proper Disposal of items that contain copper	Develop, advertise & conduct West Valley E-Waste Recycling Event **Additional Task – Not in Workplan**	*April 28, 2007* ***Free*** *Hazardous Waste Recycling Event* - for used TVs, monitors and other electronics was sponsored by the West Valley Cities. Drivers of 170 vehicles brought used electronics for recycling. Campbell held a free E-waste event on 3-16-07 at Prune Yard Tower, Campbell.	WVCWP Staff

Control nickel discharge from construction sites	NB-1	Sediment Control: Continue to implement Construction Inspection Performance Standards (see Construction Inspection work plan section).	See Construction Inspection (Section #5) of this report.	Engineering and Building Inspectors WVCWP Inspector
Control nickel discharge from construction sites	NB-1	Training: Continue to have inspectors attend Regional Board/Program workshops on construction site management and learn latest erosion/sediment control techniques	See Construction Inspection Training (Section #5T) of this report.	Engineering and Building Inspectors WVCWP Inspector

Copper/Nickel Action Plan Evaluation

Car Wash Outreach Evaluation:

Car Washing has been highlighted on the WVCWP home page; the Car Wash Kit flyer was also sent to Fire Dept inspectors at their request. The Fire Dept inspects the West Valley Industrial and Commercial facilities, and reports incidents in residential areas if they notice violations while out in the field. WVCWP would like to have an all-inclusive, educational copper brochure, which would include car washing, architectural copper and pool draining in one piece. Staff have initiated a rough draft piece for this purpose. However, the WVCWP has not had the staff or funding to create an informative, attractive, finished piece that would be appropriate for mailing to residents and for distribution at events and municipal counters, etc.

Pool and Spa Maintenance:

The West Valley communities ordered 150 to 200 more brochures to give out at Planning counters and to new pool and spa owners. During FY06-07, The Town of Los Gatos' standard Conditions Of Approval for new homes with a pool were revised to require a sanitary sewer clean-out within 10 feet of the pool equipment, and a pervious landscaped area for pool filter washout.

Educational Outreach Evaluation:

The WVCWP will continue to provide outreach on car washing, vehicle maintenance, alternative transportation, and pool maintenance during in-class presentations and outreach at community events. WVCWP incorporated messages about activities that can prevent copper runoff as part of Kindergarten and 4th and 5th grade Enviroscape curriculum. These presentations have been successful in raising interest in proper car-washing and pool & spa maintenance methods. Staff have found that children seem especially receptive to the information about copper and car washing when they participate in the Enviroscape activity.

Street Sweeping:

The West Valley cities continued their street sweeping programs and submitted annual sweeping data to the Program. Los Gatos purchased a new PM-10

WEST VALLEY COMMUNITIES

FY 2006-2007 ANNUAL COPPER (and NICKEL) ACTION PLAN REPORT

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
regenerative street sweeper in FY05-06. The Town, by contract, used the new sweeper on Monte Sereno's streets. Campbell hired a new contractor for FY06-07 in order to employ effective, up-to-date equipment. In FY05-06, Campbell decided that the sweeping contractor did not have effective equipment, which required additional sweeping to get the job done effectively. The City is pleased with the results of the change in contractors. Saratoga's sweeping contractor uses two kinds of sweepers to address the different types of debris to be picked up. Saratoga is pleased with their contractor. Saratoga updated street sweeping maps to GIS street map format and posted them on the City's website in FY06-07. Street sweeping is very important to West Valley residents. If the streets are not swept on schedule City or Town staff receive phone calls to register complaints, even on holidays.				

Training Summary: Copper/ Nickel

Training Description	Date	Attendees
WVCWP Monthly Meeting – Copper Work Plan Guidance Discussion led by: WVCWP Program Manager **Topics:** ▪ Adopting Guidelines & Standards developed by Water Resources Protection Collaborative ▪ Providing outreach to Mobile Surface Cleaners ▪ Conducting and documenting street-sweeping in residential and industrial/commercial areas ▪ Providing outreach to residents on proper pool and spa maintenance ▪ Discouraging the use of copper roofs and architecture in development permit process ▪ Planning for an E-waste event	January 23, 2007	**WVCWP (3)** Program Manager Program Assistant Sormwater Inspector **Campbell** Senior Civil Engineer **Los Gatos (1)** Senior Engineering Technician **Saratoga (1)** Public Works Analyst

Trash Management

City of Campbell

Town of Los Gatos

City of Monte Sereno

City of Saratoga

TRASH INVENTORY & MANAGEMENT

FY 2006-2007 Work Plan Self Evaluation Matrix

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party
Trash Work Plan	Strategy	Participate in Trash Ad Hoc Task Group and assist Program staff in developing an effective strategy for trash reduction in urban streams and waterways.	The West Valley Clean Water Program Mgr attended the Trash AHTG meetings and provided feedback from West Valley cities on implementation strategy and tools. Topics this year included discussion about the proposed content of a Trash Control Measures Tool Box and a Trash Sources and Pathways illustration.	WVCWP Mgr attends AHTG – WVCWP Mgr to lead follow-up discussions at West Valley monthly meetings
Trash Work Plan	Pilot Demonstration	Participate in Trash Ad Hoc Task Group and assist Program staff in implementing a Pilot Demonstration Project which focuses on documenting type and volume of trash potentially conveyed through a storm drain system.	The West Valley Clean Water Program Mgr attended the Trash AHTG meetings and provided input on behalf of West Valley cities regarding potential pilot demonstrations.	WVCWP Mgr with input from West Valley Municipal Stormwater Reps
Trash Work Plan	Identify and Prioritize Problem Areas	Continue to Identify and prioritize trash problem areas and other potential sources that may contribute to trash problems in urban streams and waterways. Revise problem area list, based on surveys & other relevant information.	West Valley's list of trash problem sites was revised after conducting assessments in FY06-07. WVCWP staff removed litter at several new locations where excessive litter was found near creeks or waterways. A review of the site list was conducted. This resulted in replacing several of the sites originally listed as West Valley's trash "problem areas" with sites that had a more direct connection to urban streams or waterways. A few sites were replaced because a few years of monitoring and cleanups demonstrated that trash there was less of an issue than originally believed; staff resources should be concentrated on other sites in order to be effective. Assessment also resulted in adding several new sites where trash appears to be more of an on-going problem.	WVCWP Staff to coordinate with municipal staff

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party
Trash Work Plan	Evaluations	Continue to conduct trash evaluations in a subset of local trash problem areas using the using the Program's Urban Rapid Trash Assessment (RTA) protocol and/or the KAB Litter index.	WVCWP staff conducted **51 KAB** assessments at the identified sites and listed problem areas in West Valley communities. The number of assessments included: Campbell (23), Los Gatos (11), Monte Sereno (13), and Saratoga (4). Although KAB monitoring usually is limited to drive-by evaluations of a site, several KAB assessments were conducted simultaneously with removal of trash and debris by WVCWP staff. The *Trash Problem Area Activity* reports for each city are included at the end of this report section. WVCWP staff and citizen volunteers also conducted **10 urban rapid trash assessments (RTA)** at listed trash problem areas in Campbell (5), Los Gatos (2) and Saratoga (3). All RTA site assessments included removal of trash and debris by WVCWP staff and volunteers.	WVCWP Staff to coordinate with WV Municipal Staff and Citizen Volunteers
Trash Work Plan	Management Practices	Continue to identify and implement trash control measures, where practical and feasible, to reduce trash and debris.	To address litter and illegal dumping problems, WVCWP staff have incorporated a trash topic into every element of public education and outreach. West Valley inspectors for industrial / commercial and construction sites have been asked to be on the lookout for litter and illegal dumping. Inspectors have been told to consider an accumulation of debris at a site to be a violation of stormwater requirements and to refer such sites to the Stormwater Discharge Inspector. Other trash management activities conducted by West Valley communities include monitoring identified problem areas, holding volunteer cleanup events at problem sites, notifying Caltrans when exceptional litter or debris problems are noticed along highways or freeway ramps, conducting removal of trash and litter as needed at sites within municipal jurisdiction and removing trash at some sites in Caltrans' jurisdiction.	WVCWP Staff to coordinate with municipal staff

Campbell ♦ Los Gatos ♦ Monte Sereno ♦ Saratoga

FY 2006 - 2007 ANNUAL REPORT

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party
See PI/P – Citizen Participation	Monitoring/Citizen Participation	Continue to promote citizen participation program to monitor trash in local creeks. Submit trash tally sheets to Program staff (element of Creek Keeper's Program).	WVCWP staff conducted three trash monitoring and cleanup events with student and citizen volunteers. The City of Campbell's Public Works Director, Public Works Superintendent and Mayor partnered with Caltrans, to hold a City-wide pick-up event on 5/19/07. Campbell's event included work on littered areas along railroad tracks and the freeway. Volunteers at all clean-up events were taught to categorize and tally (monitor) debris collected. Participants worked in groups using WVCWP trash tally forms to collect the data that helps identify trash sources and management actions. Summary sheets for these events are included at the end of this report section. Los Gatos held a cleanup event on Saturday (4-21-07). Fourteen volunteers spent several hours picking up roadside debris in downtown Los Gatos. They removed twelve bags of garbage from gutters, sidewalks, catch basins and planters. Most of the debris was leaves but other items included CDs, medicine bottles, lots of cigarette butts and egg cartons! Additionally, Los Gatos has "Adopt-a-Trail" volunteers who collected and monitored trash 6 times (every other month) alongside Los Gatos Creek Trail during FY06-07. A total of 16 bags of debris were collected, including plastic water bottles, power bar wrappers and pet waste bags.	WVCWP Staff to coordinate with municipal staff
Trash Work Plan	Report on Trash Mgmt Practices Implemented	Provide Program staff with specific information on trash management practices implemented within the city's jurisdiction using program-wide standardized format.	WVCWP staff used SCVURPPP's standardized reporting forms to provide data on trash monitoring and management activities at the listed problem sites. *Trash Problem Area Evaluation Results* for each West Valley city, as provided by the Program, are included at the end of this report section.	WVCWP Staff to coordinate with SCVURPPP
Trash Work Plan	Data Collection	Submit Urban RTA Survey forms, trash tally sheets and any other data collection tool to Program staff.	KAB and Urban RTA forms for WV cities were submitted to SCVURPPP in July 2007 for Program-wide analysis and reporting.	WVCWP staff

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party
Citizen Participation	E-Waste Event	Safe Disposal of E-waste Provide an opportunity for citizens to participate in safe disposal of e-waste and mercury thermometers.	In response to last year's E-waste survey, local residents requested a second E-waste collection event for FY06-07. WVCWP staff partnered with United Datatech to collect electronic waste on 4-28-07. The community event was free and available to the general public. UDT guaranteed that all collected material would be recycled safely and would not be sent to foreign shores. The City of Saratoga provided the collection site. A total of 13,793 pounds of E-waste was collected and **170 drive-through participants** were served.	WVCWP staff and Municipal staff

Trash Inventory & Management Evaluation

Dumpster Area Inspections & Education for Local Businesses

The WVCWP Inspector checks the dumpster areas of the downtown restaurants in each of the West Valley communities for signs of illegal dumping or debris around open dumpsters. He provides urban runoff education as needed, including the importance of keeping dumpster lids closed, and locked if necessary. His method of informal visits and issuing *Notices To Comply* has helped to reduce the amount of trash-related dumpster violations over the past three years.

Educational Outreach to Students and Teachers in Local Schools

WVCWP staff responded to every opportunity to talk about trash and littering with students. The trash topic is always included in classroom Enviroscape presentations. This year a Saratoga private school (K-8) and parents partnered with WVCWP to hold a cleanup three weeks after WVCWP made presentations to 5th and 6th grade classes. In May and June, following WVCWP presentations, two local Kindergarten classes took a tour around their school to identify storm drains and to pick up any litter they could find.

Creek Keeper Events – Volunteer Participation - Trash Identification, Tallying & Pick-up

The WVCWP has been particularly successful from 2003 to 2007 recruiting student volunteers for creek cleanups and the task of trash tallying. Each event is opened with a brief talk on the trash problem affecting our creeks and Bay. Volunteers appear to be energized by the chance to make a difference. WVCWP talks include visual aids (enlarged photos of trash accumulation downstream, near the South Bay); these appear to make a major impression on volunteers. The WVCWP's trash tally form was designed to be easy for students to use. Categories on the form reflect the trash types that are most often found in West Valley locations. Trash summary forms which show tally sheets' totals for each cleanup event are included at the end of this report section.

Partnering with other Agencies to address the problems:

WVCWP's best chance for success in dealing with the trash problem is to partner with other agencies and work with a well-organized regional group. In January 2007, at the suggestion of Campbell's Public Works Director, WVCWP staff joined the Silicon Valley Anti-Litter Task Force (formerly called the Santa Clara County Litter Technical Advisory Committee). The meetings are led by SC County and the City of San Jose and have a large attendance. WVCWP staff participates in the Education Subcommittee meetings and Campbell's Public Works Director chairs the Finance Subcommittee. On May 19, 2007, the Silicon Valley Litter Campaign sponsored a well-publicized cleanup event called Great American Pick Up Day. WVCWP, on behalf of all West Valley cities, helped staff

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party

a site that was sponsored by the City of Campbell and joined volunteers that were supervised by Caltrans to collect freeway litter.

West Valley's Illegal dumping problem will be difficult to address without the help of law enforcement and other agencies. The City of San Jose has law enforcement staff that participates in the Silicon Valley Anti-Litter Task Force. The West Valley cities cannot afford Police or Sheriff Dept. staff time to enforce anti-litter laws. The environment around some WVC areas (quiet parking lots and sparsely populated roads which border creeks) appear to attract illegal dumpers from other cities, yet WVC law enforcement staff cannot continuously monitor these zones. For instance, the WVCWP Illegal Discharge Inspector responded to a call from a bicyclist who noticed several full trash bags dumped over the side of Prospect Road in Saratoga. When the Inspector visited the sparsely traveled site, he was forced to park the car on a narrow shoulder of road and could not descend the steep drop to where the trash had been tossed. Cleanup from this kind of dumping is too dangerous for WVCWP staff and municipal staff to address alone. Putting a stop to illegal dumping requires a regional and enforceable solution.

General Evaluation of Trash Management Activities

After several years of monitoring trash sites, WVCWP staff is familiar with the sites and the problems that need to be addressed. Two leading trash sources in West Valley communities are "Illegal dumping" and "vehicular litter" (found along highways, freeway-on-and-off-ramps, and smaller arterial roads). The type of litter that is retrieved is predominantly snack, food, beverage and other product packaging and cigarette butts. Several West Valley problem areas are in Caltrans' jurisdiction. In December 2006, the WVCWP Mgr called Caltrans about cleaning up 2 bags of trash dropped and scattered on Hwy 9 near a freeway ramp in Los Gatos. Caltrans responded that day.

Saratoga Creek at Big Basin Way and Sunnyvale-Saratoga Road is a heavily vegetated area that has been used for illegal dumping. It looks better than it did during FY05-06 because Saratoga's maintenance staff and Water District staff removed several illegally-dumped items including a gas water heater and large wrought iron fixtures from the creek banks. Last year the City's Code Enforcement Officer and the Sheriff's Dept agreed to keep an eye on the area. "No Dumping" signs have been posted in the parking lot area above the creek. The banks of the creek are very steep with litter lodged between trees and vegetation about 25 feet from the high-water line. WVCWP staff will continue to monitor and remove trash from the accessible areas at the edge of the downtown parking lot at least two times per year. This site remains one of Saratoga's prioritized problem areas.

While traveling to one of Los Gatos' listed problem sites, WV staff noticed another problem area near where Shannon Creek flows into Guadalupe Creek. Staff stopped to remove illegally-dumped items and collected several bags of debris from this rural setting along Hicks Road. A GIS map indicates that this area may not be within Town jurisdiction. However, the Town's maintenance crews said they would pick up debris if it is reported within Town limits and placed within the "right-of-way". This accumulation of dumped items along a rural road is an illegal dumping concern for all jurisdictions when the abandoned debris is hidden by natural vegetation and steep slopes and violators are not caught.

Mr. Bruce H. Wolfe
Executive Officer
San Francisco Bay Region
Regional Water Quality Control Board
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: Sunnyvale Urban Runoff Management Program FY 2006-2007 Annual Report

Dear Mr. Wolfe:

This report is submitted by the City of Sunnyvale, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's municipal storm water NPDES Permit. The report summarizes activities performed during FY 2006-2007 in accordance with the City of Sunnyvale's Urban Runoff Management Plan (URMP) submitted on September 1, 2005, which contains modifications to the performance standards from the original URMP first submitted in 1997.

The goals of this Annual Report are to: 1) concisely document implementation of the URMP during the past fiscal year; 2) evaluate program results for continuous improvement; and 3) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following Attachments:

A. Certification statement
B. ICID Elimination Activities
C. Industrial/Commercial Discharger Control Program
D. Public Agency Activities
   1. Public Streets, Roads, and Highways O&M
   2. Rural Public Works O&M
   3. Storm Drain O&M
   4. Water Utility O&M
   5. Corp Yard O&M
E. New Development Planning Procedures
F. Construction Inspection
G. Public Information and Participation
   - General Outreach
   - Targeted Outreach
   - Educational Programs
   - Citizen Participation
H. Pesticide Management Activities

I. Mercury Pollution Prevention Activities
J. Copper Action Plan/Nickel Action Plan
K. Trash Inventory and Management
L. Water Quality Monitoring
M. Staff Training Summary Table
N. Watershed Management Activities
O. PCB Plan Development
P. Watershed Measures: Sediment Impairment Studies
Q. Storm Water Permit Renewal Activities

No responses were required to the Regional Board's comments provided in July 2007 on the FY 05-06 annual report submitted by the City.

A summary of the City of Sunnyvale's Urban Runoff Program highlights and accomplishments are described below:

1) A significant amount of staff time and effort continues on efforts to implement the C.3 provisions of the permit for applicable projects (i.e., those that add or replace 10,000 square feet or more of impervious area), construction inspection, and beginning implementation of post-construction inspections as projects are completed. The first projects approved under the C.3 requirements are complete or are nearing completion, so only a few have undergone post-construction inspections. Reports on those projects inspected are included in this report.

2) The City revised its Storm Water BMP Guidance Manual to include the Applicable Project definitions, HMP applicability area maps, and Storm Water Management Plan guidance for applicants and 3rd party certifiers. It was reviewed and signed by the Directors of Public Works and Community Development as the primary C.3 - BMP guidance document for the City. In addition, staff solicited updated information for the Qualified Consultants list to review and provide 3rd-party certification of Storm Water Management Plans (SWMP) submitted by projects that must meet applicable requirements under the C.3 provision. After a careful review of their qualifications and their attendance at a training session on the City's project approval process and requirements provided by staff, consulting firms were added to the revised list of Qualified Consultants.

3. To help reduce impacts to storm water from vehicle washing activities, the City purchased two "Sudsafe" car wash kits that can be loaned to groups or organizations holding charity car washes. The kits are designed to block storm drain inlets and provide a sump pump to transfer collected vehicle wash water to discharge in landscaped areas. Publicity regarding the availability has been good, and public awareness about the kit's availability is increasing. Staff are also able to provide outreach to the groups borrowing the kits about water pollution prevention.

4) The PI/P Program continued with its effective outreach to local residents at the Sunnyvale Farmer's Market, school presentations, neighborhood and corporate fairs, pancake breakfasts,

and many other community events, providing a good venue for distribution of literature and 1:1 discussions with residents on the importance of and ways to prevent storm water pollution. Descriptions of these activities and their effectiveness are included in Attachment G.

5) With the assistance of a community volunteer, staff was able to complete two assessments (winter and spring) of sites in Sunnyvale East and West Channels and Stevens Creek using the Urban Rapid Trash Assessment methodology developed by SCVURPPP (based on the Regional Boards Rapid Trash Assessment model). Eighteen sites were inspected using the *Keep America Beautiful* methodology were inspected once this past year. Some sites were dropped from previous year's "hot-spot" list, as no litter problems had been observed for several years.

Additionally, City staff continued to coordinate with the neighboring cities of Mountain View, Cupertino, West Valley communities, the Santa Clara County, the Santa Clara Valley Water District and volunteers from the Steven/Permanente Creek Watershed Council to assess five sites along Stevens Creek. Results of these efforts are discussed in Attachment K.

Thank you for your review of this Annual Report. We look forward to receiving any comments you may have. If you have any questions regarding the materials submitted, please contact Kristy McCumby Hyland at (408) 730-7274.

Sincerely,

Lorrie B. Gervin, P.E.
Environmental Division Manager

IC/ID Elimination Activities

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment B
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source[1]	FY 06-07 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Illicit Connection & Illegal Dumping Elimination Activities					
	Effectiveness Evaluation of Enhanced Illicit Connection/Illegal Discharge (ICID) Reporting	Permit Prov. c.6.a.ii	Evaluate results recorded on the IC/ID standard reporting form for Type of Incident and Source of Incident. Use this information to identify new or improve current public outreach efforts in problem areas that are identified. Continue to collect data for enhanced IC/ID reporting. Report results in the Annual Report.	• The Pretreatment Program continues to review and discuss ICID reports on a monthly basis upon receipt and during staff tailgate meetings. The reports are reviewed to identify trends and areas that require public outreach or enforcement. • ICID reports indicate a continued decrease in the number of sanitary spills or leaks, with only two in FY 06/07. The decrease was first observed during FY 05/06 and can be attributed to the continued education and outreach to food service establishments (FSEs) and from the City Sewer Department continuing with a focused line stoppage preventive maintenance program. • The Pretreatment Program has continued its Sanitary Sewer Overflow (SSO) project that provides public outreach regarding grease disposal from high density residential areas. • The majority of ICIDs reported this year are from residential sources. Increased coordination with Public Outreach will be a focus on ways to communicate home improvement / construction BMPs to residents to avoid illegal discharges from these sources	Annually Report 09/07	Dave Grabiec, Laboratory/Pretreatment Mgr.

[1] Place where continuous improvement item is identified: e.g. Urban Runoff Management Plan (URMP); **WP 06-07** (last year's Sunnyvale work plan); **Permit Provision** from Order No. 01-024 and Revised Order No. 01-119; Program Work Plan (**PWP**) task number submitted to the Regional Board and identified for inclusion into co-permitees in work plans; or **Program** (task approved by the Management Committee for all co-permittees). The **P.S. Id.** column refers to the specific performance standard in the Sunnyvale URMP.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment B
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source[1]	FY 06-07 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
ICID-3a	Annual Training	URMP	Continue annual training for staff regarding IC/ID storm water inspection procedures, enhanced reporting requirements for ICID incidents, effectiveness evaluation and public outreach.	Pretreatment Program staff continues to receive training based on the availability of formal training events, trends noted from ICID reports, and database updates. • Pre-construction storm water treatment BMPs and storm water updates, permitting, and enforcement training has been completed by Pretreatment Program staff. FOG program and control classes were also attended. • See Attachment M for other staff training received.	Annually Report 09/07	Dave Grabiec, Laboratory/Pretreatment Mgr.
ICID-3.b	Restaurant IC/ID Reporting	URMP	Continue to study the effectiveness of Restaurant BMP materials. Note problem practices observed. Follow up with appropriate changes to educational materials and/or enforcement actions, as needed.	• Food Service Employees (FSE) continue to respond favorably to BMP information and poster BMPs provided in multiple languages (English, Spanish, Mandarin, Vietnamese, and Korean). • Familiarity with grease interceptors by FSE has further reduced problems.	Annually Report 09/07	Dave Grabiec, Laboratory/Pretreatment Mgr.
ICID-5a	Effectiveness Evaluation	URMP	Evaluate customer service/ responses to incidents/complaints. Determine effectiveness of program and suggestions for improvement through customer interviews and reviews of responses.	• All incidents of customer complaints were responded to within two business days of the complaint. An immediate response is the desired goal and typically happens if the ICID event is believed to be in progress. • The Pretreatment Program has received positive feedback from external customers when a follow-up call was made to the caller regarding the Program's response to the complaint. • Timely responses to ICID incidents by Pretreatment Program Industrial Waste Inspectors have been recognized by Public Works Divisions.	Annually Report 09/07	Dave Grabiec, Laboratory/Pretreatment Mgr.

Illicit Connection & Illegal Dumping Elimination Activities (cont.)						
ICID-5b	Performance Standard revision	URMP	Review the IC/ID Performance Standards with staff. Draft new performance standards, as necessary, to meet the needs identified in the effectiveness evaluation of the enhanced IC/ID program. Implement changes, as needed.	• The current ICID Performance Standards appear reasonable and attainable with staff, given that the amount of staffing and other related resources remains relatively equal. • Periodic review of the Standards will occur to ensure they are being met. • The Program has met all Performance Standards submitted in the latest Sunnyvale URMP revision dated September 1, 2005.	Annually Report 09/07	Dave Grabiec, Laboratory/Pretreatment Mgr.

2) Reporting Data (See Enhanced Reporting Tables for IC/ID Incidents in Attachment C, Appendix 1.)

- ***Number of incidents:***

Twenty-six separate incidents were reported to the Pretreatment Program in FY 06-07; which is approximately a 14 % decrease from the number of separate incidents reported in FY 05-06 (30).

- ***Types of pollutants and pollutant sources:***

The majority (50%) of the sources of the incidents were from residential sites (13). Smaller numbers of incidents came from commercial (5), food facilities (3), and industrial facilities (2), and (3) "other" sources...

Of the incidents reported from residential pollutant sources, discharges from pools / spa / fountains (2) declined from the previous year's count of 6. Vehicle maintenance related issues (3), and paint discharge (3), were the pollutants found with the highest incidences. The number of incidents reported in FY 06-07 from residential pollutant sources (13), is less than the number reported in FY 06-06 (17), which is consistent with a three year decline in the number of residential source incidents.

Of the incidents reported from commercial, food facilities, "other", and industrial facilities pollutant sources, ten pollutants were identified including Dumpster Discharge, Paint, Saw Cutting Slurry, Sanitary Spill, Dumping, Hazardous, Misc. Incident, Vehicle Washing, Surface Cleaning, Vehicle and Equipment Leaking, and Oil and Grease.

- ***General locations (certain industrial areas or neighborhoods where incidents occurred or were incidents randomly spread out?)***

Most incidents were randomly spread out through the City, with no clusters identified from the data.

- ***Number of incidents reported by citizens or employees:***

Seven incidents were reported by citizens. Fourteen incidents were reported by interdepartmental employees. One incident was found by an inspector. Four incidents were reported by "other" or "other agency".

Follow-up actions:

- ***Number of investigations:***

Eighteen incidents where the discharge required a correction be made were followed-up with an inspection to ensure compliance. Eight of the incidents were either resolved onsite or did not require follow-up.

- ***Which enforcement actions were taken and to what level?***

Eight Warning Notices were issued. Ten Verbal Notices were given. Eight incidents required no enforcement actions, as the violations were either not found or were corrected on site. Half of the verbal notices were issued to residential and commercial facilities regarding the owners or contractors working at a site not following the City's BMPs. All of the contacts received appropriate outreach BMPs.
No notices of violation were issued in FY 06-07.

3) Response to Regional Board Comments on ICID section of FY 05-06 Annual Report.

No comments were received on this section.

4) Evaluation of ICID Program in FY 06-07:

How well did ICID program work?

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment B
Municipality: Sunnyvale

The ICID Program in Sunnyvale continues to exceed expectations based on the performance standard requirement for ICID response time. The number of overall incidents decreased from the previous year, while the reporting of those incidents from within interdepartmental sources has increased significantly. This indicates a greater awareness of City staff, with more people watching out for potential ICIDs, which at the same time are becoming less frequent.

What caused the most trouble?
ICID events occurring at residences appeared to offer a continuing challenge. Because the response and education for residential ICID events typically occurs after the fact, an increased awareness is needed for the general population in order to prevent ICIDs from occurring.

Is there a particular geographical area that causes the most problems?
Most incidents were randomly spread out through the City, with no clusters identified from the data.

Are problems getting better or worse?
The related problems are being reduced. Improved coordination with the Public Works Field Services, Street Maintenance and Sewer Maintenance Divisions, improved public outreach efforts, and more stewardship devoted to the inspector's areas are becoming solutions to previous challenges.

Describe some potential causes:
An increased awareness throughout the City through educational pieces written and communicated through a variety of media has resulted in increased reporting from these sources. An increased presence at Food Service Facilities by inspectors has resulted in increased compliance by the facilities. Language barriers continue to hamper educational efforts, most specifically for residential sources, which include contractors working in residential areas.

What, if anything will we do differently in the next FY?
The Pretreatment Program will continue with Food Service Facility inspections at increased frequencies. During these inspections, the managers / owners will be educated on proper grease interceptor maintenance and functionality. Hands-on demonstrations with grease removal devices has proven very effective in educating FSE staff in proper operation and maintenance of these devices, and is resulting in decreased incidences of restaurant source ICIDs. In addition, inspections for Automotive Facilities will be increased. Pretreatment staff will work with Public Outreach to continue and improve education for residential sources, focusing on home improvement and home construction pollutant sources.

FY 06 - 07 Annual Report

Attachment C

Industrial/Commercial Discharger Control Program

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment C
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 06-07 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Industrial/Commercial Discharger Control Programs						
ICD-7.a	Annual Training	URMP	Continue annual training for staff regarding industrial/commercial storm water inspection procedures, enhanced reporting requirements for ICD inspections, effectiveness evaluation and public outreach.	Pretreatment staff attended some storm water sessions of the Annual CWEA P3S Conference. Pretreatment staff attended several SCVURPPP training sessions regarding storm water requirements for new and redevelopment projects. Pretreatment Program supervisors continue to evaluate IC/ID and IND reports and database information to identify training needs. See Attachment M for specific training completed by City personnel.	Annually Report 09/07	Dave Grabiec, Laboratory/Pretreatment Mgr.
	Enhanced Industrial/Commercial Discharger (ICD) Reporting	Permit Prov. C.6.a.i	Collect data for enhanced ICD reporting. Discuss results of enhanced reporting with staff. Coordinate with interdepartmental divisions to perform preventative maintenance and education to eliminate sanitary sewer overflows (SSOs).	• Enhanced reporting data was submitted to the SCVURPPP. See Appendix 1 of this attachment for IND report information. • IND report information is discussed at weekly tailgate meetings to assess outreach or enforcement needed and program effectiveness.	Annually Report 09/07	Dave Grabiec, Laboratory/Pretreatment Mgr.

2) Reporting Data

- ***Number of inspections conducted, grouped by category of industry/commercial business:***

Automotive	Construction/ Building	Dry Cleaner	Electric/ Electr. Components	Food Service	Machine Shop	Cleaning Services	Other	**Total**
108	2	0	3	252	6	0	122	**493**

See Attachment C, Appendix 1 (pages 25 A-F) for IND inspection summary report from the Program.

How many problems were found during *inspections?*
Of the 493 inspections completed, there were 20 (Level 1) verbal notices given, 5 written Warning Notices, and 4 written Notices of Violation.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment C
Municipality: Sunnyvale

***Describe the kinds of problems found*:**
Twenty-nine storm water violations were found through regular inspections of industrial and commercial facilities for FY 06/07. Eleven violations were found at automotive facilities, 1 at a Construction / Building company, 3 violations for commercials categorized as "other", and 14 at food service facilities. The automotive facility violations included BMP violations such as car washing rinse water potentially or actually reaching the stormdrain, or small spills of fluids. The food service violations were typical restaurant problems such as improper disposal of mop water to the parking lot or stormdrain, leaking or uncovered tallow or trash bins, and mat rinsing outside, and in one case, an overflowing interceptor.

Numbers of inspections that were the result of citizen complaints or employee tips?
None

How many of the problems received follow up actions?
All of the violations received a follow up inspection within 30 days to verify compliance. All of the violations that received warning notices or notices of violation were corrected within the time frame of 30 days. Facilities with known repetitive problems receive drive by inspections at greater frequency to check on storm water compliance.

Describe enforcement actions that occurred and at what level:
There were no enforcement actions taken beyond the written notices of violation this year. Twenty verbal notices were given, and 5 written warning notices and 4 notices of violation were given. The written notices were given to facilities where an actual discharge to the stormdrain was observed. Verbal notices were given in cases where a potential discharge to the stormdrain was observed.

Were enforcement actions spread evenly throughout the categories or were they focused in certain areas?
Enforcement actions were given mostly in the food service and automotive categories. This is consistent with past data and trends within the City. The higher number of violations found at restaurants and automotives has both to do with higher turnover, and the number of inspections completed. Restaurants and automotives are inspected more frequently, and there are more of them; therefore a higher number of violations observed are to be expected.

How many problems were resolved?
All problems were resolved within 30 days.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment C
Municipality: Sunnyvale

3) Response to Regional Board Comments on ICID section of FY 05-06 Annual Report.
No comments were received on this section.

4) Evaluation of IND Program in FY 06-07: ***Provide comments/bullets in the following areas:***

Where were the most violations found?
Most violations were found either in car wash areas of automotive facilities, or in trash enclosure / grease interceptor / tallow areas for restaurants.

Is there a particular location or industry that is troublesome?
There was no single location or industry that was troublesome. Automotive and food service facilities in general were recorded as having most of the violations. There was no specific geographical area within the City where more problems were noted.

Are things getting better or worse?
Based on the data, storm water violations were up 2% from last year for industrial / commercial facilities. The increase in violations is primarily in the automotive category. The percentage of compliant food service facilities is basically unchanged from last year.

What are potential causes for the improvement or the problems?
Over the last four years, the Pretreatment Program has been inspecting restaurants on an annual basis as part of the Fats / Oil / and Grease Control Program. These inspections include storm water inspections and outreach as well as Pretreatment inspections. The increased visibility and the increased outreach materials distributed could both be contributing to more compliant facilities. The Program has been distributing outreach materials in more languages, including Chinese, Korean, Spanish and English. The facility owners seem to appreciate the improved communications. Frequent turnover continues to be a challenge in maintaining compliance with food service facilities. The Pretreatment Program will explore more efficient ways to identify new restaurants and / or new owners of existing restaurants to communicate relevant regulations and education to those facilities.

The number of automotive facilities inspected this year compared to last increased approximately 50%. The increased number of inspections performed in this category could lead to an increased number of violations found.

Are the enforcement actions effective? Why or why not?

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment C
Municipality: Sunnyvale

The Pretreatment Program has been successful with obtaining compliance using enforcement actions consistent with out Enforcement Response Plan. In all cases, for FY 06/07, these enforcement actions for storm water violations did not escalate beyond a written Notice of Violation. The focus of the Pretreatment Program has been to build a professional respectable relationship with the commercial businesses by promoting partnerships and an understanding of all aspects of storm water and water quality protection. This relationship has been achieved through personal communications, outreach efforts, and the local storm water ordinance. The Storm Water Ordinance also contributes to the effectiveness of enforcement actions, in that all actions are backed up with specific sections of the ordinance pertaining to the violation(s), and applicable penalties that could be levied.

What will we do differently next year?

The Pretreatment Program will focus outreach efforts on the areas that were identified as having enforcement activities and to look at trends that will help facilitate future public outreach efforts. The Program continues to explore Restaurant BMPs in other languages for possible outreach as they have proven effective in the languages available in the past. In addition, the Pretreatment Program will continue to explore opportunities to communicate with other City Departments such as the Public Works, Field Services Division including Street and Sewer Maintenance and the Trees and Landscape Division. Communications with these divisions of Public Works leads to increased awareness of storm water issues, and could lead to increased inspections by the Pretreatment Program resulting from identification of potential problems from other Divisions.

What priority industries or industrial/commercial zones will be targeted for next year?

The Pretreatment Program will focus the majority of their effort on the automotive and food service facilities. The Pretreatment Program will look into developing or obtaining updated BMP outreach material for Automotive Facilities, as these have not been updated in several years. In addition, commercial zones that have high density residential complexes will be targeted for inspections and outreach pertaining to sanitary sewer spills, blockages, and car wash areas.

City of Sunnyvale

FY 06 - 07 Annual Report

Attachment D-1

Public Streets, Roads, and Highways Operation and Maintenance

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007Annual Report
Attachment D-1
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 06-07 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Public Streets, Roads, and Highways Operation and Maintenance					
ST-1	Use of O&M Pollution Control Measures	URMP	Continue full implementation of O&M measures. Report on implementation in Annual Report.	O&M Measures were implemented on a daily basis throughout the year, with all Field Services staff receiving training on the measures.	Annually Report 09/07	Tony Pineda, Street Mnt. Sup.
ST-2	Record Keeping	URMP	Continue to track incidents that Street Maintenance staff responds to. Notify Pre-treatment Program of ICID incidents that may impact storm drains or water quality. Include staff training on enhanced ICID reporting requirements.	No incidents were reported by Field Services staff during FY 06/07. Annual training on incident reporting process was conducted on September 12 and 13, 2006. Storm Water Response Cards were again passed out to staff with information on common types of problem discharges that could be observed, as well as contact numbers to phone in complaints.	Annually Report 09/07	Tony Pineda, Street Mnt. Sup. & Dave Grabiec, Lab./Pretreat. Mgr.
ST-6	Streets and Roads O&M	URMP	Annually review and evaluate effectiveness of O&M pollution control measures and BMPs.	Streets and Roads O&M measures/BMPs for storm water pollution prevention were discussed at tailgate meetings for staff training. SOP review was not deemed necessary this year since they were revised three years ago and are still current.	Annually Report 09/07	Tony Pineda, Street Mnt. Sup.

2) Response to Regional Board Comments on Streets and Roads section of FY 05-06 Annual Report:
No comments were received on this section from the Regional Board staff.

3) Evaluation of Streets & Roads Activities in FY 06-07:

List BMPs from the performance standards that were evaluated this year and who evaluated them

No BMPs were evaluated this year, since evaluation was done three years ago when SOPs were revised and no additional need for revision came up during the year. Staff believes current SOPs are still up to date.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007Annual Report
Attachment D-1
Municipality: Sunnyvale

Describe the evidence that shows that contractors were or were not fully implementing BMPs (list sources: e.g., citizen complaints, staff drive-by inspections, other?)

Field Services staff only deals with contractors when slurry-sealing city streets. While the work is carried on by contractor forces, City staff is present most of the time, inspecting the work done and making sure that all applicable BMPs were implemented as per specifications.

Which staff are receiving training and who does not receive it?

All Field Services' field staff and their supervisors receive training. Only administrative personnel do not receive training.

City of Sunnyvale

FY 06 - 07 Annual Report

Attachment D-1 – Appendix 1

Street Sweeping Data Collected for FY 06-07

Santa Clara Valley
Urban Runoff
Pollution Prevention Program

Attachment D-1, Appendix 1

FY 2006-2007 Monthly Record Keeping Form

Month and Year: FY 06/07

Agency: City of Sunnyvale

Completed by: Valeria Rose **Date:** 7/2/07

STREET SWEEPING	Volume of material collected (cubic yards)	Miles swept* (curb miles)
1. Sweeping		
Residential Areas:		
Broom		
Regenerative Air	6,327	10,478
Vacuum		
Commercial Areas:		
Broom		
Regenerative Air	1,914	4,290[1]
Vacuum		
Industrial Areas:		
Broom		
Regenerative Air		(1)
Vacuum		
Other Areas Swept: (e.g., parking lots, major arterials)		
Broom		
Regenerative Air		(1)
Vacuum		
TOTAL	8,241	14,768

2. Have there been any changes in your street sweeping program?
(efforts to have parked cars removed, changed sweeping frequency, new equipment, significant downtime, etc.)
Sweeping schedule in FY 06/07 was once a month in residential areas, more frequently in commercial areas. When requested, City staff will post "No Parking" signs to remove parked cars in problem areas. Frequency is increased during heavy leaf drop season, and returned to reduced schedule during other seasons.

LEAF REMOVAL

Volume of leaves removed by City/Town crews: 4,160 cubic yards

Leaves bagged by residents and picked up by your City/Town: N/A bags

Check box if you have a yard waste collection program: ☒ Volume of yard waste collected: TBD tons ~~cubic yards~~
(Sunnyvale does not track volume, just weight)

Check box if you do not have a leaf removal program other than routine street sweeping or yard waste collection: ☐

* Report total miles covered by sweepers including areas operated in tandem or repeated.

[1] These areas are all swept together, no individual numbers are available.

City of Sunnyvale

FY 06 - 07 Annual Report

Attachment D-2

Rural Public Works Operation and Maintenance

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment D-2
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 06-07 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Rural Public Works					
	Rural Public Works Activities	Permit Prov. C.5	Implement applicable Rural Public Works Performance standards and BMPs. Continue education of Parks and Rec. and Field Services staff regarding rural PW BMPs and performance standards.	Staff training on Rural PW performance standards occurred on September 12 and 13, 2006. It also included training on BMPs in other streets and roads annual training. No maintenance by PW staff was required this year.	Ongoing Report 09/07	Kristy McCumby, Environmental Specialist, Parks / Rec. (Scott Morton) & Public Works (Tony Pineda)

2) Response to Regional Board Comments on Rural Public Works section of FY 05-06 annual report:
No comments were received on this section from the Regional Board.

3) Evaluation of Rural Public Works Activities for FY 06-07:

Evaluate where this element applies to your jurisdiction and what activities have been identified as being subject to the Performance Standard?

The limited portion of the San Francisco Bay Trail maintained by the City of Sunnyvale has been identified as the only area where the Rural Public Works performance standards apply. Since the City is virtually built out, there are no longer rural areas (unpaved or paved streets without curbs and gutters) where these requirements may apply otherwise. The area maintained by the City extends from the border of the Lockheed property in the west to Baylands Park in the east.

Maintenance performed in FY 06-07?

There were no maintenance activities performed by PW staff during FY 06-07 on the San Francisco Bay Trail.

City of Sunnyvale

FY 06 - 07 Annual Report

Attachment D-3

Storm Drain Operation and Maintenance

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment D-3
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 06-07 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Storm Drain System Operation and Maintenance						
SD-5	Storm Drain O&M	URMP	Annually review and evaluate effectiveness of O&M pollution control measures	O&M measures were discussed by staff during Tailgate meetings through the year, and no O&M changes were deemed necessary. No changes were made either to the Corporation Yard Storm Water Pollution Prevention Plan, which was updated during FY 05-06.	Annually Report 09/06	Jim Craig, Superintendent of Field Services
SD-3	Effectiveness Evaluation	URMP	Include O&M Performance Standard Implementation discussion in staff training; summarizing feedback in written form.	Evaluations made during tailgate discussions with staff concluded that no improvement of current standards was needed at this time.	Annually Report 09/07	Jim Craig, Superintendent of Field Services
SD-2	Reporting of Observed ICID Evidence	URMP and Permit Prov. C.6.a.ii	Train maintenance staff on procedures to notify Pretreatment Inspectors about observed ICID incidents and assist with the collection of data needed for enhanced reporting.	PW Environmental Division staff included training on the Incident Response Card with Maintenance Staff to assist with the collection of information needed about IC/ID incidents at both the September 2006 and June 2006 staff training sessions.	Annually Report in 09/07	Sarah Scheidt, Sr. Indust. Waste Insp. & Jim Craig, Superintendent of Field Services

2) Response to Regional Board Comments on Storm Drain O&M section of FY 05-06 Annual Report:
No comments were received on this section from Regional Board staff for FY 05-06.

3) Evaluation of Storm Drain O&M Activities in FY 06-07:

Describe BMPs that were evaluated this year. (See performance standard for BMP lists)

No BMPs were evaluated during FY 06/07, since evaluation done three years ago when SOPs were revised was found to be still current.

City of Sunnyvale

FY 06 - 07 Annual Report

Attachment D-4

Water Utility Operation and Maintenance

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment D-4
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 06-07 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Water Utility Operation and Maintenance						
WU-1	Inventory of Key O&M Activities	URMP	Inventory all key water utility O&M activities to identify routine and unplanned non-storm water discharges	Inventory was performed during FY 06/07, and updated SOPs were generated, including SOPs for recycled water. (See WU-2 below.)	Ongoing Report O9/07	Jim Craig, Sup. of Field Services & Val Conzet, Water PW Sup.
WU-3	Staff Training	URMP	Provide staff training on the regulatory requirements of the URMP and the use of the WUPPP.	Staff continuously reviews requirements during tailgate meetings, and training relating to URMP and WUPPP was provided in April 11, 2007.	Ongoing Report 09/07	Jim Craig, Sup. of Field Services & Val Conzet, Water PW Sup.
WU-5	WUPPP	URMP	Annually review and evaluate effectiveness of Water Utility Pollution Prevention Plan. Use both staff and contractor (if appropriate) feedback.	WUPPP was discussed at tailgate meetings with staff and a review was not deemed necessary this year.	Annually Report 09/07	Jim Craig, Superintendent of Field Services & Val Conzet, Water PW Sup.
	Performance Standard Review and Revision	URMP	Participate in SCVURPPP Work Group that will be formed to update the Water Utility Operation and Maintenance Performance Standards	No work group was formed this year by SCVURPPP, due to current Municipal Regional Permit activities. Water Utility performance standards will undergo a review once the MRP language is final.	TBD Report 09/07	Val Conzet, Water PW Sup. Support: Kristy McCumby, Env. Specialist.
WU-2	Pollution Control Measures Implementation	URMP	Review and update SOPs	SOPs were updated during FY 06/07, and new SOPs were issued for recycled water. The updated SOPs were placed in the City's URMP and copies are available upon request.	Begin 07/06 Report 09/07	Val Conzet, Water PW Sup. Support: Kristy McCumby, Env. Specialist.

2) Response to Regional Board Comments on Water Utility O&M section of FY 05-06 Annual Report:
No comments were received from the Regional Board on this section.
3) Evaluation of Water Utility O&M Activities in FY 06-07:
What key O&M activities did you inventory for routine and unplanned discharges as per Performance Standard #1?

A review and update of all Water Utility SOPs was performed during FY 06/07. New SOPs for recycled water were developed and placed in the City's URMP.

City of Sunnyvale

FY 06 - 07 Annual Report

Attachment D-5

Public Agency Activities: Corp Yard

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment D-5
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 06-07 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Corporation Yards Operation and Maintenance (Including Parks Division)						
Corp Yard SWPP	Staff Training	URMP	Hold annual Public Works staff training regarding the SWPPP for Corporation Yard.	A one-hour training session was provided by Meredith Durant (Kennedy/Jenks) to all Field Services staff on 4/11/07. Meredith also reviewed operational improvements made based on her facility inspections and hazardous materials handling.	Annually Report 09-07	Jim Craig, Superintendent of Field Services
Corp Yard SWPP	Staff Training	URMP	Hold annual Parks and Recreation staff training regarding the SWPPP for the Corporation Yard	Training was provided to Parks and Rec. staff on 11/16/06 and covered the updates to the revised Corp Yard SWPPP of June 2006.	Annually Report 09/07	Curtis Black, Parks Superintendent With assistance from the Environmental Division of Public Works
Corp Yard SWPP	Annual Meetings with O&M Supervisor	URMP	Meet annually with URMP Coordinator /staff and CY supervisors on progress and problems in implementing BMPs at the Corporation Yard.	A meeting was held in September 12 and 13, 2006 between PW Environmental Division staff and Field Services supervisors and staff to prepare for the upcoming wet season.	Annually Report 09/07	Jim Craig, Superintendent of Field Services

2) Response to Regional Board Comments on Corp Yard section of FY 05-06 Annual Report:
No comments were received on this section from the Regional Board.

3) Evaluation of Corp Yard Activities in FY 06-07:

List BMPs from the performance standard that were evaluated this year and who evaluated them

No BMPs were evaluated this year, since evaluation was done three years ago when SOPs were revised, and the Corporation Yard SWPPP updated in FY 05-06. No additional need for revision came up during the year.

City of Sunnyvale

FY 06 - 07 Annual Report

Attachment E

New Development Planning Procedures

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment E
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 06-07 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
New Development and Construction Controls -- Planning Procedures						
PL-2	Site Design Guidance to Developers	URMP	Provide information and guidance material to developers early in the project development process regarding site design requirements for stormwater pollution prevention and treatment.	Information and guidance material regarding storm water pollution prevention and treatment is discussed with developers during the early development stages of their project and draft SWMPs are required as part of their application submittal.	Ongoing Report 09/07	Jamie McLeod, Assoc. Planner Support: Kristy McCumby, Env. Spec.
PL-10	Staff Training	URMP	Provide staff training (PW and CDD) on policies, design guidelines, and pre- and post construction BMPs and control measures.	• Staff is updated on a quarterly basis on any changes in the program, and staff receives annual refresher training from the Environmental Specialist. • New staff members are provided with a one-on-one SWMP training as part of their orientation. • Staff training was provided this year on the revisions to the City's Storm Water Quality BMP Guidance Manual for New and Redevelopment Projects. One-hour sessions with staff responsible for project reviews and inspections were held in February and March, 2007. See Attachment M for training attendance.	Annually Report 09-07	Jamie McLeod, Assoc. Planner Support: Kristy McCumby, Env. Spec.
PL-11	Planning Procedure Performance Measures	URMP	Review performance measures in order to evaluate effectiveness and identify any changes that are needed.	Performance measures are reviewed n an annual basis to determine program effectiveness and opportunities from improvement. No changes were identified for this year.	Annually Report 09-07	Jamie McLeod, Assoc. Planner
PL-8b	Effectiveness Evaluation	URMP	Include Planning Procedures Performance Standard Implementation discussion in staff training; summarize feedback in written form.	The annual staff training includes information on any program changes related to enhancing program implementation. Feedback was received verbally and no changes were needed.	Annually Report 09-07	Jamie McLeod, Assoc. Planner

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment E
Municipality: Sunnyvale

	C.3 b Development Project Approval Process					
	Revise URMP Planning Procedures Perf. Standards	Order 01-119 PWP C.3 b.1	Review Program Guidance as it becomes available. Identify new Planning Procedures Performance Standards and/or revise existing standards as needed, based on Program guidance.	New program guidance is reviewed when received, and the program procedures and materials are revised as appropriate. (SMWP manual recently updated to reflect changes in program and program improvements.)	Ongoing Report 09/07	Jamie McLeod, Assoc. Planner and Kristy McCumby, Env. Spec.
	C.3 b Development Project Approval Process (cont.)					
	Project Review Process Training	Order 01-119 PWP C.3 b.3	Annually train Planning and Public Project staff on C.3 provisions, goals, and changes in the approval process and use of appropriate tools.	All Planning and Building staff, Public works CIP staff, and Pretreatment inspectors who do post-construction BMP inspections received an hour of training on the revisions to the Sunnyvale Storm Water BMP Guidance manual in February and March of 2007. The C.3 provision requirements, the City's project approval process, HMP applicability areas, coordination between departments and divisions and ways improve communication were discussed.	Annually Report 09/07	Lead Jamie McLeod, Assoc. Planner & Gordon Blancher Build. Inspector Support: Nasser Fakih & Kristy McCumby
	C.3.c Requirements for Group 1 and Group 2 Projects					
	Collect information for "Enhanced Reporting"	Order 01-119 PWP C.3 c.1	Collect information on each project (both public and private projects) covered by the enhanced performance standard for enhanced annual reporting requirements. Projects that add or replace over 10,000 sq ft of impervious area are now reported.	Data is collected on projects covered by the enhanced performance standard for enhanced annual reporting requirements. And relevant projects (add or replace over 10,000 sq ft of impervious area) are reported. (See Table 1, Parts 1 and 2 of this Attachment for data collected in FY 06-07)	Ongoing Report 09/07	Jamie McLeod, Assoc. Planner (Private Projects) & Nasser Fakih PW (Public Projects)

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment E
Municipality: Sunnyvale

	C.3.e Operation and Maintenance of Treatment BMPs					
	Operation and Maintenance of Treatment BMPs	Order 01-119 PWP C.3 e.1	Continue to track information about treatment BMPs installed at approved projects that add or replace 10,000 sq. ft. of impervious area. Lists of properties, type of treatment BMP, and operators responsible for BMP maintenance will be tracked.	The required information is tracked on treatment BMPs installed on approved projects that add or replace 10,000 sq. ft. of impervious area. Information is provided to Pretreatment staff to assist with post-construction inspections.	Ongoing Report 09/07	Lead: Jamie McLeod, Assoc. Planner & Gordon Blancher Building Insp. Support: Public Works, Env. Div. Staff
	Long-term Maintenance of Treatment BMPs	Order 01-119 PWP C.3 e.3	Implement model agreement language for O&M of treatment BMPs to meet Sunnyvale needs. Incorporate requirements for long-term maintenance for all applicable projects (those that add or replace more than 10,000 sq. ft of impervious area).	• In October 2005, SMC 12.60 was amended so that post-construction BMPs approved for all applicable projects must provide for their long-term maintenance. • Currently long-term maintenance requirements are included as Conditions of Approval and will continue to be incorporated as part of the project approval process.	Ongoing Report 09/07	Lead: Sarah Scheidt, Support Jamie McLeod, Assoc. Planner & Gordon Blancher, Bldg Insp. Coord.
	C.3.e Operation and Maintenance of Treatment BMPs (cont.)					
	Effectiveness Evaluation of Inspection of Treatment BMPs	Order 01-119 PWP C.3 e.4	Review and evaluate the inspection procedures for treatment BMPs that verify the O&M being performed by the responsible party.	• Worked with Program to revise information collected from post-construction inspections, when requested. • As more post-construction inspections are completed, staff is finding that there is a significant learning curve for property owners and property managers. Efforts are being made to educate them as soon as possible after project completion, then work with the businesses or Home Owners Associations to better implement the O&M required for the BMPs.	Ongoing Report 09/07	Sarah Scheidt, Sr. Industrial Waste Inspector
	Annual report of treatment BMPs and ongoing verification program	Order 01-119 PWP C.3 e.6	Collect information for the September 2007 Annual Report regarding treatment BMPs inspected in FY 06/07, inspection results, and any follow up, corrections, or enforcement.	Information for the September 2007 report has been collected in a Microsoft Excel format and submitted to the Program. A copy of the table is also included in Table 2 of this section	Ongoing Report 09/07	Sarah Scheidt, Sr. Industrial Waste Inspector

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment E
Municipality: Sunnyvale

	C.3.f Hydromodification Management Plan					
	Implementation of HMP as required for projects that add or replace one-acre or more of impervious surface.	Order 01-119 PWP C.3 f.3	Implement HMP requirements for projects located in the HMP applicability areas identified in Sunnyvale. Projects must meet the impervious surface size threshold of the HMP and have the potential to cause increased erosion or other related impacts to non-exempt waterways.	The parcels that meet HMP implementation criteria within Sunnyvale's jurisdiction have been identified on maps in the City's Storm Water BMP Guidance Manual. HMP actions for parcels that meet the size threshold will be applied, if the sites are redeveloped. There were no projects meeting the size threshold in the HMP applicability areas this FY.	Ongoing Report 09/07	Lead: Planning and PW/ PW Env. Division staff
	C.3.g Waiver and Compensatory Mitigation Program					
	Local waiver program	Order 01-119 PWP C.3 g.2	Continue tracking information on any projects with a Compensatory Mitigation Program approved by the City. Include project name, location, type, percent impervious surface, reasons for and terms of the waiver, and the alternative benefit project and completion date	No projects requested an alternative compliance with a compensatory mitigation program in FY 06-07.	Ongoing Report 09/07	Lead: Planning, and PW Staff (TBD) Support: Lorrie Gervin/PW Env. Div. staff
	C.3.h Alternate Certification					
	Identify projects that have been certified by other parties	Order 01-119 PWP C.3.h	Summarize those stormwater management plans certified by a firm listed on the Qualified Consultants List the City developed in the Annual Report.	• All approved private projects that add or replace 10,000 square feet of impervious area undergo a third-party review of the Storm Water Management Plans (SWMPs) submitted as part of their application package and as finally approved for Building Permit issuance. • A variety of treatment BMPs are selected based on the site characteristics. These are described in Attachment E, Table 1, parts 1 & 2. • The Qualified Consultants List developed by the City (updated in 2007) is included in Table 3 of this Attachment.	Ongoing Report 09/07	Lead: Jamie McLeod Assoc. Planner Support: Kristy McCumby, PW/Env.

Municipality: Sunnyvale

	C.3.f Hydromodification Management Plan					
	Implementation of HMP as required for projects that add or replace one-acre or more of impervious surface.	Order 01-119 PWP C.3 f.3	Implement HMP requirements for projects located in the HMP applicability areas identified in Sunnyvale. Projects must meet the impervious surface size threshold of the HMP and have the potential to cause increased erosion or other related impacts to non-exempt waterways.	The parcels that meet HMP implementation criteria within Sunnyvale's jurisdiction have been identified on maps in the City's Storm Water BMP Guidance Manual. HMP actions for parcels that meet the size threshold will be applied, if the sites are redeveloped. There were no projects meeting the size threshold in the HMP applicability areas this FY.	Ongoing Report 09/07	Lead: Planning and PW/ PW Env. Division staff
	C.3.g Waiver and Compensatory Mitigation Program					
	Local waiver program	Order 01-119 PWP C.3 g.2	Continue tracking information on any projects with a Compensatory Mitigation Program approved by the City. Include project name, location, type, percent impervious surface, reasons for and terms of the waiver, and the alternative benefit project and completion date	No projects requested an alternative compliance with a compensatory mitigation program in FY 06-07.	Ongoing Report 09/07	Lead: Planning, and PW Staff (TBD) Support: Lorrie Gervin/PW Env. Div. staff
	C.3.h Alternate Certification					
	Identify projects that have been certified by other parties	Order 01-119 PWP C.3.h	Summarize those stormwater management plans certified by a firm listed on the Qualified Consultants List the City developed in the Annual Report.	• All approved private projects that add or replace 10,000 square feet of impervious area undergo a third-party review of the Storm Water Management Plans (SWMPs) submitted as part of their application package and as finally approved for Building Permit issuance. • A variety of treatment BMPs are selected based on the site characteristics. These are described in Attachment E, Table 1, parts 1 & 2. • The Qualified Consultants List developed by the City (updated in 2007) is included in Table 3 of this Attachment.	Ongoing Report 09/07	Lead: Jamie McLeod Assoc. Planner Support: Kristy McCumby, PW/Env.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment E
Municipality: Sunnyvale

	C.3.j Site Design Measures Guidance and Standards Development					
	Modify local project approval process	Order 01-119 PWP C.3 j.4	Report on the status of review, revision and implementation of site design guidance and standards changed as a part of the City's project approval process to address the Development Policy - Compare and Contrast document. The proposed changes submitted with September 2004 annual report are used as a guide.	• Better designs with less directly connected impervious area are encouraged throughout the project approval process. • Use of Copper is strongly discouraged in all architecture.	Ongoing Report 09/07	Lead: Jamie McLeod, Assoc. Planner Support: PW engineering, PW Env. Div.
	C.3.k Source Control Measures					
	Implement conditions of approval for source control measures for applicable projects.	Order 01-119 PWP C.3 k.3	Continue Implementation of source control measure requirements by including appropriate conditions for approval for projects that add or replace 10,000 sq ft. of impervious area. Report status and provide examples of the application of these conditions in annual reports.	Source control measure requirements are included as conditions of approval, as appropriate, for projects that add or replace 10,000 sq ft. of impervious area. Information on projects approved is included in Table 1, Parts 1 and 2 of this report.	Ongoing Report 09/07	Lead: Jamie McLeod, Assoc. Planner Support: Hira Raina/Nasser Fakih
	C.3.l Update General Plans					
	Update General Plans	Order 01-119 PWP C.3 l.3	Review current General Plan policies regarding watershed protection and water quality. Identify changes or additional policies that need to be developed in order to implement the C.3 provisions of the permit.	• The Municipal Code was recently updated to adopt by reference the *Guidelines and Standards for Land Use Near Streams*, which places additional requirements on properties adjacent to streams that enhance their storm water management capabilities. • The current Surface Runoff Sub Element of the City's General Plan does not need changes to continue implementation of the C.3 provisions. • Surface Water Sub Element is not scheduled for a regular revision until FY 2010-2011.	Revise after 10/15/04 at next scheduled time	General Plan Workgroup: Lead: Lorrie Gervin, Env. Div. Mgr. with assistance from Community Development, Public Works , and Office of the City Attorney staff to be determined as needed.

			measures as conditions for their approval.	• See Table 1, parts 1&2 for information on projects approved. Storm water management plans approved for these projects include the landscape maintenance techniques for pest reduction. • Use of pest-resistant landscaping and design features part of the information provided to applicants and a requirement of the SWMPs. The need for pest-resistant landscaping is included in the staff training.		

2) Regional Board Comments on New Development Planning Procedures Section of FY 05-06 Annual Report:
Comments received on this section did not require any additional actions.

3) Evaluation of New Development Planning Procedures Activities in FY 06-07;

How well is the program going this year?

CDD:
The program continues to enhance project in the City of Sunnyvale by providing for enhanced storm water management. The program also helps to reinforce the City's commitment to providing for adequate landscaping and usable open space on sites, which is recognized to improve the general quality of life.

Pretreatment Program:
The program is working well. The oversight and implementation of the program does require a significant commitment of resources from the Pretreatment Program. It will be a challenge if the regulations require implementation on a smaller scale (i.e. 5000 sq. ft.).

Describe any strengths or weaknesses of the program.

CDD:
The strengths of the program include a uniform understanding of and commitment to the importance of the program among staff. The SWMP is included in the Pre-Project Review Committee checklist that is reviewed by all planning staff when the project is first received and reviewed.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment E
Municipality: Sunnyvale

The primary challenge is keeping all staff current on any new design techniques or technologies given the workload and requirement for planning staff to stay current in such a broad range of subjects.

Pretreatment Program:
Strengths include improved communications and understanding between the different departments within the City, who are responsible for implementing different aspects of the C3 regulations. An area to improve is the connection between the developer and the ultimate property owner. There has been some disconnect regarding the owner realizing the responsibility of O&M once the developer hands over the project for occupancy.

Describe what actions/activities you will emphasize for next year.

CDD:
The program continues to enhance project in the City of Sunnyvale by providing for enhanced storm water management. The program also helps to reinforce the City's commitment to providing for adequate landscaping and usable open space on sites, which is recognized to improve the general quality of life.

Pretreatment Program:
Next year will focus on activities aimed at more effectively communicating the SWMP knowledge and responsibilities from the developers to the property owners; in particular O&M responsibilities. In addition, next year several more projects will be complete and considered occupied and ready for inspection. The Pretreatment Program will continue to coordinate with CDD and within the Environmental Division to explore ways to improve the process of implementing the C3 regulations.

Describe where help is needed at the Program or Regional Board level.

CDD: It is always helpful to receive updates and ideas on new BMPs in a timely manner.

Pretreatment Program:
It would be helpful to have an understanding of the results / benefits of implementing the C3 regulations on a region wide level.

FY 06 - 07 Annual Report

Attachment E –
Table 1, Parts 1 & 2

Applicable Projects
Adding or replacing 10,000 sq ft of impervious area

New Development Planning Procedures

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment E- Table 1. *Report Form for Planning Procedures Performance Standard and Provision C.3.n*
FY 2006-2007 Annual Report
Municipality: Sunnyvale

Applicable Projects (Part 1)
Significant Development Projects[1]
Reviewed and/or Approved July 1, 2006 – June 30, 2007

Project Name	Project Type[1]	Site Size (sq. ft.)	New Impervious Surface (sq. ft.)[3]	Area of Land[2] Disturbed (sq. ft.)	Project Status (incl. Date Deemed Complete)	Project Storm Water Control Measures
Private Projects – Applicable Projects						
1. Place of Assembly Project at 420 Persian Drive Project No.: 2005-1131 Description: Modify and expand existing building.	Redevelopment	3.15 acres (137,210 sq. ft.)	40,100 sq. ft. new or replaced. Total impervious area increased by 11,100 sq. ft.	0.93 acres 40,500 sq. ft.	Deemed complete on 9/07/06 and approved by Planning Commission on 11/27/06	- Storm Water Treatment Measures - Source Control Measures - Site Design Measures
2. Industrial Project at 1111 Lockheed Martin Drive Project No.: 2005-1198 Description: Remove existing building and construct new Class A office complex on two lots.	Significant Redevelopment (total rebuild)	51.9 acres (2260676 sq. ft.)	6.4 acres (280,403 sq. ft.)	47.5 acres (2,069,130 sq. ft.)	Deemed complete on 5/3/06 and approved by City Council on 11/14/06	- Storm Water Treatment Measures - Source Control Measures - Site Design Measures
3. Industrial Project at 975 Benecia Avenue Project No.: 2006-0027 Description: Construct two new R&D office buildings.	Significant Redevelopment (total rebuild)	3.39 acres (147,700 sq. ft.)	117,000 sq. ft. replaced. Total impervious area decreased by 18,000 sq. ft.	3.39 acres (147,700 sq. ft.)	Deemed complete on 1/18/07 and approved by City Council on 10/23/06	- Storm Water Treatment Measures - Source Control Measures - Site Design Measures

[1] For Projects approved as of October 15, 2005, reporting applicable projects – those that add or replace 10,000 square feet of impervious area.
[2] As defined in C.3.c If the site is a "significant redevelopment", list the area of land disturbance.
[3] "New" is defined as impervious surface added, created, or replaced.

Project Name	Project Type1	Site Size (sq. ft.)	New Impervious Surface (sq. ft.)3	Area of Land2 Disturbed (sq. ft.)	Project Status (incl. Date Deemed Complete)	Project Storm Water Control Measures
Private Projects – Applicable Projects						
4. Residential Project at 640 Lakehaven Drive Project No.: 2006-0166 Description: Remove existing building and construct seven detached residential homes.	Significant Redevelopment (total rebuild)	1.004 acres (43,739 sq. ft.)	22,235 sq. ft. replaced. Total impervious area increased by 2,235 sq. ft.	1.004 acres 43,739 sq. ft. (entire site disturbed)	Deemed complete on 8/14/06 and approved by City Council on 11/28/06	- Storm Water Treatment Measures -Site Design Measures
5. Residential Project at 962 Duane Avenue Project No.: 2006-0598 Description: Remove existing buildings and construct 38 buildings with 242 condominiums.	Significant Redevelopment (total rebuild)	13.94 acres (607,019 sq. ft.)	438,506 sq. ft. replaced. Total impervious area increased by 406,041 sq. ft. (Final SWMP under review.)	13,94 acres 607,019 sq. ft. (entire site disturbed)	Deemed complete on 8/14/06 and approved by City Council on 2/27/06	- Storm Water Treatment Measures -Source Control Measures -Site Design Measures
6. Residential Project at 1044 Duane Avenue Project No.: 2006-0610 Description: Remove existing buildings and construct 304 units (68 townhomes and 236 condominiums).	Significant Redevelopment (total rebuild)	7.3 acres 317,988 sq. ft.	232,123 sq. ft. replaced. Total impervious area decreased by 48,093 sq. ft.	7.3 acres 317,988 sq. ft. (entire site disturbed)	Deemed complete on 7/12/06 and approved by City Council on 5/22/07	- Storm Water Treatment Measures -Source Control Measures -Site Design Measures
7. Mixed Use Project at 1287 Lawrence Station Road Project No.: 2006-0712 Description: Remove existing buildings and construct 335 residential units and 15,000 sq. ft. retail.	Significant Redevelopment (total rebuild)	6.6 acres (288,803 sq. ft.)	214,751 sq. ft. replaced. Total impervious area increased by 10,019 sq. ft.	6.6 acres (288,803 sq. ft.)	Deemed complete on 9/23/06; has not yet been scheduled for a public hearing (EIR pending).	- Storm Water Treatment Measures - Source Control Measures - Site Design Measures

Private Projects – Applicable Projects						
8. Retail Project at 782 E. El Camino Real Project No.: 2006-0915 Description: Remove existing building and construct two new retail buildings (total of 20,855 sq. ft. with a drive-thru).	Significant Redevelopment (total rebuild)	2.28 acres 99,370 sq. ft.	71,542 sq. ft. replaced. Total impervious area remained the same.	2.28 acres 99,370 sq. ft.	Deemed complete on 9/23/06 and approved by Planning Commission on 12/11/06	- Storm Water Treatment Measures - Source Control Measures - Site Design Measures
9. Industrial Project at 111 Java Drive Project No.: 2006-1265 Description: Remove existing building and construct three new R&D office buildings.	Significant Redevelopment (total rebuild)	12.7 acres (553,135 sq. ft.)	553,135 sq. ft. replaced. Total impervious area decreased by approximately 49,782 sq. ft.	12.7 acres (553,135 sq. ft.)	Deemed complete on 1/18/07 and approved by Planning Commission on 03/26/07	- Storm Water Treatment Measures - Source Control Measures - Site Design Measures
10. Mixed Use Project at 2502 Towncenter Lane Project No.: 2006-0030 Description: Remove most of existing buildings and construct 292 housing units, 275,000 sq. ft. of office and 992,000 sq. ft. of retail.	Significant Redevelopment (total rebuild)	36.7 acres (1,598,216 sq. ft.	35.0 acres (1,546,380 sq. ft.) replaced. Total impervious area decreased by 21,780 sq. ft.	35.5 acres (1,546,380 sq. ft.)	Deemed complete on 7/16/07; has not yet gone to a public hearing (City Council)	- Storm Water Treatment Measures - Source Control Measures - Site Design Measures
11. Industrial Project at 1376-1380 Bordeaux Drive Project No.: 2007-0200 Description: Remove existing buildings and construct two new 3-story R&D buildings.	Significant Redevelopment (total rebuild)	5.4 acres (236,088 sq. ft.)	167,944 sq. ft. replaced. Total impervious area decreased by 25,492 sq. ft.	5.4 acres (236,088 sq. ft.)	Deemed complete on 3/14/07 and approved by Planning Commission on 05/14/07	- Storm Water Treatment Measures - Site Design Measures

Applicable Projects (Part 2)
Significant Development Projects[2]
Reviewed and/or Approved July 1, 2006 – June 30, 2007

Project Name	Treat-ment BMPs	Numeric Sizing Criteria Used	O&M Responsibility Mechanism and Responsible Party	Site Design Measures	Source Control Measures	Pesticide Reduction Measures
Private Projects – Applicable projects						
1. Place of Assembly Project at 420 Persian Drive Project No.: 2005-1131 Description: Modify and expand existing building.	Bio-filter (swale), Media filter	Volume Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimal land disturbance, minimum impact street or parking lot design, and disconnect downspouts.	Covered dumpster (drain to sanitary sewer), Beneficial landscaping, Maintenance - (street sweeping, catch basin cleaning)	Education, COAs
2. Industrial Project at 1111 Lockheed Martin Drive Project No.: 2005-1198 Description: Remove existing building and construct new Class A office complex on two lots. (Master SWMP developed for 51.9 acre site)	Large detention basin / pond (wet)	Volume Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, Appendix D, using local rainfall data.	Formalized through a master SWMP for the entire Lockheed property that will be used for all projects within the 51.9 acre area. Property owner responsible for O&M of treatment BMP and pump station.	Some landscaping on site, all runoff flows through site conveyance system to a large detention pond.	Covered dumpsters, Maintenance (trash collection, site sweeping, and landscape maintenance)	Education
3. Industrial Project at 975 Benecia Avenue Project No.: 2006-0027 Description: Construct two new R&D office buildings.	Hydro-dynamic devices (CDS Units)	Flow Hydraulic Design Basis using '03 CA Storm water Quality BMP Handbook and local rainfall data	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces, provide landscaping	Covered dumpster (drains to sanitary sewer) Beneficial landscaping and Maintenance (street sweeping and catch basin cleaning	Education, COAs

[1] For Projects approved as of October 15, 2005, reporting applicable projects – those that add or replace 10,000 square feet of impervious area.
[2] As defined in C.3.c If the site is a "significant redevelopment", list the area of land disturbance.
[3] "New" is defined as impervious surface added, created, or replaced.

Project Name	Treat-ment BMPs	Numeric Sizing Criteria Used	O&M Responsibility Mechanism and Responsible Party	Site Design Measures	Source Control Measures	Pesticide Reduction Measures
Private Projects – Applicable projects (continued)						
4. Residential Project at 640 Lakehaven Drive Project No.: 2006-0166 Description: Remove existing building and construct seven detached residential homes.	Detention basin and inlet filter	Volume Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces, provide landscaping	Minimize impervious surfaces, Disconnect downspouts.	Education, COAs
5. Residential Project at 962 Duane Avenue Project No.: 2006-0598 Description: Remove existing buildings and construct 38 buildings with 242 condominiums.	Hydro-dynamic devices (CDS Unit) and Bio-filter (swale)	Flow Hydraulic Design Basis Using CA Stormwater Quality BMP Hand-book, Appd. D and local rainfall data	Formalized through Conditions of Approval, 3rd party certification (pending), and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces, provide landscaping	Covered dumpster (drains to sanitary sewer) Beneficial landscaping, Site Maintenance: street sweeping. Inlet cleaning and litter pick up	Education, COAs
6. Residential Project at 1044 Duane Avenue Project No.: 2006-0610 Description: Remove existing buildings and construct 304 units (68 townhomes and 236 condominiums).	Hydro-dynamic devices (CDS Unit) and Bio-filter (swale)	Flow Hydraulic Design Basis Using CA Stormwater Quality BMP Hand-book, Appd. D and local rainfall data	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces, provide landscaping	Covered dumpster (drains to sanitary sewer) Beneficial landscaping, Site Maintenance: street sweeping, inlet cleaning and litter pick up	Education, COAs
7. Mixed Use Project at 1287 Lawrence Station Road Project No.: 2006-0712 Description: Remove existing buildings and construct 335 residential units and 15,000 sq. ft. retail.	Bioswale, bio-retention, flow-through planters, tree-well filters	Flow Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D, using local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces, provide landscaping	Regular street sweeping, inlet and catch basin cleaning	Education, COAs

Private Projects – Applicable projects (continued)						
8. Retail Project at 782 E. El Camino Real Project No.: 2006-0915 Description: Remove existing building and construct two new retail buildings (total of 20,855 sq. ft. with a drive-thru).	Vege-tated swale, bio-retention, hydro-dynamic device	Flow Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces, provide landscaping	Building & grounds maintenance, parking/ storage maintenance, , drainage system maintenance	Education, COAs
9. Industrial Project at 111 Java Drive Project No.: 2006-1265 Description: Remove existing building and construct three new R&D office buildings.	Hydro-dynamic device (CDS Unit) and Biofilter (swale)	Flow Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces, provide landscaping	Building & grounds maintenance, parking/ storage maintenance, drainage system maintenance. Covered dumpster.	Education, COAs
10. Mixed Use Project at 2502 Towncenter Lane Project No.: 2006-0030 Description: Remove most of existing buildings and construct 292 housing units, 275,000 sq. ft. of office and 992,000 sq. ft. of retail.	Hydro-dynamic devices (inline treatment unit)	Flow Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces (multi-story buildings), Provide landscaping.	Wash area / racks (drain to sanitary sewer), Covered dumpster (drain to san. sewer), Outdoor material storage protection, Maintenance (street sweeping, catch basin cleaning)	Education, COAs
11. Industrial Project at 1376-1380 Bordeaux Drive Project No.: 2007-0200 Description: Remove existing buildings and construct two new 3-story R&D buildings.	Hydro-dynamic devices (inline treatment unit)	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, App. D, local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces	Maintenance (street sweeping, catch basin cleaning)	Education, COAs

The City has reviewed a Statement of Qualifications submitted by each of these firms and finds that they meet the requirements necessary to certify Storm Water Management Plans, as required in SMC 12.60. The City does not endorse or recommend any particular consultant on this list. They are listed in random order.

Construction Inspection

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment F
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 06-07 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
New Development and Construction Controls – Construction Site Inspection						
CI-1-4	Construction Inspection Performance Standards	URMP	Conduct annual staff review of performance measures in order to evaluate their effectiveness.	CDD- Building Division: All performance standards are being implemented and are effective. Staff provides outreach materials to contractors and developers by attaching copies of construction tri-folds "Preventing Pollution, It's up to Us" or the "Sunnyvale Blueprint for a Clean Bay" to plans and/or job card before permits are issued. 43 written Erosion/sediment Control Correction Notices and Re-inspection Notices were issued this F Y for private projects.	08/07	Gordon Blancher, Building Inspector /Coordinator
CI-2 - CI-5	Inspection of sites with significant erosion potential and construction planned for the wet season	URMP	Conduct inspection of sites (public and private) with significant erosion potential and/or construction planned during the wet season to ensure that erosion and sediment control measures are implemented in accordance with Sunnyvale Municipal Code and any conditions of approval for the project.	CDD- Building Division: Inspections of project were done to ensure that the projects erosion and sediment control measures are maintained, as needed during construction. Enforcement for compliance with SMC requirements was done, as needed. PW- CIP: The City's inspectors inspected all projects during the wet season and ensured that the contractors complied with the projects' erosion and sediment control plans. Any observed compliances were reported and rectified promptly.	Ongoing Report 09/07	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector

Attachment F
Municipality: Sunnyvale

New Development and Construction Controls – Construction Site Inspection (cont.)						
CI-4	Effectiveness Evaluation: Private Development and Public Works Inspection Program	URMP	Annually review and evaluate effectiveness of inspection programs using staff and/or contractor feedback	CDD- Building Division: Staff and contractor feedback indicate that the inspection programs are effective and meeting goals. Using the "FIELD INSPECTION – BMP'S" notices helps with documenting violations and corrective actions. PW – CIP: The existing inspection program of public projects and the regular weekly progress meetings with the contractors work very well to address and resolve all water pollution issues. Feedback from the contractors has been very positive and there is no need to change the existing procedures.	Annually Report 09/07	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector
	Construction Inspection Performance Standards	Permit Prov. C.3.a. (vi)	•Annually train Construction Inspection staff (both Community Development and Public Works) on current Construction Inspection Performance Standards and any changes to BMPs and SOP's. Also include training on construction inspection procedures, documentation, and enforcement. •Every two years, all inspectors will receive training on the latest construction BMPs and techniques. Implementation of BMPs and SOP's will be discussed, as needed, at regular staff meetings.	Information on training activities for all CDD-Building Division staff all PE-Engineering staff is presented in Attachment M of this report	Annually, before October 1 Report 09/07	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment F
Municipality: Sunnyvale

New Development and Construction Controls – Construction Site Inspection (cont.)						
	Erosion and Sediment Control Plans by Contractors for Public Projects	Permit Prov. C.3.a. (iv)	CDD Building Inspection staff and PW Construction staff to ensure that developers/contractors of projects with significant erosion potential and planned construction during the wet season have prepared an effective erosion and/or sediment control plan prior to the start of the wet season.	CDD- Building Division: Compliance with erosion and/or sediment control plans was required for projects prior to the start of the wet season. Inspectors checked to make sure the plans were done and BMP's in place. There was good cooperation from developers and contractors to meet these requirements. PW – CIP: Compliance with erosion and/or sediment control plans was required for projects prior to the start of the wet season. Inspectors checked to make sure the plans were done and BMPs in place. There was good cooperation from contractors to meet these requirements.	Ongoing Report 09/07	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector
	Municipal capital improvement project stormwater quality control measures	Permit Prov. C.3.a. (v)	Perform and document inspections of contractors on capital improvement projects to ensure their compliance with stormwater quality control requirements during construction and maintenance activities. Initiate enforcement actions, as needed. Report annually on results of inspection program.	All storm water inspection observations are documented in the inspectors' daily inspection reports. Notifications of noncompliance are documented in these diaries and are followed up until corrected. Special inspections are always performed prior, during and after anticipated storms. Contractors were very cooperative throughout all the projects.	Ongoing Report 09/07	Hira Raina, Nasser Fakih

2) Response to Regional Board Comments on this section of the FY 05-06 Annual Report
No comments were received on this section.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment F
Municipality: Sunnyvale

3) Evaluation of Construction Inspection Activities in FY 06-07

CDD: Storm water inspection activities are going well. Developers, contractors, and construction workers are familiar with the storm water protection requirements and are meeting those standards. The number of BMP Correction notices are slightly up for 06/07 (43) compared to 05/06 (35) and 04/05 (30) with a large over all construction active increase in 06/07.

PW: Storm water inspection activities are going well. Developers, contractors, and construction workers are familiar with the storm water protection requirements and are meeting those standards. PW emphasizes this item of work by requiring contractors to submit for approval the specific storm water pollution control plans for the construction projects. These pollution control plans are checked for completeness and are only approved after the Engineer is satisfied with the submittals. The inspection staff also discusses the requirements with the contractors on a regular basis. More importantly, the water pollution item is part of the agenda on all projects' weekly progress meetings. Due to the high awareness, all contractors have been very compliant and minimal noncompliance notices have been issued.

Public Information and Participation

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment G – Public Information and Participation
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 06-07 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Public Information / Participation						
PIP-1	Identification of pollution issues/problems	URMP	Continue to discuss water pollution prevention, conservation, and watershed education with regional co-permittees, pretreatment staff, and urban runoff staff to determine current issues and pollutants of concern.	Projects selected and implemented by Sunnyvale in FY06-07 reflect the current issues and pollutants of concern targeted during discussions. See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 06-07.	Ongoing Report 09/07	Sally Personett, Environmental Outreach Coordinator
PIP-2	Implementation of strategy to address issues	URMP	In order to insure efficient and effective use of resources, we will continue to select projects that automatically send behavior change messages to the greatest number of people without requiring staff to be present. In addition, we will lend support to regional projects and events that endeavor to increase behavioral change thorough public education	Media provides the most efficient and effective use of resources to target and capture large audiences. Projects include on-screen theater ads, newspaper articles and ads, website postings, utility bill inserts, flyers, mass email blitz, community cable TV, poster distribution, and literature kiosks. See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 06-07.	Ongoing Report 09/07	Sally Personett, Environmental Outreach Coordinator
PIP-3	Dissemination of outreach/education materials	URMP	Continue to update and develop new materials and information, and disseminate material to targeted audiences through participation in school and youth programs, industry-related events, presentations, community requests, plant tours, Farmers' Markets, and regional events...	Outreach material is monitored for restock and edited for content as necessary. New materials are developed as needed, and literature is disseminated as described. See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 06-07.	Ongoing Report 09/07	Sally Personett, Environmental Outreach Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment G – Public Information and Participation
Municipality: Sunnyvale

Public Information / Participation (cont.)						
PIP-4	Municipal Employee Training	URMP and Permit Prov. C.9	Provide annual training to Community Development, Parks and Recreation, and Public Works Department staff related to URMP Performance Standards, BMPs, and Watershed Outreach and Education campaign. (See IPM Policy and Hg Policy outreach sections for similar tasks)	Training continues to be provided to appropriate staff on the requirements of the City's URMP and their role in its implementation. See Attachment M for a more detailed listing of topics discussed and numbers of staff attending.	Ongoing Report 09/07	Kristy McCumby, Environmental Specialist & Dave Grabiec, Laboratory/ Pretreatment Mgr.
PIP-5	Evaluation of effort and strategy	URMP	Use various feedback methods to determine public evaluation of materials, workshops, and or seminars and level of increased awareness of pollution prevention issues. In an ongoing effort public feedback will be used by staff to evaluate appropriateness of strategies used in selected projects.	Evaluation forms are distributed and reviewed. Feedback is used to modify and fine tune projects, presentations, and workshops. This approach is not a measure of difference in usage patterns or behavior change, but is used to determine satisfaction with the presentation or activity. Level of increased awareness is chiefly established through the number of individuals reached.	Ongoing Report 09/07	Sally Personett, Environmental Outreach Coordinator
PIP-5	Work Plan Revision	URMP	As a result of ongoing evaluation and discussions as listed in PIP-1, determine projects to be continued, deleted or added.	Outreach continues to provide a wide-range of education to targeted and general audiences through participation in various events and activities in Sunnyvale, through use of media, and in project collaborations with other agencies and partners both regional and local. Projects Added: Hands on the Arts, Mercury Thermometer Exchange, Sunnyvale Visioning Festival, Corporate Environmental Fairs, Children's Library Presentation, "Sudsafe" Car Wash Kit use promotion Projects Deleted: Google Environmental Fair, Green Business Conference, Pharmaceutical Waste event, Summer Camp for Kids Projects Continued: for a listing of activities and events, see Attachment G Table 1-Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 06-07	Ongoing Report 09/07	Sally Personett, Environmental Outreach Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment G – Public Information and Participation
Municipality: Sunnyvale

Public Information / Participation (cont.)						
	Mercury Outreach	Permit Prov. C.9.c	In coordination with the Program and County-wide efforts, develop and continue to implement an educational outreach program to residential audiences regarding recycling of fluorescent lights, the proper disposal of other mercury-containing products, and the availability of non-mercury containing alternatives. Monitor and document results in the Annual Report. (Also see Control Program for Mercury for additional Outreach tasks.)	Through ongoing collaboration and effort, Sunnyvale continues to develop and implement educational outreach to residential audiences regarding non-mercury alternative devices, recycling and proper disposal of mercury containing products and water pollution prevention. See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 06-07.	Ongoing Report 09/07	Sally Personett, Environmental Outreach Coordinator and HHW/SMaRT station staff
	Integrated Pest Management Outreach	Permit Prov. C.9.d	Provide local public outreach on proper use and disposal of pesticide products and use of less toxic pest control methods. Support the Program on local IPM Store Partnership activities. Participate in Regional outreach events. (Also see Control Program for Pesticides for additional Outreach tasks.)	Sunnyvale supports the IPM store partnership program, participates in Regional outreach events, and provides local public outreach on proper use and disposal of pesticides, and use of less toxic pest control methods. See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 06-07	Ongoing Report 09/07	Sally Personett, Environmental Outreach Coordinator
	Trash Management	Program Task RWQCB Letter	Continue to promote litter reduction as a key pollution prevention element. Provide local education on what the public can do to reduce and eliminate litter. This includes outreach through articles and ads in newsletters, and presentations at local schools events. (Also see Control Program for Trash for additional outreach tasks.)	Sunnyvale continues to promote litter as a key source of water pollution, and outreach to students and the community is centered on local education through visual demonstrations with the Enviroscape and published articles regarding what individuals can do to reduce and eliminate litter as a pollution source. See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 06-07	Ongoing Report 09/07	Sally Personett, Environmental Outreach Coordinator

Table 1. Detailed Description of FY 06-07 PI/P Activities and Self Evaluation Matrix

PI/P Activity[1]	Type of Outreach [2]	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community			
Leadership Sunnyvale	Event – Targeted	This development program provides training on the fundamentals of leadership and community awareness for Sunnyvale community members. The intention is to broaden participant awareness of complex community issues, strengthen leadership skills, and increase effectiveness in the community. During this annual event Public Works hosts an Environmental Awareness Day. April 07	This event presents a key opportunity to provide awareness to potential community leaders about watershed issues. Topics included wastewater treatment overview, and public outreach and education efforts regarding water pollution and prevention. Twenty individuals participated in the event this reporting year.
Columbia Health and Safety Fair	Event – Targeted and General	The purpose of this fun-filled and engaging event is to increase awareness and educate residents about community services that provide information on issues such as health, safety, and the environment. This is a community event that targets economically disadvantaged youth and families. May 07	The Outreach exhibit highlighted the difference between sanitary sewers and storm drains, leading to information about water pollution prevention. This is primarily done through discussion, literature distribution, and presentations featuring the Enviroscape, which focuses on water pollution from pesticides, fertilizers, dog waste, automotive fluids and car wash. Approximately 62 adults stopped by the booth for information. See Schools and Youth Section for more information.
Sunnyvale Pancake Breakfast	Event – General	This event features a community breakfast, activities for kids, and exhibit booths providing public service information to the community. October 06	The Outreach display at this event featured the difference between sanitary sewers and storm drains, with a focus on stormwater pollution prevention. Although the event is geared toward children, staff was also busy talking with adults. Information about disposal of fluorescent bulbs and other mercury containing products was most in demand. Approximately 25 adults stopped for information. See the Schools and Youth for more information.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment G- Public Information and Participation (PI/P) Table 1
FY 2006-2007 Annual Report
Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
Sunnyvale Farmers Market	Event - Targeted	The goal of outreach at this once per month event is to promote pesticide reduction through IPM practices. The OWOW exhibit is displayed, and literature and fact sheets on less-toxic pest control are distributed. Other water pollution prevention literature is available, including the HHW mercury brochure and surplus utility bill inserts that target water pollution concerns. Monthly – except for December and January	The market draws 2-3000 people each Saturday and provides an effective way to interface with shoppers in a venue that promotes healthy food and pesticide free gardening. Everyone visiting the booth is in search of information about less-toxic pest control. The number of individuals reached doesn't change much from year to year; we talk with approximately 40 to 70 people at each event depending on which month it is.
State of the City Event	Event – General	This is an annual one-day event sponsored by the City as a Fourth of July celebration. The event features activities and exhibits that provide community information for residents and youth. July 06	This event offers a venue to discuss with residents that indoor/outdoor daily activities and chores impact the watershed The Outreach booth distributed water pollution prevention information and literature featuring mercury, pesticides, IPM datasheets, automobile fluids, and proper draining of pools and spas. Outreach discussed pollution prevention techniques with approximately 30-40 adults at this event.
Sunnyvale Visioning Festival	Event - General	Residents attended a working session to discuss and help create a future vision for Sunnyvale. Afterwards, attendees lunch while viewing the exhibits. October 06	This was a one time event. Approximately 180 people attended the event and viewed exhibits. The Outreach exhibit featured information about the wastewater treatment process in an effort to educate residents about its aging infrastructure and the need for upgrades. Relatively few people visited the booth.
Earth Day Thermometer Exchange	Event - Targeted	The Thermometer Exchange event provided Sunnyvale residents with an opportunity to trade in their hazardous mercury thermometers in exchange for a free non-mercury thermometer April 07	Many people have mercury thermometers in their homes and may be unaware of its toxicity. This was a popular community-focused event and the publicity and public awareness campaign helped educate the public to the dangers of this toxic element while providing a way to rid their homes of these devices. 337 mercury thermometers were exchanged during the six-hour event.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment G- Public Information and Participation (PI/P) Table 1
FY 2006-2007 Annual Report
Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
Plant Tours	Event – General and Educational	Plant Tours are conducted year round. Treatment stages and processes are discussed, and attendees learn the function and importance of the wastewater treatment plant and its role of preventing water pollution from wastewater discharge. Both stormwater and wastewater pollution issues are discussed.	The Plant conducted 16 tours this reporting year, reaching 322 individuals in FY 06-07. Discussions about water pollution and its issues impacting the watershed and the environment help tour attendees gain a better understanding of the problem. At the completion of the tour, attendees are given educational materials that promote environmentally responsible behaviors. See Schools and Youth for information on student plant tours.
Car Wash Brochure	Media - Targeted	A car wash brochure was developed for use as an educational outreach piece regarding residential car wash activities and storm water pollution. It was also used to promote use of the City's Sudsafe Car Wash Kit loan program for non-profit groups sponsoring car wash events	250 copies of the car wash brochure were printed and are used as handouts (as appropriate) at various events and other locations in Sunnyvale
Mass Mail Campaign	Campaign - Targeted	Outreach conducted a mass mail campaign by sending a cover letter and the new brochure to a variety of non-profit organizations located in Sunnyvale to encourage them to borrow the Sudsafe Car Wash Kits for any events they might hold.	137 non-profit organizations that could potentially hold carwashes as a fundraising activity received the letter and brochure. Organizations included churches, public and private schools, and community clubs located in Sunnyvale.
Theater Billboards	Media – General and Targeted	Water pollution prevention messages are displayed at the Sunnyvale Mercado Theaters as on-screen advertising. Messages are selected according to priority and season. In addition to on-screen theater advertising for mercury and pesticides, an advertisement was developed for viewing during the holidays advising the public on proper disposal of fats, oils and grease. July 06 – June 07	These 14-second animated/audio ads are viewed by movie audiences two times during a 15-minute timeframe prior to every movie shown in the 20 theater complex. This is a beneficial way, albeit extremely expensive way to reach large groups of people with targeted pollution prevention messages. It is possible this program may be suspended in favor of other advertising or program opportunities. If the theater advertising program continues, then new, refreshed messages will be developed for viewing in 2007-08.

Community (cont.)			
Broadcast News	Media – General and Targeted	Mercury Thermometer Exchange Event – April 07 ▪ KTSF – a television segment providing information about mercury thermometers and the Sunnyvale Thermometer Exchange Event was conducted on this Mandarin TV station in San Francisco. ▪ KSUN - information publicizing the event was advertised on KSUN, Sunnyvale's community cable TV station. ▪ KLIV – a radio interview was conducted announcing the event and explaining the environmental dangers from mercury thermometers Car Wash Kit – May 07 ▪ KGO - Channel 7 ran a news and interview segment providing information about water pollution from residential car wash and publicizing the availability of Sudsafe, Sunnyvale's new Car Wash Kit.	Pollution prevention messages broadcast over radio and TV media achieved significant coverage this reporting year, providing greater efficiencies in getting the word out to the general public. This proved to be a beneficial, no cost solution to our effort to achieve event attendance for the thermometer exchange, and for public awareness of the need to prevent polluted car wash water from entering the storm drain. Evaluation of media mentions is not known due to difficulties gathering data from widespread advertising.
Utility Bill Inserts	Media - General	Five pollution prevention advertisements targeting priority pollutants of concern were inserted into utility bills this reporting year: *Less Toxic Environment and Healthier Bay* July/Aug 06 *Sharky – Storm Drain Pollution* Nov/Dec 06 *Triclosan* – Jan/Feb 07 *Have Fluorescent Bulbs or E-Waste to Get Rid of?* Jan/Feb 07 *Make Everyday Earth Day* – Mar/Apr 07	Stuffing utility bills with advertising inserts reaches approximately 30,000 account customers for each two-month mailing. This is an ongoing outreach effort, and we will continue to use this venue as a cost effective way to reach a large number of people.

Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
Quarterly Report Articles	Media - General	Pollution prevention articles targeting priority pollutants of concern were published in the city's quarterly community newsletter. *City Reaches Out to Community on Pest Control* – summer 06 *Take a Tour of the Plant* – summer 06 *Don't Dump Unused Medicines* – fall 06 *Triclosan* – spring 07 *Getting Rid of Mercury* – spring 07 *Thermometer Exchange* - spring 07 *Care for Yourself and the Earth* – spring 07 *Earth Week Calendar of Events* – spring 07	The Quarterly Report is mailed to approx. 60,000 residents and businesses in Sunnyvale each quarter. In addition, 2000 copies of the report are distributed to reception and outreach areas around Sunnyvale. Ongoing. We will continue to publish articles in the Quarterly Report as it has proven to be a cost effective way to reach people who live, work and/or go to school in Sunnyvale with information on water pollution
National Pollution Prevention Week	Media – General	Posters and community cable TV advertising information on pollution prevention helped to promote National Pollution Prevention Week in September 06. Posters were placed at various key locations throughout the city. Ads with various tips on how to prevent water pollution aired on KSUN during the month. Coverage Included automotive fluids, fluorescent bulbs, car wash, yard trimmings and IPM. September 06	Any person living, working, going to school in Sunnyvale who used the library, community center, senior center or city hall could view the posters. KSUN reaches approximately 20,000 Sunnyvale residents with cable TV of whom 20% watch KSUN at least once a month.
Sunnyvale ReNews	Media – General and Targeted	The Sunnyvale ReNews Newsletter is focused on reduce, reuse, recycle messages with a heavy focus on HHW. Various articles and informational pieces relating to pollution prevention through proper disposal were published in this bi-annual newsletter. Fall 06 Spring 07	This newsletter is mailed twice a year to approximately 29,000 single family residents and 24,000 residents living in multi-family units. Copies are also available in key locations throughout the city. Considering the reach, we will continue to use this newsletter for outreach as it serves a productive method to continually remind the community about proper disposal of HHW products.

Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
The Sun	Media - Targeted	A public advertisement for the Thermometer Exchange Event was placed in the Sunnyvale Sun. April 07	The Sunnyvale Sun has a readership of approximately 42,320 and a circulation of 18,600. We will continue to use the Sunnyvale Sun as a valuable media tool to accomplish mercury outreach to the community.
Website	Media - General	Sunnyvale provides pollution prevention messaging on three different web sites in the City. The Solid Waste and Recycling website provides HHW information regarding proper disposal of hazardous materials, including pesticides, fertilizers, and mercury containing products. The Pretreatment section of the Water Pollution Control Plant web site includes specific business related BMPs for painting, concrete, facility, equipment, cleaning, and vehicle maintenance. The web site for the Water Pollution Control Plant promotes water pollution and water conservation information for the community.	The City's website does not have the ability to count number of hits.
Employees			
Poop Scoop	Media - Targeted	Several articles targeting both general pollutants and specific pollutants of concern were published in this employee newsletter. *Pollution Prevention Week* – Sept. 06 *Triclosan* – Dec 06 *Don't Trash California* – Jan 07 *Danger from Mercury Thermometers* – May 07	Approximately 60 employees at the Water Pollution Control Plant read the Poop Scoop, the employee newsletter for staff at the WPCP. This is an ongoing effort and we will continue using this newsletter venue for employee outreach.
The Harbinger	Media - Targeted I	The Harbinger is the newsletter for employees of the city of Sunnyvale. The following water pollution prevention articles were published in reporting year 06/07: *Water Plant Celebrates 50 Years* – Nov 06 *Pollution Prevention A Year Round Goal* – Nov 06 *Finding Alternatives to Antibacterials* – Feb 07	Articles and information contained in the Harbinger reach approx. 900 municipal employees. This effort will be ongoing, as publishing in this newsletter provides a cost effective way to reach all employees with specific water pollution information and suggestions for behavioral change that could be useful both on the job and at home.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Employees (cont.)			
The Works	Media - Targeted	A small article promoting National Pollution Prevention Week all year round was promoted in the Works, a Public Works employee newsletter during *National Pollution Prevention Week* – Nov 06	A total of 187 issues of *The Works* are distributed to various Public Works locations throughout the city.
National Pollution Prevention Week	Media - Targeted	National Pollution Prevention Week was September 18-24, and the theme was "The Future Is Now - Prevention Begins with You!" Messages were conveyed that pollution prevention measures can protect the environment and natural resources before pollution begins. September 06	Posters provided by the Department of Toxic Substances Control were distributed to city offices and displayed for employee viewing in the lunchrooms at city hall, library, corporation yard and community center.
Business and Industry			
Network Appliance Environmental Fair Interwoven Silicon Storage Technologies Northrop Grumman Juniper Networks Kyphon ARM Technologies	Event - General	Life and Wellness Fairs/Health and Safety Fairs Exhibitor booths offered free information to company employees that focused on helping them live a safer and healthier lifestyle. July and August 06 June 07	Staff attended Health and Safety Fairs at seven Sunnyvale businesses this reporting year. The exhibit portrays the difference between sanitary sewer and storm drains and general water pollution prevention literature about mercury, pesticides, car wash, FOG, automotive fluids, etc is available. Employees from the companies play the HHW /proper disposal bean bag game for prizes. Over 1000 company employees were reached by exhibiting at these popular events.
Chamber of Commerce Business Directory	Media - Targeted	Sunnyvale placed an ad in the upcoming Chamber of Commerce Business Directory for 07-08. The ad describes the difference between storm drains and sanitary sewer, and the sources of water pollution in the storm drain. The ad directs the reader to increase their environmental awareness and call the Plant for more information about water pollution and prevention. April 07	This semi-annual magazine and Chamber membership directory is distributed to 5,000 members, new residents, and business prospects in Sunnyvale and is available to the general public from multiple distribution points throughout the city.

FY 2006-2007 Annual Report
Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Business and Industry (cont.)			
Business Recycling and Solutions	Media - Targeted	This newsletter provides information about how businesses can address health and environmental concerns in their daily operations. An article entitled *Proper Disposal to Prevent Pollution* reminded businesses about California's Universal Waste Rules and proper disposal of mercury-containing devices. Spring 07	This business oriented newsletter focuses on reduce, reuse, recycle messages and is mailed to approx. 1600 businesses located in Sunnyvale and is available online for public viewing.
Professional Carwashing and Detailing	Media - Targeted	An article describing the release of Sunnyvale's car wash kit as an aid in helping to prevent storm drain pollution was published in a professional, nationwide magazine. May 07	Professional Car Washing & Detailing magazine serves over 17000 owners, operators, and managers of full-serve or self-serve businesses, and distributors and manufacturers of vehicle washing equipment and supplies.
Schools and Youth			
Creek Education Program	Event – Targeted and Educational	Water and Structures of Life. After studying the course in class, students take a creek education trip to McClellan Ranch Park as a supplement to their water studies course. This program is produced in partnership with the Cupertino School District. School year 06-07	This reporting year, Sunnyvale provided funding to cover the transportation cost of (6) buses, reaching (17) full classes and (1) half classes for a total of approximately (450) students.
Classroom Presentations	Event – Targeted and Educational	Sunnyvale staff conducted classroom Enviroscape presentations. In this water pollution education program, students learn the forms of water, the water cycle, what a watershed is, how water pollution happens, how to prevent water pollution, and how to conserve water. Ongoing	Outreach conducted 18 classroom presentations in the 06-07 school year, reaching approx. 411 children. Feedback from teachers indicated the information greatly improved student understanding of storm drains and water pollution caused by human activities, and teachers felt the program reinforced and supplemented their own curriculum. This activity is ongoing. We will continue to utilize classroom presentations as an effective method to reach youth with messages and water pollution and prevention.

FY 2006-2007 Annual Report
Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Schools and Youth (cont.)			
Hands on the Arts	Event - Targeted	This children's festival is billed as a fun-filled day of hands-on workshops that provide an opportunity to explore a variety of art methods and genres for children of all ages. May 07	Outreach prepared a children's picture/frame craft that offered a crayon rubbing of a flower or plant with beneficial insect stickers available to stick on the picture. The art project was extremely popular, and approximately 350 kids came to the booth to make the craft. The intended message for the children was the importance of protecting beneficial insects, but the opportunity to promote the message was minimal due to trying to coordinate the craft for the overwhelming number of children served.
Plant Tours School Groups	Event – Targeted and Educational	Students learn the stages of treatment by viewing the various processes, equipment, and tanks. Taking a tour of the plant helps students gain a better understanding of how human actions impact water in the sanitary sewer. Ongoing	Outreach conducts student tours of the Water Pollution Control Plant to educate youth about the function of the treatment plant and the importance of providing wastewater treatment. The plant hosted 16 student tours this reporting year, reaching over 283 students.
Sunnyvale State of the City	Event - Targeted	This is an annual one-day event sponsored by the City as a Fourth of July celebration. Among other activities, the event features exhibits that provide community information to residents and youth July 06	Children at this event played the bean bag game. The player decides how to properly dispose of the pollutant named bean bag by tossing it into the correct receptacle. This activity was very popular among the children and they learned about proper disposal of hazardous products at the same time. About 45 children played the bean bag toss game.
Library Presentation	Event – Targeted and Educational	This year Outreach developed a new approach to reach youth with messages about water pollution prevention by incorporating a story and craft event into the Children's Special Program session at the Sunnyvale Library. September 06	This event was intended to reach children ages 7-9. Instead, the children attending the program were preschoolers in the 4 to 6 age range. Although the story and craft event was very successful, the message of pesticides and protecting beneficial insects was a bit lost on this audience.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Schools and Youth (cont.)			
Girl Scouts Badge	Event - Targeted	To earn the Bay Care Badge, Girl Scouts learned ways to protect our water resources, focusing on San Francisco Bay. Activities focused on the area of Watershed Stewardship and included watching "Secrets of the Bay" and completing activities in the workbook "Protecting our Water Supplies" and "Saving Water Inside and Out" Jan/Feb 07	About 100 Girl Scouts from Service Unit 38, (Cambrian Willow Glen and Campbell) completed the unit and received the patch. 20 Girl Scouts from Troop 83 based in Milpitas also participated in the Bay Care Badge activity.
Columbia Health and Safety Fair	Event – General and Targeted	This annual community event targets families and youth with health, safety, and community services related activities and exhibits. May 07	Outreach conducted Enviroscape demonstrations for the children attending this event, focusing on how stormwater can become polluted from human chores and activities. Specific water pollution prevention issues such as pesticides, fertilizers, dog waste, automotive fluids and car wash were presented. This is a beneficial event in which to deliver messages to students designed to encourage personal responsibility and actions that benefit the watershed. Number of children reached = 77.
Sunnyvale Pancake Breakfast	Event – General and Targeted	This event is sponsored by Public Safety and features a community breakfast, activities for kids, and exhibit booths that provide community services information. October 06	This annual event offers an excellent opportunity to reach out to both the community and youth about water pollution prevention. This year Outreach Staff offered an arts and crafts project for the children. The craft project utilized insect stickers and the pesticide oriented message was to protect our beneficial insects. About 50 kids came to the booth to do the craft project.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Regional			
Ad Hoc Task Group Mercury	Targeted	SCVURPPP work plan activities include developing a mercury virtual elimination policy for the City, educating employees, public outreach to residents and commercial businesses on fluorescent light recycling and other mercury containing products, and working with the County Household Hazardous Waste Program.	Ongoing. Sunnyvale is a participating and contributing member of the Ad Hoc Task Group for Mercury, and will continue to participate in this endeavor.
Ad Hoc Task Group Pesticides	Targeted	SCVURPPP workplan and Program activities include public outreach to residents and businesses regarding IPM, pesticide reduction, and proper disposal information.	Ongoing. Sunnyvale Outreach is a participating partner and remains active in all aspects of the campaign. In an ongoing effort, Sunnyvale will continue to work with co-permittees, SCVURPPP staff, and the consultant to approve campaign action plans, implement strategies and activities, and to develop promotional materials.
Classic Car Wash	Event – General and Targeted	This is a SCVURPPP sponsored event. Classic Car Wash offered 50 percent off all car wash services during a 2-hour live remote. May 07	The exhibit featured the "Where Does the Water Go" display and staff talked with and handed out literature to car wash patrons.
Our Water Our World	Targeted	The OWOW outreach campaign promotes IPM, less toxic alternatives to common pesticides and proper disposal.	Sunnyvale Outreach has been active in all aspects of the OWOW campaign both locally and regionally by writing and publishing articles in local community and employees newsletters, editing and producing PSAs, reviewing website development, organizing local events and staffing regional events, presenting classroom programs and designing promotional material used as collateral and for airing on community TV and theater. Outreach activities at local community and regional events promoted less-toxic alternatives to common pesticides.

Retail Stores Program	Targeted	Mercury – the Program partners with retail hardware stores in various locations throughout the County in a drop-off program for fluorescents and batteries that contain mercury. Pesticides – the Program partners with retail hardware and nursery stores in an effort to educate customers about pesticides and water pollution prevention, to offer and promote less toxic pesticides, and an agreement to display shelf-talkers and IPM literature.	Staff continues to work with the Program and co-permittees to ensure that retail hardware stores and nurseries in Sunnyvale continue their participation in both the mercury and IPM campaign.
Award Recognition EPA/BAPPG	Media - Targeted	Safe Disposal Days - Prescription Take Back Event Apr 07	Even though this event occurred in the 05-06 timeframe, the city of Sunnyvale recently received Outstanding Achievement recognition from the EPA for its pharmaceutical disposal collection (Safe Medicine Disposal Days) event produced in partnership with The Bay Area Pollution Prevention Group (BAPPG).
BAASMA Partnership - Thermometer Exchange Event	Event - Targeted	The Bay Area Pollution Prevention Group (BAPPG) coordinated a regional collection event for mercury thermometers and other mercury-containing devices. April – June 07	Participating agencies and organizations collected 3,828 thermometers and other devices at 30 different one-day and ongoing events.

Thermometer Exchange Poster

Celebrate the Earth and help the environment!

MERCURY FEVER THERMOMETER EXCHANGE

Exchange your mercury fever thermometer and receive a free non-mercury fever thermometer in return. The thermometer exchange will be held **Friday, April 20** at the Sunnyvale Community Center from **10 a.m. until 2 p.m.** and again from **4 p.m. to 6 p.m.**

To avoid breakage and contamination, mercury thermometers **MUST** be contained in an unbreakable and closed container, such as its original case, a plastic toothbrush holder or a soda/water bottle with a screw-on cap. As a second measure of protection, the closed container must be placed in a sealed plastic bag (zip-lock is fine). Other mercury-containing products **will not** be accepted at this event. For more information, call Environmental Outreach at (408) 730-7738, TDD (408) 730-7501.

CITY OF SUNNYVALE CALIFORNIA

Car Wash Brochure

039893

Community Fundraising Car Wash Events

Groups holding car wash events as fundraisers should follow the practices listed in this brochure.

Following these steps will help reduce pollution impacts on local waterways and help your organization stay in compliance with the City's storm water pollution prevention requirements.

We look forward to partnering with you in protecting the environment through water pollution prevention efforts.

077

Storm Drain Pollution Prevention Car Wash Kits Are Available for Non-Profit Group Fund-Raising Events

Car wash storm drain protection kits are available for use by nonprofit organizations. They will be loaned out to groups on a first-come/first-served basis.

To borrow a Car Wash Kit from the City of Sunnyvale Water Pollution Control Plant for your event, contact Environmental Division staff at :

(408) 730-7260 or e-mail
wpcp@ci.sunnyvale.ca.us

Friendly City staff will also visit your site to assist you in finding the best location for setting up your event to collect the wash-water and pump it to either a landscaped area for infiltration or to a sanitary sewer line.

City of Sunnyvale

Keep Our Creeks Clean: Good Practices to Follow for Car Wash Fund Raising Events

Don't Let Your Charitable Actions Cause Water Pollution Problems in Our Creeks and the Bay!

039894

Storm Drains Are Meant to Carry Rain, Not Soap and Pollutants

:ar Washing Impacts

Vhen cars are 'ashed, dirty water ontaining soaps or etergents, residues 'om exhaust fumes, asoline, motor oil nd heavy metals ılls onto pavement, and flows into nearby storm rain inlets. Water entering the storm drains, nlike the wastewater from our sinks, bathtubs nd toilets, is not treated before being dis-harged into our local creeks or the Bay. A sin-le car being washed may have a small impact. lowever, with events such as car wash fundrais-rs where many cars are washed in a localized rea, a significant amount of water pollution is roduced that can enter our creeks.

'he Soap

oaps or detergents used, even "biodegradable" ɔaps, can harm fish and small invertebrate ani-ıals (e.g., worms, clams, and insects) that pro-ide food for fish. Soaps contain surfactants that ıay harm fish by destroying the external mucus ıyers that protects them from bacteria and arasites, and may also cause damage to its gills.)etergent concentrations of 5 parts per million ɔpm) can kill fish eggs. Detergent concentra-ons as small as 2 ppm lower the surface ten-ion of water, allowing toxic chemicals such as esticides, to be more easily absorbed by fish.

The Water

Even if soaps or detergents are not used, the wash water will pick up grease, oil, elements from brake linings, residues from exhaust fumes, rust, benzene and chromium. Adding detergents may also add phenols, dyes, acids and ammonia to the mixture. As that water flows across a driveway or parking lot, it will pick up more dirt and debris as well as heat up on a warm day. In addition to containing pollutants, this heated water could raise the normal temperature of the creek it enters, causing problems for cold-water adapted fish such as salmon or steelhead trout.

Good Practices for Car Wash Fundraisers

1. Before the car wash is held, set up a meeting with participants to explain the proper procedures to follow.

2. Clean up/sweep up any debris or litter from the car washing area and dispose of it in the trash before washing begins.

3. Select a site for washing where the water can either soak into grass or gravel or where wash water can be collected before it enters a storm drain and then pumped to nearby grassy areas or to the sanitary sewer (through a sink or drain). The City has car wash kits that can be loaned to nonprofit groups that will block a storm drain and help collect wash water so it can be pumped to landscaping or the sanitary sewer for discharge.

4. Use only soaps or cleaners labeled "non-toxic", "phosphate-free" or "biodegradable", which are usually vegetable-based or citrus-based. Do not use acid-based wheel cleaners or engine degreasers.

5. You can minimize the amount of soapy wash water runoff by doing the following:

   - Use an adjustable nozzle on the hose that will shut off the flow of water. Turn off water when not in use to help conserve water.

   - Use the least amount of soap possible and put it in a bucket to make up soapy water for use with rags or sponges. Do not add more soap directly to the rag or sponge. Wring out rags or sponges into buckets, not onto the ground.

   - Empty buckets into the sanitary sewer system (e.g., sinks or toilets). Don't empty buckets of soapy or rinse water into the parking lot, street, gutter or storm drains.

5. Only wash the exterior surface of the vehicle. Don't wash the engine, undercarriage, or transmission area.

6. Shake car mats into a trash can or vacuum them. Don't shake car mats onto the ground.

7. Remember to clean up after the event. Have volunteers walk the perimeter of the site to pick up any litter and dispose of it properly.

8. **Before you let anything go into the gutter or storm drain, stop and think!** Dirty water from your car wash will be entering local creeks and the Bay without treatment.

Quarterly Report Articles

City Reaches Out to Community on Pest Control

Nestled comfortably among vendor booths selling flowers, fruits, vegetables and exotic home-made fare, market-goers often find a member of Sunnyvale's Environmental Outreach Department distributing helpful advice on controlling pests the less-toxic way.

"We're out talking to the public about pesticides and fertilizers that wash off lawns and gardens during rains and over-watering, and drain into storms drains that flow directly to our local creeks and Bay," said Sally Personett, Environmental Outreach Coordinator for the City's Public Works Department. "People want to know how they can help. The Farmer's Market offers a unique venue to provide water pollution prevention information to the community. My job there is to help them learn alternative ways to manage pest problems without using toxic products that may eventually get into our water."

Among the Top Inquiries?

"Troubles with snails and ants are by far the most common complaints we receive," she said.

To get rid of snails, Personnett suggests crumpling up a section of the newspaper into a ball, then spraying it down with water to make it wet. At dusk, place the wet, crumpled newspaper in the garden where the snails are. During the night the snails will gather there because it's dark and damp. In the morning, simply crumple the newspaper up, and place it in a plastic bag and tie it. You can dispose of the plastic bag in the garbage.

You can learn other alternate methods of managing insect and pest problems. For more information on water pollution prevention and controlling pests the less toxic way, call the City of Sunnyvale Environmental Outreach Department at (408) 730-7738, TDD (408) 730-7501, or visit *wpcp.sunnyvale.ca.gov*.

QUARTERLY REPORT SUMMER 06

Don't Dump Unused Medicines Down the Drain

Some things stay the same, some don't. It was once common practice to flush unused or expired medicines down the toilet, or pour them in the drain to keep them out of the reach of children and pets. We now know that dumping medication into the sewer system poses a potential danger to water quality. New evidence shows that trace pharmaceutical deposits are turning up in creeks, rivers and bays around the world. And although documentation is ongoing, studies of fish in waterways near Denver, in Lake Mead and in London's Thames River have reported changes in aquatic life that may be linked to pharmaceutical deposits. The EPA now describes pharmaceutical waste as an environmental pollutant.

Treatment of sanitary sewer water from drains and toilets at wastewater treatment plants removes conventional pollutants such as biodegradable organic material. But wastewater treatment facilities were not designed to remove low concentrations of synthetic pollutants such as pharmaceuticals, and new studies show that prescription drugs are not being completely filtered out when passing through sewage treatment.

To help protect our creeks and Bay, a less-polluting alternative has replaced outdated methods of getting rid of medicine. Residents are asked to bring unused or expired prescription drugs and medications to a Household Hazardous Waste (HHW) drop-off event for safe disposal. HHW events are held the third Saturday of every month (except December) from 8 a.m. to 1 p.m. at 164 Carl Road. Medicines and pills should be transported in original containers, but be sure to remove your personal information. As with all HHW drop-off events, transport a full-limit load by gathering any left over paint, pesticides, pool chemicals or mercury-containing products all in one trip. Drop-off guidelines limit loads to five gallons or 50 pounds per vehicle, per trip.

Proper disposal of pharmaceuticals or any HHW product keeps pollution out of our waterways and leaves a clean environment for fish and wildlife.

For more information on water pollution prevention, contact the City of Sunnyvale Environmental Outreach Department at (408) 730-7738, TDD (408) 730-7501, or visit *wpcp.sunnyvale.ca.gov*.

QUARTERLY REPORT FALL 06

Antibacterial Products Can Be Overused

Can Cause Health Problems, Create Stronger Germs

Eliminate germs! It's a marketing catchphrase you've probably seen countless times, developed in response to a perceived danger on the part of consumers. As a result, the use of antibacterial products has skyrocketed in the last few years. Currently, more than 700 products containing antibacterial chemicals, most notably triclosan, are being marketed for the home, and antibacterial agents can be found in everything from soaps, toothpaste, clothes and toys, to kitchenware, bedding and bath products.

As a result of extensive human use, triclosan – a registered pesticide that can accumulate in humans and fish – has been found in bodies of water, including San Francisco Bay. Since normal wastewater treatment process cannot remove triclosan from the water, large quantities of the chemical are continuously discharged into waterways. Recent studies show these antibacterial products may be causing human health problems as well as environmental harm.

One major concern is that overexposure to triclosan will allow bacteria to become resistant to antibacterial products, rendering them useless to those who actually need them such as hospitals who use antibacterial agents as an important health care and sanitary tool. According to the American Medical Association, the Food and Drug Administration and other researchers, chemically-based antibacterial soaps and related products are no more effective than plain soap in protecting us from germs.

Alternatives to Triclosan

- Wash hands thoroughly. Regular soaps are effective and work well. Lather hands for at least 10 to 15 seconds and rinse in warm water.
- Wash hands often, especially when handling food, before eating, after using the bathroom and when someone in your house is sick.
- Dry hands with a clean towel to avoid recontamination.
- Wash surfaces that come in contact with food with detergent and water.
- Wash children's hands and toys regularly to prevent infection.

Getting Rid of Mercury

Proper Disposal of Mercury is Beneficial to the Environment

In the 18th century, German physicist Gabriel Fahrenheit developed the most accurate thermometer the world had ever seen. His secret? Mercury, which expanded at a predictable, measurable rate. While Fahrenheit was able to harness mercury to create his new thermometers, he didn't have the depth of knowledge we have today about this toxic substance. Evaporated mercury from a broken thermometer, spilled into a crack or soaked into a carpet, can lead to potentially dangerous indoor air levels and may create a health risk for families inside their home.

Improper disposal, such as pouring the mercury down the drain or placing it in the trash, can also be harmful to the environment. Just one broken thermometer is sufficient to contaminate enough water to fill 200 Olympic-sized pools – 5 million gallons. To avoid environmental contamination, these products must be properly disposed of as household hazardous waste.

Sunnyvale residents can recycle products such as mercury-containing thermostats and thermometers, fluorescent light bulbs and tubes, and various types of batteries at the SMaRT Station, or at household hazardous waste drop-off events held the third Saturday of each month, 8 a.m. – 1 p.m., except December.

Eliminating even a small amount of mercury will have a beneficial effect on the environment, and reduces the risk to humans and other living organisms. For more information, call the Environmental Services Department at (408) 730-7738, TDD (408) 730-7501, or visit *wpcp.sunnyvale.ca.gov*.

Mercury Thermometer Exchange
April 20 at the Sunnyvale Community Center
550 E. Remington Drive
10 a.m. – 2 p.m.
4 p.m – 6 p.m.

QUARTERLY REPORT SPRING 07

Care For Yourself And The Earth

In Sunnyvale, in addition to the collection of garbage, recyclable materials and yard trimmings, residents are provided with opportunities to learn how to safely maintain their home and garden. Of special interest this spring are the household hazardous drop-off events and the compost workshops.

Making Compost is So Easy – Learn How in Sunnyvale

Beautiful yards filled with vibrant colors and plush foliage can be grown in an environment that is also healthy for you and your family. The more these beautiful lawns and gardens are supported by compost, rather than fertilizer or pesticides, the healthier our community will be.

How-to workshops are held monthly through October at the Sunnyvale Heritage Building at the Sunnyvale Community Center, 550 E. Remington Drive, from 10 a.m. to noon. Even if you have a gardener, you may want to come to the workshop to learn about working with a gardener to make compost in your own yard. Sunnyvale residents who attend these workshops are eligible to purchase a compost bin (one per household) at a significant discount. To register for a workshop, contact the Sunnyvale Recycling Program at (408) 730-7262.

Next Workshop Dates:
April 21, May 19 and June 16

Sunnyvale Household Hazardous Waste Drop-off Events

Sunnyvale residents may bring hazardous materials, including cleaning products, mercury-containing products such as fluorescent bulbs and yard maintenance products, to a monthly Sunnyvale Household Hazardous Waste Drop-off event (see guidelines below). When you have a full-limit load, bring your hazardous household waste to a drop-off event in Sunnyvale.

Other items accepted at a household hazardous waste disposal event include: pesticides, insecticides, herbicides, flammable or combustible liquids, fire extinguishers, paints, household cleaning and pool maintenance products. For more information about the Household Hazardous Waste Drop-off Event schedule, contact the Sunnyvale Recycling Program (408) 730-7262.

Businesses with small quantities of hazardous waste may be eligible to participate in a county drop-off program, by appointment only; some fees will apply. Call (408) 299-7300 for details.

Planning Your HHW Drop-off Trip

- Make sure that all materials are in the original container or carefully contained in a non-leaking sealed container.
- Do not mix materials.
- Follow the 5/50 rule of thumb: make the trip to a drop-off event when you have the maximum allowable quantities of five gallons or 50 pounds per trip.

Shop after the drop

Some dropped-off materials are available at no charge for reuse. To shop for dropped-off products, stop by the event site between 1:30 p.m. – 2 p.m. at a scheduled drop-off event.

Events are held the third Saturday of each month, except December.

Next event dates:
Apr. 21, May 19 and June 16

Hours: 8 a.m. – 1 p.m.

No appointments required for Sunnyvale residents.

Location: 164 Carl Road, Sunnyvale

MERCURY FEVER THERMOMETER EXCHANGE

Friday, April 20 at the Sunnyvale Community Center
10 a.m. until 2 p.m. and again from 4 p.m. to 6 p.m.

To avoid breakage, transport the thermometer in a closed container such as its original case, a toothbrush holder, or a plastic bottle with a screw-on cap. Additionally, place the closed container in a plastic zip-lock bag. For more information call Environmental Outreach at (408) 730-7738, TDD (408) 730-7501.

SUNNYVALE HELPS KEEP FUNDRAISING CARWASHES ENVIRONMENTALLY FRIENDLY

Car washes are a popular choice for nonprofit fundraising, yet many do not know the soap and water used to wash and rinse the cars contains waste that can pollute water resources. Dirty water containing soaps, detergents, residues from exhaust fumes, gasoline, motor oil and heavy metals flows along the pavement into nearby storm drains. Water entering the storm drain system is not treated before being discharged into our local creeks and the Bay.

To help prevent pollution from car wash events, the Sunnyvale Environmental Services Division at the Water Pollution Control Plant recently purchased two Sudsafe storm drain protection kits that can be borrowed by nonprofit groups. Along with other supplies, the kits contain an insert to block a storm drain and a pump to divert wash water to nearby landscaping or to the sanitary sewer for treatment and discharge. In addition, a brochure describing proper car wash event practices is available.

For more information on best practices for car wash fundraising, or to borrow the car wash kit, call Sunnyvale Environmental Services at (408) 730-7260, TDD (408) 730-7501.

Release # 03-15

EXCHANGE YOUR MERCURY FEVER THERMOMETER

SUNNYVALE, Calif. – Mercury is well-known as a toxic substance, yet many of us still have mercury-based thermometers in our medicine cabinets. The City of Sunnyvale wants to make it easy for you to exchange your old mercury thermometer for a non-mercury model. On Friday, April 20, the City will hold a fever thermometer exchange at the Sunnyvale Community Center, from 10 a.m. to 2 p.m., and again from 4 p.m. to 6 p.m.

To avoid breakage and contamination, mercury thermometers must be contained in a closed, unbreakable container, such as its original case or a soda/water bottle with a screw-on cap. As a second measure of protection, that container must be placed in a sealable plastic bag. Other mercury-containing products will not be accepted at this event.

The Sunnyvale Community Center is located at 550 E. Remington Drive. For more information on the mercury fever thermometer exchange, visit *wpcp.sunnyvale.ca.gov*, or call the Environmental Services division at (408) 730-7738, TDD (408) 730-7501.

Create a Less-Toxic Environment and Healthier Bay

You may live miles from San Francisco Bay and still be polluting its waters.

Sewers

Sewers carry wastewater from homes and businesses to the Water Pollution Control Plant for treatment before being released to the Bay.

Storm Drains

Water draining from rain and over watering flows down the street in gutters that drain to storm drains. But this water also collects contaminants such as chemicals, grease, automotive fluids, pesticides, pet waste and other debris, and carries it into the storm drain system where water flows untreated to our local creeks and Bay. These and other pollutants contaminate our water and may harm fish and other aquatic life.

NO DUMPING FLOWS TO BAY

To learn more about how you can help prevent water pollution, visit *wpcp.sunnyvale.ca.gov* or call Environmental Outreach at (408) 730-7738, TDD (408) 730-7501

Nov/Dec 06 Printed on Recycled Paper.

KEEP CLEAN WITHOUT ANTIBACTERIAL PRODUCTS

More than 700 home products contain antibacterial chemicals. The most common chemical used in antibacterial products is **TRICLOSAN**, a registered pesticide.

Human Health and Environmental Concerns

Due to its widespread use, **TRICLOSAN** is now found in water bodies, including San Francisco Bay. Recent studies show antibacterial products may be a cause for concern:

1. **TRICLOSAN** cannot be removed during normal wastewater treatment, and large quantities are continuously discharged into waterways.
2. Overexposure may allow bacteria to become resistant to antibacterial agents, rendering them useless as an important sanitary tool to hospitals and other users.

Alternatives to Triclosan

- Wash hands often and lather for at least 10 to 15 seconds.
- Use products that do not contain **TRICLOSAN** such as hand-sanitizing gels with an alcohol or peroxide base.

To learn more about how you can help prevent water pollution, visit ***wpcp.sunnyvale.ca.gov***
or call Environmental Outreach

Welcome to Sunnyvale!

We're Glad You're Here!

We Make It Easy to Recycle - Right Where You Live

As a new member of our community, you've joined a group of individuals and families who work hard every day to recycle and reduce waste. By recycling, you reduce the amount of garbage going to landfills, save valuable resources and protect the environment. That's why the City of Sunnyvale and Specialty Solid Waste & Recycling want you to know about all the great programs that make it convenient for you to recycle right in your complex. With your help, we could easily double the amount of material being recycled in each household.

You Can Recycle:

In the Newspaper Cart

- **Newspapers, inserts, and phone books**

In the Bottles and Cans Cart

- **Glass food and beverage containers** such as pasta sauces, ketchup, jelly, peanut butter, pickles, olives
- **Steel, aluminum, mixed metal food and beverage cans** such as soup, tuna, soda
- **Plastic bottles, jars, and tubs (#1–7)** such as milk, water, laundry and dish soap, juice, soda, margarine, yogurt

Please empty all containers before recycling.

SMaRT Ideas

Use a tote bag, grocery bag, or box to store glass, metal and plastic recyclables. When either container is full, take it to the recycling carts near your unit, empty it and reuse it if possible.

Find Your Recycling Carts

On-site recycling carts are typically located either in your parking garage or next to the garbage enclosure.

Glass, metal and plastic containers

Newspapers and inserts

Hazardous Waste Do's and Don'ts

Do know the rules on correct disposal of consumer electronics. Virtually any product with a battery or circuit board (including small appliances, computers, printers, radios, DVD players, and stereos) or containing mercury (such as fluorescent lights, thermometers and thermostats) should not be put in the trash.

Do bring your consumer electronics to the SMaRT Station® at 301 Carl Road.

Don't place hazardous waste, such as household cleaners, pesticides, paint, used motor oil or anti-freeze in a garbage bin or recycling cart, or down the drain or on the ground.

Do bring this type of hazardous waste to a Household Hazardous Waste event—the third Saturday of each month (except December), 8 a.m. - 1 p.m. 164 Carl Road.

For more information, contact the Sunnyvale Recycling Program at (408) 730-7262 or TDD (408) 730-7501 or visit www.sunnyvalerecycles.org.

Used Motor Oil

We make it easy to recycle used motor oil and oil filters, too! Ask your apartment manager if you have the City's oil recycling service. If so, then look for your blue oil box, containing empty jugs for used oil and bags for filters, near your garbage and recycling area. Follow the instructions on the box. Additional supplies are just a phone call away at (408) 730-7400. Allow one week for delivery.

Printed on 30% Recycled Content Paper 10/06

Le Facilitamos el Reciclaje - Justo Donde Usted Vive

Como nuevo miembro de nuestra comunidad, ahora forma parte de un grupo de individuos y familias que se esfuerzan todos los días por reciclar y reducir los desechos. Al reciclar, usted reduce la cantidad de basura que termina en los rellenos sanitarios, ayuda a conservar valiosos recursos y protege al medio ambiente. Es por eso que la Ciudad de Sunnyvale y Specialty Solid Waste & Recycling desean que usted conozca todos los magníficos programas implementados para reciclar justo en el lugar donde vive. Con su ayuda podríamos duplicar fácilmente la cantidad de artículos que se reciclan en cada hogar.

Usted Puede Reciclar:

En el carrito para periódicos
- **Periódicos, suplementos y directorios**

En el carrito para botellas y latas
- **Envases de vidrio para alimentos y bebidas**, tales como recipientes de salsa para pasta, ketchup, mermelada, mantequilla de cacahuate (maní), pepinillos, aceitunas
- **Latas de acero, aluminio y metales mixtos para alimentos y bebidas**, como latas de sopa, de atún o de refresco
- **Botellas, frascos y recipientes de plástico (#1 – 7),** como los de leche, agua, detergente para lavar ropa y jabón para lavar platos, jugo, refrescos, margarina y yogurt.

Por favor, vacíe todos los recipientes antes de reciclarlos.

SMaRT ! Ideas !

Utilice una bolsa de tela, bolsa de supermercado, o una caja para guardar artículos reciclables de vidrio, metal y plástico. Use otro recipiente para los periódicos y suplementos. Cuando el recipiente esté lleno, llévelo a los carritos de reciclaje cerca de su unidad habitacional, vacíelo y si es posible utilícelo de nuevo.

Descubra Dónde se Encuentran Los Carritos de Reciclaje

Los carritos de reciclaje de su unidad habitacional generalmente se encuentran, ya sea en el estacionamiento, o en el área de basureros.

Qué hacer y qué no hacer con los desechos peligrosos incluyendo artículos eletrónicos

Infórmese de cuáles son las reglas que debe seguir para desechar correctamente los artículos electrónicos. En general, ningún producto que tenga baterías o tablero de circuitos (incluyendo aparatos pequeños de uso en el hogar, computadoras, impresoras, radios, reproductores de DVD y estéreos) o que contengan mercurio (tales como tubos fluorescentes, termómetros y termostatos) deben ser desechados en la basura.

Lleve sus materiales electrónicos de consumo común a la estación SMaRT en 301 Carl Road.

No deposite los desechos peligrosos, tales como artículos para la limpieza del hogar, pesticidas, pintura, aceite de motor o líquido anticongelante usados en el bote de basura, en los carritos de reciclaje ni los arroje al desagüe o al suelo

Éstos pueden ser llevados al 164 Carl Road durante los Días para Deshacerse de los Desechos Peligrosos de Uso en el Hogar, el tercer sábado de cada mes (excepto diciembre), de 8 a.m. a 1 p.m.

Para recibir información adicional, comuníquese con el Programa de Reciclaje de Sunnyvale llamando al (408) 730-7262 o visite www.sunnyvalerecycles.org. TDD (408) 730-7501

Aceite Usado de Motor

Le facilitamos reciclar el aceite usado de motor ¡y los filtros de aceite también! Pregunte al administrador de su apartamento si usted cuenta con el servicio de reciclaje de aceite de la Ciudad. De ser así, busque la caja azul de aceite que contiene recipientes vacíos para aceite usado y bolsas para filtros cerca del área donde se encuentran los basureros y zona de reciclaje. Siga las instrucciones indicadas en la caja. Puede obtener materiales adicionales con sólo hacer una llamada telefónica al (408) 730-7400. Éstos serán entregados en una semana.

Impreso en papel con 30% de Contenido Reciclado. 09/06.

¿Tiene alguna pregunta? Llame a Specialty Solid Waste & Recycling al **(408) 565-9900** o visítenos en Internet en **www.sswr.com**.

Recycle Today and Every Day!

On the whole, Sunnyvale residents have been doing a great job with recycling. With the support of dedicated recyclers throughout our city, we're keeping trash out of our landfills, making a difference to our environment and improving the quality of life in Sunnyvale.

The good news is that the City of Sunnyvale has programs in place to help you recycle. Like our recycling tote program. Have you received yours? If not, you'll be receiving it soon. Hang it on your door, put it under your sink or a counter. Then fill it up with your recyclables like bottles, cans, and plastic containers and take it to your on-site recycling carts.

It's up to you! You play a vital role in keeping recycling in Sunnyvale a top priority.

¡Recicle hoy y todos los días!

En general, los residentes de Sunnyvale han hecho una excelente labor de reciclaje. Con el apoyo de los dedicados ciudadanos que reciclan en toda la ciudad, estamos manteniendo la basura alejada de nuestros basureros de relleno sanitario, efectuando una gran aportación al medio ambiente y mejorando la calidad de vida en Sunnyvale.

Afortunadamente la Ciudad de Sunnyvale cuenta con programas para ayudarlo a reciclar. Por ejemplo, el programa para reciclar con bolsa de tela, ¿ya recibió una? Si no es así, pronto la recibirá. Cuélguela en una puerta, debajo del fregadero o debajo de una repisa. Luego, llénela con artículos reciclables como botellas, latas, y recipientes de plástico y llévela a los carritos de reciclaje de su unidad habitacional. ¡Dependemos de usted! Usted juega un papel de vital importancia para que el reciclaje en Sunnyvale siga siendo una de las más altas prioridades.

Consumer Electronics Banned from Trash

New state laws are in effect. Please pay special attention to the green area of the chart on page 2.

Se Prohíbe el Desecho de Electrónicos en Basureros

Existen nuevas leyes. Por favor, preste atención a la área resaltada en verde en la tabla de la página 2.

Qué, Dondé, y Cómo Reciclar:

Recycling Helpful Hints

ITEM	WHERE TO RECYCLE, DONATE, REUSE	HOW TO PREPARE
Bottles & cans • **Glass food and beverage containers** (pasta sauces, ketchup, jelly, pickles) • **Steel, aluminum, and mixed-metal food and beverage cans** (soup, tuna, pet food, soft drinks) • **Plastic bottles, jars and tubs** (milk, water laundry and dish soap, juice, soda, yogurt, salsa)	Carts where you live	Empty and rinse. Put in the light blue recycling cart.
Newspapers & inserts	Carts where you live	Put in the dark blue recycling cart.
TVs, monitors, consumer electronic products - virtually any product with a battery or circuit board – cell phones, small appliances, computers and printers.	SMaRT Station® See more detail at www.sunnyvalerecycles.org - Recycling Resources or call (408) 730-7262.	Transport carefully.
Fluorescent tubes, thermostats and thermometers.	SMaRT Station and HHW Program	These items contain mercury, which is hazardous. Handle carefully to prevent breakage.
Household batteries	SMaRT Station or HHW Program	Place clear tape on button and rechargeable battery terminals.

Algunas Útiles Surgerencias

ARTÍCULO	DONDÉ RECICLAR, DONAR, REUTILIZAR	CÓMO PREPARARLO
Botellas y latas * **Envases de vidrio para alimentos y bebidas** (recipientes de salsa para pasta, ketchup, mermelada, mantequilla de cacahuate maní, pepinillos) * **Latas de acero, aluminio y metales mixtos para alimentos y bebidas** (sopa, atún, alimento de mascotas, refresco) * **Botellas, frascos y recipientes de plástico** (leche, agua, detergente para lavar ropa, jabón para lavar platos, jugo, refrescos, yogurt, salsa)	Carritos donde usted vive	Limpie y enjuague. Coloque en el carrito de reciclaje azul claro.
Periódicos y suplementos	Carritos donde usted vive	Coloque en el carrito de reciclaje azul oscuro.
Televisores, monitores, productos electrónicos - prácticamente cualquier producto con batería o tarjeta de circuito - incluyendo teléfonos celulares, electrodomésticos pequeños, computadoras e impresoras.	Centro de Reciclaje SMaRT Station® Mayor información en www.sunnyvalerecycles.org - Recycling Resources o llame al (408) 730-7262.	Transporte con cuidado
Tubos fluorescentes, termostatos y termómetros.	Centro de Reciclaje SMaRT Station y Programa HHW	Estos artículos contienen mercurio, el cual es peligroso. Manéjelos con cuidado para evitar que se rompan.
Baterías de uso en el hogar	Centro de Reciclaje SMaRT Station o Programa HHW	Coloque cinta transparente en el botón y en los terminales de la batería recargable.

Recycling EVERY DAY begins and ends with you.
El reciclaje DIARIO empieza y termina con usted.

Here are some helpful "Dos" and "Don'ts"
Estas son algunas útiles sugerencias de lo que debe y no debe hacer.

1. **Do** know what you can recycle.
1. **Sepa** lo que puede reciclar.

2. **Do** recycle every day!
2. **¡No** olvide reciclar todos los días!

3. **Do** rinse your containers before you recycle.
3. **Enjuague** sus recipientes antes de reciclarlos.

4. **Do** use your tote.
4. **Utilice** su bolsa de tela de reciclaje.

5. **Do** pay attention to what goes in your on-site recycling carts.
5. **Preste** atención a lo que deposita en los carritos de reciclaje de su unidad habitacional.

6. **Don't** put products with batteries or circuit boards in your trash OR in your recycling. Bring them to the SMaRT Station.
6. **No** tire a la basura NI en el recipiente de reciclaje productos con baterías o con tableros de circuitos. Llévelos al Centro de Reciclaje SMaRT Station

7. **Don't** put hazardous waste in your trash OR in your recycling. Where possible, leave in the original container. Then take to a household Hazardous Waste Drop-Off Event. Upcoming events Sept. 16, Oct. 21, Nov. 18 (8 a.m. to 1 p.m.) at 164 Carl Road in Sunnyvale.
7. **No** deposite desechos peligrosos en la basura NI en su recipiente de reciclaje. Siempre que sea posible, deje estos productos en su recipiente o envoltura original, y luego llévelos al Día para Deshacerse de los Desechos Peligrosos de Uso en el Hogar. Los próximos eventos de este tipo tendrán lugar el 16 de septiembre, el 21 de octubre y el 18 de noviembre (8 a.m. – 1 p.m.) en 164 Carl Road en Sunnyvale.

039919

Extra Dump Weekends

8:30 a.m. to 4:30 p.m.
For Sunnyvale residential customers only

OCT 7 | OCT 8 & OCT 14 | OCT 15

Fines de Semana para Deshacerse de Basura Adicional

8:30 a.m. a 4:30 p.m.
Para clientes residenciales de Sunnyvale exclusivamente

Sunnyvale residents may dump extra trash at no charge on **October 7th & 8th, and October 14th and 15th** at the SMaRT Station®, 301 Carl Road (see map).

To better serve you - we need your help.

NEW

- **Put all electronic products in a separate container not mixed with other items. Limit of 4 TVs or monitors.**
- You must have identification and proof of residency. See on-line for acceptable proof and restrictions at **www.sunnyvalerecycles.org**.
- Drive carefully through the SMaRT Station and follow instructions.
- Unload quickly so other residents can access the tipping area.
- Household hazardous cleaning or maintenance chemicals will not be accepted here. Please bring items to a monthly Household Hazardous Waste Drop-off Event. Call (408) 730-7262 for information.

Los residentes de Sunnyvale pueden descargar basura adicional en forma gratuita el **7, 8, 14 y 15 octubre** en el Centro de Reciclaje SMaRT Station®, 301 Carl Road (ver mapa).

Para servirle mejor - necesitamos de su ayuda.

NUEVO

- **Deposite todos los productos electrónicos en otro recipiente para evitar que se mezclen con otros artículos. Límite de 4 TVs o monitores.**
- Debe contar con identificación y comprobante de residencia. Infórmese en Internet sobre comprobante aceptable y restricciones en **www.sunnyvalerecycles.org**.
- Conduzca con cuidado a través del Centro de Reciclaje SMaRT Station y siga las instrucciones.
- Descargue sus objetos rápidamente de manera que otros residentes puedan tener acceso al área de vaciado.
- En este lugar no se aceptarán sustancias químicas de limpieza o mantenimiento del hogar peligrosas. Por favor lleve esos artículos a uno de los Días para Deshacerse de los Desechos Peligrosos de Uso en el Hogar programados mensualmente. Para mayor información, llame al (408) 730-7262.

RECYCLE TODAY - HONOR THE EARTH HELP FIGHT GLOBAL WARMING

April 22nd is Earth Day. Honor the earth that day and **every day** by recycling and using other waste reduction practices. We have year 'round programs to help you reduce waste and recycle. Recycling even helps reduce greenhouse gases and prevent global warming.

Your waste reduction and recycling have reduced material going to landfills by 61 percent. Do keep up the good work. We can reduce waste and recycle even more in 2007!

Do these simple things:

- Recycle today
- Go to *www.sunnyvalerecycles.org* and click on "How do I Recycle..." to learn how you can recycle almost anything
- Donate unwanted, reusable items or hold a garage sale
- Reduce your use of hazardous products
- Take a compost or garden workshop
- Learn about grasscycling to reduce yard waste and have a healthy lawn
- Use cloth or reuseable shopping bags when you are grocery shopping

Extra Curbside Garbage Pickup Enhances Your Spring Clean-up Activities

Apr. 2 - Apr. 27
(on your regular collection day)

Each week from April 2 through April 27, Sunnyvale residents in single-family, duplex, triplex, and mobile homes can place additional material at the curb to be collected by Specialty Solid Waste & Recycling. That's **four weeks** of extra curbside garbage pickup! During these four weeks you may put out extra materials **on each of** your regular collection days. It's easy. Please note new rules for disposal of electronic products, mercury-containing items and batteries.

Place your materials neatly at curbside. Securely contain any loose materials to avoid pollution. We start our routes at **6:00 a.m.** and have multiple trucks on the road. Large items will be picked up by a different Specialty vehicle, which may arrive before or after the collection of other materials. If your pickup was missed, please contact Specialty Solid Waste & Recycling at (408) 565-9900 after 3:00 p.m.

Specialty WILL Pick Up

ITEM	PREPARATION INSTRUCTIONS	SIZE/WEIGHT RESTRICTION
Garbage - 32 gallon cans	Fill only to rim. Contain loose materials in plastic bags.	70 pound limit
Plastic trash bags	Make sure bags do not tear.	30 pound limit
Refuse in cardboard boxes	No loose materials such as Styrofoam® peanuts Put this type of item in garbage bags before disposal.	No larger than 3' x 2' x 2' and 25 pound limit
Cardboard boxes	Flatten and tie or tape into bundles.	No larger than 30" x 30" x 6"
***Appliances – Large** such as washers, dryers, refrigerators, water heaters	Remove or securely tape fridge and freezer doors closed. **Call Specialty at (408) 565-9900** with your address to help with collection planning (a separate extra truck is used for larger items).	
Carpets and tree branches	Tie into bundles	No more than 4' long and 1' in diameter
Lawn mowers	Drain of all fluids.	
***Household furniture, and large items** such as couches, chairs, and mattresses	Stack neatly at curbside so that the items do not interfere with traffic. **Call Specialty, (408) 565-9900**, with your address to help in collection planning (an extra truck is used for larger items).	*If in good condition, consider donating to a reuse agency (see list at *www.sunnyvalerecycles.org* under "Garage Sales & Donations").

DO NOT PUT YOUR CURBSIDE MATERIAL ON TOP OF WATER METER BOXES. !

Specialty WILL NOT Pick Up

ITEM	WHAT TO DO WITH THEM
Consumer electronic products - including virtually any product with a battery, circuit board or containing mercury - fluorescent lights (of any type), small appliances (including microwave ovens), computer equipment including laptops & printers,	These items are accepted from residents at the SMaRT Station®. Household batteries may be recycled at curbside year 'round. See more detail at *www.sunnyvalerecycles.org* - "How Do I Recycle" or call (408) 730-7262.
TVs or computer monitors	Take to the SMaRT Station, Limit of 4.
Construction materials and debris such as windows, doors, fencing, sheds and lumber	Contact Whole House Building Supply at (650) 856-0634 for possible donation (pick-up fee may apply), take to the SMaRT Station,** or call Utility Billing Office, (408) 730-7400, for debris box and disposal details and costs.
Hazardous materials such as old paints, thinners, and pesticides	Take to a Household Hazardous Waste Drop-off event.
Sod or tree stumps	Take to the SMaRT Station**
Tires and other automobile parts such as rims, wheels, engines, camper shells, car seats or auto body parts	Take to the SMaRT Station**
Propane tanks including tanks used in camping	Take to a Household Hazardous Waste Drop-off event.
Loose debris such as sawdust, Styrofoam peanuts, shredded paper or ashes (unless bagged)	Will be picked up if bagged and put with regular garbage (make sure ashes are cold before bagging).
Business or commercial waste	Call Utility Billing (408) 730-7681 for debris box and disposal information.

** **Regular disposal fees apply except during Extra Dump Weekends March 31 & April 1, and April 14 & 15**

For information about additional disposal options, contact Specialty Solid Waste & Recycling at (408) 565-9900

Got Extra Stuff to Dump?
Join Us At the SMaRT Station for Extra Dump Weekends

Mar. 31 & Apr. 1, Apr. 14 & Apr. 15 @ 8:30 a.m. - 4:30 p.m.

For Sunnyvale residents

Sunnyvale residents with garbage service may dump extra trash at the SMaRT Station at no charge on two upcoming weekends – March 31 & April 1 and April 14 & 15 at 301 Carl Road in Sunnyvale (see map below).

Please note new rules for electronic products and mercury-containing items.

PLEASE NOTE:

Household hazardous cleaning and maintenance chemicals will not be accepted. Please bring these hazardous items to a monthly Household Hazardous Waste Drop-off Event (see next page for details).

To better serve you, we need your help:

- Have your identification and proof of residency ready at the gate.
  Acceptable proof of residency includes:
  Your driver's license with your Sunnyvale address or your driver's license plus a 2007 PG&E , telephone, TV cable, or City of Sunnyvale utility bill showing a Sunnyvale address with the name on the bill matching the name on the driver's license.
- Drive carefully through the SMaRT Station and follow instructions.
- Unload quickly so other residents can access the tipping area.

RESTRICTIONS:

- A Sunnyvale resident must be in each vehicle with each load.
- No vehicles larger than one-ton load capacity will be admitted.
- Put all electronics products in a separate container not mixed with other items.
- No more than a total of four (4) TVs and/ or monitors.

- Asphalt, concrete, dirt and sod require special handling. You may be diverted to a special line to unload these materials.
- No more than four (4) tires.
- No business or commercial materials.

039923

Compost WorkShops Help Your Garden Grow

Apr. 21, May 19 & Jun. 16
@ 10 a.m. - 12 noon

Heritage Center Building
550 E. Remington Dr., Sunnyvale

Learn how composting can benefit your yard. Attend a composting workshop. Find out how to make compost - mixing grass clippings, leaves, yard trimmings, and kitchen scraps. It reduces garbage and makes healthier plants and gardens in the process.

After attending a workshop, Sunnyvale residents may purchase a compost bin and instruction book for only $28 (a 69% discount from retail). Reserve your place at (408) 730-7262.

Pick up finished compost at the SMaRT Station - free of charge for Sunnyvale residents.

Attend our composting class and **for only $28**, you will receive a compost bin and instruction book!

Reduce Your Use of Toxic Chemicals Year 'Round – Bring Your Hazardous Materials to a Monthly Drop-Off Event

Apr. 21, May 19 & Jun. 16
@ 8 a.m. - 1 p.m.

164 Carl Road (see map, below)

Spring cleaning is a great time to use less-toxic cleaning products and to round up unwanted pesticides, cleaning products, automotive fluids, paints or other toxic products and bring them to a Household Hazardous Waste Drop-off event.

Follow these important guidelines.

- Bring material in the original container or use a non-leaking sealed container. **Do not bring products in containers you want to keep. Please place products in disposable boxes, bags or buckets. Containers will not be returned.**
- Limit: 5 gallons or 50 pounds per vehicle per trip
- Never mix chemicals.
- Keep personal items separate from hazardous materials.
- Transport material in your trunk or pick-up bed, away from the passenger area.
- For your safety, you must stay in your vehicle when you reach the drop-off area.
- Please leave pets at home.
- Questions? Call (408) 730-7262.

Want more tips for easy things you can do in your own home? Visit *www.sunnyvalerecycles.org*. Click on "Hazardous Materials," then "Keeping a Home Healthy."

039924

Celebrate Earth Day - Your Way!
Upcoming Community-Wide Events

This year Sunnyvale offer a mix of things to do to celebrate Earth Day. Choose what works for you and your family. We'll point the way to events or places to visit.

Plan a "waste free" lunch in one of our beautiful parks. Visit the local Farmer's market on Murphy Street (on Saturday), attend a compost workshop or tour the Sunnyvale Community Garden. Attend the "Dream Green Kitchen" workshop, or turn in that mercury thermometer for a better model. For a list of happenings in Sunnyvale, visit *www.sunnyvalerecycles.org*.

Make Reuse a Priority - Sunnyvale Garage Sale Day

Apr. 21

Saturday, April 21 is also Sunnyvale Garage Sale Day. Hold a sale, shop or do both to reuse those valuable household items.

It makes a difference - to your pocketbook, the community and the environment. Put reuse at the top of your list.

Practice Health Care Without Harm - Thermometer Exchange

Apr. 20
10 a.m. - 2:00 p.m. & 4:00 p.m. - 6:00 p.m.

Turn in a mercury fever thermometer, receive a non-mercury (gallium) thermometer in return (while supplies last).

Participants must bring the thermomenter in a non-breakable, rigid container (such as the original case, toothbrush case, plastic soft drink or water bottle with a screw top), and the container MUST be placed in a sealed, plastic bag.

Recycle It At the Curb

Make sure to put your recyclables in your split cart. Put newspapers, newspaper inserts and phone books on the green side of the cart and all your other recyclables on the blue side including:

- Glass food and beverage containers
- Metal food and beverage cans
- Plastic bottles and jars

A complete list cn be found at *www.sunnyvalerecycles.org*.

Be sure to empty contents from all containers before recycling.

Other important tips:

- Put your cart out when it's at half full or more.
- Properly contain your curbside materials to prevent litter.
- Place carts with the handles facing away from the street.
- **Tape the terminals with electrical or Scotch™ tape Place household batteries in a clear plastic, zip-sealed bag on top of cart.**

039925

Dream Green Kitchens - Learn More

Apr. 18
7 p.m. - 8 p.m.

Sunnyvale Library, Program Room - 665 W. Olive Ave.

Join author Jennifer Roberts (Good green Kitchens, Redux and Good Green Homes) for a lively talk about what green means when it comes to the kitchen, the most frequently remodeled room. Get tips for eco-friendly redecorating and remodeling, and advice on how to keep costs in check when greening your kitchen. Learn about techniques, materials and products used to create beautiful, healthier kitchens that are easier on the planet. Get ready to go green.

A Green Building and Green Remodeling Guide is now available at City Hall, 456 West Olive or on-line at *www.SunnyvaleBuilding.com*.

Protect Your Identity – Come to Our Shredding Event

May. 12
10 a.m. - 3 p.m.

The City of Sunnyvale's Public Safety Department and Recycling Program are sponsoring a paper-shredding event on May 12th as part of the Health and Safety Fair. It's being held at the Columbia Neighborhood Center, 785 Morse Ave. from 10 a.m. to 3 p.m.

Bring your personal records and files and we'll shred them and recycle the paper for you at no cost. Free up space, eliminate security risks, and get rid of out-dated papers!*

*Staples, rubber bands, folders, paper clips, etc. do not need to be removed before shredding occurs. If you have questions, contact the Sunnyvale Recycling Program at (408) 730-7262.

Car Wash Letter

CITY OF SUNNYVALE CALIFORNIA

April 4, 2007

Dear Fundraiser Coordinator:

Car washes can be a popular choice for fundraising, but did you know that the soap and water used to wash and rinse cars contains waste that can pollute our water resources?

To avoid flooding of parking lots and streets, Sunnyvale's storm drains are designed to drain the excess water away. The storm drain system empties the water directly into our local creeks and San Francisco Bay without treatment. This is how car wash fundraising events can create a significant amount of water pollution without even realizing it. Discharges of polluted water into the storm drain collection system violate the requirements found in the Sunnyvale Municipal Code, Section 12.12.040.

Don't let your charitable event cause water pollution in our creeks and Bay! The City of Sunnyvale has a "Sudsafe" Car Wash Kit available for loan to non-profit organizations. Each kit contains an insert to block the storm drain and divert the polluted water. Please read the enclosed brochure for car washing guidelines and details for borrowing the car wash kit.

Should you decide to hold a car wash fundraising event, we look forward to helping your organization protect the environment by preventing water pollution.

Sincerely,

Environmental Division Staff
Water Pollution Control Plant

Enclosure

SPRING 2007

business recycling

Recycling – Good for Your Business, Good for the Environment

A Publication of the Sunnyvale Commercial Recycling Program

Local Focus
Green Business Recognition

Congratulations to the following businesses that were recognized at the April 3 City Council meeting for achieving their Green Business certification over the last year:

- Fabric Banners
- For Other Living Things
- Labcyte
- Pine Cone Lumber
- Sports Basement
- Sunnyvale Presbyterian Church

The City of Sunnyvale's City Hall, City Hall Annex, South Annex and Library also recently received Green Business certification and were recognized at the event.

To achieve certification, companies must be in compliance with all environmental regulations and meet standards for energy conservation, water conservation, pollution prevention and waste reduction/recycling/ buying recycled products.

Businesses recognized in past years for their Green Business certifications are:

- All Laser Services
- E.O.R.M.
- Juniper Networks
- Sunnyvale Ford
- Toyota Sunnyvale
- Ultimodule

For more information on the Green Business Program, please visit the http://greenbiz.sccgov.org or call Gretchen Hayes, Santa Clara County Green Business Specialist, at (408) 282-3169.

UPCOMING EVENTS

Business Hazardous Waste Drop-off Events

May 18 • June 15 • July 20

Qualifying businesses may participate by appointment only.
(408) 299-7300 www.hhw.org

Towards Sustainability
Proper Disposal to Prevent Pollution

If disposed of improperly, products containing hazardous components can pollute our air, land and/or water with serious impacts on human health and our natural environment. In order to reduce such occurrences, California's Universal Waste Rule prohibits the disposal of electronics, batteries, fluorescent tubes/bulbs and other mercury-containing items. If your business has not set up a formal recycling program for these and other hazardous items, don't wait any longer!

Recycling Services

Visit the City of Sunnyvale Recycling Resources at www.sunnyvalerecycles.org (click on *"How Do I Recycle"*) to search for the material(s) that you have and available recycling options.

Free Stickers and Posters

To order free fluorescent tube and battery "Keep it Out of the Trash" stickers and posters (pictured below; English/ Spanish available), visit www.ciwmb.ca.gov/BizWaste/Posters/OrderForm.htm.

By properly handling these materials, you can ensure that your business is in compliance with environmental regulations and keep pollutants out of the environment. Call the Commercial Recycling Program at (408) 730-7484 if you need assistance.

Professional Car Washing and Detailing

from Professional Carwashing & Detailing Magazine (Grand View Media), Tuesday, April 17, 2007

City purchases drains for charity carwashes to purchases drains for charity carwashes to use

SUNNYVALE, CA — The city of Sunnyvale has purchased two Sudsafe storm drain kits for the nonprofit groups to borrow and use when they want to hold carwash fundraisers, ABC 7 reports in an Apr. 14 story.

The story did not mention if the city has been working with professional carwashes to consider their potential involvement with charity carwash events.

According to the television station, the kits contain a drain block and pump to divert wash water to nearby landscaping or sanitary sewers for treatment and discharge.

A brochure listing proper carwash practices is also being distributed through Sunnyvale Environmental Services, the article said.

WATER, WATER EVERYWHERE: Sr. Operator **Jeff Sorrick** prepares to take City staff on a tour of the Water Pollution Control Plant during the plant's 50th anniversary celebration.

Water Plant Celebrates 50 Years

Sunnyvale's Water Pollution Control Plant celebrated 50 years of service on October 11. City staff was invited to tour the plant and learn about plant history and the wastewater treatment process.

The original facility was built in 1956 to serve a burgeoning residential, industrial and agricultural community whose essential need was a treatment facility that would process and treat the City's wastewater before being released into San Francisco Bay.

During the tours, guests learned the various stages of cleaning the water, how the plant uses alternative fuel sources to conserve energy, and how Sunnyvale conserves water by using recycled water on landscaping at business parks and city facilities.

For information about taking a tour of the Water Pollution Control Plant, please call (408) 730-7738, TDD (408) 730-7501, or visit *wpcp.sunnyvale.ca.gov*

Photo: Jessica Barrett

TO THE RESCUE: (L – R) Lt. Scott McDowell, Lt. Tracy Hern, PSO Emmett Larkin and Lt. Vinny Mata rescue a "hostage" during the annual Best in the West competition.

Sunnyvale SWAT Takes Top Honors For Seventh Time

Sunnyvale Department of Public Safety SWAT team members have taken the top honors at this year's Best in the West competition, the seventh time they have been named the overall top team.

Best in the West is an annual competition hosted by the Santa Clara County Sheriff's Department to test SWAT teams. Twenty-nine teams competed this year, bringing together teams from throughout the Bay area, Southern California, state and federal agencies, and a team from Reno. In this year's competition, held September 21 – 22, there were six challenge events. The Sunnyvale team placed first in the physical challenge; second in the long gun exercise, which is similar to sniper fire; and third in the team assault exercise, which parallels hostage rescue tactics. When all the events were completed, Sunnyvale's record put them in the top spot.

Sunnyvale DPS has competed in 12 of the 15 Best in the West tests, and has placed in the top five overall in every competition they have entered. Sunnyvale's record in the competition is remarkable, particularly in light of the fact that unlike many law enforcement agencies, DPS SWAT assignments are a secondary duty. Sunnyvale does not maintain a dedicated SWAT team that has no other duties. In addition, all Sunnyvale DPS sworn personnel are trained and proficient in fire protection as well as law enforcement, and officers rotate periodically between the two services. DPS team members this year include Lieutenants **Joel Whitmer**, **Scott McDowell**, **Tracy Hern**, **Vinnie Mata** and **Don Discher**; and Public Safety Officers **Emmett Larkin** and **Tim Sartwell**.

039934

Photo: Michael Credi

POURING IT ON: Lt. Shawn Ahern pours pancakes for the annual DPS pancake breakfast, which raised nearly $5,000 for charity.

Pancake Breakfast a Succe$$

More than 600 people showed up with empty stomachs and open wallets for the annual DPS Pancake Breakfast. The event raised $4,923 for the Alisa Ann Ruch Burn Foundation, $1,202 of which was donated by the American Legion in Santa Clara.

In addition, an in-kind donation of $1,000 was made by the Public Safety Officers Association to purchase food and supplies for the event. About 30 volunteers donated their time, including Homestead High School's Key Club and Future Business Leaders of America (FBLA), as well as Sunnyvale's own Volunteers in Public Safety. Many City departments were on hand, staffing booths to showcase their services.

Sonic Wall also contributed $1,000 to the Burn Foundation in August during the Burn Relay, putting DPS's total raised for the year at nearly $7,000.

DPS TO PROVIDE RESOURCE AT CNC

One of the most important services offered by the Sunnyvale Department of Public Safety (DPS) is the neighborhood resource officer program. Neighborhood resource officers (NRO) provide a bridge between DPS, schools and neighborhoods. Through the end of the year, an NRO will join Columbia Neighborhood Center (CNC) staff every Wednesday afternoon from 2:30 p.m. to 4 p.m.

The officer will be available to the community to answer questions, and provide guidance and information about available community resources. The officer's presence at CNC will also serve to help strengthen the relationship between DPS and the youth who participate in CNC programs.

More information on this program is available by calling (408) 730-7140.

Pollution Prevention:

A YEAR-ROUND GOAL

The theme for this year's National Pollution Prevention Week was "The Future is Now." Pollution prevention is possible when people become aware that their everyday habits and actions may impact the environment. Whether that impact is positive or negative is up to you. In past studies, the Environmental Protection Agency determined that contaminants in urban runoff such as garden and lawn chemicals, automobile fluids, pet waste, yard waste and litter are the main reason that approximately 40 percent of surveyed rivers, lakes and estuaries in the U.S. are not clean enough for fishing or swimming.

Here are a few ways you can help:

- Use less-toxic methods for lawn and garden care. If you must use a pesticide or fertilizer, apply sparingly and according to directions.
- Keep litter, pet wastes, leaves and debris out of street gutters and storm drains – these outlets drain directly to our creeks and Bay.
- Use kitty litter or sand to clean up spilled automotive fluids. Do not hose them down the street. Instead, sweep it, bag it and place in the trash.

For more information on water pollution prevention and solutions call (408) 730-7738.

039935

Community Liaison Service

What happens when a Sunnyvale resident is faced with an issue or question, but does not know which department to go to for a solution? Or even worse, what if they have already tried contacting City staff and seem to be getting the run-around? To help residents and staff in these situations, the City of Sunnyvale created the Community Liaison Service. This service assists residents in addressing their concerns in several different ways. The community liaison either promptly researches their question and provides an answer, requests that City staff or community service members contact the individual directly, or coaches the resident and provides options, empowering them to create the solution that works best for them.

The Community Liaison addresses a variety of resident concerns. Past resident concerns have included: Nuisance vehicles parked on public and private property, noise complaints from nearby businesses, personal property disputes, liability insurance questions, excessive neighborhood traffic, unsightly public property landscaping, Sunnyvale historical land use questions, and traffic signal timing complaints. The actual scope of concerns is as diverse as residents themselves.

In addition to benefitting residents of Sunnyvale, the Community Liaison service also benefits City staff by saving time. If you encounter an individual who has concerns that are beyond the scope of your department and are not sure who to contact, please refer the resident to the community liaison. Community Liaison **Nathan Truitt** can be reached at (408) 730-7472 or *ntruitt@ci.sunnyvale.ca.us.*

Finding Alternatives to Antibacterials

The use of antibacterial products has skyrocketed in the last few years as a suggested way to stay healthy. Currently, more than 700 products containing antibacterial chemicals are being marketed for the home, and antibacterial agents can be found in everything from soaps, toothpaste, clothes and toys, to kitchenware, bedding and bath. The most common chemical used in antibacterial products is triclosan.

Human Health and Environmental Concerns

Now, as a result of extensive human use, triclosan (a registered pesticide that can accumulate in the bodies of humans and fish) has been found in water bodies, including San Francisco Bay. Since normal wastewater treatment process cannot remove triclosan from water, large quantities of triclosan are continuously discharged into waterways. Recent studies show these antibacterial products may be causing human health problems as well as environmental harm.

One concern is that overexposure to triclosan will allow bacteria to become resistant to antibacterial products, rendering them useless to those who actually need them, such as hospitals that use antibacterial agents as an important health care and sanitary tool. But outside of hospital settings, use of antibacterial products is unnecessary, and the relatively recent increase of surface antibacterial agents or biocides into healthy households may be contributing to a resistance problem. According to the American Medical Association, the Food and Drug Administration and other researchers, chemically-based antibacterial soaps and related products are no more effective than plain soap in protecting us from germs.

Alternatives to Triclosan

Here are some guidelines on keeping clean without antibacterial products:

- Wash hands frequently and thoroughly. Regular soaps work well. Lather hands for at least 10 to 15 seconds and rinse in warm water. Wash hands often, especially when handling food, before eating, after using the bathroom and when someone in your house is sick.
- Dry hands with a clean towel to help brush off any germs that did not get washed down the drain
- Wash surfaces that come in contact with food with a detergent and water
- Wash children's hands and toys regularly to prevent infection

ENVIRONMENTAL OUTREACH

National Pollution Prevention Week

September 18-24

National Pollution Prevention Week originated in California in 1993, and as the name suggests, the goal of the program is to promote pollution prevention through public awareness.

This year, the theme for National Pollution Prevention Week was The Future Is Now. During this week especially, an opportunity exists for everyone to be more aware of their habits and actions that may impact the environment in a negative way. Did you know that in past studies the U.S. EPA determined that contaminants in urban runoff such as garden and lawn chemicals, automobile fluids, pet waste, yard waste and litter is the main reason that approximately 40 percent of surveyed rivers, lakes, and estuaries in the U.S. are not clean enough for fishing or swimming? Resolve to commit to new actions, because The Future Is Now. Here's how you can help:

Use less-toxic methods for lawn and garden care. If you must use a pesticide or fertilizer, apply sparingly and according to directions.

Keep litter, pet wastes, leaves, and debris out of street gutters and storm drains--these outlets drain directly to our creeks and Bay.

Use kitty litter or sand to clean up spilled automotive fluids. Do not hose them down the street. Instead, sweep it, bag it, and place in garbage.

Volume 6 Issue V November 2006—January 2007

ENVIRONMENTAL OUTREACH

Eliminates germs is a marketing catchphrase that was developed in response to a danger people want to eliminate from their surroundings. As a result, the use of antibacterial products has skyrocketed in the last few years as the suggested way to stay healthy. Currently, more than 700 products containing antibacterial chemicals are being marketed for the home, and antibacterial agents can be found in everything from soaps, toothpaste, clothes, and toys to kitchenware, bedding and bath. The most common chemical used in antibacterial products is triclosan.

Human Health and Environmental Concerns

Now, as a result of extensive human use, triclosan (a registered pesticide that can accumulate in the bodies of humans and fish) has been found in water bodies, including San Francisco Bay. Since normal wastewater treatment process cannot remove triclosan from the water, large quantities of triclosan are continuously discharged into waterways. Recent studies show these antibacterial products may be causing human health problems as well as environmental harm.

One concern is that overexposure to triclosan will allow bacteria to become resistant to antibacterial products, rendering them useless to those who actually need them such as hospitals who use antibacterial agents as an important health care and sanitary tool. But outside of hospital settings, use of antibacterial products is unnecessary, and the relatively recent increase of surface antibacterial agents or biocides into healthy households may be contributing to a resistance problem. According to the American Medical Association, the Food and Drug Administration and other researchers, chemically based antibacterial soaps and related products are no more effective than plain soap in protecting us from germs.

Alternatives to Triclosan

Here are some guidelines on keeping clean without antibacterial products:

- Wash hands frequently and thoroughly. Regular soaps work well. Lather hands for at least 10 to 15 seconds and rinse in warm water. Wash hands often, especially when handling food, before eating, after using the bathroom, and when someone in your house is sick.
- Dry hands with a clean towel to help brush off any germs that did not get washed down the drain
- Wash surfaces that come in contact with food with detergent and water
- Wash children's hands and toys regularly to prevent infection

Products that don't contain triclosan

- Pure glycerin, castile or vegetable-based soap
- Hand-sanitizing gels with an alcohol or peroxide base (they are less-

039939

ENVIRONMENTAL OUTREACH

You are taking a long car trip, or simply driving the distance of a long or short commute. It's a beautiful day and you can clearly see the mountains in the distance. You begin to daydream about the upcoming weekend. Soon, you notice something that pulls you away from your daydream. Is that a mattress and an old refrigerator someone has dumped along the side of the road? As you drive along and look further, you begin to notice vast amounts of fast food wrappers, bottles and cans, paper items such as cups and napkins, auto parts, oil containers and old tires littering the roadway. According to the California Department of Transportation (Caltrans), the number one item found along California freeways is cigarette butts, a significant environmental pollutant.

Research indicates that roadside litter comes from seven primary sources: pedestrians, drivers, household garbage cans, commercial dumpsters, construction sites, loading docks and uncovered trucks. Besides being unsightly, litter affects California waterways. Many people don't realize it, but litter can find its way into storm drains and pollute waterways and the environment. Untreated storm drain water laden with litter can flow into creeks and streams, and eventually into recreational areas such as the bay and the ocean.

ENVIRONMENTAL OUTREACH

MERCURY FEVER THERMOMETERS! OH NO!

Many families have had a mercury thermometer in their medicine cabinet for years without breaking it. But did you know that public officials warn that a broken thermometer can pose a serious threat to your family's health and the environment? Even if you've never broken a mercury thermometer, it doesn't mean you never will.

In honor of Earth Day 2007, Sunnyvale residents exchanged their mercury thermometers for a non-mercury type during the city's first Mercury Thermometer Exchange Event held at the Community Center on Friday, April 20. Approximately 350 mercury thermometers were collected, with many individuals turning in 3 or 4 thermometers at a time. One individual even exclaimed she has had her mercury fever thermometer for over 50 years! The exchange event offered a great opportunity to educate the public about mercury hazards.

While the amount of mercury in an individual thermometer may seem small, the total amount released to the environment as a result of mercury thermometer use is significant. According to the Environmental Protection Agency, records show that as early as 1996, 17 tons of mercury from fever thermometers was discarded annually to landfills in the United States, at that time making thermometers the largest single source of mercury to municipal solid waste. Eliminating even a small amount of mercury has a beneficial effect on the environment, and reduces the potential for human mercury poisoning. Every little bit helps!

That is why on Thursday, May 31, WPCP employees will have another opportunity to exchange their mercury fever thermometers and receive a free non-mercury fever thermometer in return. To avoid breakage and contamination, mercury thermometers MUST be contained in an unbreakable and closed container such as its original case, a plastic toothbrush holder, or a soda/water bottle with a screw-on cap. As a second measure of protection, the closed container must be placed in a sealable plastic bag (zip-lock is fine). The exchange will be held all day, just see Sally.

Oh, just one more thing...only one non-mercury thermometer per customer please!

Sally

A quick note from the 4-Ceers:

Look forward to the quarterly meeting/lunch next month June 6th, 11:30-1:30pm.

"Thank you", to all of you who participated in the salsa competition (Ron A., Lee, Dustin & Kirk). We crowned a new salsa king, Dustin, (pictures to follow in the next Poop Scoop). Thanks also, to all of you who helped with the setup and cleanup of the nacho plates, and for those who spent your dollars.

What's New with the 4-Ceers?

Succession Planning Update

The 4-Ceers have completed a career pathway flow chart for all of the current positions at the WPCP. The positions are arranged beginning with the entry level up to the last position as plant manager. This tool is to help identify the possible advancements and lateral transfers that one might take in their career at the plant. Arrows are included to demonstrate the lateral movements between sections. The individual positions are color-coded for each section and contain the essential requirements for that particular position.

We have also been looking into the requirements for each position and how an individual would obtain training for those requirements. The first step was dividing each section (lab, pretreatment, operations, maintenance and administration) into 4 general categories: Technician I, Technician II, Supervisor, and Manager. The second step was grouping the various qualifications into categories: education, certificates, skills, knowledge and ability. Each category is then further separated into specific components. The following is an example of data taken directly from our findings for an Tech II position in operations.

Career Pathway / Operations Tech II	OPS	Training
Certificates		
State Water Resources Control Board Grade I (required)	X	KEN KERRI COURSES. CERTIFIED GRADE I

As soon as we finalize the rest of the information for the different sections, it will be inserted into the employee handbook, along with the flowchart.

4-Ceers

What's in the Big Yellow Bag?

Are you, your friends or family involved with any car wash fundraising activities in Sunnyvale? If so, we now have two "Sudsafe" car wash kits that can be borrow from the WPCP to help prevent soapy, potentially contaminated car wash water from entering storm drains. The kits are kept in large yellow duffle bags that contain a fiberglass storm drain insert, water-filled booms and sump pump to collect wash water and pump it through a hose to infiltrate in landscaping or to a sewer clean out or sink for discharge to sanitary sewer lines. Some additional safety equipment such as cones, traffic safety vests and GFCI adapter power cords are also provided.

Why are car washes a problem? Surfactants found in soaps or detergents can harm fish and other wildlife by destroying their external mucus layers that protect them from bacteria. Detergent concentrations as low as 5 parts per million (ppm) can kill fish eggs. Detergent concentrations as low as 2 ppm lower the surface tension of water, allowing chemicals such as pesticides to be more easily absorbed by fish. Even if soap isn't used, the wash water will pick up oil, grease and debris from brake linings, exhaust fume residue, rust, benzene and chromium as the water flows off the car, across pavement, and into storm drains. When many cars are washed in a localized area, a significant amount of water pollution can be produced that can enter our creeks and the Bay. By using the Kit we divert wash water to areas where it can safely infiltrate into the soil or so that it enters the sanitary sewer line for treatment here at the WPCP.

If you know of a group who might be interested in borrowing our kit, contact Kristy (x7274), Sally (x7738), or Dustin (x 7273) to check on date availability and to get a copy of our Charity Car Wash Fundraiser Information and Kit Check-out Packet.

Flu Season Essentials

Cover your mouth and nose with a tissue when coughing or sneezing. It may prevent those around you from getting sick.

Clean your hands. Washing your hands often will help protect you from germs.

Avoid touching your eyes, nose or mouth. Germs are often spread when a person touches something that is contaminated with germs and then touches his or her eyes, nose, or mouth.

Practice other good health habits. Get plenty of sleep, be physically active, manage stress, drink plenty of fluids, and eat nutritious food.

Information provided by the Centers for Disease Control. www.cdc.gov/flu

National Pollution Prevention Week

National Pollution Prevention Week is over for this year, but we should remain aware of ways to fight pollution year-round:

- Use less-toxic methods for lawn and garden care
- Keep trash, pet waste, and leaves out of gutters
- Use kitty litter or sand to clean up auto fluids

These practices will help to keep our water clean. Currently, about 40% of U.S. rivers, lakes, and estuaries are not clean enough for fishing or swimming.

With a few small adjustments to our daily lives, we really can make a difference.

The Division of Transportation and Traffic has had the good fortune to host three volunteer interns over the past few months. All three have been San Jose State students, we highly recommend taking advantage of this resource. Timothy Le is our newest volunteer, working on traffic data collection and signal timing. Katja Irwin is supporting bicycle programs. And Mariya Hodge polished a citywide pedestrian study for the Division, before being hired as a full time planner by the Community Development Department! Right on volunteers! *-Jack Witthaus.*

Pesticide Management Activities

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment H
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 06-07 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Control Program for Pesticides						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to track OP pesticide usage and other pesticides identified as creating potential water quality problems on City-owned property. Report types and quantities used in Annual Report for the previous calendar year. Track the top five pesticides used (in quantity) by the City and report on the quantities and locations used.	Pesticide usage on City property by both contractors and City staff is collected and reported in Table 1 of Appendix 1 of Attachment H. The top five solid and liquid pesticides/herbicides are reported in this table and have been since 2001. The number of OP pesticide applications from 2001-2006 has been very small. OP pesticide usage must be justified by a PCO as necessary to deal with a problematic pest, after following the City's IPM policy.	Annually Report 09/07	Kristy McCumby Env. Spec.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Hold annual training for Parks Division to educate staff regarding pesticide and turf product applications, Integrated Pest Management Policy, and irrigation water run off	• IPM Policy training was provided to Parks staff on March 29, 2007 by Public Works – storm water staff. • Information as how irrigation water and runoff of turf products can cause water quality problems was also presented.	11/05-4/06 Report 09-07	Curtis Black, Superintendent of Parks
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Train other staff (e.g., Public Works) who apply pesticides as a regular part of their job duties as to the requirements of the Plan and Policy. Provide information and training on the contents of the plan to all City employees	Staff training was provided to Public Works staff (See Attachment M) on the City's IPM policy, as well as new ideas for less toxic pest management options. Information on the City's IPM policy is on the City's intranet web page and is available to all City employees.	Annually Report 09/06	Kristy McCumby Env. Spec.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment H
Municipality: Sunnyvale

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Modify Pest Control Vendor's contracts with the City as they come up for renewal, to include requirements that they 1) Follow the City's IPM Plan/Policy, BMPs and SOPs. 2) Provide evidence of current IPM training for contractor employees working on City property. 3) Contractors to annually provide copies of State of California Monthly Summary Pesticide Use Report (Form PR-ENF-060 Rev. 4/92) to City staff responsible for their contract management.	• Current structural Pest Control contractor is required as a part of their contract to follow the City's IPM policy. • Contractors have provided proof of training in IPM techniques in FY 06-07. They provided proof of staff obtaining 12 CEUs for IPM, two hours of classroom training and one hour of on-line training this past year. • Information on types and quantities of active ingredients for pesticides applied to City property is provided in the totals presented in Table 1 of Appendix 1 in this Attachment.	Annually Report 09/07	Kristy McCumby Env. Spec. and Elaine Wesely, Finance Manager
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Inform new leaseholders of the City's IPM policy	The City's Property Management firm sent out copies of the IPM flyer that was prepared three years ago with one of their mailings to leaseholders in June, 2007.	Annually Report 09/07	Kristy McCumby, & Mike Chan, City Property Manager
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Document training of all city staff who apply pesticides to ensure compliance with training requirements established by the County Agriculture Commissioner and the State Department of Pesticide Regulation. Provide annual training to staff who apply pesticides on the City's Pest Management Plan, IPM Policy, SOPs, BMPs, and the latest IPM techniques appropriate to the pests	• All City staff who are required to apply pesticides/herbicides as part of their assigned job duties have the appropriate level of certification or license such as Pest Control Advisor; Qualified Applicator Certification or License issued by the Department of Pesticide Registry. • 4 hours of annual training held at Murphy Park on 3/29/07 for Parks staff • See Attachment M for other information on training, including IPM-related training that Parks and Public Works staff have received.	Annually Report 09/07	Lead: Kristy McCumby Env. Spec. Support: Bill Fosbenner, Sr. PW Supervisor and Curtis Black, Parks, Sup

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment H
Municipality: Sunnyvale

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Document education provided on the City's IPM Plan/Policy for staff who do not apply pesticides and on the prohibition for use of over-the-counter pesticides by untrained staff in and around the workplace (consistent with the City's IPM Plan/Policy). Report on activities/ numbers reached in Annual Report.	• The City's IPM policy is posted on the City's website for easy access to all staff. • No specific training was provided at staff meeting this year (as was done last year when the Environmentally Preferable Purchasing Policy outreach was done. • The City's IPM policy is discussed at all Public Works and Parks & Rec staff trainings.	Annually Report 09/07	Kristy McCumby Env. Spec. Support: Sally Personett, Environmental Outreach Coord.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Evaluate effectiveness of training. Report on progress in Annual Report.	Staff training for those who apply pesticides as part of their job duties generally goes very well. Those who frequently work with pesticides have more interest in using IPM methods. General outreach on the City's policy can lose it's effectiveness over time. Future training can be done in conjunction with other environmental/pollution prevention messages provided to City Staff.	Annually Report 09/07	Kristy McCumby Env. Spec.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Conduct annual citywide search of chemical storage areas for pesticides that are no longer legal for application per EPA, State, and/or local requirements. Properly dispose of any such pesticides pursuant to appropriate waste disposal regulations.	• Public Works storage areas were inspected and no pesticides were found that are no longer legal for application per EPA and DPR rules. Some pesticides that are still legal for use, but may not be suitable for applications have been identified and will be shipped out to appropriate hazardous waste handlers for disposal in accordance with state and federal law. • Inspection of Parks storage areas was conducted monthly and no illegal pesticides were located.	Annually Report 09/07	(Report) Kristy McCumby, Env. Spec. (Support) Mike Eccles, PW, Curtis Black, (Parks & Rec. Sup.)

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to assist with local implementation of the Watershed Education and Outreach (WE&O) Campaign. Distribute literature and other outreach materials at sponsored events; disperse articles and ads about less-toxic pest control and proper disposal techniques to media venues such as newsletters, utility bills, and movie ads. Support Program events in coordination with Watershed Watch.	Outreach has been active both in the local implementation of the WE&O Campaign and in support of Program events. Outreach programs and activities include public information and presentations on pollution prevention, integrated pest management, ways to avoid pesticide contamination, proper disposal of pesticide products, and sources of additional information. Media sources include newsletter articles and advertising, theater and community cable TV ads, utility bill inserts, and participation at IPM related events. See Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 06-07.	Annually Report 09/07	Sally Personett, Environmental Outreach Coordinator
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to help business and community members to say current with the City's IPM Policy by editing the document posted on the web page as updates become available. Include updates to IPM techniques for pests.	Information regarding the City's IPM Plan and Policy and general IPM techniques is posted for public review to the Water Pollution Control Plant web page and is reviewed and updated on an as needed basis. Links to IPM fact sheets have been added for public viewing.	Annually Report 09/07	Sally Personett, Environmental Outreach Coordinator
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to provide at least one story on IPM practices/ successes and/or the City's Pest Management Plan and IPM Policy to local newspapers and/or citywide newsletters.	Several articles regarding IPM, pesticide reduction and proper disposal of pesticides were published in a variety of community and employee newsletters. Pest management advertisements included community cable TV, theater billboards, and utility bill inserts. See Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 06-07.	Ongoing Report 09/07	Sally Personett, Environmental Outreach Coordinator

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	1) Continue to assist with the local components of a "Pesticide User Outreach" as proposed by the program. Target residential and commercial users. 2) Based on recommendations from the Program's research reports and surveys of business pesticide usage, develop and implement education that will target specific businesses.	The City of Sunnyvale continues to assist the Program by implementing pesticide user outreach components locally, and by participating in business events, providing literature to retail stores and nurseries, and through advertisement in the Chamber of Commerce Business Directory. Sunnyvale's Pretreatment Program has pesticide BMP brochures which are regularly distributed during inspections to landscaping facilities, nurseries and home retail stores. See Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 06-07.	Annually Report 09/07	Sally Personett, Environmental Outreach Coordinator
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue work with the Program to provide information on less toxic pest control (e.g., IPM techniques, municipal IPM policies, model contract language, and training opportunities) to neighboring special districts (e.g., open space districts, vector control districts, and school districts) as appropriate.	Information regarding the City's IPM Plan and Policy and general IPM techniques is posted for public review to the Water Pollution Control Plant web page and is reviewed and updated on an as needed basis. Links to IPM fact sheets have been added for public viewing.	Annually Report 09/07	Sally Personett, Env. Outreach Coordinator
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Track and/or estimate the numbers of Sunnyvale residents and staff reached through outreach efforts (including advertising) regarding the City's IPM policy, pesticide use reduction, and related topics.	Promotion to special districts in Sunnyvale (school districts) was conducted by the Program in FY04-05 and has not been repeated to date. The City Parks Division has maintenance agreements for outside grounds with some schools within the City's jurisdiction. All pertinent laws are followed regarding posting, public	Annually Report 09/07	John Pilger, Com Officer & Sally Personett, Env. Outreach Coordinator

2) Response to Regional Board Comments on Pesticide Management Activities section of FY 05-06 Annual Report:

No comments were received from the Regional Board on this section.

3) Summary of How Pesticide Usage has changed in FY 06-07.

The City continues to try to reduce, as much as possible, the use of any pesticides containing Chlorpyrifos, as described in the Sunnyvale IPM Policy. The Public Works, Parks and Recreation Department, and Golf division continue to reduce their product inventories and try to order products on an as-needed basis. Due to budget constraints, contracts for turf and grounds pest control and pesticide applications by contractors were not renewed in FY 06-07 with the exception of occasional use of a contractor for gopher abatement.

The City has one structural pest control contractor that handles all city building facilities. Information as to the types and quantities of structural pesticides applied is included in Table 1 of Appendix 1 at the end of this section.

Based on the data collected, OP (chlorpyrifos-containing) pesticide use is generally low, used only on occasion, and used only when other IPM methods have not provided results to address the problem infestation. As with all pesticides used, the label requirements are followed and care is taken to prevent any runoff that could enter a storm drain system. The use of pyrethroid based pesticides by structural pest control contractors has increased slightly or remained the same for the past three years. Many of the procedures used to control building pests are done using baits. Contractors are required to follow the City's IPM policy when controlling structural pests.

IPM methods are continually taught and implemented to Parks and Public Works staff. Some examples include:

- Wood chips/mulch usage.
- Irrigation controls – Continual monitoring, adjustment, and repair to prevent under or over watering, which are conducive to weed growth.
- Manual methods – Removal of weeds by hand using volunteers and seasonal staff.
- Use of injection or other application methods other than spraying, where appropriate.
- Use of the least toxic pesticide to address a problem pest, when needed.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment H – Appendix 1 – Tables 1a-1p
Municipality: Sunnyvale

Pesticide Use and Integrated Pest Management Policy Implementation in the City of Sunnyvale

Quantities of Diazinon and Chlopyrifos-Containing Compounds Applied:

- No pesticides containing Diazinon were applied on City of Sunnyvale Properties from 2001 through 2006

- In 2001 and 2002, two products that contained Chlorpyrifos were used by City staff in very small amounts. In 2003, no chlopyrifos-containing pesticides were used.

- In July of 2004, 1.5 gallons (45.1 oz of active ingredient chlorpyrifos) of Dursban Pro/Dow Chemicals were applied to putting greens at Sunnyvale Golf Course to treat for cutworms. While every effort was made to avoid using chemical treatments, there was really no alternative means to eliminate the cutworm problem. The cutworm levels were beyond a threshold to the point where the birds were destroying turf on the putting greens in their efforts to feed on the cutworms. While this is acceptable in other turf areas of the golf course it is unacceptable on greens. All pesticides were applied per label instructions. None of the greens are in locations where the product could runoff to other water sources.

- In 2005, 3.5 gallons total of Dursban Pro/Dow Chemicals (0.80 gallons of active ingredient, chlorpyrifos) were applied in May and August to the Sunnyvale Golf Course and in June to the Sunken Gardens Golf Course to treat for cutworm infestations on some putting greens. While every effort was made to avoid using chemical treatments, there was no alternative means to eliminate the cutworm problem. The cutworm levels were beyond an acceptable threshold and were to the point where the birds were destroying turf on the putting greens in their efforts to feed on the cutworms. While this is acceptable in other turf areas of the golf course it is unacceptable on putting greens because it creates an uneven surface for play. The product was used at the recommended rates, sprayed it at night and watered in per label instructions. None of the greens are in locations where the product could runoff to other water sources.

- In 2006, no Chlorpyrifos-containing pesticides were applied to City-owned property.

The use of chlorpyrifos-containing pesticides is very low and infrequent. The choice to use this pesticide is made only after the City's IPM policy is followed and there is specific written justification for its use by a Pest Control Advisor. The quantity and location of its use depends on the specific need to control an insect problem.

Pesticide Removals:

- Annual searches of pesticide storage areas in Public Works, Parks and Recreation, and the Golf Course did not turn up any pesticides that were prohibited for current use. In FY 04-05, some pesticides containing Diazinon, Dursban, and chlorpyrifos were found by Public Works staff during their storage area inventory. These were disposed of in FY 05-06 as hazardous wastes, following all appropriate state and federal

regulations. Storage area searches in FY 06-07 did not find any pesticides that were prohibited for current use and only a few that were identified as no longer being used by staff. These will be disposed of in accordance with appropriate State and Federal law in FY 07-08.

Sunnyvale's IPM Policy:

- A copy of the IPM Policy that was placed in the City's Administrative Policy Manual (APM). The public also has access to the policy through the Water Pollution Control Plant website at http://wpcp.sunnyvale.ca.gov The IPM Policy information is also available on the City's Intranet website for access by all City staff.

- Outreach to the City's trained/licensed pesticide application staff about the IPM policy continued in FY 06-07 (See Attachment M for staff training information.)

Contractors and the City's IPM Policy:

- Pest Control Companies who had contracts with the City to apply agricultural pesticides/herbicides to City properties in FY 01-02 and FY 02-03 did not apply any Diazinon or Chlorpyrifos-containing compounds. Due to budget constraints, contracts for Parks and Recreation agricultural pesticide/herbicide application contractors were not renewed beginning in FY 03-04. Parks and Recreation certified pesticide applicators performed all applications to City-owned property from FY 03-04 through FY 06-07. No contractors were engaged in FY 06-07 with the exception for gopher control.

- The City employs one structural pest control contractor, who is required to abide by the IPM policy in their contract that became effective July 1, 2003 and was renewed in 2005. Data on types and quantities of pesticides used in structural pest control activities from July 2003 – December 2003, and calendar years 2004 through 2006 are included in Table 1 above. The current structural pest control contractor uses a very limited number of "caution" labeled products and follows IPM practices such as monitoring and pest identification prior to application of a pesticide. Traps (e.g., glue boards) and bait stations are often used prior to any application of pest control sprays or granular materials to try to control a pest problem through less-toxic means.

- Copies of their IPM training received are kept on file and provided to the City upon request. Two of the Contractor's staff each received 6 hours of IPM training in 2006 offered by Santa Clara County at their annual conference and an additional 3 hours of on-line training by Univar USA on pesticides and water quality issues in FY 06-07.

IPM and City Property Leaseholders:

- Lease holders were notified of the City's IPM policy in June 2003 by the City's property manager. Periodic updated have been provided through a flyer that was prepared for distribution by the contract property manager in 2003. This brochure was sent out again to leaseholders in June 2007.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment H – Appendix 1 – Table 2
PI/P Pesticide Management Activities – Estimated Numbers Reached
FY 2006-2007 Annual Report
Municipality: Sunnyvale

Sunnyvale Targeted Outreach for the Pest Management Plan			
Pest Management Plan/Policy Implementation	Track and/or estimate the numbers of Sunnyvale residents and staff reached through outreach efforts (including advertising) regarding the City's IPM policy, pesticides use reduction, and related topics. .	Media Sunnyvale Quarterly Report	The Quarterly Report is mailed to approximately 60,000 Sunnyvale residents and businesses each quarter, and among other features it contains a page devoted to information concerning the environment. Approximately 2000 additional copies of the report are distributed to various public distribution points around the city. The Quarterly Report is also posted on the City's web page. Articles regarding reduction and proper disposal of pesticides were published in the Quarterly Report during FY06-07.
		Media Outreach to City staff through employee newsletters	Articles regarding use of less-toxic pesticides were published in various employee newsletters. *The Harbinger* is the primary employee newsletter for Sunnyvale employees and is read by approx. 1000 employees. *The Works* newsletter is distributed to various locations throughout the city and is read by approximately 187 Public Works employees. The *Poop Scoop* is read by approximately 60 water pollution control plant employees.
		Media Sunnyvale Utility Bill Insert	Utility bill inserts promoting water pollution prevention from pesticides were developed during FY06-07. Bills and inserts are mailed to 30,000 households and businesses in Sunnyvale. Insert overruns are distributed at business and community events as IPM outreach material.
		Media Theater Advertising	A new pest control ad promoting less-toxic options was developed for viewing during at the Mercado Theater complex in Sunnyvale. The 14 second animated/audio ad was viewed by movie audiences (2) times during a 15 minute timeframe prior to every movie shown in the 20-theater complex. In the new reporting year additional messages will be developed.
		Media KSUN Community Cable TV Ads	During National Pollution Prevention Week, a pollution prevention ad for pesticides aired on Sunnyvale's community cable TV. KSUN advertising reaches about 13% of all cable subscribers in Sunnyvale, who say they tune in once or twice a month.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment H – Appendix 1 – Table 2
PI/P Pesticide Management Activities – Estimated Numbers Reached
FY 2006-2007 Annual Report
Municipality: Sunnyvale

		Media Sunnyvale ReNews Newsletter	This newsletter is mailed to approximately 29,000 single family residents and 24,000 multi-family residents twice per year, and an additional 500 copies are printed and distributed from various locations. The newsletter addresses typical pollution prevention concerns with a focus on reduce, reuse, and recycle. Proper disposal of pesticides through HHW was posted as a reminder to residents.
		Media Advertisement in the Chamber of Commerce Directory	10,000 copies are mailed to Chamber members, businesses, and newcomer residents, and are available at distribution kiosks throughout the city.
		Media Sunnyvale's WPCP and Solid Waste Website	The City of Sunnyvale does not have the ability to count number of hits to the websites.
		Event - Community Compost Workshops	Monthly workshops cover the basics of various methods of composting. IPM and gardening without pesticides is discussed during each workshop. Anywhere between 12 and 40 individuals attend new workshop sessions.
		Event - Community Sunnyvale State of the City – 4th of July Celebration	July 06 – at this community event the Outreach exhibit featured water pollution prevention information and the literature distributed focused on water pollution prevention such as IPM activities, less-toxic pest control, and HHW information. About 1000 residents attended the event.
		Event - Community Sunnyvale Pancake Breakfast	This event features a community breakfast, activities for kids, and exhibits that provide community information. IPM, pesticides and proper disposal was among the literature distributed. Approximately 25 individuals stopped by the booth for information.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment H – Appendix 1 – Table 2
PI/P Pesticide Management Activities – Estimated Numbers Reached
FY 2006-2007 Annual Report
Municipality: Sunnyvale

		Event - Community Sunnyvale Farmers Market	Outreach has an IPM exhibit at the Sunnyvale Farmers Market once per month. An assortment of literature and outreach collateral is displayed and available to market-goers. Approx. 40-70 individuals visit the booth each month for IPM information during the more popular spring, summer, and fall market months.
		Event - Community Columbia Health and Safety Fair	The outreach exhibit distributed water pollution prevention literature and conducted Enviroscape presentations to inform youth and adults about urban runoff and how storm drains carry pesticides and other pollutants to the Bay. Approximately 77 kids and 62 adults visited the exhibit.
		Event - Youth Hands on the Arts	This is a hands-on, multi-cultural arts festival for children ages 5-12. Outreach staff developed a make-it/take-it craft involving botanical rubbings and beneficial insects. Over 350 youth visited the booth, but the outreach message of protecting beneficial insects was minimal due to customer demand for the craft.
		Event - Youth Creek Education Program	This reporting year, Sunnyvale provided funding to cover bus transportation costs for approx. 450 students to McClellan Ranch Park for a creek and water studies program.
		Event - Youth Library Presentation	A story and craft module to educate youth about protecting beneficial insects was developed to reach youth attending a Children's Special Program at the Sunnyvale Library. Approximately 15 kids attended the program.
		Event - Youth Sunnyvale Schools Outreach	Using the Enviroscape as a teaching tool, students learn about water pollution from pesticides and fertilizers, less-toxic lawn and garden care, beneficial insects, IPM and water conservation. Sunnyvale conducted 18 classroom presentations this school year, reaching a total of 411 students
		Event - Business Health and Safety Fairs	Health fairs provide a convenient format to reach employees with messages about IPM and less-toxic pesticide use in helping to prevent water pollution. This reporting year Outreach attended 7 events reaching over 1000 corporate employees

Mercury Pollution Prevention Activities

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment I
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 06-07 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Control Program for Mercury						
Hg Work Plan I.A	Mercury Plan Development	Permit Prov. C.9c	Sunnyvale staff to continue to work with SCVURPPP Mercury Pollution Prevention Plan work group	Staff attended two work group meetings in FY 06-07 and also participated in the new work group to work with County Household Hazardous Waste and others to address product stewardship issues and impacts that effective P2 outreach efforts have on quantities of mercury-containing products collected and budgets for their disposal.	Ongoing Report 09/07	Kristy McCumby Env. Specialist
I.D &, I.F	Mercury Plan Implementation	Permit' Prov. C.9c	Sunnyvale Mercury Work Group to continue to meet and determine how Program-provided guidelines for the "virtual" elimination of mercury in urban runoff will be implemented to address controllable City sources.	No specific meetings of the group were held this year. However, the messages on reducing mercury-containing product usage and the proper disposal of those products such as fluorescent lamps continue to be promoted city-wide. The City's Environmentally Preferable Procurement Policy and the establishment of fluorescent and other lamp recycling programs for city-generated waste continue to be implemented	Ongoing Report 09/07	K. McCumby & Sunnyvale Mercury Work Group (PW, Parks and Rec., Admin. Serv, Public Safety
I.F & MM 1	Mercury Plan Implementation	Permit Prov. C.9.c	Continue improving current recycling programs for fluorescent lamps and Hg-containing products, as needed. Other products (e.g., thermometers/thermostats) may be included as appropriate to a particular City Department.	See Attachment I, Appendix Table 1 for information on the current city recycling efforts for mercury-containing products. Thermometers and thermostats, when generated are properly recycled or disposed of.	Ongoing Report 09/ 07	Kristy McCumby, Environmental Specialist & Sunnyvale Mercury Work Group
II.B	Mercury Plan Implementation	Permit Prov. C,9.c	Continue with existing Hg-containing product disposal services offered through the City's Household Hazardous Waste collection program, through support of the Santa Clara County HHW program.	The City continues to support disposal of Hg-containing wastes through the HHW program. Tipping fees collected by the City help support the program.	Ongoing Report 09/ 07	Kristy McCumby, Env. Spec. and Rich Gurney, HHW Program

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment I
Municipality: Sunnyvale

Control Program for Mercury (Cont.)						
II.C	Mercury Plan Implementation	Permit Prov. C.9.c	Collect and report information on quantities of fluorescent lamps collected by City HHW collection program at the SMaRT Station from residential customers. Provide collection data to the County, as requested.	Information was collected and is reported in Table 1 of this Attachment. Information on quantities collected is provided to the County, as requested.	Ongoing Report 09/07	Kristy McCumby Env. Spec. and Rich Gurney, Recycling Coordinator
II.F	Mercury Plan Implementation	Permit Prov. C.9.c	Continue working with regional HHW programs to develop and help publicize fluorescent lamp and other mercury-containing products recycling programs and efforts.	Sunnyvale continues to support HHW in coordinating a cohesive approach that includes public education and outreach activities regarding proper disposal of mercury-containing products. • Sunnyvale is a contributing member of the Mercury Ad Hoc Task Group. Activities include a media campaign through print, radio and transit ads that encourages residents to dispose of fluorescents at participating store locations. Task group members assist in developing mercury work plans, budget review and activity planning and implementation. • Outreach collaborated with HHW on a mercury thermometer exchange event in April 07 with 337 thermometers being collected. • Sunnyvale developed promotional material such as articles, theater ads, utility bill inserts and attended community and business events to talk to people, distributed literature, and promoted safe disposal of mercury containing devices. • See Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 06-07.	Ongoing Report 09/07	Sally Personett, Env. Outreach Coordinator & Rich Gurney, SW Recycling Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment I
Municipality: Sunnyvale

Control Program for Mercury (Cont.)						
III.A	Mercury Plan Implementation	Permit Prov. C.9.c	Continue financial support of Regional Monitoring Program through SCVURPPP funding.	Sunnyvale continues to provide financial support to the RMP through SCVURPP.	Ongoing Report 09/07	Lorrie Gervin, Env. Div. Mgr.
IV.C	Mercury Plan Implementation	Permit Prov. C.9.c	Support and participate in the implementation of the WMI Watershed Action Plan.	Staff continues to participate in the WMI and efforts to implement aspects of the Watershed Action Plan as they pertain to mercury control efforts in the watershed.	Ongoing Report 09/07	Lorrie Gervin, Env. Div. Manager
V.A.3	Mercury Plan Implementation	Permit Prov. C.9.c	Pretreatment inspectors will continue to integrate distribution of Mercury Outreach materials and provide outreach to industries and businesses when doing routine inspections of facilities for source control measures.	Pretreatment inspectors continue to distribute Mercury Outreach to industries during routine inspections. During FY 06-07 approximately 50 brochures titled: "Preventing Mercury Pollution: Information for Small Businesses" were distributed. In addition, when dental facilities are inspected they receive more targeted BMPs consistent with the California Dental Association's suggested Mercury BMPs.	Ongoing Activities Report 09/07	Sarah Scheidt, Senior Insp. Pretreatment Program
V.B	Mercury Plan Implementation	Permit Prov. C.9.c	Document and evaluate each outreach activity, including the target audience and number of businesses and/or residents reached.	• Documentation for target audience and numbers reached is recorded for all mercury pollution prevention outreach. Please see Attachment H-Appendix 1-Table 2 for PI/P Mercury Management Activities. • The Pretreatment Program has been evaluating the Dental inspection program for the last three years. Given the target audience, the outreach material most well received is BMP guidance consistent with California Dental Association guidance. The Program will continue to work with the CDA and update BMP literature as needed.	Annually Report 09/07	Sally Personett, Env. Outreach Coord. & Sarah Scheidt, Sr. Ind. Waste Insp.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment I
Municipality: Sunnyvale

Control Program for Mercury (Cont.)						
V.C	Mercury Plan Implementation	Permit Prov. C.9.c	Assist with the project to determine local attitudes and behaviors to evaluate the success of the outreach efforts and saturation of outreach messages in coordination with the Watershed Watch Campaign Survey	Under direction from the Program, Sunnyvale is participating in all activities of the upcoming Watershed Watch campaign survey.	To be deter-mined Report 09/07	Sally Personett, Env. Outreach Coord.

2) Response to Regional Board Comments on Mercury Plan Activities section of FY05-06 Annual Report:
No comments were received from the Regional Board on this section.

3) Summary of How Mercury-containing Product Usage and Handling Changed in FY 06-07

- Staff continued to distribute brochures and information prepared in previous years.
- City divisions/departments continue to implement fluorescent lamp and mercury-containing product recycling programs. The numbers of fluorescent lamps and mercury-containing devices shipped to recyclers was down some from previous years, but some variability is to be expected from year-to-year. Since the program is better established and shipments of materials for recycling occur on a regular basis, the numbers will likely remain at levels similar to those observed this year. (See Table 1 for this Attachment.)
- In cooperation with Santa Clara County, a very successful Mercury Thermometer exchange with the public occurred in April 2007. A total of 337 mercury thermometers were exchanged at an event held near the Senior Center in Sunnyvale. This translated into approximately one – five-gallon bucket filled with thermometers.
- The numbers of fluorescent lamps collected from the Sunnyvale HHW program increased. Outreach to the public about the appropriate disposal of wastes is being successful, as businesses and individuals are complying with the Universal Waste rules.

Sunnyvale Targeted Outreach for Mercury Pollution Prevention Activities			
Mercury Management Plan/Policy Implementation	Track and/or estimate the numbers of Sunnyvale residents, staff, and businesses reached through outreach efforts (including advertising) regarding mercury pollution prevention, proper disposal and other related topics. .	Media Sunnyvale Quarterly Report	The Quarterly Report is mailed to approximately 60,000 Sunnyvale residents and businesses each quarter, and among other features it contains a page devoted to information concerning the environment. Approximately 2000 additional copies of the report are distributed to various public distribution points around the city. The newsletter is also posted on the City's web page. Articles regarding the danger of mercury to the environment and proper disposal were published in the Quarterly Report during FY 06-07.
		Media Outreach to City staff	An article reporting the environmental dangers of mercury thermometers and the outcome of the thermometer exchange event was published in the *Poop Scoop,* the WPCP newsletter. The *Poop Scoop* is read by approximately 60 water pollution control plant employees.
		Media Sunnyvale Utility Bill Insert	Bills and inserts are mailed to 30,000 households and businesses in Sunnyvale. Insert overruns are distributed at business and community events.
		Media Sunnyvale ReNews	This newsletter addresses pollution prevention concerns with a focus on reduce, reuse, and recycle and is mailed to approximately 29,000 single family residents and 24,000 multi-family residents twice per year. An additional 500 copies are printed and distributed from various locations.
		Media KSUN Community Cable TV Ads	During National Pollution Prevention Week, an ad for proper disposal of mercury containing products aired on Sunnyvale's community cable TV. Additionally, an ad promoting the Mercury Thermometer Exchange event aired during April. KSUN advertising reaches about 13% of all cable subscribers in Sunnyvale, who say they tune in once or twice a month.
		Media The Sun (community newspaper)	The Sunnyvale Sun is a weekly community paper with a readership of approximately 42,320 and a circulation of 18,600. Additional copies are available at newsstands and distribution points throughout the City.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment I – Appendix 1 – Table 2
PI/P Mercury Management Activities – Estimated Numbers Reached
FY 2006-2007 Annual Report
Municipality: Sunnyvale

		Media Television and Radio	Mercury Thermometer Exchange 4/07 ▪ KTSF – a television segment and radio announcement ▪ KLIV - radio interview Car Wash Kit – May 07 ▪ KGO - Channel 7 interview segment See Attachment G Table 1 PIP Activity Details FY 06-07 for information about numbers reached
		Media Websites	Information regarding proper disposal of mercury containing products is listed on both the Solid Waste and Water Pollution Control Plant websites. Reach is unknown. The City of Sunnyvale does not have the ability to count number of hits to the website
		Media Business Recycling Solutions	This business oriented newsletter focuses on reduce, reuse, recycle messages and is mailed to approx. 1600 businesses located in Sunnyvale and is available online for public viewing.
		Event - Community Thermometer Exchange Event	The publicity and public awareness campaign around this event served to educate the public and provided a way for residents to properly dispose of mercury thermometers. 337 thermometers were exchanged during the six-hour event. Media outreach and advertisement included the following: Articles Posters and Flyers Email to employees Television Radio See Attachment G Table 1 PIP Activity Details 06-07 for information about numbers reached
		Event – Community Farmers Market	Outreach distributes the mercury brochure *What You Didn't Know* at the Sunnyvale Farmers Market each month. A good number of individuals don't know that fluorescents and batteries contain mercury and cannot be thrown in the trash, and people are interested to learn about the retail store program. Approximately 10 – 15 brochures are given out at each event.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment I – Appendix 1 – Table 2
PI/P Mercury Management Activities – Estimated Numbers Reached
FY 2006-2007 Annual Report
Municipality: Sunnyvale

		Event – Community State of the City	At this community event the Outreach exhibit features water pollution prevention information, IPM and less-toxic pest control options, mercury disposal and HHW information. Approximately 30-40 individuals visited the booth for information and about 40 kids played the bean bag game.
		Event – Business Corporate Health and Safety Fairs	Outreach exhibited at (7) corporate health and safety fairs this reporting year, reaching over 1000 company employees.
		Event - Community Sunnyvale Pancake Breakfast	This annual event features a community breakfast, activities for kids, and exhibits that provide community information. The most popular literature is the mercury brochure. Approximately 25 adults stopped by the booth for information
		Event - Community Columbia Health and Safety Fair	This reporting year staff conducted Enviroscape presentations and distributed water pollution prevention literature to community members attending the event. Approximately 77 kids and 62 adults visited the outreach booth for information.

City of Sunnyvale

FY 06 - 07 Annual Report

Copper Action Plan/Nickel Action Plan

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment J
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 06-07 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Copper/Nickel Baseline Activities					
CB-1 (1 &4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	Continue to inform the public by distributing materials, brochures, and other information at city offices, public places, and events. Continue to inform the public through on-site presentations. Promote methods to reduce copper discharges from vehicle washing by placing articles or ads in various media (e.g., the Quarterly, KSUN, City website, theater ads and utility bill inserts.)	Sunnyvale continues to inform the public about water pollution from residential car wash activities. See list below for information regarding vehicle washing operations and pollution prevention outreach. At the following annual events, car wash literature is always distributed, and at some events the Enviroscape is demonstrated. EVENTS – Sunnyvale ▪ Columbia Health and Safety Fair ▪ Farmers Markets ▪ State of the City ▪ Sunnyvale Pancake Breakfast EVENTS - Regional ▪ Classic Car Wash outreach <u>MEDIA Outreach</u> • Utility Bill Inserts Water pollution prevention inserts regarding dirty water and automotive fluids were developed this reporting year. • Mass Mail Campaign The car wash brochure and a letter explaining water pollution from community car wash events was sent to local schools, clubs, churches and non-profit organizations. • Press Release The city of Sunnyvale developed a press release to announce the availability of the car wash kit. • Television KGO TV conducted an interview with City staff regarding the car wash kit and	Ongoing Report 09/07	Sally Personett PW Env. Outreach Coord.

				water pollution prevention. • Business publication Professional Car Wash and Detailing Magazine published an article about Sunnyvale's new car wash kit. • KSUN Community Cable TV An advertisement advising residents about water pollution from car washing ran on KSUN during National Pollution Prevention Week. YOUTH Outreach Schools • Outreach presented the Enviroscape demonstration to 18 classes in Sunnyvale Elementary Schools. A large portion of the demonstration is storm drain pollution from washing vehicles in driveways. Creek Education Program • This creek and storm drain education program teaches 3rd graders about pollution in creeks from urban runoff See Attachment G Table 1 PIP Activity details for more information.		
CB-1 (1 &4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	Promote methods to reduce copper discharges from vehicle washing through implementation of Charity Car Wash Kit loan program.	In April 2007, the City initiated its "Sudsafe" car wash kit loan program for non-profit organizations such as schools and charitable groups. Two storm drain insert units, including a sump pump, booms, hose, extension cord, safety cones, vests, broom and signage were purchased and are available to loan City residents and organizations. Outreach was through a press release and a letter to all Sunnyvale charitable groups with information about the loan program and how to obtain the kits. An article about the kit was submitted to the Sunnyvale Quarterly for publication in July 2007.

	Copper/Nickel Baseline Activities (cont.)					
CB-1 (1 &4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	Require source control measures for new and redevelopment projects (those adding or replacing 10,000 sq ft of impervious area) that conduct vehicle/equipment washing and maintenance activities (Consistent with Provision C.3.k)	There were no new or redevelopment C.3 applicable projects approved during the reporting period that planned to conduct vehicle equipment washing or maintenance activities.	Ongoing Report 09/07	Jamie McLeod, Assoc. Planner & Sarah Scheidt, Sr. Ind. Waste Insp.
CB-1 (2 & 4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	• Continue to inspect commercial/ industrial facilities that have vehicle washing activities occur on site (this includes auto-related businesses). • Ensure BMPs for vehicle washing are employed. • Provide an effectiveness evaluation of inspection/compliance with BMPs. • Continue to inspect vehicle-washing areas for City vehicles at the Corp Yard.	• 108 Automotive related facilities were inspected for BMP compliance during the reporting period including sales, repair, fleet, car washes, and gas stations. • Eleven facilities were issued enforcement actions ranging from verbal to written notices of violation. • Three violations were specifically related to vehicle washing. • Follow up inspections and enforcement occurred to ensure compliance. • Facilities will continue to be inspected bi-annually. • The Corp Yard wash area was not inspected this year, as it is inspected biannually, similar to other auto-related businesses. Corp Yard staff did receive annual wash rack training (see Attachment M)	Ongoing Report 09/07	Sarah Scheidt, Sr. Ind. Waste Insp.

Municipality: Sunnyvale

	Copper/Nickel Baseline Activities cont.					
CB-1 (3 & 4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	• Encourage new mobile cleaners and those who are renewing their certification to use the BASMAA website on-line mobile cleaner training and be recognized on the area wide certification list. • Continue to provide training (as needed) to new mobile cleaners. • Provide bi-annual re-certification training to cleaners who have already been certified, as needed, or refer them to the BASMAA website for on-line training... • Evaluate effectiveness of the training program and BASMAA on-line training. • Encourage municipal staff to use certified mobile cleaners when contracting for cleaning services. • Maintain records on who has been trained by City staff and report on numbers trained in the annual report.	• The Pretreatment Program continues to promote the use of the BASMAA on-line training program for Surface Cleaners. • Continue to utilize the Surface Cleaners Training Kit developed by the Program to provide training to new mobile cleaners, as needed. • Provide re-certification training to certified cleaners, as needed. • Certify new businesses, as requested and report on numbers certified. One mobile cleaner in Sunnyvale was certified by the Santa Clara County Green Business Program. • The City did not certify or recertify any mobile cleaners during this reporting period.	Ongoing Report 09/07	Sarah Scheidt, Sr. Ind. Waste Insp.
CB-3	Measures to control copper discharges to storm water from targeted industrial sources	Permit Prov. C.9.a (CAP)	• Industrial Waste Inspection staff will continue specific outreach to older printed circuit board manufacturers and metal plating facilities using copper (if any continue to do business in Sunnyvale) for inspections related to potential copper discharges into storm water. Distribute and discuss BMPs/information to minimize copper discharges. • Continue Industrial Inspection program, including NOI sites such as plating, metal finishers, vehicle service, and other permitted sites	• Industrial Waste Inspection staff continues to inspect and permit all metal plating facilities yearly based upon their regulatory category. • During inspections BMP information is provided and a storm water inspection is conducted to identify any potential discharges. • Staff inspects NOI filers on a yearly basis and is typically part of the wastewater discharge permitting and inspection process.	Ongoing Report 09/07	Sarah Scheidt, Sr. Ind. Waste Insp.

CB-6/7	Reducing Traffic Congestion/ Promoting Alternative Transportation	Permit Prov. C.9.a (CAP)	Continue implementation of site design standards related to transportation to meet the requirement of C.3.j of the permit. Report on significant projects where traffic congestion reductions were included in design plans.	Traffic congestion relief projects that were initiated or completed in FY 06-07 include: 1. Sunnyvale/Saratoga Road Adaptive Traffic Signal Control 2. Wolfe Road Bike lanes 3. Evelyn Avenue bike lanes 4. Mathilda/237 Adaptive traffic signal 5. Homestead Road traffic signal interconnect 6. Mary Avenue bike lanes 7. Wolf Road/Arques Ave bike lane 8. Frances Street Transit Center	Ongoing Report 09//07	Lead: Jack Witthaus, Transportation/ Traffic Mgr/DPW Support: Jamie McLeod, Assoc. Planer
CB-8	Measures to classify and assess watersheds and to improve institutional arrangements for watershed protection	Permit Prov. C.9.a (CAP)	• Continue to implement HMP requirements for projects that meet the size threshold criteria in HMP applicability areas as identified by maps included in the City's BMP Guidance Manual. • Continue to review EIRs and complete CEQA reviews to ensure watershed protection is considered in CEQA actions. • Continue participation in SCBWMI activities as it implements the Watershed Action Plan. • Revise Sunnyvale's General Plan (Surface Water Sub Element), as needed, at the next scheduled update. Include recommendations based on the review of the Development Policies Comparison Project and Provision C.3.l of Order 01-119 as determined to be appropriate. • Continue participation in the Water Resources Protection Collaborative (WRPC). Council approved a study issue to review the guidelines and standards, and then develop a plan to implement those that apply to City circumstances.	• No projects were submitted that were within the HMP applicability zone. • As EIRs and CEQA reviews were done, watershed protection comments were provided, as appropriate. • Sunnyvale staff continued to participate in the WMI subgroups that support the Watershed Action Plan implementation (See Attachment N) • No revision of Sunnyvale's General Plan (Surface Water Sub Element) was done in FY 06-07. When it is revised, the recommendations from the review of the Development Policies Comparison Project and the various provisions of the current storm water permit will be included, as determined to be appropriate. • Staff continued participating in the WRPC and attended training on the Guidelines and Standards in the fall of 2006. Council adopted the G&S (by reference) into the Municipal Code on May 1, 2007 for implementation near waterways in Sunnyvale	Ongoing Report 09/07	Lead: Lorrie Gervin, Env. Div. Manager and Kristy McCumby, Env. Spec. Support for WRPC activities: Jamie McLeod, Assoc. Planner

CB-11	Measures to improve street sweeping controls and storm water system operation and maintenance	Permit Prov. C.9.a, (CAP)	• Implement (as appropriate) improvements identified for current sweeping program and storm drain system O&M (within available City Budgets). • Evaluate the effectiveness of street sweeping and storm drain O&M in the annual report (See Streets and Roads and Storm Drain sections of this work plan)	There was no change in the funding available for street sweeping in FY 06-07. The regular schedule was maintained throughout the year. Annual storm drain catch basin cleaning occurred and additional clean outs are done on an as-needed basis to prevent flooding. Collected debris is taken to the SMaRT Station for disposal. New "Flows to Bay" markers were installed on 88 drain intakes during FY 06/07. See Attachments D-1 and D-3 in this report for details.	Ongoing Report 09/07	Tony Pineda Maint. Supv. & Jim Craig, Field Services Superint.
CB-11	Measure to Track Street Sweeping Data	Permit Prov. C.9.a (CAP)	Continue to follow Program guidance regarding the collection and reporting of street sweeping data. Provide information periodically to the program. Information for reporting includes: quantity of waste collected (cubic yards), number of miles swept, and frequency of sweeping as required.	Data was tabulated from PW Streets maintenance daily logs and reported to SCVURPPP for FY 06-07. See Attachment D-1, Appendix 1.for information on miles swept and debris collected in FY 06/07.	Ongoing Report 09/07	Tony Pineda, Maint. Supv. & Kristy McCumby, Env. Spec.
CB-12	Measures to Control Copper Discharges from Pools and Spas	Permit Prov. C.9.a, (CAP)	Continue to inform the public by distributing materials, brochures, and other information at city offices, public places, as well as through on-site distribution at presentations and events. Continue to provide proper pool and spa water discharge information to the public by placing ads in various media (e.g., The Quarterly, KSUN, City website, theater ads, and utility bill inserts.	Public outreach activities related to water pollution from pool and spa discharge is described below: <u>Events</u> At the following community events, the *Draining Pools and Spas* brochure was distributed • Sunnyvale Pancake Breakfast • Columbia Health and Safety Fair • Farmers Market At various Health and Safety Fairs sponsored by Sunnyvale businesses, the *Draining Pools and Spas* brochure was distributed to employees:	Ongoing Report 09/07	Sally Personett, PW Env. 3) *How well did program work? Any plans for changes?*
Pretreatment: Conditions of Approval (COAs) will be considered for vehicle washing operations at applicable new and redevelopment projects. These will be incorporated, as appropriate, by CDD and Pretreatment staff at project review committee (PRC) meetings.

PIP – Outreach
The goal of outreach is to communicate to youth and the general public about the dangers of water pollution from sources producing copper/nickel. Regarding car wash outreach, staff finds that using the Enviroscape provides an excellent opportunity for members of the community and students in schools to understand through visual demonstration how these types of human activities cause water pollution. In my opinion, this demonstration tool conveys the message to the viewer 100% of the time. Whether the viewer will take the message and use it to implement a personal behavior change is difficult to ascertain. The water pollution prevention message from draining pools and spas is a bit more contained because not everyone owns a pool or spa. Keeping this in mind, staff provides the outreach brochure at all events where Sunnyvale residents have access to the information if it applies to them. In FY 07-08 a utility bill insert will be developed to accomplish widespread advertising, so neighbors of pool/spa owners will be made aware of the potential pollution problem.

The Sudsafe Car Wash Kit loan program was started in April 2007. It was used for two school events in FY 2006-2007, but we believe it will be used more often as "word of mouth" among the schools gets out. The adult organizers who used the kits were enthusiastic about their use and that the pollution prevention message was there. Sunnyvale staff provides kit users with information on how to install the kit, and does a site visit with the organizers the first time it is scheduled for use by them to identify the best location for discharge to landscaping at their venue. Staff will continue to promote the availability of the kits through a number of outreach efforts, and again target schools and non-profits with information about the kit.

Trash Investigations and Plan Development (cont.)						
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Assist Program in implementing a Pilot Demonstration Project to focus on documenting the types and volume of trash that can be conveyed through the storm drain system.	Program staff met with Sunnyvale Department of Public Works staff, Field Services Division in March 2007 to discuss potential pilot program areas. Additional meetings are planned for the summer of 2007, with the plan to implement a pilot program with trash capture devices that are retrofitted in some storm drain inlets, in areas yet to be determined in the fall of 2007.	Begin July 06 Report 09/07	Kristy McCumby/ Env. Specialist
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Assist Program in developing Trash Fact Sheets, as appropriate.	Staff provided review, comments, and suggestions for Trash Fact Sheets as they were developed by the Program.	Begin July 06 Report 09/07	Kristy McCumby/ Env. Specialist and Sally Personett, Env. Outreach Coordinator
	Trash Plan Implementation	Program Task RWQCB Letter	Continue to build trash awareness by providing outreach to residents and students in Sunnyvale schools in an effort to increase behavioral changes through public education.	• Sunnyvale continues building trash awareness through public education to adults in the community and to students in school. • Various media outreach pieces such as utility bill inserts and articles have been developed, and students receive pollution prevention demonstrations which include litter prevention in the classroom. • See Attachment G Table 1 PIP Activity details for more information.	Ongoing Report 09/07	Sally Personett, Env. Outreach Coordinator

2) Response to Regional Board Comments on Trash Inventory and Management Activities section of FY 05-06 Annual Report:

No comments were received from the Regional Board on this section.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment K
Municipality: Sunnyvale

3) Response to Regional Board comments for a performance review (when applicable):

No performance review by the Regional Board was done for this activity in FY 06-07.

- *Give brief evaluation comments, such as conclusions about trash sources or pollutant types and whether the activities will continue, change, or be curtailed.*

The information gathered for the trash problem areas investigation completed by Sunnyvale is included in the Program's Trash Inventory and Management Activities Section of the FY 06-07 Annual Report and more detailed assessment activities are included in Appendix 1 to this section.

Sunnyvale was again fortunate to have a community volunteer assist with the trash investigations in the winter and spring of 2007, thus allowing for some follow up on potential adjacent land use sources of trash from Baylands to Highway 101 on Sunnyvale East Channel and to Mathilda Avenue (where the channel goes underground) for Sunnyvale West.

No immediately adjacent land uses that contributed litter to the Sunnyvale East Channel were observed up to the Highway 101 crossing. Storm drain outfalls and road way crossings appeared to be the main sources of litter entering the channel in this section. Sunnyvale Environmental staff met with SMaRT Station program management staff to see if there were additional efforts that the City's SMaRT Station contractor could do within the existing contract constraints to help reduce the quantity of litter observed along Caribbean Drive that could enter either Sunnyvale East or West Channels from their bridge crossings. The bulk of the litter observed along this roadway is due to the large number of commercial trash-hauling vehicles disposing of their loads of waste at the Materials Recovery Facility (MRF) there.

Contract requirements call for the SMaRT station contractor to perform litter clean up efforts along the access road to the MRF. However, KAB assessments as well as other observations along Caribbean Drive have shown that there is a need for them to be more effective in their litter control efforts. We are continuing to work with them to further refine their litter pickup efforts .We will continue with the Program to establish longer-term trash monitoring areas, in combination with upstream trash management pilot actions in FY 07-08

In addition to the PI/P trash prevention-related outreach activities listed in Attachment G (Table 1) of this report, the City's Solid Waste Division continues with its activities to reduce waste and provide environmentally sound options for waste disposal. See the City's website at http://sunnyvale.ca.gov/Departments/Public+Works/Solid+Waste+and+Recycling/ for a listing of waste disposal options (e.g., extra dump days, household hazardous waste collections/drop-off, and code enforcement).

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2006-2007 Annual Report
Attachment K
Municipality: Sunnyvale

Public Works street sweeping frequency in FY 06-07 remains at the same level as the previous three years (see Attachment D-1 for details on street sweeping frequency). In areas where litter is more common due to high traffic and pedestrian numbers (e.g., City parking lots/Murphy Street) or type of activity (e.g., main access roads to SMaRT Station) the frequency of street cleaning/litter pick up will remain the same (weekly sweeping).

City of Sunnyvale

FY 06 - 07 Annual Report

Attachment K

Trash Inventory and Management

Appendix 1

Trash Assessment Results

Tables 1-2 - Summaries of Sunnyvale Trash Data Forms

Attachment K, Appendix 1
City of Sunnyvale
Trash Assessment Results, FY 06-07

Introduction:

In FY 06-07, the City was fortunate to have a new community volunteer to help conduct the Urban Rapid Trash Assessments (URTA) record data and prepare photos collected from January - June. Without the volunteer assistance, the number and frequency of assessments completed would not have been possible. Staff worked cooperatively with other co-permittees to complete trash assessments at five locations along Stevens Creek, from upper reaches of the watershed to the Baylands.

The eighteen Keep America Beautiful (KAB) sites investigated were assessed once in the winter of 2007. One site was dropped from previous years as there have been no problems at this site in over 3 years. A second site (SU-19) under the Wolfe Road overpass could not be reached due to construction activities. This site may need to be dropped if there is no longer public access to the area where dumping occurred.

KAB sites were only assessed one time this year, as based on the review of previous year's information; most of these sites do not appear to be major contributors for litter getting into waterways. The one exception to this is Caribbean Drive, Site 16c. This KAB site is linked to the URTA sites on Sunnyvale West Channel and Sunnyvale East Channel.

More time was spent in assessing the Urban Rapid Trash Assessment (URTA) sites than the KAB locations this year, as they showed direct impacts of the nearby land use on waterways. Sites on Sunnyvale East Channel, Sunnyvale West Channel (16a and 16b) and two locations in Stevens Creek (Cl 05 and Cl06) were assessed using the SCVURPPP Urban Rapid Trash Assessment Methodology. These sites were assessed in the winter (during the middle of the rainy season) as well as the spring toward the end of the rainy season.

Assessments in Sunnyvale East and West Channels were done in their northernmost reaches (in downstream areas that are tidally influenced) and in locations that intersect a known land-based trash problem area along Caribbean Drive. Materials carried by water from upstream locations may also be found at these two sites. There may also be some influx of debris from tidal influences present at these sites during significant storm events. These Channels are accessible to the public foot traffic along top the channel dike access roads. People frequently use the dike access roads to connect with the Bay Trail/Baylands areas. However, there does not appear to be much opportunity for direct public contact of the channel water due to the steep trapezoidal side slopes and the soft muddy side areas from tidal influence.

Sunnyvale staff worked together with representatives from Mountain View, Cupertino, the SCVWD, Santa Clara County, and the Stevens Permanente Creek Watershed Council to perform assessments using the URTA methodology at 5 locations in Stevens Creek in May 2007. These included sites from the northern reach adjacent to La Avenida (CI1), near the Mountain View Baylands area to Moss Rock (CI4) in the upper reaches of the watershed inside a County Park. Copies of these reports are included in this Appendix but are also discussed in the reports by the cities/agencies that have jurisdiction over the various areas.

With lower water flows in the creek this year, the Los Altos side of Stevens Creek could be reached for a more thorough retrieval of litter at the two Sunnyvale sites behind West Valley Elementary School in Sunnyvale (CI 5 and CI 6). In past years, visible litter was noted on the Los Altos side of the creek, but could not be removed due to higher water flows creating safety and accessibility problems. As a result, scores for this site were somewhat lower this year than last year, due to better access to areas where small litter pieces collected, but were not be visible from a distance (8-10 feet away).

Observations:

Tables 1 and 2 are included to show the six categories of items found in the sites assessed by Sunnyvale using the KAB method and the Urban Rapid Trash Assessment method. Table 2 also includes data collected with the collaborative group sites done on Stevens Creek using the URTA method.

Compilations of the data submitted to the Program sorted by watershed and municipality are included in the Program's section of the annual report in Appendix C.5. They include sites assessed by both Sunnyvale staff and those by collaboration with other cities/agencies along Stevens Creek.

Urban Rapid Trash Assessment Sites
Sunnyvale East:
In January 2007, the Sunnyvale East site was assessed after rain events and seasonal high tides occurred. Less litter was observed this year than in previous years. This may have been due to the smaller rain storms in the winter of 06-07 that moved debris from upstream locations, as compared to winter rain fall previous years the site was assessed. There were no high tide and storm events this year that could have brought litter in from the Guadalupe Slough, as was observed in the winter of 05-06.

Most of the litter removed during the assessment was degraded and had been in the water for some time. However, there were some small pieces of litter (Styrofoam pellets and cigarette butts) close to the roadway that appeared to

Similar to last year, when the second assessment was completed in the spring after the rainy season ended, less litter was observed than what was found in January. Most of the litter collected was plastic or light floatable debris, with no specific source identifiable.

Sunnyvale West Channel
The URTA completed in the winter and spring of 2007 showed a similar trend to that observed for the Sunnyvale East Channel. Less litter was observed in the May assessment than in the January assessment. Also, less litter was observed and collected in the winter and spring of 2007 than in the winter and spring of 2005-2006. This may have been due to the continuing clean up that occurs during the assessments or may be due to the reduced flows in the channel from less rainfall in the January-May time period of 2007.

Stevens Creek
The two Stevens Creek areas (CI05 and CI06) assessed in Sunnyvale are adjacent to each other. One is north of the footbridge crossing the Creek and the other is south of the footbridge crossing and runs parallel to the West Valley Elementary School playing fields, just downstream of the storm water outfall for the school and its surrounding neighborhood. The majority of the litter debris in the creek appeared to have come from upstream sources. However, more litter was observed this year from nearby land uses, such as the bike path on the Los Altos side of the foot bridge. Drug and inhalant abuse paraphernalia was observed along the top portion of the bank in addition to plastic drink bottles, cans, and food wrappers. Scores were lower this year than last year since the water level in the creek was lower and staff was able to reach the Los Altos side of the creek safely to pick up debris there. In previous years, observations of the larger debris items (e.g., cans, bottles, plastic bags) were made and noted on the assessment form, but could not be collected. This year they could be collected, as well as the much smaller debris (e.g., cigarette butts, small Styrofoam pieces) that could not be seen before.

This area continues to be monitored as a part of the Stream Keeper program by the Stevens and Permanente Creek Watershed Council. Public access to the creek is limited by a chain link fence and locked gate on the Sunnyvale side of the Creek. Steep side slopes on the Los Altos side of the Creek make access extremely difficult or dangerous.

KAB Sites:
The most littered areas in Sunnyvale (those scoring above a "2" or "slightly littered"), based on the Keep America Beautiful methodology, were generally those that have heavy vehicular traffic use or were sites of illegal dumping. The high traffic areas include the Highway 237 and Lawrence Expressway intersection; the Highway 101, and Matilda Avenue access ramps; and the Lawrence Expressway/CalTrain overpass. Litter in these locations is mainly

found in the CalTrans or County rights-of way. Other locations (e.g. East Persian Drive and Wildwood Drive, off Lawrence Expressway) rank above a KAB 2 due to illegal dumping that occurs in these locations. Most of the dumping occurs in the public right of way. City field services staff are called to remove debris when dumping has occurred.

Retail sites observed this year generally scored a 2 or less using the KAB scoring system. In general the litter observed was less than in previous years. However, illegal dumping of large objects in some of these business dumpster areas continues to be a problem, but is not a direct threat to local waterways.

Only the Caribbean Drive site (SU 16c) is located close to a water body. This road crosses both Sunnyvale East and Sunnyvale West channels, just upstream of the URTA sites. City staff and contractors continue to work on reducing litter and collecting litter from waste-hauling vehicles using this road as access to the SMaRT Station.

Actions Initiated:

For sites that ranked scores greater than 2 using the KAB index, some initial steps were taken to resolve the problems noted. In the case of sites SU13, SU20, and SU21, Public Works field services was notified and sent City trucks to pick up the illegally dumped debris. These areas will continue to be monitored, to determine if existing measures are adequate and to build a history that will allow additional enforcement action, if needed.

Abandoned shopping carts continue to be problems in some areas. The current City policy was followed to notify the appropriate Public Works staff person with information as to the businesses who own the carts and the address when they were found at during the trash surveys. This year, the City's Public Works Department set up a graffiti and shopping cart hot line, where the public can call in with information on abandoned shopping cart locations and the stores that own them. The City then contacts the business owners and requires them to collect the carts within 3 days of notification.

Increased efforts to perform more regular clean ups of the Highway 237 and 101 were observed by CalTrans in their roadside rights-of-way (litter pick up on a quarterly basis). However, due to extremely heavy traffic on these routes, it did not take long for them to become noticeably littered again after a clean-up was completed. The issue of dealing with trash coming from traffic on freeways is huge, and needs to be looked at on a statewide basis.

The City includes outreach messages to local residents to encourage people to cover their loads and not litter as part of the Public Education and Outreach activities (See PIP Attachment G for details on outreach.) However, litter along State freeways and County expressways may come from sources passing

through the community. So, outreach messages and other litter management efforts should be done on a region or statewide basis to help with this problem.

Potential Strategies and Next Steps:

Program-Area Wide Efforts
Sunnyvale staff will continue to work with the Program's As Hoc Trash Work Group to identify pilot efforts can be implemented that will provide effective controls for litter that enters the storm drain inlets or come from outfalls into local creeks/waterways. Staff will be identifying some locations within Sunnyvale where a pilot study, including retrofits of storm drain inlets could be done. This will be done as part of the SCVURPPP overall trash control pilot project effort. The City anticipates modifying its trash assessment efforts to link to areas where trash control BMPs have been constructed or implemented, and determine if there is any measurable reductions for litter entering waterways.

Caribbean Drive
Garbage-hauling trucks and vehicles going to the Sunnyvale SMaRT Station Materials Recovery Facility located on Carl Road use Caribbean Drive as an access route. The City recognized that blowing litter from this type vehicle traffic has been a problem along this road, so the contractor operating the SMaRT station has been required to monitor and clean litter from the north side of Caribbean drive from Borregas Avenue to the Highway 237 intersection on a weekly basis as a part of their contract with the City. Since some noticeable litter is occurring on the south side of Caribbean Drive (from KAB assessments and staff observations), the City will be including new requirements in the next contract with SMaRT station operators, effective in January 2008, that will require litter pick up on this section of the road by the contractor. In the interim, memoranda have been sent to the waste haulers and the SMaRT Station tipping floor staff to watch for and remove debris on the trucks that can be lost when vehicles exit the facility. In addition, City Field Services staff will continue to provide litter pick up during quarterly landscape maintenance activities.

Sunnyvale West Channel
Staff plans to continue with an annual investigation of the properties adjacent to Sunnyvale West Channel between the Matilda Avenue box culvert and the sampling site north of the Caribbean Drive bridge crossing. This past year's investigation showed three businesses whose outdoor trash handling procedures could lead to the quantities/types of Styrofoam found current year's assessments. Mainly uncovered dumpsters and outdoor storage of materials were observed. (See Figure 1) With assistance from the City's Solid Waste Division, letters were sent to these businesses, requesting them to keep lids down on their trash containers and to clean up around their enclosures to help reduce litter that could be blown into the Channel. Staff received phone calls from these businesses and litter pollution prevention issues were discussed.

Figure 1: Business with uncovered recyclable materials adjacent to Sunnyvale West Channel. Note some blowing litter in trees.

Sunnyvale East Channel:

An investigative walk was performed up Sunnyvale East Channel this year, from the Caribbean Drive Bridge to the Highway 101 crossing. No adjacent land use sources were identified as potential sources for trash getting into the channel in this area (e.g., businesses with uncovered dumpsters). However, the Highway 237 bridge crossing did appear to have significant potential for litter entering the channel. The area between the bridge crossing abutments was littered with light blowing debris (e.g., plastics, food wrappers). This area would not be cleaned up as a regular part of highway sweeping or litter pick up efforts (See Figure 2).

Figure 2: Litter from Highway 237 bridge crossing over Sunnyvale East Channel

Other sources for litter in Sunnyvale East appeared to be some of the storm drain outfall pipes. Most of the debris observed was small and weathered. (See Figure 3.)

Figure 3: Outfall south of Tasman Road on Sunnyvale East Channel

It is difficult to determine a specific source for much of the litter observed in Sunnyvale East channel, since this channel drains a significant portion of the City of Sunnyvale as well as parts of Cupertino. Investigations as to the best locations for additional litter control efforts are needed. In addition, coordinating regular litter clean up events in the Channel near outfalls or the highway crossings, need to be explored further. These tasks will be considered in future work plans, dependent upon the City resources available and cooperative efforts through SCVURPPP.

Trash Problem Area Activity Report
FY 06-07

175

ID	Date	Location	Assessment Score		Recent Cleanup[1]	Adjacent Land Use[2]		Trash Source[3]			Three Most Prevalent Trash Types[4]			Estimated Volume of Trash Removed (if any)	Existing Management Actions	Recommended Management Actions and/or Future Evaluations
			KAB	RTA		1	2	1	2	3	1	2	3			
cl06	1/29/2007	West Valley Elementary- Stevens Creek South		86	Unknown	School	Residential – home	Upstream/stormdrain catchment			Plastic/styrofoam	Miscellaneous	Metal	Less than 1 Cubic foot	Area is monitored by Stevens Creek Streamkeepers and cleaned up periodically	Continue to monitor as part of Stevens Creek assessment efforts
cl06	5/11/2007	West Valley Elementary - Stevens Creek South		60	Yes	School	Residential – home	Upstream/stormdrain catchment	Litter – pedestrian		Plastic/styrofoam	Miscellaneous	Metal	Less than 1 Cubic foot	Area is monitored by Stevens Creek Streamkeepers and cleaned up periodically. Contact SCVWD to assist with removal of metal pipe.	Continue to monitor as part of Stevens Creek assessment efforts
cl05	1/29/2007	West Valley Elementary - Stevens Creen North		81	Unknown	School	Residential – home	Upstream/stormdrain catchment	Other		Plastic/styrofoam	Miscellaneous	Glass	Less than 1 Cubic foot	Continue to monitor the site as part of Stevens Creek Streamkeeper program. Contact the SCVWD to remove carpet piece found	Continue to monitor as part of Stevens Creek assessment efforts
cl05	5/11/2007	West Valley Elementary - Stevens Creek North		62	Yes	School	Residential – home	Upstream/stormdrain catchment	Litter – pedestrian		Plastic/styrofoam	Miscellaneous	Metal	Less than 1 Cubic foot	Area is monitored by Stevens Creek Streamkeepers and cleaned up periodically	Continue to monitor as part of Stevens Creek assessment efforts
su01	3/15/2007	600 Block, Grand Fir and Bellflower Ave.	1		Unknown	Residential – home	Residential – apartments	Litter – pedestrian			Plastic/styrofoam	Biodegradable/paper	Miscellaneous		City street sweeping (monthly)	Consider for removal due to minimal amount of litter
su03	3/15/2007	Tamarack lane, various apartments (between Helen Ave. and Miramar Way)	1.5		Unknown	Residential – apartments	Residential – home	Litter – pedestrian			Glass	Plastic/styrofoam	Biodegradable/paper		Contacted PW staff responsible for working with businesses to pick up the shopping carts in the neighborhood with the name of the businesses it belong to (on Helen Avenue).	Continue to monitor area and determine if there are actions that could be taken to help reduce the cart accumulation problem
su05	3/15/2007	594E. El Camino Real – Alleyway behind business	1		Unknown	Commercial		Litter – commercial areas			Biodegradable/paper				Site monitored occasionally by City staff.	Remove from hot spot list
su06	3/15/2007	1053 E. El Camino Real- Alleyway behind business	2		Unknown	Commercial		Litter – commercial areas	Litter – pedestrian		Plastic/styrofoam	Biodegradable/paper			None at this time	Site should be monitored in the future to see if it still should remain on the hot spot list. Minor amount of litter observed.
su07	3/15/2007	1675 Hollenbeck Ave-Alleyway behind Business	2		Unknown	Commercial		Litter – commercial areas	Litter – vehicular	Illegal dumping	Plastic/styrofoam	Construction				Continue to periodically monitor the site for problems
su08	3/15/2007	727 Sunnyvale-Saratoga road-Alleyway behind business	1.5		Unknown	Commercial		Litter – commercial areas			Plastic/styrofoam	Biodegradable/paper			Minor amount of trash/litter observed. No additional actions planned at this time.	Continued monitoring of the site should occur.
su09	2/8/2007	1131 Lawrence Expressway	2		Unknown	Commercial		Litter – commercial areas			Plastic/styrofoam	Metal	Biodegradable/paper		Dumpster area not bad, but some litter along property border. Continue to inspect to see if problems increase.	Continued monitoring of the site should occur.
su10	2/8/2007	911 Duane Avenue – Alley way behind store	2		Unknown	Commercial	Residential – home	Litter – commercial areas	Litter – receptacles/ dumpsters		Biodegradable/paper				Dumpster and alley-way gated to preventillegal dumping. Minor amounts of litter along allyway	Consider for removal due to minimal amount of litter
su11	3/15/2007	Mathilda Ave. and Highway 101 intersection on ramps and exits	2		Unknown	Roadway		Litter – vehicular	Other		Plastic/styrofoam	Metal	Miscellaneous		Area is picked up by Cal Trans, but due to heavy traffic, becomes littered quickly after a clean-up. Clean up frequency appears to be quarterly.	Site should continue to be monitored and then consider what region-wide issues can be address with CalTrans through SCVURPPP
su12	2/8/2007	Lawrence Expressway and Highway 237 intersection- on ramps and exits	3		Unknown	Roadway		Litter – vehicular	Other		Plastic/styrofoam	Biodegradable/paper			Area is under CAL Trans jurisdiction. City is responsible for dealing with area along Carribean Drive, but not the on-ramps and exits	Site should continue to be monitored and then consider what region-wide issues can be address with CalTrans through SCVURPPP
su13	2/8/2007	Willow Ave. and Aster Ave. intersection to Agate Dr.(in Santa Clara) Area under Lawrence Expressway Overpass and Cal Train Station	2.5		Unknown	Roadway	Railways	Litter – vehicular	Litter – pedestrian	Illegal dumping	Plastic/styrofoam	Glass	Miscellaneous		Public works was contacted to pick up debris from illegal dumping. Debris from Lawrence Expy on overpass ROW clean up would have to be coordinated with the County.	Public Works staff continue to monitor the area for illegal dumping activities and then remove debris when found. Will need to identify a county contact for overpass ROW clean up efforts.
su14	3/15/2007	Angel Ct lane Ave. overpass, near Cal Train and Hendy Road, adjacent to Cal Train	1.5		Park/Trail	Roadway	Railways	Litter – pedestrian			Plastic/styrofoam	Biodegradable/paper			Trash cans have been placed at access point to CalTrain waiting area	Will continue to monitor as litter seems to appear periodically. May be a candidate for removal from the hot spot list if litter continues to be there in low amounts.
su15	3/15/2007	Victory Village Park and Fair Oaks overpass	1.5		Unknown	Commercial		Litter – commercial areas	Litter – pedestrian		Plastic/styrofoam	Metal	Biodegradable/paper		Business placed gargbage collection bags near where day-laborers congregate. Very litt litter observed.	Will continue to monitor as litter seems to appear periodically. May be a candidate for removal from the hot spot list if litter continues to be there in low amounts.

su16a	1/24/2007	Sunnyvale West Channel		93	Unknown	Park/Trail	Roadway	Litter – recreational areas	Upstream/stormdrain catchment	Litter – vehicular	Plastic/styrofoam	Biodegradable/paper	Metal	around 2 lbs / around 1 ft^3	Annually cleaned during Rapid Trash Assessments. Also, upstream sections are cleaned up by the Adopt-a-Creek program with the SCVWD - City investigated potential upstream sources. Letters send to property owner that had problems noted on their sites.	Continue to monitor during assessments to see if upstream actions/letters to dumpster owners help any. Continue upstream neighboring land user outreach to see if decreases in downstream material can be seen.
su16a	4/30/2007	Sunnyvale West Channel		100	Yes	Park/Trail	Roadway	Litter – recreational areas	Upstream/stormdrain catchment	Litter – vehicular	Plastic/styrofoam	Biodegradable/paper	Metal	less than 1 lb / less than 1/4 cu ft sq	Annually cleaned during Rapid Trash Assessments. Also, upstream sections are cleaned up by the Adopt-a-Creek program with the SCVWD -	Continue to monitor during assessments to see if upstream actions/letters to dumpster owners help any. Continue upstream neighboring land user outreach to see if decreases in downstream material can be seen.
su16b	2/2/2007	Sunnyvale East Channel		85	Unknown	Park/Trail	Roadway	Upstream/stormdrain catchment	Litter – vehicular	Litter – recreational areas	Plastic/styrofoam	Biodegradable/paper	Miscellaneous	around 4lbs / around 2 ft^3	Caribbean Drive is routinely cleaned of trash by SmaRT Station Contractor. City investigated upstream potential sources, but did not find any adjacent land uses contributing up to Highway 101 crossing. Area is cleaned up during each Rapid Trash Assessment.	Continue to monitor during assessments. Contacted SMaRT station contract manager to see if additional litter clean up efforts are possible along Caribbean Drive to reduce vehicular litter sources.
su 16b	5/3/2007	Sunnyvale East Channel		98	Yes	Park/Trail	Roadway	Upstream/stormdrain catchment	Litter – vehicular	Litter – recreational areas	Plastic/styrofoam	Biodegradable/paper	Miscellaneous	less than 1 lb / less than 1/4 cu ft sq	Caribbean Drive is routinely cleaned of trash by SmaRT Station Contractor. Continue to investigate possible upstream sources, south of Highway 101.	Continue to monitor during assessments. Contacted SMaRT station contract manager to see if additional litter clean up efforts are possible along Caribbean Drive to reduce vehicular litter sources.
su16c	2/8/2007	Caribbean Drive, between Lawrence Expressway and Mathilda Ave	2.5		Unknown	Industrial		Litter – vehicular			Plastic/styrofoam	Glass	Biodegradable/paper		Contacted the City's SMaRT Station contract manager regarding the trash observed and to check on frequency of last pick up activity.	Discussed frequency and area of clean up with SMaRT Station staff to determine if the City's contract can be changed to allow for better clean up or better containment of wastes in trucks. Contract was recently re-issued before assessment was done. Need to find ways to work within current contract to try to get more clean up along Caribbean Drive.
su17	2/8/2007	California Ave. on ramp to Central Expressway	1.5		Unknown	Roadway		Litter – vehicular	Other		Plastic/styrofoam	Biodegradable/paper			Area is on access roads to Central Expressway. Periodic clean up does occur by County or Cal Trans.	Site was better this time, appeared to have had brush removed and a clean up of debris. Very little windlown debris observed this time. Consider removal from list.
su19	2/8/2007	Wolf Road Overpass, access from Evelyn Ave parking lot														Site not accessible due to new construction that is occuring in the parking lot adjacent to the overpass. Remove from inspection list for the time being, as dumping cannot occur there while fenced
su20	2/8/2007	Wildwood Drive off Lawrence Expressway	2		Unknown	Residential – home	Commercial	Litter – vehicular	Litter – pedestrian	Illegal dumping	Plastic/styrofoam	Fabric/cloth	Biodegradable/paper		City monitors monthly for litter or illegal dumping on City-owned ROW. Notifies PW to pick up litter	Consider trying to work with nearby business to put out trash receptacles. City will continue to monitor and clean up as needed. Contacted public works to pick up illegally dumped bag of trash
su21	2/8/2007	E.Persian between Sunnyvale East and Lawrence Expy behind the mobile park	2.5		Unknown	Residential – home		Litter – pedestrian	Illegal dumping		Plastic/styrofoam	Metal	Construction		City monitors the area of the ROW for illegal dumping and picks up debris as needed.	Continue to monitor the area and notify PW of illegal dumping when observed.

[1] Recent Cleanup	[2] Land Use Types	[3] Trash Source	[4] Trash Type

Stevens Creek Trash Assessment Cooperative Sites

ID	Date	Location	Assessment Score		Recent Cleanup[1]	Adjacent Land Use[2]		Trash Source[3]			Three Most Prevalent Trash Types[4]			Estimated Volume of Trash Removed (if any)	Existing Management Actions	Recommended Management Actions and/or Future Evaluations
			KAB	RTA		1	2	1	2	3	1	2	3			
CL01	5/11/2007	Stevens Creek - La Avenida		63	Unknown	Industrial	Park/Trail	Upstream/stormdrain catchment	Litter – pedestrian		Plastic/styrofoam	Miscellaneous	Biodegradable/paper	about 1 Cubic foot (less than one bag)	Park police/grounds workers patrol daily. Site is cleaned by volunteers twice annually	The majority of the litter items observed come from upstream sources. It may be a good point to monitor to determine if upstream control measures are effective.
CL02	5/11/2007	Stevens Creek - El Camino Crossing		49	Unknown	Commercial	Roadway	Upstream/stormdrain catchment	Litter – vehicular	Litter – pedestrian	Plastic/styrofoam	Biodegradable/paper	Miscellaneous	3-4 cubic ft - 2 trash bags full	Site occasionally cleaned by volunteers from the Wateshed Council.	Accumulation of debris adjacent to temporary construction parking lot on east side of creek. May require more frequent visits to construction area ensure litter is controlled there. Continue monitoring area to see if any upstream litter control efforts are effective.
CL03	5/16/2007	Stevens Creek - McClellan Ranch		90	Unknown	Park/Trail		Upstream/stormdrain catchment	Litter – pedestrian		Plastic/styrofoam	Construction	Biodegradable/paper	Less than 1/2 cubic foot (less than one small grocery bag)	Site is cleaned by volunteers on occasion, but no specific schedule. Site is monitored by Cupertino Park staff. Most litter appeared to come from upstream sources.	Site is probably a better reference site than Moss Rock for Stevens Creek comparisons, due to the control of the area by Cupertino City Park staff and the outdoor education programs at this location. No additional a efforts other than continued monitoring and periodic litter pick up events should be considered for this site.
CL04	5/16/2007	Stevens Creek - Moss Rock		31	Unknown	Park/Trail	Roadway	Litter – recreational areas	Illegal dumping	Litter – pedestrian	Glass	Miscellaneous	Plastic/styrofoam	2-3 cubic ft - 1 1/2 trash bags full	Site is cleaned by volunteers on occasion, but no specific schedule. Site is monitored by County Park staff.	Area is becoming more of a "party" spot with many broken beer bottles. Illegal dumping of yard waste from edge of parking lot. County park may want to consider posting "no dumping" signs or placement of concrete barriers further back from edge of creek bank to prevent direct dumping of yard waste into creek.
CL05	5/11/2007	Stevens Creek - West Valley Elementary Bridge Crossing (south)		62	Yes	School	Residential – home	Upstream/stormdrain catchment	Litter – pedestrian		Plastic/styrofoam	Miscellaneous	Metal	Less than 1 cubic foot (less than one trash bag)	Sunnyvale side of the Creek is monitored by Watershed Council Streamkeeper. Accessible litter on stream bank side and what is reachable nearshore. Los Altos side of creek is not easily accessible, so litter is only picked up during assessments.	Most of the types of litter observed are from upstream locations, not from adjacent land use/school activities. Monitoring should continue to determine if upstream actions are helping to reduce litter from entering the creek.
CL06	5/11/2007	Stevens Creek - West Valley Elementary Bridge Crossing (north)		60	Yes	Park/Trail	Residential – home	Upstream/stormdrain catchment	Litter – pedestrian		Plastic/styrofoam	Miscellaneous	Metal	Less than 1 cubic foot (less than one trash bag)	Sunnyvale side of the Creek is monitored by Watershed Council Streamkeeper. Accessible litter on stream bank side and what is reachable nearshore. Los Altos side of creek is not easily accessible, so litter is only picked up during assessments.	Most of the types of litter observed are from upstream locations, not from adjacent land use/school activities. Monitoring should continue to determine if upstream actions are helping to reduce litter from entering the creek.

Trash Problem Area Activity Data Collection Form

Date: 5/11/07

I. Site Information

1. **Site ID#** CL01 **Watershed:** Stevens Creek – La Avenida **Location:** 100 ft from downstream of outfall

II. Assessment Information

1. Which assessment tool was used? (Check one)
   ☒**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
   ☐**Non-Creek**-KAB Litter Index ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 63
3. Windshield Survey Results-Trash Priority: ☒ **NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? 50%
5. This assessment is ☐ **Initial** ☒**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site? 3

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☐Plastic bags	☒Cigarette butts	☐Fabric and cloth
☒Styrofoam products	☒Plastic/Synthetic items	☐Toxic substances
☐Aluminum cans	☐Tires	☐Appliances
☐Bottles (plastic and glass)	☐Woody debris	☐Furniture
☒Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☒Other : paper

2. Potential trash source (Check all that apply):
   ☒Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☐Trash accumulation (wind-borne) ☐Illegal dumping ☐Other _____
   ☐Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☐Litter-Commercial business (name)_____
   ☐Litter-School/Institution (name)_____
   ☒Litter-Other (describe) Pedestrian
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☒**Creek N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible):Stevens Creek Trail

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☐ **No** ☒
1b. If trash was removed, provide total weight or volume (if known): Less than one bag of trash, about a cubic foot
1c. Photographic documentation: **Yes**☒ **No**☐
2a. Other Trash Management Actions Taken (describe): Area is monitored by Friends of Stevens Creek Trail and City of Mountain View (along trail) and cleaned up at least 2x per year.
3a. Follow-up action needed: **Yes** ☒ **No**☐
3b. Future trash management actions needed (Please describe): Continue monitoring the site for trash accumulation to see if upstream actions can help reduce accumulations.
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency 2 x per year in creek, monthly along adjacent trail
3d. Is a future assessment needed? **Yes**☒ **No** ☐
3e. If Yes, which tool? ☒**Creek**-RWQCB Version7.0 ☐**Non-Creek**-Windshield Survey
☐**Non-Creek**-KAB Litter Index ☐Other_____

Notes: Quantity of debris removed is small. Large numbers of small pieces of plastic/wrappers/straws and Styrofoam materials present. Thick layer of aquatic vegetation in smaller side channel made it difficult to observe trash that may have floated there. Most trash is found on center "island" in the creek and appears to be from high water flows, accumulating from upstream sources.

II. Assessment Information

1. Which assessment tool was used? (Check one)
   ☒**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
   ☐**Non-Creek**-KAB Litter Index ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 49
3. Windshield Survey Results-Trash Priority: ☒ **NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.) 50%
5. This assessment is ☐ **Initial** ☒**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site? 3

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☐Plastic bags	☒Cigarette butts	☐Fabric and cloth
☒Styrofoam products	☒Plastic/Synthetic items	☐Toxic substances
☐Aluminum cans	☐Tires	☐Appliances
☒Bottles (plastic and glass)	☐Woody debris	☐Furniture
☐Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☒Other : paper

2. Potential trash source (Check all that apply):
   ☒Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☐Trash accumulation (wind-borne) ☒Illegal dumping ☐Other _____
   ☐Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☐Litter-Commercial business (name) _____
   ☐Litter-School/Institution (name) _____
   ☒Litter-Other (describe) Litter from construction vehicle parking lot
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☒**Creek N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible): Construction site parking lot, Roadway (El Camino Real). Access road to creek gated by SCVWD.

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☐ **No** ☒
1b. If trash was removed, provide total weight or volume (if known): One and a half garbage bags full (about 3-4 cubic feet)
1c. Photographic documentation: **Yes**☒ **No**☐
2a. Other Trash Management Actions Taken (describe): Area is monitored by Stevens Creek Streamkeepers and cleaned up periodically
3a. Follow-up action needed: **Yes** ☒ **No**☐
3b. Future trash management actions needed (Please describe): City to work with construction contractor to prevent unauthorized access to the creek bank and prevent additional dumping on creek bank in that area.
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency Unknown
3d. Is a future assessment needed? **Yes**☒ **No** ☐
3e. If Yes, which tool? ☒**Creek**-RWQCB Version7.0 ☐**Non-Creek**-Windshield Survey
☐**Non-Creek**-KAB Litter Index ☐Other _____

Notes: A cache of trash/ litter from a parking lot on the east side of the creek was found this year. Access to that area was limited in previous years, but due to nearby trail construction activities, public access to the area is more prevalent. Most of the trash removed was at "top of bank" or near to it and was not in the creek itself. Small amounts of litter had washed down the creek from upstream sources or nearby roadway.

I. Site Information

1. **Site ID#** CL03 **Watershed:** Stevens Creek McClellan ranch **Location:** 10 ft upstream of metal pipe - 90 ft downstream of pipe.

II. Assessment Information

1. Which assessment tool was used? (Check one)
   ☒**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
   ☐**Non-Creek**-KAB Litter Index ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 90
3. Windshield Survey Results-Trash Priority: ☒ **NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? 5%
5. This assessment is ☐ **Initial** ☒**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site? 3

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☒Plastic bags	☐Cigarette butts	☐Fabric and cloth
☐Styrofoam products	☒Plastic/Synthetic items	☐Toxic substances
☐Aluminum cans	☐Tires	☐Appliances
☐Bottles (plastic and glass)	☒Woody debris	☐Furniture
☒Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☒Other : paper

2. Potential trash source (Check all that apply):
   ☒Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☐Trash accumulation (wind-borne) ☐Illegal dumping ☐Other _____
   ☐Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☐Litter-Commercial business (name)_____
   ☐Litter-School/Institution (name)_____
   ☐Litter-Other (describe)_____
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☒**Creek N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible): , Upstream roadway and golf course, City Park trail access

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☐ **No** ☒
1b. If trash was removed, provide total weight or volume (if known): Less than1/2 cubic foot
1c. Photographic documentation: **Yes**☒ **No**☐
2a. Other Trash Management Actions Taken (describe): Area is monitored by Stevens Creek Streamkeepers and City Park staff. It is cleaned up periodically (at least 2x per year during creek clean up events
3a. Follow-up action needed: **Yes** ☒ **No**☐
3b. Future trash management actions needed (Please describe): Continue to monitor, potential good reference site for background comparisons to urban trash levels.
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency at least 2x per year
3d. Is a future assessment needed? **Yes**☒ **No** ☐
3e. If Yes, which tool? ☒**Creek**-RWQCB Version7.0 ☐**Non-Creek**-Windshield Survey
☐**Non-Creek**-KAB Litter Index ☐Other_____

Notes: Minimal amount of trash observed in the creek, banks, or along the trail. Some cups and plastic covers on trail adjacent to the creek that appeared to be a part of a science project.

I. Site Information

1. **Site ID#** CL04 **Watershed:** Stevens Creek Moss Rock **Location:** 100 ft downstream from the upper end of Moss Rock.

II. Assessment Information

1. Which assessment tool was used? (Check one)
   ☒**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
   ☐**Non-Creek**-KAB Litter Index ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 31
3. Windshield Survey Results-Trash Priority: ☒ **NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? 80%
5. This assessment is ☐ **Initial** ☒ **Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site? 3

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☐Plastic bags	☒Cigarette butts	☐Fabric and cloth
☐Styrofoam products	☐Plastic/Synthetic items	☐Toxic substances
☐Aluminum cans	☐Tires	☐Appliances
☒Bottles (plastic and glass)	☐Woody debris	☐Furniture
☒Convenience/Fast Food wrappers	☒Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☒Other : paper

2. Potential trash source (Check all that apply):
   ☒Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☐Trash accumulation (wind-borne) ☒Illegal dumping ☐Other _____
   ☐Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☐Litter-Commercial business (name)_____
   ☐Litter-School/Institution (name)_____
   ☒Litter-Other (describe) Local "party" spot for drinking and other nefarious actions
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☒**Creek N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible):Parking lot and roadway

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☐ **No** ☒
1b. If trash was removed, provide total weight or volume (if known): about 2-3 cubic ft (most of 1 large garbage bag) of litter was removed. Unable to remove the cubic yard of yard waste/brush/tree trimmings on the creek bank
1c. Photographic documentation: **Yes**☒ **No**☐
2a. Other Trash Management Actions Taken (describe): Area is monitored by Stevens Creek Streamkeepers and cleaned up periodically (about 2x per year) . Also, is located on County Park land, so park ranger may inspect sometimes.
3a. Follow-up action needed: **Yes** ☒ **No**☐
3b. Future trash management actions needed (Please describe): Consider putting up no dumping signs or placing some concrete barriers further back from the edge of the creek bank so if someone dumps debris, it does not get into the creek.
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency1-2 times per year
3d. Is a future assessment needed? **Yes**☒ **No** ☐
3e. If Yes, which tool? ☒**Creek**-RWQCB Version7.0 ☐**Non-Creek**-Windshield Survey
☐**Non-Creek**-KAB Litter Index ☐Other_____

Notes: Smashed beer bottles were very prevalent, with hundreds of glass pieces we could not even begin to pick up. It appears that people are throwing them across the creek to see them smash on the rocks on the other side. Illegal dumping of yard waste is happening along the parking lot. Area has become a significant local "party" hang out as evidenced by the quantity of liquor/beer, cigarettes and condoms/wrappers.

☐Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☐Other :

2. Potential trash source (Check all that apply):
   ☒Trash accumulation (water-borne) ☐Homeless encampments ☒Outfall _____
   ☐Trash accumulation (wind-borne) ☐Illegal dumping ☐Other _____
   ☐Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☐Litter-Commercial business (name)_____
   ☐Litter-School/Institution (name)_____
   ☒Litter-Other (describe) construction debris washing down from unknown upstream location
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☒**Creek N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible):West valley school playground on Sunnyvale side, residential area on Los Altos side of creek

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☐ **No** ☒
1b. If trash was removed, provide total weight or volume (if known): less than 1 Cubic foot (less than 3 lbs), not counting the piece of plywood that could not be removed
1c. Photographic documentation: **Yes**☒ **No**☐
2a. Other Trash Management Actions Taken (describe): Area is monitored by Stevens Creek Streamkeepers and Sunnyvale side cleaned up periodically
3a. Follow-up action needed: **Yes** ☒ **No**☐
3b. Future trash management actions needed (Please describe): Continue to monitor and clean up as needed
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency Monthly it is removed from the Sunnyvale side of the Creek
3d. Is a future assessment needed? **Yes**☒ **No** ☐
3e. If Yes, which tool? ☒**Creek**-RWQCB Version7.0 ☐**Non-Creek**-Windshield Survey
☐**Non-Creek**-KAB Litter Index ☐Other_____

Notes: 1 empty spray can found floating. 1 piece of plywood left in place (woody debris). Lots of small Styrofoam pieces (small chunks, not from cups or pellets). Were able to reach Los Altos side this year with lower water to pick up Styrofoam and other small plastic debris.

4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)?) 0%
5. This assessment is ☐**Initial** ☒**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site? Second year assessment

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☐Plastic bags	☐Cigarette butts	☐Fabric and cloth
☐Styrofoam products	☐Plastic/Synthetic items	☐Toxic substances
☐Aluminum cans	☐Tires	☐Appliances
☐Bottles (plastic and glass)	☐Woody debris	☐Furniture
☐Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☒Other paper

2. Potential trash source (Check all that apply):
   ☐Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☐Trash accumulation (wind-borne) ☐Illegal dumping ☐Other _____
   ☐Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☒Litter-Commercial business (name) Longs Drug
   ☐Litter-School/Institution (name)
   ☐Litter-Other (describe)
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☐**Creek**☒ **N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible): Small businesses/strip mall

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☐ **No** ☒
1b. If trash was removed, provide total weight or volume (if known): _____
1c. Photographic documentation: **Yes** ☒ **No**☐
2a. Other Trash Management Actions Taken (describe): _____
3a. Follow-up action needed: **Yes** ☐ **No** ☒
3b. Future trash management actions needed (Please describe): To be removed from the hot spot list.
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency Unknown, but litter not visible
3d. Is a future assessment needed? **Yes** ☒ **No** ☐

3e. If Yes, which tool? ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
☒**Non-Creek**-KAB Litter Index ☐Other _____

Notes: _____

6. If applicable, how many follow-up assessments have been conducted at this site? Second year of assessment

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☒Plastic bags	☐Cigarette butts	☐Fabric and cloth
☐Styrofoam products	☒Plastic/Synthetic items	☐Toxic substances
☐Aluminum cans	☐Tires	☐Appliances
☐Bottles (plastic and glass)	☐Woody debris	☐Furniture
☒Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☒Other cups, paper

2. Potential trash source (Check all that apply):
   ☐Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☐Trash accumulation (wind-borne) ☐Illegal dumping ☐Other _____
   ☐Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☐Litter-Commercial business (name) _____
   ☐Litter-School/Institution (name) _____
   ☒Litter-Other (describe) Pedestrian
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☐**Creek** ☒**N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible): Cal Train ROW, City-owned parking lot and Businesses

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☐ **No** ☒
1b. If trash was removed, provide total weight or volume (if known): _____
1c. Photographic documentation: **Yes** ☒ **No**☐
2a. Other Trash Management Actions Taken (describe): Trash cans have been placed at access point to CalTrain waiting area (picture)
3a. Follow-up action needed: **Yes**☒ **No** ☐
3b. Future trash management actions needed (Please describe) Will continue to monitor as litter seems to appear periodically. May be a candidate for removal from the hot spot list if litter continues to be there in low amounts.
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency Monthly, by City crews
3d. Is a future assessment needed? **Yes** ☒ **No** ☐

3e. If Yes, which tool? ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
☒**Non-Creek**-KAB Litter Index ☐Other _____

Notes: City owned parking lot under Matilda Ave and strip of land adjacent to Cal Train ROW on Hendy Street. Area is monitored by City PW department and cleaned up as needed or on a monthly basis. Occasional shopping carts appear in the area as well. Litter along the side of the railroad track just west of the Hendy Works. Some observed in the parking lot, but nothing along the CalTrain parking area.

II. Assessment Information

1. Which assessment tool was used? (Check one)
   ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
   ☒**Non-Creek**-KAB Litter Index ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 1.5
3. Windshield Survey Results-Trash Priority: ☒**NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? 10%
5. This assessment is ☐ **Initial** ☒**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site? Third year of assessing

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☒Plastic bags	☐Cigarette butts	☐Fabric and cloth
☐Styrofoam products	☒Plastic/Synthetic items	☐Toxic substances
☒Aluminum cans	☐Tires	☐Appliances
☐Bottles (plastic and glass)	☐Woody debris	☐Furniture
☐Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☒Other paper, full trash bag

2. Potential trash source (Check all that apply):
   ☐Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☐Trash accumulation (wind-borne) ☐ Illegal dumping ☐Other
   ☐Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☒Litter-Commercial business : Home Depot
   ☐Litter-School/Institution (name)
   ☒Litter-Other (describe) Most litter from day laborers waiting at the site for a job.
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☐**Creek** ☒**N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible): Right of way next to Home Depot parking lot – an area where day-laborers congregate while waiting for jobs.

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☐ **No** ☒
1b. If trash was removed, provide total weight or volume (if known): _____
1c. Photographic documentation: **Yes** ☒ **No** ☐
2a. Other Trash Management Actions Taken (describe): _____
3a. Follow-up action needed: **Yes** ☐ **No** ☒
3b. Future trash management actions needed (Please describe):_____
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency PW Streets and Boulevards maintenance staff routinely pick up debris at the site (quarterly) or as requested.
3d. Is a future assessment needed? **Yes** ☒ **No** ☐
3e. If Yes, which tool? ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
☒**Non-Creek**-KAB Litter Index ☐Other_____

Notes: Day labors are using trash bag to collect litter and litter is contained.

I. Site Information

Site ID# SU 16 b Watershed: Sunnyvale East Channel Location: 100ft North Of Caribbean Dr. Bridge

II. Assessment Information

1. Which assessment tool was used? (Check one)
   ☒**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
   ☐**Non-Creek**-KAB Litter Index ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 85
3. Windshield Survey Results-Trash Priority: ☒**NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? 100%
5. This assessment is ☐**Initial** ☒**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site? Second year

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☐Plastic bags	☐Cigarette butts	☐Fabric and cloth
☒Styrofoam products	☒Plastic/Synthetic items	☐Toxic substances
☐Aluminum cans	☐Tires	☐Appliances
☒Bottles (plastic and glass)	☐Woody debris	☐Furniture
☒Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☒Other paper

2. Potential trash source (Check all that apply):
   ☒Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☒Trash accumulation (wind-borne) ☐Illegal dumping ☐Other _____
   ☒Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☐Litter-Commercial business (name)_____
   ☐Litter-School/Institution (name)_____
   ☒Litter-Other (describe) Nearby sports activity field
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☒**Creek(channel)**
4. Identify adjacent land uses to the trash areas assessed (if possible): Roadway, open space, public trails, sports complex

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes**☒ **No** ☐
1b. If trash was removed, provide total weight or volume (if known): 4lbs 2 cubic feet
1c. Photographic documentation: **Yes** ☒ **No** ☐
2a. Other Trash Management Actions Taken (describe): SCVWD jurisdiction. Caribbean Drive is routinely cleaned o trash by SMaRT Station Contractor. City investigated upstream potential sources
3a. Follow-up action needed: **Yes** ☐ **No** ☒
3b. Future trash management actions needed (Please describe):
See if channel can be "adopted" for creek clean up activities. Others yet to be determined
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐If yes, at what frequency Annually during assessment
3d. Is a future assessment needed? **Yes** ☒ **No** ☐
3e. If Yes, which tool? ☒**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey ☐Other_____ ☐**Non-Creek**-KAB Litter Index

Notes: It took 2 hrs to clean up. Litter was collected at low tide.

4. Identify adjacent land uses to the trash areas assessed (if possible): Roadway, open space, public trails, sports complex

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes**☒ **No** ☐
1b. If trash was removed, provide total weight or volume (if known): 0.5-1lb 0.5 cubic feet
1c. Photographic documentation: **Yes** ☒ **No** ☐

2a. Other Trash Management Actions Taken (describe): SCVWD jurisdiction. Caribbean Drive is routinely cleaned o trash by SMaRT Station Contractor. City investigated upstream potential sources Litter picked up during assessmen in February 2007
3a. Follow-up action needed: **Yes** ☐ **No** ☒
3b. Future trash management actions needed (Please describe):
See if channel can be "adopted" for creek clean up activities. Others yet to be determined
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐If yes, at what frequency Annually during assessment
3d. Is a future assessment needed? **Yes** ☒ **No** ☐
3e. If Yes, which tool? ☒**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey ☐Other_____ ☐**Non-Creek**-KAB Litter Index

Notes: Very little quantity of trash. The channel had been dredged since the last assessment was completed. 4 plastic bags were seen in the middle of the channel could not be removed. A 5 gallon bucket full of oil was found outside the survey area, next to the Caribbean Drive. City staff were notified to pick it up and dispose of it properly. Tide was low during the survey.

City's Qualified Consultants List for 3rd Party Certifications		
4/17, 4/18, and 4/25/2007	Revisions to Sunnyvale BMP Guidance Manual and Expectations for 3rd Party Certifications	9 firms, Approx. 25 staff

2) Response to Regional Board Comments on previous year's annual report:
No comments were received on this section.

3) Summarization of staff feedback, planned changes, and any other evaluation comments:
Environmental Division staff continued to provide training on Storm Water Best Management Practices and the revisions that were made to update the City's Storm Water BMP Guidance Manual. Staff from Public Works and Community Development participated.

Training for SWMP – Third-party review Qualified Consultants on the revisions to the City's BMP Guidance manual went well. Response from those attending was favorable and they indicated that it was beneficial to their understanding of the expectations for those Qualified Consultants that are being requested by project applicants to perform 3rd Party reviews of the Storm Water Management Plans.

P.S. Id.	Activity	CI Item Source	FY 06-07 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Watershed Management Activities						
	Watershed Management-Watershed Assessment	Permit Prov. C.10	City staff will continue to work through the Santa Clara Basin Watershed Management Initiative (SCBWMI) to participate in the assessment of watersheds in the Santa Clara Basin.	Sunnyvale continues to participate actively in the SCBWMI. The WMI has been evaluating how it can best play a role in seeing that the Action Plan gets implemented. The WMI recognizes that it does not have the resources or authority to complete such actions itself. With recent revenue shortfalls for cities and completion of the Characterization, first Assessment and the Action Plan Reports, the WMI must continually evaluate its structure and its approach to its mission in order to meet the needs and capacities of its member organizations. City staff continue to participate in the following WMI Work Groups or Sub Groups: • COS – Communications and Outreach Sub Group • WAMS – Watershed Assessment and Monitoring Sub Group • Land Use Sub Group • Emerging Contaminants Sub Group • Watershed Education and Outreach Sub Group Staff also participated in the Core Group Retreat held in June 2007 to identify and prioritize future actions for the WMI.	Ongoing Report 09/07	Lorrie Gervin, Environmental Division Manager

Mr. Bruce H. Wolfe
Executive Officer
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: COUNTY OF SANTA CLARA CLEAN WATER PROGRAM FY 07 ANNUAL REPORT

Dear Mr. Wolfe:

This report is submitted by the County of Santa Clara, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.(a) of its reissued municipal storm water discharge National Pollutant Discharge Elimination System Permit (Orders No. 01-024, 01-119, and R2-2005-0035).

This report summarizes activities performed during FY 07 in accordance with the County's Urban Runoff Management Plan (URMP), which was submitted to the Regional Board in September 1997 and updated subsequently, the performance standards contained therein, and the 2001 NPDES Storm Water Discharge Permit, as amended.

The County unincorporated area has a population of about 100,000 persons, with about 80,000 living within the Phase I NPDES Storm Water Discharge Permit jurisdiction. Community physical characteristics include mountains, forests, grasslands, chaparral, farms, suburbs, foothills, valley floor areas, watersheds, reservoirs, and bay frontage. There is no urban downtown core area; rather there is a large acreage of low-density land area surrounding existing suburbs and municipalities.

The County has a few urban pockets, few commercial sites, and few industrial sites. The County is pursuing a program of annexation, so that these urban pockets will become a part of the cities that surround them. The restrictive zoning and general plan policies for the unincorporated areas do not promote urban growth or subdivisions. In addition, the Parks and Recreation Department has obtained large land holdings that will never be developed, but rather will be used for primarily for open space and for low impact recreation. The largest "commercial" site in the unincorporated area is Stanford University.

Board of Supervisors: Donald F. Gage, Blanca Alvarado, Pete McHugh, Ken Yeager, Liz Kniss
County Executive: Peter Kutras, Jr.

Goals and Contents of the Report:

The goals of this Annual Report are to: 1) document implementation of the URMP and the FY 07 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with NPDES Storm Water Discharge Permit requirements; and 4) share this information with other Co-permittees, jurisdiction decision-makers, and the public. A table of contents is included with the report.

Program Highlights:

1). The County's Clean Water Program continues to be funded directly from the County General Fund. As was stated in previous annual reports, the storm water fee that supported Clean Water Program activities was eliminated by the effects of Proposition 218 in 1997. Additional tax funding can only be obtained by a 2/3 vote of the people. The County Clean Water program is staffed by one Senior Management Analyst position. Staff members of the involved departments coordinate compliance and reporting activities as they relate to each involved department, with guidance from the Clean Water Program Coordinator as well as the Santa Clara Valley Urban Runoff Pollution Prevention (SCVURPPP) program staff.

2). The County continues to move forward with implementation of the 2001 NPDES Permit, as amended. The County is interested in how the provisions of the proposed Municipal Regional Permit will affect the existing Clean Water Program functions.

3). The involved departments include Capital Programs (now a part of the Fleet and Facilities Department), Roads and Airports, Parks and Recreation, Planning and Development (Planning Office, Development Services Office, Clean Water Program, Surveyor), Agriculture and Environmental Management (Integrated Waste Management, Pollution Prevention, Graffiti and Litter Abatement, Green Business Program, Master Composter Education Project, Environmental Health [Consumer Protection, Hazardous Materials, Solid Waste, Household Hazardous Waste, Vector Control], the County Executive's Office (Special Construction Projects, and Integrated Pest Management).

4). County staff members from the various involved departments have continued to be active this fiscal year in attending informational presentations regarding implementing the requirements of the NPDES Permit and preventing nonpoint source pollution.

Continuous Improvement Activities:

1). The County Department of Environmental Health continues to provide enhanced reporting for IC/ID and IND/COMM activities within the unincorporated area.

2). The involved County departments continue to take direct responsibility for implementation of performance standards and reporting on NPDES Permit compliance activities.

3). Training events have been well received by the involved departments.

4). The County's full time IPM Program Manager is continuing to work with the Department of Parks and Recreation pursuant to its new Pesticide Use Reduction Plan, and with Department of Roads and Airports regarding a planned Expressway Median Area Mulching Project that will also reduce the need for pesticides. The County was he first jurisdiction in SCVURPPP to adopt an IPM ordinance. Also, the County IPM Program Manager now has benefit of online pesticide use requesting and reporting via a database on the County's intranet.

5). The Household Hazardous Waste, Green Business, Integrated Waste Management, Graffiti and Litter Abatement, and Master Composting Education Programs have all been active in spreading the pollution prevention message, including prevention of storm water pollution.

6). The Household Hazardous Waste (HHW) Program has been very active in the recycling of mercury containing materials, in the Mercury Education Project, and in promoting E-Waste recycling. The HHW Program supports legislation to require sellers of mercury containing products to provide for collection and recycling.

Thank you in advance for your review of this Annual Report for FY 07. If you or your staff members have any questions regarding the materials submitted, please contact me at (408) 299-5737.

Sincerely,

Steve Homan

COUNTY OF SANTA CLARA
DEH: SOLID WASTE LOCAL ENFORCEMENT AGENCY
FOR CLEAN WATER PROGRAM
ANNUAL REPORT FY 07

- **Solid Waste Local Enforcement Agency (SW-LEA)**

The Solid Waste Program approaches the goals of storm water pollution prevention to the maximum extent practicable in a pragmatic manner. Every complaint received and investigated is approached considering what is is needed to remove the threat of pollution. This often leads to a referral to another agency having jurisdiction over the cause of the polluting responsible party. Staff continues to look for and report potential polluting situations to the stormwater protection enforcement agencies for follow-up.

In many cases, the solid waste program confirms the threat and issues an order to abate the violation. Usually the threat of legal action leads to abatement of the violation, but occasionally cases are referred to the District Attorney's Environmental Crimes Unit for legal action.

The complaint investigations are widely varied in scope, but are nonetheless related to preventing pollution of the environment and are backed by the County Ordinances relating to yard waste, refuse accumulations, illegal dumping, refuse collection vehicles, and the septage or grease pumper vehicles. **Upon our recommendation to the County Integrated Waste Management awarded contracts this year to three large urban territories have limited yardwaste collection directly from the toters instead of collecting yardwaste directly on the streets.** We believe this will have a large impact on the volume of organic debris from entering the storm drain systems.

Abatement of facilities that are routinely inspected, include vehicle storage yards and solid waste facilities, operations such as landfills, transfer stations, composting facilities, and closed landfills. These facilities are under the jurisdiction of state laws and the state-designated local enforcement program. This section inspects all large facilities that generate medical or bio-hazardous wastes and ensure that their waste stream handling does not result in biohazardous waste contamination of the storm water systems near such facilities.

It is stressed at SW-LEA staff meetings and in training that one of the principal goals of our inspections is to identify and investigate any and all critical control points of the programs promoting clean water. The SW-LEA program is effective in reducing or eliminating storm water pollution because it keeps illegally dumped materials out of the storm water system and therefore out of watersheds.

Training: Solid waste staff attended a CIWMB/LEA conference promoting coordination between various state oversight boards, such as air, water and solid waste. The topics centered around solid waste facilities and how the public and the environment can be better protected from the impacts of these facilities and the improper or illegal disposal of solid waste. There were presentations relating to illegal dumping abatement as well as coordinating efforts with the RWQCBs, since local inspectors are their eyes and ears out in the field. The solid waste staff gained valuable information from several topics covered relating to storm water pollution prevention. Solid Waste staff also attends monthly the Technical Advisory Committee meeting addressing a wide range of issues regarding solid waste and recycling including storm water run off and public education.

Memorandum

July 20, 2007

To: Stormwater/Urban Runoff P2 Staff

From: Wendy Fong, Management Analyst

Re: Fiscal Year 2006/2007 HHW Program Update

Participation
The HHW Program served 26,953 residents from July 1, 2006 through June 30, 2007. In addition, over 2.3 million pounds of hazardous waste was managed safely and legally. There were 64 collection events for residents at three permanent facilities and 10 temporary events strategically located throughout the County. (Note that the San Jose facility closed in October 2006.) In addition, the Program served 418 small businesses including local governments, Goodwill Industries, and the Salvation Army.

Paint
Latex paint accounted for 819,800 pounds and other paint related materials (including oil paint) accounted for approximately 623,170 pounds. Together, paint represents 61% of the hazardous waste collected.

Pesticides
Although the grant award to conduct public education about Dursban and Diazinon has ended, we continued to manage 1,250 pounds of these two pesticides. Over 210,900 pounds of other poisons were managed as well.

UNIVERSAL WASTE

The County of Santa Clara Department of Environmental Health Household Hazardous Waste Program provides residents with opportunities to recycle mercury-containing products (fluorescent lights, batteries, and thermometers) at retail locations, community centers and special outreach events. These products contain varying amounts of mercury, a heavy metal, which is a U.S. Environmental Protection Agency waste minimization priority chemical. A community-based collection system is convenient, cost-effective and combined with an aggressive educational outreach program, will increase awareness and participation. Outreach includes the use of consistent educational messages through the media and the development and distribution of brochures, flyers and posters as well as literature and event attendance.

Mercury containing products collected in FY 2006/2007

Recycling partners were established at retail and community drop-off locations. These partners agreed to allow customers to drop-off household batteries and fluorescent lamps. To date 30 retail stores serve as fluorescent lamp drop-offs and 49 locations serve as battery drop-offs. The HHW Program picks up the waste and recycles it for them.

Elemental Mercury- 1,170 pounds (includes thermostats, thermometers and other products)
Fluorescent Lamps – 353,694 feet or 88,423 pounds
Household batteries – 65,860 pounds

Public Outreach

A total of 1,193 thermometers were collected at 7 thermometer exchange events where residents exchanged their mercury-containing thermometer for a free mercury-free one.

Participated in 22 community events.

Hazardous Waste Recycling & Disposal FOR SANTA CLARA COUNTY

Pesticide Disposal and Recycling

Pesticide Grant

In June 2001, the County of Santa Clara Household Hazardous Waste (HHW) Program was awarded a grant from the California Integrated Management Board (CIWMB) implementing public education to promote the immediate disposal of two pesticides Dursban (chlorpyrifos) and Diazinon. The objective of this grant was to provide county residents with a safe and convenient means of disposal, information on health risks involved with it's use, and pesticide alternatives.

Awareness of the dangers of Dursban and Diazinon has been spread through a wide variety of outreach methods including door hangers, brochures, and appointment letter inserts. Over 176,000 door hangers were distributed in Santa Clara County. There was also outreach material passed out to a number of schools in San Jose and Los Gatos.

It is illegal to sell Dursban as of December 31, 2001, and Diazinon will be completely off the market by the end of 2004. These chemicals have been studied and found to be dangerous nerve toxins. During the span

...more

of the grant, 34,278 residents have dropped off pesticide products of which, 9,800 pounds were Dursban and Diazinon. This waste was enough to pack forty-nine 55gallon drums.

Although the grant has expired, the Household Hazardous Waste Program continues to welcome pesticide waste at its disposal drop-offs. Please call (408)299-7300 to arrange an appointment for a drop-off.

SUBJECT: Azevedo Quarry
County File # 4728-43-60-04PAM

DATE: March 5, 2007

The following observations and recommendations for the Azevedo Quarry in San Jose, CA. are based on a site visit and inspection dated December 6, 2006.

BACKGROUND

For the background of the quarry please see the Cotton, Shires & Associates report for Azevedo Quarry dated February 5, 2007.

INSPECTION NOTES

A. Inspection of the tiger salamander habitat fence showed that the fence needs some maintenance to repair some tears in the silt fence. The habitat is located south east of the sedimentation pond.

B. The earth berm between the sedimentation pond and the railroad tracks contains a tension crack. The use of poor fill material, construction methods and the slope angle of the berm could have contributed to the failure.

C. There are also inconsistencies from the reclamation plan along the entrance the South East side of the quarry. There is a large cut slope in excess of 20 feet vertical with no slope. (Figure 1)

RECOMMENDATIONS

1. Have the Geotechnical Engineer of record study the slope near the entrance and the earth berm of the quarry to verify its stability. Provide recommendations to alleviate the issue if necessary

2. The quarry operator should be performing annual maintenance of the tiger salamander habitat area. Future inspections should look at the fence protecting the habitat.

SUBJECT: Stevens Creek Quarry
County File # 1253-16-62-04PAM

DATE: March 5, 2007

The following observations and recommendations for the Stevens Creek Quarry West of Cupertino, CA. are based on a site visit and inspection dated December 19, 2006.

BACKGROUND

For the background of the quarry please see the Cotton, Shires & Associates report for Stevens Creek Quarry dated February 5, 2007.

INSPECTION NOTES

A. When entering the main pit there was a large cut slope on the West side. The slope appeared to be steeper than 1:1, horizontal to vertical, and contained only one intermediate bench close to the top of the hill. The remaining slope appeared to go down the rest of the hill (Figure 1). The cut slope is also not covered with any erosion control.

B. Inspection the East side of the quarry revealed exposed slopes with large drainage channels and sloughing material off of the hillside to the base. (Figure 2). The slope appears to have no erosion control.

C. As we traveled along on an access road to the Northern part of the quarry we found that the access road was draining away from the quarry. There was an earth berm put in place but there were at least 3 selected cuts in the berm that allowed drainage to go to the other side of the hill. Drainage and sediment appeared to be going away from the quarry instead of being contained (figure 3).

D. As we approached the Northern part of the main pit, there was a very large accumulation of overburden soil that appeared to be unstable (Figure 4). Other portions of overburden appear to have fallen all around.

RECOMMENDATIONS

1. Have the Geotechnical Engineer of record verify the stability of slopes along the West and Northern Slope. Provide recommendations if necessary

2. Have the access road re-graded to slope towards the quarry to keep the drainage and sediment contained in the quarry. Additionally drainage should not be allowed to sheet flow onto any fill or cut slopes.

3. Erosion control should be in place to prevent drainage from causing additional damage to the cut and fill slopes and to prevent drainage channels from occuring.

4. An erosion control plan should be designed by the quarry's Civil Engineer or Geotechnical consultant and submitted to Land Development Engineering for review.

SUBJECT: Serpa Quarry
County File # 2071-42-84-04PAM

DATE: March 5, 2007

The following observations and recommendations for the Serpa Quarry in Milpitas, CA. Are based on a site visit and inspection dated November 9, 2006.

BACKGROUND

For the background information and history of the quarry, please see the Cotton, Shires & Associates report for the Serpa Quarry dated February 5, 2006.

INSPECTION NOTES

A. The Serpa Quarry is now run on an as needed basis. It is not in full operation. There were some areas of loose stockpiles generally in the Northern side of the Quarry. Drainage appears to be flowing to the adjacent property.

B. There appears to be a steep unstable slope alongside the haul road back down to the lower area. This slope needs to be addressed by the Civil Engineer and/or Geotechnical Engineer on record.

RECOMMENDATIONS

1. Better erosion control methods are advised to stabilize slopes and minimize potential landslides. Examples would be straw blankets, matted straw with jute netting or hydro-straw/ hydro seeding, etc. The Geotechnical Engineers or Civil Engineer on record should make recommendations regarding erosion control methods and submit this plan the Land Development Engineering for review. In addition, a proposed plan to grade back the slope to a 3:1 should be considered.

2. Clean up of the Northern area must be completed in addition to drainage improvements to capture storm water runoff to the adjacent property. This area needs to be re-inspected after improvements are made.

SUBJECT: Hanson Permanente Quarry
County File # 2250-13-66-04PAM

DATE: March 5, 2007

The following observations and recommendations for the Hanson Permanente Quarry in Cupertino CA. are based on a site visit and inspection dated December 14, 2006.

BACKGROUND

For the background of the quarry please see the Cotton, Shires & Associates report for Hanson Permanente Quarry dated February 5, 2007.

INSPECTION NOTES

A. In the main pit area, there are several active landslides of varying magnitude. Mining activity is still taking place in the main pit. (Figure 1)

B. The overburden soil for the quarry has been placed in a large stockpile area designated as area A. Portions of this area have been graded to a finish slope angle and seeded where as the majority of the area remains in a stockpiled condition where slope angles are in excess of 2:1 horizontal to vertical. Visually, the stockpiles didn't appear to be compacted or keyed and they were not covered with any erosion control measures. (Figure 2)

C. The near by creek that runs adjacent to the quarry appeared to be clean at the point of inspection. Storm water from the quarry was transported via closed pipe to sedimentation ponds near the cement factory.

RECOMMENDATIONS

1. The slides and slope angles in the pit area should be addressed by the quarry's geotechnical consultant to establish safe working conditions.

2. The overburden placement area A should be addressed by the quarry's geotechnical consultant to determine it's stability. It was brought to our attention that minimal if any compaction efforts were made during the placement of this material. In addition, it is not apparent that any keying or benching was executed during the construction of this area.

3. An erosion control plan should be designed by the quarry's civil engineer and submitted to Land Development Engineering for review. This plan is especially important for area A. The storm water in

this area is allowed to run off into near by tributaries. Hydro seeding alone is not adequate erosion control.

SUBJECT: Lexington Quarry
County File # 3690-30-48-04PAM

DATE: March 5, 2007

The following observations and recommendations for the Lexington Quarry South of Los Gatos, CA. are based on a site visit and inspection dated December 20, 2006.

BACKGROUND

For the background information of the quarry please see the Cotton, Shires & Associates report for Freeman Quarry dated February 5, 2007.

INSPECTION NOTES

A. There are 2 sides of the quarry, the West side and the East side. The most Southerly portion of the West side is over steepened to well over a 1:1 slope horizontal to vertical. The slope also appears to be producing talus that is accumulating in the sedimentation basins below (Figure 1). The Sedimentation basins appear to be in poor condition. None of the slopes around the basins appeared to be engineered with compacted fill. At the time of inspection the slopes were recently seeded. With the condition of the slopes the seed put down may not germinate in place.

B. Visual inspection of the reclaimed area on the West side revealed a failure within the first 15' of the immediate bench (Figure 2) and various other locations where material is sloughing over the face of the slope. Drainage ditches did not appear to be installed at each bench to collect sheet flow drainage away from the reclaimed slopes. The planting appears to be growing on the benches but the slopes appear to be uncovered.

C. Behind the rock crushing facilities near the base of the East side of the quarry, there is a pond of water that the plant is using for recycling. An unknown oily substance was found that has collected in the water that needs to be evaluated and addressed. (Figure 3). It's possible that equipment maintenance may need to be done to prevent leaking of machine grease or oils.

D. Visual inspection of the East side slope has shown that there are drainage ruts along the slopes that are carrying sediment down the slopes. This could be an indication that water is not being contained to the bench and is allowed to flow over the face of the cut slope It also appears that soil is being pushed over the slopes. There is a large slope failure above the fourth bench from the bottom near the top of the hill (Figure 4). The Geotechnical consultant should address this.

E. Inspection of the area where Limekiln Creek begins to pass through the quarry appeared to be clean and clear of debris.

RECOMMENDATIONS

1. Steepness of the Southerly portion of the West side needs to be addressed by the Geotechnical Engineer and recommendations need to be provided to stabilize the slope.

2. Reconstruction of the sedimentation basins with engineered fill to a relative compaction recommended by the Geotechnical Engineer of record must be completed. These areas should then be reseeded.

3. Provide drainage ditches on the inboard side of the benches to prevent sheet flow from going onto the cut slopes.

4. The quarry's Geotechnical Consultant should address the unstable slopes on the East side and provide recommendations to stabilize the slope.

5. An erosion control plan must be designed by the Quarry's Civil Engineer or Geotechnical consultant and submitted to Land Development Engineering for review.

SUBJECT: Calaveras Quarry
County File # 2066-42-83-04PAM

DATE: March 5, 2007

The following observations and recommendations for the Calaveras Quarry in Milpitas CA. are based on a site visit and inspection dated October 31, 2006.

BACKGROUND

For the background of the quarry, please see the Cotton, Shires & Associates report for Calaveras Quarry dated February 5, 2007.

INSPECTION NOTES

A. The Quarry is currently closed and is no longer producing. The recent fire has revealed some concerns with respect to slope stability. These exist near the entrance of the quarry where slopes were left in excess of a 2:1 angle, horizontal to vertical. Some construction debris and loose material is present throughout the quarry and erosion within the quarry boundary is a concern.

RECOMMENDATIONS

1. Have the Geotechnical Engineer of record study the slope near the entrance and along the access road to the quarry to verify their stability. Provide recommendations to alleviate the issue if necessary.

2. The quarry operator should be performing annual maintenance with respect to erosion control and sediment runoff. The quarries Geotechnical consultant should be involved in recommendations regarding the removal of the large block waste that exists in the drainage basins.

3. An erosion control plan should be designed by the quarry's Civil Engineer or the Geotechnical consultant and submitted to the Land Development Engineering Department for review.

SUBJECT: Curtner Quarry
County File # 1988-39-87-04PAM

DATE: March 5, 2007

The following observations and recommendations for the Curtner Quarry in Milpitas, CA. are based on a site visit and inspection dated November 28, 2006.

BACKGROUND

For the background of the quarry please see the Cotton, Shires & Associates report for Curtner Quarry dated February 5, 2007.

INSPECTION NOTES

A. Inspections revealed large amounts of construction debris stockpiled in the mine pit area. It appeared to be concrete slabs and piers (Figure 1). There also exists a large staging area and stockpile of k-rail onsite. It didn't appear to be in use for quarry operations. The concrete debris is stockpiled near the rock crusher onsite. It's possible that the quarry is recycling material when the use permit doesn't allow the use.

B. Operations in the main pit area showed some steep slopes cut into the hill. (Figure 3)

RECOMMENDATIONS

1. It is recommend that the quarry operator remove all construction debris and stockpiled k-rail onsite. Inspections should verify that all material has been hauled off. Concrete is a hazardous material and should be taken care of properly.

2. Have the geotechnical engineer of record verify slope stability of the slopes in the main pit area and provide recommendations if necessary.

3. An erosion control plan should be designed by the quarry's Civil Engineer or the Geotechnical consultant and submitted to the Land Development Department for review.

COUNTY OF SANTA CLARA
DEH - HMCD REPORT
FOR CLEAN WATER PROGRAM
ANNUAL REPORT FY 07

MEMORANDUM

TO: **Steve Homan**
FROM: **Jim Blamey**
DATE: **June 29, 2007**

SUBJECT: **Clean Water Program Annual Report (Non-Point Source Program)**

Santa Clara County
Department of Environmental Health
Hazardous Materials Program – Inspection Unit

Training:

The Hazardous Materials Compliance Division did not receive any training directly related to the protection of surface water or storm water quality from the Clean Water Program during FY 07.

Hazardous Materials Specialists (HMS) receives on-going training in a variety of hazardous materials program areas that indirectly are related to the Clean Water Program. The first Tuesday of every month the Santa Clara County Fire Chief's Hazardous Materials Subcommittee provides a training forum for inspectors from different programs and geographic areas. In addition, HMS staff receives training from other sources (State, Local Agencies, private companies, etc.) as the training becomes available. Some of the training staff has received this year includes:

Hazwoper Refresher:	Required safety training	8 hours
Solar Systems	Industry training on hazards	2 hours
UST Line Leak Detectors	Industry training of how systems operate	2 hours
Safety Seminar:	Variety of different safety subjects	4 hours
Hazardous Waste Laws	Review of new laws and regulations	4 hours
Epitaxial Reactor Process	New chemicals/ and safety training	2 hours
Inspector Roundtables:	Issues related to HazMat use & disposal	8 hours

Annually, the Hazardous Materials Specialist's attend the Certified Unified Program Agency (CUPA) conference. This conference is attended by jurisdiction from all over the State and is used to promote consistency, coordination and consolidation of regulatory matters related to hazardous materials and hazardous waste. This week long training typically has tracks/topics related to enforcement, underground storage tanks, hazardous materials/waste, and other relevant subjects. Staff also participated in roundtable

discussions where state, federal and local regulators scrutinize current practices and propose improvement on how the laws and regulations can be implemented.

Program Evaluation:

Over the past year, the Department of Environmental Health, along with other County government agencies and the District Attorney's Office have worked together in a task force to correct illegal activities (zoning, building, illegal disposal, etc.) that have occurred at particular sites throughout the county. This task force has been successful in correct many violations and protecting the environment from contamination. This task force meets monthly to discuss individual sites and methods for obtaining compliance.

Businesses that failed to comply with applicable environmental laws or regulations were prosecuted either through the Hazardous Materials Program - Administrative Enforcement program or the cases were referred to the District Attorneys Hazardous Materials Unit. Over the past year, the Department has successfully prosecuted several individuals or corporations for repeated violations of applicable laws or regulations.

The Hazardous Materials Program is always looking for ways to become more efficient and consistent in its inspection programs. In FY07, the Hazardous Materials Program will be piloting a computerized field based inspection program. Records of inspections will be done electronically and the reports automatically recorded in the Departments data system. In addition, the inspectors will have access to the Web where they will be able to easily access forms, applications, guidelines, databases and other useful information for the business operator.

The single biggest issue for the Hazardous Materials Program inspection staff continues to be adequate training in the issues, laws, regulations, etc. related to the Clean Water Program. The lack of training in this program continues to hamper the ability of the inspectors to provide the program with detailed inspection data and to assist the businesses in complying with program requirements.

San Jose, CA 95110

COUNTY OF SANTA CLARA
DEPARTMENT OF ROADS AND AIRPORTS REPORT
FOR CLEAN WATER PROGRAM
ANNUAL REPORT FY 07

Self-Evaluation Document for the FY 07 CWP Program Annual Report

The County Department of Roads and Airports participates in the Clean Water Program in a number of ways:

1) The department follows Maintenance Yard and field work BMPs, and has adopted SOPs.

2) Storm Water Pollution Prevention Plans (SWPPPs) have been written and are referenced in the departmental maintenance yards. (The East and West Yards are within the NPDES Permit zone.)

3) The department is using NPDES Permit C3 requirements to design storm water treatment for C3-eligible new and replacement impervious areas, such expressway widening within the NPDES Permit area.

4). The department is utilizing additional water quality questions in CEQA review, as required by the NPDES Permit.

5) The department is working with the County IPM Coordinator to reduce and eliminate pesticides where practicable, including in new landscaping and roadside vegetation management. No pesticides or herbicides are applied without the prescription of a Licensed Pest Control Operator. None are purchased without approval of the County IPM Program Coordinator.

6) NOIs and SWPPPs are prepared and filed when the disturbed area of a proposed project will be 1 acre or more. Further, for those Group 1 projects in sensitive watersheds, hydrograph modification plan mitigations to control flow and prevent creek scour are included.

7) Effective 8/15/06 the C3 requirements were reduced to 10,000 square feet of new or replacement impervious area for Group 2B projects. Projects vary, but each project is carefully evaluated as to whether or not C3 requirements apply. FY07 projects have not involved adding significant amounts of new impermeable surfaces, as the more significant projects were multi-year projects begun in prior years.

8) The department is observing the Rural Public Works Performance Standards and with the assistance of the NPS Coordinator did develop specific SOPs.

9) Litter and trash are removed from public rights of way to a permitted sanitary landfill. Observed illegal dumping problems when not in the public right of way are referred to the DEH.

10) Street sweeping and storm drain maintenance records have been maintained for many years. These records are now made available annually in the form of a spread sheet.

11) The department provides water quality related training for its employees.

12) The department coordinates between design, construction, and maintenance to ensure C3 mitigations are properly monitored and maintained. The first C3 mitigation improvements were constructed in FY 06, and are expected to pass from the contractor to department maintenance in FY 07. At present, the mitigations installed consist of bioswales which are not yet due for a monitoring report.

Summary and Evaluation:

The Department of Roads and Airports believes that its staff members and their actions are effective in preventing storm water pollution in both the maintenance yard and construction site environments.

Managers, engineers, and maintenance staff have an increasing awareness of the need to prevent storm water pollution, the BMPs necessary to support that goal, and also of the C3 requirements for storm water treatment for certain impervious areas. Procedures are in place to ensure permit compliance and to give full consideration to storm water elements in each individual project.

The department is pleased to work cooperatively toward these goals with the County CWP Coordinator and the County IPM Coordinator. It is understood that continuous improvement in these areas is expected, to the maximum extent practicable.

The department has benefited from a variety of training resources, but especially appreciates the SCVURPPP-sponsored workshops.

In FY 08, the department looks forward to the challenges that may be encountered, and the satisfaction of achieving full compliance with stormwater regulations.

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 07 Annual Report

Attachment D2A - Rural Public Works O & M

Note: A Sr. Civil Engineer from the Department of Roads and Airports and a Sr. Project Manager from the Department of Parks and Recreation both actively participated in the committee that wrote the SCVURPPP Rural Public Works Performance Standard.

The two involved departments, Roads and Parks, have since adopted and incorporated the Performance Standard into their maintenance routines.

The Standard Operating Procedures (SOPs) for this performance standard have been written by both of the involved departments, and submitted to SFB-RWQCB staff previously. No difficulties have been reported by the involved departments in implementing and observing the standards.

Subject: County Nonpoint Source Pollution Control Annual Report FY07
Parks and Recreation Department Self Evaluation

The County of Santa Clara Parks and Recreation Department (Department) is pleased to offer this brief summary of our progress toward the goal of stormwater pollution prevention as it has been implemented thus far as part of our on-going park development, operations and maintenance efforts.

In addition to extensive staff training some of which is detailed below, the Department has initiated and reinforced several program elements to assure that potential sources of stormwater pollution are reduced to the maximum extent possible.

Daily Maintenance Operations

All large-scale maintenance activities involving heavy equipment, parts cleaning and repairs have been consolidated to our Central Yard facility for a number of years. There, most major activities take place indoors and every effort is made to eliminate any discharges to the environment that could reach or affect storm water drainage facilities.

Zero Discharge Wastewater Recycling
The equipment wash pad utilizes covered zero discharge wastewater recycling technology. For our existing discharge wastewater-recycling machine, the filters are changed regularly and oil is skimmed and collected for recycling. We are currently budgeting for a new machine to take advantage of the newer technology.

Upgraded Storage Facility
An upgraded storage facility has been completed, which enable the central yard facility to store equipment and supplies in a secure facility. This facility will enable staff to collect any waste fluids that may weep or leak from machinery effectively.

The Rural Public Works Performance Standards have been shared and embraced by the Department's field staff, who now brings stormwater pollution prevention strategies to assigned tasks as one of the "tools of the trade" necessary for being a Parks professional.

Project Planning and Construction

Careful consideration is given to all environmental impacts that could be created or impacted by project related activities. As stewards of the land, the Department is serious and proud of its roles related to resource conservation and preservation. In particular efforts are made to minimize grading, integrate tree planting, preserve heritage trees, utilize drip irrigation systems, and assume that remediation and new trail construction conform to modern standards. Some of those trail standards include out-sloping, rolling dips and using bio-technical methods for erosion control.

During project construction, the Department complies with RWQCB guidelines for soil conservation, erosion control and stability, continuously monitors all construction activities, and had no C3 qualified projects during the reporting period which reflects the department's focus on minimizing where possible the use of impervious surfacing.

All construction projects will now include a BMP sheet in the construction documents, whether or not the project is C3 qualified. The department also employs a full time construction inspector to monitor and ensure that contractors are following BMPs.

Department staff includes Heavy Equipment Operators. When projects are identified, a pre-construction evaluation of the job site is performed by staff project manager to identify areas that may require Storm Water BMPs. When the need is identified, a job plan is prepared to complete the project with a minimum impact on Storm Water runoff.

There were no park development projects meeting the threshold of Group 1 projects.

Community Involvement

The Department's Volunteer Program is involved in on going major creek clean up activities, including garbage and debris removal from parklands and streams, to enhance the natural experience and promote cleaner waterways. These are National River Cleanup Day in May, and California Coastal Cleanup Day in September. These events are held at two critical times of the year. The first, in Spring, helps by collecting the trash after storms have carried it from streets and residential areas into our local waterways and parks. The second cleanup, in the Fall, targets the shorelines after water levels have dropped exposing debris and making it accessible along shorelines. Last year, through these events, the department recruited over 2,000 volunteers; removed over 52,000 pounds of garbage and debris; and collected over 15,500 pounds of recyclable materials. This is a County Wide effort, and the departmental Volunteer Coordinator is one of three members of the Creek Connections Action Group (CCAG w/ representatives from Santa Clara Valley Water District, and City of San Jose), that coordinates the event throughout Santa Clara County.

The Department's Volunteer Program has instituted an Adopt a Trail program and Trail Crew Lead program which employs trail management techniques to reduce erosion and sediment transport thereby reducing the need for soil disturbance and trail tread maintenance. For every trail adopted under this program there is a Trail Crew Lead or liaison assigned to the group. These Trail Crew Lead volunteers must go through a rigorous training program to learn the proper techniques for trail building and maintenance. Through these trainings the program conveys the important message about soil types, erosion control issues, and environmental

impacts of trail construction and repair. These Trail Crew Leads then convey the message to all of the Adopt a Trail volunteers as well as all volunteers that help at Monthly Trail Day events. It's a win-win community model that helps to accomplish the objectives for protecting the region's water resources.

Staff Training

Parks staff attended a number of applicable training sessions, symposiums and workshops.

Third Annual Regional Integrated Pest Management (IPM) Conference
November 14, 2006
Attended by 6 Park Maintenance staff

2006 Annual IPM Workshop
November 28 and 29, 2006
Attended by 63 Park Maintenance Staff (25 on 11/28 and 28 on 11/29)

Invasive Weeds and Rare Plants of SCC
Maintenance annual Refresher
March 15, 22 and 29, 2007
Attended by 57 Park Maintenance Staff (16 on 3/15, 19 on 3/22 and 22 on 3/29)

2007 Wildlife Invasive Plants Symposium
January 30 and 31, 2007
Attended by 1 Natural Resource Management and on3e Interpretive Staff

Annual SCVURPPP New Development Workshop
June 14, 2007
Attended by 2 Construction Services staff (Capital Projects Manager & Construction Division Manager)

Storm Water Monitoring

Storm Water Drains
Five storm drains at Central Yard are protected by Oil and Sediment filters. The filters are replaced as needed or once a year at a minimum. The parking lot is mechanically swept every other week to reduce sediment runoff.

Permit and non-Permit Monitoring
The Department continues to monitor storm water from Almaden Quicksilver County Park in accordance with the storm water permit requirements. In addition, all park locations visually monitor storm water flows for any signs of unusual conditions.

The Santa Clara County Parks and Recreation Department is an active partner in protecting streams, creeks and waterways. We are proud of the efforts we undertake on a daily basis to minimize impacts to the environment, while we protect and preserve the lands that the public entrusts us to maintain, on their behalf, for current and future enjoyment.

SUBJECT: **NPDES Annual Report**

This report is submitted to meet the annual reporting requirements of the County's Phase I NPDES Storm Water Discharge Permit for FY 2007.

I have provided, as Attachment (1), "C3" reporting requirements information. In FY 2007 we initiated no new projects subject to the NPDES permit.

Capital Programs Division continues to emphasize compliance with the NPDES requirements, and the need for controlling storm water contamination from construction activity. Capital Programs has four projects currently in construction for which we have obtained a NPDES permit: Valley Specialty Center; New Crime Lab; Valley Health Center at Fair Oaks; and Valley Health Center Milpitas (Construction work on VHC Milpitas will commence in September 2007). We have received, and are enforcing, SWPPP for each project.

All of Capital Programs' Project Management and inspection staff have attended SWPPP training. We are vigilant in reviewing and critiquing Contractor SWPPP plans and monitoring Contractor-compliance with their plans. We are being good stewards of the environment, especially so considering our major role in managing the design and construction of County facilities.

With regards to BMP operations and maintenance, none of our recent projects are complete to the point where this would apply.

COUNTY OF SANTA CLARA CLEAN WATER PROGRAM

Activity	Permit Item Source	Tasks	Comments	Status	Responsible Party
C.3.b Development Project Approval Process -- Planning Procedures					
Ordinance Revision	C.3.b.2	Develop new ordinance incorporate C3. requirements	Wrote amendment to existing NPS ordinance to include Numeric Sizing Criteria requirements and maintenance for Group 1,2A, 2B, and HMP projects.	C3/HMP Ordinance adopted	CWP Prgm. Coord., Planning Office, County Counsel, Land Development Engineering.
Staff Training	C.3.b.3	Provide training opportunities for County staff in the planning office, building inspection office, and land development engineering with training on the C.3. provisions including SCVURPPP sponsored and RWQCB sponsored workshops	Written guidance, staff meetings SCVURPPP workshops, in-service training.	Ongoing	CWP Prgm. Coord., Planning, Building, FAF, LDE
C.3.c. Requirements for Group 1 and Group 2 Projects					
Guidance Manual	C.3.c.4	Review Guidance Manual developed by Program and, if needed, customize for Group 1 projects.	Updated Guidance handouts written and supplied to PLN Office and LDE Section	Routine	CWP Coord., Planning, Building, LDE
Group 2 Alternative Project Size	C.3.c.8	Conduct analysis of alternative project size and prepare proposal for submittal to Regional Board. (Initial submittal to be handled by SCVURPPP/EOA Inc.	Continue to assist Program with data collection and analysis, as requested. Group 2B implemented on 8/15/2006	Ongoing Routine	Building Inspection, Planning Office, CWP Prgm. Coord.
Guidance Manual Update	C.3.c.9	Update Guidance Manual and Performance Standard for Group 2 projects as needed.	Assist Program with development and review, as requested.	As requested	

COUNTY OF SANTA CLARA CLEAN WATER PROGRAM

Activity	Permit Item Source	Tasks	Comments	Status	Responsible Party
C.3.e Operation and Maintenance of Treatment BMPs					
Data Form and Staff Training	C.3.e.1	Log information about treatment BMPs installed at approved Group 1 projects and maintain a list or database of properties, treatment BMPs, and responsible operators.	Review data collected and evaluate need to modify data collection method and need for additional staff training on tracking information.	Ongoing for AR	CWP Prgm. Coord., Planning, Building, LDE
BMP O&M Agreement Mechanism	C.3.e.2	Adapt model O&M agreement language to meet agency-specific needs and requirements and incorporate into the project review and approval process.	Recorded maint. agreement in NPS Ord. C3. /HMPRevision	Revised language planned for Fall 07	CWP Program Coord., Planning, County Counsel
BMP Inspection Program	C.3.e.5	Develop local programs for inspection of a subset of prioritized treatment BMPs to verify that proper O&M is being performed by the responsible party (Program to assist in defining which BMPs are priority for inspection.)	For Group 1, 2, 2A, 2B, and HMP projects, County working on developing written BMP inspection priority criteria and inspection and enforcement forms and procedures. (County will require private PE, RCE, maintenance inspection)	Now planned for Fall 07 Private P.E. inspection	LDE, CWP Prgm. Coord.
Reporting	C.3.e.6	Report on the County's treatment BMPs O&M verification program in each annual report, including organizational structure, evaluation of effectiveness, and planned improvement to the program. Include a list or summary of treatment BMPs inspected during the year, inspection results, and any required follow-up and correction.	Private PE or RCE inspection. Written Agreement, future recorded agreement.	Ongoing for AR	CWP Prgm. Coord., Planning, Building, LDE

COUNTY OF SANTA CLARA CLEAN WATER PROGRAM

Activity	Permit Item Source	Tasks	Comments	Status	Responsible Party
C.3.f Hydromodification Management Plan					
Staff training	C.3.f.3	Upon adoption by the Regional Board, begin implementation of HMP as part of requirements for Group 1 projects that may cause increased erosion or other related impacts.	Where applicable, HMP to be integrated into existing programs for development, review, construction inspection and BMP operations and maintenance. County staff to receive incremental training in HMP requirements.	LDE Section reviewing projects for HMP applicability	LDE, Building, Planning, FAF, Roads, Parks, CWP Prgm. Coord.
C.3.g (Waiver) Compensatory Mitigation Program					
Model Waiver Program for SCVURPPP	C.3.g.1	Develop a model waiver program.	Assist SCVURPPP by reviewing documents. <u>No County alternative compliance program is planned</u>.	Ongoing	CWP Coord., Planning Dir., Building Official, County Counsel, GSA, Parks Dir., Roads, Dir.,.
Local Waiver Program (Compensatory Mitigation)	C.3.g.2	Consider developing local waiver program, perform legal review, and incorporate waiver provisions in project review process. (If model program has not been adopted by Regional Board, consider developing interim waiver program per C.3.g.vi.). Provide info on waivers granted, if any.	Currently this is a very low priority. With large lot and parcel sizes, <u>there is currently no perceived need for a local alternative compliance program</u>.	No County alternative compliance program is planned	CWP Coord., Planning Dir., Building Official, County Counsel, FAF, Parks Dir., Roads, Dir.,

COUNTY OF SANTA CLARA CLEAN WATER PROGRAM

Activity	Permit Item Source	Tasks	Comments	Status	Responsible Party
Staff training and reporting	C.3.g.3	Begin tracking information for reporting on waivers granted, including project name, location, type, percent impervious surface, reasons for and terms of waiver, and the alternative benefit project and completion date.	If County adopts waiver program, responsible County staff will be trained on its implementation. Currently, developing a local waiver program is a very low priority.	As needed	CWP Coord., Planning Dir., Building Official, County Counsel, FAF, Parks Dir., Roads.
C.3.j Site Design Measures Guidance and Standards Development					
Policy and standards review	C.3.j.2	Review existing local design standards and guidance, and compare them to the list of areas to address in provision C.3.j. and other references such as "Start at the Source" and the "Development Policies Comparison" work sheet. Prepare and submit an analysis of local standards, identified opportunities for revision, and proposed revisions. (Program to prepare guidance for Co-permittees on this work product.)	County will focus on making sure BMP list is updated to be consistent with revised General Plan, any new ordinance requirements, C3. Numeric Sizing Criteria and the latest technical guidance documents such as the upcoming HMP, SCVURPPP "Guidance Manual," the "Using Start at the Source" manual. and the revised California BMP Handbooks.	Ongoing Routine	CWP Prgm. Coord., LDE, Planning, Roads, Fire Marshall, Parks, FAF
Standards Revisions	C.3.j.4	Incorporate any revised standards and guidance into local project approval process and "fully implement" the revised standards and guidance.	Any modification to required design standards will be done with input from Planning, Fire Marshall's Office, and other affected local agencies. (Reduced road width and other	Ongoing Routine	LDE, Fire Marshall, FAF, Roads, Parks

Activity	Permit Item Source	Tasks	Comments	Status	Responsible Party
			design standards (pervious paving, etc) are not the highest priority on large parcel single site SFD development with ample existing infiltration area and BMP installation areas available.		
C.3.k Source Control Measures					
Reporting	C.3.k.3	Implement source control measures requirements by including appropriate conditions of approval. Report status and provide examples of application of conditions in annual reports.	Report on source control BMPs required for particular projects. (The NPDES Permit seems to indicate that C3. items apply only to Group 1 and Group 2 projects; however, consideration of source control BMPs is appropriate for all projects.	Ongoing Routine	Planning, Building, CWP Coord., Roads, FAF, Parks, DEH
C.3.l Update General Plans					
General Plan Review	C.3.l.1	Review current General Plan policies related to water quality and watershed protection and incorporate additional policies as needed to implement C.3.	Depending on the content of the HMP, the County may need to modify the General Plan to incorporate new goals and policies. (Planning Office is continuing to work on a Riparian Protection Ordinance)	[Next sche-duled revision]	Planning Office, CWP Prgm. Coord.

COUNTY OF SANTA CLARA
CLEAN WATER PROGRAM
ANNUAL REPORT FY 07

CONSTRUCTION INSPECTION

The following report is based on the County Performance Standard for Construction Inspections:

1) The County ensures through a construction inspection program that construction contractors properly store, use, and dispose of construction materials, chemicals, and wastes at construction sites and prevent illicit discharges to storm drains and watercourses.

Building and Grading inspectors include these items in their inspection routine. Hazardous materials violation referrals are made to DEH--HMCD as appropriate.

2) For development projects with significant erosion potential and planned construction activity during the wet season the County ensures, through a construction inspection program, that erosion and/or sediment control measures are implemented in accordance with local ordinances and project conditions of approval and maintained as needed during construction.

The County Grading ordinance and Construction Inspectors require winterization and implementation of erosion control BMPs of projects that will continue into or start in the rainy season (after 10/15 through 4/15 each year). Ongoing inspections evaluate the effectiveness of control measures, and require changes and/or additions to BMPs where needed. Throughout the rainy season, inspectors continue to monitor construction sites, and shut down any projects where erosion control measures are inadequate. Grading Ordinance violators are also required to "winterize" their illegally graded sites.

3) The County inspects construction sites for adequacy of storm water quality control measures on a regular basis, with the frequency of inspections based on the size of the project and its potential impact on storm water quality.

Grading Inspectors continue to inspect all projects on a continuing basis, and endeavor to inspect sites with a high potential for erosion more frequently.

4) Prior to the beginning of the wet season each year, the County inspects all sites requiring erosion and/or sediment control plans, to ensure that measures have been taken to minimize discharges of sediment from disturbed areas.

This is the normal procedure for grading inspectors, and they have continued to require this throughout the past rainy season.

5) During the wet season of each year, the County inspects all construction sites requiring erosion and/or sediment control plans following each major storm event or series of events.

Grading inspectors try to inspect each active site with high erosion potential frequently, which includes the days following any major storm. In cases where they cannot get to every site, they prioritize and inspect those sites with the greatest erosion potential as soon after the rain as possible.

6) The County provides training annually to its construction inspection staff on inspection procedures, documentation, and enforcement related to storm water pollution prevention.

The County's Clean Water Program staff has worked closely with the grading inspectors and their supervisor, and problems are discussed as they arise. The inspectors are familiar with the goals of the NPS Program and refer problems to the NPS inspector when appropriate, and carry out enforcement action where necessary. The Construction Inspectors meet informally several times per week with the CWP Program Coordinator regarding enforcement needs and problems. Construction Inspectors have attended several erosion prevention and law enforcement classes.

7) The County provides outreach materials to contractors, developers, and County staff on construction BMPs and compliance with the State General Construction Activity Storm Water Permit.

Blueprint for a Clean Bay is available to applicants for building permits, and a county prepared handbook on erosion control measures is available from the CWP office. Trifolds for individuals and the construction trades are available near the building counter. NOI filing information and forms, as well as C3. and HMP handouts, are available at the Department of Planning and Development Lobby.

8) The County investigates and follows up thoroughly on grading violations, especially the ones with a high potential for erosion and sediment transport.

In FY 07, twenty-one properties within the NPDES Phase I Permit area were cited with grading ordinance violations. Official notices were sent to the property owners as orders to abate the violation, and notices of grading ordinance violation were recorded with the County Recorder. The property owners are ordered to abate the violations.

9) Official Notice Forms

New official notice forms for grading violations, grading warnings, and erosion violations were developed, for review during the Tetra Tech program revisit. Clean Water Program NPS Ordinance Violation forms have been used for over nine years.

County Integrated Waste Management Division Activities Related to Reduction of Nonpoint Source Pollution FY 07 For Clean Water Program Annual Report

Type of Activity	Description
Residential Garbage Collection Services	Weekly garbage collection services were provided to 18,000 unincorporated area households and all unincorporated area businesses.
Residential Recycling Collection Services	Provided weekly (13,854 households) or bi-weekly (4,902 households) recycling collection services. Beginning July 2007, all recycling except South County will be weekly. Recycling services provided to unincorporated area businesses vary per customer request.
Residential Yard Waste Services	Provided weekly yard wastes collection services to 13,854 households and bi-weekly services to 1,691 households. In South County unincorporated area, 3,211 residences received yard waste vouchers to provide for monthly drop off of yard wastes at San Martin Transfer Station. Beginning in July 2007, all yardwaste except South County will be collected weekly and will be containerized rather than on the street.
Residential used oil & used oil filter and household battery collection	Collected used oil & used oil filters and household batteries at curbside on a weekly basis from all unincorporated area neighborhoods (18,000 households served).
On-call disposal days	12,149 households were offered 2 days per year to set out extra waste or yard waste for collection at no added cost; 3,211 households received a voucher for one no cost drop-off at San Martin Transfer Station.
Special Cleanup Services and Events	4,110 households were served by special community cleanup events in their neighborhoods (different neighborhoods are served by this program each year). A total of 299 tons of waste and recyclable metals were collected. South County residents are now provided with vouchers for free drop-off at the San Martin Transfer Station annually.

Public Outreach Campaigns	A number of countywide public outreach campaigns were conducted through IWM including fluorescent bulb disposal education, "bring your own bag", reusable bag campaign and a source reduction, "Give the Experience" campaign encouraging people to reduce waste by giving tickets, gift cards, and experience type gifts for special occasions to reduce wrapping and other waste.
Public Outreach Events	Information on waste prevention, recycling, household hazardous waste management, home composting, and other environmental topics was provided at many local public outreach events, fairs and home and garden shows.
Public Outreach Information	The Countywide Recycling Hotline (1-800-533-8414) and Recycling Website (ReduceWaste.org) provided a wide range of waste reduction and recycling information to the public.
Newsletters	Unincorporated area residents received quarterly newsletters providing information on a variety of waste and recycling-related topics as well as bill inserts from haulers with pertinent information. The documents are produced collaboratively with hauler and IWM input.
Litter	Litter reduction and management information and tips are provided through various outreach materials. Additionally, IWM has an agreement with the Juvenile Probation department to pick up litter on a weekly basis. More detailed information is provided in the attached report.

COUNTY OF SANTA CLARA
GRAFFITI AND LITTER ABATEMENT (GALA)
FOR CLEAN WATER PROGRAM
ANNUAL REPORT FY 07

This report summarizes Graffiti and Litter Abatement (GALA) Program activities from July 1, 2006 through June 30, 2007.

Eradication

The Sunday Route Program, a collaborative effort between Integrated Waste Management and the Juvenile Probation Department, has been successful this past year in both graffiti and litter removal. GALA Program staff administer the program. The Juvenile Probation Department provides a group counselor to supervise a team of probationers in the removal of graffiti and litter most Sundays. In FY 2007, the Sunday Route crew painted out a total of 122 graffiti tags, accounting for 1,031 square feet of graffiti painted over. Additionally, the crew collected 1,514 bags of litter and 315 bags of recyclable materials from County roads. As a result of this program, 359 probationers were able to perform their community service hours. The Sunday Route Program, coupled with the swift response from the Roads and Airports Department, continues to provide the appropriate level of service needed to address current graffiti trends.

Great American Litter Pick Up

This year's Great American Litter Pick Up took place on May 19, 2007, and focused exclusively in the San Martin area. Forty three participants, including 18 cadets from the Sheriff's Academy picked up 40 cubic yards of litter and recyclable items. The clean up was followed by a celebratory barbecue at the San Martin Lions Club and was hosted by Supervisor Gage. This successful event came together through the collaborative efforts of Integrated Waste Management staff, the Office of the Sheriff, the Office of the District Attorney, the Office of Supervisor Don Gage, and the San Martin Neighborhood Alliance. South Valley Disposal and Recycling provided the 40 cubic yard bin.

Clean-Up Events

There were six hauler sponsored clean-ups that took place in FY 2007. Following is a table showing the results of these clean-up events. The first number following the date is the Garbage District that was served, followed by the Supervisorial District in which the clean-up took place. Next is the number of households served, and the total tons collected. All collected materials are taken back to the Materials Recovery Facility (MRF) and sorted, removing all recyclable materials before being landfilled.

Date	Garbage District	Households Served	Tons Collected
8/19/06	1	450	72.46
9/16/06	4	450	37.13
9/23/06	3A	1180	14.52
10/14/06	4	500	36.60
11/4/06	4	450	34.35
5/5/07	1	500	37.36
	Total	**3,530**	**232.42**

In FY 2008, there are clean-up events scheduled for all Garbage Districts beginning in August and running through the spring. Staff continues to coordinate with Board offices to confirm clean-up dates, and will distribute information to residents at the bin sites.

Per the franchise agreement, South County residents are provided with twelve yard waste vouchers and one disposal voucher per year. There is also an annual "recycling days" event in which residents may bring unlimited quantities of wood and metal items to be recycled.

Santa Clara County Litter Technical Advisory Committee (Litter TAC)

Staff attends quarterly meetings of the Santa Clara County Litter TAC and is a member of the Litter Control and Removal subcommittee. The members of the Litter TAC include multiple stakeholders and includes representatives from local government and law enforcement, VTA, CalTrans, the District Attorney's Office, local media, school districts, Santa Clara Valley Water District and more. The goals of the Litter TAC are:

- Establish countywide goals to decrease the amount of litter
- Establish a communication framework amongst the cities within the county to address litter hot spots
- Establish uniform enforcement standards among law enforcement agencies
- Establish a countywide education/media program,
- Establish a communication framework with private companies (solid waste companies, Union Pacific, etc.)
- Establish a countywide volunteer network

Enforcement

Staff continues to maintain a database of graffiti tags and shares information with the Sheriff's Office and the District Attorney's Office when requested.

Interagency Partnerships

IWM staff continues to work with the District Attorney's Office, the Probation Department and the Roads and Airports Department to address any litter and graffiti issues as they come up.

Staff serves on the Burbank Weed and Seed Steering Committee and attends monthly meetings. Weed and Seed is a federal grant for the Burbank community to weed out criminal activity and seed the area with resources and services that benefit the community.

The partnerships with the Probation Department and the Roads and Airports Department continue to be the most efficient way of abating graffiti and litter in unincorporated pocket areas. The Roads and Airports Department is responsive to calls for service, and the Sunday Route Program provides abatement services on a weekly basis when schedule permits.

Outcome of FY 2007 Performance Goals

Goal 1: Coordinate a minimum of five graffiti and litter abatement events.

Outcome: Coordinated seven events (including the Great American Litter Pick Up).

Goal 2: Coordinate 450 participants for graffiti and litter abatement.

Outcome: Coordinated 402 participants

Goal 3: Abate 5,000 square feet of graffiti

Outcome: Abated 1,031 square feet

Goal 4: Abate 375 graffiti tags

Outcome: Abated 122 graffiti tags

Goal 5: Collect 1,500 bags of litter and recycled materials

Outcome: Collected 1,829 bags of litter and recycled materials

Performance goals for FY 2008 are:

Goal 1: Coordinate a minimum of five graffiti and litter abatement events.

This goal has changed slightly from FY 2006 because clean up events are based on calendar years rather than fiscal years and is a better reflection of what actually occurs during a fiscal year.

Goal 2: Coordinate 350 participants for graffiti and litter abatement. This goal has been decreased by 100 due to the fact that the Probation Department is not able to provide the Sunday Route Program as often as in past years due to staffing shortages in Juvenile Hall.

Goal 3: Abate 2,500 square feet of graffiti.

This goal has been cut by 50% as graffiti does not seem to be as prevalent as years past.

Goal 4: Abate 100 graffiti tags.

This goal has been reduced as graffiti does not seem to be as prevalent as years past.

Goal 5: Collect 1,500 bags of litter and recycled materials.

This goal remains the same as last year.

COUNTY OF SANTA CLARA
GREEN BUSINESS PROGRAM REPORT
FOR CLEAN WATER PROGRAM
ANNUAL REPORT FY 07

This report summarizes the Santa Clara County Green Business Program activities from July 2006 through June 30, 2007.

Partners
All fifteen cities within Santa Clara County, the Santa Clara Valley Water District (SCVWD), Pacific Gas & Electric (PG&E), Association of Bay Area Governments (ABAG), Department of Toxic Substance Control (DTSC) and the Bay Area Air Quality Management District (BAAQMD)

Accomplishments
- 60 businesses certified/recertified in FY 07 bringing total certified to 159
- 127 newly enrolled businesses in FY 07
- Participants have undertaken numerous actions to reduce energy and water use and prevent waste and pollution

Local Accomplishments:
- Participating businesses are influencing employees, vendors and clients by demonstrating that businesses and consumers can make smart environmental choices in their everyday operations
- Public agencies certified: City of Cupertino Community Hall, City Hall and Library; City of Sunnyvale Civic Center and Library; Town of Los Altos Hills; and the Town of Los Gatos

Regional Accomplishments:
- All nine counties in the Bay Area are now participating in the Bay Area Green Business Program
- 1,000 business certified in the regional program
- Bay Area green Business Program celebrated 10 years
- Launched Postcard campaign in which postcards were developed for businesses to give out to their clients telling them what it means to be a Green Business – new tagline is *Bay Area Green Business Program - Environmental Values at Work*
- The Association of Bay Area Governments (ABAG) recognized all certified Public Agencies in the Bay Area in March 2007
- The California Green Business Program Network applied for a grant through the EPA to develop a measurement tool to better quantify impact of program and collect more data
- Updating and developing new industry-specific checklists as new rules and regulations arise

Pollution Prevention:
Assessments identified potential pollution sources and ways to reduce use of toxic materials. Businesses stenciled no dumping flows to bay on storm drain inlets on their property.

Next Steps

- Incorporate Strategic Priorities
- Leverage regional resources to enhance local efforts
- Conduct research on factors motivating business participation to support development of outreach and recruitment strategies
- Enhance website resources
- Simplify/streamline Green Business certification process
- Continue to nurture partnerships with cities, regulatory agencies, etc. to assist in implementation and business certifications
- Develop a measurement tool to quantify the impacts of implementing Green Business measures

Implementation Priorities

1. Increase the number of certified businesses countywide
2. Continue to conduct local outreach to educate the public on the GBP and the importance of patronizing certified green businesses

COUNTY OF SANTA CLARA
HOME COMPOSTING EDUCATION PROGRAM (HCEP)
ANNUAL REPORT FOR CLEAN WATER PROGRAM FY 07

This report summarizes the Home Composting Education Program activities from July 2006 through June 30, 2007.

Experts estimate that the average household that composts both yard and food waste will divert 579 pounds of waste per year. Home composting is a cost-effective way to recycle organic debris. We encourage participation in home composting with a flexible and diverse education program. The Master Composter volunteers share their knowledge to help residents be successful in making compost in their own yards.

Activities that have helped to prevent storm water pollution include:

- Distribution of *Bay Friendly Homeowner Guide, Soil Matters*, *Grasscycling, Grow It! The Less-Toxic Garden Control Pests & Plant Disease Using Less-Toxic Methods*. These publications encourage sustainable landscapes which reduce the amount of water, pesticides and herbicides use. Grasscycling also keeps grass clippings from washing into storm drains.
- Distribution at compost workshops and table displays *basic composting* and *worm composting* brochures encourage healthy soils which reduce water runoff.
- Compost use (commercially made and homemade) in the garden is encouraged to improve soil and less water and pesticide run-off.
- Worm composting classes encourage using redworms to recycle kitchen wastes instead of using the kitchen sink disposal or landfilling organics.
- School outreach program to encourage food waste recycling.
- Promotion of compost use, the IWMP department did a survey in FY06 of the unincorporated residents on their awareness of composting and the HCEP program. Some of these findings can be used as a baseline to sample again in the future.

PROGRAM HIGHLIGHTS

- **Volunteers**

  To date, 304 Master Composter (MC) volunteers have been certified to teach home composting. About 65 volunteers are currently active contributing through workshops and monthly meetings. (The ten-week training consists of 50 hours of classroom time and field trips). MCs are asked to perform at least 50 hours of outreach and education within Santa Clara County within one year of graduation.

  The next training class will be conducted January through March 2008.

  Total reported volunteer hours to date are 28,322 hours.

- **Workshops and Other Outreach**
  Workshops, worm composting classes, and events such as fairs, garden shows, special lectures, table displays and City Compost Bin Sales. Presentations on worm composting have been given at schools. Each participating classroom received a pound of redworms, a worm bin, and educational materials.

  In FY07 there were participants at our events as follows:
  - 29 special lectures with attendance of 2,450
  - 143 school presentations with attendance of 3,265
  - 63 compost workshops with attendance of 1,311
  - 10 teacher training with attendance of 118
  - 54 table displays with attendance of 11,500
  - 2,050 volunteer hours were donated during FY07

- **Compost Bin Sales**
  Earth Machine compost bins and wing-digger compost turning tools are for sale by appointment at the HCEP office at the County Service Center at 1553 Berger Drive. In FY07 228 Compost bins were sold, 123 wing diggers, 61 thermometers, 102 compost buckets and 303 worm bins.

  MCs assist cities with their bin sales. The Cities of Sunnyvale and Palo Alto offer residents the *Bio Stack* compost bin at a reduced price. The City of San Jose sells the *Bio Stack* and *Home Composter* compost bins, and two styles of worm bins at a reduced price.

- **Continuing Education for Master Composters**
  Education by expert guest speakers at Monthly Meetings
  Monthly Email/Print Newsletter
  Research / Resource Library
  Network with other counties programs
  Skills Survey

- **Demonstration Site**
  The MCs maintain a composting demonstration site at Prusch Park in San Jose with about a dozen different working compost bins that have been donated by manufacturers.

- **Advertising / Public Relations**
  The ReduceWaste.org website lists upcoming workshops. City Contacts help to promote HCEP workshops by purchasing advertising space in local papers. The program buys some advertising.

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 07 Annual Report

Attachment H - Pesticide Management Activities (Integrated Pest Management Program)

Notes:

1). The County of Santa Clara was the first local jurisdiction to hire a full time IPM Program Manager, and the first local jurisdiction to adopt an IPM Ordinance.

2). The IPM Program submits quarterly reports to the Housing Land Use and Transportation (HLUET) subcommittee of the Board of Supervisors.

3). The IPM Ordinance is available on the internet at:

http://www.sccgov.org/SCC/docs/scc_ordinance/TOC074.HTM

4). The County IPM Manager has co-sponsored annual pesticide use reduction conferences in past years. The FY 07 conference was co-sponsored by the SCVWD and the City of San Jose, with the County IPM Manager serving as registrar. The conference was held on November 14, 2006, in San Jose.

Background

As we enter the 21st century, we find ourselves at a critical point and with very little time – years, not generations – in which to undo environmental damage.

We must now think in terms of ***"sustained development"*** using and managing resources and the environment to maintain a strong economy and preserve a healthy environment today and in the years to come.

The most important challenge we face today is lack of significant integrated eco-system management solutions to the overall sustainability & quality of the environment. The scientific community does not fully understand the risks that synthetic pesticides pose to our environment and our health. Many problems await potential solutions, which will be evaluated and demonstrated. It may take years of research to uncover the answers. The economics of potential solutions are also under scrutiny. Lack of training is also often cited as an obstacle to the wider adoption of sustained development practices. This includes development and adoption of ***"Integrated Pest Management"*** (IPM) strategies.

Frequently the knowledge or technology supporting new pest management solutions is in its infancy, and the economics appear unacceptable.

Economic judgments at this early stage can be premature, and may prevent IPM practitioners from implementing the programs that may turn out to be economical in the long run. Both long and short-term perspectives are in the best interests of the public, toward reducing

"Often, when I have the opportunity to discuss the Santa Clara County's IPM Program effort, I am asked if the current mission of the IPM program that of reducing pesticide use, is a good one. In response I offer the following: ***We must approach pest control***

environmental impacts and increasing adoption of IPM practices.

This is a topic with important applications to local government practices, and to public agency personnel whose job it is to make the experience of public places safe, enjoyable and pest free. In the long-term, everyone benefits from a healthier environment.

***approach pest control as an integral component of our environment, our health, and our food safety. We must strive to assure our work meet defined standards, pursue quality improvement, and challenge excellence through continuous training & awareness in all aspects of integrated pest management." - Naresh Duggal*.**

Santa Clara County's IPM Program website provides a technical platform for the diverse group of Eco-System managers (such as county department's user groups as well as other public agencies, communities and industry) with access to information, tools and networks that maximize opportunities for pesticide reduction in Non-Crop Production Agriculture & Structural IPM Programs. It promotes pest prevention, minimize pesticide use and address issues that go beyond city or county boundaries.

All of us must do our part – government, industry, public interest groups, and individuals – at home, at school, at the workplace, while working, while playing, while traveling. It is time to re-examine our values, make thoughtful choices, and adjust our lifestyles to give more consideration to the environment. It is important for each one of us to act – not only for our children and ourselves, but also for future generations and for the other living things sharing the **EARTH** with us. We need to continue to work together.

The following sub-channels provide more details:

Committee Agenda Date : August 16, 2007

Agenda Item No. 7

County of Santa Clara
Office of the County Executive
Administration

HLUET−CE01 081607

Prepared by: Naresh Duggal
Program Manager

DATE: August 16, 2007

TO: Housing, Land Use, Environment, & Transportation Committee (HLUET)

FROM:

Gary A. Graves
Chief Deputy County Executive

SUBJECT:
Integrated Pest Management and Pesticide Use Ordinance −

Quarterly Status Report for the period of February '07− May'07

RECOMMENDED ACTION

Forward a favorable recommendation to the Board of Supervisors for the acceptance of the quarterly status report on the progress of implementation of the Integrated Pest Management and Pesticide Use Ordinance.

FISCAL IMPLICATIONS

There are no fiscal implications associated with acceptance of this report.

CONTRACT HISTORY

Not applicable.

REASONS FOR RECOMMENDATION

Departmental Activities − Adoption of Alternative Strategies

Department of Roads & Airport

− Reducing overall herbicide volume application − writing pesticide use recommendations (PCR) through field scouting and annual review of priority zones in Roads & Airports Right of Ways

− Reducing overall herbicide use through precision application technology; investments in pesticide volume reduction technologies e.g. Weedseeker; The department has upgraded one spray rigs, booms with Reduced Volume Technology − Weedseeker − this will allow 70−85% herbicide use reduction on Roads & Airports right of way weed control.

− Promoting inclusion of mulch on roadsides, intersections; the Department of Roads & Airport has completed first year of application of mulch in the median of county expressway; the ongoing annual program will consist of excavating existing dirt and weeds and mulching approximately 170,000 square feet of expressway median; this process will reduce herbicide spraying by approximately 50% more.

Department of Parks & Recreation

− The department plans to use mulch, sheet mulch and ground covers to control weeds in several new park renovations projects. The use of mulch will reduce the maintenance costs as well as reduce the herbicide use. The department is planning to purse grant opportunities from California Integrated Waste Management Board; grant release is due in Late July, 2007; no matching funds are required for this activity.

− The department has successfully completed their first drywood termite eradication using heat at the ranger office building at Ed Levin Park; an alternative form of pest control that involves safely raising the temperature of an affected area to a level no pest can survive. Aside from being an effective non−toxic pest control method, heat is unique in that it can be used to treat specific areas as well as entire structures. The affected area may be a wood beam, attic, entire home, hotel bed, large processing facility, or just about any area affected by unwanted pests. CENCAL a fully trained and licensed pest control company provided the patented TEMP−AIR® heat process.

− The department has entered third year of Yellow Jacket research in collaboration with UC Riverside. Expenses incurred by the department on labor and material will be reimbursed under a grant agreement between UC Riverside and Structural Pest Control Board.

− The historic barn (now a storage shed) at Ed−Levin park was also treated to control dry−wood termites using reduced risk borate treatment, replacement.

Department of Facilities and Fleet

− The department has commenced the use of rubber mulch; incorporating its use on the urban landscape areas within budgetary limits. The use of mulch will reduce the maintenance costs as well as less reliance on the post emergent. The department is planning to purse grant opportunities from California Integrated Waste Management Board; grant release is due in Late July, 2007; no matching funds are required for this activity.

− The department IPM coordinator is also taking proactive steps on follows ups related to structural maintenance, sanitation and housekeeping as observed and reported by the structural IPM contractor. This has also helped to alleviate many pest situations without opting for pesticide use.

− The department is considering conducting a need assessment study for urban turf and landscape; this will allow them to phase in various plant health care (PHC) projects over few years as permitted by the budget.

Budget Strategies for Implementation of IPM Technology

In order to include the use of IPM tools & techniques in on−going departmental activities, long−term strategies are necessary to promote transfer of existing funding to environmentally friendly technologies. While there are short−term start−up costs for any new technology, in the long run IPM has often proven to be more cost−effective than a strictly chemical control program. The County IPM Manager has discussed with the Department IPM Coordinators and Managers to plan ahead for FY07/08 on the issues facing them. The alternative technologies as adopted in FY006/07 reflect the success of adoption of some IPM technologies as mentioned above.

Status Report on Implementation Priorities

A. Pest Management and Facility Maintenance: Proactive & preventive facility maintenance is critical to mitigate chronic pest problems. Control measures such as sanitation, and building maintenance and modifications are strong elements of a structural IPM project. Eliminating or reducing sources of food, water, and harborage that are available to pests, and limiting pest access into and throughout buildings needs close attention. The Facility Managers and/or Department IPM Coordinators should review and follow up on the inspection reports and recommendations on pest activity and related sanitation, housekeeping and maintenance issues. "IPM Guide for Facility Managers", a companion manual to "SCC IPM Administrative Guidelines & Procedures" is now available as reference. The purpose of the guide is to present a sampling of techniques and procedures to illustrate the facilities management approach to pest control. All of the methods cited have been tried previously, and all have proved successful in real−world situations.

The County IPM Manager is closely monitoring the efficacy of control strategies to ensure that pest free environment is maintained for building occupants. The County IPM Manager is also conducting site−specific inspections, addressing issues related to sanitation, housekeeping, and building & landscape maintenance to mitigate pest problems. In the last two quarters, several pesky challenges were resolved using alternatives and/or limited use of least toxic pesticides. For example: bird mite control in office complex using vacuum, dehumidification and cleaning of bird nesting areas, removal of bird nest from window sills; use of bio−enzyme cleaners to clean drains and eliminate fly breeding; removing false flooring to eliminate rat harborage; improvements in garbage holding areas, removing leady waste containers etc. User groups have experienced the successful outcome of integrating various IPM tools and techniques. We are also investigating alternatives to structural fumigation to control localized infestation of dry−wood termites (e.g. Borate and Orange Oil treatments). On going chronic activity may warrant limited use of restricted (under the SCC IPM Ordinance) pesticides.

B. Ecological Urban Landscape Planning: Most Santa Clara County facilities already have established landscapes. Once immediate pest problems have been dealt with, the department landscape managers should be looking for ways to correct the underlying conditions that led to the problem. This might mean developing a long−term plan to replace problem plants, rebuild ground, redesign planters or make other changes as stated in the last report. The process of "designing in" good growing conditions should be implemented. In order to begin, the existing landscapes need to be evaluated, determine project life cycle costs, and a budgeting and implementation plan needs to be developed.

The department of Fleet and Facilities has commenced incorporating rubber mulch, bark mulch in urban landscapes and also planning to conduct study on complete landscape design and maintenance planning. The department is also participating in United States Green Building Council (USGBC) LEED certification for the new crime lab that will involve green concepts of urban landscapes. Steady improvements and adoption of eco−wise solutions with in budgetary limits will allow sustainability and overall success.

C. Pesticide Use Exemption: While we have achieved significant progress since the adoption of the IPM Ordinance, continued efforts are needed based on our experiences during the last four years. The following pesticide use exemptions per Section B28−5 have been granted during last quarters (February 06−May07). Please note that some of these exemptions are One Year Specific Use Exemptions and others are One Time Emergency use only:

1. Department of Facilities and Fleet for one−time specific use exemption under Section B28−5: use of the following pesticides applications to control weeds in urban landscapes around the county managed facilities:

− Scythe (Pelargonic acid) − Post−emergent contact herbicide − approved for specific use

The department plans to incorporate site enhancement/improvements, use of rubber mulch and bark mulch to prevent weed growth in the future.

2. Department of Social Service Agency for one−time specific use exemption under Section B28−5: use of the following pesticides applications to control weeds in urban landscapes around the county managed facility at Children Center:

− Scythe (Pelargonic acid) − Post−emergent contact herbicide − approved for specific use

3. Department of Parks & Recreation, for a one year Specific Use exemption under Section B28−5(b): The following products will be used as pre emergent vegetation management in P−1 (high priority) areas for example trail edges, parking lots, round edger, around facilities, camp grounds & fire pits in the Regional parks. P−1 areas are defined as the areas that may pose a fire hazard, or immediate safety risk if vegetation is not maintained in timely manner or the areas where vegetation is difficult to maintain by other means due to worker safety or other operational safety risk.

− Dimension Ultra 40WP (Dithiopyr) − Pre−emergent herbicide

− Scythe (Pelargonic acid) − Post−emergent contact herbicide

4. Department of Roads and Airports, for a one year Specific Use exemption under Section B28−5(b): The following products will be used as pre and post emergent vegetation management in P−1 (high priority) areas for example areas of right of ways with road safety and fire hazard related issues. The P−1 areas are defined as the areas that may pose a fire hazard or road safety, or immediate safety risk if vegetation is not maintained in timely manner or the areas where vegetation is difficult to maintain by other means due to worker safety or other operational safety risk. The proposed use

is more than 400 feet away of the general critical habitat areas or non−critical habitat sections.

− Roundup ProDry − (Glyphosate) Post−emergent contact herbicide − limited use application in selected areas

D. IPM Projects RFQ/RFP: The next round of various IPM projects RFQ/RFP's review process in underway; Structural IPM RFP review is completed is expected to be sent to the market in September, 2007. The procurement department in consultation with the county and department IPM coordinators, IPM−TAG and selection committee plans to finish procurement of all IPM projects by June 2008.

E. IPM Projects & Demonstrations aiming at Pesticide Use Reduction : The IPM projects & demonstrations reported earlier are now being implemented, providing sites where hands−on education about IPM is coupled with a relevant, "real−world" example.

The reports on each site visit are available to interested parties.

1. Yellow Jacket Abatement Control: The collaborative research work with scientists from the University of California, Riverside was implemented in May 2005 at Santa Teresa, Vasona and Hellyer parks covering approx. 150 acres. The third year study will commence in July 2007 and progress report to follow at the end of 2007.

The desired outcome of this project is the registration of insecticide bait that will be effective in the elimination of Yellow Jacket nests, and in Yellow Jacket traps and a strategic service/abatement protocol for the user groups. A successful project will potentially help alleviate this vexing problem in 27 regional parks of Santa Clara County, covering 50,000 acres, and could be expanded to urban turf & landscape areas in County owned complexes. It will also benefit other public agencies & public at large throughout California & even throughout the United States, if a successful Integrated Pest Management protocol and effective abatement strategy is developed with the registration of effective bait & lure traps.

2. KM AntPro Baiting System to Control Ants: In California urban environments, Argentine ants literally overrun homes and other structures in large numbers, so including some of the buildings managed by Santa Clara County. The IPM Program has worked actively with building managers to identify control strategies, and product formulations; however, these have not been as effective as desired. A new method of control, as proposed by one vendor, KM AntPro is under investigation.

A collaborative trial is implemented on April 29, 2007 at the South County Court facilities, with the help of KM AntPro system manufacturer and Orkin Extermination. The KM AntPro system manufacturer has offered 15 bait stations, boric acid bait and his assistance in training and implementation of the project at no cost. The Orkin service staff will provide the maintenance service through the existing contract.

A successful outcome could help alleviate this vexing problem in and around the County owned or managed facilities. Initially, at time of purchase, AntPro bait stations may cost more than conventional bait stations, but when properly cared for, they will provide years of reliable service. Plus, AntPro's patented, focused delivery on demand and spoilage retardant reservoir features adds up to considerable long−term savings.

F. IPM Awareness, Education & Interactive Application:

1. Bay−Friendly Landscaping and Green Gardener Training Programs: The County IPM Manager in association with Santa Clara Valley Urban Runoff Pollution Prevention Program (SCVURPP) − Pesticide User Outreach Work Group is exploring Bay Friendly landscaping and gardening training programs. Two training programs are now available and are doing outreach to promote regional education. More progress on the subject will be reported in next quarterly report.

BACKGROUND

On May 21, 2002, Board adopted the Integrated Pest Management (IPM) and Pesticide Use Ordinance. The IPM Ordinance went into effect on June 20, 2002. As required by the ordinance, staff is to provide a quarterly status report to the Housing, Land Use, Environment, and Transportation Committee and then to the full Board for their review and comment. The Technical Advisory Group (TAG) has previously agreed to proceed on the implementation priorities summarized in this report.

CONSEQUENCES OF NEGATIVE ACTION

Not applicable

STEPS FOLLOWING APPROVAL

Staff will incorporate any comments or direction into a follow−up transmittal to the full Board of Supervisors.

Mercury Education Project

Mercury Grant
The County of Santa Clara Department of Environmental Health, Household Hazardous Waste Program(HHW) has been awarded a California Integrated Waste Management Board (CIWMB) grant to conduct an educational campaign and to collect mercury-containing waste. Some common household products that contain mercury include fluorescent lamps, fever thermometers, button batteries, as well as some switches and thermostats.

Mercury is a potent nerve toxin and persistent pollutant that will never go away. When mercury escapes into the environment, it is transported by air, rain or runoff and deposited in our creeks and Bay. It builds up in sediments at the bottom of water bodies, and over time, the mercury is passed up the food chain affecting fish, birds, animals and even humans.

This grant will fund a three year project that enables the County and cities to decrease the amount of mercury getting into the environment by raising public awareness and providing free drop-off programs for residents and small businesses.

For proper disposal of household hazardous waste and mercury-containing products please call (408) 299-7300 to arrange an appointment for a drop-off.

TO: Steve Homan, R.E.H.S., Coordinator
Clean Water Program

DATE: 7/13/2007

SUBJECT: Universal Waste Recycling

Listed below are the Universal Waste recycling totals from County facilities for the past fiscal year (July 1, 2006 to June 30, 2007) :

Fluorescent Bulbs	18,343 individual bulbs or 60,999 linear feet of lamps.
Lighting Ballasts	861 Pounds. All were non-PBC.
Batteries	7876 Pounds

The Universal Waste Program at Facilities and Fleet (FAF) is accomplished by having all Universal Waste lamps and ballasts returned from facilities maintained by FAF to the Berger Drive complex. All lamps and ballasts are taken to AERC in Hayward for recycle.

Batteries collected from all County Buildings excluding those in Parks and Recreation, Roads and Airports and Health and Hospitals are picked up from 20 consolidation locations Countywide and brought to the Berger Complex for sorting and recycling in the following methods. All NiCad batteries are boxed and shipped for no cost to RBRC recycling. All lead acid batteries are inventoried and either taken to Bobcat Battery Recycling, or returned to the selling vendor. All non-NiCad non-lead acid batteries are sorted and brought to Household Hazardous Waste events and paid for by Occupational Safety and Environmental Compliance Department. (OSEC)

All Universal Waste activities are accomplished as ancillary duties by the OSEC Environmental Compliance Specialist stationed at FAF.

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 07 Annual Report

Attachment J - Copper/Nickel

County of Santa Clara
Clean Water Program
DEVELOPMENT SERVICES OFFICE
DEPT. OF PLANNING AND DEVELOPMENT
70 West Hedding St., 7th Floor East Wing
San Jose, CA 95110

Jurisdiction: COUNTY OF SANTA CLARA CLEAN WATER PROGRAM

Ref-erence	Activity	CI Item Source	Tasks	Comments	Status	Responsible Party
Copper Action Plan Tasks						
CB-1	Vehicle Washing Operations	CAP	• Continue to distribute outreach materials on proper vehicle/equipment washing at County P&D Department counters and public events.		Ongoing	CWP Coord., Roads
			• Submit data regarding vehicle washing outreach activities. Provide an effectiveness evaluation in Annual Reports.		Ongoing	CWP Coord.
			• Require source control measures for Group 1 new development and redevelopment projects that will conduct vehicle/equipment washing and maintenance activities (consistent with Permit Provision C.3.k).		Ongoing	LDE, Roads, FAF
			• Continue to inspect industrial/ commercial auto related facilities that may also conduct vehicle/equipment washing. Ensure that BMPs for vehicle/equipment washing are implemented. Provide an effectiveness evaluation of inspection/compliance with BMPs consistent with enhanced reporting requirements.		Ongoing	DEH--HMCD
			Continue to maintain and inspect car wash systems for City vehicles at the corporation yards .		Ongoing	Roads

Jurisdiction: COUNTY OF SANTA CLARA CLEAN WATER PROGRAM

Ref-erence	Activity	CI Item Source	Tasks	Comments	Status	Responsible Party
			Encourage municipal staff to use certified mobile cleaners when contracting cleaning service.		Ongoing	CWP Coord., FAF
NPSCB-3	Industrial Copper Control	CAP	• Continue Industrial Inspection program, including identified industrial facilities. These may include plating and metal finishing facilities, vehicle service facilities and other permitted sites (consistent with enhanced reporting requirements).		Ongoing	DEH--HMCD
CB-6/7	Reducing Traffic Congestion/ Promoting Alternative Transportation	CAP	• Complete revision of and implement revised development site design standards related to transportation per Permit Provision C.3.j.	Rural and large lot suburban areas are not conducive to such measures. The SCV Transp. Authority (VTA) handles transit service in the uninc. area. Fifty year old land use policies and GP and zoning direct urban style development to the cities.	Under annual consider-ation	LDE, CWP Coord.
CB-8	Watershed assessment and protection	CAP	• Revise County's General Plan, as needed, at next scheduled update, based on recommendations from the *Development Policies Comparison Project* and Provision C.3.l. • Continue to implement any	Not necessary. Existing GP addresses water quality issues. County will review the matter at the next scheduled update	At next scheduled update	Planning Office

Stevens Creek Trash Assessment Cooperative Sites UNIINC. AREA

ID	Date	Location	Assessment Score		Recent Cleanup[1]	Adjacent Land Use[2]		Trash Source[3]			Three Most Prevalent Trash Types[4]			Estimated Volume of Trash Removed (if any)	Existing Management Actions	Recommended Management Actions and/or Future Evaluations
			KAB	RTA		1	2	1	2	3	1	2	3			
CL04	5/16/07	Stevens Creek - Moss Rock		31	Unknown	Park/Trail	Roadway	Litter – recreational areas	Illegal dumping	Litter – pedestrian	Glass	Miscellaneous	Plastic/styrofoam	2-3 cubic ft - 1 1/2 trash bags full	Site is cleaned by volunteers on occasion, but no specific schedule. Site is monitored by County Park staff.	Area is becoming more of a "party" spot with many broken beer bottles. Illegal dumping of yard waste from edge of parking lot. County park may want to consider posting "no dumping" signs or placement of concrete barriers further back from edge of creek bank to prevent direct dumping of yard waste into creek.

Rapid Trash Assessment Worksheet

Surface Water Ambient Monitoring Program, San Francisco Bay Regional Water Quality Control Board

WATERSHED/STREAM: Stevens Creek DATE/TIME: 5/16/2007
MONITORING GROUP, STAFF: Cari, Kristy, David SAMPLE ID: Moss Rock
SITE DESCRIPTION (Station Name, Number, etc.): CL04

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
1. Level of Trash	On first glance, no trash visible. Little or no trash (<10 pieces) evident when streambed and stream banks are closely examined for litter and debris, for instance by looking under leaves.	On first glance, little or no trash visible. After close inspection small levels of trash (10-50 pieces) evident in stream bank and streambed.	Trash is evident in low to medium levels (51-100 pieces) on first glance. Stream, bank surfaces, and riparian zone contain litter and debris. Evidence of site being used by people: scattered cans, bottles, food wrappers, blankets, clothing.	Trash distracts the eye on first glance. Stream, bank surfaces, and immediate riparian zone contain substantial levels of litter and debris (>100 pieces). Evidence of site being used frequently by people: many cans, bottles, and food wrappers, blankets, clothing.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
2. Actual Number of Trash Items Found	0 to 10 trash items found based on a trash assessment of a 100-foot stream reach.	11 to 50 trash items found based on a trash assessment of a 100-foot stream reach.	51 to 100 trash items found based on a trash assessment of a 100-foot stream reach.	Over 100 trash items found based on a trash assessment of a 100-foot stream reach.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
3. Threat to Aquatic Life	Trash, if any, is mostly paper or wood products or other biodegradable materials. Note: A large amount of rapidly biodegradable material like food waste creates high oxygen demand, and should not be scored as optimal.	Little or no (<10 pieces) transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts. Presence of settleable, degradable, and non-toxic debris such as glass or metal.	Medium prevalence (10-50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, Styrofoam, balloons, cigarette butts Larger deposits (< 50 pieces) of settleable debris such as glass or metal. Any evidence of clumps of deposited yard waste or leaf litter.	Large amount (>50 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, balloons, Styrofoam, cigarette butts; toxic items such as batteries, lighters, or spray cans; large clumps of yard waste or dumped leaf litter; or large amount (>50 pieces) of settleable glass or metal.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
4. Threat to Human Health	Trash contains no evidence of bacteria or virus hazards such as medical waste, diapers, pet or human waste. No evidence of toxic substances such as chemical containers or batteries. No ponded water for mosquito production. No evidence of puncture and laceration hazards such as broken glass or metal debris.	No bacteria or virus hazards or sources of toxic substances, but small presence (<10 pieces) of puncture and laceration hazards such as broken glass and metal debris. No presence of ponded water in trash items such as tires or containers that could facilitate mosquito production.	Presence of **any one** of the following: hypodermic needles or other medical waste; used diaper, pet waste, or human feces; any toxic substance such as chemical containers, batteries, or fluorescent light bulbs (mercury). Medium prevalence (10-50 pieces) of puncture hazards.	Presence of **more than one** of the items described in the marginal condition category, or high prevalence of any one item (e.g. greater than 50 puncture or laceration hazards).
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0

Rapid Trash Assessment Worksheet

Surface Water Ambient Monitoring Program, San Francisco Bay Regional Water Quality Control Board

	CONDITION CATEGORY			
Trash Assessment Parameter	**Optimal**	**Sub optimal**	**Marginal**	**Poor**
5. Illegal Dumping	D: No evidence of illegal dumping. No bags of trash, no yard waste, no household items placed at site to avoid proper disposal, no shopping carts.	D: Some evidence of illegal dumping. Limited vehicular access limits the amount of potential dumping, or material dumped is diffuse paper-based debris.	D: Presence of **one** of the following: furniture, appliances, shopping carts, bags of garbage or yard waste, coupled with vehicular access that facilitates in-and-out dumping of materials to avoid landfill costs.	D: Evidence of chronic dumping, with **more than one** of the following items: furniture, appliances, shopping carts, bags of garbage, or yard waste. Easy vehicular access for in-and-out dumping of materials to avoid landfill costs.
Illegal Littering	L: Any trash is incidental litter (< 5 pieces) or carried downstream from another location.	L: Some evidence of litter within creek and banks originating from adjacent land uses (<10 pieces).	L: Prevalent (10-50 pieces) in-stream or shoreline littering that appears to originate from adjacent land uses.	L: Large amount (>50 pieces) of litter within creek and on banks that appears to originate from adjacent land uses.
D-SCORE	10 9	8 7 6	5 4 3	2 1 0
L-SCORE	10 9	8 7 6	5 4 3	2 1 0
6. Accumulation of Trash	There does not appear to be a problem with trash accumulation from downstream transport. Trash, if any, appears to have been directly deposited at the stream location.	Some evidence (<10 pieces) that litter and debris have been transported from upstream areas to the location, based on evidence such as silt marks, faded colors or location near high water line.	Evidence that (10 to 50 pieces) trash is carried to the location from upstream, as evidenced by its location near high water line, siltation marks on the debris, or faded colors.	Trash appears to have accumulated in substantial quantities at the location based on delivery from upstream areas, and is in various states of degradation based on its persistence in the waterbody. Over 50 items of trash have been carried to the location from upstream.
SCORE	20 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0

Total Score ~~29~~ 31

SITE DEFINITION:

UPPER/LOWER BOUNDARIES OF REACH: 100 ft Downstream from the uppermost end of Moss Rock

HIGH WATER LINE: Edge of grass Line / Blackberry bramble

UPPER EXTENT OF BANKS OR SHORE: Top edge of Parking lot ~ 5 ft from edge of bank

NOTES:

about 2-3 cubic feet of trash removed (1 large garbage bag) Most prevalent was smashed beer bottles and hundreds of pieces, we couldn't even bag in the pick up.

COUNTY OF SANTA CLARA
CLEAN WATER PROGRAM
ANNUAL REPORT FY 07

Annual Food Facility Inspection Training Meeting--WV Cities, Cupertino, County and DEH--CPD

On April 30, 2007, the West Valley Cities Clean Water Program Coordinator, the Cupertino Director of Environmental Programs, and the County Clean Water Program Coordinator met with Humphrey Karioki, County DEH Consumer Protection Division (CPD) Supervisor. (The second supervisory position at DEH was at that time vacant.)

On odd numbered years, this meeting is held with the CPD Supervisors. On even numbered years, the training meeting is held with all CPD staff who work within the unincorporated area, and any other interested staff. The Agenda is below:

***

Urban Runoff Food Facility Inspection Program Annual Meeting

City of Cupertino
County of Santa Clara Dept. of Environmental Health
County of Santa Clara Clean Water Program
West Valley Clean Water Program

Cupertino City Hall
Conference Room "A", main level
10300 Torre Avenue
Cupertino, CA 95014

Agenda

1. Introductions and Contact Information - Update

2. Review Inspection Program – Discuss issues, trouble spots, feedback from inspectors, etc.

3. Referring Potential and Actual Violations - What to do About Repeat Offenders

4. Distribute Public Education Materials
    - Setting a Table for Pests Brochure
    - Pesticide Management – Specific Fact Sheets
    - Restaurant Owners Letter / BMP Checklist

5. Training Needs for Next Year

6. Adjourn

Attendance at the Bay Area Hydrology Model (BAHM) Computer Training Workshop

7/17/2007

Location: City of San Jose, 4 hours.

Darrell Wong, P.E., Assoc. Civil Engineer, Land Development Engineering

Ryan Fong, Assistant Civil Engineer, Land Development Engineering

Ed Duazo, Assistant Civil Engineer, Land Development Engineering

Dear Mr. Homan,

The City of Palo Alto Regional Water Quality Control Plant hereby submits the 2006-2007 Annual Storm Water Review for Stanford University. The water oversight plan for Stanford University has been managed by the City of Palo Alto since February 13, 1996. The City of Palo Alto continues to monitor the areas of Stanford campus which are identified in the water oversight plan letter (Attachment 1) including the areas covered under the Industrial Waste program.

Stanford has been cooperative and responsive to all water related issues. The RWQCP and Stanford continue to meet every two months to discuss water issues.

Enclosed you will find a table of all inspections including dates, areas visited, findings, and the actions taken by Stanford (Attachment 2). The annual report covers the time period from July 2006 to June 2007. Please refer to attachment 1 which identifies the areas of the Stanford University campus specified for oversight.

A Notice of Non-Compliance was issued on July 5, 2007 for construction related hazardous materials found at the Stock Farm Road and Oak Road Lay Down Yard during the June 27, 2007 annual storm water inspection. A follow-up inspection on June 29, 2007 confirmed that Stanford's Utility Division with Stanford's Environmental Health and Safety had responded and completed hazardous materials clean-up activities of the site. No other issues were observed during the 2006-2007 period.

If you would like to discuss this report further please call me at (650)329-2285 or Nina McNitzky at (650) 329-2518.

Sincerely,

Phil Bobel, Manager
Environmental Compliance Division

Storm Water Pollution Prevention Inspection Plan
Stanford University, Stanford, California

Stanford University
Storm Water Pollution Prevention Plan

I. General
   A. Annual review of SU's SWPPP.
   B. Maintenance of a separate RWQCP binder for updates.
   C. Standing agenda item for bi-monthly meetings. Minutes in binder.
   D. Running list of areas inspected and problems found and resolved.

II. Facilities Monitored
   A. Semi-Annual industrial waste inspections
      1. Chemistry Department
      2. Science and Engineering Quadrangle
      3. Center for Integrated Systems
      4. Stanford Hospital
      5. Hoover Hospital
      6. Central Energy Facility
      7. School of Medicine
   B. Vehicle Service Facilities
      1. Fleet Services
      2. Golf Course Maintenance
   C. Peninsula Sanitary Service Inc. (Household Recycling Facility)
   D. Food Service Facilities (By County Program)
   E. Red Barn (Equestrian Facility)
   F. Construction Sites
   G. Golf Course
   H. Environmental Health and Safety Facility (Incinerator)

III. General Grounds
   A. Campus divided into thirds.
   B. Each toured each three years.
   C. Tours prior to the rainy season

Attachment 2

Stanford University Storm Water Review 2006-2007

Date	Event	Location	Report Source	Findings	Actions Taken	Date Resolved	Responsible Party
7/25/07	Bi-Monthly Meeting	RWQCP	Nina McNitzky	Discussed sink signage required for laboratories.			
				Discussed updating new storm water agreement to include current campus description.			
				Campus construction Update.			
				Recap of Stock Farm Road and Oak Road Lay Down Yard clean-up.			
				County spraying and sampling at Boathing Tree Farm/ Creek.			
7/5/07	NON Letter	RWQCP	Ken Torke	Construction related hazardous materials found at Stock Farm Road and Oak Road Lay Down Yard.	Stanford's response letter details preventative measures, monthly monitoring activities and monitoring reports, on-site posting of contact information, and notification and response outreach given to construction companies. The preventative measures include Special Conditions SWPPP contract section for all campus contracts, designated site superviors for lay down yards, initial and periodic oversight by Stanford's environmental compliance group, and annual SWPPP training for campus construction project managers.	8/13/07	Tracy Ingebrigtsen / Jack Cleary
				Request for a plan of preventative measures and monitoring activities to be implemented for management of lay down yards.			
6/29/07	Storm Water Inspection / Tour	Stanford Campus	Nina McNitzky	Observed storm drain labels that were either missing or faded and illegible in some areas of the campus. The site shall replace the signage so that storm drains are clearly marked with the words "No dumping! Flows to Bay" or equivalent.	Stanford's Response: Work order has been submitted to the Stanford paint shop. The storm drains will be stenciled by August 31, 2007.	8/9/07	Tracy Ingebrigtsen
6/29/07	Storm Water Inspection / Tour	Water Dept Lay Down Yard	Nina McNitzky	Observed that the area had been cleared of improperly stored hazardous materials.	Stanford's Response: Hazardous materials were properly stored or disposed of by the afternoon of Wednesday, June 27, 2008.	8/9/07	Tracy Ingebrigtsen
6/29/07	Storm Water Inspection / Tour	Stock Farm Rd and Oak Rd Lay Down Yard	Nina McNitzky	Observed that the area had been cleared of most of the improperly stored hazardous materials. Only remaining containers on the roof of a storage bin were in good condition and scheduled for pick-up the next business day. Also, received follow-up email photos of this area to show that remaining containers had been properly disposed of and the area is completely clear of hazardous materials.	Stanford's Response: All hazardous materials located on the ground were cleaned up on Thursday, June 28, 2007. The hazardous materials stored on top of the large containers were removed on July 2, 2007. A small amount of latex paint that spilled onto the ground was cleaned up and disposed of properly.	8/9/07	Tracy Ingebrigtsen

Date	Event	Location	Report Source	Findings	Actions Taken	Date Resolved	Responsible Party
6/27/07	Storm Water Inspection / Tour	Stanford Campus	Nina McNitzky	Observed storm drain labels that were either missing or faded and illegible in some areas of the campus. The site shall replace the signage so that storm drains are clearly marked with the words "No dumping! Flows to Bay" or equivalent.	Stanford's Response: Work order has been submitted to the Stanford paint shop. The storm drains will be stenciled by August 31, 2007.	8/9/07	Tracy Ingebrigtsen
6/27/07	Storm Water Inspection / Tour	Knoll Building	Nina McNitzky	Observed an equipment lift discarded in the shrubs behind the building. The site shall remove the abandoned equipment.	Stanford's Response: The equipment lift will be removed and recycled as scrap metal by August 31, 2007.	8/9/07	Tracy Ingebrigtsen
6/27/07	Storm Water Inspection / Tour	Jerry Building	Nina McNitzky	Observed an unsecured CO2 gas cylinder stored behind the building. We recommend properly securing the cylinder for safe storage.	Stanford's Response: Kitchen staff have been asked to secure and properly store CO2 gas cylinders.	8/9/07	Tracy Ingebrigtsen
6/27/07	Storm Water Inspection / Tour	Enchanted Broccoli Forest Driveway	Nina McNitzky	Observed a tallow bin without secondary containment directly in front a storm drain that was missing a label. The site shall move the tallow bin away from the storm drain drainage path and secure it, or alternatively provide secondary containment for this tallow bin at this location.	Stanford's Response: The tallow bin will be relocated away from the storm drain. Kitchen staff will be trained in early September on proper tallow bin management and spill cleanup measures.	8/9/07	Tracy Ingebrigtsen
6/27/07	Storm Water Inspection / Tour	Lagunita Dining Area	Nina McNitzky	Observed a CRT monitor in the garbage enclosure. The site shall remove and properly dispose of the CRT monitor.	Stanford's Response: The CRT monitor has been disposed of properly.	8/9/07	Tracy Ingebrigtsen
6/27/07	Storm Water Inspection / Tour	Treat Building	Nina McNitzky	Observed a tallow bin that was not properly maintained. The site shall use appropriate BMP's in tallow bin management to protect the storm drains.	Stanford's Response: Kitchen staff will be trained in early September on proper kitchen/tallow bin management and spill cleanup measures.	8/9/07	Tracy Ingebrigtsen
6/27/07	Storm Water Inspection / Tour	Jenkins Building	Nina McNitzky	Observed a golf cart discarded in the shrubs behind the building. The site shall remove the abandoned equipment.	Stanford's Response: Golf cart has been reported as abandoned to the Santa Clara Sheriff's Office.	8/9/07	Tracy Ingebrigtsen
6/27/07	Storm Water Inspection / Tour	Avanti/ Middle Earth Building	Nina McNitzky	Observed oil change equipment in the rear driveway/ garbage enclosure, the pavement appeared clear of any oil residue. The site shall use appropriate BMP's to protect the storm drains and prevent a possible release from unauthorized oil change activities.	Stanford's Response: The oil change equipment has been disposed of properly. Students receive printed material at the start of the school year advising of proper car maintenance activities.	8/9/07	Tracy Ingebrigtsen

Date	Event	Location	Report Source	Findings	Actions Taken	Date Resolved	Responsible Party
6/27/07	Storm Water Inspection / Tour	Stock Farm Rd and Oak Rd Lay Down Yard	Nina McNitzky	Observed numerous open, damaged, and/or leaking containers of hazardous materials discarded and stored without primary or secondary containment. The site shall immediately secondarily contain and properly dispose of the hazardous materials. The site shall use appropriate BMP's to protect the storm drain system and prevent a possible prohibited release from improper management of hazardous materials and construction debris.	Stanford's Response: All hazardous materials located on the ground were cleaned up on Thursday, June 28, 2007. The hazardous materials stored on top of the large containers were removed on July 2, 2007. A small amount of latex paint that spilled onto the ground was cleaned up and disposed of properly.	8/9/07	Tracy Ingebrigtsen / Jack Cleary
6/27/07	Storm Water Inspection / Tour	Stanford Telecom-munications Lay Down Yard	Nina McNitzky	Observed three lead acid car batteries discarded near the inside gate without secondary containment. The site shall immediately secondarily contain and properly dispose of the hazardous materials. The site shall use appropriate BMP's to protect the storm drain system and prevent a possible prohibited release from improper management of hazardous materials.	Stanford's Response: The three lead acid car batteries have been properly disposed of and the new staff have been reminded of proper disposal methods.	8/9/07	Tracy Ingebrigtsen
6/27/07	Storm Water Inspection / Tour	Stanford Water Dept Lay Down Yard	Nina McNitzky	Observed well-maintained and segregated containment zones for construction dirt piles or debris storage.	No action required.		
6/27/07	Storm Water Inspection / Tour	Stanford Water Dept Lay Down Yard	Nina McNitzky	Observed numerous containers of oils and hydraulic fluids stored without secondary containment. The site shall immediately secondarily contain and properly store or dispose of the hazardous materials. The site shall use appropriate BMP's to protect the storm drain system and prevent a possible prohibited release from improper storage of hazardous materials and construction debris.	Stanford's Response: Hazardous materials were properly stored or disposed of by the afternoon of Wednesday, June 27, 2008.	8/9/07	Tracy Ingebrigtsen

Date	Event	Location	Report Source	Findings	Actions Taken	Date Resolved	Responsible Party
6/27/07	Storm Water Inspection / Tour	Colony Lay Down Yard (Fremont Road)	Nina McNitzky	Observed numerous containers of hazardous materials discarded without secondary containment. The site shall immediately secondarily contain and properly dispose of the hazardous materials. The site shall use appropriate BMP's to protect the storm drain system and prevent a possible prohibited release from improper disposal of hazardous materials.	Stanford's Response: The materials observed at this location were not waste. Colony staff have stored the materials in secondary containment, under cover. Staff have been reminded on how to properly stored hazardous materials.	8/9/07	Tracy Ingebrigtsen
6/27/07	Storm Water Inspection / Tour	Stanford Equestrian Center	Nina McNitzky	Observed well-maintained facilities with segregated areas clear of debris and good housekeeping of chemicals in the following areas: Equestrian Center Hay Storage Facility, Brick Barn, Covered Riding Ring, Stable, Little Stable, and Red Barn.			
6/27/07	Storm Water Inspection / Tour	Equestrian Center Hay Storage Facility	Nina McNitzky	Observed six 300 gallon liquid carboys that are not labeled of contents believed to be liquid horse feed. The site shall properly label these containers.	Stanford's Response: Carboys are filled with salt water. Staff will label the carboys.	8/9/07	Tracy Ingebrigtsen
6/27/07	Storm Water Inspection / Tour	Stanford Golf Facilities	Nina McNitzky	Observed well-maintained facilities with segregated areas clear of debris and good housekeeping of chemicals in the following areas: Golf Driving Range, Golf Pro Shop, Golf Club House, and Stanford Golf Course.

AN EQUAL OPPORTUNITY EMPLOYER

August 29, 2007

Mr. Bruce H. Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: Santa Clara Valley Water District Urban Runoff Management Program
FY 2006--2007 Annual Report of Pollution Prevention Activities

Dear Mr. Wolfe:

This report is submitted by the Santa Clara Valley Water District, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal stormwater NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2006-2007 (July 1, 2006 to June 30, 2007) in accordance with the Santa Clara Valley Water District's Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 1997, updated in October 2000, and again on September 1, 2004 and the performance standards contained therein.

Program Highlights and Accomplishments–Permit Required Activities

- The Emergency Response (ER) Program's performance was evaluated by four mechanisms during FY06-07. The results of these evaluations were as follows: (1) the Clean, Safe Creeks key performance indicator was met; (2) received a "Superior" rating (the highest rating possible) on the CEO scorecard; (3) the ER Program passed the quality and environmental recertification audit according to ISO 9000 and 14000 standards; and (4) ER Program achieved excellent awareness and use by District field staff.
- The District's School Outreach Program visited 156 public and private schools and 41 summer camps, reaching 22,571 students and 1,155 educators and conducted 14 teacher workshops during FY 06-07.
- Removed 8,897 cubic yards of trash and debris from local creeks through the various District trash removal programs.
- Responded to 107 incidents reported to the District's 24 hour per day, 7 day per week pollution hotline.
- District is collaborating with the City of San Jose to identify in-stream and regional solutions for smaller land development sites as an alternative means to comply with C3 provisions. The coordination meetings have been occurring on a nearly monthly basis. Considerable progress has been made in this collaborative effort including discussion of the formation of an assessment district for financial support.

Enhancements-Non Permit Required Activities

- Implemented and expanded pilot treatment systems to improve water quality and reduce methyl mercury in one lake and two reservoirs (Almaden and Guadalupe) in the Guadalupe River Watershed.
- This year the Stream Water Quality Unit and the District's Operations Planning and Analysis Unit undertook a study to evaluate the turbidity effects in a stream during the cleaning and reconditioning of stream hydrography gauges. The study was conducted in three creeks two in the jurisdictional area of the Central Coast Regional Water Quality Control Board, Bodfish Creek and Upper Llagas creek and one stream from the San Francisco Bay Regional Water Quality Control Board's jurisdiction, Los Gatos creek below Lexington Reservoir.
- The District participated in two creek cleanup events: Coastal Cleanup Day on September 16, 2006 and the National River Cleanup Day on May 19, 2007. During Coastal Cleanup Day, over 1,100 volunteers collected 22,464 pounds of trash and 5,503 pounds of

recyclables at 24 sites from 32 miles of streams. On National River Cleanup Day, 553 volunteers collected nearly 30,000 pounds of trash and 9,900 pounds of recyclables at 22 countywide sites.

Awards

- On the 5-year anniversary of adopting the change to Environmental Stewardship in the District Act, the 2nd CEO Environmental Stewardship Awards Ceremony recognized individuals who helped promote the Board's environmental stewardship goals and the CEO's vision of creating a District that is Cleaner, Greener, and Leaner. The Stream Water Quality Unit manager, Roger Narsim, was recognized for work on the filtration and detention basin to address three components 1) stormwater treatment, 2) HMP mitigation, and 3) Flood control peak mitigation at a new District facility.
- The San Francisco Bay Regional Water Quality Control Board (Regional Board) presented the District with a Watershed Stewardship Excellence Award – Recognition for Exceptional Watershed Stewardship and Legacy Mercury Pollution Control Efforts in the San Francisco Bay Area in September 2006.

The District would like to thank the Regional Board for acknowledging the District's efforts towards watershed stewardship and resource management.

Each of these activities is described in greater detail in the attached 2006-2007 Annual Report.

Continuous Improvement Activities

The District has identified two opportunities for continuous improvement that were included in the 2007-2008 District Work Plan.

1. Construction Administration Unit inspectors to be made aware of the need for greater inspection frequency.
2. SWQU to increase frequency of inspections at District Construction Sites.

Annual Report

The attached Annual Report provides an accurate representation of the implementation efforts of the District's Urban Runoff Management Plan and FY 06-07 work plan during the past fiscal year; an evaluation of the program results for continuous improvement activities; and information that can be shared with other Co-permittees, municipal decision-makers, and the public.

The table of contents of this report provides the outline of the Annual Report.

We appreciate the opportunity to provide you with this information on the work we have accomplished and we look forward to your comments. If you have any questions regarding the materials submitted or need additional information, please feel free to contact us.

Sincerely,

Roger Narsim, P.E., P.L.S.

INTRODUCTION

This is the Santa Clara Valley Water District (District) Urban Runoff Program's Fiscal Year (FY) 06-07 Annual Report (Annual Report). This Annual Report is prepared to comply with section *C.6* of Regional Board Order 01-024 and section *n* of Regional Board Order 01-119[1]. In their entirety these two Regional Board Orders comprise the Municipal Stormwater Permit (Permit). This Annual Report is to demonstrate and describe District compliance with the Permit.

The 2006-2007 Annual Report describes the actions taken to comply with the requirements of the Municipal Stormwater Permit. The Annual Report is formatted per instructions and template received from Regional Board staff.

Annual Report (AR)

The Regional Board has established a cycle of regulatory submittals that includes the District's annual Urban Runoff Work Plan (Work Plan) that is to be submitted by March 1 of each year. The Work Plan describes planned urban runoff activities for the upcoming fiscal year. The Annual Report provides a description of completed Work Plan elements and must be submitted by September 15 each year.

The Santa Clara Valley Water District's (District) Urban Runoff Program (DURP) completed several vital tasks during the 2006-2007 fiscal year (FY 06-07). The Stream Water Quality Unit this year focused on four main objectives; 1) The expansion of the Water Quality Index pilot program to rate the water quality at several locations in the Guadalupe, Coyote and Stevens Creek watersheds 2) Sampling of Lake Almaden, Coyote, Calero, Chesbro, Uvas, Guadalupe, Stevens Creek, Lexington, and Almaden Reservoirs for ammonia, sulfate, nitrate, phosphorous, mercury, and methyl mercury; and 3) the continued study of mercury and methyl mercury processes in the Guadalupe watershed.

The DURP includes both an area-wide component and an agency specific component. The area wide component is achieved through participation in the Santa Clara Valley Urban Runoff Pollution Prevention Program (Program) which is a collaborative effort by 15 agencies, including the District. The agency specific component of the Urban Runoff Program targets District activities and facilities that are potential sources, or potential receptors, of non-point source pollution. These activities include construction of capital improvements for flood control and water supply, channel maintenance, facility maintenance, and water utility operation and maintenance. Other sources of stormwater pollution, which are not associated with District activities, include illicit connections to storm drains, and illegal or accidental dumping or discharges on District facilities and waterways.

Santa Clara Valley Water District Organization

The mission of the District is a healthy, safe and enhanced quality of living in Santa Clara County through watershed stewardship and comprehensive management of water resources in a practical, cost-effective and environmentally sensitive manner.

Readers are encouraged to read the FY03-04 AR for further information about the District.

Structure of Report

The Annual Report follows the format and instructions received from the Regional Board. The report includes three sections that describe 1) Program Highlights and Accomplishments 2) a

[1] Regional Board Order 01-119 revises section *C.3* (regarding runoff from new and redevelopment projects) of Regional Board Order 01-024.

Summary of Continuous Improvement Activities and 3) a series of attachments. Each attachment is consistent with the Work Plan submitted in March 2006.

PROGRAM HIGHLIGHTS AND ACCOMPLISHMENTS

The District's Urban Runoff Pollution Prevention Program (Program) completed numerous tasks during the 2006-2007 Fiscal Year. The details of these accomplishments are included in the attachments to this Annual Report. Some of the Program highlights are summarized below. The full description of the activity can be found by referencing the section number with the attachment.

1.1 Illicit Connection/Illegal Dumping (IC/ID) Elimination Activities (Attachment 1.1)

HIGHLIGHTS AND ACCOMPLISHMENTS

Emergency Response

The District addresses IC/ID incidents effectively through its watersheds' hazmat "Emergency Response" (ER) Program. This aggressive 24-7 program responds reactively to IC/ID incidents by providing referral and inter-agency cooperation and/or conducting field investigation and clean-up activities as appropriate. The ER Program may be contacted via the Pollution Hotline (1-888-510-5151) which is advertised on the District's internal and external websites as well as in occasional fliers and memos. The Hotline is also advertised on the Santa Clara Valley Pollution Prevention Program's website. The ER Team routinely responds to over 100 reported incidents per year as reported by District field workers, staff from other agencies, and members of the general public.

The ER Program is recognized as an effective and timely means of addressing acute contaminants that are illegally dumped or discharged to District lands and facilities. The Emergency Response Program's performance was evaluated by four mechanisms during FY06-07: (1) within the context of the District's Clean, Safe Creeks program (semi-annually); (2) by the District CEO's scorecard (quarterly); (3) by an external ISO 9000/14000 recertification audit (April 2007); and (4) by an internal effectiveness survey (February 2007). The results of these evaluations were as follows: (1) the Clean, Safe Creeks key performance indicator was met; (2) the program received a "Superior" rating (the highest rating possible) on the CEO scorecard based on phone and field response times; (3) the ER Program passed the quality and environmental recertification audit according to ISO 9000 and 14000 standards; and (4) ER Program has achieved excellent awareness and use by District field staff with a February 2007 survey finding that 91% of surveyed employees were aware of the program, 61% of respondents had used the hotline to report incidents in creeks, and at least 87% of respondents rated the hotline and response as easy to use, effective, and timely.

The District received and responded to a total of 107 emergency response reports throughout Santa Clara County during fiscal year 2006-2007. This total is down 12% from 122 reported in FY05-06. Of the 107 total incidents reported during FY06-07, 98 were within the jurisdiction of the San Francisco Bay Regional Board and the associated Santa Clara Municipal Stormwater Permit. 69 of the 98 required a field response by the one of the team members for source identification, clean up or evidence collection. The data from the emergency response reports indicates that Guadalupe River was once again the waterway with the greatest number of incidents with a total of 19 reports. Coyote Creek also a relatively high number (11) of incidents

reported. The predominant contaminants again were "Fuel/Oil" and "Chemical" with 22 and 27 reported incidents respectively – accounting for 46% of the total incidents between them. "Wastewater" surpassed "sewage" as the third most common contaminant – accounting for 12 of the incidents.

The majority of reports (50) this year again occurred within the limits of the City of San Jose. The cities of Santa Clara and Cupertino were a distant 2nd and 3rd with 9 and 8 respectively.

Water Resource Protection Ordinance Enforcement
On 2-28-07 a new Water Resource Protection Ordinance (Ordinance 06-01) went into effect and simultaneously repealed Ordinance 83-2. The new Water Resource Protection Ordinance establishes District permitting authority only over lands and facilities "owned, controlled, operated, or maintained by the District" and requires outside parties to obtain an encroachment permit for any modification to District facilities including but not limited to development activities. The District may issue an encroachment permit if it finds, based on substantial evidence, that the proposed modification conforms to requirements of the District Water Resources Protection Manual such that, among other things, it will not pollute or erode waterways.

1.2 Public Agency Activities (Attachment 1.2)

This category focuses on the District's access roads, levees, and storm drain systems. This category is also responsible for tracking of Water Utility facilities operation and maintenance. Key elements of the District's Activities include:

1. Rural Public Works
2. Storm Drain Operation & Maintenance
3. Water Utility Pollution Prevention Plan/Operations & Maintenance

Rural Public Works
The District has continued to emphasize to staff the importance of woody debris in the creeks for wildlife habitat and to facilitate the reduction of potential erosion and sediment challenges at various facilities by encouraging the creeks to remain in dynamic equilibrium.

Storm Drain System Operations & Maintenance
Annual refresher training was held on June 19, 2007. Six District staff attended the training.

Storm drain inspections and cleaning work orders continue to be distributed via the District's Maximo (field maintenance work order software) Preventative Maintenance Program for the three Water Treatment Plants. Each month facility maintenance staff automatically receive a computer generated work order to inspect all storm drains at their facility and have them cleaned as needed. The Stream Water Quality Unit has been performing storm drain inspections since FY 2005 at the Vasona Meter Shop, Corporation Yard, Headquarters and Administration Campus and the Blossom Hill Annex to ensure compliance with the Urban Runoff Management Plan.

Water Utility Pollution Prevention Plan/Operations & Maintenance
Annual refresher training was held on June 20, 2007. Twenty two District staff members who work with discharges or oversee discharges attended the training.

Staff completed program evaluation questionnaires following the training in June this year. We received 7 effectiveness evaluations from 22 attendees, which works out to 32% of attendees returning the questionnaires, which is a significant increase over last years 10%. From those questionnaires received, control measures and BMPs are being implemented properly during all discharges and are functioning effectively. Staff also indicated the annual training is very helpful and that the SWQU support for discharges and acting as the liason with the Regional Board has been great.

This year the Stream Water Quality Unit and the District's Operations Planning and Analysis Unit undertook a study to evaluate the turbidity effects in a stream during the cleaning and reconditioning of stream hydrography gauges. The goals of the this study were to determine 1) what kind of effect does stream gauge maintenance have on stream turbidity and 2) to develop potential BMP's to reduce the monitoring costs associated with turbidity monitoring during this maintenance activity. The study was conducted in three creeks two in the jurisdictional area of the Central Coast Regional Water Quality Control Board, Bodfish Creek and Upper Llagas creek and one stream from the San Francisco Bay Regional Water Quality Control Boards jurisdiction, Los Gatos creek below Lexington Reservoir. After background readings were taken the study consisted of several stream water quality unit staff being stationed downstream of the stream gauge at either 50, 100 and 200 feet or 100, 200, and 300 feet. The results indicate that the turbidity in the stream at times did reach approximately 90 NTUs, the streams recovered to background levels within an about an hour. The significance of this is that the impacts to the stream are limited in scope and likely much less detrimental to the health of the stream.
The Stream Water Quality Unit is planning to conduct one more experiment using a "Dirt Bag" on a more sensitive stream. Once this experiment is completed a short report will be forwarded to the San Francisco Regional Water Quality Control Board of our findings.

1.3 New Development Planning Procedures (Attachment 1.3)

Hydromodification Plan (HMP)

Upper Penitencia Creek

1. Collected data on Upper Penitencia Creek for continuous flow measurement for hydrologic and sediment transport modeling.
   a. Continuous flow measurement at Piedmont Road and at Berryessa Industrial Park.
   b. The data will be used to calibrate a continuous flow runoff model (HEC-HMS) for Penitencia Creek.
2. Geomorphic Survey, and Channel Stability Assessment.
   a. Collected a third year of suspended solids and bed load transport data for the winter to develop suspended sediment and bed load rating curves.

Berryessa Creek

1. This effort is similar to the Upper Penitencia Creek exercise. District staff has installed gauges on Berryessa Creek for continuous flow measurement.
   a. Continued to collect flow data measurements. Data is being collected upstream of Piedmont Road (which is the downstream end of the rural portion of the watershed) and at Hillview Road (which represents the combination of rural + urban watersheds).
   b. The data will be used to calibrate the continuous flow HEC-HMS model for Berryessa Creek.

2. Geomorphic Survey and Channel Stability.
   a. Continued the collection of suspended solids and bed load transport data during winter to develop a transport model.
   b. Extended the cross-sectional data collection to Hillview Road bridge downstream of 237/Calaveras Road. This captured the eroding reach where Berryessa Creek runs parallel to the railway tracks.

3. Provided a stable channel design for flood protection to the US Army Corp of Engineers. This has now become the preferred alternative. We were requested to provide this design after the previous alternative developed by the District and the US Army Corp of Engineers developed for flood protection was not well received by the residents.

Stevens Creek
Assisted with the 50 percent design through the Blackberry Farm area that realigns the creek to remove the fish barriers and hardscape, and provide the District credit for restoration of several thousand feet of creek restoration.

Ross Creek
Completed a stream restoration and erosion repair for 800 feet of creek downstream of Kirk. This has generated 15,000 square feet of mitigation credit. This demonstrates that stream restoration can generate mitigation credit that more than offsets additional costs incurred over traditional methods applied by the District.

Alamitos Creek
District completed a design for erosion repair at Alamitos Creek based on the longitudinal profile and cross-sectional data upstream and downstream of the Greystone Creek confluence. This alternative is expected to generate 7500 square feet of mitigation credit which offsets the additional costs of a geomorphic stream stabilization.

HMP – In-Stream/ Regional Projects Alternatives
Developed and presented "Draft Long Term Plan for Implementing Restoration/Rehab Projects" to SCVURPPP and the City of San Jose. This document includes some discussion of potential cost allocation scenarios for in-stream/regional projects in lieu of on-site improvements and potential on-site and in-stream combination for new development. In-stream regional solution is an alternative for those new developments and existing developments whose impacts are addressed only partially through on-site or off-site means. District staff continues to work the City of San Jose and the Program to identify potential sites.

1.4 Construction Inspection (Attachment 1.4)

The District continued to use the monthly inspection sheet developed in FY 02-03 to facilitate compliance and follow up inspections. The Stream Water Quality Unit continued to meet with the Construction Inspectors in the field to go over SWPPP implementation at construction sites. These field meetings proved very successful for several projects and will continue in FY 07-08.

Construction Administration Unit continues to use the Incident Response/Pollution Prevention Hotline to contact Stream Water Quality Unit staff to report construction sites that are creating sediment discharges.

In FY 06-07, the District had 8 Capital Improvement Projects (CIP) under construction that included 5 flood protection/channel improvement projects, 2 water treatment plant projects and the new water quality lab. SWQU assisted with review of CIP SWPPPs as requested.

Construction Inspection Training for 15 District staff was completed on March 27, 2007. Five staff from the Construction Engineering Unit (100%) and 10 staff from the Construction Inspection Unit (77%) attended the training.

Effectiveness evaluation questionnaires were distributed prior to the annual training. Six respondents encouraged SWQU to continue monthly email reminders, provide resources to enforce non-compliance and continue to assist with review of project SWPPPs as requested.

1.5 Public Information and Participation (PIP) Activities (Attachment 1.5)

The District serves a community of 1.7 million countywide and has excellent outreach programs to many sectors of the community. Key elements of the District's PIP Program include the Adopt-A-Creek Program providing outreach to creekside residents, creek clean up events supporting citizen participation, attendance at community events targeting the general public, numerous workshops presented by the Water Conservation Unit, and the School Outreach Program.

GENERAL OUTREACH
The District attended 25 community events during FY 06-07. A complete listing of all events is included in this section.

The District's website continues to be improved to provide continual updates to the community. During the winter season, the District's home page featured a link to flood-related information, the District's efforts to protect the waterways in the event of a flood, and sandbag distribution sites. Our on-line maintenance request form empowers citizens to report dumping or waterway-related problems, and allows them to send messages to the appropriate watershed staff. The site also includes a link to the Santa Clara Valley Urban Runoff Pollution Prevention Program.

TARGETED OUTREACH
Workshops
In May 2007, the District's Water Quality, Groundwater Management, Vegetation Management and Water Use Efficiency Units worked together with the Loma Prieta Resource Conservation District, the University of California Cooperative Extension and the United States Department of Agriculture Natural Resource Conservation Service to conduct the sixth annual Stewardship for Small Acreages – A Series of Workshops on Land Management for Clean Water. The goal was to provide rural landowners with the resources needed to protect both surface and ground water quality on and off their property. The series took rural landowners through the steps of assessing their properties and developing action plans to address the highest priority items. The workshops were held at various small acreage homes. The four sessions included: general topics such as watersheds and conservation plans, groundwater quality, wells, septic systems and hazardous household products; manure/waste management and composting; small vineyards; and fire safety, landscaping and erosion control. A total of 134 people attended the 4 sessions.

In March 2007, the Water Use Efficiency Unit conducted a four-part Water Efficient Landscaping Workshop Series. A total of 185 people attended the four sessions: Gardening with Natives, Selecting Plants for Your Water-Wise Garden, Water-Wise Garden Design, and Water Efficient Irrigation Design. In April, the District co-sponsored the "Fifth Annual Going Native Garden Tour", which spotlighted 45 homes in the South Bay providing examples of bird and butterfly friendly residential gardens that are both water-efficient and easy to maintain. The tour included a variety of gardens landscaped with native plants covering small to large lots, ranging from newly planted gardens to well established ones.

Media Campaign

The District conducted two outreach campaigns in FY 06-07: one on flood awareness and the other on water conservation. Both campaigns promoted the District's website where people could get urban runoff information and campaign information. The campaigns included the use of public service announcements, 10-second traffic radio spots for flood awareness and 60-second radio spots on flood awareness on English, Spanish and Vietnamese radio, targeted grassroots mailing to residents, community-based (including Spanish and Vietnamese) print advertisements, billboards, San Jose Mercury News print advertisements, and the Digitron billboard at Great America on Highway 101. Theater slides were also used in the flood awareness campaign.

Flood Safety Notice 2006 was mailed in October 2006 to 100,000 flood plain residents. Although the mailer's main focus was flood preparedness and safety, it also contained articles on healthy creek ecosystems, keeping debris out of creeks and illegal dumping. A copy is included in this section.

AquaFacts, the District's employee newsletter, continued this year as an online publication. AquaFacts contained 4 articles relating to stormwater pollution prevention and watershed education during FY 06-07.

An all employee Pollution Prevention Week email campaign was conducted September 18 through 24, 2006. Five emails were sent providing pollution prevention tips. Topics included: general pollution prevention week information, proper pesticide use and disposal, "Protecting Your Watershed", proper disposal of fluorescent bulbs and batteries, and fighting pollution on the road.

PBS television personality Huell Howser included the District in an episode of "California's Water," an Association of California Water Agencies sponsored series running of PBS stations throughout the state. For the episode on "Protecting Against Floods," the District was selected to represent how local agencies are taking the flood protection concept one step further with projects that integrate flood management with environmental enhancements and water quality improvements. The District's Downtown Guadalupe River Flood Protection Project was showcased as a carefully engineered project that provides flood protection for downtown San Jose and other neighborhoods and businesses while protecting habitat and greatly expanding the Guadalupe River Park with new trails, plazas and open space.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07

EDUCATIONAL OUTREACH

The District's educational outreach program serves a diverse population and responds to the needs of the schools throughout the County. Programming is consistent with State standards and regularly integrates messages and issues of other District communication programs. The District's School Outreach Program visited 156 public and private schools and 41 summer camps, reaching 22,571 students and 1,155 educators and conducted 14 teacher workshops during FY 06-07. The District offers a comprehensive education outreach program for early childhood, elementary, middle school, high school, and college-aged students to establish a foundation for understanding and appreciation of water resources.

The Coyote Creek Outdoor classroom encompasses land alongside Coyote Creek and includes a covered gazebo classroom for students and teachers, as well as a platform overlooking the creek where students can study the stream's natural habitat. Groundwater monitoring wells on site enable students to observe and evaluate the underground water table and understand how surface and groundwater interact. The site features two planting areas – one site close to the creek planted with native trees and shrubs to improve the stream's wildlife habitat, and a "high terrace" or upland area landscaped with oaks, grasses and other native plants to demonstrate drought-tolerant gardens. During the 2006-07 school year, the program provided 8 class tours for 214 students and 8 teachers.

Morley Park Outdoor Classroom in the City of Campbell provides the opportunity to teach students about the purpose of wetlands, urban runoff and the value of percolation ponds. During the 2006-07 school year, the program provided 1 tour for 36 students and 1 teacher.

CITIZEN PARTICIPATION

The District established the Adopt-A-Creek Program in 1994 to encourage residents of Santa Clara County to take an active role in helping to preserve the health and beauty of our local creeks. Due to staffing changes and shortages, Adopt-A-Creek permit information was not tracked this past year. In FY 06-07, 24 creek clean up events were conducted.

The District participated in two creek cleanup events: Coastal Cleanup Day on September 16, 2006 and the National River Cleanup Day on May 19, 2007. During Coastal Cleanup Day, over 1,100 volunteers collected 22,464 pounds of trash and 5,503 pounds of recyclables at 24 sites from 32 miles of streams. On National River Cleanup Day, 553 volunteers collected nearly 30,000 pounds of trash and 9,900 pounds of recyclables at 22 countywide sites.

In 2001, environmental stewardship was officially introduced as a third mission of the District. The Board of Directors, recognizing a need for the District charter to include environmental stewardship, worked with Senator Byron Sher to propose legislation to amend the District's 72-year-old chartering act. The bill, SB 449, provided for three amendments that clarified the District's ability to capitalize on the use of recycled water, added the responsibility of protecting the county from tidal flooding, and provided the authority to enhance, protect and restore streams, riparian corridors, and natural resources. That year, the District acknowledged individuals and organization that helped the District achieve its environmental stewardship goals. On the 5-year anniversary of adopting the change to Environmental Stewardship in the District Act, the 2nd CEO environmental Stewardship Awards Ceremony recognized individuals who helped promote the Board's environmental stewardship goals and the CEO's vision of

creating a District that is Cleaner, Greener, and Leaner. The following recipients were honored at the awards ceremony:

Adobe Creek Watershed Group	Alviso Water Task Force	Karen Scarborough
Ralph A. Qualls, Jr.	Trish Mulvey	SantaClaraCountyCreeks Coalition
Kathy Sutherland	Bob Hennessy	Luis Jaimes
Roger Narsim	Jae Abel	Ngoc Nguyen
Paul Thomas	Pat Showalter	Carol Preseley

GENERAL OUTREACH

The District feels that attendance at community events is an effective public outreach method. The individual contact made at the events allows staff to answer specific questions and deliver more extensive messages. A wide variety of information can be distributed and the games and displays are a good way to attract event participants.

TARGETED OUTREACH

The District's targeted outreach efforts provide in-depth training and information to a small, targeted audience with the opportunity to answer specific questions from individuals in the group. This method allows the District to assist targeted groups to meet regulatory requirements, change behaviors that impact water quality, and provide the knowledge needed for the group to solve any water quality problems they may be experiencing.

1.6 Pesticide Management Activities (Attachment 1.6)

The District uses pesticides as one of the tools for pest management on its properties and facilities. The primary category of pesticides used is herbicides. Insecticides and rodenticides are used in small quantities. In all cases, pesticide products are used only after an assessment has been made regarding environmental, economical, and public health aspects of each of the alternatives. The District has always been proactive and conservative in the use of pesticides.

The District continues to implement a pesticide policy and an "Approved Pesticide List." The District believes that use of the less toxic products is beneficial to the environment and the health and safety of employees. The District's annual pesticide use summary report for calendar year 2006 is included in this section as Table 6.1.

The District began implementation of the *arundo* mitigation program in 2002. The eradication program has increased the District's use of some pesticides. The cut stump method of application minimizes the potential for environmental impacts. The District currently has a program for monitoring the water quality impacts of this work type.

ALTERNATIVE PEST MANAGEMENT PRACTICES

The District continued to integrate mechanical harvesting and non-toxic dye colorants with the use of algaecides and herbicides to manage algae at percolation ponds.

TRAINING/CERTIFICATION

Continuing Education (CE) is required to maintain certification. Employees can obtain CEs through seminars sponsored by Pesticide Applicators Professional Association (PAPA), California Association of Pest Control Advisors (CAPCA), manufacturers and universities. CEs

are tracked by PAPA/CAPCA and records can be obtained from their websites. All District employees prepare an Employee Performance Plan and County Agricultural Commissioner and the State Department of Pesticide Regulations certification and training requirements are included in individual Performance Plans.

1.7 Mercury Pollution Prevention Activities & Copper/Nickel Action Plan (Attachment 1.7)

Mercury Removal Projects and Programs Completed and Underway

Stream Maintenance Program
In 2006, routine sediment removal maintenance resulted in the disposal of 91,815 cubic yards of material, with 13,482 of this total from the creeks in the upper portion of the Guadalupe River Watershed. The total mercury removed from the system was 43 kg, with 25 kg from the Guadalupe River Watershed.

Monitoring
The District has undertaken a monitoring program to evaluate water quality in Lake Almaden, Almaden Reservoir, Calero Reservoir, Guadalupe Reservoir and Stevens Creek Reservoir. Depth profile measurements of temperature, pH, conductivity, and dissolved oxygen were conducted monthly. In addition, water samples were collected from the epilimnion and hypolimnion for analyses of total and dissolved mercury, total and dissolved methyl mercury, ammonia, nitrate/nitrite, sulfate and phosphorus at Lake Almaden, Almaden Reservoir, and Guadalupe Reservoir. Samples were also collected from the epilimnion for analyses for chlorophyll a. The purpose of this monitoring is to establish existing water quality conditions and seasonal variability prior to the implementation of management changes to reservoir operations.

Mercury Control Program
In 2006, the District continued to implement three projects to control mercury in the Guadalupe River Watershed: Jacques Gulch Restoration, Lake Almaden Aeration, and Reservoir Oxygenation.

Jacques Gulch Restoration

Jacques Gulch is a tributary to Almaden Reservoir that drains approximately one-third of the reservoir watershed. A portion of this drainage includes a small tributary that drains a portion of the former New Almaden Mining District, which is now Almaden-Quicksilver County Park. The project will remove, cap, or control erosion of extensive mercury deposits in the tributary above it's confluence with Jacques Gulch, and in Jacques Gulch above it's confluence with Almaden Reservoir.

Lake Almaden Aeration

Lake Almaden is a former gravel quarry that lies at the confluence of Guadalupe Creek and Los Alamitos Creek that drain Guadalupe and Almaden Reservoirs, respectively. Below this confluence is the Guadalupe River. This lake provides recreational amenities to the community, including swimming, boating, and fishing. The Guadalupe River Watershed Mercury Study

identified the lake as a significant source of methyl mercury that bioaccumulates in fish within the lake and in fish downstream. In 2006, the District continued a monitoring and sampling program to evaluate the performance of a pilot treatment system using a solar-powered circulator (Solar Bee). Data collected during the summer of 2006 showed a 96% reduction in the methyl mercury concentrations measured in the treated portion of the lake as compared to 2005 data. Building on this success, a second circulator was installed in the lake in March 2007.

Reservoir Aeration

The Guadalupe River Watershed Mercury Study identified reservoirs as a significant source of methyl mercury that bioaccumulates in fish within the reservoirs and in downstream creeks. The study also demonstrated a correlation between the seasonal development of anoxia in the hypolimnion and increased methyl mercury concentrations. Building on the success of the Lake Almaden pilot project, the District installed three solar-powered circulators in Almaden Reservoir in April 2007. The District Board also approved the purchase of three solar-powered circulators for Guadalupe Reservoir, which are expected to be installed during the summer of 2007.

Watershed Stewardship Excellence Award
The San Francisco Bay Regional Water Quality Control Board (Regional Board) presented the District with a Watershed Stewardship Excellence Award – Recognition for Exceptional Watershed Stewardship and Legacy Mercury Pollution Control Efforts in the San Francisco bay Area in September 2006. The award was the result of the District's efforts to assist the Regional Board with development of the Total Maximum Daily Load (TMDL) for mercury in the Guadalupe River Watershed, and for taking the initiative to evaluate treatment alternatives to reduce methyl mercury in Lake Almaden.

1.8 Trash Program Evaluation

It continues to be very challenging for the District to identify individual responsible parties for many of the illegal dumping activities that occur in the creeks of the county. Since the District has no police powers and no land use authority our ability to penalize polluters and protect the environment proactively rather than retroactively is virtually non-existent outside of our extensive public and educational outreach activities. Homeless encampments are one of the primary sources of trash being directly deposited to the riparian corridor. With these limitations in mind the District dispatches maintenance crews to provide frequent and routine creek cleanup for trash, and debris, in District waterways. Some of this material is deposited in creek channels and constitutes illegal dumping but is not reported to District hazmat or code enforcement staff due to the inability to establish an individual source or responsible party. In the spring of 2006 the District formed an internal focus group made up of water quality and field maintenance staff and various managers to better strategize how to identify root causes and sources of trash and how to reduce the load of trash to the creeks. This group continues to meet several times a year to discuss potential options and structure devices to capture trash and not harm the numerous natural resources in our creeks. This group is an outcome of the District's ISO process.

The District continues to maintain three trash clean up programs which are 1) the Clean Safe Creek Outcome 1.4 Neighborhood creeks frequently inspected and cleaned of litter and graffiti;

2) Adopt-a-Creek program which allows individuals, service organizations or companies to adopt a section of creek and have there name posted along that section of creek; 3) unscheduled litter and debris removal associated with internal and external maintenance requests generated from the District's Internet website.

During FY 06-07, The District's previously described three programs collected and disposed of approximately 8,897 cubic yards of trash and debris from county waterways. Last year a total 10,248 cubic yards of trash and debris was removed. This year's breakdown by watershed is as follows; Guadalupe watershed 3,246 cubic yards (36%), Coyote watershed 2,165 cubic yards (24%), West Valley watershed 1,422 cubic yards (16%), Lower Peninsula watershed 1,196 cubic yards (13%), and Uvas Llagas watershed had 868 cubic yards (10%). The Guadalupe Watershed Good Neighbor Program continues to conduct monthly homeless encampment clean-up activities.

The watersheds most affected by homelessness and illegal dumping are the Guadalupe and Coyote. The District is constantly utilizing its limited staff and financial resources to clean up these areas. The District works closely with the City of San Jose on trash and homelessness issues that challenge both agencies. Annually the District and the City of San Jose clean up three large trash accumulation sections of the Coyote Creek or the Guadalupe River as part of a Trash Memorandum of Understanding between the City of San Jose and the District.

The District sent two groups to Los Angeles County this year to evaluate in-stream best management practices such as booms designed to capture trash in the channel additionally the most recent trip traveled with program staff to also evaluate end of outfall trash capture nets.

1.9 **Other Water Quality and Watershed Management Requirements** (Attachment 1.9)

This section captures other pollution prevention activities, many of which are unique to the District. These activities include:

1. Facility SWPPPs – Corporation Yard
2. Flood Control/Channel Maintenance Activities
3. Monitoring
4. Sediment Control
5. Watershed Measures
6. Continuous Improvement

Facility SWPPPs – Corporation Yard

BMPs were formally inspected quarterly during non-stormwater observations at all District facilities except Coyote and Pacheco Pump Stations. The pump stations do not warrant non-stormwater observations due to the low potential for these types of discharges to occur. The Corporation Yard culvert inlet protection device (constructed of cinderblocks filter fabric and washed gravels) was cleaned and reconstructed in the fall of 2006. This device is very effective at preventing a significant amount of sediment from reaching the Guadalupe River. Each fall the District removes several cubic yards of silty material that has been detained by the device.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07

Flood Control/Channel Maintenance Activities

The District maintains over 700 miles of stream channels to provide flood protection for the Santa Clara County communities. Under the Multi-Year Stream Maintenance Program (SMP) the District removes sediment, provides for erosion protection, and conducts vegetation management activities. Minor maintenance activities include trash removal, fence and access repair, maintenance of revegetation sites, and removal of downed trees or other blockages from the streams. During FY 06-07, the District removed 91,815 cubic yards of sediment and completed bank protection projects totaling 3,192 linear feet.

Annual SMP archeology awareness and BMP training was conducted on June 11, 2007 and 87% of District employees from the Watershed Field Operations Units, Watershed Program Support Units, Vegetation Management Unit, and Regulatory Compliance Unit received the training (79 employees).

BMP training evaluation forms were distributed during the training session and attendees were asked to complete them before leaving. All training sessions were rated excellent (32%) or good (68%) by the respondents. Suggestions for improving the training will be incorporated into next year's training.

The annual Internal Lessons Learned meeting was held on November 29, 2006 to discuss what went well and what was learned from the 2006 Stream Maintenance Program projects. The meeting reviewed the effectiveness of Best Management Practices (BMPs) and recommendations for their improvement.

BMP inspection checklists continued to be used for sediment removal and bank protection projects and for chemical and non-chemical vegetation management activities. The checklists provide documentation of BMP implementation at the SMP projects, inspection of the BMPs, and track any adjustments made to BMP implementation.

Coordinate Regional Monitoring Efforts of BASMAA, SCVURPPP, WMI, and District

The District Stream Water Quality Unit staff attended program and regional monitoring work group meetings including SCVURPPP Monitoring Ad-Hoc Work Group, BASMAA Monitoring Committee, WMI Assessment Subgroup meetings, and TMDL work group meetings (PCB, mercury, sediment), to identify opportunities for coordination and collaboration of monitoring activities. District staff participated in the Monitoring Ad Hoc Workgroup meetings and worked with the SCVURPPP Program to share monitoring data.

As the WMI moves from planning to implementation, the District continues to serve as a major stakeholder and leader in the WMI processes to provide a stakeholder forum, share information, provide networking opportunities, and facilitate funding support in advocating water resources issues for the Santa Clara Basin.

Major accomplishments included:

1. Provided debriefing on Solar Bee Mercury Removal efforts to pave the road for future support letters for grant funding.
2. Provided debriefing to WMI Land Use Subgroup on Stewardship Planning efforts to advocate the visions for the watersheds and better use of the information contained in the District's stewardship plans.

3. Facilitated the removal of "silver wash" washing machines from the water conservation rebate program, prevented toxic chemicals from entering the wastewater stream right from the source.
4. Played an important role to encourage City of San Jose to conduct a more thorough review of the impacts on groundwater resources for its Household Hazardous Waste Collection Facility.
5. Contributed to the planning of the June retreat for strengthening WMI's focus in its Watershed Action Plan implementation phase.
6. Led or supported several policy-level dialogues with the District Board of Directors, Environmental Advisory Committee and interested parties on Stream Protection, and Restoration. 7. Contributed to the collection of nearly 300 slides for the Developing in Watersheds presentation.
8. Staffed field trips showcasing District projects for the workshops hosted by the Land Use Subgroup.
9. Wrote an article for the District's internal newsletter to promote effective uses of the WMI functions.

Upper Penitencia Creek Limiting Factors Analysis
The District assisted with the Upper Penitencia Sediment Source and Management Practices Assessments by providing information on the operations of the diversion structures for the percolation ponds as well as by providing information on other water utility operations pertinent to Upper Penitencia creek. The District also provided significant information on the fisheries condition in the watershed.

Saratoga Creek Watershed Assessment
The District has provided funding and coordination for a fish scale analysis of the fish scales that were collected for the Saratoga Creek Watershed Assessment.

1.10 Staff Training Matrix (Attachment 1.10)

Numerous staff attended various training opportunities as detailed in the Training Section. The District feels it has met the training requirements.

Attachment 1.1
ILLICIT CONNECTION/ILLEGAL DUMPING (ICID) ELIMINATION ACTIVITIES

ILLICIT CONNECTION & ILLEGAL DUMPING ELIMINATION ACTIVITIES					
C.2.a. PS ICID-7	Effectiveness Evaluation	Conduct an annual effectiveness evaluation. District Staff who regularly interact with the Incident Response Program (IRP) will be asked to complete a questionnaire in the Spring of 2006. The questionnaire will ask for ideas for any improvements or changes that need to be made to the District's Incident Response Program. Results of the Questionnaires will be evaluated during the next ICID/Incident Response Program for incorporation into the ICP procedures.	Complete. The Emergency Response Program's performance was evaluated by four mechanisms during FY07: (1) within the context of the District's Clean, Safe Creeks program (semi-annually); (2) by the District CEO's scorecard (quarterly); (3) by an external ISO 9000/14000 recertification audit (April 2007); and (4) by an internal effectiveness survey (February 2007). District QEMS procedure and blank incident report are provided at the end of this section. The results of these evaluations were as follows: (1) the Clean, Safe Creeks key performance indicator was met; (2) the program received a "Superior" rating (the highest rating possible) on the CEO scorecard based on phone and field response times; (3) the ER Program passed the quality and environmental recertification audit	Annually June 07	SWQU ICID Team

[1] Notation is as follows: PS (Performance Standard), URMP (Urban Runoff Management Plan), NDII (New District Initiated Item), NPDES (NPDES Permit)

ILLICIT CONNECTION/ILLEGAL DUMPING ELIMINATION ACTIVITIES

Item Source[1]	Activity	FY2006-2007 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
C.6.a.ii PS ICID-6	Enhanced Reporting Requirements	Characterize as to report source, nature of report, location of the event, reported source of pollutants and follow-up investigation if needed.	The District's countywide ICID raw data contains incident data that has been characterized (see following charts) according to several parameters including: (1) pollutant type (2) watershed (3) and municipal jurisdiction. Enforcement actions are recorded on incident reports but remain applicable only in a small percentage of cases since responsible party identification is uncommon for incidents within the District's right of ways.	On-going	SWQU ICID Team

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
ILLICIT CONNECTION/ILLEGAL DUMPING ELIMINATION ACTIVITIES

Item Source[1]	Activity	FY2006-2007 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
C.6.a.ii. PS ICID-6	Enhanced Reporting Requirements	For any actual non-compliance or threatened non-compliance noted during the investigation of the report, the nature of follow up will be reported, through resolution on the noted issue, up to and including enforcement action.	Since District IC/ID response is reactive rather than proactive in nature nearly every incident constitutes a violation of District or city code and/or State discharge and water quality rules. However, most of the incidents are very small and/or are such that the perpetrator cannot be conclusively identified. Thus preventative or corrective follow up with the responsible party is usually impossible or impractical. Any cases where such follow-up - including enforcement – is possible is pursued by a “compliance order” letter and usually in support of more jurisdictionally appropriate action by municipal and/or County education and enforcement actions.	Sept 07	SWQU ICID Team

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR’S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year’s annual report.

REPORTING DATA

- The ICID incident response/pollution prevention program received 107 reported incidents in Santa Clara County, 98 of which occurred in that portion of Santa Clara that lies within SF Bay Regional Board jurisdiction. Of those 98 incidents, 69 required a field response.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
ILLICIT CONNECTION/ILLEGAL DUMPING ELIMINATION ACTIVITIES

- Types of pollutants and pollutant sources encountered this year (see associated graphics)
- Locations: both by municipality and by watershed (see associated graphics)

PROGRAM EVALUATION

Emergency Response

The District continues to focus significant resources in support of the ICID program. Key elements of the District's ICID program include a 24-hour, 7-day per week Pollution Prevention Hotline (1-888-510-5151); Hazardous material removal; and staff training. On-call response duties are rotated weekly among a 4-person response team. All of the responses are due to some form of illegal dumping activity on District property.

Ordinance Enforcement

On 2-28-07 a new Water Resource Protection Ordinance (Ordinance 06-01) went into effect and simultaneously repealed Ordinance 83-2. The new Water Resource Protection Ordinance establishes District permitting authority only over lands and facilities "owned, controlled, operated, or maintained by the District" and requires outside parties to obtain an encroachment permit for any modification to District facilities including but not limited to development activities. The District may issue an encroachment permit if it finds, based on substantial evidence, that the proposed modification conforms to requirements of the District Water Resources Protection Manual such that, among other things, it will not pollute or erode waterways. Violators may be served a written "compliance order" delivered in person or by US Mail to the person responsible for the violation. Following prescribed hearings the District Chief Executive Officer (CEO) may impose administrative penalties up to $1000 per day (not to exceed $100,000 in total) for continuing violations. In addition to financial penalties the District may recoup administrative costs - potentially including any abatement costs - incurred by the District with regard to the violation. Additionally, violations of the Water Resource Protection Ordinance are punishable as a misdemeanor and may also be enjoined by civil action.

Utilization of enforcement components within the Water Resource Protection Ordinance is often either impractical or unnecessary when dealing with illegal dumpers. This is because the parties responsible for illegal dumping can only rarely be identified and sometimes the cost of enforcement may exceed the cost of simply absorbing the clean-up expense. In the case of significant spills the responsible party, if they can be identified, is usually eager to implement clean-up activities in order to avoid prosecution under more serious municipal, county, state, and federal codes. In instances where an uncooperative responsible party can be identified, the District will implement ordinance provisions such as compliance orders and administrative penalties and costs as appropriate. Additionally, District

ordinance violation may be added to the list of violations prosecuted by the Santa Clara County District Attorney. During FY2007 no compliance orders, administrative penalties, administrative costs, civil actions, or misdemeanor prosecutions were brought against Ordinance 06-01 violators.

HIGHLIGHTS AND ACCOMPLISHMENTS

Emergency Response

The District addresses IC/ID incidents effectively through its watersheds' hazmat "Emergency Response" (ER) Program. This aggressive 24-7 program responds reactively to IC/ID incidents by providing referral and inter-agency cooperation and/or conducting field investigation and clean-up activities as appropriate. The ER Program may be contacted via the Pollution Hotline (1-888-510-5151) which is advertised on the District's internal and external websites as well as in occasional fliers and memos. The Hotline is also advertised on the Santa Clara Valley Pollution Prevention Program's website. The ER Team routinely responds to over 100 reported incidents per year as reported by District field workers, staff from other agencies, and members of the general public.

The ER Program is recognized as an effective and timely means of addressing acute contaminants that are illegally dumped or discharged to District lands and facilities. The Emergency Response Program's performance was evaluated by four mechanisms during FY07: (1) within the context of the District's Clean, Safe Creeks program (semi-annually); (2) by the District CEO's scorecard (quarterly); (3) by an external ISO 9000/14000 recertification audit (April 2007); and (4) by an internal effectiveness survey (February 2007). District QEMS procedure and blank incident report are provided at the end of this section. The results of these evaluations were as follows: (1) the Clean, Safe Creeks key performance indicator was met; (2) the program received a "Superior" rating (the highest rating possible) on the CEO scorecard based on phone and field response times; (3) the ER Program passed the quality and environmental recertification audit according to ISO 9000 and 14000 standards; and (4) ER Program has achieved excellent awareness and use by District field staff with a February 2007 survey finding that 91% of surveyed employees were aware of the program, 61% of respondents had used the hotline to report incidents in creeks, and at least 87% of respondents rated the hotline and response as easy to use, effective, and timely.

Additionally the ER Program received the highest performance rating on the District CEO's internal "scorecard" for all four quarters of 2007. Finally the ER Team achieved its "Clean, Safe Creeks" key performance indicator and was re-certified as ISO 9001 and 14001 compliant.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
ILLICIT CONNECTION/ILLEGAL DUMPING ELIMINATION ACTIVITIES

The District received and responded to a total of 107 emergency response reports throughout Santa Clara County during fiscal year 2006-2007. This total is down 12% from 122 reported in FY05-06. Of the 107 total incidents reported during FY06-07, 98 were within the jurisdiction of the San Francisco Bay Regional Board and the associated Santa Clara Municipal Stormwater Permit. 69 of the 98 required a field response by the one of the team members for source identification, clean up or evidence collection. The data from the emergency response reports indicates that Guadalupe River was once again the waterway with the greatest number of incidents with a total of 19 reports. Coyote Creek also a relatively high number (11) of incidents reported. Saratoga Creek, with 7, was the only other waterway that posted more than 5 incidents. Taken as entire watersheds the Guadalupe and Coyote Watersheds each received 31 reported incidents. West Valley, Lower Penitencia, and Uvas/Llagas watersheds reported 20, 15, and 10 incidents respectively. The predominant contaminants again were “Fuel/Oil” and “Chemical” with 22 and 27 reported incidents respectively – accounting for 46% of the total incidents between them. “Wastewater” surpassed “sewage” as the third most common contaminant – accounting for 12 of the incidents.

The majority of reports (50) this year again occurred within the limits of the City of San Jose. The cities of Santa Clara and Cupertino were a distant 2nd and 3rd with 9 and 8 respectively. The District records every response it receives. It is important for the District to be able to accurately track the number of reports. If the incident is outside of District jurisdiction (limited to its own lands and facilities – that being properties “owned, controlled, operated, or maintained by the District”) the District may forward the report information to the appropriate public agency yet still logs the report for our records - so it is important for the Regional Board to be aware that the total number of reports from all co-permittees as reported by the Program Manager may be artificially elevated due to double reporting of such cases (District + municipal). The District responded within the two hour target field response time, 100% of the time in 2006-2007 for all in-County incidents.

The GIS mapping of incidents the District intended for FY07 was initiated by identifying coordinates for historical incidents. Such coordinates will be rough since incidents’ locations have historically been reported by street intersection, address, creek street crossings.

Water Resource Protection Ordinance Enforcement

As previously reported there were no compliance orders, administrative penalties, administrative costs, civil actions, or misdemeanor prosecutions brought against Ordinance 06-01 violators during FY07. Additionally, District emergency responders continue to work cooperatively to assist investigations by law enforcement agents at the Department of Fish and Game and the District Attorney’s Office, as well as municipal and Regional Board code enforcement staff.

4. RESPONSE CATEGORY: PRIMARY RESPONDERS & URGENCY

RESPONSE CATEGORY: Select Response Code and District Field Arrival Urgency based on the incident conditions listed in the table below. The table below will assist the responder to realize when additional resources are needed and when to make appropriate notifications to the communication center[ii].

Pre-field Assessment:	Code: **Red**	District Field Arrival: **Urgent**
Field Recon Re-assessment:	Code: **Red**	District Field Arrival: **Urgent**

Note 1: *Initiate Emergency Response Sequence* by notifying County Communications (call: 299-2501, or 911) immediately upon notification or discovery of any incident posing and an immediate danger to PEP (People, Environment, Property)

Note 2: For all code Red, Orange, and Yellow Incidents within District jurisdiction complete Sections 2 (Hazards), 3, 4, and 5 of this form prior to site response activities. This will then serve as an *Incident-specific Emergency Response Plan*.

Category Code	Incident Conditions & Associated District Field Arrival		Primary Responder
	URGENT	**PRIORITY**	
Emergency Response to an Uncontrolled Release of Hazardous Substances			
Red	PEP Danger or Threat: Immediate	N/A	Fire Department
Orange	• PEP Threat: Confined • Team Resources: Insufficient	• PEP Threat: Secure - lidded containment in secure area. • Team Resources: Insufficient	Contractor
Yellow	• PEP Threat: Known and Confined • Team Resources: Sufficient	• PEP Threat: Known and Secure - lidded containment in secure area. • Team Resources: Sufficient	ER Team + Contractor for post-ER site clean-up and/or transport & disposal.
Maintenance Response to an Incidental Release of Hazardous Substances			
Green	• PEP Threat: None w/ Level D PPE	• PEP Threat: None • Confined incidental spill	ER Team
Maintenance Response to a Release of Nuisance Pollutants			
Blue	• PEP Threat: None	• Confined spill	ER Team + Contractor as needed

ER Team: Incident Response Record

5. RESPONSE PLAN

RESPONSE TYPE: ☐ EMERGENCY ☐ MAINTENANCE

5.A SITE PLANNING (only applicable for Emergency Response activities – Codes Red, Orange, and Yellow)[iii]

SAFE DISTANCE[iv] Per notification information: feet
Per site reconnaissance: feet

PLACE OF REFUGE Per Incident Command:

SITE SECURITY & CONTROL Describe perimeter barriers, warning signs, and human resources used to prevent intentional and accidental trespass into hazardous areas.

EVACUATION ROUTES Per Incident Command:

5.B ACTIVITY PLANNING

OBJECTIVES, METHODOLOGY, AND RESPONSIBILITY: For all responses complete the following table as necessary to plan and record incident response activities for both emergency and maintenance level response activities.

Action/ Objective	Method	Responsibility
Visual Recon		
Field Survey/Tests		
Sampling		
Migration Control		
Spill Control		
Chemical Stabilization		
Waste Clean-up		
Waste Containment		
Waste Removal		
Temporary Storage		
Transport		
Disposal		
Other		

PERSONAL PROTECTIVE (PPE) AND EMERGENCY EQUIPMENT (only applicable for Emergency Response activities – Codes Red, Orange, and Yellow)[v]. Do not exceed capabilities of PPE. Do not approach inhalation hazards without prior clearance from Public Emergency Response personnel who have determined the area safe through the use of air monitoring.

PPE SELECTION Describe PPE item and material selection. Use PPE according to manufacturer specifications.

DECONTAMINATION Describe decontamination technique/s, materials, rinsate capture (if any), and PPE item and decontamination material disposal.

6. NOTIFCATIONS[vi]

For all responses complete the following table as necessary to plan and record initiation of an emergency response sequence, emergency alerting, coordination with outside parties (applicable only to emergency responses) as well as lines of communication for all incident response (both emergency and maintenance level).

Department	Contact	Phone/Email	Notified by	Notified when

7. EMERGENCY MEDICAL TREATMENT[vii]

FOR A SERIOUS OR LIFE-THREATENING EMERGENCY:

- Dial 911
- Report the type of emergency (Medical, Fire, Police)
- Give the street address
- Building name and letter
- Floor number
- Stay on the line
- Provide information updates until released by 911 operator
- Send a coworker to meet and direct emergency responders to the scene.

WARNING!

Do not automatically transport an injured coworker (or allow them to self-transport) if there is any indication their condition might worsen or become life-threatening enroute. If in doubt, Dial 911. Contact Employee Services during working hours to notify the employee's emergency contact, or notify a member of the Incident Management Team (24-hour hotline: 265-2607, extension 2050) posted on District Bulletin Boards.

In an emergency, you or any employee may go to any suitable medical facility with an Emergency Room for treatment. Identify yourself as a District employee and have the hospital contact Worker's Compensation, Employee Services, or the Incident Management Team for treatment authorization.

FOR OTHER WORK-RELATED INJURIES:

Utilize "Kaiser-On-The-Job" by calling 972-6800 and/or drive to Kaiser – Santa Teresa at 275 Hospital Parkway, Suite 565, San Jose, CA.

8. URBAN RUNOFF ILLICIT CONNECTION ILLEGAL DISCHARGE (IC/ID) REPORTING

The following reporting elements have been established by the Santa Clara Valley Urban Runoff Pollution Prevention Program.

Incident Report Source:	Other:

---

[i] This section documents compliance with elements of the EMERGENCY RESPONSE PLAN as specified by 29CFR1910.120(q)(2)(iii); and demonstrates responder ability compliant with 29CFR1910.120(q)(6) which requires that Awareness Level responders (1) understand what hazardous substances are, (2) be able to recognize their presence, (3) identify them if possible, and (4) understand the associated risks and potential outcomes.
[ii] This section demonstrates responder ability compliant with 29CFR1910.120(q)(6)(i)(F)
[iii] Sections comply with Emergency Response Plan contents as specified by 29CFR1910.120(q)(2)(iv), (v), and (vi)
[iv] For known hazardous substances, utilize the most current DOT Emergency Response Guidebook initial isolation distances. For unknown materials that are believed to be dangerous do not approach within 100 meters (330 feet) until observation allows elimination of fire and inhalation hazard concerns. Then approach no closer than 30 meters (100 feet) to make additional visual observations.
[v] This section documents compliance with elements of the EMERGENCY RESPONSE PLAN as specified by 29CFR1910.120(q)(2)(vii) and (xi)
[vi] This section documents compliance with elements of the EMERGENCY RESPONSE PLAN as specified by 29CFR1910.120(q)(2)(i), (ii), and (ix)
[vii] This section documents compliance with elements of the EMERGENCY RESPONSE PLAN as specified by 29CFR1910.120(q)(2)(viii)

HAZMAT Incident Preparedness & Response

WATERSHEDS ISO 9001:2000 and ISO 14001 certified Santa Clara Valley Water District	DOCUMENT NUMBER WQ83001	REVISION R3 EFFECTIVE DATE: November 13, 2006

Printed copies are for reference only. See the Watershed Operations Internal Website for the released version.

1. PURPOSE AND SCOPE:

The purpose of this procedure is to define incident response (IR) activities that are applicable to Watershed Operations, activities and services. It describes the basic organization needed and action plans to prevent and mitigate the environmental impacts or other issues that may be related to accidents and potential emergency situations detected within Watershed Operations.

This procedure includes identification of incidents and information sources, responder training requirements, conducting emergency drills, and reviewing and revising incident response procedures following the occurrence of incidents or emergency situations. This procedure applies to all operational and functional levels within the Watershed Operations.

2. REFERENCE DOCUMENTS:

WQ42301	Document Control
WQ55301	Internal Communications
WQ62201	Training, Awareness and Competence
WF83001	ER Team: Incident Response Record

3. DEFINITIONS:

Incident:	Moderate to Serious disruptive impact (or threat of) on affected unit's ability to contribute to District mission.
Situation:	Moderate interruption of normal business operations requiring a response from a single department or unit response
Event:	Minor interruption of normal business operations requiring a response from a single department or unit response.
Hazmat	Hazardous material
Hazmat Incident:	An accidental spill or release caused by intentional or illegal dumping, an unexpected or an unplanned event having the potential to, or adversely affecting water quality and the environment
Flooding:	An overflow of water onto dry land caused by heavy rains or other emergencies, which may impact public safety and health

ICID: Illicit Connection/Illegal Dumping

4. REQUIREMENTS:

ISO 9001

None

ISO 14001

4.4.2. Training, awareness and competence
4.4.6 Operational control
4.4.7 Emergency preparedness and response

Other Requirements

NPDES Permit Order No. 01-024
NPDES Permit Order No. 01-119

5. MONITORING AND MEASUREMENT:

Measures and targets of performance monitored as a basis for continual improvement include:

- Call-back response times (15 minutes)
- On-site Response times (2 hours)
- Frequency of emergency drills (once per year)

6. PROCEDURE:

Overview	Details	Records

(1)
 	
Assess situation and notify Pollution Prevention Hot Line
 	
(Any employee)
	• Hazards or emergency situations may include:
	  • Any materials, fuels, oils, gases, or chemical spills or emissions
	  • Operational incidents involving a release or emission to the environment
	• Specific incidence and response actions and responsibilities are described by the Incident Response Record (WF83001)
	• Example of potential HAZMAT incidents include, but are not limited to:
	  • Leaking drums
	  • Spills into flowing watercourses
	  • Spills into still water bodies
	• Field staff to assess situation:
	  • Is there an actual or potential release or emission?
	  • If yes: Notify Pollution Prevention Hot Line (1-888-510-5151)
	  • If no: No further action needed.	

↓		
(2) Incident	• Document call • Call back to reporting party	

Response
 	
(District Incident Response Staff)
	• Determine need for onsite response:
	  • If yes, respond to incident and/or contact other agencies if appropriate
	  • If no, determine response action.
	
	• Fill out Incidence Response Record (WF83001)
	• Other Emergencies at the District are handled by the Office of Emergency Services (OES) using a Standardized Emergency Management System (SEMS). An Incident Command System (ICS) activation criteria threshold is used for progressive mobilization and application of emergency response responses.
		Incidence Response Form

↓		
(3) Follow Up (District Incident Response Staff)	• Use the Incident Response Record (WF83001) to notify external agencies and internal staff	
↓		

(4)
 	
Training
 	
(Unit Managers)
	• Incident response staff receive basic training on:
	  • Hazardous Waste Operations (29 CFR 1910.120)
	  • Environmental Crime & Investigation Training
	  • Erosion control & Best Management Practices (BMPs)
	  • Respirator Training (GISO 5144)
	  • Annual 8-hour refresher training
		Staff Training Record

↓		

(5)
Conduct Simulated Response Event
 	
(Emergency Drill)
(Incident Response Team)
	• The purpose of the Simulated Response event is to:
	  • assess the efficiency of District Response
	  • assess the readiness of District Contractors
	  • assess the response of local cities
	  • periodically test the effectiveness of the IR manual.
	• Simulated Response Events are conducted periodically, at a minimum of once per year by the Incident Response Team.
	• Oil and chemical spill drills are conducted in accordance with the requirements of the IR manual.	

↓		
(6) Review and Revise IR Manual (SWQU)	• Where necessary, IR procedures are reviewed after drills and incidents. • Identified changes and improvements in the IR Manual is documented, reviewed and approved by the Stream Water Quality unit (SWQU) manager. • After approval any changes to the IR are communicated to appropriate staff in accordance with WQ55301Internal Communications.	

7. RECORDS:

QUALITY RECORD	Location Kept	Filing Order	Duration Kept	Disposition	Comments
Incidence Response Form	Countywide Watershed Programs Unit	Date	3 years	Archived in Central Files	
Staff Training Records	Unit Manager	Employee and Date	3 years	Archived in Central Files	

8. CHANGE HISTORY:

Date	Revision	Comments
12/04/04	R2	The title was revised and references to flood emergencies were removed to reflect the actual scope and purpose of the procedure.
11/13/06	R3	Format corrections, minor typo cleanup, cleanup of reference documents.

RURAL PUBLIC WORKS					
C.2.a. PS under review by RWQCB		Continue to incorporate Rural Public Works guidelines as part of the Channel Maintenance Training to field staff and via tailgate meetings w/Field Operations Units.	Conducted Stream Maintenance Program training on June 11, 2007 which included a discussion on the benefits of large woody debris to in-stream habitat and discussed issues related to road repair to facilitate a reduction of sediment going to the streams.	May 07	SWQU Rural Public Works Task Lead

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

Levee grading and large woody debris removal from creeks have been identified as activities subject to this performance standard. No rural roads or trail erosion problems have been identified or came to the attention of the District Stream Water Quality Unit staff during this fiscal year. No rural public works were constructed by the District this year. However several stream flood control or erosion repair projects have been worked on to continue to improve the quality of access roads and reduce the likelihood of the levee, access roads and stream banks being sources of sediment. The District continues to enlighten staff of the importance of large woody debris for habitat during the Stream Maintenance Program training which supports the Channel Maintenance Pollution Prevention Program. The trained staff are the same staff working on many of the stream maintenance/restoration programs the District is involved with.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
PUBLIC AGENCY ACTIVITIES

HIGHLIGHTS AND ACCOMPLISHMENTS

The District has continued to emphasize to staff the importance of woody debris in the creeks for wildlife habitat and to facilitate the reduction of potential erosion and sediment challenges at various facilities by encouraging the creeks to remain in dynamic equilibrium.

C.2.a. PS SDS-4	Annual Training	Conduct annual BMP training workshop for District O&M staff.	Conducted employee workshop on June 19, 2007	March 07	SWQU SD O&M Task Lead
	Effectiveness Evaluation	Conduct annual effectiveness evaluation per the Performance Standard.	Effectiveness evaluation indicated that managers are finding the training useful in helping to understand the District's obligation to Protect water quality in the streams.	Feb 07	SWQU SD O&M Task Lead

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

The District owns and operates the stormwater drainage systems at its facilities, which includes storm drains, catch basins, vegetated swales, open drainage ditches, utility trenches, and storm drain lines. Storm drains from District facilities discharge to creeks, the Guadalupe River, and recharge ponds. Storm drains outside District facilities are owned and operated by the local (city or county) jurisdiction.

The District completed the following tasks:

1) An effectiveness evaluation survey was sent out on June 19, 2007 to solicit staff feedback on BMP effectiveness and suggestions for improving the storm drain O&M program. Three (50%) surveys were received. The effectiveness evaluation indicated that managers are finding the training useful in helping to understand the District's obligation to protect water quality in the streams.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
PUBLIC AGENCY ACTIVITIES

2) Continued implementation of the storm drain inspection and cleaning program.
3) Continued weekly street sweeping functions at facility parking areas.

BMPs were formally inspected quarterly during non-stormwater observations at most District facilities except Coyote and Pacheco Pump Stations. The pump stations do not warrant non-stormwater observations due to the low potential for these types of discharges to occur. The Corporation Yard culvert inlet protection device (constructed of cinderblocks filter fabric and washed gravels) was repaired in October of 2006 and will again be serviced in October of 2007 as it has collected sediment preventing this material from entering the Guadalupe River. Other BMPs are working effectively, as noted on the non-stormwater observation forms submitted. The three Water Treatment Plants conducted the required storm drain inspections required under this program.

HIGHLIGHTS AND ACCOMPLISHMENTS

Annual refresher training was held on June 19, 2007. Six District staff attended the training.

Storm drain inspections and cleaning work orders continue to be distributed via the District's Maximo (field maintenance work order software) Preventative Maintenance Program for the three Water Treatment Plants. Each month facility maintenance staff automatically receive a computer generated work order to inspect all storm drains at their facility and have them cleaned as needed. The Stream Water Quality Unit has been performing storm drain inspections since FY 2005 at the Vasona Meter Shop, Corporation Yard, Headquarters and Administration Campus and the Blossom Hill Annex to ensure compliance with Urban Runoff Management Plan.

C.2.a PS WUD-3	Evaluation	Complete annual effectiveness evaluation of the Water Utility Discharge program.	Completed in June, staff indicated that the annual training is very helpful and that the SWQU support for discharges and acting as the liaison with the Regional Board has been great.	Jan 07	SWQU WUD Task Lead

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

The District owns, operates, and/or maintains 3 water treatment plants, 2 pumping and metering stations, 1 pump station, 11 reservoirs, percolation facilities, water wells, a recycled water facility (South County Regional Wastewater Authority Treatment Plant), and distribution pipelines. All of these water facilities have a potential for discharging non-stormwater to surface water bodies.
The District continued reporting on all water utility O&M discharges. Please see attached inventory table (Table 2.1). Typical District discharges include raw water from water quality testing devices at District plants, San Tomas Injection Well, and Vasona Meter Shop testing.

The District's water utility maintenance staff performs all discharges. District staff implemented BMPs after consultation with the Stream Water Quality Unit. From discharge reports and the 7 effectiveness evaluation responses received, BMPs are being implemented

during all District water utility discharges and are effective. The District's Water Utility Discharge Pollution Prevention Guidance Manual (October 2001) has been effective in assisting District staff to chose and implement proper BMPs. District staff have been very open to this program and are reporting all discharges.

HIGHLIGHTS AND ACCOMPLISHMENTS

Annual refresher training was held on June 20, 2007. Twenty two District staff members who work with discharges or oversee discharges attended the training. Participants included staff from the following District units: Operations, Planning & Analysis, Utility Raw Water Operations, Utility Treated Water Operations, Groundwater Management, Infrastructure Planning, Utility Maintenance, Water Quality Unit, Water Supply Sustainability Planning Unit and Coyote Uvas/Llagas Watershed Program Support Unit. Workshop topics included: Why Pollution Prevention Matters (Environmental Impacts, Potential Pollutants and Sources, Regulatory Requirements, District Performance Standards), Water Utility Discharge Pollution Prevention Guidance Manual Overview, Roles and Procedures, BMP Implementation, Dechlorination, and Reporting and Tracking.

Staff completed program evaluation questionnaires following the training in June this year. We received 7 effectiveness evaluations from 22 attendees, which works out to 32% of attendees returning the questionnaires, which is a significant increase over last years 10%. From those questionnaires received, control measures and BMPs are being implemented properly during all discharges and are functioning effectively. Staff also indicated the annual training is very helpful and that the SWQU support for discharges and acting as the liaison with the Regional Board has been great.

This program's planned and unplanned notification policies and practices with the Regional Board have been so successful that the Regional Board has recommended that San Francisco Public Utilities Commission follow the same notification policy and practice that is used by the District.

This year the Stream Water Quality Unit and the District's Operations Planning and Analysis Unit undertook a study to evaluate the turbidity effects in a stream during the cleaning and reconditioning of stream hydrography gauges. The goal of the this study was to determine 1) what kind of effect does stream gauge maintenance have on stream turbidity 2) to develop potential BMPs to reduce the monitoring costs associated with turbidity monitoring during this maintenance activity and 3) to see if it would be reasonable to recommend that "Stream Gauge Maintenance" be added to the categorical exemption category of the new Municipal Regional Permit. The study was conducted in three creeks two in jurisdictional area of the Central Coast Regional Water Quality Control Board, Bodfish Creek and Upper Llagas creek and one stream from the San Francisco Bay Regional Water Quality Control Boards jurisdiction, Los Gatos creek below Lexington Reservoir. After background readings were taken the study consisted of several Stream Water Quality

Unit staff being stationed downstream of the stream gauge at either 50, 100, and 200 feet or 100, 200, and 300 feet. The results indicate that the turbidity in the stream at time did reach approximately 90 NTU's the streams recovered to background levels within an about an hour. The significance of this is that the impacts to the stream are limited in scope and likely much less detrimental to the health of the stream compared to having several staff walking in the stream setting up some form of filtration/detention system and then later sending staff back into the stream to remove the filtration/detention system. The Stream Water Quality Unit is planning to conduct one more experiment using a "Dirt Bag" on a more sensitive stream. Once this experiment is completed a short report will be forwarded to the San Francisco Regional Water Quality Control Board of our findings.

Water Utility Discharge
Table 2-1

FY 06-07	*Continuous flow discharge				Planned	Type			
			Volume	Time	Unplanned	of Water

NEW DEVELOPMENT PLANNING PROCEDURES

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
NEW DEVELOPMENT PLANNING PROCEDURES

SELF EVALUATION MATRIX – NEW DEVELOPMENT PLANNING PROCEDURES (C3)

Work Plan Task	Task Description	Status/Comments	Due Date (mo/yr)	Required by C.3. Section
10.A. Development Project Approval Process **Goal:** Modify District development project approval processes, for District's projects, to incorporate the requirements of Provision C.3.				
10.A.1	Implement the revised project review processes in coordination with the implementation of the Site Design Measures Guidance and Standards (C3 j), and the requirements of the final Hydrograph Modification Management Plan (HMP). Provide additional training to District staff in planning, building, and engineering per the Final HMP and revised tentative order.	District is implementing the HMP requirements for District's project. Provided training to CPSD (Capital Improvement Project) staff and CPRU (land development review) staff. After adaptation of the Water Resources Protection Ordinance on Feb 28th, 2007, District's review is limited to projects that affect our Right of Way or easements. SWQU provides Technical assistance to CPRU for plan check questions.	Dec. 2006	C.3.b
10.A.2	Review new development projects for the site design and control measures and requirements of the HMP in conformance with provision through the project review process.	Within the District's jurisdictional areas, District did not review any new projects. RWTP, Stage 2 is in the planning stage and it is proposed to use a green roof and HMP mitigation basins.	On-going	C.3.b
10.B. Requirements for Group 1 and Group 2 Projects **Goal:** Prepare to require proponents of Group 1 projects to design and implement stormwater treatment BMPs to reduce stormwater pollution to the maximum extent practicable. Participate in development of the proposal for an alternative Group 2 project definition per the Amendment Order No. R2 2005-035 and prepare to implement C.3. requirements for Group 2 projects as needed.				
10.B.1	Implement stormwater treatment BMPs to reduce stormwater pollution to the maximum extent practicable per the revised Amendment Order No. R2 2005-035.	For the RWTP, Stage 2 project, District is implementing the Treatment BMPs including a green roof. This project is in the planning stage. The New Water Quality Lab project is in the construction phase and is schedules to be completed in Oct 2007.	On-going	C.3.c.i.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
NEW DEVELOPMENT PLANNING PROCEDURES

Work Plan Task	Task Description	Status/Comments	Due Date (mo/yr)	Required by C.3. Section
10.B.2	Assist the Program in the development of the stormwater treatment BMPs guidance manual and performance standards for Group 2 projects as needed.	Completed	Aug 15, 2006	C.3.c.ii
10.C. Operation and Maintenance of Treatment BMPs **Goal:** To develop and implement District operation and maintenance (O&M) verification program to help ensure the proper maintenance of stormwater treatment measures on public and private property.				
10.C.1	Continue to implement the Operational and Maintenance (O & M) verification Program for projects with structural, in-ground, landscape and all other BMPs.	Verification of O&M of treatment BMPs within the District's jurisdiction will be coordinated and not duplicative to the co-permittee agency jurisdiction. Presently, there are no treatment BMPs in District's jurisdiction.	Ongoing	C.3.e
10.C.2	Report on the District's treatment BMP, O&M verification program in each annual report, including organizational structure, evaluation of effectiveness, and planned improvement to the program. Include a list or summary of treatment BMPs inspected during the year, inspection results, and any required follow-up and correction.	Within the District's jurisdiction there is no treatment BMP in place that requires O&M verification. This task will start in 07-08 for new Water Quality Lab BMP	Annual Report (9/15/06)	C.3.e.iii.
10.D. Hydromodification Management Plan **Goal:** To manage increases in runoff peak flow and volume for Group 1 projects, where such increases may cause increased erosion of creek beds and banks or related impacts, through implementation of a hydromodification management plan (HMP).				
10.D.2	Implement HMP requirements	Completed-Within District's jurisdiction, the District will coordinate non-duplicative implementation of the HMP requirements. The New Water Quality lab project is in construction and is schedules to be completed in Oct 2007.	Ongoing	C.3.f.i.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
NEW DEVELOPMENT PLANNING PROCEDURES

Work Plan Task	Task Description	Status/Comments	Due Date (mo/yr)	Required by C.3. Section
10.E. Waiver and Compensatory Mitigation Program **Goal 10.E.** Establish a program under which a project proponent may request a waiver from treatment BMP requirements due to impracticability, with a provision to provide an equivalent water quality benefit to the same receiving water by regional solutions and instream improvements (that allows participation in regional solutions).				
10.E.1	Evaluate potential regional treatment and/or peak flow attenuation projects.	The District in collaboration with the City of San Jose is pursuing regional treatment systems within available opportunities.	Ongoing	C.3.g.ii.
10.E.2	Perform legal review, and incorporate waiver provisions in project review process. Identify waiver projects in Annual Report.	District wishes to not allow waivers.		C.3.g.v.
10.F. Alternative Certification **Goal 10.F.** To allow a professionally qualified person (per C.3.h.) or another co-permittee with overlapping jurisdiction to certify the adequacy of design of stormwater treatment measures (per C.3.d. and f.).				
10.F.1	Continue to work with the program to allow alternative certification.	No alternative certifications were sought for District's projects.	Annual Report	C.3.h
10.G. Site Design Measures Guidance and Standards Development **Goal 10.G.** To incorporate site design measures that reduce water quality impacts into District review protocols and encourage their use in project designs so as to meet the requirements of C.3.				

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
NEW DEVELOPMENT PLANNING PROCEDURES

Work Plan Task	Task Description	Status/Comments	Due Date (mo/yr)	Required by C.3. Section
10.G.1	Incorporate Standards and Guidance in the District approval process and implement the revised Standards and Guidance document on the Final HMP and Revised Order R2 2005-035.	District has been using the revised C3 handbook for plan check and design purposes.	On-going	C.3.j
10.H. Source Control Measures **Goal 10.H.** Require source control measures for new and redevelopment projects to limit pollutant generation, discharge and runoff to the maximum extent practicable.				
10.H.1	Report implementation status of Source Control Measures.	There is no project to report within the District's jurisdiction.	On-going	C.3.k.
10.I. Update General Plans **Goal 10.I.** Include water quality and watershed protection principles and policies in the Stream Stewardship Plan to the extent necessary to provide the basis for implementation of the measures required by Provision C.3.				
10.I.1	Update the Stream Stewardship Plan/ Comprehensive Water Resources Plan to incorporate the water quality and watershed protection principals and policies for applicable development projects.	The District is pursuing collaborative efforts with other co-permittees and stakeholders to address water quality and watershed protection principals and polices.	On-going	C.3.l
10.J. Reporting Requirements **Goal 10.J.** To meet the Provision C.3. reporting requirements, and plan for anticipated data needs, and begin collecting and tracking required data on development projects as needed.				
10.J.1	Provide information described in Table 1 of Provision C.3. in annual reports.	1) RWTP, Stage 2, Addition of 1 ½ Acre of Impervious area. This project is in the planning stage. 2) New Water Quality lab Site Area including pervious and impervious area of 2.7 Acres. This project is scheduled to start in October 2007.	Annual Report (9/15/06)	C.3.n.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
NEW DEVELOPMENT PLANNING PROCEDURES

Work Plan Task	Task Description	Status/Comments	Due Date (mo/yr)	Required by C.3. Section
10.J.2	Collect information and report a summary of types of pesticide reduction measures required for development projects, and the percentage of projects for which pesticide reduction measures were required.	The District did not permit any projects greater than 10,000 square feet within our jurisdiction.	Annual Report (9/15/06)	C.3.n.iii.

HIGHLIGHTS AND ACCOMPLISHMENTS

The following activities are not part of the permit requirements. However, for the natural channel/creek design, District is diligent in collecting the geomorphic data and SWQU provided design assistance to Capital and maintenance projects.

Thompson Creek

1. There was limited data collection this year due to it being an unusually dry winter. The consultant is to prepare a final report in 2008 for Thompson Creek.

Upper Penitencia Creek

1. Collected data on Upper Penitencia Creek for continuous flow measurement for hydrologic and sediment transport modeling.
   a. Continuous flow measurement at Piedmont Road and at Berryessa Industrial Park.
   b. The data will be used to calibrate a continuous flow runoff model (HEC-HMS) for Penitencia Creek.

2. Geomorphic Survey and Channel Stability Assessment.
   a. Collected a third year of suspended solids and bed load transport data for the winter to develop suspended sediment and bed load rating curves.

Berryessa Creek

1. This effort is similar to the Upper Penitencia Creek exercise. District staff has installed gages on Berryessa Creek for continuous flow measurement.
   a. Continued to collect flow data measurements. Data is being collected upstream of Piedmont Road (which is the downstream end of the rural portion of the watershed) and at Hillview Road (which represents the combination of rural + urban watersheds).
   b. The data will be used to calibrate the continuous flow HEC-HMS model for Berryessa Creek.

2. Geomorphic Survey and Channel Stability.
   a. Continued the collection of suspended solids and bed load transport data during winter to develop a transport model.

b. Extended the cross-sectional data collection to Hillview Road bridge downstream of 237/Calaveras Road. This captured the eroding reach where Berryessa Creek runs parallel to the railway tracks.

3. Provided a stable channel design for flood protection to the US Army Corp of Engineers. This has now become the preferred alternative. We were requested to provide this design after the previous alternative developed by the District and the US Army Corp of Engineers developed for flood protection was not well received by the residents.

Adobe Creek
The effort has focused on 30% design for Upper Reach 5 that is stable, maximizes natural elements and can be accommodated to the best extent possible within the limited easement.

Stevens Creek
Assisted with the 50 percent design through the Blackberry Farm area that realigns the creek to remove the fish barriers and hardscape, and provide the District credit for restoration of several thousand feet of creek restoration.

Ross Creek
Completed a stream restoration and erosion repair for 800 feet of creek downstream of Kirk. This has generated 15,000 sf of mitigation credit. This demonstrates that stream restoration can generate mitigation credit that more than offsets additional costs incurred over traditional methods applied by the District.

Alamitos Creek
District completed a design for erosion repair at Alamitos Creek based on the longitudinal profile and cross-sectional data upstream and downstream of the Greystone Creek confluence. This alternative is expected to generate 7500 sf of mitigation credit which offsets the additional costs of a geomorphic stream stabilization.

HMP – In-Stream/ Regional Projects Alternatives
Developed and presented “Draft Long Term Plan for Implementing Restoration/Rehab Projects” to SCVURPPP and the City of San Jose. This document includes some discussion of potential cost allocation scenarios for in-stream projects in lieu of on-site improvements and potential on-site and in-stream combination for new development. In-stream regional solution is an alternative for those new developments and existing developments whose impacts are addressed only partially through on-site or off-site means.

CONSTRUCTION INSPECTION

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FY 2006-07
CONSTRUCTION INSPECTION

SELF EVALUATION MATRIX

Item Source[1]	Activity	FY2006-2007 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
NEW DEVELOPMENT AND CONSTRUCTION CONTROLS – INSPECTION PROCEDURES					
C.2.a URMP PS-6	Annual training for construction inspection staff	Conduct annual Training workshop for CIP/CPRU inspection staff.	Completed – Training was conducted for 18 District staff on March 27, 2007.	March 07	SWQU
C.2.a URMP PS-6	Inspection Procedures	Conduct annual effectiveness evaluation.	Completed – Feedback was solicited from District staff for effectiveness of the Program. Six forms were returned. Contract language was modified to incorporate BMP inspection and water quality monitoring requirements.	Jan 07	SWQU
C.2.a APRP	Inspection Procedures-	Continue to promote high frequency of construction site inspections. Maintain Training and Tracking tables. Construction Administration Unit inspectors to be made aware of the need for greater inspection frequency at annual training.	Completed – Stream Water Quality Unit maintained tracking table. During the annual training, inspectors were reminded of the need for increased inspection frequency. The tracking table maintained by the SWQU and is sent with the monthly reminder.	Monthly	SWQU

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

The Stream Water Quality Unit continued to conduct pre-rainy season inspections to facilitate site compliance whenever it was necessary or requested by Construction Inspection Unit staff. The frequency of construction site inspection coverage continued to remain high this past year. This was facilitated by Stream Water Quality Unit coordinating in the field with the construction inspectors and through the use of monthly email reminders to Construction Inspectors to conduct SWPPP evaluations. The monthly email

[1] Notation is as follows: PS (Performance Standard), URMP (Urban Runoff Management Plan), NDII (New District Initiated Item), NPDES (NPDES Permit)

reminder also includes a copy of the tracking table.

HIGHLIGHTS AND ACCOMPLISHMENTS

The District continued to use the monthly inspection sheet developed in FY 02-03 to facilitate compliance and follow up inspections. The Stream Water Quality Unit continued to meet with the Construction Inspectors in the field to go over SWPPP implementation at construction sites. These field meetings proved very successful for several projects and will continue in FY 07-08.

Construction Administration Unit continues to use the Incident Response/Pollution Prevention Hotline to contact Stream Water Quality Unit staff to report construction sites that are creating sediment discharges.

In FY 06-07, the District had 8 Capital Improvement Projects (CIP) under construction that included 5 flood protection/channel improvement projects, 2 water treatment plant projects and the new water quality lab. SWQU assisted with review of CIP SWPPPs as requested. A table showing the inspections completed is included with this section.

Construction Inspection Training for 15 District staff was completed on March 27, 2007. Five staff from the Construction Engineering Unit (100%) and 10 staff from the Construction Inspection Unit (77%) attended the training.

Effectiveness evaluation questionnaires were distributed prior to the annual training. Six respondents encouraged SWQU to continue monthly email reminders, provide resources to enforce non-compliance and continue to assist with review of project SWPPPs as requested.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
PUBLIC INFORMATION/PARTICIPATION

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

HIGHLIGHTS AND ACCOMPLISHMENTS

The District serves a community of 1.7 million countywide and has excellent outreach programs to many sectors of the community. Key elements of the District's PIP Program include the Adopt-A-Creek Program providing outreach to creekside residents, creek clean up events supporting citizen participation, attendance at community events targeting the general public, numerous workshops presented by the Water Conservation Unit, and the School Outreach Program.

GENERAL OUTREACH

The District attended 25 community events during FY 06-07. A complete listing of all events is included in this section.

The District's website continues to be improved to provide continual updates to the community. During the winter season, the District's home page featured a link to flood-related information, the District's efforts to protect the waterways in the event of a flood, and sandbag distribution sites. Our on-line maintenance request form empowers citizens to report dumping or waterway-related problems, and allows them to send messages to the appropriate watershed staff. The site also includes a link to the Santa Clara Valley Urban Runoff Pollution Prevention Program.

TARGETED OUTREACH

Workshops

In May 2007, the District's Water Quality, Groundwater Management, Vegetation Management and Water Use Efficiency Units worked together with the Loma Prieta Resource Conservation District, the University of California Cooperative Extension and the United States Department of Agriculture Natural Resource Conservation Service to conduct the sixth annual Stewardship for Small Acreages – A Series of Workshops on Land Management for Clean Water. The goal was to provide rural landowners with the resources needed to protect both surface and ground water quality on and off their property. The series took rural landowners through the steps of assessing their properties and developing action plans to address the highest priority items. The workshops were held at various small acreage homes. The four sessions included: general topics such as watersheds and conservation plans, groundwater quality, wells, septic systems and hazardous household products; Manure/Waste Management and Composting; Small Vineyards; and Fire Safety, Landscaping and Erosion Control. A total of 134 people attended the 4 sessions.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
PUBLIC INFORMATION/PARTICIPATION

In March 2007, the Water Use Efficiency Unit conducted a four-part Water Efficient Landscaping Workshop Series. A total of 185 people attended the four sessions: Gardening with Natives, Selecting Plants for Your Water-Wise Garden, Water-Wise Garden Design, and Water Efficient Irrigation Design. In April, the District co-sponsored the Fifth Annual Going Native Garden Tour, which spotlighted 45 homes in the South Bay providing examples of bird and butterfly friendly residential gardens that are both water-efficient and easy to maintain. The tour included a variety of gardens landscaped with native plants covering small to large lots, ranging from newly planted gardens to well established ones.

Media Campaign

The District conducted two outreach campaigns in FY 06-07: one on flood awareness and the other on water conservation. Both campaigns promoted the District's website where people could get urban runoff information and campaign information. The campaigns included the use of public service announcements, 10-second traffic radio spots for flood awareness and 60-second radio spots on flood awareness on English, Spanish and Vietnamese radio, targeted grassroots mailing to residents, community-based (including Spanish and Vietnamese) print advertisements, billboards, San Jose Mercury News print advertisements, and the Digitron billboard at Great America on Highway 101. Theater slides were also used in the flood awareness campaign. The District's web site, news stories, television public affairs programs and community events were utilized to extend the reach of the campaigns.

Flood Safety Notice 2006 was mailed in October 2006 to 100,000 flood plain residents. Although the mailer's main focus is flood preparedness and safety, it also contained articles on healthy creek ecosystems, keeping debris out of creeks and illegal dumping. A copy is included in this section.

AquaFacts, the District's employee newsletter, continued this year as an online publication. AquaFacts contained 4 articles relating to stormwater pollution prevention and watershed education during FY 06-07. Topics included Environmental Champions, improving water quality in Almaden Lake, and National Rivers Cleanup Day. The employee newsletter is an excellent and cost-effective method for delivering urban runoff, pollution prevention, and watershed messages to District employees.

An all employee Pollution Prevention Week email campaign was conducted September 18 through 24, 2006. Five emails were sent providing pollution prevention tips. Topics included: general pollution prevention week information, proper pesticide use and disposal, Protecting Your Watershed, proper disposal of fluorescent bulbs and batteries, and fighting pollution on the road. Numerous requests for brochures were received from the employees, as well as many comments on the campaign. This continues to be a good method to present pollution prevention ideas to District employees.

PBS television personality Huell Howser included the District in an episode of "California's Water," an Association of California Water Agencies sponsored series running of PBS stations throughout the state. For the episode on "Protecting Against Floods," the District was selected to represent how local agencies are taking the flood protection concept one step further with projects that integrate flood management with environmental enhancements and water quality improvements. The District's Downtown Guadalupe River Flood Protection Project was showcased as a carefully engineered project that provides flood protection for downtown San Jose and other neighborhoods and businesses while protecting habitat and greatly expanding the Guadalupe River Park with new trails, plazas and open space. Huell interviewed District staff at various locations along the project, highlighting the flood protection, habitat enhancement and restoration, and recreation elements of the project.

EDUCATIONAL OUTREACH

The District's educational outreach program serves a diverse population and responds to the needs of the schools throughout the County. Programming is consistent with State standards and regularly integrates messages and issues of other District communication programs. The District's School Outreach Program visited 156 public and private schools and 41 summer camps, reaching 22,571 students and 1,155 educators and conducted 14 teacher workshops during FY 06-07. The District offers a comprehensive education outreach program for early childhood, elementary, middle school, high school, and college-aged students to establish a foundation for understanding and appreciation of water resources. The program provides age-appropriate classroom presentations, teacher in-service training in water education, and tours in order to help children understand and appreciate their local water resources. Classroom presentations include hands-on experiments, information on watersheds, urban run-off, pollution prevention, flood plains, conservation tips, water awareness activities, flood management, and careers in the water industry. Scheduling is conducted on a first-come, first-served basis and provided free to schools in Santa Clara County. Number of students by watershed, city, grade, focus of presentation, and school district are included with this section. AquaCycles, a newsletter for teacher's, was published and distributed to all teachers in Santa Clara County in Winter 2006-2007. AquaDrops eNews, an electronic teacher's newsletter was sent out monthly from September 2006 through June 2007.

A guide for the labyrinth, located behind the District's Administration Building, was developed this year. It includes activities and facts about the labyrinth. A copy of "A Nature Labyrinth Experience" is included in this section.

The Coyote Creek Outdoor classroom encompasses land alongside Coyote Creek and includes a covered gazebo classroom for students and teachers, as well as a platform overlooking the creek where students can study the stream's natural habitat. Groundwater monitoring wells on site enable students to observe and evaluate the underground water table and understand how surface and groundwater interact. The site features two planting areas – one site close to the creek planted with native trees and shrubs to improve the stream's wildlife habitat, and a "high terrace" or upland area landscaped with oaks, grasses and other native plants to demonstrate drought-tolerant gardens. During the 2006-07 school year, the program provided 8 class tours for 214 students and 8 teachers.

Morley Park Outdoor Classroom in the City of Campbell provides the opportunity to teach students about the purpose of wetlands, urban runoff and the value of percolation ponds. During the 2006-07 school year, the program provided 1 tour for 36 students and 1 teacher.

CITIZEN PARTICIPATION

The District established the Adopt-A-Creek Program in 1994 to encourage residents of Santa Clara County to take an active role in helping to preserve the health and beauty of our local creeks. Due to staffing changes and shortages, Adopt-A-Creek permit information was not tracked this past year. In FY 06-07, 24 creek clean up events were conducted.

The District participated in two creek cleanup events: Coastal Cleanup Day on September 16, 2006 and the National River Cleanup Day on May 19, 2007. During Coastal Cleanup Day, 1,078 volunteers collected 22,464 pounds of trash and 5,503 pounds of recyclables at 22 sites from 32 miles of streams. On National River Cleanup Day, 553 volunteers collected 29,603 pounds of trash and 9,891 pounds of recyclables at 22 countywide sites.

In 2001, environmental stewardship was officially introduced as a third mission of the District. The Board of Directors, recognizing a need for the District charter to include environmental stewardship, worked with Senator Byron Sher to propose legislation to amend the District's 72-year-old chartering act. The bill, SB 449, provided for three amendments that clarified the District's ability to capitalize on the use of recycled water, added the responsibility of protecting the county from tidal flooding, and provided the authority to enhance, protect and restore streams, riparian corridors, and natural resources. That year, the District acknowledged individuals and organization that helped the District achieve its environmental stewardship goals. On the 5-year anniversary of adopting the change to Environmental Stewardship in the District Act, the 2nd CEO environmental Stewardship Awards Ceremony recognized individuals who helped promote the Board's environmental stewardship goals and the CEO's vision of creating a District that is Cleaner, Greener, and Leaner. The following recipients were honored at the awards ceremony:

Adobe Creek Watershed Group	Alviso Water Task Force	Karen Scarborough
Ralph A. Qualls, Jr.	Trish Mulvey	Santa Clara County Creeks Coalition
Kathy Sutherland	Bob Hennessy	Luis Jaimes
Roger Narsim	Jae Abel	Ngoc Nguyen
Paul Thomas	Pat Showalter	Carol Preseley

PROGRAM EVALUATION

The District uses numerous methods to conduct outreach, including written brochures, radio, newspaper, website, theater slides, bus back ads, community events and workshops. The wide variety of methods increases the probability that the messages are being received and understood.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
PUBLIC INFORMATION/PARTICIPATION

Combining all these different methods is very effective at meeting our public education goals. The variety of methods also ensures that many segments of the Santa Clara Valley population are being reached, including residents, businesses, students, as well as people from other locations. The District evaluates the different outreach methods and continuously seeks to improve messages and outreach methods. We work collaboratively with many other agencies and organizations to conduct outreach and will continue these partnerships in the future.

GENERAL OUTREACH

The District feels that attendance at community events is an effective public outreach method. The individual contact made at the events allows staff to answer specific questions and deliver more extensive messages. A wide variety of information can be distributed and the games and displays are a good way to attract event participants.

TARGETED OUTREACH

The District's targeted outreach efforts provide in-depth training and information to a small, targeted audience with the opportunity to answer specific questions from individuals in the group. This method allows the District to assist targeted groups to meet regulatory requirements, change behaviors that impact water quality, and provide the knowledge needed for the group to solve any water quality problems they may be experiencing. The District plans to continue this outreach method as we feel it is a valuable service to these targeted audiences and can positively impact water resources.

EDUCATIONAL OUTREACH

Teacher surveys were distributed again this year. Survey results were not available when the Annual Report was prepared. The District feels that the educational outreach program is a cost-effective method for educating children, teachers, and indirectly, parents. Based on the teacher's surveys, minor adjustments will be made to the program.

CITIZEN PARTICIPATION

The Adopt-A-Creek program and the creek cleanup events are very effective at creating and increasing stewardship and individual responsibility for the county's water resources.

Irrigation Seminar in English	Targeted	8/17/06	41 attendees. Instruction on: • Mechanical and electrical problems common in irrigation system • Increasing distribution uniformity on an irrigation system New ET controllers
Irrigation Seminar in Spanish	Targeted	8/18/06	10 attendees. Instruction on: • Mechanical and electrical problems common in irrigation system • Increasing distribution uniformity on an irrigation system New ET controllers
Fertigation Workshop	Targeted	8/23/06	15 attendees. Staffed a booth presenting drought tolerant plants information and display. Distributed information on Water-Wise plants and water conservation.
Lower Silver Creek Flood Protection Project Celebration	Targeted	8/26/06	100 attendees. Distributed urban runoff, water conservation for farmers, and general District information.
Water Management for Water Quality	Targeted	11/28/06	60 attendees. Distributed urban runoff, water conservation, and general District information.
ACWA Fall Conference Exhibition Booth	Targeted	12/5-8/06	150 attendees. Distributed urban runoff, District's history book, and general District information.
Farm Water Quality Plan Workshop	Targeted	2/12/07	60 attendees. Distributed urban runoff, water conservation, and general District information.
Water Efficient Landscaping Workshop Series: Gardening with Natives	Targeted	3/3/07	50 attendees. Distributed urban runoff, water conservation, and general District information.

Santa Clara Valley Water District
2006-07 PIP Activities/Community Events

PI/P Activity[1]	Type of Outreach [2]	Level of Implementation (Description/Dates)	Evaluation of Effectiveness [3]
Water Efficient Landscaping Workshop Series: Selecting Plants for Your Water Wise Garden	Targeted	3/10/07	55 attendees. Distributed urban runoff, water conservation, and general District information.
Water Efficient Landscaping Workshop Series: Water Wise Garden Design	Targeted	3/17/07	50 attendees. Distributed urban runoff, water conservation, and general District information.
Warm Season Crop Management Seminars: Pepper Crop Production Management	Targeted	3/20/07	30 attendees. Distributed urban runoff, water conservation, and general District information.
Water Efficient Landscaping Workshop Series: Water Efficient Irrigation Design	Targeted	3/24/07	30 attendees. Distributed urban runoff, water conservation, and general District information.
Earth Day at Saratoga High School	Taragetted (Students)	4/21/06	100 attendees. Booth presentation to celebrate Earth Day. Taught lessons about water supply and water conservation.
Stewardship for Small Acreages Workshop: General Session	Targeted (Rural landowners)	5/1/07 Workshop in coordination with Loma Prieta RCD, UC-Cooperative Extension, and USDA-NRCS. Provided rural landowners with the resources needed to assess their properties and plan and implement improvements, if needed, to protect both surface and ground water quality on and off their property.	28 attendees. Topics covered included watersheds and conservation plans, groundwater quality and well maintenance, septic system maintenance and household hazardous waste disposal and alternatives. Distributed literature on well construction, use and maintenance, septic system design and maintenance, household hazardous waste alternatives and disposal locations, individual parcel maps with water and elevation features for conservation planning.
Stewardship for Small Acreages Workshop: Fire Safety, Landscaping & Erosion Control	Targeted (Rural landowners)	5/9/07 Workshop in coordination with Loma Prieta RCD, UC-Cooperative Extension, and USDA-NRCS. Provided rural landowners with the resources needed to assess their properties and plan and implement improvements, if needed, to protect both surface and ground water quality on and off their property.	33 attendees. Topics covered included fire fuel load management, fire safe home site, native plant identification and uses in landscape, noxious weed identification and management, irrigation management and sudden oak death syndrome. Distributed literature on landscaping to reduce fire hazard, fire safety, noxious weeds, drainage and erosion control.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

District staff continued to purchase alternative products, where available, and to dispose of mercury-containing materials in accordance with applicable regulations.

District staff co-chairs the Santa Clara Basin WMI Guadalupe River Mercury TMDL Technical Workgroup and Stakeholder Workgroup. The workgroups identify opportunities to collaborate on technical studies to support TMDL development and implementation. The District staff continues to support and participate in the development of the SCB-WMI Watershed Action Plan.

[1] Notation is as follows: PS (Performance Standard), URMP (Urban Runoff Management Plan), NDII (New District Initiated Item), NPDES (NPDES Permit)

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
COPPER/NICKEL ACTION PLAN

HIGHLIGHTS AND ACCOMPLISHMENTS

Mercury Removal Projects and Programs Completed and Underway

Stream Maintenance Program

In 2006, routine sediment removal maintenance resulted in the disposal of 91,815 cubic yards of material, with 13,482 of this total from the creeks in the upper portion of the Guadalupe River Watershed. The total mercury removed from the system was 43 kg, with 25 kg from the Guadalupe River Watershed.

Monitoring

The District has undertaken a monitoring program to evaluate water quality in Lake Almaden, Almaden Reservoir, Calero Reservoir, Guadalupe Reservoir and Stevens Creek Reservoir. Depth profile measurements of temperature, pH, conductivity, and dissolved oxygen were conducted monthly. In addition, water samples were collected from the epilimnion and hypolimnion for analyses of total and dissolved mercury, total and dissolved methyl mercury, ammonia, nitrate/nitrite, sulfate and phosphorus at Lake Almaden, Almaden Reservoir, and Guadalupe Reservoir. Samples were also collected from the epilimnion for analyses for chlorophyll a. The purpose of this monitoring is to establish existing water quality conditions and seasonal variability to evaluate the implementation of management changes to improve water quality.

Mercury Control Program

In 2006, the District continued to implement three projects to control mercury in the Guadalupe River Watershed: Jacques Gulch Restoration, Lake Almaden Aeration, and Reservoir Oxygenation.

Jacques Gulch Restoration

Jacques Gulch is a tributary to Almaden Reservoir that drains approximately one-third of the reservoir watershed. A portion of this drainage includes a small tributary that drains a portion of the former New Almaden Mining District, which is now Almaden-Quicksilver County Park. The project will remove, cap, or control erosion of extensive mercury deposits in the tributary above its confluence with Jacques Gulch, and in Jacques Gulch above its confluence with Almaden Reservoir. This project will require planning, permitting and construction, and is scheduled for completion in 2011. During the reporting period, the District revised a draft Engineer's Report for the project.

Lake Almaden Aeration

Lake Almaden is a former gravel quarry that lies at the confluence of Guadalupe Creek and Los Alamitos Creek that drain Guadalupe and Almaden Reservoirs, respectively. Below this confluence is the Guadalupe River. This lake provides recreational amenities to the community, including swimming, boating, and fishing. The Guadalupe River Watershed Mercury Study identified the lake as a significant source of methyl mercury that bioaccumulates in fish within the lake and in fish downstream. In 2006, the District continued a monitoring and sampling program to evaluate the performance of a pilot treatment system using a solar-powered circulator (Solar Bee). Data collected during the summer of 2006 showed a 96% reduction in the methyl mercury concentrations measured in the treated portion of the lake as compared to 2005 data. Building on this success, a second circulator was installed in the lake in March 2007.

Reservoir Aeration

The Guadalupe River Watershed Mercury Study identified reservoirs as a significant source of methyl mercury that bioaccumulates in fish within the reservoirs and in downstream creeks. The study also demonstrated a correlation between the seasonal development of anoxia in the hypolimnion and increased methyl mercury concentrations. Building on the success of the Lake Almaden pilot project, the District installed three solar-powered circulators in Almaden Reservoir in April 2007. The District Board also approved the purchase of three solar-powered circulators for Guadalupe Reservoir, which are expected to be installed during the summer of 2007.

Watershed Stewardship Excellence Award

The San Francisco Bay Regional Water Quality Control Board (Regional Board) presented the District with a Watershed Stewardship Excellence Award – Recognition for Exceptional Watershed Stewardship and Legacy Mercury Pollution Control Efforts in the San Francisco bay Area in September 2006. The award was the result of the District's efforts to assist the Regional Board with development of the Total Maximum Daily Load (TMDL) for mercury in the Guadalupe River Watershed, and for taking the initiative to evaluate treatment alternatives to reduce methyl mercury in Lake Almaden.

In February 2005, the District completed the Guadalupe River Watershed Mercury Study, a two-year collaborative effort with the Watershed Management Initiative to ensure the TMDL was based on sound science. One important finding of the study was that methyl-mercury (the bio-available form of mercury) is produced in the reservoirs and in Lake Almaden during the warm summer months, and is related to the seasonal depletion of oxygen in the bottom of the reservoirs and lake. In March 2006, the District Board approved the purchase of the first Solar Bee to treat a portion of Lake Almaden. The Solar Bee was installed in May 2006 and subsequent systematic monitoring has shown improved water quality in the lake.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

The District, as an environmental steward, has several practices and activities in place that support copper and nickel pollution prevention. The District continues to distribute outreach materials at public events. The District's website provides a carpool connection interactive map so an individual is able to search for carpoolers in the vicinity of one's home or even along the route an individual uses to get to work.

HIGHLIGHTS AND ACCOMPLISHMENTS

The District enacted a policy several years ago to have District vehicles washed and vacuumed at the existing covered wash rack that discharges through a clarifier to the sanitary sewer system. The District is very proactive in attempting to reduce traffic and pollutants caused by traffic. The district provides, free to employees, bicycle lockers, and reimburses staff for use of public transit for business purposes.

C.2.a.		Continue trash evaluations using the Program's Urban Rapid Trash Assessment protocol (Version 1.0) in a subset of trash problem areas.	Completed- Trash assessments were completed in the Fall of 2006 and Spring of 2007. Total number of trash sites assessed by the District were 35 of which 4 sites had been recently cleaned, 4 sites were had to much trash to conduct an assessment and 8 of the sites had been recently cleaned by either Adopt-A-Creek programs, National River Clean Up events or District Maintenance staff.	June 07	SWQU Trash Team
C.2.a.		Submit Urban Trash Assessment Survey Forms, Trash Item Tally sheets to Program Staff	Completed. Data was submitted in January 2007 and again in July 2007.	June 07	SWQU Trash Team
C.2.a.		Assist Program staff in developing an effective strategy for reducing trash in urban streams and waterways.	This remains in development and a significant effort was made to evaluate effective BMP based on field trips to LA county. The District believes the primary source of trash is from the municipal storm sewer system and is encouraging other co-permittees to incorporate trash exclusion devices to prevent trash from entering the storm drain.	June 07	SWQU Trash Team
C.2.a.		Annually revise trash problem areas list on an as needed basis. Revisions should be based on trash problem area surveys and other relevant information.	Completed- The Stream Water Quality Unit staff had correspondence with our watershed division regarding new sites. However it was decided to continue to evaluate the same sites for several assessments to build a higher resolution dataset for background data and to better track in improvements due to cleanup activities.	June 07	SWQU Trash Team & Watershed Field Staff
C.2.a.		Assist Program in developing Trash Fact sheets, as appropriate.	Completed	June 07	SWQU Trash Team

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
TRASH INVENTORY AND MANAGEMENT

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

The District continues to focus a significant amount of resources on trash removal from the watersheds and the property within the District's jurisdiction. Thirty five Rapid Urban Trash assessments were completed by District staff, of which 4 sites had been recently cleaned, 4 sites were had too much trash to conduct an assessment and 8 of the sites had been recently cleaned by either Adopt-A-Creek programs, National River Clean Up events or District Maintenance staff. The District continues to include litter prevention training in its school outreach programs as well as other outreach efforts associated with youth group field trips, etc. Please see the attached charts for further clarification of the trash data set.

HIGHLIGHTS AND ACCOMPLISHMENTS

It continues to be very challenging for the District to identify individual responsible parties for many of the illegal dumping activities that occur in the creeks of the county. Since the District has no police powers and no land use authority our ability to penalize polluters and protect the environment proactively rather than retroactively is virtually non-existent outside of our extensive public and educational outreach activities. Homeless encampments are one of the primary sources of trash being directly deposited to the riparian corridor. With these limitations in mind the District dispatches maintenance crews to provide frequent and routine creek cleanup for trash, and debris, in District waterways. Some of this material is deposited in creek channels and constitutes illegal dumping but is not reported to District hazmat or code enforcement staff due to the inability to establish an individual source or responsible party. In the spring of 2006 the District formed an internal focus group made up of water quality and field maintenance staff and various managers to better strategize how to identify root causes and sources of trash and how to reduce the load of trash to the creeks. This group continues to meet several times a year to discuss potential options and structure devices to capture trash and not harm the numerous natural resources in our creeks. This group is an outcome of the District's ISO process.

District continues to maintain three trash clean up programs which are 1) the Clean Safe Creek Outcome 1.4" Neighborhood creeks frequently inspected and cleaned of litter and graffiti; 2) Adopt-A-Creek frequently inspected and cleaned of litter and graffiti"; (Adopt-a-Creek program which allows individuals, service organizations or companies to adopt a section of creek and have there name posted along that section of creek); 3) unscheduled litter and debris removal associated with internal and external maintenance requests generated from the District's Internet website.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
TRASH INVENTORY AND MANAGEMENT

During FY 06-07, The District's previously described three programs collected and disposed of approximately 8,897 cubic yards of trash and debris from county waterways. Last year a total 10,248 cubic yards of trash and debris was removed. This year's breakdown by watershed is as follows; Guadalupe watershed 3,246 cubic yards (36%), Coyote watershed 2,165 cubic yards (24%), West Valley watershed 1,422 cubic yards (16%), Lower Peninsula watershed 1,196 cubic yards (13%), and Uvas Llagas watershed had 868 cubic yards (10%). The Guadalupe watershed Good Neighbor Program continues to conduct monthly homeless encampment clean up activities. The Good Neighbor Program coordinates with the Santa Clara County Department of Corrections to utilize inmate labor for some of the creek cleanup activities. The San Jose Conservation Corp labor is also utilized extensively during many of the trash removal operations. The Adopt-A-Creek program also supports trash removal from adopted sections of various creeks and this program is highlighted in the PIP activities section of the Annual Report.

The watersheds most affected by homelessness and illegal dumping are the Guadalupe and Coyote Watershed. The District constantly is utilizing its limited staff and financial resources to clean up these areas. The District works closely with the City of San Jose on trash and homelessness issues that challenge both agencies. Annually the District and the City of San Jose clean up three large trash accumulation sections of the Coyote Creek or the Guadalupe River as part of a Trash Memorandum of Understanding between the City of San Jose and the District. This benefits the local habitat by removing the trash before the next round of winter storms and preventing the material from being redistributed throughout the lower watershed. Additionally the District has a significant number of regular trash clean up locations within each watershed where streets, roads, expressways and highways cross waterways where trash tends to accumulate. The District also is a co-chair of the SCVURPPP Trash Ad Hoc Task group that works on assessment of trash issues as well as initiating installation of trash reduction best management practices.

The District sent two groups to Los Angeles County this year to evaluate in-stream best management practices such as booms designed to capture trash in the Los Angeles River channel additionally the most recent trip traveled with program staff to also evaluate end of outfall trash capture nets at Hamilton Bowl and Ballona Basin. Please see the attached memo for a complete description and photos of the most recent trip.

Santa Clara Valley Water District

MEMORANDUM

FC 14 (01-02-07)

TO: R. Narsim, B. Goldie, M. Klemencic, D. Chesterman

FROM: Brett Calhoun

SUBJECT: Los Angeles Field Trip – Trash nets and booms

DATE: June 17, 2007

On May 10th staff from the Stream Water Quality Unit and Santa Clara Valley Urban Runoff Pollution Prevention Program (SCVURPPP) met with various staff from the County of Los Angeles to further investigate trash capturing devices utilized by the County of Los Angeles. Our primary interest was in evaluating the performance and cost of the trash net which captures trash after it exits the storm water outfalls. These are considered end of the line devices. In addition District staff spent the afternoon addressing additional questions regarding installation and maintenance of the trash booms which had been studied by District Watershed staff in November 2006. Staff from SCVURPPP spent the afternoon evaluating devices that divert or prevent trash from entering the storm drain system by trapping trash in vaults. A copy of SCVURPPP's summary of findings has been attached for your perusal.

Trash Nets

This is a photo of the system set up on a single line.

The engineering and field staff with the County of Los Angeles have found the trash nets to be successful form of capturing significant quantities of trash to prevent it from entering the open channels, canals and rivers. Initially we were briefed on the installation and maintenance costs for the nets at a County of Los Angeles Corporation Yard. Later in the morning we had an opportunity to inspect several of the installations of various size and style at two locations. At the second location the County of Los Angeles staff had arranged for the maintenance crews to conduct a cleaning and maintenance operation.

Maintenance staff using a vacuum truck to clean up debris and trash from behind the net for pollutant control.

Maintenance staff removing the actual trash net with a crane truck (outside the picture) equipped with a line scale. (This net weighed about 120 lbs and had been cleaned out one week prior to this operation.)

Installation costs when evaluated by SCVURPPP and SCVWD prior to our trip appeared to be very high for these trash nets with very low or reasonable maintenance costs. What was discovered is that these devices tend to be very significant structures that actually stand away from the storm water outfalls. These devices tend to be made of steel and stainless steel and are constructed in such a way as to significantly reduce the likelihood of damage due to tampering. They also provide some level of public safety as the system is virtually encapsulated within the steel structures. The initial cost is in the $80,000 to $140,000 range for the device and installation. Maintenance costs tend to be reasonable for the devices as the nets themselves are $125 to replace and it takes up to an hour of field crew time to conduct the replacement operation. The nets are replaced about 2 times a year. County of Los Angeles staff indicated the nets were “One of the best for the cost” best management practices they use. The County of Los Angeles has been tracking some waste volumes for the devices and in 05-06 (wet year) the device at Hamilton Bowl captured 11, 400 pounds of trash, 06-07 (through May 10) accumulation was 7,588 pounds. For comparison sake the District reported to the Regional Water Quality Control Board during FY 05-06, “The District’s Clean, Safe Creeks Natural Flood Protection Program, Good Neighbor component removed and disposed of approximately 10,248 cubic yards (about 20,000 pounds) of trash and debris from county waterways. Last year a total 10,002 cubic

yards (about 20,000 pounds) of trash and debris was removed. This year's breakdown by watershed is as follows; Guadalupe watershed 4,179 cubic yards (41%), Coyote watershed 1,999 cubic yards (19%), West Valley watershed 1,790 cubic yards (18%), Lower Peninsula watershed 1,161 cubic yards (11%), and Uvas Llagas watershed had 1,120 cubic yards (11%)."

At one outfall location in the County of Los Angeles they collected roughly half as much trash as we did in the entire countywide program. With this data in mind it may very well be more cost effective collecting the trash at the outfalls. The County of Los Angeles also has a weekly inspection program which is an additional cost.

The County of Los Angeles field maintenance staff indicated that like any device, they had to come up with some modifications such as replacing the wood net frames with plastic frames and they came up with the vacuum truck idea to collect trash from behind the device prior to pulling the nets rather than the other way around. Historically they pulled the nets and then cleaned up the area using labor which was much more time consuming and labor intensive then the vacuum trucks.

Smaller Capture Devices

At a location known as Compton Creek the County of Los Angeles has used a much smaller net which attaches directly to the storm drain outfall.

The smaller nets are also inspected weekly, but are cleaned much less frequently than the more substantial devices.

2007 5 10

The Los Angeles River Boom and Ballona Creek Boom in Marina Del Rey.

In the afternoon District staff took a trip to see two locations where the booms were used to capture and divert trash. The two locations were the Los Angles River in Long Beach and Ballona Creek in Marina Del Rey. Considering the Los Angeles Regional Water Quality Control Board TMDL indicates that "…in-stream treatment is not acceptable, and that treatment must be addressed directly at the source…" the booms are considered a last resort for catching trash. These devices tend to create significant challenges to install and maintain and are costly to keep clean. In other words for all the so called source control devices utilized a significant amount of trash still makes its way too the storm drains and into the canals, channels and rivers in the Los Angeles basin. If SCVURPPP receives a TMDL listing it will likely include similar language offering direction to other local agencies that they must be taking action to prevent trash from entering the storm drain system and dealing with the problem in the creeks will not be acceptable.

Our interest at the Los Angles River site was to discuss the trash removal operations that took place by the contractors and to view the actual installation of the diversion structure. This boom requires constant maintenance due to the nature of the flows in the river. This boom is on the downstream end of an outside bend in the Los Angeles River which facilities the capture of trash due to the stream energy focused on the outside bend. This boom only extends about halfway or less across the channel. During high flow events this boom has experienced some movement of the anchor system and is currently under going some modification to improve the anchor system by installing augers into the bottom of the channel to help secure the boom. Also this boom does collect a significant amount of trash year round with the largest accumulations taking place after rain events as expected. The operation and maintenance and disposal costs associated with this device run to nearly $500,000 per year. In addition the County of Los Angeles pays the City of Long Beach an additional $500,000 annually to dispose of the trash that is not captured by the County of Los Angeles system.

Maintenance of this system requires some unique equipment as well as significant amount of space. The following photo is of a basket that is operated by a crane or a "dragline" rig. The trash is emptied into several dumpsters on site which allows the water to drain from the waste prior to transport to the landfill. The work site consists of a 1-2 acre lot which provides room for the cranes to access the creek as well as space for dumpsters to be placed at strategic locations to simplify the cranes ability to dump the trash with out constantly relocating.

The Ballona Creek system is much less maintenance intensive and is fashioned more like a skirt that hangs in the water and is attached to the channel banks at each end. This system actually crosses the entire channel at an angle. This area is tidal at this location so trash accumulates on both sides of the skirt however the removal of trash from this area can be done with an excavator and a series of dump trucks that park on the levee. The challenge this system faces is with high flows. After using various methods to protect the boom from damage the County of Los Angeles maintenance staff developed a breakaway cable that allows the boom to safely disconnect from the downstream anchor when flows would otherwise damage the boom. This boom system is fairly inexpensive to purchase. This boom can cost from $5000 to $10,000 dollars to purchase.

The District, if it decides to implement some in channel capturing device may find a combination of the two booms a good compromise. The District could install a “Sea Curtain” similar to that utilized at Ballona Creek conceivable placed across a portion of Coyote Creek or the Guadalupe River at a bend in the river to facilitate trash moving to one side of the creek allowing trash removal to occur from one bank.

The creeks in Los Angeles were wide and free of vegetation which facilitated the trash capture in many ways were District Creeks are narrow in comparison and much more vegetated which tends to hinder the movement of trash to locations that would be more ideal for the capture and removal of trash. What the solution to this challenge is we do not know.

The safety issue did come up in conversation as well and County of Los Angeles staff did indicated that in the upper watershed the local Fire Department had them remove a boom due to the potential human safety issues for citizens and rescuers involved with a curtain placed across the creek.

It is clear that the County of Los Angeles is moving to total capture devices in the implementation of the TMDL which will allow them to drastically reduce the programs monitoring costs as the total capture devices skirt the need for a monitoring program.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

[1] Notation is as follows: PS (Performance Standard), URMP (Urban Runoff Management Plan), NDII (New District Initiated Item), NPDES (NPDES Permit)

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
OTHER WATER QUALITY AND WATERSHED MANAGEMENT REQUIREMENTS

PROGRAM EVALUATION

The District operates 3 office buildings, 3 water treatment plants, 2 pumping and metering stations, 1 pump station, 1 corporation yard, 1 warehouse storage and supply facility, and 2 storage yards. Although the District operates one Corporation Yard, the District has Storm Water Pollution Prevention Plans (SWPPPs) for all 5 facilities. In FY05-06 several SWPPP's (Vasona, Corp Yard and Headquarters) were re-written and are currently under final peer review. In FY 06-07 the SWPPP revision for the Santa Teresa Water Treatment Plant was started.

HIGHLIGHTS AND ACCOMPLISHMENTS

BMPs were formally inspected quarterly during non-stormwater observations at all District facilities except Coyote and Pacheco Pump Stations. The pump stations do not warrant non-stormwater observations due to the low potential for these types of discharges to occur. The Corporation Yard culvert inlet protection device (constructed of cinderblocks filter fabric and washed gravels) was cleaned and reconstructed in the fall of 2006. This device is very effective at preventing a significant amount of sediment from reaching the Guadalupe River. Each fall we remove several cubic yards of silty material that has been detained by the device. The device also provides some limited attenuation of the peak discharge of storm water from the corporation yard. Other BMPs are working effectively, as noted on the non-stormwater observation forms submitted.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

HIGHLIGHTS AND ACCOMPLISHMENTS

The District maintains over 700 miles of stream channels to provide flood protection for the Santa Clara County communities. Under the Multi-Year Stream Maintenance Program (SMP) the District removes sediment, provides for erosion protection, and conducts vegetation management activities. Minor maintenance activities include trash removal, fence and access repair, maintenance of revegetation sites, and removal of downed trees or other blockages from the streams. During FY 06-07, the District removed 91,815 cubic yards of sediment and completed bank protection projects totaling 3,192 linear feet.

Annual SMP archeology awareness and BMP training was conducted on June 11, 2007 and 87% of District employees from the Watershed Field Operations Units, Watershed Program Support Units, Vegetation Management Unit, and Regulatory Compliance Unit received the training (79 employees).

[2] Notation is as follows: PS (Performance Standard), URMP (Urban Runoff Management Plan), NDII (New District Initiated Item), NPDES (NPDES Permit)

BMP training evaluation forms were distributed during the training session and attendees were asked to complete them before leaving. All training sessions were rated excellent (32%) or good (68%) by the respondents. Suggestions for improving the training will be incorporated into next year's training.

The annual Internal Lessons Learned meeting was held on November 29, 2006 to discuss what went well and what was learned from the 2006 Stream Maintenance Program projects. The meeting reviewed the effectiveness of Best Management Practices (BMPs) and recommendations for their improvement. Those attending the meeting included individuals responsible for implementing various SMP components during the 2006 construction season. These included: Watershed Maintenance Managers, Engineering Unit Managers, Watershed Engineers, Regulatory Compliance Specialists, Environmental Planners, Water Quality Specialists, Biologists, Vegetation Specialists, Field Supervisors, and heavy Equipment Operators. Approximately 50 District staff attended the meeting.

BMP inspection checklists continued to be used for sediment removal and bank protection projects and for chemical and non-chemical vegetation management activities. The checklists provide documentation of BMP implementation at the SMP projects, inspection of the BMPs, and track any adjustments made to BMP implementation.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

The District will share water quality monitoring data and information from capital improvement projects and stream maintenance projects with the Program.

HIGHLIGHTS AND ACCOMPLISHMENTS

Coordinate Regional Monitoring Efforts of BASMAA, SCVURPPP, WMI, and District

The District Stream Water Quality Unit staff attended program and regional monitoring work group meetings including SCVURPPP Monitoring Ad-Hoc Work Group, BASMAA Monitoring Committee, WMI Assessment Subgroup meetings, and TMDL work group meetings (PCB, mercury, sediment), to identify opportunities for coordination and collaboration of monitoring activities. District staff participated in the Monitoring Ad Hoc Workgroup meetings and worked with the SCVURPPP Program to share monitoring data. District staff reviewed and commented on Program monitoring work plans, monitoring reports, and assessments. The District has dedicated significant resources to work on the Guadalupe Watershed Mercury study and proposed TMDL. The District has also dedicated staff time to comment on the San Francisco Bay Mercury TMDL.

As the WMI moves from planning to implementation, the District continues to serve as a major stakeholder and leader in the WMI processes to provide a stakeholder forum, share information, provide networking opportunities, and facilitate funding support in advocating water resources issues for the Santa Clara Basin.

Major accomplishments included:

1. Provided debriefing on Solar Bee Mercury Removal efforts to pave the road for future support letters for grant funding.
2. Provided debriefing to WMI Land Use Subgroup on Stewardship Planning efforts to advocate the visions for the watersheds and better use of the information contained in the District's stewardship plans.
3. Facilitated the removal of "silver wash" washing machines from the water conservation rebate program, prevented toxic chemicals from entering the wastewater stream right from the source.
4. Played an important role to encourage City of San Jose to conduct a more thorough review of the impacts on groundwater resources for its Household Hazardous Waste Collection Facility.
5. Contributed to the planning of the June retreat for strengthening WMI's focus in its Watershed Action Plan implementation phase.
6. Led or supported several policy-level dialogues with the District Board of Directors, Environmental Advisory Committee and interested parties on Stream Protection, Restoration,
7. Contributed to the collection of nearly 300 slides for the Developing in Watersheds presentation.
8. Staffed field trips showcasing District project for the workshops hosted by the Land Use Subgroup.
9. Wrote an article for the District's internal newsletter to promote effective uses of the WMI functions.

Upper Penitencia Creek Limiting Factors Analysis

The District assisted with the Upper Penitencia Sediment Source and Management Practices Assessments by providing information on the operations of the diversion structures for the percolation ponds as well as by providing information on other water utility operations pertinent to Upper Penitencia creek. The District also provided significant information on the fisheries condition in the watershed. The District completed a review of the document and also convened a multi division meeting of managers and operations staff to respond to the Regional Boards questions on the first draft of the document in the fall of 2006.

Saratoga Creek Watershed Assessment

The District has provided funding and coordination for a fish scale analysis of the fish scales that were collected for the Saratoga Creek Watershed Assessment. The District has also been working with the Program to ensure that Program staff collect samples from only public owned sites.

Wells and Water Production Unit Activities

District well inspections ensure compliance with the District Well Ordinance and State Well Construction and Destruction Standards and ensure proper handling of drilling wastes. Since its inception in 1979, the Well Ordinance Program has issued over 56,000 well and exploratory boring permits and has inspected over 51,000 well construction and well/exploratory boring destruction activities. In FY 06-07, 2,692 permits were issued by the program and 2,269 inspections of well construction/destruction and exploratory boring sealing activities were completed. Wastes that may be generated from well drilling and destruction operations include the following: drill cuttings, soils, debris (wood, bricks, cement, refuse, etc.), gray water (fluids laden with typically high pH sealing materials), cement (wet or dry), turbid water, turbine oil, fuel, hydraulic fluids, and lubricating oils. The presence of District Hydrologic Systems Analysts during these drilling and sealing activities strongly reduces the likelihood of a release of chemicals or wastes to storm drain systems or directly to local waterways.

Water Quality Index Project.

In the fall of 2004 the Stream Water Qualtiy Unit implemented a study of general water quality monitoring in the Guadalupe Watershed to compare the watershed to other studies taking place in the country. This study was both time consuming and initially costly to conduct in labor hours. This study has just completed the collection of the sixth round (3 years) of sample collection in the Guadalupe River watershed. The study has completed its third round of sampling in the Stevens Creek and Coyote Creek watersheds. At the tidal sites both a high tide and a low tide sample are collected.

Guadalupe River results indicate that the water quality does generally fall into the excellent to good range in the upper watershed and tends to degrade slightly as one approachs the lower watershed area and the bay. It also appears as would be expected that the water quality is poorer in the fall of each year and did occasionally dip below the good range into the average range. In general the tidal bay water tends to be of similar if not slightly lower quality than the stream water.

Coyote Creek results indicate a similar trend as seen in the Guadalupe watershed with water quality generally in the good range with occasional drops below the good range into the average range in the lower watershed however these dip seem to occur in the spring which may be related to reduced flows consistant with a below average rain year. The reason for the Spring 2006 higher water quality scores for O'toole Bridge and 237 bridge sites continues to be investigated.

Stevens Creek results indicate a narrower range of variability between seasons and downstream locations as well. All the results are in the good range as one might expect from the more pristine and smaller Stevens Creek watershed.

All of this cooroborates nicely with the Development of Environmental Indicators of the Condition of San Francisco Estuary report created for the San Francisco Estuary Project by Bruce Thopmson and Andrew Gunther May 2004.

A summary of the Water Quality Index is attached from the National Sewer Foundation website for review and a description of parameters assessed.

From the NSF International website:

In an effort to develop a system to compare water quality in various parts of the country, over 100 water quality experts were called upon to help create a standard Water Quality Index (WQI). The index is basically a mathematical means of calculating a single value from multiple test results. The index result represents the level of water quality in a given water basin, such as a lake, river, or stream.

To determine the WQI, the following nine water quality parameters are measured:

- **Biochemical Oxygen Demand**
  The Biochemical Oxygen Demand (or BOD) is a measure of the amount of food for bacteria that is found in water. Bacteria utilize organic matter in their respiration and remove oxygen from the water. The BOD test provides a rough idea of how much biodegradable waste is present in the water. (Biodegradable waste is usually composed of organic wastes, including leaves, grass clippings, and manure).

- **Dissolved Oxygen**
  The dissolved oxygen test measures the amount of life-sustaining oxygen dissolved in the water. This is the oxygen that is available to fish, invertebrates, and all other animals living in the water. Most aquatic plants and animals need oxygen to survive; in fact, fish will drown in water when the dissolved oxygen levels get too low. Low levels of dissolved oxygen in water are a sign of possible pollution.
- **Fecal Coliform**
  Fecal coliform is a form of bacteria found in human and animal waste.
- **Nitrates**
  Nitrates are a measure of the oxidized form of nitrogen and are an essential macronutrient in aquatic environments. Nitrates can be harmful to humans, because our intestines can break nitrates down into nitrites, which affects the ability of red blood cells to carry oxygen. Nitrites can also cause serious illnesses in fish.
- **pH**
  The pH level is a measure of the acid content of the water. Most forms of aquatic life tend to be very sensitive to pH. Water containing a great deal of organic pollution will normally tend to be somewhat acidic. Water with a pH of 7 is considered neutral. If the pH is below 7, it is classified as acidic, while water with a pH greater than 7 is said to be alkaline. The pH of tap water in the U.S. is usually between 6.5 and 8.5.
- **Temperature Change**
  The water temperature of a river is very important, as many of the physical, biological, and chemical characteristics of a river are directly affected by temperature. Most waterborne animal and plant life survives within a certain range of water temperatures, and few of them can tolerate extreme changes in this parameter. Using the same thermometer, the water temperature should be checked at the test site and at a similar site one mile upstream. Care should be taken when taking the temperature upstream to ensure that the amount of sunlight and the depth of the river are similar to the original test site.
- **Total Dissolved Solids**
  This is a measure of the solid materials dissolved in the river water. This includes salts, some organic materials, and a wide range of other things from nutrients to toxic materials. A constant level of minerals in the water is necessary for aquatic life. Concentrations of total dissolved solids that are too high or too low may limit growth and lead to the death of many aquatic life forms.
- **Total Phosphate**
  Phosphates are chemical compounds made from the elements phosphorous and oxygen; they are necessary for plant and animal growth. Phosphates can be present in water in many forms, so total phosphate gives an estimate of the total amount of phosphate potentially available in a given water supply.
- **Turbidity**
  Turbidity is a measure of the dispersion of light in a column of water due to suspended matter. The higher the turbidity, the

cloudier the water appears. If water becomes too turbid, it loses the ability to support a wide variety of plants and other aquatic organisms.

After the nine water quality tests are completed and the results recorded, a "Q" value is calculated for each parameter, and the overall WQI for the sampling site is then calculated.

It is important to monitor water quality over a period of time in order to detect changes in the water's ecosystem. The Water Quality Index can give an indication of the health of the watershed at various points and can be used to keep track of and analyze changes over time.

What Does the WQI Mean?

The Water Quality Index uses a scale from 0 to 100 to rate the quality of the water, with 100 being the highest possible score. Once the overall WQI score is known, it can be compared against the following scale to determine how healthy the water is on a given day.

Table I - WQI Quality Scale	
91-100:	Excellent water quality
71-90:	Good water quality
51-70:	Medium or average water quality
26-50:	Fair water quality
0-25:	Poor water quality

Water supplies with ratings falling in the good or excellent range would able to support a high diversity of aquatic life. In addition, the water would also be suitable for all forms of recreation, including those involving direct contact with the water. Water supplies achieving only an average rating generally have less diversity of aquatic organisms and frequently have increased algae growth.

Water supplies falling into the fair range are only able to support a low diversity of aquatic life and are probably experiencing problems with pollution. Water supplies that fall into the poor category may only be able to support a limited number of aquatic life forms, and it is expected that these waters have abundant quality problems. A water supply with a poor quality rating would not normally be considered acceptable for activities involving direct contact with the water, such as swimming.

The results of the District WQI pilot project to date are summarized in the Figures 9-1, 9-2, and 9-3 in this section of the report.

RESPONSE TO REGIONAL BOARD COMMENTS

No comments from the Regional Board were received on this section of last year's annual report.

[1] Notation is as follows : ARPR (Annual Regulatory Performance Review), WP (Item continued from previous Work Plan), AR (Annual Report), SES (Self-Evaluation Summary Table in AR), PSR (Performance Standard Revision), NDICI (New District Initiated Continuous Item); Fiscal Year is designated by '99,'00,...

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
STAFF TRAINING

HIGHLIGHTS AND ACCOMPLISHMENTS

Storm Drain Operation & Maintenance/Storm Water Pollution Prevention Plans

On June 19, 2007 training was completed for 7 individuals responsible for implementing Storm Drain inspections at the various District facilities. Staff was directed to each facility's Storm Water Pollution Prevention Plan (SWPPPP) for a summary of activities that should be taking place at each facility to protect storm water from collecting any contaminants along its path to the local waterway.

Water Utility Discharge Pollution Prevention

Annual refresher training was held on June 20, 2007. Twenty two District staff members who work with discharges or oversee discharges attended the training. Participants included staff from the following District units: Operations, Planning & Analysis, Utility Raw Water Operations, Utility Treated Water Operations, Groundwater Management, Infrastructure Planning, Utility Maintenance,
Water Quality Unit, Water Supply Sustainability Planning Unit and Coyote Uvas/Llagas Watershed Program Support Unit. Workshop topics included: Why Pollution Prevention Matters (Environmental Impacts, Potential Pollutants and Sources, Regulatory Requirements, District Performance Standards), Water Utility Discharge Pollution Prevention Guidance Manual Overview, Roles and Procedures, BMP Implementation, Dechlorination, and Reporting and Tracking.

Construction Inspection Training

Construction Inspection Training for 15 District staff was completed on March 27, 2007. Five staff from the Construction Engineering Unit (100%) and 10 staff from the Construction Inspection Unit (77%) attended the training.

Flood Control/Channel Maintenance Activities

Annual SMP archeology awareness and BMP training was conducted on June 11, 2007 and 87% of District employees from the Watershed Field Operations Units, Watershed Program Support Units, Vegetation Management Unit, and Regulatory Compliance Unit received the training (79 employees).

BMP training evaluation forms were distributed during the training session and attendees were asked to complete them before leaving. All training sessions were rated excellent (32%) or good (68%) by the respondents. Suggestions for improving the training will be incorporated into next year's training.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2006-07
STAFF TRAINING

New Employee Training

All new employees watch the video "I Am Water" during employee orientation. This 11 minute video discusses the water cycle, drinking water sources and treatment, groundwater recharge and contamination, subsidence, water recycling, water quality, urban runoff pollution, flooding, and the District's education program. This year 37 new employees attended the orientation.

Other Staff Training

Below is a list of staff training that was completed that has an impact on improving storm water quality and pollution prevention.

One District staff attended River Morphology and Applications July, 2006

Seventeen District staff attended various seminars offered by the Pesticide Applicators Professional Association on July 19, 2006, November 2, 2006, November 14, 2006, December 12, 2006, and March 21, 2007.

One District staff attended Highway Bridge Design August 24-25, 2006.

One District staff authored and presented a paper at MFA in San Diego in September 2006.

One District staff attended the National Association of Flood and Stormwater Management Association Conference September 6-8, 2006.

One District staff authored and presented two papers at the Water Environment Federation Annual Conference (WEFTEC 2006) October 2006.

One District staff attended HAZWOPER 8-hour Refresher in October 2006 and three staff attended in April 2007.

One District staff attended Fluvial Geomorphic Analysis and Stable Channel Design on January 24, 2007.

Five District staff attended the Environmental Connection Erosion Control Conference February 11-16, 2007.

One District staff attended Streambank Stabilization on March 21, 2007.

One District staff attended Migrating from ArcView 3 to ArcView 9 on March 22, 2007.

Mr. Bruce H. Wolfe
Executive Officer
San Francisco Bay Region
Regional Water Quality Control Board
1515 Clay Street, Suite 1400
Oakland, CA 94612

Subject: Submittal of FY 2007-2008 Annual Report

Dear ~~Mr. Wolfe~~ Bruce:

I am pleased to submit the Annual Report for implementation of the Santa Clara Valley Urban Runoff Pollution Prevention Program's (SCVURPPP's) Urban Runoff Management Plan (URMP) during fiscal year 2007-2008. Submittal of this Annual Report fulfills Provision C.6 of NPDES Permit No. CAS029718 (Order 01-024 as amended). The report provides documentation of the SCVURPPP's and the Co-permittees' activities; evaluation of the effectiveness of these activities; and measures for continuous improvement toward achieving the SCVURPPP goals.

Sections 1 and 2 of the Annual Report describe activities conducted by the SCVURPPP on behalf of the Co-permittees, in the areas of program management, permit management and continuous improvement. Section 3 contains information on the Program's local and regional public information/participation program including the Watershed & Outreach efforts coordinated with the Santa Clara Basin Watershed Management Initiative (SCBWMI). Section 4 contains information on the Program's two pronged monitoring approach covering: environmental monitoring and assessment, and programmatic monitoring for FY-07-08. Section 5 covers the Program's watershed management measures including the work that Program and Co-permittees have conducted to both support the SCBWMI and integrate both efforts. Section 6 covers the Program's pesticide management activities to comply with Provision C.9.d.and Section 7 contains a report of the Program's Mercury Pollution Prevention Activities conducted during FY 07-08 per Provision C.9.c

Section 8 describes the Program's efforts during FY 07-08 to assist Co-permittees in addressing and controlling development and re-development as it relates to stormwater quality and flow through the development project planning, review and approval process, per Provision C.3. Section 9 contains the Co-permittees' IND and IC/ID Summary Tables for FY 07-08. Co-permittee summary tables are also included in each Co-permittee Annual Report and contain similar information to what is found within Section 9 of the Program's *FY 05-06 Annual Report.*

111 West Evelyn Avenue, Suite 110 • Sunnyvale, CA 94086 • tel: (408) 720-8811 • fax: (408) 720-8812
1410 Jackson Street • Oakland, CA 94612 • tel: (510) 832-2852 • fax: (510) 832-2856
1-800-794-2482

Section 10 (bound in two separate volumes) contains the Co-permittees' FY 07-08 Annual Reports, prepared in accordance with the Water Board staff document entitled *Suggested SCVURPPP Co-permittee Annual Report Format* (Draft) dated May 29, 2003. Each Co-permittee Annual Report includes a cover letter summarizing local program highlights, accomplishments and continuous improvement items; and a certification statement.

In late July 2008, the Program and Co-permittees was selected to receive two awards in recognition of programs and efforts designed to protect water quality. They include the California Stormwater Quality Association (CASQA) Outstanding BMP Implementation Project Award for developing the Program's *Trash BMP Tool Box*; and the CASQA Outstanding Regional Stormwater News, Information, Outreach and Media Project Award for implementing the Santa Clara Valley Green Gardener Training and Outreach Program. Both awards will be presented at the Annual CASQA Conference in Oakland on September 23, 2008.

During FY 07-08, the Program continued the awards program for exemplary site designs to protect water quality. This awards program recognizes Santa Clara Valley's public agency and private development community leaders who are solving site design challenges, reducing stormwater pollution and runoff quantity, and meeting the requirements of the NPDES permit. The 2008 award winners included:

- Exemplary Private Project, Residential – "Modern Ice" Multi-family Housing Project, San Jose
- Exemplary Private Project, Commercial – IdeAs (Integrated Design Associates, Inc.), San Jose
- Honorable Mention:
    - Santa Clara Valley Water District Water Quality Laboratory, San Jose
    - Verizon Wireless Maintenance Switch Center, Sunnyvale
    - Fowler Creek Community Park, San Jose

Please contact me if you have any comments or questions. We look forward to working with you to successfully address new challenges during FY 08-09.

Very truly yours,

Adam

Adam W. Olivieri, Dr. P.H., P.E.
Program Manager

CREDITS

This Annual Report was a collaborative effort of the fifteen agencies participating in the Santa Clara Valley Urban Runoff Pollution Prevention Program (Program). EOA, Inc., as the Program management consultant, coordinated and compiled the Annual Reports submitted by the fifteen Co-permittees, wrote Sections 1 through 9, and was responsible for the overall preparation of the Program's Annual Report. The Program expresses its appreciation to all those who contributed to this eighteenth Annual Report.

SECTION 1

INTRODUCTION

040429

1. INTRODUCTION

BACKGROUND

Program Description

The Santa Clara Valley Urban Runoff Pollution Prevention Program ("Program") is an association of thirteen cities and towns in Santa Clara Valley, the County of Santa Clara, and the Santa Clara Valley Water District ("Co-permittees") that share a common permit to discharge stormwater to South San Francisco Bay. The Program incorporates regulatory, monitoring and outreach measures aimed at reducing pollution in urban runoff to the "maximum extent practicable" to improve the water quality of South San Francisco Bay and the streams of Santa Clara Valley. The Program is organized, coordinated, and implemented in accordance with a Memorandum of Agreement (MOA) signed by the Co-permittees in 1990, 1999, 2005 and 2006. The MOA covers the responsibilities of each Co-permittee and a cost-sharing formula for joint expenditures.

In June 1990, the San Francisco Bay Regional Water Quality Control Board (Water Board or RWQCB) issued the Program its first NPDES permit.[1] The permit was reissued in 1995[2] and 2001.[3] On October 17, 2001, the Water Board amended the permit[4] to include expanded requirements for controlling pollutants from new and redevelopment activities (Provision C.3.). On July 20, 2005, the Water Board approved a second amendment which revised Provisions C.3.c. and C.3.f.[5]

The Program's Management Committee, consisting of one designated representative from each Co-permittee, is the official decision-making body for the Program. At the inception of the Program, the Santa Clara Valley Water District took the lead responsibility for management of the Program. In September 1997, the Management Committee retained EOA, Inc. to provide Program management services and designated the District as the Program's fiscal agent. On July 1, 2005, the City of Sunnyvale became the Program's new fiscal agent.

The Program's Urban Runoff Management Plan

The Program and Co-permittees submitted a *Storm Water Management Plan* (SWMP) as part of the application for its 1995 NPDES permit renewal. The 1995 Permit required the Program to develop performance standards[6] for various stormwater control measures and incorporate them in a revised management plan by September 1, 1997. The revised plan, called the *Urban Runoff Management Plan* (URMP) because of its focus on stormwater pollution prevention efforts in urban areas, was completed and submitted to the Water Board on September 1, 1997 and subsequently approved by Water Board staff (7/10/98 and 12/14/98 letters). In addition, the URMP is incorporated into the urban runoff permit. In 2000 and 2005, updated URMPs were submitted to the Water Board as part of permit renewal applications.

---

[1] NPDES Permit No. CAS029718, Order No. 90-094.
[2] NPDES Permit No. CAS029718, Order No. 95-180 (as amended 7/21/99).
[3] NPDES Permit No. CAS029718, Order No. 01-024 (2/21/01).
[4] NPDES Permit No. CAS029718, Order No. 01-119, Amendment Revising Provision C.3. (10/17/01).
[5] NPDES Permit No. CAS029718, Order No. R2-2005-0035, Amendment Revising Order 01-119 (7/20/05).
[6] Performance standards are defined as "the level of implementation necessary to demonstrate control of pollutants in stormwater to the maximum extent practicable."

The URMP consists of an area-wide plan and individual Co-permittee plans describing what the fifteen Co-permittees will do, collectively and individually, to reduce urban runoff pollution. The URMP describes the goals and objectives of the Program and its various elements, including monitoring and watershed management measures.

The URMP also contains model performance standards that may be modified as appropriate to fit local conditions and are implemented by the Co-permittees. These include:

- Illicit Connection and Illegal Dumping (IC/ID) Elimination Activities
- Industrial/Commercial Discharger (IND) Control Program
- Public Streets, Roads, and Highways Operation and Maintenance
- Storm Drain System Operation and Maintenance
- Water Utility Operation and Maintenance
- Planning Procedures for New Development and Redevelopment
- Construction Inspection
- Pest Management
- Rural Public Works Maintenance and Support

In addition, the URMP presents a framework for the relationship between Program area-wide and Co-permittee specific Public Information/Participation (PI/P) activities that the Program and Co-permittees use to develop and conduct PI/P tasks.

In early FY 04-05, Program staff updated the URMP to include the new and revised model performance standards and other Management Committee-approved multi-year plans (e.g., Guidelines for Reduction and Management of Mercury-Containing Products, revised Multi-Year Receiving Waters Monitoring Plan, Pesticide Management Work Plan, sediment assessment Work Plan, CAP/NAP approach, Trash Work Plan and goals statement, Watershed Education and Outreach strategy, etc.). The revised Program URMP was part of the NPDES permit reapplication package submitted to the Water Board on February 24, 2005.

The Program implements watershed management through its participation in the Santa Clara Basin Watershed Management Initiative (SCBWMI). The SCBWMI was established (by the EPA, State Water Resources Control Board and Water Board) to manage water resources within the Santa Clara Basin watersheds. Stakeholders that include local, state and federal government agencies; business, agriculture and industry associations; and environmental and civic groups guide the SCBWMI. The Program has been an active participant in the SCBWMI Core Group and its subgroups. The Program is working through the SCBWMI to: 1) identify and assess beneficial uses in the watershed within the urban area; and 2) identify and prioritize reasonable urban runoff control strategies.

Co-permittee Urban Runoff Management Plans

Each Co-permittee has developed an URMP tailored to its local characteristics. The Co-permittee URMPs contain strategies for local urban runoff controls, covering each of the Program elements (Industrial/Commercial Discharger Control, New Development and Construction, etc.) that are applicable to local conditions. The Co-permittee URMPs include:

- Performance standards (using the Program URMP's model performance standards as a template);
- Work Plans to implement performance standards;

- Description of the Co-permittee's legal authority;
- Best management practices (BMPs); and
- Standard operating procedures (SOPs) that detail how control measures will be carried out from day-to-day.

The Co-permittees also have responsibilities to conduct local PI/P programs, properly maintain corporation yards, conduct staff training and participate in Program and SCBWMI activities as appropriate.

The general relationship between the NPDES Permit, the Program's URMP and the Co-permittees' URMPs is shown on Figure 1-1.

In accordance with Permit Provision C.2.b., all Co-permittees updated their URMPs and submitted the revisions to the Water Board on September 1, 2004. The updated Co-permittee URMPs, which were part of the NPDES permit reapplication package submitted to the Water Board on February 24, 2005, included a summary table indicating what changes were made and/or what sections were added to the URMP's since the last version was updated in October 2000.

Program Work Plan

By March 1 of each year, the Program submits to the Water Board a draft Work Plan for implementation of the Program's URMP for the coming fiscal year, in accordance with NPDES Permit Provision C.6.b. The Work Plan includes clearly defined tasks, responsibilities and schedules to be implemented by the Program and Co-permittees. It also includes development of new, or modification of existing performance standards (Provision C.2.b), provides the Work Plan for implementing Provision C.3, describes planned monitoring activities (Provision C.7), describes pollutant-specific requirements (Provision C.9) and defines the Program's role relative to Watershed Management efforts (Provision C.10).

The Work Plan builds on the baseline efforts conducted by the Program and Co-permittees through a "continuous improvement" process, in which the Program seeks new opportunities to control stormwater pollution. The continuous improvement process contained in the URMP is illustrated on Figure 1-2. The Work Plan includes a discussion of continuous improvement tasks that were identified, in part, during individual Co-permittee performance reviews, effectiveness evaluations in previous annual reports, and cooperative efforts between the Program and groups that include the Bay Area Stormwater Management Agencies Association (BASMAA), SCBWMI and Regional Monitoring Program (RMP).

On March 1, 2008, the Program's *FY 08-09 Work Plan* was submitted to the Water Board. No comments were received on the submittal.

Program Annual Report

In accordance with NPDES Permit Provision C.6.a., the Program must submit an Annual Report by September 15 of each year. In addition, the Annual Report serves as an important internal Program tool in the cycle of planning, implementation, evaluation and continuous improvement. The Annual Report is the mechanism for documenting the status of planned activities, evaluating the effectiveness of those activities and identifying potential improvements. An additional evaluation mechanism is holding local program performance review meetings with each of the Co-permittees. These meetings serve as external evaluations, while the Annual

Report is a self-evaluation by the Program. The results of the Annual Report and the performance reviews are used to assist the Program and Co-permittees in revising their Work Plans for the following year, as part of the Program's continuous improvement process. During FY 07-08, Water Board staff did not conduct performance review meetings. On Monday, September 17, 2007 the Program's *FY 06-07 Annual Report* was submitted to the Water Board. To date, the Program has not received any comments on the *FY 06-07 Annual Report*

The goals of this *FY 07-08 Annual Report* are to: 1) meet specific permit requirements for reporting; 2) provide an efficient mechanism for reporting and self-evaluation without duplicating information in the work plan or urban runoff management plans (URMPs); and 3) identify areas for continuous improvement.

ORGANIZATION OF REPORT

The *FY 07-08 Annual Report* consists of two volumes and one appendix placed in three-ring binders. Volume I will contain Program's activities and Volume II will consist of Co-permittees' activities. Each section contains relevant tables at the end of the section.

Following Section 1, Volume I of the *FY 07-08 Annual Report* describes the implementation of *FY 07-08 Work Plan* activities in the following sections:

FY 07-08 Annual Report	FY 07-08 Work Plan
Section 2 – Program Management	Program FY 07-08 Budget Performance Standard Revisions Program Continuous Improvement Tasks
Section 3 – Public Information/Participation (PI/P) Activities	FY 07-08 PI/P Work Plan
Section 4 – Monitoring	Multi-Year Year Receiving Waters Monitoring Plan FY 07-08 Annual Monitoring Plan Trash Management and Assessment Tasks
Section 5 – Watershed Management Measures	FY 07-08 Monitoring Plan (activities undertaken with/for the SCBWMI)
Section 6 – Pesticide Management	FY 07-08 Pesticide Management Work Plan
Section 7 – Mercury Pollution Prevention Activities	FY 07-08 Mercury Pollution Prevention Work Plan
Section 8 – New and Redevelopment Control Measures	FY 07-08 C.3. Work Plan

Section 9 contains the Co-permittees' IND and IC/ID Summary Tables for FY 07-08. Each Co-permittee summary table provides information on the required categories as described in the Industrial/Commercial Discharger Control Program and Illicit Connection & Illegal Dumping Elimination Activities Performance Standards. Co-permittee summary tables are also included in each Co-permittee Annual Report and will contain similar information to what is found within Section 9 of the Program's *FY 07-08 Annual Report*. Each Co-permittee includes a breakdown of the levels of enforcement action taken for each IND inspection.

Section 10 contains the Co-permittees' FY 07-08 Annual Reports. Each Co-permittee report includes a cover letter summarizing local program highlights, accomplishments and continuous improvement items; and a certification statement. Co-permittees have prepared and submitted the following information (with appropriate attachments) in accordance with the Water Board's document entitled *Suggested SCVURPPP Co-permittee Annual Report Format* (Draft) dated May 29, 2003:

- IC/ID Elimination Activities
- Industrial/Commercial Discharger Control Program
- Public Agency Activities
  - Public Streets, Roads and Highways O&M (including Corporation Yards)
  - Rural Public Works O&M
  - Storm Drain O&M
  - Water Utility O&M
  - Other Public Agency Activities (Golf Courses, Parks, Ponds, etc.)
- New Development Planning Procedures
- Construction Inspection
- Public Information and Participation
- Pesticide Management Activities
- Mercury Pollution Prevention Activities
- Copper Action Plan/Nickel Action Plan
- Trash Inventory and Management
- Water Quality Monitoring
- Staff Training Summary Table

Other elements that do not fall under the above categories (e.g., PCB Control Program (C.9.e.), Control Program for Sediment (C.9.f.) and Watershed Management (C.10.)) are provided by each respective Co-permittee conducting the activity.

2. PROGRAM MANAGEMENT

PROGRAM BUDGET

FY 07-08 Budget

The FY 07-08 Program Budget is summarized in Table 2-1. The budget of $3,287,116 represents approximately the same amount of funding as the FY 06-07 budget. The Program budget has been held at the same level over the past six years while significant work has been accomplished and additional fees and collaboration contributions (i.e., BASMAA, RMP and CEP) have increased. The Program has been able to juggle timing and resources to allow holding the budget flat[1]. It is important to note that the Program funds collected from the Co-permittees represent only what is spent on Program-wide activities. It does not include what the Co-permittees are spending to implement controls within their jurisdictions.

FY 08-09 Budget

During FY 07-08, the FY 08-09 Budget was prepared by Program staff, reviewed and approved by the Budget Ad Hoc Task Group and the Management Committee, and submitted as part of the *FY 08-09 Draft Work Plan*. The total budget for FY 08-09 is $3,500,000. The Management Committee is concerned that collaborative resource demands are increasing and are a significant percentage of the overall budget. As a result, these demands as well as the increased need for in-kind resources to participate in various regulatory programs continue to reduce the overall operating budget. Further, Co-permittees have the limited ability to increase current funding sources. The Management Committee is concerned that many of the potential new permit requirements, as part of the Municipal Regional Permit (MRP), will be very costly and not provide any real water quality benefit.

GENERAL PROGRAM MANAGEMENT ACTIVITIES

Management Committee Meetings

The Management Committee continues to meet monthly, on the third Thursday of the month from 9:30 a.m. to 11:30 a.m., to discuss and make decisions regarding Program business. Agendas and supporting information were mailed and posted on the Program's website (www.scvurppp.org) approximately one week in advance of each meeting and handouts were presented at each meeting. The meeting agendas were posted at Sunnyvale City Hall at least 72 hours prior to each meeting and meetings were held in the City of Sunnyvale's West Conference Room. A list of current Management Committee representatives is provided as Appendix A-1 and is on the Program's website.

Ad Hoc Task Group and Work Group Meetings

In order to effectively manage the area-wide activities required by the NPDES permit, Ad Hoc Task Groups are formed by the Management Committee to address specific Program elements

[1] Through the FY 06-07 fiscal year, the Overall Program Budget has included a line item to cover the State NPDES permit fees. Since the inception of the Program, permit application and/or annual fees have increased from $10,000 per year to approximately $162,000 per year. In FY 06-07, Co-permittees initiated direct payment of these fees but the funds still came directly from the overall program budget. Starting with FY 08-09, the approved Program budget eliminated the estimated permit fee line item. Co-permittees are now responsible for covering the costs.

or major work items. These are groups of Co-permittee representatives and Program staff with expertise in the issue at hand. Once the Ad Hoc Task Group's assignment is completed to the satisfaction of the Management Committee, the group is disbanded. The Management Committee reviews the need for Ad Hoc Task Groups on a quarterly basis. Ad Hoc Task Groups may form smaller work groups with subsets of their members to focus on specific issues in more detail. The work groups bring information back to the overseeing Ad Hoc Task Group for decision making.

A Program management organizational chart showing current Ad Hoc Task Groups and work groups is provided on the Program's website. Ad Hoc Task Groups and work groups generally meet on an as-needed basis, although some establish a regular meeting schedule.

Table 2-2 presents a list of the FY 07-08 Ad Hoc Task Groups, their members and their accomplishments. These groups worked with Program staff to provide products or recommendations to the Management Committee. There were a total of 24 Ad Hoc Task Group (AHTG) and work group meetings held during the fiscal year. In addition, task group and work group products were often distributed for review and comment via electronic mail ("virtual meetings"), thus minimizing the number of actual meetings.

The Watershed Education and Outreach (WE&O) Ad Hoc Task Group defines the final work plans for and oversees the implementation of FY 07-08 PI/P projects. An evaluation of PI/P projects conducted during FY 07-08 is provided within Section 3, Table 3-1. During FY 07-08, five work groups formed under the WE&O AHTG were active: Pesticide User Outreach Work Group, Mercury Pollution Prevention Work Group, Script Review Work Group, Alviso Education Center Work Group, and Brochure Development Work Group. One work group formed under the C.3 Provision Oversight (C3PO) AHTG, the HMP Implementation Phase Work Group, was active during FY 07-08, as described in Section 8. In addition, the Trash AHTG continued to be very active in FY 07-08.

Program Management Activities

Program management activities provided by Program staff during the period July 1, 2007 through June 30, 2008 are summarized in Table 2-3. These tasks, which are discussed within the Annual Report, are separate from the permit management and technical support provided by Program staff. General types of activities completed during FY 07-08 include the following:

- Responded to calls on the Program's and Watershed Watch toll-free numbers and distributed materials to the public;
- Facilitated and supported Management Committee and Ad Hoc Task Group meetings;
- Developed the FY 08-09 Program Budget and tracked expenditures;
- Communicated with and assisted the Program's legal counsel;
- Prepared and submitted the Program's *FY 06-07 Annual Report, FY 08-09 Draft Work Plan* and other permit-required submittals;
- Provided guidance to Co-permittees on technical and Program-related issues;
- Conducted and/or assisted with five workshops relating to the use of Bay Area Hydrology Model (BAHM) software tool; use of municipal maintenance training modules; construction site management; draft statewide construction general permit ; and implementing stormwater requirements in new development and redevelopment projects.
- Continued to implement and/or track monitoring projects being performed by the Program;

- Oversaw development and implementation of the Watershed Education & Outreach Campaign;
- Represented the Program at external organization meetings;
- Continued to oversee and/or assist with implementation of the Pesticide User Outreach and Mercury Pollution Prevention Outreach Plans; and
- Participated in the Regional Media Relations, Regional IPM Partnership and Regional Advertising Campaign projects (through BASMAA).

During FY 07-08, a significant amount of Program staff time was devoted to preparation of permit-required submittals, additional Water Board submittals and other Program-related work products. These activities are discussed in Section 2, Permit Management Activities. Additional details on completed Program management activities are provided in the memorandum entitled *Review of FY 07-08 Program Management Services* within Appendix A-2.

External Organization Meetings

Program staff represented the Program at 182 external organization meetings during FY 07-08. These included meetings of the following organizations (Program staff positions indicated in parentheses):

- Bay Area Stormwater Management Agencies Association (BASMAA) – BMP Sizing Tool Work Group, Executive Board (Vice Chair), IPM Partnership Committee, Media Relations Committee, Monitoring Committee, Regional Advertising Campaign, and meetings related to the Municipal Regional Permit;
- Regional Monitoring Program Technical Review Committee, Steering Committee, Pathways and Loadings Work Group ;
- Urban Pesticide Committee (UPC);
- Water Board Mercury Council;
- BASMAA/Water Board PCB Stakeholders Work Group;
- California Stormwater Quality Association (CASQA) – Board of Directors and Executive Program Committee;
- Bay Area Macro-invertebrate Bioassessment Information Network.

In addition, Program staff participated in 26 meetings relating to the Santa Clara Basin Watershed Management Initiative (SCBWMI). These included meetings of the following groups:

- Core Group
- Watershed Assessment and Monitoring Subgroup; and
- Land Use Subgroup.

Program staff prepared meeting summaries for the Management Committee highlighting items of interest and required action items. Summaries are routinely included in Management Committee mail-out and handout packets and posted on the Program's website. Tables listing all internal and external meetings attended during FY 07-08 are attached to the memorandum entitled *Review of FY 07-08 Program Management Services* within Appendix A-2.

Evaluation of Effectiveness

During FY 07-08, Program staff continued to implement policies and procedures related to consideration of funding requests, subcontracting, budget tracking and other improvements in Program management identified in past years. A significant amount of staff time during FY 07-08 was devoted to participation in the Municipal Regional Permit (MRP) development process; implementation of C.3. and HMP requirements; and preparation of permit-required submittals, additional Water Board submittals and other Program-related work products. Despite these resource needs, Program staff completed the general Program management tasks on schedule. The Program budget development and mid-year and year-end reviews were completed within a reasonable timeframe.

The "Work Plan" for many of the Program management activities is the scope of work in EOA's contract for Program management services. Each year, Program staff prepares a self-audit report on Program management services, including significant accomplishments, continuous improvement for existing program elements and feedback regarding Program status, as required by Section 200.5 of the Program Bylaws. A draft of this year's report, *Review of FY07-08 Program Management Services,* was submitted to the Management Committee on March 26, 2008 and approved by the Management Committee on April 16, 2008. The final version of the *Review of FY07-08 Program Management Services* is provided in Appendix A-2.

Continuous improvement items related to Program management are normally identified from three sources: the Program's performance review with Water Board staff; Water Board staff comments on the prior year's Annual Report; and/or Management Committee comments on the draft *Review of Program Management Services* memorandum submitted each year. There were no continuous improvement items identified through these sources for FY 07-08. An update and plan of action for continuous improvement items remaining from previous years are presented within Table 2-4 of this Annual Report.

To satisfy Bylaws Section 200.4, Program staff prepared an *Annual Budget Review Compilation Report* ("ABC Report") that was submitted to the Management Committee as an addendum to the report on Program management services. The addendum contained the FY 06-07 budget, periodic budget status reports, mid-year budget reconciliation, final budget closeout balance sheet and other supporting documentation. The FY 06-07 Annual Budget Review Compilation Report ("ABC Report") was distributed (by electronic mail) to the Management Committee on September 19, 2007. The Management Committee approved the ABC Report on September 20, 2007.

PERMIT MANAGEMENT ACTIVITIES

This section describes tasks related to permit management (i.e., compliance with permit requirements and Co-permittee guidance) completed by Program staff during FY 07-08.

Reporting Requirements

In addition to the Program's Annual Report and Annual Work Plan[2], the Program completed the following permit-required items during FY 07-08:

1. *Pilot Sediment Quality Triad Study: Coyote Creek Watershed, Santa Clara County,*

[2] To date, no comments have been received from the Water Board on the Program's *FY 07-08 Work Plan.*

California, per permit provision C.10.b, submitted on September 17, 2007.

2. *Copper and Nickel Action Plan FY 06-07 Accomplishments and FY 07-08 Work Plan*, submitted September 17, 2007, per POTW order 00-109 and permit provisions C.9.a and b.
3. *Monitoring and Assessment Summary Report: Santa Clara Basin Creeks (2002-2007)*, per permit provision C.10.b, submitted September 17, 2007.
4. *Upper Penitencia Creek Sediment Source Assessment*, per permit provision C.9.f.iii, submitted September 15, 2008.

Additional submittals to the Water Board included:

- Submitted *FY 06-07 Co-permittee Street Sweeping Activity Summary* on September 17, 2007 (as part of the Program's *FY 06-07 Annual Report*).
- Submitted *Summary of Co-permittee Street Sweeping Activities and estimated Mean Pollutant Load Reduction for Copper and Nickel- FY 2006- 2007* on September 17, 2007 (as part of the Program's *FY 06-07 Annual Report*).
- Submitted *Summary of Co-permittee Street Sweeping Activities and estimated Mean Pollutant Load Reduction for Lead and Zinc- FY 2006- 2007* on September 17, 2007 (as part of the Program's *FY 06-07 Annual Report*).
- Submitted *Trash Problem Area Evaluation Results- FY 06-07* (includes tables and figures) on September 17, 2007 (as part of the Program's *FY 06-07 Annual Report*).

A summary of the Program's permit-required submittals, Water Board staff comments, Program responses, and Water Board staff approvals during the past several years (beginning with the most recent submittals) is included within Appendix A-3.

Guidance to Co-permittees

The Program sponsored five workshops to educate Co-permittee staff and others about important issues and program requirements, as described below. The workshop flyers, agendas, attendance lists, and evaluation summaries for listed workshops are presented in Appendices A-4 through A-7.

Bay Area Hydrology Model (BAHM) Computer Training Workshop

On July 17, 2007, the Program co-sponsored two trainings (morning and afternoon sessions) on how to use the Bay Area Hydrology Model (BAHM) software tool. This tool, which simulates pre and post-project hydrology, automatically sizes flow control facilities to meet HMP requirements. Clear Creek Solutions (CCS), the consulting firm who developed the BAHM, provided training which reviewed technical features of the BAHM, including required inputs and outputs; provided hands-on use of the BAHM for flow duration detention facilities; discussed project examples and provided tips and tricks for model use. The workshop attracted 43 participants. Another series of trainings (beginning and advanced sessions) were conducted on November 27-29, 2007 in Fremont and Santa Clara, attracting 93[3] participants. The agenda, evaluation summary, and list of attendees for each of the trainings are provided in Appendix A-4.

Municipal Maintenance "Train-the-Trainer Meeting

[3] 93 out of 120 total slots in six training sessions were filled; some participants attended two sessions (beginning and advanced) and are counted twice.

On November 13, 2007, Program staff held a "train-the-trainer" meeting to review the training modules developed on the following BMPs: corporation yard activities, public streets, roads and highway operation and maintenance, storm drain system operation and maintenance, municipal mercury pollution prevention, pest management and municipal mercury pollution prevention. To ensure effective Co-permittee training sessions, Program staff has repackaged each training protocol into smaller, focused modules. This approach will allow Co-permittees to train municipal staff on certain key municipal elements in shorter blocks on time (e.g., 15 minutes). Each module was distributed to each of the seventeen meeting participants and placed on the Program's website (www.scvurppp.org). The agenda, evaluation summary, and list of attendees for each of the trainings are provided in Appendix A-5.

Construction Site Management Workshop

On December 3 and 4, 2007, the Program co-sponsored and helped conduct training of agency staff on construction site management. Topics covered included: construction site regulations and responsibilities; effective erosion and sediment control BMPs; inspection, monitoring and sampling; site plan update procedures; post construction requirements and demonstration of erosion and sediment control products by vendors. Evaluation forms showed that the workshops were successful in educating attendees (see evaluation summary within Appendix A-6). The workshops attracted 93 participants.

Sharing Experience with Implementation of Stormwater Requirements at Development Projects

On June 3, 2008, the Program conducted a one-day workshop to assist Co-permittees with implementation of Provision C.3. The workshop, which attracted 117 participants, was designed to address topics of interest to municipal and private planning/engineering staffs. The morning sessions presented case studies of implementation of C.3. on a variety of projects; an update on stormwater regulations; a discussion of green building standards (e.g., LEED) and the C.3. requirements; and an overview of the latest trends and approaches in low impact development (LID). The afternoon sessions focused on inspection and maintenance of stormwater treatment measures and landscaping, both during and after construction, and local experience with inspection programs. The workshop also featured exhibits for six vendors of stormwater control measures and related products. The agenda and evaluation summary for the workshop are presented within Appendix A-7.

Other Workshops and Conferences

Program staff and Co-permittees also participated in the following workshops conducted by other agencies:

- CASQA Conference, Costa Mesa, CA, presentation by John Fusco entitled "Trash in Urban Creeks- Sources, Pathways and Control Measures: A Tool Box for Decision Makers and Other Interested Stakeholders" (September 11, 2007);
- CASQA Conference, Costa Mesa, CA, presentation by John Fusco entitled "Assessing Program Effectiveness Using A Sediment Quality Triad Approach" (September 11, 2007);
- San Francisco Bay Regional Quality Water Control Board Meeting, Oakland, CA, presentation by Jon Konnan entitled "TMDL for PCBs in San Francisco Bay: BASMAA's Key Points" (September 12, 2007);
- 2007 California Chapter of the American Planning Association Conference, San Jose,

CA, presentation by Jill Bicknell entitled "Site Design Elements for Protecting Water Quality" (October 1, 2007);

- American Public Works Association (APWA) South Bay Chapter Meeting, San Jose, CA, presentation by Jill Bicknell entitled "Stormwater C.3 Requirements for Development Projects: What's Current and What's Coming" (October 17, 2007).
- CELSOC Santa Clara County Chapter Meeting, San Jose, CA, presentation by Jill Bicknell entitled "Stormwater C.3. Requirements for Development Projects: What's Current and What's Coming" (January 7, 2008).
- Bay Area Macroinvertebrate Bioassessment Information (BAMBI) Workshop, Oakland, CA; presentations by Chris Sommers entitled "Benthic Index of Biotic Integrity (IBI) for San Francisco Bay Area Creeks: Project Update January 2008" (January 30, 2008);
- San Francisco Bay Regional Quality Water Control Board Meeting, Oakland, CA, presentation by Jon Konnan entitled "TMDL for PCBs in San Francisco Bay: BASMAA Comments" (February 13, 2008);
- San Francisco Bay Regional Quality Water Control Board Meeting, Oakland, CA, presentation by Chris Sommers entitled "BASMAA Key Comments on Provision C.10 – Trash Reduction" (March 11, 2008);
- San Francisco Bay Regional Quality Water Control Board Meeting, Oakland, CA, presentation by Jon Konnan entitled "Municipal Regional Permit PCBs and Mercury Provisions: BASMAA Key Points" (March 11, 2008);
- San Francisco Bay Regional Quality Water Control Board Meeting, Oakland, CA, presentation by Jill Bicknell entitled "BASMAA Comments on MRP Provision C.3. - New Development and Redevelopment Requirements" (March 11, 2008).
- San Francisco Bay Regional Quality Water Control Board Meeting, Oakland, CA, presentation by Adam Olivieri entitled "SCVURPPP Comments on MRP" (March 11, 2008).
- Reining in the Rain: California Coast LID and Permeable Pavement Workshop, Oakland, CA, presentation by Jill Bicknell entitled "LID for Stormwater Treatment and Hydromodification Management" (April 23, 2008).
- California NPS Conference, San Diego, CA, presentation by Jill Bicknell entitled "Potential Solutions: Flow Duration Control Approach" (May 7, 2008).
- California NPS Conference, San Diego, CA, presentation by Jill Bicknell entitled "Hydromodification Management Tools" (May 7, 2008).

DEVELOPMENT OF NEW OR REVISED MODEL PERFORMANCE STANDARDS

The Program developed model performance standards (PS) in 1996. Model PS were accepted by the Water Board in June 1997. Co-permittees adopted the model PS that applied to their specific conditions. The PS were incorporated into the September 1, 1997 Urban Runoff Management Plan (URMP) and into the Co-permittees' local URMPs. The Program and local URMPs were updated by October 2000 to include revisions to performance standards for Industrial/Commercial Discharger Control, Illicit Connection/Illegal Dumping Elimination and Storm Drain Operation and Maintenance.

Priorities for recent efforts to revise or create new performance standards have been driven by the requirements in the Program's NPDES permit and/or continuous improvement tasks. All new or revised PS required by the permit have been completed. Future efforts to revise or update existing PS will be identified as part of the permit re-issuance.

LOCAL PROGRAM PERFORMANCE REVIEWS

As part of the Program's continuous improvement process (as described in the 2004 URMP), the Program, Water Board staff and interested outside parties conduct on-site performance reviews of the Co-permittees' local urban runoff management programs. Performance reviews in recent years have focused on one element of the Co-permittees' local programs in detail. Water Board staff did not conduct any performance reviews during FY 07-08.

CONTINUOUS IMPROVEMENT MEASURES

In its annual Work Plans and Annual Reports, the Program presents a list of continuous improvement items to be addressed at the Program level and an approach for implementing them. As discussed earlier under Program Management, continuous improvement items are normally identified from three sources: the Program's performance review with Water Board staff; Board staff comments on the prior year's annual report; and Management Committee comments on the *Review of Program Management Services* memorandum and other Program staff products.

Internal CI tasks identified include updating and maintaining the Program's web site (www.scvurppp.org) to ensure the effective distribution and review of draft and final products; and internal communication with the MC and other interested parties. In addition, Program staff has focused both technical and legal resources on working with Water Board staff (through BASMAA Board meetings and Water Board and Stormwater Subcommittee Workshops) on developing a Municipal Regional Permit that will address the Program's permit re-issuance. Finally, there are a few remaining lower priority continuous improvement tasks from previous years. Their status and updated schedules are provided within Table 2-4 of the *FY 07-08 Annual Report*. Program staff will continue to complete these items during FY 08-09.

PERMIT PROVISION C.1. COMPLIANCE SUMMARY TABLE

The most recent State of California adopted and USEPA approved 303(d) water quality list was approved in 2006 and identifies several "pollutants of concern" in the Lower South San Francisco Bay and creeks in the Santa Clara Basin for which urban runoff is listed as a potential source. Additionally, monitoring data collected the Program can provide evidence that urban runoff may be causing or contributing to an exceedance of water quality standards.

Consistent with Provision C.1 of its NPDES Permit, the Program has prepared a "C.1. Table", which summarizes baseline, enhanced and planned urban runoff controls implemented and investigations conducted to address these pollutants of concern. Table 2-5 summarizes the Program's current and proposed (i.e., FY 07-08) BMPs/programs/investigations for the "pollutants of concern" in the Lower South San Francisco Bay and creeks for which urban runoff is a potential "source". Although urban runoff is listed as a potential source, in reality urban runoff is the transport vehicle and not the actual source. Therefore, key urban sources of the "pollutants of concern" are identified in Table 2-5.

As noted in Table 2-5, additional information on the Program's controls/programs can be found in the following documents:

- Program and Co-permittee 2004 *Urban Runoff Management Plans*
- 1997 *Metals Control Measures Plan*
- Past Annual Report and Work Plans
- Pollutant-specific technical reports (www.scvurppp.org)

In addition, the Program intends to incorporate updates to the summary table as part of the Program's continuous improvement process where new controls/programs will be identified and reported in the Program's Annual Work Plan.

Table 2-1
SCVURPPP Total FY 07-08 Budget

Budget Summary

Item	Budget
Operational Group	
1. Program Management/Administration (EOA)	$454,124
2. Permit Management (EOA)	$494,608
3. Technical Program Management (EOA)	$143,000
4. Legal Services (MOFO)	$87,818
5. Fiscal Agent (City of Sunnyvale)	$50,000
6. RMP Contribution (SFEI) (see Collaborative Budget)	
Subtotal Operational Group	**$1,229,550**
Projects Group	
7. Monitoring Projects (EOA/Subs)	$880,000
8. HMP Technical Assistance/Guidance/Workshops	$130,000
9. PI/P & WEO budget	$383,200
10. Project Monitoring Special Study (10% per MOA – moved to Collaborative Group)	
11. NPDES Permit Renewal	$85,000
Sub-total Project Group	**$1,478,200**
Collaborative Group	
A. Program Monitoring Special Studies	$42,000
B. CASQA Dues (Regional Collaboration)	$15,000
C. TMDL CEP Participation (Regional Collaboration)	$97,000
D. RMP Fee (Regional Collaboration)	$170,910
E. BASMAA Fee (Regional Collaboration)	$85,000
F. WERF Dues	$8,000
Subtotal Collaborative Group	**$417,910**
NPDES Permit fee	**$161,456**
TOTAL FY 07-08 BUDGET	**$3,287,116**

Table 2-2
FY 07- 08 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
Budget – Close-out old budgets; review and approve proposed budgets; review and provide direction to the MC on budget & policy issues. Permit Provision: Program Management	Lorrie Gervin, Sunnyvale – Chair Melody Tovar, San Jose Steven Osborn, San Jose Rick Mauck, Santa Clara Cheri Donnelly, Cupertino Kelly Carroll, West Valley Communities Dave Chesterman, SCVWD Brett Calhoun, SCVWD Roger Narsim, SCVWD (former member) Jill Bicknell, Program staff Adam Olivieri; Program Staff	10/16/97		Reviewed and approved FY 08-09 budget; conducted mid-year FY 07-08 budget review and recommended adjustments to the MC. Reviewed and approved the Program Manager's Self-Audit Report. The Budget AHTG typically meets three times a year. A large amount of work (i.e., review of documents) is completed by electronic mail.
Monitoring* - Review & approve monitoring project priorities and products for consistency with Program and WMI goals, and with NPDES permit requirements. * Meets quarterly in concert with SCBWMI WAMS meetings. Permit Provision: C.7. and C.10	Marilyn Nickel, Milpitas Dave Drury, SCVWD Kristy McCumby-Hyland, Sunnyvale Chris Sommers, Program staff James Downing, San Jose Melody Tovar, San Jose Steven Osborn, San Jose Jan O'Hara, RWQCB Brett Calhoun, SCVWD Kate Slama, SCVWD Dave Chesterman, SCVWD Adam Olivieri; Program Staff Kelly Carroll, West Valley Communities Brad Eggleston, Palo Alto Trish Mulvey, CLEAN South Bay Larry Johmann, GCRCD Mondy Lariz, SPCWC	6/19/97		Met jointly with WMI Watershed Assessment and Monitoring Subgroup (WAMs) to provide input on FY 08-09 Receiving Waters Monitoring Plan, FY 07-08 Monitoring Results, and SSI and MDDB updates.

Table 2-2
FY 07-08 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
Municipal Employee Training Protocols – develop stormwater BMP training curriculum with modules for different activities that can be customized by each co-permittee. Permit Provision: C.2.	Kristy McCumby-Hyland, Sunnyvale Melody Tovar, San Jose Eric Anderson, Mountain View Roger Lee, Santa Clara (former member) John Fusco, Program Staff Kate Slama, SCVWD Cheryl Dayley, San Jose Cheri Donnelly, Cupertino	4/15/99		Did not meet in FY 07-08. "Train the Trainer" Workshop held November 13, 2007 to review BMP training modules.
PI/P and WEO – Develop list of proposed Program PI/P activities for annual work plan using process outlined in the PI/P Strategy, and work with Program staff and consultant to develop work plans for and implement the Watershed Education and Outreach (WEO) Campaign. Permit Provision: C.4. **(Work Groups under PIP/ WEO are:** Scripts Review Schools Outreach Alviso Education Program IPM Pesticide Outreach Mercury P2 Outreach HHW Program Work Group Brochure Development Work Group	Mary Morse, San Jose – Chair Cheri Donnelly, Cupertino Delia Romero, West Valley Communities (former member) Bruce Frisbey, San Jose Eric Anderson, Mountain View Karin Hickey, Santa Clara Sally Personett, Sunnyvale Lorrie Gervin, Sunnvyale Julie Weiss, Palo Alto Trish Mulvey, CLEAN South Bay Roxan Nasiri, Cupertino (former member) Vishakha Atre, Program Staff Kate Slama, SCVWD	Reformed 5/18/00		Reviewed, approved and implemented the following Watershed Education and Outreach projects: • Watershed Watch Campaign • Watershed Watchers Program at the Don Edwards San Francisco Bay Wildlife Refuge • ZunZun School Assemblies

Table 2-2
FY 07-08 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
Industrial Inspection – Revise performance standard/guidance to include recommendations for enhanced reporting, implement and review results. Permit Provision: C.6.a.i.	John Fusco, Program Staff Eric Anderson, Mountain View Dave Grabiec, Sunnyvale Anastazia Aziz, San Jose Mary Morse, San Jose (former member) Bhavani Yerrapotu, San Jose Jack Lovell, West Valley Communities Brett Calhoun, SCVWD Roger Lee, Santa Clara (former member) Chris Fujimoto, Palo Alto	2/6/01		Did not meet in FY 06-07.
Mercury Pollution Prevention – Assist Co-permittee and Program staffs to implement Mercury P2 Plan tasks. Permit Provision: C.9.c.	Kristy McCumby-Hyland, Sunnyvale Melody Tovar, San Jose Sharon Newton, San Jose James Downing, San Jose Dave Drury, SCVWD Steve Homan, Santa Clara County (former member) Rob D'Arcy, SC County HHW Program Kristin Kerr, Program Staff Mary Morse, San Jose Eric Anderson, Mountain View Cheri Donnelly, Cupertino Julie Weiss, Palo Alto	10/18/01		Developed mercury-containing product use survey, and model guidelines and virtual elimination policy for implementing the Mercury Pollution Prevention Plan. Did not meet in FY 07-08.

Table 2-2
FY 07-08 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
Watershed Analysis – Assist with conduct and review of work plan tasks to conduct watershed analysis and management practice assessment in "other creeks" which may be impaired by sediment. Permit Provision: C.9.f.iii	Brett Calhoun, SCVWD Kristy McCumby-Hyland, Sunnyvale Steve Homan, Santa Clara County (former member) Larry Lind, Los Altos Jim Ervin, San Jose James Downing, San Jose Neil Van Keuren, San Jose Chris Sommers, Program Staff Paul Randall, Program Staff Jae Abel, SCVWD	6/20/02		Finalized Limiting Factors Analysis (LFA) Technical Report for the Upper Penitencia Creek watershed; conducted Sediment Source Assessment (as part of the Sediment Management Practices Assessment of the Upper Penitencia Creek watershed); and conducted a Waterbody Assessment and Sediment Impact Analysis of Saratoga Creek.
Trash – Develop Trash Work Plan, coordinate trash-related activities and assist Program Staff to implement Program tasks. Permit Provision: C.1.	Dave Staub, Santa Clara Cheri Donnelly, Cupertino Kristy McCumby-Hyland, Sunnyvale Brett Calhoun, SCVWD Skip LaCaze, San Jose Sharon Newton, San Jose (former member) Melody Tovar, San Jose Phil Bobel, Palo Alto Chris Rummel, County DEH Steve Homan, Santa Clara County (former member) Lisa Rose, County GALA Trish Mulvey, CLEAN South Bay Jan O'Hara, RWQCB John Fusco, Program Staff Paul Randall, Program Staff Chris Fujimoto, Palo Alto	12/20/01		Finalized *Trash BMP Tool Box: Treatment and Institutional Controls* (includes an introductory technical report and twelve technical information sheets on treatment BMPs and institutional controls for controlling trash. Developed *Pilot Trash Structural Treatment Control Study: Implementation Plan* (details catch basin insert pilot demonstration project within the Cities of San Jose and Sunnyvale).

	Al Oxonian, Campbell Steve Homan, Santa Clara County (former member) Richard Chen, Los Altos Hills (former member) Bill Ekern, SJ Redevelopment Agency Melody Tovar, San Jose Michael Stephenson, SCC Vector Control Salifu Yakubu, San Jose Brett Calhoun, SCVWD Bill Springer, SCVWD Pamela Wu, Santa Clara County Chris Freitas, Santa Clara County Tracy Ingebritsen, Stanford Karla Tompkins, Stanford Larry Lind, Los Altos Amit Mutsuddy, San Jose Iveta Harvancik, Saratoga Julia Nguyen, San Jose Dionne Early, San Jose Jamie McLeod, Sunnyvale Jan Palajac, San Jose			

Table 2-2
FY 07-08 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
WORK GROUP INFORMATION (PIP & WEO Work Groups)				
Script Review – To review scripts created for media use related to the Watershed Watch Campaign (on a short turn around basis), oversee development of Watershed Watch web site and review page content. Permit Provision: C.4.	Sally Personett, Sunnyvale Cheri Donnelly, WVCWP Bruce Frisbey, San Jose Roxan Nasiri, Cupertino (former member) Mary Morse, San Jose Kate Slama, SCVWD Julie Weiss, Palo Alto Vishakha Atre, Program Staff	12/99		Provided input on a number of radio scripts and print ads with a short turnaround time.
Pesticide User Outreach – To help Program staff develop work plans for and implement pesticide user outreach tasks from the Program's Pesticide Management Work Plan. This project combines elements of the IPM Store partnership Work Group and the Household Chemical Management Work Group. It builds on the relationships developed with independent nurseries and hardware stores developed during the previous years of the IPM Store Partnership project. The work group also reviews the Program's Work Plan for pesticide outreach and participates in	Roxan Nasiri, Cupertino (former member) Julie Weiss, Palo Alto Larry Lind, Los Altos Paramjit Uppal, Milpitas Eric Anderson, Mountain View Bruce Frisbey, San Jose Cheryl Dayley, San Jose Mary Morse, San Jose Kara Novogradac, San Jose (former member) Kristy McCumby-Hyland, Sunnyvale Sally Personett, Sunnyvale Kate Slama, SCVWD Cheri Donnelly, Cupertino Rob D'Arcy, Santa Clara Co. Rosemary Lombard, Palo Alto	Reformed 8/02		Reviewed and approved detailed FY 07-08 Work Plan; provided input to Program staff on Regional IPM issues; reviewed and approved materials for the fall advertising campaign, planned, conducted and staffed IPM outreach related events; conducted outreach to stores.

Table 2-2
FY 07-08 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
outreach events. Permit Provision: C.9.d.	Vishakha Atre, Program Staff			
Mercury P2 Outreach – To help Program staff, develop work plans for and implement mercury outreach tasks. Permit Provision: C.9.c.	Julie Weiss, Palo Alto (Chair) Roxan Nasiri, Cupertino (former member) Mary Morse, San Jose Sally Personett, Sunnyvale Kristy McCumby-Hyland, Sunnyvale Kate Slama, SCVWD Marilyn Nickel, Milpitas Joanne Johnson, Milpitas Zakk Devine, County IWM Division Rob D'Arcy, CoHHW Program Cheri Donnelly, Cupertino Vishakha Atre, Program Staff	12/02		Reviewed and approved the detailed FY 07-08 work plan; reviewed and approved materials for the fall advertising campaign.
Schools Outreach – To plan for and oversee school outreach activities coordinated with the WEO Campaign (e.g. ZunZun performances), coordinate Co-permittee school outreach efforts and identify gaps in outreach for watershed/stormwater education. Identify a program for conducting outreach at the middle-school level. Permit Provision: C.4.	Mary Morse, San Jose – Chair Roxan Nasiri, Cupertino (former member) Julie Weiss, Palo Alto Jan Raissle, Palo Alto Bruce Frisbey, San Jose Trish Mulvey, CLEAN South Bay Cheri Donnelly, Cupertino Kate Slama, SCVWD Vishakha Atre, Program Staff Sally Personett, Sunnyvale	12/99		Provided input for conducting 50 ZunZun school assemblies by email. Did not meet in FY 07-08.

Table 2-2
FY 07-08 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
Alviso Education Program – To periodically evaluate and provide input to S.F. Bay Wildlife Refuge staff regarding educational programs funded by SCVURPPP. Permit Provision: C.4.	Kate Slama, SCVWD Bob Chessman, San Jose Bruce Frisbey, San Jose Sally Personett, Sunnvyale Mary Morse, San Jose Genie Moore, S.F. Bay Wildlife Refuge Lindy Nice, S.F. Bay Wildlife Refuge Trish Mulvey, CLEAN South Bay Vishakha Atre, Program Staff Cheri Donnelly, Cupertino	12/99		Reviewed work done in FY 07-08; discussed improvements and approved work plan for FY 08-09.
HHW Work Group –To evaluate and recommend pollution prevention strategies for pollutants (e.g., universal wastes, pesticides) that directly impact both stormwater and household hazardous waste collection programs in Santa Clara County.	Mary Morse, San Jose Leah Lowrie, San Jose Kristy McCumby-Hyland, Sunnyvale Rob D'Arcy, County HHW Program Cheri Donnelly, Cupertino Trish Mulvey, CLEAN South Bay Julie Weiss, Palo Alto Zakk DeVine, County IWM Division Vishakha Atre, Program Staff	2/07		Prepared recommendations for potential HHW program funding options for hazardous waste disposal and Program/Co-permittee participation in product stewardship efforts, and provided memorandum with recommendations to the MC on October 31, 2007.
Brochure Development Work Group – To develop a new pollution prevention brochure for the general public.	Bruce Frisbey, San Jose Mary Morse, San Jose Kate Slama, SCVWD, Sally Personett, Sunnyvale Cheri Donnelly, Cupertino Kelly Carroll, West Valley Communities Karin Hickey, Santa Clara			Developed a draft brochure and tested it during a public outreach event; brochure is in the process of being finalized.

Table 2-3
Performance of FY 07-08 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
	1.0 Program Management/Administration	
Task 1.1 - Administrative Assistance	• Provide general administrative assistance • Maintain toll-free numbers for both SCVURPPP and the Watershed Watch Campaign. • Distribute materials to the public	• Continuing • Received 25 calls in FY 07-08. Database of requests is regularly updated and will be distributed to Co-permittees. • Responded to 27 requests from the Watershed Watch website for Watershed Watch kits and 16 requests for information.
Task 1.2 - Management Committee and Ad Hoc Task Group (AHTG) Support	• Facilitate and support up to 12 MC meetings* • Facilitate and support up to 40 AHTG meetings (includes Work Group meetings)*	• Completed 20 meetings (twelve regular and eight special related to the MRP) in FY 07-08. • Facilitated 24 AHTG and Work Group meetings. AHTG meetings include: Budget AHTG (3); C3 Provision Oversight AHTG (5); Monitoring AHTG (1); Trash AHTG (3); Watershed Education & Outreach AHTG (3); and Watershed Analysis Workplan AHTG (1). Work Group meetings include: Co-permittee HMP (2); Alviso Work Group (1); HMP Instream Solutions Work Group (1); Pesticide User Work Group (1); Mercury Pollution Prevention Outreach Work Group (1); Site Design Awards Work Group (1) and SCVURPPP and HHW Program Work Group (1).

* Includes: develop/distribute agendas, comply with Brown Act, update mailing lists, do copying, reserve meeting places, facilitate meetings, draft/finalize minutes, and organize/conduct follow-up.

Table 2-3
Performance of FY 07-08 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		• Submitted three (3) status reports on Municipal Regional Permit to City/County Managers Association. Attended one meeting to discuss MRP and other stormwater issues on November 7, 2007. • Updated Public Works Directors at their monthly luncheon on the MRP – February 17, 2008. • Organized and participated in two meetings in Sacramento with legislative staff (February 13, 2008) and the East Bay Caucus (February 27, 2008) regarding MRP impacts on local resources. **Note:** Program staff helped reduce the number of actual meetings by using electronic mail for review of work products and other correspondence.
Task 1.3 - Program Budget Administration	• Develop subsequent year's budget	• Total Program budget distributed to Budget AHTG (BATG) and MC on 12/24/07; budget revised and redistributed to BATG on 2/12/08; budget approved by MC on 2/21/08.
	• Track expenditures and prepare quarterly reports to Management Committee	• Continued tracking system developed in FY 97-98. Submitted budget updates in September 2007, January 2008 and August 2008.
	• Identify and apply for grant opportunities as directed by Management Committee	• Submitted grant application entitled "Green Gardener Training and Certificate Program"

Table 2-3
Performance of FY 07-08 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		to the California Department of Pesticide Regulation on October 19, 2007. • Submitted grant application entitled "Green Gardener Training Program" for submittal to the California Department of Pesticide Regulation on April 9, 2008.
Task 1.4 - Coordination with Fiscal Agent	• Track Program Fund receipts/expenditures; obtain budget status information	• Continued to receive updated information on revenues and expenditures monthly from the City of Sunnyvale and directed the City to pay invoices. Annual audit submitted and approved by Management Committee. This process worked effectively.
Task 1.5 - Coordination with Legal Consultant	• Communicate with and provide assistance to legal counsel.	• Coordinated with legal counsel on other permit issues (e.g., MRP, TMDLs and HMP).
Task 1.6 – Coordinate Program Representation	• Communicate with and report information provided by Co-permittees representing Program at external meetings.	• Program staff attends external meetings requiring Program representation. See report under Task 2.3. Co-permittees normally do not represent the Program at external meetings. An exception is that several Co-permittees represent themselves at the San Francisquito Creek Watershed Council meetings regarding sediment control studies. (Program staff is not involved).
Task 1.7 – Develop and Manage PI/P Program	• Conduct long-range planning for Program PI/P activities	• Managed the implementation of the Watershed Watch Campaign; managed

Table 2-3
Performance of FY 07-08 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		development of the Watershed Watch Mid-year Campaign Report; Teacher Evaluation Mid-year and Final Reports, Final School Assembly Report and Watershed Watch Campaign Final Report; reviewed products by consultants; coordinated campaign with other PIP goals and activities.
	• Manage development of PI/P work plan for FY 07-08	• Developed FY 07-08 Media Campaign Plan and FY 08-09 Watershed Watch Campaign Work Plan with input from Budget and WEO AHTGs. • Throughout the year, oversaw development of work plans for and/or management of PI/P projects.
	• Miscellaneous Outreach Tasks	• Program Fact Sheets. Developed and distributed the following Program-specific fact sheet: Trash Evaluation and Management (2nd Edition). Award Applications. Prepared and submitted award applications for the following awards: 1) San Francisco Estuary Project (SFEP) Outstanding CCMP Implementation Project nominating the Program's Trash BMP Tool Box. This application, which was submitted on August 10, 2007, did not receive an award; 2) United States Environmental Protection Agency Region 9 (USEPA Region 9) Environmental Awards (submitted February 15, 2008) nominating the Program's Trash BMP Tool Box as a significant

Table 2-3
Performance of FY 07-08 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		environmental accomplishment for 2007. This application did not receive an award; 3) California Department of Pesticide Regulation (DPR) Innovator Award (submitted May 30, 2008) nominating the Program's Pesticide User Outreach activities. This application is currently being reviewed for consideration; 4) California Stormwater Quality Association (CASQA) Awards (submitted June 12, 2008) nominating the Program's Trash BMP Tool Box as an outstanding stormwater research project. In late July, CASQA selected the Trash Tool Box for the Outstanding BMP Implementation Project Award; and 5) California Stormwater Quality Association (CASQA) Awards (submitted June 13, 2008) nominating the Santa Clara Valley Green Gardener Training and Outreach Program as an outstanding regional stormwater news, information, outreach and media project. In late July, CASQA selected the Green Gardener Training and Outreach Program for the Outstanding Regional Stormwater News, Information, Outreach and Media Project Award.
	• Provide support to Co-permittee's requests for public education assistance	• Provided ongoing support to Co-permittee requests; coordinated reprints and distribution of materials; staffed outreach events, as needed; kept PI/P contacts informed about local and regional activities through email.

Table 2-3
Performance of FY 07-08 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		• Coordinated with BASMAA Regional Ad Campaign. • Contributed to the Santa Clara County Creeks Coalition to support printing of their "Creekside News Letter".
	2.0 Permit Management	
Task 2.1 - Report Preparation & Submittal	• Prepare Program Annual Report and submit to Water Board by Sept. 15 of each year.	• FY 06-07 Annual Report prepared and submitted on September 17, 2007. Continued the streamlined reporting format to reduce Co-permittee effort while satisfying Water Board requirements. Prepared guidance to Co-permittees and reviewed Co-permittee submittals for completeness and consistency. • Executive Summary- FY 2006-2007 Annual Report. Requested EO to distribute at the November 1, 2007 Water Board meeting and posted on the Program's website. Additional copies were provided to Co-permittees for distribution to interested parties within their agencies.
	• Prepare FY 07-08 Draft Work Plan and submit to Water Board by March 1	• FY 08-09 Draft Work Plan prepared and submitted on February 29, 2008. Work Plan included tasks for the following Program elements: Municipal Operations, New Development and Redevelopment (C.3.), Industrial and Commercial Site Control, Illicit Discharge Detection and Elimination, Construction Site Control, Public

Table 2-3
Performance of FY 07-08 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		Information/Participation, Water Quality Monitoring, Pollutants of Concern Control, Exempted and Conditionally Exempted Discharges and Reporting. The Program's FY 08-09 Budget is also included in the Work Plan.
Task 2.2 - Internal Co-Permittee Liaison	• Develop guidance as directed by MC. May include guidance documents, evaluation methods and effectiveness indicators.	• Developed guidance on the Annual Report, Work Plan, C.3 implementation, street sweeping tracking and evaluation, submittal of trash problem area evaluation data and submittal of IND and IC/ID inspection data. Provided additional guidance to Co-permittees in response to telephone and email requests.
	• Conduct local program reviews	• Local program reviews did not occur during FY 07-08.
	• Conduct up to 4 training workshops; may include educational outreach to businesses.	• Planned, conducted, assisted with, and/or co-sponsored the following workshops or sessions: 1) "Bay Area Hydrology Model (BAHM) Computer Training Workshops" (two separate sessions on July 17, 2007) – attracted 43 participants; 2) "2007 Conference of the California Chapter of the American Planning Association" (September 30 - October 3, 2007) – the Program sponsored a session and mobile workshop at this very large conference. Both were very

Table 2-3
Performance of FY 07-08 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		well attended; 3) "Train-the-Trainer: Municipal Maintenance Training Modules" (November 13, 2007) – attracted 17 trainers from Co-permittee agencies; 4) "Bay Area Hydrology Model (BAHM) Computer Training Workshops" (November 28 and 29, 2007) – attracted 60 participants; 5) "Construction Site Management" (December 3 and 4, 2007) – attracted 93 participants; 6) "Draft Statewide Construction General Permit" (April 30, 2008) – attracted approximately 40 participants; and 7) "Sharing Experience with Implementation of Stormwater Requirements at Development Projects" (June 3, 2008) – attracted 117 participants. Gave presentations on behalf of the Program at workshops/conferences planned by others: Refer to Attachment A.
Task 2.3 - External Organization Liaison	• Identify regulatory issues, prepare comments, and represent Program at meetings.	• Distributed information to MC on following issues: revisions to 303(d) list and TMDL priorities; mercury, diazinon, pesticides, PBDE's and copper/nickel TMDL studies and action plans, trash, wetlands policy, enforcement policy; issues discussed at Municipal Regional Permit meetings;

Table 2-3
Performance of FY 07-08 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		legislation of concern; other items of interest from the RWQCB, BASMAA and CASQA. • Program staff served on the PCB TMDL Work Group and Mercury TMDL Work Group, commented and prepared TMDL study products, helped update and report progress on the Copper Action Plan, and assisted Water Board staff with preparation of Basin Plan amendments related to mercury and PCBs.
	• Represent Program at up to 77 external organization meetings (RWQCB, BASMAA, CASQA, CEP, RMP, others) as directed by MC.	• Attended 156 external organization meetings (see separate summary table – not including WMI and Program Data Coordination meetings); prepared summaries for MC distribution; prepared and/or distributed full meeting notes for most meetings. • Program staff served on the BASMAA Executive Board (Vice Chair), CASQA Board of Directors and CASQA Executive Program Committee; and represents BASMAA on the RMP Steering Committee and RMP Technical Committee.
	• Represented Program at WMI Core Group and Subgroup meetings.	• Attended 26 WMI meetings, including: Land Use Subgroup (10); BAMBI Workshop (1); SCBWMI Core Group (5); SCBWMI Watershed Assessment and Monitoring Subgroup (2); SCBWMI Trash Subgroup (2); SCBWMI Product Stewardship Subgroup (1); SCBWMI Communications/Outreach Work Group (1);

Table 2-3
Performance of FY 07-08 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		CCAPA Conference Workshop Planning Meeting (1); CCAPA Conference (2); and CCAPA Conference- Mobile Workshop (1).
	• Obtain updates to State NOI database.	• Continued to place updated NOI lists on SCVURPPP website on a routine basis.
Task 2.4 – Permit Renewal	• Coordinate development of permit	• Coordinated with Water Board staff. MC direction contained in work plan and budget for FY 07-08.
	• Present to Water Board at regular Board meeting	• Program staff conducted extensive review of the Municipal Regional Permit draft Tentative Order released by the Water Board on December 4, 2007 and provided written comments to Water Board staff on February 29, 2008.
		• Program staff, at direction of MC, is participating in the Municipal Regional Permit (MRP) development process. During FY 07-08, Program staff has attended the following 30 MRP-related meetings, including: BASMAA Board Meetings – Special (15); BASMAA- Water Board Meeting (5); Attorney Meetings – Special (MRP) (4); Management Committee- Special (3); Water Board meetings- MRP (2); and Public Works Directors Luncheon Presentation- MRP (1) (as well as conducted numerous e-mail review of products).

Table 2-3
Performance of FY 07-08 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
Task 2.5 – Implement Continuous Improvement Items	• Investigate, develop implementation plans, and implement items for Program continuous improvement identified in Co-permittee reviews, work plan, and annual report	• Table 2-4 of the *FY 07-08 Annual Report* will present the progress of continuous improvement tasks. An update of the Program's website is the new continuous improvement item identified for FY 06-07 for implementation during FY 08-09.
	• Summarize for Program Annual Report	• The status of continuous improvement items was presented in the *FY 07-08 Draft Work Plan,* and was updated in the *FY 07-08 Annual Report.*
	3.0 Technical Program Management	
Task 3.1 - Prepare RFPs and Manage Contractors	• Develop RFPs, scopes of work, and contracts for up to 4 projects/services; assist with advertisement and selection; oversee contracted work.	• Continue to oversee contracted work. (All contractors are subcontractors to EOA, Inc., per the Program's "Procedures for Contracting Outside Services", 5/15/98).
		• Developed scopes and contracts; and managed contractors conducting Multi-year Receiving Waters Monitoring Plan, sediment assessment and bioassessment scopes of work (Contractors were selected by MC and are assisting the Program with implementing the Multi-year Plan in accordance with the permit).
		• Managed WE&O contractor (AdManor, Inc.) and trash pilot demonstration contractor (Advanced Solutions).
		• Developed scopes and contracts and managed three outreach contractors, the

Table 2-3
Performance of FY 07-08 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		ZunZun performance group, Annie Joseph Consulting, and the San Francisco Bay Wildlife Society's Environmental Education Center in Alviso. • Continued to manage contractor to complete Phase II of the BASMAA Task of Regional Benefit – BMP Sizing Tool Project (AEI-CASC). • Continued to manage contractor performing calibration of the Bay Area Hydrology Model (Clear Creek Solutions) and contractor developing a cost estimating methodology for hydromodification management measures (GeoSyntec)
Task 3.2 - Provide Technical Review	• Provide technical review of work products of contractors and provide recommendations to MC regarding acceptability/modifications.	• Reviewed all consultant products related to C.3. HMP, Bay Area Hydrology Model, BASMAA BMP Sizing Tool, Multi-year Receiving Waters Monitoring Plan, and sediment and bioassessment work.
Task 3.3 - Develop Additional Performance Standard	• Assist MC in developing or improving one performance standard.	• Continuing into FY 08-09, Program staff will work with BASMAA and Water Board staff on the Municipal Regional Permit to address any modifications and future expectations for the Performance Standards.

Table 2-4
Program Continuous Improvement (CI) Tasks

Tasks	Anticipated Completion Date	Status
New Development and Redevelopment		
1. Develop design guidance containing stormwater control opportunities for small road modifications.	December 2008	**Update** – The Program's permit requirements were made consistent with other Bay Area permits, which exempt road reconstruction (within the same footprint) from C.3. (The draft Municipal Regional Permit contains different requirements and the final language has not yet been determined). C3PO AHTG members have expressed interest in the development of stormwater control design guidance for small road and right-of-way modifications and other tight spaces. However, this was a lower priority than other C.3. tasks. The C3PO AHTG decided that this will be addressed as part of the C.3. Stormwater Handbook Update during FY 08-09.
Program Management		
1. Conduct a workshop for municipal staff based on the municipal training protocols being developed by an ad hoc task group. (Priority – Medium)	December 2007	**Completed** – On November 13, 2007, Program staff held a "train-the-trainer" meeting to review the training modules developed on the following BMPs: corporation yard activities, public streets, roads and highway operation and maintenance, storm drain system operation and maintenance, municipal mercury pollution prevention, pest management and municipal mercury pollution prevention. To ensure effective Co-permittee training sessions, Program staff has repackaged each training protocol into smaller, focused modules. This approach will allow Co-permittees to train municipal staff on certain key municipal elements in shorter blocks on time (e.g., 15 minutes). Each module was distributed to Co-permittee staff at the meeting and placed on the Program's website (www.scvurppp.org).
2. Consider developing, with the help of an ad hoc task group, a fact sheet addressing common construction BMP problems, like drain inlet protection and dewatering. (Priority – Medium)	December 2008	**In Progress** – Management Committee approved having the Program adapt an existing brochure on dewatering (created by Palo Alto, Mountain View and San Jose) for the other Co-permittees' use. At its September 24, 2007 meeting, the C3PO AHTG decided it would be better to develop new fact sheets on different types of dewatering. Program staff developed draft fact sheets and formed a work group to review them. The fact sheets are still in progress and will be completed in early FY 08-09.

[i] Performance Standards describe a specific result, or level of effort, which constitutes the "maximum extent practicable", based on current technical knowledge, available resources and local conditions (see the SCVURPPP 1997 Urban Runoff Management Plan). Co-permittee URMPs contain community specific performance standards, standard operating procedures and best management practices. The URMPs also contain annually updated Workplans including specific actions and milestones.

[ii] Complete description of enhanced controls, programs and investigations can be found in the Program and Co-permittee's Work Plans submitted on March 1, 2007 to the Water Board and information contained in this Annual Report and past Annual Report, submitted on September 15th or each year.

[iii] Complete description of enhanced controls, programs and investigations can be found in the FY 08-09 Annual Work Plan submitted on March 1, 2008 to the Water Board.

[iv] Freshwater creeks in the Santa Clara Valley where urban runoff/storm sewers are identified on the 303(d) list as contributing to the discharge of diazinon that may be causing or contributing to impairment include: Calabazas Creek, Coyote Creek, Guadalupe Creek, Guadalupe River, Los Gatos Creek, Matadero Creek, San Francisquito Creek, Saratoga Creek, and Stevens Creek. Additionally, Stevens Creek is listed on the 303(d) list for toxicity, that may be associated with pesticides.

SECTION 3

PUBLIC INFORMATION/PARTICIPATION

040486

3. PUBLIC INFORMATION/PARTICIPATION

INTRODUCTION

The goals of the PI/P element of the Program are to identify and change behaviors that adversely affect water quality, and to increase the understanding and appreciation of streams and the Bay. The Program's FY07-08 PI/P Work Plan provided a strategy to achieve these education and public participation goals with specific projects funded in the Program's FY 07-08 budget.

A number of ad hoc task groups (AHTGs) and work groups, comprised of Co-permittee representatives and Program staff, continued to meet and communicate via email to implement PI/P projects. A summary of the work groups' accomplishments is provided in Table 2-2 of Section 2.

Highlights of the accomplishments of FY 07-08 PI/P projects and ongoing projects from previous years are described below, along with an evaluation of the effectiveness of activities and measures for continuous improvement. Table 3-1 presents a summary of the projects and the effectiveness evaluation.

FY 07-08 PI/P PROJECTS

FY 07-08 PI/P Work Plan

The Program conducts its public education and outreach through three projects: Watershed Education and Outreach, Pesticide User Outreach and Mercury Pollution Prevention Outreach. In FY 04-05, the Program completed all one-time tasks planned for these projects under the current permit. Other ongoing tasks are continuing to be implemented.

The Management Committee approved the PI/P Work Plan and budget for specific projects, and the work plan was submitted as part of the Program's FY 07-08 Work Plan, submitted on March 1, 2007. No comments on the FY 07-08 Work Plan were received from the Water Board.

FY 07-08 PI/P projects included:

- Watershed Education and Outreach (WEO) Campaign (this includes funding for Watershed Watch Campaign, ZunZun School Assemblies and the Watershed Watchers Program at the Alviso Education Center, Don Edwards San Francisco Bay National Wildlife Refuge)
- Pesticide User Outreach
- Mercury Pollution Prevention Outreach
- Schools and Youth Education Outreach
- Regional Coordination (participation in BASMAA PI/P Work Groups, described at the end of Section 3)
- Program Supplies/Materials Reprinting

Scopes of work for these projects were included in Section 3 of the Program's FY07-08 Work Plan. The FY 07-08 PI/P Work Plan also includes ongoing PI/P support activities, such as support of the toll-free information hotlines, mailing brochures and Watershed Watch kits on request, etc.

Watershed Education and Outreach Campaign

The Program's Watershed Education and Outreach Campaign included funding for the Watershed Watch Campaign, the Watershed Watchers program at the San Francisco Bay National Wildlife Refuge Environmental Education Center in Alviso ("Wildlife Refuge") and ZunZun assemblies at elementary schools in Santa Clara County.

Watershed Watch Campaign

The Watershed Watch Campaign completed 8 years of implementation (and 7 years of advertising) in FY 07-08. The Campaign focused on the implementation of various outreach activities including media advertising.

A draft FY 07-08 Watershed Watch Work Plan was submitted with the Program's FY 07-08 Work Plan on March 1, 2007, and is included within Appendix B-1. The Watershed Watch Media Advertising Plan, completed in October 2007 is included within Appendix B-2.

The following describes tasks completed by the Program's consultant, with assistance from Program and Co-permittee staff, during FY 07-08. The detailed Watershed Watch Campaign and Media Report is included in Appendix B-3.

- **Task 1: Evaluation** – Developed and implemented a web based survey in July 2007. However, the total number of surveys completed was statistically insignificant and the results did not indicate effectiveness of the campaign one way or another. The process did indicate that the method of recruiting survey participants was not the most effective for the target audience. The WEO-AHTG voted to continue with the "Watch Out" creative and frequency-based media plan through FY 07-08.
- **Task 2: Creative Development** – Modified existing IPM advertisements, developed flyers and advertisements for the car wash promotions, developed and printed new Watershed Watch Discount Cards. Began developing the new Watershed Watch brochure. Copies of these materials are included in Appendix B-4.
- **Task 3: Media Advertising** – Conducted a media campaign consisting of print and radio advertising. Advertisements ran from January to June 2008. Media buys included 210 print ads and 530 radio ads. The net advertising budget for media was $78,584. Media partners provided a total added value package of benefits and resources of $178,097. Additional details on the media campaign are included in Appendix B-2 and Appendix B-3.
- **Task 4: Partnership Development and Coordination**– Continued development of the partner database and conducted meetings with potential partners. Three new partnerships were developed in FY 07-08. These include two businesses, Yamagami's Nursery and Capitol Premier Car Wash. Both are offering discounts on products and services to customers using the Watershed Watch discount card. A list of current partners is provided within Appendix B-5.
- **Task 5: Added Value Development** - As a result of media partnership negotiations and community partnership activities, the Campaign received significant added value resources. These include free advertising, free tickets, live promotions, etc. The estimated total value added to the FY07-08 Campaign from partners (community and media) is $181,265. Additional details are included in Appendix B-3.
- **Task 6: Website Maintenance** – Continued to develop and maintain the Watershed Watch website. Website statistics and details are included in Appendix B-6 and the FY 07-08 detailed Watershed Watch Campaign and Media Report within Appendix B-3.

- **Task 7: Events Coordination** – Coordinated and attended community outreach events. The Watershed Watch booth was present at 9 events, including two promotional events at Classic Car Wash locations, and one at the Premier Car Wash location.
- **Task 8: Public Relations** – Distributed pitches developed by the BASMAA Media Relations Campaign to local media outlets. Also pitched a story about the Santa Clara Valley Green Gardener Program. Several media outlets covered the Green Gardener story, including the *El Observador*, Milpitas Post, CBS 5, Morgan Hill Times and KTVU 2.
- **Task 9: FY 07-08 Work Plan and Annual Report Development** – Developed the FY 08-09 Work Plan and the FY 07-08 Annual Report. Attended WEO AHTG and Brochure Development Work Group meetings. Submitted monthly campaign reports to the WEO AHTG and Management Committee.

Evaluation of Effectiveness

Many factors indicate that the FY 07-08 Watershed Watch Campaign was a success (see Final Campaign and Media Report, Appendix B-4, and other documents in Appendix B). Some of these include:

- The continued successful partnership with Classic Car Wash and a new partnership with Premier Car Wash.
- Securing 5 partners (Happy Hollow Park and Zoo, Kelly Moore Paints, Yamagami's Nursery, Classic Car Wash, and Premier Car Wash) that offer discounts with the Watershed Watch card
- The large number of gross impressions (i.e., number of people reached by the message) made by media advertising (12,447,737);
- Media partners provided $178,097 in value added resources, which greatly supplemented the Campaign's budgeted total media buy of $78,584;
- Participation in nine community outreach events and distribution of more that 5,000 brochures and giveaways; and
- The completion of all tasks in the FY 07-08 scope of work, with active participation of Program and Co-permittee staff.

A public awareness survey to measure the effectiveness of the Campaign is planned for FY 08-09.

<u>The Watershed Watchers Program at the Don Edwards San Francisco Bay Wildlife Refuge, Alviso ("Wildlife Refuge")</u>

The Wildlife Refuge Environmental Education Center (EEC) offers trails and access to wildlife viewing for the public to gain first-hand knowledge of the value of Bay habitats. Visitors to the EEC can view a storm drain model and receive copies of Program materials, including the Watershed Watch kits and pesticide reduction brochures and fact sheets.

Evaluation of Effectiveness

As part of their "Watershed Watchers" Program, EEC staff conducted 111 programs that attracted 2,901 participants. Topics discussed at the workshops included watershed protection, wildlife in the watershed, gardening without chemicals, and the public's role in urban runoff pollution. The EEC's Fourth Quarter Report, including a summary of FY 07-08 accomplishments, is provided in Appendix B-7.

In FY 07-08, the total number of programs was higher; however the number of participants was slightly lower. Highlights of the year include:

- Scout programs offering nature-related badges (Boy Scout Webelos Naturalist, Brownie Eco-Explorer Patch, and Junior Wildlife Badge) have been very popular with over 500 participants at the programs this year, 127 of which were girl scouts.
- Shark Day was a success with over 30 volunteers and 400 visitors.
- A Community Service flyer was sent out to high schools requiring community service where volunteering at the EEC was advertised.
- 400 people attended the South Bay Bird Fest which was helped by several community organizations and 40 volunteers.

Pesticide User Outreach

A detailed FY 07-08 Pesticide User Outreach Work Plan was developed by Program staff and approved by the Pesticide User Outreach Work Group on November 19, 2007. The Pesticide User Outreach Work Plan included the following tasks:

- IPM store partnership program
- Media advertising
- IPM outreach events
- Outreach to restaurants
- Santa Clara Valley Green Gardener Training Program

The accomplishments of this project are described below:

Integrated Pest Management (IPM) Store Partnership Program

Background

The IPM Store Partnership Program, also known as the Our Water Our World (OWOW) program, was in its tenth year in FY 07-08. The goal of the OWOW program is to reduce toxicity caused by pesticides in stormwater, creeks and the Bay by:

- Developing partnerships with retailers who can educate the general public about water quality problems related to residential pesticide use while promoting the sales and use of less toxic alternatives; and
- Through the partnerships with retailers, educate the public about effective less-toxic pest control strategies, the value of the IPM approach to home and garden pest control and safe use and disposal of pesticides.

The Program contributes funding to and participates in the Regional IPM (OWOW) program, which is administered through BASMAA. The Regional Program, with input from IPM experts and participating stormwater programs, has developed fact sheets, promotional materials, training sessions, display materials for stores and an alternative products list. The Program and Co-permittees are responsible for recruiting stores, arranging training sessions for store employees, in-store display set-up, display maintenance and on-going contact with participating stores.

FY 07-08 Activities

During FY 07-08, the Program continued to support participating stores within the Program's jurisdiction. Program staff visited all the participating 28 stores at regular intervals and updated the display racks and shelf talkers, as needed. A new store, ACE Hardware Willow Glen, joined the Program this year.

Outreach material purchased for the Stores Partnership Program included IPM fact sheets and shelf talkers.

The Program also continued to use the services of Ms. Annie Joseph, an experienced IPM consultant, to provide training to store employees on selling less-toxic products. Past Program experience with training stores indicated that employees were not amenable to attending off-site trainings. In FY 07-08, the Program continued to offer trainings as in-the-aisle trainings during working hours or on-site after-hour trainings. Approximately 132 employees representing 11 stores were trained this year. Employees were also requested to fill out evaluations. The list of participating stores, their training status and a summary of evaluations received are provided within Appendix B-8.

In addition, Ms. Joseph worked with two participating stores, SummerWinds (Almaden Expressway, San Jose) and OSH (Prospect, San Jose) to implement the "Increasing Shelf Space for Less-Toxic Products" projects. Her work included: 1) meeting with pesticide buyers at stores; 2) motivating them to increase the store's inventory of less-toxic products; and 3) building endcaps showcasing these products.

Evaluation of Effectiveness

The IPM Store Partnership (OWOW) program continued to be a success in FY 07-08. The store managers and employees were enthusiastic about the program and extremely receptive to having the OWOW display in stores. The owner of the Palo Alto Ace Hardware store opened a new store in Willow Glen and proactively contacted Ms. Joseph to enroll his new store in the OWOW Program. Feedback on the trainings was also very positive, as indicated in the evaluation summary included in Appendix B-8. A few highlights of the evaluation are:

- 76% of the respondents agreed that the training information was useful;
- 70% agreed that the information changed their attitude about pesticides;
- 95% agreed that the information will help them sell less-toxic products; and
- 93% agreed that they would recommend the training to co-workers.

The following indicate the success of the "Increasing Less-Toxic Shelf Space" project:

- The OSH store created endcaps for displaying less-toxic products. The products featured included Sluggo (for 8 weeks), yellow jacket traps (4 weeks), and organic fertilizers (3 months). They have also laminated and zip-tied copies of "Good Bug Bad Bug" charts and "10 Most Wanted Bugs" brochures in the main pesticide aisle.
- SummerWinds nursery has launched its own selection of "Earth Friendly" products. The nursery worked with Annie to select products for this section. Annie also provided input for the earth-friendly section of their website.

More details on this project are included in Appendix B-8.

Media Advertising

The Program's Watershed Watch Campaign used the "Watch Out for Toxic Pesticides" radio and print ads. The advertisements offered examples of less-toxic pest control methods and directed residents to the Watershed Watch website for more information. Copies of print advertisements are included in Appendix B-4.

Evaluation of Effectiveness

The IPM outreach media campaign, which included free promotional print and radio ads, received a large number of gross impressions. Additional details are included in the FY 07-08 detailed Watershed Watch Campaign and Media Report within Appendix B-3.

IPM Outreach to Restaurants

The Program continued to provide copies of the "Don't Set a Table for Pests" poster to County Health inspectors for distribution to food facilities. This poster has been incorporated into the "Final Construction" packet of information that is distributed to new and remodeled food facilities. In addition, these posters were also provided to Co-permittees for distribution during routine stormwater inspections.

Evaluation of Effectiveness

During FY 07-08, County Health inspectors distributed 520 posters and will continue to distribute posters to restaurants during FY 08-09.

IPM Outreach Events

Program staff and Co-permittees staffed seven events at which IPM outreach was conducted. To reduce staffing requirements, events were coordinated with Watershed Watch outreach. Outreach events in FY07-08 included:

- Pumpkins in the Park – October 16, 2007;
- Happy Hollow Park & Zoo Halloween Event – October 28, 2007;
- Master Gardener Spring Garden Market, April 12, 2008;
- NVidea Environmental Fair, April 15, 2008;
- San Jose Spring Home and Garden Show, San Jose Convention Center, San Jose – April 25-27, 2008;
- Spring in Guadalupe Gardens, April 26, 2008; and
- Health and Wellness Fair, Santa Clara County Parks and Recreation, June 22, 2008.

In addition to talking to the general public about less-toxic pest control methods, event staff distributed fact sheets, "Grow It" guides, "Backyard Bugs" brochures, "Pests Bugging You" brochures and other IPM related brochures and giveaways. The beanbag game for children was used at most of the events.

Evaluation of Effectiveness

Overall, the seven outreach events were successful in providing opportunities for educating the public about less-toxic pest control methods. Event staff distributed more than 5,000 total IPM

fact sheets, brochures and giveaways (e.g., activity books, magnets, flyswatters, notepads, etc.).

The Program also provided support for promotion of the Going Native Garden Tour held on April 20, 2008. Approximately 3,000 people attended the tour. The tour featured 42 gardens that demonstrated environmentally sensitive gardening practices which include the use of native plants, water conservation, landscaping to prevent urban runoff, reducing pesticide and fertilizer use, etc. The final report for the Going Native Garden Tour is included in Appendix B-9.

Santa Clara Valley Green Gardener Training

In FY 07-08, the Program piloted the first Santa Clara Valley Green Gardener Training. This is an educational initiative that brings quality training to professional landscapers, gardeners and landscape maintenance workers on how to "garden green." Each training session is of ten weeks, with trainees meeting weekly for a two hour class.

The Green Gardener training program was first developed by the City and County of Santa Barbara, and has been successful in Santa Cruz and Monterey County as well. The Program collaborated with the Metropolitan Adult Education Program (MAEP), and the Master Gardeners of Santa Clara County to conduct the first Green Gardener training in Santa Clara County. The Program provided funds toward student fees, guest speaker fees, and supplies (soil probes, magnifying lenses, and Green Gardener patches). A fact sheet about the Green Gardener Program is included in Appendix B-10.

The pilot Green Gardener Training was held from February 7 to April 17, 2008. The Program conducted outreach to inform local landscape maintenance businesses about the training. Outreach efforts included the following:

- Mailing letters and flyers to local landscaping businesses;
- Advertising on a Spanish radio station;
- An article in the California Landscape Contractors Association (CLCA) newsletter;
- Information published on the Watershed Watch website; and
- Training announcement in the Mercury News.

The Program also conducted outreach to inform residents about the availability of trained Green Gardeners. Outreach efforts included radio ads, distribution of flyers at outreach events, and creation of new pages about the Green Gardener Program on the Watershed Watch website.

Copies of all Green Gardener outreach materials are included in Appendix B-10

Evaluation of Effectiveness

Twenty seven landscape maintenance professionals completed the first Santa Clara Valley Green Gardener training, and twenty more requested that they be placed on a waiting list for the next training. After each class and after completing the entire training, trainees were requested to fill out evaluations. A copy of the final evaluation is included in Appendix B-10. It indicates that attendees found the class very useful and will be making changes to their landscape management practices based on what they have learned at the training. Attendees also had to take a final test to receive the certificate of completion. This ensured that they have understood the curriculum and will be able to implement the practices at their client locations.

To track behavior change, the Program is planning to interview the trained Green Gardeners in fall 2008 to find out whether they are actually using the practices they learned at the training.

Mercury Pollution Prevention Outreach Project

In FY 07-08, the Santa Clara County Household Hazardous Waste Program (County HHW Program) continued its retail store partnership program and partnered with approximately 40 retail stores to provide free fluorescent bulb drop-off locations for residents. The Program's outreach focused on promoting these drop-off locations and educating people about mercury pollution using radio advertising. The "Watch Out for Mercury Pollution" radio and print advertisements were used to educate people on the proper disposal of fluorescent lamps. The mercury outreach media campaign included free promotional radio and internet ads as described in Appendix B-3.

To achieve maximum impact, advertising was coordinated with the media campaigns being implemented by the County HHW Program and the County Integrated Waste Management (IWM) Division. The County HHW Program collaborated with PG&E to run print advertising and the County IWM Division ran cable television ads. All three media campaigns ran from January through April 2008.

Evaluation of Effectiveness

During FY 07-08, the County HHW Program collected 496,484 feet (124,121 pounds[1]) of fluorescent bulbs at 32 retail drop-off locations within Santa Clara County[2]. This is a significant increase from FY 06-07. In FY 06-07, the County HHW Program collected 353,694 feet (88,423 pounds) of fluorescent bulbs.

It is estimated that approximately 1.44 kilograms of total mercury was diverted (i.e., discharge to the environment was avoided) to recycling from fluorescent lamps collected by the County HHW Program[4] in FY 07-08. In addition, the County HHW Program also collected 370 mercury-containing thermometers, 1,295 pounds of elemental mercury (includes thermostats, thermometer and other products) and 100,100 pounds of household batteries during FY 07-08.

Schools and Youth Education Outreach

The following tasks were accomplished under this project:

General Outreach to Schools

The Program and its Co-permittees conduct various school outreach programs individually and through the Program. These activities are described in detail in the tables provided in Appendix B-11.

[1] Since fluorescent light bulbs come in different sizes, quantities are reported in terms of the total length (feet) of tubes collected. One four-foot light tube weighs approximately one pound.
[2] Information regarding the collection of mercury containing products (e.g., fluorescent bulbs, thermostats, thermometers and other products) during FY 07-086 obtained from a memorandum *entitled Fiscal Year 2007/2008 HHW Program Update* (dated July 21, 2008). This memorandum was prepared by Wendy Fong, Household Hazardous Waste Program, County of Santa Clara.
[3]Based on a 1999 National Electrical Manufacturers Association survey entitled *Environmental Impact Analysis: Spent Mercury-Containing Lamps, January, 2000 (Fourth Edition)*, the average four-foot fluorescent lamp contains about 11.6 milligrams (mg) of mercury. For the sake of estimating the amount of mercury sent for recycling, approximately 124,121 four-foot fluorescent lamps were collected. As a result, 1.44 kilograms of total mercury diverted (i.e., discharge to the environment was avoided) to recycling is a rough estimate.

Outreach to Elementary Schools

Each year, the Program's Schools and Youth Education and Outreach Work Group provide a list of schools for ZunZun to contact. In addition to schools with high Hispanic populations, the Work Group continued to extend outreach to schools with high Asian/Pacific Islander populations. The Program's Schools and Youth Outreach Work Group researched demographics of Santa Clara County and generated a list of 126 schools for ZunZun to contact. The ZunZun performances use physical comedy, audience participation and musical instruments to educated teachers and children about watersheds and stormwater pollution prevention. ZunZun continued to distribute the two vocabulary lists (one for grades K-2 and the other for grades 3-6) of terms used in the presentation. These lists were mailed to every school prior to the presentation.

Evaluation of Effectiveness

During FY 07-08, ZunZun conducted 47 assemblies at 27 elementary schools in eight cities. In addition, two assemblies were conducted at the Pumpkins in the Park event for the general public, and one at the Water Wizards festival (an event for third grade students from San Jose schools). The assemblies reached approximately 11,840 students in grades K-5. Assemblies were evaluated using postage-paid evaluation cards that were distributed to all teachers present at the performances. The Program received completed evaluation cards from 177 teachers. Overall, the feedback has been very positive and indicates an increase in the students' knowledge about watersheds and pollution prevention. A few highlights of the evaluation are:

- Forty teachers (out of the 177 that sent completed evaluation cards) indicated that after the performance, 50 percent of their students knew what a watershed is; 56 teachers indicated that 75 percent of their students knew what a watershed is and 37 teachers indicated that 100 percent of their students knew what a watershed is.
- Nine teachers indicated that after the performance, 50 percent of their students could name a way to prevent pollution in the watershed; 46 teachers indicated that 75 percent of their students could name a way to prevent pollution in the watershed; and 112 teachers indicate that 100 percent of their students could name a way to prevent pollution in the watershed.

Overall, teachers had positive comments on the presentation.

ZunZun's Final Report and the Teachers' Evaluation Report are included in Appendix B-12. Highlights of the teachers' evaluations are presented on page 3 of the Teachers' Evaluation Report.

Outreach to Middle Schools

In response to a request by Water Board staff, the Program conducted a gap analysis study in FY 03-04 to identify gaps in school outreach conducted by the Program and its Co-permittees.

The objective of the study was to conduct a detailed review and analysis of the data to guide further school outreach. Data collected from Co-permittees was analyzed and GIS maps were developed to present the data. The final Schools Outreach Gap Analysis Report was submitted to the Water Board within the FY 03-04 Annual Report. The study identified some geographic gaps in outreach and gaps at the middle school level, and recommended that the Program and

Co-permittees develop Program-wide outreach that targets the middle/intermediate school level. In addition, it was recommended that outreach increase to underserved and underrepresented communities.

The Work Group evaluated various methods for targeting outreach to this grade level and identified a teachers training program as the best means of maximizing outreach with limited resources. After considering several options, the work group decided to use the City of San Jose's South Bay Water Connections "Wacky Watersheds" teachers training workshop. In FY 07-08, the Wacky Watersheds workshop staff held two workshops and trained 38 participants. During FY 08-09, a gap analysis study will be conducted to identify current gaps in school outreach.

Work group members are also trying to coordinate with their school districts so this workshop can be made available to middle school teachers at their "in-service" training days. Currently, this workshop is available only a few times a year on Saturdays.

Other Program PI/P Support Activities

Program's Toll-Free Telephone Numbers

The Program maintained two toll free telephone numbers, the Program's information number (800-794-2482) and the Watershed Watch hotline (866-WATERSHED), for calls from the general public and requests for information. Program staff responded to about 25 calls during FY 07-08. Program and consultant staff also responded to 27 Watershed Watch kit requests, and 16 requests for information on the Watershed Watch website.

PI/P Material Reprints and Supplies

The Program purchased and coordinated Co-permittee orders for reprinting the following materials:

- OWOW fact sheets and shelf talkers;
- OWOW magnets;
- "Grow It" Guides in English and Spanish;
- "The 10 Most Wanted Bugs in Your Garden" brochures;
- "Pest or Pal" Booklets; and
- "Draining Pools and Spas" Brochures.

ONGOING PI/P PROJECTS

Creek Clean-ups

In FY 07-08, the Creek Connection Action Group sponsored two creek clean-up events: Coastal Clean-up Day on Sept. 15, 2007 and National Rivers Clean-up Day on May 19, 2008 The Program provided financial support for one of the events (National Rivers Clean-up Day). A total of 1,534 volunteers participated in cleaning 51 sites and removed approximately 72,764 pounds of materials (trash and recyclables) from the creeks during the two events.

Results by clean-up event for FY 07-08 are as follows:

	Coastal Clean-up Day Sept. 15, 2007	National Rivers Clean-up Day May 17, 2008	Total
Number of sites	24	27	51
Number of volunteers	865	669	1,534
Pounds of recyclables	12,052	11,518	23,570
Pounds of trash	31,694	17,500	49,194
Pounds of material (trash plus recyclables)	43,746	29,018	72,764

Evaluation of Effectiveness

To evaluate the effectiveness of the two annual creek clean-up events, data from the past nine years of events were compiled and reviewed. The table below presents the total numbers of sites, numbers of volunteers, and pounds of materials collected each year.

Summary Results of Creek Clean-up Events[5], September 1998 – May 2008

	No. of sites	No. of volunteers	lbs. of recyclables	lbs. of trash	Total lbs. collected	Average lbs./site
FY 98-99	35	1,877		84,582	84,582	2,417
FY 99-00	35	1,586		43,475	43,475	1,242
FY 00-01	41	1,745		58,108	58,108	1,417
FY 01-02	37	1,742	13,750	59,340	73,090	1,975
FY 02-03	48	2,091	8,071	44,883	52,954	1,103
FY 03-04	56	1,943	6,537	36,718	43,255	778
FY 04-05	61	1,618	7,890	39,730	47,620	781
FY 05-06	55	1,458	4,110	29,248	33,358	607
FY 06-07	44	1,631	15,394	52,067	67,461	1,533
FY 07-08	51	1,534	23,570	49,194	72,764	1,427
Annual Average	*46*	*1,723*	*11,332*	*49,735*	*57,667*	
Total	**463**	**17,225**	**79,322**	**497,345**	**576,667**	

[5] The data presented in this table represent the total quantities from the two major creek cleanup events in Santa Clara County (including Gilroy and Morgan Hill). The data do not include quantities of trash that may have been collected by the Santa Clara Valley Water District (SCVWD) or by other volunteer groups during other times of the year. The SCVWD has an "Adopt-a-Creek" program in which community groups (e.g., scout troops and schools) agree to care for a certain section of creek. Care includes trash pickup at least twice during the year. These groups are not required to report the amount of trash they collect. A section of creek that is regularly cleaned may not be included as one of the sites involved in the two major creek cleanup events.

Beginning in FY 01-02, some site managers implemented a procedure for separating out recyclable materials from trash prior to weighing it. Thus, the total pounds of material collected are the sum of the recyclables and trash quantities. According to the Santa Clara Valley Water District, this procedure is done more frequently at Coastal Clean-up Event sites than at National Rivers Day sites. Since this procedure is not done at all sites, it is more appropriate to compare the total quantities of materials collected rather than the individual components.

The total amount of trash and recyclables collected during the two creek cleanup events each year are plotted in the figure below:

The average pounds of trash and recyclables collected at each site during the two creek cleanup events each year are plotted in the figure below:

From the data in the table and figures, it can be concluded that the total amount of trash and recyclables collected shows a decreasing trend from FY 98-99 to FY 05-06. However, the amount of trash and recyclables collected has increased in the last two years. This increase is related to targeting and addressing the most problematic trash problem areas (not including homeless encampments) with significant amounts of trash. In the past, some sites were chosen due to their familiarity and close proximity to certain local organizations participating in the creek cleanup. In some instances, these sites did not have significant levels of trash. In addition, volunteers are becoming more aware of current trash issues within local creeks and San Francisco Bay. As a result, the level of effort of removing all observed trash and recyclables has increased resulting in more thorough trash cleanups. Co-permittees intend to continue participating in future creek cleanups, as they provide a valuable opportunity for citizen participation as well as an important element of a trash management program.

Restaurant BMP Materials

In FY 99-00, a work group comprised of Program staff, representatives of the California Restaurant Association and Santa Clara County Department of Environmental Health (DEH), and Co-permittee stormwater inspectors developed a strategy of targeting food handling facility personnel with one simple message and continuously reinforcing the message over a three-year period. The focus for the first three-year period is on the improper discharge of wash water.

In FY 00-01, a restaurant wash water BMPs kit (letter, list of BMPs and a poster) was created for County Health Inspectors to hand out to restaurant managers during inspections (see FY 00-01 Annual Report). The Santa Clara County Department of Environmental Health inspectors (Consumer Protection Division) have been distributing this kit to every newly constructed and remodeled food facility in the County. In FY 02-03, one of the signatories of the cover letter was changed. The letter was updated for distribution in FY 03-04. In FY 04-05, the BMP list was updated and signatories changed. In FY 07-08, the kit was distributed to 520 food facilities.

REGIONAL COLLABORATION

Bay Area Stormwater Management Agencies Association (BASMAA) PI/P Committee

The BASMAA PI/P Committee has not met for some time, due to the Committee's interest in focusing its efforts on three active work groups: Media Relations, Regional IPM Store Partnership Program and Regional Advertising Campaign. Program staff participated in these Work Groups, and the Program benefited from regional PI/P activities, as described below.

Media Relations Campaign

Program staff participated in the development and implementation of the seventh year of the joint Media Relations effort supported by BASMAA and the Bay Area Clean Water Association (BACWA). The primary goals of the campaign are to develop long-term relationships with the media and to generate media coverage that would encourage individuals to adopt behavior changes to prevent water pollution. The Program contributed funding (approximately $9,000) to the campaign as part of its baseline budget contribution to BASMAA.

A copy of the BASMAA/BACWA Regional Media Relations Campaign Final Report is included in Appendix B-13. Campaign accomplishments included the following:

- During FY 07-08, the there were 46 media placements, including one print article, eight radio stories, eight letters to the editor, and coverage on ten media websites.
- Media coverage was received on four pitches: recycled water workshop, pest control operators, Top 5 Things You Can Do for the Bay, and the "Our Water Our World" campaign.

The total value of the coverage is estimated at $65,599. The total value of this year's coverage represents a decrease from last year, but the actual number of placements is comparable. The decrease in value is directly attributable to the significant PSA placements which have a lower value than other media placements, an increase in time and resources spent developing messages, news responses, and pitch strategy, and the increase in number of letters to the editor which have no comparative value.

Regional IPM Work Group

The IPM Store Partnership Program, also known as the Our Water Our World (OWOW) program, completed its ninth year in FY 07-08. The Program contributed funds and participated in the Regional Program, which is administered through BASMAA (the Program's contribution for FY 06-07 was approximately $5,000). The Regional Program, with input from IPM experts and participating stormwater programs, provides fact sheets, promotional materials, training sessions, display materials for stores, and an alternative products list. The Program and Co-permittees are responsible for recruiting stores, arranging training sessions for store employees, in-store display set-up, display maintenance, and on-going contact with participating stores.

FY 07-08 activities implemented by the IPM Partnership Committee are described below:

- Advertising - The customer intercept survey conducted in FY 04-05 indicated a very low awareness among residents about the OWOW program. To increase awareness, the OWOW program began an advertising campaign in FY 05-06. In FY 07-08, the Regional IPM Work Group collaborated with the BASMAA Regional Advertising Committee to implement a media campaign for promoting the OWOW program. Advertisements were developed and placed in movie theaters and on buses. The advertisements promoted the OWOW website and logo and asked people to look for the logo to identify less-toxic products. A total of 39,786 advertisements were placed. Copies of the advertisements and a summary of the media campaign are included in Appendix B-14. In addition to this, print advertisements were placed in the Bay Nature magazine and the Green Zebra coupon book.
- Store Partnership Program – The OWOW Program coordinated a print run of fact sheets and shelf talkers, updated the less-toxic products list, and developed new graphics for use in the ads and on shelf talkers. Two new fact sheets, one on rodents and the other on how businesses can select and hire pest control operators that implement IPM techniques are under development. Also provided on-call assistance (e.g., display set-up, training, IPM materials review) to specific stores (e.g., OSH, Walgreens)
- Exhibitor booths – Provided staffing for booths at the following events
  - Excel Gardens Dealer Show (August 2007)
  - L&L Dealer Show (October 2007)
  - NorCal trade show (January 2008)
  - How-to-Fair Pleasanton (March 2008)
- Event Sponsorships – Sponsored booths at the following events:
  - EcoWise Certified / UP3 Integrated Pest Management Contracting Workshop (November 2007)
  - 2008 Bay-Friendly Landscaping & Gardening Conference (February 2008).

- Media pitches – Collaborated with the BASMAA Media Relations Committee to develop and pitch a story on the OWOW Program. The article received coverage on KCBS, San Francisco Chronicle, in the Henry's Garden show on KRON.
- Presentations – Gave presentations about the OWOW Program at the following events:
  - Green-Blue Summit: Clean Water through Residential Integrated Pest Management (July 2007)
  - Southern California Academy of Sciences Symposium Controlling Runoff Pollution (May 2008)
  - Pesticides and the Chesapeake Bay Watershed Project (June 2008)

BASMAA Regional Ad Campaign

In FY 03-04, the Program's WEO AHTG recommended participating in the Regional Ad Campaign for FY 04-05. During FY 02-03 and FY 03-04, the Regional Ad Campaign (RAC) Committee implemented the "Beautiful Watersheds" advertising campaigns for increasing the public's awareness about watersheds. In FY 04-05, a new ad focusing on problems caused due to littering was developed and used. In FY 06-07, the RAC Committee began planning a new advertising campaign focusing on two pollutants: pesticides and litter. Details on the two campaigns are provided below:

Pesticides Campaign

As described in the IPM Partnership section, the pesticide campaign was implemented in August and September 2007 and included transit (bus posters) and movie theater advertising. Details are included in Appendix B-14.

Litter Campaign

In FY 07-08, the RAC Committee began planning the litter campaign. The goal of this campaign is to change Bay Area residents' (specifically the younger generation males, ages 18-29) views and behaviors regarding littering. The RAC consultants conducted a telephonic public opinion survey of 400 Bay Area residents (at least 70% of respondents were in the 18-29 years range) to provide current information about public attitudes, perceptions and behaviors on littering issues. Highlights of survey findings are described below: Although there was a considerable amount of information gathered, there were five significant findings.

1. The vast majority of respondents (73%) indicated that they would be most likely to pay attention to commercials that are funny and utilize humor to communicate key messages.
2. Almost two thirds of the targeted sample, especially those living in Alameda, Contra Costa, Solano, and San Mateo counties, indicated that they thought litter was a major problem in their region and of these, women feel litter is a major problem more often than men.
3. Although most were initially unwilling to admit to littering, the vast majority of respondents (82%) felt strongly that developing "a belief that littering is wrong" is what might keep them from littering.
4. When asked why littering matters, respondents mentioned that littering looks bad or ugly, is bad for the environment and/or that it reflects negatively on the community and its people.
5. The majority of individuals identified rivers, lakes, the bay and the ocean as important bodies of water and feel it is important to have clean water outdoors because of its impacts on the natural environment and water quality.

Based on the survey finding, the RAC consultants developed two sets of advertisements and conducted mall intercept interviews to obtain feedback. The advertisements are currently being modified based on feedback received.

Copies of the public opinion survey report and mall intercept interview report are available on request.

Program Information Fact Sheets

In FY 05-06 and FY 06-07, Program staff developed fact sheets describing several Program elements. The fact sheets aim to provide a brief non-technical overview of Program activities. Fact sheets on the following topics were developed and distributed:

- Water Quality Monitoring and Watershed Assessment;
- Sediment Impact and Management Practice Assessments;
- Watershed Education and Outreach;
- General Program;
- Trash Evaluation and Management.
- Training Municipal Development Review Staff;
- Water Quality Monitoring and Watershed Assessment (2nd Edition);
