CON 3	**Construction Inspection Frequency** The City inspects construction sites for adequacy of stormwater control measures. The frequency of inspections for active sites is at least once per month, or more frequently based on size of project, site conditions, precipitation, & project's potential impact on stormwater quality.			
CON 3.A	Maintain and update SOPs for construction inspection program.	As Needed	Done FY 05-06. SOPs were maintained and implemented for construction inspections. No updates were required.	PW, ESD-WE, PBCE-Bldg
CON 3.B	Document inspections of active construction sites.	Ongoing	Done FY 05-06. ESD and PW documented inspections of active construction sites during FY 05-06. These records are on file for review. Inspections included: ESD 418 PW (TDS) 107 PW (TDS) inspections included 8 private development sites (out of the total 107 inspected) that were not issued grading permits but had other active PW permits. In addition to the inspections listed above, PBCE Building inspections also include stormwater issues in their inspections. Currently, stormwater inspections are done during the course of routine building inspections. The outcomes are tracked only if an inspection results in a stormwater issue identified that warrants follow-up. Based on a workload review of building inspections conducted during FY 05-06, an estimated 2,500 inspections were conducted by Building inspectors to include a review of stormwater issues. The number of ESD inspections increased from 272 in FY 04-05 to 418 in FY 05-06 of which 44 were pre-season inspections. Seventy-eight were initial inspection visits that resulted in 340 follow-up visits for a total of 418 inspections. Also more verbal warnings (223 FY 05-06 compared to 124 in FY 04-05), more written notices (90 in FY 05-06 compared to 47 on FY 04-05), and more administrative citations (54 in FY 05-06 compared to 14 in FY 04-05) were issued. The increase was due to closer coordination and referrals from Public Works inspectors when contractors and developers failed to correct erosion and sediment control problems at construction sites that resulted in more aggressive enforcement actions by ESD inspectors.	PW, ESD-WE, PBCE-Bldg
CON 3.C	Evaluate the effectiveness of the construction inspection program and make improvements, as necessary.	Annually	Done FY 05-06. The coordination meetings amongst Building ESD, and Public Works inspectors continue to be a valuable tool to improve communications and coordination amongst inspectors in all three departments.	PW, ESD-WE, PBCE-Bldg

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
			Staff from ESD, PBCE Building, and Public Works on 10/12/2005 and 10/13/2005 conducted citywide training for PBCE Building inspectors and Public Works. The training continues to be an effective tool for informing inspectors of what to look for on construction sites. See Section 13.D: *Municipal Employee Training Summary*. ESD Watershed Enforcement inspectors continue to attend pre-construction meetings for public projects where they distribute and discuss erosion and sediment control BMPs with contractors and Public Works project staffs. These meetings help educate contractors on available BMPs to implement at construction sites.	
CON 4	**Wet Season Preparation** Prior to the beginning of the wet season each year, the City inspects all sites requiring erosion and/or sediment control plans, to ensure that measures have been taken to minimize erosion and discharges of sediment from disturbed areas.			
CON 4.A	Review and revise procedures for construction inspection staff regarding wet season construction requirements.	As Needed	Done FY 05-06. Procedures for wet season preparation were reviewed and found to be adequate with no changes identified. Public Works project managers continued to implement language in Section 10-2, Stormwater Pollution Prevention for public projects. This was emphasized during their annual training held January 24, 2006 for Public Works Construction Improvement Project Managers. See Section 13.D: *Municipal Employee Training Summary.*	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD
CON 4.B	Document pre-season inspection of construction sites to ensure adequate implementation of winterizing BMPs prior to the wet season.	Ongoing	Done FY 05-06 and ongoing. The City documented pre-season inspection of construction sites to ensure adequate implementation BMP, prior to the wet season during FY 05-06. Pre-season inspections were performed by Public Works for 38 private development projects. Public Works CFAS inspectors (for 26 public projects) performed preseason inspections. PBCE Building inspectors delivered notices to all active construction sites identified by Public Works. ESD Watershed Enforcement inspectors conducted 44 pre-season inspections before the official start of the rainy season on October 15, 2005.	PW-CFAS, PW-ECS, PW-TDS
CON 5	**Inspection and Site Evaluation Follow-up** Construction sites with inadequate erosion/sediment controls are given verbal and/or written notice of the inadequacies, according to the City's enforcement procedures, and followed up with action(s) commensurate with the risk of pollutants entering City storm drains or waterways. Written notices and follow-up actions are tracked and summarized in the City's Annual Report to the Regional Board.			
CON 5.A	Implement SOPs for follow-up actions and graduated	Ongoing	Done FY 05-06 and ongoing. SOPs for follow-up actions	PW-CFAS, PW-ECS,

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
	levels of enforcement for construction sites.		and graduated levels of enforcement for construction sites were implemented.	PW-TDS, PBCE-Bldg, ESD
CON 5.B	Track and summarize notices and follow-up actions for annual reports.	Annually	Done FY 05-06. Public Works Private Development (TDS) issued 165 verbal warnings. Thirty- six sites received more than one verbal warning. Fifteen written notices were issued. Three sites received more than one written notice. Eighteen referrals were made to ESD. Public Works CFAS issued 58 verbal warnings. Fifteen sites received more than one verbal warning. Sixteen written notices were issued. Fifteen sites received more than one written notice. Five referrals were made to ESD Public Works Engineering Construction Services issued verbal warnings at three of twelve project sites. All three sites received more than one verbal warning. No written notices were issued and no referrals were made to ESD. Public Works Airport Division inspectors issued approximately 14 verbal warnings and no written notices for 16 inspections conducted. Building inspectors issued a total of 18 notices to construction sites either requiring adjustments to the superintendent's performance or noting compliance with guidelines after a previous notice was delivered. Currently, stormwater inspections are done during the course of routine building inspections. The outcomes are tracked only if an inspection results in a stormwater issue identified that warrants follow-up. ESD Watershed Enforcement inspectors investigated 77 active construction sites for a total of 418 inspections. Throughout the season, ESD issued 223 verbal warnings, 90 written notices, and 54 administrative citations (fines).	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD
CON 6	**Municipal Training** The City provides training annually to its construction inspection staff on inspection procedures, documentation, and enforcement related to stormwater pollution prevention. All inspectors receive training on the latest construction-related stormwater pollution prevention techniques and appropriate follow up actions at least once every two years. The City keeps documentation that inspectors have received training.			
CON 6.A	Develop an annual training plan for construction inspection program.	Annually, Q1	Done See Section 13.D: *Municipal Employee Training Summary.*	ESD, PW, PBCE-Bldg
CON 6.B	Conduct annual training	Ongoing	Done. See Section 13.D: *Municipal Employee Training Summary.*	ESD, PW, PBCE-Bldg
CON 6.C	Track and document that inspectors have received training.	Annually	Done. See Section 13.D: *Municipal Employee Training Summary.*	ESD-UR

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
CON 6.D	Evaluate the training curriculum and frequency, and improvements, as necessary.	Annually	Done FY 05-06. The training curriculum and frequency were satisfactory. More than seven sessions were held on construction inspection. Strong emphasis on "keeping mud out of the streets" was again stressed during the training of city construction inspectors. In addition housekeeping issues, construction entrances, proper inlet protection and responsibilities of city inspectors was discussed. Staff identified the need for additional training stormwater BMPs and will conduct this training for all inspection groups during section meetings throughout FY 06-07 to supplement the main Fall training.	ESD, PW, PBCE-Bldg
CON 6.E	Hold coordination meetings for Building, ESD, and Public Works	Ongoing	Done FY 05-06 and ongoing. Meetings were held 9/20/2005, 11/30/2005, 2/15/2006, 3/29/2006, and 6/7/2006.	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD-WE, ESD-UR
CON 7	**Outreach** The City provides outreach materials to contractors, developers, and municipal staff on construction BMPs and compliance with the State General Construction Activity Stormwater Permit.			
CON 7.A	Review outreach/technology transfer materials and make improvements, as necessary	Annually, Q4	Done FY 05-06. Construction BMP information tri-folds in English, Spanish, and Vietnamese were distributed as needed in trainings and are on permanent display in City Hall. Distribution quantities are captured in 14.D: *Outreach Materials Distributed*. The City reviewed the *Dewatering from Construction Sites and In-Ground Utilities Maintenance Projects* brochure. Revisions were identified, and the revised reprints will be done in FY 06-07.	ESD, PW, PBCE-Bldg
CON 7.B	Conduct outreach sessions to development community.	Annually	Done FY 05-06. See 14.D: *PIP Activities* for details.	ESD, PW, PBCE-Bldg, Program & Water Board
CON 7.C	Document outreach to development community.	Annually	Done FY 05-06. DPW and ESD inspectors continued to distribute BMPs to the development community during construction site inspections. Outreach materials were also given to development community representatives at training sessions and at permit service counters. See 14.D: *PIP Activities* for details.	ESD-UR
CON 7.D	Evaluate outreach program and make improvements, as necessary.	Annually	Done FY 05-06. The City's outreach program is sufficient. With inspections, meetings, and training sessions, the outreach for this program element includes significant face-to-face contact. Inspectors also distribute materials to developers and contractors as part of inspection. In FY 06-07 the City is exploring placing signs at construction	ESD, PW, PBCE-Bldg

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
			site with the "No Dumping and 945-3000 Telephone Hotline" message for site employees and the public to see. The City will review key BMP materials and make changes as needed in FY 06-07.	
CON 7.D.1	Print and distribute revised "Clean Bay Blueprint" to developers and City inspectors.	FY 05-06	Done FY 05-06. See 14.D: *PIP Activities* for details.	ESD, PW, PBCE-Bldg
CON 7.D.2	Evaluate the use of construction site signs to alert site employees and the public of stormwater pollution prevention message and 945-3000 hotline information.	FY 05-06	Deferred to FY 06-07. After initial review of the concept, the City decided to modify its plans for this outreach task. It is scheduled for production and implementation in FY 06-07.	ESD, PW, PBCE-Bldg
CON 8	**Public Works Projects** The City will develop and implement a process to ensure that contractors hired to construct public works projects have adequate erosion control plans and use appropriate Best Management Practices (BMPs) adopted by the Department of Public Works.			
CON 8.A	Conduct training for Public Works capital improvement project staff (Architectural Engineering Design & Construction and Streets, Bridges & Sewers Design and Construction) on contract language, standard specifications, & enforcement.	Annually	Done FY 05-06. Training was developed and conducted on 01/24/06. See Section 13.D: *Municipal Employee Training Summary*	PW-CFAS, PW-ECS, PW-TDS, ESD
CON 8.B	Track the number of Public Works projects with these requirements.	Annually	Done FY 05-06. Tracked number of Public Works capital improvement projects to ensure erosion and sediment control language was included. Records are on file.	PW-CFAS, PW-ECS, PW-TDS
CON 9	**Construction Inspection Effectiveness Evaluation** The City of San José will review and evaluate effectiveness of its construction inspection SOPs and BMPs.			
CON 9.A	Evaluate and incorporate any needed improvements in construction inspection SOPs and BMPs.	Annually	Done FY 03-04.	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD-WE, ESD-UR
CON 9.B	Document and evaluate what worked well and what needs improvement.	Annually	Done FY 05-06. The communications and cooperation amongst Public Works, PBCE Building, and ESD Watershed Enforcement worked well. The citywide construction inspector's trainings held October 12-13, 2005, and the monthly citywide construction supervisors meetings, played a big part in this improvement. The City will continue to conduct the inspector's training and hold supervisors meetings in FY 06-07. PW (TDS) inspectors continue to observe housekeeping problems at private development sites. Some of the problems include: • No cover on dirt stockpile/dumpsters • Inadequate inlet protection • Inadequate maintenance of rock construction	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD-WE, ESD-UR

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
			entrances • Inadequate maintenance of perimeter protection • Tracking of dust and mud on public streets City inspectors will continue to work with developers to ensure effective BMPs are implemented to prevent these housekeeping issues. Staff identified the need for additional training stormwater BMPs and will conduct this training for all inspection groups during section meetings throughout FY 06-07 to supplement the main Fall training.	
CON 9.B.1	Expand the number of sites with an inspector of record to capture more of the Type 1 and Type 2 sites (per Public Work's designation)	Ongoing	Done FY 05-06 and ongoing. PBCE Building Inspection estimates they expanded the number of sites with an inspector of record to capture more of the Type 1 and Type 2 sites (per Public Work's designation) as follows: a) 51 Type 1 sites and b) 137 Type 2 sites.	PBCE-Bldg

4.B CON Program Evaluation

Several things worked well during the construction inspection process for FY 05-06. First, an ESD Watershed Enforcement inspector attended pre-construction meetings for public projects. The inspector distributed and discussed erosion and sediment control BMPs with contractors and project management staff. This pre-construction meeting helped make contractors aware of their responsibilities for preventing stormwater runoff pollution from construction sites.

Second, City inspectors and project managers attended several training sessions to improve their knowledge of erosion and sediment control practices. One-hundred and eight PBCE Building and Public Works inspectors attended annual trainings conducted by City staff on 10/12/2005 and 10/13/2005. Forty-seven Public Works project managers and technical staff attended trainings sponsored by the Water Board and Santa Clara Valley Urban Runoff Pollution Prevention Program on 12/8/2005 and 12/9/2005. Fifty-two CIP Public Works project managers attended training conducted by City staff on 1/24/2006.

Third, Public Works CFAS Division and Roads and Bridges Division instituted a practice of including a separate pay item in bids for erosion and sediment control. Contractors are now paid for implementing erosion and sediment control BMPs. This has proven to be highly effective for motivating contractors to implement BMPs at construction sites. Public Works Airport Division implemented this same practice some time ago and it also has been highly effective.

Based on evaluating the program, staff has also identified several improvements for FY 06-07. Public Works (TDS) is revising the Erosion Control Checklist so that the checklist is easier to use and the inspectors can better track the warnings. In the past, inspectors would issue a verbal warning, revisit the site at a later date to see if the violation was corrected, but would not always fully document how the violation was corrected. In order to avoid this problem, the checklist will be kept until the problem has been resolved and the resolution will be documented.

Public Works (TDS) inspectors were allowed to use their PDAs to report on erosion control on sites. Due to inconsistent reporting, however, PDA reports will no longer be accepted. All Public Works (TDS) inspectors will use the attached new form as it addresses the issues related to construction site inspections. This form will evolve with use and comment from the inspectors.

Additionally, ESD staff plans on conducting short, focused stormwater BMP trainings for all inspection groups during their section meetings throughout FY 06-07 to supplement the main Fall Annual Training. The City has also allocated funds in FY 06-07 for contractual support for two Construction Stormwater BMP Training Workshops for City staff. Public Works Engineering and Construction Services would like the training to focus on how to more effectively conduct inspections for projects that tend to

stretch over long distances and in some cases over multiple city blocks. For FY 06-07 more targeted training will be provided to E&CS inspectors on how to effectively monitor such project sites.

In FY 06-07 the City is exploring placing signs at construction sites with the "No Dumping and 945-3000 Telephone Hotline" message for use by site employees and the public. The City will review key BMP materials and make changes as needed in FY 06-07.

4.C CON Response to Water Board Comments

No comments received from Water Board on this Program Element.

4.D CON Summary Tables

Permits for Significant Development Projects[1]
Reviewed and/or Approved July 1, 2005 – June 30, 2006

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Department of Public Works, Airport Division						
Public Projects						
Renzel Airfield Improvements 2005 1661 Airport Boulevard	Taxiway Y	35 Ac	35 Ac	Ongoing	Standard Construction Best Management Practices (BMPS) including sediment and erosion control	Silt fencing, sandbags, filter fabric, etc.
North Concourse Project 1661 Airport Boulevard	Terminal	7.5 Ac	3.9 Ac	Ongoing	Standard Construction Best Management Practices (BMPS) including sediment and erosion control	Silt fencing, sandbags, filter fabric, etc.
Department of Public Works, Transportation & Development Services Division						
Private Projects						
Construct Restaurant/Retail Building (PW # 3-00178 - Issued 12/16/2005) 1751 N. First Street	Non-Residential	1.09	0.60	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow BMPs
Soil Remediation and Re-Open Storm Connection To Coyote Creek Outfall (PW # 3-00242 - Issued 9/23/2005) 1633 Oakland Road	Non-Residential	17.98	17.98	Grading On-going	Stabilized construction entrance, inlet protection, silt fence, fiber roll	Planning/grading permits, Follow SWPPP & Erosion Control Plan

[1] Projects that have conditions created by land disturbance activities that require a grading permit, as defined by local ordinance, or by discharges of stormwater runoff over areas with erodable soils.

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Grading for 20,000 sf Expansion of Existing Target Store (PW # 3-00703 - Issued 1/9/2006) 3155 Silver Creek Road	Non-Residential	5.50	5.50	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for a 2-Story Commercial Development (PW # 3-00739 - Issued 5/19/2006) 255 N. White Road	Non-Residential	1.29	1.50	Construction not Started	Standard BMPs	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for the Parking Lot of an Existing Commercial Building (PW # 3-01010 - Issued 12/20/2005) 696 E. Trimble Road	Non-Residential	0.36	0.36	Project Accepted	Standard BMPs	Planning/grading permits, Follow BMPs
Addition to Home (PW # 3-01049 - Issued 11/3/2005) 5198 Harwood Road	Residential	0.67	0.15	Grading On-going	Stabilized construction entrance, inlet protection, silt fence, sandbag barrier, wheel wash	Planning/grading permits, Follow SWPPP & Erosion Control Plan
Grading for Residential Project (PW # 3-01073 - Issued 3/16/2006) West Side of Masonic Drive, Approximately 520 Feet Southerly of Canoas Garden Avenue	Residential	4.76	2.50	Grading On-going	Stabilized construction entrance, inlet protection, fiber roll barrier	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for a Retail & Office Building (PW # 3-01153 - Issued 9/28/2005) 2110 Story Road	Non-Residential	0.51	0.51	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow BMPs
Construction of a Mcdonald's Restaurant in an Existing Shopping Mall Parking Lot (PW # 3-01184 - Issued 7/12/2005) 4800 Almaden Expy.	Non-Residential	0.70	0.70	Construction Completed	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for New Commercial Building (PW # 3-01627 - Issued 10/31/2005) 879 Coleman Avenue	Non-Residential	0.46	0.43	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract No. 9753 (PW # 3-01855 - Issued 10/27/2005) Northeast Corner Of Berryessa Road And Oakland Road	Residential	9.60	9.60	Grading On-going	Stabilized construction entrance, inlet protection, fiber rolls, silt fence, soil wetting	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Construct New Chilis Restaurant in an Existing Parking Lot (PW # 3-02202 - Issued 12/16/2005) 2200 Eastridge Loop	Non-Residential	74.46	0.54	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow BMPs
Construct New 7,102 sf Restaurant (Mac Grill) (PW # 3-02202 - Issued 2/23/2006) 2200 Eastridge Loop	Non-Residential	0.17	0.17	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Grading for Tract No. 9693 (PW # 3-02458 - Issued 9/30/2005) Northeast Corner of Bonita Avenue and Sunny Court	Residential	7.97	7.97	Grading On-going	Stabilized construction entrance, inlet protection, straw wattles, concrete washout area	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for New Chapel (PW # 3-02737 - Issued 2/15/2006) 300 Curtner Avenue	Non-Residential	0.47	0.47	Construction Completed	sandbag barrier	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Construct 26,000 sf Building (PW # 3-02988 - Issued 3/29/2006) 4202 Stevens Creek Blvd	Non-Residential	2.97	2.97	Grading On-going	Stabilized construction entrance, inlet protection, straw wattles	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for Proposed Medical Office Building (PW # 3-03081 - Issued 8/12/2005) 255 N. Jackson Avenue	Non-Residential	34.40	1.80	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for Hospital Building Expansion (PW # 3-03081 - Issued 9/30/2005) 225 N. Jackson Avenue	Non-Residential	34.40	15	Grading On-going	Stabilized construction entrance, inlet protection, straw wattles	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for Gish Apartments (PW # 3-03358 - Issued 8/26/2005) 35 East Gish Road	Residential	0.42	0.42	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Building Expansion (PW # 3-03628 - Issued 3/1/2006) 370 W. Trimble Road	Non-Residential	88.73	1.90	Construction not Started	Standard BMPs	Planning/grading permits, Follow BMPs
Grading Associated With Gas Station Improvements (PW # 3-04151 - Issued 3/30/2006) 1091 East Capitol Expressway	Non-Residential	0.53	0.53	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for a Single Family Home (PW # 3-04539 - Issued 10/26/2005) 946 Dorel Drive	Residential	1.01	0.40	Grading On-going	Stabilized construction entrance, fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for Tract No. 9807 (PW # 3-04766 - Issued 5/10/2006) Northeast Corner of Autumnvale Drive and Trade Zone Blvd	Residential	4	4	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Grading for New 2 Story Office Building (PW # 3-04853 - Issued 5/2/2006) 2077 Gold Street	Non-Residential	2.25	1.76	Grading On-going	Stabilized construction entrance, inlet protection, straw wattles, sediment trap, flow diversion berm	Planning/grading permits, Follow SWPPP & Erosion Control Plan
Grading for Tract No. 9694 (PW # 3-04988 - Issued 4/5/2006) Northwest Corner of King and Mabury Roads	Residential	3.96	3.96	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Last Phase of Old Apartment/Condo Project (PW # 3-05695 - Issued 8/26/2005) 1715 Murphy Avenue	Residential	14.30	0.80	Construction not Started	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Commercial Building (PW # 3-05731 - Issued 2/3/2006) 1674 Foxworthy Avenue	Non-Residential	11.27	6.30	Grading On-going	Stabilized construction entrance, inlet protection, fiber rolls, silt fence, soil wetting	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Construct New One-story Retail Center and a New Two-Story Office Building (PW # 3-06232 - Issued 1/23/2006) 745 S. Winchester Blvd	Non-Residential	0.90	0.90	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract No. 9789 (PW # 3-06640 - Issued 4/28/2006) Southeast Corner of Fleming Avenue and Morrie Drive	Residential	3.40	3.40	Grading On-going	Standard BMPs	Planning/grading permits, Follow SWPPP & Erosion Control Plan
To Allow for Grading for Gas Station and Car Wash on 0.78 Acre Site (PW # 3-06643 - Issued 6/29/2006) Northeast Corner of Monterey Road and Tully Road	Non-Residential	0.78	0.78	Construction not Started	Standard BMPs	Planning/grading permits, Follow BMPs
3 New SFR Detached (PW # 3-06646 - Issued 9/19/2005) 1323 Branham Lane	Residential	0.40	0.40	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for New 22-Story Building (San Jose Condominiums) (PW # 3-06748 - Issued 6/2/2006) Southwest Corner of Carlysle Street and Notre Dame Avenue	Residential	1.42	1.24	Grading On-going	Standard BMPs	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for Tract No. 9755 (PW # 3-06915 - Issued 4/11/2006) Southeast Terminus of Duckett Way, approximately 315 Feet East of South De Anza Boulevard	Residential	0.38	0.38	Construction not Started	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for a Medical Center (PW # 3-07395 - Issued 9/6/2005) 1569 Lexann Avenue	Non-Residential	1.94	1.54	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for a Below-Grade Parking Garage and Construction of a Youth Facility (PW # 3-07755 - Issued 12/1/2005) 480 S. 3rd Street	Residential	0.44	0.44	Construction not Started	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Cadence Building 7 Generator and Transformer Installation (PW # 3-08243 - Issued 3/22/2006) 2655 Seely Avenue	Non-Residential	26.84	0.17	Construction not Started	Standard BMPs	Planning/grading permits, Follow BMPs

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Grading to Build Pool in Geohazard Area (PW # 3-09283 - Issued 2/6/2006) 7195 Wooded Lake Drive	Residential	0.73	0.2	Construction not Started	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for New Medical Office Building (PW # 3-09446 - Issued 7/1/2005) 2140 Forest Avenue	Non-Residential	1.01	1.01	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract No. 9749 (PW # 3-09742 - Issued 10/12/2005) North Side of Campbell Avenue Approximately 1000 Feet East of Newhall Street	Residential	7.63	7.63	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading For 3 Residential Units (PW # 3-09963 - Issued 5/15/2006) 479 Willow Street	Residential	0.36	0.36	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow BMPs
Grading of Vacant Lot for Construction of Detached Single Family Residence (PW # 3-10969 - Issued 9/29/2005) 7236 St. George Lane	Residential	0.38	0.22	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for New Retail Building (PW # 3-11982 - Issued 3/22/2006) 2951 Monterey Road	Non-Residential	1.35	1.35	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract No. 9671 (PW # 3-12034 - Issued 8/25/2005) Southwest Corner of Loma Verde Drive and Winchester Boulevard	Residential	1.14	1.14	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Residential Project (PW # 3-12200 - Issued 6/19/2006) Southeast Corner of Curci Drive and St. Elizabeth Drive	Residential	2.88	2.88	Construction not Started	Standard BMPs	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading Plan for Parking Lot (PW # 3-12344 - Issued 6/27/2006) Near 1st Street and Guadalupe Parkway	Non-Residential	20	8.80	Construction not Started	Standard BMPs	Planning/grading permits, Follow BMPs
Grading Plan for Building 17 (PW # 3-12344 - Issued 6/27/2006) Near 1st Street and Guadalupe Parkway	Non-Residential	4.80	4.80	Construction not Started	Standard BMPs	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for 4 Lot Subdivision (PW # 3-12581 - Issued 8/5/2005) 1099 Amandalyne Court	Residential	0.75	0.75	Construction not Started	Standard BMPs	Planning/grading permits, Follow BMPs

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Grading for Church (PW # 3-12753 - Issued 7/12/2005) 2227 Curtner Avenue	Non-Residential	1.87	0.99	Grading On-going	Standard BMPs	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for Future Summerhill Tract No. 9734 (PW # 3-13081 - Issued 8/24/2005) Northwest Corner of Mcabee Road and Skyfarm Drive	Residential	5.74	5.74	Under Construction (Grading Completed)	Hydroseeding, stabilized construction entrance, inlet protection, fiber rolls, silt fence, soil wetting	Planning/grading permits, Follow SWPPP & Erosion Control Plan
Grading for Tract No. 9202 (PW # 3-13082 - Issued 9/26/2005) Branham Ln and Cherry Av (Se/C)	Residential	0.56	0.56	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Hellyer Commons (14 New Industrial Building, 97,200 Sf) (PW # 3-13432 - Issued 9/6/2005) Piercy Rd (S/S), 3100' S/E Silver Creek Valley Rd	Non-Residential	7.51	7.51	Under Construction (Grading Completed)	Stabilized construction entrance, inlet protection, sediment basin, straw wattles	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for Tract No. 9746 (PW # 3-13519 - Issued 9/28/2005) Eastside of Cypress Ave. (#332), approx. 260 ft Southerly of Stevens Creek Blvd	Residential	0.02	0.02	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract No. 9795 (PW # 3-13645 - Issued 4/5/2006) West Side Oakland Road at Rock Avenue	Residential	4.80	4.80	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Parking Lot (PW # 3-13676 - Issued 2/3/2006) 200 N. Almaden Blvd	Non-Residential	0.43	0.43	Project Accepted	Standard BMPs	Planning/grading permits, Follow BMPs
Grading For 1 SFD Residence (PW # 3-14066 - Issued 12/19/2005) 7268 Glenview Drive	Residential	0.46	0.29	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for New Single Family Residence. (PW # 3-14170 - Issued 10/14/2005) 3527 Ambra Way	Residential	0.22	0.22	Construction not Started	Straw wattles	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading to Add a Play Field to an Existing Church and School (PW # 3-14253 - Issued 4/21/2006) 500 Sands Drive	Non-Residential	23.90	1.05	Construction not Started	Standard BMPs	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for 14 Residential Condo Units (PW # 3-14687 - Issued 7/11/2005) South Side of Balbach Street Approximately 200 Feet West of South Market Street	Residential	0.40	0.40	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow BMPs

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Grading for New Worship Center At Westgate Church (PW # 3-14870 - Issued 3/29/2006) 1735 Saratoga Avenue	Non-Residential	3.38	1.80	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for 3 High-Rise Towers (PW # 3-14920 - Issued 2/5/2006) Almaden Blvd & Woz Way (Nw/C)	Non-Residential	3.66	3.57	Construction not Started	Standard BMPs	Planning/grading permits, Follow SWPPP & Erosion Control Plan
Grading for New Custom Home (PW # 3-14922 - Issued 4/3/2006) 1587 Calco Creek Drive	Residential	2.18	0.15	Grading On-going	Inlet protection, fiber roll fence	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for Commercial Building (PW # 3-15018 - Issued 6/15/2006) 955 The Alameda	Non-Residential	0.61	0.61	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract No. 9692 (PW # 3-15362 - Issued 7/20/2005) 500 Tully Road	Residential	11.40	8.54	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for Tract No. 9665 (PW # 3-15570 - Issued 9/21/2005) Northwest Corner of Bassett Street and North First Street	Residential	1.47	1.47	Grading On-going	Stabilized construction entrance, inlet protection, fiber roll fence	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for Tract No. 9579 - Bellagio Garden (PW # 3-15667 - Issued 9/26/2005) Northwest Corner of North 1st St. and Gish Rd.	Residential	0.67	0.67	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for New Auto Dealership on a Vacant Lot (PW # 3-15699 - Issued 8/31/2005) 3600 Monterey Road	Non-Residential	1.08	1.08	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Paseo Senter at Coyote Creek Affordable Housing Project (PW # 3-15816 - Issued 3/30/2006) 1898 Senter Road	Residential	7.20	6.60	Grading On-going	Stabilized construction entrance, inlet protection, silt fence, flow diversion berm, sediment basin, straw bale dike	Planning/grading permits, Follow SWPPP & Erosion Control Plan
Grading for Tract No. 9637 (PW # 3-15819 - Issued 11/14/2005) Northeast Corner of North Buena Vista Avenue and West San Carlos Avenue	Residential	2.80	2.30	Construction not Started	Standard BMPs	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for Three New Homes (PW # 3-15873 - Issued 7/1/2005) 1400 Murphy Avenue	Residential	0.38	0.22	Construction not Started	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Two New Single Family Units (PW # 3-15875 - Issued 7/1/2005) 1597 Ringwood Avenue	Residential	0.58	0.17	Construction not Started	Standard BMPs	Planning/grading permits, Follow BMPs

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Grading for Tract No. 9719 (PW # 3-15876 - Issued 3/13/2006) South Side of Murphy Avenue E/S Mission Springs Court	Residential	0.42	0.42	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Two New Single Family Dwellings (PW # 3-16083 - Issued 5/24/2006) 1777 Mount Pleasant Road	Residential	0.60	0.60	Construction not Started	Standard BMPs	Planning/grading permits, Follow BMPs
Phase 1 Grading for the Proposed Roadways and Pad Elevation Only for Residential Uses (PW # 3-16147 - Issued 4/5/2006) Southwest Corner of Monterey Road and Goble Lane.	Residential	29	29	Grading On-going	Standard BMPs	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for Tract No. 9613 - Phase II (PW # 3-16313 - Issued 5/15/2006) Southeast Corner of Madden Avenue and North Jackson Avenue	Residential	0.57	0.57	Under Construction (Grading Completed)	Stabilized construction entrance, inlet protection, straw wattles	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
To Construct One Single Family Dwelling on a Vacant Lot (PW # 3-16444 - Issued 6/27/2006) Northerly Side of River View Drive, approximately 1,400 Feet Easterly of Lyric Lane	Residential	0.27	0.27	Construction not Started	Standard BMPs	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for Tract No. 9642 (PW # 3-16567 - Issued 1/20/2006) South Side of Curtner Ave. Approx. 630 Feet Westerly of Bascom Ave.	Residential	0.98	0.98	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract No. 9805 (PW # 3-16600 - Issued 6/12/2006) Northeast Corner of Auzerais Avenue and Sunol Avenue	Residential	12.50	12.50	Grading On-going	Standard BMPs	Planning/grading permits, Follow SWPPP & Erosion Control Plan
Grading for Tract No. 9733 (PW # 3-16644 - Issued 7/14/2005) South Side of the Terminus of Marburg Way, Approximately 550 Feet West of North 33rd Street.	Residential	3.23	3.23	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for Commercial Development (PW # 3-16669 - Issued 9/30/2005) 22 N. White Rd	Non-Residential	0.34	0.34	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract No. 9731 (PW # 3-16670 - Issued 8/15/2005) North Side of Umbarger Road Approximately 1,200 Feet Westerly of Senter Road	Residential	3.49	3.49	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Grading for Tract No. 9726 (PW # 3-16697 - Issued 8/8/2005) Northeast Corner of Newhall Street and Campbell Avenue	Residential	10.10	10.10	Under Construction (Grading Completed)	Stabilized construction entrance, sediment barrier, fiber rolls	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for Tract No. 9751 (PW # 3-16712 - Issued 5/9/2006) South Side of Malone Road Approximately 240 Feet Northeasterly of Johnston Ave.	Residential	1.17	1.17	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for a Residential Project (PW # 3-16716 - Issued 12/1/2005) 3856 Suncrest Avenue	Residential	0.44	0.22	Grading On-going	Stabilized construction entrance, fiber rolls, soil wetting	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for Tract No. 9705 (PW # 3-16722 - Issued 7/14/2005) Southeast Terminus of E. San Antonio Street and S. 34th Street	Residential	1.75	1.75	Under Construction (Grading Completed)	Stabilized construction entrance, inlet protection, fiber rolls, silt fence, soil wetting	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for Tract No. 9712 (PW # 3-16737 - Issued 7/20/2005) South Side of San Antonio Road, approximately 270 Feet Easterly of King Road	Residential	1.10	1.10	Grading On-going	Stabilized construction entrance, inlet protection, fiber rolls, silt fence, soil wetting	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for an Industrial Building (PW # 3-16738 - Issued 9/15/2005) 903 Commercial Street	Non-Residential	0.58	0.58	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow BMPs
New SFR Detached (PW # 3-16749 - Issued 10/28/2005) 1324 Clayton Road	Residential	0.98	0.34	Grading On-going	Stabilized construction entrance, inlet protection, silt fence	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for Tract No. 9710 (PW # 3-16753 - Issued 8/4/2005) South Side of Hillsdale Avenue, Approximately 420 Feet East of Highway 87	Residential	1.70	1.70	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for New Office Building and Parking Lot (PW # 3-16754 - Issued 11/22/2005) 977 & 995 Saratoga Avenue	Non-Residential	0.75	0.71	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs

Project Name & Location	Project Type	Site Size (Ac or s.f.)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Grading for Tract No. 9737 (PW # 3-16780 - Issued 9/2/2005) West Side Of Dent Avenue, approximately 320 Feet Southerly of Branham Lane	Residential	0.63	0.60	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for New Commercial Building (PW # 3-16782 - Issued 11/7/2005) 987 Almaden Avenue	Non-Residential	0.36	0.36	Construction not Started	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for A Single-Family Residence (PW # 3-16793 - Issued 10/27/2005) 1581 Calco Creek Dr.	Residential	1.08	0.11	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for New R&D Building (PW # 3-16808 - Issued 9/9/2005) 1271 Story Road	Non-Residential	0.41	0.41	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract No. 9814 (PW # 3-16836 - Issued 6/13/2006) Northeast Corner of Almaden Avenue and W. Alma Avenue	Residential	0.75	0.75	Construction not Started	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for New Single Family House (PW # 3-16838 - Issued 7/15/2005) 1594 Calco Creek Dr.	Residential	0.50	0.20	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for a Single-Family Detached Residence (PW # 3-16855 - Issued 3/30/2006) 312 Willow St.	Residential	0.12	0.12	Construction not Started	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for a Residential Project (PW # 3-16869 - Issued 9/14/2005) 2038 Biarritz Place	Residential	0.46	0.32	Under Construction (Grading Completed)	Stabilized construction entrance, inlet protection, fiber rolls, silt fence, soil wetting	Planning/grading permits, Follow SWPPP & Erosion Control Plan
Grading for Tract No. 9776 (PW # 3-16879 - Issued 4/28/2006) South Side of Neal Avenue, approximately 245 feet east of South Winchester Boulevard	Residential	0.99	0.99	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract No. 9808 (PW # 3-16887 - Issued 5/3/2006) West Side of Lincoln Avenue Approximately 230 feet Northerly of Pine	Residential	0.59	0.59	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for Tract No. 9760 (PW # 3-16889 - Issued 12/20/2005) West Side of Meridian Avenue, 600 Feet Northerly of Foxworthy Avenue	Residential	8.76	8.76	Under Construction (Grading Completed)	Stabilized construction entrance, inlet protection, fiber rolls, silt fence, soil wetting	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training
Grading for 2 Lot Subdivision (PW # 3-16898 - Issued 5/23/2006) 1113 Lincoln Court	Residential	0.28	0.27	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
To Allow Initial Grading For Phase 1 of a 401 Residential Condo Units Development in a 22-Story High-Rise. (PW # 3-16917 - Issued 9/28/2005) 88 E. San Fernando Street	Residential	1.58	1.58	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading/Mass Excavation for a 22-Story Mixed-Use High Rise (PW # 3-16917 - Issued 12/21/2005) 88 E. San Fernando Street	Residential	2.99	1.13	Grading On-going	Stabilized construction entrance, inlet protection, straw wattles	Planning/grading permits, Follow SWPPP & Erosion Control Plan, Applicant/ developer/ consultant/ contractor attend PW Erosion /Sediment Controls Training

PROJECT NAME & LOCATION	PROJECT TYPE	SITE SIZE (AC OR S.F.)	AREA OF LAND DISTURBED (AC)	PROJECT STATUS	STORMWATER CONTROL MEASURES INCLUDED IN PROJECT	REQUIREMENT MECHANISM
Landslide Repair (PW # 3-16943 - Issued 10/3/2005) 5502 Sunset Hills Court	Residential	2.57	0.53	Under Construction (Grading Completed)	Standard BMPs	Planning/grading permits, Follow BMPs
New Pool and New Retaining Wall (PW # 3-16988 - Issued 6/1/2006) 2684 Gayley Place	Residential	0.41	0.10	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading Remediation (PW # 3-16997 - Issued 4/25/2006) 170 San Ramon Drive	Residential	1.03	0	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for a New Retail Building (PW # 3-17124 - Issued 7/1/2005) 2894 S. Bascom Avenue	Non-Residential	0.23	0.23	Construction Completed	Standard BMPs	Planning/grading permits, Follow BMPs
Retaining Walls (PW # 3-18058 - Issued 4/27/2006) 2142 Chisin Street	Residential	0.60	0.02	Construction not Started	Standard BMPs	Planning/grading permits, Follow BMPs
Grading for New Single Family Dwelling (PW # 3-18059 - Issued 5/15/2006) 1691 Marseilles Court	Residential	0.37	0.37	Grading On-going	Standard BMPs	Planning/grading permits, Follow BMPs

5. PSR: Public Streets, Roads, & Highways

5.A PSR Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
PSR 1	**Implementation of BMPs** The City of San José will implement Best Management Practices (BMPs) for street, road, and highway operation and maintenance (O&M) activities to reduce pollutants in stormwater and eliminate illicit discharges to the maximum extent practicable.			
PSR 1.A	Develop additional BMPs, as needed, when new O&M tasks are instituted.	As Needed	Done FY 05-06. Additional BMPs were included in the three Corp Yard SWPPP draft revisions.	DOT, ESD
PSR 1.B	Develop SOPs based on BMPs.	As Needed	Done FY 05-06. New SOPs were written for PSR and SDO elements (see PSR 1.D.1).	DOT, ESD
PSR 1.C	When new BMPs and SOPs are developed, integrate BMPs and SOPs into training program.	As Needed	Done FY 05-06. SWPPP BMPs were written into the May 2006 DOT Crew training and the June 2006 Corp Yard training.	DOT, ESD
PSR 1.D	Staff will review current PSR and SDO BMPs and SOPs. The annual training sessions with staff will be used as an opportunity to evaluate the effectiveness of BMPs and SOPs. BMPs and SOPs will be updated as indicated by the review.	Done FY 04-05 Annually	Done FY 05-06. The current review in the annual training indicated that no new SOPs, except the ones listed in PSR 1.D.1 are necessary.	DOT, ESD
PSR 1.D.1	Revise or write the following SOPs: • Sidewalk/Plaza Maintenance: Cleaning, concrete installation and replacement, surface removal and repair; • Bridge and Structure Maintenance: Painting and paint removal, repair work, and graffiti removal; • Median and Road Embankment Maintenance; • Storm Drain Line Cleaning; • Management of Storm Drain System Solid Waste; • Pump Station Inspection and Cleaning; • Drainage Ditch Cleaning.	6/30/06	Done FY 05-06. First drafts of the listed SOPs were written and sent out for review and comment by DOT and PRNS contacts. These SOPs will be finalized prior to crew training in FY 06-07.	DOT, ESD
PSR 2	**Contractor Use of BMPs** The City of San José will develop and implement a process to ensure that contractors employed to perform street, road, and highway O&M activities use appropriate BMPs per URMP.			
PSR 2.A	Train contract managers for public street, road, and highway O&M contracts on related stormwater BMPs annually.	Annually	Done FY 05-06. Contract manager training was held on 1/26/06. The City received one complaint regarding contractors conducting PSR O&M activities for the City. See 5.B: PSR *Program Evaluation* for summary of complaint.	DOT, ESD
PSR 2.B	Develop standard contract language for PSR	1/31/06	Done FY 05-06. Staff drafted stormwater standard	DOT, ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
	maintenance activities.		contract language for general POs and contracts; POs and contracts which contain pest management activities; and POs and contracts which contain PSR, RPW, and SDO operation and maintenance activities. A new compliance date, 1/31/06, was established during time language was being reviewed by the City Attorney's Office.	
PSR 3	**City Staff Annual Training** The City of San José will provide annual training to its municipal staff in the use of appropriate BMPs. The City will also provide a mechanism for obtaining feedback from staff on the implementation and effectiveness of the BMPs and Control Measures.			
PSR 3.A	Identify training goals, such as improving the focus of the training on the specific BMPs used by a section; integrating new BMPs, if any; etc.	Annually	Done FY 05-06. SWPPP training was integrated into the DOT crew training in FY 05-06.	DOT, ESD
PSR 3.B	Identify training opportunities (which could include tailgate meetings and other existing training).	Annually	Done FY 05-06. Training opportunities were identified in April 2006.	DOT, ESD
PSR 3.C	Create or revise training modules for affected City staff and contractors.	As needed	Done FY 05-06. The DOT crew training was revised to include SWPPP training.	DOT, ESD
PSR 3.C.1	Add specific components from DOT Electrical Crew training module to the general DOT Street Crew training module. These components include: asphalt/concrete removal, concrete installation and repair, and mercury lamp recycling and/or disposal.	6/30/06	Done FY 05-06. Specific components from the FY 04-05 DOT Electrical Crew training module were added to the general DOT Crew training module. Comments received in FY 04-05 DOT electrical crew training indicated that information in their training should be added to the general DOT crew training; once this was done, the DOT electrical crews were incorporated back into the general DOT crew training in FY 05-06.	ESD
PSR 3.D	Create or revise collateral material based on training modules.	As needed	Done FY 05-06. A video was included in this year's DOT Crew training – "Storm Watch, Municipal Stormwater Pollution Prevention Best Management Practices."	DOT, ESD
PSR 3.E	Schedule training with affected supervisors.	Annually	Done FY 05-06. DOT inlet cleaning crews training was scheduled with supervisors in August 2005. Training for DOT street maintenance crews was scheduled with supervisors in April 2006.	DOT, ESD
PSR 3.E.1	Develop and implement a new training module specifically for DOT electrician staff.	Done FY 04-05	Done FY 04-05.	DOT, ESD
PSR 4	**Notification of Public Agencies** The City of San José will inform other parties (e.g., CalTrans, the County of Santa Clara, and public utilities) conducting street, road, and highway O&M activities within its jurisdiction of the requirements to implement pollutant reduction BMPs and Control Measures in stormwater to the maximum extent practicable and eliminate illicit discharges.			
PSR 4.A	Identify conditions under which another agency will be notified regarding relevant stormwater requirements.	Done FY 02-03	Done prior to FY 02-03. The City notifies other agencies conducting street, road, and highway O&M activities within its jurisdiction of the requirements to implement BMPs and Control Measures on a complaint driven basis. When a complaint is received, a Watershed Enforcement Inspector	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
			investigates the complaint and educates the agency on proper BMPs and Control Measures; a citation is issued if necessary. For each complaint the City received involving other agencies in FY 05-06, Watershed Enforcement investigated the complaint and educated the agency contacts on proper BMPs and control measures to be used when conducting PSR O&M activities within the City. No citations were issued.	
PSR 5	**BMP Effectiveness Reviews** As part of the annual review process, the City of San José will review and evaluate the effectiveness of its BMPs in reducing pollutants in stormwater and eliminating illicit discharges. The review and evaluation will include input from the municipal maintenance staff that implement the BMPs.			
PSR 5.A	Draft procedure for annual effectiveness reporting, including sub-procedures for gathering feedback from affected supervisors and for modifications to BMPs and SOPs as necessary.	Done FY 01-02	Done FY 01-02.	DOT, ESD
PSR 5.A.1	Review procedures for annual effectiveness evaluation. Consider obtaining feedback from supervisors on how to assess BMP effectiveness and the use of training sessions with staff as an opportunity to evaluate BMPs and SOPs.	Annually	Done FY 05-06. The annual DOT Stormwater BMP and SOP training was conducted in May 2006. Both DOT crews and supervisors attended the training conducted in May. PSR & SDO BMPs and SOPs were reviewed and feedback was requested during the training sessions. Written evaluations for the training were also distributed. Feedback received from both sources indicated that the existing BMPs and SOPs are effective and no modifications were necessary in FY 05-06. See 5.B: *PSR Program Evaluation* for the summary of training evaluation data.	DOT, ESD
PSR 5.B	Conduct evaluation of BMPs and SOPs.	Annually	Done FY 05-06. The current review in the annual training indicated that no new SOPs, except the ones listed in PSR 1.D.1 are necessary.	DOT, ESD
PSR 6	**Rural Public Works Maintenance and Support Activities** The City will extend its control measure strategy for PSR to address water quality impacts resulting from public works maintenance and support activities in rural areas.			
PSR 6.A	Identify City-owned properties that are applicable (under the RPW performance standard).	Ongoing	Done FY 05-06 and ongoing. In FY 02-03 the initial list of rural public works facilities under the jurisdiction of the City of San José was compiled. No new RPW facilities were identified in FY 05-06.	ESD, PRNS, DOT, GS
PSR 6.A.1	Re-evaluate the feasibility of using GIS information to identify additional applicable properties, if any.	6/30/06	Done FY 05-06. First evaluated in FY 03-04, the use of GIS information for identifying additional applicable rural public works facilities was found infeasible using available data and resources. No changes specific to criteria used to identify rural public works facilities have been made in the GIS information collected by the City, therefore it was	PRNS, GS, DOT, ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
			still not feasible to use this information to identify additional applicable properties in FY 05-06.	
PSR 6.B	Develop or adapt Standard Operating Procedures (SOPs) and Best Management Practices (BMPs) for rural public works activities.	Done FY 03-04	Done FY 03-04.	PRNS, GS, DOT, ESD
PSR 6.C	Provide annual training on appropriate SOPs/BMPs to City staff that perform rural public works operations and maintenance activities. Incorporate SOPs/BMPs evaluation into annual training.	Annually	Done FY 05-06. RPW training was conducted for PRNS staff November 7-16, 2005. Five training sessions were held over a two- week period in order to accommodate a multitude of different Park staff schedules. Total attendance for the five training sessions was 37.	PRNS, GS, DOT, ESD
PSR 6.D	Through contract specifications, require contractors hired by the City to use appropriate SOPs/BMPs when performing rural public works construction or maintenance.	1/31/06	Done FY 05-06. Staff drafted stormwater standard contract language for general POs and contracts; POs and contracts which contain pest management activities; and POs and contracts which contain PSR, RPW, and SDO operation and maintenance activities. A new compliance date, 1/31/06, was established during time language was being reviewed by the City Attorney's Office.	PRNS, GS, DOT, ESD
PSR 6.E	Annually conduct an evaluation of the effectiveness of the rural public works program, report the results in the Urban Runoff Annual Report. Identify items for continuous improvement.	Annually	Done FY 05-06. The RPW BMP and SOP training was conducted in November 2005. Feedback was requested during the training, and evaluations were distributed. The feedback indicated that no modifications to the BMPs and SOPs were necessary. See 5.B: *PSR Program Evaluation* for the summary of training evaluation data.	PRNS, GS, DOT, ESD

5.B PSR Program Evaluation

Training

The City of San José provides annual training to its municipal staff in the use of appropriate BMPs. The City also provides a mechanism for obtaining feedback from staff on the implementation and effectiveness of the BMPs and Control Measures. Annual municipal staff training was held in May 2006 for the PSR and SDO program elements. Participants were given an evaluation form to fill out. Of the 189 staff that participated in the training, 104 evaluations were completed and returned. Results of the completed evaluations are summarized below:

- 88% responded that the training subjects taught are appropriate to their work;
- 87% responded that the BMPs/SOPs described match their work practices;
- 93% responded that the training adequately described the relationship of BMPs/SOPs to compliance with the City's Stormwater NPDES permit;
- 91% responded that the training adequately explained how they, City staff, can help the City maintain compliance with the Stormwater NPDES permit; and
- 90% responded that the training adequately explained a SWPPP.

Once the draft SOPs listed in PSR 1.D.1 and SDO 1.D.1 are reviewed and approved, the SOPs will be included in the FY 06-07 DOT crew training. In addition, training will be conducted in FY 06-07 for City staff and City contractors that perform surface cleaning at City facilities.

The City's control measure strategy for PSR also addresses water quality impacts resulting from public works maintenance and support activities in rural areas. Training was held in November 2005. Participants were generally positive about the content and relevance of the training session to their work. Of the 37 staff that participated in the training, 32 evaluations were completed and returned. Results of the completed evaluations are summarized below:

- 100% responded that the training subjects taught are appropriate to their work;
- 100% responded that the BMPs/SOPs described match their work practices;
- 100% responded that the training adequately described the relationship of BMPs/SOPs to compliance with the City's Stormwater NPDES permit; and
- 100% responded that the training adequately explained how they, City staff, can help the City maintain compliance with the Stormwater NPDES permit.

The RPW training schedule will be re-evaluated in FY 06-07 in order to coordinate more efficiently with PRNS staff schedules.

Contractor Use of BMPs

In FY 05-06, one complaint was received involving a City of San José contractor. A WE inspector went out to the location of the complaint, discovered the contractor discharging water to the storm drain from a leaking street sweeper (truck overflowed with water from hydrant). The street sweeper operator was told to cease the discharge, stop the truck from leaking, clean up the affected area, and protect the storm drain from future discharges. The discharge was stopped and the area cleaned up immediately. An Official Warning Notice was issued to the company, the inspector spoke to the maintenance manager, and appropriate BMPs were distributed. In FY 06-07, an additional step will be added in response to complaints involving City contractors conducting PSR and SDO O&M activities. The contract manager for the City contract involved in a stormwater complaint will also be notified.

Informing Other Agencies

In past years, the City of San José has informed other parties (e.g., CalTrans, the County of Santa Clara, public utilities) conducting street, road, and highway O&M activities within its jurisdiction of the requirements to implement pollutant reduction BMPs and control measures in stormwater to the maximum extent practicable and eliminate illicit discharges on a complaint driven basis. When a complaint is received, a Watershed Enforcement Inspector investigates the complaint and educates the agency on proper BMPs and Control Measures, and issues a citation if necessary. This method will continue to be used in FY 06-07, with the addition of letters sent by the City to public agencies that conduct PSR O&M activities within the City's jurisdiction informing them of the requirement to implement appropriate BMPs and control measures while conducting their work.

BMP Effectiveness Review

As part of the annual review process, the City of San José reviews and evaluates the effectiveness of its BMPs in reducing pollutants in stormwater and eliminating illicit discharges. The review and evaluation includes input from the municipal maintenance staff that implements the BMPs. BMP effectiveness is evaluated using staff feedback gathered from training sessions. See training evaluation above. The City received one complaint regarding contractors conducting PSR O&M activities for the City. In FY 06-07, letters will be sent to City contractors conducting PSR and SDO O&M activities with a reminder to use appropriate BMPs while conducting their work.

Street Sweeping Program

The City conducts an extensive Street Sweeping program, involving the sweeping of the central business district; arterials, collectors, and bicycle lanes; and residential streets. Annually, the City sends out a calendar of the street sweeping schedule to each single-family dwelling, and asks neighborhood associations within the City to include reminders in their association newsletters for moving parked vehicles on street sweeping days. The City is continuing to expand the areas in which parking restrictions are required and enforced to improve the effectiveness of the street sweeping program. In FY 05-06, the enforcement area was broadened from 160 to 196 curb miles. The City anticipates expanding the areas in which parking restrictions are required and enforced for street sweeping by approximately 40 curb miles in FY 06-07.

5.C PSR Response to Water Board Comments

No comments received from Water Board on this Program Element.

5.D PSR Summary Tables / Additional Information

Parks Included in the Rural Public Works Performance Standard

Name of Park	Location	Acreage	Type of Park
Almaden Lake Park	Almaden Expwy & Coleman	64.9	Regional
Alum Rock Park	Alum Rock & Penitencia Creek	718.0	Regional
Emma Prusch Farm Park	Story & King	43.5	Regional
Guadalupe River Park	Between Hwy 880 and 280 along Guadalupe River in downtown San José	205.0	Regional
Kelley Park	Senter & Story	138.0	Regional
Lake Cunningham Park/Raging Waters	Capitol & Tully	202.0	Regional
Montgomery Hill Park	Yerba Buena & Murillo	59.6	Neighborhood
Overfelt Gardens	Education Park & McKee	32.6	Regional

6. SDO: Storm Drain System Operation & Maintenance

6.A SDO Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
SDO 1	**O&M BMP Implementation** The City of San José will implement best management practices (BMPs) for the storm drain system operation and maintenance (O&M) to reduce pollutants in stormwater to the maximum extent practicable. Specific BMPs for each type of O&M activity are those listed in the City's Urban Runoff Management Plan (URMP).			
SDO 1.A	Develop additional BMPs, as needed, when new O&M tasks are instituted (including structural controls if necessary).	As Needed	Done FY 05-06. Additional BMPs were included in the three Corp Yard SWPPP draft revisions.	DOT, ESD
SDO 1.B	Develop SOPs based on BMPs.	As Needed	Done FY 05-06. New SOPs were written for PSR and SDO elements (see SDO 1.D.1).	DOT, ESD
SDO 1.C	When new BMPs and SOPs are developed, integrate BMPs and SOPs into training program.	As Needed	Done FY 05-06. The BMPs in the three draft SWPPPs were written into the May 2006 DOT Crew training and the June 2006 Corp Yard training.	DOT, ESD
SDO 1.D	Staff will review current PSR and SDO BMPs and SOPs. The annual training sessions with staff will be used as an opportunity to evaluate the effectiveness of BMPs and SOPs. BMPs and SOPs will be updated as indicated by the review.	Done FY 04-05 Annually	Done FY 05-06. The current review in the annual training indicated that no new SOPs, except the ones listed in SDO 1.D.1 are necessary.	DOT, ESD
SDO 1.D.1	Revise or write the following SOPs: • Sidewalk/Plaza Maintenance: Cleaning, concrete installation and replacement, surface removal and repair; • Bridge and Structure Maintenance: Painting and paint removal, repair work, and graffiti removal; • Median and Road Embankment Maintenance; • Storm Drain Line Cleaning; • Management of Storm Drain System Solid Waste; • Pump Station Inspection and Cleaning; • Drainage Ditch Cleaning. See PSR 1.D.1.	6/30/06	Done FY 05-06. First drafts of the listed SOPs were written and sent out for review and comment by DOT and PRNS contacts. These SOPs will be finalized prior to crew training in FY 06-07.	DOT, ESD
SDO 2	**Problem Tracking and Process Improvement** The City of San José will develop and implement processes for tracking problem areas and ensuring that appropriate BMPs and SOPs will be implemented for storm drain operation and maintenance activities.			
SDO 2.A	Implement an annual inspection and cleaning work plan to achieve a Tier II level review.	Ongoing	Done FY 05-06 and ongoing. The FY 05-06 Storm Inlet Cleaning Program was conducted September 2005-January 2006. For inlet cleaning, DOT schedules and	DOT

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
			implements the inspection and cleaning schedule annually. To date, the City has been able to achieve a Tier 2 level review with a modified implementation timeframe. In FY 06-07, the City's intent is to continue the Tier 2 level review. However, due to budget constraints, the extended window for implementation of Tier 2 may be needed. In FY 05-06, over 28,500 inlets were inspected and, if needed, cleaned.	
SDO 2.B	Evaluate criteria for collecting data from City field personnel for the purposes of determining Problem Areas.	As Needed	Done FY 05-06. DOT and ESD staff met on August 1, 2005 to evaluate the FY 04-05 Storm Inlet Cleaning Program data collected and mapped using GIS. Upon evaluation it was decided that new criteria for data collection was needed to better understand the "car on catch basin" data, "silt sack" data, and whether or not a service request was written to follow up on problems that the cleaning crew could not resolve. A new data collection procedure was developed for "car on catch basin." Crews were to check the "car on catch basin" box if they came across a car parked over a catch basin. If the crew returned to the site to check if the car had been moved, they were to record each time they returned to the site. If the crew returned and no car was parked over the catch basin, so that the catch basin could be cleaned, the crew was to record that the catch basin was cleaned. After reviewing the FY 05-06 inlet cleaning data, it appears that the implementation of this procedure was not uniform. See 6.B: *SDO Program Evaluation* for proposed changes.	DOT, ESD
SDO 2.C	Revise documentation and problem area reporting procedure, if necessary, to improve reporting performance. Documentation to include frequency, nature, and type of recurring problem. Include coordination of data from ICID and Storm Drain Management System data sources. Include analysis of data to identify trends for targeting solutions.	As Needed	Done FY 05-06. DOT staff revised the Storm Inlet Cleaning data collection form in September 2005, prior to the crew training.	DOT, ESD
SDO 2.D	Produce Problem Area report.	Annually	Done FY 05-06. FY 05-06 Storm Inlet Cleaning Program Problem Area Report was produced by DOT staff in January 2006.	DOT
SDO 2.E	Address Problem Areas through ICID enforcement/ education activities, additional BMP development, program development or retrofit.	As Needed	Done FY 05-06. DOT and ESD staff met with Construction Inspection Supervisors to address abandoned, and/or un-maintained, construction site silt sacks and gravel bags at storm inlets in public right-of-	DOT, ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
			ways. DOT supervisors are to email the PW representative with the location of any silt sacks in question. The PW representative will send inspectors out to the site to check it out if it is a development project or pass on the information to other Public Works staff if the site is under their responsibility. If the silt sack is associated with a construction site, PW inspectors will require that the construction site maintain the silt sack. If the silt sack is not associated with a construction site, DOT will be notified so that the silt sack can be removed.	
SDO 3	**Contractor Use of BMPs** The City will develop and implement, as needed, a process to ensure that contractors employed to perform storm drain O&M activities use the appropriate BMPs. NOTE: All City SDO O&M is conducted in-house, and City staff receives BMP/SOP training annually. The only time storm drain maintenance might be contracted out would be for a rare flood emergency situation. The City has standard specifications that cover storm drain BMPs for construction activities.			
SDO 3.A	Train contract managers for SDO O&M contracts on related stormwater BMPs.	Annually	Done FY 05-06. Contract manager training was held on 1/26/06. The City did not receive any complaints regarding contractors conducting SDO O&M activities for the City.	DOT, ESD
SDO 4	**Staff Training and BMP Feedback** The City of San José will provide annual training to its municipal staff in use of appropriate BMPs and/or Control Measures. The City will also provide a mechanism for obtaining feedback from staff on implementation and effectiveness of BMPs and Control Measures.			
SDO 4.A	Provide training prior to the rainy season.	Annually	Done FY 05-06. Training conducted in September 2005 for inlet cleaning crews, and May 2006 for DOT crews.	DOT, ESD
SDO 4.B	Create or revise training modules for affected City staff.	As Needed	Done FY 05-06. SWPPP training was integrated into the DOT crew training in FY 05-06, and a SWPPP training module was developed for the Corp Yards' maintenance staff.	DOT, ESD
SDO 4.B.1	Improve the focus of the training on the specific BMPs used by a section.	As Needed	Done FY 04-05.	DOT, ESD
SDO 4.B.2	Provide specific training to inlet cleaning crews on IMSPAR data collection in advance of inlet cleaning program implementation.	Annually	Done FY 05-06. DOT Storm Inlet Cleaning Program crew training was conducted on September 21 & 22, 2005.	
SDO 4.B.3	Add specific components from DOT Electrical Crew training module to the general DOT Street Crew training module. These components include: asphalt/concrete removal, concrete installation and repair, and mercury lamp recycling and/or disposal.	6/30/06	Done FY 05-06. Specific components from the FY 04-05 DOT Electrical Crew training module were added to the general DOT Crew training module. Comments received from FY 04-05 DOT electrical crew training indicated that information in their training should be added to the general DOT crew training; once this was done, the DOT electrical crews were incorporated back into the general DOT crew training in FY 05-06.	ESD
SDO 4.C	Produce schedule for training.	Annually	Done FY 05-06. DOT inlet cleaning crews training was scheduled with supervisors in August 2005. Training for	DOT, ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
			DOT street maintenance crews was scheduled with supervisors in April 2006.	
SDO 5	**Data Analysis** As part of the annual review process, the City of San José will evaluate data regarding cleaning activities and unusual flows observed during inspection. The review and evaluation will include consideration of storm drain structural retrofit.			
SDO 5.A	Draft procedure for annual review and evaluation of data.	Done FY 01-02	Done FY 01-02.	DOT, ESD
SDO 5.A.1	Collect data on the amount of materials removed during inlet cleaning.	Done FY 04-05 Annually	Done FY 05-06. Data was collected, by DOT crews, on the amount and type of materials removed during the FY 05-06 Storm Inlet Cleaning Program.	DOT, ESD
SDO 5.B	Implement annual data review and identify follow-up actions as appropriate.	Annually	Done FY 05-06. The FY 05-06 Storm Inlet Cleaning Program Problem Area data was reviewed and follow-up actions were identified. See 6.B: *SDO Program Evaluation*.	DOT, ESD
SDO 5.B.1	Evaluate how follow up is conducted by crews when "cars on catch basins" is identified on the IMSPAR report, in order to better understand to what extent parked cars are a barrier to cleaning.	6/30/06	Done FY 05-06. A new procedure was introduced in FY 05-06 for when crews encountered a car on a catch basin during the storm inlet cleaning program. Crews were to note on their data collection sheet that a car was parked over a catch basin, and therefore the catch basin could not be cleaned. If the crew was able to go back to the catch basin at a later time in an attempt to inspect and clean the catch basin again, they were to record it on the data collection sheet for each time they went back. If they were finally able to clean the catch basin, that was to be recorded on the data collection sheet also.	DOT, ESD
SDO 5.B.2	Evaluate how to integrate the results of the IMSPAR report, regarding garbage and high debris, into scheduling additional cleaning into FY 05-06 and subsequent years.	6/30/06	Done FY 05-06. Some additional cleaning was conducted in FY 05-06. Conducting additional cleaning will be evaluated again in FY 06-07 using the FY 05-06 Storm Inlet Cleaning data collected.	DOT, ESD
SDO 5.B.3	Evaluate use of hand held devices to collect data during storm drain inlet cleaning and potentially other maintenance activities.	6/30/06	Done FY 05-06. The use of hand held devices to collect data during storm drain inlet cleaning and potentially other maintenance activities was evaluated in FY 05-06 and found to be infeasible at this time.	DOT, ESD
SDO 6	**BMP Effectiveness Reviews** As part of the annual review process, the City of San José will review and evaluate the effectiveness of its BMPs in reducing pollutants in stormwater and eliminating illicit discharges.			
SDO 6.A	Review with supervisors to get feedback and information on how to assess BMP effectiveness.	As Needed	Done FY 05-06. DOT supervisors attended annual training. Evaluations were distributed to elicit information on BMP and SOP effectiveness. Feedback received indicates that the BMPs and SOPs are effective, with only the SOP listed in SDO 1.D.1 needing modification.	DOT, ESD
SDO 6.B	Use annual training sessions with staff as an	Annually	Done FY 05-06. DOT Stormwater BMP and SOP training	DOT, ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
	opportunity to evaluate the effectiveness of BMPs & SOPs.		was conducted in May 2006. Both DOT crews and supervisors attended the training conducted in May. PSR & SDO BMPs and SOPs were reviewed and feedback was requested during the training sessions. Written evaluations for the training were also distributed. Feedback received from both sources indicated that the BMPs and SOPs are effective and only the SOP listed in SDO 1.D.1 needed modification in FY 05-06. See 6.B: *SDO Program Evaluation* for the summary of training evaluation data.	

6.B SDO Program Evaluation

Training

The City of San José provides annual training to its municipal staff in use of appropriate BMPs. The City also provides a mechanism for obtaining feedback from staff on implementation and effectiveness of BMPs and Control Measures. See 5.B: *PSR Program Evaluation, Training* for results. Once the draft SOPs listed in PSR 1.D.1 and SDO 1.D.1 are reviewed and approved, the SOPs will be included in the FY 06-07 DOT crew training. In addition, training will be conducted in FY 06-07 for City staff and City contractors that perform surface cleaning at City facilities.

Storm Inlet Cleaning Program Data Review

As part of the annual review process, the City of San José evaluates data regarding cleaning activities and unusual flows observed during inspection. The review and evaluation includes consideration of storm drain structural retrofit. The City reviews data on cleaning activities via the Infrastructure Maintenance Division Storm Drain System Problem Area Report (IMSPAR). The data collection criteria developed in FY 04-05 for the Storm Inlet Cleaning program continued to work well. This was the second year that quantifiable data was collected by the inlet cleaning crews. In FY 05-06, the data collection form used check boxes for identifying each problem type. This made it easier for crews to record multiple problems at one inlet. Evaluation of the FY 05-06 IMSPAR data indicates that approximately 6% of the City's storm drain inlets and catch basins had a problem associated with them. The key problems for urban runoff were:

1. Cars parked over catch basins (~1.5%) – crews could not reach the catch basin to clean it. During review, the City considered options for minimizing parked cars but concluded that sign posting would be cost prohibitive at this time. Currently staff return to these catch basins at least once for subsequent cleaning attempts.
2. High Debris (~1.4%) – debris (leaves, lawn clippings, dirt and other natural materials) in excess of 3 feet deep in catch basin.
3. Garbage (~1.3%) – volume of garbage (paper, bottles, cans, and other man-made waste) in excess of a full grocery bag.
4. Illicit pollution (~0.1%) – materials such as concrete, antifreeze, oil, paint, etc. that appear to have been intentionally dumped into the catch basin. Maintenance staff are directed to contact Environmental Enforcement when this issue is identified.
5. Other problems encountered included roots, construction, silt sacks, and no access to catch basin (grate could not be opened).

Upon review of the IMSPAR data, the City identified several potential changes for FY 06-07. In regards to cars on catch basins, the City will further evaluate how crews conduct follow up when this issue is identified in order to better understand to what extent parked cars are a barrier to cleaning. These data will be evaluated to see if they can be used as one of the factors in determining where future posted signage for street sweeping restrictions will occur. In regards to the "high debris" issue, the City will evaluate how to integrate the results of the IMSPAR report into scheduling additional inlet cleanings for FY 06-07 and subsequent years. While budget constraints are an important driver for defining the level of effort practicable, the IMSPAR report can focus City efforts in areas where additional inlet cleaning can be the most valuable.

In FY 05-06, ESD evaluated the proposal to employ hand held devices to collect data during catch basin cleaning and potentially other maintenance activities. With current budget and staffing constraints within DOT, employing hand held devices was not found to be feasible. The proposal will be re-evaluated in FY 07-08.

The City's DOT is exploring potential funding opportunities, including grants, for the purchase of additional vactor trucks in FY 06-07. The vactor trucks would be used for both sanitary and storm drain cleaning, and would increase the efficiency for a crew that currently has to conduct cleanings manually.

BMP Effectiveness
As part of the annual review process, the City of San José reviews and evaluates the effectiveness of its BMPs in reducing pollutants in stormwater and eliminating illicit discharges. BMP effectiveness is evaluated using staff feedback gathered from training sessions. See *5.B PSR Program Evaluation, BMP Effectiveness Review* for results.

6.C SDO Response to Water Board Comments

No comments received from Water Board on this Program Element.

7. WUOM: Water Utilities Operations & Maintenance

7.A WUOM Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
WUOM 1	**Inventory of O&M Activities** The City of San José's Municipal Water System will conduct an inventory of all-key operations and maintenance activities, and identify routine and unplanned non-stormwater discharges from these activities. This inventory will be conducted every three years and evaluated at least once a year.			
WUOM 1.A	Review current procedures for operations and maintenance.	Annually	Done FY 05-06. The current procedures have been reviewed and no change is recommended at this time.	ESD-Muni
WUOM 1.B	Three-year update of list.	3/31/06 Every 3 years	Completed 3/06. Next inventory not due until 3/09. See Table 7.D: *Inventory of Potential Water Utility Discharges*	ESD-Muni
WUOM 2	**Implementation of WUPPP** The City of San José's Municipal Water System will implement the pollution control measures identified in the Water Utility Pollution Prevention Plan (WUPPP) to manage chlorine, biocides, and algaecides and prevent erosion and sedimentation.			
WUOM 2.A	Implement WUPPP/Report on activities	Ongoing	Done FY 05-06. WUPPP was implemented in 2000. Muni Water staff and their contractors comply with the BMPs and SOPs included in the WUPPP.	ESD-Muni
WUOM 3	**Staff Training and Contractor WUPPP Compliance** The City of San José's Municipal Water System will conduct annual training for municipal staff and coordinate WUPPP elements with water utility project planning, including WUPPP elements (BMPs, conditions, specifications, etc., in contract and services agreements).			
WUOM 3.A	Implement training program.	Annually, Q2	Done on December 8, 2005. See 13.D: *Municipal Employee Training Summary.*	ESD-Muni
WUOM 4	**WUPPP Effectiveness Evaluation** The City of San José's Municipal Water System will evaluate the effectiveness of the WUPPP annually. Maintain accurate documentation and revise the WUPPP as necessary.			
WUOM 4.A	Evaluation effectiveness of program.	Annually, Q4	Done FY 05-06. Muni Water has developed an evaluation program, which includes evaluating one of the SOPs annually. See 7.B: *WUOM Program Evaluation.*	ESD-Muni

7.B WUOM Program Evaluation

The City's Municipal Water System evaluation process consists of reviewing one SOP or BMP from start to finish on an annual basis. This effort is combined with a training program in which Muni Water staff creates a training video of the SOP or BMP being reviewed. Staff and others involved in the process then view the video for training. The paperwork process (checklist for that BMP) is discussed and then the forum is opened up for discussion. Individuals who perform the activity share their thoughts on what works and what does not work. The facilitator (typically, a designated supervisor) writes down the comments and suggestions. When appropriate, the SOP or BMP is revised to incorporate the results of the discussion.

For FY 05-06, Muni Water conducted an evaluation of the SOP for hydrant flushing. This evaluation took place in December 2005. A training video was made in accordance with the SOP outlined in the "Water Utility Operation and Maintenance Discharge Pollution Prevention Plan." Staff and a responsible representative of Muni Water's contractor attended the training session and viewed the video. After viewing the video, staff discussed the pros and cons of the procedure. Staff found the procedures to be satisfactory and effective for meeting the goals of the URMP. No changes were recommended at this time.

Contractor performance for Muni Water is monitored by staff inspection. If the contractor fails to follow BMPs, the Muni Water inspector on the job will notify the contractor. In addition, Muni Water may receive complaints from other parties; however, this is not typical since the inspector usually resolves issues right away.

7.C WUOM Response to Water Board Comments

No comments received from Water Board on this Program Element.

7.D WUOM Summary Tables / Additional Information

Inventory of Potential Water Utility Discharges

This inventory is performed by the Municipal Water System Division at least once every three years, as required by the Water Utility O&M Discharge Performance Standard. It is modeled on the Santa Clara Valley Urban Runoff Pollution Prevention Program's model inventory. A separate inventory is performed in each service zone (North S.J., Evergreen, Edenvale, Coyote, South Bay Water Recycling). Not all discharge and information categories will apply (such as raw water discharges and the locations of hydrant flushing). For additional guidance on completing this inventory, see the inventory given in Appendix C-1 of the San Jose Water Municipal Utility Operation and Maintenance Discharge Pollution Prevention Plan.

Discharge Activity	Discharge Location	Estimated Quantity	Estimated Rate (G.P.M.)	Estimated Frequency (per year)	Planned / Unplanned	Known Chemical Additives
SJMWS – COYOTE						
I. Un-Treated Groundwater						
1.Hydrant flushing	Throughout System	12,000 gal	1000	Every 3 years	Planned	None
2.Fire flow testing	N/A					
3.Main line breaks	System	Varies	Varies	Varies	Unplanned	None
4.Service line breaks	System	Varies	Varies	Varies	Unplanned	None
5.Reservoir tank cleaning	Reservoir Site	58,000 gal	240	Every 5 years	Planned	None
6.Reservoir tank draining	N/A					
7. Sheared hydrants	N/A					
8. Meter testing in the field	N/A					
9. Backflow testing	N/A					
10. Pump station operation discharge	N/A					

Discharge Activity	Discharge Location	Estimated Quantity	Estimated Rate (g.p.m.)	Estimated Frequency (per year)	Planned / Unplanned	Known Chemical Additives
11. Mainline cleaning (pigging)	N/A					
12. Exercising interconnection valves	N/A					
13. Blow offs	N/A					
14. Pressure release valve blow offs	N/A					
15. Air release valve blow offs	N/A					
16. Water quality sampling	Blanchard sampling site	100 gal	10	1 per month	planned	none
17. Facility landscape irrigation	N/A					
18. WTP filter bank inspection	N/A					
19. WTP filter turbidimeter	N/A					
20. WTP chlorine analyzer	N/A					
21. Elect. Generator cooling water	N/A					
22. Pumping out sumps, vaults, etc., for maintenance	N/A					
II. Raw (untreated) Water						
1. In stream recharge program	N/A					
2. Pipeline modification or maintenance	N/A					
3. Meter testing facility	N/A					
4. Percolation ponds maint. activities	N/A					
III. Groundwater						
1. Artesioning wells	N/A					
2. Well sampling	Well Sites 21,22,23	54,000 gal	1200 gpm	once per year/varies	Planned	none
3. Well rehabilitation/ maintenance	Well Sites	7.2 MG	2500	One time only	Planned	none
4. Well first-flush-to-waste cycle at startup	Well Sites 21,22,23	4500 gal	1500 gpm	Varies 1/3 days	Planned	none
5. Well chlorination (disinfection) and flushing	N/A					
6. Well destruction	N/A					
7. Excavation dewatering	N/A					
IV. NON-POTABLE						

Discharge Activity	Discharge Location	Estimated Quantity	Estimated Rate (g.p.m.)	Estimated Frequency (per year)	Planned / Unplanned	Known Chemical Additives
1. Main line breaks	N/A					
2. Service line breaks	N/A					
6. Mainline cleaning (pigging)	N/A					
7. Pump station operation discharges	N/A					
9. Blow offs	N/A					
10. Air release valve blow offs	N/A					
VI. Other						
1. Dust Control	N/A					
2. Excessive landscape irrigation	N/A					
South Bay Water Recycling						
V. Recycled (reclaimed) Water						
1. Main line breaks	System	Varies	Varies	Varies	Unplanned	Chlorine
2. Service line breaks	System	Varies	Varies	Varies	Unplanned	Chlorine
3. Reservoir tank overflow	N/A					
4. Meter testing in the field	Various	1000 gal	100	Every 2 years	Planned	Chlorine
5. Backflow testing						
6. Mainline cleaning (pigging)						
7. Pump station operation discharge						
8. Blow offs						
SJMWS - EDENVALE						
I. Un-Treated Groundwater						
1.Hydrant flushing	Throughout System	400,000 gal	1000	Every 3 years	Planned	None
2.Fire flow testing	Varies	50,000 gal	5000	As required	Planned	None
3.Main line breaks	System	Varies	Varies	Varies	Unplanned	None
4.Service line breaks	System	Varies	Varies	Varies	Unplanned	None
5.Reservoir tank cleaning	Reservoir Site	58,000 gal	240	Every 5 years	Planned	None

Discharge Activity	Discharge Location	Estimated Quantity	Estimated Rate (g.p.m.)	Estimated Frequency (per year)	Planned / Unplanned	Known Chemical Additives

8. PM: Pesticide Management

8.A PM Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
PM 1	**Integrated Pest Management** The City will adopt an Integrated Pest Management (IPM) policy and/or ordinance requiring use of IPM techniques in the agency's operations; and, minimization of pesticide use, particularly organophosphate and copper-based pesticides, by agency staff and contractors.			
PM 1.A	Develop a City IPM policy for inclusion in Pesticide Management Plan.	Done FY 02-03	Done FY 02-03.	ESD
PM 2	**Pesticide Management Plan** The City will develop and implement a Pesticide Management Plan with the goals of minimizing pesticide use and reducing the amount of pesticides in stormwater and landscape runoff to the maximum extent practicable.			
PM 2.A	Draft a City of San José Pesticide Management Plan.	Done FY 01-02	Done FY 01-02.	ESD
PM 2.B	Publish City Pesticide Management Plan in URMP.	Done FY 01-02	Done FY 01-02.	ESD
PM 3	**IPM SOPs and BMPs** The City will develop and implement standard operating procedures (SOPs) and best management practices (BMPs) for implementing the IPM Policy			
PM 3.A	Develop SOPs and BMPs for implementing IPM policy with provisions that will reduce water quality impacts from pesticide use.	Done FY 01-02	Done FY 01-02.	GS, DOT, ESD
PM 3.B	For each type of pest problem identified, seek model SOPs and BMPs from published literature.	Done FY 01-02	Done FY 01-02.	GS, DOT, ESD
PM 3.C	Incorporate or develop appropriate IPM measures into City SOPs and BMPs.	Done FY 02-03	Done FY 02-03.	GS, DOT, ESD
PM 3.D	Update City URMP to incorporate model Pest Management Performance Standard, including description of legal authority (IPM policy and contract language), work plan elements, BMPs, and SOPs needed for implementation.	Done FY 02-03	Done FY 02-03.	ESD
PM 3.E	Review and update City SOPs and BMPs as appropriate.	As Needed	The Pesticide Management Committee determined that no updates were required for FY 05-06.	GS, DOT, ESD, PRNS
PM 4	City Employee Training The City will ensure that employees receive pest management training by implementing the following: 1. Employees who apply pesticides for the City will obtain the appropriate training as required by County Agricultural Commissioner and State Department of Pesticide Regulation (DPR); 2. Employees within departments responsible for pesticide application will receive annual training on appropriate portions of City IPM Policy, SOPs, and BMPs, and latest IPM techniques; 3. Employees who are not authorized to apply pesticides will be annually trained not to use over-the-counter pesticides at workplace, consistent with IPM Policy. 4. Annual internal outreach will be conducted to employees, who do not necessarily purchase or apply pesticides during their course of work, on less toxic pest			

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
	control and to encourage employees to use IPM techniques away from work.			
PM 4.A	Ensure that employees who apply pesticides for the agency obtain appropriate training required by County Agricultural Commissioner and State Department of Pesticide Regulation.	Annually	Done FY 05-06. DOT, GS, and PRNS staff received safety training in January 2006 on the specific pesticides used during the course of their work. Training meets State DPR requirements. Additional training is done throughout the year for new employees prior to using pesticides or if new pesticides, which were not covered in the annual training, are introduced. Training is provided annually. See 13.D: *Municipal Employee Training Summary* for summary of attendance.	GS, DOT, PRNS
PM 4.B	Provide annual training on IPM Policy, SOPs, and BMPs, and latest IPM techniques to employees within departments responsible for pesticide application.	Annually	Done FY 05-06. Training for DOT, GS and PRNS staff was held in January 2006. Training topics included safety, City IPM Policy, SOPs, and BMPs, and IPM techniques. This message was also communicated in the SWPPP, PSR/SDO, and RPW municipal compliance trainings. See 13.D: *Municipal Employee Training Summary* for summary of attendance.	GS, DOT, ESD, PRNS
PM 4.C	Annually inform employees who are not authorized /trained to apply pesticides not to use over-the-counter pesticides at the workplace, consistent with IPM Policy.	Ongoing	Done FY 05-06 and ongoing. Notification that untrained staff members are not to utilize over-the-counter pesticides in the workplace was provided at the training and in a May 2006 staff notice.	GS, DOT, ESD, PRNS
PM 4.D	**Monitoring Mechanism I.B.1.** Document and evaluate effectiveness of staff training conducted each year in annual report.	Annually	Done FY 05-06. The training required for certificates and licenses is reviewed and approved for Continuing Education Units (CEUs) by the Department of Pesticide Regulation (DPR) – this ensures it is valuable and effective for applicators. In FY 05-06, an evaluation/survey for class participants was used for IPM training conducted in January 2006. The results were compiled and will be used to implement improvements for the next training. See 8.B: *PM Program Evaluation* for a summary of evaluation results.	GS, DOT, ESD, PRNS
PM 4.D.1	Update class evaluation/survey for IPM training classes conducted by City staff.	As Needed	Done FY 05-06. The appropriate updates were made to the evaluation form to reflect content of training.	GS, DOT, ESD, PRNS
PM 4.E	Public Education and Outreach Task II.A.14 Conduct internal outreach on less toxic pest control to employees who do not necessarily purchase or apply pesticides during the course of their work (to encourage employees to use IPM techniques away from work).	Annually	Done FY 05-06. The January issue of the *ESD Connections* newsletter featured an article on IPM.	ESD
PM 5	**Contractor Pesticide Management Requirements** The City will develop and implement a process to ensure that contractors employed to conduct pest control and pesticide application on municipal property engage in			

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
	pest control methods consistent with City IPM Policy. Specifically, the City will require contractors to: ▪ follow City IPM policy, BMPs, and SOPs; ▪ provide evidence of current IPM training, when feasible ▪ provide documentation of pesticide use on City property to the City in a timely manner.			
PM 5.A	Ensure that contractors employed to conduct pest control/pesticide application on municipal property engage in methods consistent with City IPM policy.	Ongoing	Done FY 05-06 and ongoing. No new contracts were issued for structural pest control in FY 05-06. New Special Districts landscape contractors were provided with copies of the City IPM policy, SOPs, and BMPs. Meetings were held with new landscape contractors to ensure that they read and understood the content of the documents. Compliance is monitored by inspection and monthly reports.	GS, DOT, ESD, PRNS, PW, RDA
PM 5.B	Review and update a list of all contractors employed by the City who perform pesticide application work.	Annually	Done FY 05-06. The contractor list was updated and new information fields were added to record information regarding contract term.	GS, DOT, ESD, PRNS, PW, RDA
PM 5.C	Implement a procedure to provide to each contractor a copy of the City's IPM policy.	Done FY 02-03	Done FY 02-03.	GS, DOT, ESD, PRNS, PW
PM 5.D	City will supply copies of pest specific BMPs and SOPs to contractors. Contractors will self certify their compliance with the City SOPs and BMPs.	Ongoing	Done FY 05-06 and ongoing. DOT Special Districts held a meeting with all new contractors to review IPM policy and relevant SOPs and BMPs. Contractors signed a statement certifying that they have read, understood, and agree to follow City SOPs. General Services likewise held meetings with both structural pest control service providers.	GS, DOT, ESD
PM 5.E	Require through contract specifications that PCOs contracted for municipal applications use pest control methods consistent with City's IPM Policy. Specifically, require contractors to: a) follow City IPM policy, BMPs and SOPs; b) provide evidence of current IPM training, when feasible; and c) provide documentation of pesticide use on City property to the City in a timely manner.	Ongoing	Done FY 05-06 and ongoing. The standard contract language was approved and distributed to contract managers for inclusion in future contracts. DOT Special Districts solicitation released included requirements for compliance with IPM policy, BMPs and SOPs, and reporting.	GS
PM 5.E.1	City will develop standard content for PCO contracts.	Done FY 04-05	Done 04-05.	GS, DOT, ESD, PRNS
PM 5.E.2	City will implement standard content for PCO contracts.	FY 05-06	Done FY 05-06 and ongoing. DOT Special Districts solicitation released included requirements for compliance with IPM policy, BMPs and SOPs, and reporting.	GS, DOT, ESD, PRNS
PM 5.F	Invite contractors to participate in City training sessions on pesticide management.	FY 05-06 Ongoing	Done FY 05-06 and ongoing. DOT Special Districts contractors were invited to participate in the City training by way of an announcement included in the RFQ. The City's structural pest control service provider was invited and participated in the training, offering a presentation on new pesticide regulations of relevance to applicators.	GS, DOT, PRNS

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
PM 5.G	**Monitoring Mechanism III.A.1.** Document number of PCOs receiving presentations and/or training on pesticide use by PCOs on municipal property.	Annually	Done FY 05-06. In FY 05-06, the City's primary PCO for facilities attended the City's Annual Training. The PCO provides training to staff on a regular basis. An outside trainer provided training twice this year and monthly internal staff trainings were held.	GS, ESD
PM 6	**Pesticide Management Outreach** The City will identify in annual work plan outreach activities it will conduct consistent with Program Pesticide Management Plan. Work plan elements will address outreach to residential and commercial pesticide users, pesticide retailers, and special districts. Information will be provided on less-toxic pest control practices, proper disposal of pesticides, and the City's own IPM practices, as applicable.			
PM 6.A	Increase awareness of target audiences regarding proper pesticide use, disposal methods, water quality impacts, and less toxic pest management messages. Target audiences include commercial and residential pesticide users, pesticide retailers, municipal employees, and special districts.	Ongoing	Done FY 05-06 and ongoing. The City participates in the Our Water Our World campaign, and the Program's Watershed Watch campaign. Both campaigns deliver IPM messages. In addition, the City published an article in the BOMA Byline newsletter with IPM information for businesses. See 14.D*: PIP Activities* for more details.	ESD
PM 6.B	Prepare IPM stories and press releases to local media.	As Needed	Done FY 05-06 and ongoing. OWOW ads were placed in multiple publications. See 14.D*: PIP Activities* for details.	ESD
PM 6.C	In conjunction with Program, City will provide information on less toxic pest control (e.g., IPM techniques, municipal IPM policies, model contract language, training opportunities, etc.) to neighboring special districts (e.g., VTA, sanitary and utility districts, open space districts, vector control districts, and school districts) as appropriate.	As Needed	Done through Program. No activity in FY 05-06.	ESD
PM 6.D	Create and provide fact sheets and materials to pesticide retailers to facilitate point-of-purchase outreach to support IPM Store Partnership Program.	Ongoing	Done FY 05-06 through Program. See 14.D*: PIP Activities* for details.	ESD
PM 6.E	**Monitoring Mechanism:** Document or estimate numbers of residents reached by outreach efforts, including events, web promotion, municipal employee outreach, and media advertising. Monitor responses to outreach efforts by documenting calls to the Program's general and watershed campaign hotlines.	Annually	Done FY 05-06. See 14.D*: PIP Activities* for evaluation of outreach activities.	ESD
PM 6.F	**Monitoring Mechanism IV.A.1.** Document outreach efforts targeting businesses, recommended in the work plan, to be developed by the Program. Implement evaluation component of the work plan.	Annually	Done FY 05-06. See 14.D*: PIP Activities* and Program Annual Report for details.	ESD
PM 7	**HHW Pesticide Disposal** The City will coordinate with household hazardous waste (HHW) collection agencies to support, enhance, and help publicize programs for proper pesticide disposal.			
PM 7.A	Work with HHW collection agencies to support, enhance, and publicize programs for pesticide disposal.	Ongoing	Done FY 05-06. This work is done at the Program level. See Program Annual Report for details. The City did a	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
PM 7.B	Ensure that adequate pesticide disposal services exist for residents and conditionally exempt small quantity commercial generators.	Annually	Done FY 05-06. Adequate pesticide disposal services were available during FY 05-06. No customers were turned away and appointments were scheduled in a timely manner.	ESD
PM 7.C	Provide hazardous waste disposal information to residents, through distribution of materials (e.g., utility bill insert, city newsletter, community events, etc.) or advertising in local media.	Ongoing	Done FY 05-06 and ongoing. Hazardous waste disposal information is provided on the City's website along with a link to the Santa Clara County HHW Program's website. The City's Integrated Waste Management (IWM) outreach includes the Santa Clara County HHW Program's hotline.	ESD
PM 7.D	**Monitoring Mechanism V.A.1.** Document that HHW collection programs adequately serve residents and businesses and that exchange programs do not exchange organophosphate or banned pesticides.	Annually	Done FY 05-06. The Santa Clara County HHW Program served approximately 3% of the City's households in FY 05-06. There was no wait in order to schedule an appointment and no customers were turned away. The HHW Program does not exchange organophosphate or banned pesticides.	ESD
PM 8	**City Pesticide Use Tracking** The City will develop and implement a process for tracking pesticide use on municipally-owned property.			
PM 8.A	Develop and implement a pilot pesticide tracking process for Diazinon and Chlorpyriphos products.	Done FY 01-02	Done FY 01-02.	GS, DOT, ESD
PM 8.B	Track pesticide use on municipally owned property. Include reporting and justification for use of OP pesticides and BMPs employed during OP pesticide use.	Ongoing	Done FY 05-06 and ongoing. Neither the City nor its contractors purchased, used, or wrote recommendations for the use of OP pesticides on municipal property. Contracts for structural pest control include requirements for reporting and justification of use of OP pesticides and BMPs employed during OP pesticide use in the contract specifications.	GS, DOT, ESD
PM 8.B.1	Evaluate feasibility of implementing electronic data management system for pesticide use.	Done FY 04-05	Done FY 04-05.	GS, DOT, ESD
PM 8.B.2	Implement electronic data management system for tracking pesticide use on City property.	Done FY 04-05 and Ongoing	Done FY 05-06 and ongoing. A database was used to track pesticide use on municipal property by City staff and contractors.	GS, DOT, ESD
PM 8.C	**Monitoring Mechanism I.A.1.** Document completion of tasks in annual reports. Use pesticide tracking process to document pesticide use.	Annually	Done FY 05-06. Monthly pesticide use reports submitted by contractors were compiled and reviewed. See 8.B: *PM Program Evaluation.*	GS, DOT, ESD, PRNS, PW, RDA
PM 9	**City Pesticide Inventory Search** The City will conduct periodic Citywide search of its chemical inventory for pesticides no longer legal for application per EPA, State, and/or local requirements. These pesticides, if found, will be properly disposed pursuant to appropriate waste disposal regulations.			
PM 9.A	Conduct Citywide search of chemical storage areas for pesticides no longer legal for application per EPA, State, and/or local requirements. Properly dispose of any such pesticides pursuant to appropriate waste	Annually	Done FY 05-06. PRNS and DOT conducted search in June 2006. No expired pesticides were found.	GS,DOT, PRNS

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
	disposal regulations.			
PM 10	**Pesticide Management Plan / IPM Policy Review** As part of annual reporting process, the City will review and evaluate, with input from municipal staff, the effectiveness of its Pest Management Plan and IPM Policy in achieving the goals of the Plan to the maximum extent practicable.			
PM 10.A	Review and continuously improve goals, actions, and monitoring mechanisms of the work plan considering results of self-evaluations, comments from Water Board staff and other interested parties, and results of local performance review meetings, if any.	Annually	Done FY 05-06. See 8.B: *PM Program Evaluation.*	GS, DOT, ESD, PRNS, PW, RDA
PM 10.B	**Monitoring Mechanism IX.A.1.** Complete revised work plan that incorporates continuous improvement items, and report on completion of work plan tasks.	Annually	Done FY 05-06 (between 06-07 Work Plan and this Annual Report).	GS, DOT, ESD, PRNS, PW, RDA
PM 10.C	**Monitoring Mechanism VII.A.1.** Summarize types of pesticide reduction measures required (such as by conditions of approval) for new development and significant redevelopment projects, and percentage of new development/ significant redevelopment projects for which pesticide reduction measures were required. (Draft Permit Provision C.3.n.)	Annually	Done FY 05-06. See NRD 5.G in *Work Plan Self Evaluation Matrix*.	PW, RDA,ESD

8.B PM Program Evaluation

Integrated Pest Management

The City continues to apply current and new less toxic and non-chemical Integrated Pest Management (IPM) techniques to resolve municipal pest problems. FY 05-06 highlights include:

- PRNS staff continues to use mulch to help alleviate the need for pre-emergent herbicides and reduce water use.
- PRNS staff released wasps in select parks to control oak and tussock moths. The parks at which wasps were released did not experience a problem with the tussock moth, while in other parks serious tussock moth infestations occurred this year.
- DOT Special Districts initiated a pilot program to control gophers using traps rather than rodenticides. Initial results are positive, indicating that trapping is effectively reducing the gopher population. The pilot program will be evaluated for overall efficacy and cost effectiveness in FY 06-07.
- The City Arborist has adopted the practice of offering IPM solutions to the thousands of calls received each year regarding maintenance of street trees in front of privately owned property.
- The City Arborist is encouraging the use of a disease resistant hybrid palm tree in new Public Works projects as a substitute for the California Fan Palm, which is susceptible to pink rot and requires regular fungicide treatment.
- The City contracts with a PCO (Pest Control Operator) that takes an IPM approach when responding to calls for service for facilities. Inspection and monitoring are part of the service that takes place before pesticide use occurs. The PCO uses traps and baits as much as possible when pest control is required. Their practice is to contact City staff on affected sites and educate them on IPM practices and to discuss things that they can do to help prevent future pest infestation.

- In FY 06-07, the City will initiate an additional pilot program to further reduce reliance on chemical controls by using predators to control rodent populations in certain parklands. The program involves constructing owl boxes and placing them in the infested area to entice owls to establish habitat and prey upon the abundance of rodents.
- In FY 06-07, the City will initiate an additional pilot program to further reduce reliance on chemical controls by using a native grass seed mix to control star thistle weed along trails. Herbicides are typically used in the area proposed for the trail project. Funds have been identified to support both of these pilot programs, and possibly additional projects.

Green Business Certification

In FY 05-06, the City began the process of Green Business Certification for selected neighborhood parks. The Green Business Certification includes a pollution prevention element that includes Integrated Pest Management. Applicants must demonstrate practices such as appropriate plant selection and placement, landscaping to minimize waste, reduced pesticide and water use, etc. PRNS anticipates that the certification process will be completed in FY 06-07.

Awards

For the attention given to environmental stewardship on many levels, including the practice of IPM, the Los Lagos Municipal Golf Course and its Superintendent Alan Andreasen earned two awards this fiscal year. The Los Lagos Municipal Golf Course and Alan Andreasen were honored as the Golf Course Superintendents Association of America (GCSAA)/Golf Digest's National Public and Overall winners of the 2005 GCSAA/Golf Digest Environmental Leaders in Golf Awards. The second award bestowed was the 2005 Merit Award for Excellence in Turfgrass Management for Public Courses by the Golf Course Superintendents Association of Northern California.

IPM Conference

During FY 05-06, the City also accepted co-host responsibilities for the 3rd Annual Regional IPM Conference scheduled to take place in November 2006. Staff members from ESD, PRNS, GS, and DOT serve as members of the Planning and Organizing Committee, and as the Conference chair. The Planning and Organizing Committee began planning activities in March 2005. The IPM Conference will serve as a tool for educating staff and area contractors about relevant IPM issues and techniques.

Data Tracking

A database was developed and implemented in FY 04-05 to track pesticide use on municipal property by City staff and contractors and continues to be used. Comparative data for City applications and Golf Courses only are included in this report due to a few data collection challenges experienced in FY 05-06. In FY 05-06, reports from Special Districts contractors included data found to be erroneous. The problem was corrected and accurate data covering applications on municipal property from September 2005 through June 2006 was submitted and entered into the database. In addition, due to an unanticipated transition of primary PCO responsibilities, only incomplete data for pesticide applications at City Facilities is available. The data loss resulted because the City's primary PCO discontinued services with the City and did not deliver reports of pesticide use for the first three months of the fiscal year, and the new primary PCO required time to establish a data collection system adequate for the new volume of work. The City will continue to work with its contractors in FY 06-07 to resolve outstanding reporting and data issues, so that accurate comparative data will be available and analyzed in the future.

Pesticide Use

This section highlights changes in usage of certain pesticides applied by City staff and Golf Course management staff. The discussion focuses on the products used in largest quantities for City applications and Golf courses. City applications represent pesticide applications performed by Parks Maintenance staff and Department of Transportation crews. Highlights include:

- City applications of Surflan (oryzalin) increased sharply this year following a decrease in FY 04-05. FY 04-05's low numbers were mostly due to a temporary stoppage of Surflan manufacturing, and the FY 05-06 increase is partly due to resumed product availability. Surflan was also used in FY 05-06 as the replacement for Pendulum (pendimethalin) for certain weeds that Pendulum did not control. Additionally, the increase in Surflan usage is attributed to the increase in acreage managed during FY 05-06.
- City application of Karmex (diuron) decreased somewhat in FY 05-06 in response to concerns about its impact on water quality.
- Overall, applications of glyphosate (isopropylamine and monoammonium salt combined) decreased this year.

- City staff shifted to a greater dependence upon the Roundup Quickpro formulation in FY 05-06, which contains diquat dibromide, because it produces visible results more expediently than the Roundup Pro Dry formulation.
- Drive (quinclorac) was tested in City applications this year for the first time and was found to yield better results in lesser amounts than other products, and its active ingredient is deemed to have less impact on the environment.
- City applications of Gallery (isoxaben) increased this year. Gallery has been found to effectively break the germination cycle of the groundsel weed and therefore reduces the need for DOT crews to perform repeat treatments of the same area.

In FY 05-06, some notable changes occurred in pesticide applications at the City's three golf courses: Los Lagos, Rancho del Pueblo, and San Jose Municipal.

- Total golf course applications of Daconil Weather Stick (chlorothalonil) and Pentathlon (maneb), fungicides used to suppress Dollar Spot on the greens, decreased in FY 05-06. Los Lagos management staff used three curative applications of a combination of these products in FY 04-05 within the guidelines of the strict chemical application management plan of its contract with the City. In FY 05-06 Los Lagos did not see Dollar Spot disease pressure so no applications of the mixture were necessary, thus the reduction in use.
- Overall use of Fore (mancozeb) declined in FY 05-06, but applications were made near the end of the season this year at San Jose Municipal Golf Course to control rapid blight fungus.
- In FY 04-05 at Los Lagos, one curative application of PCNB, a fungicide used to suppress Microdocium patch (pink snow mold), was applied to select greens. The golf course did not exceed the established disease thresholds in FY 05-06, so no applications were necessary. The overall increased PCNB use at golf courses results from the need to control pink snow mold at Rancho del Pueblo and San Jose Municipal Golf Course in FY 05-06.
- Overall usage of glyphosate products increased slightly in FY 05-06, however a shift in product usage occurred. Round Up Pro Dry Formula (glyphosate, monoammonium salt) is a non-selective herbicide used to control weeds and weed grasses on various areas on the course. Usage at Los Lagos and Rancho del Pueblo courses decreased between FY 04-05 and FY 05-06. San Jose Municipal Golf Course increased use of the Round Up Pro Dry Formula and decreased its use of the liquid Round Up.
- Pentahydrate (copper sulfate) or copper sulfate crystals is used to treat irrigation and aesthetic lakes for algae. In FY 05-06, Los Lagos Golf Course began using microbial biological controls in lakes. This has lead to the elimination of this product, resulting in a drop in usage from FY 04-05. Occasional use of a copper-based algaecide at both Los Lagos and Rancho occur when algae become uncontrollable with the biological controls. San José Municipal used less copper sulfate because of prevailing weather conditions that delayed the algae burst until late in the season.

Training

In January 2006, City staff held its annual training for staff responsible for applying pesticides. Participants were given an evaluation form to complete. Of the 115 staff that participated in the training, 49 evaluations were completed and returned. Results of the completed evaluations are indicated below and will serve as a guide for improving the training next year.

- 88% thought that the training subjects taught are appropriate to their work;
- 81% thought the training adequately described the City's IPM policy;
- 87% thought that the BMPs/SOPs described match their work practices;
- 90% thought that the training adequately described the relationship of BMPs/SOPs to compliance with the City's Stormwater NPDES permit; and
- 85% thought that the training adequately explained how they, City staff, could help the City maintain compliance with the Stormwater NPDES permit.

8.C PM Response to Water Board Comments

No comments received from Water Board on this Program Element.

9. M: Mercury

9.A M Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
M 1	**Municipal Use of Mercury –Containing Products** The City will eliminate all unnecessary municipal use of mercury-containing products and establish proper disposal methods for products that cannot be eliminated.			
M 1.A	Implement SCVURPPP guidelines for mercury-containing products reduction and management. These guidelines include a schedule for the timely phase-out of mercury-containing products identified for virtual elimination as well as reporting requirements, possibly to track recycling, replacement, and reduction in use of mercury-containing products.	Ongoing	Done FY 05-06 and Ongoing. See 9.D: *Mercury-Containing Product Management Practices* for a listing of the City's management strategies. In FY 05-06, the City modified the Program's "Got Bulbs?" poster to include City-specific practices, and distributed them to all City facilities that have their fluorescent bulbs maintained by the City's General Services Department. The poster reminds staff not to dispose of them in the trash, and how to handle, store, and manage spent bulbs.	ESD, GS
M 1.A.1	Collect and dispose of mercury-containing lamps generated in City-owned facilities	Ongoing	Done FY 05-06 and Ongoing. The City purchases, almost exclusively, low mercury fluorescent lamps. The City recycled more than 9,100 feet of mercury-containing lamps in FY 05-06 through its Lamp Recycling Program.	GS, ESD
M 1.A.2	Identify other mercury-containing products for virtual elimination, phase-out and/or proper disposal.	Annually, As Needed	Done FY 05-06. The City phased out the use of its lamp crusher for the disposal of low-pressure sodium lamps. These lamps do not contain mercury, but they are a Universal Waste, so they are recycled accordingly. The elimination of the crusher removes the potential for mercury-containing lamps to be accidentally crushed and disposed of improperly. See 9.D: *Mercury Containing Product Management Practices* for a listing of actions the City is taking.	ESD, GS
M 1.B	Monitoring Mechanism I. Document completion of tasks in annual reports. Use mercury-containing product reporting guidelines.	Annually	Done FY 05-06. See 9.D*: Mercury Containing Product Management Practices* for a summary of management options identified and/or implemented to date.	ESD
M 2	**Household Hazardous Waste Collection** The City will provide mercury-containing product disposal services through household hazardous waste (HHW) collection programs for residents and small businesses, and encourage use of these programs.			
M 2.A	Provide mercury-containing products disposal services for residents and small businesses.	Ongoing	Done FY 05-06 and Ongoing. The City supports the County of Santa Clara Department of Environmental Health's (DEH) Household and Small Business Hazardous Waste program, and the in-store take-back program for Universal Wastes. County DEH hosts weekly household and small business	ESD-IWM

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
			hazardous waste collection events. This service is provided to residents and small businesses in the county to collect and properly dispose of hazardous wastes, including mercury-containing products. In FY 05-06 this program provided service for 24,985 residents and 435 small businesses including local governments, Goodwill Industries and the Salvation Army. In FY 05-06, the County HHW Program provided service for 9,785 households in San José, roughly 3% of the City's total households. County-wide, the program collected 51,050 pounds of household batteries (more than double last year's total), and 425 pounds of elemental mercury (up from 155 pounds last FY). See County Annual Report for details.	
M 2.B	Work with Program and HHW collection agencies to develop and help publicize fluorescent light recycling program.	Ongoing	Done FY 05-06 and ongoing. The City supports the County of Santa Clara Department of Environmental Health's (DEH) Household and Small Business Hazardous Waste Program. In FY 05-06 the County collected 277,000 feet (67,943 pounds) of lamps. This is a marked increase from last FY's 166,000 feet (41,597 pounds) total. The City and the Program also worked with the County to assist with the implementation of its Universal Waste Grant. The Program developed and implemented the "Got Bulbs?" media campaign designed to encourage residents to take their spent fluorescent lamps to any of 18 drop-off locations funded by the Universal Waste grant. In FY 05-06, the five stores in San José collected an estimated total of 61,000 feet of lamps, up from 17,591 feet in FY 04-05. Also, 5,065 pounds of batteries were collected at the four battery collection stores in San José.	ESD, Program
M 3	**Monitoring and Science** The City will participate in coordinated monitoring efforts to support mercury TMDL development and implementation, including assessment of air pollution sources of mercury and concentrations of mercury in sediment.			
M 3.A	Continue financial support of the Regional Monitoring Program (RMP), including the Mercury Deposition Network Pilot Study. Continue to actively participate in the RMP steering committee and technical review committee.	Ongoing	Done FY 05-06 and ongoing. The City continues to support the RMP financially and through in-kind services operating the Mercury Deposition Network station #CA76. (see M 3.B)	ESD
M 3.B	The City of San José will continue to provide in-kind services for the maintenance of the Mercury Deposition Network site near San José.	12/31/2005	Done and ongoing. The City has operated and maintained the National Mercury Deposition Network site #CA72 since January 2000. The City collects samples, records data, and sends both to the national MDN contract laboratory for analysis. The City also sends records to SFEI for	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
			inclusion in SF Bay RMP analyses. Weekly sample collection and data reporting is scheduled to continue at this time. Information on the National MDN program (including pictures of collection apparatus) is found at: http://nadp.sws.uiuc.edu/mdn/. The City chose to continue this activity beyond the December 2005 compliance date, and is evaluating whether to continue into FY 06-07 and beyond.	
M 4	**Regional, State, and Federal Coordination** Actively participate in regional, state, and federal coordination efforts to achieve a reduction in the amount of mercury in urban runoff and air emissions.			
M 4.A	Collaborate in technical studies to support TMDL development and implementation including the Santa Clara Basin WMI Guadalupe River Mercury TMDL Workgroup, RMP, and the CEP.	Ongoing	Done FY 05-06 and ongoing. The City participates in and supports programs to reduce mercury in stormwater runoff and air emissions, including the San Francisco Bay Regional Monitoring Program, National Mercury Deposition Network, AB 982 TMDL Public Advisory Group, WMI Guadalupe River Mercury TMDL Workgroup, and the Clean Estuary Partnership.	ESD
M 4.B	Support and participate in WMI Watershed Action Plan implementation.	Ongoing	Done FY 05-06 and ongoing. The Watershed Management Initiative (WMI) continues to work on implementing the Watershed Action Plan, through the actions of its subgroups and cooperative efforts with other collaborative groups, such as the Water Resources Protection Collaborative, the Habitat Conservation Plan, and the Fisheries and Aquatic Habitat Conservation Effort.	ESD
M 5	**Public Education and Outreach** Increase awareness of proper disposal of mercury-containing products and available non-mercury containing alternatives. Target audiences include residential, commercial, and industrial users and municipal employees.			
M 5.A	Coordinate with Program and HHW collection agencies to develop and implement a mercury-containing product outreach program to educate selected target audience and encourage proper use and disposal of mercury-containing products.	Ongoing	Done FY 05-06 and ongoing. The Program posted mercury-related information for residents on the watershedwatch.net website. See Program Annual Report for details. Mercury and Household Hazardous Waste messages were also included at the Home Show event. See 14.D: *PIP Activities.* City staff attended meetings of the Regional Universal Waste workgroup. This informal group of Stormwater, Solid and Hazardous Waste agencies discussed strategies for handling universal waste collection, funding, outreach and education.	ESD, Program, County HHW
M 5.B	Coordinate with municipal inspectors to integrate mercury outreach to industrial businesses into their existing routine pretreatment, source control, and/or	Ongoing	Done FY 05-06 and ongoing. Information on the proper handling and disposal of mercury-containing products was presented to industrial businesses attending the Industrial	ESD

	hazardous materials inspection processes.		Users Academy. (See 14.D: *PIP Activities*) Copies of the County's Universal Waste brochure for Businesses was available to Inspectors for distribution as needed. The City originally intended to produce the DTSC fact sheet on Universal Waste, but the County's piece was more than sufficient.	
M 5.C	Attend community events and distribute outreach materials. (See Attachment A: Outreach Activities Summary)	Ongoing	Done FY 05-06 and Ongoing. Messages regarding proper disposal of fluorescent tubes is included whenever the Household Hazardous Waste program is promoted, e.g. the Home Show. See 14.D: *PIP Activities* for details.	ESD
M 5.D	**Monitoring Mechanism V.B.** document and evaluate each outreach activity, including the target audience and number of residents and/or businesses reached.	Annually	See Program report and 14.D: *PIP Activities* for evaluation of outreach activities.	ESD, Program

9.B M Program Evaluation

Mercury-containing lamps continue to be the focus of City efforts to reduce the impact of mercury from City operations. The City purchases and encourages the use of low mercury fluorescent lamps in City facilities. The City recycled more than 9,100 feet of mercury-containing lamps in FY 05-06 through its recycling programs. During FY 05-06, many City-owned and City-leased facilities were decommissioned and the City switched to a different color output lamp, so the recycling numbers for this year are lower. The City took the Program-developed "Got Bulbs?" poster and modified it for internal use to reinforce the City's SOP of recycling all fluorescent lamps. The posters were also posted in all City-maintained facilities to remind staff to recycle their lamps. Questions regarding mercury content and alternative products are part of the City's Request for Quotation Forms.

February 2006 marked the start of the Universal Waste Rules which require common household products like batteries, thermometers, fluorescent lamps and cathode ray tubes that contain hazardous materials, such as mercury and other heavy metals, to be disposed of at approved locations like the County's Household Hazardous Waste site. These products are no longer accepted in curbside trash or recycling receptacles. The City conducted various outreach efforts at both the City and Program levels to alert residents of this change including postings on the City's website and articles in the City's Curbside Courier newsletter.

FY 05-06 showed a remarkable increase in the number of fluorescent lamps turned in to the five drop-off stores for recycling, with the five stores collecting an estimated 61,000 feet of lamps, up from 17,591 feet in FY 04-05. This more than three-fold increase in collection can be attributed, in part, to the consistent outreach and education done by the City, the Program, and the County Household Hazardous Waste program. The start of the new Universal Waste Rule is also a major contributor to the marked increase. The City will continue to support the Program's Watershed Watch campaign and its fluorescent lamp recycling messages in FY 06-07.

Along with lamps, the City worked to expand battery recycling in City facilities. Prior to the February 2006 start date of the Universal Waste Rules regarding disposal of batteries, the City informed all staff that batteries (and lamps) cannot be thrown away in the garbage. Receptacles for battery recycling were distributed to City facilities, and AERC was contracted to collect and recycle the City's alkali and rechargeable batteries. In April 2006, the City began a comprehensive battery recycling program to collect and recycle all City-generated alkali and rechargeable batteries. Data on this program will continue to be collected in FY 06-07.

The City has operated and maintained a National Mercury Deposition Network (MDN) site since January 2000, collecting samples, recording data, and sending both to the national MDN laboratory. The City continues its commitment to work with the Water Board and stakeholders toward TMDLs that are technically defensible and feasible for implementation. City staff participates in mercury TMDL efforts by providing comments on the Bay-wide Mercury TMDL Report and Basin Plan Amendment, and serves as the WMI Watershed Assessment and Monitoring Subgroup representative to the Guadalupe Mercury TMDL project. The City expects to actively participate in the

development and implementation of both TMDLs in FY 06-07. In addition, the City supports SCVURPPP, CEP, RMP, BASMAA and BACWA as these agencies conduct technical studies to address uncertainties regarding mercury in the watershed.

9.C M Response to Water Board Comments

No comments received from Water Board on this Program Element.

9.D M Summary Tables / Additional Information

Mercury-Containing Product Management Practices

Mercury-Containing Products	Not Found	MO #1: Replace with Alternative	MO #2: Alternative upon Failure	MO #3: Reduce Use	MO #4: Recycle	MO #5: Hazardous Waste	Comments
LAMPS:							
Compact Source Lamp					I		Recycled through City's Lamp Recycling Program
Spectral Lamp	NF						
Fluorescent Lamp (Tubes)		I			I		Replacing existing lamps with low Hg lamps upon failure. All lamps are recycled through City's Lamp Recycling Program.
Metal halide Lamp					I		Recycled through City's Lamp Recycling Program
High pressure sodium Lamp					I		Recycled through City's Lamp Recycling Program
Mercury Vapor Lamps					I		Recycled through City's Lamp Recycling Program
Cold Cathode Lamp	NF						
Neon Lamp	NF						
Ultra-violet Lamp					I		
THERMOSTAT PROBES (ALSO KNOWN AS FLAME SENSORS OR GAS SAFETY VALVES):							
Furnaces					B		Implementation in progress
Water heaters					B		Implementation in progress
Ranges, ovens					B		Implementation in progress
Space heaters					B		Implementation in progress
TILT SWITCHES AND RELAYS:							
Tilt Switches at WPCP					I		
Public Works Material Testing Lab							
Thermometers					B		
Other Mercury-containing materials					B		Implementation in progress
WPCP LAB MATERIALS							
Thermometers	NF						WPCP Lab uses alcohol-based thermometers and other traditionally mercury-containing apparatus
Mercury-containing Samples						I	Spent samples treated as Hazardous Waste and picked up by hauler every 2-3 months

Status Key:
No Action: No action identified for implementation
ID: Actions have been identified; implementation has not begun
B: Began process of implementation
I: Management option identified has been fully implemented
NF: product was not found in municipal inventory to date

Management Options Key:
MO #1: Replace with an alternative product when the product is identified, if an alternative exists.
MO #2: Replace upon failure, with an alternative product if an alternative exists.
MO #3: Reduce the use where possible
MO #4: Recycle when no longer in use
MO #5: When appropriate, dispose of as hazardous waste

10. CNAP: Copper / Nickel Action Plans

10.A CNAP Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
CB-1	**Vehicle Washing Operations**			
CB-1.A	Have member of San José team trained to lead mobile cleaners certification seminar.	As needed	Done FY 05-06 and ongoing. City staff available to train as needed.	ESD
CB-1.B	Support Program in hosting mobile cleaners certification seminar.	FY 06-07	Not scheduled this FY	ESD
CB-1.B.1	Promote list of certified mobile cleaning service providers.	Ongoing	Done FY 05-06 and ongoing. A link to the database of BASMAA-trained Recognized Mobile Surface Cleaners is posted on the City's website.	ESD
CB-1.C	Distribute coupons in support of Program partnership with Western Car Wash Association.	As needed, dependant on Program activities	The Program opted not to do this task in FY 05-06.	Program, ESD
CB-3	**Industrial Discharges**			
CB-3.A	Continue Distribution of information regarding copper from roof vents.	Ongoing	Done FY 05-06 and ongoing. Information is available on ESD website. The Roof Vent BMP was also distributed to 115 pertinent Industrial Users in San José, along with a cover letter informing businesses of the potential for roof runoff at their facilities. See 14.D: *PIP Activities Tables* for details	ESD
CB-3.A.1	Continue rooftop inspections. Evaluate efforts and need for any additional effort.	12/31/2005	Done FY 05-06. See 10.B*: CNAP Program Evaluation* for details.	ESD
CB-3.B	Mail NOI Package: information on the GIASP and how to comply, to targeted industrial facilities.	6/30/2006	Done FY 05-06. 115 packages were mailed to targeted industrial facilities.	ESD
CB-8	**Watershed Assessments and New Development**			
CB-8.A	See NRD section for details on San José implementation of C.3 permit provisions.		See NRD section for details on San José implementation of C.3 permit provisions.	
CB-11	**Street Sweeping and Storm System O&M**			
CB-11.A	Track quantitative data on the tons of material removed and disposed and other relevant street sweeping program data.	Annually	Done FY 05-06. Residential street sweeping frequency is once per month. In FY 05-06, the area in which parking restrictions are enforced was again broadened to 196 curb miles, up from 160 curb miles in FY 04-05. In FY 05-06, approximately 26,891 cubic yards of debris were collected during all street-sweeping operations. See 5.B: *PSR Program Evaluation* for more information on street sweeping activities. The City also has a comprehensive storm sewer inlet	ESD-IWM, DOT

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
			cleaning program, where a Vactor removes debris from all of the City's inlets. In FY 05-06, approximately 1,355 cubic yards of debris were removed, up from 1,183 cubic yards in FY 04-05. See 6.A*: SDO Work Plan Self Evaluation Matrix* for details.	
CB-12	**Pools and Spas**			
CB-12.A	Distribute outreach materials at events, public counters, and post on City website.	Ongoing	Done FY 05-06. See 14.D: *PIP Activities Tables* for details	ESD
CB-12.B	Provide guidance to residents on disposal alternatives for pool and spa water.	Ongoing	Done FY 05-06. Residents who call for guidance are told to dispose of their pool and spa water in their sanitary sewer clean-out.	ESD
CB-21	**Architectural use of copper**			
CB-21.A	Continue to discourage architectural use of copper during Planning application review.	Ongoing	Done FY 05-06 and ongoing. As projects undergo review, comments discouraging architectural use of copper in development projects are given. Projects have been revised to reduce the use of copper and direct runoff to landscaped areas. See NRD 8.D.	PBCE-Planning
CB-21.B	Continue to monitor progress of San José Green Building program to identify opportunities for discouraging architectural use of copper.	Ongoing	Ongoing. ESD has a dedicated LEED-accredited staff person who reviews public projects and advises City staff on Green Building materials and techniques, including discouraging architectural use of copper.	PBCE-Planning ESD-UR
NB-1	**Discharges from Construction Sites**			
NB-1.A	See NRD and CON program elements for activities that address erosion control.	Ongoing	Ongoing. See NRD and CON program elements for activities that address erosion control.	

10.B CNAP Program Evaluation

Measures to control copper discharges that require implementation at the municipal level have been integrated into ongoing City activities identified in the IND and NRD sections of the URMP. Copper and Nickel also remain among the list of pollutants addressed by general and targeted outreach regarding stormwater pollution prevention. In addition to the activities described above, the City also actively participates in semi-annual meetings with the Water Board and other stakeholders to review implementation of the Copper and Nickel Action Plans. Additionally, the City provides the monitoring and data analysis used to evaluate water quality trigger levels associated with the Copper and Nickel Action Plans for the South Bay.

In FY 04-05, the City's Watershed Enforcement Program began a project to conduct rooftop inspections of select facilities in addition to other inspection activities already scheduled to occur at those facilities. This project continued into FY 05-06. The purpose of this project was to evaluate the degree of BMP implementation with respect to rooftop sources of pollution. Facilities were selected by SIC code based on the 1998 Industrial Stormwater Quality Monitoring Pilot Project's recommendations of facilities with a potential for significant contribution to polluted stormwater runoff. Contact letters and the Roof Vent BMP Fact Sheet were mailed to the 84 selected facilities, and 23 were returned from closed or moved businesses. Of the 61 viable companies, 18 were scheduled for inspection in Calendar Year 2005.

In all of the inspections performed, no Areas of Concern were discovered pertaining to roof runoff pollution. One facility received a recommendation to check roof exhaust vent prior to rainy season, and four received a recommendation to inspect and clean residue from roof top vents prior to rainy season. Due to the lack of visible evidence of roofs contributing polluted stormwater runoff, the City feels that further rooftop inspections are not warranted.

The City continued its NOI Filers Project in FY 05-06. Select facilities were contacted and encouraged to comply with the State's General Industrial Activities Stormwater Permit (GIASP). The Contact letter included a checklist to help determine if the facility needed to be covered by the GIASP, a flow chart detailing the development and implementation of a SWPPP, and a reprint of a previously published Tributary Tribune article with information about the GIASP and the Stormwater Enforcement Act of 1998 (AB 2019). The City sent the contact package to 115 facilities in San José. These facilities were selected based on the following criteria:

- Facilities listed in Watershed Enforcement's Industrial and Commercial database (EEDMS).
- Facilities with a GIASP Category of 8 or 10 (Based on SIC Code)
- Facilities documented by Watershed Enforcement Inspectors as either needing to file NOI or no determination made. (Facilities identified as not needing to file or found to have already filed were not contacted.)

Initially the contact package was to be sent out to all facilities with the above criteria AND with the SIC code identified in the 1998 *Industrial Stormwater Quality Monitoring Pilot Project*. However, the City decided to send the information to all facilities in our database which may be subject to the GIASP.

Watershed Enforcement Inspectors are trained in GIASP requirements. They evaluate each facility for applicability of the GIASP, and make recommendations to the facility owners/operators based upon their findings. These activities are fully integrated into the standard operating procedures for Watershed Enforcement inspections. Facilities found to need to file are reported to the Water Board annually in the City's URMP Annual Report. See 2.D: *Companies Requiring NOI Based on SIC But Have Not Filed* and 2.D: *Companies Requiring NOI Based on Exposure But Have Not Filed* for this information.

On May 8, 2006 the City hosted a street sweeping workshop titled Minimizing Stormwater Runoff Pollution through Sweeping Program Maximization. This workshop on pavement cleaning BMPs, sponsored by Worldsweeper.com and Allianz, gave information on the sources and characteristics of street pollutants picked up by sweepers, the effectiveness of sweepers, and guidance for developing and implementing effective pavement cleaning programs. Thirty-two people attended from local and state agencies, some from as far away as Roseville.

11. TRA: Trash

11.A TRA Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
TRA 1	**Inventory, Document and Evaluate Trash Management Practices**			
TRA 1.A	Complete Program survey of existing trash management practices.	Done FY 02-03	Done FY 02-03.	ESD
TRA 2	**Document and Map Known Trash Problem Areas**			
TRA.2.A	Identify data sources and information showing the location of known trash problem areas (e.g., trash complaints/ incidents and eradication efforts.)	Done FY 03-04	Done FY 03-04.	ESD
TRA 2.B	Compile trash problem location data/information and submit to Program for conversion to coordinates for GIS mapping.	Done FY 03-04	Done FY 03-04.	ESD
TRA 2.C	Revise and update documentation (list of locations, maps, etc.) of known trash problem areas.	As Needed	No updates were required in FY 05-06.	
TRA 3	**Conduct Trash Evaluations**			
TRA 3.A	Work with Program to select trash evaluation methodology.	Done FY 03-04	Done FY 03-04.	ESD
TRA 3.B	Assist Program with planning and organizing of training workshop for municipal staff.	Done FY 03-04	Done FY 03-04.	ESD
TRA 3.C	Participate in the trash evaluation methodology training workshop.	Done FY 04-05	Done FY 04-05.	ESD
TRA 3.D	Conduct trash evaluations and submit to Program staff:	--	--	ESD
TRA 3.D.1	Coyote Watershed	Done FY 04-05	Done FY 04-05.	ESD
TRA 3.D.2	Remaining San José locations	FY 05-06	Done FY 05-06. The remaining 12 hotspots were assessed twice during FY 05-06. 10 of the sites were on the Guadalupe River and 2 were within San Tomas Creek. All 12 sites were assessed using the KAB methodology. Accessibility and water level prevented implementation of Urban Rapid Trash Assessment (URTA) methodology at the two locations previously identified as candidates for RTA. See 11.D: *Trash Problem Area Activity Report.*	ESD
TRA 3.E	Continue trash evaluations in high priority areas to track changes over time.	Ongoing	Done FY 05-06 and ongoing. Trash evaluations were performed at 6 of the 7 high priority hotspots in the Coyote watershed identified in FY 04-05. One hotspot, Coyote Creek at Watson Park, was not re-assessed this year because the site was closed for remediation. Trash evaluations at high priority sites will continue in FY 06-07.	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
TRA 4	**Develop Standardized Documentation and Reporting Format**			
TRA 4.A	Work with Program to develop a reporting format to document trash management activities in Annual Reports.	Done FY 03-04	Done FY 03-04.	ESD
TRA 5	**Document and Analyze Evaluation Results; Identify and Prioritize Trash Problem Areas**			
TRA 5.A	Assist Program staff with the documentation and analysis of trash evaluation results.	Ongoing	Done FY 05-06 and ongoing. The City submitted trash assessment data to Program.	ESD
TRA 5.B	Identify high priority trash areas using trash evaluation results:	--	--	ESD
TRA 5.B.1	Coyote Watershed	Done FY 04-05	Done FY 04-05.	ESD
TRA 5.B.2	Remaining San José locations	FY 05-06	Done FY 05-06. Evaluations of litter hotspots were completed at the 12 remaining San José locations. The Keep America Beautiful (KAB) Litter Index was used to assess all 12 sites. Accessibility and water level prevented use of the URTA methodology at any of the remaining sites. Two assessments were performed at each site. High priority areas were determined based on receipt of a KAB score of 3 (littered) or 4 (extremely littered). See 11.D: *Trash Problem Area Activity Report.*	ESD
TRA 6	**Identify and Implement Trash Management Practices**			
TRA 6.A	Identify reasonable trash management practices to address high priority areas (in TRA 5B).	Ongoing	Done FY 05-06 and ongoing. The assessment for each site includes recommendations for enhancing trash management practices. See 11.D: *Trash Problem Area Activity Report.*	ESD, PRNS, GS, DOT
TRA 6.B	Implement or refine trash management practices at high priority areas to the maximum extent practicable.	Ongoing	Done FY 05-06 and ongoing. The City continued support of volunteer community creek clean-ups that take place at two of the high priority areas on the Coyote Creek. The City partnered with the Water District to clean up three locations with significant trash accumulations in the Coyote Creek Watershed this fiscal year as part of a memorandum of agreement. The City continues to support the Anti-Litter Program, which has more than 2,800 volunteers participating in litter removal throughout the City.	ESD, PRNS, GS, DOT
TRA 6.C	Document and report implementation of trash management actions.	7/31/05 Ongoing	Done FY 05-06 and ongoing. See 11.D: *Trash Problem Area Activity Report*. In addition, to the trash management actions noted in the activity report, the City hired the San Jose Conservation Corps to remove significant accumulations of trash from several creek areas removing a total of roughly 70 cubic yards of trash. In addition,	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
			enforcement was used to help facilitate removal of trash on privately owned properties to a greater extent.	
TRA 6.D	Provide Program with information on trash management practices implemented on standardized reporting format.	Annually	Done FY 05-06. Reviewed and provided comments on the Trash Problem Area Activity Report Form developed by the Program.	ESD
TRA 7	**Review and Update Performance Standards and Develop Long-Term Strategy for Trash Management**			
TRA 7.A	Assist with the review and update of existing standards that address BMPs or control measures relevant to trash management.	TBD by Program	Pending Program implementation.	ESD
TRA 7.B	Assist Program staff in developing a long-term strategy for trash conditions in urban streams and waterways.	FY 05-06	Done FY 05-06 and ongoing. Staff participated in Trash AHTG meetings in which discussions began regarding a long-term strategy. The City will continue to assist Program in developing a long-term strategy in FY 06-07.	ESD

11.B TRA Program Evaluation

FY 05-06's activities focused on: continuation of trash problem area assessments, continued support of City and community trash clean-up efforts, and evaluation of additional trash management activities for future implementation.

Initial trash assessments were performed at the 12 remaining San Jose hotspots, and a second round of evaluations were performed on select locations in the Coyote Creek Watershed (initially evaluated in FY 04-05). The priority was to complete initial assessments of trash problem areas on the Guadalupe River and San Tomas Aquino Creek. These assessments were completed using the Keep America Beautiful (KAB) Litter Index only. The Urban Rapid Trash Assessment (URTA) was not used at these locations due to access limitations and safety concerns. Each of the 12 sites was evaluated for the first time in the Fall 2005 and for a second time in Spring 2006. The second round of trash problem area evaluations was performed at six of the seven locations in the Coyote Creek watershed that were identified as high priority areas last year. Only a single round of assessments was performed at these locations due to resource limitations. One high priority trash hotspot on the Coyote Creek was not assessed in FY 05-06 because access was not available due to a soil remediation project in the park adjacent to the hotspot. This area will be assessed in FY 06-07, or after accessibility has been restored.

In general, trash assessments revealed that existing trash management activities are sufficient. Scores for some locations, however, indicated that some additional efforts are needed to control trash. Only 2 of the 12 Guadalupe River and San Tomas Aquino Creek sites assessed using the KAB methodology earned an average score of 3 (littered) or 4 (extremely littered), indicating a modest need for improvement. One of the four "high priority" Coyote Creek watershed sites (previously identified in FY 04-05 using the KAB methodology) scored a 3 or 4. The high priority sites in all watersheds will be assessed again in FY 06-07. Trash management practices at the remaining sites appeared to be working well based on observations at the time of the assessment.

Many of the sites on the on the hotspot list are included in the City's Anti-Litter Program (ALP) litter spots list and have been adopted and are cleaned by community members or City crews periodically. A majority of the ALP sites were found in good condition, scoring 1 (no litter) or 2 (slightly littered), indicating that ALP efforts are effective. The few ALP sites which scored 3 or 4 may need additional or improved trash management activities. The RTA assessment methodology was applied at 2 sites this year in the Coyote Creek watershed. See 11.D: *Trash Problem Area Activity Report* for assessment data. Trash assessments will continue in FY 06-07 at high priority sites only.

Enhanced Trash Management Practices

The City continues to maximize existing resources to address trash problem areas throughout the City. This year Watershed Enforcement staff served as a resource to help address trash problems on privately owned property adjacent to creeks. Contact from Watershed Enforcement Inspectors motivated property owners to take measures to clean up and/or prevent trash from re-accumulating. This year the City of San José and the Santa Clara Valley Water District (District) continued efforts

associated with the Memorandum of Agreement for Trash Prevention and Removal (Trash MOA) executed in FY 04-05. The highlight of Trash MOA activities was the partnered clean-up projects on the Coyote Creek and the Guadalupe River. The Trash MOA calls for three partnered clean-up projects each calendar year that are intended to take place at locations that fall outside the normal scope of operations of the City and District. During this reporting period, two partnered clean-up projects occurred in the Coyote Creek Watershed and a third on the Guadalupe River. An estimated total of four tons of debris was removed. In addition, the City established an agreement with the San Jose Conservation Corps to provide cleanup services along creeks to supplement existing cleanup provided under the Trash MOA and by City maintenance. The Conservation Corps removed approximately 70 cubic yards (approximately 7 tons) of trash from the Guadalupe River and Coyote Creek banks and beds.

The City submitted a concept proposal for Water Board Consolidated Grants Program for funds to support implementation of a structural trash control pilot program. The grant concept proposal was not advanced to the application stage, but City funds were budgeted to support a much smaller scale implementation of trash controls (catch basin inserts, inlet bars, or underground separation units) in FY 06-07. Efforts will be focused on developing a scope for the project that is feasible for implementation in FY 06-07.

In FY 05-06 DOT, installed and is piloting new catch basin grates as part of an American with Disabilities Act street retrofit in downtown San Jose neighborhoods. In addition to providing a firm surface for wheelchairs, walkers, crutches and the like, the catch basins prevent large pieces of trash from entering the storm drain. DOT is monitoring the catch basins to evaluate increased maintenance and whether the grates aggravate flooding. In FY 06-07, the City will continue to identify ways to enhance existing trash management practices, including the continued introduction of structural trash controls like catch basin grates. In addition, the City intends to complete production on public education materials designed to educate the public on the impact of litter on the condition of urban creeks.

11.C TRA Response to Water Board Comments

No comments were received from the Water Board on this Program Element.

11.D TRA Summary Tables / Additional Information

Trash Problem Area Activity Report

#	Date	Site ID	Watershed	Location	Assessment Method	Score	Existing Trash Management Action	Recommended Management Actions and/or Future Evaluations
1.	10/5/05	SJ01	San Tomas Aquino Creek	San Tomas Aquino Pkwy between Payne and Mona	KAB[α]	2	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	Abandoned carts reported for pick up. Future assessment is recommended.
2.	6/23/06	SJ01	San Tomas Aquino Creek	San Tomas Aquino Pkwy between Payne and Mona	KAB	1	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	Existing trash management practices appear to be sufficient. Future assessment is not recommended.
3.	10/5/05	SJ02	Guadalupe River	Blackford High School (Boyton Av)	KAB	1	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	Site was clean. There were signs indicating that sweepers recently passed through. One additional assessment is recommended to ensure that the site was not just clean because of recent street sweeping.
4.	6/29/06	SJ02	Guadalupe River	Blackford High School (Boyton Av)	KAB	1	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers	Existing trash management practices appear to be sufficient. No future

[α] Keep America Beautiful (KAB) Litter Index ratings are: 1-No litter, 2- slightly littered, 3- Littered, 4- extremely littered

							or City staff.	assessment recommended.
5.	10/23/05	SJ03	Coyote Creek	Santa Clara between 17th and 20th St.	KAB	2	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	Continue support of community clean-up efforts in this area.
6.	10/5/05	SJ06	Guadalupe River	Home St from Sunol to the dead end	KAB	4	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	This may be a potential site for partnered City and District clean-up. Future assessment is recommended.
7.	4/28/06	SJ06	Guadalupe River	Home St from Sunol to the dead end	KAB	2	A fence was installed that blocks access to creek area from Sunol. Based on what could be seen through fence, the site is cleaner than it was six months ago.	Future assessment is not recommended due to blocked access.
8.	6/23/06	SJ07	Coyote Creek	Penitencia Creek at Creekland Cir	RTA[β]	71/123	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	This location could benefit from involvement of adjacent property association participation. Future assessment is recommended.
9.	10/5/05	SJ14	Guadalupe River	Old Almaden Rd from Capitol Expwy to Almaden Expwy	KAB	4	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	Determine property ownership and identify resources to clean-up of the area. Future assessment recommended.
10.	4/28/06	SJ14	Guadalupe River	Old Almaden Rd from Capitol Expwy to Almaden Expwy	KAB	4	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	Make contact with Goodwill regarding potential solutions to the problem. Future assessment recommended.
11.	10/5/05	SJ15	Guadalupe River	E side of Camden Av between Guadalupe Mines Rd and Vista Loop	KAB	1	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	This site was extremely clean. No litter visible. Does not warrant future assessment.
12.	4/28/06	SJ15	Guadalupe River	E side of Camden Av between Guadalupe Mines Rd and Vista Loop	KAB	3	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	Future assessment recommended.
13.	10/5/05	SJ16	Guadalupe River	Blossom River Dr between Blossom Hill Rd and Blossom River Wy	KAB	2	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	Existing trash management practices appear to be sufficient. No future assessment recommended.
14.	4/28/06	SJ16	Guadalupe River	Blossom River Dr between Blossom Hill Rd and Blossom River Wy	KAB	1	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	Existing trash management practices appear to be sufficient. Future assessment is not recommended.
15.	10/5/05	SJ17	Guadalupe River	Almaden Expwy at Crown and Camden	KAB	1.5	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	Existing trash management practices appear to be sufficient. Future assessment is not recommended.
16.	4/28/06	SJ17	Guadalupe River	Almaden Expwy at Crown and Camden	KAB	2	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	Existing trash management practices appear to be sufficient. Future assessment is not recommended.

[β] Rapid Trash Assessment (RTA) scores range from 0 (worst) to 120 (best). Scores are expressed above as overall numeric score/quantity of trash counted.

#	Date	Site ID	Watershed	Location	Assessment Method	Score	Existing Trash Management Action	Recommended Management Actions and/or Future Evaluations
17.	10/5/05	SJ18	Guadalupe River	Northside of Coleman Rd between Almaden Expwy and Meridian Av	KAB	2	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	Existing trash management practices appear to be sufficient. Future assessment is not recommended.
18.	4/28/06	SJ18	Guadalupe River	Northside of Coleman Rd between Almaden Expwy and Meridian Av	KAB	1.5	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	Existing trash management practices appear to be sufficient. Future assessment is not recommended.
19.	10/5/05	SJ19	Guadalupe River	Camden Av between Coleman and Camden Village Cir	KAB	3	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	This site is located in front of a multifamily dwelling, and adjacent to a VTA bus stop. Installation of a trash receptacle may help reduce litter on ground. Lots of trash accumulated behind bench. Future assessment is recommended.
20.	4/30/06	SJ19	Guadalupe River	Camden Av between Coleman and Camden Village Cir	KAB	2	This location is on the Anti-Litter Program list and is periodically cleaned by volunteers or City staff.	No recommended management action. One future assessment is recommended. Area may have been clean due to construction project occurring at the time of assessment.
21.	10/5/05	SJ20	Guadalupe River	Almaden at Ironwood	KAB	2	Area is fenced off to prevent access which serves to keep litter out of the channel.	This site should be assessed at least once more. This location is a potential site for a future clean-up.
22.	4/28/06	SJ20	Guadalupe River	Almaden at Ironwood	KAB	2	Area is fenced off to prevent access which serves to keep litter out of the channel.	No recommended management action. Future assessment not recommended.
23.	10/5/05	SJ21	Guadalupe River	Julian St near Guadalupe Pkwy (under bridge near creek)	KAB	2	According to signage, the Rotary Club adopted this area under the Water District's Adopt-a-Creek Program.	Existing management actions appear to be effective. Future assessment is recommended to compare seasonal differences.
24.	4/28/06	SJ21	Guadalupe River	Julian St near Guadalupe Pkwy (under bridge near creek)	KAB	2	This area is maintained by the Park maintenance staff, and is a targeted Clean-up site for creek Clean-up days. According to signage, the Rotary Club adopted this area under the Water District's Adopt-a-Creek Program.	Existing trash management practices appear to be sufficient. No future assessment is recommended.
25.	6/22/06	SJ23	Coyote Creek	Coyote Creek at Evergreen Park	RTA	56	Park Maintenance staff maintains the park on a regular basis. However, the trash left in creek bed following the heavy winter rains remained.	Determine whether volunteer resources are available to do annual clean-up. Future assessment is recommended.
26.	10/5/05	SJ25	San Tomas Aquino Creek	Starbird Park (Boynton at Williams)	KAB	1	Parks Maintenance cleans the park area.	Abandoned carts reported for pick up. One future assessment is recommended.
27.	6/23/06	SJ25	San Tomas Aquino Creek	Starbird Park (Boynton at Williams)	KAB	1	Park Maintenance staff maintains the park on a regular basis. Neighboring apartment manager collects stray carts in the area and places in a fenced corral.	Existing trash management practices appear to be sufficient. No future assessment is recommended.

#	Date	Site ID	Watershed	Location	Assessment Method	Score	Existing Trash Management Action	Recommended Management Actions and/or Future Evaluations
28.	6/29/06	SJ27	Coyote Creek	Coyote Creek between Berryessa Rd and Mabury Road	KAB	2	Site was in very clean condition. The Santa Clara Valley Water District has the area fenced off which prevents access and windborne trash.	No additional management actions recommended. Future assessment is recommended.
29.	6/23/06	SJ28	Coyote Creek	Coyote Creek at Julian Street Bridge	KAB	2	The San Jose Academy has been cleaning the banks adjacent to the academy on National River Clean-up Day and Coastal Clean-up Day. A community group also helps maintain the area.	No additional management actions recommended. Future assessment is recommended.
30.	6/29/06	SJ30	Coyote Creek	Coyote Creek at Upper Penitencia (confluence adjacent to Flea Market)	KAB	3	Flea Market staff cleans the parking lot and creek banks regularly. Area seemed cleaner than it was at the last assessment.	No additional management actions recommended. A periodic communication with the Flea Market Management may help. Future assessment is recommended.

MON 3.A	Identify sampling sites based on land use, and suitability of the site for data collection.	Done 6/97	Done, prior to FY 01-02.	ESD
MON 3.B	Train staff on sampling procedures, protocols and safety measures.	Done 9/97	Done, prior to FY 01-02.	ESD
MON 3.C	Collect representative samples from first effective rainfall and every opportune rainfall event of the season.	Done 4/98 through 4/00	Done, prior to FY 01-02.	ESD
MON 3.D	Analyze each season's data to characterize runoff constituents.	Done 6/98 through 6/00	Done, prior to FY 01-02.	ESD
MON 3.E	Provide screen of analysis to further identify location and extent of pollutants for source control and outreach efforts.	Done 7/98 through 6/00	Done, prior to FY 01-02.	ESD
MON 3.F	Based on analysis, provide information for targeting sampling.	Done 12/02	Done FY 02-03.	Program
MON 3.G	Compare results with other sites, regional monitoring efforts, trends and other data to provide indication of relative magnitude of pollutant problem.	Done 9/02	Done FY 02-03.	Program

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
MON 3.H	Explore modeling approaches to characterize water quality in the watershed and target additional monitoring efforts.	Done 9/02	Done FY 02-03.	Program
MON 3.I	Provide data to SCVURPPP Program as part of 5-Year Monitoring Program.	Report 6/02	Done FY 02-03.	ESD

12.B MON Program Evaluation

Monitoring activities are conducted effectively at the Program level with participation from City staff to support collaboration with the Water Board (through the CEP) and to provide technical review of Program products. The City participated in a Program-wide survey of relevant municipal policies and practices that might serve to reduce dioxin emissions. These included activities relating to multiple potential source types such as fireplace and wood-burning appliances, diesel use, pesticide use, and paper use. The City supplied information to the Program in support of this effort. The City has existing wood burning and wood burning appliance ordinances in place that effectively reduce the potential for atmospheric dioxin release. In addition, City staff is investigating the feasibility of alternative fuels for diesel vehicles that would also serve to reduce the potential for dioxin emissions.

The City provided water quality monitoring equipment and supplies for the Program's FY 05-06 creek monitoring activities.

12.C MON Response to Water Board Comments

No comments received from Water Board on this Program Element.

12.D MON Summary Tables / Additional Information

13. MC: Municipal Compliance

13.A MC Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
MC 1	**Municipal Training** Municipal Training is a critical function of the City's NPDES Permit. Municipal compliance is dependent on the level and quality of the training provided.			
MC 1.A	Identify training needs.	Annually	Done FY 05-06. Hazardous waste, various aspects of NPDES C.3, and corporation yard SWPPP training were among the training needs identified.	ESD-UR
MC 1.B	Develop curricula.	As Needed	Done FY 05-06 for training noted in MC 1.A.	ESD-UR
MC 1.C	Conduct training.	Ongoing	Done FY 05-06. See 13.D: *Municipal Employee Training Summary*.	ESD-UR
MC 1.D	Evaluate municipal training program and make improvements as needed.	Annually	Done FY 05-06. The City conducted municipal training for all required Program Elements. The instructors reviewed course evaluation forms and made improvements to the curriculum. Evaluation forms from the morning sessions of the construction inspectors training were used on the spot by the instructors to make adjustments to the training content for the afternoon sessions.	ESD-UR
MC 2	**Municipal Facilities Assessment and Compliance** Municipal facilities are required to comply with stormwater regulations. Efforts to reduce contaminated discharges from City facilities must be similar to those required of private businesses. While many elements for permit compliance are in place, the City requires a systematic approach to City facilities compliance at the level of effort required in the URMP.			
MC 2.A	Conduct Corp Yard assessments and inspections.	Annually	Done FY 05-06. Annual Corporation Yard inspections were conducted in the first quarter of 2006. Quarterly Hazardous Material inspections at the Corp Yards and Municipal Garage, which include stormwater issues, were conducted in FY 05-06.	ESD-UR, GS, DOT
MC 2.A.1	Conduct Citywide meeting to discuss Hazardous Material, Safety, and Stormwater issues for City corporation yards (up to two times per year).	Annually	Done FY 05-06. A Citywide Hazardous Materials Management meeting was conducted on June 16, 2006. The meeting was conducted in order to provide staff with information and training on the correct handling and storage of hazardous materials, safety procedures, and stormwater best management practices.	GS, ESD, DOT, Fire, Police
MC 2.A.2	Revise Corporation Yard inspection form.	9/30/05	Done FY 05-06. Corporation Yard inspection form was updated in July 2005.	ESD-UR
MC 2.B	Review Municipal Facilities SWPPPs.	Annually	Done FY 05-06. Minor revisions were made to the Main Yard SWPPP in March 2006.	ESD, GS, DOT
MC 2.B.1	Fully revise the five (5) remaining Corporation Yard	6/30/07	Done FY 05-06 and continuing. First drafts for 3 of the	ESD-UR, GS, DOT

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
	SWPPPs (using the Main Yard revised SWPPP pilot process as a template).		remaining 5 SWPPPs that need full revision were completed in FY 05-06. Drafts are currently out for review and comment.	
MC 2.C	Conduct SWPPP training at City corporation yards.	Annually	Done FY 05-06. SWPPP training was conducted at the six Corp Yards in June 2006.	ESD-UR, GS, DOT

13.B MC Program Evaluation

Training

During FY 05-06, the City conducted municipal training for all required Program Elements. See 13.D: Municipal Employee Training Summary. Highlights from this year's training include:

1) The City conducted numerous trainings in multiple City departments on Hazardous Waste. Eight ESD Watershed Enforcement Inspectors attended Hazardous Waste Operations Annual Refresher Training on 09/20/05, 10/20/05, 11/04/05, and 12/06/05. In addition, one ESD Inspector attended the annual training conference sponsored by the California Hazardous Materials Investigation Association on 03/14/06. Hazardous materials handling was included in annual training conducted for 12 full time and 11 part time PRNS Park Rangers held on 2/10/06 and 03/28/06, respectively. In addition, 15 staff from ESD, GS, DOT, and PRNS attended a Citywide hazardous materials management meeting on 06/16/06.

2) The City continues to place high importance on post-construction stormwater treatment and hydromodification (also referred to as C.3) technical training. ESD Urban Runoff, Santa Clara Valley Urban Runoff Pollution Prevention Program, WMI-LUS, StormCon, and EOA, Inc Consultants conducted several trainings on various aspects of treatment and hydromodification management. Staff from Public Works, Planning, Building, and Code Enforcement, Transportation, and Environmental Services attended these training sessions. See 3.B: NRD Program Evaluation for details.

3) Numerous trainings were conducted for City field and maintenance staffs. Department of Transportation crews received training on stormwater BMPs and SOPs on 05/16/06, 05/17/06, 05/23/06, 05/25/06, and 05/31/06. Parks, Recreation, and Neighborhood Services (PRNS) and Rural Public Roads staffs were trained on BMPs and SOPs related to their operations on 11/07/05, 11/09/05, 11/10/05, 11/14/05, and 11/16/05. Corporation Yard SWPPP training was conducted for General Services and PRNS staffs on 06/08/06, 06/12/06, 06/13/06, 06/14/06, and 06/19/06.

4) An evaluation of training shows the City is complying with the Urban Runoff Management Plan by conducting training for every Program Element activity that requires training. Attendees for these trainings complete evaluation forms and turn them into the instructors. Instructors review these forms to see where they can improve the training and make it better. These forms are later entered in to a tracking database for later review by ESD management.

Municipal Facilities

Annual Corporation Yard stormwater inspections were completed in the first quarter of 2006. The Stormwater Inspection form for Corp Yards was revised to address confusion on whether a listed area of concern is not applicable (activity and/or equipment not present at the facility) or is applicable (present at the facility) but not inspected during the inspection.

In FY 05-06 City staff conducted quarterly Hazardous Material inspections, which also include stormwater issues. A semi-annual City-wide meeting to discuss hazardous materials, safety, and stormwater issues was held on June 16, 2006. These regular meetings have proven to be effective in improving the coordination between GS staff, ESD staff, and Corp Yard representatives. The combination of an annual stormwater assessment inspection, including stormwater concerns in the quarterly hazardous material inspections, and the Citywide Hazardous Material Management meetings, which include stormwater issues, appears to be working well. The concerns in the Corp Yard inspection reports are usually minor and resolved swiftly; concerns that are more significant are less frequently noted as the program is becoming part of the institution of the Corp Yards.

Corp Yard SWPPP training was held in June 2006 for the GS and PRNS Corp Yard staff. Participants were given an evaluation form to fill out. Of the 106 staff that participated in the training, 76 evaluations were completed and returned. Results of the completed evaluations are summarized below:

- 93% responded that the training subjects taught are appropriate to their work
- 93% responded that the BMPs/SOPs described match their work practices
- 89% responded that the training adequately described the relationship of BMPs/SOPs to compliance with the City's Stormwater NPDES permit
- 91% responded that the training adequately explained how they, City staff, can help the City maintain compliance with the Stormwater NPDES permit
- 95% responded that the training adequately explained a SWPPP.

A Corporation Yards' Pollution Prevention Team was formed in December 2004 to review and update Stormwater Pollution Prevention Plans (SWPPPs). The Main yard SWPPP was revised in FY 04-05. Using the new Main Yard SWPPP as a template, SWPPP revisions for three of the remaining five Corp Yards (Mabury, South, and West) have been drafted in FY 05-06 and are currently out for review and comment. The City anticipates completion of full revisions for all five remaining Corp Yard SWPPPs over the next fiscal year.

13.C MC Response to Water Board Comments

No comments received from Water Board on this Program Element.

13.D MC Summary Tables / Additional Information

Municipal Employee Training Summary for FY 05-06

PS ID #	Date of Training	Topic	Sponsored or Held By	Division/Section Attending	# Attended	Tentative FY 06-07 Schedule

14. PIP: Public Information / Public Participation

14.A PIP Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
PIP 1	**Public Awareness** The City of San José will promote general citizen awareness of what a watershed is, the functions of the storm drain system, pathways and sources of urban runoff pollution to the South Bay watershed, and behaviors that adversely affect water quality.			
PIP 1.A	Participate in WMI Outreach, and coordinate WMI outreach with Watershed Watch and Program efforts.	Ongoing	Done FY 05-06 and ongoing. City staff supported coordination of WMI and Program messages in the Watershed Watch campaign through WE&O AHTG and attended WMI COS workgroup meetings to keep WMI staff informed of activities. In FY 05-06 the City reprinted the WMI's Watershed Images Survey. The City also developed and printed the *WMI Update* information sheet	ESD, WMI, Program
PIP 1.A .1	Participate in Watershed Watch campaign.	Ongoing	Done FY 05-06 and Ongoing. City staff assists with planning and implementation through WE&O AHTG. See Program Annual Report for complete campaign annual report. In FY 05-06 the City participated in the workgroup that updated the Campaign strategy.	ESD, Program
PIP 1.B	Identify, support and participate in appropriate community events to further general public awareness.	Ongoing	Done FY 05-06. See 14.D: *PIP Activities.*	ESD
PIP 1.B.1	Work with Watershed Watch Events work group.	Ongoing	Done FY 05-06. Watershed Watch events are discussed and coordinated through the WE&O AHTG. See Program Annual Report for details concerning Watershed Watch events.	ESD, Program
PIP 1.C	Give presentations upon request that focus on stormwater messages to elementary through college grade levels, neighborhood groups, etc.	As Needed	Done FY 05-06 and ongoing. See 14.D: *PIP Activities.*	ESD
PIP 2	**Targeted Outreach** The City of San José will develop and implement targeted residential outreach and education campaigns, based on high priority pollutants, to effectively reduce pollutant-causing behaviors and promote Best Management Practices.			
PIP 2.A	Identify general residential practices contributing to stormwater pollution. Identify reasonable alternatives to pollutant causing behavior.	N/A	Done FY 05-06. Addressing messages through the Watershed Watch Campaign.	ESD, Program
PIP 2.A.1	Review surveys and applicable reports.	Ongoing	Done FY 05-06 and ongoing. Target audiences have been based on Program survey and are documented in the Watershed Watch strategy. San José tailors its outreach to compliment Program and regional outreach	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
			efforts, which include periodic surveys to evaluate products and outcomes.	
PIP 2.A.2	Meet with inspectors to discuss and document residential outreach needs.	Ongoing	Done FY 05-06 and ongoing. Outreach staff attend monthly Inspectors' meeting. Outreach needs are identified and incorporated into work plans accordingly.	ESD
PIP 2.A.3	Prepare report identifying residential outreach needs and tasks.	Annually	Done FY 05-06. Outreach staff submits a report to Watershed Protection Management on projected outreach needs and recommendations.	ESD
PIP 2.B	Identify ICID practices and target audience(s) contributing to pollution.	N/A	Done FY 05-06. ICID Feedback cards are regularly distributed to complainants who provide contact information. How complainants hear about ICID services is also tracked. See 1.D: *Complainant Source Summary*.	ESD
PIP 2.B.1	Review ICID reports.	Ongoing	Done FY 05-06 and ongoing. 248 ICID Complaint feedback cards were distributed to complainants, and 82 were returned. 74% felt their complaint had been resolved, a 4% increase from last FY. 72% felt their complaint had been resolved in a timely manner, a 5% increase from last FY. 62% felt their complaint had been resolved to their satisfaction, a 1% increase from last FY. 76% rated the City's service as excellent or good, a 6% increase from last FY; and 24% rated it as fair or needs improvement, a 6% decrease from last FY. How complainants heard about ICID services is also tracked. See 1.D: *Complainant Source Summary* for details.	ESD
PIP 2.B 2	Meet with ICID inspectors to discuss and document outreach needs.	Ongoing	Done FY 05-06 and ongoing. Outreach staff attend monthly Inspectors' meeting. Outreach needs are identified and incorporated into work plans accordingly.	ESD
PIP 2.B.3	Prepare report identifying ICID outreach needs and tasks.	Annually	Done FY 05-06. Outreach staff submits a report on projected outreach needs and recommendations. Report findings incorporated into work plans accordingly.	ESD
PIP 2.C	Promote selected residential and ICID messages through local and regional activity (e.g. Program PIP, BASMAA PIP, BAPPG, Media Relations, etc.)			
PIP 2.C.1	Report on targeted residential and ICID outreach activity.	Annually	Done FY 05-06. See 14.D: *PIP Activities.*	ESD
PIP 2.C.2	Participate in the Program's Pesticide and Mercury ad hoc task groups.	Ongoing	Done FY 05-06 and ongoing. Staff participated in AHTG and collaborated with regional Household Hazardous Waste efforts that are focusing on Universal Waste requirements. See Program Annual Report for details.	ESD, Program
PIP 3	**Educational Programs** The City of San José will support and/or develop and implement educational programs designed to increase youth understanding and appreciation of the South Bay watershed.			
PIP 3.A.	Support, and/or develop and implement school and	N/A	Done FY 05-06 and ongoing. See 14.D: *FY 05-06 San*	

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
	youth education programs.		*José School Outreach* for details.	
PIP 3.A.1	Participate in WE&O Schools and Youth work group.	Ongoing	Done FY 05-06 and ongoing. Participated in developing schools work plan and activities for Urban Runoff Program and Watershed Watch campaign. City Staff participated in both WE&O Ad Hoc Task Group and Schools and Youth Work group meetings, and serve as Chair of both groups. Direct implementation takes place through the Urban Runoff Program staff and the Watershed Watch Contractor. Through the City's Youth Watershed Education Team (YWET) staff collaborated to update and promote City's middle school curriculum.	ESD, Program
PIP 3.A.2	Participate in the Alviso Education Center work group.	Ongoing	Done FY 05-06 and ongoing. City staff participated in work group meetings. Program Staff administered the SCVURPPP Ed Center Grant. See Program Annual Report for details.	ESD, Program
PIP 3.A.3	Participate in City Education programs such as the Youth Watershed Education Team, Rangers in Schools, etc.	Ongoing	Done FY 05-06 and ongoing. See 14.D: *PIP Activities.*	ESD
PIP 4	**Citizen Participation** The City of San José will support and/or develop and implement citizen involvement programs designed to increase citizen understanding and appreciation of the South Bay watershed.			
PIP 4.A	Support and/or develop involvement opportunities for San José residents			
PIP 4.A.1	Participate in creek Clean-ups on a bi-annual basis through in-kind staff support for the Creek Connections Action Group.	N/A	Done FY 05-06. Coordinated internally with PRNS and Friends of Coyote Creek; externally with Creek Connections Action Group.	ESD, PRNS
PIP 4.A.1.a	Fall creek Clean-up.	Annually, Q1	Done FY 05-06. See 14.D: *PIP Activities.*	ESD, PRNS
PIP 4.A.1.b	Spring creek Clean-up.	Annually, Q4	Done FY 05-06. See 14.D: *PIP Activities.*	ESD, PRNS
PIP 5	**Outreach Evaluation** The City of San José will evaluate its Outreach efforts for effectiveness.			
PIP 5.A	Implement selected evaluation tools.	N/A	See 14.B: *PIP Program Evaluation*.	ESD
PIP 5.A.1	Work with Program, WMI, and Watershed Watch AHTG to Plan for Program's Watershed watch campaign follow–up survey.	Triennially FY 06/07	Not scheduled for FY 05-06.	ESD, Program
PIP 5.A.2	Report on survey and evaluation activity during the report period	Annually	In March 2006 the Program conducted a set of two focus groups in order to elicit feedback regarding the Watershed Watch campaign. See Program Annual Report for details. See 14.B *PIP Program Evaluation* and 14.D: *PIP Activities* for city evaluation activities	ESD
PIP 4.B	Annually review, modify and report on outreach plans based on effectiveness results.	n/a	Done FY 05-06. Work plans are evaluated and modified as needed based on evaluation results.	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
PIP 4.B 1	Produce written report on effectiveness of outreach activities conducted in prior fiscal year.	Annually	Done FY 05-06. See 14.D: *PIP Activities.*	ESD

14.B PIP Program Evaluation

San Jose's outreach strategy is implemented on three levels: Local, County-wide, and Bay Area-wide (Regional).

Local target audiences are based on survey and focus group work conducted by the City and the Program. Local outreach is conducted to address time-constrained and/or local (San José only) issues. Local strategies and tactics are documented in the Outreach Strategies submitted annually to the City's budget office. When possible, San José tailors its local outreach to compliment/coordinate with Program (countywide) and regional outreach efforts. Short-term tactic and strategy success is evaluated case-by-case using a variety of mechanisms. Public opinion surveys evaluate long-term outcomes in attitudes and behavior.

Countywide target audiences are based on Program survey and focus group work conducted through the Program and, when appropriate, the City. The City's Countywide outreach delivers stormwater and watershed messages to residential and business audiences in the Santa Clara Basin. Strategies and tactics are documented in the Watershed Watch strategy. The City advocates for and facilitates coordination of Countywide outreach with Regional outreach workgroups. Short-term tactic and strategy success is evaluated case-by-case using a variety of mechanisms. Public opinion surveys evaluate long-term outcomes in attitudes and behavior.

Regional target audiences, messages, and projects are identified through a variety of processes conducted by the various regional workgroups. San Jose's regional audiences are specific subsets of the general business and residential audiences that occur in San José, but may also be universal in the Bay area, and are targeted for messages about specific behaviors or awareness related to stormwater and watershed messages (e.g. Pest Control Operators for IPM messages; restaurants for Fats, Oils and Grease (FOG)). Strategies and tactics for these audiences are proposed and implemented through the Regional workgroups. Strategies and tactics finally selected through these processes are documented in the workplans of the various groups. Short–term tactic and strategy success is evaluated and reported case-by-case using a variety of mechanisms (e.g. the Regional Media Relations workgroup's measures). For some projects (e.g. OWOW, Regional Ad Campaign) public opinion surveys evaluate long-term outcomes in attitudes and behavior.

FY 05-06 marked the fourth and final year the City contracted with the San José Conservation Corps to stencil storm drain inlets with a creek-specific "No Dumping" message and a phone number to report incidents. Storm drain stencils are placed in locations that are highly visible to residents. Including the neighborhood creek name in the stencil gives residents specific information about how their actions tie in to the local environment. The City is currently evaluating its storm drain inlet marking activities and exploring alternatives and strategies to keep the City's 28,000+ inlets marked in an efficient and cost-effective manner.

FY 05-06's targeted efforts focused on proper disposal of universal wastes, Integrated Pest Management (IPM), construction-generated pollutants, trash, and general pollution prevention. At the local level, San José has been able to successfully direct a variety of messages to a wide array of audiences through targeted events, training workshops, direct mailing, published articles, and collaborative efforts at the regional level. Targeted outreach typically is more difficult to implement at the Program-wide level, primarily because of prioritization and staffing constraints. The Program's targeted outreach focus has been on readying the co-permittees' staff for implementation of post-construction stormwater treatment and hydromodification measures. For FOG, San José added a grease trap/interceptor tracking log form to the restaurant package, and continued distribution of the package in FY 05-06. Targeted outreach supplements tasks done in other elements of the URMP, such as Illicit Connection/Illegal Dumping, the Industrial/Commercial Dischargers, Construction Inspection, Pesticide Management, Mercury, and the Copper and Nickel Action Plans.

Citizen Participation activities are a potent method for getting residents out into the Watershed and engendering stewardship. The City participated in three Clean-up events, as well as a Bike to Work Day, designed to promote participation and stewardship in the citizens of San José. At the Coastal Clean-Up Day event one student volunteer at San Jose High commented that he did not even realize there was a creek right behind the school. By the end of the event he expressed disgust at the amount of trash found on the banks and around access points. He was a repeat volunteer at the May clean-up, and commented on how there was less trash that time, but there was still trash. Tying Clean-up days to pre-existing events such as Coastal Clean-up Day and the Great American Pick-up is a good way to maximize promotion. Advertising paid for by regional entities is useful for raising awareness locally. The City's Urban Runoff Program continued working with the Anti-Litter Program in FY 05-06 to tie watershed objectives in with existing successful efforts.

Education continues to be a vital component of San José's pollution prevention plan. The City actively contributes to education both as a City and through the Program. San José commits significant resources to youth education with the goal of instilling a sense of stewardship for the environment. San José employs both in-class education and train-the-trainer approaches to outreach. In-class presentations are more expensive per student reached, but lend themselves better to evaluation. The City's Water Awareness Program reached 224 students in the targeted grades of fifth, sixth, and seventh, a minor decrease from last year's 293. The City is currently evaluating methods to increase the reach of this effort, and plans on instituting changes to the program in FY 05-06 and beyond. The City's train-the-trainer tactics have the potential to reach many more students, but it is extremely difficult to measure the effectiveness of this potential. Youth Watershed Education Grants provide funding for groups and educators to implement their own programs, which in turn accomplish the City's education goals.

This fiscal year the City is including website visits and downloads in with the Section 14.D.: *Outreach Materials Distributed*. The City's web tracking software is sufficiently detailed enough to track visits on particular pages, allowing for this reporting. The web offers an alternative to printed materials for disseminating information, giving the City another method for reaching audiences.

14.C PIP Response to Water Board Comments

No comments received from Water Board on this Program Element.

14.D PIP Summary Tables / Additional Information

PIP Activities Table

Outreach Type:

❍ **= General Outreach** ◎ **= Targeted Outreach** **= Citizen Involvement** **= Education**

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 05-06 STATUS	EVALUATION
Att. A.1	Storm Sewer Stenciling	❍	FY 05-06 The San Jose Conservation Corps stenciled approximately 4,400 storm drain inlets throughout the City with No Dumping Flows to Neighborhood Creek and the 945-3000 Hotline Number.	This was the fourth and final year of a 4-year contract to re-stencil all the public right-of-way storm drain inlets in the City of San José. Approximately 28,440 inlets were completed during the four years. Storm drain stencils are placed in locations that are highly visible to residents. Including the neighborhood creek name gives residents specific information about how their actions tie in to the local environment. In FY 05-06 the City evaluated it's inlet marking method, looking for the most durable, non-damaging and cost-effective method to mark our inlets. This evaluation will be considered in deciding future stenciling in San Jose.
PM 6.A PIP 1.A.1 PIP 2.C PM 6.A Program	Watershed Watch sign at Happy Hollow Park and Zoo	❍	Interpretive Sign, installed in FY 03-04, features a photo montage of beneficial uses of creeks and the Bay, along with four pollution-prevention messages: keep your car tuned to avoid oil leaks, avoid pesticide use, especially before rains, proper disposal of household hazardous wastes,	In FY 05-06, 316,230 visitors attended Happy Hollow Park and Zoo. The sign is located at the bottom of the entrance walkway into the Zoo. Every visitor to the zoo passes by the sign entering and leaving.

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 05-06 STATUS	EVALUATION
			and no dumping into storm drains.	
PIP 1 PIP 2.C. PM 6.A. PM 6.E. M 2.B.	Water Awareness web page	❍	ESD web page highlighting several water issues, including pollution prevention, storm drain vs. sanitary sewer, IPM, household hazardous waste, automotive fluids, Anti-Litter Program, etc. Links to watershedwatch.net and the County's Household Hazardous Waste program included.	The Water Awareness web page is updated with seasonally pertinent information about a variety of water-related issues. A total of 1,259 visits (up from 473 in FY 04-05) and 1,346 views (up from 506) were recorded on the City's Water Awareness web page in FY 05-06.
PIP 1	Celebration in the Park at San Tomas Park (Council District 1)	❍	September 17, 2005. Free council district event with entertainment and community resources.	Distributed pollution prevention information at community resource booth. Estimated 800 residents attended.
PIP 1	Community Festival (Council District 2)	❍	September 17, 2005. Free council district event with entertainment and community resources.	Distributed pollution prevention information at community resource booth. Estimated 5,000 residents attended.
PIP 1.A.1 PIP 1.B. Att. A.3	Harvest Festival at Prusch Park Farm	❍	October 1, 2005. Watershed Watch booth with games and Pollution Prevention information.	See Program Annual Report for details.
PIP 1	Day in the Park Multicultural Festival at Lake Cunningham Park (Council District 8)	❍	October 1, 2005. Free council district event with entertainment and community resources.	Distributed pollution prevention information at community resource booth. Estimated 6,000 residents attended.
PIP 1.A.1 PIP 1.B. Att. A.3	Pumpkins in the Park at Discovery Meadow	❍	October 8, 2005. Watershed Watch booth with games and Pollution Prevention information. San José re-entered it's Scarecrow with Anti-Litter messages. The Scarecrow won Second Prize in the contest this year.	See Program Annual Report for details.
PIP 1.B PIP 1.C PIP 3.A.3	Martin Luther King Library Resource Fair	❍	March 17, 2006. Watershed protection and Urban Runoff messages were incorporated into the Slow the Flow Coordinator's presentation at this event.	Approximately 100 people visited the display.
PIP 1.B. Att. A.3	Spring in Guadalupe Gardens	❍	April 22, 2006. City of San Jose table with information on how to "green" your home, HHW, Recycle Plus, Watershed Management, South Bay Water Recycling, energy conservation, water conservation, green construction practices, waste water treatment, green business, and home composting.	Good event to interact with residents. Information on Household Hazardous Waste was the hot topic.
PIP 1.B M.5.A M 5.C Att. A.3	American Community Resource Fair	❍	April 30, 2006 at the Willow Glen chapter of the American Legion. Information-sharing with local residents.	Approximately 75 residents attended. Distributed literature on household hazardous waste disposal, pool & spa maintenance, universal waste disposal, and home maintenance tips.
PIP 1.B M 5.C	Safe Medicine Disposal Days	❍	May 15, 18, 20, 2006. Take-back event for old and/or expired medications. Partnered internally	Approximately 330 participants dropped off over 825 lbs of medications and 20 mercury thermometers over the course of

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 05-06 STATUS	EVALUATION
Att. A.3			with Council member LeZotte's office and the San José Police Department; and externally with Walgreens and Kaiser Permanente.	three events. All of the participants were positive and happy to be able to participate in this event. Data collected from these events and the other Bay Area events will be analyzed for future events or programs planning.
PIP 1	Community Resource Fair at City Hall Plaza	❍	June 11, 2006 at City Hall Plaza. Information-sharing with local residents.	Approximately 7,000 people attended. Distributed literature on household hazardous waste disposal and general pollution prevention.
PIP 1	"Don't Trash California" PSAs on Civic Center Channel 26/26A	❍	City cable channel 26/26A ran Don't Trash California PSAs in Spring and summer of 2006	Obtained PSA from CalTrans. PSAs aired an estimated 20 times.
Att. A.21	Website Revisions	❍	After reviewing the current Watershed Protection website, Staff decided a major overhaul of the entire website was needed, above and beyond the revisions called for in the FY 05-06 work plan. ESD Staff have identified goals and objectives for the website, and are building the website around them. The overhaul started in FY 05-06, and will continue into FY 06-07.	Held a usability focus group of businesses to gather information for the Watershed Protection web content targeted at businesses. Results of that focus group used to build the page's site map and populate it with information.
PIP 1	New City Hall Grand Opening	❍	August 27, 2005 for Employees and October 12, 2005 for the public. Event to showcase the New San José City Hall.	Poster session included a "Clean & Green San José" display with trash management, pollution prevention, citizen participation, difference between storm and sanitary sewers, street sweeping, and other watershed messages. Approximately 1,500 people attended the Employee event. No data on the Public event.
Overall Evaluation of General Outreach Activities		❍	San Jose's General Outreach focused on community events and the City's website. Both were used to disseminate information to the public. Downloads from the City's website increased dramatically this fiscal year compared to last. The City continues to reach out to the general public at selected community events the Watershed Watch Campaign does not attend. These events are good venues to reach San Jose citizens, providing more extensive outreach to residents.	
IND 6	Storm Sewer Stenciling	◎: Commercial	City staff provided approximately 69 stencils to 28 developers and 11 private businesses for stenciling approximately 440 storm drain inlets. In addition, 178 English, 53 Spanish, 20 Vietnamese "No Dumping! Flows To Bay" stencils were distributed to commercial and industrial businesses.	Storm drain stencils are placed in locations that are highly visible to residents and customers of businesses. Including the neighborhood creek name gives residents and customers specific information about how their actions tie in to the local environment. Developers are required as a condition of the permitting process to stencil all storm drains inlets on a development. ESD inspectors give out "No Dumping! Flows To Bay" stencils to commercial, industrial businesses so that they can stencil storm drain inlets on their properties.
PIP 1 PIP 2.C M 2.B M 5.A	Curbside Courier web page and newsletter	◎: Residential	Web page and newsletter focused on solid waste issues. Newsletter mailed to city recycling customers. Fall 2005 issue's feature article was on proper disposal of universal waste. A sidebar article focused on street sweeping. Spring 2006	Courier published twice a year as a Recycle Plus utility bill insert. The Curbside Courier reaches approximately 185,000 single-family households. Additionally, the Curbside Courier was published online.

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 05-06 STATUS	EVALUATION
CB-11			issue's feature article was also on Universal Waste – new rules for disposal of toxic technologies. Included info on proper disposal of e-waste and u-waste.	
IND 6 CB-1.B. Att. A.2	Mobile Surface Cleaner Training Workshops	◎: Commercial	Training available upon request.	Training available upon request. Companies requesting training are first referred to BASMAA's online training, and offered live training if online version does not meet their needs.
PM 6.A. PM 6.F. M 2.B M 5.A PIP 1.A.1 PIP 2.C Att. A.6	Home and Garden Show	◎: Home owners	May 5-7, 2006. San José provided booth space. Booth staffed by SCVURPPP staff, co-permittees, and San José staff. Provided IPM and Household Hazardous Waste information.	Co-permittee staff thought the Home Show was a good place to present messages and materials. See Program Annual Report for details
PM 6.A. PM 6.F. PIP 1.A.1 PIP 2.C Att. A.6	Orchard Supply Hardware's How-to Fair	◎: Home owners	May 20-21, 2006. Booth focused on Our Water Our World outreach, and was staffed by SCVURPPP staff and co-permittees. Provided IPM and Household Hazardous Waste information.	Co-permittee staff thought the How-to Fair was a better venue than the Home and Garden Show for presenting messages and materials. See Program report for details.
IND 6.A. PM 6.A. M 5.B CB-3.D. PIP 1.A. Att. A.7	Industrial Users Academy	◎: Industrial	April 19-20, 2006. Two half-day training sessions for permitted industries in the San Jose/Santa Clara Water Pollution Control Plant tributary area. Stormwater issues discussed include: facility inspections, GIASP/NOI requirements, IPM, Mercury, Trash, and General NPDES information.	32 attendees . 25 submitted evaluations. 100% agreed or strongly agreed that the workshop was useful. 76% indicated an increase in knowledge of NOI requirements. 84% indicated an increase in knowledge of pollution prevention.
PIP 1.B.	Green Business Workshop	◎: Businesses	March 17, 2006. Workshop for existing and potential Green Businesses, talking about the Green Business program and pollution prevention BMPs.	65 attendees. *Preventing Storm Drain Pollution* and Green Business brochures distributed. Attendees responded positively to the information presented. The workshop received a small mention in the *San Jose Business Journal* published the week of 3/27/06.
IND 6 CB-1.B.1	Tributary Tribune	◎: Industrial	Newsletter published for permitted industrial dischargers in the Water Pollution Control Plant tributary area. The Winter 2005 Tribune contained an article on how surface cleaning affects the Bay, and strongly encouraged businesses to hire contractors that have taken the BASMAA surface cleaning training. That issue also featured a reminder for businesses to stencil their storm drains, with contact info on how to obtain free	The Tributary Tribune was distributed three times in FY 05-06. It goes to every permitted industrial discharger in the San Jose/Santa Clara Water Pollution Control Plant tributary area (approximately 330). FY 05-06's Tributary Tribune web pages generated 507 views, triple what they generated in FY 04-05.

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 05-06 STATUS	EVALUATION
			stencils.	
IND 6 ICID 4 CB-3.A	Roof Vent BMP for metal finishers and printed circuit board facilities	◎: Metal Finishers and PCB Manufacturers	Distributed Roof Vent BMP along with a contact letter informing select businesses that their roofs may also be inspected as part of their scheduled stormwater inspection.	Cover letter and roof vent BMP fact sheet sent to 115 facilities. Inspections of select facilities started in Spring 2005 and continued through December 2005. This program is evaluated in Section 10.B.: *CNAP Program Evaluation*.
PIP 2.A CB 11 TRA 6	The Guide to Garbage and Recycling in San José	◎: Residential	Booklet with recycling information for residents. Also included information on Electronic Waste, Universal Waste, Street Sweeping, leaking vehicles, Anti-Litter Program, and general Storm Drain Pollution Prevention tips.	Guide distributed to approximately 109,000 single-family and multi-family households. This represents one-third of the City's residential population. The second third will be mailed in December 2006, and the final third will be mailed in December 2007. The booklet is also available online for viewing and downloading.
CON 7.C. Att. A.8	Conduct outreach sessions to development community	◎: Developers	September 14, 2005. Department of Public Works & ESD staff conducted training on erosion and sediment control for private developers of type 2 projects.	11 private developers of type 2 projects attended. Four topics were covered: overview of City's Stormwater NPDES Permit, overview of erosion and sediment control requirements in the City, discussion of Lessons Learned, and the City's Watershed Enforcement Procedures were reviewed. 10 evaluation forms submitted. 9 rated training as good or excellent. and a worthwhile investment of time.
CON 7.C. Att. A.8	Conduct outreach sessions to development community	◎: Developers	May 3, 2006. Pre-construction meeting for Los Gatos Creek Trail Reach 4 Lincoln/Auzerais Project. Department of Public Works & ESD staff conducted training on erosion and sediment control for private developers	20 attendees from City staff, Santa Clara Valley Water District, CalTrans, PG&E, 3 developers, 1 consultant, 1 general contractor, and 6 subcontractors. Topics of note covered: Permitting, Construction Inspections, Stormwater Pollution Prevention. Distributed Construction BMPs.
CON 7.C. Att. A.8	Conduct outreach sessions to development community	◎: Developers	June 22, 2006. Pre-construction meeting for Greater Gardner St. Reconstruction – W. Virginia Street Project.	11 attendees. Distributed Construction BMPs.
CON 7.C. Att. A.8	Conduct outreach sessions to development community	◎: Developers	June 26, 2006. Pre-construction meeting for Union Avenue Project.	9 attendees. Distributed Construction BMPs.
CON 7.C. Att. A.8	Conduct outreach sessions to development community	◎: Developers	June 27, 2006. Pre-construction meeting for Holly Hills Drive Project.	6 attendees. Distributed Construction BMPs.
PM 6.A PM 6.D PIP 2.C Att. A.13	Create and provide fact sheets and materials to pesticide retailers to facilitate point-of-purchase outreach to support IPM Store Partnership Program	◎	There are nine stores in San José participating in the IPM store partnership. This work is done at the Program level. See the Program Annual Report for details.	This work is done at the Program level. See the Program Annual Report for details.
PM 6.A PM 6.D PIP 2.C	OWOW Fleas fact sheets at Animal Services Center	◎: Pet owners	Started in April 2006. The OWOW Fact sheet for Fleas, in both English and Spanish, is available in the Animal Services Center's literature racks.	Center estimates 300 pet adoptions per month.

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 05-06 STATUS	EVALUATION
			Additionally, a fact sheet is placed in every adoption package for pets adopted from the center.	
PIP 1 PIP 2.C Att. A.3	Drive In – Trash Out	◎: Students	April 20, 2006. Event sponsored by CalTrans' "Don't Trash California" campaign and San Jose City College. Volunteers cleaned out cars and educated drivers about the impacts of trash. In-car trash bags and 'Don't Trash California' air fresheners were given to participants.	52 cars came through the event, 123 students came to event booth, and 213 students cam to the booth on campus. San José provided brochures on the City's Anti-Litter Program and P2, emphasizing the impacts of trash on creeks. Mayor Gonzales came and helped clean cars out, and KTVU-TV came out and did a story on the event.
PM 6.A PM 6.B. M 5 PIP 1 PIP 2.C Att. A.2	Regional Media Relations	◎	Concepts pitched include: First rains/first flush, information on the draft TMDL released by the Water Board, Tips for seeking the services of a pest control operator, and the use of pesticides. Media Relations began the process of working with meteorologists to incorporate water pollution prevention messages into their broadcasts. Placements include media outlets that serve San Jose residents, including the San José Mercury News, the Associated Press, KRON-TV, KTVU-TV, KGO-TV, and other local-serving print, web and radio outlets.	Regional partnership and coordination of media relations allows cities to pool their messages and resources into one consistent effort. Overall, 37 articles and broadcast stories were covered by the media in FY 05-06, including 14 print articles, 6 television, 12 radio stories, and 5 web stories.. See Regional Media Relations Campaign Final Report for full details.
PIP 2.C PM 6.A. PM 6.B. PM 6.D Att. A.9 Att. A.13	Pesticide Article published in BOMA Byline Newsletter	◎: Facilities Managers	June 2006. The OWOW fact sheet *Finding a Company that can Help Prevent Pest Problems* was modified to address a commercial audience, and had it published in the *BOMA Byline* Newsletter. The article explains the link between pesticide application and water quality impacts and offers approaches that building owners and managers can use to effectively find and/or influence a company to use less-toxic chemical pest controls in their buildings through integrated pest management practices.	The Building Operators and Managers Association Silicon Valley chapter publishes the *BOMA Byline* monthly. The *BOMA Byline* serves the counties of Santa Clara, Santa Cruz, San Benito, Monterey and San Luis Obispo.
PIP 2.C M.5 Att. A.11	Mercury Outreach	◎	San José and Program staff assisted County with Mercury-related outreach for the County's Universal Waste grant activities. City staff also distributed the County's 2 mercury/universal waste brochures in City literature racks and at City events.	See Program Annual Report for details.
Att. A.5	Watershed Enforcement Program Brochure	◎: Commercial/ Industrial	Develop a new brochure explaining the purpose and goals of the City's Watershed Enforcement Program.	Late in the Fiscal Year the City's Watershed Enforcement Program projected changes to it's tasks and target businesses. Therefore this brochure was put on hold until all changes are implemented, so that it will better represent the WE Program.

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 05-06 STATUS	EVALUATION
Overall Evaluation of Targeted Outreach activities		◎	FY 05-06's targeted efforts focused on proper disposal of universal wastes, as well as IPM, construction-generated pollutants, trash, and general pollution prevention. At the local level San José has been able to successfully direct a variety of messages to a wide array of audiences through targeted events, training workshops, direct mailing, published articles, and collaborative efforts at the Regional level. Targeted outreach typically is more difficult to implement at the Program-wide level, primarily because of prioritization and staffing constraints. The Program's targeted outreach focus has been on readying the co-permittees' staff for implementation of post-construction stormwater treatment and hydromodification measures. For FOGs, San José added a grease trap/interceptor tracking log form to the restaurant package, and continued distribution of the package in 05-06. Targeted outreach supplements tasks done in other elements of the URMP, such as Illicit Connection/Illegal Dumping, the Industrial/Commercial Dischargers, Construction Inspection, Pesticide Management, Mercury, and the Copper and Nickel Action Plans.	
PIP 4.A.1.a Att. A.14	Coastal Clean-up Day	✋	September 17, 2005. Promoted event in the ESD newsletter and on the City web site.	808 volunteers at 26 sites. Over 16,000 pounds of trash and 3,000 pounds of recyclables removed. 13 out of 26 clean-up sites in San José. Volunteers surveyed after the event. See the Santa Clara Valley Water District's Annual Report for details.
PIP 1.B PIP 2.C PIP 4.A	Great American Pick Up	✋	April 8, 2006. ESD, PRNS, DOT, City Manager's Office, Mayor's Office, SJPD, City Attorney's Office planned & coordinated event in San José.	10 clean-up sites, 1 per Council District. 342 volunteers picked up 346 bags of litter. Poor weather leading up to the event limited participation.
PIP 4.A.1.b Att. A.15	National Rivers Clean-up Day	✋	May 20, 2006. Promoted event in the ESD newsletter and on the City web site.	682 volunteers at 28 sites. Over 15,000 pounds of trash and 1,400 pounds of recyclables removed. 17 out of 28 clean-up sites in the County in San José. Volunteers surveyed after the event. See the Santa Clara Valley Water District's Annual Report for details.
PIP 1.B PIP 4.A	National Bike to Work Day (BTWD)	✋	May 18, 2006. City hosted one "energizer station" with drinks, promotional items and information to give out to bikers.	An estimated 300 people rode by or stopped at the City's energizer station, an increase from last year's event., despite operating fewer energizer stations. Throughout Santa Clara County, nearly 6,000 bicyclists were counted at about 50 Energizer Stations, and only a portion of all bicyclists stop at Energizer Stations. The Countywide estimate for all bike commuters on BTWD is 15,000-20,000. Throughout the nine-county Bay Area, about 15,000 bicyclists were counted at 177 Energizer Stations, and an estimated 50,000 bicyclists rode that day. Both stormwater and air quality benefit from the reduced number of cars on the road. Encouraging people to use alternative modes of transportation highlights this benefit and encourages public participation.
PIP 4.A Att. A.10	Anti-Litter Program	✋	The purpose of the Anti-Litter Program (ALP) is to further beautify San José by preventing graffiti and litter through community involvement, eradication, and enforcement. ALP provides free clean-up supplies to volunteers, designates litter hot spots for adoption, does school outreach with	In FY 05-06, the ALP has 2,815 Pick Up San José volunteers on the rolls. As of June 2006, 136 of the 150 Litter Hot Spots have been adopted. 12 schools received "All-star Stan" presentations. Since it's inception in 2002, participants in the program have removed 30,548,830 pounds of litter.

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 05-06 STATUS	EVALUATION
			anti-litter messages, and hosts special clean-up events like the Great American Pick-up.	
PIP 4.A Att. A.10	Adopt-a-Park and Adopt-a-Trail		Adopt-A-Park is citywide volunteer program that recruits and trains residents to assist in the general care and maintenance of neighborhood trails, neighborhood/regional parks, and open spaces in San José.	226 of the City's 232 parks have been adopted by one or more groups. Adopt-a-Trail is a new program, and data is pending.
Overall Evaluation of Citizen Participation Outreach Activities			Citizen Participation activities are a potent method for getting residents out into the Watershed and engendering stewardship. The City participated in three Clean-up events, as well as a Bike to Work Day, designed to promote participation and stewardship in the citizens of San José. At the Coastal Clean-Up Day event one student volunteer at San Jose High commented that he didn't even realize there was a creek right behind the school. By the end of the event he expressed disgust at the amount of trash found on the banks and around access points. He was a repeat volunteer at the May clean-up, and commented on how there was less trash that time, but there was still trash. Tying Clean-up days to pre-existing events such as Coastal Clean-up Day and the Great American Pick-up is a good way to maximize promotion. Advertising paid for by regional entities is useful for raising awareness locally. The City's Urban Runoff Program continued working with the Anti-Litter Program in FY 05-06 to tie watershed objectives in with existing successful efforts.	
PIP 3.A.3 Att. A.20	Youth Watershed Education Grants (YWEG)		12 Grants awarded in FY 05-06 cycle. Seven schools and five non-profits received grants. A total of $40,422 was given in grants ranging from $800 to $5,000 each.	This year's cycle saw similar demand for funds and number of proposals as last FY's. In FY 05-06 the City hosted a kick-off training and networking meeting for all grantees to give them an opportunity to meet and share ideas and resources, to hear from a past grantee, and to receive guidance on reporting and evaluation. Grant Projects are ongoing, and will be evaluated at the end of the grant cycle.
PIP 1.C PIP 3.A Att. A.17	Wacky Watersheds Workshops		October 8, November 5 & 12, 2005, February 11, and March 14, 2006. Presented South Bay Water Connections curriculum to middle school educators within San Jose/Santa Clara Water Pollution Control Plant service area. The educators were also given a tour of the Don Edwards San Francisco Bay National Wildlife Refuge at all but the March workshop.	8 participants at October's workshop at Resource Area for Teachers (RAFT). 8 submitted evaluations. All rated the workshop's materials as good or excellent. 10 participants at November's 2-day workshop at UCSC Extension. 7 participants at February's workshop at the Alviso Ed Center for YWEG Grant recipients. 15 participants at March's workshop at the Children's Discovery Museum. 9 submitted evaluations, all rated the workshop's materials as Excellent or Good.
PIP 1.B PIP 1.C PIP 3.A.3 Att. A.18	Water Awareness Program		Presentations focusing on Pollution Prevention. *It's Wet It's Wild It's Water!* Curriculum distributed to teachers. See 14.D: *FY 05-06 San José School Outreach* for details.	548 people reached 224 students in targeted grades 5-7 reached. 4 survey forms returned. All rated the program as Excellent or Good.
PIP 1.B PIP 1.C	Slow the Flow		Grant to Don Edwards Alviso Environmental Education Center to host 9 different types of events: special events, interpretive programs,	This program reached an estimated 10,871 students and adults in the SJ/SC WPCP Tributary area in 05-06. This was accomplished through field trips, weekend programs, special

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 05-06 STATUS	EVALUATION
PIP 3.A.3 Att. A.19			teacher orientation, field trips, in-class presentations, outreach presentations, workshops, special visits and interpretive displays.	events, outreach events, and classroom presentations. Additionally, visitors can view the interpretive displays at the Environmental Education Center. From a presentation standpoint, the program continues to get very high evaluations from both teachers and students. Almost 40% of those attending are repeat customers. From a content standpoint between 93 and 100% of those questioned in exit exams recalled key messages of the presentations
PIP 1.B PIP 1.C PIP 3.A.3	NASA/Ames Jason Project Event		January 30 — February 4, 2006. Watershed protection and Urban Runoff messages were incorporated into the elaborate game that the Slow the Flow Coordinator presented at the week-long Jason Event at NASA Ames Research Center.	Over the week approximately 840 people participated in the game, which took students and parents through an elaborate maze of items which stand in the way of a clean South Bay Watershed.
PIP 3.A.3	YWEG Grantee Training		February 9, 2006. Grant cycle kick-off training and networking meeting for all the Grantees.	The City reinstated this session for grantees, to give them an opportunity to meet and share ideas and resources, to hear from a past grantee, and to learn and ask questions about reporting and evaluating. Grantees anecdotally said the meeting was well worth their time.
PIP 1.B PIP 1.C PIP 3.A.3	Briarwood Elementary School Science Fair		March 14, 2006. Watershed protection and Urban Runoff messages were incorporated into the discussion by the Slow the Flow Coordinator at this school event	Approximately 150 parents and students visited the booth.
PIP 1.B PIP 1.C PIP 3.A.	Water Wizard Festival		May 26, 2006. Water education festival for 3rd graders. The purpose of the festival was to increase the awareness of the importance of water and promote stewardship of water as a resource. ESD taught 3 activities related to the City's mission concerning water and watershed issues. The messages taught were: Pollution Prevention Difference between Storm and Sanitary Sewer Systems Value of Recycled Water Value of the Treatment Plant Importance of Soil & the Value of composting	300 students from 3 San José public schools. Pre- and post-testing of each student showed knowledge increases in all areas: Up 17% in knowing that the water we use at home affects our rivers. Up 7% in knowing Polluted water is not good to drink. Up 2% in knowing all living things need water. Up 39% in knowing that we live in a watershed.

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 05-06 STATUS	EVALUATION
Overall Evaluation of Education Outreach Activities			Education continues to be a vital component of San Jose's pollution prevention plan. The City actively contributes to education both as a City and through the Program. San José commits significant resources to youth education with the goal of instilling a sense of stewardship for the environment. San José employs both in-class education and train-the-trainer approaches to Outreach. In-class presentations are more expensive per student reached, but lend themselves better to evaluation. Train-the-trainer has the potential to reach many more students, but it is extremely difficult to measure the effectiveness of this potential. Youth Watershed Education Grants provide funding for groups and educators to implement their own programs that accomplish the City's education goals. The City's Youth Watershed Education Team conducted a thorough analysis and evaluation of education activities undertaken by the City. This analysis was intended to identify strengths and weaknesses in individual activities, analyze coverage, and identify areas for improvement and focused efforts. The results of this analysis will be applied to FY 06-07	

FY 05-06 San José School Outreach

Program & Description	Contractor	Type of Program	Target Grade	Location	School Name	School Location	# events held	# students reached	Evaluation Included?

15. Permit Reapplication

15.A Permit Reapplication Preparation Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 05-06 STATUS	RESPONSIBLE PARTY
PRP A.	Compile all changes to URMP as part of reapplication for next permit (C.2.b)	Done FY 04-05	Done FY 04-05.	ESD
PRP B.	Participate in permit development and negotiation processes.	Beginning 02/01/05	Done FY 05-06 and ongoing. San Jose staff have participated and will continue to participate in the MRP process through the Program, BASMAA, and individually as a City.	ESD

15.B Permit Reapplication Preparation Evaluation

The City's current NPDES permit was adopted in February 2001 for a five-year period. The permit was amended in October 2001 and July 2005, with both amendments relating to the New and Redevelopment stormwater treatment and hydromodification provision, also known as Provision C.3. The permit has been administratively extended since February 2006, pending the adoption of the Bay Area-wide Municipal Regional Permit.

In late 2005, the Water Board embarked on a multi-stakeholder process to craft an NPDES permit, called the Municipal Regional Permit (MRP) that would apply to all municipal stormwater dischargers in the Bay Area. In the past, NPDES permits were issued separately to Bay Area stormwater programs with staggered adoption dates, which often resulted in uneven and inequitable requirements.

City staff has dedicated numerous hours to participate in work groups convened to help develop performance standards for the Inspection and Outreach components of the new permit. Staff has also participated in the steering and stakeholder meetings convened by Water Board staff. City staff will continue to participate in the MRP process through the Program, BASMAA, and individually as a City. The Water Board is expected to adopt the MRP in 2007.

15.C Permit Reapplication Preparation Response to Water Board Comments

No comments received from Water Board on this Program Element.

September 15, 2006

Mr. Bruce H. Wolfe, Executive Officer
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay Street, Suite 1400
Oakland, CA 94612

Subject: City of Santa Clara Urban Runoff Management Program
FY 2005–2006 Annual Report

Dear Mr. Wolfe:

This report is submitted by City of Santa Clara in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2004-2005 in accordance with the City of Santa Clara's Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 1997 and updated in January 2004, and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 04-05 Work Plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

- Certification Statement
- IC/ID Elimination Activities
- Industrial/Commercial Discharger Control Program
- Public Agency Activities
    - Public Streets, Roads and Highways O&M (including Corporation Yards)
    - Rural Public Works O&M
    - Storm Drain O&M
    - Water Utility O&M
- New Development Planning Procedures
- Construction Inspection
- Public Information and Participation
- Pesticide Management Activities
- Mercury Pollution Prevention Activities
- Copper Action Plan/Nickel Action Plan
- Trash Inventory and Management
- Staff Training Summary Table
- Performance Standard Certification Statement

www.ci.santa-clara.ca.us

Program Highlights and Accomplishments

The City of Santa Clara has been active in the Program elements and very active at the Co-permittee element level. IC/ID activity reported 237 incidents, up from 175 last year. IND/COM inspections totaled 249. Construction inspections totaled 986 (37 SWPPP inspections and 915 windshield inspections). In comparison, FY 04-05 construction inspections totaled 482 (27 SWPPP inspections and 455 windshield inspections). There were 71 construction element violations as compared to 47 violations from the previous fiscal year. The increase in violations is contributed to the larger number of windshield inspections conducted and the increasing in construction permits issued. Public Agency activity, IPM, Mercury/Copper and Trash elements have been steady and consistent.

Analyzing / detection of trends at the Co-permittee level continues to improve with each Annual Report. The City is alert to the various reporting information that is collected and has developed a history of adapting its resources to minimize storm water pollution.

The City continues to retain EOA Inc. to assist with the planning and implementation of the C.3. Provisions. The assistance provided by EOA has been valuable in supporting staff on site specific C.3. Provision questions.

Continuous Improvement Activities

The City of Santa Clara takes pride in our Urban Runoff Management Program and the quality of storm water. In the IC/ID element it was identified, as in past years, that concrete contractors are the primary violators. To address this continuing problem, the City has not only continued its focus on the industry, but has increased education efforts to the residents hiring these contractors. The IND/COM element continues to be dynamic in identifying industries with reoccurring violations. To this end, the City has identified, as in past years, automotive and food service facilities. The City's goal is to reduce storm water pollution to the maximum extent practicable through education, targeted inspection on identified hot spots and if necessary, through vigorous enforcement of our Storm Drain Ordinances.

The City has assumed an aggressive stance with repeat violation facilities by issuing Pre-Citation / Administrative Citations instead of repetitive violation notices. Violation notices and citations, as are warranted by the situation, continue to be implemented in increasing numbers as the City of Santa Clara establishes a database of repeat offenders.

Thank you for your review of this FY 05-06 Annual Report. As noted in your comments of our FY 04-05 Annual Report, please find definitions of acronyms not commonly used by the program at the bottom of each respective sheet. If you have any questions regarding the materials submitted, please contact Rick Mauck at 408-615-2099.

Very truly yours,

Richard J. Mauck
Director of Streets and Automotive Services

FY 05-06 Annual Report

IC/ID Elimination Activities

CITY OF SANTA CLARA
FY 2005-06ANNUAL REPORT
ICID ELIMINATION ACTIVITIES

1. **What type of incident causes the most problem?**

   The type of incident that causes the most compliance issues are cement related washouts from smaller concrete and masonry contractors. Cement related incidents totaled 107 out of 237 (refer to page 4 "breakdown of top six violators for level of enforcement action"). Enforcement actions and BMPs are continuously distributed to cement related contractors due to the high rate of violations. The potential reason for this problem is unlicensed contractors and the belief that these individuals do not stress to their employees storm water protection.

2. **Is a particular location or source a large part of the problem?**

   The locations where most of these types of incidents occurred were in residential neighborhoods. Residential cement related incidents total 101 out of 237 total incidents (see attached chart titled "ICID Elimination Activities Violation Percentage").

3. **Might it be getting better or worse?**

   The total number of incidents for FY 2005-06 is more than FY 2004-05 (107 as compared to 60).

4. **What might be the causes?**

   The cause is BMP information not being received from smaller cement related businesses. The cement related businesses, given their transient nature, are either not receiving the outreach or are not passing the information on to all their employees. Unlicensed contractors are further compounding the issue because the permit process is often not completed, circumventing the distribution of BMP material.

5. **What, if anything, will you do differently next year?**

   In FY 2005-06, the City featured an article in the City newspaper (mailed to all residents and businesses quarterly) concerning cement in storm drains. The article was designed to educate our residents who hire cement related contractors. In this current year, the article

will be featured on our City website. It is unlikely that the additional effort, over what is already occurring, will better educate all cement related contractors. In spite of storm drain inlets having the "NO Dumping" stencils, and through word-of-mouth not to dump into storm drains, the best solution is to continue to educate our residents.

"…the best solution is to educate our residents"

City of Santa Clara

FY 05-06 Annual Report

Industrial/Commercial Discharger Control Program

CITY OF SANTA CLARA
FY 2005-06 ANNUAL REPORT
INDUSTRIAL/COMMERCIAL DISCHARGE CONTROL PROGRAM

The City of Santa Clara's Industrial/Commercial Discharge element has become well-established and efficient in monitoring and enforcing the businesses of concern within the City. The City's NPS Inspector has over five years experience working with the many elements of the City's storm water pollution prevention program. Continuity in this position has provided greater efficiency, better communication within other departments and the insight to identify trends over time.

During the FY 2005-06, the City's NPS Inspector conducted a total of two hundred forty nine IND/COM mandatory and non-mandatory inspections (see attached chart titled "FY 05/06 IND/COM Number of Inspections by Category") as compared to two hundred fifty one for FY 04-05. Eighty mandated inspections including re-inspections were conducted for FY 2005-06. Mandated inspection facilities are typically inspected bi-annually or sooner as determined by SIC code or previous compliance issues. Non-mandated inspections required in the FY 05-06 Work Plan vary from year to year. For example, in the FY 2003 Work Plan there were ten facility categories inspected resulting in two hundred two mandated and non-mandated inspections. In the FY 05-06 Work Plan there were ten facility categories inspected with two hundred fifty one inspections. The inspections conducted at these facilities resulted in a total number of violations detailed in the following graph. Note that the total number of inspections includes both initial inspections and re-inspections as necessary to confirm compliance.

"Mandated inspection facilities are typically inspected bi-annually or sooner as determined by SIC code or previous compliance issues."

FY 05-06 IND/COM
MANDATED AND NON-MANDATED OCCURING VIOLATIONS AS COMPARED TO NO VIOLATIONS

Note: A non-mandatory inspection is an inspection that occurs at a facility type designated in the current work plan. A mandatory inspection is the result of a pre-determined inspection frequency based upon SIC code.

A total of ninety-two violations were found in FY 05-06. Fifty-one of those violations were found during mandatory inspections and forty-one violations during non-mandatory inspections.

All IND/COM violations in the City of Santa Clara received follow up inspections and were corrected timely as dictated by conditions. All IND/COM inspections conducted in the City are documented on a Non-Point Source IND/COM inspection sheet and kept on file.

When violations are found as a result of our numerous inspections, proper BMPs are distributed and a follow up inspection is conducted. When a violation is minor, a letter stating that corrective action has been completed from the facility contact person with supporting dated pictures is an acceptable means of compliance.

Refer to the below table for detail of the type of violations found for each respective category.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM FY 2005-06 ANNUAL REPORT

FY 2005-06

STATUS OF INSPECTIONS AND VIOLATIONS BY FACILITY CATEGORY (Includes Re-Inspections)

Mandatory Inspections

Category	Description	Status/Common Violations Found	# of Inspections	# of Violations
1	**Automotive Facilities:**	Inspect FY 06-07.	0	0
3	**Paint Facilities (water treatment) :** see non-mandatory		1	0
4	**Dry Cleaners:**	Inspected FY 02-03.	0	0
5	**Cleaning Services:**	Inspect in future workplans if warranted.	0	0
6	**Pesticide Facilities:**	None within City.	0	0
7	**Machine Shops:**	No violations.	1	0
8	**Metal Manufacturing:**	Improper waste oil storage and improper storm drain inlet protection.	26	18
9	**Electric/ Components:**	Expired storm water permit, improper wastewater disposal, and improper waste oil storage.	21	15
10	**Construction/Building:**	No construction/building facilities were inspected this year.	0	0
11	**Local Transit:**	Wastewater improperly disposed of, waste oil storage, and poor housekeeping .	9	6
12	**Recycling Yards:**	Poor housekeeping/ SWPPP update.	3	1
13	**Auto Dismantlers:**	Improper waste oil/battery storage, poor housekeeping, and improper parts storage.	7	3
14	**Concrete Products:**	Improper material storage.	4	1
15	**Industrial Corp. Yards:**	No industrial corp. yards were inspected this year.	0	0
16	**Landfills:**	No active landfills in the City.	0	0
17	**Other:**	Poor housekeeping.	10	7
Non Mandatory Inspections				
3	**Paint Facilities:**	Improper Hazardous waste and paint storage.	14	6
2	**Food Facilities:**	Tallow bin dumpster area condition/ improper wash water disposal/ oven. roof vent leaking food grease onto roof	155	35
		Total	**251**	**92**

(specifically dismantlers), and food service facility categories had the highest number of violations and repetitive violations. There are five automotive dismantlers in the City. In FY 2004-05, this facility type received a violation upon each inspection. The automotive facility category has been an ongoing enforcement problem, prompting the City to increase enforcement on repeat violators by increasing/accelerated enforcement actions which has resulted in a substantial drop in violations in FY 2005-06 for a total of seven inspections with only three violations. There are over four hundred fifty food service facilities in the City. Employee turn-over and the resulting loss in stormwater pollution control education has caused this facility category to have a higher than desired violation to inspection ratio in previous fiscal years. For the food service category, the City is issuing pre-citation notices or administrative citations to facilities immediately rather than issuing repetitive violation notices. This has dropped the violation percentage from 38% to 23%, a 15% drop from FY 2004-05.

This year and prior year inspection/violation data has shown that the majority of facilities with reoccurring violations continue poor storm water practices despite prior education. For these facilities, warnings are not effective and as a result pre-citations and administrative citations have been increasingly used. Pre-citation and administrative citations demand their attention and in many cases result in monetary damages. Through the issuance of pre-citations and administrative citations, NPS inspectors have had prompt violation correction and less reoccurring violations as compared to FY 2004-05.

The City will continue to target facilities in our yearly workplan that have the highest rate of violations.

“The City will continue to target facilities in our yearly workplan that have the highest rate of violations”

I/CD 6	Effectiveness Evaluation	2004 URMP 2005-06 Workplan	Compare for significance I/CD data collected by facility/type/location/time to determine trends/outreach needed, etc.	This has been an active analysis ongoing for several years. In 2005/06 this element focused discretionary inspections on restaurants and auto dismantling facilities. For auto dismantlers 7 inspections yielded 3 violations. For restaurants 155 inspections yielded 35 violations. Initially auto repair facilities, not auto dismantling facilities were the focus. Due to the high incidence of violation in the dismantling facilities and recent prior year inspections of auto repair facilities, it was decided to continue inspection efforts on dismantlers. In addition to these focused inspections, paint facilities were also included due to their potential. For paint facilities, 14 inspections were completed with 6 violations.	Ongoing	Street Dept.

PUBLIC AGENCY ACTIVITIES

Corporation Yard Inspections

The Storm Water Pollution Prevention Plans (SWPPP) have been complete for the various Corporation Yards throughout the City (Street, Electric, Water/Sewer and Parks). To confirm compliance with the SWPPP, Storm Water Inspectors inspect the various Corporation Yards twice a year.

Central Park

On January 10th, 11th, and 12th an illegal discharge occurred at Central Park (Keily Boulevard and Benton Street). The nature of the discharge was pond effluent with high levels of BOD into Saratoga Creek. The details of the discharge were outlined in a transmittal to Mr. Dale Bowyer on January 20, 2006. Per the action items noted in the transmittal, Parks Department staff attended a focused training event on March 22, 2006. There currently is a capital improvement budget to improve the Central Park pond. Since the dates of the incident there have been no further discharges and BMP's with training have been completed/documented.

	General Activity	2005-06 Workplan	Review SWPPP's at City Yards (Electric, Water/Sewer, Parks and Streets) and update to conform with 2004 URMP as necessary. Review practices at fire stations to ensure BMP's/SOP's are being uniformly followed.	Installation of storm drain check-valves at Fire Station #2 and at the Santa Clara Convention Center storm drains are scheduled to occur in the summer of 2006. With the addition of several elements to the URMP, it is appropriate to look at the completeness of Corporation Yard URMP's. This review/update is approximately 75% complete.	Complete	

City of Santa Clara

FY 05-06 Annual Report

Rural Public Works Operation and Maintenance

CITY OF SANTA CLARA
FY 2005-06 ANNUAL REPORT
PUBLIC AGENCY ACTIVITIES

Rural Public Works Operation and Maintenance

Rural roads within the City are the responsibility of the Parks Department. One exception is the creek trails that have been/are being constructed along San Tomas-Aquino Creek. Reach 1 (Hwy 237 to Agnew) was completed in early 2004 and Reach 2 (Agnew to Scott Blvd.) was completed in early 2006. Reach 3 (Scott Boulevard to Monroe Street) is currently in design. These improvements, as they are completed, are/will be maintained by the Street Department.

In this Annual Report, seven (7) Performance Standards (RPWM 1 – RPWM 7) were evaluated. The City, for FY 05-06, finished construction on approximately 1.5 miles of new rural roads along San Tomas Aquino Creek. For other locations, two new City parks were constructed and completed in early 2006. These new parks have minimal hardscape (access sidewalks only).

As with other elements, City staff is knowledgeable of applicable BMP's and are educated on Storm Water Pollution Prevention BMP's as needed. For current and future contracted projects, BMP's are contractual required and enforced by on-site inspectors and/or Storm Water Inspectors.

General Comment: The City has a total park area of 187.5 acres, 39,375 linear feet of 8-foot wide trails, 21,600 linear feet of 12-foot wide golf trails, nearly 3 miles of paved creek trails and 1.25 acres of concrete lined ponds/fountains.

City of Santa Clara

FY 05-06 Annual Report

Public Streets, Roads, and Highways Operation and Maintenance

CITY OF SANTA CLARA
FY 2005-06 ANNUAL REPORT
PUBLIC AGENCY ACTIVITIES

Public Streets, Roads & Highways Operation and Maintenance

The Street Department is responsible for the maintenance of approximately 240 miles of streets within the City of Santa Clara. It should be noted that the following streets are not within the jurisdiction of the City:

- Central Expressway (County)
- Lawrence Expressway (County)
- San Tomas Expressway (County)
- El Camino Real (State)

In addition, some boundary streets are shared with other jurisdictions – most notably Stevens Creek Boulevard (primarily with San Jose). BMP's observed include, but are not limited to, protection of storm drain inlets, collection of sawcut slurry and routine sweeping of City streets. Contractors completing work within the City streets are contractually required to follow BMP's. Street Department staff is trained to report poor contractor activity to the Non Point Source Fire Inspectors and/or the Storm Drain Foreperson.

BMP effectiveness has been good mainly due to a constant City presence and contractual responsibilities. Staff and City contractors are well educated on BMP use. The City policy on residential street sweeping is bi-weekly guaranteed (typically done every week), industrial/commercial sweeping is done every 11-12 days. This is not a change over previous years activities.

For fiscal year 2005-06, there were 15 verbal warnings and 39 written warnings and/or citations given to contractors working for the City on public streets.

Sweeping

The City of Santa Clara employs (3) full-time Street Sweeper Operators to sweep all of its streets, which consist of 367 residential route miles and 181 industrial route miles. The City utilizes three Schwarze A7000 regenerative air sweepers as its front-line sweepers. A Schwarze A4000 regenerative air sweeper and a Johnston suction sweeper serve as back-ups. The regenerative sweepers are very effective at collecting fine sediments.

"The regenerative sweepers are very effective at collecting fine sediments."

Residential streets are scheduled to be swept the day following the assigned garbage/recycling collection day. Residential streets are swept on a weekly basis about 70% of the time. The City guarantees bi-weekly residential street sweeping. Residential streets were swept on a bi-weekly basis 100% of the time in FY 2005-06. The City relies upon voluntary cooperation from residents to remove their vehicles from the street on their assigned street sweeping day. There are some areas in the City that are often parked in and cannot be swept. The Street Department posts temporary "No Parking" signs in these areas a few times a year to efficiently clean the gutterline.

The City has twenty-four (24) industrial routes that are swept on a continuous basis. Each Street Sweeper Operator is responsible for eight (8) routes. Each operator completes one industrial route, prior to sweeping the assigned residential route for the day. Industrial routes are typically swept twice per month. In total, 28,023 miles of sweeping occurred in fiscal year 2005-06 as compared to 27,202 miles in fiscal year 2004-05 and 8,830 yards of debris was collected. This included both residential and industrial sweeping. The industrial sweeping route map is attached for reference.

"In total, 28,023 miles of sweeping occurred…"

The City, beginning in fiscal year 2003-04, no longer hires contractors to perform street sweeping services during leaf season or to cover employee-scheduled absence due to budgetary constraints.

Leaf Collection

Typically, November marks the beginning of the Leaf Collection Program. For this program, the City utilizes two leaf vacuums (10 yard boxes) that are manned by a 2-man crew covering 10 routes. This program typically, depending on weather, operates for 2 months and is done in conjunction to the normal street sweeping operation. For fiscal year 2005-06, this program collected 2,893 cubic yards as compared to 2,183 cubic yards in fiscal year 2004-05. Ground crews manually rake leaves around obstacles, allowing the leaf vacuums easier access to the leaves. Litter is generally removed prior to vacuuming. Leaves collected are treated as green waste at the landfill.

Residents also deposit leaves in their green waste container. It is not possible to distinguish between the types of green waste collected (branches, lawn clippings and leaves). For reference, 10,816 tons of green waste was picked up in fiscal year 2005-06.

City of Santa Clara

FY 05-06 Annual Report

Storm Drain Operation and Maintenance

CITY OF SANTA CLARA
FY 2005-06 ANNUAL REPORT
PUBLIC AGENCY ACTIVITIES

Storm Drain System Operation and Maintenance:

1. Which BMP's were evaluated formally or informally this year?

- BMP's for Storm Drain System Operation and Maintenance have become well established and are routinely used by the Storm Drain Division. Most efforts of the Storm Drain Division are focused on line/inlet cleaning and support of any clean-up efforts required of IC/ID and construction events. Placing of "No Dumping – Flows To Bay" identification markers are part of the Storm Drain Division responsibilities. For greater effectiveness, placards are enameled metal. This Division also is first response support for hazardous materials spills. For these efforts, BMP's to isolate the event may be unique for each situation. All Storm Drain Divison personnel are trained in confined space to implement BMP's as required.

2. Does your process for tracking hot spots appear to be working?

- Yes, Storm Drain personnel carry plat books that map out the entire City of Santa Clara's storm drainage system. Hot spots are indicated on these maps, periodically monitored and coordinated with the Fire Department (Hazardous Materials Unit) as events occur.

3. What were your major hot spots during the fiscal year, and how has that changed from previous years?

- The City's major hot spots were locations that received significant localized flooding during major storm events. Maintenance crews are well trained to respond and maintain those locations. Even with a relatively wet winter season, there were few areas of localized flooding for FY 2005-06.

4. What evidence do you have that contractors are/aren't fully implementing BMP's?

- Storm drain inlets and catch basins are cleaned twice yearly. Debris collected from those structures indicates the type of activity causing the build-up. As indicated in the IC/ID element, cement contractors continue to be the major contractor causing violation. Overall, contractor violation events are recognized and cleaned up before entering the Storm Drain System. In instances where this is not the case, all efforts are made to track the debris back to the violator for enforcement action.

5. Which agencies and/or staff are receiving training and which are not?

- The City's Street Maintenance and Storm Drain Maintenance Divisions are trained on maintenance of the storm drain system and any illegal dumping into the storm drain. Please refer to the staff training summary table at the back of this report. City Utility Departments (Water, Sewer & Electric) have also been trained that only rainwater is to go down the drain. When substances other than rainwater is observed, these departments are outstanding in reporting the event to the Storm Water Division.

6. What feedback has staff given about the effectiveness of BMP's?

- The implementation of BMP's has become standard operating procedure. Current efforts have been to increase effectiveness/ease of use for the BMP's. It has been noted that the most effective BMP's start at the source. Inspectors focus on these BMP's first and look at downstream BMP's as secondary protection – not as a substitution of a BMP upstream.

SDOM 7	New Device Testing	2004 URMP	Montior project (Pump Station / Outfall) where an interceptor device would be practicable.	A Vactor Clean Out Station has been constructed at Highway 237 and Lafayette Street. The site has storm and sanitary clean out facilities. Each facility utilizes a sand/gravel media prior to a sedimentation tank for dewatering the debris bunker. This facility continues to work very well.	Complete	Street Dept.

City of Santa Clara

FY 05-06 Annual Report

Water Utility Operation and Maintenance

CITY OF SANTA CLARA
FY 2005-06 ANNUAL REPORT
PUBLIC AGENCY ACTIVITIES

Water Utility Operation and Maintenance

The Water/Sewer Department is responsible for maintenance of City's water distribution system. Key O&M activities, potentially affecting storm water quality, include line flushing, hydrant exercising and water meter testing. These scheduled activities have all discharges tested and treated (if needed) prior to release. Contractors working for the Water Department are contractually required to follow BMP's. Water Department staff report poor contractor activity to the Non Point Source Inspectors and/or the Storm Drain Foreperson.

The effectiveness of the Water Department in minimizing storm water pollution is good. Required staff have been trained in testing/treating of planned discharges. Only emergency/unscheduled discharges go without treatment. For these events, the storm drains are protected as quickly as possible and the discharge stopped.

City of Santa Clara

FY 05-06 Annual Report

New Development Planning Procedures

City of Santa Clara
FY 2005-2006 Annual Report
NEW DEVELOPMENT PLANNING PROCEDURES

1. Self-Evaluation Matrix (based on C.3. FY 05-06 Work Plan) -- enclosed

2. NDC Summary Tables – Significant Development (Group 1 and Group 2) Projects Approved During July 1, 2005 through June 30, 2006 -- enclosed

3. Response to Water Board Comments on the New Development Section of the FY 04-05 Annual Report:

Water Board Comment #1:
Please ensure that the pages are numbered sequentially in next year's Annual Report.

Response:
Completed.

Water Board Comment #2:
Please submit a list [of acronyms] for inclusion in the Annual Report.

Response:
Acronyms not regularly used by SCVURPPP are noted on each page of the City's FY 05-06 Annual Report as they may occur.

Water Board Comment #3:
Please revise [the Significant Development Projects Table] to include the "application deemed complete" date under "Project Status" column for each project.

Response:
Completed. The FY 04-05 Development Projects Table is resubmitted with this Annual Report.

Responses to Regional Board comments on specific projects:

- 5301 Stevens Creek Boulevard (Agilent Technologies) – **Please include in FY 05-06 Annual Report and ensure numeric sizing criteria are included as well.** Completed and included in FY 05-06 Significant Development Projects Table.
- 735 Franklin Street (Santa Clara University Offsite Parking Facilities) – **Please include numeric sizing criteria.** Completed and included in resubmitted FY 04-05 Significant Development Projects Table.
- 3600 Pruneridge Avenue (Diamond Properties) – **Please include numeric sizing criteria**. Completed and included in resubmitted FY 04-05 Significant Development Projects Table.

4. NDC Summary Table – Significant Development (Group 1) Projects Approved During July 1, 2004 through June 30, 2005 – resubmitted in response to Water Board comments.

5. Evaluation of This Element

The focus of effort in this element of the City's urban runoff program during FY 05-06 included continued implementation of the C.3. provisions for Group 1 projects, voluntary implementation for residential Group 2 projects, and completion of a program for tracking and inspecting BMP operation and maintenance (O&M).

There were 4 Group 1 projects and 2 Group 2 projects approved this year (all Group 2 projects were residential, so compliance with C.3. treatment requirements was voluntary). Description of the site design, source control and treatment control requirements for these projects are provided in the enclosed NDC Summary Tables. Review of these projects provided an opportunity to test and fine tune the changes to the development review process for C.3. The City also required site design measures (e.g., parking lot, driveway, and roof drainage routed to landscaping) at other sites that were below the Group 2 size threshold.

The City of Santa Clara is well prepared to implement C.3. site design, source control, and treatment requirements for Group 1 and 2 projects. Staff have implemented changes to the development application review process, and have incorporated these changes into the Standard Operating Procedures of the Planning Procedures Performance Standard in the City's URMP. A number of tools and forms have been developed to assist City staff with C.3. implementation.

On April 27, 2005, the City participated in an MS4 Program Evaluation conducted by Tetra Tech and Water Board staff that focused on implementation of the C.3. provisions and other program elements. For the New Development Program Element, there were no potential permit violations or major program deficiencies noted. The City was commended for:

1) Developing detailed guidance for developers and plan reviewers to implement the C.3. provisions;
2) Encouraging developers to consider alternatives to traditional stormwater management, such as low-impact development practices and reduction in impervious surfaces.

Recommendations included:

3) The City should develop a protocol to ensure that landscaped BMPs are being built and maintained as designed (**this is being incorporated into the BMP O&M verification inspection program**);
4) To ensure that the C.3 requirements are being applied consistently, the City should ensure that the C.3. guidance materials, especially the checklist designed for use by city planners when reviewing submissions, are used for each project **(this is being done.)**

More detailed information about the City's accomplishments on C.3.-related tasks during FY 05-06 are provided in the Self-Evaluation Matrix.

FY 2005-06 ANNUAL REPORT

NEW DEVELOPMENT PLANNING PROCEDURES						
P.S. I.D.	**Activity**	**C.3. Work Plan Task**	**FY 2005-06 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
PPPS 5.	Group 2 Projects	c.9.	Prepare to require proponents of Group 2 projects to design and implement stormwater treatment BMPs to reduce stormwater pollution to the maximum extent practicable.	**Completed –** In July 2005, the Water Board adopted Order R2-2005-0035 that amended Provision C.3.c. to require implementation of Group 2A projects by October 20, 2005 and Group 2B projects by August 15, 2006. City staff began applying interim requirements for Group 2 projects in April, 2005 (the original implementation date) and began applying full requirements on Oct. 20. There were no Group 2A projects approved in FY 05-06; however, several Group 2B (residential) projects were approved with voluntary stormwater treatment measures (see Significant Development Project Summary Tables for FY 05-06.)	Group 2A: 10/05; Group 2B: 8/06	Planning Dept.
PPPS 8.c.	BMP O&M Agreement Mechanism	e.3	Adapt model O&M agreement language to meet agency-specific needs and requirements and incorporate into the project review and approval process.	**Completed** – City staff developed a Stormwater Treatment Measures Inspection and Maintenance Agreement form, including an Annual Inspection Report form to be used by the property owner, and completed legal review of the documents.	Completed Draft 6/05; Final 8/05	Planning and Street Depts.

FY 2005-06 ANNUAL REPORT

NEW DEVELOPMENT PLANNING PROCEDURES						
P.S. I.D.	**Activity**	**C.3. Work Plan Task**	**FY 2005-06 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
PPPS 8.b.	BMP Inspection Program	e.5	Develop local programs for inspection of a subset of prioritized treatment BMPs to verify that proper O&M is being performed by the responsible party.	**Completed** – City staff have integrated information about BMPs into their current data management approach for tracking development applications (i.e., the City's electronic permit system called Tidemark). Group 1 and Group 2 projects are tracked, as well as projects where incorporation of BMPs is voluntary. The City developed a process by which the BMP information is extracted and provided to the Street Dept. for the inspection program. Construction was recently completed at the first two Group 1 projects in the City, and inspections of BMPs at those projects will begin in FY 06-07. In the initial years of the O&M verification program, all BMPs will be inspected; later a priority system will be developed to adjust the number of inspections to fit available resources.	Completed 6/05	Planning and Street Dept.

NEW DEVELOPMENT PLANNING PROCEDURES						
P.S. I.D.	**Activity**	**C.3. Work Plan Task**	**FY 2005-06 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
PPPS 8.	BMP O&M Reporting	e.6.	Report on the City's treatment BMPs O&M verification program in each annual report, including organizational structure, evaluation of effectiveness, and planned improvement to the program. Include a list or summary of treatment BMPs inspected during the year, inspection results, and any required follow-up and correction.	**In Progress –** From the beginning of C.3. implementation through FY 05-06, no Group 1 projects completed construction, so there were no BMPs that needed inspection in FY 05-06. Organizational structure: 1) Planning Dept. enters BMP information into City's Tidemark permit system. 2) Building Dept. conducts site inspections and verifies data in Tidemark. 3) Building Dept. generates a list from Tidemark of installed BMPs and addresses, and provides list to Street Dept. 4) Street Dept. will conduct BMP O&M inspections and collect and review property owners' inspection reports. (Street Dept. also conducts construction site inspections and has enforcement authority.) It is too early to summarize inspection results, evaluate effectiveness, or plan improvements.	Annually	Street Dept.

PPPS 5.d.	HMP	f.2.	Review HMP report and Program guidance to the Co-permittees on implementation of the HMP as part of requirements for Group 1 projects that may cause increased erosion or other related impacts.	**Completed –** The final HMP Report was completed in April 2005 and contains an implementation chapter. HMP requirements were explained at City staff meetings. A City-specific map was prepared showing HMP applicability, and only a small section of the City will be subject to HMP.	FY 05-06	Planning and Street Dept.
PPPS 5.d.	HMP	f.3.	Upon adoption by the Regional Board, begin implementation of HMP requirements for Group 1 projects that may cause increased erosion or other related impacts. Before adoption, encourage early implementation of likely elements of the HMP where possible.	**In Progress –** Key provisions of the SCVURPPP HMP Report were adopted on July 20, 2005 (Order R2-2005-0035). The Order requires implementation of HMP requirements by October 20, 2005. HMP requirements for Group 1 projects will be applied, as appropriate, for City of Santa Clara situations (there were no projects subject to HMP requirements in FY 05-06). City is also encouraging site design and treatment measures that provide flow control.	FY 05-06	Planning and Street Dept.

City of Santa Clara - NDC Summary Tables / Additional Information– Mandatory C.3 Projects

Significant Development Projects[1] Reviewed and/or Approved During July 1, 2005 – June 30, 2006

Project File Number	Project Description	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Complete/ Approval)
PLN2004-04317	5301 Stevens Creek Boulevard – Agilent Technologies Development Agreement and Rezoning for Campus Master Plan involving the addition of 560,000 square feet of office/R&D space to an existing 835,000 square feet of office/R&D/manufacturing space.	Commercial/ Industrial	55.0 acres	19.2 acres redeveloped (net loss of imprv area)	PCC: 05/09/05 CC: 07/12/05
Site Design: Redevelop existing parking lots as new buildings and parking structures, with landscaping improvements; net reduction in impervious surface area under new master plan, but exact numbers to be determined, as final design plans are not prepared.	**Source Control:** SWPPP required. Stenciled stormwater catch basins; Microretention techniques, such as tree well filters in parking and landscaping areas; Disconnected downspouts, covered dumpster, trash and storage areas.	**Treatment BMPs:** Bioswales, landscape swales, or vegetated filters in new landscape and surface parking areas; Design landscape areas to be lower in elevation than surrounding paved areas.	**Numeric Criteria:** Details to be provided with architectural approvals of phasing; Estimated to require treatment of 0.65 ac-ft of stormwater via volume-based BMP controls and 2.45 cfs for flow-based controls	**O&M Responsibility:** Owner/developer responsible for records for inspection per City O&M agreement due with architectural approvals.	**Pesticide Reduction Meas:** Use of landscape species that minimize irrigation, runoff, pesticide and fertilizer application.
PLN2005-04924	4767 Lafayette Street – Braddock & Logan Fairway Glen Shopping Center Site Redevelopment Demolish portion of existing 3.1 acre shopping center; retain existing corner retail/office building (not a part); construct 27 detached homes on 2.38 acres	Residential	2.38 acres	1.50 acres	PCC: 05/09/05 CC: 12/13/05
Site Design: Existing buildings and pavement are replaced with detached residences, private drives with landscaped areas to absorb stormwater runoff; net reduction in site impervious area. Roof drains shall discharge to splash blocks and grass areas	**Source Control:** SWPPP required. Disconnected downspouts directed to landscape area drains; Stenciled stormwater catch basins. 10% of site is volume based BMP measures for private roadway	**Treatment BMPs:** Landscape swales in common and private yard areas for infiltration of runoff onsite, first flush diversion, flow attenuation by use of open vegetated swales and natural depressions, stormwater retention or detention structures, oil/water separators, porous pavement, and non-storm water management.	**Numeric Criteria:** Volume-based BMP controls required to treat 0.031 ac-ft runoff for pvt dwy; plus Flow-based BMP controls required to treat 0.15 cfs for pvt lots	**O&M Responsibility:** HOA responsible to maintain landscape drainage areas and records for inspection per City O&M agreement to be completed prior to occupancy.	**Pesticide Reduction Meas:** Use of landscape species that minimize irrigation, pesticide and fertilizer application.
PLN2005-04878	1655 Scott Boulevard – Shea Homes – UL Site Remove existing 170,836 square foot commercial building and surface parking; construct 131-unit housing project with private streets and driveways	Residential	6.60 acres	4.25 acres	PCC: 12/05/05 CC: 01/10/06
Site Design: Remove existing retail building rooftop and open paved parking area; construct single-family style residences with private street and driveway parking	**Source Control:** SWPPP required. Minimize surface parking areas; Stenciled stormwater catch basins. Trash areas covered.	**Treatment BMPs:** Sweeping of surface parking area. Installation of hydrodynamic /filter media device in an in-line system on private storm drain outfall to City storm drain for full site	**Numeric Criteria:** Flow-based in-line BMP controls required to treat 0.65 cfs	**O&M Responsibility:** HOA responsible to maintain landscape drainage areas and records for inspection per City O&M agreement to be completed prior to occupancy.	**Pesticide Reduction Meas:** Use of landscape species that minimize irrigation, pesticide and fertilizer application.

[1] Projects that create or replace one acre or more of impervious surface area; all projects approved in FY 2005-06.

Project File Number	Project Description	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Complete/ Approval)
PLN2005-0476	1777 Agnew Road Citation Homes Demolition of existing 29,000 square foot industrial building and surface parking; Construction of 58 attached townhomes with private drive and surface parking facilities and landscape improvements	Residential	2.26 acres	1.60 acres	PCC: 10/24/05 CC: 04/11/06

Notes on Table corrections of August 2006, per RWQCB letter of July 26, 2006:

1. 5301 Stevens Creek Blvd (File PLN2004-04317) moved to FY 05-06 report due to final approval date of July 12,2005.
2. 735 Franklin Street (PLN2004-04699) corrections indicate that new or replaced impervious area is 0.46 acres and therefore is a voluntary compliance site. Three buildings and some paved areas are included in the replaced impervious area, plus new paved area included in 0.46-acre calculation. Reported figure of 1.63 acres inadvertently included existing paved areas not changed by project, and project is less than 50 percent new or replacement impervious surface area.
3. 3600 Pruneridge Avenue (PLN2004-04707) indicates 0.36 cfs to be treated; a volume-based calculation was added here and should have been included as the private street surfaces are anticipated to be treated by an in-line hydrodynamic system.

City of Santa Clara

FY 05-06 Annual Report

Construction Inspection

CITY OF SANTA CLARA
FY 2005-06 ANNUAL REPORT
CONSTRUCTION INSPECTION

1. **Do pre-rainy season inspections appear effective in getting all construction sites to install proper BMP's before October 15?**

Pre-rainy season inspections have been effective in enforcing construction site SWPPP's prior to October 15 by insuring compliance before the first rain. The City inspected twenty-eight sites both prior and after to October 15th. These twenty-eight sites were the total number of sites under construction prior and after October 15 that were considered to have the greatest potential to pollute. Each site for these inspections was given a copy of the construction inspection form and proper/adequate BMP usage (see attached form) was confirmed. If a site had a violation, depending on prior enforcement, the most applicable notice was issued with a re-inspection for compliance occurring timely.

2. **Do you think your inspection coverage of construction sites is adequate: why or why not?**

The City has very adequate coverage of construction sites. All construction sites are inspected before, during and after the rainy season. In addition, due to the limited number of construction sites, each are inspected during and after major rain events. For FY 2005-06 there was a total of nine hundred eighty-six inspections conducted at twenty-eight sites. On average thirty-five inspections were completed per construction site.

"On average thirty-five inspections were completed per construction site."

Inspections include pre-rainy season SWPPP review, pre-rain event, rain event, and post rain event. All inspections are documented on an inspection form. Pre-rain SWPPP inspections include the review of site-specific SWPPP requirements. These inspections

ensure that BMP's required of the SWPPP are timely implemented on site. Pre-rain event, rain event, and post rain event inspections are supplemented by windshield inspections. For windshield inspections the inspector drives through and around the site, already being knowledgeable of the SWPPP requirements and confirms BMP compliance. Typically, windshield survey inspections for proper BMP's implementation are not documented on an inspection form unless a violation is found. Individual windshield surveys and inspections are recorded on a construction site spreadsheet. When no violations are discovered, only the date of the inspection is entered.

City employees not normally responsible for inspections, such as building inspectors, are knowledgeable of our storm water program and report any violations they may see directly to the Non Point Source Inspector. City Building Department inspectors are trained regarding proper storm water practices and contact the NPS Inspector as violations occur or most appropriately, prior to discharge. NPS inspectors also attend preconstruction meetings for City projects to inform the contractor that the City will be inspecting the site for proper storm water BMP management.

3. Did your City take an unusually large or small number of enforcement actions this year, and what are the possible reasons?

In FY 2004-05 the City conducted twenty-seven SWPPP inspections and four hundred and fifty-five windshield inspections, for a total for four hundred eighty-two inspections. A SWPPP inspection is where the SWPPP site is reviewed and a walk-through inspection takes place. For FY 20004-05 there were twenty-six violations. For FY 2005-06 the City conducted thirty-seven SWPPP inspections and nine hundred fifteen windshield inspections. For FY 2004-05 there were sixty-eight violations. The increase in violations for FY 2005-06 as compared to FY 2004-05 is due in large part to more frequent windshield inspections (see attached graph titled "FY 2004-05 and FY 2005-06 Construction Inspection Comparison").

In FY 2004-05 there were $4,151,303 in construction permits active in the City of Santa Clara. In FY 2005-06 there were $4,236,095 in active permits. A second possible reason for the increase in violations was the increased value of construction.

4. How are verbal warnings followed up to determine whether compliance is achieved?

Verbal and written warnings are given for all violations and are followed up by a re-inspection of the site. Any time a warning is given, a follow up inspection was always conducted. If the violation was not corrected, a written violation or pre-citation notice was issued. Weekly windshield inspections are conducted during the rainy season and include inspections of all areas of concern. If a violation was found, the site construction superintendent was notified immediately and a full SWPPP inspection was conducted. A total of twenty-one SWPPP inspections were conducted. For these twenty-one sites, a total of eighteen re-inspections were required and completed.

5. Are there specific contractors who need repeated warnings?

Yes, there have been some contractors that have required repeated warnings. If a verbal warning was given to a contractor and the potential violation was not corrected, a violation notice was issued. If the violation was corrected and a different violation is found during a later inspection, a pre-citation notice was issued. If the contractor continues to be out of compliance, administrative citations are issued. Escalating enforcement occurred several times at Fire Station Six building project. For this site, four administrative citations, one pre-citation and two violation notices were issued within a short period of time. Both the four administrative citations and one pre-citation were found during windshield inspections.

“Both the four administrative citations and one pre-citation were found during windshield inspections.”

6. Are the contractors on Public Works projects doing a good job in erosion/sediment control?

Contractors engaged in public works projects are contractually required to follow all appropriate BMP's. Engineering Department-Field Services Division personnel are fully aware of our URMP program and do not hesitate to notify a Non Point Source Fire Inspector as violations are seen. For most projects, inspectors are able to identify potential discharges prior to there being an event.

At the Fire Station Six building project the City had reoccurring issues with the Contractor not following the required BMP's. As mentioned prior, the site was given several administrative citations, several verbal and written warnings in a short period of time. To help avoid the issue of ongoing repeating offenses, the City's NPS Inspector has met with building inspectors responsible for City construction projects and reinforced timely and proper BMP practices. To this end, NPS Inspectors also attend preconstruction meetings for City projects to educate contractors.

7. Are BMP's being used in your City adequately, or do you see a lot of substandard controls like sand bags and hay bails?

BMP's are being used adequately within the City. All twenty-one-construction sites had the required BMP's in place either before or immediately after inspection per their approved Storm Water Pollution Prevention Plans. The prompt issuance of violations and reinspections for compliance has insured that all BMP's are in place. No hay bales or sand bags were used as a primary source of storm water protection. The City is no longer using the "Earth-Moving Activities" Brochures that advocate the use of hay bales. (2002 Performance Review Comment). The type of BMP's the City encourages include those that stress controlling erosion at the source - for example, stabilizing dirt slopes, covering stockpiles of materials, proper storage of materials and education. Protection of inlets alone is not considered adequate.

8. Does outreach to contractors or City staff need to be improved?

The City continuously educates and monitors City staff and contractors regarding storm water pollution prevention protection. This in part is completed by frequent inspections and distribution of BMP pamphlets specifying construction storm water protection. Improvement can always be made and additional emphasis has been given to make sure contractors, when applying for permits, are given all applicable BMP information

"NPS Inspectors also attend preconstruction meetings for City projects to educate contractors."

FY 04-05 and 05-06 Construction Inspection Comparison

Note: The increase in violations found in FY 05-06 as compared to FY 04-05 is due primarily to the increased frequency of windshield inspections done at the various construction sites. Four hundred fifty-five windshield surveys were conducted in FY 04-05 as compared to nine hundred fifteen in FY 05-06. The increase in inspections led to an increase in enforcement actions.

This element was reviewed in the 2005 performance review by Tetra-Tech. During the review, Tetra-Tech questioned the value of windshield inspections. Clarification was provided that these inspections are conducted only after a thorough initial walk-around inspection has been completed. Once the site is known by the inspector, the windshield inspection focuses on areas of concern to whatever detail is necessary to confirm compliance and has been a result in finding more violations in a time efficient manner.

Initial inspections of construction sites are done with the site superintendent and the SWPPP is reviewed. If a violation is found, the appropriate enforcement action is given to the superintendent and frequent re-inspections as are necessary are conducted to eliminate further violations. The City's NPS inspector and Storm Drain Foreperson perform at a minimum a windshield inspection before, during, and after a rain event. Any violations found are documented on an inspection form or the date is logged on an Excel spreadsheet if no violation is found.

CITY OF SANTA CLARA
SCHEDULED PIP EVENTS*

EVENT	DATE
All City Picnic	July 4, 2005
Camellia Show	February 25 & 26, 2006
Citywide Clean Up Campaign	March 13 thru April 7, 2006
Art and Wine Festival	September 17 & 18, 2005
Free Disposal Days	September 18, 2005 & January 8, 2006
Arbor Day/Earth Day	April 28, 2006
Fish Derby	April 29, 2006
Household Hazardous Waste Events	Continuous (64 events held in FY 2005-06; 2,003 participants)

***Each event has a purpose separate than PIP, however many of the events produce an outstanding opportunity for Staff to set up interactive games for children, a visual computer display for adults and to distribute BMPs.**

City of Santa Clara

FY 05-06 Annual Report

Public Information and Participation

CITY OF SANTA CLARA
FY 2005-06 ANNUAL REPORT
PUBLIC INFORMATION AND PARTICIPATION

The City of Santa Clara provides information to the public in four basic ways- during mandatory and non-mandatory inspections, IC/ID events, public events and providing BMP literature for distribution at City facilities. Measuring the effectiveness of how this information is used by the public is difficult.

In past Annual Reports our IND/COM and IC/ID elements have analyzed the number of repeat violations. The City has seen repeat violations as an indicator to poor education (not utilizing BMP information). This is open to interpretation. Some industries/businesses are volatile by nature, have high employee turnover and/or are improperly managed. These are all considerations that affect BMP education effectiveness.

Public events are a great opportunity to distribute BMP literature and interact directly with citizens in an informal way. Although a large number of BMP pamplets are distributed, they are received by a public that may or may not be a target audience. As a result, BMP effectiveness can only be inferred.

The City of Santa Clara is committed to educating its businesses and residents in stormwater pollution prevention. Our participation in program activities will continue, as will our commitment to identify problem businesses for specialized inspection/distribution of specific BMP's.

N/A	General Activity	2004 URMP	Evaluate the effectiveness of PI/P Projects by direct or indirect means as appropriate.	Often difficult to find direct relationship. Effort is put into analyzing I/CD/IC/ID and other element data to find relationship, if any, of incidents versus outreach accomplished.	Ongoing	Street Dept.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2005-06 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Libraries: Central & Mission Branch, Community Centers & various locations throughout the City.	General / Educational	BMP's: Bay Begins at Your Front Door, Pest Bugging You?, Clean It!, Grow It!, Home Maintenance Tips, Home Repair & Maintenance, Pool/Spa, Painting, and Concrete and Mortar Application. Distribution continuously.	Works well in terms of numbers distributed; difficult to measure effectiveness. Provides good exposure to Storm Water Pollution Prevention, but does not provide the opportunity for interaction.
New Resident Information	General	City calendar and annual report distributed – contains information on City meetings and events for the year. Provided yearly.	Mailed to approx. 47,000 residents and businesses. 28,000 more were distributed in other ways. Well received for general information. Informs residents of upcoming events (Disposal Days, Household Hazardous Waste Drop Offs, etc.). Includes suggestion/comment card that allows for feedback, but very few returned last year.
Public Events	General	City staff helped staff booth at event. Orchard Supply Hardware How-To Fair Saturday, May 20, 2006	Event provided an excellent opportunity to educate the public about integrated pest management. Good match between message and event.

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Household Battery Disposal Information on TV/computer monitor disposal	General	Article in February 2006 utility bill insert, Mission City Scenes Winter 2005 article in City newspaper, Inside Santa Clara about new disposal rules for CRT's. Spring 2006, Inside Santa Clara, Code Enforcement Q and A about CRT disposal and write up about E-Waste banned from trash.	Well-received program. Residents comment on convenience factor (no appointment necessary). Increased requests for "battery bucket" pickup. Many requests for ASL's telephone number. No charge for disposal increases compliance.
Storm Drain Maintenance update & URPPP tips, hints, offer for info.	General / Educational	"Falling Leaves" article in September 2005 utility bill insert, Mission City Scenes Summer 2005 article in City newspaper, Inside Santa Clara, "Keep Construction Debris Out of Storm Drain"	Mission City Scenes sent to approx. 47,000 residents. Timed for wet weather. Does help reduce number of blocked storm drains due to clogged leaves, debris, etc. Phone number for the Street Department is listed to provide additional information. Few calls are received. Inside Santa Clara sent to approx 47,000 residents and businesses.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2005-06 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Street Sweeping Leaf Vac Program	General	February utility bill insert, Mission City Scenes, article. Provided yearly. "Falling Leaves" article in September 2005 utility bill insert, Mission City Scenes	Approx. 47,000 residents. Provides residents with information on street sweeping schedule so they are able to remove cars from the street on street sweeping days. Compliance and phone calls to the Street Department are increased after article appears.
Camellia Show	General / Educational	Advertised in January 2006 utility bill insert, Mission City Scenes and Winter 2005, Inside Santa Clara. February 25th & 26th, 2006	Approx. 350 attended. Article in Utility insert. Brochures "Grow It, Pests, Pool, Home Maintenance" distributed at show. Audience shows interest in the above BMPs –good match of PIP activity and information provided.
City Clean-Up Campaign	General / Educational	March 13 thru April 7, 2006 Spring 2004 article in City newspaper, Inside Santa Clara Distributed info regarding proper disposal & alternative uses to pesticides & household cleaners.	Total of 7,275 tons gross weight collected with a significant amount of hazardous materials also collected. Very effective in terms of removing potential storm water pollution from the City and increasing awareness.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2005-06 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Free Disposal Days	General	Article in August 2005 utility bill insert, Mission City Scenes for September 18, 2005 event. January 8, 2006	Total of 145 residents participated in the September event, and 250 in January. Effective in terms of removing potential storm water pollution from the City. Very well received by residents.
Arbor Day	General / Educational	Article in March 2006 utility bill insert, Mission City Scenes and Spring 2006, Inside Santa Clara. April 28, 2006 Public presentation – School age related educational materials	Approximately 1,200 students, teachers & volunteers attended. URPPP Interactive display booth & handouts appropriate for this age group. Great opportunity to reach large number of school-age children. Assembly and teacher packets are very well received. Good response from the children at the water pollution booth demonstration.
City Hall Open House	General / Educational	Due to economic restrictions, this event was not held.	
Household Hazardous Waste Drop-off Events	General / Educational	Advertised in August 2005 utility bill insert, Mission City Scenes Spring 2006 article in City newspaper, Inside Santa Clara	Over 2,023 residents used this program last year. Very effective at removing potential storm water pollution from City.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2005-06 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
		The City participates in the Santa Clara County Program which had 64 operating days in FY 2005-06 Distributed info regarding alternative uses to pesticides & household cleaners.	
Food Services Facilities Construction Sites Paint and Paint Related Facilities Mandatory Industrial Inspections	Targeted	As needed – specific BMPs & literature Mandatory Industrial Inspections schedule defined by SIC code	Currently inspecting for compliance. Works well. Accelerated rate of administrative action has increased compliance.
Distribute existing Program Outreach materials & BMPs – construction specific.	General / Targeted	Planning/Permit Center, Utility billing, Licensing Continuing	Distributed at counter and available from two self-serve racks. Effectiveness is difficult to measure, but opportunity is available for resident interaction.
URPPP info City Web Page	General / Educational	Article advertising web page in June utility bill insert, Mission City Scenes Information on the Fire Department's Hazardous Materials Division, Household Hazardous Waste Drop Off Days, Free Disposal Days, and Urban Runoff Pollution Prevention. Internet - Continuous	"Hits" continue but difficult to measure effectiveness.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2005-06 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Distributed via educational letters prompted by complaint	Targeted / Educational	Home Maintenance Tips; Home Repair & Remodeling; Pool/Spa Water; Landscape, Gardening, and Pool Maintenance; Painting & Application of Solvents & Adhesives; Roadwork & Paving; Earth Moving Activities; Heavy Equipment Operation; Fresh Concrete & Mortar Application; General Construction & Site Supervision; The Bay Begins at Your Front Door!; Blueprint for a Clean Bay; San Francisco Bay Area Recyclers & Disposal Services for Construction Sites Continuous	Distributed 535 + BMP's. Effectiveness is good – repeat offenders are greatly reduced. Information is directed to individual residents/contractors. This may have more of an impact. Accelerated rate of administrative action has increased compliance.

FY 05-06 Annual Report

Pesticide Management Activities

CITY OF SANTA CLARA
FY 2005-06 ANNUAL REPORT
PESTICIDE MANAGEMENT ACTIVITIES

This year, the Parkways & Boulevards Division will be using tighter matting mulches to prevent weeds. In addition, better timing of pre-emergence application, has occurred to achieve the goal of post-emergence herbicide reduction. Drip systems have been installed at various locations throughout the City. This improvement has increased water management and reduced the potential for weed growth.

The Parkways & Boulevards Division has been trained to recognize plants that have become infested with pests and trimming off of infected areas before a condition worsens that requires chemical treatment. If pesticide treatment is needed, our method of application has been through soil drenching, soil injection or fertilizing with fertilizers that contain systemic pesticides. These practices reduce the need for overhead spraying and keep the pesticide on site without the possibility of drift or run-off. This past year, our inventory was reduced to safer less toxic material (on-going). The City has encouraged all landscape personnel to participate in pesticide management activities by observing and contributing their thoughts with the goal to have a continuously improved pesticide management plan.

CITY OF SANTA CLARA
FY 2005-06 ANNUAL REPORT
PESTICIDE MANAGEMENT ACTIVITIES

FY 05-06 PESTICIDE USE REPORTING

The Parkways & Boulevards/Tree Division is made up of 22 full-time positions. Of these positions two employees are Pesticide Certified Applicators (PCA's) and 13 employees have Qualified Applicator Certificates (QAC's) . The remaining 7 positions are seasonal employees. The goal of the yearly City-conducted pesticide/IPM training and continuing educations classes are to practice the least toxic solutions for pesticide management. All of our pesticide cardholders are required by the California Department of Pesticide Regulation to attend seminars at which they accumulate their continuing education units. PCA* card holders are required to attend 40 hours of continuing education every two years; and QAC's** are required 20 hours. Full time and seasonal employees receive yearly City-conducted pesticide/IPM training. This training includes all product labeling, MSDS, safety information leaflets, health safety issues, and City-adopted procedures for the Integrated Pest Management Program.

The City Pesticide Management Program continuously evaluates spray techniques and the safety of products in use. There are 24 chemicals currently being used by the Parkways & Boulevards Division. In FY 2005-06 two new products were added to replace other, more toxic level chemicals. Of the 24 chemicals being used 13 showed a decrease from the FY 2004-05, 7 showed a slight increase, and 2 were not used at all.

The Parkways & Boulevards Division is continuing to practice the least toxic application to control rodents, insect, and disease. Gopher traps are being scented with garlic along with rat traps being baited with peanut butter.

Overhead spraying is continuing, but whenever possible the use of soil injection and soil

---

* PCA – Pesticide Certified Applicator

**QAC – Qualified Applicator Certificate

drenching is the preferred method. Timely applications have shown to be safer and have longer residual affects for the plant material.

Tree chippings produced by the Tree Division are being spread throughout the City in public right of ways to reduce the potential for weed growth. This practice also has a water conservation benefit, along with putting nutrients back into the soil from the decomposing matter.

Mercury/Copper/Nickel Pollution Prevention Activities

CITY OF SANTA CLARA
FY 2005-06 ANNUAL REPORT
MERCURY/COPPER/NICKEL POLLUTION PREVENTION ACTIVITIES

Copper

The City of Santa Clara has in previous workplans aggressively inspected automotive facilities and metal plating facilities. This occurred in FY 2001-02 & FY 2002-03 for automotive and FY 2002-03, FY 2004-05, and FY 2005-06 for metal plating. These facilities are inspected at least once every two years due to their SIC code but inspection frequency are accelerated if repetitive violations are found. Automotive Facilities are the targeted facility type for FY 2006-07. Our street sweeping program mandates bi-weekly sweeping of all residential streets and every twelvedays for industrial. Use of architectural copper is discouraged and is being eliminated from design in new public buildings.

Nickel

The City of Santa Clara, through our construction inspection element, has documented construction best management practices activity within the City for many years. In FY 2005-06 seventy construction inspections occurred on twenty-eight sites. Inspectors also conducted nine hundred fifteen windshield inspections of all construction sites. Emphasis has been on increasing enforcement actions to gain compliance.

MERCURY / COPPER / NICKEL POLLUTION PREVENTION ACTIVITIES (MCNP)						
Performance Standard Identification	**Activity**	**Continuous Improvement Source Item**	**FY 2005-06 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
MCNP P.S. #4	Municipal Use of Mercury-Containing Products AKA – Municipal Training & Outreach	Order No. 01-024 2004 URMP 2005-06 Workplan	Ensure that Municipal employees responsible for purchase / use / replacement of mercury-containing products receive information on City Mercury Prevention Plan (Mercury Plan).		Ongoing	Street Dept.
MCNP P.S. #4	Public Education and Outreach	Order No. 01-024 2004 URMP	Support various outreach programs to educate target audiences about proper disposal of mercury-containing products and alternative non-mercury containing products.	Working with Program	Ongoing	Street Dept.
MCNP P.S. #5	Monitoring and Science AKA – Tracing / Reviewing and Reporting Effectiveness	Order No. 01-024 2004 URMP	Develop process to trace/review and report effectiveness of the Mercury Products Reduction and Management Practices in achieving the goals of the Mercury Plan.	Products containing mercury that are used by the City have a low potential to get in storm water. Replacement is done at product failure. This process causes effectiveness to be difficult to measure.	Ongoing	Street Dept. Building Maintenance

Performance Standard Identification	**Activity**	**Continuous Improvement Source Item**	**FY 2005-06 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
MCNP	Watershed assessment and protection	2004 URMP	Revise City's General Plan, as needed, at next scheduled update, based on recommendations from the *Development Policies Comparison Project* and Provision C.3.l. Review and implement guidance from SCVURPPP and San Jose on addressing water quality in the CEQA review process, as part of C.3.m. implementation.	Current general plan determined effective with current language. New general plan revision is scheduled for 2007.	Complete	Planning Dept. Street Dept.
MCNP Overall Commitment	Monitoring and Science	Order No. 01-024 2004 URMP 2005-06 Workplan	Provide financial and staff support for a coordinated regional plan to collect data for the mercury TMDL, as defined in the RWQCB / BACWA / BASMAA.	Work with Program	Ongoing	Street Dept.

City of Santa Clara

FY 05-06 Annual Report

Trash Inventory and Management

CITY OF SANTA CLARA
FY 2005-06 ANNUAL REPORT
TRASH INVENTORY AND MANAGEMENT

In the City of Santa Clara the NPS inspector and/or Storm Drain Foreperson and/or Solid Waste Foreperson respond to trash complaints. Initial response, depending on the nature of the event, may be responded to by other City personnel.

A trash "hot spot" list was generated based on the data received from complaints and catch basin cleaning crew findings. A survey was conducted using the KAB litter index and documented on a spreadsheet two times in FY 05-06. This information is updated every year. Locations that appear on our "hot spot" list on more than one occasion receive further investigation to find a source of the litter. Facilities that can be found responsible for the trash receive a violation notice for a first offence, pre-citation notice for the second, and administrative citation for the third. If no source is found and the trash is on private property the property owner may be held responsible for clean up and the City will pick it up if its in the public right of way. Regardless of the source, trash is typically picked up within one week or sooner depending on the potential to enter the storm drain.

Attached is the table of the City's trash "hot spots" relative to the watershed affected if the trash entered the storm drain system.

Mr. Bruce Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: West Valley Community Specific Urban Runoff Management Program
FY 2005-2006 Annual Report

Dear Mr. Wolfe:

This report is submitted by the West Valley Cities of Campbell, Monte Sereno, Saratoga, and the Town of Los Gatos, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2005-2006 in accordance with the West Valley Communities' Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 2004 and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 05-06 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

I. Contents of report;
II. Program highlights and accomplishments;
III. Summary of continuous improvement activities;
IV. Attachments:
    1. Table of Contents
    2. Certification Statement
    3. Acronyms

V. Program Elements:

1. IC/ID Elimination Activities
2. Industrial / Commercial Discharger Control Program
3. Public Agency Activities
    - Storm Drain O & M
    - Street Sweeping
    - Corporation Yard
    - Rural Public Works
4. New Development: Planning Procedures
5. Construction Inspection
6. Public Information & Participation
7. Pesticide Management Activities
8. Mercury Pollution Prevention Activities
9. Copper Action Plan / Nickel Action Plan
10. Trash Inventory and Management
11. Water Quality Monitoring and Watershed Management
12. Training Summaries are provided at the end of each element

Responses to Regional Board staff's comments on the FY 04-05 Annual Report (July 26, 2006 letter) are provided at the beginning of the New Development: Planning Procedures section of each West Valley FY05-06 Annual Report.

Program Highlights and Accomplishments

During FY05-06, the West Valley Communities of Campbell, Los Gatos, Monte Sereno, and Saratoga continued efforts to implement their URMPs to the maximum extent practicable. The activities that were implemented for each element of each Community's URMP are described in Chapter 14 of the Santa Clara Valley Urban Runoff Pollution Prevention Program's URMP. Highlights of the West Valley Communities accomplishments in various program elements are described below.

Industrial/Commercial Discharger Control Program. During FY05-06, the West Valley Communities rewrote their inspection agreement with the Santa Clara County Central Fire District, extending the inspection program for five additional years. This renegotiation allowed the West Valley Communities to update the Fire District's inspection procedures, clarify their reporting requirements for improved follow up and data management, and provide material from the latest Urban Runoff Management Plans (2004) for enhanced inspector training.

Public Information/Participation Program. In FY 05-06, the West Valley Clean Water Program continued to expand its quest for effective public education and outreach. WVCWP pursued media coverage on several topics: safe disposal of E-waste and other mercury-containing products, trash impairment of creeks and the Bay, cleanup and trash assessments by students and parents, and a Saratoga student's Eco-Hero award for his campaign to keep residential pollutants (pesticides and

copper) out of the storm drain. The student's story about his mission and his partnership with WVCWP can be found in the Public Information and Participation section of this report (Attachment 6B).

Nine stories, news briefs, or letters to the editor, were covered by local community newspapers in FY05-06. The most telling article was unsolicited; a Saratoga News cover story appeared about residents deluging City Hall with calls when the funds for household hazardous waste disposal were cut short due to the City's budget shortfall. By March 2006, the City Clerk had received over three hundred calls after funding ended in November and forced a stop to residents' participation in HHW drop-off events. A copy of the article is attached to section 10 – Trash Management & Watershed Management, of Saratoga's Annual Report (Attachment 10G).

The West Valley Clean Water Program strives to maximize student involvement at every opportunity. WVCWP staff developed a fourth-grade presentation script incorporating State standards with messages on pesticides, copper, mercury, household hazardous waste and trash. The new curriculum expands the existing fifth-grade presentation by including both Coastal and Wetlands Enviroscape models. The educational presentation runs for over an hour, and during its debut was extended at the teacher's request, while an entire class of students, teachers and parents at Saratoga Elementary School remained engaged in participation and questions and answers. At least thirty students and parents from the same class spent the following Saturday working with WVCWP staff to tally and categorize trash as they cleaned up the banks of Saratoga Creek.

The WVCWP prioritized education on trash, pesticides, fluorescent bulbs, and E-waste in FY05-06. A Kindergarten script was developed for St. Mary's School in Los Gatos. Two groups of fifteen Kindergartners listened to Clean Water Program messages as they followed the script and "polluted" the water on two Enviroscape models. Immediately following the presentation the teacher and students were motivated to walk the school grounds and collect all the trash they could find for proper disposal.

Illicit Connection and Illegal Dumping Elimination Activities. A primary goal for the West Valley IC/ID Program has been to ensure adequate follow up of all potential urban runoff violations related to restaurants. The West Valley IC/ID Inspector presented a restaurant inspection training session, focused on urban runoff pollution issues, to twenty-two Dept of Environmental Health specialists at the annual (April 18th) meeting coordinated by Cupertino, the County and the WVCWP. This is the second time that the WVCWP Inspector has discussed his restaurant inspection program with DEH specialists in the last three years. Feedback from DEH staff this year was very positive. The presentation was considered to be very helpful and photos from actual inspections especially worthwhile. Training sessions with other agency and municipal staff are effective, evidenced this year when DEH specialists called the West Valley IC/ID Inspector to report IC/ID incidents, outside of, and unrelated to, their regular restaurant inspections. Increased scrutiny by other agency and municipal staff continues to strengthen the program.

Storm Drain Operation and Maintenance. The West Valley Sanitation District (WVSD) completed a major task which will make storm drain cleaning procedures more efficient and the annual SD reports more useful to the WV cities. FY05-06 was the first year that the enhanced storm drain maintenance reports were available to the cities. The reports document the status of each stormdrain and, if applicable, the nature of any problem. The majority of structures were "clean" but a few were noted as having obstructions (e.g. "leaves/paper"). Other descriptors that

are available in the report are: mud/dirt, foreign object, rocks/stone, sand/gravel, etc. All structures, as needed, are cleaned at the time of inspection. The WVSD's report may be used by WV cities to help monitor specific pollutant problems such as trash sites.

C.3 Implementation. In July and August, 2005, an engineering consultant hired by the WVCWP talked with staff in each West Valley city to review any remaining challenges with C.3 implementation. This year the cities made progress in preparing for implementation of BMP O&M verification inspections and HMP requirements. The West Valley Communities were beginning to see the completion of the first Group 1 projects in June 2006. Throughout FY05-06 the cities participated in regular monthly training meetings frequently dominated by discussion of the implementation of C.3. requirements. The BMP O&M Verification Programs were discussed in great detail and minor updates were made in FY05-06 to that section of the West Valley URMPs. The revised standard operating procedures for the BMP O&M Verification Programs were reviewed with the engineering consultant and included as attachments in New Development – Planning Procedures (section 4) of each of the WVC FY05-06 Annual Reports.

To show the spirit of C.3. implementation, two West Valley cities which have not had Group 1 or Group 2 projects to date, have made significant efforts to include swales and runoff control measures on all projects. Saratoga provided copies of drawings to developers to help them visualize the swales with under drains, which the City Engineer recommends. Monte Sereno's City Engineer required drywells, which overflow to vegetated areas, on all residential development projects, except where the ground water level was too high.

Pesticide Activities. By popular demand, the WVCWP held its third West Valley IPM Workshop. This year the WVCWP partnered with the City of San Francisco to hire Frank Rossi, a national expert (from Cornell University) who presented guidelines for managing turf with little or no pesticides. The training included PowerPoint presentations and a field trip to examine Campbell's community athletic field turf. For the past three years the WVCWP IPM workshops have prompted overwhelmingly positive feedback from municipal staff, special district personnel and private golf course superintendents. This year thirty four (34) municipal staff from three West Valley Communities and one Golf Course Superintendent from Los Gatos attended the workshop. Based on the material presented, WVCWP staff wrote a Turf Management Plan, which the four municipalities adopted. The IPM plan is included in the Pesticide Management section of the Annual Report (Attachment 7A).

Mercury Pollution Prevention Activities. In FY05-06, the WVCWP spent significant staff time and resources to offer a way for the public to get involved in reducing the amount of mercury containing waste going to landfill or being disposed of illegally. At the suggestion of the WVCWP, United Datatech recyclers agreed to hold a free TV and computer monitor recycling event in the West Valley. It turned out to be a successful effort to encourage the community to take action and to inform the public of the goals of the West Valley Clean Water Program. The WVCWP hired a PR firm (the one currently being used for the Watershed Watch campaign) to design a newspaper ad and write and submit a press release to local newspapers. As a result at least 6 news briefs, stories, and letters on the topic of hazardous waste and water quality were covered by local newspapers. Over 250 participants enthusiastically dropped off 33,657 lbs. of electronic waste materials in four hours. The event opened up an opportunity to survey the drivers and discuss mercury pollution and proper disposal of fluorescent bulbs and batteries, as people waited in vehicles to go through the line.

Trash Inventory and Management. West Valley volunteers were key partners in trash assessment and management this year. The WVCWP held two annual trash assessment and cleanups at Westmont High near San Tomas Aquino Creek. Campbell and Los Gatos/Monte Sereno each held a successful volunteer event in the Guadalupe Watershed and Saratoga partnered with the WVCWP and a local elementary school to assess and clean up trash along Saratoga Creek in the San Tomas Aquino Watershed. A combined total of over 280 volunteers categorized and picked up 12,078 trash items for a total of 1,532 lbs of trash removed during the four volunteer events where trash tallying was conducted along with cleanup. School presentations helped to promote interest in trash collection and trash management among students, teachers and frequently among parents. The increased participation is testament to the measurable benefits of educational outreach activities.

Continuous Improvement Activities

Illicit Connection and Illegal Dumping Elimination Activities. The IC/ID program continues to work phenomenally well for the West Valley Communities. As a result of having a centralized inspection program and frequent presentations or talks given by the West Valley inspector (at training sessions, workshops or municipal lunch meetings), the overall awareness of the West Valley IC/ID program has increased among other agency staff. Calls from other agencies and municipal staff (inter-departmental) increased from forty-seven (47) reports in FY04-05 to sixty-two (62) reports in FY05-06.

The inspector responded to 98 discharge incidents over the year (see IC/ID section Attachment 1A for the number and types of incidents), and conducted 28 proactive and follow-up inspections. Each of these inspection opportunities adds to the community's knowledge of storm water pollution and prevention issues. As part of the inspection process, the inspector distributes applicable educational materials. The West Valley Clean Water Program Inspector provided 421 brochures and other educational materials to industrial/commercial facilities and residents in FY05-06.

Industrial/Commercial Discharger Control Program. During FY05-06, the three West Valley Communities of Campbell, Los Gatos, and Saratoga continued to implement their Industrial/Commercial Inspection Program. The City of Monte Sereno has no industrial or commercial facilities operating within the City and therefore does not participate in this activity. In Campbell, 296 of 309 facilities were inspected, 109 of 112 facilities were inspected in Los Gatos, and 8 of 8 facilities in Saratoga were inspected. In FY05-06, the West Valley Clean Water Program's Stormwater Inspector continued to conduct proactive investigations targeting vehicle facilities for additional education regarding storm drain issues. In Campbell, Los Gatos, and Saratoga, 16 facilities were visited and notified of urban runoff requirements and the role of the Clean Water Program. All sixteen facilities were found to be in compliance.

Copper and Nickel Outreach Activities. This year the West Valley Clean Water Program's Home page at www.cleancreeks.org was updated to better promote the use of the Car Wash Kit to contain waste water runoff at local fundraisers. The Fire Dept Hazardous Material Specialist, who trains the Industrial/commercial facility inspectors, also requested copies of the Car Wash flyer for distribution to supervisors of local car wash events.

Staff Training. The West Valley Communities place a strong emphasis on training. The Annual Reports reflect this with numerous references to the Staff Training Summaries; these summaries are located at the end of each section in the Annual Reports. In FY 05-06 training was expanded

by use of a video camera to tape various trainings for viewing by additional staff at a later date. The West Valley Clean Water Program will continue to emphasize better communication between WVCWP staff and municipal staff and to host training sessions that are worthy of staff time and convenient to attend.

Thank you in advance for your review of this Annual Report. If you have any questions regarding the materials submitted, please contact me at 408.316.1233.

Very truly yours,

Cheryl C. Donnelly

FY 2005-2006 ANNUAL REPORT

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
	Continuous Improvement Item	e. Vehicle Shop Inspection Program The West Valley Clean Water Program will continue expansion of vehicle shop inspection program (formerly *Auto Body Pilot*) targeting auto repair facilities in the West Valley area and providing additional education on vehicle-washing, stormwater issues. Saratoga has five vehicle facilities.	In order to provide standardized data to SCVURPPP, two (2) proactive inspections of vehicle shops, conducted by the WVCWP IC/ID Inspector, are now reported in the IND section of this report. Note: Saratoga only has a total of five (5) automotive facilities, which includes one car wash.	WV Inspector
	URMP	f. Education Distribute BMP materials during routine inspections. Distribute follow up education information for businesses cited for potential stormwater violations.	During FY 05-06, the WVCWP Inspector distributed thirty (30) IC/ID and IND educational materials in Saratoga, as part of his outreach and inspection program.	SCC Fire & WV Inspector
	Training	g. Training Conduct training & evaluation meeting between Storm Water Discharge Inspector and Town staff, as needed to improve procedures.	Each year the WV Inspector visits a West Valley community to meet with municipal staff and explain the importance of staff being the eyes and ears for the IC/ID response program. Referrals to the WVCWP are encouraged for all incidents including seemingly innocuous ones like pool water discharges. On 4/18/06 the WV IC/ID Inspector led a training meeting and presented a slide show to twenty two (22) Santa Clara County Environmental Health inspectors. The topic was stormwater violations typically found at restaurants and West Valley reporting procedures and follow-up actions. The inspector has also attended various workshops in FY 05-06 related to illegal discharges to the storm drain system (i.e. erosion control (12/8/06), street sweeping (5-8-06) and C.3 implementation for new & redevelopment (6-6-06). IC/ID Program Evaluation

IC/ID Training

It appears that the Inspector's training meetings and presentations at various West Valley workshops have been effective. Inspectors from Dept of Environmental Health and the Fire Dept have called to report potential urban runoff violations which were observed outside of their scheduled inspections. This is encouraging for West Valley staff who have tried to improve communication and reporting, and provide relevant training sessions each year.

IC/ID Program Background

In March 2001, the four West Valley Communities hired an IC/ID Inspector to improve coordination and tracking of stormwater incidents. In FY01-02, shortly after he was hired, the WVCWP Inspector initiated a pilot to target vehicle shops (and car wash facilities) for additional proactive inspections and education. A total of twenty five facilities in the West Valley communities were initially targeted, with each receiving at least two on site inspections and multiple drive-by inspections. By the end of the year all 25 facilities were found to be in compliance.

Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2005-2006 ANNUAL REPORT

In FY02-03, due to its apparent need and success, the vehicle inspection pilot was extended. However, there are only four (4) automotive related businesses in Saratoga, which includes one car wash. Saratoga did not have any reported potential violations related to vehicle washing or automotive shops that year. Following the vehicle inspection pilot, the West Valley Inspector began a pilot targeting medium to large size restaurants. Twenty-one restaurants were targeted for additional inspections in Saratoga.

The West Valley communities have three primary sources of violations that are being prioritized for inspection and education in order to attain maximum compliance: 1) vehicle/automotive shops, 2) restaurants, 3) and construction sites. Inspection of construction sites is conducted primarily by municipal public works and engineering inspectors. The West Valley Inspector responds to potential construction site violations only when they are observed or reported by citizens, City staff or other agencies.

In FY03-04, the West Valley Inspector conducted a proactive inspection of one (1) car wash facility inspection (no violations were noted), and seventeen (17) proactive restaurant inspections (16 out of 17 restaurants were found to be in compliance). All inspections were reported as potential IC/ID incidents, even if they did not have any violations. After FY03-04, SCVURPP requested that West Valley reorganize the inspection data to facilitate Program-wide analysis. A separate database was developed by the Program for IND inspections conducted by the West Valley Inspector.

The IND incident data was then reported as part of the IND section of the West Valley annual reports. Therefore accurate trends can only be evaluated for the last two fiscal years, FY04-05 and FY05-06. It is important to note that during the first two or three years of these additional inspections, violations for automotive facilities increased significantly for Campbell and Los Gatos. However, incidents in Saratoga (a predominantly residential community) related most often to construction sites and pool water discharges.

Trend Analysis

In FY04-05 eleven (11) reported incidents were investigated. Residential and construction sites were the only two incident sources for all reported violations. Five (5) pool and spa discharges accounted for the number one IC/ID incident type reported in Saratoga in FY04-05. This was followed by two (2) tracking soil incidents and two (2) cement related discharges (concrete residue and unhardened cement). Pool and Spa incidents were clearly the most prevalent type of IC/ID problem being reported in the City. The remaining incident types (1 saw cut slurry and 1 vehicle/equipment leaking) were most likely related to residential construction or remodeling projects. No other meaningful conclusions are noted.

In FY05-06 the West Valley IC/ID inspector responded to twenty-two (22) reports of potential violations in Saratoga. Out of the 22 reports, eleven (11) were the result of interdepartmental referrals and six (6) were the result of citizen complaints. Saratoga City Manager's office came to a realization this year when they tried to save the City's budget by not increasing the its funding of HHW services for residents. The City Manager's office was deluged with phone calls (at least 300) complaining about not being able to safely dispose of toxic waste like paint, pesticides and batteries. By spring of 2006 Public Works Director met with HHW and reinstated the funding. The point is that Saratoga residents are very concerned with protecting their environment from pollutants. A point made again when, approximately thirty parents and students spent a Saturday morning in April cleaning up the banks of Saratoga Creek and an adjacent downtown area parking lot.

This take-charge attitude spills over into neighborhood vigilance and reporting of potential incidents such as pool discharges and mud tracking,

In FY05-06, seven (7) pool and spa discharges were the most commonly reported incident types. Three (3) incidents were not found and one (1) was an allowable discharge. Three (3) inspections were related to illegal dumping[1]. Two (2) equipment cleaning discharges were reported, one from a food facility and the other from a construction site. One incident was related to an oil and grease discharge which overflowed from a cleanout near three restaurants. This confirms the importance of educating restaurant owners on the need for regular grease trap maintenance. Additionally, two (2) accidental spills and one (1) hydraulic line break were reported. Other incident types were: one (1) grey water discharge, and one (1) miscellaneous construction incident. A notable trend is that Saratoga has a substantial number of pool discharges and construction related incidents.

Overall, Saratoga experienced some uncommon violations in FY05-06. Dumping had not previously been a problem in the City; in fact the City has had to look hard for trash to pick up. The dumping issue pertains to the downtown area and is being addressed as a criminal action that will be monitored by Police and City Code Enforcement.

Since the beginning of the West Valley Inspector's proactive restaurant inspection program there have been only a few restaurant violations, but it is clear that grease and oil are a threat to the cleanliness of the downtown area as well as to the nearby storm drains. The West Valley Inspector will continue to be proactive in this area. Residential awareness of pool discharge problems is good and will likely continue to be a source of several inspections. The City of Saratoga recently ordered more Pool and Spa brochures to display at the City Planner's counter and to give to new pool & spa owners.

[1] The site, adjacent to Saratoga Creek, is fairly hidden by trees and other vegetation. After an initial inspection it was determined that periodic dumping was occurring from a parking lot which backs up to a steep, well-hidden, stretch of creek bank. Saratoga Police and City Code Enforcement responded by putting the site on watch and visiting each of the surrounding businesses with warning notices. Due to the types of trash found it is not believed that the businesses are responsible for the dumping. The dumpster area, however, contributes to the trash problem.

INDUSTRIAL/COMMERCIAL DISCHARGER CONTROL PROGRAMS

Annual Report FY 2005-2006 Self Evaluation Matrix

Source	Task Source	FY 05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
	URMP	a. Joint Inspections of Retail Food Facilities Continue joint inspection program w/ DEH. Approximate number of *food handling* facilities in Saratoga is 97. All facilities will be inspected at a minimum once per year. WVCWP IC/ID Inspector will conduct follow-up and distribute BMP materials as needed per DEH referrals. Continue to evaluate data management and reporting for desirable improvements or updates.	In FY05-06, all 97 food-handling facilities in Saratoga were inspected; most of them were inspected 2 or 3 times by Santa Clara County Environmental Health Specialists (inspectors). A total of 206 food facility inspections or re-inspections were conducted by DEH in Saratoga.	Inspections conducted by SCC DEH; Annual Mtg co-ord by WVCWP
	URMP	b. Training & Evaluation Conduct annual joint meeting/train'g w/ Cupertino and SCC DEH to evaluate Inspection Prgm and discuss improvements. Annual meeting per agreement; scheduled for Spring each yr.	On April 18, 2006 the WV Cities, Cupertino and the County conducted an inspector training meeting. The WVCWP Inspector presented a slide show with photos of urban runoff violations that the Clean Water Program encounters. See evaluation below.	WVCWP to co-ord. w/ Cupertino & DEH
	Continuous Improvement Item	d. Restaurant Inspection Program Continue implementation of proactive inspection program targeting medium to large-scale restaurants. First began as a pilot in FY 02-03. *Medium to large-scale* restaurants are defined as, restaurants with 6 or more employees and/or ones that routinely handle large quantities of grease (approx. 21 in Saratoga). Restaurants are targeted because of the higher probability	Since the West Valley Restaurant Inspection Program's inception in 2002, the WVCWP Inspector has provided at least 235 pro-active inspections for 127 targeted restaurants in the cities of Campbell, Los Gatos and Saratoga. Out of 21 restaurants targeted in Saratoga, most have been visited more than one time and almost all are familiar with the West Valley Clean Water Program. In FY 05-06, three (3) restaurants were inspected pro-actively. All three inspections revealed clean sites, free of urban runoff violations. No violations were noted by DEH for food	WV Inspector

		that this subset of food handling facilities may contribute to stormwater pollution.	facilities in Saratoga.	
	URMP	c. Joint Inspections of Ind/Comm Facilities Continue joint inspection program. Approximate number of active facilities in Saratoga is 8. The inspection frequency goal for FY05-06 is 100%. The total number of facilities by business category inspected in FY05-06 will be included in the annual report.	In the City of Saratoga, 8 commercial / industrial facilities were inspected by the Fire Dept, meeting 100% of the inspection goal. Of the facilities inspected, the Fire Dept found nineteen no potential or actual violations.	Inspections conducted by SCC Fire
	URMP	d. Training & Evaluation Conduct annual joint meeting/training w/ SCC Fire to evaluate inspection reporting and confirm distribution of materials.	The Fire Dept's annual facility inspection training pertaining to urban runoff requirements was provided to 184 inspectors from May 8th through May 31st 2006. The Inspectors noted that they have plenty of handout materials; West Valley businesses have received all of the educational material during prior inspections. The Fire Dept's Sr Haz Mat Specialist, who provides training to inspectors met with the West Valley Clean Water Prog Mgr and WV Inspector on 3/1/06 to evaluate current procedures and determine revisions for a new Facility Inspection Agreement for FY06-07. A revised inspection form was developed to simplify reporting procedures. Another training meeting between WVCWP Mgr and Fire Dept's Sr. Haz Mat Specialist was held on 5/12/06 to review updated procedures for inclusion in the new Agreement.	Annual Mtg arranged by WVCWP w/ Sr. Haz Mat Specialist

Industrial/Commercial Program Evaluation

Fire Dept Inspections of Industrial / Commercial Facilities:

Of the 8 facilities inspected by the Fire Dept NO potential or actual violations were found. Since there were no violations as a result of proactive inspections, the sites with previous violations noted as a result of enforcement response calls from the IC/ID report will be prioritized for inspections at the beginning of FY06-07.

After a steady stream of improvements and more communication between Fire Dept and WVCWP staff, the inspection program is prepared for maximum efficiency for the West Valley Cities in FY06-07. When Saratoga was added to the Fire Dept Inspection Agreement for Campbell and Los Gatos (7/1/02) all West Valley facility inspections were coordinated under one umbrella. Monte Sereno does not conduct IND inspections because it has NO industrial or commercial facilities. Since 2001, WVCWP staff has met with Fire Dept staff at least twice a year to discuss standardized reporting, documentation and follow-up.

A new Industrial Commercial Facility Inspection Agreement was signed by the West Valley Cities and the Fire Dept in June 2006.

On March 1, 2006 the WVCWP Manager met with the Santa Clara County Fire Dept, Hazardous Material Specialist, who administers the Agreement for the Fire Dept. The new Agreement was written after reviewing the FY 04-05 Agreement and comparing it to West Valley IC/ID and IND Performance Standards (Revised URMP 2004). The new Agreement, signed in June 2006, covers a five-year period, with annual increases in inspection costs. The Agreement reiterates the importance of referrals to the West Valley Inspector for follow-up. The IND Performance Standard operating procedures are attached to the Agreement as a reference for annual inspector training.

One of Saratoga's problem sites, Classic Car Wash, did not have any violations this year. Last year they installed a waste water capture system to take care of vehicle wash water flowing to the storm drain.

Industrial/Commercial Program Evaluation Continued

Annual Food Facility Inspection Training Meeting

On April 18, 2006, twenty-two (22) DEH Consumer Protection Division's Environmental Health Specialists attended a training meeting and slide show presented by the WVCWP Inspector. The evaluation from the Supervising Health Specialist was positive: "Jack's presentation was great, and helpful. I believe that review and reinforcement of what a specialist is to look at during at inspection is always beneficial. Comments from staff were positive, especially regarding the photos." Inspectors were shown photos of typical problems. The importance of reporting all potential West Valley stormwater violations to the West Valley inspector was re-emphasized. Due to increased awareness, DEH inspectors referred at least one potential urban runoff violation, unrelated to food facility inspections, to the WVCWP Inspector this year. Other topics covered at this meeting were:

- Updated contact information;
- How to report urban runoff violations to municipal inspectors to ensure accurate tracking and follow up;
- Feedback on the effectiveness of outreach & educational handouts
- Reminder to distribute pesticide reduction fact sheets called "Don't Set a Table for Pests" to restaurants.

At the beginning of FY 05-06 the West Valley Inspector began a more aggressive effort to alert restaurants to the need for regular grease interceptor maintenance. A strategy meeting between the WVCWP Inspector and the West Valley Sanitation District's Director of Operations resulted in a decision to request a copy of grease interceptor maintenance records. It is not necessary to review the records as long as the facility can produce them. The Sanitation District is notified if the records are not available. At the April 18th training meeting for DEH Inspectors, the West Valley Inspector suggested that Environmental Health Specialists look for grease trap maintenance records during their restaurant inspections.

FY 2005-2006 ANNUAL REPORT

Training Summary: Industrial/Commercial Discharger Control Program

Training Description	Date	Attendees
SCC Fire Dept & WVCWP Training **Topics:** ▪ Evaluate current inspection procedures pertaining to urban runoff requirements ▪ Review NPDES Inspection and data requirements ▪ Develop a revised inspection form to clarify reporting procedures ▪ Determine revisions for a new Facility Inspection Agreement for FY06-07	**March 1, 2006**	**WVCWP (2)** Program Manager Stormwater Discharge Inspector **SCC Fire District (1)** Senior Haz Mat Specialist
SCC Fire Dept & WVCWP Training **Topics:** ▪ Review inspection procedures to include in Facility Inspection Agreement ▪ Determine reporting procedures	**May 12, 2006**	**WVCWP (2)** Program Manager Stormwater Discharge Inspector **SCC Fire District (1)** Senior Haz Mat Specialist
SCC Fire Dept. Training for Inspectors Coordinator: John Justice Multiple Trainings - average of 8 firefighters per Training **Topics**: The Fire Dept's annual staff training was provided to their inspectors through the month of May, 2006. The Inspectors noted that they have plenty of handout materials; most businesses have received all of the educational material during prior inspections. See evaluation below. ▪ Conducting an Industrial Inspection for urban runoff issues ▪ Reporting violations found during Inspections ▪ Filling out Urban Runoff Program inspection forms ▪ Discuss educational materials for distribution during Inspections ▪ Q & A and discussion	**May 8 – 31 2006**	**SCCC Fire District - 184** Senior Deputy Fire Marshall and all field staff Due to staff rotation, any firefighter may be called upon to do inspections; therefore, all firefighters in District received training

Training note:

In FY05-06 Fire Dept Inspector trainings were updated to include material which was covered during SCVURPPP's FY04-05 pre-workshop planning sessions and the end of year Industrial/Commercial and IC/ID Inspection Workshop. Fire Dept staff attended the pre-workshop planning meetings to help determine topics which would be helpful for their in-house inspector training sessions. In June 2005, three (3) SCC Fire District staff and several West Valley municipal staff attended the all day IND & IC/ID Inspection workshop.

PUBLIC AGENCY ACTIVITIES: Operation and Maintenance

FY 2005-2006 Work Plan Self Evaluation Matrix

Activity	Task Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Storm Drain Operations and Maintenance				
Annual Storm Drain Cleaning	2004 URMP	Continue contract w/ WVSD. Continue schedule/cycle for inspection and cleaning of storm drain system (two year cycle for residential & one year cycle for commercial/industrial); Public Works staff will clean high leaf drop and other noted areas more frequently and as needed.	WVSD performs systematic storm drain cleaning and inspection annually. Saratoga is on a biennial cycle. City crew assist the contracted sweeper by providing additional cleaning in high leaf drop areas and removal of storm debris from all inlets and grates as needed.	Pub Works Dir contract: Streets Supervisor coordinates in-field operations
Training - Annual WVSD/ Storm Drain Oper. & Maint.	FY05-06 Workplan	Annual WVSD Storm Drain Operations & Maint. Supervisors training meeting - evaluate status of annual storm drain cleaning and provide training on other Pub Works maintenance issues.	The annual WV Storm Drain Op & Maint. Supervisor's workshop was held on June 19, 2006. Five (5) Saratoga staff attended, including the Street Supvsr, Street Leadworker, Street Specialist, Parks Supvsr and Park Leadworker. Staff from WVSD, WVCWP, and the other WV Communities also participated. Topics included: • Storm Drain Maintenance findings by WVSD • Review of Emergency Response Procedures for SD overflow • Presentation on Street Sweeping for Water Quality • Power Point Presentation on BMPs for Streets, Rural Public Works and Storm Drain Maintenance Round table discussion on all topics	Led by WVSD; Attend by Streets Supervisor and Maint staff, Hosted by WVCWP
Storm Drain Stencils or Signage	C/I item -Source Control Measure	Continue to replace and/or upgrade storm drain stencils or signage on storm drains or catch basins, as needed.	Saratoga decided not to use more thermoplastic storm drain stencils than it initially ordered for the pilot. While the durability is excellent, the cost is prohibitive (about $250 each, installed). Storm drain signage is replaced if it becomes worn, or bent (if it is metal). The City primarily	Streets Supvsr

Saratoga

FY 2005-2006 ANNUAL REPORT

Activity	Task Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			uses painted stencils because they are easy to apply, they can be installed on flat surfaces (unlike the thermoplastic stencils) and the savings in staff time and cost of stencils is substantial. The metal plates, previously installed by the WV communities, are no longer applied because they tended to bend over time, exposing sharp edges and therefore creating a potential to injure pedestrians or bicyclists.	
Street Sweeping/ Pavement Management				
Street Sweeping Program	URMP	By contract – residential swept twice monthly; downtown every week; arterials and Commercial/industrial areas once weekly. High leaf drop and other noted areas cleaned more frequently and as needed (i.e., construction zones - swept by responsible party).	This year the City collected an annual total of 521.5 cubic yards of debris from sweeping 2,310 residential curb miles; and collected 108 cubic yards of debris from sweeping 715 curb miles of commercial streets. **The annual combined total was 629.5 cubic yards of debris collected from sweeping 3,025 curb miles.** Saratoga hired a new street sweeping contractor in August 2005. Because of the transition, no street sweeping data was collected for the month of July, 2005. In preparation for street sweeping, City crews removed 200 cubic yards of leaves. In addition to street sweeping and leaf removal by staff, all residents and businesses are required to utilize large recycling bins for leaves and other yard waste as part of their trash collection service. Yard waste is not allowed in streets but waste from receptacles is picked up weekly. **A total of 10,771.5 tons of yard waste was recycled** in Saratoga during FY 05-06.	Street Supervisor
Street Sweeping Data Collection		Collect and review street sweeping data and provide number of curb miles swept and cubic yards of debris quarterly, to SCVURPPP for evaluation of effectiveness.	Street Sweeping data was collected monthly and provided to the SCVURPPP at the end of the fiscal year.	Street Supvsr and Public Works Assistant, WVCWP to assist

Saratoga

FY 2005-2006 ANNUAL REPORT

Activity	Task Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Training	FY05-06 Work Plan	As needed, provide training meetings, on collection of street sweeping data to appropriate municipal staff.	Training for municipal staff on street sweeping, data requirements and state of the art street sweeping methods, was included in WVCWP's June 19, 2006 Storm Drain Operation and Maintenance Supervisors workshop.	Street Maint Supvsr with WVCWP to assist
Corporation Yard				
SWPPP	URMP	SWPPP - Implement BMPs.	The current BMPs are working effectively and no problems have been encountered. The City of Saratoga along with the other West Valley communities plans to hold a round-table review and discussion of West Valley municipal SWPPPs during FY06-07. The corp yard SWPPP and standard operating procedures (SOPs) will be evaluated to determine if revisions or additions to the manual are needed.	Street Maint Supvsr & PW staff
Staff Training	FY05-06 Workplan	Perform Annual Review and evaluation of BMPs w/ Corp-Yard walk-thru	On June 8th, 2006 Saratoga street and park maintenance staff (16 employees) reviewed the City's SWPPP procedures and received training on best management practices (BMPs). A tour of the Corp Yard was conducted. Locations of several absorbent stations were pointed out.	Street Maint Supvsr & PW staff
Rural Public Works Activities				
Rural Public Works Perf Std	URMP	Continue implementation of Rural Public Works Performance Standard	No Rural Public Works construction took place this year. The model Performance Standard has been implemented. SOPs were reviewed and updated as part of the City's Urban Runoff Management Plan revision in 2004.	Street Maint Supvsr
Staff Training	FY05-06 Workplan	Train appropriate Public Works staff on the use of current BMPs and SOPs, as noted in the performance standard.	On June 19, 2006, WVCWP held a Storm Drain Maintenance workshop and gave a presentation for street maintenance staff on BMPs for Rural Public Works. The meeting included a round table discussion among staff from all of the West Valley communities. Requirements of the Performance Standard were reviewed and photo slides of BMPs were shown. Five (5) Saratoga PW staff attended,	Street Maint Supvsr, WVCWP to assist

Activity	Task Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			including the Street Maintenance Supervisor and Park Supervisor.	

Rural Public Works Program Evaluation

Stormwater BMPs are currently discussed in pre-construction meetings with contractors; the City inspects all contracted rural public works work in its jurisdiction and ensures the use of stormwater quality and erosion control BMPs. No capital improvement projects involving Rural Public Works were conducted this year. When future construction of Rural Public Works takes place, measures will be implemented for erosion prevention.

Street Sweeping Comparison for FY04-05 and FY05-06

Fiscal Year 04-05

Curb Miles Swept	Debris Collected	Yard Waste Collected
Residential **2,520 curb miles** swept **Commercial & Arterials** **780 curb miles** swept **Annual Combined Total** **3,300 curb miles swept**	**Residential & Commercial & Arterials** The residential & commercial cubic yards of debris was **not available** because it was not tracked separately in FY04-05. Saratoga changed sweeping contractors in July 2005. Data was tracked separately in FY05-06. **Annual Combined Total** **705 cubic yards** of debris collected	An annual total of **10,939 tons** of yard waste was picked up by garbage collection service during FY 04-05

Fiscal Year 05-06

Curb Miles Swept	Debris Collected	Yard Waste Collected
Missing 1 month's data (July 2005) due to change in contractors **Residential** **2,310 curb miles** swept **Commercial & Arterials** **715 curb miles** swept **Annual Combined Total** **3,025 miles curb miles swept**	Missing 1 month's data (July 2005) due to change in contractors **Residential** **521.5cubic yards** of debris collected **Commercial & Arterials** **108 cubic yards** of debris collected **Annual Combined Total** **629.5 cubic yards** of debris collected	An annual total of **10,771.5 tons** of yard waste was picked up by garbage collection service during FY 05-06

Saratoga

FY 2005-2006 ANNUAL REPORT

Public Agency Activities: Operations and Maintenance Evaluation

Storm Drain Maintenance: The West Valley Sanitation District (WVSD) finished a major task during FY05-06 which will make storm drain cleaning procedures more efficient and the annual SD reports more useful to the WV cities. Since the project began in FY04-05, WVSD staff have been building a database (using asset mgmt software) that would number the storm drains at upstream and downstream locations and provide the street name. FY05-06 was the first year that the enhanced storm drain maintenance reports, with street names, were available to the cities. WVSD presented them at WVCWP's June 19th workshop. The reports document the status of each stormdrain and, if applicable, the nature of any problem. The majority of structures were "clean" but a few were noted as having obstructions (e.g. "leaves/paper"). Other descriptors that are available in the report are: mud/dirt, foreign object, rocks/stone, sand/gravel, etc. All structures, as needed, are cleaned at the time of inspection. The WVSD's report may be used by WV cities to help monitor POC problems, such as trash sites.

Street Sweeping: The City of Saratoga sweeps approximately 210 curb miles of residential streets and 65 curb miles of commercial and arterial streets monthly. In FY05-06, the City was forced to hire a new sweeping contractor. The previous contractor did not track residential and commercial debris separately. This was partly due to the layout of the City. Saratoga is predominantly residential; commercial areas exist as scattered pockets among residential areas and arterials are lined mainly by residential areas. The City took the opportunity to review the Program's data tracking standards with the new sweeping contractor so that optimum sweeping data would be available for annual reporting. However, the City was between sweeping contractors during the month of July 2005. Therefore, the total cubic yards of debris collected for FY04-05 was slightly higher (705 cubic yards) than it was for the current year (629 cubic yards) because one less month of debris was collected in FY05-06 due to the change in sweeping contractors.

While the amount of debris collected in Saratoga (629.5 cubic yards) through street sweeping is relatively little compared to Campbell (2,026 cubic yards) or Los Gatos (4,138 cubic yards) the amount of yard waste collected is substantial (10,771.5 tons) compared to Los Gatos (9,250.7 tons) and Campbell (6,609 tons). Regarding yard waste collection, the West Valley Communities have selected a new contractor to provide garbage & recyclable collection. The new contract will begin in March 2007. Yard waste collection methodology and tracking may change when the current contract with Waste Management expires.

The WVCWP Mgr gave a street sweeping presentation at the June 19th West Valley Storm Drain Maintenance workshop, based on a Street Sweeping workshop held on 5/8/2006 in San Jose. The principal speaker at the 5/8/06 workshop was the editor of Worldsweeper.com. He provided material for the WV training. The Town of Los Gatos purchased a new Street Sweeper and used it for the first time in FY05-06. The Town's Sweeper Operator drove the street sweeper to the WVCWP workshop for viewing and questions by other municipal staff. The Town PW Superintendent gave a brief talk on why this model of sweeper was selected. According to the PW Superintendent, this PM10 certified regenerative air sweeper will generate fewer dust particles than the Town's previous model of sweeper. This type of sweeper is required in Southern California, but not yet required in Northern CA.

Saratoga's new street sweeping contractor provided sweeping schedule post cards (schedule is also on the City's website) for the City to mail out to remind residents that cars must be moved off the street by 6.a.m. on the day sweeping is to occur.

Training Evaluation: Workshop evaluation forms from the 6/19/06 WVCWP Storm Drain Maintenance Workshop showed that all attendees thought the workshop was "informative and worthwhile." Attendees also requested continued updates on storm drain maintenance and street sweeping practices. Most of those who attended stayed for the optional discussion between cities at the end of the workshop.

Corporation Yard SWPPPs: The West Valley communities have included a task in their FY 06-07 workplans to hold a round table meeting with municipal staff to review and update, if necessary, corporation yard SWPPPs. The outcomes from this meeting and any SWPPP revisions will be reported in next year's annual report.

		into the City's project approval process.)		
Training		Provide incremental training on HMP requirements to City staff via SCVURPPP workshops and/or in-house staff training.	On 7/19/05, the City PW Analyst attended a WVCWP-run discussion on early HMP implementation opportunities. On 1/26/06, the City's PW Analyst, an Associate Planner, and the Associate Civil Engineer attended a workshop on the updated HMP. This WVCWP-sponsored workshop was presented by Jill Bicknell, of SCVURPPP, and held in Monte Sereno.	SCVURPPP/ City Engineer / Public Works & Community Development Dir
Reporting	C.3.f.viii	Provide development and implementation status and a summary of projects incorporating HMP measures in the Annual Report	There were no HMP-regulated projects submitted in FY '05-'06.	Assoc. Engineer
C.3.g Waiver and Compensatory Mitigation Program				
Waiver Program or Alternate Compliance	Permit C.3.g.	Currently a waiver or alternate compliance program is not offered by the City. Stormwater treatment BMPs will be required on all Group 1 and Group 2 projects. Any proposed alternative compliance must meet Provision C.3.g.vi conditions, and first be approved by the Water Board's Executive Officer.	All applicable projects are required to implement C3 requirements without using alternative or off-site compliance measures. The City does not foresee using a Waiver Program.	Community Dev Dir & Public Works Director
C.3.h Alternate Certification				
Alternate Certification reporting	(Permit C.3.h)	If alternate certification is used, list the projects certified by someone other than City staff and mechanism for ensuring that outside certifiers are qualified.	The project applicant is responsible for having all stormwater measures certified for adequacy, according to the requirements of Provisions C.3.d & C.3.f and C.3.h. The City uses the City of Sunnyvale and BASMAA lists of qualified civil engineers to determine who is allowed to certify C.3 compliance for private development projects. Saratoga did approve any Group 1 or Group 2 projects for construction or grading in FY05-06.	Assoc. Engineer & Public Works Director

Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2005-2006 ANNUAL REPORT

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
C.3.j Site Design Measures Guidance and Standards Development				
Site Design Measures Guidance and Standards	(Permit C.3.j.)	As feasible, continue to review local site design standards and guidance for possible revisions that would reduce impacts to water quality. Summarize updated status, if any, in the Annual Report.	In March 2006, a City code revision went into effect to encourage reduction of impervious surface by reducing minimum parking requirements in the "Village", Saratoga's downtown area. Municipal Code ,15-35.020, General requirements and regulations for off-street parking spaces, (Subsection K) may be viewed online at: http://www.bpcnet.com/codes/saratoga/ The City strives for consistent application of BMPs from *"Start At The Source"* into large single-family residential and commercial projects, as is practical for each individual site's conditions. Swales with sub-drains are required wherever feasible and the City provides the developer/design team with technical guidance on their design. When appropriate, the City also uses conditions of approval to require large projects to dedicate open space and/or public trail easements. The current zoning regulations require a minimum setback of 25 ft from the top of the creek bank. However, the City discourages creek setbacks of less than 50ft. Applicants are referred to the Santa Clara Water District to obtain permits for creek set backs of less than 50ft. Saratoga staff expects that the City will adopt SCVWD-based code amendments or policies related to reviewing development projects near streams in January 2007. The City will continue to evaluate local site design standards to determine any necessary revisions.	Associate Planner/City Engineer/ Community Development Director

Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2005-2006 ANNUAL REPORT

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
C.3.k Source Control Measures				
Source Control Measures	Permit C.3.k.	Whenever practicable, stormwater pollutant source control measures are incorporated into all development projects.	The City will continue to evaluate its source control BMP requirements to determine any necessary revisions.	Associate Planner/Plan Examiner
C.3.l General Plan Update				
General Plan	Permit C.3.l	Revise General Plan, at next planned update, to reflect principles and policies needed to address C.3 requirements.	Saratoga is currently updating Open Space/Conservation element of the General Plan to include urban runoff pollution prevention. The City expects updates will be completed by the end of FY06-07.	Community Dev Dir & Pub Works Dir
C.3.m Water Quality Review Processes				
CEQA Review	C.3.m.1	City will continue to evaluate water quality effects & identify mitigation measures when conducting Env Review Process for all projects, consistent with the City's URMP and Program guidance. If applicable, make note of updates to the Environmental Review process in the Annual Report.	No changes were made in FY '05-'06 to Saratoga's environmental review process. However staff in the City's Public Works and Community Development Departments will continue to evaluate implementation of CEQA and C.3 requirements to determine any necessary revisions to environmental review procedures. The City of Saratoga ensures that the required environmental documents (EIRs, negative declarations, and initial study checklists) for those projects that fall under CEQA review, address both significant and cumulative stormwater quality impacts during the life of the project. Relevant permit requirements and specific mitigation measures related to stormwater management are examined and included where applicable.	Associate Planner / Community Development Dir

Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2005-2006 ANNUAL REPORT

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
C.3.n Reporting Requirements				
C3 Project Reporting	Permit C.3.n.i. (C.3.c.)	In Annual Report, list Group 1 and Group 2 projects by name. Include location, project type (per C.3.c.), size (ac. or sq. ft.), and impervious surface area. Report square footage of land disturbed for redevelopment projects.	No projects in the Group 1 or 2 categories were approved or submitted this year.	Assoc. Engineer & Assoc Planner to collect data
C3 Project Reporting	Permit C.3.n.ii. (C.3.c.)	Report on type of treatment BMPs used, numeric sizing criteria used, O&M inspections and if needed, follow-up actions. Also list site design measures used, and source control measures required.	No projects in the Group 1 or 2 categories were approved or submitted this year.	Assoc. Engineer to collect data
Reporting - Pesticide Reduction Measures	Permit C.3.n.iii. (C.3.c.)	For projects addressed under C.3.c (Group 1 and Group 2), report on the types of pesticide measures required and the percentage of projects for which pesticide control measures were required.	No projects in the Group 1 or 2 categories were approved or submitted this year. However, the following are used in Saratoga to discourage pesticide use at new and redevelopment sites: 1. Where feasible, landscaping shall be designed and operated to treat storm water runoff by incorporating elements that collect, detain and infiltrate runoff. In areas that provide detention of water, plants that are tolerant of saturated soil conditions and prolong exposure to water shall be specified. 2. Pest resistant landscaping plants shall be considered for use throughout the landscaped area, especially along any “hardscaped” area. 3. Plant materials selected shall be appropriate to site specific characteristics such as soil type, topography, climate, amount and timing of sunlight, prevailing winds, rainfall, air movement, patterns of land use, ecological consistency and plant interactions to ensure successful establishment.	Assoc. Engineer, Community Development Dir, Associate Planner and Public Works Administrative Analyst

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
			4. Existing native trees, shrubs, and ground cover shall be retained and incorporated into the landscape plan to the maximum extent possible. 5. Proper maintenance of landscaping, with minimal pesticide use, shall be the responsibility of the property owner.	

Planning Procedures Evaluation

All projects subject to City of Saratoga development plan review and approval procedures are encouraged to incorporate appropriate source control and site design measures to minimize stormwater pollutant discharges to the maximum extent practicable.

City Public Works staff continue to coordinate very closely with the Community Development Department to ensure that all development projects are conditioned properly for storm water quality requirements. In addition, Public Works staff assist developers and their design team members with C.3 technical and legal issues (specifically bio-swale design and the BMP O&M agreement). For projects requiring bio-swales, the Associate Engineer provides the developer with design drawings. The City has received positive feedback from designers – they appreciate knowing exactly what the City wants and seeing detailed examples.

Several times during FY ’05-’06, Public Works and Building staff met to discuss how best to manage BMP O&M Verification inspections (to date, none have been needed). The outcome of these discussions was the decision to use City staff, instead of an outside consultant, to perform these inspections.

The City of Saratoga requires that developers of Group 1 and Group 2 Projects design and implement the following measures to reduce stormwater pollution to the maximum extent practicable.

a. Site design shall include measures to minimize impervious land coverage, maximize infiltration (where appropriate and designed to protect groundwater quality), and provide detention or retention as part of landscaping where feasible;

b. Source controls shall be required to limit pollution generation, discharge, and runoff as appropriate, including measures to discourage pesticide use;

c. Stormwater treatment measures shall be designed in accordance with the numeric design criteria in Provision C.3.d;

d. Continued operation and maintenance of BMP treatments shall be ensured by the developer and future property owners by legal document and continued O&M of BMP treatments shall be verified (inspected) by Saratoga Public Works staff at appropriate intervals in perpetuity.

e. Increases in peak runoff flow and volume shall be managed for appropriate projects by implementing the guidance in the Program’s Hydromodification Management Plan (HMP) for the specific stream receiving the discharge.

Attachment 4A

City of Saratoga
Standard Operating Procedures
BMP Operation and Maintenance Verification Program
(NPDES Permit Provision C.3.e)

Saratoga's BMP O&M Verification Program, an excerpt from the City's URMP

As a condition of the development permit, each owner of a Group 1 or Group 2 project in Saratoga is required, through Planning Commission resolution, to enter into a recorded covenant with the City for on-going operation and maintenance of all permanent on-site BMPs. This obligation runs with the land and is binding on all future owners of a Group 1 or Group 2 property. The City uses a standard condition of development approval to notify developers of this requirement.

The City keeps records of the location, ownership, and inspection status of permanent BMPs at private and public Group 1 and Group 2 properties by collecting an NPDES Permit Provision C.3 Data Form for each Group 1 or Group 2 projects. The City forwards a copy these forms to the West Valley Clean Water Program (WVCWP) for annual reporting, as they are collected.

Once the project is completed, the Saratoga Public Works Inspector will inspect the BMPs at each Group 1 or Group 2 site annually. Any enforcement issues would be referred to the Saratoga Code Enforcement Officer for further action.

Permanent BMP Operation and Maintenance Responsibilities

Owners of Group 1 and Group 2 properties are required to operate and maintain permanent on-site BMPs in perpetuity. As a condition of the development permit for these projects, owners must enter into a written, recorded covenant with the City to this effect. Each year, these owners must submit proof to the City that they have met this requirement.

Since the City anticipates very few Group 1 projects, initially BMPs at all Group 1 and Group 2 properties will be inspected annually by the Public Works Inspector. The Public Works Inspector will refer any enforcement issues to the City's Code Enforcement Dept for further action. To determine if inspecting BMPs at every applicable site is cost-effective, the City will re-evaluate the Saratoga BMP O&M inspection program each year, as part of annual report preparation.

STANDARD OPERATING PROCEDURES FOR SARATOGA'S PERMANENT BMP OPERATION AND MAINTENANCE INSPECTION PROGRAM

Selection of Annual Permanent BMP O&M Inspection Sites

- Permanent BMPs at all Group 1 and Group 2 Project properties will be inspected annually, in March.
- In the future, depending on the total number of Group 1 and 2 properties in Saratoga, the City may develop criteria for inspection of a subset of these sites, as allowed under NPDES Permit Provision C.3.e.

Permanent BMP O&M Inspection Program Responsibilities

- The City Public Works staff will collect and track all Group 1 and Group 2, Saratoga NPDES Permit Provision C.3 Data Forms. The City forwards a copy of these forms to the Public Works Inspector and to the WVCWP as they are collected.
- The City of Saratoga Public Works staff maintains a database for permanent BMP construction and BMP O&M inspection and enforcement for all Group 1 or Group 2 Projects.
- The City of Saratoga's Public Works staff will submit a Permanent BMP O&M Inspection report for the previous fiscal year to the WVCWP Manager by July 15th of each year.
- The WVCWP Manager will include BMP O&M inspection data in the Annual Report.

Permanent BMP O&M Pre-Inspection Preparation

- The Public Works Inspector will review the City of Saratoga's NPDES Permit Provision C.3 Data Forms at least two weeks prior to beginning annual inspections.
- The City of Saratoga Public Works Inspector will contact each Group 1 and Group 2 site owner/manager by telephone to arrange a mutually agreeable inspection appointment.
- Prior to each site inspection, the Public Works Inspector will review the site's Storm Water Management Plan, including any applicable as-built construction plans, for BMP information, including BMP types and locations. At this time, the Inspector will also review the site's current BMP O&M self-certification report, any previous inspection reports, and any necessary special procedures (e.g., inspection forms, underground confined space entry).
- The Public Works Inspector will review the applicable CASQA or SCVURPPP BMP fact sheets and any other information on the BMP O&M Inspection Program that may be useful in addressing questions or comments raised by BMP owners or operators during the inspection.
- Prior to each site inspection, the Public Works Inspector will assemble the necessary equipment and supplies.

Permanent BMP O&M Inspection and Enforcement Procedures

- Upon arriving at the inspection site, Public Works Inspector will contact the site manager/owner and explain the purpose of the visit.
- Permanent BMP O&M inspection by the Public Works Inspector will be in accordance with an approved inspection checklist.
- Inspection results will be logged in writing using the permanent BMP O&M inspection checklist.
- If any deficiency is noted during the inspection, the Public Works Inspector will notify the Saratoga Code Enforcement Section in writing, including information on location, the nature of violation and any needed follow-up.
- The Saratoga Code Enforcement Section will prepare a written Notice of Violation including a copy of the BMP O&M inspection form, a list of corrective actions needed and a compliance schedule. The City will send this Notice of Violation to the to the Group 1 or Group 2 property owner/manager within ten working days of an inspection.

- The Public Works staff will enter the permanent BMP O&M inspection information, including any violations, into the Permanent BMP O&M Inspection database.
- The property owner and, if applicable, the site manager, will be instructed by the City Code Enforcement Officer to notify the Public Works Inspector within the time period indicated on the Notice of Violation so that the facilities can be reinspected. The Inspector will complete a new inspection form, noting whether all recommended maintenance activities have been completed and if any other actions are needed to assure proper operation of the facility.
- If repairs are not undertaken or are not done properly within the time allocated in the compliance schedule, the Public Works Inspector will refer the matter to the Public Works Director, which will begin enforcement proceedings.
- Once all necessary repairs have been completed, the Public Works Inspector will note this in the database, including the date work was completed and any other pertinent information (such as if City intervention was required to complete corrective work).

Background Data for BMP Type

The *Standard Stormwater Treatment BMP Inspection Data Collection Form* (Inspection Form) lists twenty stormwater treatment BMP types (see Section III). Inspectors, data entry staff and others who use the Inspection Form can refer to the California Stormwater Quality Association (CASQA) and SCVURPPP Fact Sheets for background information. The CASQA Fact Sheets are numbered (see below) and are located in the CASQA *Stormwater BMP Handbook for New Development and Redevelopment,* as well as SCVURPPP's *C3. Stormwater Handbook*. The SCVURPPP Fact Sheets are also located in the *C3. Stormwater Handbook.* Both Handbooks are available online.

<u>CASQA Reference Number</u>
Bioretention TC-32
Drain Insert MP-52
Extended Detention Basin TC-22
Infiltration Basin TC-11
Infiltration Trench TC-10
Media Filter TC-40 and MP-40
Retention/Irrigation TC-12
Vegetated Buffer Strip TC-31
Vegetated Swale TC-30
Vortex Separator MP-51
Water Quality Inlet TC-50

FY 2005-2006 Work Plan Self Evaluation Matrix

Source	05-06 Work Plan Activity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
	URMP	Staff Training Participate in and support SCVURPPP sponsored workshops/ info sessions on erosion control and construction BMPs; support distribution of related materials.	On December 8th WVCWP IC/ID Inspector and Manager attended the Water Board's Construction Site Management and Erosion Control BMPs Workshop and spoke to attendees about the organization of the WVCWP, the need to report all construction and erosion incidents and how trend analysis determines how programs conduct public outreach (to effect behavior changes). Saratoga's Public Works Analyst attended the Water Board (SFEP)-sponsored Construction and Erosion Control Workshop on Dec 9th 2005 at Campbell Community Center. Workshop material was discussed at Saratoga's in-house training. On May 8, '06, eight (8) Saratoga staff members, including building/construction inspectors, a plan check engineer and other PW staff, participated in an in-house training session featuring the video "Hold Onto Your Dirt".	SCVURPPP or WVCWP coordinates, City staff to attend

SARATOGA

FY 2005-2006 ANNUAL REPORT

	URMP	Construction Inspections Continue construction site inspections for stormwater issues (i.e., mudtracking, mat'l storage, housekeeping, etc.).	During FY05-06, Saratoga PW staff inspected 358 construction projects including 7 grading projects, 33 new single family dwellings, 153 additions to single family dwellings, 81 remodeling projects, 36 swimming pools and 4 new commercial buildings. This also included new garages, & demolition projects. The Building Official says the inspectors and other Public Works staff are on constant lookout for storm drain problems. Projects that were problematic received daily drive-by spot checks by City inspectors. Projects that were clearly well controlled were inspected at least every 2 weeks during the rainy season. See attached spreadsheet.	Pub Works Building Official & Const/Eng Inspectors, PW Analyst to coordinate

SARATOGA

FY 2005-2006 ANNUAL REPORT

Construction Inspection Evaluation

Construction Site evaluation of trends:

FY05-06		Previous Year - FY04-05	
Allowable Discharge – listed as Complaint Not Found	0	Tracking Soil	2
Grey Water Discharge - resolved	1	Vehicle and Equipment Leaking	1
Complaint not found (Citizen reported - Looks okay to inspector)	1	Unhardened Cement discharge	1
Misc. Incident (Site a mess – resolved - cleaned up per inspection)	1	Complaint not found (in compliance, saw slurry vacuumed)	0
		Misc. Incident (a proactive follow up from previous year)	0
Total Number of Incidents	4		4

Coordinated efforts between the City's building inspectors and the WVCWP Inspector are working well. Potential incidents reported by other agency staff or citizens, are inspected and re-inspected through to final resolution, by the WV Inspector. This year the WVCWP Inspector went out on 4 potential incident reports. All sites that have been issued a Notice to Comply and then have been resolved are revisited, pro-actively, during the following year. See the Construction Site Incident table following this section.

The number of incidents is the about the same as the previous year. Tracking soil accounted for 2 incidents last year. Other than that each incident type was responsible for only one violation. Generally the most common incident in Saratoga is not related to construction but to draining pools. However, the City made a concentrated effort to distribute pool brochures to all new owners in addition to the mail-out to all pool owners last year. The pool brochure is also on display at the City's planning counter

Last year's actual violations totaled 4 and this year's actual violations totaled only 3. In general the number of incidents remained about the same. Most Construction Site incidents in 05-06 were related to draining excess water (rain) to the storm drain. Inspectors are always on the lookout for problems. They continue to educate the contractors and visit the sites more often. Public Outreach to residents and educational visits from the WVCWP Inspector will continue to reduce the number of residential violations.

Construction Site Erosion Control Workshops, WVCWP arranged with SFEP to hold the Santa Clara Construction/ Erosion Control Workshop on Dec 8th and 9th in 2005, at Campbell's Community Center. City of Campbell provided the venue so that the workshop could be held after the preparation time for rainy season when inspectors have more time to attend trainings.

The Construction Inspection Program currently works well – Continued public outreach efforts and further training n communication between municipal inspection staff and the WV Stormwater Inspector is planned for FY06-07.

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
A. SCV Program Projects/Support				
	SCV Program PMP (II.A.1)	a. Watershed Education and Outreach Campaign Support multi-year watershed education and outreach campaign.Participate in campaign development and special projects. If funding is available from the SCVURPPP Budget, campaign will include funding for educational programs at the Alviso Ed Center and funding for ZunZun performances in local schools. As SCVURPPP Budget permits, continue establishing partnerships with local recreational attractions to promote watershed messages. See SCVURPPP Project Work Plan for details.	*WEO:*.WVCW Pgm Mgr assists via active participation in WEO Ad hoc Task Group. *Happy Hollow Halloween Event on Sunday 10/30/05* 1 WVCWP staff member & 1 WVCWP volunteer assisted at this event..2 WVCWP mascot costumes were used: a Clapper Rail & a Saltmarsh Harvest Mouse. Wearing the costumes, they handed out educational materials and gave visitors an opportunity to play a watershed Bean Bag Game. The game teaches players to select destinations (stormdrains, sanitary sewers, or hazardous household waste drop-off) for water and other materials or substances. *Home and Garden Show on Saturday and Sunday 5/6/06.* 2 WVCWP staff worked two shifts at the San Jose Convention Center. In addition to program materials WVCWP staff handed out pencils engraved with water pollution prevention messages and the WVCWP website address. Topics of interest were safe fluorescent bulb disposal, safe paint and pesticide disposal; less-toxic gardening methods. Some people were interested in controlling specific pest infestations. A few parents asked if WVCWP would visit	WVCWP staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			their child's classroom to give an Enviroscape presentation WVCWP staff talked to at least 150 visitors to the booth. WVCWP arranged for 2 Program-sponsored Zun Zun assemblies to be presented at Saratoga Elementary School (May 2, 2006). The assemblies were provided to the School as a thank you for Saratoga students' and parents' participation in a Creek Clean-up on April 1st. The school received two (2) vocabulary lists (one for K-2 and one for 3-6) and an information sheet about the assembly content for teachers to refer to. Teachers were asked to familiarize the students with the vocabulary words prior to the assembly. Teachers also questioned students after the assembly to determine what was learned. The results are summarized in the Program's FY05-06 Annual Report.	
	NPDES Permit, PMP (II.A.12)	b. Pesticide User Outreach Project If SCVURPPP Budget allows, provide funding and participate in implementing IPM Store Partnership and Household Chemical Management Projects. Project scope will include items in Program's Pesticide Management Plan based on provision c.9.d. of the Permit for outreach to residents, commercial businesses, and pest control operators.	The WV Clean Water Program Manager participated in the SCVURPPP IPM Ad Hoc Task Group. See SCVURPPP Annual Report for details on accomplishments. See above: *Home and Garden Show on Saturday and Sunday 5/6/06.* *Orchard Supply Hardware store point-of-sale IPM -May 23, 2005* West Valley staff helped the SCV Program and *Our Water Our World* staff to set up Sunnyvale's Orchard Supply Hardware store's gardening aisles with 'shelf talkers' which relay IPM information to customers. Shelf talkers educate the general public on less-toxic methods to control pests and on child- and pet-safe solutions for homes and gardens. *March 22, 2006 Turf Workshop*	WVCWP Staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			Attendees included municipal staff from Campbell, Los Gatos and Saratoga and supervisor for Los Gatos private golf course. School Districts, golf course staff and press were invited. Cornell University Turf Specialist presented latest research in management methods to reduce pesticide use on turf. Evaluation comments included "Great Presentation/Program" and "Learned a Lot!" See "Pesticide Management" section "*Training for Applicators*". Formerly, WVCWP worked directly with the **Summerwinds Garden Center** in Campbell to provide IPM educational materials and to coordinate with Our Water Our World and SCVURPPP activities. In the interest of streamlining activities, SCVURPPP is now working directly with this garden center, and WVCWP is no longer their main contact.	
	NPDES Permit, Provision c.9.c.	c. Mercury Pollution Prevention Outreach This project will encompass local implementation of the Program's Mercury Pollution Prevention Plan including public education on: 1) the effects of mercury in the environment, and 2) products containing mercury and proper disposal of such products	*Fluorescent Lightbulb Recycling Flyer* WVCWP worked to update and improve its flyer created last year, listing local drop-off points (5 hardware stores) which are part of the fluorescent bulb residential drop-off program. Hours and location of stores are listed, along with HHW contact info. The flyer now reminds residents that **it's illegal to put fluorescent bulbs in the trash or home recycling bins**. The flyer was distributed at community events.	WVCWP Staff
		Outreach Event	*January 28, 2006 **Free** Hazardous Waste Recycling Event* - for recycling of TVs, monitors and laptops. Event was	WVCWP Staff to coordinate

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
		Not part of Work Plan – additional activity	sponsored by all four West Valley Cities through West Valley Clean Water Program. The event was held at Los Gatos Municipal Yard, and Los Gatos and Saratoga staff assisted. The event was for West Valley businesses, residents and schools. **Flyers/posters, press releases and an ad were created** for this event noting that E-waste can leach toxic metals (i.e., mercury) into our water, and that by using a responsible recycler we can help prevent export of our waste to foreign dumps where mercury leaches into the environment. (See above row for details on outreach materials). Over 250 cars brought E-waste for recycling. Posters placed around the site highlighted the environmental affects of improper E-waste disposal. One high school coordinated with WVCWP prior to the event, and dropped off pallets of E-waste on the previous day.	

Public Information/Participation Program EVALUATION - *SCV Program Projects/Support*

Zun Zun Assembly: WVCWP received an evaluation courtesy of the School Principal's Assistant: "Yes, it was very much enjoyed by all."The kids learned a lot, now know what a watershed is, understand the environmental issues. The 1st grade teacher was very impressed.... I thought it was very cute. I learned some things too!" The final comment that "I learned some things too!" reinforces what WVC staff have generally found to be true: adults may be more receptive to learning about stormwater issues, and proper behavior, if the messages are funneled through the children.

Mercury Outreach/ E-Waste Recycling Event: WVCWP used a portion of staff time and funds to organize a Free E-Waste Recycling Event for West Valley residents, businesses and schools, and to publicize Mercury issues while doing outreach for the event. The WVC were challenged in trying to decide on a

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
meaningful way to reduce mercury and copper discharges. WVCWP pursued an opportunity to reduce the illegal dumping of televisions and monitors (esp with the increase in sales of flat screen products and the obsolence of many TV and computer monitors). UNITED DATATECH was willing to help the WVC conduct this service at no cost. The television that was pulled out of a Los Gatos creek in December emphasized the importance of this event. The *Los Gatos Weekly* and the *Saratoga News* ran articles about the TV in the creek; these papers, along with the *Campbell Reporter* and the *Los Gatos Daily News*, printed details about the WVCWP event. A January date was chosen, so that residents could dispose of outdated E-waste if they had received new electronic items during the holidays in December. Outreach was conducted during December and January. Outreach included press releases and flyers which were sent to Campbell, Los Gatos and Saratoga Chambers of Commerce and School Districts. This resulted in the information being posted on Chamber and School websites and in electronic e-mails, so that it reached thousands of citizens. Funds were also used to retain a PR firm which worked with WVCWP to develop an eye-catching newspaper ad, and a timely, captivating newspaper article. WVC felt that this outreach money was well-spent in a successful, low-budget media campaign that increased awareness of mercury issues. The outreach included information on mercury toxicity, and the need to prevent mercury (and other E-waste) from landfill dumping, where it can leach into water – both at home or abroad. A strong emphasis was placed on the fact that the event was organized with a responsible recycling firm, which would use appropriate recycling methods for all materials. Residents responded with overwhelmingly positive feedback. Some had been saving monitors and TVs for years. The event was very successful in that over 250 cars brought E-waste, and a high school arranged to bring over pallets of E-waste. Residents want more events like this one, since it makes a difference. WVCWP staff will plan one for FY06-07. (See *Mercury Pollution Prevention Activities* section for further details.)				
B. WVCWP Joint Projects				
GENERAL OUTREACH				
General	NPDES Permit, Provision c.4.and c.9	a. Distribute Materials. Distribute public information materials at civic centers, libraries, building and planning department desks. Provide pesticide management materials to: 1) nurseries and hardware stores for distribution at point-of-sale; and 2)	WVCWP evaluated and ordered a new outreach item for use with children/students: "Pest or Pal" – a coloring book with text related to IPM and less-toxic pest management. The item was well-received. ***LIBRARY STORY TIME 9/05 at SARATOGA LIBRARY*** KIDS STUFF - 29 OWOW magnets	WVCWP Staff & WVCWP Staff to coordinate with municipal staff

			8,367 Flyers were distributed to schools and sent home with students (Outreach Flyer for watershed-themed activities at Don Edwards Nat'l Wildlife Refuge/Alviso Educational Center)	
	General Outreach	Creation of new outreach materials Extensive educational outreach on mercury was conducted in relation to the WVCWP-sponsored free Hazardous Waste Recycling Event.	**Created Flyers/Posters and Newspaper Ad targeting Mercury toxicity & safe E-Waste disposal** *E-Waste Recycling Event* : A large portion of the PIP budget was used to pay for the **development and placement of a newspaper ad**, which ran in 3 West Valley community newspapers* on January 25, 2006. See the copy of the ad at the end of this section. *Campbell Reporter: readership - 50,200, Los Gatos Weekly Times; readership 54,200 and Saratoga News; readership 24,600. The ad was also printed as a color poster. **50 color posters were placed** at schools, post offices, office supply stores, real estate offices, community centers, senior centers, municipal buildings, etc. Approx. **50 black & white posters were given to real estate offices** for distribution to clients who might be moving & discarding TVs, monitors, etc.	WVCWP Staff
	General Outreach	Creation of new outreach materials **Not part of Work Plan – additional activity**	**Developed & distributed pencils with stormwater themes:** WVCWP staff developed numerous stormwater slogans suitable for printing onto pencils. A variety of local residents and municipal staff were polled for the most effective slogans. 4 slogans were chosen; **250 pencils of**	WVCWP Staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			each slogan (1000 pencils total) were printed on pencils made of recycled materials. The WVCWP website address was included to encourage residents to contact WVCWP. Slogans included: • Don't Taste the Waste • Pick It Up Before We Drink It Up • Get The Scoop…Don't Pollute…Every Litter Bit Hurts • Only Rain and Sunshine In The Street Drains The pencils proved to be very popular items with residents and have been a successful outreach tool. (see Materials Distributed)	
	General Outreach	Creation of new outreach materials **Not part of Work Plan – additional activity**	**City of Saratoga – Streetsweeping Postcard** The City created a multi-color postcard announcing its new streetsweeping contractor. The card stressed the importance of streetsweeping, listed route schedules and asked that cars be moved prior to sweeping. A contact number was included. The card was sent to all Saratoga households.	Saratoga PW staff

Public Information/Participation Program EVALUATION – *B. Joint Projects: General Outreach – Materials Distribution*

OUTREACH MATERIALS

The "Grow-It Guide" continues to be the most popular IPM literature. Although WVCWP and the cities/town make available a variety of IPM materials at public places and community events, it is most common for residents to pick up only the Grow-It Guides.

Items for children are also popular. WVCWP continues to search for affordable, fun and informative children's outreach material. The "Kids Guide to Backyard Bugs" is always popular, but supplies are very limited, so these are distributed sparingly. Many more would be taken, if they were available. This year WVCWP evaluated a children's coloring book: "Pest or Pal" – a coloring book with text related to IPM and less-toxic pest management. The item was well-received. However, it is rather high-priced to be given out in large numbers.

WVCWP also purchased numerous copies of a hard bound picture book **"All The Way To The Ocean"** -- depicting how stormdrains carry trash & other pollutants into nearby water bodies. The book was donated to classes which held Enviroscape presentations as a "Thank You". The book will also serve as a means for teachers to introduce the subject to their classes in coming years, prior to the students viewing the Enviroscape. Copies kept at WVCWP can also be loaned to schools and libraries when a book is needed for a Story Time situation.

Efforts were directed to finding an inexpensive, desirable item which people would be happy to pick up at events, and which would reinforce Stormwater messages. WVCWP was also looking for something with its website address, which would be kept around the home so that residents could refer to it in order to be able to reach the website easily. WVC decided on using pencils made of recycled denim (blue) and recycled money (green). Slogans were chosen and printed on the pencils, along with the website address. The pencils proved to be very popular outreach items, and were found to be a good way to keep the subject and the website address in front of people.

Another effective outreach piece was a flyer created to promote new watershed-themed youth programs at Don Edwards Nat'l Wildlife Refuge. Schools in the Campbell School District agreed to pass these out to their students, so that they could be taken home. In June 2006, **8,367** of these were distributed through 6 schools in the District. The Education Center at **Don Edwards subsequently reported a noticeable increase in calls and participation related to youth programs**.

Extensive outreach was conducted concerning the E-Waste Recycling Event in January 2006. Posters were placed in numerous public places and flyers were distributed to Real Estate offices. However, based upon response from those who attended the event, it appears that the overwhelming majority of attendees learned about the event through ads and articles in the local weekly newspapers.

GENERAL OUTREACH				
Source	**WP Task**	**FY05-06 Work Plan Tasks**	**FY 05-06 Accomplishments**	**Responsible Party**
General	NPDES Permit, Provision c.4 and c.9 & PMP (II.A.4.)	b. Participate in Community Events 1) Promote watershed messages by participating in community events (e.g., farmers market, festivals, creeks clean-ups, etc.). 2) Conduct or participate in local activities that are coordinated with the Watershed Education & Outreach campaign (as budget permits). 3) including outreach events targeted at pesticide users.	**1)** *Saratoga Library Story Time Sept. 05:* the Library used a "Rivers" theme for its Story time. WVCWP Coordinated with the library to make Enviroscape presentations at the evening Story time. WVCWP arranged fto have 2 books read, related to watersheds and wildlife in local creeks. The Enviroscape was used to demonstrate runoff issues. Approx. 27 children participated and approx. 21 parents viewed the presentations. Numerous materials were taken. SEE ATTACHMENT PIP 6A FOR A PHOTO OF THE ACTIVITY **2)** *Audubon Wildlife Fair 10-22-06* WVCWP partnered with local Sierra Club chapter & Audubon Society to present a table at Audubon's "Wildlife Education Fair". Table featured: Enviroscape hands-on watershed model demonstrating pesticide pollution in runoff, a display on dangers of diazinon for birds, and IPM materials; Sierra Club distributed California Golden Poppy seeds to promote pest-resistant planting. The Wildlife Fair is held at the Audubon facility along City of Saratoga's northern border. Approx. 25 children participated in the Enviroscape, with over 25 parents watching. Participation was less than previous years due to	WVCWP Staff WVCWP Staff to coordinate with Municipal Staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			the presence of a SCV Water District table with Enviroscape, which attendees saw first, in the flow of traffic. **3)** For participation in Program WEO events, see "**A. SCV Program Projects/Support"** at the beginning of this PIP Section. **4)** *"Tax Free Day" at OSH (bordering Saratoga & Campbell) 10-8-05* Spoke with at least 45 customers and employees (some with family or friends who are not included in this total). Gave out HHW, & IPM Materials (see above). Talked to customers about disposing fluorescent bulbs at HHW or bringing bulbs back to OSH (this site was a partnering drop off location). One elementary school teacher expressed interest in an Enviroscape presentation for 5th grade. **MUNICIPALLY-SPONSORED EVENTS** **CAMPBELL** *Creekside Clean Up* Public Works staff organized and supervised a community creekside Clean-up event at which materials were also distributed. The Clean-up was held in conjunction with "Keep California Beautiful". **CAMPBELL**: Events with Materials Distributed *Arbor Day* Public Works staff organized and supervised an Arbor	

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			Day event at which materials were also distributed. *Neighborhood Meetings* Public Works staff sponsored 2 Neighborhood Meetings at local schools. Stormwater runoff was among the issues discussed, and materials were distributed. **LOS GATOS** *Farmers Market Event 4-9-06* WV Staff and one volunteer presented water quality topics using the Enviroscape model. Fifty people visited the booth. IPM materials and WVCWP Pencils were distributed. **SARATOGA**: Events with Materials Distributed *Building Bridges Event Oct 9, 2005* Saratoga City staff distributed materials at the "Building Bridges" event at West Valley College. Materials concerning HHW, Copper, Mercury and IPM were distributed. *Mustard Walk Feb. 2006* This family event is based upon the Heritage Orchard and serves as an appropriate place to distribute gardening/IPM materials. City staff place decorative baskets with IPM literature for residents to take. Grow-It Guides and WVCWP pencils were the most popular items.	
General	NPDES Permit, Provision c.4 and	c. Prepare City Newsletter Articles Prepare and contribute articles of interest	The Summer ***Campbell Profile*** (mailed to all Campbell residences) included the following articles:	WVCWP Staff

			Press Release for 9/17/05 Creek Clean-up – e-mailed to Westmont High School 8/30. PR was posted on school website, and included in daily email bulletin. **Oct. 05** In response to a Press Release, the San Jose Mercury News, on 10/15/05, printed an article on a Town of Los Gatos Trash pick-up event, sponsored by a local church. The church had asked Town staff for recommendations on useful volunteer activities, and the litter pick-up was suggested and was a successful event. **March 06:** Press release to gardening columnist for 3 local papers; information on upcoming Less Toxic Turf Management workshop and invitation to attend workshop. **April 06:** In response to a press release, the Saratoga News printed a brief article on the upcoming Creek Clean-up along Saratoga Creek in Saratoga Village. **May 06** Press Release for 5/20/06 Creek Clean-up – e-mailed to Westmont High School. PR was posted on school website, and included in daily email bulletin.	
General	FY05-06 CI Item	f. WVCWP Web-Site Continue to expand and update WVCWP web-site to provide new educational material to the public e.g. on IPM, mercury, trash, copper/nickel & HHW.	• **December 14, 2005** WVCWP created a web "flyer" for a **FREE** TV/monitor/laptop collection event to take place on January 28, 2006. (See A. SCV, c. Mercury Pollution Outreach). The flyer was also placed on municipal websites.	WVCWP Staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			• **Early Spring 2006:** staff changed the "Take Action" page to focus on **less toxic gardening and affect of pesticides** on water quality. The new page highlighted links to "Our Water Our World" website. • Spring 2006: On the WVCWP Home page, staff added a car wash/copper graphic and text. Changes included adding a link to WVCWP's *Car Wash Kit flyer* with info on copper as a water pollutant.	
		Municipal Web-Sites	**Campbell** The City of Campbell created a completely new website in FY 05-06. The Public Works link can now be followed to a full page of links relating to Stormwater, NPDES and C.3 requirements. The page also features links to PDFs of all the "Construction Tri-folds" which list BMPs. In addition, the site has a page on community/creek clean-ups, including statistics from last year's clean-up. **Los Gatos** The Town of Los Gatos created a completely new website in FY 05-06. The Public Works link can now be followed to a full page of links relating to Stormwater, NPDES and C.3 requirements. The site allows users to search for terms such as "Car Washing" or "Draining Pools". This brings up a Stormwater Page which gives instructions on correct behavior for these activities, plus other issues such as Pet Waste, Dirty Water down the Stormdrain, etc. **City of Saratoga**	Municipal Staff

			Saratoga's home page includes links to Household Hazardous Waste disposal advice, and a Street Sweeping Schedule, Map and information.	
PUBLIC PARTICIPATION				
Public Partici-pation	FY05-06 CI Item	g. "Creek Keepers" Program Continue development and promotion of trash monitoring activity. Develop and implement other clean-up activities as feasible.	Promoted through Press Release for 9/17/05 and 5/05 Creek Clean-ups (Coastal Cleanup Day & Nat'l River Cleanup) – e-mailed to Westmont High School. **Trash Monitoring was conducted at 4 different Clean-up events in FY 05-06.** Two Creek Clean-ups were held at an established site: San Tomas Aquino Creek at Westmont High School (which serves Campbell, Los Gatos, Monte Sereno and Saratoga students). Most of the participants are high school students, and they have been proven to be quite receptive to helping with Trash Monitoring. WVCWP sponsored the cleanup and trash monitoring events on 9-17-05 and 5-20-06. To prepare for the event, flyers were distributed to 6 local schools. Students and parents were trained to conduct trash monitoring and told why trash has become a pollutant of concern (POC) for the S.F. Bay area. 9-17-05 – 54 volunteers 5-20-06 – 50 volunteers **One Clean-up was sponsored by the City of Campbell**. WVCWP tried a slightly simplified Monitoring form at this	WVCWP Staff & WVCWP Staff to coordinate with Municipal Staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			event. Community volunteers were responsive to filling out the forms. **One Clean-up was sponsored by the City of Saratoga along with WVCWP**. Saratoga Elementary School students and their parents participated in the Clean-up and Trash Monitoring. Due to the students' young age, parents did most of the Trash Monitoring. Participants noted that recording the Trash made them much more aware of the extent of the litter and dumping. 4-1-06 – 48 volunteers See "Trash Management" section for details on Trash Monitoring. Clean-ups and Trash Monitoring were promoted via: **Creek Clean Up Outreach – Westmont 9-17-06** **Calif. Coastal Clean Up Day** PR was posted on Westmont website, and included in the daily e-mail bulletin. 34 Flyers distributed to other local schools for 9/17/05 Cleanup: 1 + school newsletter Blackford Elementary (school will put into their newsletter) 10 – Monroe Middle School 1 -- Sherman Oaks Community school 1 -- Rosemary Elementary 10 -- McKinnon Community school 10 – Del Mar HS

TARGETED OUTREACH & SCHOOLS				
Targeted Schools	FY05-06 Work Plan	i. Coordinate Watershed Education with schools Promote awareness of WVCWP through **presentations** in one or more West Valley schools. j. Provide Watershed Education in classrooms Conduct Water Quality Protection education or presentations in local schools, using *Enviroscape* and/or other interactive methods to engage students in Watershed Campaign messages.	**Saratoga Elementary – 4th grade 28 students and two teachers**. On 3-29-06, students participated in an inter-active Enviroscape presentation. WVCWP brought attention to pollutants of concern (trash, mercury, copper, and pesticides) and introduced "take action" steps to help the problem. This year WVCWP developed new curriculum for 4th grade, based on current textbook and State standards. Presentation topics also included: wetlands, stormdrains vs. sanitary drains, pet waste, HHW disposal (paint, pesticides, fertilizers & batteries), and how to report illegal dumping or illegal stormdrain discharges to the WVCWP Inspector. **Grow-It-Guides and Pencils** labeled with stormdrain slogans and the WVCWP website address were distributed to students & teachers. • A 30 min presentation was scheduled, but the teacher requested WVCWP to stay to continue the discussion with the students. • **A "Zun Zun" watershed assembly** was subsequently **presented to 500 students** at the school. • WVCWP donated a picture book to the school called **"All The Way To The Ocean"** depicting how stormdrains carry trash & other pollutants into nearby water bodies. •	WVCWP Staff
Targeted Schools	FY05-06 Work Plan	i. Coordinate Watershed Education with schools	**St. Mary's School– Kindergarten class** **On 6/12/06 30 students and 3 teachers** attended an	WVCWP Staff

		Promote awareness of WVCWP through **presentations** in one or more West Valley schools. j. Provide Watershed Education in classrooms Conduct Water Quality Protection education or presentations in local schools, using *Enviroscape* and/or other interactive methods to engage students in Watershed Campaign messages.	Enviroscape presentation. Topics included: washing cars, fertilizing, over-watering lawns, pet waste, trash, construction, and reporting illegal discharge to the Stormdrain Inspector. • **Grow-It-Guides and Pencils** labeled with stormdrain slogans and the WVCWP website address were distributed to students & teachers. • WVCWP donated a picture book to the school called **"All The Way To The Ocean"** depicting how stormdrains carry trash & other pollutants into nearby water bodies **Los Gatos High School District (Nova Program)** WVCWP staff made a presentation on watershed protection to high school students. Main topic was preventing leaching of toxic metals (mercury, copper, etc.) into water, through proper disposal of e-wasted. General watershed/stormdrain issues were also discussed. Upcoming free E-Waste Recycling event in Los Gatos was promoted. **Pencils** with watershed messages and WVCWP website address were distributed to the students.	
Targeted Schools	FY05-06 Work Plan	k. Schools Outreach and Watershed Education Continue to incorporate, 5th grade curriculum into WVCWP classroom presentations, consistent with state required education standards to make it more feasible for teachers to use in the classroom. Evaluate effectiveness and	In an effort to widen its appeal to teachers, WVCWP worked to develop Enviroscape-related curriculum for Kindergarten and 4th Grade. On Dec. 14, 2005, WVCWP Pgm Mgr met with City of Sunnyvale Environmental Outreach Program to share and to develop new curriculum. The new curriculum was subsequently used very successfully at Saratoga Elementary School (4th Grade) and St. Mary's School (Kindergarten).	WVCWP Staff

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
		appeal by soliciting teacher's evaluations.	All teachers felt the presentations were educational and enjoyable, and requested the presentation for the following year.	
Targeted Schools	FY 05-06 Work Plan	l. Outreach to Local Private Schools Participate as a judge and/or audience in science fair at local private school, predominately serving West Valley Communities. (Grade 6-8) Provide encouragement to students who examine watershed pollution issues, especially those that solicit positive behavior changes. If warranted, motivate students, teachers and parents by inviting student(s) to present project to WVC Reps at monthly meeting.	*See m. Partnering with Students, this section.*	WVCWP Staff
		m. Partnering with Students **Not part of Work Plan – additional activity**	*April 18, 2006 Monthly Meeting of West Valley Cities – Presentation by David Marash-Whitman, 7th-grade Kehillah Jewish High School student scientist and Saratoga resident.* The student was familiar with the West Valley Clean Water Program and wanted to do a science project to assist in WVCWP's outreach and education efforts. He consulted with WVCWP Program Manager, as to which pollutant of concern would have the most impact for a project study. He received guidance from SCVRPPP on which tools to use for data collection. He prepared a project on Rhizofiltration – a technique using plants to remove heavy metals (i.e., copper) from contaminated aquatic environments - and presented his project at the	WVCWP Staff to co-ord

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			March 2006 Santa Clara County Science Fair, at which he received the CCMP Award. WVCWP Pgm Mgr attended the Science Fair; WVCWP invited David to present to the West Valley Cities at their April meeting, and he received much accolade from the attendees. He has won many other awards, including State Science Fair awards and the **2005 International Young Eco-Hero Award** from the non-profit organization, *Action For Nature*. His Eco-Hero Award was presented at the WV mtg and received press coverage from several newspapers, including a 300+ word article in the Saratoga News.	
		Additional outreach to schools **Not part of Work Plan – additional activity**	June 2006, WVCWP staff distributed fliers announcing upcoming youth-oriented watershed-themed events at Don Edwards National Wildlife Refuge & Environmental Ed Center. **8,367 fliers** were delivered to **16 schools** in the Campbell School District to promote watershed & wetlands education among West Valley students. WVCWP also sent fliers electronically to Saratoga and Los Gatos school districts for student packets, which are sent home via e-mail.	WVCWP Staff

Public Information/Participation Program Evaluation

For additional Evaluations, see Sections above***:***

- ***SCV Program Projects/Support*** and
- ***Joint Projects: General Outreach – Material Distribution***

Participation in Community Events: WVCWP staff found its participation in the **Saratoga Library Evening Story Time** to be a very effective means of reaching both parents and children. Librarians and parents expressed appreciation for the opportunity for children to use the Enviroscape. After this event, the Campbell and Los Gatos Libraries were contacted by phone and by e-mail (with photos of the successful Saratoga event). However, WVCWP was not able to elicit similar invitations from these libraries. It is possible that an offer to use the Enviroscape during summer outdoor Reading Program activities would instigate invitations.

At the **Audubon Wildlife Fair** this year, the SCV Water District was also a participant, and also brought an Enviroscape. This diverted visitors who would have participated in WVCWP Enviroscape activities. It is possible that WVCWP will not attend this Wildlife Fair in FY 06-07, in order to avoid duplication of efforts with the SCVWD.

"Tax Free Day" at Orchard Supply Hardware: WVCWP appreciates OSH's permission to approach customers and employees in the store. The event remains an effective means of reach residents, since it allows an opportunity to speak with them personally, and to approach people who are actually buying items (gardening materials, fluorescent bulbs) which are addressed by our outreach materials.

Creek Clean-up Outreach: Many flyers were distributed for the Sept 05 Creek Clean-up. It appeared that these flyers did not really result in volunteers attending the event. There was some response from the Westmont High School website announcement and the Parent/Teacher/Student Assn. 'daily e-mail". It was found that the best response was the result of students learning about the event from a Westmont High Science teacher, who also offered extra credit for students who participate and then write a review. In the future, WVCWP will use less efforts on flyers, and more efforts on working with teachers. For the May 06 Creek Clean-up at the site, a WVCWP spoke with school staff and put minimal efforts into additional outreach. At this event, the turnout was almost exactly the same as the September event – even with minimal additional outreach. This turnout is about the maximum that the site can handle, so it appears there is no need for much outreach beyond working with the school.

Schools Outreach: The new Enviroscape curriculums, developed this year to address Calif. State Standards for Kindergarten and 4th grade, were piloted successfully. Teachers expressed appreciation for the classroom activity, and requested presentations for the next school year. The 4th grade Enviroscape presentation at Saratoga Elementary School was given prior to a Creek Clean-up, which the students were invited to attend. The classroom presentation and

Creek Clean-up were followed by 2 Zun Zun assemblies at the school. Teachers, school administrators and parents all commented that they felt both students and adults had learned new ideas and information, and the school will be more inspired to take notice of its local Saratoga Creek which is only 3 blocks away.

WVCWP also initiated use of a hardbound picture book “All the Way to the Bay” as a means of keeping the Stormwater Pollution subject in teachers’ minds. The book is given as a gift after an Enviroscape presentation. It is hoped that the presence of the book will help stimulate interest in the subject in subsequent years, and among additional teachers.

All West Valley businesses, residents & schools are invited to bring unwanted TVs, monitors and laptops to this FREE recycling event.

January 28, 2006
9 am – 1 pm

41 Miles Ave. – Los Gatos
(Municipal Yard – Near University Ave. & Highway 9)

Here's your chance to act locally, and make an impact globally, while clearing up your clutter in the process! Your support of this event ensures that the hazardous substances in these items will be recycled responsibly to prevent toxic water contamination and air pollution, both locally and in Third World countries.

Brought to you by Campbell, Los Gatos, Monte Sereno and Saratoga through the West Valley Clean Water Program.

Saratoga youth named 'Eco-Hero' award winner by Action for Nature

By Kaustuv Basu

"No Dumping: Flows directly to bay"--almost everyone has seen that sign on a sidewalk.

Saratoga David Marash-Whitman, 13, wanted to learn more about it.

As part of a school project two years ago, he decided to find out more about household pollutants that can damage creeks and the bay.

One of the first people he contacted was Cheri Donnelly, program manager for the West Valley Clean Water Program. She told him about the pollutants that were the most dangerous to the creeks. That project was completed a while ago, while David was at South Peninsula Hebrew Day School.

David has moved to Kehillah Jewish High School since then but he has continued with his mission of educating the public about the dangers of pollutants.

Last month, he won the International Young Eco-Hero Award from Action for Nature, a local ecology group, for his efforts. He is one of several youngsters worldwide chosen for their commitment to protecting the environment.

"I was horrified to learn how toxic residential products like paint-removers and pesticides

can affect creeks," David said.

He said that he advocates his cause whenever he gets a chance. "My next project is to get kids to help clean up the local creeks," he said.

Donnelly said that David does a very professional job when he makes presentations to people. "People have no idea how litter has damaged our creeks," she said.

But advocates such as David are helping, she said.

B. Shimon Schwarzschild, the founder of Action for Nature, said that he is delighted with efforts made by young people all over the world.

"Individuals can make a difference," Scwarzschild said.

Electronic Waste Discovered in Local Creek
Free Recycling Event in Los Gatos Aimed at Preventing Water Pollution

(Los Gatos, CA) – Following recent storms, Los Gatos Town staff pulled a discarded 27" television from a local creek. The culprit remains unknown. While they may have thought this was nothing more than littering, the potential problem for this crime is much bigger. When not recycled or disposed of properly, electronic waste can result in toxic pollution. E-waste leaches lead, mercury, copper and other metals into the groundwater, posing serious health hazards to people and wildlife.

As flat-screen plasma TVs and LCD monitors become more affordable, consumers are replacing conventional cathode ray tube (CRT) TVs and monitors at a rapid pace. Judging by holiday sales and pre-Super Bowl ads, there will soon be many conventional TVs gathering dust – or worse, as we found in a local creek.

To help local residents properly dispose of this waste, the municipalities of Campbell, Los Gatos, Monte Sereno and Saratoga are hosting a FREE recycling event for TVs, computer monitors and laptop computers.

The event will be held in Los Gatos at 41 Miles Avenue (near intersection of University Ave. & Highway 9) on January 28th from 9 a.m. to 1 p.m. The West Valley Clean Water Program (www.cleancreeks.org), the official storm water agency for these 4 municipalities, is partnering with local recycling firm United Datatech Distributors (UDT) for the event.

UDT was selected for their high standards of materials handling. UDT does not export waste to third world countries, where children and laborers seeking salvageable parts are exposed to toxic e-waste which pollutes local water supplies or billows noxious air pollution when burned. UDT also keeps these deadly materials out of our local landfills, where runoff containing hazardous substances can seep into our groundwater.

The issue of littering aside, it is illegal in California to dump TVs and monitors in landfills. Garbage collection for local municipalities prohibits putting these items into residential garbage cans. Instead, these items must be handled by a credentialed recycler, often for a fee. This event is a great way to avoid the fee, get a jump on spring cleaning, and avoid desperate disposal measures.

Free Recycling Event
TV - Monitor - Laptop Recycling in Los Gatos

Quick Facts:

What: FREE Recycling/Collection event
Items Accepted: TVs, Computer Monitors, Laptop Computers (working or not)
When: Saturday, January 28th, 2006
Time: 9 a.m. to 1 p.m.
Where: 41 Miles Ave., Los Gatos (near intersection of University Ave. & Highway 9)
Who is invited: Residents, Businesses, Schools in the South San Francisco Bay Area
Further info at: www.cleancreeks.org or 408.354.5385 (tip line)

- The EPA estimates that Americans discard 2 million tons of electronic waste each year.
- The EPA considers old cathode ray tube TVs and monitors the most hazardous items.
- E-waste leaches mercury, lead, copper, etc. into our ground water.
- Irresponsible recyclers ship e-waste to Third World countries where it pollutes land, air and water, posing serious health risks to residents. Visit www.ban.org for details.
- Support of this event sends a message about ethically responsible recycling practices.
- Information about United Datatech Distributors (UDT) can be found at www.uniteddatatech.com

Creek is no place to dump computers, television sets

By Jennifer McLain

For some, recycling is second nature. But when it comes time to toss out that old TV or computer monitor, there's no such thing as a recycle bin for "e-waste only." Some resolve the problem by throwing the electronics out in the dumpster--forgetting, not realizing or not caring that the toxins in them can eventually seep into groundwater. Others just ignore the "no dumping" signs and cast them in the creek.

"We found a 27-inch TV in the Los Gatos Creek a few weeks ago," said Los Gatos resident Cheri Donnelly, program manager at the West Valley Clean Water Program. The clean water program started in 1994 and is dedicated to preserving and protecting the water in Campbell, Los Gatos, Monte Sereno and Saratoga.

"People are desperate to get rid of their old electronics, but they can't just put them in the landfill because the toxins can get into our groundwater," Donnelly said.

One alternative is to take the old electronics to a free TV-and monitor-recycling event from 9 a.m. to 1 p.m. on Jan. 28 at 41 Miles Ave. in Los Gatos.

The water company is teaming up with United Datatech Distributors and ECS Refining for the event. Donnelly said that unwanted electronics brought to the recycling event will be handled responsibly.

"At a lot of these types of events, people feel giddy and gooey that they are doing the right thing, but what they fail to realize is that a number of these places are shipping these devices to someone else's back yard," said Tom Hogye, vice president and general manager of the distributor and refining company.

Hogye said that some so-called recyclers take the cheapest and not most environmentally sound route, and ship scraps to undeveloped countries while making a profit.

"Even if we are taking care of our country, we certainly don't want to see the waste in Africa and Asia," Donnelly said.

Hogye said that Datatech sends the waste to environmentally sound processors, which are primary and secondary smelters.

It is illegal to dump TVs and monitors in landfills, and since the inception of SB20, the Electronic Waste Recycling Act of 2003, a fund was created for the collection and recycling of certain electronic waste. As of July 1, 2005, plasma televisions and TVs with liquid crystal display screens are classified as e-waste. Each time a consumer buys a new electronic that contains cathode ray tubes (CRT) or has a liquid crystal display, he or she pays a $6 to $10 fee that will cover the collection and recycling of the wastes.

Electronic devices contain a variety of materials, including copper, lead, zinc, arsenic and mercury.

"Mercury is one that our program is highly focused on," Donnelly said. These toxins can enter the groundwater and are hazardous to the health of plants, animals and humans.

It is estimated that Americans discard nearly 2 million tons of electronic waste a year, and among the most hazardous are CRT televisions and monitors.

In general, Donnelly said the Los Gatos community needs to be aware of what is going into its groundwater.

"It's about knowing that what goes into the street drain. If it's dog waste or pesticides, it really is going directly to the Los Gatos Creek and downstream into San Jose," said Donnelly.

For more information about the event or the West Valley Clean Water Program, call 408.354.5385, or visit www.cleancreeks.org.

		and includes messages about less-toxic pest control and proper disposal. Campaign features South Bay English- and Spanish-language, radio and print ads.	See PI/P Section, "Citizen Participation" & "General Outreach"	
	SCVURPPP PMP (II.A.5.) & (II.A.6)	Community & School Events Identify and attend community/school events; distribute outreach materials regarding less toxic pest control. Community Material Distribution Provide outreach to community through distribution of information via libraries, civic and community centers, and other points of social interest.	Through WVCWP, significant IPM outreach has been incorporated into educational activities and presentations in the local schools. Students have learned about pesticide runoff and the need to use less-toxic pest management strategies. This point is made when they play with the Enviroscape and watch the toxic-colored water (pesticide runoff) flow into the creeks, Bay, wetlands and Ocean where it affects sea otters, fish, wildlife and even people. Grow it guides are provided for students to take home to parents. September 20th 2005, WVCWP staff made a special evening presentation at Saratoga Library's story time for young children when the topic of the week was "water & rivers". Since parents accompanied the children materials for both age groups were given out. **Materials Distribution** For Kids - 29 Our Water Our World picture frame magnets 7 Watershed Watch magnets 31 A Child's Garden coloring books 10 Kids Guide to Backyard Bugs	WVCWP coordinate w/ Cmpbl: Sr. Civil Engr LG: Pub Works staff MS: City Manager Stga: PW Analyst

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2005-2006 ANNUAL REPORT

Pesticide Management Activities Evaluation

PESTICIDE USAGE REDUCTION MEASURES – Pest Specific

CITY OF SARATOGA

City Building Maintenance:

Saratoga did not use any pesticides indoors this year. Traps were used to control rodents in buildings. Good sanitation practices help to avoid insect infestations.

Parks & Public Works Maintenance Dept.

APHIDS:

2 trees had aphid problems; they are located downtown with lots of foot traffic, where dripping was a problem. The trees were injected with a systemic pesticide to reduce environmental impact.

YELLOWJACKETS:

Saratoga uses traps as the main means of control.

Parks staff tries to clean off picnic tables every Monday to prevent attracting wasps & ants. The Parks Dept will be ordering plastic tables which are easier to keep clean and should serve to attract fewer wasps.

Only if above steps don't work, and a public health problem develops, is Wasp Freeze used. NO new nests

WEEDS:

Mulch spread last year continued to control weeds this year (see italics for last year's mulching). *Saratoga used free mulch from tree service contractor; this mulch is used for weed control wherever possible. Wood chips were dumped and spread as mulch on the unlandscaped medians on Fruitvale Ave (a major arterial)*. This action resulted in NO spraying on a half mile stretch of median which would otherwise be a problem area.

The Street Maintenance Dept. hired a landscape company to cut down roadside weeds twice this year instead of spraying; this cut pesticide applications from 4 to 2 for that task.

Hand hoeing/pulling of weeds is used where possible. Weekly walk-through with lots of hand weeding; Round-up is used when weeds begin to get out of control, such as springtime – the emphasis is on catching the problem early in an attempt to avoid having to spray larger areas later.

RODENTS:

A contractor is engaged to trap rodents in order to avoid poisonous baits; this is done when there is an outbreak of a number of rodents at once. A PCO was

hired to use baits when trapping failed.

ANTS:

Based upon BMPs presented at a WVCWP IPM training, the city ended use of PCO spraying for ants. Ants are vacuumed up; trails are cleaned away with soapy water. If ant problem persists, last resort is ant bait stations with fipronil, placed indoors.

MEDIAN LANDSCAPING:

Policy is to install pest resistant shrubs and landscaping and avoid high-maintenance, low-pest resistance turf and greenery.

MICROSPRAY IRRIGATION:

Microspray irrigation systems have been installed in the Heritage Orchard and computerized irrigation systems are used in medians, to reduce any possible runoff which could carry pesticides. Installations are on-going as budget allows; 50% are now computerized. Main medians on major arterials have all been completed.

Two more Electronically Timed controllers were added to City landscaping to monitor water usage and avoid runoff. Nozzles continue to be modified to optimize spray.

Results of Pesticide Use Review FY 05-06:

Saratoga was able to eliminate use of any OP pesticides in 05-06, 03-04 & 02-03. The City is making an effort to stress prevention (prevent weed growth, prevent pest infestations) where possible. Saratoga is moving into use of IPM and engineered, rather than chemical, controls as much as possible given budget and staff limitations.

In City facilities, sanitation is being stressed as a means to prevent pest infestations (ants, mice, etc.) so that chemical controls will not be needed.

Over the past several years, the Public Works Dept. has worked on landscape design and improved irrigation systems which will reduce need for perticide/heribicide use, and reduce any potential runoff which could carry pesticides.

Natural insect controls include use of traps for wasp control, and soapy water for ant control.

Through these types of efforts, Saratoga is progressively reducing chemical pesticide use.

In addition, an annual IPM training is held through the efforts of WVCWP (involving Saratoga, Campbell, Los Gatos & Monte Sereno). Municipal and school district staff receive training which enables them to implement IPM efforts. Experts in the field present information on such issues as identifying beneficial vs. harmful pests, etc. In FY 05-06 an expert from Cornell University presented the latest research of Turf Management methods which reduce the need for pesticides. The training was deemed to be very successful and staff stated that various aspects of the researched methods can be employed for municipal turf.

IPM Plan
for
"High Use / No Pesticide / Low Budget TURF"

Goals:

- Reduce use of pesticides for weed control through turf management methods which produce healthy turf and discourage weeds.
- Determine weed treatment threshold - the maximum number of weeds that can be tolerated at a site without causing unacceptable damage, hazard, or nuisance.
- Incorporate latest research on less-toxic methods for generating and maintaining healthy turf.
- Train staff annually on newest management practices which encourage healthy turf and discourage weeds
- Develop successful management practices tailored to municipal turf sites, based on site characteristics and horticultural practices applicable to those characteristics (i.e. frequent overseeding for high-traffic areas, amendments to clay soil, etc.)

Tolerance level for weeds:

- Low to zero in public areas

Turf Management facts:

- Turf sites should be tested for chemical and soil characteristics to facilitate optimal decisions on turf management.
- Correct use of soil amendments (compost) along with proper aeration reduces compaction and encourages healthy turf.
- Proper mix of turf types (Kentucky Bluegrass base, rye and fescue overseeding) helps ensure healthy turf in high-traffic areas
- Regular, frequent overseeding is a successful, non-toxic means of reducing weed problems in turf.

Managing Turf to Prevent Weed Problems

MAINTENANCE & MANAGEMENT

Careful management and maintenance are the best means of preventing weed invasions. Many different aspects of turf maintenance can affect weed growth. These include (but are not necessarily limited to) seeding, fertilizing, irrigation, aeration, soil amendments, top-dressing, and mowing. Management, such as choosing the most appropriate grass seed for the turf use, is also very important.

INITIAL STEP: ANALYSIS

If we want to use less pesticides & fertilizers, we need to know more about the biological systems of the turf and weeds/ pests. When we know more about why the weed/ pest is there, we can deal with it better.

Chemical & Physical Analysis

SITE TESTING: It's important to get the site tested. At a minimum, get a **physical analysis** before doing any soil amendment activities. It can even be important to get a breakdown of any sand in the soils: i.e. is it fine sand - which is almost silt, or is it course sand - which has different properties.

A report listing a "sandy loam" could have a sand that's mostly a fine sand. Or what appeared to be silt could also contain clay, which is smaller and has a negative charge.

A **chemical analysis** can help determine if any constituents of an amendment could lead to problem levels of a chemical/mineral, such as phosphorus.

AMENDMENT TESTING: It's also important to get any compost tested – some amendments may contain 20% - 30% clay, which would be detrimental to the site.

⇨ The ratio of Carbon/Nitrogen should be close to, but not more than, 30/1 (i.e. 30 units of Carbon/ 1 unit of Nitrogen).

⇨ The compost needs to have 60-80% organic matter, and should have minimal 'fine particles'.

Use Analysis

Traffic on the turf causes wear, which can result in deteriorating turf and thus presenting an opportunity for weeds to grow.

Wear is abrasion to the grass and compaction of the turf and soil due to the downward pressure of many feet. Compaction will be even worse when there is clay in the soil.

Heavy traffic can also result in a lack of recovery time for the turf; recovery time is needed for the turf to replenish broken stalks and restore turf density.

"WHEN" Does It Get TRAFFIC?

Determine when much of the heavy traffic occurs; i.e. is in the fall due to football and soccer activities? During the fall and winter, turf is slow growing and doesn't regenerate well, which compounds the problem of heavy traffic.

The WV Communities locale has a generally uniform growth pattern due to irrigation – but it still grows more slowly when there is less sunlight (shorter days) and cooler weather. Lots of traffic during the depressed growth periods causes a problem for the turf. This includes intense practice sessions - before an official sports 'season' begins, such as in early Spring, or in Fall, when days are shorter. Timing of your fertilization and seeding is determined by when the traffic falls.

WORK WITH STAKEHOLDERS:

"FIELD ASSESSMENT SPREADSHEETS"

Meeting with users of the fields allows an opportunity to work together to determine thresholds, and helps users to understand the requirements involved in maintaining usable turf.

"Field Assessment Spreadsheets": Use these to meet with sports associations to discuss use of the fields. If the # is greater than 35, you have to re-assess use, consider renovation. A range of 11-20 is pretty good. Engage the people who use the field; work together to make the fields usable within the limitations of the municipal budget and limitations of the turf (soil, climate, etc.). Filling out the sheet together helps users understand what they may have to tolerate, and to work together with municipal staff to set a realistic target.

WHERE is the TRAFFIC?

Where on the fields is help needed most?

For example, the corners of the soccer fields don't get much wear compared to the center. The logical way to save money and labor is to concentrate most of fertilization and other management activities mostly in the center of the field.

Soccer field: center = approx. 40,000 sf

Football field: Between the 20 yd lines, and in between the hash marks = 16,000 sf

A whole field = approx. 80,000 sf. (2 acre field)

These heavily used (center) areas need 3-4x the amount of resources as the corners.

➔ Make 2 applications/year in the corners, 6-8 apps/year in the center

TURF MANAGEMENT

Compaction Management

The 1st line of defense is compaction management. Over-use can cause compaction.

CORING & AERATION:

⇨ The best fields are cored between every month to every 6 weeks. The benefits of coring are short-lived & only last 3-4 weeks, so it must be done frequently.

If it's not possible to core this frequently, it is at least necessary to aerate.

Coring (& aeration) promote:

- nutrient release
- increase in microbial activity
- increase in rooting activity
  - In a sand situation, this will Increase Organic Material coming to surface

During the season when you can't core, use needle tines to get water and air in, in order to improve the environment to allow increased rooting.

Factors in coring:

- Don't core when soil is too wet.
- Need to affect 10-15% of the surface (2-4" spacing of vertical drive machine is better than the 8-10" spacing).
- Use the 8-10" for bringing up soil to create bed for seeding.
- In the center of the field do it every 4-6 weeks, the corners of the field, maybe only once a year, since corners don't have much compaction.

Aeration with "knives"

1 form of aeration is to use an "Aerways" aerator. This uses huge blades, placed on an angle, to cut down through the turf and soil. They cut down 18-20". The Aerways actually shakes the soil. It's good to use it when the soil is dry. By shattering the layers of soil, it doesn't just affect the surface. The shattering will occur more when the soil is dry.

The "Vertidrain" is similar to the Aerway, but the knives are placed at more of an angle. It is recommended to be used a few times a year on high use fields. It has a lever which allows the blades to go down in straight, then kick on the way out; this forces shattering and loosens the whole soil profile.
Outsource: To have a 7 acre site treated with a Vertidrain can cost about $2,000 - $2,500.
When using the Aerways or Vertidrain, the turf is not left with holes in the soil, which can be hard to fill in adequately.

When doing serious amending or seeding, it's necessary to pull out cores so the amendment can replace the cored soil, or so the cored soil can be spread to make a seedbed.

⇨ Once in a while it's important to break up any layer that's being created by using the same length of tines consistently (i.e. use the Vertidrain to shake up the soil profile). One reason that layers need to be broken up is because the layers keep the water from percolating evenly.

Amending / Layering

FOR A CLAY-BASED FIELD:
The first line of defense has to be surface drainage. Water standing on the surface makes the compaction worse. In order to fix a clay soil, it's necessary to create good surface drainage.

Clay subsoils have an infiltration rate of about 0.10 – 0.30" per hour
By composting with the right amount of organic matter, it's possible to increase the infiltration rate by 10 fold, as well as encouraging turf growth with the nitrogen, etc. in the compost.

Creating good surface drainage through coring and amending:
⇨ Mow down to 1"; then core & hollow tine in several different directions; remove the cores, aerate, spread with top dresser 1 time: put it down, brush it in, water it in, then repeat the amendment several days later. It's a weeklong process to do amending. The key is to have a good source of compost.

⇨ One time/year do the amending, and several times per year do the top dressing. After 3-5 years of this, there will be a real improvement in the turf. A good source of compost is needed in order to be able to do this consistently.

However, after 5 - 7 years with compost, you can get phosphorus build-up and runoff, which can affect local drinking water supplies. A solution is to compost for 3-5 years, then stop for a while.

Compost Amendments for establishing turf:
Manure or biosolids compost is the best.
Yard waste is the worst.

Manure is a Biosolid, a combination of Carbon & Nitrogen
The ratio of Carbon/Nitrogen should be less than 30/1 (i.e. 30 units of Carbon/ 1 unit of Nitrogen).

- Microbes/ microorganisms etc. need the carbon to grow and then need the nitrogen. The grass also needs the nitrogen. For example, a 40/1 ratio causes too much growth of microbes and they compete with the grass for the nitrogen (grass will yellow).

- The compost needs to have 60-80% organic matter.
- Need as little 'fine particles' as possible.
- Possible weed problems with manure: have it checked first through testing.

Sand Amendments:
If amending with sand, **don't use pure sand**.
⇨ For each 1" of clay you need 8" of sand. Putting in anything less than that will end up as cement. The bridge differential between the 2 particles causes it to set up as cement.

⇨ The ideal sand size for clay soil is medium to somewhat coarse.
Do test for sodium levels in the sand before purchasing it - with rainfall and irrigation, salts in the sand can leach out. Then, if the sodium level was high, the grass seed won't establish well.

If a salt problem has developed, gypsum can be helpful. However, in general gypsum will not improve the soil – it won't help soil structure.

Putting **sand on top of clay** can improve drainage (create a big crown on the field and cap with 5-6" of sand), BUT a completely different grass-growing environment is needed; this is more appropriate for golf courses than municipal fields. It's not a forgiving environment and it's harder to actually get grass to grow well.

Peat / Sand Amendments:
Peat can be good when it's blended properly with sand, but it's not really cost effective. Peat may be more degraded than compost, whereas a manure compost can reduce the turf's nitrogen demand 30% over 3-5 years.

Mowing

MOWING & DENSITY
⇨ Mow at between 2" & 3". It's important to pick a height and stick with it, i.e. 2" or 3" - not 2" one mowing and 3" the next. Get the mower on a smooth paved area, and measure the blade height with a ruler.

➔ ***Fertilizer Vs. Mowing Frequency***
Increasing the mowing from 1x to 2x per week increases the wear tolerance about 50%. The reason is that increased mowing results in increased density of turf roots.

Fertilizer

FERTILIZER TIMING

⇨ 0.5 - 0.75 lbs of Nitrogen per month, every month can be applied in our area due to the fairly uniform growing season. Cooler weather in conjunction with longer days promotes good root growth. This would be early Spring and late Fall (Feb.-March & Oct.-Nov.).

FERTILIZER CHARACTERISTICS

⇨ A pH between 5 & 8 is okay; the ideal range is between 6 & 7. Elemental sulfur can be used to bring idown the pH, and lime can be used to bring it up.

Slow-release vs. Urea (Ammonium sources of nitrogen):

A comparison was done for Urea vs. Polyon. Polyon is a sustained release fertilizer – one application disperses over the whole season/24 weeks. Polyon saves money on labor for application vs. urea (1 application/season for Polyon = 5 applications/season of urea). Polyon cost 3x as much as urea.

⇨ The study showed that the cost equaled out when applied to @ 30,000 sq ft or more (@$15/hr labor.

➔ Combine a slow release fertilizer, spread over the entire field, with frequent applications of a cheaper regular fertilizer over the high traffic areas.

This system will also mean that the whole field doesn't have to be closed for fertilizing; teams can practice on the areas where sustained-release was applied, when an additional application is being made to the high-traffic areas.

Fertilizer vs. Corn Gluten Meal

For Corn Gluten Meal, the anecdotal evidence says it works well as pre-emergent in ornamentals. Evidence also shows it works well in turf - however, basic fertilizer (ammonium sulfate) does the same thing.

For 10-0-0 fertilizer with some pre-emergent herbicide effects vs. Corn Gluten Meal, the fertilizer has the same results in controlling crabgrass. Since CGM costs 10x as much as regular lawn fertilizer it doesn't appear to be cost-effective.

Seeding/ Overseeding

EFFECTIVENESS OF SEEDING FOR WEED CONTROL

Use of regular, frequent overseeding will make a big difference in maintaining turf density which will help keep weeds out, and will promote a quality turf without pesticides. Overseeding is an effective weed control measure for high-use / low-input fields that need a low cost solution to keep the turf in shape.

If a field starts out with dense turf, it has been shown that putting on any seed on a weekly basis will maintain turf density despite heavy traffic. Studies showed that plots overseeded did much better than those not seeded. In plots not overseeded during heavy use periods, turf density went down to 20%. A year after ending the study, the overseeded area still kept out the crabgrass.

IMPLEMENTATION OF OVERSEEDING

⇨ Anytime seed is being put down, make a phosphorus application.
⇨ The critical point for successful overseeding is regular, appropriate frequency, rather than the amount of seed applied.

Recommended seeds
⇨ ***Coventry Kentucky Blue Grass*** provides a good base turf. Many of the highest quality sports fields have Kentucky Blue Grass base, which is seeded throughout the season, (then overseeded with perennial ryegrass). The Bluegrass rhizomes are necessary to knit the field together. However, it's not effective to overseed frequently with KBG because it takes too long to germinate and establish.

⇨ Ryegrass and Tall Fescue varieties are effective for overseeding:
"Citation" perennial ryegrass
"Jaguar" tall fescue

Frequency/ amount of seeding
During a dry year, 8-10 lbs/1000 sf of overseeding weekly may be necessary in order to get a good density.
⇨ Irrigated fields: During a good year, or with irrigation, only 2 lbs of seed/1000 sf were needed for weekly overseeding to be effective.

⇨ In a study, the turf was drop-seeded weekly. The plots were mowed at a 3" height. They were fertilized in June and September.

FIELD STRUCTURE

Field structure can be used to help facilitate healthy turf growth, for example structural changes which promote good drainage. Bring a drain pipe to the surface in a low spot, have the pipe go to a pipeline so it will drain away standing water in the low spots.

Standing water tends to be a problem where irrigation lines are all hooked up in 1 straight line (1 sprinkler line runs the whole length of the field), so that low & high spots are getting the same amount of water. This may result in enough irrigation for high spots, but with too much for the low spots.

One solution is to "Zone" the irrigation system. It's also better to have it the turf bit on the drier side than too wet. Drier turf is better for preventing disease and promoting rooting.

For soccer fields, changing the structure of the goal mouth area can improve turf growth. The goal mouth gets the most wear, so crown it (about a 2" crown) to promote drainage and help address the wear. Start from outside the goal box to create a crown across the front area.

Crumb rubber can be used as a top dressing on field sidelines, off the playable surface. This protects the growing point and extends the growth period (due to black rubber holding in heat during cold weather).

BUDGETING

If turf is well managed, and use of pesticides can be decreased, then most of the former Pesticides Budget can be spent on labor and seed.

ANNUAL EVALUATION OF EFFECTIVENESS:

Evaluation of effectiveness of turf management for weed control is primarily conducted by visual and site inspections, and customer complaints.

More information on this topic is available at:
http://turf.lib.msu.edu - go to the Turfgrass Information file

TRAINING DESCRIPTION	DATE	ATTENDEES
ANNUAL WEST VALLEY IPM WORKSHOP – Attended by WVCWP, Campbell, Los Gatos, & Saratoga Staff		
West Valley Turf Mgmt Workshop Sponsored by West Valley Communities Presented by Frank Rossi, a national expert from Cornell University A national expert from Cornell University presented a PowerPoint presentation. One hundred percent of attendees who turned in evaluations rated the training as "worth my time to attend", and 22 out of 25 said the training would enable them to change turf management methods to reduce pesticide use **Topics:** ▪ Guidelines for managing turf with little or no pesticides ▪ Field trip to examine Campbell's community athletic field turf Planting to Encourage ▪ From the training, WVCWP developed a "Turf Management IPM Plan" to be used as a reference for outdoor maintenance staff. Training was attended by all Parks Maintenance staff (or presentation was given later to staff). One local private Golf Course Superintendent also attended. The WVCWP made a video of the workshop (to transfer to CD) for parks maintenance staff to incorporate into future IPM training sessions.	March 22, 2006	**Campbell** **City of Campbell (16)** Public Works Park Supervisor Maintenance Staff **Los Gatos (7)** Parks & Forestry Superintendent Public Works Supervisor Parks & Maint Workers **(6)** **Monte Sereno** No parks or medians Under Monte Sereno jurisdiction. **Saratoga (10)** Parks Supervisor Parks Lead Worker Parks Maintenance Workers (8) **Saratoga Country Club (1)** Golf Course Superintendent

FY 2005-2006 ANNUAL REPORT

MERCURY POLLUTION PREVENTION ACTIVITES				
FY 2005-2006 Work Plan Self Evaluation Matrix				
Source	**WP Task**	**FY05-06 Work Plan Tasks**	**FY 05-06 Accomplishments**	**Responsible Party**
	Mercury Plan (I.D.)	Mercury Policy Continue Implementation of mercury policy requiring the virtual elimination of mercury from controllable sources in urban runoff from agency operations.	Saratoga adopted its mercury policy in FY 03-04 and continues to implement the policy. Saratoga continued its Battery Recycling Program handled by Facilities Maintenance Supervisor. Collection buckets are placed in all departments. The City collects all used dry cell and wet cell batteries accumulated by employees at work. Used batteries from home are also accepted. Some employees have started using rechargeable batteries.	Facilities and Street Maint. Supervisor WVCWP to assist
	Mercury Plan (I.E.)	Guidelines Continue implementing the guidelines for the phase-out of mercury-containing products (MCPs). Phase-out will coincide with replacement of MCPs on an as needed basis.	Reduction of mercury-containing products is being implemented. Research on alternatives to mercury-containing products has been conducted and implemented wherever possible.	Facilities / Street Maint. Supervisor
	Mercury Plan (II.C.)	Disposal of Mercury Containing Products Track recycling, replacement, and reduction in use of mercury-containing products. If feasible, document quantities of fluorescent lamps from City buildings and departments, which are disposed of at Hazardous Waste Collection facilities in FY 05-06[1].	One thousand four hundred, forty (1,440) feet of fluorescent bulbs were collected and disposed of by the City's HHW contractor. All mercury-containing items are removed via hazardous waste disposal contractor. City employees put used batteries in recycle bins located throughout city departments for removal by hazardous waste disposal.	Facilities / Street Maint. Supervisor
	Mercury Plan (V.A.)	Fluorescent Light Recycling Program Continue Implementation of an outreach program to educate small businesses and	*Fluorescent Light bulb Recycling Flyer* WVCWP updated its flyer created last year, listing local	SCVURPPP & WVCWP to coordinate w/ HHW staff

[1] Tasks for documenting and reporting quantities of mercury-containing products disposed of by city will take into consideration whether it is possible to keep detailed records of each mercury-containing product (fluorescent lamp) disposed of by municipality.

MERCURY POLLUTION PREVENTION ACTIVITES				
FY 2005-2006 Work Plan Self Evaluation Matrix

		conditionally exempt small quantity generators about recycling fluorescent lights. Coordinate educational outreach with fluorescent light recycling events sponsored by HHW.	drop-off points (5 hardware stores) which are part of the fluorescent bulb drop-off program. Hours and location of stores are listed, along with HHW contact info. The flyer reminds readers that **it's illegal to put fluorescent bulbs in the trash or in regular recycling bins**. The flyer was distributed at all West Valley community events.	
		Develop, advertise & conduct West Valley E-Waste Recycling Event **Additional Task – Not in Workplan**	*January 28, 2006 **Free** Hazardous Waste Recycling Event* for recycling TVs, monitors and laptops. The event was sponsored by the four West Valley Cities through West Valley Clean Water Program. It was held at Los Gatos Public Works parking lot. Los Gatos & Saratoga and WVCWP (for Campbell & Monte Sereno) staffed the event. West Valley businesses, residents and schools were invited to participate. **WVCWP staff hired and worked with Carl & Manor Ad Agency to create flyers, posters, a press release, and a newspaper ad** to raise awareness in the West Valley communities about E-waste and about the Clean Water Program in general. Ads, articles and flyers relayed the message that E-waste can leach toxic metals (i.e., mercury) into our water, and that by using a responsible recycler we people can help prevent export of our waste to foreign dumps where mercury leaches into the environment. (See above row for details on outreach materials). Over 250 cars brought E-waste for recycling. Posters placed around the site highlighted the environmental affects	WVCWP and City Public Works staff

MERCURY POLLUTION PREVENTION ACTIVITES

Source	WP Task	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			of improper E-waste disposal. One high school coordinated with WVCWP prior to the event, and dropped off pallets of E-waste on the previous day. Quantities collected for responsible recycling are listed in the Evaluation below.	

Mercury Pollution Prevention Activities Evaluation

West Valley Communities Developed, Advertised, Sponsored and Staffed the West Valley E-Waste Recycling Event

Much discussion and research went into trying to develop an action that would make a difference in the amount of mercury containing waste going to landfill or being disposed of illegally. The issue of illegal dumping was exemplified by the television that was found dumped in a Los Gatos Creek during the winter season. While the dumping was not necessarily done by a West Valley resident, it served as a good example of the fact that illegal dumping is a problem. This incident was featured in the West Valley Clean Water press release which was written as part of the advertising for the community event. Two local newspapers ran the article and placed it next to the ad that WVCWP Communities ran in each of the local community papers. Residents responded enthusiastically and brought the ad from the paper as if it would be needed to participate in the free event. Many more people noticed the ad than attended the event. WVCWP and West Valley municipal staff interviewed participants as they waited in their cars to make the drop off. Often staff were told that residents were bringing in E-waste belonging to one or more of their neighbors, in addition to their own items. The event was one of WVCWP 's most successful attempts to encourage the community to take action and bring to light the goals of the West Valley Clean Water Program.

Residents & Businesses Joined In

WVCWP made the decision to spend a significant part of WVCWP budget on hiring the Public Relations agency (Carl & Manor) for the Watershed Watch campaign to design a news ad and submit a press release to local papers. (See *PI/P Section - A SCV Program Projects/Support* for details on additional outreach for the event). Even more exciting was that two local businesses, Le Boulanger and Pizza-My Heart supported the community in these efforts by donating breakfast and lunch for all volunteer staff. In a four hour period, over 250 vehicles came to drop off E-waste. The residents were delighted with the event and the most popular question was, “When will you do this again?” At that point WVCWP and municipal staff determined that the WVC would work hard to sponsor another E-waste drop off event in FY06-07. The **Los Gatos Weekly** and **Saratoga News** also printed a short editorial letter from the WVCWP Mgr thanking the residents for their enthusiastic participation, noting that a total of 33,657 pounds of E-waste was collected, and thanking the businesses for their donations and support.

COPPER ACTION PLAN/NICKEL ACTION PLAN

FY 2005-2006 Work Plan Self Evaluation Matrix

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Vehicle Washing Operations	CB-1	Continue to distribute outreach materials on proper vehicle/equipment washing at Municipal counters/Post Offices/Libraries and public events, and post on WVCWP website.	The WVCWP "Car Wash Kit" flyer is now available on the WVCWP website as a PDF. The site's Home page now has a car washing graphic and text which links to the PDF. The PDF can be downloaded and printed by visitors to the site. The "Bay Begins Here" brochure, which contains information on car washing, was distributed at various events. (see PI/P section *B. WVCWP Joint Projects – a. distribute materials*) A car wash was held on Sat. Oct. 1 – materials related to car washing & copper were handed out: --"Washing Cars and Other Vehicles", --"Cars Pollute Water Too!" --"Residential Car Washing" cards.	WVWCP staff
Vehicle Washing Operations	CB-1	Discuss copper impacts; teach proper methods of Car Washing and Pool & Spa drainage through use of Enviroscape watershed model in classroom presentations.	See PI/P section *B. WVCWP Joint Projects -* *b. Participate in Community Events* *j. Provide Watershed Education in classrooms*	WVWCP staff
Vehicle Washing Operations	CB-1	Provide Car Wash Kit & education to charity car wash organizers. Solicit feedback from participants.	A car wash was held on Sat. Oct. 1, 2005 at a Union 76 gas station, located east of Los Gatos on Blossom Hill Rd., S.J. Approximately 75 vehicles were washed. WVCWP Stormwater Discharge Inspector arrived at 7:00	WVWCP staff

WEST VALLEY COMMUNITIES

FY 2005-2006 ANNUAL COPPER (and NICKEL) ACTION PLAN REPORT

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			am, and was there until almost 10:00 am, teaching participants to set up the car wash kit to protect runoff from entering the street or storm drain. The event went on until after 3:00 pm. WVCWP used about 400 ft. of hose and 300 ft. of extension cord. The car wash kit worked extremely well, but it was difficult to set up. Photos were taken which can be used for future classroom presentations. Approximately 35 volunteers participated and saw the Car Wash Kit in use. The Car Wash was sponsored by employees of Advanced Medical Center. Materials handed out: --"Washing Cars and Other Vehicles", --"Cars Pollute Water Too!" --"Residential Car Washing" cards.	
Vehicle Washing Operations	CB-1	Put Car Wash Kit information and proper car washing instructions on WVCWP web site.	The WVCWP website Home page was modified to include a car washing graphic and text. These graphics are links to a PDF of the WVCWP Car Wash Kit flyer which requests car wash event organizers to contact WVCWP. The flyer also includes information on harmful effects of copper: http://www.cleancreeks.org/images_new/carwashweb.pdf	WVWCP staff
Vehicle Washing Operations	CB-1	Within the Planning permit process, require source control measures at facilities that will conduct vehicle/ equipment washing and maintenance activities (consistent with Permit Provision C.3.k).	The WVC did not have any Group 1 projects that would conduct vehicle/equipment washing and maintenance activities.	Planning Dir/ Sr. Planner

WEST VALLEY COMMUNITIES

FY 2005-2006 ANNUAL COPPER (and NICKEL) ACTION PLAN REPORT

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Vehicle Washing	CB-1	Promote improved car washing methods at auto businesses during inspections. Provide info on alternative arrangements for auto businesses with possible compliance problems.	The Stormwater Discharge Inspector distributes several vehicle washing pieces during pro-active inspections and in relation to any actual or suspected IC/ID incident. This means of outreach is very effective and the Inspector is able to answer questions and offer suggestions. One piece used is the WVCWP-created fact sheet, which provides information on wastewater capture systems for automotive facilities. The fact sheet was designed to provide small-scale automotive facilities (those that find installing a full-fledged wash rack cost-prohibitive) with examples of inexpensive treatment technologies and distributor information.	WVWCP ICID Inspector
Vehicle Washing Operations	CB-1	Maintain recommended source controls for vehicle washing at City corporation yard.	Municipal staff continues to follow the suggested practices and to ensure that the Corp Yard systems function correctly.	Pub Works Staff
Vehicle Washing Operations	CB-1	City staff will attend "Mobile Cleaning Workshop" or view training video to review Best Management Practices.	**Campbell:** On April 13, 2006, twenty nine (29) Campbell staff reviewed SWPPP procedures and received training on best management practices (BMPs). Staff viewed the pressure washing video "We Do the Job Right" for mobile pressure washing. John Iaquinto, Public Works Superintendent led the training.	WVWCP ICID Inspector / Pub Works Supt
Industrial Copper Control	CB-3	Continue Industrial Inspection program with Fire Dept., including NOI sites and other industrial sites such as plating and metal finishing facilities, vehicle service facilities, and other permitted sites.	The City has an agreement with the SCC Fire District to conduct urban runoff inspections for machine shops and metal manufacturing facilities. This year efforts were directed at re-negotiating municipal contracts with the SCC Fire District, which was due to expire at the end of FY 05-06. Many meetings were held to ensure that future contracted inspections would provide the	SCVC Fire Dept./ WV ICID Inspector

WEST VALLEY COMMUNITIES

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			type of inspections, and related data, necessary for the Stormwater programs. See *IND Section* for inspection details.	
Reducing Traffic Congestion Promoting Alternative Transporta-tion	CB-6/7	Within the Planning permit process encourage and promote best practicable transportation-related design practices and alternative modes of transportation.	The WVC encourage best design practices wherever practicable. These small communities tend not to have large developments conducive to requiring alternative transportation within the permitting process. However, the WVC encourage alternative transportation through other means: Campbell now has 3 stations for Light Rail service linking the City to stops throughout Santa Clara Valley. Service started this FY in August 2005. The City Redevelopment Agency was actively involved in this project. Los Gatos has a project that provided bike racks throughout the commercial campus and bike lockers and shower facilities for employees who will ride their bikes to work at the Netflix HQ bldg (HQ bldg houses approx. 200 employees). The City of Saratoga has been investigating development of a 'rails to trails' project along a Southern Pacific Railroad corridor. The City has held public hearings on the proposal but a resolution has not been reached. The City website encourages biking through its "Bikeways" map, showing where striped bike lanes exist, and classifying bike routes according to safety.	Planning Dir. / Sr. Planner
Reducing Traffic Congestion	CB-6/7	Continue to incorporate and support "Best Practices for Integrating Transportation and Land Use" as documented in the VTA's 2003 Community Design &	These elements remain in the WVCs' General Plans and serve as guiding principles for their Land Use and Transportation development.	Traffic Engineer

WEST VALLEY COMMUNITIES

		Transportation Manual.		
Watershed assessment and protection	CB-8	Implement agreed-upon guidelines & standards developed by the Water Resources Protection Collaborative for watershed protection.	Campbell, Los Gatos and Saratoga have participated in, and invested significant staff time in, the Water Resources Protection Collaborative. All of the West Valley cities have reviewed the "Guidelines and Standards for Land Use Near Streams" and plan to use them in their permitting process.	Planning Dir
Street sweeping & stormdrain O&M	CB-11	See Street Sweeping section (3.B) of this work plan for tasks on data collection and evaluation.		
Street sweeping & stormdrain O&M	CB-11	Implement (as appropriate) identified improvements to current street sweeping and storm drain system O&M programs (within available budgets). Meet with WVSD for stormdrain O&M evaluation.	See Street Sweeping in Public Agency Activities section of this report.	Pub Works Supt. with WVCWP guidance
Outreach on pool, spa maintenance	CB-12	Continue to distribute pool & spa maintenance brochure via agency department counters and public places. As time permits, update WVCWP website with current Pool & Spa maintenance information.	WVC ordered an additional 500 Pool brochures for distribution at Planning & Bldg Dept counters. Municipal staff will provide the brochure to new pool and spa owners. The brochure is also distributed at community events. (see PI/P section *B. WVCWP Joint Projects – a. distribute materials*)	WVCWP with Municipal Staff
Outreach on pool, spa maintenance	CB-12	Continue to distribute pool & spa brochures as part of ICID WVC inspections.	The Inspector provides pool and spa brochures to residents and pool and spa companies as part of his IC/ID Inspection Program.	WV Inspector

WEST VALLEY COMMUNITIES

FY 2005-2006 ANNUAL COPPER (and NICKEL) ACTION PLAN REPORT

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Use of architectural copper	CB-21	Within the Planning permit process, discourage use of copper roofing and gutters.	All WVC discourage copper architecture, with the exception of Los Gatos.	Planning Dir/ Sr. Planner
Nickel Action Plan Tasks				
Control nickel discharge from construction sites	NB-1	Sediment Control: Continue to implement Construction Inspection Performance Standards (see Construction Inspection work plan section).	See Construction section of this report.	Bldg Official/ WVC-ICID Inspector
Control nickel discharge from construction sites	NB-1	Training: Continue to have inspectors attend Regional Board/Program workshops on construction site management and learn latest erosion/sediment control techniques	Campbell hosted the Construction Site and Erosion Control workshop at the Campbell Community Center on Dec 8th & 9th 2005. The WVCWP Mgr, WVCWP Inspector attended for the West Valley communities, and spoke at the workshop about the need for field staff to report any observed sediment discharges to the WVCWP for follow-up.	Bldg Official/ WVC- ICID Inspector

Copper/Nickel Action Plan Evaluation

Car Wash Outreach Evaluation:

Car Washing has been highlighted on the WVCWP home page, the Car Wash Kit flyer was also sent as a PDF to Fire Dept inspectors at their request. The Fire Dept inspects the West Valley industrial and Commercial facilities, and reports incidents in residential areas if they happen to see any violations while out in the field. WVCWP would like to have an all-inclusive, educational copper brochure, which would include car washing, architectural copper and pool draining in one piece. However, the WVCWP has not had the staff or resources to create something like this that would be appropriate for distribution and mailing to residents.

Pool and Spa Brochures:

Each of the West Valley communities (except Monte Sereno) ran out of Pool and Spa brochures and ordered 150 to 200 more to give out at the planning counter and to all new pool and spa owners. WVCWP Pool brochures were sent out to all pool and spa owners during the previous year.

Educational Outreach Evaluation:

The WVCWP will continue to provide outreach on car washing, vehicle maintenance, alternative transportation, and pool maintenance during in-class

WEST VALLEY COMMUNITIES

FY 2005-2006 ANNUAL COPPER (and NICKEL) ACTION PLAN REPORT

Activity	Source	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
presentations and outreach at community events. WVCWP incorporated messages about activities that can prevent copper runoff as part of the new Kindergarten and 4th grade Enviroscape curriculum, and as part of its Enviroscape presentations at community events. These presentations have been successful in raising interest in the proper car-washing and pool & spa maintenance. Staff has found that children seem especially receptive to the information about copper and car washing when they participate in the Enviroscape activity. **Street Sweeping:** The WVC continued their street sweeping programs and tracked and reported annual street sweeping data to the Program. The City of Saratoga highlighted street sweeping with a postcard which was sent to all city households. The sweeping company created a color postcard announcing its new contract with the City. The card stressed the importance of street sweeping, provided a map of routes with schedules and asked that cars be moved before 6am on the day of street sweeping. Street sweeping has become very important to residents. If the streets are not swept on schedule City or Town staff receive phone calls to register complaints. The Town of Los Gatos had a resident call on the Fourth of July because it was the regularly scheduled day to sweep but the sweeper did not show up.

TRASH INVENTORY & MANAGEMENT

FY 2005-2006 Work Plan Self Evaluation Matrix

Source	WPActivity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
Trash Work Plan	Strategy	Assist Program staff, by participation in Trash Ad Hoc Task Group, in developing a long-term strategy for trash conditions in urban streams and waterways.	The West Valley Clean Water Program Mgr attended the Trash AHTG meetings and provided comments from West Valley Cities. Accomplishments this year included fine tuning electronic reporting forms for KAB drive by monitoring of existing problem areas; revised Urban Rapid Trash Assessment procedures and tally form for categorizing data and determining trends and future management actions.	WVCWP Mgr to attend AHTG and discuss with municipal Reps at WVCWP monthly meetings
Trash Work Plan	Identify and Prioritize Problem Areas	Identify and prioritize management of potential sources that may contribute to trash problem areas in a subset of urban streams and waterways	During FY05-06 all West Valley trash problem areas were monitored (see Trash Problem Area Evaluation Results table attached). Management actions were implemented and evaluated to see what more could be done at specific problem sites. Saratoga's code enforcement officer visited businesses which back up to Saratoga Creek to discuss an illegal dumping problem. WVCWP organized a student-parent participation cleanup event at the Saratoga Creek problem site. WVCWP Mgr contacted Caltrans Assistant Stormwater Coordinator (District Four) about working together to resolve a trash problem at Hwy 17 and Hamilton off ramp, where a new light rail station may have contributed to an increase in pedestrian littering. WVCWP took photos documenting the litter. Caltrans agreed to send a crew out to clean up the site. WVCWP and Caltrans will continue to consider ways to reduce trash at this site.	Sr. Civil Engineer/ Public Works Supt, WVCWP staff to assist

Source	WPActivity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			WVCWP presentations provided to students as part of the Enviroscape Activity feature a trash topic. WVCWP conducted three volunteer cleanup/trash monitoring events in partnership with local schools. Each event is opened with a brief talk on the trash problem facing our creeks and Bay. Volunteers seem to be energized by the chance to make a difference. Two schools conducted trash cleanup events after their classroom presentations.	
Trash Work Plan	Evaluations	Conduct trash evaluations using the RWQCB Rapid Trash Assessment protocol (Version 7.0) and/or the KAB Litter index, in local trash problem areas. Continually revise identified trash problem area list as litter conditions change.	WVCWP staff conducted *Keep America Beautiful (KAB)* assessments at all identified problem areas in the West Valley Communities, for a total of 57 assessments. For details see the Trash Problem Area Activity Reports following this table. Campbell monitored 13 sites, conducting 20 KAB assessments and 3 RTA assessments. Los Gatos monitored 8 sites, conducting 11 KAB assessments. Monte Sereno monitored 5 sites, conducting 15 KAB assessments Saratoga monitored 4 sites, conducting 7 KAB assessments and 1 RTA assessment. One of the sites Saratoga listed as SA04 was actually in San Jose. Site SA04 will be replaced by another site in Saratoga, to be determined by monitoring results in FY06-07.	Campbell Stormwater Rep (Sr. Civil Engineer) and Public Works Supt. WVCWP to assist
Trash Work Plan	Management Practices	Continue identifying and implementing trash control measures, as appropriate, to address trash problem areas.	All West Valley sites were monitored this year. Several new sites were added to the list to be monitored (a couple to be cleaned) in FY06-07, based on documented accumulation of trash in new areas. Some problem areas are in Caltrans jurisdiction. In June 2006, the WVCWP Mgr called Caltrans about cleaning up Freeway on and off ramps in Campbell (Fwy17 & Hamilton).	Sr. Civil Engineer/ Public Works Supt. WVCWP to assist

Campbell ♦ Los Gatos ♦ Monte Sereno ♦ Saratoga

FY 2005-2006 ANNUAL REPORT

Trash Work Plan	Report on Trash Mgmt Practices Implemented	Provide Program staff with City specific information on trash management practices implemented, using standardized reporting format.	Transferred the West Valley citizen participation monitoring data into RTA format for Program's annual report. The WVCWP conducted three trash monitoring events with student and citizen volunteers. The City of Campbell conducted one event on 4/8/06 using the WVCWP tally forms (summary sheets are included in this report for each monitored site). Volunteers were taught how to record and document trash types and quantities.	Sr. Civil Engineer/ Public Works Supt, with WVCWP to coordinate
Citizen Participation	Monitoring/Citizen Participation	Continue to promote citizen participation program to monitor trash in local creeks (element of Creek Keeper's Program).	**WVCWP** and the West Valley communities organized five large clean up events. "Clean A Creek" flyers (announcing the Westmont High cleanup) were distributed to 13 schools in Campbell Union School District for the Sept. 17, 05 event. Fifty (50) volunteers participated – see attached tally sheet for trash collected. **WVCWP** sent a notice to Westmont High for the PTA / daily e-mail bulletin to notify students at Westmont High School of the Clean Up on 5/20/06. Fifty (50) volunteers attended the spring event as well. **Saratoga** and WVCWP staff organized a student-parent participation cleanup event on April 1, 2006 at Saratoga Creek behind restaurants on Big Basin Way. Thirty eight (38) volunteers and staff picked up 38 bags of trash (weighed trash & recyclables totaled about 100 lbs.) Large items discovered included a file cabinet and a water heater which could not be removed by staff or volunteers. Water District (SCVWD) staff met with WVCWP staff and agreed to partner with the City on pick up of the larger items. The steep banks of the creek make retrieval of the items both unsafe and costly. Saratoga Code enforcement alerted businesses to the dumping problem and Saratoga Police started surveillance of the area. **Los Gatos & Monte Sereno** sponsored a successful *Stash the Trash* event on Saturday 10/15/05. Over 350 volunteers monitored and cleaned up trash. About 35 support staff	WVCWP Staff to coordinate

Source	WPActivity	FY05-06 Work Plan Tasks	FY 05-06 Accomplishments	Responsible Party
			setup the event and provided breakfast to volunteers. Staff also joined the volunteers in picking up trash. Volunteers started at 9am with many finishing up as late as 2pm. A total of 396 bags (not all full) of trash were picked up. Trash included a bike and a shopping cart (which one team returned to Trader Joe's). Paul Michael at Waste Management garbage collection service provided a large dumpster for the trash. **City of Campbell** held a spring public cleanup event on April 8, 2006, which brought in 145 volunteers for three hours of trash monitoring and cleanup. Volunteers picked up trash from sides of streets, along the railroad tracks, near the creek trails, and from some off-path areas, etc. Approximately 600 lbs of trash and recyclables were collected.	
Citizen Participation	E-Waste Event	Continue to promote citizen participation.	WVCWP and municipal staff co-sponsored an E-waste collection event with Thomas Hogye, Vice President and General Mgr of United Datatech (UDT). UDT guaranteed that the E-waste would be recycled safely and would not be sent to foreign shores. The Town of Los Gatos provided a municipal parking lot as a collection site and municipal staff from two of the West Valley Cities worked the event. Before the event, local Los Gatos and Saratoga community newspapers printed a story about a TV set that was found in Los Gatos creek. A WVCWP ad for the event and the upcoming event. As a way of supporting a clean, healthy environment, two local businesses (Pizza My Heart & Le Boulanger) donated free breakfast and lunch for volunteers who worked the event. A total of 33,657 pounds of E-waste (consisting mostly of televisions and monitors) was collected	WVCWP and Municipal staff

Trash Inventory & Management Evaluation

Dumpster Area Inspections & Education for Local Businesses

The WVCWP Inspector checks the dumpster areas of most of the downtown restaurants in each of the West Valley communities for signs of illegal dumping or debris around open dumpster lids. He provides urban runoff education and IPM (pest management materials) as needed. His method of informal visits and issuing *notices to comply* has helped to reduce the amount of trash-related dumpster violations over the past three years.

Educational Outreach to Students and Teachers in Local Schools

WVCWP staff responded to every opportunity to talk about trash with students in FY05-06. The trash topic is always included in the classroom Enviroscape presentations. This year a Saratoga fourth grade class and their parents partnered with WVCWP to hold a cleanup the week after their classroom Enviroscape presentation; and in June, after a classroom presentation, a Los Gatos Kindergarten took a tour around the school to look for trash and pick up the litter they found. Teachers from both schools have said that they would like the same presentation for their classes next year.

Creek Keeper Events – Volunteer Participation - Trash Identification, Tallying & Pick-up

The WVCWP has been particularly successful (from 2003 to 2006) in recruiting student volunteers for creek cleanups and the task of conducting trash assessments. The WVCWP's method of trash assessment is similar to the RTA method except that it was designed to include trash types that are most often found in West Valley locations and to be simple enough for young students to use. This year data was collected at West Valley events and later transferred to the Program's Rapid Trash Assessment forms so that the monitoring completed by volunteers could be evaluated with other Program data. During FY06-07 WVCWP staff will revise the WVCWP tally forms so that all trash data collected by West Valley volunteers (Creek Keepers) can be submitted to the Program as RTA trash assessments.

General Evaluation

WVCWP staff has noticed that volunteers and on-lookers at local trash tracking and cleanup events show appreciation, enthusiasm and interest. Many people respond positively to getting rid of trash, and are surprised to find out that trash is a problem that may need to be addressed with permits and requirements. As clean up events recur every year and students and other residents volunteer, trash tracking and trash collection is likely to grow in popularity. According to social marketing techniques, to effect behavior change it is more productive to start by targeting the "green" audience for educational outreach and support. "Green" refers to the population that is willing and ready to support the idea and may already be taking some of the desired steps. The "green" audience will grow in numbers as the marketed idea becomes acceptable to a wider population. As acceptance prevails, the "brown" audience (those who are resistant to accepting the change) will be swept into some positive behavior changes by peer pressure. WVCWP is targeting two green audiences for awareness. Most of the volunteers that attend clean ups are part of the "green" population. Besides reaching out to volunteers, WVCWP aims to reach students and make water pollution prevention concepts fun. The students are also a "green" audience because they easily receive and remember what they hear and see and often take the message home or share it with friends. WVCWP cleanup events and classroom presentations have been very successful in helping to change local students' and residents' perspective on trash. In FY06-07 these events will be conducted as often as West Valley budget and staff time will allow.

NEWS

Families clean up the creek

The Saratoga Creek Clean-up Project, sponsored by the city of Saratoga and the West Valley Clean Water Program, is an effort to get children and their parents more involved in the community and the environment. Families with young children are invited to pick up litter from the banks of the Saratoga Creek on April 1 from 10 a.m. to noon. Supplies and snacks will be provided.

Participants will clean up the creek behind downtown businesses between Fourth Street and Highway 9.

A maximum of 30 children can participate, so parents should call to reserve a space.

To participate in the event or for more information, email Sue Persico at persico16@comcast.net, or call 408.867.7323.

Local residents in the dumps over hazardous waste disposal issues
By Jason Sweeney

Saratogans don't want their environment polluted with hazardous waste. Everyday products common to suburban neighborhoods, if not disposed of properly, can wreak havoc on water supplies and local ecosystems.

When county officials told Saratoga residents they were no longer eligible to participate in the Countywide Hazardous Waste Collection Program, city clerk Cathleen Boyer heard about it.

"Three hundred people called in after funding ended in November," Boyer said.

City staff began referring residents to alternative sites to dispose of items such as batteries, motor oil and flourescent light bulbs. But alternative disposal sites for latex and oil-based paint, pesticides and other household chemicals were not available.

Boyer said every year Santa Clara County asks the city of Saratoga to augment the Countywide Household Hazardous Waste Collection Program with about $40,000. Because of budget constraints last year, the city decided not to provide augmentation funding for the program, which meant Saratogans became ineligible to participate in late November.

A recent decision by the city council to provide $25,000 budgeted out of the city's environmental fund means city residents can once again dispose of hazardous waste with the county. Saratoga will be participating in the program through the rest of the fiscal year, which ends in June. Then the city council will decide what to do from there.

"We're having to subsidize our hazardous waste more than most cities do," Councilwoman Kathleen King said. "It's pretty expensive for us to drop off hazardous waste. We're doing it because it's the right thing to do."

Several factors make hazardous waste disposal expensive for the city. The county provides $1.85 per ton of trash to the city's environmental fund. Because Saratoga is mostly residential with little commercial activity, and because city residents recycle and use disposal services at a higher rate than average, funding usually runs out before the fiscal year has ended. Augmentation funds are then required.

Rob D'Arcy, the hazardous materials program manager for Santa Clara County, said because Saratogans are more environmentally aware, they require a higher level of service. "Given the demographics of Saratoga, being residential with little commercial, the funding is not quite adequate for the people who want the service. We were at a point where we couldn't deliver the service without appropriate funding so we referred them to the city."

D'Arcy said Saratogans make frequent appointments to drop off their hazardous waste with the county and they participate in temporary drop-off events throughout the year.

Although Saratogans are once again eligible to residents citizens would pressure the producers of products such as garden pesticides, household cleaners and paint to take responsibility for their disposal rather than leave it to government.

"The producers have developed sophisticated distribution systems but not for reverse distribution," D'Arcy said. "Instead, it's pushed onto the taxpayers. If you are going to profit from a product, then the end-life of the product should be part of the cost. It's not a job for government. It's a waste of taxpayers' money and it's a shame the producers aren't held responsible."

Subject: Sunnyvale Urban Runoff Management Program FY 2005-2006 Annual Report

Dear Sue:

This report is submitted by the City of Sunnyvale, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's municipal storm water NPDES Permit. The report summarizes activities performed during FY 2005-2006 in accordance with the City of Sunnyvale's Urban Runoff Management Plan (URMP) submitted on September 1, 2005, which contains modifications to the performance standards from the original URMP first submitted in 1997.

The goals of this Annual Report are to: 1) concisely document implementation of the URMP during the past fiscal year; 2) evaluate program results for continuous improvement; and 3) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following sections:

I. Contents of report
II. Program highlights and accomplishments
III. Attachments A - Q

I. Contents of the Report:

K. Trash Inventory and Management
L. Water Quality Monitoring
M. Staff Training Summary Table
N. Watershed Management Activities
O. PCB Plan Development
P. Watershed Measures: Sediment Impairment Studies
Q. Storm Water Permit Renewal Activities

Responses to the Regional Board's comments on Attachment E, Group 2 projects for FY 2004-2005 received on July 26, 2006, are included in Attachment E attachment of this year's report. No comments were received on any other sections of the FY 2004-2005 Annual Report.

A summary of the City of Sunnyvale's Urban Runoff Program highlights and accomplishments are described below.

II. Program Highlights and Accomplishments

1) A significant amount of staff time and effort continues on efforts to implement the C.3 provisions of the permit for applicable projects (i.e., those that add or replace 10,000 square feet or more of impervious area), construction inspection, and beginning implementation of post-construction inspections as projects are completed. The Sunnyvale Municipal Code, Chapter 12.60 was amended as of October 15, 2005 to reflect the reduced size threshold (adding or replacing 10,000 sq. ft of impervious surface.) and to address the Hydromodifcation Management Plan (HMP) provisions of our amended storm water permit.

2) The City is in the process of revising the Interim Stormwater BMP Guidance Manual to include the Applicable Project definitions, HMP applicability area maps, and Storm Water Management Plan guidance for applicants and 3rd party certifiers. The revised manual will provide applicants necessary information in one document, rather than in the several locations it is presently found in. It will be reviewed and signed by the Directors of Public Works and Community Development as the primary C.3 - BMP guidance document for the City.

3. In cooperation with Solid Waste Division, staff completed a series of presentations to all City departments regarding the Environmentally Preferable Purchasing Policy and how it impacts the purchase of low-mercury or non-mercury-containing products for City use.

4) The PI/P Program continued with its effective outreach to local residents at the Sunnyvale Farmer's Market, school presentations, neighborhood and corporate fairs, pancake breakfasts, and many other community events, providing a good venue for distribution of literature and 1:1

discussions with residents on the importance of and ways to prevent storm water pollution. Descriptions of these activities and their effectiveness are included in Attachment G.

5) With the assistance of a volunteer, staff was able to complete two assessments (winter and spring) of the 21 locations in the City that had been identified with potential trash problems in previous years. Assessments were done at locations on the lower reaches of the Sunnyvale East and Sunnyvale West Channels using the Regional Water Quality Control Board Trash Assessment Methodology. The other 19 areas were land-based assessments using the Keep America Beautiful methodology. In addition, City staff coordinated with the neighboring cities of Mountain View, Cupertino, West Valley communities, Santa Clara County, the Santa Clara Valley Water District and volunteers from the Steven/Permanente Creek Watershed Council to assess five sites along Stevens Creek. Results of these efforts are discussed in Attachment K.

Thank you for your review of this Annual Report. We look forward to receiving any comments you may have. If you have any questions regarding the materials submitted, please contact Kristy McCumby Hyland at (408) 730-7274.

Sincerely,

Lorrie B. Gervin, P.E.
Environmental Division Manager

FY 05 - 06 Annual Report

Attachment B

IC/ID Elimination Activities

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment B – IC/ID Activities
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source[1]	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Illicit Connection & Illegal Dumping Elimination Activities					
	Effectiveness Evaluation of Enhanced Illicit Connection/Illegal Discharge (ICID) Reporting	Permit Prov. c.6.a.ii	Evaluate results recorded on the IC/ID standard reporting form for Type of Incident and Source of Incident. Use this information to identify new or improve current public outreach efforts in problem areas that are identified. Continue to collect data for enhanced IC/ID reporting. Report results in the Annual Report.	• The Pretreatment Program continues to review and discuss ICID reports on a monthly basis upon receipt and during weekly staff meetings. The reports are reviewed to discuss trends and identify areas that will require public outreach or enforcement. • ICID reports identified one sanitary spill or leak as a pollutant incident in FY 05-06, which was a decrease from the seven incidents noted in FY 04-05. The decrease in incidents can be attributed to the education and outreach to food service establishments (FSEs) during inspections and from the City Sewer Department continuing with a focused line stoppage preventive maintenance program. • Pretreatment initiated its Sanitary Sewer Overflow (SSO) project that provides public outreach regarding grease disposal from high density residential areas. See PIP Attachment G for details on the outreach efforts. • The SSO program continues to work closely with the fats, oil, and grease (FOG) program, and is targeting FSEs with grease interceptors. A FOG content demonstration was used to train	Annually Report 09/06	Dave Grabiec, Laboratory/Pre treatment Mgr.
	Effectiveness					

[1] Place where continuous improvement item is identified: e.g. Urban Runoff Management Plan (URMP); **WP 05-06** (last year's Sunnyvale work plan); **Permit Provision** from Order No. 01-024 and Revised Order No. 01-119; Program Work Plan (**PWP**) task number submitted to the Regional Board and identified for inclusion into co-permitees in work plans; or **Program** (task approved by the Management Committee for all co-permittees). The **P.S. Id.** column refers to the specific performance standard in the Sunnyvale URMP.

FY 2005-2006 Annual Report
Attachment B – IC/ID Activities
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source[1]	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Evaluation of Enhanced Illicit Connection/Illegal Discharge (ICID) Reporting ***(Continued)***			employees. • The number of pools/spas/fountains discharge incidents increased (6) since FY 04-05 (3). This may be due to outreach efforts over the past two years causing increased public and city staff awareness of proper swimming pool draining procedures that resulted in more incident reporting. • Paint discharge reports increased by two in FY 05-06, but no saw cutting slurry discharge incidents occurred. The overall number of residential and commercial construction-related ICID incidents decreased from FY04-05 (8) to FY05-06 (7). An emphasis on outreach with pollution prevention messages for home improvement activities will continue.		
ICID-3a	Annual Training	URMP	Continue annual training for staff regarding IC/ID storm water inspection procedures, enhanced reporting requirements for ICID incidents, effectiveness evaluation and public outreach.	• Pretreatment Program staff continues to receive training based on the availability of training events, trends noted from ICID reports, and database updates. • The current ICID incident database more accurately tracks separate ICID events for reporting purposes. The newer SSO database is also in use. • Post-construction storm water treatment BMPs and storm water updates, permitting, and enforcement training has been completed by Pretreatment Program staff. FOG program and control classes were also attended. • See Attachment M for details on staff training received.	Annually Report 09/06	Dave Grabiec, Laboratory/Pre treatment Mgr.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment B – IC/ID Activities
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source[1]	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
ICID-3.b	Restaurant IC/ID Reporting	URMP	Continue to study the effectiveness of Restaurant BMP materials. Note problem practices observed. Follow up with appropriate changes to educational materials and/or enforcement actions, as needed.	• FSEs appeared to respond favorably to BMP information in multiple languages, and poster BMPs in multiple languages (English, Spanish, Mandarin, Vietnamese, and Korean) made to be displayed have been distributed. • Familiarity with grease interceptors by FSE employees should further reduce problems • No SSO incidents directly related to an FSE have been reported in FY 05-06.	Annually	Dave Grabiec, Laboratory/Pre treatment Mgr.
ICID-5a	Effectiveness Evaluation	URMP	Evaluate customer service/ responses to incidents/complaints. Determine effectiveness of program and suggestions for improvement through customer interviews and reviews of responses.	• All incidents of customer complaints were responded to within two business days of the complaint. An immediate response is the desired goal and typically is so if the ICID event is believed to be in progress. • The Pretreatment Program has received positive feedback from external customers when a follow-up call was made to the caller regarding the Program's response to the complaint. • Public Works staff from other divisions have verbally indicated their appreciation of the timely responses to ICID incidents by Pretreatment Program Industrial Waste Inspectors. Public Works staff was provided with ICID response cards during training to help them report incidents when they are observed.	Annually Report 09/06	Dave Grabiec, Laboratory/Pre treatment Mgr.

Illicit Connection & Illegal Dumping Elimination Activities (cont.)						
ICID-5b	Performance Standard revision	URMP	Review the IC/ID Performance Standards with staff. Draft new performance standards, as necessary, to meet the needs identified in the effectiveness evaluation of the enhanced IC/ID program. Implement changes, as needed.	• The current ICID Performance Standards were reviewed and are attainable with current staffing and resources. No additions were needed to implement the enhanced IC/ID program. • Periodic review of the Standards will continue to ensure they are being met. • The Program has met all Performance Standards submitted in the latest Sunnyvale URMP revision dated September 1, 2004.	Annually Report 09/06	Dave Grabiec, Laboratory/Pretreatment Mgr.

2) Reporting Data (See Enhanced Reporting Tables for IC/ID Incidents in Attachment C, Appendix 1.)

- ***Number of incidents:***
  Thirty separate incidents were reported to the Pretreatment Program in FY 05-06; which is approximately a 17 % increase from the number of separate incidents reported in FY 04-05 (25). Multiple calls that were received for some incidents were not recorded as separate incidents in the ICID Enforcement Action Summary by incident source in Attachment C, Appendix 1.

- ***Types of pollutants and pollutant sources:***
  The majority (57%) of the sources of the incidents were from residential sites (17). Smaller numbers of incidents came from commercial (5), food facilities (4), construction sites (2) and industrial facilities (2).

  The incidents reported from residential pollutant sources included the following pollutant sources: discharges from pools / spa / fountains (6), vehicle and equipment leaking (3), un-hardened cement discharge (2), paint discharge (2), equipment cleaning (1), surface cleaning (1), dumping – non-hazardous (1) and miscellaneous incidents (1) discharges were the other pollutant sources. The number of incidents reported in FY 05-06 from the residential pollutant source (17) is slightly less than the number reported in FY 04-05 (20).

  Of the incidents reported from commercial, food facilities, construction sites, and industrial facilities pollutant sources, nine pollutants were identified, with dumping – non-hazardous, equipment cleaning water, surface cleaning water, and cooling water discharge. Five of the pollutants reported in FY 05-06 (dumping – non-hazardous materials, equipment cleaning water, food facility oil and grease discharge, water line breaks, and cooling water discharge) were not identified as pollutants in FY 04-05.

Of the number of incidents reported in FY 05-06 from the five commercial pollutant sources, the surface cleaning discharge (2) pollutant was more than the number reported in FY 04-05 (1). The numbers of miscellaneous incidents (1), sanitary spill or leak (1) and saw cutting slurry discharge reported in FY 05-06 are less than the number of incidents reported in FY 04-05.

There were no reported incidents from automotive facilities or other/unknown pollutant sources. There were no reported incidents of grey water discharge, used oil dumping, vehicle repair or vehicle washing pollutant discharges in FY 05-06.

- ***General locations (certain industrial areas or neighborhoods where incidents occurred or were incidents randomly spread out?)***
  Most incidents were randomly spread out through the City, with no clusters identified from the data.

- ***Number of incidents reported by citizens or employees:***
  There were 11 incidents reported by citizens and 14 incidents reported by both City of Sunnyvale employees and illicit discharge inspectors. The remaining five incidents were reported by other agency employees or from other sources.

Follow-up actions:

- ***Number of investigations:***
  Six incidents where the discharge required a correction be made were followed-up with an inspection to ensure compliance.
  Twenty four of the incidents were either resolved on site or did not require follow-up.

- ***Which enforcement actions were taken and to what level?***
  Eleven incidents required no enforcement action, as the issue was resolved on site.

  Thirteen verbal notices were issued, and all of them were corrected at the time of the inspection or within the amount of time given to correct the violation(s). Four of the verbal notices required a follow up inspection to ensure compliance.

  More than half (7) of the verbal notices were issued to residential and commercial facilities regarding the owners or contractors working at a site not following the City's BMPs. All of the contacts received appropriate outreach BMPs.

  Six warning notices were issued, and all of them were corrected at the time of the inspection or within the amount of time given to correct the violation(s). Two of the warning notices required a follow up inspection to ensure compliance.

Residential and food facilities were issued two warning notices each, and a commercial facility and a construction site received a warning notice each for not following the City's BMPs. The owners, contractors, or employees all received appropriate outreach BMPs.

No notices of violation were issued in FY 05-06.

3) Response to Regional Board Comments on ICID section of FY 04-05 Annual Report.

No comments were received.

4) Evaluation of ICID Program in FY 05-06:

How well did ICID program work?

The City of Sunnyvale Pretreatment Program response to ICID incidents continues to exceed expectations based on the performance standard requirement for ICID response time.

There was no significant change in the number of ICID incidents reported in FY 05-06 compared to FY 04-05, yet identifying additional ICID events and receiving better ICID information has improved. Increased surveillance of geographical areas and enhanced interdepartmental communications appeared to increase the number of reportable ICIDs. It also appeared that such activities led to an increase in the amount of ICID events reported, yet the overall number of ICID incidents reported in FY 05-06 did not change significantly.

The program continues to improve on educating the answer point personnel at the Corporation Yard and the Water Pollution Control Plant, and that outreach has also been expanded to the Streets and Sewer personnel. These efforts further enhance the effectiveness in helping inspectors with the identification of the incident, its location, and in providing the proper educational tools to the party causing the ICID event.

The ICID program worked well regarding monitoring construction activities that could lead to ICID events. Procedures have been developed with other City staff to ensure that construction contractors are aware of and comply with storm water pollution prevention BMPs in both pre-construction and during construction. Inspectors can now more readily identify construction sites and monitor them in addition to the construction site inspection activities done by City Building inspection staff and Project Administration Staff for public projects. .

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment B – IC/ID Activities
Municipality: Sunnyvale

What caused the most trouble?

ICID events occurring at residences present a continuing challenge. The current housing market might be a factor leading to increased home improvement activities, which means more contractors performing most of the work. The risk of paint, un-hardened cement, non-hazardous dumping and equipment cleaning discharge incidents increases, and pollution prevention outreach typically occurs during or after the ICID event. However, if the ICID event already occurred, additional effort has been put on working with the homeowner or locating the contractor linked the ICID event and require them to conduct any remedial activity.

There was an increase in the number of pools/spas/fountains discharge ICID events (6) compared to those that occurred in FY 04-05 (3). Swimming pools that overfilled from the excessive rainfalls in spring of 2006 and the increase in draining unused pools to reduce mosquito breeding grounds might have contributed to the increased ICIDs. Additionally, a brochure that included BMPs for swimming pool draining was previously mailed to all City of Sunnyvale residences. It might have increased proper drain pool awareness, and citizen complaints were then reported regarding those residences that were unaware of proper swimming pool draining procedures.

Is there a particular geographical area that causes the most problems?

The reported ICID events seemed to have occurred in geographical areas that are diverse as the pollution sources and the pollutants that were involved with them. High density to medium density residential areas previously appeared to have a greater incidence of sanitary sewer spills, but such locations didn't seem to be impacted in FY 05-06. Geographical hot spots have been identified, however, where the potential for a sanitary sewer spill exists. These areas received additional sewer maintenance, and the Pretreatment Program focused on extended public outreach, with additional emphasis on medium density to high density residential living complexes.

Are problems getting better or worse?

The related problems are being reduced. Improved coordination with the Public Works Streets and Sewers Department, improved public outreach efforts, and more stewardship devoted to the inspector's areas are becoming solutions to previous challenges.

Describe some potential causes:

Language barriers in the food service facilities have been a potential cause of ICIDs, and food service facilities now have related BMPs available in several languages. Bilingual public outreach information is being provided to multi-family residential complexes.

What, if anything will we do differently in the next FY?

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment B – IC/ID Activities
Municipality: Sunnyvale

All food service facilities that utilize grease interceptors are having their personnel trained on proper grease interceptor maintenance. Pretreatment Program staff display the grease interceptor to the personnel and conduct a fats, oil, and grease (FOG) content demonstration. Additional outreach is being provided to medium to high density residential complexes regarding the proper disposal of FOG.

Storm water pollution prevention on construction projects will continue to be coordinated with Building Inspector staff to address prevention of illegal discharges. An emphasis will be on the review and inspection of pre-construction plans and during-construction activities to prevent illegal discharges.

The reporting of ICIDs will be improved by ensuring that the Pretreatment Program database does not record follow up inspections as separate ICID events. The Streets and Sewer Department will submit main line stoppage data on a timely basis, and will also be recording any sanitary sewer overflow that occurs on private property.

2) Reporting Data

- ***Number of inspections conducted, grouped by category of industry/commercial business:***

Automotive	Construction/ Building	Dry Cleaner	Electric/ Electr. Components	Food Service	Machine Shop	Cleaning Services	Other	**Total**
57	2	19	4	316	8	4	221	**631**

See Attachment C, Appendix 1 for IND inspection summary report from the Program.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment C – I/CD Control Programs
Municipality: Sunnyvale

How many problems were found during *inspections?*

Of the 631 inspections completed, there were 15 (Level 1) verbal notices given and, 4 written Warning Notices.

***Describe the kinds of problems found*:**

Nineteen stormwater violations were found through regular inspections of industrial and commercial facilities for FY 05/06. Three violations were found at automotive facilities, one at a machine shop, and fifteen at food service facilities. The automotive facility violations had to do with car washing rinse water potentially or actually reaching the storm drain. One machine shop was found in violation for improper disposal of mop water to the storm drain. The food service violations were typical restaurant problems such as improper disposal of mop water to the parking lot or storm drain, leaking or uncovered tallow or trash bins, and mat rinsing outside.

Numbers of inspections that were the result of citizen complaints or employee tips?

None

How many of the problems received follow up actions?

All of the warning notice violations received a follow up inspection within 30 days to verify compliance. All of the violations that received warning notices were corrected within the time frame of 30 days. Facilities with known repetitive problems receive drive by inspections at greater frequency to check on stormwater compliance.

Describe enforcement actions that occurred and at what level:

There were no enforcement actions taken beyond the written notices this year. Fifteen verbal notices were given, and four written warning notices were given. The written notices were given to facilities where an actual discharge to the storm drain was observed. Verbal notices were given in cases where a potential discharge to the storm drain was observed.

Were enforcement actions spread evenly throughout the categories or were they focused in certain areas?

Enforcement actions were given mostly in the food service category. This is consistent with past data and trends within the City. The higher number of violations found at restaurants has both to do with higher turnover, and the number of inspections completed. Restaurants are inspected more frequently, and there are more of them; therefore a higher number of violations observed are to be expected.

How many problems were resolved?

All problems were resolved within 30 days.

3) Response to Regional Board Comments on ICID section of FY 04-05 Annual Report.
No comments were received.

4) Evaluation of IND Program in FY 05-06:

Provide comments/bullets in the following areas:
Where were the most violations found?
Most violations were found either in car wash areas of automotive facilities, or in trash enclosure / grease interceptor / tallow areas for restaurants.

Is there a particular location or industry that is troublesome?
There was no single location or industry that was troublesome. Automotive and food service facilities in general, had most of the violations. There was no specific geographical area within the City where more problems were noted.

Are things getting better or worse?
Based on the data, stormwater violations are occurring less frequently, indicating that things are improving.

What are potential causes for the improvement or the problems?
Over the last four years, the Pretreatment Program inspected restaurants on an annual basis as part of the Fats / Oil / and Grease Control Program. These inspections include stormwater inspections and outreach as well as Pretreatment inspections. The increased visibility and the increased numbers of outreach materials distributed could both be contributing to more compliant facilities. The Program has been distributing outreach materials in more languages, including Chinese, Korean, Spanish and English. The facility owners seem to appreciate the improved communications.

Are the enforcement actions effective? Why or why not?
The Pretreatment Program has been successful in obtaining compliance using enforcement actions consistent with out Enforcement Response Plan. In all cases, for FY 05/06, these enforcement actions for stormwater violations did not escalate beyond a written warning notice. The focus of the Pretreatment Program has been to build a professional respectable relationship with the commercial businesses by promoting partnerships and an understanding of all aspects of stormwater and water quality protection. This relationship has been achieved through personal communications, outreach efforts, and the local stormwater ordinance. The Stormwater Ordinance also contributes to the

effectiveness of enforcement actions, in that all actions are backed up with specific sections of the ordinance pertaining to the violation(s), and applicable penalties that could be levied.

What will we do differently next year?

The Pretreatment Program will focus outreach efforts on the areas that were identified as having enforcement activities and to look at trends that will help facilitate future public outreach efforts. Restaurant BMPs in other languages will be explored for possible outreach as they have proven effective in the languages available in the past. In addition, the Pretreatment Program will explore opportunities to communicate with other Public Works Divisions such as the Streets, Sewer, and Trees/Landscaping Divisions. More communication with these Divisions may result in an increased awareness of stormwater issues, and could lead to more referrals of potential problems to be inspected by the Pretreatment Program.

What priority industries or industrial/commercial zones will be targeted for next year?

The Pretreatment Program will focus the majority of their effort on the automotive and food service facilities. In addition, commercial zones that have high density residential complexes will be targeted for inspections and outreach pertaining to sanitary sewer spills, blockages, and car wash areas.

FY 05 - 06 Annual Report

Attachment D-1

Public Streets, Roads, and Highways Operation and Maintenance

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment D-1 – Public Streets & Roads O&M
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Public Streets, Roads, and Highways Operation and Maintenance						
ST-1	Use of O&M Pollution Control Measures	URMP	Continue full implementation of O&M measures. Report on implementation in Annual Report.	O&M Measures were implemented on a daily basis throughout the year, with all Field Services staff receiving training on the measures	Annually Report 09/06	Tony Pineda, Street Mnt. Sup.
ST-2	Record Keeping	URMP	Continue to track incidents that Street Maintenance staff responds to. Notify Pre-treatment Program of ICID incidents that may impact storm drains or water quality. Include staff training on enhanced ICID reporting requirements.	• Several incidents (approx. 8) were reported by Field Services staff directly to the Pretreatment Inspectors for follow up and enforcement in FY 05/06 Some were related to cement or sawcut slurry discharges and others were regarding discharges from pools or spas. See Attachment B for details of ICID. • Annual staff training on the illegal discharge incident reporting process was conducted on June 20 and 21, 2006. • Staff was provided with a revised IC/ID incident reporting card that can be kept in a wallet or in a City vehicle so reporting contact information is easily available. See attached sample card.	Annually Report 09/06	Tony Pineda, Street Mnt. Sup. & Dave Grabiec, Lab./Pretreat. Mgr.
ST-6	Streets and Roads O&M	URMP	Annually review and evaluate effectiveness of O&M pollution control measures and BMPs.	Streets and Roads O&M measures/BMPs for storm water pollution prevention were discussed at tailgate meetings for staff training. SOP revision was not necessary this year since they were revised two years ago and no significant changes in operations have occurred.	Annually Report 09/06	Tony Pineda, Street Mnt. Sup.

2) Response to Regional Board Comments on Streets and Roads/Corp Yard section of FY 04-05 Annual Report:
No comments were received on this section from the Regional Board.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment D-1 – Public Streets & Roads O&M
Municipality: Sunnyvale

3) Evaluation of Streets & Roads Activities in FY 05-06:

List BMPs from the performance standards that were evaluated this year and who evaluated them

No BMPs were evaluated this year. An evaluation was done two years ago when the SOPs were revised. No significant changes in requirements came up during the year that would call for a revision of the BMPs.

Describe the evidence that shows that contractors were or were not fully implementing BMPs (list sources: e.g., citizen complaints, staff drive-by inspections, other?)

Field Services staff does not deal with contractors very often. The only large work done by contractors was related to slurry sealing city streets, and City staff were present most of the time, inspecting the work done and making sure that all applicable BMPs were implemented.

Which staff are receiving training and who does not receive it?

All field staff and their supervisors receive training. Only administrative office personnel do not receive the training.

Vacuum		
TOTAL	8,020	14,768

2. Have there been any changes in your street sweeping program?
(efforts to have parked cars removed, changed sweeping frequency, new equipment, significant downtime, etc.)
Sweeping schedule in FY 05/06 was once a month in residential areas, more frequently in commercial areas. When requested, City staff will post "No Parking" signs to remove parked cars in problem areas. Frequency is increased during heavy leaf drop season, and returned to reduced schedule during other seasons.

LEAF REMOVAL

Volume of leaves removed by City/Town crews: 4,385 cubic yards

Leaves bagged by residents and picked up by your City/Town: N/A bags (City does not collect leaves in bags)

Check box if you have a yard waste collection program: ☒ Volume of yard waste collected: 14,847 tons ~~cubic yards~~

(Sunnyvale does not track volume, just weight and this number includes all yard waste, not just leaves).

Check box if you do not have a leaf removal program other than routine street sweeping: ☐

* Report total miles covered by sweepers including areas operated in tandem or repeated.

[1] These areas are all swept together, no individual numbers are available.

City of Sunnyvale

FY 05 - 06 Annual Report

Attachment D-2

Rural Public Works Operation and Maintenance

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Rural Public Works Annual Report
Attachment D-2 – Rural Public Works
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Rural Public Works					
	Rural Public Works Activities	Permit Prov. C.5	Implement applicable Rural Public Works Performance standards and BMPs.	• PW Staff training on Rural PW performance standards occurred on 9/13/05. • Minimal maintenance by PW staff took place this year – only a few small potholes were filled with base rock. • Parks staff also performed regular, non-construction related maintenance such as mowing side-slopes of trail, weekly garbage can pick ups, and monthly litter collection efforts along the trail. • Included staff training on Rural PW Performance Standards and BMPs in other streets and roads annual training.	Ongoing Report 09/06	Kristy McCumby, Environmental Specialist, Parks / Rec. (Scott Russell) & Public Works (Tony Pineda)

2) Response to Regional Board Comments on Rural Public Works section of FY 04-05 annual report:
No comments were received on this section from the Regional Board.

3) Evaluation of Rural Public Works Activities for FY 05-06:

Evaluate where this element applies to your jurisdiction and what activities have been identified as being subject to the Performance Standard?

Only the limited portion of the San Francisco Bay Trail that is maintained by the City of Sunnyvale has been identified as an area where the Rural Public Works performance standards apply. Since the City is virtually built out, there are no longer rural areas (unpaved or paved streets without curbs and gutters) where these requirements may apply. The only area identified that the City maintains is the Bay Trail from the border of the Lockheed Property in the West to Baylands Park in the East.

Maintenance performed in FY 05-06?

The only maintenance activities performed by PW staff were three instances of pothole filling with base rock in trail surface. Parks staff completed their normal maintenance activities such as mowing areas alongside the trail, emptying trash cans and picking up accumulated litter along the trail.

FY 05 - 06 Annual Report

Attachment D-3

Storm Drain Operation and Maintenance

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment D-3 Storm Drain O & M
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Storm Drain System Operation and Maintenance						
SD-5	Storm Drain O&M	URMP	Annually review and evaluate effectiveness of O&M pollution control measures	• O&M measures were discussed by staff during bimonthly Tailgate meetings through the year, and no O&M changes were deemed necessary. • The Corporation Yard Storm Water Pollution Prevention Plan was reviewed and updated during FY 05-06 by Kennedy Jenks. Consultants.	Annually Report 09/06	Jim Craig, Superintendent of Field Services
SD-3	Effectiveness Evaluation	URMP	Include O&M Performance Standard Implementation discussion in staff training; summarizing feedback in written form.	Evaluations were made during tailgate discussions with staff, and the conclusion was that no changes to the current standards were needed at this time.	Annually	Jim Craig, Superintendent of Field Services
SD-2	Reporting of Observed ICID Evidence	URMP and Permit Prov. C.6.a.ii	Train maintenance staff on procedures to notify Pretreatment Inspectors about observed ICID incidents and assist with the collection of data needed for enhanced reporting.	PW Environmental Division staff reviewed enhanced ICID reporting requirements with Maintenance Staff on June 20 and 21, 2006. See Attachment M for training information.	Annually Report in 09/06	Dave Grabiec, Laboratory/ Pretreatment Mgr. & Jim Craig, Superintendent of Field Services

2) Response to Regional Board Comments on Storm Drain O&M section of FY 04-05 Annual Report:
No comments were received from the Regional Board on this section.

3) Evaluation of Storm Drain O&M Activities in FY 05-06:

Describe BMPs that were evaluated this year. (See performance standard for BMP lists)

No BMPs were evaluated this year, since the evaluation was done two years ago when SOPs were revised. No additional need for revision came up during the year.

FY 05 - 06 Annual Report

Attachment D-4

Water Utility Operation and Maintenance

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Work Plan
Attachment D-4 – Water Utility O&M
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Water Utility Operation and Maintenance						
WU-1	Inventory of Key O&M Activities	URMP	Inventory all key water utility O&M activities to identify routine and unplanned non-storm water discharges	Inventory is to be performed every three years. Review of activities is scheduled to be performed next fiscal year (06/07). Due to lengthy budget process staff had no time to update SOPs for recycled water during FY 05/06. Update has been rescheduled to be performed during FY 06/07 and has been carried over to the FY 06-07 work plan.	Ongoing Report O9/06	Jim Craig, Sup. of Field Services & Val Conzet, Water PW Supervisor
WU-3	Staff Training	URMP	Provide staff training on the regulatory requirements of the URMP and the use of the WUPPP.	Staff training to be performed at least once each year. Staff continuously reviews requirements during tailgate meetings, and training relating to URMP was provided in September, 2005. (See Attachment M for training details.)	Ongoing Report 09/06	Jim Craig, Sup. of Field Services & Val Conzet, Water PW Supervisor
WU-5	WUPPP	URMP	Annually review and evaluate effectiveness of Water Utility Pollution Prevention Plan. Use both staff and contractor (if appropriate) feedback.	The WUPPP was reviewed and no plan changes or staff contact information changes were deemed necessary.	Annually Report 09/06	Jim Craig, Superintendent of Field Services & Val Conzet, Water PW Supervisor
	Performance Standard Review and Revision	URMP	Participate in SCVURPPP Work Group that will be formed to update the Water Utility Operation and Maintenance Performance Standards	No SCVURPPP work group was formed to address the Water Utility O&M Performance Standards in FY 05-06 due to staff participation in the Municipal Regional Permit development activities. This activity has been carried forward into the FY 06-07 work plan.	TBD Report 09/06	Val Conzet, Water PW Supervisor Support: Kristy McCumby, Env. Specialist.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Work Plan
Attachment D-4 – Water Utility O&M
Municipality: Sunnyvale

2) Response to Regional Board Comments on Water Utility O&M section of FY 04-05 Annual Report:

No comments were received from the Regional Board on this section.

3) Evaluation of Water Utility O&M Activities in FY 05-06:

What key O&M activities did you inventory for routine and unplanned discharges as per Performance Standard #1?

None were inventoried this year. A review of key O&M activities is scheduled to be performed next fiscal year (06/07).

City of Sunnyvale

FY 05 - 06 Annual Report

Attachment D-5

Public Agency Activities: Corp Yard

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment D-5 – Corp Yard
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Corporation Yards Operation and Maintenance (Including Parks Division)						
Corp Yard SWPP	Staff Training	URMP	Hold annual Public Works staff training regarding the SWPPP for Corporation Yard.	A one-hour training session was provided by Meredith Durant (Kennedy Jenks) to all Field Services staff on 4/13/06. Meredith also reviewed any operational improvements to be made based on her facility inspections.	Annually Report 09-06	Jim Craig, Superintendent of Field Services
Corp Yard SWPP	Staff Training	URMP	Hold annual Parks and Recreation staff training regarding the SWPPP for the Corporation Yard	Training on the requirements of the Corp Yard SWPPP was held on 02/02/2006 at Ponderosa Park for all Parks staff. Training was provided by the Environmental Division, Public Works staff and covered the requirements of the SWPPP prepared by Public Works consultants for the Corp Yard areas.	Annually Report 09/06	Curtis Black, Parks Superintendent With assistance from the Environmental Division of Public Works
Corp Yard SWPP	Annual Meetings with O&M Supervisor	URMP	Meet annually with URMP Coordinator /staff and CY supervisors on progress and problems in implementing BMPs at the Corporation Yard.	A meeting was held in October, 2005 between PW Environmental Division staff and Field Services supervisors to prepare for the upcoming wet season.	Annually	Jim Craig, Superintendent of Field Services

2) Response to Regional Board Comments on Streets and Roads/Corp Yard section of FY 04-05 Annual Report:
No comments were received on this section from the Regional Board.

3) Evaluation of Corp Yard Activities in FY 05-06:

List BMPs from the performance standard that were evaluated this year and who evaluated them
No BMPs were evaluated this year, since evaluation was done two years ago when SOPs were revised. No need for additional revision came up during the year. SOPs (and BMPs) are scheduled for review and revaluation during FY 06/07.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment D-5 – Corp Yard
Municipality: Sunnyvale

Describe the evidence that shows that contractors were or were not fully implementing BMPs (list sources: e.g., citizen complaints, staff drive-by inspections, other?)

Field Services staff does not deal with contractors very often for activities at the Corp Yard and this past year did not include any projects where contractors would be required to implement BMPs.

Which staff are receiving training and who does not receive it?

All Field Services' field staff and their supervisors receive training. Only administrative office personnel do not.

Describe the feedback that staff have given about the effectiveness of the BMPs

Field Services' staff has not given feedback about BMP effectiveness other than comments provided during training sessions, pointing out some of the recently instituted mercury-containing lamp storage area requirements.

Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
New Development and Construction Controls -- Planning Procedures						
PL-2	Site Design Guidance to Developers	URMP	Provide information and guidance material to developers early in the project development process regarding site design requirements for stormwater pollution prevention and treatment.	• Ongoing effort: Staff continues to provide Interim BMP Guidance materials and refers developers to the City's web site where information and links are available. The SWMP requirement is also included in the application checklist. Guidance is updated as needed. Storm water control site planning is discussed with developers early in the plan approval process. • Staff is in the process of revising the Interim manuals for review and approval by the Directors of Public Works and Community Development. The Version 2.0 of the BMP Guidance Manual will be completed in FY 06-07 and made available to project applicants both by hard copy and in a downloadable form from the City's website. • Additional staff training on the revised BMP Guidance manual will occur once approved by the Directors.	Ongoing Report 09/06	Jamie McLeod, Assoc. Planner Support: Kristy McCumby, Env. Spec.
PL-10	Staff Training	URMP	Provide staff training (PW and CDD) on policies, design guidelines, and pre- and post construction BMPs and control measures.	• CDD staff receives quarterly updates and/or process reviews. The potential need for storm water controls is discussed for each project during the bi-weekly planning staff project review meetings. Updates are also provided to staff on BMP information, training opportunities and links to relevant web sites.	Annually Report 09-06	Jamie McLeod, Assoc. Planner Support: Kristy McCumby, Env. Spec.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment E – New and Redevelopment
Municipality: Sunnyvale

	Staff Training (Cont.)			• PW Staff training occurs as needed throughout the year as issues or projects come up. (See Table M for training received in this FY.) • When the revisions to the BMP Guidance Manual are complete and approved by Directors, it is anticipated additional training will occur in FY 06-07 for all staff involve in the project development and review process.		
PL-11	Planning Procedure Performance Measures	URMP	Staff review of revised performance measures in order to evaluate effectiveness.	Evaluation of the performance measures were submitted in written form to the URMP Coordinator, Lorrie Gervin.	06/06	Jamie McLeod, Assoc. Planner
PL-8b	Effectiveness Evaluation	URMP	Include Planning Procedures Performance Standard Implementation discussion in staff training; summarize feedback in written form.	• Training is provided to staff on how to implement the performance standards at staff meetings and pre-PRC discussions. • A formal written report is submitted to the URMP Coordinator, Lorrie Gervin.	06/06	Jamie McLeod, Assoc. Planner
	Revise URMP Planning Procedures Perf. Standards	Order 01-119 PWP C.3 b.1	Review Program Guidance and identify new Planning Procedures Performance Standards and/or revise existing standards Group 2 Projects.	• Staff requires all projects that add or replace 10,000 square feet of impervious area to meet Performance Standards. • Written sections of the URMP are under revision to reflect the changes, but requirements are included for these applicable projects based on the sizing criteria in the City's Storm Water Ordinance SMC 12.60. • Staff reviews current standards when questions arise and identifies potential standards be considered for revision in order to maintain an understandable, streamlined project review process.	Ongoing Report 09/06	Jamie McLeod, Assoc. Planner and Kristy McCumby, Env. Spec.

Municipality: Sunnyvale

C.3.c Requirements for Group 1 and Group 2 Projects						
	Collect information for "Enhanced Reporting"	Order 01-119 PWP C.3 c.1	Collect information on each project covered by the enhanced performance standard for enhanced annual reporting requirements.	• Continue data collection and report the following for all new and redevelopment projects that add or replace 10,000 square feet of impervious surface: project name, location, type as per C3 description, size (acre or square footage), impervious surface area, and for redevelopment projects, include area of land disturbance • See Tables 1 and 2 in Appendix 1 of this section for the information on projects approved in FY 05-06	Ongoing Report 09/06	Jamie McLeod, Assoc. Planner
	Review Guidance under development by Program and provide comments	Order 01-119 PWP C.3.c. 4, 5, & 7	Review Guidance Manual, Model Planning Procedures Performance Standards, and Alternative Minimum Project Size guidance for Group 2 projects as provided by the Program.	• Planning staff has worked with Env. Division staff to ensure that the proposed changes to the BMP Guidance Manual correlate with standard planning practice in order to ensure smoother service delivery and minimize confusion among staff and customers on revisions and modifications. • As stated above, the Sunnyvale BMP Guidance manual is being revised to incorporate Program guidance for all applicable projects that add or replace 10,000 square feet of impervious area.	Ongoing Report 09/06	CDD and Public Works staff. City review coordinated by Kristy McCumby
	Requirements for Group 2 Projects	Order 01-119 PWP C.3 c.6	Incorporation changes for revised model Planning Procedures Performance Standards for Group 2 projects in Sunnyvale Urban Runoff Management Plan and City's BMP Guidance Manual for both private and public projects.	• As stated above, the BMP Guidance manual is being revised to incorporate requirements for all applicable projects that add or replace 10,000 square feet of impervious area. • Pages in the URMP that refer to Group 2 will be changed, as needed, to reflect the applicable project size for new and redevelopment projects. • Any proposed modifications to the	To be completed by Group 2 date Report 09/06	Lead: Jamie McLeod, Assoc. Planner Support: Hira Raina/ Nasser Fakih

	Requirements for Group 2 Projects (continued)			process are reviewed by the inter-departmental implementation team prior to finalizing. The revised processes are then reviewed during division staff meetings and monitored by key staff in each division to ensure compliance.		
	C.3.e Operation and Maintenance of Treatment BMPs					
	Operation and Maintenance of Treatment BMPs	Order 01-119 PWP C.3 e.1	Continue to track information about treatment BMPs installed at approved Group 1 projects (and Group 2 projects after Implementation date). Lists of properties, type of treatment BMP, and operators responsible for BMP maintenance will be tracked.	• Community Development continues to collect and record data. Data is provided to PW Environmental Division. Community Development staff assist in annual report preparation. • See Tables 1 and 2 of this section for information collected in FY 05-06.	Ongoing Report 09/06	Lead: Jamie McLeod, Assoc. Planner & Gordon Blancher Building Insp. / Coord. Support: Public Works, Env. Div. Staff
	C.3.e Operation and Maintenance of Treatment BMPs (cont.)					
	Long-term Maintenance of Treatment BMPs	Order 01-119 PWP C.3 e.3	Adapt model agreement language provided by Program for O&M of treatment BMPs to meet Sunnyvale needs. Incorporate agreement language into the City's project review and approval process as appropriate and apply it to Group 2 projects.	• The City's Municipal Code has been updated to include required C.3 provisions for Group 2 projects (now known as "applicable projects") into the City's Sewer Use Ordinance (SMC12.60 Storm Water Management). • The project review and approval process has progressed with open dialog between the Planners, Building Dept. and Pretreatment Inspectors to streamline the review process for projects subject to C.3 provisions.	Complete before amended implement ation date Report 09/06	Lead: Dave Grabiec, Support Jamie McLeod, Assoc. Planner & Gordon Blancher, Bldg Insp. Coord. ,City Attorney's Office, (TBD)
	Effectiveness Evaluation of Inspection of Treatment BMPs	Order 01-119 PWP C.3 e.4	Review and evaluate the inspection procedures for treatment BMPs that verify the O&M being performed by the responsible party.	• In FY 05-06 only one project subject to C.3 provisions was completed during the wet season. The site was inspected and deficiencies provided to responsible party. Initial inspection will be model for future inspections. • Several projects have been completed in the latter part of FY 05-06 and will be inspected in FY 06-07	Evaluate by 06/06 Report 09/06	Dave Grabiec, Laboratory/ Pretreatment Mgr.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment E – New and Redevelopment
Municipality: Sunnyvale

	C.3.f Hydromodification Management Plan					
	Annual report of treatment BMPs and ongoing verification program	Order 01-119 PWP C.3 e.6	Collect information for the September 2005 Annual Report regarding treatment BMPs inspected in FY 04/05, inspection results, and any follow up, corrections, or enforcement.	• Pretreatment Program field staff has had one facility inspection for multiple BMPs in FY 05-06. Additional site inspections will be conducted as projects are completed over the next FY. • Best Buy/ PetSmart- Notice to Comply issued for correction of deficiencies related to storm water control measures. For additional information regarding the inspection of this project see ***Attachment E- Post Construction Inspection Form Table 2***.	Ongoing Report 09/06	Dave Grabiec, Laboratory/ Pretreatment Mgr.
	Implementation of HMP as required for Group 1 projects	Order 01-119 PWP C.3 f.3	Review program guidance for HMP management practices, rules, BMP selection and design guidance to protect stream channels downstream of development areas as they apply to Sunnyvale situations. Begin implementation of HMP for Group 1 projects that may cause increased erosion or other related impacts as determined for Sunnyvale projects.	• SMC 12.60 was amended to include the key parameters of the HMP and the HMP plan by reference, effective October 2005. • The parcels that meet HMP implementation criteria within Sunnyvale's jurisdiction have been identified and maps will be included in the revision of the City's BMP Guidance Manual. Staff training was provided on the areas of applicability • HMP actions for these parcels will be applied, if the sites are redeveloped.	Begin after Regional Board Approval, Ongoing Report 09/06	Lead: Planning/PW/ PW Env. and PW Env. div. staff
	C.3.g Waiver and Compensatory Mitigation Program					
	Local waiver program	Order 01-119 PWP C.3 g.2	Continue tracking information on any projects with a Compensatory Mitigation Program approved by the City. Include project name, location, type, percent impervious surface, reasons for and terms of the waiver, and the alternative benefit project and completion date	• No waiver requests have been received to date, so no waivers were granted in FY 05-06, nor were any Compensatory Mitigation projects approved. • CDD Planning and PW Engineering will continue to track any approvals granted under this program and provide them to PW Environmental staff for inclusion in the Annual report.	Ongoing Report 09/06	Lead: Planning, and PW Staff (TBD) Support: Lorrie Gervin/PW Env. Div. staff

Attachment E – New and Redevelopment
Municipality: Sunnyvale

C.3.j Site Design Measures Guidance and Standards Development						
	Modify local project approval process	Order 01-119 PWP C.3 j.4	Summarize the status of review, revision and implementation of site design guidance and standards changed as a part of the City's project approval process to address the Development Policy - Compare and Contrast document. Use the submission of proposed changes submitted with September 2004 annual report as a guide.	Only the site design guidance related to the ornamental use of copper, which was included in the Development Policy Review project document, needs to be addressed by the City. Sunnyvale's process for modifying policy is fairly involved. In the interim, until City code can be changed, staff have adopted an internal policy of incorporating issues of environmental concern (e.g., avoiding the use of ornamental copper) into the information provided to developers and into the recommended Conditions of Approval attached to conditionally approved permits	Ongoing Report 09/06	Lead: Jamie McLeod, Assoc. Planner Support: PW engineering, PW Env. Div.
C.3.h Alternate Certification						
	Identify projects that have been certified by other parties	Order 01-119 PWP C.3.h	Summarize those storm water management plans (SWMPs) certified by a firm listed on the Qualified Consultants List the City developed.	• All SWMPs that are required as COAs must provide third-party certification. See Tables 1 and 2 in this section for a list of those projects. • The Qualified Consultant list developed in FY 03-04 is still in use. Other consultants may be added to the list after undergoing an established review process. This list will be updated in FY 06-07. • The consultant information is included on those projects where "Qualified Consultants" certified the site's SWMP and BMP design sizing. • The requirements for 3rd party consultants are being revised to require verification that the SWMP has no conflict with any plan sheets for the project (e.g., utility, grading, or landscaping plans).	Ongoing Report 09/06	Lead: Jamie McLeod Assoc. Planner Support: PW engineering, PW Env. Div.

Attachment E – New and Redevelopment
Municipality: Sunnyvale

	C.3.k Source Control Measures					
	Implement conditions of approval for Group 2 projects	Order 01-119 PWP C.3 k.3	Begin implementation of source control measure requirements by requiring appropriate conditions for approval of Group 2 projects starting on the implementation date established by the RQWCB. Report status and provide examples of the application of these conditions in annual reports.	• City began implementing Group 2 requirements in FY 04-05 and formally adopted BMP sizing requirements for all projects that add or replace 10,000 sq ft. of impervious area when amendments to SMC 12.60 became effective in October 2005. • Conditions of approval will continue to be reported. See Tables 1 and 2 in this section for details on project approvals.	Ongoing Activity Report 09/06	Lead: Jamie McLeod, Assoc. Planner Support: Hira Raina/Liliana Price
	C.3.l Update General Plans					
	Update General Plans	Order 01-119 PWP C.3 l.3	Review current General Plan policies regarding watershed protection and water quality. Identify changes or additional policies that need to be developed in order to implement the C.3 provisions of the permit.	• Current Surface Runoff Sub Element of the City's General Plan does not need any change in order to begin implementation of C.3 provisions. • Revision of the Surface Water Sub - element was identified as a potential study issue for Council in FY 05-06. This update was not among the highest priority items for FY 05-06 and will be reviewed again, relative to other Council priorities in December 2006	Revise after 10/15/04 at next scheduled time	General Plan Workgroup: Hira Raina, Jamie McLeod OCA reps, (as needed) and Lorrie Gervin, Env. Div. Mgr.
	C.3.m Environmental Review Process					
	Environmental Review Process	Order 01-119 PWP C.3. m	Summarize revisions to the Environmental Review process, if any are made.	This is an ongoing effort. To date, legal review has not identified any changes needed to the existing process. Staff identified the need to clarify the internal review process, and a flowchart of responsibilities was revised for inclusion in the revision of the City's Storm Water BMP Guidance Manual that will be available later in 2006.	Annually Report 09/06	Lead: Jamie McLeod, Assoc. Planner Support: Hira Raina/Liliana Price

2) Response to Regional Board Comments on New Development Planning Procedures Section of FY 04-05 Annual Report:

Comments from the RWQCB dated July 26, 2006:

- *Significant Redevelopment Projects Table (pages 62-71): Table needs to be revised to include the "application deemed complete" date under the "project status" column for each project.*

  These tables have been revised in FY 05-06 to clearly identify a "deemed complete" date in the Project Status column. Pages 62-71 of Attachment E, Table 1, Group 2 Projects were revised to include an approximate date that the projects were deemed complete, based on the amount of time usually required for a project, once deemed complete, to be approved by the Planning Commission, City Council or Administrative Hearing Officer. In FY 04-05, there is some difficulty in capturing the exact date a project was deemed complete for Group 2 projects, as it was not always recorded for projects that were approved in the early stages of C.3 implementation for these sizes of projects. A copy of the revised FY 04-05 Table 1, Group 2 is included in Appendix 1 to this Attachment.

  However, if one looks in the Project Status column for the Group 2 projects listed, it should be noted that the dates that the projects were approved by Sunnyvale's Planning Commission, City Council, or Administrative Hearing Officer are all listed and occurred prior to April 15, 2005, the date that co-permittees were to begin implementation of C.3 requirements for Group 2 projects. These approval dates by Planning Commission, City Council, or Hearing Officers occur several weeks after a project has been "deemed complete" by staff. A note was provided in the Project Storm Water Control Measures column to indicate that these projects had been deemed complete prior to the Group 2 implementation date and therefore, they should not be expected to require storm water treatment measures that are sized to meet C.3 requirements.

- *Project 2-1, Residential Project at 1038 Morse was approved after June 30, 2005. Ensure that the information for this project is included in the FY 05-06 Annual Report.*
  The information for this project has been carried over into the Tables for FY 05-06.

3) Evaluation of New Development Planning Procedures Activities in FY 05-06;

How well is the program going this year?

CDD:
There is a much higher comfort level on the part of staff with the program this past year. The newness has worn off and the understanding of what we are doing and why is deeper. This is seen in staff recommending minor BMPs in some exempt projects.
Pretreatment Program:
At this point the program is in its infancy in regard to post-construction BMP inspections. Staff has attended training and conducted one inspection of the new Post-Construction Storm Water Control Measures. Communication has progressed regarding the roles and responsibilities of the different departments involved in implementing the new C.3 provisions.

Describe any strengths or weaknesses of the program.
CDD:
The strength of the program is the foundation that has been built in terms of process and staff training. A challenge in this next year will be incorporating the new Water Protection Collaborative Guidelines & Standards into the standard permitting and the SWMP process as the distinctions between the two programs may be confusing to staff members who only work on storm water projects occasionally. We continue to work to modify and improve our internal processes and tracking systems.
Pretreatment Program:
Since only one post-construction inspection of a C.3 project has been completed this FY, no strengths or weaknesses have been identified at this time.

Describe what actions/activities you will emphasize for next year.
CDD:
Continuing to modify the process, as appropriate, when opportunities to streamline the process are identified is a goal for next year. More customer outreach in the early stages may be helpful in clarifying the City's expectation of the developer throughout the process. This year we should be receiving from feedback on the O&M of systems, as a few have been on-line for over a year now. Staff training, especially for new staff, is an ongoing task.
Pretreatment Program:
Emphasis for the next year will be on streamlining the C.3 review process for projects and between the departments involved. Communication between departments will be addressed and the roles and responsibilities will be further clarified.

Describe where help is needed at the Program or Regional Board level.

CDD:

More timely feedback would be helpful in determining what is being done well or what we may be missing, from the Regional Board's perspective.

Pretreatment Program:

Areas needing help from the Program or Regional Board staff have not been identified at this time.

Municipality: Sunnyvale

Group 1 Projects (Part 1)
Significant Development Projects[1]
Reviewed and/or Approved July 2005 – October 15, 2005

Project Name	Project Type[1]	Site Size (ac. or sq.ft.)	New Impervious Surface (sq. ft.)[3]	Area of Land Disturbed (sq. ft.)[2]	Project Status	Project Storm Water Control Measures
Private Projects – Group 1						
1. Commercial Project at 782 E. El Camino Real Project No.: 2005-0413 Description: Remove existing building and construct new 19,200 sq. ft. retail building.	Significant Redevelopment (total rebuild)	101,930 sq. ft.	52,036 sq. ft. replaced. Total impervious area reduced by 41,964 sq. ft.	101,930 sq. ft. (entire site disturbed)	Deemed complete on 4/22/05 and approved by City Council on 7/12/05	- Storm Water Treatment Measures - Source Control Measures - Site Design Measures
2. Residential Project at 1156 Aster Ave. Project No.: 2005-0510 Description: Remove existing building and construct 42 townhomes.	Significant Redevelopment (total rebuild)	81,675 sq. ft.	66,749 sq. ft. replaced. Total impervious area decreased by 1,874 sq. ft.	81,600 sq. ft.	Deemed complete on 6/02/05 and approved by Planning Commission on 8/01/05	- Storm Water Treatment Measures - Site Design Measures
3. Residential Project at 1122 Morse Ave. Project No.: 2005-0625 Description: Remove existing building and construct 72 townhomes.	Significant Redevelopment (total rebuild)	157,868 sq. ft.	118,925 sq. ft. replaced. Total impervious area decreased by 9,754 sq. ft.	157,868 sq. ft. (entire site disturbed)	Deemed complete on 6/02/05 and approved by Planning Commission on 8/01/05	- Storm Water Treatment Measures - Source Control Measures - Site Design Measures

[1] For projects from July 2005 to October 15, 2005, report projects with new impervious surface area greater than 10,000 sq. ft. (Group 1 and 2). As of October 15, 2005, report all applicable projects that add or replace 10,000 sq ft of impervious area.

[2] As defined in C.3.c If the site is a "significant redevelopment", list the area of land disturbance.

[3] "New" is defined as impervious surface added, created, or replaced.

Group 1 Projects (Part 2)
Storm Water Control Measures for Group 1
Reviewed and/or Approved July 2005 – October 15, 2005

Project Name	Treat-ment BMPs	Numeric Sizing Criteria Used	O&M Responsibility Mechanism and Responsible Party	Site Design Measures*	Source Control Measures	Pesticide Reduction Measures*
Private Projects – Group 1						
1. Commercial Project at 782 E. El Camino Real Project No.: 2005-0413 Description: Remove existing building and construct new 19,200 sq. ft. retail building.	Biofilter, Hydro-dynamic device	Volume Hydraulic Design and Flow Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D, using local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces	Maintenance (e.g., trash collection, site sweeping, landscape maintenance, and covered dumpsters)	Education, COAs
2. Residential Project at 1156 Aster Ave. Project No.: 2005-0510 Description: Remove existing building and construct 42 townhomes.	*Hydro-dynamic device*	Flow Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D, using local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces, provide landscaping	Maintenance (e.g., trash collection, site sweeping, landscape maintenance, and covered dumpsters)	Education, COAs
3. Residential Project at 1122 Morse Ave. Project No.: 2005-0625 Description: Remove existing building and construct 72 townhomes.	*Hydro-dynamic device*	Flow Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D, using local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces, provide landscaping	Maintenance (e.g., trash collection, site sweeping, landscape maintenance, and covered dumpsters)	Education, COAs

4. Residential Project at 1038 Morse Ave. Project No.: 2005-0556 Description: Remove existing building and construct 17 townhomes; Phase 2 of previously approved project on the neighboring parcels for 50 townhomes.	Hydro-dynamic Device	Flow Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D, using local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces, Provide landscaping	Maintenance (e.g., trash collection, site sweeping, landscape maintenance, and covered dumpsters)	Education, COAs
5. Residential Project at 1250 Lakeside Dr. Project No.: 2004-0910 Description: Remove existing building and construct 263 hotel units and 250 residential units with structured parking.	Biofilter, Detention pond, Media filter	Volume Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D, using local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize. impervious surfaces, Cluster structures /pavement	Covered dumpster and Swimming pool to drain to sewer, Beneficial landscaping, Covers/ drains/ maintenance for loading docks, bays & fuel areas.	Education, COAs
6. Residential Project at 610 Alberta Ave. Project No.: 2005-0622 Description: Remove existing mobile homes and construct 55 single-family homes	Biofilter	Volume Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D, using local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces, provide landscaping	Maintenance (e.g., trash collection, site sweeping, landscape maintenance, and covered dumpsters)	Education, COAs

Applicable Projects (Part 1)
Significant Development Projects[1]
Reviewed and/or Approved October 15, 2005 – June 2006

Project Name	Project Type[1]	Site Size (sq. ft.)	New Impervious Surface (sq. ft.)[3]	Area of Land[2] Disturbed (sq. ft.)	Project Status (incl. Date Deemed Complete)	Project Storm Water Control Measures
Private Projects – Applicable Projects						
1. Residential Project at 488 Tasman Dr. Project No.: 2005-0646 Description: Remove existing building and construct 43 townhomes.	Significant Redevelopment (total rebuild)	102,366 sq. ft.	63,532 sq. ft. replaced. Total impervious area decreased by 26,048 sq. ft.	102,366 sq. ft. (entire site disturbed)	Deemed complete on 11/07/05 and approved by Planning Commission on 1/06/06	- Storm Water Treatment Measures - Source Control Measures - Site Design Measures
2. Place of Assembly Project at 1251 Sandia Ave. Project No.: 2005-0912 Description: Remove existing building and construct a new 2-story 18,972 sq. ft. building.	Significant Redevelopment (total rebuild)	67,518 sq. ft.	49,238 sq. ft. replaced. Total impervious area increased by 42,538 sq. ft.	55,000 sq. ft.	Deemed complete on 11/07/05 and approved by Planning Commission on 1/06/06	- Storm Water Treatment Measures -Source Control Measures -Site Design Measures
3. Residential Project at 108 S. Wolfe Rd. Project No.: 2005-1020 Description: Remove existing building and construct 130 townhouses.	Significant Redevelopment (total rebuild)	314,358 sq. ft.	229,358 sq. ft. replaced. Total impervious area decreased by 25,000 sq. ft.	229,358 sq. ft.	Deemed complete on 11/07/05 and approved by Planning Commission on 1/06/06	- Storm Water Treatment Measures - Source Control Measures - Site Design Measures

[1] For projects from July 2005 to October 15, 2005, report projects with new impervious surface area greater than 10,000 sq. ft. (2). For Projects approved as of October 15, 2005, report applicable projects – those that add or replace 10,000 square feet of impervious area.

[2] As defined in C.3.c If the site is a "significant redevelopment", list the area of land disturbance.

[3] "New" is defined as impervious surface added, created, or replaced.

Applicable Projects (Part 2)
Significant Development Projects[2]
Reviewed and/or Approved October 15, 2005 – June 2006

Project Name	Treat-ment BMPs	Numeric Sizing Criteria Used	O&M Responsibility Mechanism and Responsible Party	Site Design Measures	Source Control Measures	Pesticide Reduction Measures
Private Projects – Applicable projects						
1. Residential Project at 488 Tasman Dr. Project No.: 2005-0646 Description: Remove existing building and construct 43 townhomes.	CDS Unit	Flow Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D, using local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Min. impervious surfaces, Cluster structures/ pavement, Discount downspouts	Covered dumpster (drain to sewer), Maintenance (e.g., Trash collection, site sweeping, and landscape maintenance)	Education, COAs
2. Place of Assembly Project at 1251 Sandia Ave. Project No.: 2005-0912 Description: Remove existing building and construct a new 2-story 18,972 sq. ft. building.	Biofilter	Volume Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D, using local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces, provide landscaping	Maintenance (e.g., Trash collection, site sweeping, and landscape maintenance), Covered Dumpster	Education, COAs

[1] For projects from July 2004 through June 2005, report projects with new impervious surface area greater than 10,000 sq. ft. (Group 1 and 2).
[2] As defined in C.3.c If the site is a "significant redevelopment", list the area of land disturbance.
[3] "New" is defined as impervious surface added, created, or replaced.

Project Name	Treat-ment BMPs	Numeric Sizing Criteria Used	O&M Responsibility Mechanism and Responsible Party	Site Design Measures	Source Control Measures	Pesticide Reduction Measures
Private Projects – Applicable projects (continued)						
3. Residential Project at 108 S. Wolfe Rd. Project No.: 2005-1020 Description: Remove existing building and construct 130 townhouses.	Hydro-dynamic device	Flow Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D, using local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Min. impervious surfaces, Microdetention in landscaping	Covered dumpster (drain to sewer), Maintenance (e.g., Trash collection, site sweeping, and landscape maintenance)	Education (IPM). COAs
4. Residential Project at 1035 N. Fair Oaks Ave. Project No.: 2005-1157 Description: Remove existing building and construct 30 residential flats.	CDS Unit	Flow Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D, using local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces, provide landscaping	Covered dumpster (drain to sewer), Maintenance (e.g., Trash collection, site sweeping, and landscape maintenance)	Education, COAs
5. Industrial Project at 411 N. Pastoria Ave. Project No.: 2005-1216 Description: Remove existing building and construct a new 40,000 sq. ft. telecom facility.	Hydro-dynamic device	Flow Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D, using local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces	Covered dumpster (drain to sewer), Maintenance (e.g., Trash collection, site sweeping, and landscape maintenance)	Education (IPM). COAs
6. Industrial Project at 1165 E. Arques Ave. Project No.: 2005-1228 Description: Modified plan for previously approved self-storage project (2005-0033) with increased floor area and 3-story buildings.	Hydro-dynamic device, Porous pave-ment	Flow Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D, using local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces, provide landscaping	Covered dumpster (drain to sewer), Maintenance (e.g., Trash collection, site sweeping, and landscape maintenance)	Education, COAs

Project Name	Treat-ment BMPs	Numeric Sizing Criteria Used	O&M Responsibility Mechanism and Responsible Party	Site Design Measures	Source Control Measures	Pesticide Reduction Measures
Private Projects – Applicable projects (continued)						
7. Commercial Project at 595 Lawrence Expressway Project No.: 2005-1048 Description: Remove existing building and construct a new 22,682 sq. ft. retail center.	Hydro-dynamic device	Flow Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D, using local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces, provide landscaping	Covered dumpster (drain to sewer), Maintenance (e.g., Trash collection, site sweeping, and landscape maintenance)	Education (IPM), COAs
8. Residential Project at 1049 Kiel Ct. Project No.: 2006-0153 Description: Remove existing building and construct 30 condominium flats and 4 townhouse units.	*Hydro-dynamic device*	Flow Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D, using local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces, provide landscaping	Covered dumpster (drain to sewer), Maintenance (e.g., Trash collection, site sweeping, and landscape maintenance)	Education, COAs
9. Residential Project at 1168 Aster Ave. Project No.: 2006-0069 Description: Remove existing building and construct 80 condominiums.	Media filter, infiltration trench, porous pave-ment	Volume Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D, using local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Min. impervious surfaces, min. impact parking lot design, disconnect downspouts, alt. driveway design, preserve open space, min. runoff.	Beneficial landscaping, Covered dumpster (drain to sewer), Maintenance (e.g., Trash collection, site sweeping, and landscape maintenance)	Education, COAs
10. Residential Project at 698 E. Taylor Ave. Project No.: 2005-1185 Description: Remove existing building and construct 68 townhomes.	*Hydro-dynamic device*	Flow Hydraulic Design Basis using 2003 CA Stormwater Quality BMP Handbook, Appd. D, using local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surfaces, provide landscaping	Covered dumpster (drain to sewer), Maintenance (e.g., Trash collection, site sweeping, and landscape maintenance)	Education, COAs

Group 1 Projects (Part 1)
Significant Development Projects[1]
Reviewed and/or Approved July 2004 – June 2005

Project Name	Project Type[1]	Site Size (ac. or sq.ft.)	New Impervious Surface (sq. ft.)[3]	Area of Land Disturbed (sq. ft.)[2]	Project Status	Project Storm Water Control Measures
Private Projects – Group 1						
1-1) Residential Project at 1485 Sunnyvale-Saratoga Rd Project No.: 2004-0505 Description: Construction of 25 New Houses.	Significant Redevelopment	2.02 acres	56,753 sq. ft (1.3 acres)	2.02 acres	**Deemed complete on approx. 6/02/04,** and Approved by Planning Commission on 8/09/04	- Storm Water Treatment Measures - Source Control Measures - Site Design Measures
1-2) Residential Project at 545 E Weddell Drive Project No.: 2004-0603 Description: Construction of 130 townhomes and 1 common recreational building.	Significant Redevelopment	6.56 acres	207,153 sq.ft (4.76 acres)	6.56 acres	**Deemed complete on approx. 7/12/04**, and Approved by Planning Commission on 9/27/04	- Storm Water Treatment Measures - Source Control Measures - Site Design Measures

[1] For projects from July 2004 through June 2005, report projects with new impervious surface area greater than 10,000 sq. ft. (Group 1 and 2).
[2] As defined in C.3.c If the site is a "significant redevelopment", list the area of land disturbance.
[3] "New" is defined as impervious surface added, created, or replaced.

Group 1 Projects (Part 2)
Storm Water Control Measures for Group 1
Reviewed and/or Approved July 2003 – June 2004

Project Name	Treatment BMPs	Numeric Sizing Criteria Used	O&M Responsibility Mechanism and Responsible Party	Site Design Measures*	Source Control Measures	Pesticide Reduction Measures*
Private Projects – Group 1						
1-1) Residential Project at 1485 Sunnyvale-Saratoga Rd Project No.: 2004-0505 Description: Construction of 25 New Houses.	Bioswales and Vortex Separator	Flow Hydraulic Design Basis using methodology of Appendix D of the CASQA Storm Water Quality BMP Handbook (2003), using local rainfall data.	3rd Party Certification of Storm Water Management Plan (SMWP) SWMP must be recorded with the property deed. The property owner is responsible for maintaining the stormwater BMPs	- Minimize impervious surfaces - Beneficial use of landscaping	- Site maintenance (e.g. litter clean up and landscape maintenance) - Covered dumpster area	- Education – IPM flyer included in Sunnyvale BMP Guidance Manual and Storm Water Management Plan (SWMP) preparation guidance.
1-2) Residential Project at 545 E Weddell Drive Project No.: 2004-0603 Description: Construction of 130 townhomes and 1 common recreational building.	Bioswales and Vortex separator	Flow and Volume hydraulic Design Basis using methodology of Appendix D of the CASQA Storm Water Quality BMP Handbook (2003), using local rainfall data.	3rd Party Certified Stormwater Management Plans must be recorded with the property deed. The owner is responsible for maintaining the stormwater BMPs	- Minimize impervious surfaces - Beneficial use of landscaping	- Site maintenance (e.g. litter clean up and landscape maintenance) - Covered dumpster area	-Education – IPM flyer included in Sunnyvale BMP Guidance Manual and Storm Water Management Plan (SWMP) preparation guidance.

1-3) Residential Project at 430 Toyama Project No.: 2004-0650 Description: Construction of 50 new townhomes.	Bioswales and Vortex Separator	SWMP is in preparation and not and has not yet received 3rd Party Certification	3rd Party Certified Stormwater Management Plans must be recorded with the property deed. The owner is responsible for maintaining the stormwater BMPs	- Minimize impervious surfaces - Beneficial use of landscaping	- Site maintenance (e.g. litter clean up and landscape maintenance) - Covered dumpster area	-Education – IPM flyer included in Sunnyvale BMP Guidance Manual and Storm Water Management Plan (SWMP) preparation guidance.
1-4) Commercial Project at 1165 E. Arques Ave. Project No.: 2005-0033 Description: Demolition of existing industrial building and the construction of a new self-storage facility.	Under-ground retention and treatment – Hydrodyna-mic device -Porous pavement	Volume hydraulic Design Basis using methodology of Appendix D of the CASQA Storm Water Quality BMP Handbook (2003), using local rainfall data.	3rd Party Certified Stormwater Management Plans must be recorded with the property deed. The owner is responsible for maintaining the stormwater BMPs	Minimize impervious surfaces -Microdetention in landscape -Minimize change in runoff hydrograph by adding pervious area - Beneficial use of landscaping	Wash area/racks drain to sanitary sewer area -Covered Dumpster Area -Outdoor material storage protection -Maintenance (e.g. street sweeping and catch basin cleaning)	Education – IPM flyer included in Sunnyvale BMP Guidance Manual and Storm Water Management Plan (SWMP) preparation guidance.

Attachment F – New Development and Construction Controls
FY 2005-2006 Annual Report
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
New Development and Construction Controls – Construction Site Inspection						
CI-1-4	Construction Inspection Performance Standards	URMP	Conduct annual staff review of performance measures in order to evaluate their effectiveness.	CDD- Building Division: All performance standards are being implemented and are effective. Staff provides outreach materials to contractors and developers by attaching copies of construction tri-folds "Preventing Pollution, It's up to Us" or the "Sunnyvale Blueprint for a Clean Bay" to plans and/or job card before permits are issued. 36 written Erosion/sediment Control Correction Notices and Re-inspection Notices were issued this F Y for private projects.	08/06	Gordon Blancher, Building Inspector /Coordinator
CI-2 - CI-5	Inspection of sites with significant erosion potential and construction planned for the wet season	URMP	Conduct inspection of sites (public and private) with significant erosion potential and/or construction planned during the wet season to ensure that erosion and sediment control measures are implemented in accordance with Sunnyvale Municipal Code and any conditions of approval for the project.	CDD- Building Division: Inspections of project were done to ensure that the projects erosion and sediment control measures are maintained, as needed during construction. Enforcement for compliance with SMC requirements was done, as needed. PW –Project Administration City inspectors conducted inspections at all sites. All inspections were inspected and documented in inspectors' daily reports.	Ongoing Report 09/06	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspect

Municipality: Sunnyvale

New Development and Construction Controls – Construction Site Inspection (cont.)						
CI-4	Effectiveness Evaluation: Private Development and Public Works Inspection Program	URMP	Annually review and evaluate effectiveness of inspection programs using staff/contractor feedback	CDD- Building Division: Staff and contractor feedback indicate that the inspection programs are effective and meeting goals. Using the "FIELD INSPECTION – BMP'S" notices helps with documenting violations and corrective actions. PW –Project Administration Staff discussed the existing inspection program and determined that the existing procedures and documentation are working well. No change is necessary at this time.	Annually Report 09/06	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector
	Implement Revised Construction Inspection Performance Standards	Permit Prov. C.3.a. (vi)	Annually train Construction Inspection staff (both Community Development and Public Works) on current Construction Inspection Performance Standards and any changes to BMPs and SOP' s. Also include training on construction inspection procedures, documentation, and enforcement. Every two years, all inspectors will receive training on the latest construction BMPs and techniques. Implementation of BMPs and SOP's will be discussed, as needed, at regular staff meetings.	• Information on training activities for all CDD-Building Division and PW –Project Administration staff is presented in Attachment M of this report.	Annually, before October 1 Report 09/06	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment F – New Development and Construction Controls
FY 2005-2006 Annual Report
Municipality: Sunnyvale

New Development and Construction Controls – Construction Site Inspection (cont.)						
	Erosion and Sediment Control Plans by Contractors for Public Projects	Permit Prov. C.3.a. (iv)	CDD Building Inspection staff and PW Construction staff to ensure that developers/contractors of projects with significant erosion potential and planned construction during the wet season have prepared an effective erosion and/or sediment control plan prior to the start of the wet season.	CDD- Building Division: Compliance with erosion and/or sediment control plans was required for projects prior to the start of the wet season. Inspectors checked to make sure the plans were done and BMPs in place. There was good cooperation from developers and contractors to meet these requirements. PW –Project Administration: Project Administration requires Storm Water Pollution Prevention Plans from all contractors for all projects regardless of the time of the year. The contractor is not allowed to proceed with the work until SWPPP are received and approved. PW inspectors inspect in-place BMPs prior to the rainy season and prior to commencement of construction.	Ongoing Report 09/06	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector
	Municipal capital improvement project storm water quality control measures	Permit Prov. C.3.a. (v)	Perform and document inspections of contractors on capital improvement projects to ensure their compliance with storm water quality control requirements during construction and maintenance activities. Initiate enforcement actions, as needed. Report annually on results of inspection program.	Project Administration inspectors inspected capital projects for any SWPPP deficiencies on a daily basis. Deficiencies were immediately communicated to the contract for correction. The contractor complied in all cases. All observations were documented in the inspector's daily diaries. The attached Table F summarizes the projects that Project Administration oversaw this fiscal year.	Ongoing Report 09/06	Hira Raina, Nasser Fakih

2) Response to Regional Board Comments on this section of the FY 04-05 Annual Report
No comments were received on this section.

3) Evaluation of Construction Inspection Activities in FY 05-06

CDD:

Storm water inspection activities are going well. Developers, contractors, and construction workers are familiar with the storm water protection requirements and are meeting those standards. The number of BMP Correction notices are slightly up for 05/06 (35) compared to 04/05 (30) with a large over all construction active increase in 05/06.

PW: Public works inspection staff monitors compliance with SWPPP requirements throughout the year. Staff requires all contractors to submit water pollution control plans for approval prior to start of construction regardless of the size and the type of the project. Once approved, the staff discusses the requirements with the contractor prior to commencing the work. During the work, staff monitors compliance and verbally informs the contractor of any violations. Staff also performs pre-rainy season inspections and pre storm inspections. Any potential violations are communicated to contractors for correction. For this year, all contractors complied with the staff's verbal notifications. This is documented in the daily dairies and in the minutes of the weekly progress meetings. Were the contractor not to comply, a notice of non-compliance would be issued and the contractor would be required to comply immediately. If compliance is achieved, it will be noted in the inspector's daily dairies. If the contractor fails to comply, the City will issue a stop work notice for the area affected by the noncompliance. No Stop Work notices were issued in FY 05-06 and staff did not note any specific contractors that needed multiple verbal warnings.

Contractors are generally very aware of the water pollution requirements and are generally prepared to comply with required BMPs

Public Information and Participation

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment G – Public Information and Participation
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Public Information / Participation						
PIP-1	Identification of pollution issues/problems	URMP	Continue to discuss water pollution prevention, conservation, and watershed education with regional co-permittees, pretreatment staff, and urban runoff staff to determine current issues and pollutants of concern.	This is a continuous, ongoing effort and projects selected and implemented for FY05-06 reflect Sunnyvale's response to those discussions. See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 05-06.	Ongoing Report 9/06	Sally Personett, Environmental Outreach Coordinator
PIP-2	Implementation of strategy to address issues	URMP	In order to insure efficient and effective use of resources, we will continue to select projects that automatically send behavior change messages to the greatest number of people without requiring staff to be present. In addition, we will lend support to regional projects and events that endeavor to increase behavioral change through public education	Media is identified as a key use of resources, and typical media projects include on-screen theater ads, articles and newspaper ads, web site updates, utility bill inserts, flyers, mass email blitz, community cable TV, poster distribution, literature kiosks, etc. See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 05-06.	Ongoing Report 9/06	Sally Personett, Environmental Outreach Coordinator
PIP-3	Dissemination of outreach/education materials	URMP	Continue to update and develop new materials and information, and disseminate material to targeted audiences through participation in school and youth programs, industry-related events, presentations, community requests, plant tours, Farmers' Markets, and regional events...	Stock of outreach material is regularly tracked for quantity, reviewed for accuracy, and updated when new information is available. New materials are developed as needed, and disseminated via a variety of methods. See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 05-06.	Ongoing Report 9/06	Sally Personett, Environmental Outreach Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment G – Public Information and Participation
Municipality: Sunnyvale

Public Information / Participation (cont.)						
PIP-4	Municipal Employee Training	URMP and Permit Prov. C.9	Provide annual training to Community Development, Parks and Recreation, and Public Works Department staff related to URMP Performance Standards, BMPs, and Watershed Outreach and Education campaign. (See IPM Policy and Hg Policy outreach sections for similar tasks)	Staff training on a number of topics related to storm water pollution prevention, integrated pest management, mercury product pollution prevention and other watershed-related information was provided to staff. See Attachment M for descriptions of training provided by Environmental Division Staff	Ongoing Report 09/06	Kristy McCumby, Environmental Specialist & Dave Grabiec, Laboratory/ Pretreatment Mgr.
PIP-5	Evaluation of effort and strategy	URMP	Use various feedback methods to determine public evaluation of materials, workshops, and or seminars and level of increased awareness of pollution prevention issues. In an ongoing effort public feedback will be used by staff to evaluate appropriateness of strategies used in selected projects.	Evaluation forms are distributed after school presentations, and the feedback is used to modify the activity in order to fine tune the educational experience for the targeted audience. This approach is designed to determine satisfaction with the presentation or activity, not a measure of difference in usage patterns or behavior change.	Ongoing Report 9/06	Sally Personett, Environmental Outreach Coordinator
PIP-6	Work Plan Revision	URMP	As a result of ongoing evaluation and discussions as listed in PIP-1, determine projects to be continued, deleted or added.	Outreach continues to provide a wide-range of education to targeted and general audiences through participation in various events and activities in Sunnyvale, through use of media, and in project collaborations with other agencies and partners both regional and local. Projects Added: State of the City, Door Hanger Project, Pharmaceutical Waste Event, Community Workshops, Google Environmental Fair. Projects Deleted: Teachers Resource Fair, Thermometer Exchange, Grow Your Own Conference, Network Appliance Environmental Fair, Lockheed Environmental Fair, Hotel & Motel outreach Projects Continued: for a listing of activities and events, see Attachment G Table 1-Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 05-06	Ongoing 9/06	Sally Personett, Environmental Outreach Coordinator

Attachment G – Public Information and Participation
Municipality: Sunnyvale

Public Information / Participation (cont.)						
PIP-7	Mercury Outreach	Permit Prov. C.9.c	In coordination with the Program and County-wide efforts, develop and continue to implement an educational outreach program to residential audiences regarding recycling of fluorescent lights, the proper disposal of other mercury-containing products, and the availability of non-mercury containing alternatives. Monitor and document results in the Annual Report.	Through ongoing collaboration and effort, Sunnyvale continues to develop and implement educational outreach to residential audiences regarding mercury containing products and water pollution prevention. See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 05-06.	Ongoing Report 09/06	Sally Personett, Environmental Outreach Coordinator and HHW/SMaRT station staff
	Integrated Pest Management Outreach	Permit Prov. C.9.d	Continue to provide local public outreach on proper use and disposal of pesticide products and use of less toxic pest control methods This includes local IPM Store Partnership activities and participation in Regional outreach events. (Also see Water Quality Provisions of Order No. 01-024: Control Program for Pesticides for additional Outreach tasks.)	Sunnyvale continues to support local IPM store partnership activities and participate in Regional outreach events, as well as provide local public outreach on proper use and disposal of pesticides and use of less toxic pest control methods. See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 05-06.	Ongoing Report 09/06	Sally Personett, Environmental Outreach Coordinator

1) See Attachment G Table 1 for the audiences assigned to each PI/P Outreach activity and the evaluation of that activity as accomplished in FY 05-06. The audience types are listed below:
General Outreach: Outreach of a general nature that does not fit any of the categories listed below. Effectiveness evaluations of General Outreach activities are included in Attachment G Table 1.
Targeted Outreach: Outreach to municipal staff, targeted industries, commercial entities, and to citizens that targets a specific pollutant or behavior. Effectiveness evaluations of targeted outreach activities either individually or as a whole are included in Attachment G Table 1.
Educational Programs: Outreach to schools, and other activities, as appropriate. Effectiveness of educational activities is included in Attachment G Table 1.
Citizen Participation: Sunnyvale's support/interaction with citizen Advisory committees, creek groups, citizen monitoring, and creek and trash clean-up activities.

Effectiveness of citizen participation activities is included in Attachment G Table 1.

2) Response to Regional Board Comments on Public Information and Participation section of FY 04-05 Annual Report:

No comments were received from the Regional Board on this section that needs to be addressed.

3) Include any new brochures/flyers/graphics or outreach material created in FY 05-06.

The following Sunnyvale outreach pieces created in FY 05-06 are included Attachment G, Appendix 1:

Outreach to the Community
Quarterly Report:
Earth Day is April 22 – Water Pollution and Prevention – spring 06
Decadent Dinners Stick to Your Ribs and Your Pipes – fall 05
Household Hazardous Waste for Safe Disposal of Household Batteries and Other Extras – winter 05/06
Keep Pool, Spa and Fountain Water out of our Storm Drains, Creeks and the Bay – summer 05

KSUN Community Cable TV:
Pollution Prevention Tips – National Pollution Prevention Week – September 05
- *Automotive Fluids*
- *Mercury*
- *Pesticides*
- *Car Wash*
- *Leaves and Yard Trimmings*

Grease Goes from the Pan to the Can – October 05
Mercury – New Hazardous Waste Disposal Rules – February 05
Theater Advertising
A theater ad regarding proper disposal of fluorescent bulbs was produced for viewing at the Mercado Theater – May 06
A theater ad regarding IPM and less-toxic pesticides was produced for viewing at the Mercado Theater – June 06

Sunnyvale Sun
Now Everyone Must Conform to the E-Waste Disposal Laws – February 06

Table 1. Detailed Description of FY 05-06 PI/P Activities and Self Evaluation Matrix

PI/P Activity[1]	Type of Outreach [2]	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community			
Leadership Sunnyvale	Event – Targeted	This annual event is geared toward civic-minded individuals within the community interested in Sunnyvale government. During each workshop, the group visits a different department within the city, with a goal toward learning how the City operates and the process of governing. During one of the workshops the group visits the Water Pollution Control Plant for an overview and tour. April 06	This event presents a key opportunity to reach civic minded community members about water pollution issues. Overview topics include groundwater and shallow groundwater clean-up issues, the sanitary sewer project, public education, HHW information, and environmental issues relating to water quality in sewer and storm drain systems. This event offers an opportunity for Outreach to focus on long-term audience Goal 5 - build community leader and decision-makers awareness of watershed issues. 22 community members participated in the event this reporting year.
Columbia Health and Safety Fair	Event – General and Targeted	This annual community event targets economically disadvantaged families and youth with health, safety, and community services related activities and exhibits. May 06	At this event the Outreach exhibit focused on sanitary sewers and storm drain education and pollution prevention. Outreach conducted (8) Enviroscape demonstrations informing residents how storm water can become polluted from human chores and activities. Specific water pollution prevention issues such as pesticides, fertilizers, dog waste, automotive fluids and car wash, and industrial oil spills were presented. This is a beneficial event in which to reach the long-term target audience that includes low-income and Latino residents. Outreach discussed water pollution prevention with approximately 50 adults. See Schools and Youth category for number of students reached at this event.

FY 2005-2006 Annual Report
Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (continued)			
Sunnyvale Pancake Breakfast	Event – General and Targeted	This event features a community breakfast, activities for kids, and exhibit booths providing public service information to the community. October 05	The Outreach display at this event included sanitary sewers and storm drain information, with a focus on water pollution prevention. The Outreach booth is extremely popular among kids and adults, and everyone is always fascinated by the Enviroscape demonstrations. Specific water pollution prevention issues such as pesticides, fertilizers, dog waste, automotive fluids and car wash, and industrial oil spills are introduced and discussed. This event offers a venue for Outreach to focus on short-term target audience reach for Goal 3 – inform that indoor/outdoor daily activities impact our watershed Outreach discussed water pollution prevention with approximately 30 adults. See Schools and Youth category for number of students reached at this event.
Farmers Market	Event - Targeted	Outreach staffs an exhibit booth once per month at the Farmers Market in Sunnyvale. The Our Water Our World exhibit is displayed and IPM literature is distributed. The goal of outreach at this event is to promote pesticide reduction and IPM practices. Other pollution prevention literature such as the HHW mercury brochure and utility bill inserts targeting other water pollution prevention issues is available at the table and also distributed at this event. Ongoing February through November	During peak months, Outreach speaks to between 40 and 70 people at each event about methods of non-toxic pest management both inside and outside the home. This reporting year a casual survey was implemented on an intermittent basis to determine how many individuals visiting the booth had heard of the term *Integrated Pest Management* (IPM). On average, only 1 in 4 adults were somewhat familiar with this terminology. This gave Outreach staff the opportunity to discuss IPM with individuals who visited the booth.

Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
State of the City Event	Event – General	This is an annual one-day event sponsored by the City as a Fourth of July celebration. Among other activities, the event features exhibits that provide community information to residents and youth. July 05	The Outreach booth featured water pollution prevention information and literature. Brochures and literature distributed included Pests Bugging You, The Dirty Dozen, IPM datasheets, Keeping it all in Tune, Home Maintenance Tips for a Cleaner Bay, and proper disposal (HHW) information. This event offers a venue for Outreach to focus on short-term target audience reach for Goal 3 – inform that indoor/outdoor daily activities impact our watershed Outreach discussed pollution prevention techniques with approximately 60 adults at this event.
Earth Day	Event – General	At this one-time event, Environmental Outreach partnered with the City's Solid Waste and Recycling Division to present community workshops at the Sunnyvale Library. Outreach presented *Protecting Our Water*, a water pollution prevention workshop. April 06	The presentation included watershed education, how the combined effects of pollution from many sources continues to impact our watershed and the quality of our water resources, how change impacts our watershed, and pollution tracked from many sources. The Enviroscape demonstration presented specific water pollution prevention issues such as pesticides, fertilizers, dog waste, automotive fluids and car wash, and industrial oil spills. Best management practices were discussed to prevent water pollution 10 adults attended the *Protecting our Water* workshop.
Pharmaceutical Waste Event	Event – Targeted	Sunnyvale was one of 30 Bay Area agencies that participated in the campaign *Safe Medicine Disposal Days* sponsored by the Bay Area Pollution Prevention Group. May 06	The goal of this outreach event was to create awareness among residents that it is no longer acceptable to dispose of pharmaceuticals in the toilet or down the drain. Sunnyvale felt the event exceeded expectations, as more than 50 people dropped off approximately 875 bottles of unused medicines during a six-hour period.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment G- Public Information and Participation (PI/P) Table 1
FY 2005-2006 Annual Report
Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
Community Workshops	Event - Targeted	Two community workshops were conducted during this reporting year • *What Your Gardener Can Do* August 05 • *Making Your Garden Less Toxic* Sept 05	Compost workshops are scheduled once per month, and these specialty workshops were conducted in coordination with the compost workshops. Approximately 30 people attended each of the two workshops.
Plant Tours	Event – General and Targeted	Plant tours are offered to community and schools groups. Tours present information on the physical, chemical and biological treatment processes, how the Plant uses alternative fuel sources to conserve energy and information on conservation using recycled water for landscaping. Ongoing	This activity heightens awareness of the function and importance of water treatment in preventing water pollution in the Bay. The goal of this event is to reach individuals about wastewater treatment and water pollution prevention. This is a valuable way for individuals to learn firsthand about the important role of a water pollution control plant plays in preventing water pollution. This reporting year, 63 adults toured the Plant. See Schools and Youth category for number of students reached during student tours.
Theater Billboards	Media – Targeted	Water pollution prevention messages were displayed at the Sunnyvale Mercado Theaters as on-screen advertising. To date, two ads have been produced: - *Mercury (fluorescent lighting)* - *Pesticides* April – June 06	This is a cost-effective beneficial way to reach audiences with targeted pollution prevention messages. These 14-second animated/audio ads are viewed by movie audiences (2) times during a 15-minute timeframe prior to every movie shown in the 20-theater complex. In the new reporting year additional, targeted messages will be developed for viewing.

FY 2005-2006 Annual Report
Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
KSUN Community Cable TV	Media – Targeted	Sunnyvale residents view PSAs regarding water pollution prevention on community cable TV. The following P2 messages were broadcast during National Pollution Prevention Week September 05: • *Oil and automotive fluids* • *Fluorescent bulbs* • *Less toxic pest control* • *Car wash* • *Leaves and yard trimmings* Two additional P2 messages were broadcast this reporting year: • *Fats, Oil and Grease* – Oct 05 • *Mercury – Hazardous Waste* – Feb 06	KSUN Channel 18 is the City's government access television station. Approximately 13% of all Sunnyvale cable subscribers watch KSUN once or twice a month. This is a cost-effective way to advertise pollution prevention messages to the Sunnyvale community.
Utility Bill Inserts	Media – Targeted	Utility bills are mailed to Sunnyvale rate payers on a two-month billing cycle. • *GOT BUGS?* Sept/Oct 05 • *Sunnyvale's IPM Policy* Sept/Oct 05 • *Street Clean/Yard Maintenance* Sept/Oct 05 • *Fats, Oils, Grease* Nov/Dec 05 • *Keep Leaves off Street* Nov/Dec 05 • *Auto Pollution* Jan/Feb 06 • *Keep Fluorescents Out of Trash* Jan/Feb 06 • *Old Batteries Taking Over?* Jan/Feb 06 • *Drain Smart – Pools* Mar/April 06 • *Healthy Habits Clean Water* Mar/Apr 06	Sunnyvale will continue to use utility bill advertising as a cost-effective way to reach residents and businesses with pollution prevention outreach messages. Bills containing water pollution prevention messages are mailed over a two-month timeframe reaching over 30,000 utility accounts in Sunnyvale.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment G- Public Information and Participation (PI/P) Table 1
FY 2005-2006 Annual Report
Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
Quarterly Report Articles	Media - Targeted	The Quarterly Report is a community newsletter for residents and businesses. • *Draining Pools and Spas* summer 05 • *Fats Oils and Grease* fall 05 • *HHW Safe Disposal* winter 05 (batteries, fluorescents, pesticides, paint, pool) • *Earth Day – Water Pollution Prevention* spring 06	The Quarterly Report is mailed to approximately 60,000 Sunnyvale residents and businesses each quarter. In addition, 2000 copies of the Report are distributed to reception and outreach areas in Sunnyvale. Placing articles regarding water pollution prevention will be an ongoing effort as this has proven to be a cost effective way to reach people who live, work and/or go to school in Sunnyvale.
Door Hanger Project	Media - Targeted	A door hanger was developed for distribution to residents in high-density housing areas that have a history of sanitary sewer overflow incidents. The door hanger advises residents about overflows from accumulations of fats, oils and grease in drains and pipes. Ongoing	The goal of this outreach is to reduce or eliminate fats, oils and grease (FOG) at the source and to raise awareness among residents that proper disposal of (FOG) in the garbage will reduce sanitary sewer overflows and prevent water contamination. When a sewer overflow in a neighborhood is grease related, the door hangers are distributed to homes and units in the immediate area. This is an effective method for targeted one-on-one outreach related to a targeted pollutant.
National Pollution Prevention Week	Media – General and Targeted	National Pollution Prevention Week is an annual event presented by the Dept. of Toxic Substances Control. The Plant coordinates outreach to the community by placing P2 posters in strategic locations citywide and airing pollution prevention messages on KSUN, the city's community cable channel. September 2005	Any person living, working or going to school in Sunnyvale who visited the Library, Community Center, Senior Center, or City Hall (two locations) could see the P2 posters. Advertising P2 reminders on community cable TV reaches approximately 13% of all Sunnyvale cable subscribers who watch KSUN once or twice a month.

FY 2005-2006 Annual Report
Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
Sunnyvale ReNews	Media – General and Targeted	The Sunnyvale ReNews newsletter is focused on reduce, reuse, recycle messages with additional focus on HHW. Mercury articles - *Sunnyvale's Program for Consumer Electronics* - *Use the SMaRT Recycling Center Drop-off* HHW articles - *Bring Us Your Toxic Chemicals* Less-Toxic Cleaning - *Cleaning Green* spring 06 summer 06	This newsletter is mailed twice a year to approximately 29,000 single family residents and 24,000 residents living in multi-family units An additional 500 copies are distributed to key locations throughout the city. Considering the reach, this newsletter serves as a productive method to continually remind the community about recycling with a focus on HHW disposals.
The Sun	Media - Targeted	An article published in the Sunnyvale Sun advised the public that as of February 9 it will be against the law to dispose of certain waste in the garbage. - *Now Everyone Must Conform to New E-Waste Disposal Rule* February 06	The Sunnyvale Sun has a readership of approximately 42,320 and a circulation of 18,600.
Poop Scoop	Media – Targeted	The Poop Scoop is the employee newsletter for staff working at the Water Pollution Control Plant. This reporting year articles included: • *New Disposal Rules – Fluorescents* Mar/Apr 06 • *Record Rainfall and Water Quality* May/June 06 (litter, pet waste, automotive pollutants)	The Poop Scoop is the employee newsletter for staff at the Water Pollution Control Plant, with a readership of approximately 65 employees.
Mass Emails	Media - Targeted	A mass email was sent to Sunnyvale employees this reporting year, with a targeted message of mercury pollution prevention. • *Batteries, Fluorescent Lights and Electronics Recycling* March 06	Approximately 1000 City employees that have access to a computer to read email.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment G- Public Information and Participation (PI/P) Table 1
FY 2005-2006 Annual Report
Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
Reference Tool	Media - Targeted	A reference tool was developed for answer point staff that may be required to answer questions posed by residents regarding the new safe disposal guidelines that became effective February 9, 2006. • *Recycling Guides for Consumer Electronic Devices, Batteries, and Mercury Containing Products* February 06	This proved to be an effective reference tool to prepare telephone answer point staff with correct answers to public inquiries regarding proper disposal of mercury containing devices. Approximately 27 individuals responsible for answer points within the city were sent a copy of the matrix to use as a referral tool.
The Harbinger	Media - Targeted	The Harbinger is the employee newsletter for City of Sunnyvale staff. Articles included: • *Keeping the Creeks and Bay Clean* Nov/Dec 05 • *FOG Don't Clog City Drains* Mar/Apr 06 • *New Hazardous Waste Rules* Mar/Apr 06 • *Protecting the Bay is Our Job* May/June 06	Published bi-monthly, the Harbinger is available electronically to about 1000 Sunnyvale employees with access to a computer. The Harbinger serves as a cost-effective way to reach City staff with specific water pollution information and suggestions for behavioral change that could be useful both on the job and at home.
Web Page	Media - General	Two department web sites within the city advertise pollution prevention, including information to residents about HHW materials and proper disposal. • The Water Pollution Control Plant website advises general tips on water pollution prevention, water conservation, and watershed stewardship. • The City's Solid Waste and Recycling website provides HHW information regarding proper disposal of hazardous materials, including pesticides, fertilizers, paints, and mercury containing products. Ongoing	The website will be monitored on a continual basis and updated with current information as necessary. The City's web site does not have a counter to determine number of hits, and consequently, effectiveness of this outreach activity.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment G- Public Information and Participation (PI/P) Table 1
FY 2005-2006 Annual Report
Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Business and Industry			
Google Environmental Fair	Event - General	This was the first environmental fair held by Google for its employees. The fair featured display booths and exhibits from a variety of organizations and agencies showcasing information, as well as earth friendly products and services. The outreach booth displayed posters explaining the differences between sanitary sewers and storm drains. September 05	The event had minimal attendance compared to the potential number of Google employees. Google's Environmental Fair targets recycling, air and water pollution. Outreach focused on water pollution prevention messages and discussions with Google employees centered on behavioral changes to prevent water pollution. Literature distributed included IPM, automotive pollution and HHW information. About 40 employees visited the booth for pollution prevention information.
Web Site	Media - Targeted	To assist businesses with water pollution prevention, the Pretreatment section of the Water Pollution Control Plant website advertises specific BMPs for painting, concrete cleaning, facility maintenance, equipment cleaning, and vehicle maintenance. Ongoing	The website will be monitored on a continual basis and updated with current information as necessary. Number of businesses reached cannot be determined because Sunnyvale does not have a counter to record number of hits to the website.
Sunnyvale Chamber of Commerce Business Directory	Media - Targeted	Sunnyvale purchased ad space in the new Directory and developed an ad focused on several topics; the difference between storm drains and sanitary sewer; increasing environmental awareness; and best management practices. • *A Healthy Bay – its Good Business* January 06	This is a cost-effective way to reach a large segment of the small business population in Sunnyvale. 10,000 copies of the Directory are mailed to Chamber members, major businesses and newcomer residents. Copies of the Directory available at major distribution points throughout the City and are included in Chamber business packets.
Santa Clara County Green Business Conference	Event – Targeted	This mini-conference was presented by the Santa Clara Valley Water District and Green Business of Santa Clara County, and was held at the Sunnyvale Community Center. Topics presented at the conference included water conservation, purchasing for waste prevention, energy conservation and pollution prevention. March 06	Outreach staffed a booth at the Green Business Conference in order to target Sunnyvale businesses regarding the regulations businesses are required to meet relative to reducing or eliminating the introduction of pollutants into the sanitary sewer.

Attachment G- Public Information and Participation (PI/P) Table 1
FY 2005-2006 Annual Report
Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Business and Industry (continued)			
Business Recycling and Solutions Newsletter	Media - Targeted	An article was published to advise Sunnyvale businesses of the new legislation requiring safe disposal of mercury products such as fluorescent bulbs, batteries and electronic devices. Winter 06	This newsletter is mailed to approx 1600 businesses located in Sunnyvale.
Schools and Youth			
Creek Education Program	Educational – General and Targeted	The creek and storm drain education program provides urban runoff, water pollution prevention, storm water, and water conservation information to Sunnyvale students attending schools in the Cupertino School District. Ongoing	After studying water and structures of life in class, students take a "storm drain flows to creek" education trip to McClellan Ranch Park as a supplement to the water studies course. In partnership with Cupertino, Sunnyvale provided funding to cover the transportation cost for (5) buses to transport the Sunnyvale students that attend schools in the Cupertino School District. This program offers an excellent opportunity to encourage youth audiences to accept personal responsibility and actions that benefit the watershed. Two 3rd grade classes from West Valley and three classes of 3rd graders from Nimitz School. Total students reached = 150
Classroom Presentation	Educational – General and Targeted	Watershed pollution demonstration using the Enviroscape focuses on introducing kids to watersheds, water pollution problems, storm drains and sanitary sewers, water conservation, and watershed stewardship. Ongoing	Outreach conducted 16 classroom presentations this school year. In their feedback remarks, many students indicated they learned new things from the presentation. Many said they never knew that only 1% of the world's water is fresh water, and that we should protect it. Other students remarked they didn't know about storm drains and sewer systems before the presentation. Evaluation feedback from teachers indicated the information reinforced and supported what they were learning in class. Kinder =58 2nd = 54 5th =309 Total =421

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment G- Public Information and Participation (PI/P) Table 1
FY 2005-2006 Annual Report
Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Schools and Youth (continued)			
Sunnyvale Summer Camps	Educational - Targeted	In partnership with Sunnyvale Parks and Recreation Department, the Outreach program provides environmental games and activities that focus on water pollution prevention to younger children enrolled in Summer Camp. July 05 August 05	This year, the program for outreach at summer camps was modified. Two camps serving youth ages (9-12) and (6-12) were eliminated. Due to staff limitations, Outreach focused only on youth attending Kidstuff Camp (age 6-9). In addition, instead of a summer long program, the format was reduced to (2) presentations in July and (2) presentations in August. Presentations introduced material such as storm drains, sewers and water pollution (Enviroscape), and beneficial insects (story, discussion, craft project). Outreach at summer camps will likely be eliminated in 06-07 due to staff limitations and lack of support by Parks and Rec. 196 youth reached
Plant Tours School Groups	Educational – General and Targeted	Plant tours focus on the difference between storm drains and sanitary sewer, the importance of wastewater treatment in protecting the Bay, wastewater treatment processes, water pollution prevention, and the value of recycled water.	To determine if public messages on preventing pollution in storm drains were effective, we surveyed tour participants to find out if students knew the difference between storm drain flows and treated water from sanitary sewer lines. An informal evaluation was conducted on an intermittent basis during 8 of the 15 tours, with an intention of capturing student knowledge about storm drains. The goal of the evaluation was to learn if students 1) know what a storm drain is, and 2) know where storm drains flow. Outcome showed that of the 136 students surveyed, only 31 felt they knew what a storm drain is, and only 9 felt they knew where storm drains flow. Interestingly, 107 students out of the 136 were high school or college students touring with a biology and/or environmental science course. The outcome resulted in transfer of knowledge about storm drains and where storm drains discharge, with 100% of student audience reached. The Plant conducted 15 student tours reaching 41 elementary, 53 high school, and 196 college age students. Total = 290

Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Schools and Youth (continued)			
Sunnyvale Pancake Breakfast	Educational – General and Targeted	This is a community event sponsored by the City's Public Safety Unit. The event features a community breakfast, activities for kids, and exhibit booths providing information about City services. The outreach focus at this event is water pollution prevention.	This is an excellent event to reach kids and families with messages about watersheds, storm drains, and water pollution prevention. Our booth at this event is very popular among both kids and adults, and everyone is always very interested in watching the Enviroscape demonstrations and learning about water pollution. This event offers an excellent venue for Outreach to focus on short-term target audience reach for Goal 4 – deliver messages to students designed to encourage personal responsibility and actions that benefit the watershed. Approx. 50 kids watched the demonstrations and learned about water pollution prevention.
Columbia Health and Safety Fair	Educational – General and Targeted	This is a family oriented health and safety event. At this event the Outreach booth conducts Enviroscape presentations with focus on storms drains and water pollution prevention.	Outreach conducted 8 Enviroscape presentations, informing youth about storm drains and how water becomes polluted from human activities. The Enviroscape is a very effective tool to use at an event of this type because children are fascinated and riveted by the visual demonstration of how the water becomes polluted, which I believe helps them understand the problem and drives home the water pollution prevention message. This is a beneficial event in which to reach short-term audiences with Goal 4 – deliver messages to students designed to encourage personal responsibility and actions that benefit the watershed. AND long-term target audiences that includes low-income and Latino residents. Total number of children – approximately 80

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Regional			
Home and Garden Show	Event – General and Targeted	The San Jose Home and Garden Show is reported to be the largest, most highly attended home show in the area offering homeowners an opportunity to see the latest trends and products in home improvement, design and landscaping. April 06	Volunteers staffing the event spent time talking with attendees about the difference between sanitary sewer and storms drain systems, about less-toxic pest control around the home and garden, and promoting the main message of water pollution from pesticide runoff. Total number of individuals reached at this event was 583, with 678 pieces of literature distributed.
Guadalupe Gardens Grand Opening	Event – General and Targeted	The Guadalupe River Park Grand Opening Celebration included activities and fun for the whole family. Many of the exhibit booths featured an environmental theme. The Watershed Watch booth provided information on IPM and pesticides. September 05	Approx 50,000 people were expected to visit this event. The goal of the outreach was to inform the public through interaction, literature, playing the bean bag game, and the Watershed Watch Display about why watersheds are important and how to prevent water pollution in our local creeks and Bay. 528 pieces of IPM literature were distributed.
Orchard Supply Hardware	Event - Targeted	The Orchard Supply Hardware Home and Garden Show offers homeowners an opportunity to see the latest trends and products in home improvement, design and landscaping. May 06	Volunteers staffing the event spent time talking with attendees about IPM techniques, less-toxic pest control around the home and garden, and promoting the main message of water pollution from pesticide runoff.
Ad Hoc Task Group Participation	Targeted	Participating member of the SCVURPPP ad hoc task group for Mercury and IPM. Ongoing	Activities include literature development, program development, work plan and timeline development and review, budget review and approval, activity planning and implementation.
Watershed Outreach and Education Campaign (WE&O)	Targeted	The goal of the campaign is to educate residents of Santa Clara County about watershed protection through water pollution prevention awareness and appreciation, to promote public involvement in watershed stewardship through behavioral changes, and to change behaviors that negatively impact the watershed.	Outreach has been a participating partner and remains active in all aspects of the campaign. In an ongoing effort, Outreach continues to work with co-permitees, SCVURPPP staff, and the consultant to approve campaign action plans and promotional materials.

Earth Day is April 22

Sunnyvale Quarterly Report
Spring – 2006

April 22 marks the annual celebration of Earth Day. The City of Sunnyvale will officially launch Earth Day with a proclamation and recognition of Sunnyvale's newest "Green Businesses" at the April 11 Council meeting.

During the week before Earth Day there will be numerous opportunities to learn about how to be a better Earth care-giver, starting at home. Cap it off by holding a sale or shopping for treasures at the Citywide garage sale Saturday, April 22, and stopping for lunch at one of Sunnyvale's beautiful parks. Or bring lunch and have a picnic at Plaza del Sol.

Attend one or all of these workshops designed to help you learn about how to turn toward living green.

A Healthy Home from the Inside Out

An Environmental Program Series
Monday, April 17 - Wednesday, April 19

Earth Day is a time to celebrate our connection to our planet. It is a time to learn what you can do to help the environment and improve the quality of life in our community. The City will present a series of programs at the Library during this week geared toward environmental protection in our City, neighborhoods and homes. Each of these events will be held in the Program Room at the Sunnyvale Library.

Water Pollution and Prevention

Monday, April 17, 7 p.m. - 8:30 p.m.

The combined effect of pollution from many sources continues to impact our watershed and the quality of our water resources. The presentation discusses changes that impact our watershed, and tracks pollution from various sources. Best management practices are discussed to prevent water pollution and environmental contamination.

Greening Your Home: Materials and Strategies

Presented by Build It Green
Tuesday, April 18, 7 p.m. - 9 p.m.

This workshop will cover materials and strategies that can allow you to create a home that's healthy for you and your family, saves money, and is easy on the environment. You will learn how to:

- Increase your home's comfort, health and durability;
- Reduce utility bills;
- Make smart material and appliance choices; and
- Maintain and operate your home's structure and systems.

Whatever your style or budget, you can enjoy the benefits of a green home!

Cleaning Green: How to Keep Your Home Clean and Green

Wednesday, April 19, 1 p.m. - 2 p.m.
7 p.m - 8:30 p.m., Community Center Neighborhood Room

Hear from Annie B. Bond, a leading environmental expert and author, on keeping your home clean using safe, non-toxic cleaners and products. Your whole family benefits.

- Learn about some cleaning chemicals and their consequences;
- Identify common household products that can double as cleaners;
- Teach others in your household safe-clean how-to's; and
- Learn how to save money while staying green.

Why Use Cloth for Your Child?

Presented in cooperation with Tiny Tots Diaper Service, the Real Diaper Association and the City of Sunnyvale
Wednesday, April 19, 2:30 p.m. - 3:30 p.m.

Learn why Sunnyvale promotes the use of cloth diapers. Included in this workshop will be a parent, currently using 100 percent cotton diapers, demonstrating just how simple it is for today's moms and dads to diaper using the no-pinning method. Practical ways to ensure a non-toxic environment for your baby's bottom will also be discussed.

QUARTERLY REPORT

CITY OF SUNNYVALE CALIFORNIA

CITY OF SUNNYVALE FALL 2003

Decadent Dinners Stick To Your Ribs and Your Pipes

Properly Disposing of Fat, Oil and Grease.

Southern-style fried chicken. Onions sautéed in butter or oil. Taco fiestas and delicious curries. They're all mouth-watering feasts, but you may be surprised to learn that they can also be hazardous to the health of your home's plumbing system. Pouring the remains of these culinary delights into a drain or garbage disposal can cause costly, unpleasant sewer blockages and overflows.

What happens is simple: fats, oil and grease from food build up in pipes by sticking to the sides of the pipe, roots, or cracks in the sewer. Over time, the build-up can block an entire pipe. Using commercial products such as detergents that claim to dissolve grease may simply pass grease down the line and cause problems in other areas.

On average, one in 60 homes in the Bay Area is affected by a blockage in their plumbing or in the main lines of the public sewer system every year. These blockages can cause overflow into homes. Besides the mess and unpleasant odor, untreated sewage can cause health hazards and threaten the environment. Overflows of sanitary waste into a storm drain may reach our local creeks and Bay, contaminating the water and impacting plant, fish and wildlife. Sanitary sewer overflows also require expensive cleanup and plumbing repairs.

For more information about how to prevent fat, oil and grease from damaging the sanitary sewer and the environment, call the City of Sunnyvale Environmental Division at (408) 730-2761, TDD (408) 730-7501.

Household Hazardous Waste Program

For Safe Disposal of Household Batteries and Other Extras

Dec/Jan 06

Does the post-holiday season find you with a stock of new gadgets and a cache of old batteries or other household extras that you need to dispose or recycle? The City of Sunnyvale provides several options for safe disposal of unwanted household products containing hazardous materials, helping to prevent damage to the people and the environment.

Locally and nationally the effects of mercury contamination in the food chain are receiving increasing media attention. This winter and post-holiday season are especially good times of the year to look for and dispose of unwanted household items containing mercury. Common household items that may contain mercy include fluorescent light bulbs and tubes, batteries, mercury thermometers and thermostats.

Disposal and Recycling Options for Sunnyvale Residents

Curbside

Household batteries may be recycled at curbside. Put them in a heavy-duty, sealed plastic bag and place the bag on top of recycling cart.

SMaRT Station®

Fluorescent bulbs or tubes may be taken to the SMaRT Station, 301 Carl Road, Sunnyvale. Daily 8 a.m. – 5 p.m. No charge.

Local Retail Shops
(for fluorescent bulbs and tubes)

Numerous retail stores in Santa Clara County are now accepting fluorescents bulbs and tubes at their stores during regular business hours. For a complete list, visit the *Mercury Education* link under *Household Hazardous Waste Home* at *www.hhw.org*.

Household Hazardous Waste Event

When you have a full-limit load, bring your other mercury-containing products and other hazardous household waste to a Household Hazardous Waste Drop-off event in Sunnyvale, held the third Saturday of each month, excluding December.

Next events: January 21, February 18, March 18
Hours: 8 a.m. – 1 p.m.
No appointments required for Sunnyvale residents.
Location: 164 Carl Road

Other items accepted at a Household Hazardous Waste event include pesticides, insecticides, herbicides, flammable or combustible liquids, fire extinguishers, paints, household cleaners and pool products. Businesses with small quantities of hazardous waste may be available to participate in a fee-based county drop-off program by appointment only. Call (408) 299-7300 for details.

Planning Your Household Hazardous Waste Drop-off Trip

Do not mix materials, and make sure that all materials are in the original container or carefully contained in a sealed, non-leaking container. Follow the City's transportation guidelines of no more than five gallons or 50 pounds per vehicle, per trip.

Please help us prevent the unsafe disposal of mercury and other toxic household products year-round. Do not put any of these items in the trash or dump them into toilets, drains or on the ground. For more information, contact the recycling program at (408) 730-7262 or visit *www.sunnyvalerecycles.org*.

Quarterly REPORT Summer 2005

Draining Pools and Spas

Keep Pool, Spa and Fountain Water Out of Our Storm Drains, Creeks and the Bay

Clean water is vital to the health of fish, plants, animals and humans, but many human chores and activities can lead to water pollution. Common culprits are swimming pools and spas, which must be drained properly to ensure chemicals don't enter storm drains where water flows untreated to our local creeks and Bay. Copper is used as an algaecide in pools, spas and fountains, and copper pipes are commonly used in pool plumbing. Draining pools, spas and fountains to storm drains can pollute our creeks and Bay with copper, chlorine, sediments, and other contaminants. A properly maintained pool, spa or fountain may reduce the need for draining.

Maintaining your pool, spa or fountain

- Minimize algae buildup to prevent the need for toxic algaecides
- Clean regularly, maintain proper chlorine levels, and maintain water filtration and circulation.
- Manage pH and water hardness to minimize copper pipe corrosion that can stain your pool and end up in our creeks and the Bay.
- Ask your pool maintenance service for help resolving persistent algae problems without using copper algaecides.

Cleaning

- Never clean a filter in the street, gutter, or storm drain.
- Rinse cartridge filters onto a dirt area and spade filter residue into the soil.
- Keep backwash discharges out of the street and storm drain. Backwash sand and diatomaceous earth filters onto a dirt area. Dispose of spent filter materials in the trash.

Draining

- Don't drain to a street, gutter, or storm drain. Instead, discharge water to a sanitary sewer clean-out.
- To report a pool in your neighborhood draining to the street, or for information about locating your sanitary sewer clean-out call the Sunnyvale Water Pollution Control Plant at (408) 730-7260.

What does a sanitary sewer clean-out look like?

- Look on your property for a small concrete or metal cover marked "sewer." Clean-outs are often located under them.
- Look for a small circular cap on a pipe, with a raised square on it, sticking out of your house or out of the ground. These caps often cover clean-outs.
- In either case, remove the cap and place the hose in the pipe to drain. To prevent backflow, keep the end of the hose from touching the bottom of the sewer pipe while draining.

Tips for finding your clean-out:

- If your kitchen or bathroom is on an exterior wall of your house, look outside along that wall for a clean-out.
- Stand on the sidewalk looking toward your house. Line up the main water sources in your house: bathrooms, kitchen, washers, etc. The clean-out is often located on that line, in front of or behind your house.
- Look for an "S" stamped into the curb or sidewalk near your house. It marks where the sewer line is. Your clean-out may be along it.
- Look for a slight linear depression in your yard between your house and the street. This may indicate the location of a sewer line, and your clean-out may be on it.

Residents of Sunnyvale can dispose of pool chemicals at a hazardous waste drop-off event. For more information call Sunnyvale Solid Waste and Recycling at (408) 730-7262 or visit *www.sunnyvalerecycles.org*.

For information about how to protect our creeks and bay, call (866) WATERSHED or visit the Watershed Watch Web site at *www.watershedwatch.net*.

Now everyone must conform to the e-waste disposal laws

By Jason Goldman-Hall

Sunnyvale residents threw out 5 tons of batteries and $3^1/2$ miles worth of cylindrical fluorescent light bulbs in fiscal year 2004-05.

For almost five years, large companies had special procedures to follow when disposing of high-tech garbage, known as e-waste. Small companies and households were exempt from the rules.

Since Feb. 9, however, anyone with e-waste must use proper disposal methods. E-waste--usually defined as anything with circuit boards or batteries--includes all telephones, televisions, home electronics and computers, whether they are household PCs or high-powered industrial machines.

Many of those products contain heavy metals such as lead and mercury and can contaminate handlers and ground soil if thrown away like regular trash.

The city of Sunnyvale and the state of California have set up a number of outlets for people looking to get rid of their old equipment. In Sunnyvale specifically, e-waste can be taken to the Sunnyvale Materials Recovery and Transfer Station,

, and batteries can be placed in heavy-duty plastic bags and put out next to traditional trashcans.

The city has actually been offering residents that service for years, knowing that the disposal exemption could eventually end.

"This is something everyone is going to have to address, so it just made sense to get a jump on things," said Sunnyvale Deputy Communications Officer Adam Levermore-Rich.

The SMaRT Station collects e-waste and sorts it by type to be sent to individual "demanufacturing," companies that break the items down and recycle the materials.

But the city is not the only entity acting as the middleman for e-waste recycling. A number of companies have also gotten into the business of collecting and sorting e-waste for recycling.

Sunnyvale's Amerturk Inc--just a few blocks from the SMaRT Station on Duane Avenue--specializes in collecting unwanted computers and other equipment from major companies.

In just one week, CEO Harum Sevimli, a Sunnyvale resident, said the company collects 10-20 thousand pounds of e-waste.

"A lot of people don't know what do with all this stuff," said Patricia Perry, AmerTurk director of communications and fundraising. "We've get things from the 1940s that people have just held on to."

The company recently helped St. Francis High School get rid of its old computers and in just three days, literally filled a room, floor to ceiling, with computer monitors.

"And we expect business to increase with the new law," Perry said.

Companies like Amerturk don't do the recycling themselves because dealing with hazardous chemicals requires special permits and facilities, but they sort the items and send them out.

Such companies are supported by funds set aside by the Electronic Waste Recycling Act that became law on Sept. 24, 2003. Since Jan. 1, 2005, California residents pay a fee of $5-$10 whenever they buy certain video display devices, such as computer monitors or televisions, and that money is put in a special account.

Because of the state funding, all the equipment collected must be catalogued for reference, but there is no cost to residents who drop equipment off.

On Feb. 6 and 7, Santa Clara resident Charlie Sosinsky dropped off a truckload of computer monitors and an old VCR at Amerturk.

"I think the recycling is a good thing, and I hope they can be put to a good use," he said. "I think we ought to do all we can."

Some of the items Amerturk collects are donated to community organizations, but most of the company's community work comes through fundraisers. While the company doesn't typically pay for donated goods, it does offer money for groups that bring in equipment. That work also helps expose Amerturk's business to the community, so more people know about the now-mandatory services they provide.

"Most citizens are unaware of this," Sevimli said. "They want to help; they just need us to tell them how."

Amerturk Inc. is located at 1050 E. Duane Avenue, Suite M. Drop off hours are 9 a.m. to 6 p.m. Monday through Saturday. For more information, call 408.733.3916 or 408.329.1716. For information on Sunnyvale e-waste recycling, visit www.sunnyvalerecycles.org, or call 408.730.7262.

Release # 02 03

SUNNYVALE GETS HEAD START ON NEW HAZARDOUS WASTE RULES

SUNNYVALE, Calif. –California's newest hazardous waste rules will ban most consumer electronics, batteries and mercury-containing products from being placed in the trash for disposal as of February 9. But Sunnyvale is giving its residents and small businesses a head start. Many of these products can already be recycled right here in Sunnyvale.

Virtually all electronic devices that contain a battery or circuit board – including computers, printers, cell phones, stereos, and even some appliances like microwave ovens – are targeted in the new regulations, because they often contain heavy metals like lead, copper, and chromium. When not disposed of properly, these hazardous waste products can pollute the environment. Household batteries, mercury thermometers, thermostats with mercury, and fluorescent tubes and compact bulbs are also among the prohibited products.

Sunnyvale residents with curbside recycling can recycle household batteries by placing them in a heavy-duty, sealed plastic bag and setting them on top of their recycling cart at curbside. Residents and small businesses can also take fluorescent tubes, compact bulbs and household batteries to the Sunnyvale Materials Recovery and Transfer (SMaRT®) Station, 301 Carl Road, for recycling.

More information on hazardous waste recycling is available by visiting *www.sunnyvalerecycles.org* or calling (408) 730-7262, TDD (408) 730-7501.

Release # 04 02

SUNNYVALE EARTH DAY EVENTS

SUNNYVALE, Calif. – Earth Day 2006 will be celebrated through a variety of community events in Sunnyvale this year, beginning with the presentation of an Earth Day Proclamation at the April 11 City Council meeting.

During the week of April 17 – 22, the City is sponsoring a series of environmental workshops at the Sunnyvale Library, 665 W. Olive Ave. Topics include: *Protecting Our Water*, April 17 at 7 p.m.; *Materials and Strategies for Greening Your Home*, April 18 at 7 p.m.; *Cleaning Green*, April 19, 1 p.m. and repeated at 7 p.m. in the Community Center Neighborhood Room, 550 E. Remington Drive; and *Choosing Cloth for Your Child – Diapering Made Easy*, April 19 at 2:30 p.m. The programs are free of charge.

Friday, April 21, the City of Sunnyvale will join a countywide campaign to promote the reuse of grocery shopping bags by distributing reusable bags at local grocery stores, including Albertsons at 580 E. El Camino Real and Safeway at 785 E. El Camino Real.

Saturday, April 22 is Sunnyvale's annual Garage Sale Day – a 14-year old program designed to encourage circulation and reuse of household goods rather than wasting or discarding them into landfills.

For additional information on Sunnyvale Earth Day programs, contact the Sunnyvale Recycling Program at (408) 730-7262, TDD (408) 730-7501.

###

Sewer Monsters Do Exist!

Cooking oil and grease are clogging sewer lines in your neighborhood, creating a monster of a problem!

Starve the Sewer Monster!

Never pour grease or cooking oil down sinks or garbage disposals.

Pour cooking grease into a sealable container, or mix with an absorbent such as cat litter and place in the garbage.

Scrape leftover food waste from meals into the garbage or backyard compost container.

Use food strainers in kitchen sinks to catch food particles and other garbage.

Visit the Web site at ***wpcp.sunnyvale.ca.gov*** or call the Sunnyvale Pretreatment Program at **(408) 730-7270, TDD (408) 730-7501** for more information on grease disposal.

Printed on Recycled Paper.

Los Monstruos del Alcantarillado ¡Sí existen!

El aceite y la grasa de cocinar están obstruyendo las tuberías del alcantarillado de su comunidad, creando un gran problema!

¡Mate de hambre al monstruo del alcantarillado!

Nunca deseche grasa ni aceite de cocinar por el fregadero ni por el triturador de basura.

Coloque la grasa de cocinar en un recipiente hermético o mézclela con un material absorbente como la arena para gatos y tírela a la basura.

Tire los restos de la comida a la basura o en el contenedor del abono.

Utilice coladores en el fregadero de la cocina para atrapar partículas de alimentos y otra basura.

Visite el sitio Web ***wpcp.sunnyvale.ca.gov*** o llame al Programa de Pretratamiento de Sunnyvale al **(408) 730-7270, TDD (408) 730-7501** si desea más información sobre cómo desechar la grasa.

Healthy Habits for Clean Water

The City of Sunnyvale is asking you to help reduce storm drain pollution.

Urban Runoff

Water draining from rain and landscape watering creates urban runoff. Pesticides, auto fluids, grass clippings, pet waste and other pollutants from streets, lawns, gardens and sidewalks are transported in urban runoff to gutters and storm drains, where the water flows untreated to our local creeks and Bay.

How You Can Help

Healthy habits for clean water can be as easy as 1-2-3:

1. Vehicle Maintenance – Avoid dirty, soapy water in the storm drain by using a commercial car wash or washing your car on the lawn. Repair oil leaks promptly and clean up spilled fluids with kitty litter or sand.

2. Lawn and Garden – Avoid toxic pesticides and fertilizers. Find alternative ways to control pests or enrich your soil. If you use them, use sparingly and according to package directions. Do not use when rain is forecast.

3. Household and Garage – Use cleaning, painting or automotive products until finished, or share them with a neighbor. Rinse latex paint brushes, pans and rollers in the sink, not outside. Take toxic products and solvents to a Household Hazardous Waste Drop-off Event.

NO DUMPING FLOWS TO BAY

For pollution prevention information visit our Web site at *wpcp.sunnyvale.ca.gov* or call the Water Pollution Control Plant at (408) 730-7738, TDD (408) 730-7501

When you need to drain ...

DRAIN SMART

Keep chlorinated pool, spa and fountain water out of storm drains, creeks and the Bay. It can harm plants, fish and wildlife. Instead, discharge water to a sanitary sewer clean-out.

When you need to discharge a large amount of chlorinated water, please call the Water Pollution Control Plant at (408) 730-7270, TDD (408) 730-7501, for help in finding your sewer clean-out.

Vehicle Maintenance and Water Pollution

Oil and other fluids leaking from motor vehicles onto streets do more than create an unsightly mess! When it rains, these contaminants wash from the street into storm drains that flow directly to our creeks and San Francisco Bay. These pollutants can impair water quality for plants, fish and wildlife.

Reduce and Eliminate Water Pollution Caused by Vehicles

To avoid unnecessary water pollution AND ensure better gas mileage, keep your car in good mechanical condition. Stop drips and leaks by fixing them promptly.

Use ground cloths or drip pans beneath your vehicle when doing engine work. Clean up spills immediately.

Soak up accidental spills of automotive fluids with kitty litter, sawdust, or a similar absorbent material. Sweep and place in covered garbage can.

Never dispose of oil or other engine fluids into the storm drain or pour them on the ground.

Sunnyvale residents may have used motor oil and oil filters collected at curbside. Residents may also bring automotive batteries, antifreeze, motor oil and oil filters to the SMaRT Station®. Call (408) 730-7262 for more information.

For pollution prevention information visit our Web site at *wpcp.sunnyvale.ca.gov* or call the Water Pollution Control Plant at (408) 730-7738, TDD (408) 730-7501

Never dispose of oil or other engine fluids into the storm drain or pour them on the ground.

Sunnyvale residents may have used motor oil and oil filters collected at curbside. Residents may also bring automotive batteries, antifreeze, motor oil and oil filters to the SMaRT Station®. Call (408) 730-7262 for more information.

For pollution prevention information visit our Web site at *wpcp.sunnyvale.ca.gov* or call the Water Pollution Control Plant at (408) 730-7738, TDD (408) 730-7501

Old Batteries
Taking Over Your House?

Do not put them out of the trash.

Do recycle them.

Batteries from toys, games and other household cordless products contain hazardous materials that do not belong in the landfill.

If batteries are disposed of in the garbage, they end up in the landfill where the hazardous materials can eventually leak out and pollute our groundwater.

Here are some options for proper disposal:

- Residents may put household batteries in a plastic bag and place it on top of the recycling cart on collection day.
- Recycle the rechargeable batteries that power most common household cordless products at your local Radio Shack, Orchard Supply Hardware or the **SMaRT® Recycling Center**.
- Bring **batteries** to a scheduled HHW drop-off event: **the third Saturday of every month (except December), 8 a.m. to 1 p.m.**

PLEASE

KEEP YOUR LEAVES OFF THE STREET!

Put Them in Your Yard Trimmings Cart or Compost Bin

Many trees are beginning to drop their leaves. But, please don't leave them in the street or sweep them into a storm drain.

WHAT TO DO

- Put leaves in your yard cart or compost bin
- More leaves than cart space? Store leaves until the following week, or set them out in 32-gallon cans labeled 'yard waste.'
- If transporting yard trimmings by truck, keep them covered.
- Ask your gardener to follow these guidelines, too.

HOW IT HELPS

- Allows easy access for City street-sweeping
- Reduces the waste Sunnyvale sends to the landfill
- Makes leaves available in finished compost
- Prevents street flooding from leaf-clogged drains
- Reduces Bay pollution

Compost is available free of charge to residents of Sunnyvale, Mountain View, Palo Alto and Los Altos at the SMaRT® Recycling Center, 301 Card Rd., seven days a week (8 a.m. to 5 p.m.) except November 24, December 25, and January 1.

Less-Toxic Pest Management in Sunnyvale

It is the City's goal to reduce and minimize the amount of harmful pesticides present in urban storm water runoff to local waterways. To this end, Sunnyvale operates under a Citywide Integrated Pest Management (IPM) policy to address weed, insect, fungi or algae problems at all City-owned facilities.

IPM policy details methods of control through a combination of evaluation and selection of appropriate options such as passive controls, biological controls or low-toxicity pesticides used in accordance with state laws. All City departments, staff and pest-control contractors hired by Sunnyvale follow the City's IPM policy.

To read the full policy online, refer to the regulatory requirements section of the City's Web site at *wpcp.sunnyvale.ca.gov*

Please join in the City's effort by using your own less-toxic alternatives to help protect our watershed.

Sunnyvale Diverts 61%—A Record High!
It's Time to Renew Your Commitment

Thanks for your help. We've already reduced waste by 61% but we can do more. So join others in recycling and reducing waste.

Since Spring is a time for new beginnings, many people take this time for spring cleaning—to freshen up their homes inside and out. That's why spring is a great time to make a commitment (or re-commitment) to recycling. Include recycling in your spring cleaning routine and then continue it year 'round. With Earth Day in April, it's a great way to honor the Earth as well. Recycle with us. It can be easy and fun.

Create a spring cleaning checklist that incorporates recycling.

☑ Involve the entire family.

☑ Collect your recyclables for your recycling cart.

☑ Donate or hold a garage sale.

☑ Use less toxic cleaning materials.

☑ Show you care—reuse your grocery shopping bags.

☑ Take a compost workshop.

NEW RULES FOR UNWANTED CONSUMER ELECTRONICS

New State rules ban the disposal (in your trash or with curbside collection) of virtually any consumer product containing a battery, circuit board or mercury. See inside for details of how Sunnyvale is helping you dispose of these products.

Extra Dump Weekends

For Sunnyvale residential customers only

Sunnyvale residents may dump extra trash at no charge on April 1st and 2nd, and April 8th and 9th at the SMaRT Station®, 301 Carl Road (see map).

To better serve you—we need your help. Please note new rules for electronic products and mercury-containing items.

- Have your identification and proof of residency ready at the gate. Acceptable proof of residency includes:
  Your driver's license with your Sunnyvale address or your driver's license plus a 2006 PG&E, telephone, TV cable, or City of Sunnyvale utility bill showing a Sunnyvale address with the name on the bill matching the name on the driver's license.
- Drive carefully through the SMaRT Station and follow instructions.
- Unload quickly so other residents can access the tipping area.

Restrictions:

- A Sunnyvale resident must be in each vehicle with each load.
- No vehicles larger than one-ton load capacity will be admitted.
- NEW **Put all electronic products in a separate container not mixed with other items. No more than a total of 4 TVs or monitors**
- Asphalt, concrete, dirt and sod require special handling. You may be diverted to a special line to unload these materials.
- No more than four (4) tires.
- No business or commercial materials.

PLEASE NOTE:
Household hazardous cleaning and maintenance chemicals will not be accepted. Please bring these hazardous items to a monthly Household Hazardous Waste Drop-off Event. Call (408) 730-7262 for information.

Sunnyvale Programs for Consumer Electronics

For some time, Sunnyvale residents have been able to take advantage of programs to recycle or dispose of hazardous waste including many of those products included in California's newest Hazardous Waste Rules. For example, Sunnyvale residents have been recycling household batteries at curbside by placing them in a heavy-duty, sealed plastic bag and setting them on top of your recycling cart. A new rule notes that you need to tape the battery terminals with electrical or Scotch™ tape to reduce the risk of fire or explosion. And you've been taking fluorescent tubes, TVs, and monitors, thermostats and thermometers to the SMaRT Station as well. Now, you can take your other consumer electronics to the SMaRT Station, too.

You can't, however, leave these things at curbside even during our Extra Curbside Pick-up days.

Just remember...virtually any electronic device with a battery or a circuit board... including computers, printers, VCRs, DVD players, cell phones, telephones, answering machines, radios, stereos and some appliances like microwaves... must now be taken to the SMaRT Station—not left at curbside.

If you have any questions, refer to www.sunnyvalerecycles.org or call us at (408) 730-7262.

Sunnyvale Has Great Ideas for an Earth-Friendly Home

A Healthy Home from the Inside Out

An Environmental Program Series Sponsored by the Library & Department of Public Works

Held in the Library Program Room
665 W. Olive Sunnyvale
April 17, 18, 19

Want to learn a bit about choices that help the environment and the quality of living in your home? Attend one or all of these workshops.

Protecting Our Water
April 17, 7–8:30 p.m.

Greening Your Home
April 18, 7–9 p.m.

Cleaning Green
April 19, 1–2 p.m.*

Choosing Cloth for Your Child
April 19, 2:30–3:30 p.m.

Greening Your Home: Materials and Strategies

If you really want to go "green" from the ground up, attend this workshop presented by Build It Green on Tuesday, April 18, 7 – 9 p.m. This workshop will cover materials and strategies that can allow you to create a home that's healthy for you and your family, saves money, and is easy on the environment.

Cleaning Green— How to Keep Your Home Clean and Green

Presented by Annie B. Bond, Wednesday, April 19 1-2 p.m.

Hear from the leading environmental expert and author, Annie B. Bond, on keeping your home clean using safe and non-toxic cleaners or products. Your whole family can benefit. Here are just a few things you'll learn:

- Cleaners that are so safe you can keep them in the 'fridge"
- Cleaning chemicals and their consequences
- Common household products that can double as cleaners
- Ways you can save money, too

***Repeated, **Wednesday, April 19, 7-8:30 p.m.** At the Community Center, Community Room at 550 E. Remington Drive.

Bring Us Your Toxic Chemicals
Reduce the Use in Your Home Year 'Round

8 a.m. to 1 p.m.

Household Hazardous Waste Events
164 Carl Road, Sunnyvale
(see map below)

Spring cleaning is a great time to not only use less-toxic cleaning products but also to round up those unwanted pesticides, cleaning products, automotive fluids, paints and other toxic products and bring them to a Household Hazardous Waste Drop-off event. When you come, be sure to follow these important guidelines.

- Bring material in the original container or use a non-leaking sealed container. **Do not bring products in containers that you want to keep, such as recycle bins, garbage cans or plastic storage boxes. Place products in disposable boxes, bags or buckets for quicker removal from your vehicle. No containers will be returned.**
- Never mix chemicals.
- Keep personal items separate from hazardous materials.
- Transport material in your trunk or pick-up bed, away from the passenger area.
- Limit: 5 gallons or 50 pounds per vehicle.
- For your safety, you must stay in your vehicle when you reach the drop-off area.
- Please leave your pets at home.
- Questions? Call (408) 730-7262.

To save money, make your own household cleaners. See details on our web site: **www.sunnyvalerecycles.org**.

SMART Idea

Use club soda to spot clean carpets. With a sponge or cellulose cloth, rub a small amount on the carpet until clean and then rinse well. Come to a workshop at the library on **April 19th at 1 p.m.** to learn more!

Use the SMaRT Recycling Center Drop-off

Everything you recycle at curbside (and more) can be recycled at the SMaRT Recycling Center. Check out the complete list at www.sunnyvalerecycles.org. Residents of Mt. View, Palo Alto, and Sunnyvale can also drop off the following items (residents only, no businesses):

- Auto batteries, used motor oil and oil filters, and anti-freeze
- Fluorescent light bulbs and tubes
- Hypodermic needles
- Any item containing a battery or circuit board including monitors, computers, small appliances and consumer electronics
- Mercury-containing products

The SMaRT Recycling Center is open 7 days a week from 8 a.m. to 5 p.m.

Hold a Garage Sale

Garage sales are a great way to recycle your unwanted items. Whether you're a "first timer" or a seasoned veteran, you'll find helpful tips to maximize your sales at www.sunnyvalerecycles.org. Click on "Garage Sales and Donations."

Shop with the Environment in Mind

Shop with an eye towards the environment. Buy non-toxic, organic and recycled products. And bring your own bag!

Give Items to a Reuse Agency

If there isn't a garage sale in your future, consider donating your unwanted items to a reuse agency. Check out the Reuse Agencies on-line at www.sunnyvalerecycles.org.

SUNNYVALE WATER POLLUTION CONTROL PLANT

A Healthy Bay – It's Good Business

Indoor Drains Flow to Plant

Water draining from showers, sinks, and toilets is called wastewater, and it flows through the sanitary sewer system to the Water Pollution Control Plant. When wastewater arrives at the Plant, the task is to clean it of ordinary pollutants such as detergent, food waste, paper products and human waste, so the resulting effluent is safe enough to discharge to the San Francisco Bay.

Industries that work with hazardous materials on-site are required to treat their process water before discharging it to the sanitary sewer. The Pretreatment Program works directly with commercial businesses and industrial facilities to prevent industrial waste from getting into wastewater or storm drains, which may cause damage to the sewer system, interfere with Plant operations, or compromise public health or the environment.

Treating municipal wastewater before discharge to the bay protects the health of people, property, and the environment.

Storm Drains Flow to Bay

When rain or other water is washed from parking lots, driveways, or streets, pollutants such as pesticides, paints, solvents, chemicals, grease, oil, and dirty bucket water are carried along with the water to storm drains in the parking lot or street. In Sunnyvale, storm drains were built only to control flooding, and water that enters the storm drain system is not treated before flowing to our local creeks and the bay.

Increasing Environmental Awareness

To learn about the Best Management Practices and Standard Operating Procedures your business can apply to reduce or eliminate pollution flowing to the bay, call the Pretreatment Program at 408-730-7260. To learn more about water pollution prevention in your community, call Environmental Outreach at 408-730-7738. For information about the Water Pollution Control Plant and its programs, visit our web site at *wpcp.sunnyvale.ca.gov.*

037507

Your Inquiries

Q Is there new California legislation which will ban all businesses from disposing of fluorescent bulbs, batteries and electronic devices in the garbage?

A In short, yes. California's Universal Waste Rules, effective since February 8, 2002, permitted specific waste generators (such as households and businesses generating small quantities) to send certain hazardous wastes to the landfill rather than requiring that they be recycled or handled by a hazardous waste hauler. This disposal allowance will expire as of February 9, 2006.

Although businesses using best management practices may already be recycling hazardous wastes which were initially exempted, as of Feb. 9, 2006, no amount of any of the following items can be legally disposed of in the garbage:

- Fluorescent, high intensity discharge, neon, mercury vapor, high pressure sodium and metal halide lamps
- Batteries (all types)

- Consumer electronic devices powered by electricity or battery with a printed circuit board (e.g. computers, printers, VCRs, stereos, copiers, cell phones)

Businesses will find a list of recycling companies for fluorescent bulbs, batteries, electronics and many more items at *www.sunnyvalerecycles.org* (click on "Recycling Resources"). For additional information, please visit the Department of Toxic Substances Control's Universal Waste website at *www.dtsc.ca.gov/HazardousWaste/UniversalWaste*, email *uwaste@dtsc.ca.gov* or call (800) 728-6942 toll-free.

Send your questions to *jbenabente@ci.sunnyvale.ca.us.*

Sign Up Now For Staff Tables at 2006 State of the City

The 2006 State of the City celebration will once again be held July 4 at Washington Park. As in previous years, City departments are invited to host an information table at the event. This is a great opportunity to reach out to the Sunnyvale community, as the State of the City has been growing in popularity each year. Last year, more than 1,500 people attended the event, and even more are expected this year. The celebration begins at 11 a.m., and runs until 2 p.m. The deadline to sign up is June 1. For information about reserving a table, contact the Communications Division at (408) 730-7535, or e-mail *communications@ci.sunnyvale.ca.us.*

NOVA Program Targets At-Risk Youth

Many young people today understand the potential value of finding a job: extra money, saving for college and developing an employment history. For some youth, however, working is not only a means of constructively investing their time, but also a financial necessity and a life-changing opportunity. Among the employment services provided to young adults through NOVA, the Career Guidance Program is an ongoing effort to reach at-risk youth in order to aid them in their career development needs. NOVA's career advisors work with such target populations as homeless and runaway youth, ex-offenders, pregnant and parenting teens, foster and emancipated youth, and out-of-school youth who have not completed high school. Due to cuts in federal funding, NOVA's popular work experience program, in place since 1983, has been scaled back.

Services to youth are continually modified based upon feedback provided by its users. Life skills training, one recent addition to NOVA's youth services, is critical in helping youth focus on communication, customer service and other interpersonal skills, as well as time management, financial literacy, problem solving and making informed decisions. The program also helps promote self-advocacy, coaching youth in accessing resources and obtaining information for their specific needs. Career planning assistance involves assessing an individual's interests, values and skills in order to identify career options and encouraging youth to conduct informational interviews.

NOVA also works to connect at-risk youth with educational options, such as volunteer-based tutoring to assist youth in obtaining a high school diploma or GED, and exploration of higher education opportunities. Additional services that the NOVA Youth Program will be implementing include instruction on networking, techniques for success at job fairs, and them guidance on labor laws that will affect them once they reach the age of 18. NOVA is still accepting enrollments for the Career Guidance Program. Applicants must be 16 to 21 years of age, possess right-to-work documentation and have identifiable barriers to employment. Youth must also reside or attend school in Cupertino, Los Altos, Milpitas, Mountain View, Palo Alto, Santa Clara or Sunnyvale.

To inquire about these and other services for youth, please contact NOVA's Youth Office at (408) 730-7640 or visit *www.novaworks.org/youth.*

Protecting the Bay is our job

Committed to protecting water quality in our local creeks and Bay, City of Sunnyvale staff and pest control contractors hired by the City follow an Integrated Pest Management (IPM) policy when working to control pests and weeds on City-owned properties

IPM is an ecologically-based strategy that relies on a hierarchy of natural factors in order to minimize use of harmful chemicals in pesticides that can threaten the delicate ecosystem. IPM techniques keep beneficial insects alive, reduce dependence on potentially harmful pesticides and avoid the undesirable effects of chemical runoff into our local creeks and Bay.

Practicing pollution prevention techniques such as IPM is key to protecting the environmental integrity of our local water resources. For more information about safer, more environmental approaches to gardening, call **Sally Personett**, Environmental Outreach Coordinator, at (408) 730-7738, or e-mail *spersonett@ci.sunnyvale.ca.us.*

Council Negotiates Management Compensation

The City is currently in negotiations with Council over management compensation. The negotiations follow the same procedures used by other groups, including PSOA, COA and SEA.

More than five years ago, the City engaged a professional compensation analysis organization – the Hay Group – to analyze management compensation; during 2005, the findings were updated.

The result of the study is a modernization of the management compensation plan. A proposal was given to Council in closed session on February 7. As of Harbinger's press time, Council is again scheduled to review the plan in closed session February 14.

Once Council has worked out any remaining questions with the city manager and human resources director, the final plan will be presented in an open session of Council, at which time they will vote on whether or not to implement the plan.

The city manager will keep management staff informed of any Council action.

New Employees

Dee Schabot, HR Manager, HRD

Cynthia Viveiros, Sr. Office Assistant, DPR

Tammy Baier, Staff Office Assistant, DPS, has worked for the City for a year as a casual employee, supporting the Animal Control Unit and the Office of Emergency Services. Baier has both a Bachelor's and a Master's degree in Geography, specializing in public perception of earthquake risks.

Promotion Commotion

Congratulations to the following employees.

SUNNYVALE GETS HEAD START ON NEW HAZARDOUS WASTE RULES

California's newest hazardous waste rules will ban most consumer electronics, batteries and mercury-containing products from being placed in the trash for disposal as of February 9.

But Sunnyvale is giving its residents and small businesses a head start. Many of these products can already be recycled right here in Sunnyvale.

Virtually all electronic devices that contain a battery or circuit board – including computers, printers, cell phones, stereos, and even some appliances like microwave ovens – are targeted in the new regulations, because they often contain heavy metals like lead, copper and chromium. When not disposed of properly, these hazardous waste products can pollute the environment. Household batteries, mercury thermometers, thermostats with mercury, and fluorescent tubes and compact bulbs are also among the prohibited products.

Sunnyvale residents with curbside recycling can recycle household batteries by placing them in a heavy-duty, sealed plastic bag and setting them on top of their recycling cart at curbside. Residents and small businesses can also take fluorescent tubes, compact bulbs and household batteries to the Sunnyvale Materials Recovery and Transfer (SMaRT®) Station, 301 Carl Road, for recycling.

More information on hazardous waste recycling is available by visiting *www.sunnyvalerecycles.org* or calling (408) 730-7262, TDD (408) 730-7501.

GETTING THE WORD OUT: Deputy Communications Officer Adam Levermore-Rich talks to NBC-11's Laura Garcia-Cannon about Sunnyvale's response to the new regulations.

CitySkills

SPREAD THE WORD: Spring Applications Now Being Accepted

Offered through a partnership between the City of Sunnyvale and Silicon Valley Leadership, CitySkills is an fun, inexpensive way for Sunnyvale community members to "get their feet wet" in the areas of civic engagement and leadership with a relatively small time commitment. CitySkills consists of four two-hour classes, once per week for four consecutive weeks, for a nominal fee of $15 for the entire four week series.

The CitySkills schedule includes topics such as: Goal Setting, City Services and Government Structure, How Sunnyvale is Managed, Presenting Your Views to Government, City Budgeting, Impacting City Decisions, Sunnyvale's "Hot" Issues, and Conflict Resolution.

If you know of a Sunnyvale community member who might be interested in CitySkills, please refer them to **Michelle Bromstead**, Community Outreach Coordinator, Office of the City Manager, at (408) 730-7472, or *mbromstead@ci.sunnyvale.ca.us*. Schedules and applications are also available at *CitySkills.inSunnyvale.com*. The Spring session starts April 5, and applications must be received by March 20.

Don't Clog City Drains

Fats, oils and grease can be found in animal or vegetable products such as meat, food scraps, baking goods, sauces, shortening, butter and dairy products. When these food products are washed from plates into lunchroom sinks and garbage disposals, grease is washed into the plumbing system and sewer drains. Garbage disposals don't prevent grease from going down the drain, and grease can buildup over time and block the entire pipe.

Grease buildup in plumbing and sewer drains causes blockages and overflows which may increase operation and maintenance costs for the City. The easiest way to solve the grease problem is to prevent grease from entering the plumbing. This can be done by scraping food from serving ware and utensils and disposing of the scraps in the trash; and by using paper towels to wipe off the fat, oil and grease residues before washing them. Also, try to minimize the use of garbage disposals.

Taking a few simple measures to eliminate food scraps from plumbing and sewer pipes helps reduce the likelihood of sewer system blockages backing up in the kitchen and saves on operation and maintenance costs.

EARLY EDUCATION AWARD NOMINATION PERIOD OPENS

The City of Sunnyvale has announced the opening of the nomination period for its third annual Awards for Excellence in Early Education. The program recognizes high-quality early-educators in the Sunnyvale community, and highlights the crucial role early child care providers play in a child's social, physical, emotional and intellectual well-being.

Nominations are being sought from parents and others who have first-hand experience with the nominee's commitment to providing high-quality early-learning experiences for young children. Awards are given in recognition of six categories of service, including:
Infant Child Care Center; Preschool/ Child Care Center (preschool-age); School-age Child Care Center; Family Child Care Provider; Child Care Center or Preschool Director; and Child Care or Preschool Teacher.

Each nominee will be evaluated in a number of areas based on criteria from the National Association for the Education of Young Children (NAEYC). Sunnyvale's Child Care Advisory Board (CCAB) will make the final selections. Nominating applications must be received by the City of Sunnyvale by March 16. The winners will be announced at the Sunnyvale Health & Safety Fair, Saturday, May 6.

For more information about the award program and to download an application, visit the City's Web site at *www.sunnyvale.ca.gov/ communityresources*, then click on *Child Care Resources*, then on *Award Nomination Forms*. You may also call (408) 730-7608 for more information.

Environmental Procurement Policy

BUYING WITH PEOPLE AND THE ENVIRONMENT IN MIND

In 1999, the City of Sunnyvale adopted its Environmental Procurement Policy (EPP) to help us make responsible and healthy purchasing decisions that can benefit our employees, our community and the environment. Since September, Solid Waste and Environmental Division staff have been attending staff meetings throughout the City to provide a PowerPoint information session on the EPP and to answer questions about the policy. The presentation includes a discussion on environmentally-preferable paper and office supplies, building products, cleaning products, pest management as well as the minimization and proper handling of products containing mercury.

The PowerPoint presentation, the City's policy, and other resources for making environmentally-preferable purchasing decisions are posted online at *jasmine/employee-recycle/buy-recycled.*

Final presentations to IT and HR staff are scheduled within the next two months. If your working group has not received a presentation and would like to schedule one, please contact **Julie Benabente** at (408) 730-7484.

2006 City Holidays

City offices will be closed on the following dates in 2006. Should unforseen circumstances occur that require change to the above holidays, the holiday(s) will be observed as designated by the City Council.

1/2	New Year
1/16	Martin Luther King, Jr. Day
2/20	Presidents Day
5/29	Memorial Day
7/4	Independence Day
9/4	Labor Day
11/23 11/24	Thanksgiving
12/22 12/25	Christmas
12/29 1/1	New Year

Deferred Compensation Update for Calendar Year 2006

For those employees participating in the Deferred Compensation Plan, the maximum annual contribution will increase from $14,000 to $15,000 in calendar year 2006. The regular Catch-Up annual contribution limit for the three years prior to retirement will increase from $14,000 to $15,000. The Age 50 Catch-Up annual contribution limit will increase from $4,000 to $5,000. If you would like to make a change to the amount of your paycheck deduction, please request a form from the Department of Human Resources. If you would like to make changes to your fund allocations, please contact your plan provider.

Nationwide Retirement Solutions	**(800) 769-4457**
Ronald Salvemini	(877) 677-3678, ext. 43504
ICMA Retirement Corporation	**(800) 669-7400**

PERS 457 Program	**(800) 260-0659**
Ka Yi Li	(877) 499-7832

If you have questions regarding Deferred Compensation, please contact **Nicole Adamo** in the Department of Human Resources at (408) 730-7496.

JUNK MAIL WASTES TIME AND RESOURCES

In City operations, unsolicited mail wastes staff time and money. You can take action to reduce junk mail at work and at home.

AT WORK

Write "JUNK MAIL" on any unwanted mail you receive then interoffice it back to the mailroom. Mail Services staff will return the mail to the distributors or contact them to remove your name from their mailing list.

AT HOME

Get your FREE Stop Junk Mail Kit which includes letter templates to major mailing clearinghouses and other resources for reducing your unwanted mail. Go online to *www.StopJunkMail.org*, e-mail *info@recyclestuff.org* or call the Santa Clara County Recycling Hotline at (800) 533-8414 for a kit.

The City of Sunnyvale has joined other Bay Area cities, counties and businesses that are working together with The Bay Area Recycling Outreach Coalition (BayROC) to save our national resources by sponsoring the Stop Junk Mail campaign.

037512

Keeping the Creeks and Bay Clean

Residential remodeling and weekend construction projects can affect the water quality in our local creeks and South San Francisco Bay. When materials and waste from home improvement projects are not handled properly, chemicals, sediment and debris can enter our creeks and bay through the City's storm drain system, and can harm fish and other aquatic life.

The City of Sunnyvale has developed a handy card system, to help staff be on the lookout for storm water pollution while traveling around Sunnyvale. The *Illegal Connection/Illegal Discharge* (IC/ID) response card lists specific phone numbers for employees to call to report potential problems or illegal discharge. Be ready to report your name, the address, nearest cross street and any other information that may help locate the problem. Watch for the following violations:

- Disposal of any wastes directly into a storm drain.
- Muddy water, oil, or any other chemicals flowing from a residential, business or construction area into storm drains.
- Construction materials stored too close to the street, gutters, or storm drains. Materials or piles of excavated soil should be covered with tarps to prevent pollution from storm water runoff if it rains.

- Residents or contractors hosing down dirty pavement, construction tools or paint supplies, and allowing the runoff to flow to the gutter and storm drain.

By working together, we can minimize the pollution that construction and home remodeling projects send through the storm drain system to our creeks and bay.

To obtain an IC/ID card, e-mail **Kristy McCumby** at *kmccumby@ci.sunnyvale.ca.us.*

ENVIRONMENTAL OUTREACH

Disposal Rules Change for Fluorescent Lamps and Tubes

New Rules Effective February 9, 2006

California's newest Universal Waste Rule took effect on February 9, 2006. What this means is that household fluorescent lamps and tubes and other universal waste can no longer be placed in the garbage.

Some may ask, "What is universal waste, and what types of products are they talking about?" Typical items needed by people to maintain their households such as batteries, thermostats, fluorescent lamps and tubes, consumer electronic devices and cathode ray tubes (CRTs) are common products that usually contain small amounts of mercury, and therefore are designated as universal (hazardous) waste. When improperly disposed of, hazardous waste products can pollute the environment.

Be aware that the new regulation covering disposal of products containing hazardous waste will affect all households. After February 9, 2006, the items mentioned above can no longer be discarded into the trash and sent to the local landfill. Employees who live in Santa Clara County (except Palo Alto and Sunnyvale) should call their Household Hazardous Waste Program at (408) 299-7300 or visit: www.hhw.org for disposal information. Those who live in Sunnyvale can visit www.sunnyvalerecycles.org or call (408) 730-7262 for disposal information. Palo Alto residents can call (650) 496-6980 or visit: www.city.palo-alto.ca.us/hazwaste/househaz.

ENVIRONMENTAL OUTREACH

RECORD RAINFALL

Some good news - Some bad news

Want to hear good news? The good news is that the record-breaking rainfall we experienced this season along the West Coast produced bountiful groundwater storage. What could possibly be the bad news? Well, the record-breaking rainfall may have also stirred up a variety of water quality problems. Nonstop rainstorms have likely drained increased amounts of pollutants such as pesticides, fertilizers, automobile fluids, sediment and trash into storm drains that flow directly to our local creeks and San Francisco Bay. Did you know that the San Francisco Bay is a catch basin of polluted runoff water from approximately 40 percent of California? Other interesting facts and statistics include:

Trash is one of the most obvious pollutants in San Francisco Bay. During Coastal Cleanup Day in 2005, volunteers pulled 200,000 pounds of trash out of Bay Area streams and the Bay.

ENVIROFLASH: How long does it take for garbage to break down?

>Plastics take 500 years
>Aluminum cans take 500 years
>Organic materials take six months
>Cotton, rags and paper take six months

Car Pollutants – regular people contribute more motor oil into waterways than oil tankers do. In the Bay Area, people spill, dump or leak a total of three million gallons of oil a year into San Francisco Bay.

ENVIROFLASH: More than 500 species of wildlife live in the Bay. Car pollutants are toxic and can disrupt their natural habitats. Oil can contaminate and smother animals and plants.

Pet Waste – Pet waste left on the ground can wash into storm drains, carrying bacteria and contaminants into the Bay, degrading water quality and potentially harming fish, wildlife and people.

ENVIROFLASH: In San Francisco, dog and cat waste accounts for four percent of the waste stream. San Francisco is currently studying ways to produce power from the waste.

A recent poll indicates that 81 percent of Bay Area residents think pollution from runoff entering our storm drains is an increasing problem. Now, residents must commit to being part of the solution and take simple actions to protect the Bay. What can you do?

On **Friday, May 12th,** see Sally in Environmental Outreach. Suggest a simple water pollution prevention practice and win a special prize.

sally

Recycling Guide for Consumer Electronic Devices, Batteries and Mercury-Containing Products

The State of California has recently expanded its hazardous waste rules. As a result, a number of items commonly disposed by residents are banned from being placed in the trash for disposal. Most notably, virtually any electronic device that contains mercury or that has a battery or circuit board is considered hazardous. These products often contain heavy metals like lead, copper, mercury, and chromium. When not disposed of properly, these hazardous waste products can pollute the environment.

The resources listed below are located in Sunnyvale. Call to verify this information is accurate and for location.

Finally, unless you are sure a product is not hazardous, you should presume these types of electronic devices need to be either recycled or disposed of as hazardous waste, not thrown in the trash. If you have questions, call the Sunnyvale Recycling Program at (408) 730-7262 or look up the item at www.sunnyvalerecycles.org by clicking the "Recycling Resources" link.

Revised 2-9-06

Robert Gallo - Batteries, Fluorescent Lights and Electronics Recycling

From: Julie Benabente
To: Sunnyvale City Staff
Date: 3/9/2006 7:33:12 AM
Subject: Batteries, Fluorescent Lights and Electronics Recycling

A Word From ReSource
The City Employees Recycling Program

California's rules regarding hazardous wastes changed on Feb. 9, 2006 expanding the list of items, originally exempted, that must now be handled as a hazardous waste. **As of Feb 9, 2006, it is illegal to throw the following items in the garbage:**

- Fluorescent, high intensity discharge, neon, mercury vapor, high pressure sodium and metal halide lamps
- Batteries (all types)
- Consumer electronic devices, basically any item with a battery or circuit board (e.g. computers, printers, VCRs, stereos, copiers, telephones, cell phones, radios, digital cameras, microwaves)

Below is information on how to handle these items as a City employee and as a resident.
In City operations....

- Fluorescent lamps/bulbs should continue to be recycled through the City's existing recycling program. These items contain mercury, please do not break them or place them in the garbage.
- Batteries should continue to be recycled through the City's existing recycling program. When the gray battery bin in your area is full, place the batteries in an envelope or box and send them interoffice mail to Central Stores for processing. To find a battery recycling location near you, please visit the Employee Recycling Website.
- Consumer electronics used in City operations should be returned to IT for handling. Small electronic items like a mouse, keyboard, PDA, cell phone can be sent to IT via interoffice mail. For larger electronics, contact the IT HelpDesk at x7555 to request a pickup. The standard turnaround time for this service is 20 working days after receipt of the request.

As an individual....

- Residents in Santa Clara County can dispose of these wastes through various means including the County's regularly scheduled hazardous waste drop-off events. If you are a Sunnyvale resident, visit www.sunnyvalerecycles.org (click on "Recycling Resources") for your disposal/recycling options.
- Those living outside of Santa Clara County should contact their city for disposal options.

For additional information on the rule, you can visit the Department of Toxic Substances Control's Universal Waste website at www.dtsc.ca.gov/HazardousWaste/UniversalWaste, email uwaste@dtsc.ca.gov or call them at 1-800-728-6942.
- Julie

Sally Personett - Earth Day Workshops: April 17 - 19

From: Julie Benabente
To: Sunnyvale City Staff
Date: 4/13/2006 12:33 PM
Subject: Earth Day Workshops: April 17 - 19

In honor of **Earth Day** (April 22), the City is sponsoring the following workshops at the Sunnyvale Library, Program Room, 665 W. Olive Ave.:

- **Protect Your Water by Preventing Water Pollution**
  Mon., April 17, 7 - 8:30 pm
  Learn about watersheds, water pollution sources and good habits to prevent water pollution.
- **Greening Your Home: Materials & Strategies**
  Tues., April 18, 7 - 9 pm
  Learn about green building materials and energy-saving appliances.
- **Choosing Cloth for Your Child**
  Wed., April 19, 2:30 - 3:30 pm
  Find out about using cloth diapers for your child.
- **Cleaning Green**
  Wed., April 19, 1 - 2 pm (also at the Community Center Neighborhood Rm. on April 19, 7 - 8:30 pm)
  Come hear Annie B. Bond, author of "Clean & Green", talk about non-toxic alternatives to cleaning, pest control and other home-care products.

Additional details are on the attached flyer.

City of Sunnyvale

FY 05 - 06 Annual Report

Attachment H

Pesticide Management Activities

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment H – Control Program for Pesticides
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Control Program for Pesticides						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to track OP pesticide usage and other pesticides identified as creating potential water quality problems on City-owned property. Report types and quantities used in Annual Report for the previous calendar year. Track the top five pesticides used (in quantity) by the City and report quantities and locations used.	See Table 1 in this attachment for the report on OP and top 5 types of pesticides used on City-owned property calendar year 05. Information for calendar year 06 pesticide usage is still being collected.	Annually Report 09/06	Kristy McCumby Env. Spec.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Hold annual training for Parks Division to educate staff regarding pesticide and turf product applications, Integrated Pest Management Policy, and irrigation water run off	An 8-hour Parks staff training on IPM related topics was completed on 3/30/06 (See Attachment M for details).	11/06-4/06 Report 09-06	Curtis Black, Superintendent of Parks
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Train other staff who apply pesticides as a regular part of their job duties as to the requirements of the Plan and Policy. Provide information and training on the contents of the plan to all City employees	Training on the City's IPM policy and some new IPM options was provided on 3/30/06 to Parks staff. Training for Public Works staff occurred on February 28, 2006. (See Attachment M for details). A copy of the presentation is available upon request.	Annually Report 09/06	Kristy McCumby Env. Spec.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Modify Pest Control Vendor's contracts with the City as they come up for renewal, to include requirements that they 1) Follow the City's IPM Plan/Policy, BMPs and SOPs. 2) Provide evidence of current IPM training for contractor employees working on City property. 3) Contractors to annually provide copies of State of California Monthly Summary Pesticide Use Report (Form PR-ENF-060 Rev. 4/92) to City staff responsible for their contract management.	No new contracts for Parks and Rec. were issued FY05-06. • Current Structural Pest Control contract includes requirements that the contractor follows the City's IPM policy requirements. • Staff provide contractor with IPM training opportunity information when it becomes available. • Contractor provides information to City staff regarding types and quantities of pesticides used in city-owned buildings, as well as IPM actions.	Annually Report 09/06	Kristy McCumby Env. Spec. and Elaine Wesely, Finance Manager

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment H – Control Program for Pesticides
Municipality: Sunnyvale

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Inform new leaseholders of the City's IPM policy	An informational flyer about the City's IPM policy was provided to the City's Property Manager for distribution. Nine new leaseholders were provided with the information in FY 05-06	Annually Report 09/06	Kristy McCumby, & Mike Chan, City Property Manager
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Document training of all city staff who applies pesticides to ensure compliance with training requirements established by the County Agriculture Commissioner and the State Department of Pesticide Regulation. Provide annual training to staff who apply pesticides on the City's Pest Management Plan, IPM Policy, SOPs, BMPs, and the latest IPM techniques appropriate to the pests	Training on the City's IPM policy, as well as IPM techniques for Public Works, Golf, and Parks staff is included in Attachment M. Public works had 13 staff members, Golf and Parks had 70 receive City-sponsored training on the IPM – policy requirements.	Annually Report 09/06	Lead: Kristy McCumby Env. Spec. Support: Bill Fosbenner, Sr. PW Supervisor and Curtis Black, Parks, Sup
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Document training on the City's IPM Plan/Policy for staff who do not apply pesticides and on the prohibition for use of over-the-counter pesticides by untrained staff in and around the workplace (consistent with the City's IPM Plan/Policy). Report on activities/ numbers reached in Annual Report.	Information on the City's IPM policy was provided as a portion of the Environmentally Preferable Purchasing Policy Training that was done at staff meetings in each of the City's departments and divisions in FY 05-06. It is estimated that over City 200 staff participated in this direct training.	Annually Report 09/06	Kristy McCumby Env. Spec. Support: Sally Personett, Environmental Outreach Coord.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Evaluate effectiveness of training. Report on progress in Annual Report.	• As reported in the Attachment I, for Mercury Pollution Prevention/EPP policy training activity, a survey was taken of those who attended the EPP presentations and they generally found the information useful. • Other mechanisms for evaluation include the collecting of data and reporting of information required as part of the annual report. If staff is able to provide the information required, then they are implementing the Policy.	Annually Report 09/06	Kristy McCumby Env. Spec.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment H – Control Program for Pesticides
Municipality: Sunnyvale

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Conduct annual citywide search of chemical storage areas for pesticides that are no longer legal for application per EPA, State, and/or local requirements. Properly dispose of any such pesticides pursuant to appropriate waste disposal regulations.	• Public Works Boulevard and Landscaping Division completed their inventory this year and were able to send a shipment of unused pesticides/ herbicides as well as those no longer legal for application for proper disposal. • Parks and Rec. Department did not have any pesticides in storage that are no longer legal for application this year.	Annually Report 09/06	(Report) Kristy McCumby, Env. Spec. (Support) Bill Fosbenner, PW, Curtis Black (Parks & Rec.)
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to assist with local implementation of the Watershed Education and Outreach (WE&O) Campaign by dispersing literature, by providing articles and ads for media release about less-toxic pest control methods and the proper disposal techniques. Support Program events in coordination with Watershed Watch...	Outreach has been active both in the local implementation of the WE&O Campaign and in support of Program events by: • Writing and publishing articles • Advertising on community cable TV, theater screens, and utility bills • Exhibiting at Sunnyvale events and volunteering for Program events • Presenting IPM theory to youth through demonstrations, discussions and activities See Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 05-06.	Annually Report 09/06	Sally Personett, Environmental Outreach Coordinator
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Update City's web page as needed with information on the City's IPM Plan and Policy. Also, include updates on IPM techniques for pests as they become available.	Information regarding the City's IPM Plan and Policy and general IPM techniques is posted for public review to the Water Pollution Control Plant web page and is reviewed and updated as needed.	Annually Report 09/06	Sally Personett, Environmental Outreach Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment H – Control Program for Pesticides
Municipality: Sunnyvale

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to provide at least one story on IPM practices/ successes and/or the City's Pest Management Plan and IPM Policy to local newspapers and/or citywide newsletters.	Articles regarding the City's Pest Management Plan, as well as general IPM practices were published in: • The Harbinger, the Sunnyvale employee newsletter. • A community announcement in the Sept/Oct 05 utility bill. See Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 05-06.	Ongoing Report 09/06	Sally Personett, Environmental Outreach Coordinator
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	1) Continue to assist with the local components of a "Pesticide User Outreach" as proposed by the program. Target residential and commercial users. 2) Based on recommendations from the Program's research reports and surveys of business pesticide usage, develop and implement education that will target specific businesses.	The City of Sunnyvale continues to assist the Program by implementing pesticide user outreach components locally, and by participating in business events, providing literature to retail stores and nurseries, and through advertisement in the Chamber of Commerce Business Directory. See Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 05-06.	Annually Report 09/06	Sally Personett, Environmental Outreach Coordinator
Prov. C.9.d	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to provide information on less toxic pest control (e.g., IPM techniques, municipal IPM policies, model contract language, and training opportunities) to neighboring special districts (e.g., open space districts, vector control districts, and school districts) as appropriate.	Promotion to special districts in Sunnyvale (school districts) was conducted by the Program in FY04-05. The City Parks Division has maintenance agreements for outside grounds with some schools within the City's jurisdiction. All pertinent laws are followed regarding posting, public notifications, and types of pesticides that are used.	Annually Report 09/06	Sally Personett, Env. Outreach Coordinator

Control Program for Pesticides (cont.)						
Prov. C.9.d	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Track and/or estimate the numbers of Sunnyvale residents and staff reached through outreach efforts (including advertising) regarding the City's IPM policy, pesticide use reduction, and related topics.	See Attachment H-Appendix 1-Table 2 for estimates of the number of Sunnyvale residents and City staff reached regarding the City's IPM policy, pesticide use reduction, and related topics.	Annually Report 09/06	John Pilger, Com Officer & Sally Personett, Env. Outreach Coordinator

2) Response to Regional Board Comments on Pesticide Management Activities section of FY 04-05 Annual Report:

No comments were received from the Regional Board on this section.

3) Summary of How Pesticide Usage has changed in FY 05-06.

The City continues to try to reduce, as much as possible, the use of pesticides containing Chlorpyrifos, as described in the Sunnyvale IPM Policy. The Public Works, Parks and Recreation Department, and Golf division continue to reduce their product inventories and try to order products on as a-needed basis as much as possible. Due to budget constraints, contracts for turf and grounds pest control and pesticide applications by contractors were not renewed in FY 05-06 with the exception of occasional use of a contractor for gopher abatement, as needed.

The City has one structural pest control contractor that handles all city building facilities. Information as to the types and quantities of structural pesticides applied is included in Table 1 of Appendix 1 at the end of this section.

Based on the data collected, OP (chlorpyrifos-containing) pesticide use is generally low, used only on occasion, and used only when other IPM methods have not provided results to address the problem infestation. As with all pesticides used, the label requirements are followed and care is taken to prevent any runoff that could enter a storm drain system. The use of pyrethroid based pesticides by structural pest control contractors has increased slightly or remained the same for the past three years. Many of the procedures used to control building pests are done using baits. Contractors are required to follow the City's IPM policy when addressing structural pests.

IPM methods are continually taught and implemented to Parks and Public Works staff. Some examples include:

- Wood chips/mulch usage.
- Irrigation controls – Continual monitoring, adjustment, and repair to prevent under or over watering, which are conducive to weed growth.
- Manual methods – Removal of weeds by hand using volunteers and seasonal staff.
- The City's continuing budget difficulties have an effect quantities of pesticides applied. Parks has had a 20% labor reduction since 2002, which has caused a greater use of chemicals, particularly in situations where manual removal of weeds had been used before. In other cases, the reduction in funds available for outside contractors has decreased the amount of pesticides applied.

City of Sunnyvale

Pesticide Use and Integrated Pest Management Policy Implementation in the City of Sunnyvale

Quantities of Diazinon and Chlopyrifos-Containing Compounds Applied:

- No pesticides containing Diazinon were applied on City of Sunnyvale Properties from 2001 through 2005
- In 2001 and 2002, two products that contained Chlorpyrifos were used by City staff in very small amounts. In 2003, no chlopyrifos-containing pesticides were used.
- In July of 2004, 1.5 gallons (45.1 oz of active ingredient chlorpyrifos) of Dursban Pro/Dow Chemicals were applied to putting greens at Sunnyvale Golf Course to treat for cutworms. While every effort was made to avoid using chemical treatments, there was really no alternative means to eliminate the cutworm problem. The cutworm levels were beyond a threshold to the point where the birds were destroying turf on the putting greens in their efforts to feed on the cutworms. While this is acceptable in other turf areas of the golf course it is unacceptable on

putting greens because it creates an uneven surface for play. The product was used at the recommended rates, sprayed it at night and watered in per label instructions. None of the greens are in locations where the product could runoff to other water sources.

- In 2005, 3.5 gallons total of Dursban Pro/Dow Chemicals (0.80 gallons of active ingredient, chlorpyrifos) were applied in May and August to the Sunnyvale Golf Course and in June to the Sunken Gardens Golf Course to treat for cutworm infestations on some putting greens. While every effort was made to avoid using chemical treatments, there was no alternative means to eliminate the cutworm problem. The cutworm levels were beyond an acceptable threshold and were to the point where the birds were destroying turf on the putting greens in their efforts to feed on the cutworms. While this is acceptable in other turf areas of the golf course it is unacceptable on putting greens because it creates an uneven surface for play. The product was used at the recommended rates, sprayed it at night and watered in per label instructions. None of the greens are in locations where the product could runoff to other water sources.

The use of chlorpyrifos-containing pesticides is very low and infrequent. The choice to use this pesticide is made only after the City's IPM policy is followed and there is specific written justification for its use by a Pest Control Advisor. The quantity and location of it's use depends on the specific need to control an insect problem.

Pesticide Removals:

- Annual searches of pesticide storage areas in Public Works, Parks and Recreation, and the Golf Course did not turn up any pesticides that were prohibited for current use. Some pesticides containing Diazinon, Dursban, and chlorpyrifos were found by Public Works staff that were no longer being used by trained staff in FY 04-05. These were disposed of in FY 05-06 as hazardous wastes, following all appropriate state and federal regulations.

Sunnyvale's IPM Policy:

- A copy of the IPM Policy that was placed in the City's Administrative Policy Manual (APM) and is available to all staff for viewing on the City's intranet website. It is also available to the public through the Water Pollution Control Plant website at http://wpcp.sunnyvale.ca.gov

- In FY 05-06, employees were provided with information on the IPM policy and the proper procedures for dealing with pest problems on site through presentations on the City's Environmentally Preferable Purchasing Policy provided at staff meetings in each City Department and Division. .

- Outreach to the City's trained/licensed pesticide application staff about the IPM policy continued in FY 05-06 (See Attachment M for staff training information.) Outreach continued to all City staff about the IPM policy presentations at all Department and Division staff meetings from September 2005 through January 2006...

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment H – Appendix 1 – Tables 1a-1m
Municipality: Sunnyvale

Contractors and the City's IPM Policy:

- Pest Control Companies who had contracts with the City to apply agricultural pesticides/herbicides to City properties in FY 01-02 and FY 02-03 did not use any Diazinon or Chlorpyrifos-containing compounds in calendar years 2001 – 2005. Due to budget constraints, contracts for Parks and Recreation agricultural pesticide/herbicide application contractors were not renewed for FY 03-04. Parks and Recreation certified pesticide applicators performed all applications to City-owned property themselves in FY 04-05 and FY 05-06. No contractors were engaged in FY 05-06 due to budget limitations.

- The City employs one structural pest control contractor, who is required to abide by the IPM policy in their contract that became effective July 1, 2003 and was renewed in 2005. Data on types and quantities of pesticides used in structural pest control activities from July 2003 – December 2003, and calendar years 2004 and 2005 are included in Table 1 above. The current structural pest control contractor uses a very limited number of "caution" labeled products and follows IPM practices such as monitoring and pest identification prior to application of a pesticide. Traps (e.g., glue boards) and bait stations are often used prior to any application of pest control sprays or granular materials to try to control a pest problem through less-toxic means.

- Copies of their IPM training received are kept on file and provided to the City upon request. Contractor staff received 7.5 hours of IPM training in 2005 offered by Santa Clara County at their annual conference.

IPM and City Property Leaseholders:

- Lease holders were notified of the City's IPM policy in 2003 by the City's property manager.

- A new property manager was contracted to manage City properties in August 2004. A flyer was prepared for the property manager to distribute to new leasees that provides information about the City's IPM policy and where information can be found about selecting less toxic options for pest problems.

- Flyer and information on City's IPM policy were distributed to 9 new leaseholders in FY 05-06.

Attachment H – Appendix 1 – Table 2
PI/P Pesticide Management Activities – Estimated Numbers Reached
FY 2005-2006 Annual Report
Municipality: Sunnyvale

Sunnyvale Targeted Outreach for the Pest Management Plan			
Pest Management Plan/Policy Implementation	Track and/or estimate the numbers of Sunnyvale residents and staff reached through outreach efforts (including advertising) regarding the City's IPM policy, pesticides use reduction, and related topics.	Sunnyvale Quarterly Report	The Quarterly Report contains a page devoted to information concerning the environment, and is mailed to approximately 60,000 Sunnyvale residents and businesses each quarter. Additionally, 2000 copies of the report are distributed to the Library, City Hall, Community Center, Senior Center, Public Safety and Columbia Neighborhood Center. The Quarterly Report is also posted on the City's web page. An article discussing safe disposal of pesticides was published in the winter 05 edition.
		Outreach to City staff through employee newsletters	An article regarding the City's IPM policy and pesticide pollution prevention was published in The Harbinger, the City's employee newsletter. The Harbinger is read by approximately 1000 Sunnyvale employees with access to a computer .
		Sunnyvale Utility Bill Insert	Three utility bill inserts advertising the City's IPM policy and general pesticides pollution prevention information were developed and mailed over a two-month timeframe to 30,000 households and businesses in Sunnyvale. Insert overruns are distributed at business and community events as IPM outreach material.
		Sunnyvale Farmers Market	Outreach has an IPM exhibit at the Sunnyvale Farmers Market once per month An assortment of literature and outreach collateral is displayed and offered to market-goers. Approx. 40-70 individuals visit the booth each month for IPM information during the more popular spring, summer, and fall market months.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment H – Appendix 1 – Table 2
PI/P Pesticide Management Activities – Estimated Numbers Reached
FY 2005-2006 Annual Report
Municipality: Sunnyvale

		Sunnyvale Schools Outreach	Sunnyvale uses the Enviroscape as a teaching tool for classroom presentations. The presentation focuses on watershed education and water pollution from urban runoff. Pesticides, beneficial insects, IPM and less-toxic lawn and garden care is introduced and discussed. Sunnyvale conducted 16 classroom presentations this school year, reaching a total of 421 students.
		Sunnyvale State of the City – 4th of July Celebration	July 05 – at this community event the Outreach exhibit focused on IPM, distributing IPM literature as well as other water pollution prevention information. About 1200 residents attended the event and approximately 60 adults visited the booth for information.
		Sunnyvale Pancake Breakfast	At this popular community event, Enviroscape presentations demonstrate water pollution from pesticides in urban runoff. The Outreach exhibit distributes IPM literature and discusses methods of water pollution prevention, reaching about 30 adults and 50 youth.
		Google Environmental Fair	An outdoor Environmental Fair was held on the Google campus in Sept. 05. Approx. 1200 Google employees attended, The Outreach exhibit included sewers and storm drain information, with a focus on water pollution prevention using IPM. About 40 Google employees visited the exhibit.
		KSUN Community Cable TV Ads	An IPM and pesticide pollution prevention ad aired on Sunnyvale's community cable TV this reporting year. KSUN advertising reaches about 13% of all cable subscribers in Sunnyvale. Of that 13%, viewers say they tune in to KSUN once or twice a month.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment H – Appendix 1 – Table 2
PI/P Pesticide Management Activities – Estimated Numbers Reached
FY 2005-2006 Annual Report
Municipality: Sunnyvale

		Earth Day	A watershed and water pollution prevention presentation was conducted during Earth Day week. The Enviroscape was used to demonstrate water pollution in urban runoff. Pesticides, beneficial insects, IPM and less-toxic lawn and garden care was introduced and discussed. Outreach at this community presentation included approximately 10 adults and 3 youth.
		Summer Camps	Outreach conducted (4) summer camp sessions this reporting year, focusing on water pollution prevention, less toxic gardening and beneficial insects. 196 youth between the ages of 6-9 were served through this activity.
		Community Workshops	Two community workshops were held this reporting year, reaching approximately 60 residents interested in composting, gardening and IPM techniques. • *Making Your Garden Less Toxic* • *What Your Gardener Can Do*
		Theater Advertising	An IPM ad was developed for viewing at the Mercado Theater complex in Sunnyvale. The :14 animated/audio ad was viewed by movie audiences (2) times during a 15 minute timeframe prior to every movie shown in the 20-theater complex. In the new reporting year additional messages will be developed.
		IPM via Sunnyvale Website	The City of Sunnyvale does not have the ability to count number of hits to the website.
		Sunnyvale ReNews Newsletter	This newsletter is mailed to approximately 29,000 single family residents and 24,000 multi-family residents twice per year. An additional 500 copies are printed and distributed from various locations. The newsletter addresses typical pollution prevention concerns with a focus on reduce, reuse, and recycle. Proper disposal of pesticides through HHW was posted as a reminder to residents in the spring 2006 edition.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment H – Appendix 1 – Table 2
PI/P Pesticide Management Activities – Estimated Numbers Reached
FY 2005-2006 Annual Report
Municipality: Sunnyvale

		Columbia Health and Safety Fair	The outreach booth distributed water pollution prevention literature and conducted 8 Enviroscape presentations, informing youth and adults about urban runoff and how storm drains carry pesticides to the Bay. Approximately 80 youth and 50 adults visited the exhibit.
		Advertisement in the Sunnyvale Chamber of Commerce Business and Residential Directory	A new edition was distributed in January 06. 10,000 copies are mailed to Chamber members, businesses, and newcomer residents, and are available at distribution kiosks throughout the city.
		Creek Education Program	The creek and storm drain pollution prevention and education program provides urban runoff, water pollution prevention, stormwater, and water conservation information to Sunnyvale students attending 3rd grade at schools in the Cupertino School District. 150 Sunnyvale students participated in the program this reporting year.

City of Sunnyvale

FY 05 - 06 Annual Report

Attachment I

Mercury Pollution Prevention Activities

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment H – Control Program for Mercury
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Control Program for Mercury					
Hg Work Plan I.A	Mercury Plan Development	Permit Prov. C.9c	Sunnyvale staff to continue to work with SCVURPPP Mercury Pollution Prevention Plan work group	Staff continues to participate in the Program's Mercury Pollution Prevention Outreach group meetings. Staff attended two meetings and provided reviews and comments on outreach publications, posters, and region-wide activities.	Ongoing Report 09/06	Kristy McCumby Env. Specialist
I.D &, I.F	Mercury Plan Implementation	Permit' Prov. C.9c	Sunnyvale Mercury Work Group to continue to meet and determine how Program-provided guidelines for the "virtual" elimination of mercury in urban runoff will be implemented to address controllable City sources.	• A focus this year was to provide small group outreach to as many City employees as possible. Working with staff from the City's Solid Waste Program, a Power Point presentation was developed and taken to a majority of the Department/Division staff meetings that occurred from September 2005 through January 2006. The presentation covered the City's Environmentally Preferable Purchasing Policy and a part of the Policy's implementation that focused on the hazards associated with mercury-containing products. Information was provided on alternatives to mercury-containing products and how they should be used when ever feasible. Information about the proper handling and recycling of fluorescent lamps and other mercury-containing materials was also provided. Presentations reached in excess of 200 city staff, many of whom were at the manager/ supervisor level.	Ongoing Report 09/06	K. McCumby & Sunnyvale Mercury Work Group (PW, Parks and Rec., Admin. Serv, Public Safety reps.)

I.D &, I.F	Mercury Plan Implementation (continued)			• A secure storage area in the Corp. Yard was designated for spent street lamps scheduled for recycling. Some fluorescent lamps from Field Services outside facilities were also brought here and stored. Onyx Electronics was again the contractor charged with disposing and recycling the lamps, in accordance with applicable laws and regulations. • Parks and Rec. and Facilities Management staff also collected fluorescent lamps for recycling. A portion from Facilities Management was sent to the SMaRT station for recycling and others were collected for shipment to a recycler. Spent lamps are stored at the Corp Yard and a shipment has not been sent to the recycler this fiscal year. • Staff completed the brochure "Is Mercury Hiding in Your Construction or Demolition Project" for distribution at the One-stop Counter for building/ demolition permits by Community Development staff. The new brochure is included in Attachment I Appendix 1.		
I.F & MM 1	Mercury Plan Implementation	Permit Prov. C.9.c	Continue improving current recycling programs for fluorescent lamps and Hg-containing products, as needed. Other products (e.g., thermometers/thermostats) may be included as appropriate to a particular City Department.	Staff continued to work with Corp Yard, Parks and Rec, and Facilities Management to educate and promote proper handling and recycling of mercury-containing products. As part of the outreach on the EPP policy, groups such as Fleet and Park Maintenance were given additional information on mercury-containing products and their alternatives.	Ongoing Report 09/ 06	Kristy McCumby, Environmental Specialist & Sunnyvale Mercury Work Group

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment H – Control Program for Mercury
Municipality: Sunnyvale

Control Program for Mercury (cont.)						
II.B	Mercury Plan Implementation	Permit Prov. C,9.c	Continue with existing Hg-containing product disposal services offered through the City's Household Hazardous Waste collection program, through support of the Santa Clara County HHW program.	The City continues to support the County HHW program. In FY 05-06, $246,000 was budgeted for disposal of HHW by Sunnyvale residents. This year the HHW program may have to pay for an additional $12,000 to $20,000 overage due to a surge, late in the fiscal year in participation in the program by Sunnyvale residents.	Ongoing Report 09/ 06	Kristy McCumby, Env. Spec. and Rich Gurney, HHW
II.C	Mercury Plan Implementation	Permit Prov. C.9.c	Annually document quantities disposed or recycled by the City divisions/ departments.	The quantities of mercury-containing wastes collected and recycled by the City are included in Table 1 of this Attachment.	Ongoing, Report 09/06	Kristy McCumby, with support from Larry Iaquinto, Jim Craig, & Curtis Black and Rich Gurney
II.C	Mercury Plan Implementation	Permit Prov. C.9.c	Collect and report information on quantities of fluorescent lamps collected by City HHW collection program at the SMaRT Station from residential customers. Provide this information to the Program, as needed, to add to County data for HHW collected from residents and CESQG business collection programs.	The City continues to collect and properly dispose of HHW through support of the County's program. Information as to the quantity of materials collected or recycled by the City is presented in Table 1 of this Attachment. The numbers of lamps recycled are approximate, based on an estimate of 0.6.bs/lamp. The lamp quantity recycled was reported in lbs of lamps from the SMaRT Station, so the number of lamps that weight represents was calculated. Information about the quantity of mercury-containing wastes collected and recycled by the County is available from SCVURPPP section on Mercury Plan Implementation or the County HHW program.	Ongoing Report 09/06	Kristy McCumby Env. Spec. and Rich Gurney, Recycling Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment H – Control Program for Mercury
Municipality: Sunnyvale

Control Program for Mercury (Cont.)						
II.F	Mercury Plan Implementation	Permit Prov. C.9.c	Continue working with regional HHW programs to develop and help publicize fluorescent lamp and other mercury-containing mercury.	Sunnyvale continues to support regional HHW activities that develop and publicize messages about mercury pollution prevention. • Sunnyvale is a participating and contributing member of the Mercury Ad Hoc Task Group. • In collaboration with HHW and Program agencies, Sunnyvale participated in the development of mercury pollution prevention materials by reviewing, editing and finalizing outreach collateral. • Outreach developed and published mercury pollution prevention materials such as articles, theater ads, utility bills, community cable TV ads, and staff emails publicizing safe disposal of mercury products through HHW. • Sunnyvale attends community, business, and school events to promote safe disposal and distribute literature regarding pollution prevention from mercury containing devices. • At community events in Sunnyvale, the recent brochure developed by HHW *What You Don't Know about Mercury and Universal Waste Could be Harmful to You* is distributed to residents. • See Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 05-06.	Ongoing Report 09/06	Sally Personett, Env. Outreach Coordinator & Rich Gurney, SW Recycling Coordinator

Santa Clara Valley Urban Runoff Pollution Prevention Program

Attachment H – Control Program for Mercury
Municipality: Sunnyvale

Control Program for Mercury (Cont.)						
III.A	Mercury Plan Implementation	Permit Prov. C.9.c	Continue financial support of Regional Monitoring Program through SCVURPPP funding.	Sunnyvale continued to provide financial support of the RMP through SCVURPPP funding. See the Program's section of the Annual Report for a discussion on RMP financial participation.	Ongoing Report 09/06	Lorrie Gervin, Env. Div. Mgr.
IV.C	Mercury Plan Implementation	Permit Prov. C.9.c	Support and participate in the implementation of the WMI Watershed Action Plan.	Sunnyvale staff continued participation in the WMI activities in FY 05-06 as related to implementation of the prioritized work plan and action list for the WMI as determined in August 2005. (See http://www.scbwmi.org/org-chart.htm for a list of the prioritized actions.) Sunnyvale provided staff time to participate in several of the subgroups such as Land Use Subgroup, Watershed Assessment and Monitoring Sub Group, and the Indicators Work group that helped to implement the prioritized actions.	Ongoing Report 09/06	Lorrie Gervin, Env. Div. Manager
V.A.3	Mercury Plan Implementation	Permit Prov. C.9.c	Pretreatment Inspectors will continue to integrate distribution of Mercury Outreach materials and provide outreach to industries and businesses when doing routine inspections of facilities for source control measures	• Pretreatment Inspectors continued to distribute outreach brochures titled, "Preventing Mercury Pollution: Information for Small Businesses", to commercial and retail customers during inspections in FY 05-06. • In addition, during annual Dental office inspections, specific mercury / amalgam source control procedures are distributed as required Best Management Practices.	Ongoing activity Report 09/06	Sarah Schiedt, Inspector/ Pretreatment Program

Control Program for Mercury (cont.)						
V.B	Mercury Plan Implementation	Permit Prov. C.9.c	Document and evaluate each outreach activity, including the target audience and number of businesses and/or residents reached.	Each outreach activity relative to mercury pollution prevention is documented, (including numbers reached and target audiences) and is recorded in Attachment H-Appendix 1-Table 2 for PI/P Mercury Management Activities.	Annually Report 09/06	Sally Personett, Env. Outreach Coord.
V.C	Mercury Plan Implementation	Permit Prov. C.9.c	Assist with the project to determine local attitudes and behaviors to evaluate the success of the outreach efforts and saturation of outreach messages in coordination with the Watershed Watch Campaign Survey	The Watershed Watch campaign has not conducted a survey of local attitudes in recent years. When a survey is initiated, City staff will assist Watershed Watch in all aspects of survey activity, as directed by the Program.	To be deter-mined Report 09/06	Sally Personett, Env. Outreach Coord.

2) Response to Regional Board Comments on Mercury Plan Activities section of FY04-05 Annual Report:
No comments were received from the Regional Board on this section.

3) Summary of How Mercury-containing Product Usage and Handling Changed in FY 05-06

- Staff prepared a brochure "Is Mercury Hiding in your construction project?" for distribution at the Community Development counter to those coming in for demolition permits.
- Over 14 Environmental procurement policy presentations were given at city department staff meetings to educate staff about the City's policy and how the selection of non-mercury containing products fits in with that policy. The dangers improper handling and disposal of mercury-containing products were discussed. A brief written survey of those who received the training was done, and the results showed the power point training to generally be an effective tool for use with this audience.
- City Departments/Divisions continue to improve their individual recycling programs for fluorescent and other mercury-containing lamps. Outreach will continue to remind staff of the appropriate BMPs to use when collecting and recycling lamps.
- The number of lamps and mercury-containing devices shipped to recyclers continued to increase in FY 05-06 from amounts recycled in FY 04-05 and FY 03-04. See Table 1 in this section for details on quantities recycled by the City in FY 05-06. This is likely due to the loss of the household exemption for disposal of wastes in February 2006, as well as significant outreach efforts to get people and businesses to recycle lamps.

Municipality: Sunnyvale

Sunnyvale Targeted Outreach for Mercury Pollution Prevention Activities			
Mercury Management Plan/Policy Implementation	Track and/or estimate the numbers of Sunnyvale residents, staff, and businesses reached through outreach efforts (including advertising) regarding mercury pollution prevention, proper disposal and other related topics.	Sunnyvale Quarterly Report	The Quarterly Report contains a page devoted to information concerning the environment, and is mailed to approximately 60,000 Sunnyvale residents and businesses each quarter. Additionally, 2000 copies of the report are distributed to the Library, City Hall, Community Center, Senior Center, Public Safety and Columbia Neighborhood Center. The Quarterly Report is also posted on the City's web page. Articles regarding proper disposal of mercury products were developed and published in the Quarterly Report this reporting year.
		Outreach to City staff through e-mail promotion	Mercury pollution prevention messages were sent online via email to over 1000 Sunnyvale employees with access to a computer. A useful matrix tool describing correct disposal requirements for various mercury containing products was developed and sent via email to Sunnyvale answer point staff.
		Sunnyvale Utility Bill Insert	Two utility bill inserts, one for batteries and one for fluorescents, were developed this year for insertion in the Jan/Feb 06 utility bills. Utility bills are mailed over a two-month timeframe and reach approx. 30,000 households and businesses in Sunnyvale. Insert overruns are distributed at business and community events as mercury related outreach material.
		Sunnyvale ReNews	This newsletter is focused on reduce, reuse, recycle messages with additional focus on HHW. Two mercury articles were published in the ReNews this reporting year. The newsletter reaches 29,000 single-family residents and 24,000 multi-family units. An additional 500 copies are distributed to key locations throughout the city.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment I – Appendix 1 – Table 2
PI/P Mercury Management Activities – Estimated Numbers Reached
FY 2005-2006 Annual Report
Municipality: Sunnyvale

Mercury Management Plan/Policy Implementation	Track and/or estimate the numbers of Sunnyvale residents, staff, and businesses reached through outreach efforts (including advertising) regarding mercury pollution prevention, proper disposal and other related topics	KSUN Community Cable TV Ads	Two mercury pollution prevention ads were aired on Sunnyvale's community cable TV this reporting year. KSUN advertising reaches about 13% of all cable subscribers in Sunnyvale. Of that 13%, viewers say they tune in to KSUN once or twice a month.
		Sunnyvale Pancake Breakfast	The popular event draws over 1000 family members (both kids and adults). The Outreach exhibit distributes literature and discusses methods of water pollution prevention with residents and youth. Proper disposal of mercury products such as batteries and fluorescents was discussed. Approximately 30 adults and 50 youth visited the booth for information.
		Theater Advertising	An ad for proper disposal of fluorescents was developed for the Mercado Theater complex in Sunnyvale. The :14 animated/audio ad was viewed by movie audiences (2) times during a 15 minute timeframe prior to every movie shown in the 20-theater complex. In the new reporting year additional messages will be developed.
		The Sun (community newspaper)	The Sunnyvale Sun is a weekly community paper with a readership of approximately 42,320 and a circulation of 18,600. Additional copies are available at newsstands and distribution points throughout the City. An article advising the community about the new mercury disposal law effective in February was published.
		Poop Scoop	The Poop Scoop is the employee newsletter at the Water Pollution Control Plant, and the newsletter is read by approx. 65 employees. An article was published advising staff of the new mercury disposal law.

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment I – Appendix 1 – Table 2
PI/P Mercury Management Activities – Estimated Numbers Reached
FY 2005-2006 Annual Report
Municipality: Sunnyvale

Mercury Management Plan/Policy Implementation	Track and/or estimate the numbers of Sunnyvale residents and staff reached through outreach efforts (including advertising) regarding the mercury pollution, proper disposal and other related topics.	Harbinger – Sunnyvale employee newsletter	The Harbinger is the employee newsletter for City of Sunnyvale staff and is read by approximately 1000 employees with access to a computer. An article advising City staff about the new mercury disposal law was published in the Mar/Apr 06 edition.
		Sunnyvale websites Press Release	A press release informing the community about the new law regarding proper disposal of fluorescents was posted to the City of Sunnyvale website. The City of Sunnyvale does not have the ability to count number of hits to the website.
		Google Environmental Fair	An outdoor Environmental Fair was held on the Google campus in Sept. 05. Approx. 1200 Google employees attended, The Outreach exhibit included sewers and storm drain information, with a focus on water pollution prevention. Among the literature distributed was information about proper disposal of mercury-containing products. About 40 Google employees visited the exhibit.
		Business Recycling and Solutions Newsletter	An article was published to advise Sunnyvale businesses of new legislation requiring safe disposal of mercury products. This business newsletter reaches approx. 1600 businesses in Sunnyvale.

037555

Disposal of Mercury-Containing Wastes

In California, it is illegal to dispose of fluorescent tubes or other lamps or devices that contain mercury into the trash. Prior to renovating or demolishing buildings, all fluorescent tubes, bulbs or lamps should be removed, packaged to prevent breakage and then recycled. All other equipment, appliances or devices that contain mercury should also be segregated so that the mercury switches or thermostats can be removed by a trained professional.

Disposal Options:

- ***Sunnyvale Residents*** can bring fluorescent lamps/bulbs and mercury-containing thermometers, probes, and thermostats to the SMaRT Station at 301 Carl Road, 7-days a week from 8 AM—5 PM. Residents may also dispose of their other mercury-containing items at the monthly Household Hazardous Waste Drop Off event in Sunnyvale. Call the Sunnyvale Recycling program at (408) 730-7262 or visit **www.sunnyvalerecycles.org** for Drop Off Event dates and other details.

- ***Santa Clara County Businesses (with less than 27 gallons or 220 lbs of hazardous waste per month)*** may bring mercury-containing wastes such as fluorescent lamps/bulbs, switches, probes or thermostats to the Santa Clara County's Business Hazardous Waste Program. Drop Off Events for businesses are held monthly in Sunnyvale and a fee applies. Contact the Program at (408) 299-7300 for details and to set up an appointment to drop off materials. More information can also be found at County's website **www.hhw.org**.
- ***Santa Clara County Businesses or Contractors (with more waste than the limits described above)*** must dispose of their mercury-containing wastes and other hazardous wastes through a licensed hauler/recycler. Contact the Santa Clara County Business Hazardous Waste Program at (408) 299-7300 for options. Some HVAC equipment wholesalers work with manufacturers to sponsor take-back programs for switches and thermostats. Contact your HVAC supplier for program details.

Why Should We Care About Mercury?

Mercury is a silver-colored heavy metal that is liquid at room temperature. It is toxic to humans and animals if inhaled, absorbed through the skin, or ingested in very small amounts.

Mercury is released when fluorescent lamps, mercury switches, or other mercury containing devices break, are placed in the regular trash, or are incinerated with solid wastes.

Mercury pollution in our lakes, rivers, and coastal waters comes from many sources, including the improper handling and disposal of mercury-containing wastes.

For more information about reducing mercury in products purchased or existing products that may contain mercury, contact the

Environmental Division, Public Education Program

at the address listed below:

City of Sunnyvale
Water Pollution Control Plant

1444 Borregas Ave
P.O. 3707
Sunnyvale, CA 94088-3707
Phone: 408-730-7260
FAX: 408-747-1139

Is Mercury Hiding in Your Construction or Demolition Project?

What You Can Do to Help Reduce Mercury Pollution Sources

Products That Contain Mercury

Lighting Equipment Sources:

All fluorescent tubes, compact fluorescent lamps, mercury vapor, high pressure sodium, metal halide lamps, neon lights, and backlit Liquid Crystal Display (LCD) devices contain mercury. High Intensity Discharge (HID) lamps such as high-pressure sodium and metal halide lamps also contain mercury. However, using energy efficient/high light output fluorescent lighting, LCD, and HID lamps has benefits that outweigh their potential pollution impacts. When replacing lamps in an existing building or preparing a building for demolition, the proper handling and disposal of the lamps, tubes, and bulbs is essential to prevent the release of the mercury present in them.

Recommendations for lamp handling and removal:

- ***Do not intentionally break or crush lamps. If they do break, carefully pick up debris and store in an airtight bag until ready for disposal.***
- ***Store them in a rigid protective container (e.g., heavy cardboard box) and label as Universal Waste with the date accumulation began.***
- ***Do not dispose of them in the trash.***
- ***See back panel of this brochure for disposal options***

Switches and Thermostats:

Electrical switches and thermostats found in heating, ventilation and cooling systems (HVAC), reed relays, boilers, older small electronic devices, electric warming devices, wall thermostats, "silent" wall-mounted light switches manufactured before 1991, and other equipment with electrical switches may contain mercury. If there are materials or devices that contain mercury in them, then they need to be removed prior to building demolitions or renovations and should be disposed of as Universal Wastes.

Tilt Switches:

Mercury tilt switches are used in clothes washers to shut off spin cycles when the cover is opened. Similar types of switches turn on lights in the lids of chest freezers or turn off electric space heaters if they tip over. Mercury is also used in float switches to turn sump pumps on and off, depending on the level of the liquid present.

Thermostat Probes:

Mercury-containing thermostat probes (also known as flame sensors) are found in older gas-fired appliance that have pilot lights. These include ranges, ovens, clothes dryers, water heaters, furnaces, or space heaters. They are usually present as a part of the safety valve that prevents gas flow if the pilot light is not lit. Thermostat probes may also be part of the main temperature-controlling gas valve. The metal flame sensor consists of a metal bulb and thin tube attached to a gas-control valve.

If you have questions about the mercury content of a thermostat probe, contact the product manufacturer to obtain information, as non-mercury thermostat probes may also be used.

Recommendations for handling and removal:

- ***For existing equipment consider labeling all mercury-containing parts with bright tags so proper measures can be taken if breakage occurs and mercury is released or when equipment must be replaced or discarded.***
- ***When removing switches or thermostats for either replacement or disposal, keep the unit as a whole, if possible. Trying to separate parts may cause breakage and a release of mercury.***
- ***Store in a tightly-covered rigid container and label as Universal Waste with accumulation start date.***
- ***See back panel of this brochure for disposal options***

Alternatives to Mercury Switches and Thermostats:

Today, there are many new electronic versions of switches and thermostats that are available for consumers. Choose mercury-free devices as replacements whenever feasible to help reduce mercury releases to the environment and avoid costly disposal expenses often associated with products that contain mercury.

City of Sunnyvale

FY 05 - 06 Annual Report

Attachment J

Copper Action Plan/Nickel Action Plan

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment J – Copper/Nickel Baseline Activities
Municipality: Sunnyvale

P.S. Id.	Activity	CI Item Source	FY 05-06 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Copper/Nickel Baseline Activities					
CB-1 (1 &4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	Continue to inform the public by distributing materials, brochures, and other information at city offices, public places, and events. Continue to inform the public through on-site presentations. Promote methods to reduce copper discharges from vehicle washing by placing articles or ads in various media (e.g., the Quarterly, KSUN, City website, theater ads and utility bill inserts.)	Actions taken for outreach related to vehicle washing operations are: PUBLIC Outreach At the following community events, Enviroscape presentations demonstrated storm drain pollution from washing cars in driveways • Sunnyvale Pancake Breakfast • Columbia Health and Safety Fair • Earth Day Workshop MEDIA Outreach -*Utility Bill Inserts* The "Healthy Habits for Clean Water" utility bill insert advised residents to avoid getting soapy water in the storm drain by washing car on unpaved surface. - *KSUN Community Cable TV* An advertisement advising residents about water pollution from car washing ran on KSUN during National Pollution Prevention Week. YOUTH Outreach - *Schools* Outreach presented the Enviroscape demonstration to 16 classes in Sunnyvale Elementary Schools. A large portion of the demonstration is storm drain pollution from washing vehicles in driveways. - *Summer Camps* At the Summer Camps, Enviroscape demonstrations presented storm drain pollution from washing vehicles in driveways. - *Creek Education Program* This creek and storm drain education program teaches 3rd graders about pollution in creeks from urban runoff	Ongoing Report 09/06	Sally Personett PW Env. Outreach Coord.

Attachment J – Copper/Nickel Baseline Activities
Municipality: Sunnyvale

Copper/Nickel Baseline Activities cont.						
CB-1 (1 &4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	Require source control measures for Group 1 (and Group 2 projects after the implementation date) new and redevelopment projects that conduct vehicle/equipment washing and maintenance activities (Consistent with Provision C.3.k)	• The City adopted the C.3 measures into the City Ordinance (SMC 12.12.60. Pretreatment Inspectors continue to review all C.3 projects currently in progress. At this time, no projects subject to C.3 provisions conduct vehicle/equipment washing other than those activities as described in their respective Storm Water Pollution Prevention Plans. No design plans have been received that would provide for ongoing vehicle/equipment washing onsite. If plans are received, vehicle wash water would be required to be plumbed to the sanitary sewer, with appropriate pre-treatment. • Conditions of Approval (COAs) will be considered for vehicle washing operations for new and redevelopment projects that add or replace 10,000 sq ft of impervious area. These will be incorporated as COAs for projects as determined appropriate by CDD and Pretreatment staff at project review committee (PRC) meetings.	Ongoing Report 09/06	Jamie McLeod, Assoc. Planner & Dustin Clark Ind. Waste Insp.
CB-1 (2 & 4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	• Continue to inspect commercial/ industrial facilities that have vehicle washing activities occur on site (this includes auto-related businesses). • Ensure BMPs for vehicle washing are employed. • Provide an effectiveness evaluation of inspection/compliance with BMPs. • Continue to inspect vehicle-washing areas for City vehicles at the Corp Yard.	• Pretreatment Inspectors inspect all automotive facilities every two years to ensure BMPs related to automotive activities are performed. • Currently, effectiveness is based upon violations issued and complaint responses. • The Corp Yard has applied for and received recognition as a Green Business for their efforts to minimize waste streams and adhere to Best Management Practices.	Ongoing Report 09/06	Dustin Clark, Ind. Waste Insp.

Attachment J – Copper/Nickel Baseline Activities
Municipality: Sunnyvale

Copper/Nickel Baseline Activities cont.						
CB-1 (3 & 4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	• Encourage new mobile cleaners and those who are renewing their certification to use the BASMAA website on-line mobile cleaner training and be recognized on the area wide certification list. • Continue to provide training (as needed) to new mobile cleaners. • Provide bi-annual re-certification training to cleaners who have already been certified, as needed. • Evaluate effectiveness of the training program and BASMAA on-line training. • Encourage municipal staff to use certified mobile cleaners when contracting for cleaning services. • Maintain records on who has been trained by City staff and report on numbers trained in the annual report.	• The Pretreatment Program continues to provide training for those interested in performing mobile cleaning services in Sunnyvale as requested. • With the introduction of the BASMAA website, individuals requesting training are referred to there for on-line training. • The effectiveness of the BASMAA on-line training has not been evaluated in this FY. City staff plans to work with SCVURPPP as the new Municipal Regional Permit is developed to determine if the mobile cleaner training program will need to be revised. • Facilities Management Division of the City has been informed of the certified mobile cleaners list and has been encouraged to select cleaners who have the BASMAA training. • Due to the BASMAA website, Sunnyvale staff does not maintain a list of certified cleaners. 26 firms from Santa Clara County have been certified by BASMAA and are listed on their website.	Ongoing Report 09/06	Dustin Clark, Ind. Waste Insp. And Kristy McCumby, Env. Specialist.
CB-3	Measures to control copper discharges to storm water from targeted industrial sources	Permit Prov. C.9.a (CAP)	• Industrial Waste Inspection staff will continue specific outreach to older printed circuit board manufacturers and metal plating facilities using copper (if any continue to do business in Sunnyvale) for inspections related to potential copper discharges into storm water. Distribute and discuss BMPs/information to minimize copper discharges. • Continue Industrial Inspection program, including NOI sites such as plating, metal finishers, vehicle service, and other permitted sites	• Industrial Waste Inspection staff continues to inspect and permit all metal plating facilities yearly based upon their regulatory category. • During inspections, BMP information is provided and a storm water inspection is conducted to identify any potential discharges. • Staff inspects NOI filers on a yearly basis and is typically part of the wastewater discharge permitting and inspection process.	Ongoing Report 09/06	Dustin Clark, Ind. Waste Insp.

FY 2005-2006 Annual Report
Attachment J – Copper/Nickel Baseline Activities
Municipality: Sunnyvale

Copper/Nickel Baseline Activities cont.						
CB-6/7	Reducing Traffic Congestion/ Promoting Alternative Transportation	Permit Prov. C.9.a (CAP)	Continue implementation of site design standards related to transportation to meet the requirement of C.3.j of the permit. Report on significant projects where traffic congestion reductions were included in design plans.	The Land Use and Transportation Element of the General Plan calls for reducing trip length. Through the Plan Review process, staff reviews the street layouts to ensure an efficient and smooth flow of traffic. Sunnyvale has prepared a comprehensive bicycle transportation plan and is in the process of developing a pedestrian opportunity study.	Ongoing Report 09//06	Jamie McLeod, Assoc. Planer & PW Engineering staff (to be determined)
CB-8	Measures to classify and assess watersheds and to improve institutional arrangements for watershed protection	Permit Prov. C.9.a (CAP)	• Address implementation of Hydromodification Management Plan in review of new and redevelopment projects after plan has been approved by the Regional Board. • Continue to review EIRs and complete CEQA reviews to ensure watershed protection is considered in CEQA actions. • Continue participation in SCBWMI activities as it implements the Watershed Action Plan. • Revise Sunnyvale's General Plan (Surface Water Sub Element), as needed, at the next scheduled update. Include recommendations based on the review of the Development Policies Comparison Project and Provision C.3.l of Order 01-119 as determined to be appropriate. • Continue participation in the Water Resources Protection Collaborative and implement guidelines and standards that are agreed upon by the group to the extent feasible and appropriate the City.	• The HMP and Key Elements identified by the RWQCB were adopted into the City's Storm Water Ordinance, SMC 12.60 in October 2005. Geographical areas of the City where HMP requirements apply, based on storm water drainage to Stevens Creek or Calabazas Creek (non-tidal influenced areas) were identified. • EIRs that have been reviewed by staff have included comments related to storm water control and watershed protection. CEQA checklist questions and guidance address watershed protection issues • The City is a signatory to the WMI and staff continues to participate in Core Group and several Subgroup activities such as the Land Use, Watershed Analysis and Monitoring, Communications and Outreach, and Bay Monitoring and Modeling. • Sunnyvale's General Plan (Surface Water Sub Element) has not been revised. However, the requirements of the Sub Element still are effective in	Ongoing Report 09/06	Lorrie Gervin, Env. Div. Manager and Kristy McCumby, Env. Spec.

				implementing the requirements of our current storm water discharge permit. • Staff continued to participate in the WRPC this past year. The City is reviewing the Guidelines and Standards and will be bringing issues to a Council Study Session in the fall of 2006. Council will determine which of the applicable Guidelines and Standards the City will adopt. Staff has been working with the Santa Clara Valley Water District on an early consultation program to address any setback issues from waterways in Sunnyvale.		
Copper/Nickel Baseline Activities cont.						
CB-11	Measures to improve street sweeping controls and storm water system operation and maintenance	Permit Prov. C.9.a, (CAP)	• Implement (as appropriate) improvements identified for current sweeping program and storm drain system O&M (within available City Budgets). • Evaluate the effectiveness of street sweeping and storm drain O&M in the annual report (See Streets and Roads and Storm Drain sections of this work plan)	• There was no change in the funding available for street sweeping in FY 06-06. The regular schedule was maintained throughout the year. Annual storm drain catch basin cleaning occurred and additional clean outs are done on an as-needed basis to prevent flooding. Collected debris is taken to the SMaRT Station for disposal. • See Attachment D-1, D-3, and in this report for details.	Ongoing Report 09/06	Tony Pineda Maint. Supv. & Jim Craig, Field Services Superint.
CB-11	Measure to Track Street Sweeping Data	Permit Prov. C.9.a (CAP)	Continue to follow Program guidance regarding the collection and reporting of street sweeping data. Provide information periodically to the program. Information for reporting includes: quantity of waste collected (cubic yards), number of miles swept, and frequency of sweeping as required.	Data was tabulated from PW Streets maintenance daily logs and reported this information to the Program. See Attachment D-1 for information on miles swept and debris collected in FY 05-06.	Ongoing Report 09/06	Tony Pineda, Maint. Supv. & Kristy McCumby, Env. Spec.

Copper/Nickel Baseline Activities cont.						
CB-12	Measures to Control Copper Discharges from Pools and Spas	Permit Prov. C.9.a, (CAP)	Continue to inform the public by distributing materials, brochures, and other information at city offices, public places, as well as through on-site distribution at presentations and events. Continue to provide proper pool and spa water discharge information to the public by placing ads in various media (e.g., The Quarterly, KSUN, City website, theater ads, and utility bill inserts.	Actions taken in FY05-06 for public outreach related to vehicle washing operations are described below: PUBLIC Outreach At the following community events, the Draining Pools and Spas brochure was distributed • Sunnyvale Pancake Breakfast • Columbia Health and Safety Fair • Earth Day Workshop MEDIA Outreach Utility Bill Insert • A utility bill stuffer was developed using the Drain Smart brochure cover Quarterly Report Article *Draining Pools and Spas – summer 05*	Ongoing Report 09/06	Sally Personett, Outreach Coord.
CB-21	Measures to Discourage the Architectural Use of Copper	Permit Prov. C.9.a (CAP)	• The ornamental/architectural use of copper in building designs is discouraged, but not prohibited by Sunnyvale ordinance. • The City is in the process of changing its Design Guidelines to not allow the ornamental use of copper for roofs, gutters, or other architectural/ornamental exterior uses.	•The City reviewed the Policy, Code, and Ordinance worksheet provide by the Program and has performed an analysis of local standards and guidance, identifying those items in need of review or change. The City is planning to limit the use of copper on roofs, in roof shingles, and gutters. •Policies or codes that have been changed will be reported annually. Stave have incorporated issues of environmental concern (e.g., the use of ornamental copper for roofing and gutters) into the information provided to developers and into the recommended Conditions of Approval attached to conditionally approved permits.	Ongoing Report 09/06	Jamie McLeod, Assoc. Planner & Kristy McCumby, Env. Spec

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment J – Copper/Nickel Baseline Activities
Municipality: Sunnyvale

Copper/Nickel Baseline Activities cont.						
NB-1	Measures to Implement Metals Controls Measures: Erosion 1) Implement perf. Stds for Const. Inspect. Erosion 2) Participate in region-wide training and certification of site inspectors	Permit Prov. C.9.b (NAP)	• Continue to implement Construction Inspection Performance Standards • Continue to have Inspectors attend Regional Board/Program workshops on Construction Site Management and erosion controls to learn the latest in erosion and sediment control techniques. • Continue to attend Program-sponsored workshops on post-development storm water control BMPs	Construction inspections for erosion control and implementation of Performance Standards continued for both public and private projects in FY 05-06. See Attachment F for information on the City's Construction Inspection activities. Staff attended regional training, when appropriate (see Attachment M) and also attended program-sponsored training when appropriate and available.	Ongoing Report 09/06	Gordon Blancher, Building Insp./ Coord. Hira Raina/ Nasser Fakih

2) Response to Regional Board Comments on CAP/NAP Activities section of FY 04-05 Annual Report:
No comments were received on this section.

3) *How well did program work? Any plans for changes?*

Pretreatment:
At this time there are no significant changes to the Cu/Ni plan implementation being considered. Staff will continue to provide information to metal finishing/plating businesses during inspections and inspect NOI filers as well as businesses that have vehicle washing facilities.

CDD:
The program has been working fairly well. One error was made on a copper roof when the submitted permit did not call out for a change in the roof and the submitted plans called out for a different material on the summary cover sheet, but the detailed plans made reference to copper material. Staff caught the error after the plans had been approved. A revised process was developed to address similar types of plan submittals in the future.

PIP – Outreach
A pollution prevention program for measures to reduce copper discharges from vehicle washing operations and pools and spas has been implemented and is ongoing. Literature distributed at events and articles published through media outreach provided thorough and informative information, and the program was well received by the community. Plans for the upcoming year include a continuation of material distribution with an emphasis on proper discharge of pools and spas.

No comments were received from the Regional Board on this section.

3) Response to Regional Board comments for a performance review (when applicable):

No performance review by the Regional Board was done for this activity in FY 05-06.

- *Give brief evaluation comments, such as conclusions about trash sources or pollutant types and whether the activities will continue, change, or be curtailed.*

The information gathered for the trash problem areas investigation completed by Sunnyvale is included in the Program's Trash Inventory and Management Activities Section of the FY 05-06 Annual Report and more detailed assessment activities are included in Appendix 1 to this section.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2005-2006 Annual Report
Attachment K – Trash Investigations and Plan Development
Municipality: Sunnyvale

Sunnyvale was fortunate to continue to have a community volunteer assist with the trash investigations, which allowed us to do more assessments this last year than anticipated. Two new sites were added this year, to help with our understanding of trash issues in Stevens Creek. Future KAB assessments will likely be curtailed in those areas where there are few problems, and the focus will be shifted to those areas in the City's jurisdiction that are chronic problems for litter, (albeit in relatively small quantities). We will be coordinating with the Program to establish longer-term trash monitoring areas, in combination with upstream trash management pilot actions.

In addition to the PI/P trash prevention-related outreach activities listed in Attachment G (Table 1) of this report, the City's Solid Waste Division continues with its activities to reduce waste and provide environmentally sound options for waste disposal. See the City's website at http://sunnyvale.ca.gov/Departments/Public+Works/Solid+Waste+and+Recycling/ for a listing of waste disposal options (e.g., extra dump days, household hazardous waste collections/drop-off, and code enforcement).

Public Works street sweeping frequency in FY 05-06 remains on the reduced schedule due to budgetary constraints (see Attachment D-1 for details on street sweeping frequency). In areas where litter is more common due to high traffic and pedestrian numbers (e.g., City parking lots/Murphy Street) or type of activity (e.g., main access roads to SMaRT Station) the frequency of street cleaning/litter pick up will remain the same (weekly sweeping).

Trash Inventory and Management

Appendix 1

Trash Assessment Results

Attachment K, Appendix 1
City of Sunnyvale
Trash Assessment Results, FY 05-06

Introduction:

In FY 05-06, the City was fortunate to continue to have a community volunteer to help conduct the assessments and record data and photos collected. Without the volunteer assistance, the number and frequency of assessments completed would not have been possible. Staff was also able to work cooperatively with other co-permittees to complete trash assessments at five locations along Stevens Creek, from upper reaches of the watershed to the Baylands.

The nineteen Keep America Beautiful (KAB) sites investigated in 2004-2005 were assessed two-times each (winter and spring) during FY 2005-2006.

Sites on Sunnyvale East Channel, Sunnyvale West Channel and two locations in Stevens Creek were assessed using the SCVURPPP modified Regional Water Quality Control Board's (RWQCB) Rapid Trash Assessment Methodology version 8.0. These sites were assessed in the winter as well as the spring. However due to high stream flows, one site in Stevens Creek was not accessible during the spring sampling event period.

Assessments in Sunnyvale East and West Channels were done in their northernmost reaches (in downstream areas that are tidally influenced) and in locations that intersect a known land-based trash problem area along Caribbean Drive. Garbage-hauling trucks and vehicles going to the Sunnyvale SMaRT Station Materials Recovery Facility located on Carl Road use Caribbean Drive as an access route. The City recognized that blowing litter from this type vehicle traffic has been a problem along this road in the past, so the contractor operating the SMaRT station is required to monitor and clean litter from it on a weekly basis or as needed as a part of their contract with the City. City crews from Public Works, Field Services also pick up litter from median strips and other areas in the Right of Way.

Materials carried by water from upstream locations may also be found at these two sites. There may also be some influx of debris from tidal influences that are present at these sites. These Channels are accessible to the public foot traffic along top the channel dike access roads. People frequently use the dike access roads to connect with the Bay Trail/Baylands areas. However, there does not appear to be much opportunity for public contact of the channel water due to the steep trapezoidal channel side slopes and the soft muddy side areas from tidal influence.

Sunnyvale staff worked together with representatives from Mountain View, Cupertino, the SCVWD, Santa Clara County, and the Stevens Permanente Creek Watershed Council to perform Version 8.0 modified RWQCB rapid trash assessments at 5 locations in Stevens Creek in May. These included sites from the northern reach adjacent to La Avenida, near the Mountain View Baylands area to Moss Rock in the upper reaches of the watershed inside a County Park. Copies of these reports are included in this Appendix but are also discussed in the reports by the cities/agencies that have jurisdiction over the various areas.

Observations:

Tables 1 and 2 are included to show the six categories of items found in the sites assessed by Sunnyvale and with the collaborative group for Stevens Creek using the KAB method and the RWQCB Rapid Trash Assessment Method, Version 8.0.

Tables 3 and 4 are compilations of the data submitted to the Program sorted by watershed. They include sites assessed by both Sunnyvale staff and those by collaboration with other cities/agencies along Stevens Creek.

RWQCB Version 8.0 sites

In January 2006, the Sunnyvale East site was assessed shortly after a significant series of rain events and seasonal high tides. More litter was observed at that time that appeared to be transported from upstream sources, or possibly from the Guadalupe Slough with the high tide events. The litter was much degraded and appeared to have been in the water for some time. Most of the litter observed did not appear to be recently windblown from Caribbean Drive or come from the Twin Creeks Sports Complex, due to the high degree of weathering seen on the litter colleted. Which ever the source, significantly more debris was found there than in the previous year after large winter storms.

When the second Sunnyvale East Channel assessment was done in the spring, the quantity of trash found was less than that observed in the winter sample. Much of the litter was weathered and the construction debris (wood, wood products) observed appeared to have washed down to this location during winter storms. Some of the paper/plastic materials could have come from vehicular traffic on Caribbean Drive. No one specific source could be determined for the litter observed.

In Sunnyvale West, the scores for each of the two assessments were the same between December 2005 and May 2006. The main types of wastes observed were Styrofoam materials (cups, pellets, or chunks of packing material) and biodegradable paper products. The sources may be from upstream areas and carried from storm drains or possibly blown in from the nearby roadway. However, the degree of weathering observed and their location on the bank indicated that they were transported from an upstream location. A few plastic bottles were found on the inside edge of the dike that could have come from

pedestrian use of the access roads present on both sides of the channel up to the Bordeaux Avenue crossing. No specific source could be identified for the trash that was observed. However, there are some businesses along the Channel that have dumpster storage areas a relatively short distance away from the toe of the dike. Most of them have fenced enclosures, but it could be possible that windblown light materials (e.g., Styrofoam or paper) could be entering the channel from these sources.

The two Stevens Creek areas sampled are adjacent to each other. One is north of the footbridge crossing the Creek and the other is south of the footbridge crossing and runs parallel to the West Valley Elementary School, just downstream of the storm water outfall for the school and its surrounding neighborhood. The majority of the litter debris observed at both of these sites appeared to have come from upstream sources. In particular, golf balls (two golf-courses are present upstream in Cupertino) and water-eroded plastic materials were common.

This site is also monitored as a part of the Stream Keeper program by the Stevens and Permanente Creek Watershed Council. A very small amount of the litter found on the upper bank may be coming from pedestrians using the bridge, as it was found above the high water line in the area. Public access to the creek is limited by a chain link fence and locked gate on the Sunnyvale side of the Creek. Steep side slopes on the Los Altos side of the Creek make access extremely difficult or dangerous.

KAB Sites:
Similar to last year, the most littered areas in Sunnyvale (those scoring above a "2" or "slightly littered"), based on the Keep America Beautiful methodology, were those that have heavy vehicular traffic use. These include the Highway 237 and Lawrence Expressway intersection; the Highway 101 and Matilda Avenue access ramps; and the Lawrence Expressway/CalTrain overpass. Litter in these locations is mainly found in the CalTrans or County rights-of way.

Other sites that scored above a "2" using the KAB methodology were associated with retail businesses and their dumpster areas. There were some businesses that appear to have dumpsters too small or not frequent enough pick ups during the holiday season to deal with the debris being generated. Also, there was some evidence of illegal dumping in or near their dumpsters.

One site not associated with a business had illegal dumping occurring on the roadside Right of Way. This location has had problems in the past and continues to be one of the few chronic illegal dumping areas within the City. The materials illegally dumped here included bedframes, tires, and some debris that may have come from homeless use.

None of the KAB sites is located close to water bodies. Any illegal dumping that occurred did not happen in or near a waterway.

Actions Initiated:

For sites that ranked scores greater than 2 using the KAB index, some initial steps were taken to resolve the problems noted. In the case of site SU07 and 08, Solid Waste Division Staff and Neighborhood Preservation were contacted to initiate actions related to clean ups of loading and trash storage at small business malls. At SU15, Public Works field services was notified and sent City trucks to pick up the illegally dumped debris and the homeless encampment debris. These areas will continue to be monitored, to determine if existing measures are adequate and to build a history that will allow additional enforcement action, if needed when dealing with the businesses.

Several areas had abandoned shopping cart problems. The current policy was followed to notify the appropriate Public Works staff person with information as to the businesses who own the carts and the location they were found. The City no longer collects the carts at a central location due to costs and other difficulties in getting carts back to owners. Instead, the business owners are contacted and they are requested to pick them up themselves. The Public Works Department presented a study issue to Council in May 2006 to request that an ordinance be drafted regarding the abandonment of shopping carts and requirements for businesses to have procedures in place to deal with the cart removals from their property. It is anticipated that the ordinance will be drafted and approved in early 2007.

Increased efforts to perform more regular clean ups of the Highway 237 and 101 were observed by CalTrans in their roadside rights-of-way. Due to extremely heavy traffic on these routes, it did not take long for them to become noticeably littered again within a very short period after a clean-up was completed. The issue of dealing with trash coming from traffic on freeways is huge, and needs to be looked at on a statewide basis.

The City includes outreach messages to local residents to encourage people to cover their loads and not litter as part of the Public Education and Outreach activities (See PIP Attachment G for details on outreach.) However, litter along State freeways and County expressways may come from sources passing through the community. So, outreach messages and other litter management efforts should be done on a region or statewide basis to help with this problem.

Potential Strategies and Next Steps:

Sunnyvale staff will continue to work with the Program's As Hoc Trash Committee to identify if some pilot efforts can be implemented that will provide effective controls for litter that either enters the storm drain inlets or come from outfalls into local creeks/waterways. Staff is hoping to identify some locations within Sunnyvale were these pilot studies could be held, or if not within Sunnyvale, that they could be piloted in neighboring communities with similar infrastructure. The City anticipates revising its trash assessment efforts to link to areas where trash control BMPs have been constructed or implemented, and determine if there is any measurable decrease in litter entering waterways.

If new sites of significant trash accumulation are discovered within Sunnyvale boundaries, staff will assess them using the appropriate method (KAB or RWQCB version 8.0) and then identify if there are specific actions that can be undertaken to address the problem accumulations. If it appears that contact with a specific business or property owner is needed to deal with a trash accumulation problem, then the appropriate city staff (e.g., Neighborhood Preservation or Public Works Solid Waste Division) will make those contacts. Follow-up by City staff will be done to document actions taken in response to the complaint.

City staff plans to continue work with the Trash ad hoc task group sponsored by SCVURPPP to work on resolving trash problems that are larger in scope for an area, such as the problems that occur along road rights-of-way with heavy traffic.

Sunnyvale West Channel:
Further investigations of the properties adjacent to Sunnyvale West channel between the Matilda Avenue box culvert and the sampling site north of the Caribbean Drive bridge crossing did not reveal any specific businesses whose outdoor trash handling procedures would lead to the quantities/types of Styrofoam found in the previous year's assessment. In FY 05-06, there appeared to be fewer active industries/businesses with properties adjacent to the West Channel. Therefore, fewer trash enclosure areas were observed to be in operation near the Channel than in previous years. Environmental Division Staff will be working with Solid Waste Program staff to educate nearby property owners of the importance of keeping the lids down on their trash containers and cleaning up around their enclosures to help reduce litter that could be blown into the Channel.

Sunnyvale East Channel:
The increase in litter Sunnyvale East Channel observed in January 2006 was likely due to the heavy rainfall events that caused a washout of debris from upstream sources or catchments. Based on the degree of weathering and the location of the debris picked up in the channel banks, it did not appear that the Sports Complex located adjacent to the channel was a significant contributor to the litter problem this year. The Complex is totally fenced off from the channel and it did not appear that the small amount of litter observed near the fence was

making its way into the channel. No further actions with the Sports Complex are being considered at this time.

A more likely source of litter is debris blowing in from Caribbean Drive traffic. City staff will continue to work with Public Works/ Solid Waste Division, the SMaRT Station contractor, and the companies with trash-hauling vehicles that have been observed with small amounts of blowing debris coming from them to better control this litter sources.

It is difficult to determine a specific source for the majority of the litter observed in Sunnyvale East channel, since this channel drains a significant portion of the City of Sunnyvale as well as parts of Cupertino. City staff will continue to work with the SCVURPPP to determine if there are some locations where pilot trash control BMPs could be implemented to see if there is any decrease in the quantity of litter observed at this downstream evaluation site.

Trash Problem Area Activity Report
FY 05-06

ID	Date	Location	Assessment Score		Recent Cleanup[1]	Adjacent Land Use[2]		Trash Source[3]			Three Most Prevalent Trash Types[4]			Estimated Volume of Trash Removed (if any)	Existing Management Actions	Recommended Management Actions and/or Future Evaluations
			KAB	RTA		1	2	1	2	3	1	2	3			
SU01	12/16/2005	600 Block Grand Fir and Bellflower	1		Unknown	Residential – apartments		Illegal dumping	Litter – receptacles/ dumpsters		Plastic/styrofoam	Biodegradable/paper		Very few pieces of litter observed in allyway. Litter not present on streets or sidewalks. No illegal dumping.	Streets swept by City. Periodic monitoring by city staff or receipt of complaints by Neighborhood Preservation.	A number of shopping carts were observed in the back allyway. City PW staff were notified. Should probably remain on list for potential illegal dumping, but not a priority site due to distance from storm drains and waterways.
SU01	5/25/2006	600 Block Grand Fir and Bellflower	1.5		No	Residential – apartments		Illegal dumping	Litter – receptacles/ dumpsters		Miscellaneous	Plastic/styrofoam		Couches/chairs on curbside. Might be scheduled for oversize pick up, but not tagged. Very minor amounts of litter in ally or on sidewalks - less than a cubic foot.	Site has not had any illegal dumping of furniture in two years. Checked back on 6/2/06 and furniture had been removed.	Site should remain on the list for now, but not be a priority as amounts of debris are small and illegal dumping/accumulation does not seem to be a significant problem.
SU03	12/12/2005	Tamarack Lane, Helen Ave,and Miramar Way * note SU 02 and SU 03 were combined as they were adjacent to each other and with similar litter problems.*	1.5		Unknown	Residential – home	Residential – apartments	Litter – pedestrian	Litter – vehicular		Miscellaneous	Biodegradable/paper		Less than 1 cubic foot of litter estimated as present, but over 20 shopping carts found and reported	No current city actions other than periodic montioring.	Contacted Public Works staff an notified them of the shopping carts and the businesses they belong to. PW policy is to contact the business owners and require their removal. Litter was only a very minor issue at this site.
SU03	5/24/2006	Tamarack Lane, Helen Ave,and Miramar Way * note SU 02 and SU 03 were combined as they were adjacent to each other and with similar litter problems.*	1.5		Unknown	Residential – home	Residential – apartments	Litter – pedestrian	Litter – vehicular		Plastic/styrofoam	Glass	Miscellaneous	Less than 1 cubic foot of litter estimated as present, with the exeption of over 20 shopping carts abandoned along sidewalks	No current city actions other than periodic montioring.	Contacted Public Works staff an notified them of the shopping carts and the businesses they belong to. PW policy is to contact the business owners and require their removal. Litter was only a very minor issue at this site.
SU04	12/12/2005	1034 E. El Camino	1		Unknown	Commercial		Litter – commercial areas						No litter visible	New trash compacter and enclosure fencing. Suggest removal from Hot Spot list	Remove from future inspections. Due to changes in trash containment, litter is no longer an issue at this site.
SU04	5/24/2006	1034 E. El Camino	1		Unknown	Commercial		Litter – commercial areas						No litter visible	New trash compacter and enclosure fencing. Suggest removal from Hot Spot list	Remove from future inspections. Due to changes in trash containment, litter is no longer an issue at this site.
SU05	12/16/2005	594 El Camino Real, Alleyway behind business	1		Unknown	Commercial		Litter – receptacles/ dumpsters						No litter visible. Dumpster is full, but waste is contained.	Site monitored occasionally by City staff.	Consider removal from trash hot-spot list
SU05	5/24/2006	594 El Camino Real, Alleyway behind business	1		Unknown	Commercial		Litter – receptacles/ dumpsters			Biodegradable/paper			Only 1-2 pieces of litter visible. Dumpster not full	Site monitored ocassionally by City staff.	Suggest removal from trash hot spot list as there has not been a litter problem here in the past year. No nearby waterways are present and the amount of debris/litter that could get into storm drains is small.
SU06	12/12/2005	1053 E. El Camino	1.5		Unknown	Commercial		Litter – commercial areas			Biodegradable/paper			Less than 1 cubic foot estimated as present	Site was assessed before the dumpster was picked up that day.	Continue to periodically monitor the site for problems.
SU06	5/25/2006	1053 E. El Camino	1.5		Unknown	Commercial		Litter – commercial areas	Litter – receptacles/ dumpsters		Plastic/styrofoam	Biodegradable/paper		Less than 1 cubic foot estimated as present	Some litter in the parking lot, a few pieces observed near dumpster, but dumpster was not full.	Continue to periodically monitor the site for problems. However, this should not be a priority site since it is not near any water bodies and the quantity of litter observed is small.
SU07	12/16/2005	1675 Hollenbeck Ave	2		Unknown	Commercial		Litter – receptacles/ dumpsters	Litter – commercial areas		Plastic/styrofoam	Biodegradable/paper	Miscellaneous	Styrofoam pellets near the dumpsters and paper cups present in the parking lot. Two bags of trash did not make it into the dumpster, but placed beside it. Not a large quantity -maybe 3-4 cubic feet of debris estimated that is not totally contained.	Site infrequently monitored by City staff. Property owners have cleaned up when requested in the past. Last time when it was inspected there was less debris.	Continue to monitor and determine if further actions need to be taken to get the property owners/businesses to control litter and clean up the areas around their dumpsters.
SU07	5/24/2006	1675 Hollenbeck Ave	2.5		Unknown	Commercial		Litter – receptacles/ dumpsters	Litter – commercial areas	Illegal dumping	Plastic/styrofoam	Miscellaneous	Biodegradable/paper	Overflowing dumpsters observed, some evidence of illegal dumping of furniture near dumpsters. Generally messy dumpster areas behind businesses of the mall. About 35% of the area had some litter present, perhaps several bags full along with large couch.	Site infrequently monitored by City staff. Property owners have cleaned up when requested in the past. Last time when it was inspected there was less debris.	Contacted PW/ Solid Waste Division regarding dumpster issues. They will follow up and provide a report on the outcome.

SU08	12/12/2005	727 Sunnyvale-Saratoga Rd	3		Unknown	Commercial		Litter – commercial areas	Litter – receptacles/ dumpsters		Biodegradable/paper	Plastic/styrofoam		Not estimated - large quantity with cardboard, paper, and plastic materials	Site monitored occasionally by staff. Contact property/business owners when litter problem is noted.	Contacted Public Works/Solid Waste Division to determine if they could notify property/business owners about the problem and follow up with enforcement as needed. Also finding some "homeless" debris/collections in the area. Received Compaint Response back from PW. They inspected the area on 12/12/05 and wrote courtesy noteice to property owner about the problems. Re-inspected on 12/29/05 and found some problems, spoke with business representatives. Re-inspected on 1/10/06 and found no problems.
SU08	5/24/2006	727 Sunnyvale-Saratoga Rd	2.5		Unknown	Commercial		Litter – commercial areas	Litter – receptacles/ dumpsters		Plastic/styrofoam	Biodegradable/paper		Difficult to estimate - 3-4 bags of debris, mostly large cardboard pieces.	Site monitored occasionally by staff. Contact property/business owners when litter problem is noted.	Contacted Public Works/Solid Waste Division to determine if they could take action with the property/business owners about the problem and follow up with enforcement as needed.
SU09	12/8/2005	1131 Lawrence Expy	1		Unknown	Commercial		Litter – commercial areas	Litter – vehicular		Biodegradable/paper			Almost no litter visible. Could be picked up in a small bag. Much less than 1 cu ft.	It appears that the property owner is keeping the site clean. The few pieces of litter observed could have come from parked cars.	Continue to monitor, but should be considered for removal from list as trash problems at the site are minimal.
SU09	5/24/2006	1131 Lawrence Expy	2.5		Unknown	Commercial		Litter – commercial areas	Litter – receptacles/ dumpsters		Plastic/styrofoam	Biodegradable/paper	Miscellaneous	Overflowing and messy dumpster areas behind businesses - difficult to quantify amount of litter present.	Site in need of housekeeping - overflowing dumpsters and litter around back alleyway.	Notified Public Works- Solid Waste division regarding dumpster and alley-way litter problems.
SU 10	12/8/2005	911 Duane Ave	1.5		Unknown	Commercial		Litter – commercial areas			Biodegradable/paper	Plastic/styrofoam		Small amount of debris,about less than 1 cu ft if picked up	Dumpster and allyway are gated to prevent illegal dumping. Some litter from materials being placed in dumpster. In need of litter pick up.	Continue to monitor the site and if sufficient amount continues to be there, notify PW - solid waste to request enforcement. Litter amount visible was relatively small and not an immediate threat to waterways.
SU 10	5/24/2006	911 Duane Ave	1.5		Unknown	Commercial		Litter – commercial areas	Litter – receptacles/ dumpsters		Plastic/styrofoam	Biodegradable/paper		Small amount of debris,about less than 1 cu ft if picked up	Dumpster and allyway are gated to prevent illegal dumping. Some litter from materials being placed in dumpster. In need of litter pick up.	Continue to monitor the site and if sufficient amount continues to be there, notify PW - solid waste to request enforcement. Litter amount visible was relatively small and not an immediate threat to waterways.
SU11	12/16/2005	Mathilda Ave and Highway 101 on-ramps and exits	2.5		Yes	Roadway		Litter – vehicular			Plastic/styrofoam	Biodegradable/paper		Large quantity, not estimated. Area is in CalTrans ROW.	CalTrans cleans the area periodically and appears to have been picked up a few weeks after the assessment.	Continue to monitor the site. Identify mechanism for notifying CalTrans when there is a significant accumulation.
SU11	5/25/2006	Mathilda Ave and Highway 101 on-ramps and exits	2		Yes	Roadway		Litter – vehicular			Biodegradable/paper	Plastic/styrofoam		About 20% of the area still had litter remaining, but much reduced from previous observations	CalTrans had cleaned portions of the west-bound off-ramp and east-bound on-ramp areas about 2 weeks before the assessment was completed.	Continue to monitor the site. Work with SCVURPP to dentify mechanism for notifying CalTrans when there is a significant accumulation.
SU12	12/8/2005	Lawrence Expy and Highway 237 on-ramps and exits	3		No	Roadway		Litter – vehicular			Plastic/styrofoam	Miscellaneous	Biodegradable/paper	Unknown - would take crews a day or more to pick up all the debris	Caltrans cleans the area periodically. (It was cleaned up about a week after the oberservations were made.	Continue to monitor the site. Work with SCVURPP to dentify mechanism for notifying CalTrans when there is a significant accumulation.
SU12	5/24/2006	Lawrence Expy and Highway 237 on-ramps and exits	2.5		Yes	Roadway		Litter – vehicular			Plastic/styrofoam	Miscellaneous	Biodegradable/paper	Quantity is stell significant, would take a crew at least a day to clean thoroughly. May be more than a cubic yard.	Caltrans had cleaned portions of the west-bound on and off-ramp areas about 2-3 weeks before the assessment was completed.	Continue to monitor the site. Work with SCVURPP to identify mechanism for notifying CalTrans when there is a significant accumulation.
SU 13	12/12/2005	Willow and Aster interstection	2.5		Unknown	Roadway	Commercial	Illegal dumping	Litter – vehicular		Miscellaneous	Biodegradable/paper	Plastic/styrofoam	2 bags of trash plus box springs and tire dumped illegally. Some roadway litter from Lawerence Expy on other side of road	City monitors area periodically. Cleans up ROW debris on City street. Debris from Lawrence Expy is under County jurisdiction.	PW was notified to pick up debris at site. Continue to monitor for illegal dumping activities. Not near a waterway. Illegal dumping debris was picked up by City crews. Need to identify County contact for Lawrency Expy clean up.
SU 13	5/24/2006	Willow and Aster interstection	3		Unknown	Roadway	Commercial	Homeless encampments	Illegal dumping	Litter – vehicular	Miscellaneous	Fabric/cloth	Construction	TV set, construction debris, homeless "nesting" materials - may be a cubic yard or more of material	City monitors area periodically and cleans it when requested. Public works staff were notified of debris accumulation in ROW. Debris from Lawrence Expy is under County jurisdiction.	PW was notified to pick up illegally dumped debris along roadway ROW. Continue to monitor for illegal dumping activities. Not adjacent to a waterway. Side slope of Lawrence Expy with less litter observed - may have been cleaned by County.
SU14	12/12/2005	Angel Ct Parking lot and Hendy Rd, near CalTrain ROW	1.5		Yes	Railways	Other	Litter – pedestrian			Biodegradable/paper	Plastic/styrofoam		Estimated less than 1 cubic foot of trash plus one shopping cart.	City monitors the area monthly and crews pick up debris as needed.	Contacted Public Works Staff regarding shopping cart. Also let PW Boulevards staff that litter was accumulating along the railroad track fence to the west of Hendy Rd.
SU14	5/24/2006	Angel Ct Parking lot and Hendy Rd, near CalTrain ROW	1		Yes	Railways	Railways	Litter – pedestrian	Litter – vehicular		Plastic/styrofoam	Biodegradable/paper		Estimated less than 1 cubic foot of trash.	City monitors the area monthly and crews pick up debris as needed.	Only small amounts of litter visible at this time. Will continue to monitor and initiate clean up actions when needed.
SU15	12/12/2005	Victory Village Park under Fair Oaks Overpass	1		Yes	Industrial	Park/Trail	Litter – pedestrian	Other		Biodegradable/paper			Less than 1 cubic foot of litter present.	City monitors and PW crews clean underpass area on a regular basis.	In the past, most of the litter seen a this site appeared to come from the day-labor force that frequent the sidewalk outside the Home Depot store. This appears to have been cleaned up either by business staff or city crews in the area. Very little litter was evident at the time of the inspection.
SU16	5/24/2006	Victory Village Park under Fair Oaks Overpass	1.5		Yes	Industrial	Park/Trail	Litter – pedestrian	Other		Plastic/styrofoam	Biodegradable/paper	Metal	About 10% of the area has some litter (one or two pieces) volume would be less than 1 cubic foot.	City monitors and PW crews clean underpass area on a regular basis.	Business had placed garbage can where day laborors congregate. Some litter may be blowing in from railroad track. Very small amount of litter was present.

233

SU16a	12/6/2005	Sunnyvale West Channel, 100 ft below Caribbean Bridge crossing		100	Unknown	Industrial	Roadway	Upstream/stormdrain catchment	Litter – vehicular	Litter – pedestrian	Plastic/styrofoam	Biodegradable/paper	Fabric/cloth	1< Cubic foot, only a small portion of a garbage bag	City crews clean up along road right of way. Most of the debris observed seemed to have washed down from upstream sources, very little littering along access road/trail bank	Channel was adopted under District's adopt-a-creek program. Further investications upstream to the point where the channel goes into an underground box culvert by Matilda Ave did not show any upstream business sources. (e.g., open dumpsters or outdoor activities). Some litter may be coming from those utilizing the access roads on top of the dikes as walking/running trails. However the amount of litter from this potential use is small.
SU16a	5/26/2006	Sunnyvale West Channel, 100 ft below Caribbean Bridge crossing		100	Unknown	Industrial	Roadway	Upstream/storm drain catchment	Litter – vehicular	Litter – pedestrian	Plastic/styrofoam	Biodegradable/paper		1< Cubic foot, only a small portion of a garbage bag	City crews clean up along road right of way. Most of the debris observed seemed to have washed down from upstream sources, very little littering along access road/trail bank	About the same amount of litter debris was removed during this assessment. No potential new actions have been indentified to help reduce litter in the area.
SU16b	1/20/2006	Sunnyvale East Channel, below Carribbean Bridge crossing, 100 ft north of access gate/fence		67	No	Park/Trail	Roadway	Upstream/stormdrain catchment	Litter – vehicular	Litter – pedestrian	Plastic/styrofoam	Biodegradable/paper	Metal	approx 2-3 cu ft (1 large 32 gallon trash bag)	City crews clean up along road right of way. Most of the debris observed this time either washed down from upstream or came in with high tides during storms.	Continue monitoring to see if upstream efforts or BMPs that might be installed as part of a pilot project can help reduce quantities observed.
SU16b	6/2/2002	Sunnyvale East Channel, below Carribbean Bridge crossing, 100 ft north of access gate/fence		83	Unknown	Park/Trail	Roadway	Upstream/storm drain catchment	Litter – vehicular	Litter – pedestrian	Plastic/styrofoam	Construction	Metal	1-2 cu ft (about 1/2 trash bag full, less than 5 lbs)	City crews clean up along road right of way. Most of the debris observed this time appeared to be washed down from upstream, with some blowing in from the roadway.	Continue monitoring to see if upstream efforts or BMPs that might be installed as part of a pilot project can help reduce quantities observed. Amount of litter debris observed this time was significantly less than what was observed in January after winter storms.
SU16c	12/8/2005	Caribbean Drive between Lawrence Expressway and Matilda Ave.	1.5		Yes	Industrial	Roadway	Litter – vehicular	Litter – pedestrian		Plastic/styrofoam	Biodegradable/paper	Construction	Unknown, probably a bag or two in the mile of roadway	Sunnyvale PW cleans right of way and center divider periodically. Street is swept bi-weekly by SMART Station Contractor	Most of the litter present on the roadway and median comes from trucks entering and leaving the SMART station materials recovery facility off of Borregas Ave. City crews clean the ROW area and the contractor who operates the SMART Station sweeps the street area. Litter accumulation does not appear to be significant.
SU16c	5/24/2006	Caribbean Drive between Lawrence Expressway and Matilda Ave.	1.5		Yes	Industrial	Roadway	Litter – vehicular	Litter – pedestrian		Plastic/styrofoam	Biodegradable/paper		Possibly one bag full of debris	Sunnyvale PW cleans right of way and center divider periodically. Street is swept bi-weekly by SMART Station Contractor	Most of the litter present on the roadway and median comes from trucks entering and leaving the SMART station materials recovery facility off of Borregas Ave. City crews clean the ROW area and the contractor who operates the SMART Station sweeps the street area. Litter accumulation does not appear to be significant.
SU17	12/12/2005	California Ave on-ramp to Central Expressway	1.5		Unknown	Roadway		Litter – vehicular			Biodegradable/paper	Plastic/styrofoam		Small quantity, hard to estimate but maybe 2-3 cu ft of litter present (large garbage bag)	Site monitored occasionally by City staff. Site is periodically cleaned by County and/or City PW staff.	Continue to monitor the site and notify PW if accumulation is signficant.
SU17	5/24/2006	California Ave on-ramp to Central Expressway	1.5		Unknown	Roadway		Litter – vehicular			Miscellaneous	Glass		Small quantity, less than a cubic foot or so of debris remaining	Site may have been cleaned up recently as only a small amount of debris was visible.	Continue to monitor the site and notify PW if accumulation is signficant. However, site is not a threat to waterways and quantity of debris present is small, so it should be a low priority for future efforts.
SU19	12/8/2005	Wolf Road Overpass- Access from Eveleyn Ave	1.5		Unknown	Commercial	Industrial	Homeless encampments	Illegal dumping		Miscellaneous	Fabric/cloth		2-3 Cu ft - table and bedding from homeless useage	City monitors the area under the overpass and picks up debris as needed.	Mostly large debris from homeless usage of the area under the overpass. Little threat to the storm drains due to the large size of material and it is not near any water bodies. City will continue to monitor and remove debris as needed.
SU19	5/24/2006	Wolf Road Overpass- Access from Eveleyn Ave	2		Unknown	Commercial	Industrial	Homeless encampments	Illegal dumping	Litter – pedestrian	Plastic/styrofoam	Biodegradable/paper		2-3 Cu ft - debris from homeless useage. Fenced off area in need of repair.	City monitors the area under the overpass and picks up debris as needed. Staff notified of need for clean up.	Mostly large debris from homeless usage of the area under the overpass. PW staff was notified of fence and debris problem, and it was taken care of within two weeks of their notification. Debris in area is little threat to the storm drains due to the large size of material and it is not near any water bodies. City will continue to monitor and remove debris as needed.
SU20	12/8/2005	Wildwood Drive and Lawrence Expressway	2		Unknown	Commercial	Roadway	Litter – pedestrian	Illegal dumping	Litter – vehicular	Biodegradable/paper	Miscellaneous		2-3 cu ft. - Boxes and a shopping cart	City monitors the area in their ROW and picks up debris as needed.	Notified PW about the shopping carts for pick up and the cardboard boxes/debris. City crews picked up the site. Continue to monitor, but not significant threat to storm drains in the area.
SU20	5/24/2006	Wildwood Drive and Lawrence Expressway	1.5		Unknown	Commercial	Roadway	Litter – pedestrian	Litter – vehicular		Plastic/styrofoam	Metal	Biodegradable/paper	Minor amount of litter visible, plactic bags, bottles, and cans mostly, less than 1 cubic foot.	City monitors the area in their ROW and picks up debris as needed.	Very little trash visible at this time. Continue to monitor, but not significant threat to storm drains in the area.
SU21	12/8/2005	E. Persian Drive between Sunnyvale East and Lawrence Expy. - blocks 190-400	1.5		Yes	Residential – home	Roadway	Illegal dumping	Litter – vehicular		Miscellaneous	Biodegradable/paper		4-5 cu ft - furniture from illegal dumping mostly	Sunnyvale PW cleans the ROW and monitors the site for illegal dumping from nearby residences and others.	Continue to monitor the site. Notified PW to pick up debris. Site is behind the Highway sound wall and along the back fence of the mobil home park. There are not any nearby storm drains and mostly larger debris seems to appear here.
SU21	5/24/2006	E. Persian Drive between Sunnyvale East and Lawrence Expy. - blocks 190-400	1		Yes	Residential – home	Roadway	Litter – vehicular			Plastic/styrofoam	Metal	Biodegradable/paper	No illegal dumping observed at this time and very few pieces of litter.	Sunnyvale PW cleans the ROW and monitors the site for illegal dumping from nearby residences and others.	Continue to monitor the site and have PW pick up debris as needed. Site is behind the Highway 237 sound wall and along the back fence of the mobil home park. There are not any nearby storm drains and mostly larger debris seems to appear here.

CL05 * new site added*	12/16/2005	Stevens Creek, foot bridge crossing behind West Valley Elementary School		82	Yes	School	Residential – home	Upstream/stormdrain catchment	Litter – pedestrian	Litter – school/institution	Plastic/styrofoam	Miscellaneous	Metal	1< Cubic foot, only a small portion of a garbage bag	Site is monitored by Stevens Permanente Watershed Council Streamkeeper program. Accumulated trash is picked up monthly, when accessible.	Continue monitoring to see if upstream efforts or BMPs reduce amounts of trash obesrved. Consider working with school on litter control project.
CL05	5/3/2006	See Stevens Creek Assessments done by representatives from Cupertino, Mountain View, Steven&Permanente Creek Watershed Council and Sunnyvale for information on the assessement done in May.		95												
CL06 *new site added*	12/16/2005	Stevens Creek, foot bridge crossing behind West Valley Elementary School -directly below storm drain outfall		99	Yes	School	Residential – home	Upstream/stormdrain catchment	Litter – school/institution		Plastic/styrofoam	Biodegradable/paper	Glass	1< Cubic foot, only a small portion of a garbage bag	Site is monitored by Stevens Permanente Watershed Council Streamkeeper program. Accumulated trash is picked up monthly, when accessible.	Continue monitoring to see if upstream efforts or BMPs reduce quantities of trash observed. Consider working with school on litter control project.
CL06	5/3/2006	Unable to sample area due to high water in the creek

ID	Date	Location	Assessment Score		Recent Cleanup[1]	Adjacent Land Use[2]		Trash Source[3]			Three Most Prevalent Trash Types[4]			Estimated Volume of Trash Removed (if any)	Existing Management Actions	Recommended Management Actions and/or Future Evaluations
			KAB	RTA		1	2	1	2	3	1	2	3			
CL03	5/3/2006	Stevens Creek - McClellan Ranch		101	Yes	Park/Trail	Residential – home	Litter – pedestrian	Litter – school/institution		Biodegradable/paper	Fabric/cloth	Plastic/styrofoam	Less than 1cu ft	Site often cleaned by Park staff and students, most recent cleaning occurred on 3/18/06	Very little debris is found here and park area is well maintained. Does not appear to collect debris from upstream areas much. May be a good reference point.
CL04	5/3/2006	Stevens Creek - Moss Rock		68	Unknown	Roadway	Other	Litter – recreational areas	Illegal dumping	Other	Glass	Plastic/styrofoam	Metal	abt.2-3 cu ft (large trash bag full	Site occasionally cleaned up by volunteers. No current management actions in place - belive property ower to be the County. Area appears to have increased "party" activity, along with new illegal dumping of yard waste observed.	Contacted County staff and confirmed that area was on County Parks property. County Parks staff will increase patrols to the area and try to prevent future problems. Continued monitoring of the site is recommended.
CL05	5/3/2006	Stevens Creek - West Valley Elementary School Bridge crossing		95	Yes	School	Residential – home	Upstream/stormdrain catchment	Litter – pedestrian		Plastic/styrofoam	Glass	Metal	Less than 1 cu ft	Site is monitored by Stevens and Permanente Watershed Council Streamkeeper volunteer. Litter is collected on a monthly basis from one side of the creek, depending on accessibility and creek water levels.	Site is located just below an outfall for West Valley Elementary and the residential areas nearby. Monitoring will continue at this site. May consider getting school involved with trash/clean up activities on their grounds.
CL02	5/10/2006	Stevens Creek - El Camino Bridge crossing		91	No	Commercial	Roadway	Upstream/stormdrain catchment	Litter – vehicular	Litter – pedestrian	Plastic/styrofoam	Construction	Miscellaneous	abt.2-3 cu ft (large trash bag full	Site occasionally cleaned up by volunteers. No current management actions in place. Large accumulation of floating debris on side of bank downstream of assessment area.	Site is located below the El Camino bridge and several upstream storm drain outfalls. Water was higher and faster than last year at the time sampled. Will work with volunteers to get the downstream area trash accumulation picked up.
CL01	5/10/2006	Stevens Creek - La Avenida site		67	Unknown	Industrial	Park/Trail	Upstream/stormdrain catchment	Litter – pedestrian		Plastic/styrofoam	Miscellaneous	Construction	About 3 trash bags full plus some large pieces of wood	Site is cleaned up at least twice each year by volunteers and park patrol cleans up daily along the trail area.	The majority of litter/debris observed comes from upstream sources. May be a good point to continue monitoring to determine if upstream measures to control litter are effective.

Calabazas Creek

ID #	Date	Location	Assessment Tool	Score	Existing Management Actions	Recommended Management Actions and/or Future Evaluations
SU13	5/24/2006	Willow and Aster intersection	KAB	3	City monitors area periodically and cleans it when requested. Public works staff were notified of debris accumulation in ROW. Debris from Lawrence Expy is under County jurisdiction.	PW was notified to pick up illegally dumped debris along roadway ROW. Continue to monitor for illegal dumping activities. Not adjacent to a waterway. Side slope of Lawrence Expy with less litter observed - may have been cleaned by County.
SU12	12/8/2005	Lawrence Expy and Highway 237 on-ramps and exits	KAB	3	CalTrans cleans the area periodically. (It was cleaned up about a week after the observations were made.	Continue to monitor the site. Work with SCVURPPP to identify mechanism for notifying CalTrans when there is a significant accumulation.
SU13	12/12/2005	Willow and Aster intersection	KAB	2.5	City monitors area periodically. Cleans up ROW debris on City street. Debris from Lawrence Expy is under County jurisdiction.	PW was notified to pick up debris at site. Continue to monitor for illegal dumping activities. Not near a waterway. Illegal dumping debris was picked up by City crews. Need to identify County contact for Lawrence Expy clean up.
SU09	5/24/2006	1131 Lawrence Expy	KAB	2.5	Site in need of housekeeping - overflowing dumpsters and litter around back alleyway.	Notified Public Works- Solid Waste division regarding dumpster and alley-way litter problems.
SU12	5/24/2006	Lawrence Expy and Highway 237 on-ramps and exits	KAB	2.5	CalTrans had cleaned portions of the west-bound on and off-ramp areas about 2-3 weeks before the assessment was completed.	Continue to monitor the site. Work with SCVURPPP to identify mechanism for notifying CalTrans when there is a significant accumulation.
SU20	12/8/2005	Wildwood Drive and Lawrence Expressway	KAB	2	City monitors the area in their ROW and picks up debris as needed.	Notified PW about the shopping carts for pick up and the cardboard boxes/debris. City crews picked up the site. Continue to monitor, but not significant threat to storm drains in the area.
SU06	12/12/2005	1053 E. El Camino	KAB	1.5	Site was assessed before the dumpster was picked up that day.	Continue to periodically monitor the site for problems.
SU10	5/24/2006	911 Duane Ave	KAB	1.5	Dumpster and alleyway are gated to prevent illegal dumping. Some litter from materials being placed in dumpster. In need of litter pick up.	Continue to monitor the site and if sufficient amount continues to be there, notify PW - solid waste to request enforcement. Litter amount visible was relatively small and not an immediate threat to waterways.
SU10	12/8/2005	911 Duane Ave	KAB	1.5	Dumpster and alleyway are gated to prevent illegal dumping. Some litter from materials being placed in dumpster. In need of litter pick up.	Continue to monitor the site and if sufficient amount continues to be there, notify PW - solid waste to request enforcement. Litter amount visible was relatively small and not an immediate threat to waterways.
SU06	5/25/2006	1053 E. El Camino	KAB	1.5	Some litter in the parking lot, a few pieces observed near dumpster, but dumpster was not full.	Continue to periodically monitor the site for problems. However, this should not be a priority site since it is not near any water bodies and the quantity of litter observed is small.
SU03	5/24/2006	Tamarack Lane, Helen Ave,and Miramar Way * note SU 02 and SU 03 were combined as they were adjacent to each other and with similar litter problems.*	KAB	1.5	No current city actions other than periodic monitoring.	Contacted Public Works staff an notified them of the shopping carts and the businesses they belong to. PW policy is to contact the business owners and require their removal. Litter was only a very minor issue at this site.
SU03	12/12/2005	Tamarack Lane, Helen Ave,and Miramar Way * note SU 02 and SU 03 were combined as they were adjacent to each other and with similar litter problems.*	KAB	1.5	No current city actions other than periodic monitoring.	Contacted Public Works staff an notified them of the shopping carts and the businesses they belong to. PW policy is to contact the business owners and require their removal. Litter was only a very minor issue at this site.
SU20	5/24/2006	Wildwood Drive and Lawrence Expressway	KAB	1.5	City monitors the area in their ROW and picks up debris as needed.	Very little trash visible at this time. Continue to monitor, but not significant threat to storm drains in the area.

SU04	12/12/2005	1034 E. El Camino	KAB	1	New trash compacter and enclosure fencing. Suggest removal from Hot Spot list	Remove from future inspections. Due to changes in trash containment, litter is no longer an issue at this site.
SU04	5/24/2006	1034 E. El Camino	KAB	1	New trash compacter and enclosure fencing. Suggest removal from Hot Spot list	Remove from future inspections. Due to changes in trash containment, litter is no longer an issue at this site.
SU09	12/8/2005	1131 Lawrence Expy	KAB	1	It appears that the property owner is keeping the site clean. The few pieces of litter observed could have come from parked cars.	Continue to monitor, but should consider removing from list since trash problems are minimal.

Sunnyvale East

ID #	Date	Location	Assessment Tool	Score	Existing Management Actions	Recommended Management Actions and/or Future Evaluations
SU08	12/12/2005	727 Sunnyvale-Saratoga Rd	KAB	3	Site monitored occasionally by staff. Contact property/business owners when litter problem is noted.	Contacted Public Works/Solid Waste Division to determine if they could notify property/business owners about the problem and follow up with enforcement as needed. Also finding some "homeless" debris/collections in the area. Received Complaint Response ba
SU11	12/16/2005	Mathilda Ave and Highway 101 on-ramps and exits	KAB	2.5	CalTrans cleans the area periodically and appears to have been picked up a few weeks after the assessment.	Continue to monitor the site. Identify mechanism for notifying CalTrans when there is a significant accumulation.
SU07	5/24/2006	1675 Hollenbeck Ave	KAB	2.5	Site infrequently monitored by City staff. Property owners have cleaned up when requested in the past. Last time when it was inspected there was less debris.	Contacted PW/ Solid Waste Division regarding dumpster issues. They will follow up and provide a report on the outcome.
SU08	5/24/2006	727 Sunnyvale-Saratoga Rd	KAB	2.5	Site monitored occasionally by staff. Contact property/business owners when litter problem is noted.	Contacted Public Works/Solid Waste Division to determine if they could take action with the property/business owners about the problem and follow up with enforcement as needed.
SU19	5/24/2006	Wolf Road Overpass- Access from Evelyn Ave	KAB	2	City monitors the area under the overpass and picks up debris as needed. Staff notified of need for cleanup.	Mostly large debris from homeless usage of the area under the overpass. PW staff was notified of fence and debris problem, and it was taken care of within two weeks of their notification. Debris in area is little threat to the storm drains due to the larg
SU11	5/25/2006	Mathilda Ave and Highway 101 on-ramps and exits	KAB	2	CalTrans had cleaned portions of the west-bound off-ramp and east-bound on-ramp areas approximately two weeks before the assessment was completed.	Continue to monitor the site. Work with SCVURPPP to identify mechanism for notifying CalTrans when there is a significant accumulation.
SU07	12/16/2005	1675 Hollenbeck Ave	KAB	2	Site infrequently monitored by City staff. Property owners have cleaned up when requested in the past. Last time when it was inspected there was less debris.	Continue to monitor and determine if further actions need to be taken to get the property owners/businesses to control litter and clean up the areas around their dumpsters.
SU21	12/8/2005	E. Persian Drive between Sunnyvale East and Lawrence Expy. - blocks 190-400	KAB	1.5	Sunnyvale PW cleans the ROW and monitors the site for illegal dumping from nearby residences and others.	Continue to monitor the site. Notified PW to pick up debris. Site is behind the Highway sound wall and along the back fence of the mobile home park. There are not any nearby storm drains and mostly larger debris seems to appear here.
SU14	5/24/2006	Angel Ct Parking lot and Hendy Rd, near CalTrain ROW	KAB	1.5	City monitors the area monthly and crews pick up debris as needed.	Only small amounts of litter visible at this time. Will continue to monitor and initiate clean up actions when needed.
SU15	5/24/2006	Victory Village Park under Fair Oaks Overpass	KAB	1.5	City monitors and PW crews clean underpass area on a regular basis.	Business had placed garbage can where day laborers congregate. Some litter may be blowing in from railroad track. Very small amount of litter was present.

SU01	5/25/2006	600 Block Grand Fir and Bellflower	KAB	1.5	Site has not had any illegal dumping of furniture in two years. Checked back on 6/2/06 and furniture had been removed.	Site should remain on the list, but not be a priority as amounts of debris are small and illegal dumping/accumulation does not seem to be a significant problem.
SU14	12/12/2005	Angel Ct Parking lot and Hendy Rd, near CalTrain ROW	KAB	1.5	City monitors the area monthly and crews pick up debris as needed.	Contacted Public Works Staff regarding shopping cart. Also let PW Boulevards staff that litter was accumulating along the railroad track fence to the west of Hendy Rd.
SU19	12/8/2005	Wolf Road Overpass- Access from Evelyn Ave	KAB	1.5	City monitors the area under the overpass and picks up debris as needed.	Mostly large debris from homeless usage of the area under the overpass. Little threat to the storm drains due to the large size of material and it is not near any water bodies. City will continue to monitor and remove debris as needed.
SU17	12/12/2005	California Ave on-ramp to Central Expressway	KAB	1.5	Site monitored occasionally by City staff. Site is periodically cleaned by County and/or City PW staff.	Continue to monitor the site and notify PW if accumulation is significant.
SU17	5/24/2006	California Ave on-ramp to Central Expressway	KAB	1.5	Site may have been cleaned up recently since only a small amount of debris was visible.	Continue to monitor the site and notify PW if accumulation is significant. However, site is not a threat to waterways and quantity of debris present is small, so it should be a low priority for future efforts.
SU01	12/16/2005	600 Block Grand Fir and Bellflower	KAB	1	Streets swept by City. Periodic monitoring by city staff or receipt of complaints by Neighborhood Preservation.	A number of shopping carts were observed in the back alleyway. City PW staff were notified. Should probably remain on list for potential illegal dumping, but not a priority site due to distance from storm drains and waterways.
SU05	5/24/2006	594 El Camino Real, Alleyway behind business	KAB	1	Site monitored occasionally by City staff.	Suggest removal from trash hot spot list as there has not been a litter problem here in the past year. No nearby waterways are present and the amount of debris/litter that could get into storm drains is small.
SU15	12/12/2005	Victory Village Park under Fair Oaks Overpass	KAB	1	City monitors and PW crews clean underpass area on a regular basis.	In the past, most of the litter seen a this site appeared to come from the day-labor force that frequent the sidewalk outside the Home Depot store. This appears to have been cleaned up either by business staff or city crews in the area. Very little litt
SU21	5/24/2006	E. Persian Drive between Sunnyvale East and Lawrence Expy. - blocks 190-400	KAB	1	Sunnyvale PW cleans the ROW and monitors the site for illegal dumping from nearby residences and others.	Continue to monitor the site and have PW pick up debris as needed. Site is behind the Highway 237 sound wall and along the back fence of the mobile home park. There are not any nearby storm drains and mostly larger debris seems to appear here.
SU05	12/16/2005	594 El Camino Real, Alleyway behind business	KAB	1	Site monitored occasionally by City staff.	Consider removal from trash hot-spot list
SU16b	1/20/2006	Sunnyvale East Channel, below Caribbean Bridge crossing, 100 ft north of access gate/fence	RTA	67	City crews clean up along road right of way. Most of the debris observed this time either washed down from upstream or came in with high tides during storms.	Continue monitoring to see if upstream efforts or BMPs that might be installed as part of a pilot project can help reduce quantities observed.
SU16b	6/2/2006	Sunnyvale East Channel, below Caribbean Bridge crossing, 100 ft north of access gate/fence	RTA	83	City crews clean up along road right of way. Most of the debris observed this time appeared to be washed down from upstream, with some blowing in from the roadway.	Continue monitoring to see if upstream efforts or BMPs that might be installed as part of a pilot project can help reduce quantities observed. Amount of litter debris observed this time was significantly less than what was observed in January after winter

Sunnyvale West

ID #	Date	Location	Assessment Tool	Score	Existing Management Actions	Recommended Management Actions and/or Future Evaluations
SU16c	5/24/2006	Caribbean Drive between Lawrence Expressway and Matilda Ave.	KAB	1.5	Sunnyvale PW cleans right of way and center divider periodically. Most of the litter present on the roadway and median comes from trucks entering and leaving the SMART station materials recovery facility off of Borregas Ave. City crews clean the ROW area and the contractor who operates the SMART Station sweeps the stre

SU16c	12/8/2005	Caribbean Drive between Lawrence Expressway and Matilda Ave.	KAB	1.5	Sunnyvale PW cleans right of way and center divider periodically. Street is swept bi-weekly by SMART Station Contractor.	Most of the litter present on the roadway and median comes from trucks entering and leaving the SMART station materials recovery facility off of Borregas Ave. City crews clean the ROW area and the contractor who operates the SMART Station sweeps the stre
SU16a	5/26/2006	Sunnyvale West Channel, 100 ft below Caribbean Bridge crossing	RTA	100	City crews clean up along road right of way. Most of the debris observed seemed to have washed down from upstream sources, very little littering along access road/trail bank.	About the same amount of litter debris was removed during this assessment. No potential new actions have been identified to help reduce litter in the area.
SU16a	12/6/2005	Sunnyvale West Channel, 100 ft below Caribbean Bridge crossing	RTA	100	City crews clean up along road right of way. Most of the debris observed seemed to have washed down from upstream sources, very little littering along access road/trail bank.	Channel was adopted under District's Adopt-a- Creek program. Further investigations upstream to the point where the channel goes into an underground box culvert by Matilda Ave did not show any upstream business sources. (e.g., open dumpsters or outdoor

Collaboration ATTACHMENT K TABLE 4

Baylands						
ID #	**Date**	**Location**	**Assessment Tool**	**Score**	**Existing Management Actions**	**Recommended Management Actions and/or Future Evaluations**
CL01	5/10/2006	Stevens Creek - La Avenida site	RTA	67	Site is cleaned up at least twice each year by volunteers and park patrol cleans up daily along the trail area.	The majority of litter/debris observed comes from upstream sources. May be a good point to continue monitoring to determine if upstream measures to control litter are effective.
Stevens Creek						
ID #	**Date**	**Location**	**Assessment Tool**	**Score**	**Existing Management Actions**	**Recommended Management Actions and/or Future Evaluations**
CL04	5/3/2006	Stevens Creek - Moss Rock	RTA	68	Site occasionally cleaned up by volunteers. No current management actions in place - property owner is believed to be the County. Area appears to have increased "party" activity, along with new illegal dumping of yard waste observed.	Contacted County staff and confirmed that area was on County Parks property. County Parks staff will increase patrols to the area and try to prevent future problems. Continued monitoring of the site is recommended.
CL05	12/16/2005	Stevens Creek - West Valley Elementary School Bridge crossing	RTA	82	Site is monitored by Stevens Permanente Watershed Council Streamkeeper program. Accumulated trash is picked up monthly, when accessible.	Continue monitoring to see if upstream efforts or BMPs reduce amounts of trash observed. Consider working with school on litter control project.
CL02	5/10/2006	Stevens Creek - El Camino Bridge crossing	RTA	91	Site occasionally cleaned up by volunteers. No current management actions in place. Large accumulation of floating debris on side of bank downstream of assessment area.	Site is located below the El Camino bridge and several upstream storm drain outfalls. Water was higher and faster than last year at the time sampled. Will work with volunteers to get the downstream area trash accumulation picked up.
CL05	5/3/2006	Stevens Creek - West Valley Elementary School Bridge crossing	RTA	95	Site is monitored by Stevens and Permanente Watershed Council Streamkeeper volunteer. Litter is collected on a monthly basis from one side of the creek, depending on accessibility and creek water levels.	Site is located just below an outfall for West Valley Elementary and the residential areas nearby. Monitoring will continue at this site. May consider getting school involved with trash/clean up activities on their grounds.
CL06	12/16/2005	Stevens Creek, foot bridge crossing behind West Valley Elementary School - directly below storm drain outfall	RTA	99	Site is monitored by Stevens Permanente Watershed Council Streamkeeper program. Accumulated trash is picked up monthly, when accessible.	Continue monitoring to see if upstream efforts or BMPs reduce quantities of trash observed. Consider working with school on litter control project.
CL03	5/3/2006	Stevens Creek - McClellan Ranch	RTA	101	Site often cleaned by Park staff and students. Most recent cleaning occurred on 3/18/06	Very little debris was found. Park area is well maintained. Does not appear to collect debris from upstream areas. May be a good reference point.

Trash Survey Forms/Data and Photos

Santa Clara Valley
Urban Runoff
Pollution Prevention Program

Trash Problem Area Activity Data Collection Form

Date: 12-08-2005

I. Site Information

1. **Site ID# SU 21 Watershed:** Sunnyvale West Channel **Location:** E.Persian between Sunnyvale East and Lawrence Expy behind the mobile park

II. Assessment Information

1. Which assessment tool was used? (Check one)
   ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
   ☒**Non-Creek**-KAB Litter Index ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 1.5
3. Windshield Survey Results-Trash Priority: ☐ **NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? 20%
5. This assessment is ☒ **Initial** ☐**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site? _____

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☐Plastic bags	☐Cigarette butts	☐Fabric and cloth
☐Styrofoam products	☐Plastic/Synthetic items	☐Toxic substances
☐Aluminum cans	☐Tires	☐Appliances
☐Bottles (plastic and glass)	☒Woody debris	☒Furniture
☐Convenience/Fast Food wrappers	☒Yard waste	☐Biohazards
☒Man-made wood products	☐Batteries	☐Other

2. Potential trash source (Check all that apply):

☐Trash accumulation (water-borne)	☐Homeless encampments	☐Outfall _____
☐Trash accumulation (wind-borne)	☒Illegal dumping	☐Other _____
☐Litter-Vehicular	☐Litter-Dumpster/Receptacle (describe) _____	

   ☐Litter-Commercial business (name) _____
   ☐Litter-School/Institution (name) _____
   ☐Litter-Other (describe) _____
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☐**Creek N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible): behind the mobile park

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☐ **No** ☒
1b. If trash was removed, provide total weight or volume (if known): _____
1c. Photographic documentation: **Yes**☒ **No**☐

2a. Other Trash Management Actions Taken (describe): Contacted the PW staff and notified about the illegal dumping. They followed up with a discussion with the mobile home park manager and the debris in the ROW was picked up.
3a. Follow-up action needed: **Yes** ☐ **No**☒
3b. Future trash management actions needed (Please describe): continue monitor the site and notify the PW Staff as if the problem occurs again.

3c. Is trash routinely removed from this site? **Yes** ☐ **No** ☒ If yes, at what frequency Site is monitored by PW
3d. Is a future assessment needed? **Yes**☒ **No**☐
3e. If Yes, which tool? ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
☒**Non-Creek**-KAB Litter Index ☐Other _____

Notes: _____

I. Site Information

1. **Site ID#** CL05 **Watershed:** Stevens creek- behind west valley Elementary-Northern side
Location: 10ft south of pathway to 90ft north(under the bridge)

II. Assessment Information

1. Which assessment tool was used? (Check one)
☒**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
☐**Non-Creek**-KAB Litter Index ☐Other _____

2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 82

3. Windshield Survey Results-Trash Priority: ☐ **NA** ☐**High** ☐**Medium** ☐**Low**

4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? 30%

5. This assessment is ☒ **Initial** ☐**Follow-up** (Check one)

6. If applicable, how many follow-up assessments have been conducted at this site?_____

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☒Metal products	☐Construction debris
☐Plastic bags	☒Cigarette butts	☒Fabric and cloth
☒Styrofoam products	☒Plastic/Synthetic items	☒Toxic substances
☐Aluminum cans	☐Tires	☐Appliances
☐Bottles (plastic and glass)	☐Woody debris	☐Furniture
☒Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☐Other

2. Potential trash source (Check all that apply):

☒Trash accumulation (water-borne)	☐Homeless encampments	☒Outfall storm drain
☒Trash accumulation (wind-borne)	☐Illegal dumping	☐Other _____
☐Litter-Vehicular	☐Litter-Dumpster/Receptacle (describe) _____	

☐Litter-Commercial business (name)_____
☐Litter-School/Institution (name)_____
☐Litter-Other (describe)_____

3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☒**Creek N/A**

4. Identify adjacent land uses to the trash areas assessed (if possible): _____

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☐ **No** ☒
1b. If trash was removed, provide total weight or volume (if known):about 2-3lbs
1c. Photographic documentation: **Yes**☒ **No**☐
2a. Other Trash Management Actions Taken (describe): All the trash was removed on Sunnyvale side of creek. Two spray cans, Styrofoam pellets and debris found on the Los altos side of the creek were not removed. Unable to reach them due to high water flow and steepness of Los Altos side of the bank.
3a. Follow-up action needed: **Yes** ☒ **No**☐
3b. Future trash management actions needed (Please describe): Continue to monitor the site as part of Stevens Creek Streamkeeper program.

3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency Monthly by Streamkeepers
3d. Is a future assessment needed? **Yes**☒ **No** ☐
3e. If Yes, which tool? ☒**Creek**-RWQCB Version7.0 ☐**Non-Creek**-Windshield Survey
☐**Non-Creek**-KAB Litter Index ☐Other_____

Notes: An orange and a golf ball was found in the water. There were hard plastic pieces, Mylar wrappers and a piece of old fence was found high on the bank. The large amount of Styrofoam may be due to high water flow earlier in the month where it was trapped on the grass.

I. Site Information

1. **Site ID#** SU 04 **Watershed:** Calabazas Creek **Location:** 1034 E. El Camino real- Dumpsters of the business.

II. Assessment Information

1. Which assessment tool was used? (Check one)
   - ☐**Creek**-RWQCB Version 7.0
   - ☐**Non-Creek**-Windshield Survey
   - ☒**Non-Creek**-KAB Litter Index
   - ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 1.0
3. Windshield Survey Results-Trash Priority: ☒**NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? 0%
5. This assessment is ☒**Initial** ☐**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site? _____

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☐Plastic bags	☐Cigarette butts	☐Fabric and cloth
☐Styrofoam products	☐Plastic/Synthetic items	☐Toxic substances
☐Aluminum cans	☐Tires	☐Appliances
☐Bottles (plastic and glass)	☐Woody debris	☐Furniture
☐Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☐Other

2. Potential trash source (Check all that apply):
   - ☐Trash accumulation (water-borne)
   - ☐Trash accumulation (wind-borne)
   - ☐Litter-Vehicular
   - ☐Homeless encampments
   - ☐Illegal dumping
   - ☒Litter-Dumpster/Receptacle (describe) New compactors within an enclosure. Not a litter issue.
   - ☐Outfall _____
   - ☐Other _____
   - ☐Litter-Commercial business (name) _____
   - ☐Litter-School/Institution (name) _____
   - ☐Litter-Other (describe) _____
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☐**Creek**☒ **N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible): Businesses parking lot

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☐ **No** ☒
1b. If trash was removed, provide total weight or volume (if known): _____
1c. Photographic documentation: **Yes** ☒ **No**☐
2a. Other Trash Management Actions Taken (describe): None at this time.
3a. Follow-up action needed: **Yes** ☐ **No** ☒
3b. Future trash management actions needed (Please describe): new compactors with no litter issue(can be removed from the hot spot list
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency unknown
3d. Is a future assessment needed? **Yes** ☒ **No** ☐

3e. If Yes, which tool?
- ☐**Creek**-RWQCB Version 7.0
- ☐**Non-Creek**-Windshield Survey
- ☒**Non-Creek**-KAB Litter Index
- ☐Other _____

☒**Non-Creek**-KAB Litter Index ☐Other _____

Notes: Most of the debris in the alley appeared to come from the grocery operation in the mall. However other businesses had overflowing dumpsters. Numerous wood pallets, shopping carts, display racks, and other light plastic wrap, paper, cardboard, and packing material was observed outside the dumpster or any enclosed area. There were also two carts filled with things belonging to homeless encampment. PW/Solid waste notified of problems. See attached follow up

Complaint: 2005-2861
Address: 727 SUNNYVALE SARATOGA RD
Descript.: Alleyway behind Trader Joe's off of Cezanne. The strip mall there with Trader Joe's, Aaron Brothers and a couple of other businesses has bunch of overflowing dumpsters plus debris that has fallen from the dumpsters in the alleyway.
Owner: Leung Patrick K Trustee & Et Al
Own Ph:

Sch. Date: 1/10/06 **Description:** Inspect for Compliance. Trash, debris, outside storage, overflowing dumpsters behind commercial, strip mall building.

Insp. Date: 1/10/06 **Comments:** 2:30 PM, The area behind the strip mall is exceptionally neat and clean for a commercial delivery, pick-up and trash area. Closed case 1/10/06.

Sch. Date: 12/29/05 **Description:** Inspect for Compliance. Trash, debris, outside storage, overflowing dumpsters behind commercial, strip mall building.

Insp. Date: 12/29/05 **Comments:** Checked on site at 1:20 PM. Except for some stacks of corrugated there were in the process of being put on a Big 5 truck the area was relatively neat. The dumpster were recently emptied. There were three neat piles of leaves that have been recently been swept up. The area behind Aaron Brothers Art store, Beck's Shoe store, the Dentist office and the restaurant were exceptionally clean. It appears that Trader Joes is the largest trash producer in the strip mall and then Big 5 to a much lesser extent. I talked to the Big 5 Shift Manager and told him of the trash compliant, asked him to work on keeping the area neat and would he pass the request on to his boss and the staff at Big 5. I talked to the Shift Manager and Receiving Clerk at Trader Joes and told them of the trash complaint and asked to work on keeping the area neat and would they pass the request on to the bosses and the staff at Trader Joes, The managers that I talked to both gave me the same summary. During the holiday season they produced more trash then usual and it was much busier so they had less time to deal with it. I replied they could ask for extra pickups and to work with the property owners to deal with these issues. To follow up again on 1/10/05 as planned.

Sch. Date: 12/13/05 **Description:** Alleyway behind Trader Joe's off of Cezanne. The strip mall there with Trader Joe's, Aaron Brothers and a couple of other businesses has bunch of overflowing dumpsters plus debris that has fallen from the dumpsters in the alleyway.

Insp. Date: 12/13/05 **Comments:** Found outside storage of storage units, racks, wood covers, baskets. Found overflowing dumpster and trash and debris scattered on access road and dumpster storage areas. Mailed courtesy notice to property owner, Patrick and Ester Leung, 900 Kearny St., Suite 618, San Francisco, Ca 94133-5126. 'The City of Sunnyvale has received complaints of garbage overflow, outside storage, junk, debris, and trash behind the commercial establishments at 144-727 Sunnyvale-Saratoga Road. Please work with your property management company and tenants to remove stored items, keep the area and clean and provide more trash pickups if necessary.' Included one copy of file photo showing debris and overflowing trash containers . Comply date 1/10/06.

   ☐Litter-Commercial business (name) _____
   ☐Litter-School/Institution (name) _____
   ☐Litter-Other (describe) _____
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☐**Creek** ☒**N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible): highway on-ramps and exits

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☐ **No** ☒
1b. If trash was removed, provide total weight or volume (if known): _____
1c. Photographic documentation: **Yes** ☒ **No** ☐
2a. Other Trash Management Actions Taken (describe): _____
3a. Follow-up action needed: **Yes** ☐ **No** ☒
3b. Future trash management actions needed (Please describe): Area is picked up by Cal Trans, but due to heavy traffic, becomes littered quickly after a clean-up. Site should continue to be monitored and then consider what region-wide issues can be address with CalTrans through SCVURPPP.
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency Unknown, need to ask Cal Trans.
3d. Is a future assessment needed? **Yes** ☒ **No** ☐
3e. If Yes, which tool? ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
☒**Non-Creek**-KAB Litter Index ☐Other _____

Notes: There was visible trash both inside and outside the access control fences.

I. Site Information

1. **Site ID#** **SU 12** **Watershed:** Calabazas Creek **Location:** Lawrence Expressway and Highway 237 intersection- on ramps and exits

II. Assessment Information

1. Which assessment tool was used? (Check one)
   ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
   ☒**Non-Creek**-KAB Litter Index ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 3
3. Windshield Survey Results-Trash Priority: ☒**NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? 100%
5. This assessment is ☐ **Initial** ☒**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site? Second year of assessments

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☒Construction debris
☒Plastic bags	☐Cigarette butts	☐Fabric and cloth
☐Styrofoam products	☐Plastic/Synthetic items	☐Toxic substances
☒Aluminum cans	☐Tires	☐Appliances
☒Bottles (plastic and glass)	☐Woody debris	☐Furniture
☐Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☒Other paper, fiber,box

2. Potential trash source (Check all that apply):
   ☐Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☒Trash accumulation (wind-borne) ☐Illegal dumping ☐Other _____
   ☒Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☐Litter-Commercial business (name)_____
   ☐Litter-School/Institution (name)_____
   ☐Litter-Other (describe)_____
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☐**Creek**☒ **N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible): Freeway on-ramps and exits _____

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☐ **No** ☒
1b. If trash was removed, provide total weight or volume (if known): _____
1c. Photographic documentation: **Yes** ☐ **No** ☐
2a. Other Trash Management Actions Taken (describe): _____
3a. Follow-up action needed: **Yes** ☒ **No** ☒
3b. Future trash management actions needed (Please describe): Area is under CAL Trans jurisdiction. City is responsible for dealing with area along Carribean Drive, but not the on-ramps and exits
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency Unknown, need to check with CAL Trans
3d. Is a future assessment needed? **Yes** ☒ **No** ☐
3e. If Yes, which tool? ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
☒**Non-Creek**-KAB Litter Index ☐Other_____

Notes: Trashes are being picked up by Cal Trans, but due to heavy traffic, it becomes littered very quickly. The issues dealing with litter from Cal Trans is something that we need to consider as a SCUVRPPP-wide topic.

Site ID# SU 13 **Watershed**: Calabazas Creek **Location:** Willow Ave. and Aster Ave. intersection to Agate Dr.(in Santa Clara) Area under Lawrence Expressway Overpass and Cal Train Station

II. Assessment Information

1. Which assessment tool was used? (Check one)
   ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
   ☒**Non-Creek**-KAB Litter Index ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 2.5
3. Windshield Survey Results-Trash Priority: ☒**NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? 50%
5. This assessment is ☐ **Initial** ☒**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site? Second year of assessments

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☒Rubber products	☐Metal products	☐Construction debris
☒Plastic bags	☐Cigarette butts	☐Fabric and cloth
☐Styrofoam products	☒Plastic/Synthetic items	☐Toxic substances
☐Aluminum cans	☒Tires	☐Appliances
☒Bottles (plastic and glass)	☐Woody debris	☐Furniture
☐Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☒Other box spring mattress

2. Potential trash source (Check all that apply):

☐Trash accumulation (water-borne)	☐Homeless encampments	☐Outfall _____
☒Trash accumulation (wind-borne)	☒Illegal dumping	☐Other _____
☒Litter-Vehicular	☐Litter-Dumpster/Receptacle (describe) _____	

   ☐Litter-Commercial business (name)_____
   ☐Litter-School/Institution (name)_____
   ☒Litter-Other (describe) homeless activity, passing through
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☐**Creek** ☒**N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible): Road way/Lawrence Expressway embankment and overpass. CalTrain station stop.

IV. Trash Management Actions

1a. Are trash management actions planned for the site? Yes☒ No ☐ Contact Public Works to clean up homeless debris and illegal dumping in ROW

1c. Photographic documentation: **Yes** ☒ **No** ☐

2a. Other Trash Management Actions Taken (describe): None Yet

3a. Follow-up action needed: **Yes** ☒ **No** ☐

3b. Future trash management actions needed (Please describe):Determine if overpass embankment is County road jurisdiction. Continue to monitor for homeless debris.

3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency as needed by PW

3d. Is a future assessment needed? **Yes** ☒ **No** ☐

3e. If Yes, which tool? ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
☐**Non-Creek**-KAB Litter Index ☐Other_____

Notes: Illegal dumping of tires and a box spring mattress was found and a couple of bags of trash were found Litter on Lawrence Expy ROW (County Jurisdiction) in need of litter pick up.

4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? 40%
5. This assessment is ☒**Initial** ☐**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site? _____

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☒Plastic bags	☐Cigarette butts	☐Fabric and cloth
☐Styrofoam products	☐Plastic/Synthetic items	☐Toxic substances
☐Aluminum cans	☐Tires	☐Appliances
☐Bottles (plastic and glass)	☐Woody debris	☐Furniture
☒Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☒Other paper cups, paper, one shopping cart

2. Potential trash source (Check all that apply):
   ☐Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☒Trash accumulation (wind-borne) ☐Illegal dumping ☐Other _____
   ☒Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☐Litter-Commercial business (name) _____
   ☐Litter-School/Institution (name) _____
   ☒Litter-Other (describe) _____
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☐**Creek** ☒**N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible): Cal Train ROW, City-owned parking lot and Businesses

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☐ **No** ☒
1b. If trash was removed, provide total weight or volume (if known): _____
1c. Photographic documentation: **Yes** ☒ **No**☐
2a. Other Trash Management Actions Taken (describe): _____
3a. Follow-up action needed: **Yes**☒ **No** ☐ Contacted PW about shopping carts and litter in parking lot.
3b. Future trash management actions needed (Please describe) Will continue to monitor as litter seems to appear periodically. May be a candidate for removal from the hot spot list if litter continues to be there in low amounts.
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency Monthly, by City crews
3d. Is a future assessment needed? **Yes** ☒ **No** ☐

3e. If Yes, which tool? ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
☒**Non-Creek**-KAB Litter Index ☐Other _____

Notes: City owned parking lot under Matilda Ave and strip of land adjacent to Cal Train ROW on Hendy Street. Area is monitored by City PW department and cleaned up as needed or on a monthly basis. Occasional shopping carts appear in the area as well. Litter along the side of the railroad track just west of the Hendy Works. Some observed in the parking lot, but nothing along the CalTrain parking area.

I. Site Information

1. **Site ID# SU 19 Watershed:** Sunnyvale East **Location: W**olf Road over pass/ North side access from Evelyn

II. Assessment Information

1. Which assessment tool was used? (Check one)
   ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
   ☒**Non-Creek**-KAB Litter Index ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 1.5
3. Windshield Survey Results-Trash Priority: ☒**NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? 10%
5. This assessment is ☐**Initial** ☒**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site? Second year of assessments

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☐Plastic bags	☐Cigarette butts	☒Fabric and cloth
☐Styrofoam products	☐Plastic/Synthetic items	☐Toxic substances
☐Aluminum cans	☐Tires	☐Appliances
☐Bottles (plastic and glass)	☐Woody debris	☒Furniture
☐Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☒Man-made wood products	☐Batteries	☐Other sleeping bag

2. Potential trash source (Check all that apply):
   ☐Trash accumulation (water-borne) ☒Homeless encampments ☐Outfall _____
   ☐Trash accumulation (wind-borne) ☒Illegal dumping ☐Other _____
   ☐Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☐Litter-Commercial business (name)_____
   ☐Litter-School/Institution (name)_____
   ☐Litter-Other (describe)_____
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☐**Creek**☒ **N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible):Industrial park, city owned property

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☒ **No** ☐
1b. If trash was removed, provide total weight or volume (if known): _____
1c. Photographic documentation: **Yes** ☐**No**☒
2a. Other Trash Management Actions Taken (describe): Site monitored regularly by PW staff as a problem dumping area. PW notified of need to pickup debris from city owned property
3a. Follow-up action needed: **Yes** ☒ **No** ☐
3b. Future trash management actions needed (Please describe):_____
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency as needed or accumulated
3d. Is a future assessment needed? **Yes** ☒ **No** ☐
3e. If Yes, which tool? ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
☒**Non-Creek**-KAB Litter Index ☐Other_____

Notes: Occasional homeless users – some illegal dumping. Area under Wolfe road overpass and is monitored by the City.

1. **Site ID#** SU 20 **Watershed:** Calabazas Creek **Location:** Wildwood Drive off Lawrence Expressway

II. Assessment Information

1. Which assessment tool was used? (Check one)
   ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
   ☒**Non-Creek**-KAB Litter Index ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 2
3. Windshield Survey Results-Trash Priority: ☒**NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? 60%
5. This assessment is☐ **Initial** ☒**Follow-up** (Check one)(site inspected by PW)
6. If applicable, how many follow-up assessments have been conducted at this site? Second year of inspections

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☐Plastic bags	☐Cigarette butts	☐Fabric and cloth
☐Styrofoam products	☐Plastic/Synthetic items	☐Toxic substances
☒Aluminum cans	☐Tires	☐Appliances
☐Bottles (plastic and glass)	☐Woody debris	☐Furniture
☒Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☐Other box, shopping cart

2. Potential trash source (Check all that apply):
   ☐Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☒Trash accumulation (wind-borne) ☒Illegal dumping ☐Other _____
   ☒Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☐Litter-Commercial business (name)_____
   ☐Litter-School/Institution (name)_____
   ☒Litter-Other (describe)Maybe some litter from pedestrians
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☐**Creek**☒ **N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible):Residential, convenience store, highway/ Expressway

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☒ **No** ☐
1b. If trash was removed, provide total weight or volume (if known): _____
1c. Photographic documentation: **Yes** ☐**No**☒
2a. Other Trash Management Actions Taken (describe): Notify PW to pick up litter. City-owned ROW.
3a. Follow-up action needed: **Yes** ☐ **No** ☒
3b. Future trash management actions needed (Please describe): Consider trying to work with nearby business to put out trash receptacles. City will continue to monitor and clean up as needed.
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency as needed or 3x a year
3d. Is a future assessment needed? **Yes** ☒ **No** ☐
3e. If Yes, which tool? ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
☒**Non-Creek**-KAB Litter Index ☐Other_____

Notes: City owned property. Litter may be from local pedestrians or some may be wind blown from nearby expressway

3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency unknown
3d. Is a future assessment needed? **Yes**☒ **No** ☐
3e. If Yes, which tool? ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
☒**Non-Creek**-KAB Litter Index ☐Other_____

Notes: Quantity of litter was such that it could be a problem in storm drains. Some concerns about illegal dumping as well. Need to follow up at site and see if problems are still present.

Trash Problem Area Activity Data Collection Form

Date: May 24, 2006

I. Site Information

1. **Site ID# SU08** **Watershed: Sunnyvale East** **Location: 727 Sunnyvale-Saratoga Road**

II. Assessment Information

1. Which assessment tool was used? (Check one)
   ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
   ☒**Non-Creek**-KAB Litter Index ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 2.5
3. Windshield Survey Results-Trash Priority: ☒ **NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? 40%
5. This assessment is ☐ **Initial** ☒**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site? Second year of assessments

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☒Plastic bags	☐Cigarette butts	☐Fabric and cloth
☒Styrofoam products	☒Plastic/Synthetic items	☐Toxic substances
☐Aluminum cans	☐Tires	☐Appliances
☒Bottles (plastic and glass)	☐Woody debris	☐Furniture
☐Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☒Other paper/cardboard

2. Potential trash source (Check all that apply):
   ☐Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☐Trash accumulation (wind-borne) ☐Illegal dumping ☐Other _____
   ☐Litter-Vehicular ☒Litter-Dumpster/Receptacle (describe) _____
   ☒Litter-Commercial business (name)_____
   ☐Litter-School/Institution (name)_____
   ☐Litter-Other (describe)_____
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☐**Creek**☒ **N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible): Commercial businesses and parking lot

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☐ **No** ☒
1b. If trash was removed, provide total weight or volume (if known): _____
1c. Photographic documentation: **Yes**☒ **No**☐
2a. Other Trash Management Actions Taken (describe): Contact PW – Solid Waste Division for follow-up
3a. Follow-up action needed: **Yes** ☒ **No**☐
3b. Future trash management actions needed (Please describe): Continue to monitor and require actions by property owner.
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency unknown
3d. Is a future assessment needed? **Yes**☒ **No** ☐
3e. If Yes, which tool? ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
☒**Non-Creek**-KAB Litter Index ☐Other_____

Notes: Problem appears to be chronic. Actions are taken each time problems are noted, Clean up occurs for a while, then accumulation and overflowing dumpsters occur again.

II. Assessment Information

1. Which assessment tool was used? (Check one)
   ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
   ☒**Non-Creek**-KAB Litter Index ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 2.5
3. Windshield Survey Results-Trash Priority: ☒ **NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? 15%
5. This assessment is ☐ **Initial** ☒**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site? Second year of assessments

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☒Plastic bags	☒Cigarette butts	☐Fabric and cloth
☒Styrofoam products	☒Plastic/Synthetic items	☐Toxic substances
☒Aluminum cans	☐Tires	☐Appliances
☒Bottles (plastic and glass)	☐Woody debris	☐Furniture
☒Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☐Other

2. Potential trash source (Check all that apply):
   ☐Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☐Trash accumulation (wind-borne) ☐Illegal dumping ☐Other _____
   ☐Litter-Vehicular ☒Litter-Dumpster/Receptacle (describe) _____
   ☒Litter-Commercial business (name)_____
   ☐Litter-School/Institution (name)_____
   ☐Litter-Other (describe)_____
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☐**Creek** ☒**N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible): commercial/strip mall

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☐ **No** ☒
1b. If trash was removed, provide total weight or volume (if known): _____
1c. Photographic documentation: **Yes**☒ **No**☐
2a. Other Trash Management Actions Taken (describe): Notify PW – solid waste of problem
3a. Follow-up action needed: **Yes** ☐ **No**☒
3b. Future trash management actions needed (Please describe): May want to continue on list, but keep as a lower priority due to location and type of waste observed.
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency unknown
3d. Is a future assessment needed? **Yes**☒ **No** ☐
3e. If Yes, which tool? ☐**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
☒**Non-Creek**-KAB Litter Index ☐Other_____

Notes: Site had not had any litter problems in previous two visits, now there are problems again. Need to check back and see if they are chronic or just a one-time occurrence.

5. This assessment is ☐ **Initial** ☒**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site? Second year of assessments

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☒Plastic bags	☐Cigarette butts	☐Fabric and cloth
☒Styrofoam products	☐Plastic/Synthetic items	☐Toxic substances
☐Aluminum cans	☐Tires	☐Appliances
☒Bottles (plastic and glass)	☐Woody debris	☐Furniture
☒Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☒Other- paper products

2. Potential trash source (Check all that apply):
   ☒Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☒Trash accumulation (wind-borne) ☐Illegal dumping ☐Other _____
   ☒Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☐Litter-Commercial business (name)_____
   ☐Litter-School/Institution (name)_____
   ☐Litter-Other (describe)_____
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☒**Creek/Channel N/A**

Identify adjacent land uses to the trash areas assessed (if possible): Baylands public trail, closed landfill, roadway

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☐ **No** ☒
1b. If trash was removed, provide total weight or volume (if known): < 5 lbs or 1 cubic foot
1c. Photographic documentation: **Yes**☒ **No**☐

2a. Other Trash Management Actions Taken (describe): City cleans road ROW and contractor for SMaRT Station is responsible for litter pick up alongside of roadway 2x per week according to their contract
3a. Follow-up action needed: **Yes** ☐ **No**☐
3b. Future trash management actions needed (Please describe): Identify if there are any upstream businesses that might be adding to the amount of litter in the channel (especially Styrofoam packing materials)

3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency 2x per year under "adopt a creek program
3d. Is a future assessment needed? **Yes**☒ **No** ☐
3e. If Yes, which tool? ☒**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey ☐Other_____ ☐**Non-Creek**-KAB Litter Index

Notes: Most common debris noted were Styrofoam cups and plastic mylar food wrappers. Styrofoam pellets were also very common, but small and lightweight.

Date: June 2, 2006

I. Site Information

1. **Site ID# SU16b Watershed: Sunnyvale East Channel Location: 100 ft north of Caribbean Dr. bridge**

II. Assessment Information

1. Which assessment tool was used? (Check one)
   ☒**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
   ☐**Non-Creek**-KAB Litter Index ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 83
3. Windshield Survey Results-Trash Priority: ☒ **NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? about 10%
5. This assessment is ☐ **Initial** ☒**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site? Second year of assessments

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☒Rubber products	☒Metal products	☒Construction debris
☒Plastic bags	☐Cigarette butts	☐Fabric and cloth
☒Styrofoam products	☒Plastic/Synthetic items	☐Toxic substances
☒Aluminum cans	☐Tires	☐Appliances
☒Bottles (plastic and glass)	☐Woody debris	☐Furniture
☒Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☒Man-made wood products	☐Batteries	☒Other – dog waste on trail

2. Potential trash source (Check all that apply):
   ☒Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☒Trash accumulation (wind-borne) ☐Illegal dumping ☐Other _____
   ☒Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☐Litter-Commercial business (name)_____
   ☐Litter-School/Institution (name)_____
   ☐Litter-Other (describe)_____
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☒**Creek/Channel N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible): Public trail, roadway, sports complex

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☐ **No** ☒
1b. If trash was removed, provide total weight or volume (if known): less than 5 lbs of trash , between 1-2 cu. ft.
1c. Photographic documentation: **Yes**☒ **No**☐
2a. Other Trash Management Actions Taken (describe): City cleans trash in road ROW and contractor for SMaRT station cleans along sides of roadways 2x per week per their contract.
3a. Follow-up action needed: **Yes** ☒ **No**☐
3b. Future trash management actions needed (Please describe): Continue to monitor. May be a good monitoring site to determine effectiveness of upstream outfall trash control effort
3c. Is trash routinely removed from this site? **Yes** ☐ **No** ☐ If yes, at what frequency Don't know
3d. Is a future assessment needed? **Yes**☒ **No** ☐
3e. If Yes, which tool? ☒**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey ☐Other_____ ☐**Non-Creek**-KAB Litter Index

Notes: Trash observed was less than what was found in January 2006, just after some severe storms. Also, more difficult to pick up debris due to high vegetation growth by this time of year. Suggest assessments be done prior to spring, if possible.

FY 2005-2006 Annual Report
Municipality: Sunnyvale

STAFF TRAINING BY DEPARTMENT/DIVISION FOR FY 05-06

1) Staff Training Table

TRAINING DATE	SUBJECT	APPROXIMATE NUMBER OF STAFF ATTENDING
PW - Street Maintenance		
September 14, 2005	Non-Point Source, Hazardous Wastes, URMP and storm drains, Roads Operation and Maintenance, Rural Roads SOPs (PW Env. Staff Presentation)	23
March 29, 2006	URMP, washrack refresher	24
June 21, 2006	General Storm Water Permit (PW Env. Staff presentation)	25
PW - Corp Yard & Public Works Field Services: Water, Sewer, and Stormwater		
September 13, 2005	Non-Point Source, Hazardous Wastes, URMP and storm drains, Roads Operation and Maintenance, Rural Roads SOPs (PW Env. Staff presentation)	41
October 5, 2005	Daily logs, records, SOP, BMP for street sweeping	38
March 28, 2006	URMP, Wash rack refresher	36
June 20, 2006	General Storm Water Permit (PW Env. Div. Staff presentation)	44
Public Works - Street Trees and Boulevard Landscaping		
July 13, 2005	Pesticide training topics included: Safe Handling & Use, Review city IPM Policy (1 hour), Storage, Worker Protection (4hours)	13
July 20, 2005	PAPA Pesticide Application Seminar (8.5 hours) IPM Training (2 hours)IPM in Roses and New Options for Turf Management	4
July 21, 2005	Cleaning spray rig and wash rack review (1 hour)	16
August 6,2005	Recording Pesticide use (1 hour)	12
Sept. 21, 2005	Wet Weather Stormwater Pollution Prevention (PW Environmental Division Staff presentation 1 hour)	13
Jan. 17, 2006	Minimum Safety Gear for Applying any Pesticides	12
Feb. 1, 2006	NCTLC Mtg. Santa Clara pesticide training (5.5 hours)2.5 hours IPM training	20
Feb. 2, 2006	NCTLC Mtg. Santa Clara pesticide training (6 hours) 3.0 hours IPM training	15
Feb. 14, 2006	Pesticide training topics included: Safe Handling & Use, Review city IPM Policy (1 hour), Storage, Worker Protection (5 hours)	14
Feb. 28, 2006	City's IPM policy(Environmental Division Staff presentation - 1 hour)	13
March 28, 2006	Wash Rack Refresher (1hour)	40
Apr. 13, 2005	Non Point Source/MSDS (1hour)	40
May 9, 2006	Fill gas cans and filling up small equipment (1/2 hour)	15
May 16, 2006	S. J. Field Day (4 hour)	3
June 21, 2005	General Storm Water Permit –Stormwater Pollution Prevention (1hour – Environmental Division Staff presentation)	40

June 8, 2006	Update on C.3 program, as applies to planning projects. (PW Env. Div. staff presentation)	8
CDD - Building Inspection		
September 21, 2005	Wet weather inspections - Storm water protection training	7
December 1, 2005	SCVURPPP-sponsored Storm Water Protection for Construction Projects Training	1 (New-hire staff attended)
May 17, 2006	Storm Water Management Plan Requirements: Post-construction Inspection and 3rd party certification process	10
All City Departments: Parks and Rec., Public Safety, IT, Public Works, NOVA, Finance, Library, OCM, Community Development, Fleet, and Human Resources		
September 2005 – Jan 2006	Environmentally Preferable Purchasing Policy training– addressing the purchase, use, and disposal of Mercury-containing products and encouraging the use of alternatives to Hg-containing products and the City's IPM policy related to purchase or use of pesticides on City property.	Presented to Approx. 300 City staff at each group's bi-weekly staff meetings over this period.

2) Response to Regional Board Comments on previous year's annual report:
No comments were received.

3) Summarization of staff feedback, planned changes, and any other evaluation comments:

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment M – Staff Training
FY 2005-2006 Annual Report
Municipality: Sunnyvale

Staff feedback is not collected by the City from training presented by SCVURPPP or other agencies. SCVURPPP reports general feedback in the Program's section of the annual report.

Feedback is not formally collected from most in-house training that occurs at Department meetings for City staff. The evaluation of the effectiveness of in-house staff training is determined by the Environmental Division of the Public Works Department, which has oversight for the development of the annual work plan and annual report preparation for the City's NPDES Stormwater Discharge Permit. If no problems are noted during the preparation of these documents, then that is an indication that staff has been trained and knows their responsibilities under the permit and URMP requirements. If problem areas are identified, then additional staff training is provided to those specific groups who need it.

However, this year, a staff survey was done after the Environmentally Preferable Purchasing Policy (EPP Policy) was presented. Of the 54 people responding to the survey, they were generally favorable to the presentations and felt that they learned about the policy and could apply it. A copy of the survey is presented in Appendix 1 of this Attachment.

The City will continue to take advantage of training opportunities provided by the Program and other agencies, as they become available. Future training from SCVURPP is expected for HMP implementation and the Bay Area Hydrology Model. Also, additional training for BMP installation and inspection may be available.

The City will continue to provide in-house training to staff related to storm water pollution prevention, Urban Runoff Management Plan requirements, new and re-development issues, and on pollutants of concern.

#3: How did you feel about the format of the presentation (i.e. PowerPoint)?	**Liked it**	**Prefer PowerPoint isn't used (list preferred format)**	**Comments**		
Total	**50**	**4**	**54**		
P&R	1				
PS	5				
IT	3				
PW		1			
NOVA	10	1	Presenters pretty much read the PP presentation. Would rather hear them talk.		
FINANCE	1				
LIBRARY	5				
OCM	3				
CDD	3	1			
FLEET	1				
HR	5		You guys did a great job.		
Other	13	1	Don't think PP adds anything worthwhile to presentation. A few handouts and/or graphics are better.		
#4: What did you like about the presentation?	**Comment**	**Comment**	**Comment**	**Comment**	**Comment**
P&R	Provided clear examples.				

PS	Julie & Kristy were very knowledgeable and understood the policy & issues very well. Provided clear information and explained it very well. Liked the P.Point presentation.	Very informative and very well presented./Quick and to the point. Covered the important topics. I now better understand./Very well put together	Informative & put together well		
IT	Enjoyed the slide show w/the info. Good information/Brief and to the point	Informative, a lot to learn about how to do better environmentally. I would like to know more about what we can do as indivduals but know that wasn't the focus of the presentation.			
OCM	Opportunity to ask questions.	Great thorough info.	It was clear & not a lot of extra info we didn't need. Very good		
PW					
NOVA	The presentation helps staff become more aware of the environ-friendly efforts the City is spearheading./Program is well-run & speakers were excellent & very clear.	Presentation was laid out in a manner easy to follow and understand. Good examples were given that were relevant to the topic./	Info presented thoroughly & concisely./Good overview of info. Nice to know the City is concerned about the environ./Glad to hear there is a procurement policy	I was more aware of the care the City takes to be environ. responsible./Down to earth/ The City is environmentally conscious of their actions.	
FINANCE	It was very informative.				

LIBRARY	The fact the now everyone has the same info regarding the City's requirements/	The fact that you did a presentation. Info good to know. I am sure others who don't directly order supplies are not aware of the policy./Clear & concise	Pleased to learn that the City is taking a very pro-active stance.		
CDD	It was to the point. Info valuable. Presentation not too long and presenter did not read the slides. She knew her stuff.	The pace			
FLEET	Made me aware of what EPP is about				
HR	Both Julie and Kristy were very knowledgeable	gave us enough information on the subject, so that I now understand why and how we do ppe	It was well presented. It was helpful to know what the City is doing to protect the environment, even if much of it doesn't apply to our specific department.	It was inofrmative. I learned a lot.	Very thorough information presented simply.
Other	Good to know we use recycled materials/Very informative/The personal delivery of info from Julie & Kristy/Quick and to the point./Informative	Learning the City has a serious commitment to preserving our enrviron. by having resources/policies in place -not just talk.	The City is environmentally conscious of their actions./Informative, not too long, great presenters./Clear,concise, knowledgeable,passionate presenters	Concise/Info about some household items used that have lead or are hazardous./Combination of IPM & EPP into single coordinated presentation./	Well organized. Speakers used P.Point as guide for talking points, in some cases - boring.
#5: What improvements would you suggest?	**Comment**	**Comment**	**Comment**	**Comment**	**Comment**
P&R	None				
PS	None				

IT	None	Julie sounded like she had given the presentation many, many times.			
OCM	Provide more info/examples around P.Point slides instead of reading word for word.				
LIBRARY	Presentation well done, would suggest we be updated on any new info or environ. friendly products that become available.	Email or post a summary of the presentation for our review.			
PW					
NOVA	Do similar presentations to help staff w/enviro. issues. Examples: turn off equip./appliance/Xtra lights/office @ moderate temp./print drafts of recy.paper/use public transp./car pool/use less dispos.products/use natural prod./avoid water & other resource waste/use refills or supplies from Cent.stores not new ones/	None, great job./Give info without too much talking. Presentation could easily have been shorter./The focus was on purchasing. Might suggest focus also be on individual user ie, turning off computers, recent column in Mercury News about individ. responsibility & energy use.	With only one presenter for a while there was a bit of uncertainty in the flow of the presentation./Part of the presentation was a little too detailed for our dept. Most staff don't write procurement specs. or make direct purchases/	Provide more info./examples around the P.Point slides instead of reading word for word.	remind staff to use environ. friendly measures @ hm and wk.

CDD	Environmental cookies!	Julie & Kristy sharing the stage. More speakers make it more interesting.			
FLEET	Presentation was very informative. No improvement needed.				
HR	I wish I had heard about it sooner so I could comply/follow epp. It's sad that although in HR, I did not know about the EPP prior to your presentation.	Just how interesting can you make this subject??	None	For me it was new, so I'm not sure how much I will retain. Maybe send out little reminders every now and then as refreshers.	None. Good job.
Other	None/More emphasis at the beginning by introducing yourself, where you wk, quick overview so we know what is next w/the P.Point presentation.	It was kind of a dry subject. A more energetic presentation would hold everyone's attention better./Focus on people who make purchases for the City. eg. Purchasing/Stores.	was not directed at the personnel who actually make the day to day purchases for the dept./Maybe mention choosing items that don't use excessive packaging./None, good job!

September 15, 2006

Mr. Bruce H. Wolfe
Executive Officer
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: COUNTY OF SANTA CLARA CLEAN WATER PROGRAM FY 06 ANNUAL REPORT

Dear Mr. Wolfe:

This report is submitted by the County of Santa Clara, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.(a) of its reissued municipal storm water discharge National Pollutant Discharge Elimination System Permit (Orders No. 01-024, 01-119, and R2-2005-0035). This report summarizes activities performed during FY 06 in accordance with the County's Urban Runoff Management Plan (URMP), which was submitted to the Regional Board in September 1997 and updated subsequently, the performance standards contained therein, and the 2001 NPDES Storm Water Discharge Permit, as amended.

Goals and Contents of the Report:

The goals of this Annual Report are to: 1) document implementation of the URMP and the FY 06 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with NPDES Storm Water Discharge Permit requirements; and 4) share this information with other Co-permittees, jurisdiction decision-makers, and the public. A table of contents is included with the report.

Program Highlights:

1). The County's Clean Water Program continues to be funded directly from the County General Fund. As was stated in previous annual reports, the storm water fee that supported Clean Water Program activities was eliminated by the effects of Proposition 218 in 1997. The County Clean Water program is staffed by one Senior Management Analyst position. Staff members of the involved departments coordinate compliance and reporting activities as they relate to each department, with guidance from the Clean Water Program Coordinator as well as the Santa Clara Valley Urban Runoff Pollution Prevention program staff.

2). The County continues to move forward with implementation of the 2001 NPDES Permit, as amended in 2005.

3). The involved departments include Capital Programs (now a part of the Fleet and Facilities Department), Roads and Airports, Parks and Recreation, Planning and Development (Planning Office, Development Services Office, Clean Water Program), Agriculture and Environmental Management (Integrated Waste Management, Pollution Prevention, Graffiti and Litter Abatement, Green Business Program, Master Composter Education Project, Environmental Health (Consumer Protection, Hazardous Materials, Solid Waste, Household Hazardous Waste, Vector Control), the County Executive's Office (Special Construction Projects, and Integrated Pest Management).

4). County staff members from the various involved departments have continued to be active this fiscal year in attending informational presentations regarding implementing the requirements of the NPDES Permit and preventing nonpoint source pollution.

Continuous Improvement Activities:

1). The County Planning Office is continues to participate in the Santa Clara Valley Water District sponsored Water Collaborative, with regard to formulating an area-wide approach to Land Use Regulations near streams.

2). The County Department of Environmental Health continues to provide enhanced reporting for IC/ID and IND/COMM activities within the unincorporated area.

3). The involved County departments continue to take direct responsibility for implementation of performance standards and reporting on NPDES Permit compliance activities.

4). Attendance at training events has been excellent for all of the involved departments.

5). The County's full time IPM Program Manager is continuing to work with the Department of Parks and Recreation pursuant to its new Pesticide Use Reduction Plan, and with Department of Roads and Airports regarding a planned Expressway Median Area Mulching Project that will also reduce the need for pesticides.

6). The County IPM Program Manager now has benefit online pesticide use requesting and reporting via a database on the County's intranet.

7). The Household Hazardous Waste, Green Business, Integrated Waste Management, Graffiti and Litter Abatement, and Master Composting Education Programs have all been very active in spreading the pollution prevention message, including prevention of storm water pollution.

8). The Household Hazardous Waste Program has been very active in the recycling of mercury containing materials, in the Mercury Education Project, and in promoting E-Waste recycling.

Thank you in advance for your review of this Annual Report for FY 06. If you or your staff members have any questions regarding the materials submitted, please contact me at (408) 299-5737.

Sincerely,

Steve Homan

- **Solid Waste Local Enforcement Agency (SW-LEA)**

The Solid Waste Program approaches the goals of storm water pollution prevention to the maximum extent practicable in a pragmatic manner. Every complaint received is investigated, and they approached considering what is is needed to remove the threat of pollution. This sometimes leads to a referral to another agency having jurisdiction over the responsible party and the type of pollution.

In most cases, the solid waste program confirms the threat and issues an order to abate the violation. Usually the threat of legal action leads to abatement of the violation, but occasionally cases are referred to the District Attorney's Environmental Crimes Unit for legal action.

The complaint investigations vary widely in scope, but are nonetheless related to preventing pollution of the environment and are backed by the County Ordinances relating to yard waste, refuse accumulations, illegal dumping, refuse collection vehicles, and the septage or grease pumper vehicles. We have made recommendations to the County Integrated Waste Management to discontinue awarding contracts to collection companies which allow yard waste collection directly from the street and not in containers.

Abatement of facilities that are routinely inspected, include vehicle storage yards and solid waste facilities, operations such as landfills, transfer stations, composting facilities, and closed landfills. These facilities are under the jurisdiction of state laws and the state-designated local enforcement program. This section inspects all large facilities that generate medical or bio-hazardous wastes and ensure that their waste stream handling does not result in biohazardous waste contamination of the storm water system near such facilities.

It is stressed at SW-LEA staff meetings and in training that one of the principal goals of our inspections is to identify and investigate any and all critical control points of the programs promoting clean water. The SW-LEA program is effective in reducing or eliminating storm water pollution because it keeps illegally dumped materials out of the storm water system and therefore out of watersheds.

Training: Solid waste staff attended a CIWMB/LEA conference promoting coordination between various state oversight boards, such as air, water and solid waste. The topics centered around solid waste facilities and how the public and the environment can be better protected from the impacts of these facilities and the improper or illegal disposal of solid waste. There were presentations relating to illegal dumping abatement as well as coordinating

efforts with the RWQCBs, since local inspectors are their eyes and ears out in the field. The solid waste staff gained valuable information from several topics covered relating to storm water pollution prevention. Solid Waste staff also attends monthly the Technical Advisory Committee meeting addressing a wide range of issues regarding solid waste and recycling including storm water run off and public education.

MEMORANDUM

TO: Steve Homan, CWP Program Coordinator
FROM: Jim Blamey, Supv. Hazardous Materials Specialist
DATE: July 7, 2006

SUBJECT: Clean Water Program Annual Report

Santa Clara County
Department of Environmental Health
Hazardous Materials Program – Inspection Unit

Training:
The Hazardous Materials Compliance Division did not receive any training directly related to the protection of surface water or storm water quality from the Clean Water Program during FY 06.

Hazardous Materials Specialists (HMS) receives on-going training in a variety of hazardous materials program areas that indirectly are related to the Clean Water Program. The first Tuesday of every month the Santa Clara County Fire Chief's Hazardous Materials Subcommittee provides a training forum for inspectors from different programs and geographic areas. In addition, HMS staff receives training from other sources (State, Local Agencies, private companies, etc.) as the training becomes available. Some of the training staff has received this year includes:

Bloodborne Pathogen Training:	Required safety training	2 hours
Hazwoper Refresher:	Required safety training	8 hours
Safety Seminar:	Variety of different safety subjects	4 hours
IIPP Training:	Reviewing IIPP document	1 hour
Propane Gas Training:	Industry training on safety and storage	4 hours
California Fire Code IFC update:	Understand the new Fire Code	4 hours
Hazardous Waste Recycling:	New State requirements	4 hours
DTSC New Manifest Update:	New Federal/State requirements	3 hours
Inspector Roundtables:	Issues related to HazMat use & disposal	8 hours

In addition, the HMS's attended an annual week long training conference on a variety of related programs. The Unified Program Training Conference serves several vital purposes, all of which promote regulatory compliance, assist regulated communities, and enhance the professionalism of the regulators and businesses. The conference offers a four-day training program with technical sessions presented by experts, providing the latest information polices, programs, and practices affecting the local hazardous materials programs. Training is provided in different tracks ranging from enforcement to technical programs (underground tank, hazardous material business plan, Cal ARP, universal waste, hazardous waste, etc.). Staff also participated in roundtable discussions where state, federal and local regulators scrutinize current practices and propose improvement on how the laws and regulations can be implemented. Because of the wide range of program responsibilities, HMS staff receives a significant amount of training in areas that over lap with programs like the Clean Water Program.

Program Evaluation:

The Hazardous Materials Compliance Division, Hazardous Materials Specialists found that most businesses appear to be in compliance with the requirements of the Clean Water Program (CWP). This past reporting year, the program found most businesses and residential home owners were aware of the CWP program and understood the importance of not discharging materials into the storm drain system. Public information in the form of handouts, posters, labeled storm water drains, advertisements and public announcements appear to have educated the general public and industrial sector.

The Department of Environmental Health Hazardous Materials Program, Solid Waste Program and Consumer Protection Division have successfully worked together on several large problem sites where abandoned automobiles, garbage, rubbish, hazardous materials and other materials removed and the site clean-up. In addition, the Department works with numerous other public agencies in task forces to ensuring that illegal conditions, many of which are related to storm water runoff, are corrected and the properties returned to their natural conditions.

The Hazardous Materials Program promotes its program requirements, along with other related programs, in a variety of methods. Last year the program provided training or made presentations to a wide range of individuals and businesses including: Dry Cleaners, Pacific Industrial Business Association, Farm Bureau Association, City of San Jose Public Works Department, other Certified Unified Program Agencies and numerous businesses that attended our Hazardous Waste Training session.

The Hazardous Materials Program is always looking for ways to become more efficient and consistent in its inspection programs. Inspections for the Clean Water Program are incorporated into routine hazardous materials inspections with the majority of the focus being the handling, use, and disposal of hazardous materials. Training that focuses on the laws, regulations and ordinances pertaining to the Clean Water Program would greatly improve our ability to identify problems and assist our businesses in complying with the requirements of the program.

Mercury Education Project, DEH-HHW

(from DEH-HHW Website)

Mercury Grant

The County of Santa Clara Department of Environmental Health, Household Hazardous Waste Program(HHW) has been awarded a California Integrated Waste Management Board (CIWMB) grant to conduct an educational campaign and to collect mercury-containing waste. Some common household products that contain mercury include fluorescent lamps, fever thermometers, button batteries, as well as some switches and thermostats.

Mercury is a potent nerve toxin and persistent pollutant that will never go away. When mercury escapes into the environment, it is transported by air, rain or runoff and deposited in our creeks and Bay. It builds up in sediments at the bottom of water bodies, and over time, the mercury is passed up the food chain affecting fish, birds, animals and even humans.

This grant will fund a three year project that enables the County and cities to decrease the amount of mercury getting into the environment by raising public awareness and providing free drop-off programs for residents and small businesses.

For proper disposal of household hazardous waste and mercury-containing products please call (408) 299-7300 to arrange an appointment for a drop-off.

Enviromental Resources Agency Mercury Education Project funded by the California Integrated Waste Management Board

MEMO

FROM: Arlette Kerley, R.E.H.S.
Supervising Environmental Health Specialist
CPD, DEH

TO: Steve Homan, R.E.H.S., Coordinator
Clean Water Program

DATE: 8/1/2006

SUBJECT: Summary and Evaluation of Clean Water Program Activities of the Consumer Protection Division (CPD) of DEH

As part of the Department of Environmental Health's ongoing commitment to participate in storm water pollution prevention activities, CPD Environmental Health Specialist inspection staff continues to look for relevant violations within the unincorporated area, as part of the food facility inspection and complaint investigation programs.

In addition to staff conducting routine food facility inspections and complaint investigations, activities also include interviewing business owners and managers regarding the proper disposal of waste and the utilization of approved cleaning practices. Any water pollution violations found are noted, referred as required, and always followed up on. Enforcement action is initiated as needed for non-compliance.

Food facility owners and mangers are given a SCVURPPP BMP packet at time of ownership change or upon the opening of a new food facility. The packet includes a letter outlining the Program, a checklist of best cleaning practices, and a BMP poster to hang up for easy employee reference.

DEH continues to track food facility inspections and complaints using a database. The data is transmitted quarterly to SCVURPPP and annually to the County Clean Water Program Coordinator. This program is considered very effective since (1) the number of inspections far exceeds the inspection frequency targeted in the County's Urban Runoff Management Plan, and (2) very few violations are observed.

COUNTY OF SANTA CLARA
Department of Roads and Airports

Self-Evaluation Document for the FY 06 NPS Program Annual Report

The County Department of Roads and Airports participates in the Nonpoint Source Pollution Control Program in a number of ways:

1) The department follows Maintenance Yard and field work BMPs, and has adopted SOPs.

2) Storm Water Pollution Prevention Plans (SWPPPs) have been written and are referenced in the departmental maintenance yards. (The East and West Yards are within the Phase I NPDES Permit zone.)

3) The department is using NPDES Permit C3 requirements to design storm water treatment for C3-eligible new and replacement impervious areas, such expressway widening within the NPDES Phase I Permit area.

4). The department is utilizing additional water quality questions in CEQA review, as required by the NPDES Permit.

5) The department is working with the County IPM Coordinator to reduce and eliminate pesticides where practicable, including in new landscaping and roadside vegetation management. No pesticides or herbicides are applied without the prescription of a Licensed Pest Control Operator. None are purchased without approval of the County IPM Program Coordinator.

6) NOIs and SWPPPs are prepared and filed when the disturbed area of a proposed project will be 1 acre or more.

7) The department is aware that effective 10/20/05, C3 requirements were reduced to 10,000 for the more contaminate intensive Group 2A projects, and 8/15/06 the C3 requirements will be reduced to 10,000 square feet of new or replacement impervious area for Group 2B projects. Projects vary, but each project is carefully evaluated as to whether or not C3 requirements apply. FY06 projects have not involved adding significant amounts of new impermeable surfaces.

8) The department is observing the Rural Public Works Performance Standards and with the assistance of the NPS Coordinator did develop specific SOPs.

9) Litter and trash are removed from public rights of way to a permitted sanitary landfill. Observed illegal dumping problems when not in the public right of way are referred to the DEH.

10) Departmental data certification is now provided for the NPS Annual Report.

11) Street sweeping and storm drain maintenance records have been maintained for many years. These records are now made available annually in the form of a spread sheet.

12) The department provides water quality related training for its employees.

13) The department coordinates between design, construction, and maintenance to ensure C3 mitigations are properly monitored and maintained. The first C3 mitigation improvements were constructed in FY06, and are expected to pass from the contractor to department maintenance in FY07.

Summary and Evaluation:

The Department of Roads and Airports believes that its staff members and their actions are effective in preventing storm water pollution in both the maintenance yard and construction site environments.

Managers, engineers, and maintenance staff have an increasing awareness of the need to prevent storm water pollution, the BMPs necessary to support that goal, and also of the C3 requirements for storm water treatment for certain impervious areas. Procedures are in place to ensure permit compliance and to give full consideration to storm water elements in each individual project.

The department is pleased to work cooperatively toward these goals with the County NPS Coordinator and the County IPM Coordinator. It is understood that continuous improvement in these areas is expected, to the maximum extent practicable.

The department has benefited from a variety of training resources, but especially appreciates the SCVURPPP-sponsored workshops.

In FY07, the department looks forward to implementing monitoring and maintenance of C3 mitigations being installed as a part of the Montague Expressway project.

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 06 Annual Report

Attachment D3 - Rural Public Works O & M

Note: A Sr. Civil Engineer from the Department of Roads and Airports and a Sr. Project Manager from the Department of Parks and Recreation both actively participated in the committee that wrote the SCVURPPP Rural Public Works Performance Standard.

The two involved departments, Roads and Parks, have since adopted and incorporated the Performance Standard into their maintenance routines.

The Standard Operating Procedures (SOPs) for this performance standard have been written by both of the involved departments, and submitted to SFB-RWQCB staff previously. No difficulties have been reported by the involved departments in implementing and observing the standards.

Subject: Clean Water Program Annual Report for FY06 and Self Evaluation for the Department of Parks and Recreation

The County of Santa Clara Parks and Recreation Department (Department) is pleased to offer this brief summary of our process toward the goal of stormwater pollution prevention as it has been implemented thus far into our operations.

In addition to extensive staff training some of which detailed bellow, the Department has initiated and reinforced several program elements to assure that potential sources of stormwater pollution are reduced to the maximum extent possible.

Daily Maintenance Operations

All large-scale maintenance activities involving heavy equipment, parts cleaning and repairs have been consolidated to our Central Yard facility. There, most major activities take place indoors and every effort is made to eliminate any discharges to the environment that could reach or affect storm water. The equipment wash pad utilizes covered zero discharge wastewater recycling technology. Filters are changed regularly and oil is skimmed and collected for recycling.

The parts washer was recently upgraded to a closed loop, hot water and detergent based system, and solvents were eliminated from the parts cleaning process on a department wide basis. Based on the results of a recent stormwater inspection, a new large capacity spill cleanup station was added adjacent to the fuel dispensing inlands, new filter fabric was installed on the storm drain that serves the central parking lot area of the facility, and the storage of materials outdoors, always limited, has been further decreased with some additional clean up. The result of this latter effort has allowed more covered area for material storage. The most recent improvements includes, but not limited to, gas station canopy at Central Yard, re-painting "Flow to Bay" signs on all storm water drains, installation of 10' rock strip for oil collection before reaching parking lot and budgeting for a cover of the gas pumps.

The Rural Public Works Performance Standards have been shared and embraced by the Department's field staff, who now bring stormwater pollution prevention strategies to assigned tasks as one of the "tools of the trade" necessary for being a Parks professional.

Project Planning and Construction:

Careful consideration is given to all environmental impacts that could be created or impacted by project related activities. As stewards of the land, the Department is serious and proud of its roles related to resource conservation and preservation, In particular, effort are made to minimize grading, integrate tree planting, preserve heritage trees, utilize drip irrigation systems, and assume that remediation and new trail construction conform to modern standards. Some of those trails standards include out sloping, rolling dips and using bio-technical methods for erosion control.

During project construction, the Department complies with RWQCB guidelines for soil erosion and stability, continuously monitors all construction activities, and has no current C3 qualified projects budgeted which reflects our focus on open space in project design over impervious surfacing wherever possible.

Community Involvement

Working with the San Jose Conservation Corps and our Volunteer Program, the department is involved in creek clean up activities, including garbage removal from parklands and streams, to enhance the natural experience and promote cleaner waterways. As part of our Volunteer Program, the Department has instituted an "Adopt a Trail" program, which employs the aforementioned trail management techniques. For every trail adopted under this program there is a "volunteer crew lead" assigned and head volunteer must go through a rigorous training program to learn the proper techniques for trail building and maintenance. Careful attention is given in these training programs to learning about he to protect our waterways and these volunteer crew leads impart this information to the "Adopt-a-Trail" volunteers. It's a win-win community model that helps to accomplish the objectives for protecting our water resources.

Staff Training

IPM: The Department held two training sessions on Integrated Pest Management (IPM): One was on 11/16/05 attended by 23 Park Maintenance Workers, and another one on 11/18/05 attended by 23 Park Maintenance Workers each for 7 contact hours.

Trails: The Department held Parks Maintenance Annual Refresher on Trails attended by 10 Park Maintenance Workers on 3/28 – 3/30/06 with 24 contact hours. Several member of the staff attended California State Parks/Road to Trails on 9/25/05, Wildland Weed Field Course on 10/4/05 and 2006 Trails & Outdoor Leadership Training on 5/12-5/14/06.

NRM: The Department held three Parks Maintenance Annual Refresher on Natural Resource Management (NRM) on 3/14/04, 3/21/06 and 4/5/6 each for 3 contact hours attended by 19, 16 and 22 Park Maintenance Workers respectively.

Stormwater: The Department continues to monitor storm water from Almaden Quicksilver County Park in accordance with our storm water permit requirements. In addition, all park locations visually monitor storm water flows for any signs of unusual conditions.

The Santa Clara County Parks and Recreation Department is an active partner in protecting streams, creeks and waterways. We are proud of the efforts we undertake on a daily basis to minimize impacts to the environment, while we protect and preserve the lands that the public entrusts us to maintain, on their behalf, for current and future enjoyment.

Should you have any additional comments or questions on this report, please feel free to contact me at (408) 355-2208 or Bill Grimes, Environmental Health & Safety Compliance Specialist, at (408) 355-2273.

COUNTY OF SANTA CLARA CLEAN WATER PROGRAM

Activity	Permit Item Source	Tasks	Comments	Status	Responsible Party
C.3.b Development Project Approval Process -- Planning Procedures					
Ordinance Revision	C.3.b.2	Develop new ordinance incorporate C3. requirements	Wrote amendment to existing NPS ordinance to include Numeric Sizing Criteria requirements and maintenance for Group 1,2A, 2B, and HMP projects.	C3/HMP Ordinance completed and submitted to Admin. and Co. Counsel	CWP Prgm. Coord., Planning Office, County Counsel, Land Development Engineering.
Staff Training	C.3.b.3	Provide training opportunities for County staff in the planning office, building inspection office, and land development engineering with training on the C.3. provisions including SCVURPPP sponsored and RWQCB sponsored workshops	Written guidance, staff meetings SCVURPPP workshops, in-service training.	Ongoing	CWP Prgm. Coord., Planning, Building, FAF, LDE
C.3.c. Requirements for Group 1 and Group 2 Projects					
Guidance Manual	C.3.c.4	Review Guidance Manual developed by Program and, if needed, customize for Group 1 projects.	Updated Guidance handouts written and supplied to PLN Office and LDE Section	Routine	CWP Coord., Planning, Building, LDE
Group 2 Alternative Project Size	C.3.c.8	Conduct analysis of alternative project size and prepare proposal for submittal to Regional Board. (Initial submittal to be handled by SCVURPPP/EOA Inc.	Continue to assist Program with data collection and analysis, as requested. Plan on implementing Group 2A on 10/20/05 and 2B on 8/15/2006	Ongoing Routine	Building Inspection, Planning Office, CWP Prgm. Coord.
Guidance Manual Update	C.3.c.9	Update Guidance Manual and Performance Standard for Group 2 projects as needed.	Assist Program with development and review, as requested.	As requested	

COUNTY OF SANTA CLARA CLEAN WATER PROGRAM

Activity	Permit Item Source	Tasks	Comments	Status	Responsible Party
C.3.e Operation and Maintenance of Treatment BMPs					
Data Form and Staff Training	C.3.e.1	Log information about treatment BMPs installed at approved Group 1 projects and maintain a list or database of properties, treatment BMPs, and responsible operators.	Review data collected and evaluate need to modify data collection method and need for additional staff training on tracking information.	Ongoing for AR	CWP Prgm. Coord., Planning, Building, LDE
BMP O&M Agreement Mechanism	C.3.e.2	Adapt model O&M agreement language to meet agency-specific needs and requirements and incorporate into the project review and approval process.	Will incorporate recorded maint. agreement into NPS Ord. C3. /HMPRevision Fall 06	Now planned for Fall 06	CWP Program Coord., Planning, County Counsel
BMP Inspection Program	C.3.e.5	Develop local programs for inspection of a subset of prioritized treatment BMPs to verify that proper O&M is being performed by the responsible party (Program to assist in defining which BMPs are priority for inspection.)	For Group 1, 2, 2A, 2B, and HMP projects, County working on developing written BMP inspection priority criteria and inspection and enforcement forms and procedures. (County will require private PE, RCE, maintenance inspection)	Now planned for Fall 06	LDE, CWP Prgm. Coord.
Reporting	C.3.e.6	Report on the County's treatment BMPs O&M verification program in each annual report, including organizational structure, evaluation of effectiveness, and planned improvement to the program. Include a list or summary of treatment BMPs inspected during the year, inspection results, and any required follow-up and correction.	Private PE or RCE inspection. Written Agreement, future recorded agreement.	Ongoing for AR	CWP Prgm. Coord., Planning, Building, LDE

COUNTY OF SANTA CLARA CLEAN WATER PROGRAM

Activity	Permit Item Source	Tasks	Comments	Status	Responsible Party
C.3.f Hydromodification Management Plan					
Staff training	C.3.f.3	Upon adoption by the Regional Board, begin implementation of HMP as part of requirements for Group 1 projects that may cause increased erosion or other related impacts.	Where applicable, HMP to be integrated into existing programs for development, review, construction inspection and BMP operations and maintenance. County staff to receive incremental training in HMP requirements.	*Training now planned for FY 07, due to HMP adoption in FY 06*	LDE, Building, Planning, FAF, Roads, Parks, CWP Prgm. Coord.
C.3.g (Waiver) Compensatory Mitigation Program					
Model Waiver Program for SCVURPPP	C.3.g.1	Develop a model waiver program.	Assist SCVURPPP by reviewing documents. No County alternative compliance program is planned.	*Ongoing*	CWP Coord., Planning Dir., Building Official, County Counsel, GSA, Parks Dir., Roads, Dir.,.
Local Waiver Program (Compensatory Mitigation)	C.3.g.2	Consider developing local waiver program, perform legal review, and incorporate waiver provisions in project review process. (If model program has not been adopted by Regional Board, consider developing interim waiver program per C.3.g.vi.). Provide info on waivers granted, if any.	Currently this is a very low priority. With large lot and parcel sizes, there is currently no perceived need for a local alternative compliance program.	No County alternative compliance program is planned	CWP Coord., Planning Dir., Building Official, County Counsel, FAF, Parks Dir., Roads, Dir.,

Activity	Permit Item Source	Tasks	Comments	Status	Responsible Party
Staff training and reporting	C.3.g.3	Begin tracking information for reporting on waivers granted, including project name, location, type, percent impervious surface, reasons for and terms of waiver, and the alternative benefit project and completion date.	If County adopts waiver program, responsible County staff will be trained on its implementation. Currently, developing a local waiver program is a very low priority.	As needed	CWP Coord., Planning Dir., Building Official, County Counsel, FAF, Parks Dir., Roads.
C.3.j Site Design Measures Guidance and Standards Development					
Policy and standards review	C.3.j.2	Review existing local design standards and guidance, and compare them to the list of areas to address in provision C.3.j. and other references such as "Start at the Source" and the "Development Policies Comparison" work sheet. Prepare and submit an analysis of local standards, identified opportunities for revision, and proposed revisions. (Program to prepare guidance for Co-permittees on this work product.)	County will focus on making sure BMP list is updated to be consistent with revised General Plan, any new ordinance requirements, C3. Numeric Sizing Criteria and the latest technical guidance documents such as the upcoming HMP, SCVURPPP "Guidance Manual," the "Using Start at the Source" manual. and the revised California BMP Handbooks.	Ongoing Routine	CWP Prgm. Coord., LDE, Planning, Roads, Fire Marshall, Parks, FAF
Standards Revisions	C.3.j.4	Incorporate any revised standards and guidance into local project approval process and "fully implement" the revised standards and guidance.	Any modification to required design standards will be done with input from Planning, Fire Marshall's Office, and other affected local agencies. (Reduced road width and other	Ongoing Routine	LDE, Fire Marshall, FAF, Roads, Parks

Activity	Permit Item Source	Tasks	Comments	Status	Responsible Party
			design standards (pervious paving, etc) are not the highest priority on large parcel single site SFD development with ample existing infiltration area and BMP installation areas available.		
C.3.k Source Control Measures					
Reporting	C.3.k.3	Implement source control measures requirements by including appropriate conditions of approval. Report status and provide examples of application of conditions in annual reports.	Report on source control BMPs required for particular projects. (The NPDES Permit seems to indicate that C3. items apply only to Group 1 and Group 2 projects; however, use of source control BMPs is appropriate for all projects.	Ongoing Routine	Planning, Building, CWP Coord., Roads, FAF, Parks, DEH
C.3.l Update General Plans					
General Plan Review	C.3.l.1	Review current General Plan policies related to water quality and watershed protection and incorporate additional policies as needed to implement C.3.	Depending on the content of the HMP, the County may need to modify the General Plan to incorporate new goals and policies. (Planning Office is continuing to work on a Riparian Protection Ordinance)	[Next sche-duled revision]	Planning Office, CWP Prgm. Coord.

COUNTY OF SANTA CLARA
CLEAN WATER PROGRAM
ANNUAL REPORT FY 06

CONSTRUCTION INSPECTION

The following report is based on the County Performance Standard for Construction Inspections:

1) The County ensures through a construction inspection program that construction contractors properly store, use, and dispose of construction materials, chemicals, and wastes at construction sites and prevent illicit discharges to storm drains and watercourses.

Building and Grading inspectors include these items in their inspection routine. Hazardous materials violation referrals are made to DEH--HMCD as appropriate.

2) For development projects with significant erosion potential and planned construction activity during the wet season the County ensures, through a construction inspection program,that erosion and/or sediment control measures are implemented in accordance with local ordinances and project conditions of approval and maintained as needed during construction.

The County Grading ordinance and Construction Inspectors require winterization and implementation of erosion control BMPs of projects that will continue into or start in the rainy season (after 10/15 through 4/15 each year). Ongoing inspections evaluate the effectiveness of control measures, and require changes and/or additions to BMPs where needed. Throughout the rainy season, inspectors continue to monitor construction sites, and shut down any projects where erosion control measures are inadequate. Grading Ordinance violators are also required to "winterize" their illegally graded sites.

3) The County inspects construction sites for adequacy of storm water quality control measures on a regular basis, with the frequency of inspections based on the size of the project and its potential impact on storm water quality.

Grading Inspectors continue to inspect all projects on a continuing basis, and endeavor to inspect sites with a high potential for erosion more frequently.

4) Prior to the beginning of the wet season each year, the County inspects all sites requiring erosion and/or sediment control plans, to ensure that measures have been taken to minimize discharges of sediment from disturbed areas.

This is the normal procedure for grading inspectors, and they have continued to require this throughout the past rainy season.

5) During the wet season of each year, the County inspects all construction sites requiring erosion and/or sediment control plans following each major storm event or series of events.

Grading inspectors try to inspect each active site with high erosion potential frequently, which includes the days following any major storm. In cases where they cannot get to every site, they prioritize and inspect those sites with the greatest erosion potential as soon after the rain as possible.

6) The County provides training annually to its construction inspection staff on inspection procedures, documentation, and enforcement related to storm water pollution prevention.

The County's Clean Water Program staff has worked closely with the grading inspectors and their supervisor, and problems are discussed as they arise. The inspectors are familiar with the goals of the NPS Program and refer problems to the NPS inspector when appropriate, and carry out enforcement action where necessary. The Construction Inspectors meet informally several times per week with the CWP Program Coordinator regarding enforcement needs and problems. Construction Inspectors have attended several erosion prevention and law enforcement classes.

7) The County provides outreach materials to contractors, developers, and County staff on construction BMPs and compliance with the State General Construction Activity Storm Water Permit.

Blueprint for a Clean Bay is available to applicants for building permits, and a county prepared handbook on erosion control measures is available from the CWP office. Trifolds for individuals and the construction trades are available near the building counter. NOI filing information and forms, as well as C3. and HMP handouts, are available at the Planning and Building Lobby.

8) The County investigates and follows up thoroughly on grading violations, especially the ones with a high potential for erosion and sediment transport.

In FY 06, twenty properties were cited with grading ordinance violations. Official notices were sent to the property owners as orders to abate the violation, and notices of grading ordinance violation were recorded with the County Recorder.

9) Official Notice Forms

New official notice forms for grading violations, grading warnings, and erosion violations were developed, for review during the Tetra Tech program revisit.

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 06 Annual Report: PUBLIC INFORMATION AND PARTICIPATION

COUNTY OF SANTA CLARA: Clean Water Program

Public Information / Participation					
PI/P	On-going public Information program	Staff will continue to use a variety of outreach avenues to educate the variety of audiences in the County. See following PI/P table for detail of activities.	Green business program is ongoing. IWM and MCEP and GALA and GBP have been included within the Dept. of Agriculture and Environmental Management	Ongoing	IWM Coord., GALA Coord., DEH, CWP Prgm. Coord.

General Outreach

Activity	Communication Vehicle	Goal
CWP literature distribution to the general public at County facilities: • Govt. Center • Planning/ Building Dept. counter • Events, i.e. Earth Day, County Safety Day Seminar	**CWP Prgm. literature:** Pests Bugging You?, Home Maintenance Tips, eight construction tri-folds, Blueprint For a Clean Bay booklet, IPM pest-specific fact sheets, Grow-It!, pool water brochure. **HHW Prgm literature:** HHW brochures, small business hazardous waste brochure, (and any new Mercury-products literature as it becomes available)	Keep stocked in view of public ONGOING ROUTINE
HHW Collection Events	Handouts	Ongoing throughout the year VERY SUCCESSFUL
Website: Include new information in County CWP Prgm. website. Include CWP Ordinance C3. changes when	County web site	On-going When HMP

adopted.		approved and if Group 2 date extended FALL 2006 Updates Planned
Watershed Education & Outreach Campaign: Conduct or participate in local activities that are coordinated with the Watershed Education & Outreach campaign. Evaluate the effectiveness of PI/P projects by direct or indirect means as appropriate.	Any ed. materials developed by the WE&O campaign. Continue handing out Watershed Watch packets until gone.	Supporting through SCVURPPP. Working well.

Targeted Outreach

Activity	Communication Vehicle	Goal
County staff: • Building inspectors • Construction Inspectors and Engineer/Plan Checkers • Planning Office: Planners • Maint. Yard& Roads Maint. staff • Roads staff and GSA staff managing	CWP literature, as appropriate In-house and Program trainings E-mails	Internal training at least once/yr, for each listed group of employees (except the general County employee info on IPM) In addition, building inspectors, construction inspectors, planners, and engineers are encouraged to

facilities pesticide spraying contract • County employees for general info on less-toxic alternatives for their own home use, and info on not using pesticides on the job, if unauthorized (detail in the Pesticide Workplan)		attend SCVURPPP-sponsored training events. Working Well
County Contractors: Require PCOs, contracted for work on County facilities, to use pest control methods consistent with our IPM policy and demonstrate adequate training (IPM Coord.) (See Pesticide workplan for details.)	Contract specifications. IPM Ordinance. SCVURPPP sponsored IPM workshops as they occur.	Adequate contract specifications. Appropriate contractor & GSA staff attendance at Program workshops. (IPM Coord., Parks, Roads, GSA) Routine. IPM Program very well managed

Auto Repair Shops	Education of shop mgrs. during tri-annual inspections by DEH; use SCVURPPP lit., when necessary	Ongoing Routine by DEH-HMCD
Restaurant education	Restaurant poster distr. at inspections by County health inspectors as needed, when not present in facility, when wall space allows.	Posters left at restaurants at routine inspections by DEH as appropriate. Routine by DEH-CPD
Development community	Literature distr. at Planning/Bldg Lobby *Blueprint for a Clean Bay* manual; eight construction tri-folds; storm drain stencils are available.	Restock as needed, check regularly Routine by CWP Coord.

Problem contractors in the field	2nd Outreach letter to problem contractors (40 on database—warning letters sent in the past to all). Illegal dumping of soil: targeted letters to swimming pool contractors. Verbal and Written notices and follow up. Improve written notices for erosion problems.	Late Summer 2006 Constr Insp. Perf. Std.
Residents living near creeks	Water District's Stream Care Guide	Display, restock as needed
Gardening community—IWM Coord. contacts and coordinates with local gardening clubs to provide them with IPM info. through composting program	IPM fact sheets from SCVURPPP and others	As opportunities arise. (IWM Coord. and MCEP)
Outreach to local restaurants (working with DEH inspectors) to encourage less-toxic control (Program Pesticide Workplan for details.)		Arrange for distribution as the new materials become available. (DEH--CPD) New swimming pool literature now provided in Building lobby and sent to DEH

Public Participation

Activity	Communication Vehicle	Goal

COUNTY OF SANTA CLARA: Clean Water Program

Encourage participation in regional creek cleanup event. Help publicize cleanup.	Email, hang posters in Govt. Center	Involve public and county work force Routine

School/Education Outreach

Activity	Communication Vehicle	Goal
Public Schools N/A [Students primarily attend schools within the incorporated cities; therefore this is not a priority for the County]	Cities' existing and planned outreach	Present storm water pollution prevention message to youth

COUNTY OF SANTA CLARA
CLEAN WATER PROGRAM
ANNUAL REPORT FY 06

GRAFFITI AND LITTER ABATEMENT (GALA) PROGRAM

This report summarizes Graffiti and Litter Abatement Program activities from July 1, 2005 through June 30, 2006.

Eradication
The Sunday Route Program, a collaborative effort between Integrated Waste Management (IWM) and the Juvenile Probation Department, has been successful this past year in both graffiti and litter removal. IWM Program staff administers the program and funds an extra help group counselor from the Juvenile Probation Department for a crew leader to supervise a team of probationers in the removal of graffiti and litter each Sunday. In FY 06, the Sunday Route crew painted out a total of 241 graffiti tags, accounting for 4,240 square feet removed. Additionally, the crew collected 1,083 bags of litter and 145 bags of recyclable materials from County roads. As a result of this program, 415 probationers were able to perform their community service hours. The Sunday Route Program, coupled with the swift response from the Roads and Airports Department, continues to provide the appropriate level of service needed to meet current graffiti trends.

Clean Up Events
On August 13, 2005, three Integrated Waste Management (IWM) staff picked up nine bags of litter and one bag of recyclable materials in the Lexington Hills area while residents cleaned out their garages and backyards, dumping 28.33 tons of items in eight debris boxes provided by Green Waste Recovery. This event served 1,180 homes in the Lexington Hills area.

A similar event was held August 20, 2005 in the Meridian and Hamilton area of District Four. IWM staff led ten truant youth through neighborhoods, picking up 25 bags of litter and two bags of recyclable items as residents filled 14 debris boxes provided by Green Valley. Five hundred households were served and a total of 25.6 tons was disposed

On September 24, 2005 IWM staff was again leading eleven habitually truant youth through the Golf & Toyon area of Garbage District One, collecting 18 bags of litter and 5 bags of recyclable materials. Four hundred households were served and residents filled 15 debris boxes with nearly 28.38 tons of garbage.

On November 5, 2005, IWM staff supervised fifteen youth in picking up nine bags of litter and two bags of recyclable items in the Golf/Toyon area of District One. Fifteen bins were filled with nearly forty tons of debris and 450 households were served by Green Valley Disposal.

The Great American Litter Pick Up took place on April 8, 2006. Nineteen participants picked up 11 bags of litter and 2 bags of recyclable items in the Burbank area. The Great American Litter Pick Up is an annual event coordinated by a multi-jurisdictional task force that includes Santa Clara County Integrated Waste Management Division, Santa Clara County Office of the District

Attorney, Caltrans, the Valley Transportation Authority, the City of San Jose and the City of Campbell.

On April 29, 2006 a clean up event was held in the Alum Rock neighborhood of District One. Staff supervised three youth who collected six bags of litter and recyclable items while neighborhood residents filled 15 debris boxes with 43 tons of material.

Per the franchise agreement, South County residents are provided with 12 yard waste vouchers and one disposal voucher per year. There is also an annual "recycling days" event in which residents may bring unlimited quantities of wood and metal items to be recycled.

Upcoming Clean Up Events
There are three more clean-up events scheduled in the fall for Garbage District 4 and one in Lexington Hills. Staff will coordinate with Board offices to confirm dates and will be available to distribute information to residents about the various programs IWM makes available to County residents.

Enforcement
Staff continues to maintain a database of graffiti tags and shares information with the Sheriff's Office and the District Attorney's Office when requested. The level of graffiti in South County has increased in the past year.

Interdepartmental Partnerships
Staff continues to work with the District Attorney's Office, the Probation Department and the Roads and Airports Department.

The District Attorney's Office has received another year of funding from a federal Weed and Seed grant for the Burbank community to weed out criminal activity and seed the area with resources and services to benefit the community. Staff serves on the Weed and Seed Steering Committee and attends monthly meetings.

The partnerships with the Probation Department and the Roads and Airports Department continue to be the most efficient way of abating graffiti and litter in unincorporated pocket areas. The Roads and Airports Department is responsive to calls for service and the Sunday Route Program provides abatement services on a weekly basis.

Status of Performance Goals
Goal 1: Coordinate six graffiti and litter abatement events.
Outcome: Coordinated six clean up events.

Goal 2: Coordinate 300 participants for graffiti and litter abatement.
Outcome: Coordinated 544 participants.

Goal 3: Abate 5,000 square feet of graffiti.
Outcome: Abated 4,240 square feet.

Goal 4: Abate 100 graffiti tags.
Outcome: Removed 246 tags.

Goal 5: Collect 650 bags of litter and recycled materials.
Outcome: Collected 1,596 bags of litter and recycled materials.

Performance goals for FY07 are:

1. Coordinate a minimum of five clean up events
2. Coordinate 400 participants for graffiti and litter abatement activities with the Probation Department
3. Abate 2,000 square feet of graffiti
4. Abate 150 graffiti tags
5. Collect 1,500 bags of litter and recycled materials

COUNTY OF SANTA CLARA
CLEAN WATER PROGRAM
ANNUAL REPORT FY 06

GREEN BUSINESS PROGRAM

This report summarizes the Santa Clara County Green Business Program activities from July 1, 2005 through June 30, 2006.

Partners
All fifteen cities within Santa Clara County, the Santa Clara Valley Water District (SCVWD), Pacific Gas & Electric (PG&E), Association of Bay Area Governments (ABAG), Department of Toxic Substance Control (DTSC) and the Bay Area Air Quality Management District (BAAQMD)

Accomplishments

- 41 businesses certified in FY06 bringing total certified to 103
- 96 newly enrolled businesses in FY06
- Total businesses enrolled in the program and working towards certification is 78
- Participants have undertaken numerous actions to reduce energy and water use and prevent waste and pollution

Local Accomplishments:

- Participating businesses are influencing employees, vendors and clients by demonstrating that businesses and consumers can make smart environmental choices in their everyday operations
- Public agencies certified: City of Sunnyvale Community Center, City of Gilroy City Hall, City of Gilroy Corp Yard, City of Gilroy Fire Stations, City of Gilroy Senior Center, County of Santa Clara Assessor's Office
- On July 1, 2005 the program was expanded to include ALL cities in Santa Clara County, making it a truly countywide program

Regional Accomplishments:

- Worked with marketing firm to develop outreach strategy
- Over 700 businesses and organizations certified throughout the San Francisco Bay Area
- Expansion underway within Bay Area and other areas within EPA Region 9, including development of a database that will allow for better quantitative data tracking
- The Association of Bay Area Governments (ABAG) recognized all certified Public Agencies in the Bay Area in March 2006
- The California Green Business Program Network was launched which functions as a clearinghouse for new programs so that we can ensure consistency of measures while still allowing for flexibility based on a specific jurisdiction's regulations and requirements
- Updating and developing new industry-specific checklists as new rules and regulations arise

Pollution Prevention:
Assessments identified potential pollution sources and ways to reduce use of toxic materials. Businesses stenciled no dumping flows to bay on storm drain inlets on their property.

Next Steps

- Incorporate Strategic Priorities
- Leverage regional resources to enhance local efforts
- Conduct research on factors motivating business participation to support development of outreach and recruitment strategies
- Enhance website resources
- Simplify/streamline Green Business certification process
- Continue to build partnerships with cities, regulatory agencies, etc. to assist in implementation and business certifications
- Develop a measurement tool to quantify the impacts of implementing Green Business measures

Implementation Priorities

1. Increase the number of enrolled and certified businesses countywide
2. Develop/conduct local outreach to educate the public on the GBP and the importance of patronizing certified green businesses

COUNTY OF SANTA CLARA
CLEAN WATER PROGRAM
ANNUAL REPORT FY 06

HOME COMPOSTING EDUCATION PROGRAM

This report summarizes the Home Composting Education Program activities from July 1, 2005 through June 30, 2006.

Experts estimate that the average household that composts both yard and food waste will divert 579 pounds of waste per year. Home composting is a cost-effective way to recycle organic debris. We encourage participation in home composting with a flexible and diverse education program. The Master Composter volunteers share their knowledge to help residents be successful in making compost in their own yards.

Activities that have helped to prevent storm water pollution include:

- Distribution of *Bay Friendly Homeowner Guide, Soil Matters, Grasscycling, Grow It! The Less-Toxic Garden Control Pests & Plant Disease Using Less-Toxic Methods*. These publications encourage sustainable landscapes which reduce the amount of water, pesticides and herbicides use. Grasscycling also keeps grassclippings from washing into storm drains.
- Distribution at compost workshops and table displays *basic composting* and *worm composting* brochures encourage healthy soils which reduce water runoff.
- Compost use (commercially made and homemade) in the garden is encouraged to improve soil and less water and pesticide run-off.
- Worm composting classes encourage using redworms to recycle kitchen wastes instead of using the kitchen sink disposal or landfilling organics.
- School outreach program to encourage food waste recycling.
- Promotion of compost use The IWMP department did a survey of the unincorporated residents on their awareness of composting and the HCEP program. Some of these findings can be used as a baseline to sample again in the future.
- Staff attended two regional meetings (March 2, & June 21) of the Bay Area Coalition for Sustainable Landscaping. There were representatives from 8 counties; 11 from water agencies, 6 with focus on stormwater & IPM, 7 waste management, others with multiple hats.
- Distributed information on rebates for Santa Clara Valley Water District & the City of Morgan Hill rebate programs for homeowners and businesses for removing grass/turf in the landscape.

PROGRAM HIGHLIGHTS

- **Volunteers**
  To date, 292 Master Composter (MC) volunteers have been certified to teach home composting. About 98 volunteers are currently active contributing through workshops and monthly meetings. (The ten-week training consists of 50 hours of classroom time and field trips). MCs are asked to perform at least 50 hours of outreach and education within Santa Clara County within one year of graduation.

  The next training class will be conducted January through March 2007.

  Total reported volunteer hours to date are 26,272 hours.

- **Workshops and Other Outreach**
  Workshops, worm composting classes, and events such as fairs, garden shows, special lectures, table displays and City Compost Bin Sales. Presentations on worm composting have been given at schools. Each participating classroom received a pound of redworms, a worm bin, and educational materials.

  In FY06 there were 19,196 participants at our events as follows:
  - 33 special lectures with attendance of 635
  - 165 school presentations with attendance of 4,853
  - 54 compost workshops with attendance of 943
  - 3 teacher training with attendance of 60
  - 52 table displays with attendance of 12,715
  - 2,200 volunteer hours were donated during FY06

- **Compost Bin Sales**
  Earth Machine compost bins and wing-digger compost turning tools are for sale by appointment at the HCEP office at the County Service Center at 1553 Berger Drive. In FY06 181 Compost bins were sold, 99 wing diggers, 48 thermometers, 48 compost buckets and 172 worm bins.

  MCs assist cities with their bin sales. The Cities of Sunnyvale and Palo Alto offer residents the *Bio Stack* compost bin at a reduced price. The City of San Jose sells the *Bio Stack* and *Home Composter* compost bins, and two styles of worm bins at a reduced price.

- **Continuing Education for Master Composters**
  Education by expert guest speakers at Monthly Meetings
  Monthly Email/Print Newsletter
  Research / Resource Library
  Network with other counties programs
  Skills Survey

- **Demonstration Site**
  The MCs maintain a composting demonstration site at Prusch Park in San Jose with about a dozen different working compost bins that have been donated by manufacturers.

- **Advertising / Public Relations**
  The ReduceWaste.org website lists upcoming workshops. City Contacts help to promote HCEP workshops by purchasing advertising space in local papers. The program buys some advertising.

County Integrated Waste Management Division Activities Related to Reduction of Nonpoint Source Pollution FY 2006

Type of Activity	Description
Residential Garbage Collection Services	Weekly garbage collection services were provided to 19,699 unincorporated area households and all unincorporated area businesses.
Residential Recycling Collection Services	Provided weekly (13,854 households) or bi-weekly (4,902 households) recycling collection services. Recycling services provided to unincorporated area businesses vary per customer request.
Residential Yard Waste Services	Provided weekly yard wastes collection services to 13,854 households and bi-weekly services to 1,691 households. In South County unincorporated area, 3,211 residences received yard waste vouchers to provide for monthly drop off of yard wastes at San Martin Transfer Station.
Residential used oil & used oil filter collection	Collected used oil & used oil filters at curbside on a weekly basis from all unincorporated area neighborhoods (19,699 households served).
On-call disposal days	12,149 households were offered 2 days per year to set out extra waste or yard waste for collection at no added cost; 3,211 households received a voucher for one no cost drop-off at San Martin Transfer Station.
Special Cleanup Services and Events	4,110 households were served by special community cleanup events in their neighborhoods (different neighborhoods are served by this program each year). A total of 299 tons of waste and recyclable metals were collected. South County residents are now provided with vouchers foron free drop-off at the San Martin Transfer Station annually.
Public Outreach Campaigns	A number of countywide public outreach campaigns were conducted. The outreach through the franchised haulers has been stepped up to include quarterly news letters and more frequent bill inserts with topical information.
Public Outreach Events	Information on waste prevention, recycling, household hazardous waste management, home composting, and other environmental topics was provided at many local public outreach events.

Public Outreach Information	The Countywide Recycling Hotline (1-800-533-8414) and Recycling Website (ReduceWaste.org) provided a wide range of waste reduction and recycling information to the public.
Newsletters	Unincorporated area residents received quarterly newsletters providing information on a variety of waste and recycling-related topics. In addition to the quarterly Green Business newsletter, IWM has utilized the County Comline to inform County employees about environmental issues.
Litter	Litter reduction and management information and tips are provided through various outreach materials. Additionally, IWM has an agreement with the Juvenile Probation department to pick up litter on a weekly basis. More detailed information is provided in the attached report.

County of Santa Clara
Department of Environmental Health

Memorandum

July 21, 2006

To: Stormwater/Urban Runoff P2 Staff

From: Rob D'Arcy, Hazardous Materials Program Manager

Re: Fiscal Year 2005/2006 HHW Program Update

Participation
The HHW Program served 24,985 residents from July 1, 2005 through June 30, 2006. In addition, over 2.2 million pounds of hazardous waste was managed safely and legally. There were 59 collection events for residents at three permanent facilities and five temporary events strategically located throughout the County. In addition, the Program served 435 small businesses including local governments, Goodwill Industries and the Salvation Army.

Paint
Latex paint accounted for 673,544 pounds and other paint related materials (including oil paint) accounted for approximately 556,260 pounds. Together, paint represents over 55% of the hazardous waste collected.

Pesticides
Although the grant award to conduct public education about Dursban and Diazinon has ended, we continued to manage 2,250 pounds of these two pesticides. Over 201,000 pounds of other poisons were managed as well.

Batteries

UNIVERSAL WASTE

The County of Santa Clara Department of Environmental Health Household Hazardous Waste Program provides residents with opportunities to recycle mercury-containing products (fluorescent lights, batteries, thermostats and thermometers) at retail locations, community centers and special outreach events. These products contain varying amounts of mercury, a heavy metal, which is a U.S. Environmental Protection Agency waste minimization priority chemical. A community-based collection system is convenient, cost-effective and combined with an aggressive educational outreach program, will increase awareness and participation. Outreach includes the use of consistent educational messages through the media and the development and distribution of brochures, flyers and posters as well as literature and event attendance.

Mercury containing products collected in FY 2005/2006

Recycling partners were established at retail and community drop-off locations. These partners agreed to allow customers to drop-off Universal Waste, such as batteries and fluorescent lamps. To date 18 retail stores serve as

fluorescent lamp drop-offs and 22 community and retail centers serve as battery drop-offs. The HHW Program picks up the waste and recycles it for them.

Elemental Mercury- 425 pounds (Includes thermostats, thermometers and other products)
Fluorescent Lights – 277,000 feet 67,943 pounds of lights
231 mercury-containing thermometers
Household batteries - 51,050 pounds

Public Outreach
6 Thermometer Exchanges – residents exchange their mercury-containing thermometers for a free mercury-free thermometer.

Participated in 21 community events.

Hazardous Waste Recycling & Disposal FOR SANTA CLARA COUNTY

Mercury Education Project, DEH-HHW

(from DEH-HHW Website)

Mercury Grant

The County of Santa Clara Department of Environmental Health, Household Hazardous Waste Program(HHW) has been awarded a California Integrated Waste Management Board (CIWMB) grant to conduct an educational campaign and to collect mercury-containing waste. Some common household products that contain mercury include fluorescent lamps, fever thermometers, button batteries, as well as some switches and thermostats.

Mercury is a potent nerve toxin and persistent pollutant that will never go away. When mercury escapes into the environment, it is transported by air, rain or runoff and deposited in our creeks and Bay. It builds up in sediments at the bottom of water bodies, and over time, the mercury is passed up the food chain affecting fish, birds, animals and even humans.

This grant will fund a three year project that enables the County and cities to decrease the amount of mercury getting into the environment by raising public awareness and providing free drop-off programs for residents and small businesses.

For proper disposal of household hazardous waste and mercury-containing products please call (408) 299-7300 to arrange an appointment for a drop-off.

Enviromental Resources Agency Mercury Education Project funded by the California Integrated Waste Management Board

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 06 Annual Report

Attachment H - Pesticide Management Activities (Integrated Pest Management Program)

Notes:

1). The County of Santa Clara was the first local jurisdiction to hire a full time IPM Program Manager, and the first local jurisdiction to adopt an IPM Ordinance.

2). The IPM Program submits quarterly reports to the Housing Land Use and Transportation (HLUET) subcommittee of the Board of Supervisors.

3). The IPM Ordinance is available on the internet at:

http://www.sccgov.org/SCC/docs/scc_ordinance/TOC074.HTM

4). The County IPM Manager has co-sponsored annual pesticide use reduction conferences in past years. The FY 07 conference is co-sponsored by the SCVWD and the City of San Jose, with the County IPM Manager serving as registrar. The next conference is on November 14, 2006, in San Jose. Information is available on the internet at:

http://www.sccgov.org/conference_2006

Supervisor Pete McHugh, Vice−Chairperson
Housing, Land Use, Environment, & Transportation Committee (HLUET)

FROM:

Gary A. Graves
Chief Deputy County Executive

SUBJECT: Integrated Pest Management and Pesticide Use Ordinance −
Quarterly Status Report for the period of February'05− April'06

RECOMMENDED ACTION

Forward a favorable recommendation to the Board of Supervisors for the acceptance of the quarterly status report on the progress of implementation of the Integrated Pest Management and Pesticide Use Ordinance.

FISCAL IMPLICATIONS

There are no fiscal implications associated with acceptance of this report.

CONTRACT HISTORY

Not applicable.

REASONS FOR RECOMMENDATION

Budget Strategies for Implementation of IPM Technology

In order to include the use of IPM tools & techniques in on−going departmental activities, long−term strategies are necessary to promote transfer of existing funding to environmentally friendly technologies. While there are short−term start−up costs for any new technology, in the long run IPM has often proven to be more cost−effective than a strictly chemical control program. The County IPM Manager has discussed with the Department IPM Coordinators and Managers to plan ahead for FY06/07 on the issues facing them. The Department of Roads & Airport and Park & Recreation, Social Services Agency and Health and Hospital have planned to submit their IPM plans by July, 2006, and Fleet and Facilities by August, 2006. The departmental activities for FY06/07 will reflect adoption of some of IPM technologies.

Status Report on Implementation Priorities

A. Pest Management and Facility Maintenance: Proactive & Preventive facility maintenance is critical to mitigate chronic pest problems. Control measures such as sanitation, and building maintenance and modifications are strong elements of a structural IPM project. Eliminating or reducing sources of food, water, and harborage that are available to pests, and limiting pest access into and throughout buildings needs close attention. The Facility Managers and/or Department IPM Coordinators should review and follow up on the inspection reports and recommendations on pest activity and related sanitation, housekeeping and maintenance issues. "IPM Guide for Facility Managers", a companion manual to "SCC IPM Administrative Guidelines & Procedures" is now available as reference. The purpose of the guide is to present a sampling of techniques and procedures to illustrate the facilities management approach to pest control. All of the methods cited have been tried previously, and all have proved successful in real−world situations.

The prolonged rainy season in early 2006 may present a sudden influx of pest problems such as ants, yellow jackets, rodents etc. Pest monitoring, reduced risk control treatments & related

occupant education are underway in the facilities with reoccurring infestations. The County IPM Manager is closely monitoring the efficacy of control strategies to ensure that pest free environment is maintained for building occupants. The County IPM Manager is also conducting site−specific inspections, addressing issues related to sanitation, housekeeping, and building & landscape maintenance to mitigate pest problems. On going chronic activity may warrant limited use of restricted (under the SCC IPM Ordinance) pesticides. Five Pesticide use exemptions were granted in this quarter.

B. Ecological Urban Landscape Planning: Most Santa Clara County facilities already have established landscapes. Once immediate pest problems have been dealt with, the department landscape managers should be looking for ways to correct the underlying conditions that led to the problem. This might mean developing a long−term plan to replace problem plants, rebuild ground, redesign planters or make other changes as stated in the last report. The process of "designing in" good growing conditions should be implemented. In order to begin, the existing landscapes need to be evaluated, determine project life cycle costs, and a budgeting and implementation plan needs to be developed.

The department of Fleet and Facilities plans to complete landscape design and maintenance planning process by August 2006. They may hire a landscape consultant to facilitate the same.

A pilot demonstration using non−chemical approaches to Urban Turf & Landscape maintenance is under consideration. A site at least one acre in size, if possible located at the County Administration building, is being sought and discussion are underway with the Department of Facilities & Fleet to execute the same. This demonstration will provide a real world example comparing current practices to maintenance through alternative practices. The project will also assist in assessing potential cost.

C. Posting of Pesticide Use: There is no update on the subject as stated previously.

D. Pest Management & Pesticide Use − Record Keeping (PUR) & Reporting : Records of each application reside with the departments and the contractors and are available upon request on case−by−case basis. Quarterly comparative analysis is on hold, since it requires a central database and uniform data entry. It will be made available once the web based electronic PUR database is fully developed and functional. ISD has made significant progress in development process, the estimated launch date yet to be determined.

E. Pesticide Use Exemption: While we have achieved significant progress since the adoption of the IPM Ordinance, continued efforts are needed based on our experiences during the last four years. Following pesticide use exemptions per Section B28−5 are granted. Please note that some of these exemptions are One Year Specific Use Exemptions and others are One Time Emergency use only:

1.Department of Fleet and Facilities, for Emergency Use Exemption under Section B28−5(c): "Whitmire P.I." (Pyrethrins). The product was used to control a Honey Bees infestation in the wall void of the Public Health Building, 80, Highland Avenue, San Martin.

2.Department of Health and Hospitals Systems, for Emergency Use Exemption under Section B28−5(c): "Whitmire P.I." (Pyrethrins). The product will be used to control a Honey Bees infestation in the wall void of the Public Health Department, 3003, Moorpark Avenue, San Jose.

3.Department of Health and Hospitals Systems, for Emergency Use Exemption under Section B28−5(c): "Whitmire PT565 Plus XLO" (Pyrethrins). The product may be used to control a Fruit flies infestation in the Nuclear Medicine Department (Waste Disposal Room), 751 S. Bascom Avenue, San Jose. However, the Structural IPM contractor planned to opt for EcoPCO ACU (2−Phenethyl propionate) an approved product as first preference.

4.Department of Health and Hospital Systems for one−time specific use exemption under Section B28−5(b1−a&c): use of the following pesticides applications to control Subterranean termites at the 90 Highland Avenue, San Jose.:

First Line (N−Ethyl Perfluoro Octanesulfonamide) − approved for specific use

First Line GT (Sulfuramid) Bait − approved for specific use

Tim−Bor (Disodium Octaborate Tetrahydrate) − approved for specific use

Borid Turbo (Orthoboric acid) − approved for specific use

Bora−Care Jecta (Disodium Octaborate Tetrahydrate) − approved for specific use

Cy−Kick (Cyfluthrin) −approved for specific use

Premise (Imidacloprid) − approved for specific use

Tempo 20 WP (Cyfluthrin) − approved for specific use]

5.Department of Park and Recreation for one−time specific use exemption under Section B28−5(b1−a&c): use of the following pesticides applications to control Subterranean and Drywood termites at the 6603 San Ignacio Avenue, San Jose:

First Line (N−Ethyl Perfluoro Octanesulfonamide) − approved for specific use

First Line GT (Sulfuramid) Bait − approved for specific use

Tim−Bor (Disodium Octaborate Tetrahydrate) − approved for specific use

Borid Turbo (Orthoboric acid) − approved for specific use

Bora−Care Jecta (Disodium Octaborate Tetrahydrate) − approved for specific use

Cy−Kick (Cyfluthrin) − approved for specific use

Premise (Imidacloprid) − approved for specific use

Tempo 20 WP (Cyfluthrin) − approved for specific use

Vikane (Sulfuryl Fluoride) − approved for specific use

The department plans to incorporate site enhancement/improvements to prevent termite activity in the future.

F. IPM Web site: The IPM web site was launched on November 17 2005. The website will help in dissemination of necessary IPM awareness and education to all user groups and the public. The website address is http://IPM.SCCGOV.ORG

G. IPM Projects & Demonstrations aiming at Pesticide Use Reduction : The IPM projects & demonstrations reported earlier are now being implemented, providing sites where hands−on education about IPM is coupled with a relevant, "real−world" example.

The reports on each site visit are available to interested parties.

1.Use of Matran (Clove Oil formulation); Radiant Heat & Weed Flamer torches in post emergent vegetation control: Adoption of the use of Matran Pro (Clove Oil formulation) for Rights−of−Way weed control on urban landscapes throughout the county facilities, recreational areas of all regional parks, airports and limited adoption at the Roads rights−of−way is underway. Unsightly weed growth in certain areas of the county landscapes is anticipated as we undergo this transition and learn about optimizing logistics and protocols. It is highly unlikely to find one technology or product (conventional herbicide or alternative) as a panacea of all. An integrated approach including variety of

tools & techniques is necessary and should be appropriately designed and implemented within the overall management of urban ecosystem. For example, to supplement clove oil post emergent vegetation control applying principles of plant health care (PHC), radiant heat, weed flamers, use of mulch, weed fabric, plant selection, and design improvements etc. should be considered. The Clove Oil project will continue in the upcoming 2005−06 season to determine optimum time of product application and protocol. The users departments are planning for purchase and use the product in the upcoming season. Periodic training of the user groups and consulting with subject matter specialists will help to overcome any challenges in the broad spectrum of vegetation management in urban landscapes.

2.Yellow Jacket Abatement Control: The collaborative research work with scientists from the University of California, Riverside was implemented in May 2005 at Santa Teresa, Vasona and Uvas Canyon parks covering approx. 150 acres. The first year of study completed in October 2005 and synopsis is available for review. The planning for 2006 trails is underway, with an initial survey by UC Riverside scientists on May 10 2006.

The desired outcome of this project is the registration of insecticide bait that will be effective in the elimination of Yellow Jacket nests, and in Yellow Jacket traps and a strategic service/abatement protocol for the user groups. A successful project will potentially help alleviate this vexing problem in 27 regional parks of Santa Clara County, covering 50,000 acres, and could be expanded to urban turf & landscape areas in County owned complexes. It will also benefit other public agencies & public at large throughout California & even throughout the United States, if a successful Integrated Pest Management protocol and effective abatement strategy is developed with the registration of effective bait & lure traps.

3.Investigating Precision Pesticide Application Equipment: The technology like "WeedSeeker" uses advanced optics and computer circuitry to sense if a weed is present; only sprays weeds, not bare ground and is being used in agriculture as well as along roadsides, irrigation districts, railroads, right−of−ways, airport facilities, golf courses, parking lots with medians, parks and hiking trails, etc. This technology claims to reduce weed control cost by 80 percent. The Department of Roads & Airport and Parks & Recreation are planning to invest/purchase such technology in 2006−07 seasons.

H. IPM Awareness, Education & Interactive Application:

1.5th National IPM Symposium: The County IPM Manager participated at the National IPM Symposium, delivering an informative lecture to the conference participant's on April 5, 2006 that was well received by the audience. The symposium was the culmination of three years of planning a technical platform to share latest information on IPM tools and technologies. Attended by 700 plus subject matter specialists and interest group from 16 plus countries, the symposium was sponsored by the United States Department of Agriculture, Environmental Protection Agency, Department of Agriculture Cooperative State Research, Education, and Extension Service, Regional IPM Centers, Regional Plant Diagnostic Network, Department of Agriculture Forest Services, National Park Services, United States Agency for International Development, University of California Exotic/Invasive Pests and Diseases Research Program, National Science Foundation Center for Integrated Pest Management and the Pesticide Risk Reduction Program of Canadian Ministry of Agriculture. The keynotes and subject specific messages, all reflected the progress and challenges connecting pests, IPM practices, priorities, and strategic directions across disciplines. Two important highlights of Keynote message were as follows:

− One by Senior IPM Officer, UN Food and Agriculture Organization, Rome, Italy was "The sheer decisions at the policy level and peoples willingness to transition to alternatives alone have permitted several developing countries IPM programs to reduce annual pesticide use by tens of thousands of tons and still maintain food production growth with population while reducing potential pesticide risks." The statement was well substantiated by statistics.

− Another by Toxic Reduction/Green Building Manager, City/County of San Francisco who placed emphasis on adoption of precautionary principles, training, clear and transparent decision making as key factors of IPM success.

2.Occupant/Tenant Awareness & Training: Two training programs for year 2005−06 were planned to educate building occupants/tenants on practices such as good sanitation, housekeeping, and maintenance. These awareness training will help to mitigate several pest management problems. The method of delivery (educational workshop versus staff meetings) for large audience is under discussion. The project is on hold due to time limitation and engagements with other IPM priorities.

3.Public Awareness: One brochure & one PSA (public service announcement) will be developed to promote the county's IPM efforts. These brochures will introduce the concept

of IPM to a diverse audience. The description about IPM, its components and its advantages will be written in house by the County IPM coordinator. Six thousand dollars ($6000.00) are available for this project from the one−time funds allocated to the IPM program. The project is on hold due to time limitation and engagements with other IPM priorities.

BACKGROUND

On May 21, 2002, Board adopted the Integrated Pest Management (IPM) and Pesticide Use Ordinance. The IPM Ordinance went into effect on June 20, 2002. As required by the ordinance, staff is to provide a quarterly status report to the Housing, Land Use, Environment, and Transportation Committee and then to the full Board for their review and comment. The Technical Advisory Group (TAG) has previously agreed to proceed on the implementation priorities summarized in this report.

CONSEQUENCES OF NEGATIVE ACTION

Not applicable

STEPS FOLLOWING APPROVAL

Staff will incorporate any comments or direction into a follow−up transmittal to the full Board of Supervisors.

cc: Peter Kutras, Jr.

Integrated Pest Management Plan 2006-07
Presentation at IPM-TAG Meeting July 18, 2006

The Parks and Recreation department will continue to support the Counties IPM goal of reduce pesticide use. We will accomplish this goal by implementing strategies that will allow us to maintain our parks to a high standard while providing a pesticide use plan that will meet the County IPM ordinance guidelines. The Parks and Recreation department is innovative and sets the standard for the use of Best Management practices for IPM in pesticide use. Our goal is to maintain park property in a responsible, cost effective method, to provide a safe environment for the citizens of Santa Clara County and preserve parkland for future generations.

Research

We are entering the second year of a cooperative research project with the University of California, Riverside for yellow jacket control. We will begin this year's project by hosting the researchers for an onsite coordination meeting in May to set up the parameters of this year's project. The goal of this joint research project is to develop a system to control yellow jackets that are a potential safety issue for park visitors and staff. We will be evaluating several different techniques for control:

- Intensive trapping method
- Evaluating different traps for effectiveness
- Using different types of low risk pesticides
- Understanding the nesting habits in parks
- Locate the areas that nest are being built in
- Physically removing nest that are found to reduce numbers

We also use the services of a profession pest control company that specialize in yellow jacket control using no pesticides. This company also helps in the development of new techniques of Yellow Jacket control using alternatives to pesticides.

Training

All staff that applies pesticide will attend eight-hour pesticide safety training. This training is held before the start of the spray season and will consist of:

- How to reduce the amount of pesticide used to control vegetation
- Proper pesticide application methods
- How to minimize environmental hazards
- Prevention of personal exposure
- How to recognize health hazards

Integrated Pest Management Plan 2006-07
Presentation at IPM-TAG Meeting July 18, 2006

Pesticide use Reporting

- The parks department will integrate the Department of Agriculture, electronic pesticide use reporting system. This system will provide electronic reporting for the State of California, pesticide use reporting.
- All recommendations for pesticide use will be produced using the IPM pesticide use reporting system that is being developed in conjunction with ISD. This system will be a work order based system that will gather information on the applicator of the pesticide, the location of the pesticide applied and various other items that will be used for analysis.

Mechanical Control

Parks Department is purchasing several pieces of equipment that will help to reduce pesticide use. Mechanical control is an effective means of vegetation control on park owed property. The addition of this equipment will supplement our already vast inventory of equipment used for vegetation control. The following equipment is being purchased:

- Tractor equipped with a Brush Hog mower to maintain heavy vegetation and brush
- 3 DR wheeled vegetation trimmers
- 6 hand held weed trimmers

Pesticide Application equipment

The spray crew who apply volume pesticide for vegetation control is researching a new low volume sprayer. The specifications of this sprayer will enable the spray crew to reduce the amount of pesticide used. It will allow a precise metered application of pesticide for vegetation control. The sprayer is to be truck mounted self-agitated model.

The pesticide is applied from a boom sprayer with a single nozzle. The applicators will reduce personal exposure by controlling the unit from within the truck cab.

Vertebrate pest control

The parks department is committed to public safety in all public use areas of the parks. We have developed a pesticide free method of ground squirrel control using traps. This is an effective means of control. It is selective and targets the ground squirrels that are in the high use areas where hazards to humans are the greatest.

- Purchased 25 new traps for the program
- Continue use the services of a professional trapper to advise and assist in our program

Integrated Pest Management Plan 2006-07
Presentation at IPM-TAG Meeting July 18, 2006

Best Management practices for IPM

- Mulching is being used in several new park renovations to control weeds. The use of mulch will reduce the maintenance costs as well as reduce the amounts of pesticides applied to control unwanted vegetation. The use of mulch is an effort to incorporate the use of IPM techniques in the planning phase of park construction.

- Other planning techniques are the use of ground covers. Ground covers will shade out vegetation and provide competition for weed. Areas that have established ground covers will have a very low weed population.

- Continue the use of topdressing, fertilizing and aeration of the turf grass areas to promote good turf health. Turf that is healthy is able to resist disease. When turf is maintained using best management practices it will have less weeds, disease will be minimal and it will be full and thick in its growth and habit.

8/22/2006

Department of Roads and Airports
Expressway Median Mulch Program

- 10 year program to place 4 inches of mulch in the median of 6 County expressways.
- Annual program will consist of excavating existing dirt and weeds and mulching approximately 170,000 square feet of expressway median.
- Annual cost to the department will be approximately $150,000, which includes excavation and mulching. The entire 10 year program will cost the department $1,500,000.
- The program will reduce spraying on the expressways by approximately 170,000 square feet a year.
- At the completion of the 10 year program, spraying on the expressways will be reduced by approximately 50%.

Preliminary Schedule

2006	San Tomas Expressway (170,000 SF)
2007	Central Expressway (45,000 SF) San Tomas Expressway (125,000 SF)
2008	San Tomas Expressway (170,000 SF)

2009	San Tomas Expressway (170,000 SF)
2010	Lawrence Expressway (170,000 SF)
2011	Lawrence Expressway (54,000 SF) Page Mill Expressway (123,000 SF)
2012	Almaden Expressway (123,000 SF) Capitol Expressway (47,000 SF)
2013	Capitol Expressway (170,000 SF)
2014	Capitol Expressway (170,000 SF)
2015	Capitol Expressway (162,000 SF)

COUNTY OF SANTA CLARA

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
I. Municipal Pesticide Use ***Goal I.A.*** *Eliminate all unnecessary municipal pesticide use (particularly organophosphate (OP) pesticide use) and implement Integrated Pest Management (IPM) techniques.*				
I.A.1	Track pesticide use on County owned property. (PS #9).	Routine Data available on request. **The County has a full time IPM Manager, an IPM Ordinance, an IPM Program, and the services of the Agricultural Commissioner's staff for pesticide regulation.** Evaluation: The program is successful and professionally managed.	Ongoing	County IPM Program Coordinator in County Exec's Office, FAF
I.A.3	Continue to refine and implement SOPs and BMPs for implementing the IPM policy. (PS #3).	Routine	Ongoing	County IPM Coord., FAF
I.A.4	Update URMP with Pest Mgmt. changes.	Routine	Report In AR IPM Ord.	CWP Prgm Coord.

I.A.4	Update URMP with Pest Mgmt. changes.	Routine	Report In AR IPM Ord. IPM Quarterly Reports	CWP Prgm Coord.
I.A.5	Continue to ensure that any contractor employed to conduct pest control and pesticide application on County property engages in pest control methods consistent with the IPM policy adopted by the agency (PS #6).	Routine	Ongoing	County IPM Coordinator, FAF
I.A.6	Arrange annual, County facility search of chemical storage areas for pesticides no longer legal for application, and properly dispose of them. (PS #10)	--->	Conducted once. Now ALL pesticide purchase goes through IPM Coord.	County IPM Coord.
MM	Document completion of tasks in annual	Pesticide use reports available upon	Ongoing	County IPM

Program Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Responsible Party
Goal I.B. *Raise awareness of all municipal employees and train employees who apply pesticides for the jurisdictiony about the IPM Policy and/or IPM techniques as appropriate.*				
I.B.1	Ensure that employees who apply pesticides for the agency continue to obtain the	Routine	Annually	County IPM Coord. FAF,

I.B.1	Ensure that employees who apply pesticides for the agency continue to obtain the appropriate County Ag and DPR- required training (PS #5a).	Routine	Annually	County IPM Coord. FAF, Parks, Roads
I.B.2	Provide for annual training on the IPM Policy, SOPs, and BMPs, and the latest IPM techniques to employees within departments responsible for pesticide application (PS #5b).	Routine: IPM Manager	Annually	County IPM Coordinator
I.B.3	Annually inform employees who are not authorized to apply pesticides, that they cannot use over-the-counter pesticides in the workplace (PS #5c)	Routine	Annually, by e-mail or county newsletter	County IPM Coordinator
MM I.B.1.	Document and evaluate effectiveness of annual staff training.	Quarterly HLUET Committee reports also.	Annually for AR	County IPM Coordinator
II. Public Education and Outreach *Goal II.A. Increase awareness of IPM so target audiences recall less toxic pest management messages and adopt IPM behaviors. Target audiences include residential pesticide users, professional pest control businesses, customers of professional pest control businesses, & pesticide retailers, school districts(PS # 7).*				
II.A.1	Assist with local implementation of the Watershed Education & Outreach (WE&O) Campaign[1], which will target the general public and include messages about less-toxic pest control and proper disposal. Support SCVURPPP as requested	Financial support through SCVURPPP	During FY 06	CWP Prgm. Coord.
II.A.2	Assist SCVURPPP in developing targeted messages regarding proper pesticide use and		Review of new pieces as	CWP Prgm. Coord.

II.A.4	Identify and attend local community events and distribute outreach material. Distribute literature at Backyard Compost or Master Composter workshops.	MCEP Program -- Routine Routine		IWM Prgm. Coord., P2 Coord. MCEP Program
II.A.5	Maintain contact with local gardening groups and offer them literature.	MCEP Program -- Routine		IWM Prgm Coord., P2
II.A.9	Continue to support BASMAA Regional Media Relations Campaign featuring pitches to Bay Area media and responses to breaking news on pesticide-related topics.	SCVURPPP funds BASMAA baseline projects, including Regional Media Relations Campaign.	Ongoing	CWP Prgm. Coord.
II.A.10	IPM coord. to provide IPM-related press releases to local media as appropriate—using SCVURPPP generated materials when appropriate	Routine	Intermittently, as needed	IPM Coord.
II.A.12	Continue to assist with implementation of local components of a "Pesticide User Outreach" project targeting residential and commercial users	Will assist as needed.	As requested by SCVURPPP	CWP Prgm. Coor., IPM Coord.
II.A.14	Internal outreach on IPM to encourage employees to use IPM techniques away from work: Distribute IPM fact sheets electronically to involved County employees through e-mail or web site or newsletter.	Routine: IPM Manager	Intermittently	IPM Prgm. Coord., IWM Coord.
MM	Document or estimate numbers of residents	Routine: IPM Manager: Conference	Annually, for	IPM Prgm.

MM II.A.1.	Document or estimate numbers of residents reached by outreach efforts and media advertising	Routine: IPM Manager: Conference attendance records and employee newsletter	Annually, for AR	IPM Prgm. Coord., IWM Coord.
Goal II.B. *Educate pesticide retailers and consumers about less toxic pest control products and promote the sale of such products.*				
II.B.1	Continue to fund and participate in the BASMAA Regional IPM Partnership	SCVURPPP funds BASMAA baseline projects, including Regional IPM Partnership.	Ongoing	CWP Prgm. Coord.
II.B.2	Continue to support the IPM Store Partnership Program. (Nurseries)	Support through SCVURPPP	Ongoing	CWP Prgm. Coord.
MM II.B.1.	Assist Program when requested in documenting number of participating stores, materials distributed, employees trained, and cost-effectiveness of the IPM Store Partnership Program.	N/A this FY	As requested. **There are very few retail stores in**	SCVURPPP

Mercury Grant

The County of Santa Clara Department of Environmental Health, Household Hazardous Waste Program(HHW) has been awarded a California Integrated Waste Management Board (CIWMB) grant to conduct an educational campaign and to collect mercury-containing waste. Some common household products that contain mercury include fluorescent lamps, fever thermometers, button batteries, as well as some switches and thermostats.

Mercury is a potent nerve toxin and persistent pollutant that will never go away. When mercury escapes into the environment, it is transported by air, rain or runoff and deposited in our creeks and Bay. It builds up in sediments at the bottom of water bodies, and over time, the mercury is passed up the food chain affecting fish, birds, animals and even humans.

This grant will fund a three year project that enables the County and cities to decrease the amount of mercury getting into the environment by raising public awareness and providing free drop-off programs for residents and small businesses.

For proper disposal of household hazardous waste and mercury-containing products please call (408) 299-7300 to arrange an appointment for a drop-off.

Clean Water Program

DATE: 8/1/2006

SUBJECT: Universal Waste Recycling

Listed below are the Universal Waste recycling totals from County facilities for the past fiscal year (July 1, 2005 to June 30, 2006) :

Fluorescent Bulbs	21,964 individual bulbs or 77,000 linear feet of Fluorescent lamps.
Lighting Ballasts	456 Pounds. All were non-PBC.
Batteries	6159 Pounds

The Universal Waste Program at Facilities and Fleet (FAF) is accomplished by having all Universal Waste lamps and ballasts returned from facilities maintained by FAF to the Berger Drive complex. From the period 7/1/2005 to 12/31/2005 these bulbs were taken to the Household Hazardous waste facility in San Jose for free recycling subsequent to a State grant that expired 12/31/2005. From 1/1/2006 until 6/30/2006 the lamps were again either delivered to, or picked up by AERC recycling in Hayward.

Batteries collected from all County Buildings excluding those in Parks and Recreation, Roads and Airports and Health and Hospitals are picked up from 20 consolidation locations Countywide and brought to the Berger Complex for sorting and recycling in the following methods. All NiCad batteries are boxed and shipped for no cost to RBRC recycling. All lead acid batteries are inventoried and either taken to Bobcat Battery Recycling, or returned to the selling vendor. All non-NiCad non-lead acid batteries are sorted and brought to Household Hazardous Waste events and paid for by Occupational Safety and Environmental Compliance Department. (OSEC)

All Universal Waste activities are accomplished as ancillary duties by the OSEC Environmental Compliance Specialist stationed at FAF.

TRAINING:

DEH -- Solid Waste - Local Enforcement Agency Training

DEH Solid Waste - LEA staff attended a CIWMB/LEA conference promoting coordination between various state oversight boards, such as air, water and solid waste. The topics centered around solid waste facilities and how the public and the environment can be better protected from the impacts of these facilities and the improper or illegal disposal of solid waste.

There were presentations relating to illegal dumping abatement as well as coordinating efforts with the RWQCBs, since local inspectors are their eyes and ears out in the field. The solid waste staff gained valuable information from several topics covered relating to storm water pollution prevention. Solid Waste staff also attends monthly the Technical Advisory Committee meeting addressing a wide range of issues regarding solid waste and recycling including storm water run off and public education.

COUNTY OF SANTA CLARA
CLEAN WATER PROGRAM
ANNUAL REPORT FY 06

Annual Food Facility Inspection Training Meeting--WV Cities and DEH--CPD

On April 18, 2006, twenty-two (22) DEH Consumer Protection Division's Environmental Health Specialists attended a training meeting and slide show presented by the West Valley Clean Water Program (WVCWP) Inspector. The evaluation from the Supervising Environmental Health Specialist was positive: "Jack's presentation was great, and helpful. I believe that review and reinforcement of what a specialist is to look at during at inspection is always beneficial. Comments from staff were positive, especially regarding the photos." (Powerpoint slides).

Inspectors were shown photos of typical problems. The importance of reporting all potential West Valley storm water violations to the West Valley inspector was re-emphasized. Due to increased awareness, DEH inspectors referred at least one potential urban runoff violation, unrelated to food facility inspections, to the WVCWP Inspector this year. Other topics covered at this meeting were:

- Updated contact information;
- How to report urban runoff violations to municipal inspectors to ensure accurate tracking and follow up;
- Feedback on the effectiveness of outreach & educational handouts
- Reminder to distribute pesticide reduction fact sheets called "Don't Set a Table for Pests" to restaurants.

(At the beginning of FY 05-06 the West Valley Inspector began a more aggressive effort to alert restaurants to the need for regular grease interceptor maintenance. At the April 18th training meeting for DEH--CPD Inspectors, the West Valley Inspector suggested that the Environmental Health Specialists look for grease trap maintenance records during their restaurant inspections.)

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 06 Annual Report

Attachment N - Activities at Stanford University

Note: The City of Palo Alto conducts many storm water inspections at Stanford University, by informal agreement with the County and the University. This is because (1) a great deal of the storm water generated on campus flows to the Palo Alto storm drain system, and (2) since the University connects to the Palo Alto wastewater treatment facility, Palo Alto inspectors are often present on campus.

Dear Mr. Homan,

The City of Palo Alto Regional Water Quality Control Plant hereby submits the 2005-2006 Annual Storm Water Review for Stanford University. The water oversight plan for Stanford University has been managed by the City of Palo Alto since February 13, 1996. The City of Palo Alto continues to monitor the areas of Stanford campus which are identified in the water oversight plan letter (Attachment 1) including the areas covered under the Industrial Waste program.

Stanford has been cooperative and responsive to all water related issues. The RWQCP and Stanford continue to meet every two months to discuss water issues.

Enclosed you will find a table of all inspections including dates, areas visited, findings, and the actions taken by Stanford (Attachment 2). The annual report covers the time period from April 2005 to June 2006. Please refer to attachment 1 which identifies the areas of the Stanford University campus specified for oversight.

No significant issues were observed during the 2005-2006 period.

If you would like to discuss this report further please call me at (650)329-2285 or Chuck Muir at (650)329-2518.

Sincerely,

Phil Bobel, Manager
Environmental Compliance Division

06/20/06	Plan Review – Environment and Energy Building – Quad 4 Building 070.	Stanford	Chuck Muir	• PAMC 16.09.106(e): New dumpster areas shall be covered. The area shall be designed to prevent water run-on to the area and run-off from the area • PAMC 16.09.032: Connections to the storm drain shall not be permitted for loading docks where chemicals, hazardous materials, grease, oil, or waste products are handled	Recommendations submitted to Stanford University on 6/20/06.		Tracy Ingebrigtsen
06/07/06	Stanford University Stadium Groundwater Discharge - Meeting	Stanford	Chuck Muir, Ken Torke, Phil Bobel	• Met with Stanford and contractor Vance Brown to discuss groundwater discharge.			
05/31/06	Bimonthly Meeting	RWQCP	Chuck Muir	• Discussed Stanford Stadium groundwater discharge. • Discussed C.3 requirements including who will inspect them.			
05/26/06	Groundwater Discharge Inspection	Stanford Stadium	Chuck Muir	• RWQCP along with Stanford inspected the Stanford Stadium construction site. The contractor, Vance Brown, was in the process of construction dewatering in order to install a new storm drain collection system. However, contractor was discharging to the sanitary sewer system.	RWQCP requested that Stanford collect and test groundwater for organic compounds. Sample collected on June 1, 2006. Results were all Non-Detectable (ND). Notice of Noncompliance issued to Vance Brown for failure to notify RWQCP of discharge and for the discharge of clean water to the sanitary sewer. Groundwater discharge diverted from sanitary sewer to storm water collection system on June 7, 2006.	06/07/06	Marty Laporte & Bijendra Sewak - Stanford; Rodney Humble - Vance Brown.
04/28/06	Semiannual Inspection	Research Animal Facility I & II	Chuck Muir	• No storm drain issues identified.			
04/26/06	Semiannual Inspection	Gilbert Biology	Chuck Muir	• No storm drain issues identified.			
4/26/2006 (Continued)	Semiannual Inspection	Stauffer Chemistry Buildings I & II	Chuck Muir	• No storm drain issues identified.

November 9 & 23, 2005	Storm water Inspection/Tour	General	Chuck Muir	• Hose bibs. There were a number of hose bibs observed during the two day inspection especially at the student housing areas. It may be beneficial to remind students of the University's policy regarding the use of hose bibs for automobile washing. Areas of the campus where hose bibs were observed include Escondido Village, Wilbur Hall, Rains House, Cowell Houses, and Pearce Mitchell • Computer monitors. There were a few computer monitors observed near garbage dumpsters on campus. It may be beneficial to remind students of the University's policy regarding disposal of computer monitors. Areas of the campus where used computer monitors were observed include Stanford Auxiliary Library, Escondido Village, and • Storm drain labeling. There were some storm drains that did not have any labeling or the label had worn off. Recommend labeling storm drains to ensure proper protection for accidental discharge into storm	Stanford's response: Stanford University will continue to provide outreach to students on this issue. For those areas where usable hose bibs were observed, the Housing Department has requested a locking/no access hose bib be reinstalled. Stanford's response: Stanford University continues to educate the community about proper disposal of electronic equipment. All noted computer monitors have been disposed of properly. Stanford's Response: Stanford continues to re-label storm drains where the label has worn off. We are in a multi-year process of replacing painted labels with durable heat applied labels.	02/02/06	Tracy Ingebrigtsen

Stanford University Stormwater Review for FY 06

Date	Event	Location	Report Source	Findings	Actions Taken	Date Resolved	Responsible Party
11/23/05	Storm water Inspection	Stern Hall – Loading Dock/Dining & Kitchen Area	Chuck Muir	• Observed the storm drain in the loading dock area at Stern Hall. The storm drain contained a white solid that appeared to be grease. The site should remind all personnel that grease is not allowed in any of the storm drains or sanitary drains. Grease needs to be disposed of properly. The drain should have a stencil indicating that it drains to the bay.	Stanford's Response: Stern Hall staff have been reminded not to wash down any waste into the storm drain. Tallow bins and the kitchen grease trap are emptied by a vendor at least quarterly and removed off-site. The storm drain currently has a permanent stencil in place. Further investigation of this storm drain is taking place to ensure only storm water is entering this basin. 7/26/06 Additional follow-up – This drain was cleaned out by plugging and pressure washing. Facility staff are monitoring drain.	02/02/06	Tracy Ingebrigtsen
11/23/05	Storm water Inspection	Wilbur Hall – Loading Dock	Chuck Muir	• Observed soapy water inside the storm drain in the loading dock area of Wilbur Hall. All personnel should be reminded of the proper disposal of mop or any cleaning water. Please ensure the storm drain is properly • Observed grease residue on asphalt next to tallow collection drums and food waste bins. The site should address this potential storm water threat. Please ensure that the storm drain is properly labeled	Stanford's Response: Wilbur Hall staff have been reminded not to wash down any waste into the storm drain. The tallow bin and food compost bin area will be mopped up more frequently and the water disposed of through a grease trap to the sanitary sewer. The storm drain has been re-stenciled.	02/02/06	Tracy Ingebrigtsen
11/23/05	Storm water Inspection	Schwab Center	Chuck Muir	• Observed the dumpster area at the Schwab Center. There was some water next to the storm drain. Employees should be reminded that it is ok to discharge cleaning water to the sanitary sewer but not the storm drain. Please ensure that the storm	Stanford's Response: Schwab Center staff have been reminded about proper kitchen best management practices. The nearby storm drain has been re-stenciled.	02/02/06	Tracy Ingebrigtsen
11/23/05	Storm water Inspection	Manzanita Hall	Chuck Muir	• Observed secondary containment for tallow drums. The secondary containment pallet was full of grease. Secondary containment shall be kept clean and dry	Stanford's Response: The Manzanita Hall Kitchen Manager cleaned the tallow bin secondary containment structure.	02/02/06	Tracy Ingebrigtsen
11/23/05	Storm water Inspection	Encina Temporary Trailer	Chuck Muir	• Observed paint cans stored outside of air-conditioning unit #6. The site should properly dispose of or correctly store the paint cans	Stanford's Response: The paint cans have been disposed of properly.	02/02/06	Tracy Ingebrigtsen

Stanford University Stormwater Review for FY 06

Date	Event	Location	Report Source	Findings	Actions Taken	Date Resolved	Responsible Party
11/23/05	Storm water Inspection	Chi Theta Chi House	Chuck Muir	• Observed broken fluorescent lights next to garbage dumpster. Observed 3 x 55 gallon drums of unknown liquid. Drums not labeled • Observed small garbage can full of used motor oil. The can was uncovered. • The site should properly dispose of the broken hazardous fluorescent lights. • The site should properly dispose of the unknown liquids and used motor oil. • The site should remind the housing manager(s) of the correct storage and disposal of hazardous materials and used liquids	Stanford's Response: The Chi Theta Chi house has removed the hazardous materials storage cabinets. All chemicals and other hazardous materials have been properly labeled and removed for proper disposal.	02/02/06	Tracy Ingebrigtsen
11/23/05	Storm water Inspection	Synergy House	Chuck Muir	• Observed used paint cans outside in back of the house. The paint cans should have proper secondary containment and stored inside	Stanford's Response: Paint cans have been disposed of properly.	02/02/06	Tracy Ingebrigtsen
11/23/05	Storm water Inspection	Red Barn Facility	Chuck Muir	• Blacksmith shed needs secondary containment for paint cans and chemicals. The floor inside the shed is dirt.	Stanford's Response: The Athletics Department is disposing of the materials properly or secondarily containing usable materials. The Stanford EHS department will provide regular hazardous materials oversight of this area.	02/02/06	Tracy Ingebrigtsen
11/09/05	Storm water Inspection	Facilities Operations – Corporation Yard	Chuck Muir	• Observed mulch and sand storage bays. Storage bays located next to storm drain. The mulch and sand piles have been tracked outside of the bays. There is some debris from the mulch and sand pile next to the storm drain. The site should keep the areas around the storm drain clean.	Stanford's Response: Staff are implementing best management practices (BMPs) to keep this area as clean as possible. BMPs include:Covering stockpiled materials during rain and wind. Placing straw waddles across the entrances to the stockpiles during rain events. Regularly sweeping area. Insuring that the storm drain grate is kept free and clear of debris.	02/02/06	Tracy Ingebrigtsen
11/09/05	Storm water Inspection	Facilities Operations - Grounds	Chuck Muir	• Oil and lubricant containers behind grounds building need to be stored inside and secondarily contained.	Stanford's Response: Oil and lubricant containers have been properly stored.	02/02/06	Tracy Ingebrigtsen

Stanford University Stormwater Review for FY 06

Date	Event	Location	Report Source	Findings	Actions Taken	Date Resolved	Responsible Party
11/09/05	Storm water Inspection	Facilities Operations – Tractor Storage Area	Chuck Muir	• Observed oil leaking from underneath the tractors stored on the asphalt. The tractors are covered by canopies. Oil leaking from equipment should be cleaned up and properly maintained	Stanford's Response: Leaking oil from the tractors has been cleaned up and the equipment fixed or drip pans placed under leaking equipment.	02/02/06	Tracy Ingebrigtsen
11/09/05	Storm water Inspection	Facilities Operations – Old Barn	Chuck Muir	• Observed a large number of paint cans stored inside the barn on a table. Some cans were secondarily contained while others were stored outside the secondary containment. The floor inside the barn was wet possibly due to a leaking roof. All containers need secondary containment and need to be protected	Stanford's Response: All containers have been disposed of properly or secondarily contained.	02/02/06	Tracy Ingebrigtsen
11/09/05	Storm water Inspection	Stanford Auxiliary Library – Secondary Loading Dock	Chuck Muir	• Observed a 5 gallon paint can behind loading dock. The paint can should be properly disposed of. There is a storm drain located in the middle of the loading dock driveway. The storm drain should be properly labeled. The driveway appears to be	Stanford's Response: The 5-gallon paint can has been disposed of properly. The storm drain already has a permanent storm drain stencil.	02/02/06	Tracy Ingebrigtsen
11/09/05	Storm water Inspection	Pepper Tree After school House	Chuck Muir	• Observed miscellaneous chemical containers outside in the yard next to house. The chemical containers were made up of 5 gallon paint cans, cleaners, sealers and polishers. The materials should be properly stored inside and properly contained	Stanford's Response: All chemical containers have been cleaned up and disposed of properly.	02/02/06	Tracy Ingebrigtsen
11/09/05	Storm water Inspection	Escondido Village – Housing Maintenance Yard	Chuck Muir	• Housing Maintenance grinding and welding area is located on top of open storm drain. Recommend protecting the storm drain from potential contamination of metal debris.	Stanford's Response: The following best management practices (BMPs) have been instituted. Storm drain will be covered (cover on order) during any grinding and welding. Area will be swept clean after machine use. A sign will be posted outlining these procedures.	02/02/06	Tracy Ingebrigtsen
11/09/05	Storm water Inspection	Blackwelder – 112F Jenkins Court	Chuck Muir	• observed oil waste in garbage dumpster area. There was a 5 gallon plastic garbage can which contained used oil. The oil waste should be properly disposed of	Stanford's Response: The used oil has been disposed of properly.	02/02/06	Tracy Ingebrigtsen

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 06 Annual Report

Attachment O - Clean Water Program Response to RWQCB Staff Comments Regarding the FY 05 Annual Report

County of Santa Clara
Clean Water Program
DEVELOPMENT SERVICES OFFICE
DEPT. OF PLANNING AND DEVELOPMENT
70 West Hedding St., 7th Floor East Wing
San Jose, CA 95110

RESPONSE TO COMMENTS OF THE SFB-RWQCB STAFF REGARDING THE COUNTY OF SANTA CLARA FY 05 CLEAN WATER PROGRAM ANNUAL REPORT
8/30/2006

The comments of the SFB-RWQCB staff regarding the FY 05 Clean Water Program Annual Report are listed below in italics, with the County's Clean Water Program response in normal type.

1). We appreciate Santa Clara County including a list of acronyms (and their definitions) in the Annual Report; however, there are some acronyms that have not been defined (e.g., pages 31 and 71 – LLA; page 74 – SFD). Please revise the acronym list on page 5 to include all acronyms that are used in the Annual Report.

LLA means Licensed Landscape Architect, and SFD means Single Family Dwelling. The acronym legend has been improved for the FY 06 Annual Report, and the official SCVURPPP acronym list has also been added.

2). Santa Clara County's Group 1 New Development and Significant Redevelopment Projects Table (pages 30-41): Please revise this table to include the "application deemed complete" and approval dates under the "Project Status" column for each project. Also, for each entry in the table, please indicate the specific kind of development or redevelopment (i.e., residential single-family homes, residential condominiums, commercial, industrial, mixed use (commercial and residential), etc.).

Please see the revised table included after this response memo.

3). Stanford University Equestrian Center: Please list the number of acres of new and/or replaced impervious surface for this project in the appropriate column.

Please see the revised table included after this response memo.

4). *Page 42 states that for private projects, operation and maintenance inspections will be performed by a private Registered Civil Engineer. Please clarify who (Santa Clara County or the project proponents) will be hiring the Registered Civil Engineer. For public projects, please include a discussion about the personnel/departments responsible for conducting the inspections.*

Privately constructed project owners will engage private Registered Civil Engineers for submittal of maintenance inspection reports. Stanford University will be allowed to utilize Registered Civil Engineer staff members or private Registered Civil Engineers.

Maintenance inspections of public projects will be supervised by Registered Civil Engineer departmental staff or conducted by privately retained Registered Civil Engineers. The involved departments are: Fleet and Facilities for most new public buildings, the Department of Parks and Recreation for new park projects, the Department of Roads and Airports for new street, airport, and expressway projects, and the County Executive's Office for new special projects.

AN EQUAL OPPORTUNITY EMPLOYER

August 29, 2006

Mr. Bruce H. Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: Santa Clara Valley Water District Urban Runoff Management Program
FY 2005--2006 Annual Report of Pollution Prevention Activities

Dear Mr. Wolfe:

This report is submitted by the Santa Clara Valley Water District, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal stormwater NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2005-2006 (July 1, 2005 to June 30, 2006) in accordance with the Santa Clara Valley Water District's Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 1997,updated in October 2000, and again on September 1, 2004 and the performance standards contained therein.

Program Highlights and Accomplishments

- Provided Urban Runoff training to 125 District staff for Storm Drain Operation and Maintenance, Water Utility Discharge Reporting and BMP implementation, Storm Water Pollution Prevention Plan (SWPPP) implementation, Channel Maintenance Activity BMPs and Construction Site SWPPP implementation
- Responded to 122 incidents reported to the District's 24 hour per day, 7 day per week pollution hotline
- Removed 10,248 cubic yards of trash and debris from local creeks through the District's Good Neighbor - Trash Removal program
- Expanded the Water Quality Index pilot program to rate the water quality at several locations in the Guadalupe, Coyote and Stevens Creek watersheds
- Continued sampling of Lake Almaden, Coyote, Calero, Chesbro, Uvas, Guadalupe, Stevens Creek, Lexington, and Almaden Reservoirs for ammonia, sulfate, nitrate, phosphorous, mercury, and methyl mercury
- Undertook a detailed geomorphic assessment of sections of Alamitos Creek and continued assessments in Adobe Creek, Upper Penitencia Creek and Stevens Creek
- The District's School Outreach Program visited 177 public and private schools and 27 summer camps, reaching 35,602 students and 1,646 educators and conducted 17 teacher workshops during FY 05-06. Public Information and Participation efforts included attendance at 35 community events, conducting a four part water efficient landscaping workshop series and participation in Coastal Cleanup Day and National Rivers Cleanup Day
- Continued to study chemical and physical parameters at local reservoirs in support of the ongoing Mercury study by the District.

Each of these activities is described in greater detail in the attached 2005-2006 Annual Report.

Continuous Improvement Activities

The District has identified one opportunity for continuous improvement. The item is listed in the Continuous Improvement section of the Annual Report as:

> **Trash Assessments**
> The District will be conducting trash assessments in the Fall of each year rather than in the Spring due to likelihood of high spring flows below the reservoirs which has hindered stream access.

Annual Report

The attached Annual Report provides an accurate representation of the implementation efforts of the District's Urban Runoff Management Plan and FY 05-06 work plan during the past fiscal year; an evaluation of the program results for continuous improvement activities; and information that can be shared with other Co-permittees, municipal decision-makers, and the public.

The table of contents of this report provides the outline of the Annual Report.

We appreciate the opportunity to provide you with this information on the work we have accomplished and we look forward to your comments. If you have any questions regarding the materials submitted or need additional information, please feel free to contact us.

Sincerely,

Roger Narsim, P.E., P.L.S.

INTRODUCTION

This is the Santa Clara Valley Water District (District) Urban Runoff Program's Fiscal Year (FY) 05-06 Annual Report (Annual Report). This Annual Report is prepared to comply with section *C.6* of Regional Board Order 01-024 and section *n* of Regional Board Order 01-119[1]. In their entirety these two Regional Board Orders comprise the Municipal Stormwater Permit (Permit). This Annual Report is to demonstrate and describe District compliance with the Permit.

The 2005-2006 Annual Report describes the actions taken to comply with the requirements of the Municipal Stormwater Permit. The Annual Report is formatted per instructions and template received from Regional Board staff.

Annual Report (AR)

The Regional Board has established a cycle of regulatory submittals that includes the District's annual Urban Runoff Work Plan (Work Plan) that is to be submitted by March 1 of each year. The Work Plan describes planned urban runoff activities for the upcoming fiscal year. The Annual Report provides a description of completed Work Plan elements and must be submitted by September 15 each year.

The Santa Clara Valley Water District's (District) Urban Runoff Pollution Prevention Program (DURPPP) completed several vital tasks during the 2005-2006 fiscal year (FY 05-06). The Stream Water Quality Unit this year focused on four main objectives; 1) the continued study of mercury and methyl mercury processes in the Guadalupe watershed, 2) Sampling of Lake Almaden, Coyote, Calero, Chesbro, Uvas, Guadalupe, Stevens Creek, Lexington, and Almaden Reservoirs for ammonia, sulfate, nitrate, phosphorous, mercury, and methyl mercury; 3) The expansion of the Water Quality Index pilot program to rate the water quality at several locations in the Guadalupe, Coyote and Stevens Creek watersheds and; 4) continued with geomorphic surveys and assessments in several watersheds in the county. Items 1 through 4 are above and beyond the tasks identified in the FY 05-06 Work Plan.

The DURP includes both an area-wide component and an agency specific component. The area wide component is achieved through participation in the Santa Clara Valley Urban Runoff Pollution Prevention Program (Program) which is a collaborative effort by 15 agencies, including the District. The agency specific component of the Urban Runoff Program targets District activities and facilities that are potential sources, or potential receptors, of non-point source pollution. These activities include construction of capital improvements for flood control and water supply, channel maintenance, facility maintenance, and water utility operation and maintenance. Other sources of stormwater pollution, which are not associated with District activities, include illicit connections to storm drains, and illegal or accidental dumping or discharges on District facilities and waterways.

Santa Clara Valley Water District Organization

The mission of the District is a healthy, safe and enhanced quality of living in Santa Clara County through watershed stewardship and comprehensive management of water resources in a practical, cost-effective and environmentally sensitive manner.

Readers are encouraged to read last year's FY03-04 AR for further information about the District.

---

[1] Regional Board Order 01-119 revises section *C.3* (regarding runoff from new and redevelopment projects) of Regional Board Order 01-024.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2005-06

Structure of Report
The Annual Report follows the format and instructions received from the Regional Board. The report includes two sections that describe 1) Program Highlights and Accomplishments and 2) Summary of Continuous Improvement Activities. A third section presents a series of attachments. Each attachment is consistent with the Work Plan submitted in March 2005. The attachments include a Self-Evaluation Matrix and supporting information.

PROGRAM HIGHLIGHTS AND ACCOMPLISHMENTS

The District's Urban Runoff Pollution Prevention Program (Program) completed numerous tasks during the 2005-2006 Fiscal Year. The details of these accomplishments are included in the attachments to this Annual Report. Some of the Program highlights are summarized below. The full description of the activity can be found by referencing the section number with the attachment.

1.1 Illicit Connection/Illegal Dumping (IC/ID) Elimination Activities (Attachment 1.1)

Emergency Response
The Stream Water Quality Unit has continued internal outreach efforts. Stream Water Quality Unit staff attend various District unit staff meetings to personally inform District staff of the Emergency Response Pollution Prevention Hotline number and services provided. Field Maintenance staff, Water Utility Discharge staff and Construction Administration Unit staff were re-informed of the Hotline number at their respective annual training events. Staff from many of the field operations units as well as staff who work with the public have been provided with red 4"x1" stickers with the Emergency Response/Pollution Prevention Hotline number boldly displayed for placement on clipboards or in vehicles.

The District Watershed Division's has achieved certification of its Quality and Environmental Management System (QEMS) to the ISO 9001:2000 and ISO 14001 international standards and must undergo semi annual audits as conducted by both internal and external auditors. In general terms, ISO 9001 standard provides for a management system that assists organizations to consistently meet or exceed customer expectations. ISO 14001 standard helps an organization identify and control its effects on the environment. In line with this certification the District's Stream Water Quality Unit is revising its "Emergency Response Procedures Manual" and creating new Work Instructions to meet ISO requirements and improve operations according to ISO audit findings. These documents fulfill the certification requirements by incorporating processes that ensure the program is current and efficiently managed.

The District received and responded to a total of 122 emergency response reports throughout Santa Clara County during fiscal year 2005-2006. Of the incidents 78 required a field response. Of this total 111 were within the jurisdiction of the San Francisco Bay Regional Board and the associated Santa Clara Municipal Stormwater Permit. The data from the emergency response reports indicates that Guadalupe River was once again the waterway with the greatest number of incidents with a total of 21 reports. Coyote Creek also a relatively high number (9) of incidents reported. The remainder of the creeks had 4 or less reported incidents. Taken as entire watersheds the Guadalupe watershed accounted for 35% of all reported incidents, both Coyote and West Valley watersheds

accounting for 20% each, Lower Peninsula (15%) and Uvas/Llagas (10%) accounted for the remainder of the incidents. The predominant contaminants again were "Hydrocarbons" and "Chemical" with 27 and 30 reported incidents respectively – accounting for 46% of the total incidents between them. Sewage was the third most common contaminant - occurring in 16 of the incidents. Trash which had the third most incidents last year slipped to 6th behind wastewater and sediment discharges.

The majority of reports (58) this year again occurred within the limits of the City of San Jose. Unincorporated areas of north Santa Clara County accounted for 9 responses this year followed by Palo Alto (8), the City of Santa Clara (6), and the Towns of Saratoga and Los Gatos (5 each). The District records every response it receives. It is important for the District to be able to accurately track the number of reports. The District may forward the report information to other cities and the cities may be the actual responder but the District still logs the report for our records so it is important for the Regional Board to be aware that the total number of reports from all co-permittees as reported by the Program Manager may be artificially elevated due to double reporting (District + municipal). The District responded within the two hour target response time, 100% of the time in 2005-2006.

83-2 Ordinance Enforcement

As previously reported the 83-2 code enforcement program has been temporarily reduced due to staffing and fiscal constraints this year. However District Emergency Responders continue to work closely with law enforcement agents at the Department of Fish and Game and the District Attorney's Office, as well as municipal and Regional Board code enforcement staff.

Training and Education

The District continued ICID training of District staff, other response agencies and the public. The District has made inroads, as part of the Urban Runoff workshops, to inform District field maintenance crews and other District staff of the pollution prevention hotline. Field crews continue to be provided with "Pollution Hotline" stickers (that include the hotline phone number) to be placed in District vehicles and on clipboards. As part of the ISO process, four team members were individually evaluated by undergoing a drill regarding pollutants found in one of the creeks and having to trace the release of contaminants to one of the local water sources and staff were evaluated on their investigation skills as well as notification protocol for other agencies, local co-permittees and District management.

1.2 Public Agency Activities (Attachment 1.2)

This category focuses on the District's access roads, levees, and storm drain systems. This category is also responsible for tracking of Water Utility facilities operation and maintenance. Key elements of the District's Activities include:

1. Rural Public Works
2. Storm Drain Operation & Maintenance
3. Water Utility Pollution Prevention Plan/Operations & Maintenance

Rural Public Works
The District has continued to emphasize to staff the importance of woody debris in the creeks for habitat to facilitate the reduction of potential erosion and sediment challenges at various facilities.

Storm Drain System Operations & Maintenance
Storm drain inspections and cleaning work orders continue to be distributed via the District's Maximo (field maintenance work order software) Preventative Maintenance program for the Rinconada Water Treatment Plant. Each month facility maintenance staff automatically receive a computer generated work order to inspect all storm drains at their facility and have them cleaned as needed. Stream Water Quality Unit took over the storm drain inspections at the Vasona Meter Shop, Corporation Yard, Headquarters and Administration Campus and the Blossom Hill Annex to ensure compliance with Urban Runoff Management Plan.

Water Utility Pollution Prevention Plan/Operations & Maintenance
Annual refresher training was held on May 31, 2006. Twenty District staff members who work with discharges or oversee discharges attended the training. Participants included staff from the following District units: Operations, Planning & Analysis, Utility Raw Water Operations, Utility Treated Water Operations, Groundwater Management, Infrastructure Planning, Utility Maintenance, Process Engineering, Water Quality Infrastructure Planning, and Lower Peninsula West Valley Watershed Field Operations. Workshop topics included: Why Pollution Prevention Matters (Environmental Impacts, Potential Pollutants and Sources, Regulatory Requirements, District Performance Standards), Water Utility Discharge Pollution Prevention Guidance Manual Overview, Roles and Procedures, BMP Implementation, Dechlorination, and Reporting and Tracking.

In April, 2006 and again in June of 2006, program evaluation questionnaires were sent to 50 District staff members responsible for water utility O&M. 10% (5) were returned completed. From those questionnaires received, control measures and BMPs are being implemented properly during all discharges and are functioning effectively.

This program's planned and unplanned notification policies and practices with the Regional Board have been so successful that the Regional Board has recommended that San Francisco Public Utilities Commission follow the same notification policy and practice that is used by the District.

1.3 New Development Planning Procedures (Attachment 1.3)

Hydromodification Plan (HMP)

Thompson Creek

1. Collected three years of continuous flow data (at 15 minute interval) on Thompson Creek. This data will help to increase the confidence level of District's calibration for frequent storms.

2. Completed three years of sediment data collection at the gages on Thompson Creek to develop sediment rating curves for the bed load and suspended load.

Upper Penitencia Creek

1. Collected data on Upper Penitencia Creek for continuous flow measurement for hydrologic and sediment transport modeling.

    a. Continuous flow measurement continues for second year at Piedmont Road and at Berryessa Industrial Park.
    b. The data will be used to calibrate a continuous flow runoff model (HEC-HMS) for Penitencia Creek.
    c. The second year of data collection was completed.

2. Geomorphic Survey, and Channel Stability Assessment.

    a. Collected second year of suspended solids and bed load transport data for the winter to develop suspended sediment and bed load rating curves.

Berryessa Creek

1. The effort is similar to Upper Penitencia Creek. District staff have installed gages on Berryessa Creek for continuous flow measurement.

    a. Continued to collect flow data measurements. Data is being collected upstream of Piedmont Road (which is the downstream end of the rural portion of the watershed) and at Hillview Road (which represents the combination of rural + urban watersheds).
    b. The data will be used to calibrate the continuous flow HEC-HMS model for Berryessa Creek.

2. Geomorphic Survey and Channel Stability.

    a. Continued collection of suspended solids and bed load transport data for during winter to develop suspended sediment and bed load transport data.
    b. Extended the cross-sectional data collection to Hillview Road bridge downstream of 237/Calaveras Road. This captured the eroding reach where Berryessa Creek runs parallel to the railway tracks.

Adobe Creek

The effort has focused on the development of a design for Upper Reach 5 that is stable, maximizes natural elements and can be accommodated to the best extent possible within the limited easement. The data collected and the models developed apply to all future stream stabilization projects that the District may undertake between 280 and El Camino Real.

Continued data collection from a continuous flow gage on Adobe Creek at Middlefield Road (ISCO 4150) to develop and calibrate HEC-HMS model continuous flow runoff model.

Stevens Creek

The project team has undertaken the development of a design through the Blackberry Farm area that realigns the creek to remove the fish barriers and hardscape, and provide the District credit for restoration of several thousand feet of creek restoration.

Ross Creek
Completed a stream restoration and erosion repair for 300 feet of creek downstream of Harwood. The reconstructed section of the stream performed admirably this year.

Developed a stream rehabilitation for 600 feet of creek downstream of Kirk Road. The analysis for the design included application of geomorphology data collected during the HMP project and later, the HEC-HMS model developed, the HEC-RAS and shear stress model.

Alamitos Creek
A longitudinal profile survey of one mile of Alamitos Creek was completed upstream and downstream of the Greystone Creek confluence. This data was collected as part of an effort to design a natural alternative to eliminate bank erosion of the channel near the confluence of the two creeks.

HMP – Stream Impact Master Plan Elements
Developed and presented "Draft Long Term Plan for Implementing Restoration/Rehab Projects" to SCVURPPP and the City of San Jose. This document includes some discussion of potential cost allocation scenarios for in-stream projects in lieu of on-site improvements and potential on-site and in-stream combination for new development. In-stream regional solution is an alternative for those new developments and existing developments whose impacts are addressed only partially through on-site or off-site means.

1.4 Construction Inspection (Attachment 1.4)

The District continued to use the monthly inspection sheet developed in FY 02-03 to facilitate compliance and follow up inspections. The Stream Water Quality Unit continued to meet and train the Construction Inspectors in the field to go over SWPPP implementation at construction sites.

Construction Administration Unit continues to use the Incident Response/Pollution Prevention Hotline to contact Stream Water Quality Unit staff to report construction sites that are creating sediment discharges.

In FY 05-06, the District had 6 Capital Improvement Projects (CIP) under construction that included 5 flood protection/channel improvement projects and 3 water treatment plant projects. SWQU assisted with review of CIP SWPPPs as requested. A table showing the inspections completed is included with this section.

Construction Inspection Training for 20 District staff was completed on March 27, 2006. The training included staff from the District's Capital Programs Units again this year. Five staff from the Construction Engineering Unit (100%) and 15 staff from the Construction Inspection Unit (100%) attended the training.

Effectiveness evaluation questionnaires were distributed prior to the annual training. Most of the respondents encouraged SWQU to continue monthly email reminders, provide resources to enforce non-compliance and continue to assist with review of project SWPPPs as requested.

1.5 Public Information and Participation (PIP) Activities (Attachment 1.5)

The District serves a community of 1.7 million countywide and has excellent outreach programs to many sectors of the community. Key elements of the District's PIP Program include the Adopt-A-Creek Program providing outreach to creekside residents, creek clean up events supporting citizen participation, attendance at community events targeting the general public, numerous workshops presented by the Water Conservation Unit, and the School Outreach Program.

GENERAL OUTREACH

The District attended 35 community events during FY 05-06. A complete listing of all events is included in this section.

A Creekwise Approach (Five tips to care for your creekside property) was mailed to 38,000 streamside property owners in January 2006. The mailer provided information on creekwise gardening and landscaping practices, invasive species, paved surfaces, building near creeks, and erosion control. A copy of the brochure is included in this section.

ValleyWater News quarterly has been discontinued and revamped as the countywide mailer. This year's countywide mailer contained as article promoting watershed practices that keep water clean at its source. The mailer was sent to 700,000 residents in September 2005. A copy is included in this section.

The District's website continues to be improved to provide continual updates to the community. During the winter season, the District's home page featured a link to flood-related information, the District's efforts to protect the waterways in the event of a flood, and sandbag distribution sites. Our on-line maintenance request form empowers citizens to report dumping or waterway-related problems, and allows them to send messages to the appropriate watershed staff. The site also includes a link to the Santa Clara Valley Urban Runoff Pollution Prevention Program.

TARGETED OUTREACH

Workshops

In September/October 2005 and April 2006, the District's Water Quality, Groundwater Management, Vegetation Management and Water Use Efficiency Units worked together with the Loma Prieta Resource Conservation District, the University of California Cooperative Extension and the United States Department of Agriculture Natural Resource Conservation Service to conduct the fifth annual Stewardship for Small Acreages – A Series of Workshops on Land Management for Clean Water. The goal was to provide rural landowners with the resources needed to protect both surface and ground water quality on and off their property. The series took rural landowners through the steps of assessing their properties and developing action plans to address the highest priority items. The workshops were held at various small acreage homes. The four sessions included: general topics such as watersheds and conservation plans, groundwater quality, wells, septic systems and hazardous household products; Manure/Waste Management and Composting; Small Vineyards; and Fire Safety, Landscaping and Erosion Control. A total of 144 people attended the 9 sessions.

In March 2006, the Water Use Efficiency Unit conducted a four-part Water Efficient Landscaping Workshop Series. A total of 183 people attended the four sessions: Selecting Plants for Your Water-Wise Garden, Water-Wise Garden Design, Water Efficient Irrigation Design, and Gardening with Natives. In April, the District co-sponsored the Fourth Annual Going Native Garden Tour, which spotlighted 46 homes in the South Bay providing examples of bird and butterfly friendly residential gardens that are both water-efficient and easy to maintain. The tour included a variety of gardens landscaped with native plants covering small to large lots, ranging from newly planted gardens to well established ones. The District campus was included as one of the tour sites.

Media Campaign

The District conducted two campaigns during FY 05-06: one on flood awareness/safety and the other on water conservation. Both campaigns included the District's website where people could get urban runoff information. The campaigns included the use of frequent targeted public service announcements on radio stations, 10- and 60-second sponsored traffic radio spots on English and ethnic radio, targeted grassroots mailing to residents, community-based print media placement, billboards, and the Digitron billboard at Great America on Highway 101. Theater slides were also used in the flood awareness campaign. The District's web site, news media relations and community events were utilized to extend the reach of the campaign.

Flood Safety Notice 2006 was mailed in January 2006 to over 100,000 flood plain residents. Although the mailer's main focus is flood preparedness and safety, it also contained an article on watersheds. There were five versions of the mailer, containing the map of the resident's specific watershed: Lower Peninsula, West Valley, Guadalupe, Coyote, and Uvas/Llagas.

The Guadalupe River Watershed Mercury Study identified Lake Almaden as a significant source of methyl mercury that bioaccumulates in fish within the lake and in fish downstream. The District installed a pilot aeration system in May 2006 to improve water quality (see Section 7 for details). To assist San Jose Park and Recreation Department with questions about the SolarBee, a brochure containing frequently asked questions was developed. The brochure also includes watershed information. A copy is attached in this section.

AquaFacts, the District's employee newsletter, continued this year as an online publication. AquaFacts contained 7 articles relating to stormwater pollution prevention and watershed education during FY 05-06. Topics included cleanup of homeless camps, Guadalupe River Park and Gardens grand opening, environmental commitment, pesticides, and illegal dumping. The employee newsletter is an excellent and cost-effective method for delivering urban runoff, pollution prevention, and watershed messages to District employees.

An all employee Pollution Prevention Week email campaign was conducted September 20 through 23, 2005. Four emails were sent providing pollution prevention tips. Topics included: general pollution prevention week information, preventing mercury pollution, pollution prevention on the road, and proper disposal of dead batteries. Due to a mix-up, the pesticide message was not sent and will be the second message during next year's email campaign to ensure that employees receive the information. Numerous requests for brochures were received from the employees, as well as many comments on the campaign.

This continues to be a good method to present pollution prevention ideas to District employees.

EDUCATIONAL OUTREACH

The District's educational outreach program serves a diverse population and responds to the needs of the schools throughout the County. Programming is consistent with State standards and regularly integrates messages and issues of other District communication programs. The District's School Outreach Program visited 177 public and private schools and 27 summer camps, reaching 35,602 students and 1,646 educators and conducted 17 teacher workshops during FY 05-06. The District offers a comprehensive education outreach program for early childhood, elementary, middle school, high school, and college-aged students to establish a foundation for understanding and appreciation of water resources. The program provides age-appropriate classroom presentations, teacher in-service training in water education, and tours in order to help children understand and appreciate their local water resources. Classroom presentations include hands-on experiments, information on watersheds, urban run-off, pollution prevention, flood plains, conservation tips, water awareness activities, flood management, and careers in the water industry. Scheduling is conducted on a first-come, first-served basis and provided free to schools in Santa Clara County. Number of students by watershed, city, grade, focus of presentation, and school district are included with this section. AquaCycles, a newsletter for teacher's, was published and distributed to all teachers in Santa Clara County in Fall 2005. AquaDrops eNews, an electronic teacher's newsletter was also sent out in Fall 2005.

The District's Water Cycle Boogie song was heard at the Los Angeles County Fair in September 2005.

The District participated in the JASON Project at NASA again this year. The JASON Project was held January 30 through February 3, 2006. The Project allowed the District to educate over 7,000 students in a one week period. JASON's year-long curriculum comes to life during an annual expedition! Each year, Dr. Ballard leads a team of scientists, students and teachers on a journey to explore and study in research locations featured in the curriculum. Satellite and Internet technologies bring students in classrooms around the world into direct, real-time contact with scientists and researchers as the expedition is happening. The culminating event for local students is a visit to NASA/Ames Research Center at Moffet Field. Students go to Jason City to participate in various learning activities. The District hosted four activities this year: the groundwater model that included pollution prevention, a parts per billion (ppb) activity, water magic and music presentations and a related art activity.

The Coyote Creek Outdoor classroom encompasses land alongside Coyote Creek and includes a covered gazebo classroom for students and teachers, as well as a platform overlooking the creek where students can study the stream's natural habitat. Groundwater monitoring wells on site enable students to observe and evaluate the underground water table and understand how surface and groundwater interact. The site features two planting areas – one site close to the creek planted with native trees and shrubs to improve the stream's wildlife habitat, and a "high terrace" or upland area landscaped with oaks, grasses and other native plants to demonstrate drought-tolerant gardens. During the 2005-06 school

year, the program provided 7 class tours for 336 students and 3 teacher in-services for 12 teachers.

Morley Park Outdoor Classroom in the City of Campbell provides the opportunity to teach students about the purpose of wetlands, urban runoff and the value of percolation ponds. During the 2005-06 school year, the program provided 2 tours for 102 students.

CITIZEN PARTICIPATION

The District established the Adopt-A-Creek Program in 1994 to encourage residents of Santa Clara County to take an active role in helping to preserve the health and beauty of our local creeks. In FY 05-06, 6 new permits and 5 renewal permits were issued and 41 creek clean up events were conducted. The program currently has 125 active participants.

The District participated in two creek cleanup events: the 22tndAnnual Coastal Cleanup Day on September 17, 2005 and the 10th Annual National River Cleanup Day on May 20, 2006. During Coastal Cleanup Day, over 800 volunteers collected 19,269 pounds of trash at 26 sites. On National River Cleanup Day, 669 volunteers collected more than 12,500 pounds of trash at 27 countywide sites.

PROGRAM EVALUATION

The District uses numerous methods to conduct outreach, including written brochures, radio, newspaper, website, theater slides, bus back ads, community events and workshops. The wide variety of methods increases the probability that the messages are being received and understood. Combining all these different methods is very effective at meeting our public education goals. The variety of methods also ensures that many segments of the Santa Clara Valley population are being reached, including residents, businesses, students, as well as people from other locations. The District evaluates the different outreach methods and continuously seeks to improve messages and outreach methods. We work collaboratively with many other agencies and organizations to conduct outreach and will continue these partnerships in the future.

GENERAL OUTREACH

The District feels that attendance at community events is an effective public outreach method. The individual contact made at the events allows staff to answer specific questions and deliver more extensive messages. A wide variety of information can be distributed and the games and displays are a good way to attract event participants.

TARGETED OUTREACH

The District's targeted outreach efforts provide in-depth training and information to a small, targeted audience with the opportunity to answer specific questions from individuals in the group. This method allows the District to assist targeted groups to meet regulatory requirements, change behaviors that impact water quality, and provide the knowledge needed for the group to solve any water quality problems they may be experiencing. The District plans to continue this outreach method as we feel it is a valuable service to these targeted audiences and can positively impact water resources.

EDUCATIONAL OUTREACH

Teacher surveys were distributed again this year. 99% of the teachers returning the surveys rated the program "helpful" to "extremely helpful." 97% are "satisfied" to "very satisfied" with the scheduling of the program and 99% would recommend the program to others. The District feels that the educational outreach program is a cost-effective method for educating children, teachers, and indirectly, parents. Based on the teacher's surveys, minor adjustments will be made to the program. A summary of the District's Water Awareness School Program can be found in this section.

CITIZEN PARTICIPATION

The Adopt-A-Creek program and the creek cleanup events are very effective at creating and increasing stewardship and individual responsibility for the county's water resources.

1.6 Pesticide Management Activities (Attachment 1.6)

The District uses pesticides as one of the tools for pest management on its properties and facilities. The primary category of pesticides used is herbicides. Insecticides and rodenticides are used in small quantities. In all cases, pesticide products are used only after an assessment has been made regarding environmental, economical, and public health aspects of each of the alternatives. The District has always been proactive and conservative in the use of pesticides.

The District continues to implement a pesticide policy and an "Approved Pesticide List." Except for three products, the District's Approved Pesticide List met the criteria established in the District's Pesticide Policy for water quality, environmental and public health hazards. The District's policy states "Category I and II pesticides may only be used if required to meet health and safety concerns or if mandated to maintain regulatory compliance such as dam safety." The three "Toxicity Category I" products, one herbicide and two rodenticides, were exempted from meeting the toxicity restriction due to the following factors:

1. They are integral in meeting the structural engineering requirements of the District's levee systems and dam safety program.
2. There are no practical alternatives at this time.
3. The toxicity and hazard exposure of these products applies only to the applicator at the time of application. These hazards are mitigated with protective clothing and eye protection which minimize the exposure hazard to the maximum extent.

The District believes that use of the less toxic products is beneficial to the environment and the health and safety of employees. The District's annual pesticide use summary report for calendar year 2005 is included in this section as Table 5.1.

The District began implementation of the arundo mitigation program in 2002. The eradication program has increased the District's use of some pesticides. The cut stump method of application minimizes the potential for environmental impacts. The District currently has a program for monitoring the water quality impacts of this work type.

The District continued the program in South County to control vegetation on levee roads, in right-of-ways, and on the top of banks. The District designated 2002 as the baseline year for measuring pesticide reduction. Several herbicides were reformulated in 2005, so the products

were grouped by active ingredient. The District's Spartina (invasive species) mitigation program began using a different herbicide, Imazapyr, in FY 05-06. Baseline total for Imazapyr will be set at 2005 usage for future reports. A comparison of 2002 usage to 2005 usage can be seen in Attachment 1.6 on page 5.

ALTERNATIVE PEST MANAGEMENT PRACTICES
The District continued to integrate mechanical harvesting and non-toxic dye colorants with the use of algaecides and herbicides to manage algae at percolation ponds.

TRAINING/CERTIFICATION
Continuing education (CE) is required to maintain certification. Employees can obtain CEs through seminars sponsored by Pesticide Applicators Professional Association (PAPA), California Association of Pest Control Advisors (CAPCA), manufacturers and universities. CEs are tracked by PAPA/CAPCA and records can be obtained from their websites. All District employees prepare an Employee Performance Plan and County Agricultural Commissioner and the State Department of Pesticide Regulations certification and training requirements are included in individual Performance Plans. Performance Plan evaluations are conducted every January for all employees. Employees not meeting certification and training requirements contained in their Performance Plan may face disciplinary action or termination of employment.

Bi-weekly safety meetings are held that include IPM Policy, SOP and BMP training. Label training, hazardous spill response, symptoms of pesticide poisoning were some of the topics covered this past year.

BMP inspection checklists continue to be completed for both chemical and non-chemical vegetation management activities.

1.7 Mercury Pollution Prevention Activities & Copper/Nickel Action Plan (Attachment 1.7)

Mercury Removal Projects and Programs Completed and Underway

Stream Maintenance Program
In 2005, routine sediment removal maintenance resulted in the disposal of 36,372 cubic yards of material, with 4,695 of this total from the creeks in the upper portion of the Guadalupe River Watershed. The total mercury removed from the system was 31 kg, with 27 kg from the Guadalupe River Watershed. Of this, 25 kg was from the removal of sediment from behind the Los Alamitos Drop Structure; this structure was identified in the Guadalupe River Watershed Mercury Study as a potential sink and source of mercury in suspended sediment during storm events.

Monitoring
The District has undertaken a monitoring program to evaluate water quality in Lake Almaden, Almaden Reservoir, Calero Reservoir, Guadalupe Reservoir and Stevens Creek Reservoir. Depth profile measurements of temperature, pH, conductivity, and dissolved oxygen were conducted monthly. In addition, water samples were collected from the epilimnion and hypolimnion for analyses of total and dissolved mercury, total and dissolved methyl mercury, ammonia, nitrate/nitrite, sulfate and phosphorus at Lake Almaden, Almaden Reservoir, Calero

Reservoir, Guadalupe Reservoir and Stevens Creek Reservoir. Samples were also collected from the epilimnion for analyses for chlorophyll a. The purpose of this monitoring is to establish existing water quality conditions and seasonal variability prior to the implementation of management changes to reservoir operations.

Mercury Control Program

In March 2005, following completion of the District Guadalupe River Watershed Mercury Study, the District initiated three projects to control mercury in the Guadalupe River Watershed: Jacques Gulch Restoration, Reservoir Oxygenation, and Lake Almaden Aeration.

Jacques Gulch Restoration

Jacques Gulch is a tributary to Almaden Reservoir that drains approximately one-third of the reservoir watershed. A portion of this drainage includes a small tributary that drains a portion of the former New Almaden Mining District, which is now Almaden-Quicksilver County Park. The project will remove, cap, or control erosion of extensive mercury deposits in the tributary above its confluence with Jacques Gulch, and in Jacques Gulch above its confluence with Almaden Reservoir. This project will require planning, permitting and construction, and is scheduled for completion in 2011. During the reporting period, the District completed a draft Engineer's Report for the project.

Reservoir Oxygenation

The Guadalupe River Watershed Mercury Study identified reservoirs as a significant source of methyl mercury that bioaccumulates in fish within the reservoirs and in downstream creeks. The study also demonstrated a correlation between the seasonal development of anoxia in the hypolimnion and increased methyl mercury concentrations. In 2006, the District has been going through a planning process and exploring design and build system for an oxygenation system for Calero Reservoir. The District intent is to install and operate a pilot oxygenation system to evaluate the multiple water quality benefits that would potentially be realized, including reduced methyl mercury production, improved fisheries, reduced ammonia and hydrogen sulfide production, improved water clarity, and improved taste and odor (Calero is source water for the District's drinking water treatment plant).

Lake Almaden Aeration

Lake Almaden is a former quarry that lies at the confluence of Guadalupe Creek and Los Alamitos Creek that drain Guadalupe and Almaden Reservoirs, respectively. Below this confluence is the Guadalupe River. This lake provides recreational amenities to the community, including swimming, boating, and fishing. The Guadalupe River Watershed Mercury Study identified the lake as a significant source of methyl mercury that bioaccumulates in fish within the lake and in fish downstream. In 2005, the District initiated a monitoring and sampling program to establish baseline water quality and fish tissue concentrations, and a project to design an aeration system for the lake. The District installed a pilot aeration system (Solar Bee) in May 2006 to improve water quality to evaluate the multiple water quality benefits that would potentially be realized, including reduced methyl mercury production, improved fisheries, reduced ammonia and hydrogen sulfide production, and improved water clarity.

Copper/Nickel Action Plan
The District, as an environmental steward, has several practices and activities in place that support copper and nickel pollution prevention. The District continues to distribute outreach materials at public events. The District also continues to have street sweepers clean facility streets and parking lots on a weekly basis. The District's website provides a carpool connection interactive map so an individual is able to search for carpoolers in the vicinity of one's home or even along the route an individual uses to get to work.

The District enacted a policy several years ago to have District vehicles washed and vacuumed at the existing covered wash rack that discharges through a clarifier to the sanitary sewer system. The District is very proactive in attempting to reduce traffic and pollutants caused by traffic. The district provides, free to employees, bicycle lockers, and reimburses staff for use of public transit for business purposes.

1.8 Trash Inventory and Management (Attachment 1.8)

It is very challenging for the District to identify individual responsible parties for many of the illegal dumping activities that occur in the creeks of the county. Since the District has no police powers and no land use authority our ability to penalize polluters and protect the environment proactively rather than retroactively is virtually non-existent outside of our extensive public and educational outreach activities. Homeless encampments are one of the primary sources of trash being directly deposited to the riparian corridor. With these limitations in mind the District dispatches maintenance crews to provide frequent and routine creek cleanup for trash, and debris, in District waterways. Some of this material is deposited in creek channels and constitutes illegal dumping but is not reported to District hazmat or code enforcement staff due to the inability to establish an individual source or responsible party. In the spring of 2006 the District formed an internal focus group made up of water quality and field maintenance staff and various managers to better strategize how to identify root causes and sources of trash and how to reduce the load of trash to the creeks. This group is an outcome of the District's ISO process.

During FY 05-06, The District's Clean, Safe Creeks Natural Flood Protection Program, Good Neighbor component removed and disposed of approximately 10,248 cubic yards of trash and debris from county waterways. Last year a total 10,002 cubic yards of trash and debris was removed. This year's breakdown by watershed is as follows; Guadalupe watershed 4,179 cubic yards (41%), Coyote watershed 1,999 cubic yards (19%), West Valley watershed 1,790 cubic yards (18%), Lower Peninsula watershed 1,161 cubic yards (11%), and Uvas Llagas watershed had 1,120 cubic yards (11%). The Guadalupe watershed Good Neighbor Program continues to conduct monthly homeless encampment clean up activities. The Good Neighbor Program coordinates with the Santa Clara County Department of Corrections to utilize inmate labor for some of the creek cleanup activities. The San Jose Conservation Corp labor is also utilized extensively during many of the trash removal operations. The Adopt-A-Creek program also supports trash removal from adopted sections of various creeks and this program is highlighted in the PIP activities section of the Annual Report.

The watersheds most affected by homelessness and illegal dumping are the Guadalupe and Coyote Watershed. The District constantly is utilizing its limited staff and financial resources to clean up these areas. The District works closely with the City of San Jose on trash and

homelessness issues that challenge both agencies. Annually the District and the City of San Jose clean up three large trash accumulation sections of the Coyote Creek or the Guadalupe River as part of a Trash Memorandum of Understanding between the City of San Jose and the District. This benefits the local habitat by removing the trash before the next round of winter storms and preventing the material from being redistributed throughout the lower watershed. Additionally the District has a significant number of regular trash clean up locations within each watershed where streets, roads, expressways and highways cross waterways where trash tends to accumulate. The District also is a co-chair of the SCVURPPP Trash Ad Hoc Task group that works on assessment of trash issues as well as initiating installation of trash reduction best management practices.

1.9 Other Water Quality and Watershed Management Requirements (Attachment 1.9)

This section captures other pollution prevention activities, many of which are unique to the District. These activities include:

1. Facility SWPPPs – Corporation Yard
2. Flood Control/Channel Maintenance Activities
3. San Francisquito Creek Sediment Project

Facility SWPPPs – Corporation Yard
BMPs were formally inspected quarterly during non-stormwater observations at all District facilities except Coyote and Pacheco Pump Stations. The pump stations do not warrant non-stormwater observations due to the low potential for these types of discharges to occur. The Corporation Yard culvert inlet protection device (constructed of cinderblocks filter fabric and washed gravels) was evaluated. Other BMPs are working effectively, as noted on the non-stormwater observation forms submitted. Storm drain inlets at the Corporation Yard were cleaned out in the Fall of 2005.

Flood Control/Channel Maintenance Activities
The District maintains over 700 miles of stream channels to provide flood protection for the Santa Clara County communities. Under the Multi-Year Stream Maintenance Program (SMP) the District removes sediment, provides for erosion protection, and conducts vegetation management activities. Minor maintenance activities include trash removal, fence and access repair, maintenance of revegetation sites, and removal of downed trees or other blockages from the streams. During FY 05-06, the District removed 42,084 cubic yards of sediment and completed bank protection projects totaling 6,345 linear feet.

Annual SMP archeology awareness and BMP training was conducted on June 5, 2006 and 72% of District employees from the Watershed Field Operations Units, Watershed Program Support Units, Ecological Services Unit, and Regulatory Compliance Unit received the training (59 employees). In addition, 12 staff from the Vegetation Management and Watershed Business Management Units also attended.

BMP training evaluation forms were distributed during the training session and attendees were asked to complete them before leaving. All training sessions were rated excellent or good by

the respondents. Suggestions for improving the training will be incorporated into next year's training.

The annual Lessons Learned meeting with the regulatory agencies and stakeholders was held in February 2006. Internal lesson learned meetings were held prior to the February regulatory meeting.

BMP inspection checklists continued to be used for sediment removal and bank protection projects and for chemical and non-chemical vegetation management activities. The checklists provide documentation of BMP implementation at the SMP projects, inspection of the BMPs, and track any adjustments made to BMP implementation.

San Francisquito Creek Sediment Project
In fiscal year 2005-2006 the District fulfilled its commitment of sponsoring, through funding and technical oversight, the Aquatic Habitat and Limiting Factors Assessment (AHALFA) of San Francisquito Creek as a follow up to the "San Francisquito Creek Watershed Sediment Analysis Final Report" and "San Francisquito Creek Watershed Existing Conditions Analysis Final Report" that were completed two years ago. The goal of the AHALFA was to determine what, if any, factors limit current Steelhead habitat and, if so, what linkages may or may not be made to the creek's designation as impaired by sediment under Clean Water Act Section 303(d). The AHALFA project was developed with Regional Board participation in an Expert Advisory Panel to support the watershed analysis provision of the NPDES permit. The primary issue in the development of the TMDL is the implied degradation of steelhead spawning habitat for which sediment deposition and decrease in flow conveyance may be a contributing factor. This study indicated that a lack of sufficient overwintering habit and gravel imbeddeness are the most significant limiting factors to steelhead populations in San Francisquito Creek.

Upper Penitencia Creek Limiting Factors Analysis
The District assisted with the Upper Penitenicia Limiting Factors Analysis by providing information on the operations of the diversion structures for the percolation ponds as well as by providing information on other water utility operations pertinent to Upper Pennitencia creek. The District also provided significant information on the fisheries condition in the watershed. The District completed a review of the document and also conveneyed a meeting of managers and operations staff to respond to the Regional Boards questions on the first draft of the document.

Saratoga Creek Watershed Assessment
The District has been working with the Program to provide fish scale analysis of the fish that have been collected for the Saratoga Creek Watershed Assessment. The District has also been working with the Program to ensure that Program staff collect samples from only public owned sites.

Water Quality Index-Guadalupe Watershed Pilot Project.
In the fall of 2004 the Stream Water Qualtiy Unit implemented a study of general water quality monitoring in the Guadalupe Watershed to compare the watershed to other studies taking place in the country. This study was both time consuming and initially costly to conduct in labor hours. This study has just completed the collection of the fourth round of sample collection in the Guadalupe River watershed. The study has completed its first round of sampling in the Stevens Creek and Coyote Creek watersheds. At the tidal sites both a high tide and a low tide

sample are collected. A summary of the Water Quality Index is attached from the National Sewer Foundation website for review and a description of parameters assessed.

To determine the WQI, the following nine water quality parameters are measured:

- **Biochemical Oxygen Demand**
  The Biochemical Oxygen Demand (or BOD) is a measure of the amount of food for bacteria that is found in water. Bacteria utilize organic matter in their respiration and remove oxygen from the water. The BOD test provides a rough idea of how much biodegradable waste is present in the water. (Biodegradable waste is usually composed of organic wastes, including leaves, grass clippings, and manure).

- **Dissolved Oxygen**
  The dissolved oxygen test measures the amount of life-sustaining oxygen dissolved in the water. This is the oxygen that is available to fish, invertebrates, and all other animals living in the water. Most aquatic plants and animals need oxygen to survive; in fact, fish will drown in water when the dissolved oxygen levels get too low. Low levels of dissolved oxygen in water are a sign of possible pollution.

- **Fecal Coliform**
  Fecal coliform is a form of bacteria found in human and animal waste.

- **Nitrates**
  Nitrates are a measure of the oxidized form of nitrogen and are an essential macronutrient in aquatic environments. Nitrates can be harmful to humans, because our intestines can break nitrates down into nitrites, which affects the ability of red blood cells to carry oxygen. Nitrites can also cause serious illnesses in fish.

- **pH**
  The pH level is a measure of the acid content of the water. Most forms of aquatic life tend to be very sensitive to pH. Water containing a great deal of organic pollution will normally tend to be somewhat acidic. Water with a pH of 7 is considered neutral. If the pH is below 7, it is classified as acidic, while water with a pH greater than 7 is said to be alkaline. The pH of tap water in the U.S. is usually between 6.5 and 8.5.

- **Temperature Change**
  The water temperature of a river is very important, as many of the physical, biological, and chemical characteristics of a river are directly affected by temperature. Most waterborne animal and plant life survives within a certain range of water temperatures, and few of them can tolerate extreme changes in this parameter. Using the same thermometer, the water temperature should be checked at the test site and at a similar site one mile upstream. Care should be taken when taking the temperature upstream to ensure that the amount of sunlight and the depth of the river are similar to the original test site.

- **Total Dissolved Solids**
  This is a measure of the solid materials dissolved in the river water. This includes salts, some organic materials, and a wide range of other things from nutrients to toxic materials. A constant level of minerals in the water is necessary for aquatic life.

Concentrations of total dissolved solids that are too high or too low may limit growth and lead to the death of many aquatic life forms.

- **Total Phosphate**
  Phosphates are chemical compounds made from the elements phosphorous and oxygen; they are necessary for plant and animal growth. Phosphates can be present in water in many forms, so total phosphate gives an estimate of the total amount of phosphate potentially available in a given water supply.

- **Turbidity**
  Turbidity is a measure of the dispersion of light in a column of water due to suspended matter. The higher the turbidity, the cloudier the water appears. If water becomes too turbid, it loses the ability to support a wide variety of plants and other aquatic organisms.

After the nine water quality tests are completed and the results recorded, a "Q" value is calculated for each parameter, and the overall WQI for the sampling site is then calculated.

The results of the District WQI pilot project to date are summarized in the Figures 9-1, 9-2, 9-3 and 9-4 of Attachment 9 in this report. As one can see from the attached charts the water quality was of good quality and approached excellent at many locations in the various watersheds. Another round of sampling should give us enough data to determine any significant differences in between the spring and fall water quality but at this time any further analysis is purely speculative. The District looks forward to continueing this study over the next year to complete two full cycles of sampling to identify the usefulness of this form of analysis to rate, in a simplified manner, the water quality within other watersheds in Santa Clara County.

1.10 Staff Training Matrix (Attachment 1.10)

Numerous staff attended various training opportunities as detailed in the Training Section. The District feels it has met the training requirements.

1.11 Last Year's Continuous Improvement Activities and Status

District SWPPP inspection implementation at some facilities
The Stream Water Quality Unit has implemented a mentor program where interns from the Stream Water Quality Unit conduct non-stormwater and stormwater inspections with appropriate facility staff at the facilities that were not adequately inspected the previous year.

SWPPP updates
The Stream Water Quality Unit had identified that several of the facility SWPPP's were in need of updates as some of the Roles and Responsibilities have changed over the last few years. These SWPPP's have been updated and are currently in peer review prior to printing.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2005-06

SUMMARY OF CONTINUOUS IMPROVEMENT ACTIVITIES

The District has identified one opportunity for continuous improvement. The item is listed in the Continuous Improvement section of the Annual Report as:

Trash Assessments
The District will be conducting trash assessments in the Fall of each year rather than in the Spring due to likelihood of high spring flows below the reservoirs.

Attachment 1.1
ILLICIT CONNECTION/ILLEGAL DUMPING (ICID) ELIMINATION ACTIVITIES

ILLICIT CONNECTION & ILLEGAL DUMPING ELIMINATION ACTIVITIES					
C.2.a. PS ICID-7	Effectiveness Evaluation	Conduct an annual effectiveness evaluation. District Staff who regularly interact with the Incident Response Program (IRP) will be asked to complete a questionnaire in the Spring of 2006. The questionnaire will ask for ideas for any improvements or changes that need to be made to the District's Incident Response Program. Results of the Questionnaires will be evaluated during the next ICID/Incident Response Program for incorporation into the ICP procedures.	Complete. In addition, The Emergency Response Program received a quality and environmental audit according to ISO 9000 and 14000 standards in September 2005 during which ER Team members were questioned to identify non-conformities and areas for improvement. Results included: (1) implementation of simulated response drills, (2) revision of procedures and work instructions and forms. The former was completed in January, the latter in August 2006.	Annually June 06	SWQU ICID Team
C.6.a.ii. PS ICID-6	Enhanced Reporting Requirements	Identify the number of responses to reports of potential impact to water quality, complaints, spills, and other similar reports. Create an attachment to the annual report and include summary in the highlights and accomplishments section of the annual report.	Complete. End of year information was transmitted to the Program Manager for inclusion in the Annual Report. District specific charts are included in the agency-specific section of the Annual Report.	Ongoing	SWQU ICID Team

[1] Notation is as follows: PS (Performance Standard), URMP (Urban Runoff Management Plan), NDII (New District Initiated Item), NPDES (NPDES Permit)

ILLICIT CONNECTION/ILLEGAL DUMPING ELIMINATION ACTIVITIES

Item Source[1]	Activity	FY2005-2006 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
C.6.a.ii PS ICID-6	Enhanced Reporting Requirements	Characterize as to report source, nature of report, location of the event, reported source of pollutants and follow-up investigation if needed.	The District's countywide ICID raw data contains incident data that has been characterized (see following charts) according to several parameters including: (1) pollutant type (2) watershed (3) and municipal jurisdiction. Enforcement actions are recorded on incident reports but remain applicable only in a small percentage of cases since responsible party identification is uncommon for incidents within the District's right of ways.	On-going	SWQU ICID Team
C.6.a.ii. PS ICID-6	Enhanced Reporting Requirements	For any actual non-compliance or threatened non-compliance noted during the investigation of the report, the nature of follow up will be reported, through resolution on the noted issue, up to and including enforcement action.	Not applicable this year.	Sept 05	SWQU ICID Team

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

REPORTING DATA

- The ICID incident response/pollution prevention program received 122 reports of potential ICIDs in Santa Clara County within SF Bay Regional Board jurisdiction, 78 of which required a field response.
- Types of pollutants and pollutant sources encountered this year
- General locations

- How many incidents were reported by citizens or employees
- Follow up actions (how many incidents were investigated, how many enforcement actions of each level were taken)

PROGRAM EVALUATION

Emergency Response

The District continues to focus significant manpower in support of the ICID program. Key elements of the District's ICID program include a 24-hour, 7-day per week Pollution Prevention Hotline (1-888-510-5151); Hazardous material removal; and staff training.

Ordinance 83-2 violations

The ordinance 83-2 code enforcement program has been hampered due to a lack of staff and funding. The position that resided in the Community Projects Review Unit was vacated by the retirement of an individual and the position has not been filled due to the reduction of District funds by California's diverting of $54 million dollars in District property tax revenue to the State Education Revenue Augmentation Fund in Fiscal Years 2004-2005 and 2005-2006.

HIGHLIGHTS AND ACCOMPLISHMENTS

Emergency Response

The Stream Water Quality Unit has continued internal outreach efforts. Stream Water Quality Unit staff utilize various means, including attending various District unit staff meetings, to personally inform District staff of the Emergency Response Pollution Prevention Hotline number and services provided. Field Maintenance staff, Water Utility Discharge staff and Construction Administration Unit staff were re-informed of the Hotline number at their respective annual training events. Individuals from many of the field operations units as well as staff who work with the public continue to be provided with red 4"x1" stickers with the Emergency Response/Pollution Prevention Hotline number boldly displayed for placement on clipboards or in vehicles.

The District Watershed Division's has achieved certification of its Quality and Environmental Management System (QEMS) to the ISO 9001:2000 and ISO 14001 international standards and must undergo semi annual audits as conducted by both internal and external auditors. In general terms, ISO 9001 standard provides for a management system that assists organizations to consistently meet or exceed customer expectations. ISO 14001 standard helps an organization identify and control its effects on the environment. In line

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2005-06
ILLICIT CONNECTION/ILLEGAL DUMPING ELIMINATION ACTIVITIES

with this certification the District's Stream Water Quality Unit is revising its "Emergency Response Procedures Manual" and creating new Work Instructions to meet ISO requirements and improve operations according to ISO audit findings. These documents fulfill the certification requirements by incorporating processes that ensure the program is current and efficiently managed. As part of the ISO process 4 team members were individually evaluated by undergoing a drill regarding pollutants found in one of the creeks and having to trace the release of contaminants to one of the local water sources and staff were evaluated on their investigation skills as well as notification protocol for other agencies, local co-permittees and District management. Also this year the incident report form is undergoing revision and modifications to eventually be an Access database document.

The District received and responded to a total of 122 emergency response reports throughout Santa Clara County during fiscal year 2005-2006. Of this total 111 were within the jurisdiction of the San Francisco Bay Regional Board and the associated Santa Clara Municipal Stormwater Permit. A total of 82 required a field response by the one of the team members for source identification, clean up or evidence collection. The data from the emergency response reports indicates that Guadalupe River was once again the waterway with the greatest number of incidents with a total of 21 reports. Coyote Creek also a relatively high number (9) of incidents reported. The remainder of the creeks had 4 or less reported incidents. Taken as entire watersheds the Guadalupe watershed accounted for 35% of all reported incidents, both Coyote and West Valley watersheds accounting for 20% each, Lower Peninsula (15%) and Uvas/Llagas (10%) accounted for the remainder of the incidents. The predominant contaminants again were "Hydrocarbons" and "Chemical" with 27 and 30 reported incidents respectively – accounting for 46% of the total incidents between them. Sewage was the third most common contaminant - occurring in 16 of the incidents. Trash which had the third most incidents last year slipped to 6th behind wastewater and sediment discharges.

The majority of reports (58) this year again occurred within the limits of the City of San Jose. Unincorporated areas of north Santa Clara County accounted for 9 responses this year followed by Palo Alto (8), the City of Santa Clara (6), and the Towns of Saratoga and Los Gatos (5 each). The District records every response it receives. It is important for the District to be able to accurately track the number of reports. The District may forward the report information to other cities and the cities may be the actual responder but the District still logs the report for our records so it is important for the Regional Board to be aware that the total number of reports from all co-permittees as reported by the Program Manager may be artificially elevated due to double reporting (District + municipal). The District responded within the two hour target response time, 100% of the time in 2005-2006.

The GIS mapping exercise has been put on hold as the Steam Water Quality Unit focused more on Mercury issues, Trash assessments and Water Quality Index sampling. The GIS mapping will be performed next year.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2005-06
ILLICIT CONNECTION/ILLEGAL DUMPING ELIMINATION ACTIVITIES

83-2 Ordinance Enforcement

As previously reported the 83-2 code enforcement program has been temporarily reduced due to staffing and fiscal constraints this year. However District Emergency Responders continue to work closely with law enforcement agents at the Department of Fish and Game and the District Attorney's Office, as well as municipal and Regional Board code enforcement staff.

Training and Education

The District continued ICID training of District staff, other response agencies and the public. The District has made inroads, as part of the Urban Runoff workshops, to inform District field maintenance crews and other District staff of the pollution prevention hotline. Field crews continue to be provided with "Pollution Hotline" stickers (that include the hotline phone number) to be placed in District vehicles and on clipboards. Four team members were individually evaluated by undergoing a drill regarding pollutants found in one of the creeks and having to trace the release of contaminants to one of the local water sources and staff were evaluated on their investigation skills as well as notification protocol for other agencies, local co-permittees and District management.

RURAL PUBLIC WORKS					
C.2.a. PS under review by RWQCB		Continue to incorporate Rural Public Works guidelines as part of the Channel Maintenance Training to field staff and via tailgate meetings w/Field Operations Units.	Conducted Stream Maintenance Program training on May 23, 2006 which included a discussion on the benefits of large woody debris to in-stream habitat and discussed issues related to road repair to facilitate a reduction of sediment going to the streams.	May 06	SWQU Rural Public Works Task Lead

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

Levee grading and large woody debris removal from creeks have been identified as activities subject to this performance standard. No rural roads or trail erosion problems have been identified or came to the attention of the District Stream Water Quality Unit staff during this fiscal year. No rural public works were constructed by the District this year. However several stream flood control or erosion repair projects have been worked on to continue to improve the quality of access roads and reduce the likelihood of the levee, access roads and stream banks being sources of sediment. The District continues to enlighten staff of the importance of large woody debris for habitat during the Stream Maintenance Program training which supports the Channel Maintenance Pollution Prevention Program. The trained staff are the same staff working on many of the stream maintenance/restoration programs the District is involved with.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2005-06
PUBLIC AGENCY ACTIVITIES

HIGHLIGHTS AND ACCOMPLISHMENTS

The District has continued to emphasize to staff the importance of woody debris in the creeks for wildlife habitat and to facilitate the reduction of potential erosion and sediment challenges at various facilities by encouraging the creeks to remain in dynamic equilibrium.

	Effectiveness Evaluation	Conduct annual effectiveness evaluation per the Performance Standard.	Effectiveness evaluation indicated that there is an increased understanding that properly functioning storm drains help prevent pollution.	Jan 06	SWQU SD O&M Task Lead

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

The District owns and operates the stormwater drainage systems at its facilities, which includes storm drains, catch basins, vegetated swales, open drainage ditches, utility trenches, and storm drain lines. Storm drains from District facilities discharge to creeks, the Guadalupe River, and recharge ponds. Storm drains outside District facilities are owned and operated by the local (city or county) jurisdiction.

The District completed the following tasks:

1) Sent out an effectiveness evaluation survey on April 6 and June 7, 2006 to solicit staff feedback on BMP effectiveness and suggestions for improving the storm drain O&M program. The effectiveness evaluation indicated that there is an increase of the understanding that properly functioning storm drains help prevent pollution.
2) Continued implementation of the storm drain inspection and cleaning program.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2005-06
PUBLIC AGENCY ACTIVITIES

3) Continued weekly street sweeping functions at facility parking areas.

BMPs were formally inspected quarterly during non-stormwater observations at most District facilities except Coyote and Pacheco Pump Stations. The pump stations do not warrant non-stormwater observations due to the low potential for these types of discharges to occur. The Corporation Yard culvert inlet protection device (constructed of cinderblocks filter fabric and washed gravels) was evaluated and is in need of repair, the necessary repairs will be performed in the FY 06-07. Other BMPs are working effectively, as noted on the non-stormwater observation forms submitted. Two water treatment plants have been under some form of construction during the past fiscal year, and have therefore been operating under the contractor's Storm Water Pollution Prevention Plan (SWPPP) during construction. The Rinconada Water Treatment Plant conducted the required storm drain inspections required under this program. Storm drain inlets at the Corporation Yard and the Vasona Meter Shop were cleaned out in the Fall of 2005.

HIGHLIGHTS AND ACCOMPLISHMENTS

Storm drain inspections and cleaning work orders continue to be distributed via the District's Maximo (field maintenance work order software) Preventative Maintenance program for the Rinconada Water Treatment Plant. Each month facility maintenance staff automatically receive a computer generated work order to inspect all storm drains at their facility and have them cleaned as needed. Stream Water Quality Unit took over the storm drain inspections at the Vasona Meter Shop, Corporation Yard, Headquarters and Administration Campus and the Blossom Hill Annex to ensure compliance with Urban Runoff Management Plan.

C.2.a PS WUD-3	Evaluation	Complete annual effectiveness evaluation of the Water Utility Discharge program.	Completed in March, and indicated that staff is aware of the program and following notification requirement and is using appropriate BMPs.	Jan 06	SWQU WUD Task Lead

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

The District owns, operates, and/or maintains 3 water treatment plants, 2 pumping and metering stations, 1 pump station, 11 reservoirs, percolation facilities, water wells, a recycled water facility (South County Regional Wastewater Authority Treatment Plant), and distribution pipelines. All of these water facilities have a potential for discharging non-stormwater to surface water bodies.
The District continued reporting on all water utility O&M discharges. Please see attached inventory table (Table 2.1). Typical District discharges include raw water from water quality testing devices at District plants, San Tomas Injection Well, and Vasona Meter Shop testing.

The District's water utility maintenance staff performs all discharges. District staff implemented BMPs after consultation with the Stream Water Quality Unit. From discharge reports and from the 4 program evaluation responses received, BMPs are being implemented during all District water utility discharges and are effective. The District's Water Utility Discharge Pollution Prevention Guidance Manual

(October 2001) has been effective in assisting District staff to chose and implement proper BMPs. District staff have been very open to this program and are reporting all discharges with no complaints.

HIGHLIGHTS AND ACCOMPLISHMENTS

Annual refresher training was held on May 31, 2006. Twenty District staff members who work with discharges or oversee discharges attended the training. Participants included staff from the following District units: Operations, Planning & Analysis, Utility Raw Water Operations, Utility Treated Water Operations, Groundwater Management, Infrastructure Planning, Utility Maintenance, Process Engineering, Water Quality Infrastructure Planning, and Lower Peninsula West Valley Watershed Field Operations. Workshop topics included: Why Pollution Prevention Matters (Environmental Impacts, Potential Pollutants and Sources, Regulatory Requirements, District Performance Standards), Water Utility Discharge Pollution Prevention Guidance Manual Overview, Roles and Procedures, BMP Implementation, Dechlorination, and Reporting and Tracking.

In April, 2006 and again in June of 2006, program evaluation questionnaires were sent to 50 District staff members responsible for water utility O&M. 10% (5) were returned completed. From those questionnaires received, control measures and BMPs are being implemented properly during all discharges and are functioning effectively.

This program's planned and unplanned notification policies and practices with the Regional Board have been so successful that the Regional Board has recommended that San Francisco Public Utilities Commission follow the same notification policy and practice that is used by the District.

NEW DEVELOPMENT PLANNING PROCEDURES

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2004-05
NEW DEVELOPMENT PLANNING PROCEDURES

SELF EVALUATION MATRIX – NEW DEVELOPMENT PLANNING PROCEDURES (C3)

Work Plan Task	Task Description	Status/Comments	Due Date (mo/yr)	Required by C.3. Section
10.A. Development Project Approval Process **Goal:** Modify District development project approval processes, for both private and public development projects, to incorporate the requirements of Provision C.3.				
10.A. 1	Implement the revised project review processes in coordination with the implementation of the Site Design Measures Guidance and Standards(C3 j), and the requirements of the Hydromodification Management Plan (HMP). Provide additional training to District staff in planning, building, and engineering on the C.3. Provisions and goals, the required changes in the approval process, and the use of appropriate tools.	District is implementing the HMP requirements for District's project. (Example: Expansion work for Rinconada Water Treatment Plant(RWTP), Stage 2 includes the HMP basins and WQ treatment and Green Roof alternatives and New Water Quality lab project scheduled to start construction in August 2006) Provided training to CPSD(Capital Improvement Project) staff and CPRU (land development review) staff. The Scope of land development review will change depending on the outcome of the Water resources Protection Ordinance.	*Pending final approval of the HMP by the Water Board*	C.3.b
10.A. 2	Review new development projects for the site design and control measures and requirements of the HMP in conformance with provision through the project review process.	Within the District's jurisdictional areas, District did not review any new projects. RWTP, Stage 2 is in the planning stage and WQ Lab project was reviewed two years ago. District provided courtesy assistance to a land developer based on the request from City of Los Altos.	*Pending final approval of the HMP by the Water Board*	C.3.b
10.B. Requirements for Group 1 and Group 2 Projects **Goal:** Prepare to require proponents of Group 1 projects to design and implement stormwater treatment BMPs to reduce stormwater pollution to the maximum extent practicable. Participate in development of the proposal for an alternative Group 2 project definition and prepare to implement C.3. requirements for Group 2 projects as needed.				

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2004-05
NEW DEVELOPMENT PLANNING PROCEDURES

Work Plan Task	Task Description	Status/Comments	Due Date (mo/yr)	Required by C.3. Section
10.B. 1	Implement stormwater treatment BMPs to reduce stormwater pollution to the maximum extent practicable for Group 1 and Group 2 projects.	For the RWTP, Stage 2 project, District is implementing the Treatment BMPs including Green roof. This project is in the planning stage. The New Water Quality lab project Includes a stormwater treatment BMP such as Filtration Basin. The construction work is scheduled to start in August 2006.	On Going *Pending final approval of the HMP by the Water Board*	C.3.c.i.
10.B. 2	Assist the Program in the development of the stormwater treatment BMPs updating the guidance manual and performance standards for Group 2 projects as needed.	Completed	Ongoing	C.3.c.ii/
10.C. Operation and Maintenance of Treatment BMPs **Goal:** To develop and implement District operation and maintenance (O&M) verification program to help ensure the proper maintenance of stormwater treatment measures on public and private property.				
10.C. 1	Continue to implement the Operational and Maintenance (O & M) verification Program for projects with structural, in-ground, landscape and all other BMPs.	Verification of O&M of the treatment BMPs within the District's jurisdiction will be coordinated and not duplicative to the co-permittee agency jurisdiction.	Ongoing	C.3.e
10.C. 2	Report on the District's treatment BMPs O&M verification program in each annual report, including organizational structure, evaluation of effectiveness, and planned improvement to the program. Include a list or summary of treatment BMPs inspected during the year, inspection results, and any required follow-up and correction.	Within the District's jurisdiction there is no treatment BMP in place that requires O&M verification.	Annual Report	C.3.e.iii.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2004-05
NEW DEVELOPMENT PLANNING PROCEDURES

Work Plan Task	Task Description	Status/Comments	Due Date (mo/yr)	Required by C.3. Section
10.D. Hydromodification Management Plan **Goal:** To manage increases in runoff peak flow and volume for Group 1 projects, where such increases may cause increased erosion of creek beds and banks or related impacts, through implementation of a hydromodification management plan (HMP).				
10.D. 1	Assist with completion of the final HMP: -- Final HMP for approval by the RWQCB	Completed	*Pending final approval of the HMP by the Water Board*	C.3.f
10.D. 2	Implement HMP requirements	Completed-Within District's jurisdiction, the District will coordinate non-duplicative implementation of the HMP requirements. New Water Quality lab project incorporates detention basin and retention basin in combination to meet and exceed the current HMP requirements.	*Pending final approval of the HMP by the Water Board*	C.3.f. i.
10.E. Waiver and Compensatory Mitigation Program **Goal 10.E.** Establish a program under which a project proponent may request a waiver from treatment BMP requirements due to impracticability, with a provision to provide an equivalent water quality benefit to the same receiving water (that allows participation in regional solutions).				
10.E. 1	Evaluate potential regional treatment and/or peak flow attenuation projects.	District prepared a Draft Long Term Plan for In Stream Restoration in May 2006. This Long Term Plan did not include regional treatment. This draft plan was provided to Program and the City of San Jose in June 2006. The District is pursuing regional treatment systems within available opportunities.	*Pending final approval of the HMP by the Water Board*	C.3.g.ii.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2004-05
NEW DEVELOPMENT PLANNING PROCEDURES

Work Plan Task	Task Description	Status/Comments	Due Date (mo/yr)	Required by C.3. Section
10.E. 2	Perform legal review, and incorporate waiver provisions in project review process. Identify waiver projects in Annual Report.	District wishes to not allow waivers.	Sept. 05	C.3.g.v.
10.F. Alternative Certification **Goal 10.F.** To allow a professionally qualified person (per C.3.h.) or another co-permittee with overlapping jurisdiction to certify the adequacy of design of stormwater treatment measures (per C.3.d. and f.).				
10.F. 1	Continue to implement the internal procedure to allow alternative certification.	District will report new projects with alternative certification within the District's jurisdiction that need to be certified.	Annual Report	C.3.h
10.G. Site Design Measures Guidance and Standards Development **Goal 10.G.** To incorporate site design measures that reduce water quality impacts into District review protocols and encourage their use in project designs so as to meet the requirements of C.3.				
10.G. 1	Incorporate Standards and Guidance in the District approval process and Implement the revised Standards and Guidance.	District has used C3 handbook prepared by the program for the standards and guidelines. Program/District	On-going	C.3.j
10.H. Source Control Measures **Goal 10.H.** Require source control measures for new and redevelopment projects to limit pollutant generation, discharge and runoff to the maximum extent practicable.				
10.H. 1	Report implementation status of Source Control Measures.	There is no project to report within the District's jurisdiction.	NA	C.3.k.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2004-05
NEW DEVELOPMENT PLANNING PROCEDURES

Work Plan Task	Task Description	Status/Comments	Due Date (mo/yr)	Required by C.3. Section
10.I. Update General Plans **Goal 10.I.** Include water quality and watershed protection principles and policies in the Stream Stewardship Plan to the extent necessary to provide the basis for implementation of the measures required by Provision C.3.				
10.I.1	Update the Stream Stewardship Plans to incorporate the water quality and watershed protection principals and policies for applicable development projects.	The District does not have permitting authority over development projects.	On-going	C.3.l
10.J. Reporting Requirements **Goal 10.J.** To meet the Provision C.3. reporting requirements, and plan for anticipated data needs, and begin collecting and tracking required data on development projects as needed.				
10.J. 1	Provide information described in Table 1 of Provision C.3. in annual reports.	1) RWTP, Stage 2, Addition of 1 ½ Acre of Impervious area. This project is in planning stage. 2) New Water Quality lab Site Area including pervious and impervious area of 2.7 Acres. This project is scheduled to start in August 2006	Annual Report (9/15/06)	C.3.n.
10.J. 2	Collect information and report a summary of types of pesticide reduction measures required for development projects, and the percentage of projects for which pesticide reduction measures were required.	The District did not permit any projects greater than 10,000 square feet within our jurisdiction.	Annual Report (9/15/06)	C.3.n.iii.

SANTA CLARA VALLEY WATER DISTRICT
FY 2005 Consolidated[1] "C3" Reporting Form

for Planning Procedures Performance Standard and Provision C.3.n.i, ii, and iii Reporting Requirements

Group 1 and 2 New Development and Significant Redevelopment Projects

No new or significant project to report for FY 2005-2006 within District jurisdiction.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

The District received two comments from the Board pertaining to this section of the annual report.

"We commend the District on its proactive approach to including properly sized stormwater controls as well as peak flow attenuation of runoff in its planned water quality lab building."

"We appreciate the District's continued hydromodification (HMP) studies in several watersheds in Santa Clara County and the development and testing of a method for computing and allocation cost for in-stream regional solutions. "

No District response is required.

HIGHLIGHTS AND ACCOMPLISHMENTS

Thompson Creek

1. Collected three years of continuous flow data (at 15 minute interval) on Thompson Creek. This data will help to increase the confidence level of District's calibration for frequent storms.

2. Completed three years of sediment data collection at the gages on Thompson Creek to develop sediment rating curves for the bed load and suspended load.

[1] (1) GROUP 1 - constructed since July 1, 2004 with 1 acre (43,560 s.f.) new impervious surface entirely within District jurisdiction, easement, or property owned in fee; and (2) GROUP 2 - constructed since April 15, 2005 with new impervious surface area greater than 10,000 square feet entirely within District jurisdiction, easement, or property owned in fee.

Upper Penitencia Creek

1. Collected data on Upper Penitencia Creek for continuous flow measurement for hydrologic and sediment transport modeling.

    a. Continuous flow measurement continues for second year at Piedmont Road and at Berryessa Industrial Park.
    b. The data will be used to calibrate a continuous flow runoff model (HEC-HMS) for Penitencia Creek.
    c. The second year of data collection was completed.

2. Geomorphic Survey, and Channel Stability Assessment.

    a. Collected second year of suspended solids and bed load transport data for the winter to develop suspended sediment and bed load rating curves.

Berryessa Creek

1. The effort is similar to Upper Penitencia Creek. District staff have installed gages on Berryessa Creek for continuous flow measurement.

    a. Continued to collect flow data measurements. Data is being collected upstream of Piedmont Road (which is the downstream end of the rural portion of the watershed) and at Hillview Road (which represents the combination of rural + urban watersheds).
    b. The data will be used to calibrate the continuous flow HEC-HMS model for Berryessa Creek.

2. Geomorphic Survey and Channel Stability.

    a. Continued collection of suspended solids and bed load transport data for during winter to develop suspended sediment and bed load transport data.
    b. Extended the cross-sectional data collection to Hillview Road bridge downstream of 237/Calaveras Road. This captured the eroding reach where Berryessa Creek runs parallel to the railway tracks.

Adobe Creek

The effort has focused on the development of a design for Upper Reach 5 that is stable, maximizes natural elements and can be accommodated to the best extent possible within the limited easement. The data collected and the models developed apply to all future stream stabilization projects that the District may undertake between 280 and El Camino Real.

Continued data collection from a continuous flow gage on Adobe Creek at Middlefield Road (ISCO 4150) to develop and calibrate HEC-HMS model continuous flow runoff model.

Stevens Creek

The project team has undertaken the development of a design through the Blackberry Farm area that realigns the creek to remove the fish barriers and hardscape, and provide the District credit for restoration of several thousand feet of creek restoration.

Ross Creek

Completed a stream restoration and erosion repair for 300 feet of creek downstream of Harwood. The reconstructed section of the stream performed admirably this year.

Developed a stream rehabilitation for 600 feet of creek downstream of Kirk Road. The analysis for the design included application of geomorphology data collected during the HMP project and later, the HEC-HMS model developed, the HEC-RAS and shear stress model.

Alamitos Creek

A longitudinal profile survey of one mile of Alamitos Creek was completed upstream and downstream of the Greystone Creek confluence. This data was collected as part of an effort to design a natural alternative to eliminate bank erosion of the channel near the confluence of the two creeks.

HMP – Stream Impact Master Plan Elements

Developed and presented “Draft Long Term Plan for Implementing Restoration/Rehab Projects” to SCVURPPP and the City of San Jose. This document includes some discussion of potential cost allocation scenarios for in-stream projects in lieu of on-site improvements and potential on-site and in-stream combination for new development. In-stream regional solution is an alternative for those new developments and existing developments whose impacts are addressed only partially through on-site or off-site means.

URBAN RUNOFF ANNUAL REPORT FY 2005-06
CONSTRUCTION INSPECTION

SELF EVALUATION MATRIX

Item Source[1]	Activity	FY2005-2006 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
NEW DEVELOPMENT AND CONSTRUCTION CONTROLS – INSPECTION PROCEDURES					
C.2.a URMP PS-6	Annual training for construction inspection staff	Conduct annual Training workshop for CIP/CPRU inspection staff.	Completed – Training was conducted for 20 District staff on March 27, 2006.	March 06	SWQU
C.2.a URMP PS-6	Inspection Procedures	Conduct annual effectiveness evaluation.	Completed – Feedback was solicited from District staff for effectiveness of the Program. Eight forms were returned. Contract language will be modified to incorporate BMP inspection and water quality monitoring requirements.	Jan 06	SWQU
C.2.a APRP	Inspection Procedures-	Continue to promote high frequency of construction site inspections. Maintain Training and Tracking tables. Construction Administration Unit inspectors to be made aware of the need for greater inspection frequency at annual training.	Completed – Stream Water Quality Unit maintained tracking table. Inspectors were reminded of the need for increased inspection frequency during annual training. Tracking table is now sent with the monthly reminder.	Monthly	SWQU

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

When requested by Construction Inspection Unit staff, the Stream Water Quality Unit continued to conduct pre-rainy season inspections to facilitate site compliance. The frequency of construction site inspection coverage continued to remain high this past year. This was facilitated by Stream Water Quality Unit coordinating in the field with the construction inspectors and through the use of monthly email reminders to Construction Inspectors to conduct SWPPP evaluations. The monthly email reminder also includes a copy of the tracking table.

[1] Notation is as follows: PS (Performance Standard), URMP (Urban Runoff Management Plan), NDII (New District Initiated Item), NPDES (NPDES Permit)

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FY 2005-06
CONSTRUCTION INSPECTION

HIGHLIGHTS AND ACCOMPLISHMENTS

The District continued to use the monthly inspection sheet developed in FY 02-03 to facilitate compliance and follow up inspections. The Stream Water Quality Unit continued to meet with the Construction Inspectors in the field to go over SWPPP implementation at construction sites. These field meetings proved very successful for several projects and will continue in FY 06-07.

Construction Administration Unit continues to use the Incident Response/Pollution Prevention Hotline to contact Stream Water Quality Unit staff to report construction sites that are creating sediment discharges.

In FY 05-06, the District had 6 Capital Improvement Projects (CIP) under construction that included 5 flood protection/channel improvement projects and 3 water treatment plant projects. SWQU assisted with review of CIP SWPPPs as requested. A table showing the inspections completed is included with this section.

Construction Inspection Training for 20 District staff was completed on March 27, 2006. The training included staff from the District's Capital Programs Units again this year. Five staff from the Construction Engineering Unit (100%) and 15 staff from the Construction Inspection Unit (100%) attended the training.

Effectiveness evaluation questionnaires were distributed prior to the annual training. Eight respondents encouraged SWQU to continue monthly email reminders, provide resources to enforce non-compliance and continue to assist with review of project SWPPPs as requested.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2005-06
PUBLIC INFORMATION/PARTICIPATION

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

HIGHLIGHTS AND ACCOMPLISHMENTS

The District serves a community of 1.7 million countywide and has excellent outreach programs to many sectors of the community. Key elements of the District's PIP Program include the Adopt-A-Creek Program providing outreach to creekside residents, creek clean up events supporting citizen participation, attendance at community events targeting the general public, numerous workshops presented by the Water Conservation Unit, and the School Outreach Program.

GENERAL OUTREACH

The District attended 35 community events during FY 05-06. A complete listing of all events is included in this section.

A Creekwise Approach (Five tips to care for your creekside property) was mailed to 38,000 streamside property owners in January 2006. The mailer provided information on creekwise gardening and landscaping practices, invasive species, paved surfaces, building near creeks, and erosion control. A copy of the brochure is included in this section.

ValleyWater News quarterly has been discontinued and revamped as the countywide mailer. This year's countywide mailer contained as article promoting watershed practices that keep water clean at its source. The mailer was sent to 700,000 residents in September 2005. A copy is included in this section.

The District's website continues to be improved to provide continual updates to the community. During the winter season, the District's home page featured a link to flood-related information, the District's efforts to protect the waterways in the event of a flood, and sandbag distribution sites. Our on-line maintenance request form empowers citizens to report dumping or waterway-related problems, and allows them to send messages to the appropriate watershed staff. The site also includes a link to the Santa Clara Valley Urban Runoff Pollution Prevention Program.

PUBLIC INFORMATION/PARTICIPATION

TARGETED OUTREACH

Workshops

In September/October 2005 and April 2006, the District's Water Quality, Groundwater Management, Vegetation Management and Water Use Efficiency Units worked together with the Loma Prieta Resource Conservation District, the University of California Cooperative Extension and the United States Department of Agriculture Natural Resource Conservation Service to conduct the fifth annual Stewardship for Small Acreages – A Series of Workshops on Land Management for Clean Water. The goal was to provide rural landowners with the resources needed to protect both surface and ground water quality on and off their property. The series took rural landowners through the steps of assessing their properties and developing action plans to address the highest priority items. The workshops were held at various small acreage homes. The four sessions included: general topics such as watersheds and conservation plans, groundwater quality, wells, septic systems and hazardous household products; Manure/Waste Management and Composting; Small Vineyards; and Fire Safety, Landscaping and Erosion Control. A total of 144 people attended the 9 sessions.

In March 2006, the Water Use Efficiency Unit conducted a four-part Water Efficient Landscaping Workshop Series. A total of 183 people attended the four sessions: Selecting Plants for Your Water-Wise Garden, Water-Wise Garden Design, Water Efficient Irrigation Design, and Gardening with Natives. In April, the District co-sponsored the Fourth Annual Going Native Garden Tour, which spotlighted 46 homes in the South Bay providing examples of bird and butterfly friendly residential gardens that are both water-efficient and easy to maintain. The tour included a variety of gardens landscaped with native plants covering small to large lots, ranging from newly planted gardens to well established ones. The District campus was included as one of the tour sites.

Media Campaign

The District conducted two campaigns during FY 05-06: one on flood awareness/safety and the other on water conservation. Both campaigns included the District's website where people could get urban runoff information. The campaigns included the use of frequent targeted public service announcements on radio stations, 10- and 60-second sponsored traffic radio spots on English and ethnic radio, targeted grassroots mailing to residents, community-based print media placement, billboards, and the Digitron billboard at Great America on Highway 101. Theater slides were also used in the flood awareness campaign. The District's web site, news media relations and community events were utilized to extend the reach of the campaign.

Flood Safety Notice 2006 was mailed in January 2006 to over 100,000 flood plain residents. Although the mailer's main focus is flood preparedness and safety, it also contained an article on watersheds. There were five versions of the mailer, containing the map of the resident's specific watershed: Lower Peninsula, West Valley, Guadalupe, Coyote, and Uvas/Llagas.

The Guadalupe River Watershed Mercury Study identified Lake Almaden as a significant source of methyl mercury that bioaccumulates in fish within the lake and in fish downstream. The District installed a pilot aeration system in May 2006 to improve water quality (see Section 7 for details). To assist San Jose Park and Recreation Department with questions about the SolarBee, a brochure containing frequently asked questions was developed. The brochure also includes watershed information. A copy is attached in this section.

AquaFacts, the District's employee newsletter, continued this year as an online publication. AquaFacts contained 7 articles relating to stormwater pollution prevention and watershed education during FY 05-06. Topics included cleanup of homeless camps, Guadalupe River Park and Gardens grand opening, environmental commitment, pesticides, and illegal dumping. The employee newsletter is an excellent and cost-effective method for delivering urban runoff, pollution prevention, and watershed messages to District employees.

An all employee Pollution Prevention Week email campaign was conducted September 20 through 23, 2005. Four emails were sent providing pollution prevention tips. Topics included: general pollution prevention week information, preventing mercury pollution, pollution prevention on the road, and proper disposal of dead batteries. Due to a mix-up, the pesticide message was not sent and will be the second message during next year's email campaign to ensure that employees receive the information. Numerous requests for brochures were received from the employees, as well as many comments on the campaign. This continues to be a good method to present pollution prevention ideas to District employees.

EDUCATIONAL OUTREACH

The District's educational outreach program serves a diverse population and responds to the needs of the schools throughout the County. Programming is consistent with State standards and regularly integrates messages and issues of other District communication programs. The District's School Outreach Program visited 177 public and private schools and 27 summer camps, reaching 35,602 students and 1,646 educators and conducted 17 teacher workshops during FY 05-06. The District offers a comprehensive education outreach program for early childhood, elementary, middle school, high school, and college-aged students to establish a foundation for understanding and appreciation of water resources. The program provides age-appropriate classroom presentations, teacher in-service training in water education, and tours in order to help children understand and appreciate their local water resources. Classroom presentations include hands-on experiments, information on watersheds, urban run-off, pollution prevention, flood plains, conservation tips, water awareness activities, flood management, and careers in the water industry. Scheduling is conducted on a first-come, first-served basis and provided free to schools in Santa Clara County. Number of students by watershed, city, grade, focus of presentation, and school district are included with this section. AquaCycles, a newsletter for teacher's, was published and distributed to all teachers in Santa Clara County in Fall 2005. AquaDrops eNews, an electronic teacher's newsletter was also sent out in Fall 2005.

The District's Water Cycle Boogie song was heard at the Los Angeles County Fair in September 2005.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2005-06
PUBLIC INFORMATION/PARTICIPATION

The District participated in the JASON Project at NASA again this year. The JASON Project was held January 30 through February 3, 2006. The Project allowed the District to educate over 7,000 students in a one week period. JASON's year-long curriculum comes to life during an annual expedition! Each year, Dr. Ballard leads a team of scientists, students and teachers on a journey to explore and study in research locations featured in the curriculum. Satellite and Internet technologies bring students in classrooms around the world into direct, real-time contact with scientists and researchers as the expedition is happening. The culminating event for local students is a visit to NASA/Ames Research Center at Moffet Field. Students go to Jason City to participate in various learning activities. The District hosted four activities this year: the groundwater model that included pollution prevention, a parts per billion (ppb) activity, water magic and music presentations and a related art activity.

The Coyote Creek Outdoor classroom encompasses land alongside Coyote Creek and includes a covered gazebo classroom for students and teachers, as well as a platform overlooking the creek where students can study the stream's natural habitat. Groundwater monitoring wells on site enable students to observe and evaluate the underground water table and understand how surface and groundwater interact. The site features two planting areas – one site close to the creek planted with native trees and shrubs to improve the stream's wildlife habitat, and a "high terrace" or upland area landscaped with oaks, grasses and other native plants to demonstrate drought-tolerant gardens. During the 2005-06 school year, the program provided 7 class tours for 336 students and 3 teacher in-services for 12 teachers.

Morley Park Outdoor Classroom in the City of Campbell provides the opportunity to teach students about the purpose of wetlands, urban runoff and the value of percolation ponds. During the 2005-06 school year, the program provided 2 tours for 102 students.

CITIZEN PARTICIPATION

The District established the Adopt-A-Creek Program in 1994 to encourage residents of Santa Clara County to take an active role in helping to preserve the health and beauty of our local creeks. In FY 05-06, 6 new permits and 5 renewal permits were issued and 41 creek clean up events were conducted. The program currently has 125 active participants.

The District participated in two creek cleanup events: the 22^{tnd}Annual Coastal Cleanup Day on September 17, 2005 and the 10th Annual National River Cleanup Day on May 20, 2006. During Coastal Cleanup Day, over 800 volunteers collected 18,077 pounds of trash at 28 sites. On National River Cleanup Day, 650 volunteers collected more than 11,171 pounds of trash at 27 countywide sites.

PROGRAM EVALUATION

The District uses numerous methods to conduct outreach, including written brochures, radio, newspaper, website, theater slides, bus back ads, community events and workshops. The wide variety of methods increases the probability that the messages are being received and understood. Combining all these different methods is very effective at meeting our public education goals. The variety of methods also ensures that many

segments of the Santa Clara Valley population are being reached, including residents, businesses, students, as well as people from other locations. The District evaluates the different outreach methods and continuously seeks to improve messages and outreach methods. We work collaboratively with many other agencies and organizations to conduct outreach and will continue these partnerships in the future.

GENERAL OUTREACH

The District feels that attendance at community events is an effective public outreach method. The individual contact made at the events allows staff to answer specific questions and deliver more extensive messages. A wide variety of information can be distributed and the games and displays are a good way to attract event participants.

TARGETED OUTREACH

The District's targeted outreach efforts provide in-depth training and information to a small, targeted audience with the opportunity to answer specific questions from individuals in the group. This method allows the District to assist targeted groups to meet regulatory requirements, change behaviors that impact water quality, and provide the knowledge needed for the group to solve any water quality problems they may be experiencing. The District plans to continue this outreach method as we feel it is a valuable service to these targeted audiences and can positively impact water resources.

EDUCATIONAL OUTREACH

Teacher surveys were distributed again this year. 99% of the teachers returning the surveys rated the program "helpful" to "extremely helpful." 97% are "satisfied" to "very satisfied" with the scheduling of the program and 99% would recommend the program to others. The District feels that the educational outreach program is a cost-effective method for educating children, teachers, and indirectly, parents. Based on the teacher's surveys, minor adjustments will be made to the program. A summary of the District's Water Awareness School Program can be found in this section.

CITIZEN PARTICIPATION

The Adopt-A-Creek program and the creek cleanup events are very effective at creating and increasing stewardship and individual responsibility for the county's water resources.

Santa Clara Valley Water District
2005-06 PIP Activities/Community Events

PI/P Activity[1]	Type of Outreach [2]	Level of Implementation (Description/Dates)	Evaluation of Effectiveness [3]
Orchard Supply Hardware "How to" Event San Jose	General	7/10/05	30 attendees. Promoted Water-Wise House Call Program, distributed water conservation and general District information.
Orchard Supply Hardware "How to" Event Sunnyvale	General	7/23/05	60 attendees. Promoted Water-Wise House Call Program, distributed water conservation and general District information.
Orchard Supply Hardware "How to" Event San Jose	General	8/6/05	45 attendees. Promoted Water-Wise House Call Program, distributed water conservation and general District information.
District Day at the Giants	General	8/20/05	1,200 attendees. Distributed urban runoff, water conservation, and general District information.
Children's Fun Fest Berryessa Flea Market	General	8/20-21/06	1,200 attendees. Performed 2 water magic shows and staffed 2 booths. Distributed information on water conservation, water supply and water pollution prevention.
Milpitas Chamber of Commerce Art and Wine Festival	General	8/20-21/05	150 stopped by District booth. Distributed water conservation, water-wise house call program, urban runoff, gardening and low-water-use plant information. Promoted District services that help the public save water, energy and money.
Orchard Supply Hardware "How to" Event San Jose	General	8/21/05	32 attendees. Promoted Water-Wise House Call Program, distributed water conservation and general District information.
24th Annual South Bay Home & Garden Show	General	9/9-11/05	2,000 attendees. Distributed urban runoff, water conservation, and general District information.

Affordable Housing Fair	General	5/13/06 San Jose Flea Market	200 people stopped by District booth. Distributed water conservation, urban runoff and general District information.
Stewardship for Small Acreages Workshop: General Session	Targeted (Rural landowners)	9/7/05 Workshop in coordination with Loma Prieta RCD, UC-Cooperative Extension, and USDA-NRCS. Provided rural landowners with the resources needed to assess their properties and plan and implement improvements, if needed, to protect both surface and ground water quality on and off their property.	20 attendees. Topics covered included watersheds and conservation plans, groundwater quality and well maintenance, septic system maintenance and household hazardous waste disposal and alternatives. Distributed literature on well construction, use and maintenance, septic system design and maintenance, household hazardous waste alternatives and disposal locations, individual parcel maps with water and elevation features for conservation planning.
Stewardship for Small Acreages Workshop: Manure/Waste Management, Composting & Livestock Health	Targeted (Rural landowners)	9/14/05 Workshop in coordination with Loma Prieta RCD, UC-Cooperative Extension, and USDA-NRCS. Provided rural landowners with the resources needed to assess their properties and plan and implement improvements, if needed, to protect both surface and ground water quality on and off their property.	20 attendees. Topics covered included manure, animal health husbandry, landfills and waste recycling, and conservation plan implementation. Distributed literature on manure management, composting, pasture management, and animal care.
Stewardship for Small Acreages Workshop: Pastures, Pens & Paddocks: Mud, Drainage & Erosion Control	Targeted (Rural landowners)	9/21/05 Workshop in coordination with Loma Prieta RCD, UC-Cooperative Extension, and USDA-NRCS. Provided rural landowners with the resources needed to assess their properties and plan and implement improvements, if needed, to protect both surface and ground water quality on and off their property.	20 attendees. Topics covered included invasive weeds, appropriate plant and grass selection, erosion and sediment control techniques, understanding drainage challenges. Distributed literature on pasture management.

Santa Clara Valley Water District
2005-06 PIP Activities/Community Events

PI/P Activity[1]	Type of Outreach [2]	Level of Implementation (Description/Dates)	Evaluation of Effectiveness [3]
Stewardship for Small Acreages Workshop: Small Vineyard	Targeted (Rural landowners)	9/28/05 Workshop in coordination with Loma Prieta RCD, UC-Cooperative Extension, and USDA-NRCS. Provided rural landowners with the resources needed to assess their properties and plan and implement improvements, if needed, to protect both surface and ground water quality on and off their property.	22 attendees. Topics covered included conservation for the small vineyard, fertilizer and irrigation management, water quality protection, organic methods, and integrated pest management. Distributed literature on beneficial insects, less-toxic pest control, and composting.
Stewardship for Small Acreages Workshop: Fire Safe Landscaping & Erosion Control	Targeted (Rural landowners)	10/5/05 Workshop in coordination with Loma Prieta RCD, UC-Cooperative Extension, and USDA-NRCS. Provided rural landowners with the resources needed to assess their properties and plan and implement improvements, if needed, to protect both surface and ground water quality on and off their property.	20 attendees. Topics covered included fire fuel load management, fire safe home site, native plant identification and uses in landscape, noxious weed identification and management, irrigation management, sudden oak death syndrome and portable garden. Distributed literature on landscaping to reduce fire hazard, fire safety, noxious weeds, drainage and erosion control.
Fertigation Workshop	Targeted	10/27/05 Workshop in cooperation with UC Cooperative Extension	24 attendees. Instruction in fertilizer injection into drip irrigation systems. Hands-on field instruction for irrigators and growers.
Irrigation & Water Budgeting Training Session	Targeted	12/13-15/05 Workshop in coordination with Cal Poly Irrigation Training & Research Center	26 attendees. Water auditing and budgeting workshop. Distributed urban runoff, water conservation, and general District information.
Common Ground Garden Supply and Education Center Drought Tolerant Plants Information Table and Display	Targeted	12/17/05	15 attendees. Staffed a booth presenting drought tolerant plants information and display. Distributed information on Water-Wise plants and water conservation.
Ecological Farming Conference	Targeted	1/28/06	20 attendees. Distributed urban runoff, water conservation for farmers, and general District information.

PESTICIDE MANAGEMENT ACTIVITIES

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2005-06
PEST MANAGEMENT

SELF EVALUATION MATRIX

Item Source	FY2005-2006 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
I. Santa Clara Valley Water District Pesticide Use				
Goal I.A. *Eliminate all unnecessary District pesticide use (particularly organophosphate (OP) pesticide use) and implement Integrated Pest Management (IPM) techniques.*				
C.9.d.i	Conduct a periodic District-wide search of chemical storage areas for pesticides no longer legal for application per EPA, State, and/or local requirements, and properly dispose of any such pesticides pursuant to appropriate waste disposal regulations. (PS 9)	Completed – Prior to quarterly hazardous waste collection events, storage areas are inventoried and chemicals no longer legal for application are sent for disposal.	Sept 05 Dec 05 March 06 June 06	Vegetation Management Unit (VMU)
Goal I.B. *Raise awareness of all municipal employees and train employees who apply pesticides for the municipality about the municipality's IPM Policy and/or IPM techniques as appropriate.*				
C.9.d.i	Ensure that employees who apply pesticides for the District obtain the appropriate training as required by the County Agricultural Commissioner and the State Department of Pesticide Regulation (DPR). (PS 4a)	Completed – Annual license renewals and in-house training is tracked.	Annually	VMU
C.9.d.i	Provide annual training on the appropriate portions of the IPM Policy, SOPs, and BMPs, and the latest IPM techniques to employees within departments responsible for pesticide application. (PS 4b)	Completed – Vegetation Management Unit staff were trained on the District's IPM Policy, SOPs and BMPs during Unit meetings and the Annual BMP Training session.	May 06	VMU
C.9.d.i	Inform employees who are not authorized and trained to apply pesticides that they cannot use over-the-counter pesticides in or around the workplace, consistent with the IPM Policy. (PS 4c)	Completed – September 2005.	May 06	SWQU
II. Public Education and Outreach				
Goal II.A. *Increase awareness of IPM so target audiences recall less toxic pest management messages and adopt IPM behaviors. Target audiences include residential and commercial users, pesticide retailers, municipal employees, and special districts. (PS #6).*				

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2005-06
PEST MANAGEMENT

Item Source	FY2005-2006 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
C.9.d.ii	Assist with local implementation of the Watershed Education & Outreach (WE&O) Campaign, which will target the general public and include messages about less-toxic pest control and proper disposal (Program FY 01-02 Work Plan).	Completed – Staff attended ad hoc task group and work group meetings.	Annually, FY 01-02 through FY 04-05	SWQU
C.9.d.ii	Identify and attend community events and distribute outreach materials. (Program will attend events strategic to the WE&O campaign.) (PS 6)	Completed – Coordinated attendance at community events with District's Office of Communications. List of events is included in Attachment 1.5 Public Information and Participation.	Ongoing	SWQU
C.9.d.i	Conduct internal outreach on less toxic pest control to employees who do not necessarily purchase or apply pesticides during the course of their work (to encourage employees to use IPM techniques away from work). (PS 4c)	Completed – Conducted internal outreach during the District's Pollution Prevention Week e-mail Campaign. Copies of the email campaign are included in Attachment 1.5 Public Information and Participation.	Sept 05	SWQU
Goal II.B. *Educate pesticide retailers and consumers about less toxic pest control products and promote the sale of such products.*				
C.9.d.ii	Continue to fund and participate in the BASMAA Regional IPM Partnership. (Program FY 01-02 Work Plan)	Completed – Program funds the "Our Water, Our World" (OWOW) Regional IPM Partnership. Assisted with implementation of the OWOW program through attendance of ad hoc task group and work group meetings.	Ongoing	Program
C.9.d.ii	Continue to implement cost-effective elements of the IPM Store Partnership Program. Create and provide fact sheets and other materials to pesticide retailers to facilitate point-of-purchase outreach. Visit stores as necessary to ensure ongoing participation. (Program FY 01-02 Work Plan) (PS 6)	Completed – Assisted Program to develop fact sheets and facilitate point-of-purchase outreach. Completed through attendance of ad hoc task group and work group meetings and review of documents.	Ongoing if effective	Program
III. Pest Control Operators (PCOs) ***Goal III.A***. *Minimize pesticide use by PCOs contracted for structural pest control and landscape maintenance.*				

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2005-06
PEST MANAGEMENT

Item Source	FY2005-2006 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
C.9.d.i	Continue to implement and improve the process that requires PCOs contracted for District applications to use pest control methods consistent with the District's IPM policy (through contract specifications). Specifically, require contractors to: a) follow the District's IPM policy, BMPs, and SOPs; b) provide evidence of current IPM training, when feasible; and c) provide documentation of pesticide use on District property to the District in a timely manner. (PS 5)	Completed – Continued to incorporate contract language developed in 2004 into all contracts. Continued to use tracking system for contractor's monthly reports.	Ongoing	VMU
Goal III.B. *Require all PCOs to implement Best Management Practices (BMPs).*				
C.9.d.i	Continue to require PCOs contracted by the District to implement the industry standard BMPs, developed by the Program, through contract specifications. (PS 5)	Completed – Contract language incorporated into contracts that expired June 2006.	Ongoing	VMU
IV. Commercial Businesses ***Goal IV.A.*** *Determine the extent of commercial business employees' use of pesticides (i.e., pesticide applications not performed by a licensed PCO) and conduct appropriate outreach regarding less toxic pest management.*				
C.9.d.ii	Implement education programs that target commercial businesses, per recommendations developed in Program work plan. (PS 6)	Completed – Coordinated through Program (see Section 6-Pest Management of Program's Annual Report).	June 06	SWQU
V. Household Hazardous Waste Collection ***Goal V.A.*** *Provide pesticide disposal services through household hazardous waste (HHW) collection programs for all residents and small businesses, and encourage use of these programs.*				
C.9.d.ii	Work with HHW collection agencies to support, enhance, and help publicize programs for proper pesticide disposal. (PS 7)	Completed – Coordinated with Program through attendance of ad hoc task group and work group meetings.	Ongoing	Program
C.9.d.ii	Provide hazardous waste disposal information to residents, through distribution of materials (e.g., utility bill insert, city newsletter, community events, etc.) or advertising in local media. (PS 6)	Completed – Coordinated with District's Office of Communications to ensure that information was available at community events and through other venues.	Periodically at least annually	OOC

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2005-06
PEST MANAGEMENT

Item Source	FY2005-2006 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
VI. Monitoring and Science				
Goal VI.A. *Participate in coordinated monitoring efforts to support pesticide TMDL development and implementation.*				
C.9.d.iii	Continue financial support of the Regional Monitoring Program (RMP) and Clean Estuary Partnership (CEP).	Completed – Supported through Program budget.	Annually	Program
C.9.d.i	Conduct District aquatic herbicide water quality monitoring to fulfill requirements of Statewide General NPDES Permit for Discharges of Aquatic Pesticides to Water of the United States.	Completed – Self-Monitoring Report was submitted January 23, 2006. Report cover page included in this section.	Feb 06	VMU
VII. Review and Revision of Work Plan				
Goal VII.A. *Implement a work plan that includes appropriate goals, actions, and monitoring mechanisms to reduce pesticide-related toxicity in urban runoff.*				
C.9.d.i	Review and continuously improve the goals, actions, and monitoring mechanisms of the work plan considering results of self-evaluations, comments from Regional Board staff and other interested parties, and results of local performance review meetings if any. (PS 10)	Completed – Goals, actions and monitoring mechanisms of the work plan were reviewed; effectiveness evaluation was conducted and improvements were included in the FY 2006-07 work plan.	June 06	SWQU

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

HIGHLIGHTS AND ACCOMPLISHMENTS

The District uses pesticides as one of the tools for pest management on its properties and facilities. The primary category of pesticides used is herbicides. Insecticides and rodenticides are used in small quantities. In all cases, pesticide products are used only after an assessment has been made regarding environmental, economical, and public health aspects of each of the alternatives. The District has always been proactive and conservative in the use of pesticides.

The District continues to implement a pesticide policy and an "Approved Pesticide List." Except for three products, the District's Approved Pesticide List met the criteria established in the District's Pesticide Policy for water quality, environmental and public health hazards. The District's policy

states "Category I and II pesticides may only be used if required to meet health and safety concerns or if mandated to maintain regulatory compliance such as dam safety." The three "Toxicity Category I" products, one herbicide and two rodenticides, were exempted from meeting the toxicity restriction due to the following factors:

1. They are integral in meeting the structural engineering requirements of the District's levee systems and dam safety program.
2. There are no practical alternatives at this time.
3. The toxicity and hazard exposure of these products applies only to the applicator at the time of application. These hazards are mitigated with protective clothing and eye protection which minimize the exposure hazard to the maximum extent.

The District believes that use of the less toxic products is beneficial to the environment and the health and safety of employees. The District's annual pesticide use summary report for calendar year 2005 is included in this section as Table 5.1.

The District began implementation of the arundo mitigation program in 2002. The eradication program has increased the District's use of some pesticides. The cut stump method of application minimizes the potential for environmental impacts. The District currently has a program for monitoring the water quality impacts of this work type.

The District continued the program in South County to control vegetation on levee roads, in right-of-ways, and on the top of banks. The District designated 2002 as the baseline year for measuring pesticide reduction. Several herbicides were reformulated in 2005, so the products were grouped by active ingredient. The District's Spartina (invasive species) mitigation program began using a different herbicide, Imazapyr, in FY 05-06. Baseline total for Imazapyr will be set at 2005 usage for future reports. A comparison of 2002 usage to 2005 usage shows the following decreases and increases by active ingredient (Table 5.2) and a comparison of 2004 usage to 2005 usages shows the following decreases (Table 5.3):

Ingredient	Baseline Reduction	Decrease From 2004
Chlorsulfuron	100.00%	0.00%
Clopyralid	96.61%	0.00%
Imazapyr	N/A	N/A
Oryzalin	17.65%	73.44%
Pendimethalin	50.14%	71.71%
Sulfometuron-Methyl	100.00%	100.00%
Triclopyr	57.26%	48.07%

Ingredient	Baseline Increase	Decrease From 2004
Glyphosate	25.51%	8.22%
Isoxaben	1.02%	28.04%
Non-Ionic Surfactant	11.00%	34.74%

R-11 was not used in FY 2005-06, but will remain on the list of approved pesticides for possible use in the future.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2005-06
PEST MANAGEMENT

Specifications were developed for Pest Control Operators (PCOs) contracted for District applications to use pest control methods consistent with the District's IPM Policy. PCOs are required to follow the District's IPM Policy, Best Management Practices, and Standard Operating Procedures; provide evidence of current IPM training, when requested; and provide monthly pesticide use reports. Implementation of the new specifications and a pesticide use tracking system began July 1, 2004.

ALTERNATIVE PEST MANAGEMENT PRACTICES

The District continued to integrate mechanical harvesting and non-toxic dye colorants with the use of algaecides and herbicides to manage algae at percolation ponds.

TRAINING/CERTIFICATION

Continuing education (CE) is required to maintain certification. Employees can obtain CEs through seminars sponsored by Pesticide Applicators Professional Association (PAPA), California Association of Pest Control Advisors (CAPCA), manufacturers and universities. CEs are tracked by PAPA/CAPCA and records can be obtained from their websites. All District employees prepare an Employee Performance Plan and County Agricultural Commissioner and the State Department of Pesticide Regulations certification and training requirements are included in individual Performance Plans. Performance Plan evaluations are conducted every January for all employees. Employees not meeting certification and training requirements contained in their Performance Plan may face disciplinary action or termination of employment.

Bi-weekly safety meetings are held that include IPM Policy, SOP and BMP training. Label training, hazardous spill response, symptoms of pesticide poisoning were some of the topics covered this past year.

BMP inspection checklists continue to be completed for both chemical and non-chemical vegetation management activities.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

District staff continued to purchase alternative products, where available, and to dispose of mercury-containing materials in accordance with applicable regulations.

District staff co-chairs the Santa Clara Basin WMI Guadalupe River Mercury TMDL Technical Workgroup and Stakeholder Workgroup. The workgroups identify opportunities to collaborate on technical studies to support TMDL development and implementation. The District staff continues to support and participate in the development of the SCB-WMI Watershed Action Plan.

[1] Notation is as follows: PS (Performance Standard), URMP (Urban Runoff Management Plan), NDII (New District Initiated Item), NPDES (NPDES Permit)

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2005-06
COPPER/NICKEL ACTION PLAN

HIGHLIGHTS AND ACCOMPLISHMENTS

Mercury Removal Projects and Programs Completed and Underway

Stream Maintenance Program

In 2005, routine sediment removal maintenance resulted in the disposal of 36,372 cubic yards of material, with 4,695 of this total from the creeks in the upper portion of the Guadalupe River Watershed. The total mercury removed from the system was 31 kg, with 27 kg from the Guadalupe River Watershed. Of this, 25 kg was from the removal of sediment from behind the Los Alamitos Drop Structure; this structure was identified in the Guadalupe River Watershed Mercury Study as a potential sink and source of mercury in suspended sediment during storm events.

Monitoring

The District has undertaken a monitoring program to evaluate water quality in Lake Almaden, Almaden Reservoir, Calero Reservoir, Guadalupe Reservoir and Stevens Creek Reservoir. Depth profile measurements of temperature, pH, conductivity, and dissolved oxygen were conducted monthly. In addition, water samples were collected from the epilimnion and hypolimnion for analyses of total and dissolved mercury, total and dissolved methyl mercury, ammonia, nitrate/nitrite, sulfate and phosphorus at Lake Almaden, Almaden Reservoir, Calero Reservoir, Guadalupe Reservoir and Stevens Creek Reservoir. Samples were also collected from the epilimnion for analyses for chlorophyll a. The purpose of this monitoring is to establish existing water quality conditions and seasonal variability prior to the implementation of management changes to reservoir operations.

Mercury Control Program

In March 2005, following completion of the District Guadalupe River Watershed Mercury Study, the District initiated three projects to control mercury in the Guadalupe River Watershed: Jacques Gulch Restoration, Reservoir Oxygenation, and Lake Almaden Aeration.

Jacques Gulch Restoration

Jacques Gulch is a tributary to Almaden Reservoir that drains approximately one-third of the reservoir watershed. A portion of this drainage includes a small tributary that drains a portion of the former New Almaden Mining District, which is now Almaden-Quicksilver County Park. The project will remove, cap, or control erosion of extensive mercury deposits in the tributary above its confluence with Jacques Gulch, and in Jacques Gulch above its confluence with Almaden Reservoir. This project will require planning, permitting and

construction, and is scheduled for completion in 2011. During the reporting period, the District completed a draft Engineer's Report for the project.

Reservoir Oxygenation

The Guadalupe River Watershed Mercury Study identified reservoirs as a significant source of methyl mercury that bioaccumulates in fish within the reservoirs and in downstream creeks. The study also demonstrated a correlation between the seasonal development of anoxia in the hypolimnion and increased methyl mercury concentrations. In 2006, the District has been going through a planning process and exploring design and build system for an oxygenation system for Calero Reservoir. The District intent is to install and operate a pilot oxygenation system to evaluate the multiple water quality benefits that would potentially be realized, including reduced methyl mercury production, improved fisheries, reduced ammonia and hydrogen sulfide production, improved water clarity, and improved taste and odor (Calero is source water for the District's drinking water treatment plant).

Lake Almaden Aeration

Lake Almaden is a former quarry that lies at the confluence of Guadalupe Creek and Los Alamitos Creek that drain Guadalupe and Almaden Reservoirs, respectively. Below this confluence is the Guadalupe River. This lake provides recreational amenities to the community, including swimming, boating, and fishing. The Guadalupe River Watershed Mercury Study identified the lake as a significant source of methyl mercury that bioaccumulates in fish within the lake and in fish downstream. In 2005, the District initiated a monitoring and sampling program to establish baseline water quality and fish tissue concentrations, and a project to design an aeration system for the lake. The District installed a pilot aeration system (Solar Bee) in May 2006 to improve water quality to evaluate the multiple water quality benefits that would potentially be realized, including reduced methyl mercury production, improved fisheries, reduced ammonia and hydrogen sulfide production, and improved water clarity.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2005-06
COPPER/NICKEL ACTION PLAN

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

The District, as an environmental steward, has several practices and activities in place that support copper and nickel pollution prevention. The District continues to distribute outreach materials at public events. The District also continues to have street sweepers clean facility streets and parking lots on a weekly basis. The District's website provides a carpool connection interactive map so an individual is able to search for carpoolers in the vicinity of one's home or even along the route an individual uses to get to work.

HIGHLIGHTS AND ACCOMPLISHMENTS

The District enacted a policy several years ago to have District vehicles washed and vacuumed at the existing covered wash rack that discharges through a clarifier to the sanitary sewer system. The District is very proactive in attempting to reduce traffic and pollutants caused by traffic. The district provides, free to employees, bicycle lockers, and reimburses staff for use of public transit for business purposes.

Per Trash Work Plan Rain delayed as creeks have been unsafe to wade. Work Began in May and will be completed by September.	March 06 Currently taking place.	SWQU Trash Team
C.2.a.		Provide Program staff with information on trash management practices implemented in their jurisdictions, using standardized reporting format.	Completed	June 06	SWQU Trash Team

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

The District continues to focus a significant amount of resources on trash removal from the watersheds and the property within the District's jurisdiction. The Stream Water Quality Unit also conducted a limited study of trash hotspots using the SCVURPPP RTA protocol that was revised in the fall of 2005 and updated in the spring of 2006. Due to high stream flows through late May and June of 2006 only three assessments were completed in FY 2005-2006 however as of this writing the District will be conducting additional assessments over the next few weeks. The District continues to include litter prevention training in its school outreach programs as well as other outreach efforts associated with youth group field trips, etc. Please see the attached charts for further clarification of the trash data set.

HIGHLIGHTS AND ACCOMPLISHMENTS

It is very challenging for the District to identify individual responsible parties for many of the illegal dumping activities that occur in the creeks of the county. Since the District has no police powers and no land use authority our ability to penalize polluters and protect the environment

[1] Notation is as follows: PS (Performance Standard), URMP (Urban Runoff Management Plan), NDII (New District Initiated Item), NPDES (NPDES Permit)

proactively rather than retroactively is virtually non-existent outside of our extensive public and educational outreach activities. Homeless encampments are one of the primary sources of trash being directly deposited to the riparian corridor. With these limitations in mind the District dispatches maintenance crews to provide frequent and routine creek cleanup for trash, and debris, in District waterways. Some of this material is deposited in creek channels and constitutes illegal dumping but is not reported to District hazmat or code enforcement staff due to the inability to establish an individual source or responsible party. In the spring of 2006 the District formed an internal focus group made up of water quality and field maintenance staff and various managers to better strategize how to identify root causes and sources of trash and how to reduce the load of trash to the creeks. This group is an outcome of the District's ISO process.

During FY 05-06, The District's Clean, Safe Creeks Natural Flood Protection Program, Good Neighbor component removed and disposed of approximately 10,248 cubic yards of trash and debris from county waterways. Last year a total 10,002 cubic yards of trash and debris was removed. This year's breakdown by watershed is as follows; Guadalupe watershed 4,179 cubic yards (41%), Coyote watershed 1,999 cubic yards (19%), West Valley watershed 1,790 cubic yards (18%), Lower Peninsula watershed 1,161 cubic yards (11%), and Uvas Llagas watershed had 1,120 cubic yards (11%). The Guadalupe watershed Good Neighbor Program continues to conduct monthly homeless encampment clean up activities. The Good Neighbor Program coordinates with the Santa Clara County Department of Corrections to utilize inmate labor for some of the creek cleanup activities. The San Jose Conservation Corp labor is also utilized extensively during many of the trash removal operations. The Adopt-A-Creek program also supports trash removal from adopted sections of various creeks and this program is highlighted in the PIP activities section of the Annual Report.

The watersheds most affected by homelessness and illegal dumping are the Guadalupe and Coyote Watershed. The District constantly is utilizing its limited staff and financial resources to clean up these areas. The District works closely with the City of San Jose on trash and homelessness issues that challenge both agencies. Annually the District and the City of San Jose clean up three large trash accumulation sections of the Coyote Creek or the Guadalupe River as part of a Trash Memorandum of Understanding between the City of San Jose and the District. This benefits the local habitat by removing the trash before the next round of winter storms and preventing the material from being redistributed throughout the lower watershed. Additionally the District has a significant number of regular trash clean up locations within each watershed where streets, roads, expressways and highways cross waterways where trash tends to accumulate. The District also is a co-chair of the SCVURPPP Trash Ad Hoc Task group that works on assessment of trash issues as well as initiating installation of trash reduction best management practices.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

The District operates 3 office buildings, 3 water treatment plants, 2 pumping and metering stations, 1 pump station, 1 corporation yard, 1 warehouse storage and supply facility, and 2 storage yards. Although the District operates one Corporation Yard, the District has Storm

[1] Notation is as follows: PS (Performance Standard), URMP (Urban Runoff Management Plan), NDII (New District Initiated Item), NPDES (NPDES Permit)

Water Pollution Prevention Plans (SWPPPs) for all 5 facilities. In FY05-06 several SWPPPs were re-written and are currently under final peer review.

HIGHLIGHTS AND ACCOMPLISHMENTS

BMPs were formally inspected quarterly during non-stormwater observations at all District facilities except Coyote and Pacheco Pump Stations. The pump stations do not warrant non-stormwater observations due to the low potential for these types of discharges to occur. The Corporation Yard culvert inlet protection device (constructed of cinderblocks filter fabric and washed gravels) was evaluated and is in need of repair a work order for the repairs has been submitted and the repairs will be completed in Fall 2006. Other BMPs are working effectively, as noted on the non-stormwater observation forms submitted. Storm drain inlets at the Corporation Yard were cleaned out in the Fall of 2005.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

HIGHLIGHTS AND ACCOMPLISHMENTS

The District maintains over 700 miles of stream channels to provide flood protection for the Santa Clara County communities. Under the Multi-Year Stream Maintenance Program (SMP) the District removes sediment, provides for erosion protection, and conducts vegetation management activities. Minor maintenance activities include trash removal, fence and access repair, maintenance of revegetation sites, and removal of downed trees or other blockages from the streams. During FY 05-06, the District removed 42,084 cubic yards of sediment and completed bank protection projects totaling 6,345 linear feet.

Annual SMP archeology awareness and BMP training was conducted on June 5, 2006 and 72% of District employees from the Watershed Field Operations Units, Watershed Program Support Units, Ecological Services Unit, and Regulatory Compliance Unit received the training (59 employees). In addition, 12 staff from the Vegetation Management and Watershed Business Management Units also attended.

[2] Notation is as follows: PS (Performance Standard), URMP (Urban Runoff Management Plan), NDII (New District Initiated Item), NPDES (NPDES Permit)

BMP training evaluation forms were distributed during the training session and attendees were asked to complete them before leaving. All training sessions were rated excellent or good by the respondents. Suggestions for improving the training will be incorporated into next year's training.

The annual Lessons Learned meeting with the regulatory agencies and stakeholders was held in February 2006. Internal lesson learned meetings were held prior to the February regulatory meeting.

BMP inspection checklists continued to be used for sediment removal and bank protection projects and for chemical and non-chemical vegetation management activities. The checklists provide documentation of BMP implementation at the SMP projects, inspection of the BMPs, and track any adjustments made to BMP implementation.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

The District will share water quality monitoring data and information from capital improvement projects and stream maintenance projects with the Program.

HIGHLIGHTS AND ACCOMPLISHMENTS

Coordinate Regional Monitoring Efforts of BASMAA, SCVURPPP, WMI, and District

The District URP staff attended program and regional monitoring work group meetings including SCVURPPP Monitoring Ad-Hoc Work Group, BASMAA Monitoring Committee, WMI Assessment Subgroup meetings, and TMDL work group meetings (PCB, mercury, sediment), to identify opportunities for coordination and collaboration of monitoring activities. District staff participated in the Monitoring Ad Hoc Workgroup meetings and worked with the Program to share monitoring data. District staff reviewed and commented on Program monitoring work plans, monitoring reports, and assessments.
The District has dedicated as significant resources to work on the Guadalupe Watershed Mercury study and proposed TMDL. The District has also dedicated staff time to comment on the San Francisco Bay Mercury TMDL.

San Francisquito Creek Sediment Project

In fiscal year 2005-2006 the District fulfilled its commitment of sponsoring, through funding and technical oversight, the Aquatic Habitat and Limiting Factors Assessment (AHALFA) of San Francisquito Creek as a follow up to the “San Francisquito Creek Watershed Sediment Analysis Final Report” and “San Francisquito Creek Watershed Existing Conditions Analysis Final Report” that were completed two years ago. The goal of the AHALFA was to determine what, if any, factors limit current Steelhead habitat and, if so, what linkages may or may not be made to the creek’s designation as impaired by sediment under Clean Water Act Section 303(d). The AHALFA project was developed with Regional Board participation in an Expert Advisory Panel to support the watershed analysis provision of the NPDES permit. The primary issue in the development of the TMDL is the implied degradation of steelhead spawning habitat for which sediment deposition and decrease in flow conveyance may be a contributing factor. This study indicated that a lack of sufficient overwintering habit and gravel imbeddeness are the most significant limiting factors to steelhead populations in San Francisquito Creek.

Upper Penitencia Creek Limiting Factors Analysis

The District assisted with the Upper Penitenicia Limiting Factors Analysis by providing information on the operations of the diversion structures for the percolation ponds as well as by providing information on other water utility operations pertinent to Upper Pennitencia creek. The District also provided significant information on the fisheries condition in the watershed. The District completed a review of the document and also convened a meeting of managers and operations staff to respond to the Regional Boards questions on the first draft of the document.

Saratoga Creek Watershed Assessment

The District has been working with the Program to provide fish scale analysis of the fish that have been collected for the Saratoga Creek Watershed Assessment. The District has also been working with the Program to ensure that Program staff collect samples from only public owned sites.

Wells and Water Production Unit Activities

District inspections ensure compliance with the District Well Ordinance and State Well Construction and Destruction Standards and ensure proper handling of drilling wastes. Since its inception in 1979, the Wells and Water Production Unit (WWPU) has issued approximately 53,500 well permits and has inspected nearly 49,000 wells in Santa Clara County. In FY 04-05, approximately 2,000 permits were issued and nearly 1,500 wells were inspected. Wastes that may be generated from well drilling and destruction operations include the following: drill cuttings, soils, debris (wood, bricks, cement, refuse, etc.), gray water (fluids laden with typically high pH sealing materials), cement (wet or dry), turbid water, turbine oil, fuel, hydraulic fluids, and lubricating oils.

Water Quality Index-Guadalupe Watershed Pilot Project.

In the fall of 2004 the Stream Water Qualtiy Unit implemented a study of general water quality monitoring in the Guadalupe Watershed to compare the watershed to other studies taking place in the country. This study was both time consuming and initially costly to conduct in labor hours. This study has just completed the collection of the fourth round (2 years) of sample collection in the Guadalupe River watershed. The study has completed its first round of sampling in the Stevens Creek and Coyote Creek watersheds. At the tidal sites both a high tide and a low tide sample are collected. A summary of the Water Quality Index is attached from the National Sewer Foundation website for review and a description of parameters assessed.

From the NSF International website:

In an effort to develop a system to compare water quality in various parts of the country, over 100 water quality experts were called upon to help create a standard Water Quality Index (WQI). The index is basically a mathematical means of calculating a single value from multiple test results. The index result represents the level of water quality in a given water basin, such as a lake, river, or stream.

To determine the WQI, the following nine water quality parameters are measured:

- **Biochemical Oxygen Demand**
  The Biochemical Oxygen Demand (or BOD) is a measure of the amount of food for bacteria that is found in water. Bacteria utilize organic matter in their respiration and remove oxygen from the water. The BOD test provides a rough idea of how much biodegradable waste is present in the water. (Biodegradable waste is usually composed of organic wastes, including leaves, grass clippings, and manure).
- **Dissolved Oxygen**
  The dissolved oxygen test measures the amount of life-sustaining oxygen dissolved in the water. This is the oxygen that is available to fish, invertebrates, and all other animals living in the water. Most aquatic plants and animals need oxygen to survive; in fact, fish will drown in water when the dissolved oxygen levels get too low. Low levels of dissolved oxygen in water are a sign of possible pollution.
- **Fecal Coliform**
  Fecal coliform is a form of bacteria found in human and animal waste.
- **Nitrates**
  Nitrates are a measure of the oxidized form of nitrogen and are an essential macronutrient in aquatic environments. Nitrates can be harmful to humans, because our intestines can break nitrates down into nitrites, which affects the ability of red blood cells to carry oxygen. Nitrites can also cause serious illnesses in fish.
- **pH**
  The pH level is a measure of the acid content of the water. Most forms of aquatic life tend to be very sensitive to pH. Water containing a great deal of organic pollution will normally tend to be somewhat acidic. Water with a pH of 7 is considered neutral. If the pH is below 7, it is classified as acidic, while water with a pH greater than 7 is said to be alkaline. The pH of tap water in the U.S. is usually between 6.5 and 8.5.
- **Temperature Change**
  The water temperature of a river is very important, as many of the physical, biological, and chemical characteristics of a river are directly affected by temperature. Most waterborne animal and plant life survives within a certain range of water temperatures, and few of them can tolerate extreme changes in this parameter. Using the same thermometer, the water temperature should be

checked at the test site and at a similar site one mile upstream. Care should be taken when taking the temperature upstream to ensure that the amount of sunlight and the depth of the river are similar to the original test site.

- **Total Dissolved Solids**
  This is a measure of the solid materials dissolved in the river water. This includes salts, some organic materials, and a wide range of other things from nutrients to toxic materials. A constant level of minerals in the water is necessary for aquatic life. Concentrations of total dissolved solids that are too high or too low may limit growth and lead to the death of many aquatic life forms.
- **Total Phosphate**
  Phosphates are chemical compounds made from the elements phosphorous and oxygen; they are necessary for plant and animal growth. Phosphates can be present in water in many forms, so total phosphate gives an estimate of the total amount of phosphate potentially available in a given water supply.
- **Turbidity**
  Turbidity is a measure of the dispersion of light in a column of water due to suspended matter. The higher the turbidity, the cloudier the water appears. If water becomes too turbid, it loses the ability to support a wide variety of plants and other aquatic organisms.

After the nine water quality tests are completed and the results recorded, a "Q" value is calculated for each parameter, and the overall WQI for the sampling site is then calculated.

It is important to monitor water quality over a period of time in order to detect changes in the water's ecosystem. The Water Quality Index can give an indication of the health of the watershed at various points and can be used to keep track of and analyze changes over time.

What Does the WQI Mean?

The Water Quality Index uses a scale from 0 to 100 to rate the quality of the water, with 100 being the highest possible score. Once the overall WQI score is known, it can be compared against the following scale to determine how healthy the water is on a given day.

Table I - WQI Quality Scale	
91-100:	Excellent water quality
71-90:	Good water quality
51-70:	Medium or average water quality
26-50:	Fair water quality
0-25:	Poor water quality

Water supplies with ratings falling in the good or excellent range would able to support a high diversity of aquatic life. In addition, the water would also be suitable for all forms of recreation, including those involving direct contact with the water. Water supplies achieving only an average rating generally have less diversity of aquatic organisms and frequently have increased algae growth.

Water supplies falling into the fair range are only able to support a low diversity of aquatic life and are probably experiencing problems with pollution. Water supplies that fall into the poor category may only be able to support a limited number of aquatic life forms, and it is expected that these waters have abundant quality problems. A water supply with a poor quality rating would not normally be considered acceptable for activities involving direct contact with the water, such as swimming.

The results of the District WQI pilot project to date are summarized in the Figures 9-1, 9-2, 9-3 and 9-4 in this section of the report. As one can see from the attached charts the water quality was of good quality and approached excellent at many locations in the various watersheds. Another round of sampling should give us enough data to determine any significant differences in between the spring and fall water quality but at this time any further analysis is purely speculative. The District looks forward to continueing this study over the next year to complete two full cycles of sampling to identify the usefulness of this form of analysis to rate, in a simplified manner, the water quality within other watersheds in Santa Clara County.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2005-06
STAFF TRAINING

RESPONSE TO REGIONAL BOARD COMMENTS

No comments from the Regional Board were received on this section of last year's annual report.

HIGHLIGHTS AND ACCOMPLISHMENTS

Storm Drain Operation & Maintenance/Storm Water Pollution Prevention Plans

On June 7, 2006 training was completed for 7 individuals responsible for implementing Storm Drain inspections at the various District facilities. Staff was directed to each facility's Storm Water Pollution Prevention Plan (SWPPPP) for a summary of activities that should be taking place at each facility to protect storm water from collecting any contaminants along its path to the local waterway.

Water Utility Discharge Pollution Prevention

Annual refresher training was held on May 31, 2006 for twenty District staff members who work with water utility discharges. Participants included staff from the following District units Operations, Planning & Analysis, Utility Raw Water Operations, Utility Treated Water Operations, Groundwater Management, Infrastructure Planning, Utility Maintenance, Process Engineering, Water Quality Infrastructure Planning, and Lower Peninsula West Valley Watershed Field Operations. Workshop topics included: Why Pollution Prevention Matters (Environmental Impacts, Potential Pollutants and Sources, Regulatory Requirements, District Performance Standards), Water Utility Discharge Pollution Prevention Guidance Manual Overview, Roles and Procedures, BMP Implementation, Dechlorination, and Reporting and Tracking.

Construction Inspection Training

Construction Inspection Training for 20 District staff was completed on March 27, 2006. The training included staff from the District's Capital Programs Units again this year. Five staff from the Construction Engineering Unit (100%) and 15 staff from the Construction Inspection Unit (100%) attended the training.

Flood Control/Channel Maintenance Activities

Annual SMP archeology awareness and BMP training was conducted on June 5, 2006 and 72% of District employees from the Watershed Field Operations Units, Watershed Program Support Units, Ecological Services Unit, and Regulatory Compliance Unit received the training (59 employees). In addition, 12 staff from the Vegetation Management and Watershed Business Management Units also attended.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2005-06
STAFF TRAINING

BMP training evaluation forms were distributed during the training session and attendees were asked to complete them before leaving. All training sessions were rated excellent or good by the respondents. Suggestions for improving the training will be incorporated into next year's training.

New Employee Training

All new employees watch the video "I Am Water" during employee orientation. This 11 minute video discusses the water cycle, drinking water sources and treatment, groundwater recharge and contamination, subsidence, water recycling, water quality, urban runoff pollution, flooding, and the District's education program. Due to hiring freeze, new employee orientation was suspended during FY 05-06 and will restart in FY 06-07.

Other Staff Training

Due to the State of California's unanticipated Education Revenue Augmentation Fund (ERAF) tax shift which diverted $52 million dollars of the District's property tax revenues to the State coffers, the District reduced all out of state conferences, and training opportunities as well as reduced individual training budgets for each employee 2005-2006. Though District staff attended fewer storm water pollution prevention training classes in 2005-2006 we anticipate and increase in the number of District staff that will be trained in various areas of expertise in 2006-2007 as numerous training opportunities have been identified at various locations within California.

Below is a list of staff training that was completed that has an impact on improving storm water quality and pollution prevention.

One District staff attended HEC-RAS July 13-15, 2005.

One District staff authored and presented a paper on Design for Stream Restoration and as well as attended session on stream restoration at StormCon 2005, July 18-21, 2005.

One District staff attended the National Association of Flood and Stormwater Management Association Conference August 21-25, 2005.

One District staff attended the Urban Water Conference August 24-25, 2005.

One District staff conducted a 4 hour seminar on Erosion and Stream Stability at the Flood Management Conference in Sacramento, September 6-9, 2005, and presented a paper on the Adobe Upper Reach 5 Design.

Two District staff attended HAZWOPER 8-hour Refresher in October 2005 and one staff attended in April 2006.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2005-06
STAFF TRAINING

One District staff authored and presented three papers at the Water Environment Federation Annual Conference (WEFTEC 2005) in Washington DC, October 29 – November 2, 2005, and attended various sessions including Water Quality, Watershed and TMDL.

One District staff attended the Pest Management Seminar on November 30, 2005.

10 District staff attended How Creeks Affect Development; How Development Affects Creek on December 7, 2005.

One District staff attended HazWaste Management in California December 13-14, 2005.

One District staff attended DOT Hazmat Training on December 15, 2005.

Two District staff attended Applied Fluvial Geomorphology January 23-27, 2006.

Two District staff attended the Environmental Connection Erosion Control Conference February 20-24, 2006.

One District staff attended South Bay Salt Pond Social Dimensions of Restoration workshop on April 18, 2006.

One District staff attended South Bay Science Symposium in June 2006.

Executive Officer
San Francisco Bay Region
Regional Water Quality Control Board
1515 Clay Street, Suite 1400
Oakland, CA 94612

Subject: Submittal of FY 2006-2007 Annual Report

Dear Mr. ~~Wolfe~~ Bruce:

I am pleased to submit the Annual Report for implementation of the Santa Clara Valley Urban Runoff Pollution Prevention Program's (SCVURPPP's) Urban Runoff Management Plan (URMP) during fiscal year 2006-2007. Submittal of this Annual Report fulfills Provision C.6 of NPDES Permit No. CAS029718 (Order 01-024 as amended). The report provides documentation of the SCVURPPP's and the Co-permittees' activities; evaluation of the effectiveness of these activities; and measures for continuous improvement toward achieving the SCVURPPP goals.

Sections 1 and 2 of the Annual Report describe activities conducted by the SCVURPPP on behalf of the Co-permittees, in the areas of program management, permit management and continuous improvement. Section 3 contains information on the Program's local and regional public information/participation program including the Watershed & Outreach efforts coordinated with the Santa Clara Basin Watershed Management Initiative (SCBWMI). Section 4 contains information on the Program's two pronged monitoring approach covering: environmental monitoring and assessment, and programmatic monitoring for FY-06-07. Section 5 covers the Program's watershed management measures including the work that Program and Co-permittees have conducted to both support the SCBWMI and integrate both efforts. Section 6 covers the Program's pesticide management activities to comply with Provision C.9.d.and Section 7 contains a report of the Program's Mercury Pollution Prevention Activities conducted during FY 06-07 per Provision C.9.c

Section 8 describes the Program's efforts during FY 06-07 to assist Co-permittees in addressing and controlling development and re-development as it relates to stormwater quality and flow through the development project planning, review and approval process, per Provision C.3. Section 9 contains the Co-permittees' IND and IC/ID Summary Tables for FY 06-07. Co-permittee summary tables are also included in each Co-permittee Annual Report and contain similar information to what is found within Section 9 of the Program's *FY 05-06 Annual Report*.

1410 Jackson Street • Oakland, CA 94612 • tel: (510) 832-2852 • fax: (510) 832-2856
1-800-794-2482

Section 10 (bound in two separate volumes) contains the Co-permittees' FY 06-07 Annual Reports, prepared in accordance with the Water Board staff document entitled *Suggested SCVURPPP Co-permittee Annual Report Format* (Draft) dated May 29, 2003. Each Co-permittee Annual Report includes a cover letter summarizing local program highlights, accomplishments and continuous improvement items; and a certification statement.

In FY 06-07, the Program and Co-permittees received three national awards in recognition of their excellent stormwater management programs and efforts. They include the following: USEPA 2006 Clean Water Act Recognition Award for Stormwater Management (Municipal); National Association of Environmental Professionals (NAEP) National Environmental Excellence Award for Education Excellence; and the FY 05-06 National Association of Flood and Stormwater Management Agencies (NAFSMA), Excellence in Communication Award, Third Place, for Improving Water Quality.

In October 2006, the Program sponsored an awards program for exemplary site designs to protect water quality. This awards program recognizes Santa Clara Valley's public agency and private development community leaders who are solving site design challenges, reducing stormwater pollution and runoff quantity, and meeting the requirements of the NPDES permit. The 2006 award winners included:

- Exemplary Public Project (Large Site) – Tully Library, City of San Jose;
- Exemplary Public Project (Small Site) – Alum Rock Library, City of San Jose;
- Exemplary Private Project (Residential) – Willow Glen Reflections, DKB Homes and City of San Jose;
- Exemplary Private Project (Institutional) – Congregation Sinai Facility, Congregation Sinai and City of San Jose.

Please contact me if you have any comments or questions. We look forward to working with you to successfully address new challenges during FY 07-08.

Very truly yours,

Adam

Adam W. Olivieri, Dr. P.H., P.E.

CREDITS

This Annual Report was a collaborative effort of the fifteen agencies participating in the Santa Clara Valley Urban Runoff Pollution Prevention Program (Program). EOA, Inc., as the Program management consultant, coordinated and compiled the Annual Reports submitted by the fifteen Co-permittees, wrote Sections 1 through 9, and was responsible for the overall preparation of the Program's Annual Report. The Program expresses its appreciation to all those who contributed to this seventeenth Annual Report.

Management Committee Voting Members

Palo Alto -- Joe Teresi

Campbell – Al Oxonian

Milpitas – Kathleen Phalen

Saratoga – John Cherbone

San Jose – Melody Tovar

Cupertino -- Lavenia Millar

Santa Clara -- Rick Mauck

Los Altos – Larry Lind

Sunnyvale – Lorrie Gervin

Los Altos Hills – Richard Chen

Monte Sereno – Brian Loventhal

Mountain View -- Eric Anderson

Santa Clara County -- Steve Homan

Los Gatos – Kevin Rohani

West Valley Communities – Cheri Donnelly

Santa Clara Valley Water District – Dave Chesterman, Chair

SECTION 1

INTRODUCTION

1. INTRODUCTION

BACKGROUND

Program Description

The Santa Clara Valley Urban Runoff Pollution Prevention Program ("Program") is an association of thirteen cities and towns in Santa Clara Valley, the County of Santa Clara, and the Santa Clara Valley Water District ("Co-permittees") that share a common permit to discharge stormwater to South San Francisco Bay. The Program incorporates regulatory, monitoring and outreach measures aimed at reducing pollution in urban runoff to the "maximum extent practicable" to improve the water quality of South San Francisco Bay and the streams of Santa Clara Valley. The Program is organized, coordinated, and implemented in accordance with a Memorandum of Agreement (MOA) signed by the Co-permittees in 1990, 1999, 2005 and 2006. The MOA covers the responsibilities of each Co-permittee and a cost-sharing formula for joint expenditures.

In June 1990, the San Francisco Bay Regional Water Quality Control Board (Water Board or RWQCB) issued the Program its first NPDES permit.[1] The permit was reissued in 1995[2] and 2001.[3] On October 17, 2001, the Water Board amended the permit[4] to include expanded requirements for controlling pollutants from new and redevelopment activities (Provision C.3.). On July 20, 2005, the Water Board approved a second amendment which revised Provisions C.3.c. and C.3.f.[5]

The Program's Management Committee, consisting of one designated representative from each Co-permittee, is the official decision-making body for the Program. At the inception of the Program, the Santa Clara Valley Water District took the lead responsibility for management of the Program. In September 1997, the Management Committee retained EOA, Inc. to provide Program management services and designated the District as the Program's fiscal agent. On July 1, 2005, the City of Sunnyvale became the Program's new fiscal agent.

The Program's Urban Runoff Management Plan

The Program and Co-permittees submitted a *Storm Water Management Plan* (SWMP) as part of the application for its 1995 NPDES permit renewal. The 1995 Permit required the Program to develop performance standards[6] for various stormwater control measures and incorporate them in a revised management plan by September 1, 1997. The revised plan, called the *Urban Runoff Management Plan* (URMP) because of its focus on stormwater pollution prevention efforts in urban areas, was completed and submitted to the Water Board on September 1, 1997 and subsequently approved by Water Board staff (7/10/98 and 12/14/98 letters). In addition, the URMP is incorporated into the urban runoff permit. In 2000 and 2005, updated URMPs were submitted to the Water Board as part of permit renewal applications.

---

[1] NPDES Permit No. CAS029718, Order No. 90-094.
[2] NPDES Permit No. CAS029718, Order No. 95-180 (as amended 7/21/99).
[3] NPDES Permit No. CAS029718, Order No. 01-024 (2/21/01).
[4] NPDES Permit No. CAS029718, Order No. 01-119, Amendment Revising Provision C.3. (10/17/01).
[5] NPDES Permit No. CAS029718, Order No. R2-2005-0035, Amendment Revising Order 01-119 (7/20/05).
[6] Performance standards are defined as "the level of implementation necessary to demonstrate control of pollutants in stormwater to the maximum extent practicable."

The URMP consists of an area-wide plan and individual Co-permittee plans describing what the fifteen Co-permittees will do, collectively and individually, to reduce urban runoff pollution. The URMP describes the goals and objectives of the Program and its various elements, including monitoring and watershed management measures.

The URMP also contains model performance standards that may be modified as appropriate to fit local conditions and are implemented by the Co-permittees. These include:

- Illicit Connection and Illegal Dumping (IC/ID) Elimination Activities
- Industrial/Commercial Discharger (IND) Control Program
- Public Streets, Roads, and Highways Operation and Maintenance
- Storm Drain System Operation and Maintenance
- Water Utility Operation and Maintenance
- Planning Procedures for New Development and Redevelopment
- Construction Inspection
- Pest Management
- Rural Public Works Maintenance and Support

In addition, the URMP presents a framework for the relationship between Program area-wide and Co-permittee specific Public Information/Participation (PI/P) activities that the Program and Co-permittees use to develop and conduct PI/P tasks.

In early FY 04-05, Program staff updated the URMP to include the new and revised model performance standards and other Management Committee-approved multi-year plans (e.g., Guidelines for Reduction and Management of Mercury-Containing Products, revised Multi-Year Receiving Waters Monitoring Plan, Pesticide Management Work Plan, sediment assessment Work Plan, CAP/NAP approach, Trash Work Plan and goals statement, Watershed Education and Outreach strategy, etc.). The revised Program URMP was part of the NPDES permit reapplication package submitted to the Water Board on February 24, 2005.

The Program implements watershed management through its participation in the Santa Clara Basin Watershed Management Initiative (SCBWMI). The SCBWMI was established (by the EPA, State Water Resources Control Board and Water Board) to manage water resources within the Santa Clara Basin watersheds. Stakeholders that include local, state and federal government agencies; business, agriculture and industry associations; and environmental and civic groups guide the SCBWMI. The Program has been an active participant in the SCBWMI Core Group and its subgroups. The Program is working through the SCBWMI to: 1) identify and assess beneficial uses in the watershed within the urban area; and 2) identify and prioritize reasonable urban runoff control strategies.

Co-permittee Urban Runoff Management Plans

Each Co-permittee has developed an URMP tailored to its local characteristics. The Co-permittee URMPs contain strategies for local urban runoff controls, covering each of the Program elements (Industrial/Commercial Discharger Control, New Development and Construction, etc.) that are applicable to local conditions. The Co-permittee URMPs include:

- Performance standards (using the Program URMP's model performance standards as a template);
- Work Plans to implement performance standards;

- Description of the Co-permittee's legal authority;
- Best management practices (BMPs); and
- Standard operating procedures (SOPs) that detail how control measures will be carried out from day-to-day.

The Co-permittees also have responsibilities to conduct local PI/P programs, properly maintain corporation yards, conduct staff training and participate in Program and SCBWMI activities as appropriate.

The general relationship between the NPDES Permit, the Program's URMP and the Co-permittees' URMPs is shown on Figure 1-1.

In accordance with Permit Provision C.2.b., all Co-permittees updated their URMPs and submitted the revisions to the Water Board on September 1, 2004. The updated Co-permittee URMPs, which were part of the NPDES permit reapplication package submitted to the Water Board on February 24, 2005, included a summary table indicating what changes were made and/or what sections were added to the URMP's since the last version was updated in October 2000.

Program Work Plan

By March 1 of each year, the Program submits to the Water Board a draft Work Plan for implementation of the Program's URMP for the coming fiscal year, in accordance with NPDES Permit Provision C.6.b. The Work Plan includes clearly defined tasks, responsibilities and schedules to be implemented by the Program and Co-permittees. It also includes development of new, or modification of existing performance standards (Provision C.2.b), provides the Work Plan for implementing Provision C.3, describes planned monitoring activities (Provision C.7), describes pollutant-specific requirements (Provision C.9) and defines the Program's role relative to Watershed Management efforts (Provision C.10).

The Work Plan builds on the baseline efforts conducted by the Program and Co-permittees through a "continuous improvement" process, in which the Program seeks new opportunities to control stormwater pollution. The continuous improvement process contained in the URMP is illustrated on Figure 1-2. The Work Plan includes a discussion of continuous improvement tasks that were identified, in part, during individual Co-permittee performance reviews, effectiveness evaluations in previous annual reports, and cooperative efforts between the Program and groups that include the Bay Area Stormwater Management Agencies Association (BASMAA), SCBWMI, Regional Monitoring Program (RMP) and Clean Estuary Partnership (CEP).

On March 1, 2006, the Program's *FY 06-07 Work Plan* was submitted to the Water Board, and no comments have been received on that submittal. On March 1, 2007, the Program's *FY 07-08 Work Plan* was submitted to the Water Board. No comments were received on the submittals.

Program Annual Report

In accordance with NPDES Permit Provision C.6.a., the Program must submit an Annual Report by September 15 of each year. In addition, the Annual Report serves as an important internal Program tool in the cycle of planning, implementation, evaluation and continuous improvement. The Annual Report is the mechanism for documenting the status of planned activities,

evaluating the effectiveness of those activities and identifying potential improvements. An additional evaluation mechanism is holding local program performance review meetings with each of the Co-permittees. These meetings serve as external evaluations, while the Annual Report is a self-evaluation by the Program. The results of the Annual Report and the performance reviews are used to assist the Program and Co-permittees in revising their Work Plans for the following year, as part of the Program's continuous improvement process. During FY 06-07, Water Board staff did not conduct performance review meetings.

On September 15, 2006, the Program's *FY 05-06 Annual Report* was submitted to the Water Board. On July 18, 2007, the Program received a letter entitled *Review of SCVURPPP's FY 2005-06 Annual Report*. The Water Board staff review focused only on the New and Redevelopment section. Water Board staff found that section of the FY 2005-06 Annual Report to be acceptable (Shin-Roei Lee to David Chesterman, July 18, 2007). No responses are required.

The goals of this *FY 06-07 Annual Report* are to: 1) meet specific permit requirements for reporting; 2) provide an efficient mechanism for reporting and self-evaluation without duplicating information in the work plan or urban runoff management plans (URMPs); and 3) identify areas for continuous improvement.

ORGANIZATION OF REPORT

The *FY 06-07 Annual Report* consists of two volumes and one appendix placed in three-ring binders. Volume I will contain Program's activities and Volume II will consist of Co-permittees' activities. Each section contains relevant tables at the end of the section.

Following Section 1, Volume I of the *FY 06-07 Annual Report* describes the implementation of *FY 06-07 Work Plan* activities in the following sections:

FY 06-07 Annual Report	FY 06-07 Work Plan
Section 2 – Program Management	Program FY 06-07 Budget Performance Standard Revisions Program Continuous Improvement Tasks
Section 3 – Public Information/Participation (PI/P) Activities	FY 06-07 PI/P Work Plan
Section 4 – Monitoring	Multi-Year Year Receiving Waters Monitoring Plan FY 06-07 Annual Monitoring Plan
Section 5 – Watershed Management Measures	FY 06-07 Monitoring Plan (activities undertaken with/for the SCBWMI)
Section 6 – Pesticide Management	FY 06-07 Pesticide Management Work Plan
Section 7 – Mercury Pollution Prevention Activities	FY 06-07 Mercury Pollution Prevention Work Plan
Section 8 – New and Redevelopment Control Measures	FY 06-07 C.3. Work Plan

Section 9 contains the Co-permittees' IND and IC/ID Summary Tables for FY 06-07. Each Co-permittee summary table provides information on the required categories as described in the Industrial/Commercial Discharger Control Program and Illicit Connection & Illegal Dumping Elimination Activities Performance Standards. Co-permittee summary tables are also included in each Co-permittee Annual Report and will contain similar information to what is found within Section 9 of the Program's *FY 06-07 Annual Report*. Each Co-permittee includes a breakdown of the levels of enforcement action taken for each IND inspection.

Section 10 contains the Co-permittees' FY 06-07 Annual Reports. Each Co-permittee report includes a cover letter summarizing local program highlights, accomplishments and continuous improvement items; and a certification statement. Co-permittees have prepared and submitted the following information (with appropriate attachments) in accordance with the Water Board's document entitled *Suggested SCVURPPP Co-permittee Annual Report Format* (Draft) dated May 29, 2003:

- IC/ID Elimination Activities
- Industrial/Commercial Discharger Control Program
- Public Agency Activities
  - Public Streets, Roads and Highways O&M (including Corporation Yards)
  - Rural Public Works O&M
  - Storm Drain O&M
  - Water Utility O&M
  - Other Public Agency Activities (Golf Courses, Parks, Ponds, etc.)
- New Development Planning Procedures
- Construction Inspection
- Public Information and Participation
- Pesticide Management Activities
- Mercury Pollution Prevention Activities
- Copper Action Plan/Nickel Action Plan
- Trash Inventory and Management
- Water Quality Monitoring
- Staff Training Summary Table

Other elements that do not fall under the above categories (e.g., PCB Control Program (C.9.e.), Control Program for Sediment (C.9.f.) and Watershed Management (C.10.)) are provided by each respective Co-permittee conducting the activity.

Figure 1-1. Program Implementation

Figure 1-2
Continuous Improvement

SECTION 2

PROGRAM MANAGEMENT

2. PROGRAM MANAGEMENT

PROGRAM BUDGET

FY 06-07 Budget

The FY 06-07 Program Budget is summarized in Table 2-1. The budget of $3,287,618 represents approximately the same amount of funding as the FY 05-06 budget. The Program budget has been able to remain flat over the past five years while more work has been accomplished and additional fees and collaboration contributions (i.e., annual permit fee, BASMAA, RMP, CEP) have been paid. It is important to note that the Program funds collected from the Co-permittees represent only what is spent on Program-wide activities. It does not include what the Co-permittees are spending to implement controls within their jurisdictions.

FY 07-08 Budget

During FY 06-07, the FY 07-08 Budget was prepared by Program staff, reviewed and approved by the Budget Ad Hoc Task Group and the Management Committee, and submitted as part of the *FY 07-08 Draft Work Plan*. The total budget for FY 07-08 is $3,287,116. The Management Committee is concerned that permit fees and collaborative resource demands are increasing and are a significant percentage of the overall budget. As a result, these demands as well as the increased need for in-kind resources to participate in various regulatory programs continue to reduce the overall operating budget. Further, Co-permittees have the limited ability to increase current funding sources. The Management Committee is concerned that potential new permit requirements, as part of the Municipal Regional Permit (MRP), will be costly.

GENERAL PROGRAM MANAGEMENT ACTIVITIES

Management Committee Meetings

The Management Committee continues to meet monthly, on the third Thursday of the month from 9:00 a.m. to 12 noon, to discuss and make decisions regarding Program business. Agendas and supporting information were mailed and posted on the Program's website (www.scvurppp.org) approximately one week in advance of each meeting and handouts were presented at each meeting. The meeting agendas were posted at Sunnyvale City Hall at least 72 hours prior to each meeting and meetings were held in the City of Sunnyvale's West Conference Room. A list of current Management Committee representatives is provided as Appendix A-1 and is on the Program's website.

Ad Hoc Task Group and Work Group Meetings

In order to effectively manage the area-wide activities required by the NPDES permit, Ad Hoc Task Groups are formed by the Management Committee to address specific Program elements or major work items. These are groups of Co-permittee representatives and Program staff with expertise in the issue at hand. Once the Ad Hoc Task Group's assignment is completed to the satisfaction of the Management Committee, the group is disbanded. The Management Committee reviews the need for Ad Hoc Task Groups on a quarterly basis. Ad Hoc Task Groups may form smaller work groups with subsets of their members to focus on specific issues in more detail. The work groups bring information back to the overseeing Ad Hoc Task Group for decision making.

A Program management organizational chart showing current Ad Hoc Task Groups and work groups is provided on the Program's website. Ad Hoc Task Groups and work groups generally meet on an as-needed basis, although some establish a regular meeting schedule.

Table 2-2 presents a list of the FY 06-07 Ad Hoc Task Groups, their members and their accomplishments. These groups worked with Program staff to provide products or recommendations to the Management Committee. There were a total of 40 Ad Hoc Task Group (AHTG) and work group meetings held during the fiscal year. In addition, task group and work group products were often distributed for review and comment via electronic mail ("virtual meetings"), thus minimizing the number of actual meetings.

The Watershed Education and Outreach (WE&O) Ad Hoc Task Group defines the final work plans for and oversees the implementation of FY 06-07 PI/P projects. An evaluation of PI/P projects conducted during FY 06-07 is provided within Section 3, Table 3-1. During FY 06-07, five work groups formed under the WE&O AHTG were active: Pesticide User Outreach Work Group, Mercury Pollution Prevention Work Group, Script Review Work Group, Alviso Education Center Work Group and Schools, and Youth Education Outreach Work Group. In addition, two work groups formed under the C.3 Provision Oversight (C3PO) AHTG, the HMP Implementation Phase Work Group and the BMP O&M Verification Work Group, were active during FY 06-07, as described in Section 8.

Program Management Activities

Program management activities provided by Program staff during the period July 1, 2006 through June 30, 2007 are summarized in Table 2-3. These tasks, which are discussed within the Annual Report, are separate from the permit management and technical support provided by Program staff. General types of activities completed during FY 06-07 include the following:

- Responded to calls on the Program's and Watershed Watch toll-free numbers and distributed materials to the public;
- Facilitated and supported Management Committee and Ad Hoc Task Group meetings;
- Developed the FY 07-08 Program Budget and tracked expenditures;
- Communicated with and assisted the Program's legal counsel;
- Prepared and submitted the Program's *FY 05-06 Annual Report, FY 07-08 Draft Work Plan* and other permit-required submittals;
- Provided guidance to Co-permittees on technical and Program-related issues;
- Conducted and/or assisted with three workshops relating to the interactions between urban/suburban activities and natural habitats; construction site planning and management; and implementing stormwater requirements in new development and redevelopment projects.
- Continued to implement and/or track monitoring projects being performed by the Program, and developed the Program's FY 07-08 Monitoring Work Plan, including scopes of work for six FY 07-08 projects;
- Oversaw development and implementation of the Watershed Education & Outreach Campaign;
- Represented the Program at external organization meetings;
- Continued to oversee and/or assist with implementation of the Pesticide User Outreach and Mercury Pollution Prevention Outreach Plans; and
- Participated in the Regional Media Relations, Regional IPM Partnership and Regional Advertising Campaign projects (through BASMAA).

During FY 06-07, a significant amount of Program staff time was devoted to preparation of permit-required submittals, additional Water Board submittals and other Program-related work products. These activities are discussed in Section 2, Permit Management Activities. Additional details on completed Program management activities are provided in the memorandum entitled *Review of FY 06-07 Program Management Services* within Appendix A-2.

External Organization Meetings

Program staff represented the Program at 161 external organization meetings during FY 06-07. These included meetings of the following organizations (Program staff positions indicated in parentheses):

- Bay Area Stormwater Management Agencies Association (BASMAA) – Executive Board (Vice Chair), New Development Committee, Media Relations Committee, Stormwater Treatment BMP Design Tool Work Group, Regional Advertising Campaign, and meetings related to the Municipal Regional Permit;
- Regional Monitoring Program Technical Review Committee, Steering Committee, Contaminant Fate Work Group and Sources, Pathways and Loadings Work Group;
- Clean Estuary Partnership Technical Committee, Mercury Risk Reduction Work Group and PCBs Work Group;
- Urban Pesticide Committee (UPC);
- Water Board Mercury Council;
- BASMAA/Water Board PCB Stakeholders Work Group;
- California Stormwater Quality Association (CASQA) – Board of Directors and Executive Program Committee;
- Bay Area Macro-invertebrate Bioassessment Information Network.

In addition, Program staff participated in 15 meetings relating to the Santa Clara Basin Watershed Management Initiative (SCBWMI). These included meetings of the following groups:

- Core Group
- Watershed Assessment and Monitoring Subgroup; and
- Land Use Subgroup.

Program staff prepared meeting summaries for the Management Committee highlighting items of interest and required action items. Summaries are routinely included in Management Committee mail-out and handout packets and posted on the Program's website. Tables listing all internal and external meetings attended during FY 06-07 are attached to the memorandum entitled *Review of FY 06-07 Program Management Services* within Appendix A-2.

Evaluation of Effectiveness

During FY 06-07, Program staff continued to implement policies and procedures related to consideration of funding requests, subcontracting, budget tracking and other improvements in Program management identified in past years. A significant amount of staff time during FY 06-07 was devoted to participation in the Municipal Regional Permit (MRP) development process; and preparation of permit-required submittals, additional Water Board submittals and other Program-related work products. Despite these resource needs, Program staff completed the

general Program management tasks on schedule. The Program budget development and mid-year and year-end reviews were completed within a reasonable timeframe.

The "Work Plan" for many of the Program management activities is the scope of work in EOA's contract for Program management services. Each year, Program staff prepares a self-audit report on Program management services, including significant accomplishments, continuous improvement for existing program elements and feedback regarding Program status, as required by Section 200.5 of the Program Bylaws. A draft of this year's report, *Review of FY06-07 Program Management Services,* was submitted to the Management Committee on March 20, 2007 and approved by the Management Committee on April 19, 2007. The final version of the *Review of FY06-07 Program Management Services* is provided in Appendix A-2.

Continuous improvement items related to Program management are normally identified from three sources: the Program's performance review with Water Board staff; Water Board staff comments on the prior year's Annual Report; and/or Management Committee comments on the draft *Review of Program Management Services* memorandum submitted each year. There were no continuous improvement items identified through these sources for FY 06-07. An update and plan of action for continuous improvement items remaining from previous years are presented within Table 2-4 of this Annual Report.

To satisfy Bylaws Section 200.4, Program staff prepared an *Annual Budget Review Compilation Report* ("ABC Report") that was submitted to the Management Committee as an addendum to the report on Program management services. The addendum contained the FY 05-06 budget, periodic budget status reports, mid-year budget reconciliation, final budget closeout balance sheet and other supporting documentation. The FY 05-06 Annual Budget Review Compilation Report ("ABC Report") was distributed (by electronic mail) to the Management Committee on October 9, 2006. The Management Committee approved the ABC Report on October 19, 2006.

PERMIT MANAGEMENT ACTIVITIES

This section describes tasks related to permit management (i.e., compliance with permit requirements and Co-permittee guidance) completed by Program staff during FY 06-07.

Reporting Requirements

In addition to the Program's Annual Report and Annual Work Plan[1], the Program completed the following permit-required items during FY 06-07:

1. *Upper Penitencia Creek Limit Factor Analysis Technical Report* (Final), per permit provision C.9.f.iii, submitted September 15, 2006.
2. *Copper and Nickel Action Plan FY 05-06 Accomplishments and FY 06-07 Work Plan*, submitted September 15, 2006, per POTW order 00-109 and permit provisions C.9.a and b.
3. *SCVURPPP FY05-06 Watershed Monitoring and Assessment Summary Report*, submitted September 15, 2006, per permit provision C.10.b.
4. *Copper and Nickel Action Plan FY 07-08 Work Plan and Reporting Tables* (Final), submitted March 1, 2007, per POTW order 00-109 and permit provisions C.9.a and b.
5. *FY 07-08 Annual Receiving Waters Monitoring Plan and Watershed Management Measures Work Plan* submitted March 1, 2007, per permit provisions C.7.c and C.10.

[1] To date, no comments have been received from the Water Board on the Program's *FY 06-07 Work Plan*.

Additional submittals to the Water Board included:

- Submitted letter entitled *Response to Water Board Staff Review of Upper Penitencia Creek Limiting Factors Analysis (LFA) Report* on August 23, 2006. The letter was in response to RWQCB comments (3/6/06 RWQCB electronic mail) on the Program's technical report entitled *Upper Penitencia Creek Limiting Factor Analysis Technical Report (Draft*).
- Submitted letter entitled *Response to Regional Board Staff Comments on SCVURPPP's FY 04-05 Annual Report* on September 12, 2006. The letter transmitted a compilation of the Co-permittees' responses to comments on the SCVURPPP FY 04-05 Annual Report provided by the RWQCB on July 26, 2006.
- Submitted *FY 05-06 Co-permittee Street Sweeping Activity Summary* on September 15, 2006 (as part of the Program's *FY 05-06 Annual Report*).
- Submitted *Summary of Co-permittee Street Sweeping Activities and estimated Mean Pollutant Load Reduction for Copper and Nickel- FY 2005- 2006* on September 15, 2006 (as part of the Program's *FY 05-06 Annual Report*).
- Submitted *Summary of Co-permittee Street Sweeping Activities and estimated Mean Pollutant Load Reduction for Lead and Zinc- FY 2005- 2006* on September 15, 2006 (as part of the Program's *FY 05-06 Annual Report*).
- Submitted *Trash Problem Area Evaluation Results- FY 05-06* (includes tables and figures) on September 15, 2006 (as part of the Program's *FY 05-06 Annual Report*).
- Submitted *Dioxin Control Program- FY 2005-2006 Activities* on September 15, 2006 (as part of the Program's *FY 05-06 Annual Report*).
- Submitted *Executive Summary- FY 2005-2006 Annual Repor*t to RWQCB on November 15, 2006.

A summary of the Program's permit-required submittals, Water Board staff comments, Program responses, and Water Board staff approvals during the past several years (beginning with the most recent submittals) is included within Appendix A-3.

Guidance to Co-permittees

The Program sponsored four workshops to educate Co-permittee staff and others about important issues and program requirements, as described below. The workshop flyers, agendas, attendance lists, and evaluation summaries for listed workshops are presented in Appendices A-4 through A-7.

<u>Construction Site Planning and Management Workshop</u>

On December 5, 2006, the Program sponsored training of agency staff on construction site management. The workshop, which attracted 109 participants, replaced those previously held by the San Francisco Estuary Project. Topics covered included: construction regulations and responsibilities, erosion and sediment control BMPs, non-stormwater discharge prevention, examples of good and bad construction site management practices and demonstration of erosion and sediment control products by vendors. Evaluation forms showed that the workshops were successful in educating attendees (see evaluation summary within Appendix A-4).

<u>Where San Jose Meets the Bay: Don Edwards National Refuge Walking Tour</u>
On December 6, 2006, the Program, in collaboration with the SCBWMI Land Use Subgroup, planned and held the workshop entitled ""Where San Jose Meets the Bay: Don Edwards

National Refuge Walking Tour". Information provided during the tour included: the interactions between urban/suburban activities and natural habitats; how salt marshes help restore water quality; effects of freshwater discharges on the Bay; and how to landscape with native plants. The workshop attracted 33 participants. Evaluation forms showed that the vast majority of participants gave the workshop high remarks (see evaluation summary within Appendix A-5).

Implementing Stormwater Requirements in New Development and Redevelopment Projects

On June 14, 2007, the Program conducted a one-day workshop to assist Co-permittees with implementation of Provision C.3. The workshop, which attracted 128 participants, was designed to address topics of interest to municipal and private planning/engineering staffs. The morning sessions presented case studies of implementation of C.3. on a variety of projects; an update on stormwater regulations; and an overview of the HMP cost estimating study (described in Section 8). The afternoon sessions focused on design, construction, experience and planting guidelines for bioretention systems; use of structural soils for street trees; and vector control considerations for stormwater treatment devices The workshop also featured exhibits for five stormwater control measure vendors. The agenda and evaluation summary for the workshop are presented within Appendix A-6.

Bay Area Hydrology Model (BAHM) Computer Training Workshop

On July 17, 2007, the Program co-sponsored two trainings (morning and afternoon sessions) on how to use to the Bay Area Hydrology Model (BAHM) software tool. This tool, which simulates pre and post-project hydrology, automatically sizes flow control facilities to meet HMP requirements. Clear Creek Solutions (CCS), the consulting firm who developed the BAHM, provided training which reviewed technical features of the BAHM, including required inputs and outputs; provided hands-on use of the BAHM for flow duration detention facilities; discussed project examples and provided tips and tricks for model use. The workshop attracted 43 participants. Evaluation forms showed that participants gave the workshop high remarks (see evaluation summary within Appendix A-7).

Other Workshops and Conferences

Program staff and Co-permittees also participated in the following workshops conducted by other agencies:

- CASQA Conference, Sacramento, CA, presentations by Jill Bicknell entitled "Regulatory Changes and BMP Design" (September 25, 2006); and "Bay Area Hydrology Model – A Tool for Analyzing Hydromodification Effects on Development Projects and Sizing Solutions" (September 26, 2006)
- CASQA Conference, Sacramento, CA, presentations by Chris Sommers entitled "A Systematic Approach to Evaluating Beneficial Use Condition and Stormwater Impacts on Receiving Waters" (September 26, 2006); "Development of a Protocol for Risk Assessment of Separate Stormwater System Microorganisms" (September 26, 2006); and "A Review of Treatment Controls for Microorganisms in Stormwater" (September 27, 2006),
- CASQA Conference, Sacramento, CA, presentation by John Fusco entitled "A Proactive Approach to Addressing Trash within the San Francisco Bay Area" (September 26, 2006);

- CASQA Conference, Sacramento, CA, presentation by Lucy Buchan entitled “A Novel Approach to Assessing Municipal Stormwater Impacts in the Context of all Watershed Influences” (September 26, 2006);
- CASQA Conference, Sacramento, CA, presentation by Paul Randall entitled “Is Stormwater Impairing Steelhead? Assessing Sediment Impacts on Aquatic Land Uses in Two Northern California Creeks (September 27, 2006);
- San Diego Regional Stormwater Co-permittees Hydromodification Plan Workgroup Meeting, presentation by Jill Bicknell entitled “Hydromodification Management Plan for Santa Clara Valley" (December 6, 2006);
- PIBA Workshop - Storm Water Regulatory Update; presentation by Jill Bicknell entitled "Local Storm Water Requirements for Industries and Businesses" (December 12, 2006);
- West Valley Clean Water Program MRP Meeting; presentation by Jill Bicknell entitled "Background on SCVURPPP and Permit Requirements for New and Redevelopment Projects" (December 19, 2006);
- Bay Area Macroinvertebrate Bioassessment Information (BAMBI) Workshop, Oakland, CA; presentations by Chris Sommers entitled “Benthic Index of Biotic Integrity (IBI) for San Francisco Bay Area Creeks-Project Update”; “Future of Bioassessment in the Bay Area: Drivers and Needs”; and “State of California Surface Water Ambient Monitoring Program: Status of SWAMP Redesign” (January 30, 2007);
- SCVWD Stream Protection, Restoration, and Erosive Forces Workshop; San Jose, CA, presentation by Jill Bicknell entitled "The Role of the Santa Clara Valley Urban Runoff Program in Stream Protection and Control of Erosive Forces" (January 31, 2007);
- Sacramento Stormwater Quality Partnership Hydrograph Modification Management Workshop, Sacramento, CA, presentation by Kristin Kerr entitled "Hydromodification Management Plan for Santa Clara Valley" (February 22, 2007)
- CASQA General Membership Meeting, San Jose, CA, presentation by Jill Bicknell and Kristy McCumby-Hyland (City of Sunnyvale) entitled “Conducting BMP Operation & Maintenance Verification Inspections: A County-wide Approach and Early Lessons Learned” (March 9, 2007).
- City of San Jose Construction Management Training, San Jose, CA, presentation by Jill Bicknell entitled "The New Construction General Permit - How Will It Affect Your Next Project?" (March 28, 2007).
- Santa Clara Valley Water District Board Meeting, San Jose, CA, presentation by Jill Bicknell entitled "The Role of the Santa Clara Valley Urban Runoff Program in Stream Protection and Control of Erosive Forces", Part of the Stream Protection, Restoration and Erosive Forces (SPREF) Presentation (April 10, 2007).
- BPC Decision Makers Conference, Oakland, CA, Adam Olivieri chaired roundtable discussion on Streams and Wetland Protection- Proposed New Rules (April 12, 2007).
- National Association of Environmental Professionals National Conference, Orlando, FL, presentation by Vishakha Atre entitled “Santa Clara Valley Urban Runoff Pollution Prevention Program Watershed Watch Campaign” (April 24, 2007).

Stormwater Management/Environmental Excellence Awards

In FY 06-07, the Program and Co-permittees received three national awards in recognition of their excellent stormwater management programs and efforts.

Clean Water Act Recognition Award

In September 2006, the Program received EPA's 2006 Clean Water Act Recognition Award, First Place, for Municipal Storm Water Management. No other awards were presented by EPA in the municipal category for 2006. Jill Bicknell, Program staff, accepted the award on behalf of the Program at the WEFTEC 2006 Annual Conference. In addition, Alexis Strauss, of USEPA Region IX, presented the award to the Management Committee at a Program-sponsored awards ceremony on October 30, 2006 (see awards ceremony program within Appendix A-8).

NAFSMA Excellence in Communication Award

The Program's Watershed Watch Campaign received the FY 2005-2006 National Association of Flood and Stormwater Management Agencies (NAFSMA), Excellence in Communication Award, Third Place, for Improving Water Quality. James Fiedler, Santa Clara Valley Water District, accepted this award on behalf of the Program at the NAFSMA 2006 Annual Meeting and Workshop.

NAEP Environmental Excellence Award

On March 7, 2007, the Program Manager was notified that the Program received the National Association of Environmental Professionals (NAEP) National Environmental Excellence Award for Education Excellence. The award recognizes the accomplishments of the Watershed Watch Campaign. Vishakha Atre, Program staff, and Rick Mauck, City of Santa Clara, accepted the award on behalf of the Program at the NAEP 2007 Annual Conference.

DEVELOPMENT OF NEW OR REVISED MODEL PERFORMANCE STANDARDS

The Program developed model performance standards (PS) in 1996. Model PS were accepted by the Water Board in June 1997. Co-permittees adopted the model PS that applied to their specific conditions. The PS were incorporated into the September 1, 1997 Urban Runoff Management Plan (URMP) and into the Co-permittees' local URMPs. The Program and local URMPs were updated by October 2000 to include revisions to performance standards for Industrial/Commercial Discharger Control, Illicit Connection/Illegal Dumping Elimination and Storm Drain Operation and Maintenance.

Priorities for recent efforts to revise or create new performance standards have been driven by the requirements in the Program's NPDES permit and/or continuous improvement tasks. All new or revised PS required by the permit have been completed. Future efforts to revise or update existing PS will be identified as part of the permit re-issuance.

LOCAL PROGRAM PERFORMANCE REVIEWS

As part of the Program's continuous improvement process (as described in the 2004 URMP), the Program, Water Board staff and interested outside parties conduct on-site performance reviews of the Co-permittees' local urban runoff management programs. Performance reviews in recent years have focused on one element of the Co-permittees' local programs in detail. Water Board staff did not conduct any performance reviews during FY 06-07.

CONTINUOUS IMPROVEMENT MEASURES

In its annual Work Plans and Annual Reports, the Program presents a list of continuous improvement items to be addressed at the Program level and an approach for implementing them. As discussed earlier under Program Management, continuous improvement items are normally identified from three sources: the Program's performance review with Water Board staff; Board staff comments on the prior year's annual report; and Management Committee comments on the *Review of Program Management Services* memorandum and other Program staff products.

Internal CI tasks identified include updating and maintaining the Program's web site (www.scvurppp.org) to ensure the effective distribution and review of draft and final products; and internal communication with the MC and other interested parties. In addition, Program staff has focused both technical and legal resources on working with Water Board staff (through BASMAA Board meetings and Water Board and Stormwater Subcommittee Workshops) on developing a Municipal Regional Permit that will address the Program's permit re-issuance. Finally, there are a few remaining lower priority continuous improvement tasks from previous years. Their status and updated schedules are provided within Table 2-4 of the *FY 06-07 Annual Report*. Program staff will continue to complete these items during FY 07-08.

PERMIT PROVISION C.1. COMPLIANCE SUMMARY TABLE

The State of California's and USEPA's 303(d) water quality list, approved in 1999, identifies several "pollutants of concern" in the Lower South San Francisco Bay for which urban runoff is listed as a potential source. Consistent with Provision C.1 of its NPDES Permit, the Program has prepared a "C.1. Table" which summarizes the urban runoff controls being implemented to address these pollutants of concern. Although not required by Provision C.1, Table 2-5 provides an update to Table 2-5 contained in the *FY 03-04 Annual Repor*t and, as required, addresses the direction received from Water Board staff with regard to certain items.

Table 2-5 provides an updated summary of the Program's current and proposed (i.e., FY 06-07) BMPs/programs for the "pollutants of concern" and "pollutants of potential concern" in the Lower South San Francisco Bay for which urban runoff is listed as a potential source. Although urban runoff is listed as a potential source, in reality urban runoff is the transport vehicle and not the actual source. Therefore, key urban sources of the "pollutants of concern" and "pollutants of potential concern" are identified in Table 2-5.

As noted in Table 2-5, additional information on the Program's controls/programs can be found in the following documents:

- Program and Co-permittee 2004 *Urban Runoff Management Plans*
- 1997 *Metals Control Measures Plan*
- Past Annual Report and Work Plans

- Pollutant-specific technical reports (www.scvurppp.org)

In addition, the Program intends to incorporate updates to the summary table as part of the Program's continuous improvement process where new controls/programs will be identified and reported in the Program's Annual Work Plan.

Table 2-1
SCVURPPP Total FY 06-07 Budget

Budget Summary

Item	Budget
Operational Group	
1. Program Management/Administration (EOA)	$454,168
2. Permit Management (EOA)	$492,496
3. Technical Program Management (EOA)	$143,000
4. Legal Services (MOFO)	$87,818
5. Fiscal Agent (City of Sunnyvale)	$50,000
6. RMP Contribution (SFEI) (see Collaborative Budget)	
Subtotal Operational Group	**$1,227,482**
Projects Group	
7. Monitoring Projects (EOA/Subs)	$880,000
8. HMP Technical Assistance/Guidance/Workshops	$160,000
9. PI/P & WEO budget	$383,200
10. Project Monitoring Special Study (10% per MOA – moved to Collaborative Group)	
11. NPDES Permit Renewal	$75,000
Sub-total Project Group	**$1,498,200**
Collaborative Group	
A. Program Monitoring Special Studies	$27,000
B. WE&O - Watershed Support Fund	$0
C. CASQA Dues (Regional Collaboration)	$15,000
D. TMDL CEP Participation (Regional Collaboration)	$97,000
E. RMP Fee (Regional Collaboration)	$168,480
F. BASMAA Fee (Regional Collaboration)	$85,000
G. WERF Dues	$8,000
Subtotal Collaborative Group	**$400,480**
NPDES Permit fee	**$161,456**
TOTAL FY 06-07 BUDGET	**$3,287,618**

Table 2-2
FY 06- 07 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
Budget – Close-out old budgets; review and approve proposed budgets; review and provide direction to the MC on budget & policy issues. Permit Provision: Program Management	Lorrie Gervin, Sunnyvale – Chair Melody Tovar, San Jose Steven Osborn, San Jose Rick Mauck, Santa Clara Cheri Donnelly, West Valley Communities Dave Chesterman, SCVWD Roger Narsim, SCVWD Jill Bicknell, Program staff Adam Olivieri; Program Staff	10/16/97		Reviewed and approved FY 07-08 budget; conducted mid-year FY 06-07 budget review and recommended adjustments to the MC. Reviewed and approved the Program Manager's Self-Audit Report. The Budget AHTG typically meets three times a year. A large amount of work (i.e., review of documents) is completed by electronic mail.
Monitoring* - Review & approve monitoring project priorities and products for consistency with Program and WMI goals, and with NPDES permit requirements. * Meets quarterly in concert with SCBWMI WAMS meetings. Permit Provision: C.7.	Marilyn Nickel, Milpitas Dave Grabiec, Sunnyvale Kristy McCumby-Hyland, Sunnyvale Chris Sommers, Program staff Jim Ervin, San Jose James Downing, San Jose Steven Osborn, San Jose Jan O'Hara, RWQCB Brett Calhoun, SCVWD Kate Slama, SCVWD Dave Chesterman, SCVWD Adam Olivieri; Program Staff	6/19/97		Met jointly with WMI Watershed Assessment and Monitoring Subgroup (WAMs) to provide input on FY 07-08 Receiving Waters Monitoring Plan, FY 06-07 Monitoring Results, and SSI and MDDB updates.

Table 2-2
FY 06-07 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
Municipal Employee Training Protocols – develop stormwater BMP training curriculum with modules for different activities that can be customized by each co-permittee. Permit Provision: C.2.	Kristy McCumby-Hyland, Sunnyvale Melody Tovar, San Jose Eric Anderson, Mountain View Roger Lee, Santa Clara John Fusco, Program Staff Kate Slama, SCVWD Cheryl Dayley, San Jose Cheri Donnelly, West Valley	4/15/99		Did not meet in FY 06-07.
PI/P and WEO – Develop list of proposed Program PI/P activities for annual work plan using process outlined in the PI/P Strategy, and work with Program staff and consultant to develop work plans for and implement the Watershed Education and Outreach (WEO) Campaign. Permit Provision: C.4. **(Work Groups under PIP/ WEO are:** Scripts Review Schools Outreach Alviso Education Program IPM Pesticide Outreach Mercury P2 Outreach HHW Program Work Group	Mary Morse, San Jose – Chair Cheri Donnelly, West Valley Communities Delia Romero, West Valley Communities Bruce Frisbey, San Jose Eric Anderson, Mountain View Karin Hickey, Santa Clara Sally Personett, Sunnyvale Lorrie Gervin, Sunnvyale Julie Weiss, Palo Alto Trish Mulvey, CLEAN South Bay Roxan Nasiri, Cupertino (former member) Vishakha Atre, Program Staff Kate Slama, SCVWD	Reformed 5/18/00		Reviewed, approved and implemented the following Watershed Education and Outreach projects: • Watershed Watch Campaign • Watershed Watchers Program at the Don Edwards San Francisco Bay Wildlife Refuge • ZunZun School Assemblies

Table 2-2
FY 06-07 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
Industrial Inspection – Revise performance standard/guidance to include recommendations for enhanced reporting, implement and review results. Permit Provision: C.6.a.i.	John Fusco, Program Staff Eric Anderson, Mountain View Dave Grabiec, Sunnyvale Anastazia Aziz, San Jose Mary Morse, San Jose (former member) Bhavani Yerrapotu, San Jose Jack Lovell, West Valley Brett Calhoun, SCVWD Roger Lee, Santa Clara Chris Fujimoto, Palo Alto	2/6/01		Did not meet in FY 06-07.
Mercury Pollution Prevention – Assist Co-permittee and Program staffs to implement Mercury P2 Plan tasks. Permit Provision: C.9.c.	Kristy McCumby-Hyland, Sunnyvale Melody Tovar, San Jose Sharon Newton, San Jose James Downing, San Jose Dave Drury, SCVWD Steve Homan, Santa Clara County Rob D'Arcy, SC County HHW Program Kristin Kerr, Program Staff Mary Morse, San Jose Eric Anderson, Mountain View Cheri Donnelly, West Valley Communities Julie Weiss, Palo Alto	10/18/01		Developed mercury-containing product use survey, and model guidelines and virtual elimination policy for implementing the Mercury Pollution Prevention Plan. Did not meet in FY 06-07.

Table 2-2
FY 06-07 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
Watershed Analysis – Assist with conduct and review of work plan tasks to conduct watershed analysis and management practice assessment in "other creeks" which may be impaired by sediment. Permit Provision: C.9.f.iii	Brett Calhoun, SCVWD Kristy McCumby-Hyland, Sunnyvale Steve Homan, Santa Clara County Larry Lind, Los Altos Jim Ervin, San Jose James Downing, San Jose (former member) Neil Van Keuren, San Jose Chris Sommers, Program Staff Paul Randall, Program Staff Jae Abel, SCVWD (former member)	6/20/02		Finalized Limiting Factors Analysis (LFA) Technical Report for the Upper Penitencia Creek watershed; conducted Sediment Source Assessment (as part of the Sediment Management Practices Assessment of the Upper Penitencia Creek watershed); and conducted a Waterbody Assessment and Sediment Impact Analysis of Saratoga Creek
Trash – Develop Trash Work Plan, coordinate trash-related activities, and assist Program Staff to implement Program tasks. Permit Provision: C.1.	Dave Staub, Santa Clara Cheri Donnelly, WVCWP Kristy McCumby-Hyland, Sunnyvale Brett Calhoun, SCVWD Skip LaCaze, San Jose Sharon Newton, San Jose Melody Tovar, San Jose Phil Bobel, Palo Alto Chris Rummel, County DEH Steve Homan, Santa Clara County Lisa Rose, County GALA Trish Mulvey, CLEAN South Bay Jan O'Hara, RWQCB John Fusco, Program Staff Paul Randall, Program Staff Chris Fujimoto, Palo Alto Roxan Nasiri, Cupertino (former member) Larry Lind, Los Altos	12/20/01		Developed the *SCVURPPP Trash Management and Effectiveness Assessment Strategy Proposed Major Tasks and Schedule* (Trash Strategy). The Trash Strategy included six tasks to be conducted over three fiscal years. Developed the "Trash BMP Tool Box" (includes an introductory technical report and twelve technical information sheets on treatment BMPs and institutional controls for controlling trash

Table 2-2

	Michael Stephenson, SCC Vector Control Salifu Yakubu, San Jose Brett Calhoun, SCVWD Bill Springer, SCVWD Pamela Wu, Santa Clara County Chris Freitas, Santa Clara County Tracy Ingebritsen, Stanford Karla Tompkins, Stanford Larry Lind, Los Altos Amit Mutsuddy, San Jose Iveta Harvancik, Saratoga Julia Nguyen, San Jose Dionne Early, San Jose Jamie McLeod, Sunnyvale Jan Palajac, San Jose			

Table 2-2
FY 06-07 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
WORK GROUP INFORMATION **(PIP & WEO Work Groups)**				
Script Review – To review scripts created for media use related to the Watershed Watch Campaign (on a short turn around basis), oversee development of Watershed Watch web site and review page content. Permit Provision: C.4.	Sally Personett, Sunnyvale Cheri Donnelly, WVCWP Bruce Frisbey, San Jose Roxan Nasiri, Cupertino (former member) Mary Morse, San Jose Kate Slama, SCVWD Julie Weiss, Palo Alto Vishakha Atre, Program Staff	12/99		Provided input on a number of radio scripts and print ads with a short turnaround time.
Pesticide User Outreach – To help Program staff develop work plans for and implement pesticide user outreach tasks from the Program's Pesticide Management Work Plan. This project combines elements of the IPM Store partnership Work Group and the Household Chemical Management Work Group. It builds on the relationships developed with independent nurseries and hardware stores developed during the previous years of the IPM Store Partnership project. The work group also reviews the Program's Work Plan for pesticide outreach and participates in outreach events.	Roxan Nasiri, Cupertino (former member) Julie Weiss, Palo Alto Larry Lind, Los Altos Paramjit Uppal, Milpitas Eric Anderson, Mountain View Bruce Frisbey, San Jose Cheryl Dayley, San Jose Mary Morse, San Jose Kara Novogradac, San Jose (part of the year) Kristy McCumby-Hyland, Sunnyvale Sally Personett, Sunnyvale Kate Slama, SCVWD Cheri Donnelly, WVCWP Rob D'Arcy, Santa Clara Co. Rosemary Lombard, Palo Alto	Reformed 8/02		Reviewed and approved detailed FY 06-07 Work Plan; provided input to Program staff on Regional IPM issues; reviewed and approved materials for the fall advertising campaign, planned, conducted and staffed IPM outreach related events; conducted outreach to stores.

Table 2-2
FY 06-07 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
Permit Provision: C.9.d.	Vishakha Atre, Program Staff			
Mercury P2 Outreach – To help Program staff, develop work plans for and implement mercury outreach tasks. Permit Provision: C.9.c.	Julie Weiss, Palo Alto (Chair) Roxan Nasiri, Cupertino (former member) Mary Morse, San Jose Sally Personett, Sunnyvale Kristy McCumby-Hyland, Sunnyvale Kate Slama, SCVWD Marilyn Nickel, Milpitas Joanne Johnson, Milpitas Zakk Devine, County IWM Division Rob D'Arcy, CoHHW Program Cheri Donnelly, WVCWP Vishakha Atre, Program Staff	12/02		Reviewed and approved the detailed FY 06-07 work plan; reviewed and approved materials for the fall advertising campaign.
Schools Outreach – To plan for and oversee school outreach activities coordinated with the WEO Campaign (e.g. ZunZun performances), coordinate Co-permittee school outreach efforts and identify gaps in outreach for watershed/stormwater education. Identify a program for conducting outreach at the middle-school level. Permit Provision: C.4.	Mary Morse, San Jose – Chair Roxan Nasiri, Cupertino (former member) Julie Weiss, Palo Alto Jan Raissle, Palo Alto Bruce Frisbey, San Jose Trish Mulvey, CLEAN South Bay Cheri Donnelly, West Valley Kate Slama, SCVWD Vishakha Atre, Program Staff Sally Personett, Sunnyvale	12/99		Provided input for conducting 50 ZunZun school assemblies.

Table 2-2
FY 06-07 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
Alviso Education Program – To periodically evaluate and provide input to S.F. Bay Wildlife Refuge staff regarding educational programs funded by SCVURPPP. Permit Provision: C.4.	Kate Slama, SCVWD Bob Chessman, San Jose Bruce Frisbey, San Jose Roxan Nasiri, Cupertino (former member) Sally Personett, Sunnvyale Mary Morse, San Jose Genie Moore, S.F. Bay Wildlife Refuge Laurie McEwen, S.F. Bay Wildlife Refuge (part of the year) Lindy Nice, S.F. Bay Wildlife Refuge (part of the year) Trish Mulvey, CLEAN South Bay Vishakha Atre, Program Staff Cheri Donnelly, WVCWP	12/99		Reviewed work done in FY 06-07; discussed improvements and approved work plan for FY 07-08.
HHW Work Group –To evaluate and recommend pollution prevention strategies for pollutants (e.g., universal wastes, pesticides) that directly impact both stormwater and household hazardous waste collection programs in Santa Clara County.	Mary Morse, San Jose Leah Lowrie, San Jose Kristy McCumby-Hyland, Sunnyvale Rob D'Arcy, County HHW Program Cheri Donelly, WVCWP Trish Mulvey, CLEAN South Bay Julie Weiss, Palo Alto Zakk DeVine, County IWM Division Vishakha Atre, Program Staff	2/07		Started addressing both "beginning-of-pipe" and "end-of-pipe" challenges (e.g., identification of potential HHW program funding options for hazardous waste disposal and product stewardship legislation to reduce manufacturer use of hazardous materials associated water quality problems at a product's end of life). Recommendations will be presented to the MC during FY 07-08.

Table 2-2
FY 06-07 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
C3PO Work Groups				
BMP Operations & Maintenance Verification Work Group -- Review model O&M documentation and develop guidance for conducting verification programs and reporting inspection data. Permit Provision: C.3.e.	Dipankar Sen, SCVWD Patti Joki, Milpitas Paramjit Uppal, Milpitas Jenny Nusbaum, San Jose Brett Calhoun, SCVWD Cheri Donnelly, WVCWP Eric Anderson, Mountain View Genevieve Fire, Cupertino Trish Duarte, Los Gatos Jack Lovell, West Valley Communities Jamie Matthews, San Jose Kristy McCumby-Hyland, Sunnyvale Lavenia Millar, Cupertino Maria Angeles, San Jose Melody Tovar, San Jose Anastazia Aziz, San Jose Rafles Warnars, San Jose Ray Ho, San Jose Roger Narsim, SCVWD Chris Fujimoto, Palo Alto John Fusco, Program Staff Paul Randall, Program Staff	4/22/02		Reviewed use of the Standard Stormwater Treatment BMP Inspection Data Collection Form and guidance on annual reporting of data; coordinated with County Vector Control District and reporting requirements; shared information on implementation of inspection programs.

Table 2-2
FY 06-07 Ad Hoc Task Groups and Accomplishments

NAME/PURPOSE	MEMBERS	START DATE	DISBAND DATE	ACCOMPLISHMENTS
HMP Implementation Phase Work Group	Melody Tovar, San Jose Kristy McCumby-Hyland, Sunnyvale Mike Campbell, HMH Engineers Larry Lind, Los Altos Dipankar Sen, SCVWD Roger Narsim, SCVWD Dave Chesterman, SCVWD Kristin Kerr, Program Staff Jill Bicknell, Program Staff Joe Teresi, Palo Alto Anastazia Aziz, San Jose Joe Vafa, San Jose Maria Angeles, San Jose Julia Nguyen, San Jose Christine Mohanna, San Jose Fariborz Heydari, Milpitas Trish Mulvey, Clean South Bay Amit Mutsuddy, San Jose Dionne Early, San Jose			Received updates on HMP issues and projects, permit status, and activities of other programs; provided input on implementation tools being developed; shared information on implementation of HMP requirements on development projects.
Infiltration Work Group - To develop guidance to Co-permittees on design of Stormwater infiltration measures to protect groundwater quality. Permit Provision: C.3.i	Yaping Liu, SCVWD Larry Lind, Los Altos Mike Campbell, RBF Consulting Anastazia Aziz, San Jose Kristy McCumby-Hyland, Sunnyvale Jill Bicknell, Program Staff Roger Narsim, SCVWD Paul Randall, Program Staff Bill Scott, San Jose (former member) Tracy Ingebritsen, Stanford	1/22/03		Did not meet in FY 06-07.

Table 2-3
Performance of FY 06-07 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
	1.0 Program Management/Administration	
Task 1.1 - Administrative Assistance	• Provide general administrative assistance • Maintain toll-free numbers for both SCVURPPP and the Watershed Watch Campaign. • Distribute materials to the public	• Continuing • Received 14 calls in FY 06-07. Database of requests is regularly updated and will be distributed to Co-permittees. • Responded to 33 requests from the Watershed Watch website for Watershed Watch kits and 31 requests for information.
Task 1.2 - Management Committee and Ad Hoc Task Group (AHTG) Support	• Facilitate and support up to 12 MC meetings* • Facilitate and support up to 40 AHTG meetings (includes Work Group meetings)*	• Completed 11 meetings (ten regular and one special) in FY 06-07. • Facilitated 40 AHTG and Work Group meetings. AHTG meetings include: Budget AHTG (2); C3 Provision Oversight AHTG (5); Trash AHTG (3); and Watershed Education & Outreach AHTG (5). Work Group meetings include: Alviso Work Group (1); BMP O&M Verification Work Group (1); HMP Instream Projects Work Group (9); HMP Implementation Phase (HIP) Work Group (8);Mercury P2 Outreach Work Group (1); Pesticide User Work Group (1); Pilot Trash Demonstration Meeting (2); and SCVURPPP and HHW Program Work Group (2). • Submitted two status reports on Municipal

* Includes: develop/distribute agendas, comply with Brown Act, update mailing lists, do copying, reserve meeting places, facilitate meetings, draft/finalize minutes, and organize/conduct follow-up.

Table 2-3
Performance of FY 06-07 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		Regional Permit to City/County Managers Association. Attended one meeting to discuss MRP and other stormwater issues on April 11, 2007. **Note:** Program staff helped reduce the number of actual meetings by using electronic mail for review of work products and other correspondence.
Task 1.3 - Program Budget Administration	• Develop subsequent year's budget • Track expenditures and prepare quarterly reports to Management Committee • Identify and apply for grant opportunities as directed by Management Committee	• Total Program budget distributed to Budget AHTG (BATG) and MC on 12/21/06; budget revised and redistributed to BATG on 1/17/07; budget approved by MC on 1/18/07. • Continued tracking system developed in FY 97-98. Submitted budget updates in September 2006, December 2006 and March 2007. • Submitted concept proposal entitled "Sustainable Streets for Improving Stormwater Quality in Santa Clara County " in the Summer 2006. This project is to be included within the Bay Area Integrated Regional Water Management Plan. • Supported the Santa Clara County Household Hazardous Waste Program in applying for a grant from the California Integrated Waste Management Board to fund additional drop-off locations for the proper disposal of mercury-containing

Table 2-3
Performance of FY 06-07 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		products and home generated sharps.
Task 1.4 - Coordination with Fiscal Agent	• Track Program Fund receipts/expenditures; obtain budget status information	• Continued to receive updated information on revenues and expenditures monthly from the City of Sunnyvale and directed the City to pay invoices. This process worked effectively. Forwarded independent auditors report to MC for FY 05-06 in March 2006.
Task 1.5 - Coordination with Legal Consultant	• Communicate with and provide assistance to legal counsel.	• Coordinated with legal counsel on other permit issues (e.g., MRP, TMDLs and HMP).
Task 1.6 – Coordinate Program Representation	• Communicate with and report information provided by Co-permittees representing Program at external meetings.	• Program staff attends external meetings requiring Program representation. See report under Task 2.3. Co-permittees normally do not represent the Program at external meetings. An exception is that several Co-permittees represent themselves at the San Francisquito Creek Watershed Council meetings regarding sediment control studies. (Program staff is not involved).
Task 1.7 – Develop and Manage PI/P Program	• Conduct long-range planning for Program PI/P activities	• Managed the implementation of the Watershed Watch Campaign; managed development of the Watershed Watch Mid-year Campaign Report; Teacher Evaluation Mid-year and Final Reports, Final School Assembly Report, and Watershed Watch

Table 2-3
Performance of FY 06-07 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		Campaign Final Report; reviewed products by consultants; coordinated campaign with other PIP goals and activities.
	• Manage development of PI/P work plan for FY 06-07	• Developed FY 07-08 PI/P Work Plan with input from Budget and WEO AHTGs. Updated pollutant/PIP materials matrix and developed recommendations and strategies for FY 07-08 projects. • Throughout the year, oversaw development of work plans for and/or management of PI/P projects.
	• Miscellaneous Outreach Tasks	• Program Fact Sheets. Developed and distributed Program-specific fact sheets on the following topics: Dioxin Control, Training Municipal Development Review Staff, Water Quality Monitoring and Watershed Assessment (2nd Edition), and Sediment Impact and Management Practice Assessments (2nd Edition). • Award Applications. Prepared and submitted award applications for the following awards: United States Environmental Protection Agency Clean Water Act Recognition Award- Outstanding Municipal Storm Water Management (submitted June 23, 2006, awarded first place on September 8, 2006); CASQA Stormwater Research Project of the Year (submitted July 14, 2006); National Association of Flood and Stormwater Management Agencies- Excellence in

Table 2-3
Performance of FY 06-07 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		Communication Awards, Improving Water Quality (submitted August 15, 2006, awarded third place); and National Association of Environmental Professionals-National Environmental Excellence Award-Education Excellence (submitted January 31, 2007, awarded first place on March 7, 2007).
	• Provide support to Co-permittee's requests for public education assistance	• Provided ongoing support to Co-permittee requests; coordinated reprints and distribution of materials; staffed outreach events, as needed; kept PI/P contacts informed about local and regional activities through email. • Coordinated with BASMAA Regional Ad Campaign.
	2.0 Permit Management	
Task 2.1 - Report Preparation & Submittal	• Prepare Program Annual Report and submit to Water Board by Sept. 15 of each year.	• FY 05-06 Annual Report prepared and submitted on September 15, 2006. Continued the streamlined reporting format to reduce Co-permittee effort while satisfying Water Board requirements. Prepared guidance to Co-permittees and reviewed Co-permittee submittals for completeness and consistency. • Executive Summary- FY 2005-2006 Annual Report. Distributed at the November 15, 2006 Water Board meeting and posted on the Program's website. Additional copies were provided to Co-permittees for

Table 2-3
Performance of FY 06-07 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		distribution to interested parties within their agencies.
	• Prepare FY 07-08 Draft Work Plan and submit to Water Board by March 1	• FY 07-08 Draft Work Plan prepared and submitted on March 1, 2007. Work Plan contained the following: the Program Continuous Improvement Plan, Future Performance Standard Revisions, PI/P Work Plan, FY 07-08 Annual Receiving Water Monitoring Plan, FY 07-08 Copper/Nickel Work Plan, Watershed Management Measures, Status of ongoing Pesticide Management Plan tasks, Mercury Pollution Prevention efforts and Work Plan, New and Redevelopment (C.3.) Work Plan and Program FY 07-08 Budget and Co-permittee FY 07-08 Work Plan Summary Tables.
Task 2.2 - Internal Co-Permittee Liaison	• Develop guidance as directed by MC. May include guidance documents, evaluation methods and effectiveness indicators.	• Developed guidance on the Annual Report, Work Plan, C.3 implementation, Copper Action Plan Work Plan, street sweeping tracking and evaluation, submittal of trash problem area evaluation data and submittal of IND and IC/ID inspection data. Provided additional guidance to Co-permittees in response to telephone and email requests.
	• Conduct local program reviews	• Local program reviews did not occur during FY 06-07.
	• Conduct up to 4 training workshops; may include educational outreach to businesses.	• Planned, conducted, assisted with, and/or co-sponsored the following workshops:

Table 2-3
Performance of FY 06-07 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		1) "Construction Site Planning and Management" (December 5, 2006) – attracted 109 participants; and 2) "Where San Jose Meets the Bay: Don Edwards National Refuge Walking Tour" (December 6, 2006) – attracted 33 participants; 3) "Implementing Stormwater Requirements in New Development and Redevelopment Projects" (June 14, 2007) – attracted 128 participants; and 4) "Bay Area Hydrology Model (BAHM) Computer Training Workshop" (July 17, 2007) – attracted 43 participants. Gave presentations on behalf of the Program at workshops/conferences planned by others: Refer to Attachment A.
Task 2.3 - External Organization Liaison	• Identify regulatory issues, prepare comments, and represent Program at meetings.	• Distributed information to MC on following issues: revisions to 303(d) list and TMDL priorities; mercury, diazinon, pesticides, PBDE's and copper/nickel TMDL studies and action plans; issues discussed at Municipal Regional Permit work group and stakeholder meetings; legislation of concern; other items of interest from the RWQCB, BASMAA and CASQA. Program staff served on the PCB TMDL Work Group and Mercury TMDL Work Group, commented and prepared TMDL study products, helped update and report

Table 2-3
Performance of FY 06-07 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		progress on the Copper Action Plan, and assisted Water Board staff with preparation of Basin Plan amendments related to mercury.
	• Represent Program at up to 77 external organization meetings (RWQCB, BASMAA, CASQA, CEP, RMP, others) as directed by MC.	• Attended 161 external organization meetings (see separate summary table – not including WMI and Program Data Coordination meetings); prepared summaries for MC distribution; prepared and/or distributed full meeting notes for most meetings. • Program staff served on the BASMAA Executive Board (Vice Chair), CASQA Board of Directors and CASQA Executive Program Committee; and represents BASMAA on the RMP Steering Committee and RMP Technical Committee.
	• Represented Program at WMI Core Group and Subgroup meetings.	• Attended 15 WMI meetings, including: Land Use Subgroup (8); BAMBI Workshop (1); LUS Workshop/Walking Tour of Don Edwards National Wildlife Refuge (1); SCBWMI Core Group (3); SCBWMI Watershed Assessment and Monitoring Subgroup (2);
	• Obtain updates to State NOI database.	• Continued to place updated NOI lists on SCVURPPP website on a quarterly basis.
Task 2.4 – Permit Renewal	• Coordinate development of permit with WMI via Regulatory Subgroup	• Coordinated with Water Board staff. MC direction contained in work plan and budget

Table 2-3
Performance of FY 06-07 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		for FY 06-07.
	• Present to Water Board at regular Board meeting	• Program staff conducted extensive review of preliminary and administrative drafts of the Municipal Regional Permit released by the Water Board on October 14, 2006 and May 1, 2007, provided written comments to Water Board staff and are discussing revisions on behalf of the Management Committee. • Program staff, at direction of MC, is participating in the Municipal Regional Permit (MRP) development process. During FY 06-07, Program staff has attended 23 MRP-related meetings, including: special BASMAA Board Meetings (18); special BASMAA Attorney Meetings (3); Water Board meeting- MRP (1); and Water Board meeting- Trash Workshop (1) (as well as conducted numerous e-mail review of products)
Task 2.5 – Implement Continuous Improvement Items	• Investigate, develop implementation plans, and implement items for Program continuous improvement identified in Co-permittee reviews, work plan, and annual report	• Table 1-1 of the *FY 07-08 Draft Work Plan* and Table 2-4 of the *FY 06-07 Annual Report* presented the progress of continuous improvement tasks. An update of the Program's website is the new continuous improvement item identified for FY 06-07 for implementation during FY 07-08.
	• Summarize for Program Annual Report	• The status of continuous improvement items was presented in the *FY 07-08 Draft Work*

Table 2-3
Performance of FY 06-07 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		Plan, and is updated in the *FY 06-07 Annual Report.*
	3.0 Technical Program Management	
Task 3.1 - Prepare RFPs and Manage Contractors	• Develop RFPs, scopes of work, and contracts for up to 4 projects/services; assist with advertisement and selection; oversee contracted work.	• Prepared scopes of work for monitoring/assessment and WE&O projects for FY 06-07; continue to oversee contracted work. (All contractors are subcontractors to EOA, Inc., per the Program's "Procedures for Contracting Outside Services", 5/15/98). • Worked via CEP to develop RFPs and manage contractors (PCB, Mercury and Risk Reduction). • Developed scopes and contracts; and managed contractors conducting Multi-year Receiving Waters Monitoring Plan, sediment assessment and bioassessment scopes of work (Contractors were selected by MC and are assisting the Program with implementing the Multi-year Plan in accordance with the permit). • Managed the following regional project: Introduction to Dioxins for Bay Areas

Table 2-3
Performance of FY 06-07 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
		Stormwater Management Agencies (BASMAA task of regional benefit). • Developed scope and contract; and managed WE&O contractor (Carl & Manor-selected previously via RFP process). • Developed scopes and contracts and managed two outreach contractors, the ZunZun performance group and the San Francisco Bay Wildlife Society's Environmental Education Center in Alviso. • Developed scope and contract for and managed contractor to complete Phase II of the BASMAA Task of Regional Benefit – BMP Sizing Tool Project (AEI-CASC). • Continued to manage contractor performing calibration of the Bay Area Hydrology Model (Clear Creek Solutions) and contractor performing a comparison of this model with the HEC-HMS model (GeoSyntec)
Task 3.2 - Provide Technical Review	• Provide technical review of work products of contractors and provide recommendations to MC regarding acceptability/modifications.	• Reviewed all consultant products related to C.3. HMP, Bay Area Hydrology Model, BASMAA BMP Sizing Tool, Multi-year Receiving Waters Monitoring Plan, and sediment and bioassessment work.

Table 2-3
Performance of FY 06-07 Program Management Tasks

Task Description	Work Items	Work Completed / Comments
Task 3.3 - Develop Additional Performance Standard	• Assist MC in developing or improving one performance standard.	• Continuing into FY 07-08, Program staff will work with BASMAA and Water Board staff on the Municipal Regional Permit to address any modifications and future expectations for the Performance Standards.

Table 2-4
Program Continuous Improvement (CI) Tasks

Tasks	Anticipated Completion Date	Status[1]
New Development and Redevelopment		
1. Develop design guidance containing stormwater control opportunities for small road modifications.	December 2007	**Update** – The Program's permit requirements were made consistent with other Bay Area permits, which exempt road reconstruction (within the same footprint) from C.3. (The draft Municipal Regional Permit contains different requirements and the final language has not yet been determined). C3PO AHTG members have expressed interest in the development of stormwater control design guidance for small road and right-of-way modifications and other tight spaces. However, this was a lower priority than other C.3. tasks. The C3PO AHTG decided that this will be addressed as part of the C.3. Stormwater Handbook Update during FY 07-08.
Program Management		
1. Conduct a workshop for municipal staff based on the municipal training protocols being developed by an ad hoc task group. (Priority – Medium)	December 2007	**Update** – Five Power Point presentations have been developed on BMPs for corporation yards, storm drain O&M, road maintenance, pest management and mercury pollution prevention. Program staff has repackaged each training protocol into smaller, focused modules. This approach will allow Co-permittees to train municipal staff on certain key municipal elements in shorter blocks on time (e.g., 15 minutes). Each module will be distributed to Co-permittee staff through the Program's website (www.scvurppp.org). This task was delayed due to Program staff focus on higher priority items. It will be addressed during the first half of FY 07-08.
2. Consider developing, with the help of an ad hoc task group, a fact sheet addressing common construction BMP problems, like drain inlet protection and dewatering. (Priority – Medium)	December 2007	**Update** – Management Committee approved having the Program adapt an existing brochure on dewatering (created by Palo Alto, Mountain View and San Jose) for the other Co-permittees' use. The C3PO AHTG confirmed its interest in this project at its July 23, 2007 meeting. As a result, this task will be completed during the first half of FY 07-08.

[1] Tasks reported as completed in the FY 05-06 Annual Report have been removed from the list.

Table 2-5
SCVURPPP Current and Proposed BMPs for Pollutants of Concern Prepared in Compliance with NPDES Order 01-024

CHEMICAL	WATER-BODY	KEY URBAN SOURCES[i]	URBAN RUNOFF CONTROLS (ONGOING PROGRAM CONTROLS)[ii]	FY 06-07 ADDITIONAL URBAN RUNOFF CONTROLS/PROGRAMS PROPOSED TO REDUCE POLLUTANTS[iii]	CONTINUOUS IMPROVEMENT (IDENTIFICATION & ASSESSMENT OF NEW URBAN RUNOFF CONTROLS/PROGRAMS)
Pollutants of Concern [iv]					
Metals (particulate form)	**Lower South Bay**	**All Urban Sources**	Performance standards[v]: • Illicit Discharge and Illegal Dumping Elimination • Industrial/Commercial Discharger Control • Public Streets, Roads and Highways O&M • Storm Drain Systems O&M • Water Utility O&M • New Development and Construction Control Measures-Planning Procedures • New Development and Construction Control Measures-Construction Inspections • Rural Public Works Maintenance and Support	Performance Standard Improvements: Implement & Track Performance (see Section 2 and 6 of Work Plan and changes to Work Plan contained in Annual Report): PI/P Work Plan: Implement and Track Watershed Education & Outreach Strategy (see Section 3 of Work Plan, Tables 2-2 and 3-1 for specific Program projects and Co-permittee Work Plans) Monitoring Program: Implement and Track monitoring projects. (See Section 4 of Work Plans). See Annual Report Section 4 for a summary of specific projects. Watershed Measures: Implement and Track watershed measures (see Sections 4 and 5 for details). Five areas of effort include: • Characterizing watersheds and stormwater discharges; • Assessing existing or potential adverse impacts to beneficial uses; • Identifying potential sources of pollutants of concern; • Aiding in developing and implementing strategies for controlling adverse impacts of beneficial uses; and • Assessing the effectiveness of pollutant prevention/control	Evaluate the need for additional BMPs to reduce discharges of "pollutants of concern".

Table 2-5
SCVURPPP Current and Proposed BMPs for Pollutants of Concern Prepared in Compliance with NPDES Order 01-024

CHEMICAL	WATER-BODY	KEY URBAN SOURCES[i]	URBAN RUNOFF CONTROLS (ONGOING PROGRAM CONTROLS)[ii]	FY 06-07 ADDITIONAL URBAN RUNOFF CONTROLS/PROGRAMS PROPOSED TO REDUCE POLLUTANTS[iii]	CONTINUOUS IMPROVEMENT (IDENTIFICATION & ASSESSMENT OF NEW URBAN RUNOFF CONTROLS/PROGRAMS)
				measures. See Watershed Monitoring and Assessment Summary Report: 2002-2007 (September 15, 2007) and revised MY-RWMP (July 1, 2004) per permit condition C7b and C9. See Watershed Integration report (June 29, 2001) prepared per condition C10a. Program is a key player in the CEP and RMP efforts and is involved in various technical advisory committees. The Program provides funding to the CEP and the RMP to investigate key issues related to the health of the Bay; and assists the RWQCB in meeting TMDL mandates. Develop guidance for the implementation of Permit Provision C3, which is indirectly related to the control of many of the pollutants of concern.	
Copper	**Lower South Bay**	**Brake pads & Industrial sources** (approximately 46% of total copper load to Lower South Bay)	Same as above for general metals, plus copper specific controls: AUTO-1 *Support Brake Pad Partnership efforts to promote reformulation of friction materials in brake pads.* AUTO-2 *Participate in educating the storm water community about the significance of metals loading from brake pads* AUTO-3 *Participate in educating the public about the significance of metals*	See Permit Provision C9a. Same as above for metals, plus baseline copper specific controls described in Table 4-1 (reviewed and approved by BMM/RS on August 23, 2000) of the Lower South San Francisco Bay- Copper Action Plan (June 2000). See CAP table attached to Permit. Refer to the FY 07-08 Copper/Nickel Work Plan and FY 06-07 Reporting Tables (see Appendix C-3) for specific	• Evaluate the results of Table 4-1 control activities. • Develop Bay-wide stormwater Copper Management Strategy through the MRP development process. • Continue to actively track activities of Brake Pad Partnership

Table 2-5

CHEMICAL	WATER-BODY	KEY URBAN SOURCES[i]	URBAN RUNOFF CONTROLS (ONGOING PROGRAM CONTROLS)[ii]	FY 06-07 ADDITIONAL URBAN RUNOFF CONTROLS/PROGRAMS PROPOSED TO REDUCE POLLUTANTS[iii]	CONTINUOUS IMPROVEMENT (IDENTIFICATION & ASSESSMENT OF NEW URBAN RUNOFF CONTROLS/PROGRAMS)
		nickel load to Lower South Bay)	*program for construction site inspectors.*	Baseline nickel specific controls described in Table 4-1 (reviewed and approved by BMM/RS on August 23, 2000) of the Lower South San Francisco Bay- Nickel Action Plan (August 2000). NAP discussion is the same as above for CAP. A summary of FY 05-06 and FY 06-07 activities are contained in the FY 07-08 Copper/Nickel Work Plan and FY 06-07 Reporting Tables (see Appendix C-3). Implemented revised Construction Inspection Performance Standard, incorporate into Co-permittee URMPs and initiate implementation. Implementing the Rural PW Maintenance and Support Performance Standard. CEP approved and funded a project to measure the loading of a variety of contaminants (e.g., mercury, copper, nickel and PCBs) from the Guadalupe River to the Bay.	
Diazinon	**Fresh Water Streams**[vi]	**Urban Uses** (primarily residential)[vii]	Co-permittee participation in the local Integrated Pest Management (IPM) Store Partnership Program Implementation of Co-permittee BMPs for pesticides usage and pest management (see Performance Standard for Public Streets, Roads and Highways O&M,	See Permit Provision C9d. • IPM Store Partnership Program • BASMAA Media Relations Campaign • Household Chemical Management Project • Pesticide Table Top Display	• Develop a Monitoring Plan for Diazinon through the Clean Estuary Partnership. • Conduct monitoring for pesticides in accordance with Revised Multi-Year Receiving Water Monitoring Plan.

Table 2-5
SCVURPPP Current and Proposed BMPs for Pollutants of Concern Prepared in Compliance with NPDES Order 01-024

CHEMICAL	WATER-BODY	KEY URBAN SOURCES[i]	URBAN RUNOFF CONTROLS (ONGOING PROGRAM CONTROLS)[ii]	FY 06-07 ADDITIONAL URBAN RUNOFF CONTROLS/PROGRAMS PROPOSED TO REDUCE POLLUTANTS[iii]	CONTINUOUS IMPROVEMENT (IDENTIFICATION & ASSESSMENT OF NEW URBAN RUNOFF CONTROLS/PROGRAMS)
			Section V.D.3) Co-permittee support of local or county-wide household hazardous waste programs Distribution of educational materials such as "Pests Bugging You?", "Grow It Guide", and IPM Fact Sheets on 11 different pest control problems. Support through Program's Watershed Action Fund of local community group efforts to demonstrate gardening techniques without use of toxic chemicals. Continued implementation of pesticide outreach and education programs, including: • Participation in BASMAA Regional Ad Campaign on use of less toxic methods for pest control; • Participation in BASMAA Regional Media Relations Campaign and continue to pitch pesticide-related stories to Bay area media; • Participation in BASMAA Regional IPM Store Partnership Committee • Local ad campaigns on less toxic methods for pest control	• Urban Pesticide Committee (UPC) • Participate (Chair) BASMAA Pesticide Work Group • Supported actions by the California Stormwater Quality Association (CASQA) Also See June 26, 2001 Submittal (revised October 15, 2001 and March 1, 2002) of Pesticide Management Plan including: • Pesticide Management Plan –Goals, Actions and Monitoring Mechanisms • Preliminary Draft pest Management Performance Standard • Co-permittees' Municipal Pest Management Surveys RMP approved and funded a project to measure the loading of a variety of contaminants (e.g., mercury, copper, nickel and PCBs) from the Guadalupe River to the Bay. Continue to fund RMP. Conducted monitoring for pesticides in accordance with Revised Multi-Year Receiving Water Monitoring Plan	

Table 2-5
SCVURPPP Current and Proposed BMPs for Pollutants of Concern Prepared in Compliance with NPDES Order 01-024

CHEMICAL	WATER-BODY	KEY URBAN SOURCES[i]	URBAN RUNOFF CONTROLS (ONGOING PROGRAM CONTROLS)[ii]	FY 06-07 ADDITIONAL URBAN RUNOFF CONTROLS/PROGRAMS PROPOSED TO REDUCE POLLUTANTS[iii]	CONTINUOUS IMPROVEMENT (IDENTIFICATION & ASSESSMENT OF NEW URBAN RUNOFF CONTROLS/PROGRAMS)
Mercury	**Fresh Water Streams**	**Tailpipe emissions** (Tailpipe emissions represent approximately 42% of load to Lower South Bay; major nonpoint sources include natural erosion & mine tailings which represent approximately 55% of load to Lower South Bay)	Same as above for general metals, copper and nickel, plus: AIR-1 *Support BAAQMD to reduce metals emissions from diesel-powered vehicles, and with the CMA to reduce, through congestion management, metals emissions from all vehicles.* AIR-2 *Support BAAQMD implementation of Toxic Air Contaminant Reduction Plan* BASMAA "Spare the Air and Water Too" campaign press release and public service announcements	See permit Provision C9c and results of C9e reporting. Same as controls for nickel, plus: • BASMAA Regional Advertising Campaign (tailpipe emissions) • Continue to implement monitoring as part of multi-year plan Guadalupe River TMDL: Participate as stakeholder, and assist with identification and possible implementation of future controls	
Pollutants of Potential Concern					
Mercury	**Lower South Bay**	**Tailpipe emissions** (Same as above for mercury)	Same as above for general metals, copper, nickel and mercury, plus: Bay-Wide TMDL: Participate as stakeholder and assist with conduct of TMDL and identification and implementation of future controls.	See Permit Provision C9c Developed and continue implementing: • "Guidelines for Mercury-Containing Products Reduction and Management" • "Mercury Virtual Elimination Policy"	
PCBs **Dioxin Like Compounds**	**Bay-wide**	**Legacy pollutants** (Industry applications) **Combustion** (Air Emission)	See program developed to respond to Permit Provision C9e.	See program developed to respond to Permit Provision C9e.

[i] The SCVURPPP Metals Control Measures Plan (MCMP) contains an updated loads assessment and source evaluation, environmental significance evaluation, and identification and evaluation of existing and new source controls for metals in the particulate form (WWC/EOA, 1997). The analysis was conducted consistent with NPDES Permit provision C.6, and the results and measures have been incorporated into the approved SCVURPPP 1997 Urban Runoff Management Plan (URMP). Estimated loads are taken from MCMP.
[ii] Complete descriptions of all controls can be found in the 1997 URMP and the FY 98-99 and FY 99-00 Work Plans. Controls identified as AUTO, INDUSTRY and EROSION were developed as part of Metals Control Measures Plan and are contained in 1997 URMP.
[iii] Complete description of controls can be found in the Annual Work Plans submitted on March 1 of each year to the RWQCB and the final additions to the Work Plan contained in the Annual Report dated submitted each year to the RWQCB on September 15.
[iv] For South San Francisco Bay, urban runoff/storm sewers are identified on the 303(d) list as contributing to the discharge of the following pollutants that may be causing impairment: copper and nickel.
[v] Performance Standards describe a specific result, or level of effort, which constitutes the "maximum extent practicable", based on current technical knowledge, available resources and local conditions (see the SCVURPPP 1997 Urban Runoff Management Plan). Co-permittee URMPs contain community specific performance standards, standard operating procedures and best management practices. The URMPs also contain annually updated Workplans including specific actions and milestones.
[vi] Freshwater streams in the Santa Clara Valley where urban runoff/storm sewers are identified on the 303(d) list as contributing to the discharge of diazinon that may be causing or contributing to impairment include: Calabazas Creek, Coyote Creek, Guadalupe Creek, Guadalupe River, Los Gatos Creek, Matadero Creek, San Francisquito Creek, Saratoga Creek, and Stevens Creek.
[vii] Based on draft San Francisco Bay RWQCB Urban Creeks Diazinon TMDL Workplan (January 28, 1999).
[viii] In addition, sedimentation/siltation is a pollutant of concern from nonpoint sources in San Francisquito Creek and is being addressed by various cities in San Mateo County with involvement from two SCVURPPP Co-permittees (i.e., SCVWD and the City of Palo Alto).

SECTION 3

PUBLIC INFORMATION/PARTICIPATION

3. PUBLIC INFORMATION/PARTICIPATION

INTRODUCTION

The goals of the PI/P element of the Program are to identify and change behaviors that adversely affect water quality, and to increase the understanding and appreciation of streams and the Bay. The Program's FY 06-07 PI/P Work Plan provided a strategy to achieve these education and public participation goals with specific projects funded in the Program's FY 06-07 budget.

A number of ad hoc task groups (AHTGs) and work groups, comprised of Co-permittee representatives and Program staff, continued to meet and communicate via email to implement PI/P projects. A summary of the work groups' accomplishments is provided in Table 2-2 of Section 2.

Highlights of the accomplishments of FY 06-07 PI/P projects and ongoing projects from previous years are described below, along with an evaluation of the effectiveness of activities and measures for continuous improvement. Table 3-1 presents a summary of the projects and the effectiveness evaluation.

FY 06-07 PI/P PROJECTS

FY 06-07 PI/P Work Plan

The Program conducts its public education and outreach through three projects: Watershed Education and Outreach, Pesticide User Outreach and Mercury Pollution Prevention Outreach. In FY 04-05, the Program completed all tasks planned for these projects under the current permit. During FY 05-06 and FY 06-07, ongoing tasks were implemented.

The Management Committee approved the PI/P Work Plan and budget for specific projects, and the work plan was submitted as part of the Program's FY 06-07 Work Plan, submitted on March 1, 2006. No comments on the FY 06-07 Work Plan were received from the Water Board.

FY 06-07 PI/P projects included:

- Watershed Education and Outreach (WEO) Campaign (this includes funding for Watershed Watch Campaign, ZunZun School Assemblies and the Watershed Watchers Program at the Alviso Education Center, Don Edwards San Francisco Bay National Wildlife Refuge).
- Pesticide User Outreach
- Mercury Pollution Prevention Outreach
- Schools and Youth Education Outreach
- Regional Coordination (participation in BASMAA PI/P Work Groups, described at the end of Section 3),
- Program Supplies/Materials Reprinting

Scopes of work for these projects were included in Section 3 of the Program's FY 06-07 Work Plan. The FY 06-07 PI/P Work Plan also includes ongoing PI/P support activities, such as support of the toll-free information hotlines, mailing brochures and Watershed Watch kits on request, etc.

Watershed Education and Outreach Campaign

The Program's Watershed Education and Outreach Campaign included funding for the Watershed Watch Campaign, the Watershed Watchers program at the San Francisco Bay National Wildlife Refuge Environmental Education Center in Alviso ("Wildlife Refuge") and ZunZun assemblies at elementary schools in Santa Clara County.

Watershed Watch Campaign

The Watershed Watch Campaign completed 7 years of implementation (and six years of advertising) in FY 06-07. The Campaign focused on the implementation of various outreach activities including media advertising.

A draft FY 06-07 Watershed Watch Work Plan was submitted with the Program's FY 06-07 Work Plan on March 1, 2006, and is included within Appendix B-1. The Watershed Watch Media Advertising Plan, completed in June 2006, is included within Appendix B-2.

The following describes tasks completed by the Program's consultant, with assistance from Program and Co-permittee staff, during FY 06-07. The detailed Watershed Watch Campaign and Media Report is included in Appendix B-3.

- **Task 1: Creative Development** – Developed new print, radio and transit advertisements for IPM and mercury outreach. Developed promotional materials flyers, and giveaways (e.g., notepads, fly swatters and tattoos). Copies of these materials are included in Appendix B-4.
- **Task 2: Media Advertising** – Conducted a media campaign consisting of print, radio and transit advertising. Advertisements ran through out the year. Transit advertising was funded by the Santa Clara County Integrated Waste Management group and the City of Sunnyvale. The City of Palo Alto, the City of Santa Clara and the West Valley Clean Water Program provided additional funds to supplement Campaign advertising. New advertisements were developed to promote less-toxic pesticide use and proper disposal of used fluorescent light bulbs. Media buys included 210 print ads, 1530 radio ads and 75 transit (bus taillight poster) ads. The net advertising budget for media was $93,133. Media partners provided a total added value package of benefits and resources of $228,846. Additional details on the media campaign are included in Appendix B-2 and Appendix B-3.
- **Task 3: Partnership Development** – Continued development of the partner database and conducted numerous meetings with potential partners. Four new partnerships were developed in FY 06-07. A list of current partners is provided within Appendix B-5.
- **Task 4: Added Value Development -** As a result of media partnership negotiations and community partnership activities, the Campaign received significant added value resources. These include media buys, free tickets, etc. The estimated total value added to the FY 06-07 Campaign from partners (community and media) is $233,202. Additional details are included in Appendix B-3.
- **Task 5: Website Maintenance** – Continued to develop and maintain the Watershed Watch website. In FY 06-07, www.watershedwatch.net was replaced (redirected) with www.mywatershedwatch.org. The decision to redirect the Watershed Watch website was based on focus group research that indicated "dot org" sites were perceived more favorably for government and environmental outreach. Additional details on website statistics are included in Appendix B-6 and the FY 06-07 detailed Watershed Watch Campaign and Media Report within Appendix B-3.

- **Task 6: Events Coordination** – Organized and attended nine community outreach events in FY 06-07. This includes four events at Classic Car Wash locations.
- **Task 7: Public Relations** – Due to absence of newsworthy stories, media pitches were not conducted. The budget from this task was used to implement the Campaign evaluation "e-mail survey", originally planned for FY 07-08.
- **Task 8: FY 07-08 Work Plan and Annual Report Development –** Developed the FY 07-08 Work Plan and the FY 06-07 Annual Report.

The consultants also conducted seven meetings with WEO Ad Hoc Task Group (WEO AHTG) and work groups, and submitted monthly campaign reports to the WEO AHTG and Management Committee.

As directed by the WEO AHTG, the consultants implemented a web-based survey to evaluate the success of the FY 06-07 Watershed Watch Campaign. The survey, which was launched on June 25, 2007, will be completed by the end of July 2007. Survey results will be collected and presented to the WEO AHTG for developing the FY 07-08 media campaign.

Evaluation of Effectiveness

During FY 06-07, the Watershed Watch Campaign received two public education awards.

The Program's Watershed Watch Campaign received the FY 2005-2006 National Association of Flood and Stormwater Management Agencies (NAFSMA), Excellence in Communication Award, Third Place, for Improving Water Quality. Santa Clara Valley Water District staff accepted this award on behalf of the Program at the NAFSMA 2006 Annual Meeting and Workshop.

On March 7, 2007, the Program Manager was notified that the Program received the National Association of Environmental Professionals (NAEP) National Environmental Excellence Award for Education Excellence. The award recognizes the accomplishments of the Watershed Watch Campaign. NAEP is a nationally recognized, multidisciplinary, professional association that promotes ethical practices, technical competency, and professional standards in the environmental field. The NAEP Award Program recognizes nationally significant environmental achievements from across the country.

Many factors indicate that the FY 06-07 Watershed Watch Campaign was a success (see Final Campaign and Media Report, Appendix B-4, and other documents in Appendix B). Some of these include:

- The continued successful partnership with Classic Car Wash and implementation of four car wash events;
- The large number of gross impressions (i.e., number of people reached by the message) made by media advertising (21,544,500);
- Media partners provided $228,846 in value added resources, which greatly supplemented the Campaign's budget, for a total media buy of $93,133;
- Participation in five community outreach events and distribution of more that 4,000 brochures and giveaways; and
- The completion of all tasks in the FY 06-07 scope of work, with active participation of Program staff and Co-permittees.

Another measure of effectiveness was a survey of 98 people conducted at the Pumpkins in the Park event, which produced the following results:

- 69 people indicated that they are aware that it is illegal to dispose of used fluorescent light bulbs in the trash or recycling bin and
- 84 people indicated that water flowing into storm drains flows into our creeks and Bay without treatment.

This survey indicates the rising awareness of stormwater pollution prevention issues.
