Pollution Prevention Program

FY 2007-2008 Monthly Record Keeping Form

Month and Year: 7/1/07 – 6/30/08

Agency: City of Palo Alto

Completed by: Steve Banks – Manager, Maintenance Operations

STREET SWEEPING	Volume of material collected (cubic yards)	Miles swept* (curb miles)
1. Sweeping		
Residential Areas:		
Broom	945	1528
Regenerative Air	10083	12727
Vacuum	0	0
Commercial Areas:		
Broom	0	0
Regenerative Air	1266	3143
Vacuum	0	0
Industrial Areas:		
Broom	177	420
Regenerative Air	1054	2016
Vacuum	0	0
Other Areas Swept: (e.g., parking lots, major arterials)		
Broom	18	142
Regenerative Air	1135	1896
Vacuum	0	0
TOTAL	14,678	21872

2. Have there been any changes in your street sweeping program?
(efforts to have parked cars removed, changed sweeping frequency, new equipment, significant downtime, etc.)
NO

LEAF REMOVAL

Volume of leaves removed by City/Town crews: 16,178 cubic yards.

Leaves bagged by residents and picked up by your City/Town: N/A bags

Check box if you have a yard waste collection program: **X** Volume of yard waste collected: 13,428 **tons.**

Check box if you do not have a leaf removal program other than routine street sweeping or yard waste collection: ☐

Report total miles covered by sweepers including areas operated in tandem or repeated.

Corporation Yard O&M Program Evaluation
Some areas of the MSC are currently under construction and tenant improvements are in progress which resulted in outdoor storage of items that are normally placed inside. The MSC inspection during the second quarter of FY 2007-2008 revealed some minor areas of concern with respect to compliance with the SWPPP. Public Works Environmental Control Hazardous Waste Division coordinated efforts to correct all concerns from the inspection for total compliance. The MSC will be inspected again prior to the FY 2008-09 rainy season.

Rural Public Works Program Evaluation

Compliance with required rural public works best management practices has improved since Open Space and Environmental Compliance staff met with Utilities management to review the requirements of the Performance Standard and to solicit their cooperation. Open Space staff will continue to monitor the performance of the Utilities crews when they work in the open space preserves. Public Works and Utilities staff will review the Performance Standard and the appropriate BMP's during annual staff training prior to the 2008-09 rainy season.

			meeting. Ongoing training and feedback also takes place at individual crew tailgate meetings held every two weeks.	
	Effectiveness Evaluation	Review and evaluate effectiveness of SD operations and maintenance program as part of Annual Report.	See effectiveness evaluation discussion below.	Public Works Operations

Regional Board Comments on Storm Drain System O&M in FY 2006-2007 Annual Report

Item	RWQCB Comment	City Of Palo Alto Response
N/A	N/A	N/A

Storm Drain System O&M Program Evaluation

STORM DRAIN MAINTENANCE DATA

Number of catch basins cleaned – 3,010 each
Weight of debris removed from catch basins (using hand tools) – 20,380 lbs.
Weight of debris removed by vactor truck – 12,180 lbs.
Linear feet of pipeline cleaned by vactor truck – 157,337 lf.
Hours of maintenance on storm water pump stations – 380 hours

Inspectors and City project managers and administrators must be educated that Best Management Practices (BMP's) for contractors can be problematic, especially during the first heavy rain events of each year when filter fabric and other Best Management Practices are discovered blocking catch basin inlets causing localized flooding complaints. A large percentage of flooding complaints continues to be abandoned fabric or sand and class 2 materials blocking the catch basin outlets or downstream inside the pipeline. Staff must then remove filter fabric and other damaged sand bags from blocked inlets and clean base rock out of the catch basins. More emphasis is being placed on on-site BMPs such as perimeter straw wattles and stabilized construction entrances that keep sediment on site (rather than trying to capture sediment in the gutter with sand bags).

Water System O&M Program Evaluation
Water crews continue to employ best management practices to de-chlorinate potable water prior to discharge to gutters and storm drains and to control pollutant discharges during construction/maintenance activities. During routine tailgate meetings and prior to hydrant flushing, operators are reminded to employ storm water pollution prevention measures at each job site. In addition, the daily operation worksheet contains specific instructions on the use of the de-chlorinator. During this reporting period, water transmission operations staff flushed its entire system. Prior to the flushing, new de-chlorinators were purchased to ensure that any discharge to the storm drain is de chlorinated. The Water Operations group also purchased a number or large filter bags that are used to filter pumped discharges from excavations that need to be dewatered during water main breaks.

New Development-Planning Procedures Program Evaluation

No major changes to the development review process for FY 2007-08. The City of Palo Alto was recognized by the Santa Clara Valley Urban Runoff Pollution Prevention Program as a recipient of two **2007 Site Design Awards** for exemplary development projects within the City (see attached fact sheet). The Stanford/Palo Alto Community Playing Fields project was honored in the "Large Public Project" category for its stormwater infiltration sump, permeable pavement, and vegetated drainage swales. The 361-369 California Avenue development was recognized in the "Small Private Site" category for its permeable pavement plaza that also receives storm runoff from the building roof.

Description of the Organizational Structure of the City of Palo Alto's Operation and Maintenance Verification Program

Legal authority for the City of Palo Alto's Operation and Maintenance (O&M) Verification Program is contained in the Palo Alto Municipal Code. The program is implemented by staff in the Engineering and Environmental Compliance Divisions of the Public Works Department. The enforcement mechanism is a written maintenance agreement, signed by the City and the party responsible for maintenance and then recorded with the Santa Clara County Recorder's Office.

2007 SCVURPPP Site Design Awards

Summary of Award-Winning Projects

SCVURPPP Site Design Awards Program

The Santa Clara Valley Urban Runoff Pollution Prevention Program (SCVURPPP) is a consortium of 13 cities in the Santa Clara Valley, Santa Clara County and the Santa Clara Valley Water District that share a joint permit to discharge stormwater to South San Francisco Bay. The Program's stormwater permit contains requirements for stormwater control measures to remove pollutants and limit runoff from development projects above a certain size. These measures can include changes in site design to mitigate stormwater impacts, stormwater treatment facilities, and controls on sources of pollutants. Typical site design measures include reduction of impervious surfaces, grassy swales, detention areas in landscaping, pervious paving, green roofs, roof gardens, and roof downspouts that drain to landscaped areas. All of these measures help to protect water quality by filtering stormwater through plants and soil and allowing stormwater to infiltrate into the ground, thus mimicking the natural hydrology of the undeveloped site.

This awards program recognizes Santa Clara Valley's public agency and private development community leaders who are solving site design challenges, reducing storm water pollution and runoff quantity and meeting the requirements of the municipal stormwater permit.

The 2007 award winners are described below:

361-369 California Avenue, Palo Alto (Winner: Private Project Small Site)

The 361-369 California Avenue Project is located on a 9,600 sq. ft. lot in Palo Alto's California Avenue Business District. The project uses permeable unit pavers in the plaza and table seating area in front of the restaurants. Permeable unit pavers were also used for several parking stalls at the rear of the site. This design approach accomplishes effective runoff attenuation and stormwater treatment at a small, urban site that is mostly covered with buildings and pavement.

Rainwater leaders from the building roof are routed directly into the reservoir of open graded rock beneath the permeable pavers to allow for further infiltration of site runoff.

The 361-369 California Avenue Project received the award for innovative stormwater treatment on a small site in a densely developed commercial area. The site's stormwater treatment measures are inconspicuous and in a heavily used public space. The treatment measures are good examples of measures that could be applied to other small infill/ redevelopment projects in the area.

Stanford / Palo Alto Community Playing Fields (Winner: Public Project Large Site)

The City of Palo Alto and Stanford University jointly developed two full size public soccer fields on 5.9 acres of land owned by the University. The site features an underdrain system under the synthetic turf playing fields that collects runoff and conveys it to a large,

rock-filled sump where it slowly infiltrates into the underlying soils. The sump contains an overflow to the municipal storm drain system to handle runoff from larger storm events. Parking lot runoff is routed through curb cuts into a system of vegetated bioswales along the site perimeter. In addition, the plaza area around the clubhouse is paved with permeable unit pavers.

The Stanford/Palo Alto Community Playing Fields present a good example of multiple treatment measures on one site. The use of synthetic turf in combination with stormwater treatment controls on the project provides for a durable year-round, all-weather field, potable water savings, and effective stormwater pollution prevention.

Stanford Football Stadium,
Stanford University
(Winner: Private Project Recreational)

The Stanford Stadium reconstruction was completed in September 2006 in less than 10 months' time. The project addresses the stormwater permit requirements with a unique combination of site design and treatment measures to provide the required stormwater mitigation within a limited site footprint and topographic, elevation and historical constraints.

Site design and treatment control measures include a reduced impervious area based on the new stadium design, a perimeter swale to treat flows from the upper slope areas, trench drains with grates to prevent trash from entering the storm drainage system, a hydrodynamic separator unit to treat flows that are not treated by the landscaped areas, and roof downspouts that drain to landscaping.

Stanford earned the award by overcoming several design challenges, including site constraints and historic preservation issues, as part of its efforts to protect water quality. Vegetated swales and filter strips are integrated nicely into the attractive site. Stanford's ability to incorporate multiple treatment systems into the stadium design serves as a good example for similar private and public projects.

Regional Board Comments on New Development-Construction Inspection in FY 2006-2007 Annual Report		
Item	**RWQCB Comment**	**City Of Palo Alto Response**
N/A	N/A	N/A

New Development-Construction Inspection Program Evaluation
The continuing efforts of the storm water program investigator have improved the organization, inspection, and enforcement of new development construction locations. Job experience and knowledge of the city, City procedures, and code enforcement activities are vital to the success of the program. Further investigator and staff training will enable city personnel to continually improve the program. Proactive inspection levels are back to normal, as well as the effective response to complaints and inter-departmental referrals during the non-rainy season. Compliance at construction sites has dramatically improved during the past decade, but a continued presence is essential. The biggest problems are unforeseen groundwater dewatering and breaks in water lines. These two incidents now account for most of the significant violations at construction sites. Work with contractors on being prepared for such emergencies will continue. Reports generated by the Building Division's Accela Permits program are an essential tool used to find all large sites over 10,000 square feet with substantial earth disturbance work as well as construction sites with approved dewatering permits. This resource is also important in the identification of the date when a permit was issued as well as the status of the permit. Public Works Engineering Division developed an Accela Permits Report to identify dewatering sites for the purpose of the storm water investigations. The rainy season was very short during this reporting period. All large construction sites were inspected on a regular basis during the year to ensure compliance with storm water regulations.

		course of their work. 6. Continue to implement IPM Partnership with hardware garden supply stores in POTW service area. 7. Offer training to employees of IPM Partnership stores in POTW service area. 8. Conduct one residential IPM workshop. 9. Work with the Program and the regional effort to expand Bay Friendly Gardening (stopwaste.org program) to provide regionally coordinated IPM training to residents and PCOs.	on behalf of CASQA at a Structural Pest Control Board meeting in favor of adopting regulation changes that would allow EcoWiseCertified PCOs to advertise the environmental benefits of their services. 4. Participated in BASMAA Media Relations meetings. 5. City-wide email and intranet messages providing information on IPM are distributed to employees periodically as well as to staff who are responsible for pest control. 6. Stocked *Our Water Our World* fact sheets and shelf talkers for less-toxic products at all participating local stores, including a hardware store in East Palo Alto. Spoke with all store managers to show a utility bill insert listing their store as a participant in the *Our Water, Our World* program. 7. Joint trainings given to two Ace Hardware store teams located in San Jose and Palo Alto 8. This was effort was not pursued. The intention was to utilize the Bay Friendly Gardening workshop program for this task, but the cost was prohibitive. Staff is reassessing the best way to proceed. 9. Bay Friendly Gardening is expanding regionally. Staff is assessing the best way to coordinate with the Bay Friendly Program given the cost of their workshops.	

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2007-2008 ANNUAL REPORT

Municipality: City of Palo Alto

	Mercury Outreach	1. Continue to publicize the fluorescent bulb, thermometer, and thermostat drop-off programs through utility bill inserts, newspaper advertising, etc. 2. Provide digital thermometer to all residents who recycle mercury thermometers. 3. Work with East Palo Alto Family Health Center to expand mercury awareness to their patients. 4. Support the Program's efforts to provide outreach and assistance regarding Universal Waste Rule (UWR) to conditionally-exempt small quantity generators. 5. Support County's program for fluorescent bulb drop-off at hardware stores and recycling centers.	1. Ongoing: • Done in partnership with SCVURPP outreach. An August 2007 utility bill insert promoted fluorescent lamp and household hazardous waste drop-off programs. • As part of School Outreach Campaign, reached 366 students in 15 fourth grade classroom presentations specific to mercury. 2. Ongoing at RWQCP and at special events. 3. Thermometer take-backs now offered as special event service. RWQCP is partnering with East Palo Alto's Ravenswood Health Center to provide digital thermometers as part of its mercury awareness campaign. 4. RWQCP staff support outreach to small quantity generators through participation in the SCVURPPP WE&O Subgroup. 5. The original RWQCP program was adopted and expanded by Santa Clara County. Currently five stores accept fluorescent bulbs in the RWQCP service area. Palo Alto supports the County program through advertising in the RWQCP service area that supplements County program advertising.	Public Works Environmental Compliance
	Copper Outreach	Conduct outreach to Building/Planning staff and to developers on ban of copper roofs and gutters implemented in January 2003.	Continued using a stamp on building permit plan sets approved by the Development Center to notify residents regarding the ban on copper roofs and gutters.	Public Works Environmental Compliance

Santa Clara Valley Urban Runoff Pollution Prevention Program
FY 2007-2008 ANNUAL REPORT

Municipality: City of Palo Alto

Public Information/Participation Program Evaluation

Pesticide Outreach: See evaluation in Pest Management Program Section

Mercury Outreach: See evaluation in Mercury Program Section

Copper Outreach: The ordinance banning copper architectural materials has been effective at eliminating the installation of new copper roofs.

School Outreach: 78% of teachers returned a postage-paid evaluation postcard, with a cumulative rating of 5.0 out of 5 in both quality of program and clarity of presenter. 98% stated students' understanding of water pollution prevention increased, and 100% stated that students' understanding of the difference between storm drain/sewer systems increased.

Vehicle Service Facilities: Since inception of this program, the participation has increased to 98% of eligible facilities. Eighty-eight shops have participated in the Clean Bay program for at least 10 years.

Public education challenges include finding new and compelling messages to inspire the public to use less-toxic do-it-yourself and contracted pest control methods, and to recycle mercury-containing items. RWQCP will continue identifying strategies with partner agencies and its communications consultant for effective outreach to non-English speaking communities via local newsletters, community groups and health centers. Another planned effort is public outreach targeted to residents about legacy pollutants such as banned pesticides. This outreach will be coincident with expanded weekday hours for the City's household hazardous waste program scheduled to commence in Fall 2008. Staff also plans to provide additional funds to expand run time of ads produced by the WEO campaign that focus on mercury and pesticides. Staff continues to participate in co-permittee and potential regional efforts to support expansion plans for the Bay Friendly Garden Project to target landscape maintenance workers, training them to use IPM practices.

PEST MANAGEMENT
(Provision C.9.d of the Permit)
FY 2007-2008 Work Plan Self Evaluation Matrix

Item No.	Activity	FY07-08 Work Plan Tasks	FY 07-08 Accomplishments	Responsible Party
	Municipal Pesticide Use	1. Provide annual *Less Toxic Pest Management and Pesticide Use* report. 2. Provide annual training on SOPs, BMPs, and IPM techniques to employees responsible for pesticide application. 3. Finalize new IPM structural pest control contract and begin service to City facilities. 4. Identify least toxic controls for pest management challenges identified in Annual Report.	1. Report was completed in June 2008. 2. Two multi-jurisdictional training sessions for ants, stinging insects, mice and rats were offered in FY 07-08. In October and November 2007, the City offered a four-hour IPM training for the control of structural pests. This meeting was attended by staff from eight agencies including the City of Palo Alto, Palo Alto Unified School District, Mountain View and Los Altos RWQCP partners, and other agency staff from San Jose to Richmond. 3. Completed. Spray pesticide use for ants was reduced to zero applications, except for the use of soapy water. Ant baits and exclusion methods such as caulking, and light building repair are used to reduce favorable habitats for pests. 4. Ongoing. In 2007, one less-toxic alternative for ecotoxic fungicides used at the golf course was identified and was rotated into the selection of products that are regularly used. Ant control products were also improved (see bullet 3 above).	Public Works Environmental Compliance

Pest Management Program Evaluation

The City's use of pesticides associated with ecotoxicity has been reduced over time through use of IPM strategies. Palo Alto has made significant strides in targeting the source of pollution stemming from staff and contractor structural pest control activities currently most associated with impaired water quality. Future efforts will continue to target landscape pest control problems that lead to use of ecotoxic fungicides and rodenticides, which are currently the greatest source of ecotoxicity in City operations.

For residential and business use, Palo Alto will continue to promote new and existing programs locally and regionally, such as EcoWise Certified, Bay Friendly, Green Gardener and *Our Water, Our World*. These programs are effective in providing education to non-municipal audiences that contribute to urban pesticide pollution.

Two multi-jurisdictional training for ants, stinging insects, mice and rats
In October 2007, the City offered a four-hour IPM training for the control of structural pests. This meeting was attended by staff from eight agencies including the City of Palo Alto, Palo Alto Unified School District, Mountain View and Los Altos RWQCP partners, and other agency staff from the San Jose to Richmond.

2007 Pesticide Use Information

1. **Total Pesticide Use Trends**
   Total active ingredient use increased by increased by 54 pounds (15%) in 2007 due primarily to increased fungicide applications, including the new use of less-toxic Tier 2 fungicides. Some of the increased fungicide use was offset by a significant decrease in herbicide use.

Figure 1: Total Pesticide Active Ingredient Use by Year (2001 – 2007)

2. **Tier 1-3 Pesticide Use**
   The City's use of Tier 1, 2, and 3 pesticides for calendar years 2001 through 2007 is displayed in Figure 2. Figures 3 through 6 provide annual pesticide use, by tier, for controlling fungus, rodents, weeds, and insects, respectively.

Tier 1 Pesticide Use

In 2007, the City's Tier 1 pesticide use increased by approximately 76 pounds (33%). The increased Tier 1 use is attributed primarily to the following:

- A net increase of 54 pounds in fungicide use at the golf course
- A new use of 24 pounds of imazapyr, an aquatic herbicide used in 2007 to control the highly invasive weed phragmites in the Palo Alto Baylands

In 2007, 73% percent of the City's Tier 1 pesticide use was at the golf course to control fungus. The remainder of Tier 1 pesticides was applied at the golf course for ground squirrel and gopher control, and at various City locations for weeds, grubs, and smaller fungus problems.

Figure 2: Tier 1, 2, and 3 Pesticide Use by Year (2001 – 2007)

Tier 1 fungicide use increased from 174 pounds in 2006 to 228 pounds in 2007. This net increase of about 50 pounds includes a dramatic increase of 154 pounds for mancozeb and a decrease of about 100 pounds in total for PCNB, thiophanate-methyl, and chlorothalonil. It should be noted that annual fluctuations of fungicide use are likely to continue unless standards for golf course playability decrease or CIP funding is authorized for greens renovations as discussed in the 2005 Report (the current design of older greens helps foster turf diseases). This is especially true given projected climate change scenarios which could increase favorable growing conditions for turf fungus. It is anticipated that the incorporation of Tier 2 fungicides into the golf course fungicide rotation in 2008 will lead to reductions

in Tier 1 fungicide use, although more frequent applications will likely be required due to their lower persistence and toxicity, potentially increasing total active ingredient use. The Tier 2 fungicides had limited use in 2007.

Use of Tier 1 active ingredients to control weeds increased from 24 pounds in 2006 to 41 pounds in 2007. However, as mentioned previously, this increase is due almost entirely to the use of Habitat herbicide (imazapyr) to treat the invasive weed phragmites at the Palo Alto Baylands. Imazapyr applications are generally considered an environmentally appropriate approach to treating phragmites. This effort will continue in 2008, and Tier 1 herbicide applications are consequently expected to remain higher than in previous years. Tier 1 insecticide and rodenticide applications were both slightly higher in 2007, increasing by 1 and 4 pounds, respectively. Despite the 2007 increases in Tier 1 insecticide and herbicide use, Figures 5 and 6 depict the general decline in total pesticide use for control of these pests. In 2007, staff used the lowest amount of insecticides and herbicides since the City's IPM program began. Operations-Trees continues to use injectable pesticides instead of foliar applications to control pests and to plant replacement trees with pest resistant varieties. The golf course has increased the use of weed-eating to control grass and weeds around trees and signs, and continues to use mechanical removal for cattail control.

Tier 2 Pesticide Use

Tier 2 pesticide use decreased by 24 pounds (18%) due mostly to decreased use of glyphosate for weed control. This reduction in glyphosate use was not accompanied by an increase in a Tier 1 substitute herbicide. (The increase in Tier 1 herbicide use depicted in Figure 5 is due to the new use of imazapyr to control phragmites at the Baylands, as described above.) In terms of the total Tier 2 pesticide use, the decrease in glyphosate was partially offset by the introduction of the two new Tier 2 fungicides that were tested at the golf course in 2007.

Tier 3 Pesticide Use

A slight increase in Tier 3 products was seen in 2007 from 0.3 pounds to 2 pounds due to a single pesticide (bacillus thuringensis) application to control moths. It should be noted that Roundup products containing the active ingredient glyphosate monoammonium salt were reclassified from Tier 3 to Tier 2 in 2006. This change was not applied retroactively to previous years' data. The Tier 3 pesticide use depicted in Figure 2 for years prior to 2006 consisted predominantly of glyphosate monoammonium salt.

MERCURY POLLUTION PREVENTION PROGRAM
(Provision C.9.c of the Permit)
FY 2007-2008 Work Plan Self Evaluation Matrix

Item No.	Activity	FY07-08 Work Plan Tasks	FY 07-08 Accomplishments	Responsible Party
	Municipal Use of Mercury-Containing Products	1. Continue to implement the City's Mercury Elimination Policy. 2. Continue recycling of fluorescent bulbs used in City facilities and purchase of low-mercury bulbs. 3. Regional Water Quality Control Plant will continue to replace mercury switches with non-mercury alternatives (typically upon failure).	1. Ongoing 2. Ongoing 3. Since 2002, RWQCP has replaced or removed 42 mercury switches (approximately 2.3 pounds of mercury). Many of the switches that were recycled were not in service but were warehouse inventory.	Public Works Environmental Compliance
	Household Hazardous Waste Collection	1. Support the County's program to provide fluorescent bulb drop-off and recycling for residents at local hardware stores. 2. Continue thermometer and thermostat drop-off and recycling program for residents at the POTW. 3. Continue collection of fluorescent bulbs, thermometers, and thermostats from residents and small quantity commercial generators at	1. The original RWQCP program was adopted and expanded by Santa Clara County. Currently five stores accept fluorescent bulbs in the RWQCP service area. Palo Alto supports the County program through advertising in the RWQCP service area that supplements County program advertising. 2. Digital thermometer program replaced previous coupon-based program. This program is less active than in the past, as many residents have already exchanged mercury thermometers. The RWQCP has partnered with Palo Alto Utilities for mercury thermostat exchanges and rebates for digital	Public Works Environmental Compliance

Regional Board Comments on Mercury Pollution Prevention Program in FY 2006-2007 Annual Report		
Item	**RWQCB Comment**	**City Of Palo Alto Response**
N/A	N/A	N/A

Mercury Pollution Prevention Program Evaluation
The City actively participates in SCVURPPP pollution prevention activities, diverts thermostats and thermometers for recycling, and provides extensive outreach to schools in its service area. City staff believe there is a need for regional coordination on product stewardship issues for mercury-containing products. Mercury pollution prevention programs continue to be good vehicles for engaging the public. Mercury is both an ecosystem issue and a human health issue. As such, the campaign to remove mercury from the home resonates with parents wanting to protect children from toxics. Therefore, City staff plan to continue using mercury programs as key public messages, alternating them with other pollutant messages. A planned new area of emphasis to address mercury pollution is demolition of buildings containing mercury-containing devices. A draft ordinance provision will specifically require the inventory, removal, and proper management of mercury-containing devices prior to building demolition.

CB-1	Vehicle Washing Operations	• Distribute outreach materials on proper vehicle/equipment washing at City department counters and public events, and post on City web site. • Provide car wash kit to charity car wash organizers and educate on the use of the kits. • Submit data regarding vehicle washing outreach activities and effectiveness evaluation in annual reports. • Require source control measures for Group 1 new development and redevelopment projects that will conduct vehicle/equipment washing and maintenance activities (consistent with Permit Provision C.3.k). • Inspect auto businesses regarding car wash requirements, and prohibited storm drain discharge.	Within CB-1, Paragraphs 1, 2, 5, 6, 7, 8, & 9 are ongoing programs which have been run by Palo Alto for a number of years, and which were run again successfully in FY 2007-08. Paragraph 3 calls for an effectiveness evaluation regarding vehicle washing outreach. Utility bill stuffers, fliers, and special event displays have been used successfully to promote changes in vehicle washing practices as a means to protect storm water quality. Awareness of this issue has grown over the years, serving as a testament to the outreach program. Palo Alto does not do its own public opinion surveys, but rather relies on regional surveys to quantify and confirm the success of this and other behavior modifications. With respect to Paragraph 4, several Group 1 projects approved to-date in Palo Alto (multi-family residential developments) include covered vehicle wash areas that are plumbed to the sanitary sewer. Item	RWQCB Comment	City Of Palo Alto Response
N/A	N/A	N/A

Trash Inventory & Management Program Evaluation

The program continues to make significant progress. Continual inspections of "hot spots" have allowed staff to remove sites that are no longer considered a threat to waterways. Additional sites have been added to address new areas of concern for the City of Palo Alto. The creation of the Trash BMP Tool Box Pamphlet as provided by SCVURPPP provides technical information to resolve future trash problems.

The proposed combined effort to coordinate City of Palo Alto Environmental Compliance Division, Public Works Engineering, Public Works Operations, Palo Alto Police Department, San Francisquito Watershed Council, and other interested environmental persons and groups shall improve reporting accuracy and help increase the total number of trash items removed from local creeks and waterways.

In FY 2008-09, staff hopes to commence a trash capturing device located downstream of the Matadero Pump Station. This will help to identify the most effective method for screening trash and may lead to modifications to the trash racks at the Matadero Pump Station and other City pump stations that will increase the level of trash removal prior to discharge of pump effluent to local creeks. This proposal to study pump stations as trash removal devices may be the first in the region.

Subject: City of San José Urban Runoff Management Plan
Fiscal Year 2007-2008 Annual Report

Dear Mr. Wolfe:

Enclosed is the City of San José Urban Runoff Management Plan Annual Report, pursuant to provision C.6.a. of the municipal storm water NPDES Permit (Order No. 01-024). The report was approved by the City Council on August 26, 2008, without changes. The report summarizes activities performed during FY 2007-2008 in accordance with the City of San Jose's Urban Runoff Management Plan (URMP) submitted to the Regional Board in September 2004, and the performance standards contained therein.

If you have questions regarding the Annual Report, please contact Anastazia Aziz of my staff at 408-277-2773.

Sincerely,

Melody Tovar, P.E.

GLOSSARY 175

041722

Executive Summary

The City is required to submit to the San Francisco Bay Regional Water Quality Control Board (Water Board) an Annual Report that documents the progress of the Urban Runoff Management Plan for the previous fiscal year. The Annual Report is prepared pursuant to provision C.6 of the City's National Pollutant Discharge Elimination System (NPDES) permit for stormwater discharge through the City's storm sewer system to waters of the United States.

Thermoplastic storm drain inlet marking on Chesbro Avenue

The Report includes sections for each of the program elements included in the Urban Runoff Management Plan as required in the permit. Each section is comprised of an update on the status of the work plan, an evaluation of various performance elements, responses to Water Board feedback received during the past year, and additional tables or information to demonstrate performance for a program element. Summaries are also provided for the array of outreach activities and municipal training sessions that are included in various program elements.

Most program elements contain components carried out by more than one City department. The strategy for attaining compliance focuses on three different types of activities that the City conducts:

1. Enforcement and monitoring to detect and respond to incidents of illegal discharge to the storm sewer system;

2. Modification of structural and business processes to implement best practices in all municipally managed projects, operations, and services; and

3. Outreach and education of municipal employees as well as the community at large to reduce stormwater pollution, ensure that developments comply with local stormwater regulations, and give businesses and residents information on best management practices to incorporate them into their daily activities to protect stormwater quality.

The City also contributes to activities undertaken by the Santa Clara Valley Urban Runoff Pollution Prevention Program (Program) and the Bay Area Stormwater Management Agencies Association (BASMAA); however, this report includes only activities performed by the City. An overview of the year for each program element follows.

Illicit Connection / Illegal Discharge Inspection (ICID)

The City's Environmental Services Department (ESD) responds to complaints regarding illegal discharges or threats of discharge to the storm sewer system. This year, the City responded to more than 700 cases. Of note, the number of calls received is trending downwards. This year, approximately 15% fewer calls were received compared to three years ago. This downward

trend in the number of reported violations may be an indication of the increased education and enforcement efforts by the City. ESD responds to all complaints with education and enforcement in partnership to achieve compliance and prevent future incidents.

Vehicle and equipment leaking continue to be the leading type of illegal discharges to the storm sewer system; however the number of these incidents is down 25% from FY 04-05 levels. This may be attributed to increased outreach by City staff attending Strong Neighborhood Initiative (SNI) neighborhood meetings during the past two years.

Tracking soil complaints rose over last year, but are below historic highs. In order to ensure construction sites have adequate stormwater controls, the City hired an additional inspector housed in the Environmental Services Department to better monitor and correct issues at construction sites related to stormwater. Inspectors also received specialized training on erosion and sediment control at construction sites.

Watershed Enforcement Inspector investigating a complaint near Babb Creek

This year the City installed more than 3,000 thermoplastic stormdrain stencils as a pilot project. The new stencils are highly reflective and are expected to be more durable than the traditional painted stencils the City uses. The stencils were placed in areas characterized by high ICID complaints and City staff will monitor the longevity of these stencils and trends in incident complaint calls.

Industrial & Commercial Discharges (IND)

The goal of the IND program is to reduce storm drain pollution from commercial and industrial facilities through inspections. ESD inspected more than 4,500 businesses in FY 07-08. The frequency a business is inspected depends on their potential for contributing pollutants as determined by previous inspection results. This method of assigning inspection frequencies has been effective in focusing inspection resources on high priority cases to best protect water quality. More than 70% of the businesses inspected are found to have no significant stormwater issues and thus do not warrant near-term re-inspection. When issues are identified, education and enforcement are used together to achieve compliance.

Watershed Enforcement Inspector reviewing an inspection report with a facility manager

The total inventory of facilities in the City that are subject to inspection next fiscal year increased by more than 45% this year due to a spike in the number of business license applications likely brought on by the City's business license amnesty program. Staff is exploring a variety of methods to address the current and projected increases in

facilities subject to inspection such as prioritizing and phasing initial inspection, shifting resources, and using mail as an initial point of contact. Environmental Services has successfully integrated increased workloads in past years and anticipates doing the same this year.

FY 07-08 marked the second year for the City's comprehensive Fats, Oils, and Grease (FOG) Inspection Program, and over 1,300 facilities were inspected. This Program focuses on integrating the sanitary sewer management plan (SSMP) requirements and enhancing the businesses' general awareness of stormwater issues specific to food service facilities.

Education remains the primary tool for preventing or stopping practices that may pollute stormwater. In FY 07-08, inspectors distributed more than 12,500 Best Management Practices (BMPs) brochures, fact sheets, posters, and other materials as part of the City's inspection programs. Inspectors are proactive in discussing stormwater issues and distributing BMPs to support educational efforts.

New and Redevelopment (NRD)

This program element is driven by the New and Redevelopment provision (also referred to as C.3) of the permit, amended in October 2001 and most recently in July 2005. This provision requires that development projects implement controls to address pollutant discharges and increased storm flows for the life of a project.

The City continues to make strides in integrating stormwater controls into development projects. Sixty-four private development projects included in this year's report incorporated hydraulically-sized stormwater management measures. This success is the product of policy development, staff training and coordination, regional collaboration, and ongoing outreach to and collaboration with the development community.

Infiltration trench: a stormwater treatment control measure

The City continues to emphasize site design, source control, and Low Impact Development (LID) as key strategies for minimizing stormwater pollution. In addition, the City made considerable efforts to emphasize appropriate selection of landscape-based measures and effective operation and maintenance of BMPs. Implementing stormwater treatment and hydromodification controls on smaller, infill sites in a developed urban area is much more difficult given the limited land area and the high cost of land. In addition to the project-by-project approach, the City continues to emphasize its policies that discourage sprawl and encourage increased densities. These policies have a broad water quality benefit as they reduce traffic congestion and the associated air pollution.

The City conducted inspections of projects with post-construction treatment controls that completed construction in FY 07-08. City staff inspected nine BMPs at eight different sites utilizing the Program's standard inspection data collection form. It has been determined that as numerically-sized BMPs are installed, additional resources and coordination among departments will be necessary to ensure appropriate installation, operation, and maintenance of BMPs. Based on this experience and the upcoming changes to the Operation and Maintenance (O&M) Verification Program requirements proposed in the new stormwater permit, the City's O&M Verification Program will be revised.

The City also continued to actively participate in efforts to develop analytical tools and conduct outreach on a regional basis. City staff from key departments continues to provide information on new requirements and stormwater strategies to the public and the development community.

Construction Inspection (CON)

The City inspects activities at construction sites to prevent sediment and other pollutants from entering the storm sewer system. Despite a slowdown in construction activity in San Jose in FY 07-08, the City continued to enhance and implement a vigilant construction site monitoring program. In FY 07-08, the City focused on staff training, inspection of construction sites, outreach to developers, and enforcement.

City Construction Inspectors receiving Erosion and Sediment Control training

An even greater emphasis was placed on training in FY 07-08 to further develop staff's construction site monitoring skills and qualifications. The City sponsored a comprehensive, two-day program in September on erosion and sediment control best management practices attended by 108 staff. A written evaluation indicated that the training was well-received and useful and the City plans to retain a consultant for similar training in FY 08-09. In addition, three ESD inspectors and four Public Works inspectors became Certified Inspectors of Sediment and Erosion Control (CISEC) by completing a rigorous course and exam administered by CISEC, Inc.

Other trainings completed by City inspectors included the Program's Annual Construction Site Management training in December and focused "refresher" trainings conducted by ESD Urban Runoff staff in April. In addition, Public Works Capital Improvement Project Managers participated in an April training session on erosion and sediment control contract language and specifications.

Reviewing erosion and sediment controls is part of the routine inspections of Public Works and PBCE-Building inspectors. Environmental Services supplements this effort with stormwater specific inspection and enforcement. The "hand-off" system developed and implemented by the three inspection groups in 2004 continues to provide effective monitoring of construction sites. In an effort to maintain construction sites appropriately and reduce violations and incidents of

escalated enforcement, these departments continue to collaborate in providing outreach to the development community on appropriate best management practices.

In FY 07-08, there were no inquiries from the Water Board regarding erosion and sediment control violations at construction sites in San Jose. This may be attributable to more aggressive and vigilant inspections, evidenced by a 22 percent increase in verbal warnings issued by Public Works and ESD and a 17 percent decrease in actual violations. City staff continue their commitment to quickly identify and correct areas of concern at construction sites and promote sediment and erosion control best management practices to maintain water quality to the highest degree possible.

In addition to engaging staff in detailed review and discussion of the Municipal Regional Permit Tentative Order, the City conducted a review of the Draft State Construction General Permit. Additionally, the City hosted a regional workshop for co-permittees and developers to discuss the Draft State Construction General Permit.

Public Streets, Roads, & Highways (PSR)

This program element is pursuant to provision C.2.a of the permit and is one of several that address municipal activities. These program elements essentially consist of BMPs being incorporated into City operations such as street repair. Training plays a key role in ensuring that staff uses the proper techniques during the course of their duties to protect water quality. For FY 07-08, this training was completed in May 2008. Session content centered on review of the Department of Transportation's BMPs and Standard Operating Procedures (SOPs) for O&M activities. Corporation Yard Stormwater Pollution Prevention Plan training was integrated into the DOT crew training in FY 07-08. Training content is directed by which work groups are present, and the training curriculum is revised when needed to reflect new practices. On average, 93% of the employees responded that the BMPs taught were appropriate for their work.

Training was also conducted for Rural Public Works BMPs in accordance with provision C.5, which requires that the City employ proper techniques when conducting maintenance activities in rural areas. This standard is integrated as part of the PSR program element. The City's departments of Parks, Recreation, and Neighborhood Services; General Services; and Transportation are responsible for managing rural public works maintenance and support activities.

Material storage area with a straw wattle, a control BMP, at the Central Service Yard

The City conducts an extensive Street Sweeping program, involving the sweeping of the central business district; neighborhood business districts; arterials, collectors, and bicycle lanes; and residential streets. Annually, the City sends out a calendar of the residential street sweeping schedule to each single-family dwelling, and asks neighborhood associations within the City to include reminders in their association newsletters for moving parked vehicles on street sweeping days.

The City is continuing to expand the areas in which parking restrictions are required and enforced to improve the effectiveness of the street sweeping program. In FY 07-08, the enforcement area was broadened from 239 to 266.5 curb miles. The City anticipates expanding the areas in which parking restrictions are required and enforced for street sweeping by approximately 20 curb miles in FY 08-09.

Storm Drain System Operation & Maintenance (SDO)

Department of Transportation crew cleaning a storm drain catch basin on Adrian Avenue

Storm Drain System Operation and Maintenance is another program element implemented in accordance with provision C.2.a of the permit. This program includes key maintenance activities that are conducted to ensure the proper function of the storm sewer system to collect and convey storm runoff. Maintenance staff training was conducted to coincide with that of the PSR program element and was completed in May 2008.

The Department of Transportation successfully implemented its annual storm drain inlet inspection and cleaning program, cleaning approximately 29,500 inlets. Evaluation of the data collected during inlet cleaning indicates that approximately 2.7% of the City's storm drain inlets and catch basins had a problem associated with them. The key problems for stormwater protection were abandoned silt sacks and vehicles parked on the catch basin. Maintenance staff is directed to contact Environmental Enforcement for follow up when pollution is identified.

Water Utilities Operations & Maintenance (WUO&M)

This program addresses O&M activities at the City's Municipal Water System and is implemented in accordance with provision C.2.a. The key tool for implementing this program is the Water Utility Operation and Maintenance Discharge Pollution Prevention Plan. Per the plan, staff training ensures that proper techniques are employed during maintenance activities. An annual training program covers common SOPs and BMPs and includes the development of a video demonstrating a specific work function. In FY 07-08, staff produced a training video focused on tank cleaning. After viewing and evaluating the procedures in the training video, staff determined that no changes in the current practices are needed. Additionally, a survey of staff indicates that current SOPs and BMPs are clear, adequate, workable, and effective.

Water System Technicians performing maintenance, diverting the flow to a pervious landscape area

Pesticide Management (PM)

This program addresses municipal pesticide use and is implemented in accordance with provision C.9.d. of the Permit. The primary purpose of the Pesticide Management program is to reduce the amount of pesticides in urban runoff. Activities include setting municipal policy, incorporating Integrated Pest Management (IPM), implementing proper techniques when selecting and applying pesticides on City property, staff training, public education, and City participation in regional efforts to influence regulations that affect pesticide management.

The City continues to apply both proven and innovative IPM techniques to resolve municipal pest problems. Continued IPM methods include scraping and power washing tussock moth cocoons from trees, applying mulch in landscapes as a water-saving weed barrier, trapping and removing squirrels instead of baiting and poisoning, and favoring tree injections over broadcast spraying when pesticides are needed.

Sheep grazing on weeds at the Airport, a chemical--free management strategy

Innovative pilot projects in FY 07-08 include the installation of barn owl boxes in City parks to encourage predation of gophers and posting of bat boxes in community gardens to encourage bats to roost and feast on mosquitoes. Additionally, the City piloted the use of grazing animals to manage vegetation and invasive weeds without the use of chemical or mechanical resources. Approximately sixty-seven acres of municipal property was grazed at sites including Mineta San Jose International Airport, Alum Rock Park, DOT Special Assessment Districts in Evergreen, and the Municipal Water Zone 3 Recycled Water Reservoir.

In FY 07-08, the City continued data collection and tracking of pesticide applications on City property, including City facilities, parks and golf courses, DOT Special Assessment Districts, and Municipal Water sites. Even though notable declines were documented in the use of pesticides with known carcinogenic effects and reproductive toxicity (CA Prop 65 List) and those most likely to threaten water quality, overall pesticide use increased by seven percent from FY 06-07 to FY 07-08. While using total pesticide use as an indicator is problematic for a number of reasons, this increase is most likely attributable to the addition of 20 new acres of City park land and more comprehensive reporting of pesticide use in FY 07-08. The City will continue collecting pesticide use data from all City sources into the future.

Mercury (M)

This program element is implemented pursuant to provision C.9.c of the permit. The City has continued its efforts to reduce or eliminate potential mercury discharges from municipal operations. The City purchases low mercury-containing fluorescent lamps, and

spent lamps are recycled properly. In FY 07-08, the City recycled more than 58,000 feet, or over 11 miles, of mercury-containing spent fluorescent lamps. Residential recycling of lamps is accomplished through the City's support of the Santa Clara County's Household & Small Business Hazardous Waste program.

The City also continues its support of the San Francisco Bay Regional Monitoring Program, AB 982 Total Maximum Daily Load (TMDL) Public Advisory Group, and the WMI Guadalupe River Mercury TMDL Workgroup. The City continues its commitment to work with the Water Board and stakeholders toward TMDLs that are technically defensible and feasible for implementation.

Copper & Nickel Action Plans (CNAP)

This program element is implemented pursuant to provisions C.9.a and C.9.b of the permit, which incorporate Action Plans for copper and nickel to be implemented based on water quality monitoring results in the South Bay. The action plans include activities for which various agencies or entities assume responsibility. Only activities undertaken at the municipal level for stormwater are included in this report. Such activities have largely been integrated into other ongoing program elements but are reported as a summary for clarity. Copper and Nickel remain among the list of pollutants addressed by general and targeted outreach regarding stormwater pollution prevention.

The City piloted a car wash storm drain diverter kit grant in FY 07-08. The City purchased a diverter kit and granted it to the Lincoln High School cheerleader squad for use in their fundraising car wash activities at Hoover Middle School. The diverter kit included a portable basin which sits across the top of the opened storm drain. In theory the wash water would run into this basin and a sump pump would pump the water to a cleanout or to landscaping. Unfortunately, the diverter kit did not function as well as planned. Due to concerns with the performance of the kit, logistical constraints, and labor-intensive nature of running a kit-based program, the City has not pursued purchasing additional kits to grant to additional public schools; instead promoting alternative fundraising strategies.

IS YOUR ROOF RUNOFF POLLUTED?

In the City's Industrial and Commercial Inspection program, key activities have been implemented to address copper either exclusively or among the array of potential pollutants. A fact sheet regarding rooftop sources of copper pollution was again distributed to select industrial facilities. The City also continued its "NOI Filers" project. This activity aimed to increase awareness among industrial facilities of their obligations under the State's General Industrial Activities Stormwater Permit (GIASP) by providing them with BMPs and information alerting them to the requirements. Review of this information has already been successfully incorporated into routine inspections and the City reports to the Water Board a list of facilities that have not yet filed under the GIASP.

The City provides BMP information for its residential and commercial constituents on various actions they can take to reduce or eliminate the exposure and discharge of copper from their activities. Materials are distributed via inspection, at the City's planning and permitting offices, at outreach events, and on the City's website.

Trash (TRA)

This program element is implemented pursuant to the Program's Trash Work Plan and provision C.1 of the permit. The purpose of the Trash program is to address litter and illegal dumping that threatens to pollute urban waterways. Activities associated with the Trash program are broken up into four major areas: assessment, prevention, removal, and pilot studies.

The City continued to assess the level of trash at various sites in the City. Assessments were performed using one of two standard protocols selected and utilized by all co-permittees in the Santa Clara Valley. Assessments provide information regarding the type and potential sources of trash found in and around urban creeks and offered insight into the effectiveness of existing trash management practices. The trash assessments revealed that existing trash management activities are sufficient at many locations, but that enhancements are needed in others. The City is exploring additional assessment tools to better characterize the levels and characteristics of litter across the City as a whole.

The City strongly advocates litter prevention, and actively participates in the Silicon Valley Anti-Litter Campaign and BASMAA's upcoming Regional Advertising Campaign focusing on litter prevention. The City is also exploring long-term illegal encampment solutions with the County's Blue Ribbon Commission on Housing and Homeless Issues, as well as considering policies which curtail specific items which disproportionally make up litter, such as plastic shopping bags.

Contractors installing a catch basin screen on Mt. Vista Drive for the structural trash pilot

The City of San José and the Santa Clara Valley Water District (District) expanded efforts associated with the Memorandum of Agreement for Trash Prevention and Removal (Trash MOA), which began in FY 04-05. The Trash MOA was revised to incorporate illegal encampment cleanup activities, some of which were taking place on an ad hoc basis. The revised Trash MOA includes weekly encampment cleanup activities on waterways in the City, up to 10 monthly cleanups of large and active illegal encampments, as well as increasing the number of City-District partnered cleanups to a maximum of five per year. During this reporting period, partnered clean-up projects on the Coyote Creek and the Guadalupe River removed over 28 tons of debris from these waterways, with one of the cleanups removing 24 tons.

The City began piloting catch basin inserts (screens) as a structural trash control technique. These screens could serve as an additional method to further prevent trash and other debris from entering the City's stormwater conveyance system and, ultimately, our local creeks.

Approximately 85 inserts were installed in FY 07-08 as part of a multi-year structural trash management pilot study. Preliminary results indicate that the screens are effective at preventing material from entering the stormwater conveyance system without significantly effecting catch basin function and capacity. Preliminary results to-date also indicate that the far majority of material captured is leafy debris. A final report on this will be completed next year.

Monitoring (MON)

Monitoring activities required in the stormwater permit are generally implemented at the Program level. However, the City participates directly in monitoring activities region-wide, including the San Francisco Bay Regional Monitoring Program, through participation in the Sources, Pathways and Loadings Workgroup and Technical Committee, SCVURPPP Multi-year Monitoring Program, various regional and Program-focused investigations of pollutants and sources to the storm drain system, and special studies in support of TMDLs.

Program staff monitoring Calabazas Creek

This year, City staff actively participated in planning and review activities for the Regional Monitoring Program (RMP), serving on the RMP Technical Committee and as members of the Sources, Pathways and Loadings workgroup. Financial support for the RMP has continued since its inception. City staff also serves on the Guadalupe Mercury TMDL Workgroup, representing the City and the Watershed Management Initiative's Watershed Assessment and Monitoring Subgroup. The City reviewed special study reports and provided in-kind services in support of the Guadalupe Mercury TMDL.

Municipal Compliance (MC)

This program element summarizes the City's efforts to train City staff on pollution prevention practices and to ensure that City facilities comply with storm water requirements. In FY 07-08, the City held over 90 sessions on various topics to ensure that City staff received training on procedures and issues related to storm water programs. Again the City retained a consultant that conducted the annual erosion and sediment control training for Building, Environmental, and Public Works construction inspectors. Approximately 108 City staff attended the training. Watershed Enforcement inspectors completed numerous trainings that included: 1) fats, oil, and grease; 2) industrial discharge inspection procedures; 3) hazardous waste operations; 4) traffic safety; and crime scene investigation. Numerous trainings were conducted on post-construction BMPs as well as workshops on vegetated swales, green building designs, and design techniques to reduce the amount of pesticide use in new project landscape. As part of the catch basin trash insert pilot study, trainings were conducted by Urban Runoff staff to City storm drain inlet cleaning crews in DOT to inform them

Vegetative swale training for City staff

how the inserts function and how to clean them of leaves and debris.

To ensure stormwater compliance at priority City properties, Corporation Yards were routinely inspected for stormwater practices. An annual inspection was conducted at each of the five Corp Yards during March and April 2008. Three hazardous material inspections at each of the Yards and the Municipal Garage, which include stormwater issues, were also conducted in FY 07-08. Corporation Yard Stormwater Pollution Prevention Plans (SWPPPs) were revised as necessary during FY 07-08. Corporation Yard SWPPP training was incorporated into the annual crew trainings, with additional SWPPP training conducted in June 2008 for the remaining Corp Yard maintenance staff not captured in the annual crew trainings. Approximately 95% of the employees surveyed responded that the training adequately explained a SWPPP. The combination of site inspections and the semi-annual meetings appears to be working well. The concerns identified in the Yards' inspection reports are usually minor and resolved swiftly.

Public Information / Participation (PIP)

This program is implemented in accordance with provision C.4 and includes general outreach, targeted outreach, educational programs, and public participation activities. The City has a robust and broad-based public information and public participation program, utilizing many different methods to best deliver stormwater pollution prevention and watershed protection messages to a wide array of audiences. Conducting outreach to the community and providing opportunities for participation in water quality protection activities are critical to evoking the behavior changes needed to manage stormwater quality. They are also important for garnering the support needed to continue and expand services and programs.

Environmental Specialist with community members at National Night Out at Emma Prusch Park

The City participates in and supports a wide variety of stormwater outreach and education activities, including many in collaboration with other local and regional agencies. Highlights for FY 07-08 include: participating in the Silicon Valley Anti-Litter Campaign; providing access and supplies for multiple creek clean-up sites; participating in dozens of community events; training teachers and providing watershed curriculum materials; and providing training sessions for developers on construction requirements. Outreach continues to be a vital tool for inspectors, allowing for direct education of polluters and potential polluters. Education is the first step in the City's Enforcement Response Plan. Educating the youth of San José continues to be a priority, with multiple programs targeting students, teachers, administrators, and school communities with watershed education and green practices.

The City also actively supports Program-wide and Bay Area-wide outreach and education activities, including IPM outreach, mercury outreach, regional media relations, and the Watershed Watch campaign. Coordinating outreach activities with the Program and Bay Area-

wide efforts enables the City to deliver pollution prevention messages more effectively and at reduced cost.

Permit Reapplication

The City's current NPDES permit was adopted in February 2001 for a five-year period. The permit was amended in October 2001 and July 2005, with both amendments relating to the New and Redevelopment stormwater treatment and hydromodification provision, also known as Provision C.3. The permit has been administratively extended since February 2006, pending the adoption of the Bay Area-wide Municipal Regional Permit.

In late 2005, the Water Board embarked on a multi-stakeholder process to craft an NPDES permit, called the Municipal Regional Permit (MRP) that would apply to all municipal stormwater dischargers in the Bay Area. In the past, NPDES permits were issued separately to Bay Area stormwater programs with staggered adoption dates, which often resulted in uneven and inequitable requirements.

In December 2007, the Water Board released the MRP Tentative Order, which included a 60-day comment period. City staff dedicated numerous hours analyzing the Tentative Order, briefing stakeholders, and preparing written responses. City staff submitted both technical comments coordinated by the Environmental Services Department as well as legal comments from the City Attorney's Office in February 2008. City staff and elected officials also testified at a Water Board public hearing in March 2008. City staff will continue to participate in the MRP process through the Program, BASMAA, and individually as a City. Water Board staff continues to anticipate adoption of the MRP in late 2008.

Conclusion

The City of San José is committed to managing and protecting stormwater quality and dedicates resources to a variety of activities designed to address stormwater quality issues. The City actively participates in many local and regional efforts designed to leverage the most value for its resources and citizens. With the new Council-adopted Green Vision, the City is a leader in bold, proactive environmental policies and continues to meet or exceed its permit-mandated obligations.

City of San José
FY 2007-2008 ANNUAL REPORT

Certification Statement

"I certify, under penalty of law, that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to ensure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted, is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

1. ICID: Illicit Connection / Illegal Discharge Inspection

1.A ICID Work Plan Self Evaluation Matrix

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
ICID 1	**Response to Complaints** The City of San José will respond to complaints regarding ICID dumping activities into the storm drain system and will ensure that the activity has ceased or is on a time schedule to cease.			
ICID 1.A	Update database system to track ICID complaint information.	Done FY 02-03	Done FY 02-03.	ESD-WE
ICID 1.B.1	Document complaint activity, the number of ICID complaints that the City received, and that the activity has ceased or is an allowable discharge.	Annually	Done FY 07-08. See 1.D: *ICID Summary Tables/ Additional Information.*	ESD-WE
ICID 1.B.2	Prepare draft complaint activity data tables to review trends and to facilitate timely evaluation of the data.	Annually, Q3	Done FY 07-08.	ESD-WE
ICID 1.C	Document to the Water Board annually follow-up activities from each ICID complaint response.	Annually	Done FY 07-08. See 1.D: *ICID Summary Tables/ Additional Information.*	ESD-WE
ICID 1.D.1	Review effectiveness of standard operating procedures for responding to ICID complaints.	Ongoing	Done FY 07-08. New database was finalized. Procedures are being updated to reflect the new database.	ESD-WE
ICID 1.D.2	Refine and implement standard operating procedures for responding to ICID complaints/referrals.	As Needed	Done FY 07-08. Current procedures are working well. *See comment in ICID 1.D.1*	ESD-WE
ICID 1.E	Work with SCVURPPP to refine administrative procedure for providing referrals to the Regional Board.	Pending Implementation by Program	Pending activity by Program ICID AHTG.	ESD-WE, Program
ICID 1.F	Revise standard operating procedures to incorporate results of ICID 1E.	Pending Implementation by Program	Pending completion of ICID 1E.	ESD-WE, Program
ICID 2	**Investigations** The City of San José will conduct investigations of high priority areas. High Priority is defined as areas with a high potential for non-stormwater discharges to the City's collection system.			
ICID 2.A	Target areas for monitoring by identifying high priority areas, primary types and sources of ICID pollution based on complaints, historical inspection records, inspector knowledge, and monitoring information.	Annually	Done FY 07-08. Priority areas based on complaints received. All complaints are investigated.	ESD-WE
ICID 2.A.1	Perform GIS analysis on frequently occurring ICID sources and/or types.	Done FY 03-04	Done FY 05-06 and FY 07-08. In FY 07-08, the highest number of complaints received were in zip code 95112. See 1.D: *ICID Summary Tables/ Additional Information.*	ESD-UR
ICID 2.A.2	Perform outreach in targeted areas based on GIS analysis and other analyses as available. See PIP 2 for details.	Annually	Done FY 07-08. Outreach was performed in eight different Strong Neighborhood Initiative areas. See 1.B: *ICID Program Evaluation, Targeted Outreach.*	ESD-UR & WE

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
ICID 2.B	Conduct investigations of high priority areas based on ICID 2A.	Ongoing	Done FY 07-08. See 1.D: *ICID Summary Tables/ Additional Information.*	ESD-WE
ICID 2.C	Document to the RWQCB that high priority areas have been conducted, per Table 2 in revised reporting format.	Annually	Done FY 07-08. See 1.D: *ICID Summary Tables/ Additional Information.*	ESD-WE
ICID 3	**Inspector Training** The City of San José will ensure that ICID inspectors are adequately trained in inspection procedures, documentation, and enforcement related to stormwater pollution prevention.			
ICID 3.A	Conduct annual training for ICID inspectors.	Annually, Q1	Done FY 07-08. See 13.D: *Municipal Employee Training Summary* for details.	ESD-WE
ICID 3.B	Provide and document on-the-job training and other training opportunities, such as inspection workshops.	Ongoing	Done FY 07-08. See 13.D: *Municipal Employee Training Summary* for details.	ESD-WE
ICID 3.C	Review inspection training protocols to identify new training opportunities, approaches, and materials.	Annually	Done FY 07-08.	ESD-WE
ICID 4	**Outreach and Technology Transfer** The City of San José will distribute outreach and technology transfer material containing applicable control measures and/or BMPs to target parties responsible for ICID activities.			
ICID 4.A	Determine need for new and/or revised outreach and technology transfer material by getting feedback from inspectors regarding 1) continuing problem activities; 2) discharge types; 3) monitoring and complaint data; and 4) usefulness of existing outreach and technology transfer material.	Ongoing	Done FY 07-08. See 14.D: *PIP Activities Table* for details on ICID outreach.	ESD-MarComm ESD-UR
ICID 4.B	Develop, audit and/or modify existing outreach material, as needed, based on report developed under ICID 4A.	As Needed	Done FY 07-08. Feedback from inspectors is collected during regular staff meetings. Needs are identified and responded to as priorities and budget allow.	ESD
ICID 4.C	Document to Water Board that outreach and technology transfer material and/or BMPs have been distributed.	Annually	Done FY 07-08. See 14.D: *PIP Activities Table* for a count of outreach and technology transfer materials distributed as part of inspection activities.	ESD-UR
ICID 4.D	Develop and implement standard operating procedures to gather customer feedback on ICID services.	Development Done FY 02-03 Implementation Ongoing	Done FY 07-08. Customer feedback cards are routinely distributed to ICID complainants. See Section 14 A, Item PIP 2.B 1 for details.	ESD-WE
ICID 5	**SOPs Effectiveness Evaluation** The City of San José's Watershed Enforcement staff will review and evaluate the effectiveness of its SOPs in responding to complaints regarding illicit connections and illegal discharge dumping activities into the storm drain system.			
ICID 5.A	Document and evaluate effectiveness of SOPs.	Annually	Done FY 07-08 and ongoing.	ESD-WE
ICID 5.B	In Annual Report, document and evaluate what worked well and what needs improvement.	Annually	Done FY 07-08. See 1.B: *ICID Program Evaluation.*	ESD-WE

1.B ICID Program Evaluation

The City's Environmental Services Department (ESD) responds to complaints regarding illegal discharges or threats of discharge to the storm sewer system. The total number of incidents increased slightly from 672 last year to 706 this year as shown in Table labeled "Incident Types by Potential Source of Incident" in 1.D: *ICID Summary Tables / Additional Information*. Figure 1, *Number of Incidents by Type* illustrates distribution of incidents according to categories such as dumping non-hazardous, tracking soil, and vehicle and equipment leaking. Figure 2 *Number of Incidents by Category* illustrates the distribution of ICID incident types for residential, commercial, industrial, automotive, food, construction, and public facilities. As in past years, vehicle and equipment leaking and tracking soil continue to be the two most common types of illegal discharges to the storm sewer system. However, the total number of calls is down approximately 15% from FY 04-05 which may be an indication that resident's are more aware of the ICID program, specifically that dumping anything into the stormdrain is prohibited and detrimentally affects the local creeks and watershed.

Looking back at the trends of the leading incident type - vehicle and equipment leaking - the number of violations related to this incident type decreased by approximately 25% since FY 04-05. This may be due in part to increased outreach in residential areas. Data analysis shows that, a significant proportion, 82%, of the vehicle and equipment leaking violations originate in residential areas. This may be due to residents conducting car repair, oil changes, and other auto-related activities, either in the street or in the driveway, which may result in liquids leaking onto the street and into the stormdrain. Whereas auto-related activities conducted in commercial or industrial areas are usually done by professionals in enclosed buildings which results in very little, if any leaking onto the street or into the stormdrain. Recent intensive outreach efforts by ESD staff in the Strong Neighborhood Initiative (SNI) residential areas may be a contributing factor to the high number of calls related to these incidents originating in residential areas. Additionally, ESD staff inform residents that car repair and dumping anything, including oil, and other auto-related materials into the street or stormdrain are prohibited by City ordinance.

Tracking soil continues to be a leading incident complaint, with 42% of these complaints originated in residential areas, a 4.5% increase from FY 07-08. Again, this may be due to increased outreach and education conducted by ESD staff in SNI areas. Residents' awareness of illegal discharge issues, such as tracking soil from construction sites onto streets, may have increased and resulted in a high number of calls related to this incident type compared to other incidents such as RV waste. In an effort to discourage the occurrence of, and to draw attention to, potential soil tracking at construction sites, the City piloted highly visible fence-mounted signs at two construction sites. The signs alerted readers to report to the City any mud that they may see on the street. This new initiative may also have been responsible for the continued high number of calls related to tracking soil. The City will continue and expand the pilot of fence-mounted signs at construction sites. In order to address this continuing issue with construction sites, the City hired a third inspector in FY 07-08 in order to better monitor and correct issues at construction sites related to stormwater.

To make it easier for complaining parties to file a complaint, the City began accepting ICID complaints via the internet in January 2008. Staff developed an online reporting form, located on the City's stormwater internet site at http://www.sanjoseca.gov/esd/stormwater/stormdrain-complaint.asp. Complaints received from this form are entered into the system and responded to by Watershed Enforcement Inspectors the same as phoned-in complaints. The City will continue promoting this new means of registering complaints through existing outreach channels.

Targeted Outreach

In FY 07-08, City staff conducted outreach to eight neighborhoods through direct outreach by attending community meetings in the following SNI areas: Tully/ Senter, 13th Street, KONA, University, Spartan Keyes, Edenvale/ Great Oaks, Washington, and Market-Almaden. These areas were selected because they are proximate to the zip code areas that had the highest volume of calls in preceding years. The neighborhood groups gladly accepted the distributed information and usually asked questions of the City staff concerning ICID and associated environmental issues.

A zip code analysis of ICID complaints for FY 07-08 shows the downtown zip code 95112 with the highest number of calls. A number of the SNI meetings attended this year were in the 95112 zip code, such as 13th Street, University, and Tully/Senter. The increased number of calls may be a result of education and awareness activities targeted at downtown residents. Residents are aware of the program and are more apt to call in violations, and are less likely to conduct violations themselves. The SNI continues to be an excellent venue to reach City residents. Staff will continue to do targeted outreach at these existing venues, in addition to providing articles to Neighborhood Associations for their monthly newsletters, in order to educate residents with the intention of decreasing the number of illegal discharges to the storm sewer system. Information about the SNI program can be found at http://www.strongneighborhoods.org.

Thermoplastic Stencils

This fiscal year, the City installed 3,076 thermoplastic stormdrain stencils as a pilot project. The new stencils are highly reflective and are expected to be more durable and longer lasting than the traditional painted stencils the City uses. The stencils were placed in areas characterized by high ICID complaints received in FY 05-06. City staff will monitor the longevity of these stencils and trends in incident complaint calls for continuous program improvement. Please see PIP 14.B. Program Evaluation section for more details.

1.C ICID Response to Water Board Comments

No comments received from Water Board on this Program Element.

1.D ICID Summary Tables / Additional Information

2. IND: Industrial & Commercial Discharges

2.A IND Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
IND 1	**Notice of Intent (NOI) Filers** The City of San José will conduct inspections of those facilities that have filed an NOI with the State and appear on a list provided by the State. An NOI is required to be filed with the State by companies that are considered to have a high potential to contaminate stormwater and are classified under certain standard industrial classification (SIC) codes.			
IND 1.A	Annually, obtain NOI filer database from State with annual information, review information and identify new NOI facilities for inspection the following year.	Annually	Done FY 07-08.	ESD-WE
IND 1.B	Conduct and document initial inspections of NOI Filers within one year using the inspector checklist form to determine exposure and assign a future inspection frequency to each facility accordingly. Document whether the facility had submitted an NOI, and whether a SWPPP and a SWMP were on site.	Ongoing	Done FY 07-08 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 1.C	Conduct and document annual inspections of facilities determined to have exposure in accordance with inspection frequency schedule.	Ongoing	Done FY 07-08 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 1.D	Conduct and document inspections of facilities that need to file an NOI at least once every five years and in accordance with the inspection frequency schedule identified in IND 3.	Ongoing	Done FY 07-08 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 1.E	Maintain the database to track the inspection information from the inspector checklist and to include all NOI filer SIC codes required by the Industrial Activities Stormwater General Permit.	Ongoing	Done FY 07-08 and ongoing.	ESD-WE
IND 2	**Non-Filer Investigations** The City of San José will inspect industrial facilities that may be subject to general permit requirements but are not found on the NOI filer list provided by the State.			
IND 2.A	Identify industrial facilities that conduct activities with the SIC codes listed in the IND SOPs.	Annually	Done July 2007: Determined the Inspection schedule for the year based on the IND SOP.	ESD-WE
IND 2.B	Develop a list of facilities targeted for inspection during upcoming year that may be subject to general permit requirements for NOI based on business licenses, etc.	Annually	Done, July 2007: Determined the Inspection schedule for the year based on the IND SOP.	ESD-WE
IND 2.C	Conduct and document initial inspections of industrial facilities with the SIC codes listed referenced in IND 2A, using the inspector checklist form to document whether the facility constituted a potential threat to discharge pollutants to the storm drain collection system, whether	Ongoing	Done FY 07-08 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
	the facility had submitted an NOI, and whether a SWPPP and a SWMP were on site. Maintain database.			
IND 2.D	Conduct and document annual inspections of facilities determined to have exposure in accordance with implementation schedule. Add the facility to appropriate database(s) and assign an inspection frequency. If the facility inspected is determined to need to file an NOI and is not able to provide an NOI, SWPPP or SWMP, refer to the Water Board.	Ongoing	Done FY 07-08 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 2.E	Work with the Program's Industrial Inspection Ad Hoc TG on an Administrative procedure for providing referrals to the Regional Board and document providing referrals to the Regional Board for facilities with significant problems.	Pending Implementation by Program	Pending activity by Program IND AHTG.	ESD-WE, ESD-UR
IND 3	**City Regulated Facilities** The City of San José will conduct inspections of City Regulated commercial facilities as identified below: Food service facilities: 2 or more AOCs* over a rolling three year time period - Every year 1 AOC over a rolling three year time period - Every two (2) years 0 AOCs over a rolling three year time period - Every three (3) years All Other City Regulated facilities: 2 or more AOCs* over a rolling five year time period - Every year 1 AOC over a rolling five year time period - Every two (2) years 0 AOCs over a rolling five year time period but have exposure - Every five (5) years 0 AOCs over a rolling five year time period with no exposure or potential for exposure - No further inspections Facilities for which a referral or ICID complaint is received: As soon as practicable for violations and every year until they meet the above criteria. *Area of Concern (AOC) = A violation based on the San José Municipal Code 15.14.530 issued to a facility during a stormwater inspection.			
IND 3.A	Determine industrial/commercial facilities identified in the IND SOPs for inspection in each FY.	Annually, Q1	Done, July 2007: Determined the Inspection schedule for the year based on the IND SOP.	ESD-WE
IND 3.B	Conduct and document inspections of City Regulated facilities, other than food service facilities, at least once every five (5) years in accordance with the inspection frequency schedule. If determined to have no impact or no potential for pollution, will not be scheduled for future inspection.	Ongoing	Done FY 07-08 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 3.C	Conduct and document inspections of City Regulated food service facilities at least once every three (3) years. Initial approved performance standards require inspections every three years.	Ongoing	Done FY 07-08 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 3.D	Conduct and document inspections for which a referral or complaint was received within five days of complaint received and second inspection within one year.	Ongoing	Done FY 07-08 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 3.E	Develop a database to track the inspection information	Done FY 02-03	Done FY 02-03.	ESD-WE

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
	from the inspector facility inspection report.			
IND 3.E.1	Implement new Environmental Enforcement Data Management System.	Done FY 03-04	Done FY 03-04.	ESD-WE
IND 3.E.2	Prepare draft data inspection tables to review data trends and to facilitate timely evaluation of the data.	Annually, Q3	Done FY 07-08	ESD-WE
IND 3.F	Maintain database to track inspection information from inspector facility inspection report and to include new industrial program categories.	Ongoing	Done FY 03-04.	ESD-WE
IND 3.G	For B, C, D, and E, collect information during inspections on the potential for stormwater pollution at City Regulated facilities in order to determine the appropriate inspection frequency for the various facilities.	Ongoing	Done FY 07-08 and ongoing. Areas of Concern (AOC) determine inspection frequency. AOCs are identified during inspection.	ESD-WE
IND 3.H	Develop an inspection frequency plan to track frequency of inspections. Implement & update, as needed, the inspection frequency plan.	Development: Done FY 01-02 Ongoing Updated As Needed	Done FY 01-02 and ongoing. Areas of Concern (AOC) determine inspection frequency. AOCs are identified during inspection.	ESD-WE
IND 4	**Compliance** The City of San José will conduct industrial/commercial inspections to determine the existence of discharges or potential discharges which are illegal under local ordinances. The facility operator will be notified of observed areas of concern to be corrected and/or if official action on violations is necessary, it will take place under local enforcement procedures.			
IND 4.A	Document facilities that have enforcement actions and the type of enforcement actions conducted for the existence of discharges or threatened discharges that are illegal under local ordinances.	Ongoing	Done FY 07-08 and ongoing. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE
IND 5	**Training** The City of San José will ensure that industrial/commercial inspectors are adequately trained in inspection procedures, documentation, and enforcement related to stormwater pollution prevention.			
IND 5.A	Conduct annual training for IND inspectors.	Annually Q1	Done FY 07-08. See 13.D: *Municipal Employee Training Summary* for details.	ESD-WE
IND 5.B	Maintain a training plan and provide and document on-the-job training and other training opportunities such as industrial/commercial inspection workshops.	Ongoing	Done FY 07-08 and ongoing. See 13.D: *Municipal Employee Training Summary* for details.	ESD-WE
IND 5.C	Review inspection training protocols to identify new training opportunities, approaches, and materials.	Annually	Done FY 07-08 and ongoing. See 13.D: *Municipal Employee Training Summary* for details.	ESD-WE
IND 6	**Outreach** The City of San José will help develop and distribute outreach and technology transfer material containing applicable control measures and/or BMPs to industrial/commercial facility operators responsible for IND activities.			
IND 6.A	Identify and list existing outreach and technology	Annually	Done FY 07-08. Outreach materials are listed in Appendix	ESD-UR

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
	transfer material.		A of the City's URMP.	
IND 6.B	Distribute applicable outreach and technology transfer material to industrial/commercial facility operators. Document to the Water Board that outreach and technology transfer material and/or BMPs have been distributed, as needed, to industrial/commercial facility operators.	Distribution: Ongoing See PIP Program Element in Annual Report	Done FY 07-08 and ongoing. See 14.D: *Outreach Materials Distributed* for a count of outreach and technology transfer materials distributed as part of Inspection activities.	ESD-UR
IND 6.C	Determine usefulness of outreach and technology transfer materials by obtaining feedback from industrial/commercial facilities. Obtain feedback from inspectors about the effectiveness of existing outreach and technology transfer material and develop and/or modify existing outreach material.	As Needed	Done FY 07-08. Feedback from inspectors is collected during regular staff meetings. Needs are identified and responded to as priorities and budget allow.	ESD-UR
IND 7	**NOI Filers Effectiveness Evaluation** The City of San Jose's Watershed Enforcement staff will review and evaluate the effectiveness of its inspections procedures and database tracking system.			
IND 7.A	Document and evaluate the effectiveness of NOI Filers inspections procedures.	Annually	Done FY 07-08. NOI filers are inspected in a similar manner as all facilities. These procedures were updated to include a better mechanism for determining whether a facility needs to file for an NOI if conditional.	ESD-WE
IND 7.B	Document and evaluate the effectiveness of the NOI Filers database tracking system.	Annually	Done FY 07-08. The NOI filer database tracking system identifies whether facilities are conditional or not and includes a special button for indicating if there is any potential for exposure.	ESD-WE
IND 7.C	Document and evaluate what worked well and what needs improvement.	Annually	Done FY 07-08. See 2.D: *IND Summary Tables/Additional Information.*	ESD-WE

2.B IND Program Evaluation

The goal of the IND Program Element is to reduce stormdrain pollution from commercial and industrial facilities through inspections. The Watershed Enforcement and Fats, Oils and Grease (FOG) Sections of the Watershed Protection Division inspected more than 4,500 businesses in San José this year.

Increase in Businesses Subject to Inspection

As shown in 2.D: *IND Summary Tables,* the total inventory of facilities in the City subject to inspection in FY 07-08 experienced another significant spike, increasing from 8,936 in FY 06-07 to 13,034 in FY 07-08. This dramatic increase is due primarily to an increase in the number of businesses that registered for business licenses through the City Finance Department due to a business license amnesty and the field data collection on businesses.

The City also experienced a significant increase in businesses subject to inspection in FY 05-06. At that time, the total inventory of facilities in the City subject to inspection had almost doubled over three years from 4,991 in FY 03-04 to 9,229 in FY 05-06. The City began to integrate this increased workload by prioritizing and phasing initial inspections, shifting resources, reorganizing, and adding staff. The FOG program which focuses on food service facilities, was part of a recent reorganization done in part to address the high volume of businesses in FY 05-06. In order to successfully manage the additional 4,000 businesses into next fiscal year's inspection workload, staff is exploring the use of these previously successful strategies as well as other options such as initial mail outs to home based businesses and other businesses that may pose a low threat to stormwater quality.

Enforcement Actions Taken

Over 4,000 enforcement actions were taken in FY 07-08, down 2% from last fiscal year. This does not include BMPs distributed during inspections, which increased by 19% over last fiscal year. This is due in part to the additional 600 businesses that were inspected over last year and due to the development of new useful BMPs. While the overall level of non-educational enforcement actions remained level, the number of administrative citations issued doubled. Inspectors are proactive in the distribution of educational materials, and will elevate enforcement to higher levels when the situation requires it.

A further analysis of the data revealed that food service facilities, comprising approximately 30% of the overall IND workload, had half of the Administrative Citations issued. The City started a new FOG program to work exclusively with food service facilities (see below). The City's intent is to educate and work with this business type in order to reduce the number of enforcement actions, such as Administrative Citations, and ensure that appropriate BMPs are used in order to protect the storm drain system.

Fats, Oils and Grease (FOG) Inspection Program

A highlight this fiscal year is the second successful year of the City's FOG Inspection Program, in which over 1,300 food service facilities were inspected and about 7,800 BMPs were distributed. Though the City has conducted comprehensive food service facilities inspections over the past five years, the FOG Program dedicates specific resources and staff to inspect stormwater and FOG-related practices at food service facilities. This is the second year that the program focused particularly on integrating the Sewer System Management Plan (SSMP) requirements and enhancing the business' general awareness of stormwater issues related to food service facilities.

In addition to regular inspections, FOG inspectors conducted 40 investigations of 67 facilities that were potential contributors to partial sewer blockages or sanitary sewer overflows. These investigations are done at the request of the City's Department of Transportation sewer crews, or via ICID complaints at food service facilities. These investigations identified 141 AOCs and resulted in the issuing of two administrative citations. The resolution of partial sewer blockages and sanitary sewer overflows ensures that wastewater does not enter the storm sewer system.

ESD staff conducted 352 plan check reviews of proposed new food service facilities. In the plan check role, staff reviews plans of proposed food service facilities submitted to the Building Division of the Planning, Building and Code Enforcement Department. ESD staff checks the plans to ensure the facilities include the necessary equipment, e.g. grease pumpers and vapor hoods, to prevent sewer blockages and overflows.

The FOG program continues to develop new and revise existing outreach material. In FY 07-08 the Maintenance Log sheet was revised to better organize the data it tracks. A new fact sheet listing exhaust hood cleaning servicers, grease trap services, and grease interceptor cleaning services was also developed." Additionally, City staff are collaborating with the Bay Area Pollution Prevention Group (BAPPG) to develop regionally consistent BMPs for FOG.

City staff have given presentations about the City's FOG Inspection Program at various venues in FY 07-08. Presentations were given at the California Water Environment Association's Pretreatment, Pollution Prevention, and Stormwater (CWEA P3S) board meeting, a Bay Area Pollution Prevention Group (BAPPG) meeting, and at a CWEA Santa Clara Valley Section training meeting.

City staff began developing a FOG website to provide food facility owners the information they need to understand why protection of the storm sewer system is a vital part of their business operations. The FOG website will also include tools and links to various BMPs, and is expected to go live in FY 08-09. In addition, the FOG Inspection Program's sanitary sewer inspections will be expanded to cover FOG-generating facilities in the WPCP tributary area. Any storm sewer-related issues noted during the inspections will be referred to the appropriate agency.

BMP Distribution

More than 12,500 Best Management Practice brochures were distributed by Inspectors in FY 07-08, an increase of 17% from FY 06-07. City Inspectors are very proactive in distributing BMP brochures, as education increases compliance rates and minimizes the number of future AOCs a facility has. Therefore, businesses that do not have any AOCs may still be given BMP brochures by inspectors to educate the business on pollution preventing best management practices. BMP brochures are available in multiple languages, providing facilities with the tools needed to adopt and maintain good practices.

2.C IND Response to Water Board Comments

No comments received from Water Board on this Program Element.

2.D IND Summary Tables / Additional Information

IND Summary Tables

Overall Facility Inspection Totals	07-08	06-07	05-06	04-05	03-04	Description of item
Facilities Subject to Inspection	13,034	8,936	9,229	6,164	4,991	All facilities in the database that require inspections to meet the performance standard, whether or not they are scheduled for inspection in the current year. This includes both city-regulated and GIASP facilities. This excludes facilities that the City has determined are not subject to future inspection based on a determination that there was no exposure, incorrect SIC, etc.
Facilities Scheduled for Inspection in reporting year	4,538	3,929	3,490	3,020	3,022	All facilities that were determined to need inspection by existing schedule date and imports from business license, Harris Info, and NOI filers state listing for reporting year.
Facilities Inspected in FY 07-08	4,551	3,930	3,506	3,029	2,872	All facilities subject to inspection that were inspected. Also described as number of cases.
Other City Regulated Facilities	82	67	85	51	26	These facilities had an Illicit Connection Illegal Dumping complaint filed against them, so now are scheduled to receive an industrial/commercial inspection as per IND 3D.
Facilities Scheduled for Inspection next fiscal year	4,550	4,469	4,000	3,237	3,144	All facilities subject to inspection for the following fiscal year.

Status of GIASP Implementation	07-08	06-07	05-06	04-05	03-04	Description of item
Board Referrals						
New NOI Filers	10	14	13	4	20	Total industrial facilities in San José with new NOI filed according to Water Board Database as of July 2004. Prior to 02-03, data included all Active NOI filers; not just new ones.
New NOI Filers Inspected	10	14	7	4	17	Of the facilities referred to the City by the Water Board, the number inspected during the fiscal year
Inspections						
Potential NOI Facilities	902	864	840	746	521	Of the facilities scheduled for inspection during the fiscal year, the number that may be subject to GIASP provisions
Have filed	64	45	52	96	126	Of the facilities inspected, the number that have filed.
SWPPP or SWMP on-site	81	82	81	87	149	Per IND 1B and IND 2C, the number of facilities having a SWPPP or SWMP on-site. Some facilities may have an informal plan or a formal SWPPP, even though they do not need to file NOI.
Need to file	24	35	59	90	26	Of the facilities inspected, the number determined to need to file in accordance with the GIASP. These facilities are listed in 2.D: *Companies Requiring NOI Based on SIC But Have Not Filed* and 2.D: *Companies Requiring NOI Based on Exposure But Have Not Filed.*
Do Not Need to File (Conditional - No Permit Required)	635	508	451	560	279	All facilities that were determined to need an inspection per the GIASP with findings of no NOI required.
Closed/Moved Facilities	179	276	278	248	521	NOI facilities no longer in operation.

Enforcement Actions Summary

Total Enforcement Actions Taken	07-08	06-07	05-06	04-05	03-04	Description of item
AOCs	2,254	2,263	1,821	2,591	2,624	Area of concern with a compliance date and any enforcement action activity.
BMPs	12,684	10,655	8,912	6,890	5,796	Number of BMPs issued as part of Enforcement.
Verbal Warning	1,384	1,402	1,070	1,280	1,927	Verbal warning providing information for corrective actions.
Official Warning Notice	440	500	366	384	162	Written letter providing information for corrective actions (In San José this is an Official Warning Notice.)
Administrative Action	0	0	0	0	0	Official letter describing requirements and consequences (in San José this is a Compliance Order. They are no longer used.)
Administrative Action with Penalty &/or Fine	18	9	5	15	3	Administrative actions, including fines (In San José this is an Administrative Citation.)
Criminal Action	0	0	0	0	0	Legal actions
Referral for Enforcement	0	0	0	0	0	Refer case to agency with enforcement powers
Referral for other reason	0	0	0	0	0	Refer case to internal or external agency for clean-up, information or jurisdictional reasons.

Highest Enforcement Action Taken	07-08	06-07	05-06	04-05	03-04	Description of item
No Enforcement Action	1,243	1,438	1,169	703	835	Cases with no Enforcement Action taken
BMPs Distributed	2,126	1,216	1,342	758	850	Cases with BMPs Distributed as the highest Enforcement Action to achieve compliance
Verbal Warning	826	858	686	1,013	1,064	Cases with Verbal Notice as the highest Enforcement Action to achieve compliance
Warning Notice	341	410	306	589	120	Cases with Warning Notice as the highest Enforcement Action to achieve compliance
Administrative Citation	15	8	3	0	3	Cases with Administrative Citation as the highest Enforcement Action to achieve compliance
Criminal Action	0	0	0	0	0	Cases with Criminal Action as the highest Enforcement Action to achieve compliance
Total	4,551	3,930	3,506	3,063	2,872	All facilities subject to inspection that were inspected. Also described as number of cases.

Inspections Required for Compliance	07-08	06-07	05-06	04-05	03-04	Description of item
One Inspection	3,376	2,907	2,807	2,055	2,057	Number of Cases requiring one inspection to achieve compliance.
Two Inspections	848	779	571	681	535	Number of Cases requiring two inspections to achieve compliance.
Three Inspections	229	192	96	204	158	Number of Cases requiring three inspections to achieve compliance.
Four Inspections	69	39	18	77	59	Number of Cases requiring four inspections to achieve compliance.
Five Inspections or More	29	13	14	46	63	Number of Cases requiring five inspections or more to achieve compliance.
No Inspections	0	0	0	0	0	Number of Cases requiring zero inspections (These are duplicates and facilities determined to be non-existent by Business List and phone calls)
Total	4,551	3,930	3,506	3,063	2,872	All facilities subject to inspection that were inspected. Also described as number of cases.

IND Facility Categories for the City of San José

(Developed by AHTG to use for Program-wide Reporting, September 7, 2001 Memo's 17 categories + 4 City categories)

Category #	Program Category	Current AHTG Municipal Category	Scheduled	Actual
1	Automotive	Automotive sales, engine and body repair, gas stations, car washes, parking, vehicle services	663	669
2	Food Service	Eating and drinking establishments, including cafeterias, delis, bakeries, mobile food	1,316	1,318
3	Paint Facilities	Manufacturing and retailing	2	2
4	Dry Cleaners	Dry cleaners	0	0
5	Cleaning Services	Mobile washers, building cleaning, carpet cleaning	629	627
6	Pesticide Facilities	Manufacturing and retailing; pesticide applicators	7	8
7	Machine Shops	Industrial machinery and equipment	96	98
8	Metal Manufacturing	Metal fabricating, finishing, plating, metal work (40 CFR 413, 433)	56	58
9	Electric/Electrical Components	Manufacturing (40 CFR 469)	90	90
10	Construction/ Building	Retail, trade contractors, construction, landscape and garden businesses	875	878
11	Local Transit; Highway Transport	Electric, Gas and Sanitary Services, Trucking Industries	371	371
12	Recycling yards	Assembling, breaking up, sorting and wholesale distribution of scrap and waste materials. This includes auto wreckers engaged in dismantling automobiles for scrap.	25	24
13	Auto Dismantlers	Dismantling motor vehicles for the purpose of selling parts.	0	0
14	Concrete/Stone/Clay Products	Manufacturing cement, structural clay products, pottery, concrete and gypsum products, cut stone, abrasive and asbestos products, and other products from materials taken principally from the earth in the form of stone, clay and sand.	35	35
15	Corporation Yards	PG&E, Caltrans, School bus, VTA, Municipal	0	0
16	Landfills	Dumps; Garbage collecting, destroying and processing; Landfill; Rubbish collection and disposal.	2	2
17	Wood Furniture & Other Products	Manufacturing finished articles made entirely or mainly of wood or related materials.	41	41
18	Chemical Manufacturing	Manufacturing/producing basic chemicals, chemical products to be used in further manufacture (synthetic fibers, etc.) and finished chemical products to be used for ultimate consumption or as materials or supplies in other industries (such as cosmetics, soaps, fertilizers)	2	2
19	Misc. Manufacturing	Caskets, Furniture, Glass, Jewelry/Precious Metal, Manufacturing Industries-NEC, Medical, Office & Store Fixtures, Paper, Petroleum & Coal, Pharmaceuticals, Rubber & Plastics, Signs, Toys & Sports	116	116
20	Other	**Other includes:** Air Conditioning Services, Amusement Parks, Chiropractors, Commercial Areas, Florist, Hazardous Waste, Laboratories, Laundries, Medical and Dental Labs, Miscellaneous, Petroleum Pipelines, Petroleum Refining, Photographic/Printing, Property Management, Radiologists, Steam Electric Power Generation (per permit), Storage, Veterinarians, Welding/Iron Works, Welding Repair, Winery, and Underground Storage Tanks and unspecified SIC Code.	205	205
21	Airport		7	7
		TOTAL	4,538	4,551

Site Design Techniques and Alternative Materials

The City continues to emphasize landscape-based treatment control measures over proprietary mechanical units. Eleven trainings, workshops and tours hosted by ESD, PBCE, ABAG, California Coastal Commission (CCC), and StormCon focused on site design techniques and alternative paving solutions, while one training focused on proprietary storm water products. The eleven sessions were well attended. A total of 152 staff attending one or more of the sessions. Topics included the following:

- **LID principles** (*Low Impact Development* by Dan Cloak (attended by 26), *Reigning in the Rain: Watershed-Friendly "Low Impact Development" Site Design and Permeable Pavement for Stormwater Management* by CCC (3), *LID Principles and Implementation: A Hands-On Workshop* by StormCon (1));
- **Permeable pavement** (Hardscape 101: Permeable Interlocking Concrete Paving Systems (30), Pervious Concrete (47));
- **Green building, landscaping, and infill development techniques** (*Green Building Tour of Santa Clara University* (6), Emeryville Tour of Landscape-based Stormwater Management Solutions for Infill Development (6), *Stormwater BMPs and PRNS* (22), *Best Practices Conference Series: Green Infill* by ABAG (3), *Stormwater Treatment Workshop: Vegetated Swales* by Ed Boscacci, BKF (21));
- **Structural soil** (*A Sampling of 30+ Project Sites Using Structural Soil with Q & A Discussion* by Dave Dockter (34).

Contech provided one training on its products called, *C.3 Post-Construction Stormwater BMP Proprietary Storm Water Products* attended by 16 staff from ESD, PW, DOT, PBCE, and PRNS.

Recurring Meetings: Combining Review, Critique, and Training

Integrating compliance review for conformance with stormwater policy as part of the comprehensive review of current development projects is the key to developing successful stormwater management plans. To do this successfully requires regular attendance at weekly, bi-weekly, and monthly meetings for both public and private development attended by staff from multiple departments.

- *Development Services Staff Review: Review and Critique of Recently Submitted Private NRD Projects* is held weekly and attended by approximately 20 staff from PBCE, PW, Fire, ESD, RDA, Police, and the Santa Clara Valley Water District. Project managers from Planning layout plan sets for projects submitted for development permits two weeks prior and each staff member comments verbally on behalf of their respective department or agency. Each department representative puts this information in a letter that becomes part of the initial response package due to the applicant within 30 days of application submittal. This meeting has provided countless opportunities to resolve conflicts between stormwater policy and regulations including Building Code, Fire Code, or ADA compliance.
- *Citywide Stormwater NPDES Coordination* is a bi-weekly meeting used to discuss challenges, successes and concerns implementing all provisions of the NPDES permit. An average of ten staff attend this meeting which is also used to provide trainings and review particularly challenging development projects.
- *Safety Bond Program Coordination, Review, and Critique of Fire and Police Station and Other Community Building Projects* is a monthly meeting dedicated to public projects. These projects, though exempt from treatment control measure numeric sizing requirements (funded prior to October 15, 2003), strive to provide BMPs and TCMs to act as an example for private development. Constructed Bond projects have provided useful information as the review of these projects has been the cornerstone of the City's O & M Verification Pilot Program.
- *Public and Turnkey Parks Coordination, Review, and Critique* is a monthly meeting dedicated to the review of public parks and turnkey parks which are fully-constructed before legal ownership is turned over the City. Many of these parks are on constrained sites with limited funding for maintenance so proper design, selection, and construction of BMPs and TCMs is critical.

Recurring Meetings: Developer and Consultant Outreach

Developer and consultant outreach has always been important to the City. The following two meetings provide monthly opportunities for policy updates, training, trend analysis, and Q & A for stormwater management:

- *Developers' Roundtable for Design, Development and Construction Firms* continues to serve as an important venue to provide policy updates, discuss new procedures and answer questions related to implementation of stormwater policy. Approximately 25 people attend this meeting.
- *Developers' Industry Representative Roundtable for Civil Engineering Firms* serves as an important venue to provide BMP- and TCM-specific training, discuss the pros and cons of landscape-based and propriety treatment measures, and answer questions from the private sector firms that work with developers to design stormwater management plans. Approximately 25 people attend this meeting.
- *BAHM Software Demonstration and Training* provided by SCVURPPP gave 28 staff and private sector consultants a hands-on opportunity to learn about this software to assist designers of HMP facilities.

Other

- *Envision San Jose 2040: General Plan Update Task Force Study Session on Water Quality Issues* provided a rare opportunity to present to the community leaders and activists playing active roles in updating the City's General Plan. The presentation emphasized that the best way to protect water quality is to preserve open space, protect creeks and use LID techniques to reduce the impacts of increasing density and intensification of uses on redevelopment sites. The Study Session was held on April 28, 2008 and included thirty-seven task force members and City staff. This meeting was also open to the public.
- *The Importance of Ephemeral Streams* training and presentation by a City staff Biologist defined and discussed ephemeral streams in Santa Clara County. The training also provided examples of good and bad riparian setback practices and their implications. Twenty-five PBCE staff attended this training on February 7, 2008.
- Two sessions of *Design Techniques to Reduce Pesticide Use in NRD Projects* was given to 56 City staff from PW, DOT, ESD, PBCE, and PRNS on February 7th and 21, 2008. Training emphasized picking a variety of native and drought-tolerant plants to reduce pesticide use.
- Several City staff from PBCE, PW, and ESD participated in SCVURPPP's Annual C.3 Workshop, entitled *Sharing Experience with Implementation of Storm Water Requirements and Development Projects* on June 3, 2008 in Cupertino, CA. The City of San Jose projects received two awards and one honorable mention.
- Annual CASQA Conference entitled, *Stormwater Management-Tools for Success* was attended by five staff from ESD and PBCE, September 10-12, 2007 in Costa Mesa, CA.
- *APWA Exemplary Site Design for Storm Water Pollution Prevention* workshop and luncheon provided an opportunity for ESD, PW and Planning staff to interact with engineering professionals and see examples from our region. Five staff attended this event on March 19, 2008 in Mountain View, CA.

O&M Verification Program

The City conducted inspections of FY 06-07 projects that completed construction in FY 07-08. Based on that experience and the upcoming changes to the stormwater permit, the City's Operation and Maintenance (O&M) Verification Program will be revised in FY 08-09. City staff inspected eleven BMPs at eight different sites utilizing the Program's standard inspection data collection form. It has been determined that as numerically-sized BMPs are installed, additional resources and coordination among departments will be necessary to ensure appropriate installation, operation, and maintenance of BMPs. The data table and associated map follow the NRD Summary Tables.

Implications of C.3 Implementation

With the number of applicable projects implementing numerically-sized stormwater BMPs and TCMs jumping from 35 projects in FY 06-07 to 77 (public and private) projects in FY 07-08, concerns about costs, particularly related to inspection and O & M Verification continue to increase. In the near future, the number of public projects required to comply will increase as the City nears the completion of construction on the majority of exempted Safety Bond-funded projects. Staff costs will continue to increase to provide adequate review and comment to ensure 100 percent compliance of all public and private Stormwater Control Plans and related EIRs, Initial Studies and development permits. Additionally, City staff will be required to provide and/or attend training in order to stay up-to-date on ever-changing policy and implementation requirements.

3. NRD: New and Redevelopment

3.A NRD Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
NRD 1	**Legal Authority** The City of San José will have adequate legal authority to implement new development control measures, including all applicable requirements of Provision C.3, as part of its development plan review and approval procedures and other appropriate new development and redevelopment permitting procedures (Provision C.3.a.i).			
NRD 1.A	Revise Municipal Code to ensure adequate legal authority to implement new development control measures (C.3.a.i).	As Needed	The City currently has adequate legal authority to implement new development control measures.	PBCE, ESD, PW
NRD 2	**Guidance to Developers** The City will provide developers with information and guidance materials on site design guidelines, building permit requirements, and BMPs for stormwater pollution prevention, as appropriate for the type of project and location.			
NRD 2.A.1	Draft necessary revision(s) to Guidance Manual on Selection of Stormwater Quality Control Measures to allow incorporation of hydraulic sizing design criteria and provide to developers.	Done FY 02-03	Done FY 02-03 and ongoing. During FY 06-07 and 07-08, the City contracted with RBF Consulting to develop a C.3 Stormwater Control Plan Design Guidelines Manual. The intent of this manual is to provide more detailed guidance to developers, project managers, and project engineers working in San Jose's jurisdiction on the selection, design, implementation, and maintenance of stormwater treatment BMPs. Once the MRP is approved this manual will be revised and distributed for use.	PBCE, ESD, PW, RDA
NRD 2.A.2	Refine Guidance Manual on Selection of Stormwater Quality Control Measures to incorporate HMP measures, as necessary.	Done FY 05-06	Done FY 05-06.	PBCE, ESD, PW, RDA
NRD 2.B	Provide development community with revised information and guidance materials concerning any adopted on site design, building permit requirements and hydraulic sizing design criteria and maintenance requirements for BMPs for stormwater treatment measures.	Done FY 02-03	Done FY 02-03 and ongoing. In FY 07-08, revised information was provided by 1) printed status bulletin information sheets distributed by e-mail to the development community, as handouts at public information counter and at Developer's Roundtable Meetings; 2) Webpage updates; 3) inviting the development community to attend Program workshops and City sponsored Developers' Roundtable meetings. In addition, PBCE revised and updated stormwater requirements and data collection on all its applications.	PBCE, ESD, PW, RDA
NRD 2.B.1	Coordinate w/development community on proposed hydraulic sizing criteria for structural stormwater treatment measures, HMP criteria and any proposed revisions to Guidance Manual and policy through workshops and regular meetings.	Done FY 02-03	Done FY 02-03. See NRD 2.B. above.	PBCE, ESD, PW, RDA

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
NRD 2.B.2	Update guidance material regarding maintenance responsibilities for any HMP measures.	Done FY 05-06	Done FY 05-06.	PBCE, ESD, PW, RDA, Program
NRD 3	**CEQA Requirements** The City will ensure that environmental documents required for those projects that fall under CEQA and NEPA review address both significant and cumulative stormwater quality impacts during the life of the project, and relevant permit requirements. These documents include EIRs, negative declarations and initial study checklists (C.3.m).			
NRD 3.A	Review and evaluate the City's Environmental Review procedures to improve the review for water quality impacts and identification of mitigation measures. (Provision C.3.m.)	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA
NRD 3.A.1	Identify areas where new or additional water quality review processes and related documents or checklist questions are needed and propose schedule for revision.	Done FY 02-03	Done FY 02-03. See NRD 3.A.	PBCE, ESD, PW, RDA
NRD 3.A.2	Refine and update areas where new or additional water quality related mitigation measures may be needed.	Done FY 05-06	Done FY 05-06.	PBCE, ESD, PW, RDA
NRD 3.B.	Report on revisions made to environmental review process.	Done FY 02-03	Done FY 02-03. See NRD 3.A.	PBCE, ESD, PW, RDA
NRD 4	**Project Mitigation Measures and Design Requirements** The City will encourage developers of all projects subject to design review under its development plan review and approval procedures to consider incorporating appropriate source control and site design measure that minimize stormwater pollutant discharges to the maximum extent practicable.			
NRD 4.A	Revise current Policy on Post-Construction Urban Runoff Management as necessary to incorporate minimum BMP requirements for all projects.	Done FY 03-04 Ongoing	Done FY 07-08 and ongoing. In FY 07-08, Council revised Municipal Zoning Code Chapter 20.95 "Stormwater Management," to reflect the required numeric sizing threshold.	PBCE, ESD, PW, RDA, CAO
NRD 4.B.	Review and modify development permit approval procedures for adopted revisions as necessary.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 4.C	Review the design standards and guidance for opportunities to make revisions that would result in reduced impacts to water quality and summarize how they were incorporated into approval procedures.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 4.D	Review the existing source control measures contained in site design standards, guidance documents and conditions of approval for opportunities to limit stormwater pollution. (Provision C.3.k.)	Done FY 03-04	Done FY 03-04 in coordination with the Program.	PBCE, ESD, PW, RDA
NRD 4.E	Review General Plan and revise as necessary to incorporate water quality and watershed protection principles and policies, and summarize revisions made. (Provision C.3.l.)	Done FY 03-04 Ongoing	Done FY 03-04 and ongoing. In FY 07-08, the City continued the revision process for its General Plan. Titled "Envision San Jose 2040," the update will incorporate environmental protection and sustainability into all the elements of the General Plan.	PBCE, ESD
NRD 4.F	Review the design standards and guidance for	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
	opportunities to make revisions as necessary that would result in reduced impacts to water quality and summarize how they were incorporated into approval procedures. Such revisions are listed in Provision C.3.j.			
NRD 4.F.1	Identify and document existing site design standards and guidance documents and policies.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 4.F.2	Revise Site Design Measures and Standards, as necessary.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA
NRD 5	**Group 1, 2 and HMP Project Requirements** On October 15, 2003, the City began phased implementation of hydraulically sized stormwater treatment measures in conformance with Policy 6-29 beginning with projects that create or replace one acre or more of impervious surface area and are considered Land Uses of Concern. On February 15, 2005, all projects that created or replaced one acre or more of impervious surface were required to hydraulically size stormwater treatment measures. On May 17, 2005, the threshold changed to include all projects that created or replaced 10,000 sq. ft. impervious surface and are a Land Use of Concern. Effective August 15, 2006, all projects that create or replace 10,000 sq. ft. or more of impervious surface were required to include hydraulically sized stormwater treatment measures. On October 18, 2005, all projects that met the criteria described in Policy 8-14 were required to manage increases in runoff flow, volume and duration. The following is a brief summary of the Best Management Practices that are required in all development projects: • Site design shall include measures to minimize impervious land coverage, maximize infiltration (where appropriate and designed to protect groundwater quality) and provide detention or retention as part of landscaping where feasible (C3.b.i and C.3.j); • Source controls shall be required to limit pollution generation, discharge, and runoff as appropriate (C.3.k), including measures to discourage pesticide use (C.9.d.ii); • Stormwater treatment measures shall be designed in accordance with the numeric design criteria in Policy 6-29 (Provision C.3.d); A. Increases in runoff flow, volume and duration shall be managed in accordance with Policy 8-14 (Provision C.3.f). (HMP) for the specific stream receiving the discharge, following approval of the HMP by the Water Board (C.3.f).			
NRD 5.A.1	Propose revisions to current Policy 6-29 on Post-Construction Urban Runoff Management as necessary to incorporate hydraulic sizing design criteria.	Done FY 03-04	Done FY 03-04 and FY 06-07.	PBCE, ESD, PW, RDA, CAO
NRD 5.A.2	Revise current Policy 6-29 on Post-Construction Urban Runoff Management as necessary to incorporate hydraulic sizing design criteria.	Done FY 03-04	Done FY 03-04.	PBCE, ESD, PW, RDA, CAO
NRD 5.A.3	Revise policy as needed for Group 2 implementation	Done FY 04-05	Done FY 04-05 and FY 06-07.	PBCE, ESD, PW, RDA, CAO
NRD 5.A.4	Revise policy as needed for HMP implementation.	Done FY 05-06	Done FY 05-06.	PBCE, ESD, PW, RDA, CAO
NRD 5.B	Develop a list of Annual Reporting requirements from Provision C.3 Design data tracking needs and protocols.	Done FY 02-03	Done FY 02-03.	PBCE, ESD, PW, RDA, CAO
NRD 5.B.1	Compile a list of new development and redevelopment projects by name, type of project, site acreage or square footage, square footage of new impervious surface, treatment BMPs and numeric sizing criteria used for applicable projects. Also, list the source	Annually	Done FY 07-08. See Section 3.D: *Applicable Projects Reviewed and/or Approved During July 1, 2007 – June 30, 2008.*	PBCE, ESD, PW, RDA

	to Provision C.3. hydraulic sizing criteria requirements for Annual Report.	Ongoing		
NRD 9.C.1	Modify the existing data collection software for public projects to track new Capitol Improvement Projects with stormwater treatment and/or HMP measures.	FY 06-07	Continued progress during FY 07-08. The City is implementing a stormwater data tracking feature in the data collection software used by CIP project managers. Finalization of software updates to be completed following MRP adoption.	PW
NRD 9.D	Monitor development of City's Green Building program for opportunities to discourage architectural use of copper in development projects (Prov. C.9.a.) and to incorporate urban runoff considerations.	Done FY 02-03 Ongoing	Done FY 02-03 and ongoing. As of June 30, 2008, ESD has two and PBCE has one dedicated LEED accredited staff person who reviews projects and advises City staff on Green Building materials and techniques, including discouraging architectural use of copper. Council updated the Green Building Policy on March 6, 2007 to require LEED Silver on all municipal buildings over 10,000 sq. ft. with a goal of achieving Gold or Platinum.	PBCE, ESD, PW, RDA
NRD 10	**City Staff Training** The City will provide training at least annually to its planning, building, and public works staff on planning procedures, policies, design guidelines, and BMPs for stormwater pollution prevention (C.3.a.vi).			
NRD 10.A	Provide training to Planning and Public Works staff on planning procedures, policies, design guidelines, and BMPs for stormwater pollution prevention. (Provision C.3.a.vi.)	Ongoing	Done FY 07-08 and ongoing. In FY 07-08, City staff met regularly to share information and resources on planning procedures, policies, design guidelines, and BMPs for stormwater pollution prevention. In addition, several training events were conducted to educate staff on site design techniques, and alternative materials and treatment control measures. See 13.D: *Municipal Employee Training Summary* and 3.B: *NRD Program Evaluation* for details.	PBCE, ESD, PW, RDA
NRD 10.B	Provide training to Redevelopment Agency and Department of Transportation staff on planning procedures, policies, design guidelines, and BMPs for stormwater pollution prevention. (Provision C.3.a.vi.)	Ongoing	Done FY 07-08 and ongoing. In FY 07-08, City staff met regularly to share information and resources on planning procedures, policies, design guidelines, and BMPs for stormwater pollution prevention. In addition, several training events were conducted to educate staff on how to meet requirements by implementing stormwater pollution prevention strategies. See 13.D: *Municipal Employee Training Summary* and 3.B: *NRD Program Evaluation* for details.	PBCE, ESD, PW, RDA, DOT
NRD 10.C	Revise the training protocol to incorporate any newly adopted Provision C.3. Permit requirements and related revised procedures.	As Needed	As Needed. In coordination with the Program.	PBCE, ESD, PW, RDA
NRD 10.D	Train staff responsible for design review on pest-resistant landscaping techniques and model conditions of approval and the importance of minimizing pesticide	Ongoing	Done FY 07-08 and ongoing. In FY 07-08, training was provided to Planning, Public Works, General Services, DOT and other City staff on pest-resistant planting	PBCE, ESD, PW, RDA

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
	use in runoff from development sites. (Provision C.3.n. and Provision C.9.d.ii)		techniques. See 13.D: *Municipal Employee Training Summary* for details.	
NRD 11	**Development Plan Review and Approval Procedures Effectiveness Evaluation** The City of San José will review and evaluate the effectiveness of its development plan review and approval procedures.			
NRD 11.A	Evaluate and incorporate any needed improvements in review and approval process.	Annually	Annually. See 3.B: *NRD Program Evaluation.*	PBCE, ESD, PW, RDA
NRD 11.B	Document and evaluate what worked well and what needs improvement.	Annually	Annually. See 3.B: *NRD Program Evaluation.*	PBCE, ESD, PW, RDA

3.B NRD Program Evaluation

The City continued to make significant strides in implementing the NRD program element in FY 07-08, experiencing more than a doubling in the number of private projects implementing numerically-sized stormwater BMPs and TCMs. Private NRD projects jumped from thirty-five in FY 06-07 to seventy-five in FY 07-08. Of those seventy-five, eleven are programmatic permits that do not allow any grading or construction. These eleven sites are located at the proposed industrial/research and development campus called Coyote Valley Research Park, the future Cisco Headquarters (see CVRP Project Boundary on the Private Development Map). Nineteen permitted projects are located within the North San Jose Area Development Policy (NSJ) boundaries (see North SJ Development Policy boundary on the Private Development Map). The NSJ Policy guides the ongoing growth and development of the North San José area. This primarily industrial area is home to many of the City's high-tech companies and is a very important employment center for the Region. Creating master plans for business and medium- and high-density, mixed-use residential developments that include stormwater management, new public and private streets, new trails, and new public parks along the existing VTA Light Rail corridor ensure this area exemplifies the smart growth principles important to water quality protection. The remaining sixty-four approved projects constitute 8,456 new units of housing, 3,182,502 square feet of commercial space, and 2,268,572 square feet of office space, yet represents only a 0.1% increase in impervious surface for the City of San Jose.

Additionally, over twenty percent of projects reduced impervious surface (net reduction) by 412,200 square feet (approximately 9 acres). Projects included four mixed-use high-density residential and three high-density residential developments that averaged 78 and 52 dwelling units per acres (DU/AC) respectively. These projects are infill redevelopment projects located either in the General Plan designated Downtown Core Area or Transit-Oriented Development Corridors and also took advantage of the city policy that allows a ten percent reduction in the number of parking spaces that must be constructed in these particular areas. Reducing the availability of parking spaces in areas well served by transit helps to reduce the number of auto-related trips and the associated air and water quality pollution associated with car travel. The City's trend towards use of site design techniques to reduce impervious surface, including the use of landscape-based treatment control measures, contributes towards the achievement of broader goals of being a Smart Growth city that discourages sprawl and encourages effective, efficient development/redevelopment.

Additional achievements discussed below include minor updates to City code, participation in the General Plan update process, continued training of City staff, increased coordination with the development community and City departments, and the receipt of two site design awards for exemplary development projects.

Code

Municipal Zoning Code Update

On May 5, 2008, Ordinance No. 28301 was approved by the City Council amending Chapter 20.95 *Storm Water Management* of Title 20 of the San Jose Municipal Code to reflect the current applicability and conformance threshold requirements of Provision C.3 of the current permit. The specific changes eliminated one acre threshold references and replaced them with the 10,000 square foot threshold as the impervious surface trigger for requiring numerically sized treatment control measures.

Awards

The City received two awards and one honorable mention from the Santa Clara Valley Urban Runoff Pollution Prevention Program (SCVURPPP) in June 2008:

- Exemplary Private Project, Residential: Modern Ice, San Jose
- Exemplary Private Project, Commercial: IDeAs Integrated Design Associates, Inc., San Jose
- Honorable Mention: Fowler Creek Community Park, San Jose

Projects will be featured in "Developments Protecting Water Quality: A Guidebook for Site Design Examples" produced by SCVURPPP.

Training

The City continues its commitment to educating staff and increasing developers' awareness of C.3 numeric sizing treatment criteria and hydromodification measures. During FY 07-08, City staff sponsored the majority of the thirty-two trainings attended by City staff.

The foundation of information sharing in the City are the six regular monthly meeting forums, two of which involve the private development and consultant communities. The focus of these interdepartmental meetings is the review and critique of current development projects for compliance with stormwater policies and policy updates. Staff from the following departments attended the trainings:

- Environmental Services Department (ESD)
- Department of Planning, Building and Code Enforcement (PBCE)
- Public Works (PW)—this includes the Airport, Development Services, Roads & Bridges, and City Facilities Architectural Services (CFAS)
- Department of Transportation (DOT)
- Parks, Recreation and Neighborhood Services (PRNS)
- Redevelopment Agency (RDA)
- Fire Department (Fire)

The trainings had the following focuses:

C.3 During and After the Construction Phase

FY 07-08 marked the first year that developments required to provide numerically sized treatment control measures had completed construction. During implementation of the O & M Verification Pilot Program, staff learned that citywide success in the construction of BMPs and TCMs for development projects would require specialized training for project management staff for public projects and construction inspectors for public and private development.

- Four sessions of ***Understanding Post-Construction BMP*** focused on teaching 108 PBCE, ESD, and PW Construction Inspectors about Provision C.3 and the differences between construction and post-construction phase BMPs and TCMs. One additional session tailored this training for ten Watershed Enforcement Inspectors.
- One session of ***Sediment and Erosion Control Training*** for fifty-five PW staff coupled with four sessions of ***Protecting Post-Construction Treatment Control Sites During Construction*** for fifty-one PW staff provided erosion and sediment control training with a special emphasis on the impacts of construction activity, such as over compacting soil by parking heavy construction equipment where a post-construction infiltration basin will be located, on the function of landscape based BMPs and TCMs.
- One session of ***Initial Inspection of BMPs and TCMs at Big Box Commercial Sites*** provided hands-on training for seven Construction Inspectors and other ESD staff. This training focused on comparing development permit post-construction stormwater control plans to the constructed project. Staff used the skills learned in this training to conduct O & M Verification Inspections reported in this Annual Report.

BMP O&M Verification Program

BMP O&M Verification Results					
[redacted]	DATE: 6/17/08	LOCATION: North side of Minnesota Avenue, approximately 350 feet westerly of Lincoln Avenue (1139 Minnesota Avenue, San Jose, CA 95125)	PROJECT TYPE: Other: Private Club	BMP TYPE: None	REASON FOR INSPECTION: Initial
INSPECTION RESULTS: 1) 62. Other		ENFORCEMENT ACTION: None	COMMENTS: Permeable paver system is used to reduce imperviousness of new 10,000 square foot parking lot. This project incorporates tree planting and permeable pavers. Because the parking lot expansion is 10,000 sqft the new paved patio was required to be permeable pavers and beneficial landscaping and tree plantings were required. The pavers are unconventional. They are 3' x 3' panels with stamped design. Due to the size of the pavers site should have a follow-up visit during the rainy season to see if water is infiltrating. Return Inspection is required no later than January 31, 2009. Follow-up requirement and priority for re-inspection will be determined at that time.		
[redacted]	DATE: 6/16/08	LOCATION: South side of Paula Street, approximately 160 feet easterly of Meridian Way	PROJECT TYPE: Residential	BMP TYPE: Structural: Media Filter	REASON FOR INSPECTION: Initial
INSPECTION RESULTS: 1) 7. BMP Access Obstructed		ENFORCEMENT ACTION: None	COMMENTS: Mechanical unit with oil baffle appeared clean and functioning. BMP Access Obstructed was the result of not being able to locate the clean out for the structural BMP. Because unit was clean and functioning no enforcement action is required at this and has a low priority for reinspection and no return inspection is needed.		
[redacted]	DATE: 6/26/08	LOCATION: North side of Charles Street approximately 750 feet westerly of Oakland Road.(625/645 Charles Street, San Jose, CA 95112)	PROJECT TYPE: Industrial	BMP TYPE: Structural: Media Filter	REASON FOR INSPECTION: Initial
INSPECTION RESULTS: 1) 1. No Visible/Apparent Problems		ENFORCEMENT ACTION: None	COMMENTS: This site is Greenwaste Recovery Recycling Center. Priority for reinspection is high. Site should be inspected annually. Site has an Industrial SWPPP.		
[redacted]	DATE: 6/12/08	LOCATION: Southwest corner of Ardis Avenue and Stevens Creek Boulevard (3396 Stevens Creek Blvd. San Jose, CA 95117)	PROJECT TYPE: Commercial	BMP TYPE: Structural: Media Filter	REASON FOR INSPECTION: Initial
INSPECTION RESULTS: 1) 38. Access Cover Damaged/Difficult to Remove/Not in Place 2) 6. Evidence of Contaminants & Pollution 3) 62. Other		ENFORCEMENT ACTION: Verbal notice	COMMENTS: Owner/operator of Stevens Creek European Car Dealership was given a Verbal Notice due to two Areas of Concern (AOC): 1) vehicle washing directly over storm drain inlet (owner told to cease vehicle washing immediately and redirect wash water into sanitary system)(#38); 2) remove asphalt and other debris deposited on access to media filter (#6); and 3) owner was not able to locate maintenance receipts or operation and maintenance guidelines for media filter (#62). Follow-up is required within one month. Priority for reinspection is high. Return inspection within one month of Verbal Notice found all issues were corrected.		
[redacted]	DATE: 6/12/08	LOCATION: Northerly side of Bailey Avenue approximately 5,000 feet westerly of Santa Teresa Boulevard (555	PROJECT TYPE: Industrial	BMP TYPE: Vegetated Swales	REASON FOR INSPECTION: Initial

BMP O&M Verification Results					
		Bailey Ave San Jose, CA 95141)			
INSPECTION RESULTS: 1) 1. No Visible/Apparent Problems		ENFORCEMENT ACTION: None	COMMENTS: Vegetated swales in new parking lot at this IBM campus appear to be properly constructed, operable and well maintained. No AOC.No follow-up or reinspection are required at this time. Priority for reinspection is low.		
	DATE: 6/12/08	LOCATION: Northerly side of Bailey Avenue approximately 5,000 feet westerly of Santa Teresa Boulevard (555 Bailey Ave San Jose, CA 95141)	PROJECT TYPE: Industrial	BMP TYPE: Wet Pond	REASON FOR INSPECTION: Initial
INSPECTION RESULTS: 1) 1. No Visible/Apparent Problems		ENFORCEMENT ACTION: None	COMMENTS: Wet/Detention ponds were existing and determined to have the capacity to treat and retain additional stormwater volume from new parking lot. Ponds are well established and well maintained. No AOC. No follow-up or reinspection are required at this time. Priority for reinspection is low.		
	DATE: 6/11/08	LOCATION: Southwest corner of Old Almaden Road and Foxworthy Avenue (1084 Foxworthy Avenue, San Jose, CA 95118)	PROJECT TYPE: Commercial	BMP TYPE: Vegetated Swales	REASON FOR INSPECTION: Initial
INSPECTION RESULTS: 1) 1. No Visible/Apparent Problems		ENFORCEMENT ACTION: None	COMMENTS: Swales appear to be well constructed and well maintained. No AOC. No follow-up or reinspection are required at this time. Priority for reinspection is low.		
	DATE: 6/11/08	LOCATION: Southwest corner of Old Almaden Road and Foxworthy Avenue (1084 Foxworthy Avenue, San Jose, CA 95118)	PROJECT TYPE: Commercial	BMP TYPE: Bioretention	REASON FOR INSPECTION: Initial
INSPECTION RESULTS: 1) 1. No Visible/Apparent Problems		ENFORCEMENT ACTION: None	COMMENTS: Bioretention/drain rock area appear to be well constructed and well maintained. No AOC. No follow-up or reinspection are required at this time. Priority for reinspection is low. Site won SCVURPPP award.		
	DATE: 6/11/08	LOCATION: East side of Will Wool Drive approximately 400 feet north of Quinn Avenue (2268 Will Wool Drive, San Jose, CA 95112)	PROJECT TYPE: Industrial	BMP TYPE: Vegetated Swales	REASON FOR INSPECTION: Initial
INSPECTION RESULTS: 1) 1. No Visible/Apparent Problems		ENFORCEMENT ACTION: None	COMMENTS: Vegetated swales along the rear, side and front of property appear to be installed correctly and well vegetated. Outside of the BMP a small puddle was observed likely due to over irrigation. No follow-up or reinspection are required at this time. Priority for reinspection is medium due to the outdoor storage of materials and use of this industrial site as a small corporation yard.		
	DATE: 6/11/08	LOCATION: Southeasterly side of Silver Creek Valley Road, and at the south terminus of Fontanoso Way (5978 Silver Creek Valley Road San Jose, CA.	PROJECT TYPE: Commercial	BMP TYPE: Vegetated Swales	REASON FOR INSPECTION: Initial
INSPECTION RESULTS: 1) 1. No Visible/Apparent Problems		ENFORCEMENT ACTION: None	COMMENTS: Vegetated swales along the rear, sides and front of property appear to be installed correctly and well vegetated. Disconnected downspouts are open and free from clogging. No-mow grass is thickly planted and well irrigated. This site also has exemplary trash covered enclosures. All water is treated via swales before discharge to storm drain. Priority for reinspection is low.

4. CON: Construction Inspection

4.A CON Work Plan Self Evaluation Matrix

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
CON 1	**Site Housekeeping** The City ensures through a construction inspection program that construction contractors properly store, use, and dispose of construction materials, chemicals, and wastes at construction sites and prevent illicit discharges to storm drains and watercourses.			
CON 1.A	Track and document incidents of housekeeping issues at construction sites	Ongoing	Done FY 07-08 and ongoing. ESD, PW, and PBCE-Building inspectors tracked and documented incidents of housekeeping issues at construction sites during FY 07-08 and these records are on file for review. Housekeeping issues were documented at 144 sites (compared to 160 last year). ESD inspectors identified housekeeping issues at 47 sites, PW inspectors identified housekeeping issues at 70 sites, and PBCE-Building inspectors identified housekeeping issues at 27 sites. A total of 285 housekeeping issues were documented (compared to 347 last year). ESD inspectors identified 72 housekeeping issues, PW inspectors identified 171 housekeeping issues, and PBCE-Building inspectors identified 42 housekeeping issues. Inspectors documented similar housekeeping issues as last year, including inadequate installation and maintenance of BMPs pertaining to inlet protection, site entrance/exit stabilization, stockpiles and material storage, perimeter protections, dust and mud containment, saw cutting operations, and street cleaning. Most housekeeping issues were addressed and quickly resolved, as evidenced by an increase in verbal warnings and a decrease in actual violations. Increased compliance may be attributable to prior year's outreach and enforcement efforts, increased inspector training, and the start of year-round inspections by ESD.	PBCE-Bldg, PW, ESD-WE
CON 2	**Local Ordinance** For development projects with significant erosion potential and planned construction activity during the wet season, the City ensures, through a construction inspection program, that erosion and/or sediment control measures are implemented in accordance with local ordinances and project conditions of approval and maintained as needed during construction.			
CON 2.A	Maintain a program for identifying and conditioning projects with significant erosion potential and planned wet season activity.	Ongoing	Done FY 07-08 and ongoing. ESD, PW, and PBCE-Building inspectors continued to implement a construction inspection program for identifying and conditioning projects with significant erosion potential and planned wet	PW, PBCE-Bldg

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
			season activity. ESD and PW conducted a total of 111 pre-wet season inspections (compared to 137 last year). ESD conducted 38 pre-wet season active construction site inspections. PW conducted 73 pre-wet season active construction site inspections. The decrease in these inspections is attributable to fewer active construction sites this year.	
CON 2.B	Identify ordinance changes needed to conduct inspections.	As Needed	No changes to existing ordinances were required in FY 07-08.	PW, ESD-WE, PBCE-Bldg
CON 3	**Construction Inspection Frequency** The City inspects construction sites for adequacy of stormwater control measures. The frequency of inspections for active sites is at least once per month, or more frequently based on size of project, site conditions, precipitation, and project's potential impact on stormwater quality.			
CON 3.A	Maintain and update SOPs for construction inspection program.	As Needed	Done FY 07-08. SOPs for construction inspection were maintained and implemented. No updates were required.	PW, ESD-WE, PBCE-Bldg
CON 3.B	Document inspections of active construction sites.	Ongoing	Done FY 07-08 and ongoing. ESD, PW, and PBCE-Building inspectors documented inspections of active construction sites in San José that were subject to inspection during FY 07-08. These records are on file for review. Approximately 1039 inspections were conducted this year (compared to 1485 last year), including repeat inspections of the same site. PW conducted 361 inspections, ESD conducted 359 inspections, and PBCE-Building conducted approximately 319 inspections. Fewer inspections this year can be attributed to a decrease in construction activity. PW inspected 190 active construction sites (compared to 290 last year) and ESD inspected 50 active construction sites (compared to 71 last year).	PW, ESD-WE, PBCE-Bldg
CON 3.C	Evaluate the effectiveness of the construction inspection program and make improvements, as necessary.	Annually	Done FY 07-08. See 4.B: *CON Program Evaluation*.	PW, ESD-WE, PBCE-Bldg
CON 4	**Wet Season Preparation** Prior to the beginning of the wet season each year, the City inspects all sites requiring erosion and/or sediment control plans, to ensure that measures have been taken to minimize erosion and discharges of sediment from disturbed areas.			
CON 4.A	Review and revise procedures for construction inspection staff regarding wet season construction requirements.	As Needed	Done FY 07-08. Procedures for wet season preparation were reviewed and found to be adequate with no changes identified. A pre-wet season meeting was held on October 10, 2007 amongst the citywide construction inspection supervisors to discuss wet season preparation. In addition, PBCE-Building inspection staff discussed wet season procedures during their annual training on September 26 and September 27.	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
CON 4.B	Document pre-season inspection of construction sites to ensure adequate implementation of winterizing BMPs prior to the wet season.	Ongoing	Done FY 07-08 and ongoing. The City documented pre-season inspection of construction sites to ensure adequate implementation of winterizing BMPs prior to the wet season. 111 pre-wet season inspections occurred before the official start of the rainy season (October 15, 2007). See CON 2.A.	PW-CFAS, PW-ECS, PW-TDS
CON 5	**Inspection and Site Evaluation Follow-up** Construction sites with inadequate erosion/sediment controls are given verbal and/or written notice of the inadequacies, according to the City's enforcement procedures, and followed up with action(s) commensurate with the risk of pollutants entering City storm drains or waterways. Written notices and follow-up actions are tracked and summarized in the City's Annual Report to the Water Board.			
CON 5.A	Implement SOPs for follow-up actions and graduated levels of enforcement for construction sites.	Ongoing	Done FY 07-08 and ongoing.	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD
CON 5.B	Track and summarize notices and follow-up actions for annual reports.	Annually	Done FY 07-08. PW issued 82 verbal warnings and 10 official warning notices. ESD issued 275 verbal warnings, 13 official warning notices, and 0 administrative actions with penalty and/or fine.	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD
CON 5.B.1	Use revised erosion and sediment control checklist to better track warnings and required corrections given to construction site managers.	FY 06-07 Annually	Done FY 07-08. The form was developed by PW in FY 05-06 to address issues related to construction site inspections and was revised in FY 07-08 to collect additional data and provide more guidance on tracking BMPs.	PW-TDS
CON 6	**Municipal Training** The City provides training annually to its construction inspection staff on inspection procedures, documentation, and enforcement related to stormwater pollution prevention. All inspectors receive training on the latest construction-related stormwater pollution prevention techniques and appropriate follow up actions at least once every two years. The City keeps documentation that inspectors have received training.			
CON 6.A	Develop an annual training plan for construction inspection program.	Annually, Q1	Done FY 07-08. See 13.D: *Municipal Employee Training Summary.*	ESD, PW, PBCE-Bldg
CON 6.B	Conduct annual training	Ongoing	Done FY 07-08. 108 staff attended annual training on September 26-27. See 13.D: *Municipal Employee Training Summary.*	ESD, PW, PBCE-Bldg
CON 6.C	Track and document that inspectors have received training.	Annually	Done FY 07-08. See 13.D: *Municipal Employee Training Summary.*	ESD-UR
CON 6.D	Evaluate the training curriculum and frequency, and improvements, as necessary.	Annually	Done FY 07-08. Written evaluations were conducted at every training event to help gauge effectiveness and target future training needs.	ESD, PW, PBCE-Bldg
CON 6.D.1	Conduct additional stormwater BMP training for all inspection groups during section meetings throughout FY 06-07 to supplement the main Fall training.	FY 06-07 Ongoing	Done FY 07-08. Focused "refresher" trainings were held at each inspection group's staff meeting. Approximately 104 PW and PBCE inspectors attended the 5 training sessions. See 13.D: *Municipal Employee Training Summary.*	ESD-UR, ESD-WE

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
CON 6.E	Hold coordination meetings for Building, ESD, and Public Works	Ongoing	Done FY 07-08 and ongoing. See 13.D: *Municipal Employee Training Summary.*	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD-WE, ESD-UR
CON 6.F	City has allocated funds in FY 07-08 for contractual support for two Construction Stormwater BMP Training Workshops for City staff. Ensure staff attends two funded Construction Stormwater BMP Training Workshops.	FY 07-08	Done FY 07-08. See CON 13.D *Municipal Employee Training Summary.*	ESD-UR, ESD-WE
CON 7	**Outreach** The City provides outreach materials to contractors, developers, and municipal staff on construction BMPs and compliance with the State General Construction Activity Stormwater Permit.			
CON 7.A	Review outreach and technology transfer materials and make improvements, as necessary	Annually, Q4	Done FY 07-08. Construction BMP information blueprints and tri-folds in English, Spanish, and Vietnamese were distributed as needed at trainings, inspections, and are on permanent display in City Hall. See 14.D: *Outreach Materials Distributed* for details.	ESD, PW, PBCE-Bldg
CON 7.A.1	Reprint revised Dewatering from Construction Sites and In-Ground Utilities Maintenance Projects brochure.	FY 07-08 As Needed	Deferred to FY 08-09 to include any additional requirements from the MRP.	ESD-UR
CON 7.B	Conduct outreach sessions to development community.	Annually	Done FY 07-08. See 14.D: *PIP Activities Table* for details.	ESD, PW, PBCE-Bldg, Program
CON 7.C	Document outreach to development community.	Annually	Done FY 07-08. DPW and ESD inspectors continued to distribute BMPs to the development community during construction site inspections. Outreach materials were also provided to development community representatives at training sessions and at permit service counters. See 14.D: *PIP Activities Table* and 14.D: *Outreach Materials Distributed* or details.	ESD-UR
CON 7.D	Evaluate outreach program and make improvements, as necessary.	Annually	Done FY 07-08. The City's outreach program continues to make improvements as needed. With inspections, meetings, and training sessions, the outreach for this program element includes significant face-to-face contact. Inspectors also distribute materials to developers and contractors as part of inspection. The City reviewed key BMP materials and made changes as needed in FY 07-08.	ESD, PW, PBCE-Bldg
CON 7.D.1	Print and distribute revised "Clean Bay Blueprint" to developers and City inspectors.	Done FY 06-07	Done FY 06-07. See 14.D: *Outreach Materials Distributed* for details.	ESD, PW, PBCE-Bldg
CON 7.D.2	Explore the use of construction site signs to alert site employees and the public of stormwater pollution prevention message and 945-3000 hotline information.	FY 06-07	Done FY 07-08 and ongoing. Signs were produced in FY 06-07 but were not piloted in FY 07-08 at select construction due to some internal communications problems. They shall be piloted in FY 08-09. Evaluation of the pilot will occur after the signs are installed.	ESD, PW, PBCE-Bldg

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
CON 7.D.3	Implement, if feasible, the use of construction site signs to alert site employees and the public of stormwater pollution prevention message and 945-3000 hotline information, if feasible.	FY 07-08	Done FY 07-08 and ongoing. Signs were made available for public projects in Spring 2008. Implementation will continue into FY 08-09.	ESD, PW, PBCE-Bldg
CON 7.D.4	Evaluate use of construction site signs program and possibly expand it to other municipal construction project sites during FY 07-08.	FY 07-08	Deferred to FY 08-09. Not enough signs were distributed to evaluate their use. Sign distribution will be refined and increased in FY 08-09.	ESD, PW, PBCE-Bldg
CON 8	**Public Works Projects** The City will develop and implement a process to ensure that contractors hired to construct public works projects have adequate erosion control plans and use appropriate Best Management Practices (BMPs) adopted by the Department of Public Works.			
CON 8.A	Conduct training for Public Works capital improvement project staff (Architectural Engineering Design & Construction and Streets, Bridges & Sewers Design and Construction) on contract language, standard specifications, & enforcement.	Annually	Done FY 07-08. Training was developed and conducted on 4/09/08. See 13.D: *Municipal Employee Training Summary.*	PW-CFAS, PW-ECS, PW-TDS, ESD
CON 8.B	Track the number of Public Works projects with these requirements.	Annually	Done FY 07-08. Tracked number of Public Works capital improvement projects to ensure erosion and sediment control language was included. Records are on file.	PW-CFAS, PW-ECS, PW-TDS
CON 9	**Construction Inspection Effectiveness Evaluation** The City of San José will review and evaluate effectiveness of its construction inspection SOPs and BMPs.			
CON 9.A	Evaluate and incorporate any needed improvements in construction inspection SOPs and BMPs.	Annually	Done FY 07-08. No changes required for FY 07-08.	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD-WE, ESD-UR
CON 9.B	Document and evaluate what worked well and what needs improvement.	Annually	Done FY 07-08. See 4.B: *CON Program Evaluation.*	PW-CFAS, PW-ECS, PW-TDS, PBCE-Bldg, ESD-WE, ESD-UR
CON 9.B.1	Expand the number of sites with an inspector of record to capture more of the Type 1 and Type 2 sites (per Public Work's designation)	Ongoing	Deferred to FY 08-09 due to incomplete data.	PBCE-Bldg

4.B CON Program Evaluation

Despite a slowdown in construction activity (fewer active grading permits) in San Jose in FY 07-08 and fewer rainy days compared to the previous year, the City continued to enhance and implement a vigilant construction site monitoring program. In FY 07-08, the City focused on staff training, inspection of construction sites, outreach to developers, and enforcement.

Monitoring erosion and sediment controls is part of the routine inspections of Public Works and PBCE-Building inspectors. ESD Watershed Enforcement supplements this effort with stormwater specific inspections and, when necessary, escalated enforcement. The "hand-off" system developed and implemented by the three inspection groups in 2004 has provided effective monitoring of construction sites. However, in response to deceased staff capacity this year, PBCE-Building restructured their approach to screening level inspections, evidenced by a decrease in number of inspections conducted and housekeeping issues documented. To maintain an effective level of citywide

monitoring of construction sites, ESD Watershed Enforcement increased levels of inspection by implementing monthly and year-round inspections. This procedural change and redistribution of inspections seems to be effective. In a continued effort to maintain a reduction in violations and incidents of escalated enforcement, the departments continued to collaborate in providing outreach to the development community on appropriate best management practices.

Three ESD inspectors and four Public Works inspections became Certified Inspectors of Sediment and Erosion Control this year by completing a rigorous course and passing an exam administered by CISEC, Inc. Additional highlights from FY 07-08 municipal staff training include:

- 108 staff attended Construction Site Inspection and Sediment and Erosion Control BMP Training by Scott Taylor, September 26-27;
- 19 staff attended the Program's annual Construction Site Management Workshop, December 3-4;
- 55 Capital Improvement Projects staff attended a training on sediment and erosion control specifications and contract language, April 9;
- 104 staff received a focused "refresher" training on construction site management at their respective staff meeting in March-April; and

ESD Watershed Enforcement continued to improve its EEDMS system to better track data from construction inspections. Improved tracking methods in EEDMS helped inspectors identify construction sites, schedule inspections, and track and manage sites. A revision of the Area of Concern and Remedial Action list also helped inspectors better communicate violations to site operators and facilitate corrective actions.

In FY 07-08, there were no inquiries from the Water Board regarding erosion and sediment control violation at construction sites in San Jose. This may be attributable to more aggressive and vigilant inspections, evidenced by a 22 percent increase in verbal warnings issued by Public Works and ESD and a 17 percent decrease in actual violations. City staff continue their commitment to quickly identify and correct areas of concern at construction sites and promote sediment and erosion control best management practices to maintain water quality to the highest degree possible.

4.C CON Response to Water Board Comments

No comments received from Water Board on this Program Element.

4.D CON Summary Tables / Additional Information

Permits for Significant Development Projects[1] Reviewed and/or Approved July 1, 2007 – June 30, 2008

Project Name & Location	Project Type	Site Size (Ac)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Department of Public Works, Airport Division						
Public Projects						
North Concourse Project 1661 Airport Boulevard	Terminal	7.5	3.9	Ongoing	Standard Construction Best Management Practices (BMPS) including sediment and erosion control	Silt fencing, sandbags, filter fabric, etc.
Terminal Area Improvement Program (TAIP) 1661 Airport Boulevard	Terminal	28.0	24.5	Ongoing	Standard Construction Best Management Practices (BMPS) including sediment and erosion control	Silt fencing, sandbags, filter fabric, etc.

[1] Projects that have conditions created by land disturbance activities that require a grading permit, as defined by local ordinance, or by discharges of stormwater runoff over areas with erodable soils.

Project Name & Location	Project Type	Site Size (Ac)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
Department of Public Works, Transportation & Development Services Division						
72 SINGLE-FAMILY ATTACHED RESIDENCES ON A 2.93 GROSS ACRE SITE (PW # 3-06380 - Issued 03/05/08) EAST SIDE OF MONTEREY HIGHWAY, APPROXIMATELY 600 FEET SOUTHERLY OF UMBARGER ROAD	Residential	2.96	2.96	Grading On-going	Standard BMPs	Planning / Grading Permits. Follow BMPs
GRADING FOR TRACT NO. 9917 OAK KNOLL - 25 SINGLE FAMILY DETACHED HOMES (PW # 3-16802 - Issued 05/01/08) WEST SIDE OF SAN FELIPE ROAD APPROXIMATELY 300 FEET SOUTHERLY OF YERBA BUENA ROAD	Residential	11.6	5.15	Not Started	Stabilized Construction Entrance. Fiber Rolls. Inlet Protection.	Planning / Grading Permits. Follow SWPPP & Erosion Control Plan
GRADING FOR PARKING LOT ONLY. (PW # 3-03061 - Issued 08/29/07) EAST SIDE OF INDUSTRIAL AVENUE APPROXIMATELY 550 FEET NORTH OF E. GISH ROAD	Non-Residential	2.66	2.51	Completed	Straw Wattle. Stabilized Construction Entrance. Inlet Protection.	Planning / Grading Permits. Follow SWPPP & Erosion Control Plan. Applicant / Developer / Consultant / Contractor attend PW Erosion . Sediment Control Training
RESURFACE KAISER/LIBRARY PARKING LOT (PW # 3-07311 - Issued 12/21/07) NORTHEAST CORNER OF SANTA TERESA BLVD AND CAMINO VERDE DRIVE	Non-Residential	2.4	0.72	Not Started	Stabilized Construction Entrance. Fiber Rolls. Inlet Protection.	Planning / Grading Permits. Follow SWPPP & Erosion Control Plan. Applicant / Developer / Consultant / Contractor attend PW Erosion . Sediment Control Training
GRADING FOR A SINGLE FAMILY DETACHED ON A 0.38 AC SITE (PW # 3-09839 - Issued 02/22/08) NORTHEAST TERMINUS OF CANYON VIEW COURT APPROXIMATELY 110 FEET EASTERLY FROM CANYON VIEW DRIVE	Residential	0.38	0.29	Grading On-going	Stabilized Construction Entrance. Fiber Rolls. Inlet Protection. Gravel Bags in Gutter	Planning / Grading Permits. Follow SWPPP & Erosion Control Plan. Applicant / Developer / Consultant / Contractor attend PW Erosion . Sediment Control Training
GRADING PERMIT FOR THE RELOCATION OF ONE EX. STRUCTURE, AND THE CONSTRUCTION OF TWO NEW BUILDINGS TOTALLING 17,900 ON A 1.65 GR AC SITE (PW # 3-12797 - Issued 08/09/07) SOUTHEAST CORNER OF SOUTH DE ANZA BOULEVARD AND BOLLINGER ROAD.	Non-Residential	1.653	1.653	Grading On-going	Hydroseeding. Stabilized Construction Entrance. Fiber Rolls. Inlet Protection.	Planning / Grading Permits. Follow SWPPP & Erosion Control Plan. Applicant / Developer / Consultant / Contractor attend PW Erosion . Sediment Control Training
GRADING FOR POOL (PW # 3-14073 - Issued 07/20/07) 7196 GLENVIEW DRIVE	Residential	0.789	0.007	Completed	Standard BMPs	Planning / Grading Permits. Follow BMPs

Project Name & Location	Project Type	Site Size (Ac)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
AFFORDABLE HOUSING APARTMENTS (PW # 3-15704 - Issued 10/18/07) EAST SIDE OF HIGHWAY 101, AT THE WESTERN TERMINUS OF SAN ANTONIO COURT	Residential	2.2	2.2	Grading On-going	Stabilized Construction Entrance. Fiber Rolls. Inlet Protection.	Planning / Grading Permits. Follow SWPPP & Erosion Control Plan. Applicant / Developer / Consultant / Contractor attend PW Erosion . Sediment Control Training
PRIVATE PARK ON A 1.07 GROSS ACRE SITE (PW # 3-16768 - Issued 07/20/07) SOUTHEAST CORNER OF COUNTRY CLUB PARKWAY AND BLACKPOOL COURT	Non-Residential	1.07	0.79	Grading On-going	Standard BMPs	Planning / Grading Permits. Follow BMPs
BLOCKS C & D (PW # 3-16854 - Issued 02/13/08) MONTAGUE EXPWY (N/S), ~ 550 FT W/O N 1ST ST	Residential	10.8	10.8	Not Started	Stabilized Construction Entrance. Fiber Rolls. Inlet Protection. Silt Fence	Planning / Grading Permits. Follow SWPPP & Erosion Control Plan. Applicant / Developer / Consultant / Contractor attend PW Erosion . Sediment Control Training
TO GRADE FOR A SINGLE FAMILY RESIDENTIAL ADDITION, SWIMMING POOL, AND RETAINING WALLS (PW # 3-18085 - Issued 07/19/07) 924 FOOTHILL DRIVE	Residential	0.23	0.14	Grading On-going	Fiber Rolls.	Planning / Grading Permits. Follow SWPPP & Erosion Control Plan. Applicant / Developer / Consultant / Contractor attend PW Erosion . Sediment Control Training
GRADING PLANS FOR SINGLE FAMILY HOUSE (PW # 3-18209 - Issued 11/29/07) NEAR GLENVIEW DRIVE	Residential	0.89	0.39	Grading On-going	Stabilized Construction Entrance. Fiber Rolls.	Planning / Grading Permits. Follow SWPPP & Erosion Control Plan. Applicant / Developer / Consultant / Contractor attend PW Erosion . Sediment Control Training
TO ALLOW GRADING FOR NEW CAR WASH AT EXISTING GAS STATION THAT INCLUDES EXTERIOR SURFACE REPLACEMENT AND OTHER SITE IMPROVEMENTS. (PW # 3-00249 - Issued 01/30/08) NORTHWEST CORNER OF SOUTH WHITE ROAD AND ABORN ROAD	Non-Residential	0.63	0.459	Grading On-going	Straw Wattles. Inlet Protection. Concrete Washout. Stabilized Construction Entrance.	Planning / Grading Permits. Follow BMPs
TO ALLOW GRADING TO DEMOLISH EXISTING GAS STATION AND REMOVE TANKS. (PW # 3-00310 - Issued 04/09/08) NORTHWEST CORNER OF BLOSSOM HILL ROAD AND POUGHKEEPSIE ROAD	Non-Residential	0.5	0.029	Grading On-going	Silt Fence. Straw Wattles. Inlet Protection. Stabilized Construction Entrance.	Planning / Grading Permits. Follow BMPs

Project Name & Location	Project Type	Site Size (Ac)	Area of Land Disturbed (Ac)	Project Status	Stormwater Control Measures Included in Project	Requirement Mechanism
TO ALLOW GRADING FOR A NEW PARKING LOT OF 110 NEW PARKING SPACES (PW # 3-02163 - Issued 08/17/07) NORTHERLY SIDE OF BAILEY AVENUE APPROXIMATELY 5000 FEET WESTERLY OF SANTA TERESA BOULEVARD	Non-Residential	220	0.9	Completed	Straw Wattles. Inlet Protection. Concrete Washout. Stabilized Construction Entrance.	Planning / Grading Permits. Follow SWPPP & Erosion Control Plan. Applicant / Developer / Consultant / Contractor attend PW Erosion . Sediment Control Training
TO ALLOW GRADING FOR PARKING LOT EXPANSION WITH ASSOCIATED STORM DRAINAGE/STORMWATER TREATMENT WORK. (PW # 3-06854 - Issued 10/23/07) A STRETCH OF U.P.R.R RIGHT-OF-WAY STARTING AT THE N/E SIDE OF S 10TH STREET, 1050FT S/E OF NEEDLES DRIVE EXTENDING N/E FOR 760FT	Non-Residential	84.89	0.75	Grading On-going	Inlet Protection. Stabilized Construction Entrance. Straw Wattles	Planning / Grading Permits. Follow BMPs

5. PSR: Public Streets, Roads, & Highways

5.A PSR Work Plan Self Evaluation Matrix

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
PSR 1	**Implementation of BMPs** The City of San José will implement Best Management Practices (BMPs) for street, road, and highway operation and maintenance (O&M) activities to reduce pollutants in stormwater and eliminate illicit discharges to the maximum extent practicable.			
PSR 1.A	Develop additional BMPs, as needed, when new O&M tasks are instituted.	As Needed	Not needed in FY 07-08.	DOT, ESD
PSR 1.B	Develop SOPs based on BMPs.	As Needed	Not needed in FY 07-08.	DOT, ESD
PSR 1.C	When new BMPs and SOPs are developed, integrate BMPs and SOPs into training program.	As Needed	Not needed in FY 07-08.	DOT, ESD
PSR 1.C.1	Include SOPs listed in PSR 1.D.1 and developed in FY 05-06 into the FY 06-07 training program.	Done FY 06-07	Done FY 06-07.	ESD
PSR 1.D	Staff will review current PSR and SDO BMPs and SOPs. The annual training sessions with staff will be used as an opportunity to evaluate the effectiveness of BMPs and SOPs. BMPs and SOPs will be updated as indicated by the review.	Done FY 04-05 Annually	Done FY 07-08. The current review in the annual training indicated that no new SOPs are necessary. However a request was made to review the existing street sweeping SOP. The street sweeping SOP will be reviewed in FY 08-09 and revised if needed.	DOT, ESD
PSR 1.D.1	Revise or write the following SOPs: • Sidewalk/Plaza Maintenance: Cleaning, concrete installation and replacement, surface removal and repair; • Bridge and Structure Maintenance: Painting and paint removal, repair work, and graffiti removal; • Median and Road Embankment Maintenance; • Storm Drain Inlet Cleaning; • Storm Drain Line Cleaning; • Management of Storm Drain System Solid Waste; • Pump Station Inspection and Cleaning; • Drainage Ditch Cleaning.	Done FY 05-06	Done FY 05-06.	DOT, ESD, PRNS
PSR 1.D.2	Include a check box on the WE ICID inspection report form to indicate whether the responsible party in a stormwater complaint is a City employee.	FY 07-08 Ongoing	Due to technical requirements, it was not feasible to include a check box in the WE ICID inspection report form in FY 07-08. A change order for the database WE ICID inspection report form is in the process of being written. This task will be carried over into the FY 08-09 work plan. Inspectors will track this information manually and forward the information to the ESD-UR section for appropriate action.	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
PSR 1.D.3	In response to stormwater complaints involving a City employee conducting PSR and SDO O&M activities, the supervisor for the City employee involved in the complaint will be notified.	FY 07-08 Ongoing	Done FY 07-08. One complaint involving a City employee conducting PSR and SDO O&M activities was received in FY 07-08. The supervisor was notified of the complaint.	DOT, GS, PRNS, ESD
PSR 2	**Contractor Use of BMPs** The City of San José will develop and implement a process to ensure that contractors employed to perform street, road, and highway O&M activities use appropriate BMPs per URMP.			
PSR 2.A	Train contract managers for public street, road, and highway O&M contracts on related stormwater BMPs annually.	Annually	Done FY 07-08. Contract manager training was held on 6/17/08.	DOT, ESD
PSR 2.A.1	Include a check box on the WE ICID inspection report form to indicate whether the responsible party in a stormwater complaint is a City contractor.	FY 07-08 Ongoing	Due to technical requirements, it was not feasible to include a check box in the WE ICID inspection report form in FY 07-08. A change order for the database WE ICID inspection report form is in the process of being written. This task will be carried over into the FY 08-09 work plan. Inspectors will track this information manually and forward the information to the ESD-UR section for appropriate action.	ESD
PSR 2.A.2	In response to stormwater complaints involving City contractors conducting PSR and SDO O&M activities, the contract manager for the City contract involved in the complaint will be notified.	FY 07-08 Ongoing	Done FY 07-08. The City did not receive any complaints regarding contractors conducting PSR O&M activities for the City. See 5.B: PSR *Program Evaluation* for summary of complaint.	DOT, GS, PRNS, ESD
PSR 2.B	Develop standard contract language for PSR maintenance activities.	Done FY 05-06	Done FY 05-06.	DOT, ESD
PSR 2.B.1	Send letters to City contractors conducting PSR and SDO O&M activities with a reminder to use appropriate BMPs while conducting their work.	FY 07-08	Done FY 07-08. A letter was drafted In July 2007 and mailed to City contractors conducting PSR and SDO O&M activities in October 2007.	DOT, GS, PRNS, ESD
PSR 3	**City Staff Annual Training** The City of San José will provide annual training to its municipal staff in the use of appropriate BMPs. The City will also provide a mechanism for obtaining feedback from staff on the implementation and effectiveness of the BMPs and Control Measures.			
PSR 3.A	Identify training goals, such as improving the focus of the training on the specific BMPs used by a section; integrating new BMPs, if any; etc.	Annually, Q4	Done FY 07-08. Training goals were identified.	DOT, ESD
PSR 3.B	Identify training opportunities (which could include tailgate meetings and other existing training).	Annually	Done FY 07-08. Training opportunities were identified throughout the year for various City departments.	DOT, ESD
PSR 3.C	Create or revise training modules for affected City staff and contractors.	As needed	Done FY 07-08. The DOT crew training was revised to reflect the closure of the Main Corp Yard and the new operations located at the Central Service Corp Yard.	DOT, ESD
PSR 3.C.1	Add specific components from DOT Electrical Crew training module to the general DOT Street Crew training module. These components include: asphalt/concrete	Done FY 05-06	Done FY 05-06.	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
	removal, concrete installation and repair, and mercury lamp recycling and/or disposal.			
PSR 3.D	Create or revise collateral material based on training modules.	As needed	Done FY 07-08. Presentations were revised as necessary.	DOT, ESD
PSR 3.E	Schedule training with affected supervisors.	Annually	Done FY 07-08. DOT inlet cleaning crews training was scheduled with supervisors in September 2007. RPW training was scheduled in April 2008 for PRNS field crews and Rangers. Training for DOT street maintenance crews was scheduled with supervisors in March 2008.	DOT, ESD
PSR 3.E.1	Develop and implement a new training module specifically for DOT electrician staff.	Done FY 04-05	Done FY 04-05.	DOT, ESD
PSR 4	**Notification of Public Agencies** The City of San José will inform other parties (e.g., CalTrans, the County of Santa Clara, and public utilities) conducting street, road, and highway O&M activities within its jurisdiction of the requirements to implement pollutant reduction BMPs and Control Measures in stormwater to the maximum extent practicable and eliminate illicit discharges.			
PSR 4.A	Identify conditions under which another agency will be notified regarding relevant stormwater requirements.	Done FY 02-03	Done prior to FY 02-03. The City notifies other agencies conducting street, road, and highway O&M activities within its jurisdiction of the requirements to implement BMPs and Control Measures on a complaint driven basis. When a complaint is received, a Watershed Enforcement Inspector investigates the complaint and educates the agency on proper BMPs and Control Measures; a citation is issued if necessary. For each complaint the City received involving other agencies in FY 07-08, Watershed Enforcement investigated the complaint and educated the agency contacts on proper BMPs and control measures to be used when conducting PSR O&M activities within the City.	ESD
PSR 4.A.1	Include a check box on the WE ICID inspection report form to indicate whether the responsible party in a stormwater complaint is another agency.	FY 07-08 Ongoing	Due to technical requirements, it was not feasible to include a check box in the WE ICID inspection report form in FY 07-08. A change order for the database WE ICID inspection report form is in the process of being written. This task will be carried over into the FY 08-09 work plan. Inspectors will track this information manually and forward the information to the ESD-UR section for appropriate action.	ESD
PSR 4.A.2	The City will send letters to other agencies that conduct PSR O&M activities within its jurisdiction informing them of the requirement to implement appropriate BMPs and control measures while conducting their work.	Done FY 06-07	Done FY 06-07.	ESD-WE
PSR 5	**BMP Effectiveness Reviews** As part of the annual review process, the City of San José will review and evaluate the effectiveness of its BMPs in reducing pollutants in stormwater and eliminating illicit discharges. The review and evaluation will include input from the municipal maintenance staff that implement the BMPs.			

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
PSR 5.A	Draft procedure for annual effectiveness reporting, including sub-procedures for gathering feedback from affected supervisors and for modifications to BMPs and SOPs as necessary.	Done FY 01-02	Done FY 01-02.	DOT, ESD
PSR 5.A.1	Review procedures for annual effectiveness evaluation. Consider obtaining feedback from supervisors on how to assess BMP effectiveness and the use of training sessions with staff as an opportunity to evaluate BMPs and SOPs.	Annually	Done FY 07-08. The annual DOT Stormwater BMP and SOP training was conducted in April and May 2008. Both DOT crews and supervisors attended the training conducted in June. PSR & SDO BMPs and SOPs were reviewed and feedback was requested during the training sessions. Written evaluations for the training were also distributed. Feedback received in FY 07-08 indicated that most of the existing BMPs and SOPs are effective; however, a request was made to review the existing street sweeping SOP. The street sweeping SOP will be reviewed in FY 08-09 and revised if needed. See 5.B: *PSR Program Evaluation* for the summary of training evaluation data.	DOT, ESD
PSR 5.B	Conduct evaluation of BMPs and SOPs.	Annually	Done FY 07-08.	DOT, ESD
PSR 5.B.1	Revise the eight SOPs reviewed in FY 06-07 according to comments received during the review process.	FY 07-08	Done FY 07-08. Revisions were made according to comments received.	ESD
PSR 5.C	Expand parking restriction signage and enforcement for street sweeping by 20 curb miles.	FY 07-08	Done FY 07-08. The parking restriction signage and enforcement for street sweeping was expanded by 27.5 curb miles.	DOT
PSR 5.D	Collect street sweeping data: volume and/or weight of debris collected, curb miles swept, and estimated percentage of leaves in yard trimmings collection program.	Ongoing [See CNAP CB-11]	Done FY 07-08 and ongoing. The volume and/or weight of street sweeping debris collected, curb miles swept, and estimated percentage of leaves in yard trimmings collection program were collected.	DOT, ESD
PSR 6	**Rural Public Works Maintenance and Support Activities** The City will extend its control measure strategy for PSR to address water quality impacts resulting from public works maintenance and support activities in rural areas.			
PSR 6.A	Identify City-owned properties that are applicable (under the RPW performance standard).	Ongoing	Done FY 07-08. No new City-owned properties were identified.	ESD, PRNS, DOT, GS
PSR 6.A.1	Re-evaluate the feasibility of using GIS information to identify additional applicable properties, if any.	Done FY 05-06	Done FY 05-06.	PRNS, GS, DOT, ESD
PSR 6.A.2	Some of the roads on the rural roads list compiled in FY 06-07 have portions that are within City limits and portions that are within Unincorporated Areas. Determine exactly which portions of these roads fall within the City's limits.	FY 07-08	Done FY 07-08. Using street maps, it was determined which portions of these roads fall within the City's limits.	DOT. ESD
PSR 6.B	Develop or adapt Standard Operating Procedures (SOPs) and Best Management Practices (BMPs) for	Done FY 03-04	Done FY 03-04.	PRNS, GS, DOT, ESD

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
	rural public works activities.			
PSR 6.C	Provide annual training on appropriate SOPs/BMPs to City staff that perform rural public works operations and maintenance activities. Incorporate SOPs/BMPs evaluation into annual training.	Annually	Done FY 07-08. RPW training was conducted for PRNS staff in May 2008. Seven training sessions were held with a total attendance of 121.	PRNS, GS, DOT, ESD
PSR 6.C.1	Evaluate the RPW training schedule in order to coordinate more efficiently with PRNS staff schedules.	Done FY 06-07	Done FY 06-07.	PRNS, ESD
PSR 6.D	Through contract specifications, require contractors hired by the City to use appropriate SOPs/BMPs when performing rural public works construction or maintenance.	Done FY 05-06	Done FY 05-06.	PRNS, GS, DOT, ESD
PSR 6.E	Annually conduct an evaluation of the effectiveness of the rural public works program, report the results in the Urban Runoff Annual Report. Identify items for continuous improvement.	Annually	Done FY 07-08. The RPW BMP and SOP training was conducted in May 2008. Feedback was requested during the training, and evaluations were distributed. The feedback indicated that no modifications to the BMPs and SOPs were necessary. See 5.B: *PSR Program Evaluation* for the summary of training evaluation data.	PRNS, GS, DOT, ESD

5.B PSR Program Evaluation

Training

The City of San José provides annual training to its municipal staff in the use of appropriate BMPs. The City also provides a mechanism for obtaining feedback from staff on the implementation and effectiveness of the BMPs and Control Measures. Annual municipal staff training was held in April and May 2008 for the PSR and SDO program elements. Participants were given an evaluation form. Of the 193 staff that participated in the training, 125 evaluations were completed and returned. Results of the completed evaluations are summarized below and are comparable to the hi ratings in last year's results:

- 94% responded that the training subjects taught are appropriate to their work;
- 95% responded that the BMPs/SOPs presented correspond to their work practices;
- 98% responded that the training adequately described the relationship of BMPs/SOPs to compliance with the City's Stormwater NPDES permit;
- 95% responded that the training adequately explained how they, City staff, can help the City maintain compliance with the Stormwater NPDES permit; and
- 95% responded that the training adequately explained a SWPPP.

The City's control measure strategy for PSR also addresses water quality impacts resulting from public works maintenance and support activities in rural areas. Training was held in May 2008. Participants were generally positive about the content and relevance of the training session to their work. Of the 121 staff that participated in the training, 90 evaluations were completed and returned. Results of the completed evaluations are summarized below:

- 97% responded that the training subjects taught are appropriate to their work;
- 93% responded that the BMPs/SOPs described corresponds to their work practices;
- 94% responded that the training adequately described the relationship of BMPs/SOPs to compliance with the City's Stormwater NPDES permit; and

- 97% responded that the training adequately explained how they, City staff, can help the City maintain compliance with the Stormwater NPDES permit.
- 97% responded that the training adequately explained a SWPPP.

Contractor Use of BMPs

In FY 07-08, no complaints were received involving a City of San José contractor conducting PSR or SDO O&M activities. A letter was drafted in July 2007 and was mailed to City contractors conducting PSR and SDO O&M activities in October 2007.

Informing Other Agencies

In past years, the City of San José has informed other parties (e.g., CalTrans, the County of Santa Clara, public utilities) conducting street, road, and highway O&M activities within its jurisdiction of the requirements to implement pollutant reduction BMPs and control measures in stormwater to the maximum extent practicable and eliminate illicit discharges on a complaint driven basis. When a complaint is received, a Watershed Enforcement Inspector investigates the complaint and educates the agency on proper BMPs and Control Measures, and issues a citation if necessary. This method continued to be used in FY 07-08.

Partnership with Our City Forest

The City partnered with Our City Forest to plant trees in order to help control erosion on an overpass embankment. The Cropley Avenue overpass southeast embankment (located between Cropley Avenue and Largo Drive) was experiencing erosion, which was causing sediment to enter the street and gutter. While a long-term solution was being evaluated, straw wattles were installed to keep sediment out of the street and gutter. DOT and ESD staff evaluated long-term solutions to control the erosion. With the current budget and staff, DOT decided that planting trees on the overpass embankment would be the best long-term solution. DOT contacted Our City Forest and requested assistance with planting the trees. Our City Forest agreed to plant trees on the embankment. In November 2007, twenty-seven trees were planted on the embankment.

BMP Effectiveness Review

As part of the annual review process, the City of San José reviews and evaluates the effectiveness of its BMPs in reducing pollutants in stormwater and eliminating illicit discharges. The review and evaluation includes input from the municipal maintenance staff that implements the BMPs. BMP effectiveness is evaluated using staff feedback gathered from training sessions. See training evaluation above.

Street Sweeping Program

The City conducts an extensive Street Sweeping program, involving the sweeping of the central business district; neighborhood business district; arterials, collectors, and bicycle lanes; and residential streets. Annually, the City sends out a calendar of the residential street sweeping schedule to each single-family dwelling, and asks neighborhood associations within the City to include reminders in their association newsletters for moving parked vehicles on street sweeping days. The City is continuing to expand the areas in which parking restrictions are required and enforced to improve the effectiveness of the street sweeping program. In FY 07-08, the enforcement area was broadened from 239 to 266.5 curb miles. The City anticipates expanding the areas in which parking restrictions are required and enforced for street sweeping by approximately 20 curb miles in FY 08-09. In FY 07-08, approximately 30,938 cubic yards of debris were collected during all street-sweeping operations. Along with street sweeping, the City has a Yard Trimmings Collection Program. The total amount of yard trimmings collected in FY 07-08 was 129,811 tons. Of the 129,811 tons of yard trimmings collected, 63,384 tons were leaves.

5.C PSR Response to Water Board Comments

No comments received from Water Board on this Program Element.

5.D PSR Summary Tables / Additional Information

Parks Included in the Rural Public Works Performance Standard

Name of Park	Location	Acreage	Type of Park
Almaden Lake Park	Almaden Expwy & Coleman	64.9	Regional
Alum Rock Park	Alum Rock & Penitencia Creek	718.0	Regional
Emma Prusch Farm Park	Story & King	43.5	Regional
Guadalupe River Park	Between Hwy 880 and 280 along Guadalupe River in downtown San José	205.0	Regional
Kelley Park	Senter & Story	138.0	Regional
Lake Cunningham Park/Raging Waters	Capitol & Tully	202.0	Regional
Montgomery Hill Park	Yerba Buena & Murillo	59.6	Neighborhood
Overfelt Gardens	Education Park & McKee	32.6	Regional

Rural Roads within the City of San Jose

Name of Road	Comments
Bailey Avenue	Only a portion of Bailey Road is rural - west of Santa Teresa Avenue to McKean Road.
Casa Loma Road	Casa Loma Road starts at McKean Road and heads west to Rancho Canada del Oro Open Space Preserve. It has no curbs, gutters, or storm drains. A small creek is in the vicinity of the road.
Coyote Creek Golf Course Drive	Coyote Creek Golf Course Drive is a small portion of road leading from the Hwy 101 west bound off ramp to the Coyote Creek Golf Course. It has no curbs, gutters, or storm drains.
Fleming Avenue	Only a portion of Fleming Avenue is rural - east of Morrie Drive. No curb, gutter, or storm drain is on the end portion of the avenue.
Grand Boulevard	Only a portion of Grand Boulevard is rural - at Los Esteros Road (north of Spreckles Avenue) as it goes to the Don Edwards San Francisco Bay National Wildlife Refuge Environmental Education Center.
Hicks Road	Most of Hicks Road south of Guadalupe Mines Road to City limits has no curbs, gutters or storm drains. Hicks Road meanders in and out of the City limits.
Los Esteros Road	Most of Los Esteros Road has no curbs, gutters, or storm drains. Curbs and gutters are on the road in front of the San Jose/Santa Clara Water Pollution Control Plant Administration Building.
McKean Road	Only a portion of McKean Road is rural - south of Bailey Avenue to City limits.
Metcalf Road	East of Hwy 101 as the road goes up into the hills. Small portions of Metcalf Road have an asphalt curb. Portions of Metcalf Road are in the City limits and portions are in Unincorporated Area.
Monterey Road	Only portions of Monterey Road are rural. Most of Monterey Road between Live Oak Ave. and Forsum Road has no curbs, gutters, or storm drains. There are some curbs, gutters and storm drains at the intersection of Palm Avenue and also at the Bailey Avenue interchange.
San Felipe Road	Only portions of San Felipe Road are rural. San Felipe Road between Aborn Road and Early Morning Court has curbs, gutters and storm drains. Portions of San Felipe Road after Early Morning Court and to the City limits have an asphalt curb on one side and no curb, gutter or storm drains on the other side.
Santa Teresa Boulevard	Only a portion of Santa Teresa Boulevard is rural - south of Bailey Avenue to City limits.

Name of Road	Comments
Sierra Road	Only a portion of Sierra Road is rural – as the road goes up into the east hills. Portions of Sierra Road are in the City limits and portions are in Unincorporated Area.
Sweigert Road	Only a portion of Sweigert Road is rural - northeast of Geist Road there is no curb, gutter, or storm drain as Sweigert Road goes up hill toward private drives.
Zanker Road	Only a portion of Zanker Road is rural - north of the Hwy 237 off ramp to Los Esteros Rd. has no curbs and gutters except in front of the San Jose/Santa Clara Water Pollution Control Plant Environmental Services Building.

6. SDO: Storm Drain System Operation & Maintenance

6.A SDO Work Plan Self Evaluation Matrix

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
SDO 1	**O&M BMP Implementation** The City of San José will implement best management practices (BMPs) for the storm drain system operation and maintenance (O&M) to reduce pollutants in stormwater to the maximum extent practicable. Specific BMPs for each type of O&M activity are those listed in the City's Urban Runoff Management Plan (URMP).			
SDO 1.A	Develop additional BMPs, as needed, when new O&M tasks are instituted (including structural controls if necessary).	As Needed	Not needed in FY 07-08.	DOT, ESD
SDO 1.B	Develop SOPs based on BMPs.	As Needed	Not needed in FY 07-08.	DOT, ESD
SDO 1.C	When new BMPs and SOPs are developed, integrate BMPs and SOPs into training program.	As Needed	Not needed in FY 07-08.	DOT, ESD
SDO 1.C.1	Include SOPs listed in SDO 1.D.1 and developed in FY 05-06 into the FY 06-07 training program.	Done FY 06-07	Done FY 06-07.	ESD
SDO 1.D	Staff will review current PSR and SDO BMPs and SOPs. The annual training sessions with staff will be used as an opportunity to evaluate the effectiveness of BMPs and SOPs. BMPs and SOPs will be updated as indicated by the review.	Done FY 04-05 Annually	Done FY 07-08. The current review in the annual training indicated that no new SOPs are necessary for SDO O&M.	DOT, ESD
SDO 1.D.1	Revise or write the following SOPs: • Sidewalk/Plaza Maintenance: Cleaning, concrete installation and replacement, surface removal and repair; • Bridge and Structure Maintenance: Painting and paint removal, repair work, and graffiti removal; • Median and Road Embankment Maintenance; • Storm Drain Inlet Cleaning; • Storm Drain Line Cleaning; • Management of Storm Drain System Solid Waste; • Pump Station Inspection and Cleaning; • Drainage Ditch Cleaning. See PSR 1.D.1.	Done FY 05-06	Done FY 05-06.	DOT, ESD, PRNS
SDO 1.D.2	Include a check box on the WE ICID inspection report form to indicate whether the responsible party in a stormwater complaint is a City employee.	FY 07-08 Ongoing	Due to technical requirements, it was not feasible to include a check box in the WE ICID inspection report form in FY 07-08. A change order for the database WE ICID inspection report form is in the process of being written. This task has been carried over to the FY 08-09 work plan.	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
			Inspectors will track this information manually and forward the information to the ESD-UR section for appropriate action.	
SDO 1.D.3	In response to stormwater complaints involving a City employee conducting PSR and SDO O&M activities, the supervisor for the City employee involved in the complaint will be notified.	FY 07-08 Ongoing	Done FY 07-08. One complaint involving a City employee conducting PSR and SDO O&M activities was received in FY 07-08. The supervisor was notified of the complaint.	DOT, GS, PRNS, ESD
SDO 2	**Problem Tracking and Process Improvement** The City of San José will develop and implement processes for tracking problem areas and ensuring that appropriate BMPs and SOPs will be implemented for storm drain operation and maintenance activities.			
SDO 2.A	Implement an annual inspection and cleaning work plan to achieve a Tier II level review.	Ongoing	Done FY 07-08 and ongoing. The FY 07-08 Storm Inlet Cleaning Program was conducted October 2007-January 2008. For inlet cleaning, DOT schedules and implements the inspection and cleaning schedule annually. To date, the City has been able to achieve a Tier 2 level review with a modified implementation timeframe. In FY 08-09, the City's intent is to continue the Tier 2 level review. However, due to resource constraints, the extended window for implementation of Tier 2 may be needed. In FY 07-08, 29,500 inlets were inspected and, if needed, cleaned.	DOT
SDO 2.B	Evaluate criteria for collecting data from City field personnel for the purposes of determining Problem Areas.	As Needed	Done FY 06-07.	DOT, ESD
SDO 2.C	Revise documentation and problem area reporting procedure, if necessary, to improve reporting performance. Documentation to include frequency, nature, and type of recurring problem. Include coordination of data from ICID and Storm Drain Management System data sources. Include analysis of data to identify trends for targeting solutions.	As Needed	Done FY 06-07.	DOT, ESD
SDO 2.D	Produce Problem Area report.	Annually	Done FY 07-08. FY 07-08 Storm Inlet Cleaning Program Problem Area Report was produced by DOT staff in March 2008.	DOT
SDO 2.E	Address Problem Areas through ICID enforcement/ education activities, additional BMP development, program development or retrofit.	As Needed	Not needed in FY 07-08.	DOT, ESD
SDO 2.E.1	Explore purchasing additional vactor trucks.	Done FY 06-07	Done FY 06-07. .	DOT
SDO 3	**Contractor Use of BMPs** The City will develop and implement, as needed, a process to ensure that contractors employed to perform storm drain O&M activities use the appropriate BMPs.			
SDO 3.A	Train contract managers for SDO O&M contracts on	Annually	Done FY 07-08. Contract manager training was held on	DOT, ESD

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
	related stormwater BMPs.		6/17/08.	
SDO 3.A.1	Include a check box on the WE ICID inspection report form to indicate whether the responsible party in a stormwater complaint is a City contractor.	FY 07-08 Ongoing	Due to technical requirements, it was not feasible to include a check box in the WE ICID inspection report form in FY 07-08. A change order for the database WE ICID inspection report form is in the process of being written. This task has been carried over to the FY 08-09 work plan. Inspectors will track this information manually and forward the information to the ESD-UR section for appropriate action.	ESD
SDO 3.A.2	In response to stormwater complaints involving City contractors conducting PSR and SDO O&M activities, the contract manager for the City contract involved in the complaint will be notified.	FY 07-08 Ongoing	Done FY 07-08. The City did not receive any complaints regarding contractors conducting PSR O&M activities for the City. See 5.B: *PSR Program Evaluation* for summary of complaint.	DOT, GS, PRNS, ESD
SDO 4	**Staff Training and BMP Feedback** The City of San José will provide annual training to its municipal staff in use of appropriate BMPs and/or Control Measures. The City will also provide a mechanism for obtaining feedback from staff on implementation and effectiveness of BMPs and Control Measures.			
SDO 4.A	Provide training prior to the rainy season.	Annually, Q4	Done FY 07-08. Training conducted on September 28, 2007 for inlet cleaning crews; in April and May 2008 for DOT crews; and in May 2008 for PRNS staff.	DOT, ESD
SDO 4.B	Create or revise training modules for affected City staff.	As Needed	Done FY 07-08. The DOT crew training was revised to reflect the closure of the Main Corp Yard and the new operations located at the Central Service Corp Yard.	DOT, ESD
SDO 4.B.1	Improve the focus of the training on the specific BMPs used by a section.	As Needed	Done FY 06-07.	DOT, ESD
SDO 4.B.2	Provide specific training to inlet cleaning crews on IMSPAR data collection in advance of inlet cleaning program implementation.	Annually	Done FY 07-08. DOT Storm Inlet Cleaning Program crew training was conducted on September 28, 2007.	DOT, ESD
SDO 4.B.3	Add specific components from DOT Electrical Crew training module to the general DOT Street Crew training module. These components include: asphalt/concrete removal, concrete installation and repair, and mercury lamp recycling and/or disposal.	Done FY 05-06	Done FY 05-06.	ESD
SDO 4.C	Produce schedule for training.	Annually	Done FY 07-08. DOT inlet cleaning crews training was scheduled with supervisors in September 2007. RPW training was scheduled in April 2008 for PRNS field crews and Rangers. Training for DOT street maintenance crews was scheduled with supervisors in March 2008.	DOT, ESD
SDO 5	**Data Analysis** As part of the annual review process, the City of San José will evaluate data regarding cleaning activities and unusual flows observed during inspection. The review and evaluation will include consideration of storm drain structural retrofit.			
SDO 5.A	Draft procedure for annual review and evaluation of	Done FY 01-02	Done FY 01-02.	DOT, ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
	data.			
SDO 5.A.1	Collect data on the amount of materials removed during inlet cleaning.	Done FY 04-05 Annually	Done FY 07-08. Data was collected, by DOT crews, on the amount and type of materials removed during the FY 07-08 Storm Inlet Cleaning Program.	DOT, ESD
SDO 5.B	Implement annual data review and identify follow-up actions as appropriate.	Annually	Done FY 07-08. The FY 07-08 Storm Inlet Cleaning Program Problem Area data was reviewed and follow-up actions were identified. See 6.B: *SDO Program Evaluation.*	DOT, ESD
SDO 5.B.1	Re-evaluate how follow up is conducted by crews when "cars on catch basins" is identified on the IMSPAR report, in order to better understand to what extent parked cars are a barrier to cleaning.	Done FY 06-07	Done FY 06-07.	DOT, ESD
SDO 5.B.2	Evaluate "cars on catch basins" data to see if it can be used as one of the factors in determining where future posted signage for street sweeping restrictions will be installed.	Done FY 06-07	Done FY 06-07.	DOT, ESD
SDO 5.B.3	Evaluate how to integrate the results of the IMSPAR report, regarding garbage and high debris, into scheduling additional cleaning.	Annually	Done FY 07-08. Some additional cleaning was conducted in FY 07-08.	DOT, ESD
SDO 5.B.4	Re-evaluate use of hand held devices to collect data during storm drain inlet cleaning and potentially other maintenance activities.	FY 07-08	Done FY 07-08. ESD evaluated the proposal to employ hand-held devices to collect data during catch basin cleaning and potentially other maintenance activities. Due to current budget and staffing constraints within DOT, employing the devices is not feasible at this time.	DOT, ESD
SDO 6	**BMP Effectiveness Reviews** As part of the annual review process, the City of San José will review and evaluate the effectiveness of its BMPs in reducing pollutants in stormwater and eliminating illicit discharges.			
SDO 6.A	Review with supervisors to get feedback and information on how to assess BMP effectiveness.	As Needed	Done FY 07-08. DOT supervisors attended annual training. Evaluations were distributed to elicit information on BMP and SOP effectiveness. Feedback received indicates that the BMPs and SOPs are effective.	DOT, ESD
SDO 6.B	Use annual training sessions with staff as an opportunity to evaluate the effectiveness of BMPs & SOPs.	Annually	Done FY 07-08. The annual DOT Stormwater BMP and SOP training was conducted in April 2008. Both DOT crews and supervisors attended the training conducted in April-May 2008. PSR & SDO BMPs and SOPs were reviewed and feedback was requested during the training sessions. Written evaluations for the training were also distributed. Feedback received indicated that the existing BMPs and SOPs are effective and no modifications to SDO SOPs were necessary in FY 07-08. See 5.B: *PSR Program Evaluation* for the summary of training evaluation data.	DOT, ESD

6.B SDO Program Evaluation

Training

The City of San José provides annual training to its municipal staff in use of appropriate BMPs. The City also provides a mechanism for obtaining feedback from staff on implementation and effectiveness of BMPs and Control Measures. See 5.B: PSR Program Evaluation, Training for results for combined PSR & SDO training.

Annual staff training was held in September 2007 for the Storm Drain Inlet Cleaning Program. Participants were given an evaluation form to fill out. Of the 26 staff that participated in the training, 8 evaluations were completed and returned. Results of the completed evaluations are summarized below:

- 100% responded that the training subjects taught are appropriate to their work;
- 100% responded that the training adequately explained how to fill out the storm inlet cleaning data collection form;
- 100% responded that the training adequately described the need for complete and consistent inlet location information;
- 100% responded that the training adequately explained how they, City staff, can help the City maintain compliance with the Stormwater NPDES permit.

Storm Inlet Cleaning Program Data Review

As part of the annual review process, the City of San José evaluates data regarding cleaning activities and unusual flows observed during inspection. The review and evaluation includes consideration of storm drain structural retrofit. The City reviews data on cleaning activities via the Infrastructure Maintenance Division Storm Drain System Problem Area Report (IMSPAR). The data collection criteria developed in FY 04-05 for the Storm Inlet Cleaning program continued to work well. This was the fourth year that quantifiable data was collected by the inlet cleaning crews. Evaluation of the FY 07-08 IMSPAR data indicates that approximately 2.7% of the City's storm drain inlets and catch basins had a problem associated with them. The key problems for urban runoff were:

1. Cars parked over catch basins (~0.5%) – crews could not reach the catch basin to clean it. During review, the City considered options for minimizing parked cars but concluded that sign posting would be cost prohibitive at this time. Currently staff return to these catch basins at least once for subsequent cleaning attempts.
2. High Debris (~0.1%) – debris (leaves, lawn clippings, dirt and other natural materials) in excess of 3 feet deep in catch basin.
3. Garbage (~0.1%) – volume of garbage (paper, bottles, cans, and other man-made waste) in excess of a full grocery bag.
4. Other problems (~2.0%), such as roots (~0.2%), silt sacks (~1.2%), and no access to catch basin (~0.5% - grate could not be opened or located due to other reasons beside cars over the grate).

In FY 07-08, ESD again evaluated the proposal to employ hand held devices to collect data during catch basin cleaning and potentially other maintenance activities. With current budget and staffing constraints within DOT, employing hand held devices was not found to be feasible at this time.

DOT acquired $1M in funding in FY 07-08 for the purchase of four (4) combination cleaner trucks. Combination cleaner trucks can both vacuum out and water jet catch basins and sewer lines The order for the four combination cleaner trucks was placed in FY 07-08, but the trucks have not yet been delivered. DOT anticipates ordering two (2) more combination cleaner trucks in FY 08-09. DOT filled several vacant maintenance positions in the sewer programs in FY 07-08, resulting in fully staffed programs.

BMP Effectiveness

As part of the annual review process, the City of San José reviews and evaluates the effectiveness of its BMPs in reducing pollutants in stormwater and eliminating illicit discharges. BMP effectiveness is evaluated using staff feedback gathered from training sessions. See *5.B PSR Program Evaluation, BMP Effectiveness Review* for results.

6.C SDO Response to Water Board Comments

No comments received from Water Board on this Program Element.

6.D SDO Summary Tables / Additional Information

FY 07-08 Storm Inlet Cleaning Program Problem Area Data

7. WUOM: Water Utilities Operations & Maintenance

7.A WUOM Work Plan Self Evaluation Matrix

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
WUOM 1	**Inventory of O&M Activities** The City of San José's Municipal Water System will conduct an inventory of all-key operations and maintenance activities, and identify routine and unplanned non-stormwater discharges from these activities. This inventory will be conducted every three years and evaluated at least once a year.			
WUOM 1.A	Review current procedures for operations and maintenance.	Annually	Done FY 07-08. The current procedures have been reviewed and no change is recommended at this time.	ESD-Muni
WUOM 1.B	Three-year update of list.	Done 03/31/06 03/31/09	Done 3/06. Next inventory not due until 3/09.	ESD-Muni
WUOM 2	**Implementation of WUPPP** The City of San José's Municipal Water System will implement the pollution control measures identified in the Water Utility Pollution Prevention Plan (WUPPP) to manage chlorine, biocides, and algaecides and prevent erosion and sedimentation.			
WUOM 2.A	Implement WUPPP/Report on activities	Ongoing	Done FY 07-08. WUPPP was implemented in 2000. Municipal Water staff and their contractors comply with the BMPs and SOPs included in the WUPPP.	ESD-Muni
WUOM 3	**Staff Training and Contractor WUPPP Compliance** The City of San José's Municipal Water System will conduct annual training for municipal staff and coordinate WUPPP elements with water utility project planning, including WUPPP elements (BMPs, conditions, specifications, etc., in contract and services agreements).			
WUOM 3.A	Implement training program.	Annually, Q2	Done 12/6/07. See 13.D: *Municipal Employee Training Summary.*	ESD-Muni
WUOM 4	**WUPPP Effectiveness Evaluation** The City of San José's Municipal Water System will evaluate the effectiveness of the WUPPP annually. Maintain accurate documentation and revise the WUPPP as necessary.			
WUOM 4.A	Evaluation effectiveness of program.	Annually, Q4	Done FY 07-08. Municipal Water has developed an evaluation program, which includes evaluating one of the SOPs annually. See 9.B: *WUOM Program Evaluation.*	ESD-Muni

7.B WUOM Program Evaluation

The City's Municipal Water System evaluation process consists of reviewing one SOP or BMP from start to finish on an annual basis. This effort is combined with a training program in which Municipal Water staff produce a training video of the SOP or BMP being reviewed. Staff and others involved in the process view the video and discuss the procedure. The paperwork process for SOPs and BMPs is also reviewed and discussed in a group setting. Individuals who perform the operation and maintenance activity share their thoughts on what works well and where procedural improvements could be made. The facilitator (typically, a designated supervisor) records comments and suggestions for consideration, and when appropriate, SOPs or BMPs are revised.

In FY 07-08, Municipal Water conducted an evaluation of the tank cleaning SOP. This evaluation took place on 12/6/07. A training video was developed in accordance with the SOP outlined in the "Water Utility Operation and Maintenance Discharge Pollution Prevention Plan." Staff and a representative of Muni Water's contractor attended the training session and viewed the video. Staff found the procedures to be satisfactory and effective for meeting the goals of the URMP. No changes were recommended at this time.

A survey was conducted at the annual training to supplement the program evaluation. Results indicate that staff feels that SOPs and BMPs are clear, adequate, workable, and effective.

7.C WUOM Response to Water Board Comments

No comments received from Water Board on this Program Element.

7.D WUOM Tables / Additional Information

No additional information for this Program Element.

8. PM: Pesticide Management

8.A PM Work Plan Self Evaluation Matrix

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
PM 1	**Integrated Pest Management** The City will adopt an Integrated Pest Management (IPM) policy and/or ordinance requiring use of IPM techniques in the agency's operations; and, minimization of pesticide use, particularly organophosphate and copper-based pesticides, by agency staff and contractors.			
PM 1.A	Develop a City IPM policy for inclusion in Pesticide Management Plan.	Done FY 02-03	Done FY 02-03.	ESD
PM 2	**Pesticide Management Plan** The City will develop and implement a Pesticide Management Plan with the goals of minimizing pesticide use and reducing the amount of pesticides in stormwater and landscape runoff to the maximum extent practicable.			
PM 2.A	Draft a City of San José Pesticide Management Plan.	Done FY 01-02	Done FY 01-02.	ESD
PM 2.B	Publish City Pesticide Management Plan in URMP.	Done FY 01-02	Done FY 01-02.	ESD
PM 3	**IPM SOPs and BMPs** The City will develop and implement standard operating procedures (SOPs) and best management practices (BMPs) for implementing the IPM Policy			
PM 3.A	Develop SOPs and BMPs for implementing IPM policy with provisions that will reduce water quality impacts from pesticide use.	Done FY 01-02	Done FY 01-02.	GS, DOT, ESD
PM 3.B	For each type of pest problem identified, seek model SOPs and BMPs from published literature.	Done FY 01-02	Done FY 01-02.	GS, DOT, ESD
PM 3.C	Incorporate or develop appropriate IPM measures into City SOPs and BMPs.	Done FY 02-03	Done FY 02-03.	GS, DOT, ESD
PM 3.C.1	Pilot the use of additional IPM techniques, e.g., for weed control.	FY 06-07 Ongoing	Done FY 07-08 and ongoing. See 8.B: *PM Program Evaluation.*	GS, DOT, ESD, PRNS
PM 3.D	Update City URMP to incorporate model Pest Management Performance Standard, including description of legal authority (IPM policy and contract language), work plan elements, BMPs, and SOPs needed for implementation.	Done FY 02-03	Done FY 02-03.	ESD
PM 3.E	Review and update City SOPs and BMPs as appropriate.	As Needed	The Pesticide Management Committee determined that no updates were required for FY 07-08.	GS, DOT, ESD, PRNS
PM 3.F	Develop Approved Pesticide List for applications on City property.	FY 06-07 Ongoing	Done FY 07-08 and ongoing. The Pesticide Management Committee developed a list in draft form and will revise as needed.	PRNS, DOT, GS, ESD
PM 3.F.1	Revise SOPs and BMPs to reflect use of Approved Pesticide List.	FY 06-07 Ongoing	Done FY 07-08 and ongoing. The Pesticide Management Committee determined that no updates were required for FY 07-08, pending revisions to Approved Pesticide List.	PRNS, DOT, GS, ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
PM 4	**City Employee Training** The City will ensure that employees receive pest management training by implementing the following: 1. Employees who apply pesticides for the City will obtain the appropriate training as required by County Agricultural Commissioner and State Department of Pesticide Regulation (DPR); 2. Employees within departments responsible for pesticide application will receive annual training on appropriate portions of City IPM Policy, SOPs, and BMPs, and latest IPM techniques; 3. Employees who are not authorized to apply pesticides will be annually trained not to use over-the-counter pesticides at workplace, consistent with IPM Policy. 4. Annual internal outreach will be conducted to employees, who do not necessarily purchase or apply pesticides during their course of work, on less toxic pest control and to encourage employees to use IPM techniques away from work.			
PM 4.A	Ensure that employees who apply pesticides for the agency obtain appropriate training required by County Agricultural Commissioner and State Department of Pesticide Regulation.	Annually	Done FY 07-08. DOT, GS, and PRNS staff received safety training on March 11, 2008 on the specific pesticides used during the course of their work. Training is provided annually and meets State DPR requirements. Additional training is done throughout the year for new employees prior to using pesticides or if new pesticides, which were not covered in the annual training, are introduced. See 13.D: *Municipal Employee Training Summary* for summary of attendance.	GS, DOT, PRNS
PM 4.B	Provide annual training on IPM Policy, SOPs and BMPs, and latest IPM techniques to employees within departments responsible for pesticide application.	Annually	Done FY 07-08. Training for DOT, GS and PRNS staff was held on March 11, 2008. Training topics included safety, City IPM Policy, SOPs and BMPs, and IPM techniques. This material was also communicated in the SWPPP, PSR/SDO, and RPW municipal compliance trainings. See 13.D: *Municipal Employee Training Summary* for summary of attendance.	GS, DOT, ESD, PRNS
PM 4.C	Annually inform employees who are not authorized /trained to apply pesticides not to use over-the-counter pesticides at the workplace, consistent with IPM Policy.	Ongoing	Done FY 07-08. Notification that untrained staff members are not to utilize over-the-counter pesticides in the workplace was provided at trainings and in a June 2008 staff notice to City facility managers.	GS, DOT, ESD, PRNS
PM 4.D	Monitoring Mechanism I.B.1. Document and evaluate effectiveness of staff training conducted each year in annual report.	Annually	Done FY 07-08. The training required for certificates and licenses is reviewed and approved for Continuing Education Units (CEUs) by the Department of Pesticide Regulation (DPR) – this ensures it is valuable and effective for applicators. In FY 07-08, an evaluation/survey for class participants was used for IPM training conducted in March 2008. The results were compiled and will be used to implement improvements for the next training. See 8.B: *PM Program Evaluation for a summary of evaluation results.*	GS, DOT, ESD, PRNS
PM 4.D.1	Update class evaluation/survey for IPM training classes	As Needed	Done FY 07-08. The appropriate updates were made to	GS, DOT, ESD, PRNS

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
	conducted by City staff.		the evaluation form to reflect content of training.	
PM 4.E	Public Education and Outreach Task II.A.14 Conduct internal outreach on less toxic pest control to employees who do not necessarily purchase or apply pesticides during the course of their work (to encourage employees to use IPM techniques away from work).	Annually	Done FY 07-08. The summer issue of the *ESD Connections* newsletter featured an article on IPM.	ESD
PM 5	**Contractor Pesticide Management Requirements** The City will develop and implement a process to ensure that contractors employed to conduct pest control and pesticide application on municipal property engage in pest control methods consistent with City IPM Policy. Specifically, the City will require contractors to: ▪ follow City IPM policy, BMPs, and SOPs; ▪ provide evidence of current IPM training, when feasible ▪ provide documentation of pesticide use on City property to the City in a timely manner.			
PM 5.A	Ensure that contractors employed to conduct pest control/pesticide application on municipal property engage in methods consistent with City IPM policy.	Ongoing	Done FY 07-08.	GS, DOT, ESD, PRNS, PW, RDA
PM 5.B	Review and update a list of all contractors employed by the City who perform pesticide application work.	Annually	Done FY 07-08. The contractor list was updated to reflect FY 07-08 contracts.	GS, DOT, ESD, PRNS, PW, RDA
PM 5.C	Implement a procedure to provide to each contractor a copy of the City's IPM policy.	Done FY 02-03	Done FY 02-03.	GS, DOT, ESD, PRNS, PW
PM 5.D	City will supply copies of pest specific BMPs and SOPs to contractors. Contractors will self certify their compliance with the City SOPs and BMPs.	Ongoing	Done FY 07-08.	GS, DOT, ESD
PM 5.E	Require through contract specifications that PCOs contracted for municipal applications use pest control methods consistent with City's IPM Policy. Specifically, require contractors to: a) follow City IPM policy, BMPs and SOPs; b) provide evidence of current IPM training, when feasible; and c) provide documentation of pesticide use on City property to the City in a timely manner.	Ongoing	Done FY 07-08.	GS
PM 5.E.1	City will develop standard content for PCO contracts.	Done FY 04-05	Done FY 04-05.	GS, DOT, ESD, PRNS
PM 5.E.2	City will implement standard content for PCO contracts.	Done FY 05-06 Ongoing	Done FY 07-08.	GS, DOT, ESD, PRNS
PM 5.F	Invite contractors to participate in City training sessions on pesticide management.	FY 05-06 · Ongoing	Done FY 07-08.	GS, DOT, PRNS
PM 5.G	Monitoring Mechanism III.A.1. Document number of PCOs receiving presentations and/or training on pesticide use by PCOs on municipal property.	Annually	Done FY 07-08.	GS, ESD
PM 6	**Pesticide Management Outreach** The City will identify in annual work plan outreach activities it will conduct consistent with Program Pesticide Management Plan. Work plan elements will address			

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
	outreach to residential and commercial pesticide users, pesticide retailers, and special districts. Information will be provided on less-toxic pest control practices, proper disposal of pesticides, and the City's own IPM practices, as applicable.			
PM 6.A	Increase awareness of target audiences regarding proper pesticide use, disposal methods, water quality impacts, and less toxic pest management messages. Target audiences include commercial and residential pesticide users, pesticide retailers, municipal employees, and special districts.	Ongoing	Done FY 07-08. The City participates in the Our Water Our World (OWOW) campaign, and the Program's Watershed Watch campaign. Both campaigns deliver IPM messages. See 14.D: *PIP Activities Table* for more details.	ESD
PM 6.B	Prepare IPM stories and press releases to local media.	As Needed	Done FY 07-08. Media advisories were issued regarding IPM pilot projects, including grazing and installation of owl and bat boxes. The pilot projects received wide coverage by local media. In addition, OWOW ads were placed in multiple publications. See Program Annual Report and 14.D: *PIP Activities Table* for details.	ESD
PM 6.C	In conjunction with Program, City will provide information on less toxic pest control (e.g., IPM techniques, municipal IPM policies, model contract language, training opportunities, etc.) to neighboring special districts (e.g., VTA, sanitary and utility districts, open space districts, vector control districts, and school districts) as appropriate.	As Needed	See Program Annual Report.	ESD
PM 6.D	Create and provide fact sheets and materials to pesticide retailers to facilitate point-of-purchase outreach to support IPM Store Partnership Program.	Ongoing	Done FY 07-08 through Program and BASMAA's OWOW Campaign. See Program Annual Report and 14.D: *PIP Activities Table* for details.	ESD
PM 6.E	Monitoring Mechanism: Document or estimate numbers of residents reached by outreach efforts, including events, web promotion, municipal employee outreach, and media advertising. Monitor responses to outreach efforts by documenting calls to the Program's general and watershed campaign hotlines.	Annually	Done FY 07-08. See Program Annual Report and 14.D: *PIP Activities Table* for evaluation of outreach activities.	ESD
PM 6.F	Co-host regional IPM conference to promote implementation of IPM practices in municipal operations in the City and Bay Area region.	Done FY 06-07	Done FY 06-07.	ESD, PRNS, DOT, GS
PM 6.G	Monitoring Mechanism IV.A.1. Document outreach efforts targeting businesses, recommended in the work plan, to be developed by the Program. Implement evaluation component of the work plan.	Annually	Done FY 07-08. See Program Annual Report and 14.D: *PIP Activities Table* for details.	ESD
PM 7	**HHW Pesticide Disposal** The City will coordinate with household hazardous waste (HHW) collection agencies to support, enhance, and help publicize programs for proper pesticide disposal.			
PM 7.A	Work with HHW collection agencies to support, enhance, and publicize programs for pesticide disposal.	Ongoing	Done FY 07-08 and ongoing. This work is done at the Program level. See Program Annual Report for details.	ESD
PM 7.B	Ensure that adequate pesticide disposal services exist	Annually	Done FY 07-08. Adequate pesticide disposal services	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
	for residents and conditionally exempt small quantity commercial generators.		exist through the County's Household Hazardous Waste and Conditionally Exempt Small Quantity Generators programs. No San José customers were turned away and appointments were scheduled in a timely manner.	
PM 7.C	Provide hazardous waste disposal information to residents, through distribution of materials (e.g., utility bill insert, city newsletter, community events, etc.) or advertising in local media.	Ongoing	Done FY 07-08 and ongoing. Hazardous waste disposal information is provided on the City's website along with a link to the Santa Clara County HHW Program's website. The City's Integrated Waste Management (IWM) outreach includes the Santa Clara County HHW Program's hotline.	ESD
PM 7.D	Monitoring Mechanism V.A.1. Document that HHW collection programs adequately serve residents and businesses and that exchange programs do not exchange organophosphate or banned pesticides.	Annually	Done FY 07-08. The Santa Clara County HHW Program managed 1,000 lbs of Diazinon and Dursban as well as 280,750 lbs of other pesticides (163,750 lbs liquid and 117,000 lbs solid). There was no wait in order to schedule an appointment and no customers were turned away. The HHW Program does not exchange organophosphate or banned pesticides.	ESD
PM 8	**City Pesticide Use Tracking** The City will develop and implement a process for tracking pesticide use on municipally-owned property.			
PM 8.A	Develop and implement a pilot pesticide tracking process for Diazinon and Chlorpyriphos products.	Done FY 01-02	Done FY 01-02.	GS, DOT, ESD
PM 8.B	Track pesticide use on municipally owned property. Include reporting and justification for use of OP pesticides and BMPs employed during OP pesticide use.	Ongoing	Done FY 07-08 and ongoing. Neither the City nor its contractors purchased, used, or wrote recommendations for the use of OP pesticides on municipal property. Contracts for structural pest control include requirements for reporting and justification of use of OP pesticides and BMPs employed during OP pesticide use in the contract specifications.	GS, DOT, ESD
PM 8.B.1	Evaluate feasibility of implementing electronic data management system for pesticide use.	Done FY 04-05	Done FY 04-05.	GS, DOT, ESD
PM 8.B.2	Implement electronic data management system for tracking pesticide use on City property.	Done FY 04-05 and Ongoing	Done FY 07-08. A database was used to track pesticide use on municipal property by City staff and contractors.	GS, DOT, ESD
PM 8.C	Monitoring Mechanism I.A.1. Document completion of tasks in annual reports. Use pesticide tracking process to document pesticide use.	Annually	Done FY 07-08. Monthly pesticide use reports submitted by contractors were compiled and reviewed. See 8.B: *PM Program Evaluation.*	GS, DOT, ESD, PRNS, PW
PM 9	**City Pesticide Inventory Search** The City will conduct periodic Citywide search of its chemical inventory for pesticides no longer legal for application per EPA, State, and/or local requirements. These pesticides, if found, will be properly disposed pursuant to appropriate waste disposal regulations.			
PM 9.A	Conduct Citywide search of chemical storage areas for pesticides no longer legal for application per EPA, State, and/or local requirements. Properly dispose of any such pesticides pursuant to appropriate waste	Annually	Done FY 07-08. PRNS and DOT conducted search. No expired pesticides were found.	GS,DOT, PRNS

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
	disposal regulations.			
PM 10	**Pesticide Management Plan / IPM Policy Review** As part of annual reporting process, the City will review and evaluate, with input from municipal staff, the effectiveness of its Pest Management Plan and IPM Policy in achieving the goals of the Plan to the maximum extent practicable.			
PM 10.A	Review and continuously improve goals, actions, and monitoring mechanisms of the work plan considering results of self-evaluations, comments from Water Board staff and other interested parties, and results of local performance review meetings, if any.	Annually	Done FY 07-08. See 8.B: *PM Program Evaluation.*	GS, DOT, ESD, PRNS, PW
PM 10.B	**Monitoring Mechanism IX.A.1.** Complete revised work plan that incorporates continuous improvement items, and report on completion of work plan tasks.	Annually	Done FY 07-08 (between 07-08 Work Plan and this Annual Report).	GS, DOT, ESD, PRNS, PW
PM 10.C	**Monitoring Mechanism VII.A.1.** Summarize types of pesticide reduction measures required (such as by conditions of approval) for new development and significant redevelopment projects, and percentage of new development/ significant redevelopment projects for which pesticide reduction measures were required. (Draft Permit Provision C.3.n.)	Annually	Done FY 07-08. See NRD 5.G in *Work Plan Self Evaluation Matrix.*	PW, ESD

8.B PM Program Evaluation

Integrated Pest Management

The City continues to apply current and new less toxic and non-chemical Integrated Pest Management (IPM) techniques to resolve municipal pest problems. FY 07-08 highlights include:

- In July 2007, San Jose piloted the use of animal grazing as a pesticide-free vegetation management tool on 4 acres at the Municipal Water Zone 3 Recycled Water Reservoir. In 2008, the pilot program expanded to graze approximately 68 acres of City property at sites including Mineta San Jose International Airport, Alum Rock Park, DOT Special Assessment Districts, and again at Municipal Water Zone 3 Recycled Water Reservoir. See 8D*: IPM Pilot Programs Map.*
- To encourage natural predatory control of gophers, the City completed the installation of 30 barn owl houses and began monitoring the areas. Monitoring began to help gauge effectiveness and anticipated reduced reliance on pesticides. In addition, educational signage was installed to communicate the IPM message and promote the pilot project. See 8D*: IPM Pilot Programs Map.*
- To encourage bats to roost in the City and prey on mosquitoes, the City completed the installation of eight bat boxes in community gardens and two boxes in DOT Special Assessment Districts. The hope is that mosquito control by bats will result in less pesticide use as well as a reduced human health risk of West Nile Virus. Monitoring began to help gauge the effectiveness of the pilot project and educational signage was installed to communicate the IPM message and promote the pilot project. See 8D*: IPM Pilot Programs Map.*
- DOT staff in Special Assessment Districts continued the practice of power washing and scraping tussock moth cocoons from plum and live oak trees. By removing cocoons using mechanical IPM methods, DOT staff eliminates the need to use pesticide spray applications. DOT staff shared information on this successful technique with the City's Pesticide Management Committee and other departments are looking into incorporating this non-toxic method into their operations.

- While many City park sites have not suffered from oak tussock moths due to biological control by parasitic wasps, several City parks sites experience tussock moth infestations too severe to be controlled by mechanical or biological methods. In these situations, PRNS used injection pesticides in place of spraying of infested trees. The injection method not only provides control of the tussock moths but also resulted in less pesticide drift and runoff potential.
- PRNS, DOT, and ESD staff continue to use mulch to help alleviate the need for pre-emergent herbicides and to reduce water use.
- To achieve a tolerable and publically acceptable population of ground squirrels in parks, PRNS continues to implement manual trap and remove methods as opposed to baiting and poisoning with a pesticide. Over a three month period in FY 07-08, Alum Rock Park trapped and removed approximately 300 ground squirrels from around picnic areas, the visitor's center, and a youth center.
- In response to a disease crisis that was killing rare heritage roses in the Guadalupe River Park, the City piloted the use of compost and compost tea as an alternative to pesticides. The pilot improved drainage, reduced incident of disease, and provided reduced reliance to pesticides. Acknowledging that this project meets San Jose's sustainability and Urban Accords goals, utilizes composted materials collected in the residential yard waste program, and incorporates IPM strategies, the City Council issued a commendation recognizing the project.

Data Tracking

The City's pesticide tracking database was developed and implemented in FY 04-05. In FY 06-07, the City improved data collection methods which provided a much wider picture of pesticide use. In turn, neither FY 06-07 nor FY 07-08 pesticide usages for City applications are directly comparable to previous fiscal years' usage numbers. However, the FY 07-08 data set is directly comparable to the FY 06-07 data set, with an exception in the Facilities summary: neither calcium hypochlorite nor sodium hypochlorite, chemicals used to treat fountains and swimming pools, were captured in reports until FY 07-08. Pesticide tracking for golf courses has remained consistent since FY 04-05 and data from each fiscal year is directly comparable. The City will strive to continue collecting pesticide use data from all City sources into the future, which will increase the availability of accurate and comparable data.

Pesticide Use

Even though notable declines were documented in the use of pesticides with known carcinogenic effects and reproductive toxicity (CA Prop 65 List) and those most likely to threaten water quality, overall pesticide use increased by seven percent (404.77 lbs) from FY 06-07 to FY 07-08. While using total pesticide use as an indicator is problematic for a number of reasons, this increase is most likely attributable to the addition of approximately 20 acres of City property requiring maintenance (15 acres of park land and 5 acres of DOT property) and more comprehensive reporting of pesticide use in FY 07-08. Specifically, calcium hypochlorite and sodium hypochlorite, which are used in large quantities (841 lbs in FY 07-08) to treat fountains and swimming pools, were not reflected in previous years' reports, therefore raising total pesticide use in the FY 07-08 report.

Highlights include:

- City applications of oxadiazon continued to decrease (by 20 percent in the last year) in response to its known reproductive toxicity and carcinogenic effects (CA Prop 65 List);
- Following an increased reliance on several broadleaf weed controls (2,4-D, 2-Ethylhexyl Ester; 2,4-D, Isooctyl Ester; and Carfentrazone-Ethyl) in previous years, these pesticides were used approximately 50 percent less in FY 07-08;
- Following an increased reliance on glyphosphate products as a broadleaf weed control in FY 06-07, use of this active ingredient decreased approximately 15 percent last year; and
- Golf course applications of mancozeb have decreased over the last four years in response to its known carcinogenic effects (CA Prop 65 List), however, an increase in use of the fungicide was required last year to respond to rapid blight on greens at the San Jose Municipal Golf Course.

Outreach

The City of San Jose, in partnership with Program Co-permittees, the Santa Clara County Integrated Pest Management Program, and the Metropolitan Adult Education Center of Santa Clara County, developed a 10-week Green Gardener training course for professional landscapers and gardeners. On April 24, 2008, the first class of Green Gardeners graduated after completing 20 hours of training and passing a final exam. Grant funding requested from the California Department of Pesticide

Regulation to support the course was turned down twice. In hopes of continuing the course, partners revised and submitted a request for funding in FY 07-08. See the Program Annual Report for complete details.

Training

In March 2008, City staff held its annual training for staff responsible for applying pesticides. At the conclusion of the training program, participants were given an evaluation form to complete. Of the 126 staff that participated in the training, 63 evaluations were completed and returned. Results of the completed evaluations are indicated below and will serve as a guide for improving the training next year.

- 88% thought the overall training experience was good or excellent;
- 97% thought the training adequately described the City's IPM policy;
- 97% thought that the BMPs/SOPs described match their work practices;
- 96% thought that the training adequately described the relationship of BMPs/SOPs to compliance with the City's Stormwater NPDES permit; and
- 95% thought that the training adequately explained how they, as City staff, could help the City maintain compliance with the Stormwater NPDES permit.

A new Pest Management intranet site was developed and made available to City staff in January. The site contains information on IPM, City policy, pest contracting and purchasing services, and links to sites with related resources.

8.C PM Response to Water Board Comments

No comments received from Water Board on this Program Element.

9. M: Mercury

9.A M Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
M 1	**Municipal Use of Mercury –Containing Products** The City will eliminate all unnecessary municipal use of mercury-containing products and establish proper disposal methods for products that cannot be eliminated.			
M 1.A	Implement SCVURPPP guidelines for mercury-containing product reduction and management. These guidelines include a schedule for the timely phase-out of mercury-containing products identified for virtual elimination as well as reporting requirements, possibly to track recycling, replacement, and reduction in use of mercury-containing products.	Ongoing	Done FY 07-08 and ongoing. See 9.D: *Mercury-Containing Product Management Practices* for a listing of the City's management strategies. The City continued its municipal alkaline and rechargeable battery recycling program in all City facilities. Thirteen major facilities have collection directly from the vendor, the remainder deliver collected batteries to a central collection point. City facilities collected 4,343 pounds of batteries for proper disposal. See 9.B. *Program Evaluation* for details.	ESD, GS
M 1.A.1	Collect and dispose of mercury-containing lamps generated in City-owned facilities	Ongoing	Done FY 07-08 and ongoing. The City purchases low mercury fluorescent lamps, and recycled more than 58,299 feet (11.04 miles) of mercury-containing lamps in FY 07-08 through its Lamp Recycling Program.	ESD, GS
M 1.A.2	Identify other mercury-containing products for virtual elimination, phase-out and/or proper disposal.	Annually, As Needed	Done FY 07-08. The City has an Environmentally Preferable Purchasing Policy which guides City purchasing towards environmentally-friendly products, such as those with no mercury or with viable mercury recycling options. The City is in the process of reassessing its mercury-containing products, and will identify virtual elimination practices where appropriate. See 9.D: *Mercury Containing Product Management Practices* for a listing of actions the City is taking.	ESD, GS
M 1.B	Monitoring Mechanism I. Document completion of tasks in annual reports. Use mercury-containing product reporting guidelines.	Annually	Done FY 07-08. See 9.D: *Mercury Containing Product Management Practices* for a summary of management options identified and/or implemented to date.	ESD
M 2	**Household Hazardous Waste Collection** The City will provide mercury-containing product disposal services through household hazardous waste (HHW) collection programs for residents and small businesses and encourage the use of these programs.			
M 2.A	Provide mercury-containing product disposal services for residents and small businesses.	Ongoing	Done FY 07-08 and ongoing. The City supports the County of Santa Clara Department of Environmental Health's (DEH) Household and Small Business Hazardous Waste program and the in-store take-back program for Universal Wastes. County DEH hosts weekly household and small business hazardous waste collection events. This service allows	ESD-IWM

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
			residents and small businesses in the county to properly dispose of their hazardous wastes, including mercury-containing products. See the County Annual Report for collection numbers and other details.	
M 2.B	Work with Program and HHW collection agencies to develop and help publicize the fluorescent light recycling program.	Ongoing	Done FY 07-08 and ongoing. The City supports the County of Santa Clara Department of Environmental Health's (DEH) Household and Small Business Hazardous Waste Program. See the County's Annual Report for collection numbers and other details. The City and the Program also worked with the County to publicize its fluorescent tube drop-off program. The Program developed and implemented the "Watch Out for Mercury Pollution!" media campaign designed to encourage residents to take their spent fluorescent lamps to any of 32 official drop-off locations in Santa Clara County (up from 30 last FY).	ESD, Program
M.2.C	Host a mercury fever thermometer exchange event for residents in San José and the Water Pollution Control Plant service area.	6/30/08	Done FY 07-08. See 14.D: *PIP Activities Table* for details.	ESD
M 3	**Monitoring and Science** The City will participate in coordinated monitoring efforts to support mercury TMDL development and implementation, including assessment of air pollution sources of mercury and concentrations of mercury in sediment.			
M 3.A	Continue financial support of the Regional Monitoring Program (RMP), including the Mercury Deposition Network Pilot Study. Continue to actively participate in the RMP steering committee and technical review committee.	Ongoing	Done FY 07-08 and ongoing. The City continues to support the RMP financially. The City provided in-kind services from December 2000 through December 2006, operating the Mercury Deposition Network station #CA72. (See M 3.B). The City continues to participate on the RMP steering committee, technical committee, and the Sources, Pathways, and Loadings workgroup.	ESD
M 3.B	Examine feasibility of enhancing stormwater pollution prevention and control activities on a watershed or sub watershed basis to focus activities in those parts of the Guadalupe River Watershed enriched in mercury from natural or mining-related causes.	FY 07-08	Done FY 07-08. The City used GIS to compare sensitive areas from the Guadalupe River Watershed Mercury TMDL with areas designated to receive the most stringent hydromodification management plan requirements. Generally, erosional areas within the Guadalupe River watershed within the City's jurisdiction are required to fully implement HMP requirements.	ESD
M 4	**Regional, State, and Federal Coordination** Actively participate in regional, state, and federal coordination efforts to achieve a reduction in the amount of mercury in urban runoff and air emissions.			
M 4.A	Collaborate in technical studies to support TMDL development and implementation including the Santa Clara Basin WMI Guadalupe River Mercury TMDL Workgroup, RMP, and the CEP.	Ongoing	Done FY 07-08 and ongoing. The City participates in and supports programs to reduce mercury in stormwater runoff and air emissions, including the San Francisco Bay Regional Monitoring Program, National Mercury	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
			Deposition Network, AB 982 TMDL Public Advisory Group, and the WMI Guadalupe River Mercury TMDL Workgroup.	
M 4.B	Support and participate in WMI Watershed Action Plan implementation.	Ongoing	Done FY 07-08 and ongoing. The Watershed Management Initiative (WMI) continues to implement the Watershed Action Plan through the actions of its subgroups and cooperative efforts with other collaborative groups and programs, such as the Water Resources Protection Collaborative, the Habitat Conservation Plan, and the Fisheries and Aquatic Habitat Conservation Effort. City staff participates in most subgroups of the WMI and chairs the Land Use subgroup and the Watershed Education and Outreach subgroup, and continues to support the WMI through the contribution of staff time for the position of WMI Coordinator. In 2007, the City also accepted the role of WMI co-chair and chair for the WMI steering group.	ESD
M 5	**Public Education and Outreach** Increase awareness of proper disposal of mercury-containing products and available non-mercury containing alternatives. Target audiences include residential, commercial, and industrial users and municipal employees.			
M 5.A	Coordinate with Program and HHW collection agencies to develop and implement a mercury-containing product outreach program to educate a selected target audience as well as encourage the proper use of the disposal of mercury-containing products.	Ongoing	Done FY 07-08 and ongoing. The Program maintains mercury-related information for residents on the MyWatershedWatch.org website. See Program Annual Report for details. Mercury and Household Hazardous Waste messages were also included at the Home Show event. See 14.D: *PIP Activities Table.*	ESD, Program, County HHW
M 5.B	Coordinate with municipal inspectors to integrate mercury outreach into the existing routine pretreatment, source control, and/or hazardous materials inspection processes of industrial businesses.	Ongoing	Done FY 07-08 and ongoing. Provided proper handling and disposal information for mercury-containing products to businesses attending the Industrial Users Academy. See 14.D: *PIP Activities Table.* Inspectors also distribute the County's Universal Waste brochure for businesses as needed.	ESD
M 5.C	Attend community events and distribute outreach materials. (See Attachment A: Outreach Activities Summary)	Ongoing	Done FY 07-08 and ongoing. Messages regarding proper disposal of fluorescent tubes are included whenever the Household Hazardous Waste program is promoted, e.g. the Home Show. See 14.D: *PIP Activities Table* for details.	ESD
M 5.D	Monitoring Mechanism V.B. document and evaluate each outreach activity, including the target audience and number of residents and/or businesses reached.	Annually	See Program report and 14.D: *PIP Activities Table* for evaluation of outreach activities.	ESD, Program

9.B M Program Evaluation

In FY 07-08, the City focused its virtual elimination policy activities on the collection and disposal of batteries and mercury-containing lamps, with the goal of reducing the impact of mercury from City operations. The City purchases and encourages the use of low mercury fluorescent lamps in City facilities. The City recycled more than 58,299 feet (11.04 miles) of mercury-containing lamps in FY 07-08 through its recycling programs. Questions regarding mercury content and alternative products are part of the City's Request for Quotation (RFQ) forms.

The City also worked to expand battery recycling in City facilities. Battery recycling is implemented at all facilities (approximately 100), making it easier for municipal employees to properly dispose of spent batteries. The batteries are collected as Universal Waste and hauled offsite by an outside contractor – thirteen facilities have collection directly from the vendor; the rest bring batteries collected at their site to a central collection point. From May 2007 to June 2008, 4,343 pounds of alkaline, lithium, and rechargeable batteries were collected and properly recycled.

In addition to activities meant to prevent mercury from contaminating stormwater runoff, the City engages in efforts to prevent mercury from entering the sanitary sewer system. The City hosted multiple mercury thermometer take-back events for City residents in FY 07-08. A total of 541 mercury-containing thermometers were collected at these City-sponsored events, and disposed of appropriately. This equates to 270 grams of mercury removed from the environment. More thermometer exchange events will take place in San José as well as the Water Pollution Control Plant Service Area in FY 08-09.

The City continues its commitment to work with the Water Board and stakeholders toward TMDLs that are technically defensible and feasible for implementation. City staff participated in mercury TMDL efforts by providing comments on the Guadalupe Watershed Mercury TMDL Report and Basin Plan Amendment, and serves as the WMI Watershed Assessment and Monitoring Subgroup representative to the Guadalupe Mercury TMDL project. The City expects to actively participate in the adaptive implementation of both the Baywide and Guadalupe mercury TMDLs in FY 08-09. In addition, the City supports SCVURPPP, RMP, BASMAA and BACWA as these agencies conduct technical studies to address uncertainties regarding mercury in the watershed.

9.C M Response to Water Board Comments

No comments received from Water Board on this Program Element.

9.D M Summary Tables / Additional Information

Mercury-Containing Product Management Practices

Mercury-Containing Products	Not Found	MO #1: Replace with Alternative	MO #2: Alternative upon Failure	MO #3: Reduce Use	MO #4: Recycle	MO #5: Hazardous Waste	Comments
LAMPS:							
Compact source lamp					I		Recycled through City's Lamp Recycling Program
Spectral lamp	NF						
Fluorescent lamp (Tubes, CFLs)		I	I		I		All lamps are recycled through City's Lamp Recycling Program.
Metal halide Lamp					I		Recycled through City's Lamp Recycling Program
High pressure sodium lamp					I		Recycled through City's Lamp Recycling Program
Mercury Vapor lamps					I		Recycled through City's Lamp Recycling Program
Cold Cathode lamp	NF						
Neon lamp	NF						
Ultra-violet lamp					I		
THERMOSTAT PROBES (ALSO KNOWN AS FLAME SENSORS OR GAS SAFETY VALVES):

10. CNAP: Copper / Nickel Action Plans

10.A CNAP Work Plan Self Evaluation Matrix

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
CB-1	**Vehicle Washing Operations**			
CB-1.A	Have member of San José team trained to lead mobile cleaners certification seminar.	As needed	Done FY 07-08 and ongoing. City staff available to train as needed.	ESD
CB-1.B	Support Program in hosting mobile cleaners certification seminar.	Done FY 06-07	Done FY 06-07. Companies desiring training are directed to the BASMAA online training program, and offered a live training if they desire one.	ESD
CB-1.B.1	Promote list of certified mobile cleaning service providers.	Ongoing	Done FY 07-08 and ongoing. A link to the database of BASMAA-trained Recognized Mobile Surface Cleaners is posted on the City's website.	ESD
CB-1.C	Offer discount car washes through the Watershed Watch Campaign.	12/31/07	Done FY 07-08. The Watershed Watch campaign partnered with Classic Car Wash to offer discounted car wash services thru the end of December 2007 to customers using their Watershed Watch card, which is available for free download on www.MyWatershedWatch.org. In May 2008 this partnership restarted, along with an additional partner with one Premier Car Wash location in San Jose. These new discounts run through December 2008.	Program, ESD
CB-3	**Industrial Discharges**			
CB-3.A	Continue Distribution of information regarding copper from roof vents.	Ongoing	Done FY 07-08 and ongoing. Information is available on ESD website, and for Watershed Inspectors to distribute. The Roof Vent BMP was also distributed to 139 pertinent Industrial Users in San José, along with a cover letter informing businesses of the potential for roof runoff at their facilities. See 14.D: *PIP Activities Table* for details	ESD
CB-3.A.1	Continue rooftop inspections. Evaluate efforts and need for any additional effort.	Done FY 05-06	Done FY 05-06.	ESD
CB-3.B	Mail NOI Package: information on the GIASP and how to comply, to targeted industrial facilities.	Done FY 05-06	Done FY 07-08. See CB-3.A.	ESD
CB-8	**Watershed Assessments and New Development**			
CB-8.A	Review new and redevelopment project review procedures and update or refine procedures to minimize copper pollution. See NRD sections 3, 4, and 9 for details on San José's implementation of C.3 permit provisions.	Done FY 02-03	See NRD sections 3, 4, and 9 for details on San José's implementation of C.3 permit provisions.	ESD, PBCE, PW, RDA
CB-11	**Street Sweeping and Storm System O&M**			

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
CB-11.A	Track quantitative data on the tons of material removed and disposed and other relevant street sweeping program data.	Annually	Done FY 07-08. The City conducts an extensive Street Sweeping program, involving the sweeping of the central business district; neighborhood business districts; arterials, collectors, and bicycle lanes; and residential streets. Annually, the City sends out a calendar of the residential street sweeping schedule to each single-family dwelling, and asks neighborhood associations within the City to include reminders in their association newsletters to move parked vehicles on street sweeping days. The City is continuing to expand the areas in which parking restrictions are required and enforced to improve the effectiveness of the street sweeping program. In FY 07-08, the enforcement area was broadened from 239 to 266.5 curb miles. The City anticipates expanding the areas in which parking restrictions are required and enforced for street sweeping by approximately 20 curb miles in FY 08-09. In FY 07-08, 30,938 cubic yards of debris were collected during all street-sweeping operations. See 5.B: *PSR Program Evaluation* for details. The City also has a comprehensive storm sewer inlet cleaning program, where a combination cleaner truck removes debris from all of the City's inlets. In FY 07-08, approximately 300 cubic yards of debris were removed. See 6.A: *SDO Work Plan Self Evaluation Matrix* for details.	ESD-IWM, DOT
CB-12	**Pools and Spas**			
CB-12.A	Distribute outreach materials at events, public counters, and post on City website.	Ongoing	Done FY 07-08 See 14.D: *PIP Activities Table* for details	ESD
CB-12.B	Provide guidance to residents on disposal alternatives for pool and spa water.	Ongoing	Done FY 07-08. Residents who call for guidance are told to dispose of their pool and spa water in their sanitary sewer clean-out.	ESD
CB-21	**Architectural use of copper**			
CB-21.A	Continue to discourage architectural use of copper during Planning application review.	Ongoing	Done FY 07-08 and ongoing. As projects undergo review, comments discouraging architectural use of copper in development projects are given where appropriate. See NRD 9.	PBCE-Planning
CB-21.B	Continue to monitor progress of San José Green Building program to identify opportunities for discouraging architectural use of copper.	Ongoing	Done FY 07-08 and ongoing. As of June 30, 2008, ESD has two and PBCE has one dedicated LEED accredited staff person who reviews projects and advises City staff on Green Building materials and techniques, including discouraging architectural use of copper. City Council updated the Green Building Policy on March 6, 2007 to require LEED Silver on all municipal buildings	PBCE-Planning ESD-UR

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
			over 10,000 sq. ft. with a goal of achieving Gold or Platinum. San Jose's fourth Green Vision goal is to build or retrofit 50 million square feet of green buildings. The City is working on a Green Building program for private development, and internal Green Building stakeholders meet monthly to discuss projects and share information.	
NB-1	**Discharges from Construction Sites**			
NB-1.A	Implement performance standards for construction inspection.	See NRD 6 and CON program element for activities that address erosion control.	See NRD 6 and CON program element for activities that address erosion control.	ESD, PBCE, PW
NB-1.B	Participate in the Water Board's regional training of construction site inspectors.	See NRD 6 and CON program element for activities that address erosion control.	See NRD 6 and CON program element for activities that address erosion control.	ESD, PBCE, PW

10.B CNAP Program Evaluation

Measures to control copper discharges at the municipal level have been integrated into ongoing City activities identified in the IND and NRD sections of the URMP. Copper and Nickel also remain among the list of pollutants addressed by general and targeted outreach regarding stormwater pollution prevention. Additionally, the City provides the monitoring and data analysis used to evaluate water quality trigger levels associated with the Copper and Nickel Action Plans for the South Bay. The City's South Bay Monitoring Program collects samples from 12 stations monthly in the Lower South San Francisco Bay, and compares dry season indicator station means to trigger levels originally set out in the Copper/Nickel action plan. To date, the project has collected over 1,600 samples for analysis of dissolved copper and nickel.

In addition to the existing work plan, the City piloted a car wash storm drain diverter kit in FY 07-08. The City purchased a SudSafe car wash diverter kit and granted it to the Lincoln High School cheerleader squad for use in their fundraising car wash activities at Hoover Middle School. The events took place on public school property to avoid violating City ordinances requiring permits to do this type of activity. The kit was granted to the school instead of loaned, due to concerns about City responsibility for misuse or failure of the kit. The SudSafe kit was chosen from several kit-in-a-box products, most of which require plugging the catch basin's outlet and using the basin to capture water. Plugging the basin requires 'confined space entry,' which most parents or students do not have the training, tools, or authorization to do. The SudSafe kit consisted of a portable basin which sits across the top of the opened storm drain, with a sump pump in it to pump the water to a nearby cleanout. In theory the wash water would run into the kit basin, and the pump would turn on and pump the water out of it, to a cleanout or to landscape. The school group used the kit on August 5, 2007 at Hoover MS, with City staff on-site to help set it up. Every catch basin is uniquely sized and shaped, and in this case the kit's basin did not completely seal the catch basin. In addition, the kit's basin had a ¼-inch lip, so the wash water simply flowed around the basin and into the storm drain. City staff tried to modify the kit on-site, with little success. The kit can likely be modified but it will cost about as much as the device itself, and require some skill in setting it up properly. The school group did not hold another fundraiser, so modifications to the kit were never tried. Due to the concerns with the performance of the kit, logistical constraints, and labor-intensive nature of running a kit-based program, the City has not pursued purchasing additional kits to grant to additional public schools; instead promoting alternative fundraising strategies.

The City continued its NOI Filers Project in FY 07-08. Select facilities were contacted and encouraged to comply with the State's General Industrial Activities Stormwater Permit (GIASP). The contact letter included a checklist to help determine if the facility needed to be covered by the GIASP, a flow chart detailing the development and

implementation of a SWPPP, and a reprint of a previously published Tributary Tribune article with information about the GIASP and the Stormwater Enforcement Act of 1998 (AB 2019). The City sent the contact package to 139 facilities in San José. These facilities were selected based on the following criteria:

- Facilities listed in Watershed Enforcement's Industrial and Commercial database (EEDMS).
- Facilities with a GIASP Category of 8 or 10 (Based on SIC Code).
- Facilities which fall under the SIC codes identified in the 1998 *Industrial Stormwater Quality Monitoring Pilot Project.*

Watershed Enforcement Inspectors are trained annually in GIASP requirements. They evaluate each facility for applicability of the GIASP, and make recommendations to the facility owners/operators based upon their findings. These activities are fully integrated into the standard operating procedures for Watershed Enforcement inspections. Facilities found to need to file are reported to the Water Board annually in the City's URMP Annual Report. See 2.D: *Companies Requiring NOI Based on SIC But Have Not Filed* and 2.D: *Companies Requiring NOI Based on Exposure But Have Not Filed* for this information.

The City directs Mobile Cleaners to the BASMAA online Mobile Surface Cleaner Training to educate themselves on cleaning BMPs. The City promotes the list of trained service providers on the website. Live trainings are available upon request. No requests were made in FY 07-08.

10.C CNAP Response to Water Board Comments

No comments received from Water Board on this Program Element.

10.D CNAP Summary Tables / Additional Information

No additional information for this Program Element.

11. TRA: Trash

11.A TRA Work Plan Self Evaluation Matrix

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
TRA 1	**Inventory, Document and Evaluate Trash Management Practices**			
TRA 1.A	Complete Program survey of existing trash management practices.	Done FY 02-03	Done FY 02-03.	ESD
TRA 2	**Document and Map Known Trash Problem Areas**			
TRA.2.A	Identify data sources and information showing the location of known trash problem areas (e.g., trash complaints/incidents and eradication efforts.)	Done FY 03-04	Done FY 03-04.	ESD
TRA 2.B	Compile trash problem location data/information and submit to Program for conversion to coordinates for GIS mapping.	Done FY 03-04	Done FY 03-04.	ESD
TRA 2.C	Revise and update documentation (list of locations, maps, etc.) of known trash problem areas.	As Needed	Done FY 07-08. Known trash problem areas along creeks are documented as part of the Trash Prevention and Removal MOA. Areas where the trash is a result of illegal encampment activities are referred to the MOA's weekly and monthly cleanup programs.	ESD
TRA 2.D	Continue identifying and prioritizing trash problem areas in urban streams and waterways and other potential sources that may contribute trash to those areas.	Annually	Done FY 07-08. Known trash problem areas along creeks are documented as part of the Trash Prevention and Removal MOA. Areas where the trash is a result of illegal encampment activities are referred to the MOA's weekly and monthly cleanup programs.	ESD, PRNS, DOT, PD
TRA 3	**Conduct Trash Evaluations**			
TRA 3.A	Work with Program to select trash evaluation methodology.	Done FY 03-04	Done FY 03-04.	ESD
TRA 3.B	Assist Program with planning and organizing of training workshop for municipal staff.	Done FY 03-04	Done FY 03-04.	ESD
TRA 3.C	Participate in the trash evaluation methodology training workshop.	Done FY 04-05	Done FY 04-05.	ESD

TRA 3.D.1	Coyote Watershed	Done FY 04-05	Done FY 04-05.	ESD
TRA 3.D.2	Remaining San José locations	Done FY 05-06	Done FY 05-06.	ESD
TRA 3.E	Continue trash evaluations in high-priority areas to track changes over time.	Ongoing	Done FY 07-08. Trash evaluations were performed at 9 high-priority locations in San José identified in FY 05-06's Annual Report or by the structural trash pilot project. See 11.D: *Trash Problem Area Activity Report.*	ESD
TRA 4	**Develop Standardized Documentation and Reporting Format**			

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
TRA 4.A	Work with Program to develop a reporting format to document trash management activities in Annual Reports.	Done FY 03-04	Done FY 03-04.	ESD
TRA 5	**Document and Analyze Evaluation Results; Identify and Prioritize Trash Problem Areas**			
TRA 5.A	Assist Program staff with the documentation and analysis of trash evaluation results.	Ongoing	Done FY 07-08. The City submitted trash assessment data to Program.	ESD
TRA 5.B	Identify high-priority trash areas using trash evaluation results:	Ongoing	Done FY 07-08. Known trash problem areas along creeks are documented as part of the Trash Prevention and Removal MOA. Areas where the trash is a result of illegal encampment activities are referred to the MOA's weekly and monthly cleanup programs.	ESD
TRA 5.B.1	Coyote Watershed	Done FY 04-05	Done FY 04-05.	ESD
TRA 5.B.2	Remaining San José locations	Done FY 05-06	Done FY 05-06.	ESD
TRA 6	**Identify and Implement Trash Management Practices**			
TRA 6.A	Identify reasonable trash management practices to address high=-priority areas (in TRA 5B).	Ongoing	Done FY 07-08 and ongoing. See 11.D: *Trash Problem Area Activity Report.*	ESD, PRNS, GS, DOT
TRA 6.B	Implement or refine trash management practices at high-priority areas to the maximum extent practicable.	Ongoing	Done FY 07-08 and ongoing. The City partnered with the Water District to clean up three locations with significant trash accumulations: 2 on Coyote Creek and 1 on Guadalupe River this fiscal year as part of the Trash MOA. The Trash MOA itself was refined and revised in FY 07-08. See 11.B: *TRA Program Evaluation* for details. The City's Anti-Litter Program has approximately 3,426 volunteers participating in litter removal throughout the City, a 10% increase over FY 06-07. See 14.D.: *PIP Activities Table* for more information on litter-related Citizen Involvement activities.	ESD, PRNS, GS, DOT
TRA 6.C	Document and evaluate implementation of trash management actions.	Ongoing	Done FY 07-08 and ongoing. See 11.D: *Trash Problem Area Activity Report* and 11.D: *Trash Prevention and Removal Activities undertaken by the City of San José.*	ESD
TRA 6.D	Provide Program with information on trash management practices implemented on standardized reporting format.	Annually	Done FY 07-08. The City submitted trash assessment data to Program.	ESD
TRA 6.E	Provide Program with trash assessment data forms.	Annually	Done FY 07-08. The City submitted trash assessment data to Program.	ESD
TRA 6.F	Assist Program in developing Trash Fact Sheets.	TBD by Program	Done FY 07-08. Provided content and comments on latest iteration of Program's Trash fact sheet.	ESD
TRA 7	**Review and Update Performance Standards and Develop Long-Term Strategy for Trash Management**			
TRA 7.A	Assist with the review and update of existing standards that address BMPs or control measures relevant to trash management.	TBD by Program	See Program Annual Report for details.	ESD

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
TRA 7.B	Assist Program staff in developing a long-term strategy for trash conditions in urban streams and waterways.	Ongoing	Done FY 07-08 and ongoing. Staff participated in Trash AHTG meetings in which discussions began regarding a long-term strategy.	ESD
TRA 8	**Implement a Pilot Demonstration Project**			
TRA 8.A	Assist Program in implementing a pilot project to address trash conveyed through the storm drain system.	Ongoing as necessary	Done FY 07-08 and ongoing. The City has worked closely with the Program and other co-permittees to coordinate structural trash pilot projects in the Santa Clara Basin. The pilot began in FY 07-08 and will continue in FY 08-09.	ESD, DOT, PW
TRA 8.B	Begin piloting the use of structural controls to prevent trash from entering the storm sewer system.	Ongoing as necessary	Done FY 07-08 and ongoing. The City hired a contractor to manufacture and install approximately 80 inlet trash screens in select pilot locations in the City. Installation occurred in fall of 2007 and late spring 2008.	ESD, DOT, PW
TRA 8.C	Pursue grant funding to support installation of structural controls for trash management.	As Needed	Done FY 07-08. No grants for this type of work were pursued.	ESD, DOT, PW
TRA 8.D	Evaluate the effectiveness of the pilot structural controls.	Ongoing as necessary	In progress.	Program, ESD, DOT, PW

11.B TRA Program Evaluation

Assessments

In FY 07-08, the City continued to perform trash problem area assessments, supported City and community trash clean-up efforts, and evaluated the need and effectiveness of additional trash management activities for future implementation. See 11.D: *Trash Assessment Activity Report* for details.

The City continued to assess the level of trash at various sites in the City. Assessments were performed using one of two standard protocols utilized by all co-permittees in the Santa Clara Valley. Assessments provide information regarding the type and potential sources of trash found in and around urban creeks and offered insight into the effectiveness of existing trash management practices. The trash assessments revealed that existing trash management activities are sufficient at many locations, but that enhancements are needed in others. The City is exploring additional assessment tools to better characterize the levels and nature of litter across the City as a whole.

Prevention

The City strongly advocates litter prevention, and actively participates in efforts which promote prevention. One effort, the Silicon Valley Anti-Litter Campaign is a countywide collaboration of agencies, businesses, and interested parties committed to litter-free streets and creeks. See 14.D: *PIP Activities Table* for details about this campaign. The City is also actively involved in BASMAA's upcoming Regional Advertising Campaign focusing on litter prevention. The City is also exploring long-term illegal encampment solutions with the County's Blue Ribbon Commission on Housing and Homeless Issues, as well as exploring policies which curtail specific items may end up as litter, such as shopping bags.

Removal

The City implements multiple litter removal programs, as detailed in 11.D: *Trash Prevention and Removal Activities Undertaken by the City of San José*. The highlight of FY 07-08 was the City and the Santa Clara Valley Water District (District) expanding efforts associated with the Memorandum of Agreement for Trash Prevention and Removal (Trash MOA), which began in FY 04-05. The Trash MOA was revised in February 2008 to incorporate illegal encampment cleanup activities, some of which were taking place on an ad hoc basis. The revised Trash MOA includes weekly encampment cleanup activities on waterways in the City, up to 10 monthly cleanups of large and active illegal encampments, as well as increasing the number of City-District partnered cleanups from a maximum of three per year to a maximum of five per year. During this

reporting period, partnered clean-up projects on the Coyote Creek and the Guadalupe River removed over 28 tons of debris from the banks and waterways, a 75% increase from FY 06-07. The vast majority of this debris was removed from one site, highlighting the value of this collaboration.

The City's Anti-litter Program has 3,426 Pick Up San José volunteers, a 10% increase from last FY in the number of volunteers cleaning litter from City streets, parks, and waterways. Pick Up San José volunteers and one-day clean-up event volunteers collected 1,472 bags of litter in FY 07-08. The Anti-litter program also has 132 of its 150 Litter Hot Spots 'adopted' and volunteers have collected 373 bags of litter from these sites. In addition, the Anti-litter Program eliminated eight illegal dumpsites, using clean-up and enforcement to discourage additional dumping at these sites.

Structural Trash Management Pilot

The City installed approximately 85 catch basin inserts (screens) in FY 07-08 as part of the multi-year structural trash management pilot program, done in collaboration with the Program and the City of Sunnyvale. These screens could serve as an additional method to further prevent trash and other debris from entering the City's stormwater conveyance system and, ultimately, our local creeks. Preliminary results indicate that the screens are effective at preventing material from entering the stormwater conveyance system, without significantly affecting catch basin function or capacity. However, results are based on a dryer than average wet season. Preliminary results also indicate that the majority of material captured is leafy debris. Catch basin size, shape, and plumbing constraints prohibit installation of in-basin structural controls in many of the City's storm inlets; however, targeted applications of the inserts may be beneficial. Quantitative results of this pilot study are anticipated in the summer of 2009, and will include additional information on effectiveness and costs associated with installation, operation, and maintenance.

ESD met with Redevelopment Agency staff to look into the feasibility of piloting dual-purpose storm drain inlet hoods in the downtown core. These inlet hoods would have both trash exclusion capabilities and a pre-cast 'No Dumping' message. These devices are prohibitively expensive and would require lengthy technical evaluation to determine their impact on flood control before they could be installed. The City may continue to explore the feasibility of this structural control in the future.

11.C TRA Response to Water Board Comments

No comments received from Water Board on this Program Element.

11.D TRA Summary Tables / Additional Information

Trash Assessment Activity Report

#	Date	Site ID	Watershed	Location	Assessment Method[11]	Score	Existing Trash Management Action	Recommended Management Actions and/or Future Evaluations
1	6/30/08	SJ02	Guadalupe	Blackford High School (Boynton Ave between Blackford & Underwood)	KAB	1	Monthly street sweeping, Anti-Litter Program hotspot, periodically cleaned by volunteers or City staff.	Site was mostly clean. No additional assessments recommended.
2	6/24/08	SJ23	Coyote	Yerba Buena Creek at Evergreen Park	RTA	91	Park Maintenance staff maintains the park on a regular basis.	Trash appears to have blown in from adjacent park, and littered by park users in the dry creek bed and on pedestrian bridge, with minor downstream transport. Future assessment not recommended.
3	2/19/08	SJ27	Coyote	Coyote Creek between Berryessa Rd and Mabury Road	KAB	1	Creek access was too limited, so assessment done on street. No trash management actions apparent.	Banks are clean, but the water is significantly impacted by trash. Recommend exploring in-creek cleanup to remove trash and move fallen trees that are collecting the trash. Future assessment is recommended.
4	2/19/08	SJ28	Coyote	Coyote Creek at Julian Street Bridge	KAB	3	San Jose High Academy cleans adjacent banks on National River Clean-up Day and Coastal Clean-up Day.	Natural vegetation frequently creates a dam at this site. Recommend referral to City-District Trash MOA for future cleanup. Future assessment is recommended.
5	2/19/08	SJ30	Coyote	Coyote Creek at Upper Penitencia (confluence adjacent to Flea Market), on Berryessa Rd.	KAB	2.5	Flea Market staff cleans the parking lot and creek banks regularly. Area appeared cleaner than in previous assessments.	No additional management actions recommended. A periodic communication with the Flea Market Management may help. One additional assessment is recommended, to see if litter levels change.
6	2/19/08	SJ31	Coyote	Leeward Dr between Story Rd and Arden Wy.	KAB	3	Catch basin inserts installed in storm drains.	No additional actions recommended, as this area is part of the Structural Trash Management Pilot. Future assessments recommended as needed for the Pilot.
7	2/19/08	SJ32	Coyote	Lenfest Dr between Mabury Rd and Las Plumas Ave.	KAB	1.5	Catch basin inserts installed in storm drains.	No additional actions recommended, as this area is part of the Structural Trash Management Pilot. Future assessments recommended as needed for the Pilot.

[11] Two different assessment methods were used. Keep America Beautiful (KAB) Litter Index ratings are: 1-No litter, 2- slightly littered, 3- Littered, 4- extremely littered. Rapid Trash Assessment (RTA) scores range from 0 (worst) to 120 (best).

#	Date	Site ID	Watershed	Location	Assessment Method[11]	Score	Existing Trash Management Action	Recommended Management Actions and/or Future Evaluations
8	6/24/08	SJ33	Coyote	South side of Tully Rd from King Rd to parking lot	KAB	1.5	Catch basin inserts installed in storm drains.	No additional actions recommended, as this area is part of the Structural Trash Management Pilot. Future assessments recommended as needed for the Pilot.
9	2/19/08	SJ34	Silver Creek	El Rancho Verde Dr between Sereno Vista Wy and Irazu Ct	KAB	1.5	Catch basin inserts installed in storm drains.	No additional actions recommended, as this area is part of the Structural Trash Management Pilot. Future assessments recommended as needed for the Pilot.

Trash Prevention and Removal Activities Undertaken by the City of San José

Program & Description	Participating Departments/ Agencies	Details
Encampment & Illegal Dumping Activities		
Trash Prevention & Removal MOA Agreement between the City of San Jose and the Water District to remove illegal encampments from creekside parcels, and address up to 5 difficult-to-address sites impacted by trash.	CSJ: ESD, PD, PRNS, Housing, DOT SCVWD	Original agreement formed in 2004, revised in 2008.
Trash MOA Monthly Encampment Cleanup Program City and District cooperate to perform cleanup of homeless encampments along creeks on a monthly basis, up to 10 times per year.	CSJ – Metro PD SCVWD	Work performed under the auspices of the Trash Prevention and Removal MOA
Trash MOA Weekly Cleanup Program District uses either in-house or SJCC labor to clean up small and/or abandoned illegal homeless encampments and litter accumulations on City or District Right-of-Way creek parcels.	SCVWD Guadalupe Watershed, Coyote Watershed	Work performed under the auspices of the Trash Prevention and Removal MOA
Trash MOA Partnered Cleanups City-District partnered cleanup on up to five creek parcels that are impacted by trash and not covered by an existing O&M or cleanup program. Each agency brings specialized services and supplies to the cleanup.	CSJ SCVWD	In 2008, the number of sites increased to a maximum of 5, up from a maximum of 3 in previous years.
Alternate Work Program City staff supervises Santa Clara County Department of Corrections labor for cleanup of encampments, illegal dumping on City parcels, as well as weed, litter, and illegal dumping removal along roadsides, vacant lots, landscaped areas, and alleyways within the City limits.	CSJ – DOT CSJ - PRNS	Program goals are similar to landscaping, as AWP is responsible for a subset of the City's responsibility.
Illegal Dump Site Correction Corrections are made to eliminate illegal dumpsites.	CSJ – PRNS (Anti-Litter Program)	Funded by an annual Community Development Block Grant. In FY 07-08, eliminated eight illegal dumpsites.
Operations & Maintenance Activities		
General Complaint Trucks Crews collect illegal dumping, debris and other hazards found in or along the City streets in response to calls from the public. They also respond to requests for accident and spill cleanups in City streets.	CSJ - DOT	The primary goal is to respond to the highest percentage of calls within a stated time period.
Code Enforcement Response	CSJ – PBCE – Code	For hazardous waste dumping, it's still the property

PROGRAM & DESCRIPTION	PARTICIPATING DEPARTMENTS/ AGENCIES	DETAILS
Debris dumped on private property is the responsibility of the property owner, even if it was not generated by the property owner. Code Enforcement inspectors direct the property owner to clean up the debris.	Enforcement	owner's responsibility. But if it's identifiable, the property owner has recourse by filing suit with the District Attorney's office.
Neighborhood Clean-ups Scheduled throughout the year, with approximately five large events per Council District occur annually. Additional cleanups organized by Code Enforcement as needed in areas with high levels of code violations.	CSJ – PBCE – Code Enforcement Council District Offices	Residents can bring their bulky household discards for free disposal. Space is limited, and almost always runs out early in the day. This is a very popular program.
Stormdrain Inlet Cleaning Program Between mid September and the end of the calendar year, all inlets in the City are inspected and cleaned out to remove collected debris.	CSJ – DOT CSJ – ESD	The program's goal is to prevent both fine and bulky pollutants from traveling further down the storm system.
Street Sweeping Using both contractual and City personnel, the City provides sweeping at least once per month on all streets. Arterials, collectors and selected business districts receive sweeping at least twice per month. Outreach through the Recycle Plus Program with the message to move cars on sweep day.	CSJ – DOT Contracts managed by CSJ – ESD - IWM	The goal of the program is to have the highest percentage of swept streets judged good or better.
SJ Parks Maintenance Crews provide maintenance services and respond to illegal dumping in City parks and along trails in seven Park Maintenance Districts, with six Regional Park Facilities (Alum Rock, Almaden Lake/Eden vale, Lake Cunningham, Prusch/Overfelt, Guadalupe River Park/ Downtown Core, and Kelley Parks) within them.	CSJ - PRNS	Supplies include vehicles (for city staff), litter sticks, plastic trash bags, leather gloves (the SJCC usually bring their own supplies). Training includes protecting back, avoiding sharps, avoiding dangerous situations or confrontations.
Landscape Maintenance Crews remove litter and debris from City landscaped medians and backups.	CSJ - DOT	Primary goal is to maximize number of landscape parcels in good or better condition.
Weekend Youth Juvenile Offender Program Three vans of Youth Juvenile Offenders remove debris from Litter Hot Spots.	CSJ – PRNS (Anti-Litter Program)	In FY 05-06 spots were cleaned 282 times
[illegible]		
Adopt-A-Hotspot Volunteers "adopt" and clean one or more of 150 identified Litter Hotspots a minimum of once a month.	CSJ – PRNS (Anti-Litter Program)	See *14.D.: PIP Activities Table* for details
Adopt-A-Park Recruits and trains residents to assist in the general care and maintenance of parks and other open spaces in San José.	CSJ - PRNS	See *14.D.: PIP Activities Table* for details
Adopt-A-Trail Recruits and trains volunteers to support management of trails, including litter removal.	CSJ - PRNS	See *14.D.: PIP Activities Table* for details
Adopt-A-Street Recruits and trains volunteers to remove litter in City vacant lots and other properties. Focused on City-owned landscaped areas, so it is more about maintenance than just litter removal.	CSJ - DOT	City supplies vests, gloves & bags, and any equipment required for the area to maintain it, such as litter sticks, rakes, brooms, etc.
Creek Connections Action Group Volunteers remove trash from creeks, rivers and lakes in Santa Clara County twice each year on National River Cleanup Day (May) and Coastal Cleanup Day (September).	CSJ – PRNS, ESD, County Parks, SCVWD	See *14.D.: PIP Activities Table* for details

Program & Description	Participating Departments/ Agencies	Details
Pick Up San Jose Volunteers are recruited at fairs, festivals, community meetings and other miscellaneous group meetings to pick up litter whenever they are able. Training and supplies are given to the volunteers.	CSJ – PRNS (Anti-Litter Program)	Volunteers recruited: FY 05-06: 2,859; FY 06-07: 3,143; FY 07-08: 3,426
Shed Program Volunteer groups borrow anti-litter supplies from an AGLP shed and conduct a neighborhood cleanup.	CSJ – PRNS (Anti-Litter Program)	Supplies loaned to groups to conduct neighborhood cleanups: FY 05-06: 46 groups; FY 06-07: 32 groups; FY 07-08: 43 groups
Great American Litter Pick-up Annual volunteer clean-up at 10 locations within the City, and various locations in the County based on other agency's participation	CSJ, City of Campbell, VTA, County	See *14.D.: PIP Activities Table* for details
Other Activities		
Silicon Valley Anti-Litter Campaign Multi-stakeholder forum with five-year goals aimed at reducing the amount of litter in the County through a variety of means.	County agencies	Formed in FY 06-07.
WMI Trash Subgroup Subgroup of the Santa Clara Basin Watershed Management Initiative with the following goals: 1. Bring people together who are working on the trash issue. 2. Share information on current activities. 3. Determine what additional activities would help reduce trash in creeks. 4. Make recommendations for action by the WMI and other entities.	WMI agencies	Formed in 2008
WMI Product Stewardship Subgroup Subgroups of the Santa Clara Basin Watershed Management Initiative, formed to promote, implement, and track local agency activities that advance the responsible management and reduction of product-associated waste streams that can affect watershed health. Goals of this subgroup are: 1. Coordinate pilot product disposal / take back programs for pharmaceuticals. 2. Promote local agency involvement in the California Product Stewardship Council and support of relevant legislation that furthers EPR. 3. Collaborate/Coordinate on product "actions" (for example, reducing single-use shopping bags and reducing or eliminating agency use of triclosan)	WMI agencies	Formed in FY 07-08. 11 local agencies have signed the CPSC Pledge of Support (Goal 2).
Blue Ribbon Commission on Housing and Homelessness Countywide effort which seeks to eliminate homelessness in Santa Clara County	County, San Jose, others	A reduction in trash is not a primary goal of this effort.
BASMAA Regional Ad Campaign on Trash Media campaign targeting 18-29 yr old males who litter, with the goal of reducing littering behaviors in this audience.	Stormwater Programs in Alameda, Contra Costa, Santa Clara, San Mateo, Marin Counties, as well as the Vallejo and Fairfield/Suisun sanitary districts	To be implemented in FY 08-09

12. MON: Monitoring

12.A MON Work Plan Self Evaluation Matrix

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
PCB	**PCB Control Program**			
PCB.A	Sample, analyze, and report on PCBs in storm drain sediments to characterize potential sources and implement controls.	Done, 6/00 through FY 01-02	Done, prior to FY 01-02.	Program, ESD
PCB.B	Begin implementation of final PCB Control Plan upon approval.	Done FY 02-03 & Ongoing	Done, prior to FY 01-02. Program level activity.	ESD
Dioxin	**Dioxin-like Compound Control Program**			
Dioxin.A	Characterize distribution of Dioxin-like compounds in the urban runoff system based on existing data.	Done FY 01-02	Program level activity.	Program
Dioxin.B	Begin implementation of SCVURPPP plan to characterize distribution of Dioxins.	In Progress at Program Level	Program level activity.	Program
Dioxin.C	Submit plan that identifies control measures / management practices to eliminate or reduce discharges of Dioxins, if needed.	TBD	Program submitted draft Control Plan separately 3/1/02.	Program
Dioxin D	Explore, and implement if feasible, efforts to move toward alternative fuels for diesel vehicles in City fleet.	FY 06-07 & Ongoing	Done FY 07-08 and ongoing. In FY 07-08 the City's Diesel fleet switched to using B20 biodiesel, and the City is exploring other blends.	ESD, DOT, GS
MON 1	**Industrial Stormwater Monitoring Pilot Program**			
MON 1.A	Design and execute a sampling program to meet the project objectives, analyze results, develop guidance for industry to improve SWPPP implementation, and provide technology transfer information to industry and inspectors.	Done, FY 96-97 through 01-02 Ongoing as part of IND	Done, prior to FY 01-02.	ESD
MON 3	**First Flush Monitoring Program**			
MON 3.A	Conduct multi-year First Flush study sampling, analyze data and provide data to Program as part of Multi-year Monitoring Program.	Done, FY 96-97 through 02-03	Done, prior to FY 02-03.	ESD, Program

12.B MON Program Evaluation

Monitoring activities are conducted effectively at the Program level with participation from City staff to support collaboration with the Water Board and to provide technical review of Program products. This fiscal year, the City has transitioned its diesel fleet from B10 Biodiesel blend to B20. Among other benefits, this also serves to reduce the potential for dioxin emissions from the City's diesel fleet. These efforts also serve to further the City's Green Vision goal of ensuring that 100 percent of public fleet vehicles run on alternative fuels by FY 12-13.

The City continues to participate actively in SCVURPPP monitoring program field activities whenever they are conducted within the City's jurisdiction. Moreover, City staff assist in regional monitoring studies within its jurisdiction such as the Guadalupe loads study, and portions of those regional studies conducted within the City's jurisdiction.

12.C MON Response to Water Board Comments

No comments received from Water Board on this Program Element.

12.D MON Summary Tables / Additional Information

No additional information for this Program Element.

13. MC: Municipal Compliance

13.A MC Work Plan Self Evaluation Matrix

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
MC 1	**Municipal Training** Municipal Training is a critical function of the City's NPDES Permit. Municipal compliance is dependent on the level and quality of the training provided.			
MC 1.A	Identify training needs.	Annually	Done FY 07-08. Short focused BMP trainings on erosion and sediment control activities at construction sites for Public Works and Building inspectors were identified as training needs.	ESD-UR
MC 1.A.1	Conduct training for City staff and City contractors that perform surface cleaning at City facilities.	Done FY 06-07 As Needed	Done FY 07-08. See 13.D: *Municipal Employee Training Summary*.	DOT, GS, ESD
MC 1.B	Develop curricula.	As Needed	Done FY 07-08 for training noted in MC 1.A.	ESD-UR
MC 1.C	Conduct training.	Ongoing	Done FY 07-08. See 13.D: *Municipal Employee Training Summary*.	ESD-UR
MC 1.D	Evaluate municipal training program and make improvements as needed.	Annually	Done FY 07-08. The City conducted municipal training for all required Program Elements. Evaluation forms were handed out, collected and reviewed by instructors. This information will be used to make improvements as needed.	ESD-UR
MC 2	**Municipal Facilities Assessment and Compliance** Municipal facilities are required to comply with stormwater regulations. Efforts to reduce contaminated discharges from City facilities must be similar to those required of private businesses. While many elements for permit compliance are in place, the City requires a systematic approach to City facilities compliance at the level of effort required in the URMP.			
MC 2.A	Conduct Corp Yard assessments and inspections.	Annually	Done FY 07-08. Annual Corporation Yard inspections were conducted in the March and April 2008. Three Hazardous Material inspections at each of the Corp Yards and Municipal Garage, which include stormwater issues, were conducted over the course of FY 07-08.	ESD-UR, GS, DOT
MC 2.A.1	Conduct Citywide meeting to discuss Hazardous Material, Safety, and Stormwater issues for City corporation yards (up to two times per year).	Annually	Done FY 07-08. A Citywide Hazardous Materials, Safety, and Stormwater Management meeting was conducted on June 10, 2008.	GS, ESD, DOT, Fire, Police, PRNS
MC 2.A.2	Revise Corporation Yard inspection form.	Done FY 05-06 As Needed	Done FY 05-06. No revision to the form was necessary in FY 07-08.	ESD-UR
MC 2.B	Review Municipal Facilities SWPPPs.	Annually	Done FY 07-08. Municipal Facilities SWPPPs were reviewed and updated as necessary.	ESD-UR, GS, DOT
MC 2.B.1	Fully revise the five (5) remaining Corporation Yard SWPPPs (using the Main Yard revised SWPPP pilot process as a template).	Done FY 06-07	Done FY 07-08. SWPPP revisions for last two of the Corp Yards (Central and Municipal Garage) were drafted in FY 06-07 and were sent out for review and comment.	ESD-UR, GS, DOT

ITEM NO.	ACTIVITY	COMPLIANCE DATE	FY 07-08 STATUS	RESPONSIBLE PARTY
			Revisions for these two Corp Yard SWPPPs were continued in FY 07-08.	
MC 2.C	Conduct SWPPP training at City corporation yards.	Annually	Done FY 07-08. SWPPP training sessions were conducted at the Corp Yards in June 2008.	ESD-UR, GS, DOT

13.B MC Program Evaluation

Training

During FY 07-08, the City conducted municipal training for all required Program Elements. See 13.D: Municipal Employee Training Summary. Attendees for these trainings complete evaluation forms and turn them into the instructors (These forms are later entered in to a tracking database.) Instructors review this information to see where they can improve the training.

Highlights of FY 07-08 trainings included:

a) Watershed Enforcement & Fats, Oils, and Grease Inspectors training held on 7-17-07;

b) Watershed Enforcement & IND Training held 7-19-07 & 7-20-07;

c) OSHA & 8 Hour Hazardous Waste Training on 10-5-07, 10-25-07, & 11-9-07;

d) Pervious Concrete Presentation on 10-11-07;

e) Developers Roundtable Meetings on 10-8-07 & 1-11-08;

h) Erosion & Sediment Control Training for City Inspectors held 9-26-07 & 9-27-07;

f) Erosion & Sediment Control Training for Capital Improvement Project Managers held 4-9-08;and

g) City of San José Pesticide Safety and IPM Training held 3-11-08.

Municipal Facilities

Annual Corporation Yard stormwater inspections were completed in March and April of 2008.

In FY 07-08, City staff conducted three Hazardous Material inspections at each of the Corp Yards and the Municipal Garage, which also include stormwater issues. A City-wide meeting to discuss hazardous materials, safety, and stormwater issues was held on June 10, 2008. These regular meetings have proven to be effective in improving the coordination between GS staff, ESD staff, and Corp Yard representatives. The combination of an annual stormwater assessment inspection, including stormwater concerns in the hazardous material inspections, and the Citywide Hazardous Material Management meetings, which include stormwater issues, continues to be working well. The concerns in the Corp Yard inspection reports are usually minor and resolved swiftly; concerns that are more significant are less frequently noted as the program is becoming part of the institution of the Corp Yards.

Corp Yard SWPPP training was held in June 2008 for the GS-Trades & Fleet and PW-Materials Testing Lab Corp Yard staff. Participants were given an evaluation form to fill out. Of the 83 staff that participated in the training, 72 evaluations were completed and returned. Results of the completed evaluations are summarized below:

- 88% responded that the training subjects taught are appropriate to their work;
- 92% responded that the BMPs/SOPs described match their work practices;
- 92% responded that the training adequately described the relationship of BMPs/SOPs to compliance with the City's Stormwater NPDES permit;

- 94% responded that the training adequately explained how they, City staff, can help the City maintain compliance with the Stormwater NPDES permit; and
- 93% responded that the training adequately explained a SWPPP.

Corp Yard SWPPP Training is included in the PSR, RPW, and SDO Stormwater BMP/SOP Trainings. Approximately 397 Municipal employees received Corp Yard SWPPP training in FY 07-08. SWPPP revisions for last two of the Corp Yards (Central and Municipal Garage) were drafted in FY 06-07 and were sent out for review and comment. Revisions for these two Corp Yard SWPPPs were continued in FY 07-08.

13.C MC Response to Water Board Comments

No comments received from Water Board on this Program Element.

14. PIP: Public Information / Public Participation

14.A PIP Work Plan Self Evaluation Matrix

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
PIP 1	**General Outreach** The City of San José will promote general citizen awareness of what a watershed is, the functions of the storm drain system, pathways and sources of urban runoff pollution to the South Bay watershed, and behaviors that adversely affect water quality.			
PIP 1.A	Participate in WMI Outreach, and coordinate WMI outreach with Watershed Watch and Program efforts.	Ongoing	Done FY 07-08 and ongoing. City staff supported the coordination of WMI and Program messages in the Watershed Watch campaign through the WEO AHTG. See 14.D: *PIP Activities Table.*	ESD, WMI, Program
PIP 1.A .1	Participate in Watershed Watch campaign.	Ongoing	Done FY 07-08 and ongoing. City staff assists with planning and implementation through WEO AHTG and serves as the AHTG's chair. See the Program Annual Report for complete campaign annual report.	ESD, Program
PIP 1.B	Identify, support, and participate in appropriate community events to increase general public awareness.	Ongoing	Done FY 07-08 and ongoing. See 14.D: *PIP Activities Table.*	ESD
PIP 1.B.1	Work with the Watershed Watch Events work group.	Ongoing	Done FY 07-08 and ongoing. Watershed Watch events are discussed and coordinated through the WEO AHTG. City staff assists with staffing tables at events. See the Program Annual Report for details concerning Watershed Watch events.	ESD, Program
PIP 1.C	Give presentations upon request that focus on stormwater messages to elementary through college grade levels, neighborhood groups, etc.	As Needed	Done FY 07-08 and ongoing. See 14.D: *PIP Activities Table.*	ESD
PIP 2	**Targeted Outreach** The City of San José will develop and implement targeted residential outreach and education campaigns based on high priority pollutants to effectively reduce pollutant-causing behaviors and promote Best Management Practices.			
PIP 2.A	Identify general residential practices that contribute to stormwater pollution. Identify reasonable alternatives to pollutant causing behavior.	N/A	Done FY 07-08. Messages are addressed at the Program level through the Watershed Watch Campaign, and locally through events, direct outreach, and education via inspectors. See 14.D: *PIP Activities Table.*	ESD, Program
PIP 2.A.1	Review surveys and applicable reports.	Ongoing	Done FY 07-08 and ongoing. BASMAA performed a survey targeted at 18-29 year old males with littering habits to gather information on an upcoming media campaign. Target audiences are based on the Program survey and are documented in the Watershed Watch strategy. San José tailors its outreach to compliment Program and regional outreach efforts, which include periodic surveys to evaluate products and outcomes. See	ESD

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
			the Program Annual Report for details.	
PIP 2.A.2	Meet with inspectors to discuss and document residential outreach needs.	Ongoing	Done FY 047-08 and ongoing. Staff involved in outreach attend Inspectors' meetings and trainings and keep in contact with Inspectors on a regular basis. Outreach needs are identified and incorporated into work plans accordingly.	ESD
PIP 2.A.3	Prepare reports identifying residential outreach needs and tasks.	Annually	Done FY 07-08. Outreach staff submits a report to Watershed Protection Management on projected outreach needs and recommendations.	ESD
PIP 2.B	Identify ICID practices and target audience(s) contributing to pollution.	N/A	Done FY 07-08. ICID Feedback cards are regularly distributed to complainants who provide contact information. How complainants hear about ICID services is also tracked.	ESD
PIP 2.B.1	Review ICID reports.	Ongoing	Done FY 07-08 and ongoing. 356 ICID Complaint feedback cards were distributed to complainants, and 57 were returned. 57% or responders felt their complaints were resolved to their satisfaction in a timely manner, while 60% rate our service as good or excellent. How complainants heard about ICID services is tracked. See 1.D: *Complainant Source Summary* for details.	ESD
PIP 2.B 2	Meet with ICID inspectors to discuss and document outreach needs.	Ongoing	Done FY 07-08 and ongoing. Staff involved in outreach attend Inspectors' meetings and trainings and keep in contact with Inspectors on a regular basis. Outreach needs are identified and incorporated into work plans accordingly.	ESD
PIP 2.B.3	Prepare reports identifying ICID outreach needs and tasks.	Annually	Done FY 07-08. Outreach staff submits a report on projected outreach needs and recommendations and incorporate report findings into work plans accordingly.	ESD
PIP 2.C	Promote selected residential and ICID messages through local and regional activity (e.g. Program PIP, BASMAA PIP, BAPPG, Media Relations, etc).			
PIP 2.C.1	Report targeted residential and ICID outreach activity.	Annually	Done FY 07-08. See 14.D: *PIP Activities Table.*	ESD
PIP 2.C.2	Participate in the Program's Pesticide and Mercury ad hoc task groups.	Ongoing	Done FY 07-08 and ongoing. City staff participated in AHTG and collaborated with regional Household Hazardous Waste efforts that focused on reducing pesticide use and the proper disposal of spent fluorescent lamps. See the Program Annual Report for details.	ESD, Program
PIP 3	**Educational Programs** The City of San José will support and/or develop and implement educational programs designed to increase youth understanding and appreciation of the South Bay watershed.			
PIP 3.A.	Support, develop and implement school and youth education programs.	N/A	Done FY 07-08 and ongoing. See 14.D: *FY 07-08 San José School Outreach* for details.	
PIP 3.A.1	Participate in the WEO programs and Schools and	Ongoing	Done FY 07-08 and ongoing. City staff participated in	ESD, Program

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
	Youth Work Groups.		developing schoolwork plans and activities for the Urban Runoff Program and Watershed Watch campaign. City Staff participated in both the WEO Ad Hoc Task Group and Schools and Youth work group meetings, serving as Chair of both groups. Direct implementation takes place through the Program staff and the Watershed Watch contractor. The City's Youth Watershed Education Team (YWET) and Program collaborated to promote the City's middle school curriculum, which is supported by a stipend program funded by the Schools and Youth Work Group.	
PIP 3.A.2	Participate in the Alviso Education Center work group.	Ongoing	Done FY 07-08 and ongoing. City staff participated in work group meetings. Program Staff administered the SCVURPPP Ed Center Grant. See the Program Annual Report for details.	ESD, Program
PIP 3.A.3	Participate in City Education programs such as the Youth Watershed Education Team, Rangers in Schools, Go Green Initiative, etc.	Ongoing	Done FY 07-08 and ongoing. See 14.D: *FY 07-08 San José School Outreach* for details.	ESD
PIP 4	**Citizen Participation** The City of San José will support and/or develop and implement citizen involvement programs designed to increase citizen understanding and appreciation of the South Bay watershed.			
PIP 4.A	Support and/or develop involvement opportunities for San José residents			
PIP 4.A.1	Participate in creek Clean-ups on a bi-annual basis through in-kind staff support for the Creek Connections Action Group.	N/A	Done FY 07-08. Coordinated internally with PRNS, and externally with the Creek Connections Action Group.	
PIP 4.A.1.a	Fall creek Clean-up.	Annually, Q1	Done FY 07-08. See 14.D: *PIP Activities Table.*	ESD, PRNS
PIP 4.A.1.b	Spring creek Clean-up.	Annually, Q4	Done FY 07-08. See 14.D: *PIP Activities Table.*	ESD, PRNS
PIP 5	**Outreach Evaluation** The City of San José will evaluate its Outreach efforts for effectiveness.			
PIP 5.A	Implement selected evaluation tools.	N/A	See 14.B: *PIP Program Evaluation.*	ESD
PIP 5.A.1	Work with Program, WMI, and Watershed Watch AHTG to Plan for the Program's Watershed watch campaign follow–up survey.	Triennially FY 06/07	Done FY 07-08. The survey did not receive enough responses to be viable. A future survey is being planned. See program Annual Report for details.	ESD, Program
PIP 5.A.2	Report on survey and evaluation activity during the report period	Annually	Done FY 07-08. BASMAA's Regional Ad Campaign conducted 2 surveys in preparation for their upcoming media campaign focused on trash. See Program Annual Report for details.	ESD
PIP 5.B	Annually review, modify and report on outreach plans based on effectiveness results.	n/a	Done FY 07-08. Work plans are evaluated and modified as needed based on evaluation results.	ESD
PIP 5.B 1	Produce a written report on the effectiveness of outreach activities conducted in the prior fiscal year.	Annually	Done FY 07-08. See 14.D: *PIP Activities Table.*	ESD

14.B PIP Program Evaluation

Outreach Strategy

San Jose's outreach strategy is implemented on three levels: Local (City-wide), Program (County-wide), and Regional (Bay Area-wide).

Local target audiences are based on program, survey and focus group work conducted by the City and the Program. Local outreach is conducted to address time-constrained and/or local (San José only) issues. Local strategies and tactics are documented in the Outreach Strategies submitted annually to the City's budget office. When possible, San José tailors its local outreach to compliment/coordinate with Program (countywide) and regional outreach efforts. Short-term tactic and strategy success is evaluated case-by-case using a variety of mechanisms. Public opinion surveys evaluate long-term outcomes in attitudes and behavior.

County-wide target audiences are based on survey and focus group work conducted through the Program and, when appropriate, the City. The City's County-wide outreach delivers stormwater and watershed messages to residential and business audiences in the Santa Clara Basin. Strategies and tactics are documented in the Watershed Watch strategy. The City advocates for and facilitates the coordination of Countywide outreach with Regional outreach workgroups. Short-term tactic and strategy success is evaluated case-by-case using a variety of mechanisms. Public opinion surveys evaluate long-term outcomes in attitudes and behavior.

Regional target audiences, messages, and projects are identified through a variety of processes conducted by the various regional workgroups. San Jose's regional audiences are specific subsets of the general business and residential audiences that occur in San José, but may also be universal in the Bay Area. Messages focus on about specific behaviors or increasing awareness related to stormwater and watershed issues (e.g., Pest Control Operators for IPM messages; restaurants for Fats, Oils and Grease (FOG)). Strategies and tactics for these audiences are proposed and implemented through the Regional workgroups, and they are documented in the work plans of the various groups. Short–term tactic and strategy success is evaluated and reported case-by-case using a variety of mechanisms (e.g. the Regional Media Relations workgroup's measures). For some projects (e.g., OWOW, Regional Ad Campaign) public opinion surveys evaluate long-term outcomes in attitudes and behavior.

General Outreach

San Jose's General Outreach focused on attending community events, and maintaining up-to-date information on the City's website. Both were used to disseminate information to the public. Downloads from the City's website increased substantially this fiscal year compared to last, and the City attended a wider variety of community events compared to last FY. The City continues to reach out to the general public at selected community events that the Watershed Watch Campaign does not attend. These events are good venues to reach San Jose citizens, providing more extensive outreach to residents. Promoting San Jose's Green Vision provided an excellent opportunity to intertwine watershed and pollution prevention messages into other environmental messages such as Zero Waste and Sustainability. The residential and commercial sectors seem to be more accepting of environmental messages and behavior changes than they have in previous years.

The City works though a variety of mediums to distribute outreach materials to residents and business owners. The total number of outreach materials distributed in FY 07-08 is 137,328, which is comprised of BMPs disseminated by ICID, IND, and CON inspectors; City staff at outreach events; and self-serve BMPs downloaded from the City's website. Distribution increased by 43% over last year, due in part to the adoption of the City's Green Vision generating interest in environmental initiatives, as well as increased City participation in outreach events.

Targeted Outreach

FY 07-08's targeted efforts focused on reaching audiences at the grass-roots level. By taking messages to people where they were, and when they are primed to hear them, they are more likely to understand and therefore apply the information in the message. At the local level San José has successfully directed a variety of messages to a wide array of audiences through publishing articles in newsletters, hosting trainings and workshops, attending events targeting specific audiences, direct mailing, and collaborative efforts at the regional level. Targeted outreach supplements tasks done in other elements of the URMP, such as Illicit Connection/Illegal Dumping, the Industrial/Commercial Dischargers, Construction Inspection, Pesticide Management, Mercury, and the Copper and Nickel Action Plans.

Citizen Participation Activities

Citizen participation activities are a potent method for getting residents out into the Watershed and engendering stewardship. The City participated in four Clean-up events, as well as a Bike to Work Day, designed to promote participation and stewardship in the citizens of San José. Tying Clean-up events to pre-existing events such as Coastal Clean-up Day and the Great American Pick-up is a good way to maximize promotion. Regional promotional activities are useful for raising awareness locally. The

City also organized regular participation activities through the Adopt-A-Park, Adopt-A-Trail, Anti-Litter Volunteers, and Volunteer San José programs. Through these programs, thousands of San José residents are taking an active role in watershed stewardship.

Education Outreach

Education continues to be a vital component of San Jose's pollution prevention plan. The City actively contributes to education both as a City and through the Program. San José commits significant resources to youth education with the goal of instilling a sense of stewardship for the environment. San José employs both in-class education and train-the-trainer approaches to Outreach. In-class presentations are more expensive per student reached, but lend themselves better to evaluation. Train-the-trainer has the potential to reach many more students, but it is extremely difficult to measure the effectiveness of this potential. Youth Watershed Education Grants provide funding for groups and educators to implement their own programs that accomplish the City's education goals.

FY 07-08 saw the continuation and expansion of the City's Go Green Schools Program. Go Green Schools fosters recycling and environmental stewardship in a parent-driven and community-driven process, and supplies grants to schools to help them achieve their green goals. The City connects schools with free recycling supplies and other green resources, and encourages them to take up Go Green at the level the school chooses, whether it be recycling or environmental curriculum or green purchasing or other green practices.

Thermoplastic Inlet Stencils Pilot

With approximately 30,000 storm drain inlets and the potential for more stringent inlet marking requirements in the future, the City piloted alternatives to maintaining the City's inlet markings in an efficient and cost-effective manner. In FY 07-08, the City piloted thermoplastic inlet markings in two targeted ZIP codes based on the elevated number of ICID complaints received in these areas in FY 05-06. The thermoplastic stencils were installed in five minutes compared to the ten minutes it previously took to install the Mylar plastic stencils and paint. Applying them requires specialized tools and training, which the painted stencils did not. The thermoplastic stencils are easy to read, and to-date have not shown signs of fading. They are installed on the top of the curb above the storm drain inlet, so are not subject to tire traffic and wear from street sweepers. The City anticipates that they will last longer than the Mylar stencils, potentially up to 4 times longer, based on experience of several local cities that have had them for several years. The pilot will track the durability of the thermoplastic stencils, to see if their longer life will offset the significantly higher up-front cost.

14.C PIP Response to Water Board Comments

No comments received from Water Board on this Program Element.

14.D PIP Summary Tables / Additional Information

PIP Activities Table

Outreach Type:

○ = General Outreach **◎ = Targeted Outreach** **= Citizen Involvement** **= Education**

Item No.	Activity	Outreach Type	FY 07-08 Status	Evaluation
Att. A.1	Storm Sewer Stenciling Evaluation	○	In FY 07-08 the City implemented a pilot thermoplastic stenciling program in ZIP Codes 95116 and 95123. These ZIP Codes were chosen due to the higher number of ICID calls from those ZIP codes in FY 05-06. This pilot was expanded to include ZIP codes 95122, 95127, and 95148, based on available data and stencil supplies. 3,076 thermoplastic stencils were	The thermoplastic stencils were installed in five minutes compared to the ten minutes it previously took to install the Mylar plastic stencils and paint. Applying them requires specialized tools and training, which the painted stencils did not. The thermoplastic stencils are easy to read, and to date have not shown signs of fading. They are installed on the top of the curb above the storm drain inlet, so are not subject to tire traffic and wear from street sweepers. The City anticipates that they will last

Item No.	Activity	Outreach Type	FY 07-08 Status	Evaluation
			installed in these areas between August 20, 2007 and March 24, 2008. 57 No Dumping Flows to Guadalupe River, 511 Flows to Canoas Creek, 600 Flows to Coyote Creek, and 1,908 Flows to Silver Creek.	longer than the Mylar stencils, potentially up to 4 times longer, based experience of several local cities that have had them for several years. The pilot will track the durability of the thermoplastic stencils, to see if their longer life will offset the significant higher up-front cost.
PIP 1 PIP 2.C PM 6.A M 2.B Att. A.19	Water Awareness Web Page	❍	The ESD web page highlights several water issues, including watershed stewardship, pollution prevention, storm drain vs. sanitary sewer, IPM, household hazardous waste, automotive fluids, the Anti-Litter Program, etc., along with links to MyWatershedWatch.org, and the County's Household Hazardous Waste program	A total of 1,812 visits (down from 2,088 in FY 06-07 but up from 1,259 in FY 05-06 and 473 in FY 04-05) were recorded on the City's Water Awareness web page in FY 07-08.
PIP 1 Att. A.19	Stormwater Website	❍	The website includes information on various stormwater permit elements, resources for businesses and residents, and links to key City departments implementing stormwater requirements as well as local and regional pages of interest.	The site will be updated on a regular basis with pertinent information for both residential and commercial audiences. See 14.D.: *Outreach Materials Distributed* for website downloads and page visits.
PM 6.A PIP 1.A.1 PIP 2.C Program	Watershed Watch Sign at Happy Hollow Park and Zoo	❍	An Interpretive Sign, installed in FY 03-04, features a photo montage of beneficial uses of creeks and the Bay, along with four pollution-prevention messages: keep your car tuned to avoid oil leaks, avoid pesticide use (especially before rains), proper disposal of household hazardous wastes, and no dumping into storm drains.	The sign is located at the bottom of the entrance walkway into the Zoo. Every visitor to the zoo passes by the sign entering and leaving. In the winter of 2007 the Park and Zoo began an expansive project to renovate and green several buildings, which impacted attendance numbers. The park and zoo both are currently closed, and are scheduled to reopen in the fall of 2009.
PIP 2.C	Water Pollution Control Plant Tours	❍	Free tours of the San Jose/Santa Clara Water Pollution Control Plant, targeting residents and businesses in the treatment plant's tributary area.	A total of 1,679 people attended one of 36 public tours offered in FY 07-08. Information on watershed protection, stormwater pollution prevention, and how our everyday activities impact the Bay and its wetlands were given along with info about the Plant.
PIP 1.B Att. A.4	National Night Out	❍	August 7, 2007. Multiple locations throughout the City hosted community entertainment and resource fairs promoting public safety and other neighborhood issues.	Hosted one table at one event. Provided general stormwater, pollution prevention, and IPM messages.
PIP 1.A.1 PIP 1.B. Att. A.4	Pumpkins in the Park at Discovery Meadow	❍	October 13, 2007. Watershed Watch booth with games and Pollution Prevention information.	This event drew approximately 12,000 attendees. See the Program Annual Report for details.
PIP 1.A.1 PIP 1.B. Att. A.4	Haunt the Hollow	❍	October 28, 2007. Watershed Watch booth with Pollution Prevention information.	This event drew approximately 6,000 attendees. See the Program Annual Report for details.

Item No.	Activity	Outreach Type	FY 07-08 Status	Evaluation
PIP 1.B Att. A.4	Viva La Spring	❍	March 8, 2008 at the Southside Community Center. Resource fair for southside residents.	Distributed urban runoff, pollution prevention messages and information in English and Spanish. Estimated 500 attendees.
PIP 1.B Att. A.4	Senior Walk at Valley Fair Mall	❍	April 4, 2008. Free event which focused on community resources for senior residents. Distributed general pollution prevention materials.	Over 100 attendees. Many expressed interest in "Our Water Our World" fact sheets.
PIP 1.B Att. A.4	Spring Garden Market at History Park	❍	April 12, 2008. Plant sale and demonstration fair for homeowners and garden enthusiasts. Watershed Watch booth with IPM information.	This event drew approximately 4,000 people. See the Program Annual Report for details
PIP 1.B Att. A.4	Get Your Green On	❍	April 12, 2008 at Los Gatos High School. Free event which focused on providing residents, businesses, and students with green tools and information. The City of San Jose had a table with pollution prevention, stormwater, and community involvement event information.	Distributed urban runoff and pollution prevention messages. Estimated 300 attendees.
PIP 1.B Att. A.4	Earth Day at City Hall	❍	April 22, 2008 at San José City Hall. The four-hour event included a farmer's market, live entertainment and a marketplace of environmental ideas – where the City was able to showcase its Green Vision and promote programs and information to help people "green" their lifestyle or their business. City staff and community partners provided information on energy and water conservation, waste and recycling, clean transportation, watershed protection, green building, and urban landscape and nature. About 700 people took the 2008 Green Vision Pledge to conserve water, recycle, and use alternative transportation when possible.	More than 2,000 residents and downtown employees participated at City Hall Plaza, and more than 125 cyclists joined Mayor Chuck Reed for his Earth Day Bike Ride, which started and ended at the Plaza event.
PIP 1.B Att. A.4	Cypress Senior Center Earth Day Event	❍	April 25, 2008 at the Cypress Senior Center. Thermometer Exchange and table with P2 information.	Collected 144 old-fashioned mercury thermometers, a bottle of elemental mercury, and a thermostat. Provided pollution prevention and stormwater materials to an estimated 150 attendees.
PIP 1.B Att. A.4	Spring in Guadalupe Gardens	❍	April 26, 2008. The City of San José had a table with information on green schools, Recycle Plus, and home composting. Watershed Watch had a table with information on HHW, IPM, and Green Gardening.	Good event to interact with residents. See Program Annual Report for additional information.
PIP 1.B Att. A.4	Prescription Drop-off and Thermometer Exchange	❍	June 20, 2008 at the Cypress Senior Center in District 1. Free council district event for exchanging thermometers, disposing of	Collected 220.5 pounds of pharmaceuticals, 112 old-fashioned mercury thermometers, and 2 blood pressure cuffs. Additional events will be held during the statewide pharmaceutical drop-off in

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 07-08 STATUS	EVALUATION
			pharmaceuticals, and other community resources.	October 4-11, 2008 during the statewide "No Drugs Down the Drain" campaign.
PIP 1.B Att. A.4	Thermometer Exchange Events	❍	Thermometer Exchange Events in San Jose and WPCP tributary area: August 21, 2007(Santa Clara), September 18, 2007 (to City of San José employees), April 25, 2008 (Cypress Senior Center Earth Day Event), May 31, 2008 (City of San José, Edenvale Branch Library), and June 20, 2008 (in conjunction with Councilmember Pete Constant's Prescription Drop-off at Cypress Senior Center). Plant Tour Thermometer Exchange Events: March 13, June 4, and June 26, 2008. Collection event for residents to exchange their mercury-containing fever thermometer for a digital thermometer free of charge. Information on safe methods for Household Hazardous Waste disposal and other related pollution prevention methods were provided.	541 mercury-containing thermometers were collected and disposed of appropriately. This results in 270.5 grams of elemental mercury removed from the environment. More thermometer exchange events will take place in the WPCP service area and San José in FY 08-09.
PIP 1.B Att. A.4	CommUnity Resource Faire	❍	June 29, 2008 at History Park. Community Resource Fair	Distributed fact sheets and other pollution prevention information.
PIP 1.B Att. A.4	GreenFaire Silicon Valley	❍	June 7-8, 2008 at the San José Convention Center.	Distributed Compost and Green Vision messages to an estimated 4,000 attendees.
Overall Evaluation of General Outreach Activities		❍	San Jose's General Outreach focused on attending community events, and maintaining up-to-date information on the City's website. Both were used to disseminate information to the public. Downloads from the City's website increased substantially this fiscal year compared to last, and the City attended a wider variety of community events compared to last FY. The City continues to reach out to the general public at selected community events that the Watershed Watch Campaign does not attend. These events are good venues to reach San Jose citizens, providing more extensive outreach to residents. Promoting San Jose's Green Vision provided an excellent opportunity to intertwine watershed and pollution prevention messages into other environmental messages such as zero waste and sustainability. Residents and businesses seem to be more accepting of environmental messages and behavior changes than they have in previous years.	
IND 6 CON 7	Storm Sewer Stenciling	◎: Commercial	The City provided approximately 49 "No Dumping! Flows to Neighborhood Creek" stencils to contractors & developers to stencil approximately 414 storm drain inlets. Private businesses received approximately 5 No Dumping English, 1 No Dumping Spanish, 1 No Dumping Vietnamese and 2 No Dumping Flows to Neighborhood Creek stencils to stencil approximately 49 inlets. Muni Water received approximately 9 No Dumping	Storm drain stencils are placed in locations that are highly visible to residents and customers of businesses. Including the neighborhood creek name gives residents and customers specific information about their actions tie in to the local environment. Developers are required as a condition of the permitting process to stencil all storm drain inlets on a development. ESD inspectors give out "No Dumping! Flows To Bay" stencils to commercial and industrial businesses so that they can stencil storm drain inlets on their property.

Item No.	Activity	Outreach Type	FY 07-08 Status	Evaluation
			Flows to Neighborhood Creek stencils to stencil approximately 34 inlets at different locations. Santa Clara Valley Urban Runoff Pollution Prevention Program received approximately 5 No Dumping English to have on-hand until their order of stencils was received. Approximately 180 No Dumping stencils distributed to ESD inspectors to give to businesses and industries as follows: 109 No Dumping English, 40 No Dumping Spanish, and 31 No Dumping Vietnamese.	
TRA 6 Att. A.9	Litterbug Hotline	◎: Littering Vehicles	Launched in September 2007 by the Silicon Valley Anti-Litter Campaign. The City's Anti-Graffiti and Litter Program sponsors this service which allows people to report vehicle littering. Littering vehicles are then sent a letter indicating that their vehicle was spotted on a specific date littering at a specific location, details the cost of litter abatement activities, cites the California Penal Code for littering, and encourages the vehicle owner not to litter.	460 reports were logged between September 17, 2007 and June 10, 2008. The top three items reported were cigarette butts at 67%, generic litter at 15%, and cans at 4.5%.
MC PIP 2	Green Brown Bag Seminars	◎: City employees as residents	Lunchtime seminars providing information on a variety of environmental topics.	Topics covered in FY 07-08 include sustainable seafood and green fuels.
IND 6	Tributary Tribune	◎: Industrial	Newsletter published for permitted industrial dischargers in the Water Pollution Control Plant tributary area. The Fall 2007 Tribune contained an article highlighting the recently-renovated City stormwater website. The Spring 2008 Tribune featured an article discussing FOG inspections, which incorporate both stormwater and sanitary sewer issues.	The Tributary Tribune was distributed three times in FY 07-08. The Tribune goes to every permitted industrial discharger in the San Jose/Santa Clara Water Pollution Control Plant tributary area (approximately 330 businesses and 900 contacts). The City found that many people who should be getting this info were not due to them not being the primary contact at the facility, so the City modified the contact list to include all applicable persons at each facility, which increased the number of contacts on the mailing list to more than 1,300. Tributary Tribune web pages generated 11,499 views, triple last year's number, with the previous years' issues generating most of the views.
PM 6 Att. A.3 Att. A.11	Green Gardener Training	◎: Landscape businesses	Winter-Spring 2008: 20-hour training course offered through Municipal Adult Education to train landscapers in watershed-friendly landscape management techniques.	See Program Annual Report for details.
CON 7.B. Att. A.6	Conduct outreach sessions to development community	◎: Contractors	Department of Public Works staffs hold meetings with developers to discuss construction project specifications, including erosion and sediment control. Five pre-construction meetings were held	These meetings were of extreme importance to the contractors present. They appreciated ESD inspectors being there to let them know the erosion and sediment controls that they needed to implement and maintain at their construction sites.

Item No.	Activity	Outreach Type	FY 07-08 Status	Evaluation
			during FY 07-08 for municipal projects. ESD Watershed Enforcement construction inspectors were invited to discuss erosion and sediment controls required at these construction sites. The five sites and dates of the meetings were Fall Creek Park on 10-10-07, Mayfair Community Center during 1/08, Happy Hollow Park and Zoo on 1-16-08, Watson Park on 1-16-08, and Police Substation adjacent to the Hitachi Project on Great Oaks Blvd on 2-19-08.	
PIP 1 PIP 2.C M 5.A TRA 6	Curbside Courier web page and newsletter	◎: Residential recycling customers	Web page and newsletter focused on solid waste issues. Newsletter mailed to city recycling customers. The Fall 2007 issue focused on proper disposal of hazardous wastes for safety reasons and to avoid water pollution. It also featured a sidebar on proper disposal of bulky items, and an article on keeping leaves out of the storm drain. The Spring 2008 issue focused on the City's Green Vision, listed several environmental actions (e.g.: green gardening, litter pickup events) that promote watershed stewardship, and listed both National River Clean-up Day and the Great American Litter Pick-up in the upcoming events sidebar.	The curbside Courier published twice a year as a Recycle Plus utility bill insert. The Curbside Courier reaches approximately 185,000 single-family households. Additionally, the Curbside Courier was published online, with a total of 3,687 downloads in FY 07-08: 1,665 English versions, 1,135 Spanish versions, and 887 Vietnamese versions.
PM 6.A PIP 2.C Att. A.8	Create and provide fact sheets and materials to pesticide retailers to facilitate point-of-purchase outreach to support IPM Store Partnership Program	◎: Consumers	There are nine stores in San José participating in the IPM store partnership. This work is done at the Program level. See the Program Annual Report for details.	This work is done at the Program level. See the Program Annual Report for details.
PM 6.A PIP 2.C	OWOW Fleas fact sheets at Animal Services Center	◎: Pet owners	Started in April 2006. The OWOW Fact sheet for Fleas, in both English and Spanish, is available in the Animal Services Center's literature racks.	Center estimates 300 pet adoptions per month.
PM 6 M 5 PIP 1 PIP 2.C Att. A.3	Regional Media Relations	◎: Public via Media outlets	Six media pitches on wastewater, stormwater, and watershed pollution prevention issues.	At the time this report was written, the final regional media relations report was not complete. See the Regional Media Relations Campaign Final Report in the Program Annual Report for full details.
CB-1 PIP 2.B Att. A.21	Charity Car Wash Kit Pilot	◎: Public school-	The City piloted a car wash storm drain diverter kit in FY 07-08. The City purchased a SudSafe car wash diverter kit and granted it to the Lincoln High School cheerleader squad for use in their	The school group used the kit on August 5, 2007 at Hoover MS, with ESD staff on-site to help set it up. Every catch basin is uniquely sized and shaped, and in this case the kit's basin did not completely seal the catch basin. In addition, the kit's basin had a

Item No.	Activity	Outreach Type	FY 07-08 Status	Evaluation
		based fundraising car washes	fundraising car wash activities at Hoover Middle School. The events took place on public school property to avoid violating City ordinances requiring permits to do this type of activity. The kit was granted to the school instead of loaned, due to concerns about City responsibility for misuse or failure of the kit. The SudSafe kit was chosen from several kit-in-a-box products, most of which require plugging the catch basin's outlet and using the basin to capture water. Plugging the basin requires 'confined space entry,' which most parents or students do not have the training, tools, or authorization to do. The SudSafe kit consisted of a portable basin which sits across the top of the opened storm drain, with a sump pump in it to pump the water to a nearby cleanout. In theory the wash water would run into the kit basin, and the pump would turn on and pump the water out of it, to a cleanout or to landscape.	¼-inch lip, so the wash water simply flowed around the basin and into the storm drain. ESD staff tried to modify the kit on-site, with little success. The kit can likely be modified but it will cost about as much as the device itself, and require some skill in setting it up properly. The school group didn't hold another fundraiser, so modifications to the kit were never tried. Due to the concerns with the performance of the kit, logistical constraints, and labor-intensive nature of running a kit-based program, the City has not pursued purchasing additional kits to grant to additional public schools; instead promoting alternative fundraising strategies.
IND 6.B PIP 1.C	FOG Presentation to Franklin McKinley School District	◎: FMSD employees	October 10, 2007. Three FOG inspectors went to the Franklin McKinley School District Offices and did a one hour presentation	60 food service workers attended. The topics were preventing storm water pollution, reducing fats, oil and grease to the sanitary sewer and thereby reducing sanitary overflows.
PIP 2 Att. A.4	Compost Bin Workshops and Sales	◎: Residents	July 14, August 11, September 8, October 6, November 3, 2007 and February 10, March 10, April 12, May 10, and June 14, 2008. Workshop to teach residents how to compost, and sale of bins at a discount to City residents.	965 people attended the compost bin and vermicomposting workshops, , a 71% increase over last year .A total of 537 compost bins were sold, similar to last year's results..
ICID 2.A.2 ICID 4 PIP 2.C Att. A.9 Att. A.20	ICID Outreach to Targeted Areas	◎: Residents	Last FY the City reached out to 4 SNI Neighborhood Action Committees (NACs) and one Neighborhood Association in areas with elevated ICID complaints for illegal dumping and vehicles dripping auto fluids. In FY 07-08 the City continued this effort in eight more SNI NACs.	See below
ICID 2.A.2 ICID 4 PIP 2.C Att. A.9 Att. A.20	Tully/Senter SNI NAC Meeting	◎: Residents	November 1, 2007. Presented and distributed info on P2, watershed awareness, the difference between storm and sanitary sewers, who to call if dumping occurs, proper disposal of thermometers and exchange opportunities, no FOG down the drain, and no pharms down the drain.	Approximately 20 attendees. Community members were very receptive to the information presented.
ICID 2.A.2	13th Street SNI NAC Meeting	◎:	November 15, 2007. Presented and distributed info on P2, watershed awareness, the difference	25 attendees. Community members particularly interested in mercury messages, and concerns about the perceived danger of

Hosted an information table at Earth Day information and resource fair hosted by SJSU for their students, local residents, and local businesses.	Distributed P2, IPM, and HHW information. Estimated 500 attendees.
PM 6.A, M 2.B, M 5.A, PIP 1.A.1, PIP 2.C, Atts. A.4, A.10	Home and Garden Show	◎: Home owners	April 25-27, 2008 at the San Jose Convention Center. San José provided booth space. Booth staffed by SCVURPPP staff, co-permittees, and San José staff. Provided IPM and Household Hazardous Waste information.	See Program Annual Report for details.
IND 6 PM 6.A. M 5.B CB-3 PIP 2 Att. A.6	Industrial Users Academy	◎: Industrial	May 14, 2008. The Industrial User Academy is an all-day training workshop for permitted industrial users in the San Jose/Santa Clara Water Pollution Control Plant tributary area. Attendees received training on the Pretreatment Program, wastewater discharge permit applications, permit issuance & conditions, and the Inspection Program. They also completed Self Monitoring Reports, Enforcement, Sampling, and Storm-water Guidelines.	The academy was well attended by 34 representatives. An exit survey was administered and it showed that all of the attendees went away with greater knowledge of the subject matter, with 84% specifically having a better understanding of the storm water inspection program. 100% Agreed that the workshop was useful to them. There has been such an increase in demand for this workshop that a second has been scheduled this year, to be held in October 2008.
IND 6 Att. A.3	FOG Presentation at BAPPG	◎: Agency Staff	June 4, 2008, 2008. City staff presented information on the City's FOG Inspection Program to the Bay Area Pollution Prevention Group.	20 attendees. Distributed FOG-related outreach materials.
PIP 2.C M.5 Att. A.10	Mercury Outreach	◎	City and Program staff assisted County with Mercury-related outreach for the County's Universal Waste activities. City staff also distributed the County's 2 mercury/universal waste brochures in City literature racks, with CFL outreach, and at City events.	See Program Annual Report for details.
IND 6 ICID 4 CB-3.B	GIASP NOI Outreach	◎: High potential Cu and Ni dischargers	June 30, 2008. Distributed Roof Vent BMP, NOI Checklist, SWPPP Flow Chart, along with a contact letter informing select businesses that they may be subject to the State General Activities Stormwater Permit (GIASP.)	Cover letter and roof vent BMP fact sheet sent to 139 facilities, based upon their SIC code. Seven SIC codes were targeted based on the recommendations from the 1997 Industrial Stormwater Pollution Pilot.
IND 6 CB-1.B.	Mobile Surface Cleaner Training Workshops	◎: Commercial	Training available upon request. No requests received in FY 07-08.	Training available upon request. Companies requesting training are first referred to BASMAA's online training, and offered live training if the online version does not meet their needs.

ITEM NO.	ACTIVITY	OUTREACH TYPE	FY 07-08 STATUS	EVALUATION
Overall Evaluation of Targeted Outreach activities		◎	FY 07-08's targeted efforts focused on reaching audiences at the grass-roots level. By taking messages to people where they were, and when they're primed to hear them, they are more likely to understand and therefore apply the information in the message. At the local level San José has successfully directed a variety of messages to a wide array of audiences through publishing articles in newsletters, hosting trainings and workshops, attending events targeting specific audiences, direct mailing, and collaborative efforts at the Regional level. Targeted outreach supplement tasks have been done in other elements of the URMP, such as Illicit Connection/Illegal Dumping, the Industrial/Commercial Dischargers, Construction Inspection, Pesticide Management, Mercury, and the Copper and Nickel Action Plans.	
PIP 4.A.1.a Att. A.13	Coastal Clean-up Day	✋	September 15, 2007. Promoted event in the ESD newsletter, Green Schools ListServ, and on the City web site.	Approximately 865 volunteers county-wide, a 22% decrease from last year. Despite that, approximately 32,000 pounds of trash were removed, a 44% increase; and 12,000 pounds of recyclables were removed, more than doubling last year's numbers. 10 out of 22 clean-up sites in Santa Clara County were in San José. Volunteers were surveyed after the event. See the Santa Clara Valley Water District's Annual Report for details.
TRA 6 PIP 1.B PIP 2.C PIP 4.A	Alviso Shines	✋	October 27, 2007. One-day event recruiting community volunteers to clean up litter in the streets and waterways in Alviso.	This event did not draw enough volunteers nor remove enough litter to make it worth the time and resources needed to hold it.
TRA 6 PIP 1.B PIP 2.C PIP 4.A	Great American Pick Up	✋	April 12, 2008. ESD, PRNS, DOT, City Manager's Office, Mayor's Office, SJPD, City Attorney's Office, and external agencies planned & coordinated event in Santa Clara County.	There were 30 clean-up sites in San José, 3 per Council District, as well as sites in the Cities of Campbell, Sunnyvale, and Gilroy. Over 1,100 volunteers picked up 683 bags of litter and 127 bags of recyclables, all of which were significant increases from the previous year. Increased advertising and holding the event on a different day than National River Cleanup Day helped boost the numbers.
PIP 4.A.1.b Att. A.14	National Rivers Clean-up Day	✋	May 15, 2008. Promoted event in the ESD newsletter, the Great American Litter Pick-up flyer, the Curbside Courier newsletter, the Green Schools ListServ, and on the City web site.	669 volunteers at 26 sites, a 20% increase from last year's event. Approximately 17,500 pounds of trash and 11,500 pounds of recyclables removed. 14 out of 26 clean-up sites in the County were in San José. 40% less trash was removed, but 17% more recyclables were removed. Volunteers were surveyed after the event. See the Santa Clara Valley Water District's Annual Report for details.
PIP 1.B PIP 4.A Att. A.4	National Bike to Work Day (BTWD)	✋	May 15, 2008. The City hosted one "energizer station" with free food, drinks, bike helmets, bike tune-ups, promotional items and information to give out to bikers. Both stormwater and air quality benefit from the reduced number of cars on the road. Encouraging people to use alternative modes of transportation highlights this benefit and encourages public participation.	An estimated 300 people rode by or stopped at the City-sponsored energizer station, similar to last year's turn-out. The With over 225 Energizer Stations strategically placed along major commute routes throughout the Bay Area, organizers estimate that participation numbers increased an average of 40% from previous years.

Item No.	Activity	Outreach Type	FY 07-08 Status	Evaluation
TRA 6 PIP 1.B PIP 2.C PIP 4.A Att. A.9	Anti-Litter Program		The purpose of the Anti-Litter Program (ALP) is to further beautify San José by preventing graffiti and litter through community involvement, eradication, and enforcement. ALP provides free clean-up supplies to volunteers, designates litter hot spots for adoption, does school outreach with anti-litter messages, and hosts special clean-up events like the Great American Pick-up.	In FY 07-08, the ALP has 3,426 Pick Up San José volunteers on the rolls, a 10% increase over last FY. Participants picked up 1,472 bags of litter removed from the City's streets, parks, creeks, and neighborhoods. As of June 2007, 134 of the 150 Litter Hot Spots have been adopted, and eight illegal dumpsites were eliminated.
TRA 6 PIP 1.B PIP 2.C PIP 4.A Att. A.9	Adopt-A-Park and Adopt-A-Trail		Adopt-A-Park is citywide volunteer program that recruits and trains residents to assist in the general care and maintenance of neighborhood trails, neighborhood/regional parks, and open spaces in San José.	The City's Adopt-a-Park program has 170 parks eligible for adoption. The Adopt-a-Trail has 35 trail segments eligible for adoption.
TRA 6 PIP 1.B PIP 2.C PIP 4.A Att. A.9	Alum Rock Trail Days		Monthly events where residents help maintain trails (e.g.: weed abatement, trail repair, litter removal) in Alum Rock Park.	This program has been active for over 20 years. Average months see less than 10 volunteers showing up, but some months see dramatic turnouts of scouts working on outdoor merit badges.
Overall Evaluation of Citizen Participation Outreach Activities			Citizen participation activities are a potent method for getting residents out into the Watershed and engendering stewardship. The City participated in four Clean-up events, as well as a Bike to Work Day, designed to promote participation and stewardship in the citizens of San José. Tying Clean-up events to pre-existing events such as Coastal Clean-up Day and the Great American Pick-up is a good way to maximize promotion. Advertising paid for by regional entities is useful for raising awareness locally. The City also organized regular participation activities through the Adopt-A-Park, Adopt-A-Trail, Anti-Litter Volunteers, and Volunteer San José programs. Through these programs, thousands of San José residents are taking an active role in watershed stewardship.	
PIP 3.A.3 Att. A.18	Youth Watershed Education Grants (YWEG)		Ten grants recommended for awarding in FY 07-08 cycle, five to schools and five to non-profits working with youth.. A total of $37,515 was given in grants ranging from $900 to $5,000.	This year's cycle saw similar demand for funds and number of proposals as in the last three FYs. An estimated 2,680 youth will be impacted by these grants, a 25% increase from last year's estimated 2,140. The City dedicated many hours to working with several of the grantees to refine their grant proposals to maximize their educational goals and the City's goals of educating youth on watershed issues and pollution prevention. Grant Projects are ongoing, and are evaluated at the end of the grant cycle.
PIP 3.A.3	YWEG Grantee Training		February 6, 2008. Grant cycle kick-off training and networking meeting for all the Grantees.	The City held this session for grantees to give them an opportunity to meet and share ideas and resources, to hear from a current grantee who used to be the grant manager, and to learn and ask questions about reporting and evaluating. Grantees anecdotally said the meeting was well worth their time.
PIP 1.C	Wacky Watersheds		March 1, 2008. Presented South Bay Water	RAFT workshop: 12 participants. All rated the workshop's

PIP 3.A.3 Att. A.15	Workshops		Connections curriculum to educators at the Resource Area for Teaching (RAFT) Warehouse. Also, June 24, 2008: presented a condensed version of the Workshop at week-long environmental education workshop at San Jose State University.	materials as good or excellent. SJSU workshop: 38 participants. All rated the workshop's materials as good or excellent.
PIP 3.A	San José Go Green Schools Program	✎	The San José Go Green Schools Program fosters school recycling and environmental stewardship in a parent and community driven process based on the Go Green Initiative of Pleasanton. The City encourages schools to Go Green and connects them to free recycling supplies, mini-grants, site assessments, and other green resources.	The Go Green Schools steering committee has diverse members representing City, School, and Community organizations all dedicated to helping schools Go Green. 49 schools in San José received SJGGS services in FY 07-08, the City awarded 29 grants totaling $47,500 to 27 schools to help them get their Go Green Schools programs started.. Each school is unique and poses different challenged to going green, but the City is dedicated to helping schools not only green their operations, but educating their students and communities about environmental issues.
PIP 3.A	National 2007 Go Green Schools Earth Summit Schools Environmental Conference	✎	November 2 & 3, 2007. Two-day workshop at the Marriott Hotel with lectures and break-out sessions describing different free green resources for teachers, and success stories from other Go Green schools. Also ran a concurrent set of break-out sessions with information specific to San José Schools.	95 teachers, parents, students and other schools and community representatives from San José attended with scholarships provided by the City. 29 Evaluations were submitted, with 100% of respondents rating the overall conference as good or excellent. Most valued of the San Jose sessions were: funding green programs, starting recycling programs and composting basics.
PIP 1.B PIP 1.C PIP 3.A.3 Att. A.16	Creeks Come to Class (formerly the Water Awareness Program)	✎	Presentations focusing on Pollution Prevention. *It's Wet It's Wild It's Water!* Curriculum distributed to teachers. See 14.D: *FY 07-08 San José School Outreach* for details.	480 students reached. 85 Students in targeted grades 5-7 reached. 4 Survey forms returned. All rated the program as excellent or good.
PIP 3.A.1	ZunZun Presentations of "The Musical Watershed"	✎	See Program Annual Report for details.	See Program Annual Report for details.
PIP 3	Cupertino School District Field Trip Bussing	✎	Paid for bussing for four San José schools in the Cupertino Union School District and to bus 3rd graders to local creeks as part of Cupertino's 3rd Grade Creek Education Program.	See Cupertino Annual Report for details.
PIP 1.B PIP 1.C PIP 3.A.3 Att. A.17	Slow the Flow	✎	Grant to Don Edwards Environmental Education Center at Alviso to host 9 different types of events: special events, interpretive programs, teacher orientation, field trips, in-class presentations, outreach presentations, workshops, special visits and interpretive displays.	This program reached an estimated 16,000 students and adults in the SJ/SC WPCP Tributary area in FY 07-08. This was accomplished through special events (including a week-long summer camp), field trips, integrated experiences, weekend programs, offsite presentations, outreach events, workshops, and co-op programs. Additionally, visitors can view the interpretive displays at the Environmental Education Center (the number of people who do this is not tracked.).

Item No.	Activity	Outreach Type	FY 07-08 Status	Evaluation
PIP 1.B PIP 1.C PIP 3.A.	Water Wizards Festival	✎	May 21, 2008. Water education festival for 3rd graders. The purpose of the festival was to increase the awareness of the importance of water and promote stewardship of water as a resource. ESD taught 3 activities related to the City's mission concerning water and watershed issues. The messages taught were: Pollution Prevention Difference between Storm and Sanitary Sewer Systems Value of Recycled Water Value of the Treatment Plant Importance of Soil & the Value of Composting	300 students from 4 San José public schools, 1 Santa Clara public school, and 1 Palo Alto private school. Pre- and post-testing of each student showed knowledge increases in most areas: Up 247% in knowing that we live in a watershed (33% to 80%) Up 11% in knowing Polluted water is not good to drink (76% to 87%) Up 7% in knowing that the water we use at home affects our rivers (67% to 74%) Up 1% in knowing all living things need water (92% to 93%)
Overall Evaluation of Education Outreach Activities		✎	Education continues to be a vital component of San Jose's pollution prevention plan. The City actively contributes to education both as a City and through the Program. San José commits significant resources to youth education with the goal of instilling a sense of stewardship for the environment. San José employs both in-class education and train-the-trainer approaches to Outreach. In-class presentations are more expensive per student reached, but lend themselves better to evaluation. Train-the-trainer has the potential to reach many more students, but it is extremely difficult to measure the effectiveness of this potential. Youth Watershed Education Grants provide funding for groups and educators to implement their own programs that accomplish the City's education goals. FY 07-08 saw the continuation and expansion of the City's Go Green Schools Program. Go Green Schools fosters recycling and environmental stewardship in a parent and community driven process, and supplies grants to schools to help them achieve their green goals. The City connects schools with free recycling supplies and other green resources, and encourages them to take up Go Green at the level the school chooses, whether it be recycling or environmental curriculum or green purchasing or other green practices.

15. Permit Reapplication

15.A Permit Reapplication Preparation Self Evaluation Matrix

Item No.	Activity	Compliance Date	FY 07-08 Status	Responsible Party
PRP A.	Compile all changes to URMP as part of reapplication for next permit (C.2.b)	Done FY 04-05	Done FY 04-05.	ESD
PRP B.	Participate in permit development and negotiation processes.	Ongoing	Done FY 07-08 and ongoing. San Jose staff have participated and will continue to participate in the MRP process through the Program, BASMAA, and individually as a City.	ESD
PRP C	As required, develop new five-year work plan that starts the following fiscal year upon adoption of MRP.	FY 07-08	Not needed in FY 07-08	ESD

15.B Permit Reapplication Preparation Evaluation

The City's current NPDES permit was adopted in February 2001 for a five-year period. The permit was amended in October 2001 and July 2005, with both amendments relating to the New and Redevelopment stormwater treatment and hydromodification provision, also known as Provision C.3. The permit has been administratively extended since February 2006, pending the adoption of the Bay Area-wide Municipal Regional Permit.

In late 2005, the Water Board embarked on a multi-stakeholder process to craft an NPDES permit, called the Municipal Regional Permit (MRP), that would apply to all municipal stormwater dischargers in the Bay Area. In the past, NPDES permits were issued separately to Bay Area stormwater programs with staggered adoption dates, which often resulted in uneven and inequitable requirements.

City staff has dedicated numerous hours analyzing MRP drafts, briefing stakeholders, and preparing responses to the drafts. Staff has also participated in the steering and stakeholder meetings convened by Water Board staff. City staff will continue to participate in the MRP process through the Program, BASMAA, and individually as a City. The Water Board is expected to adopt the MRP in late 2008.

15.C Permit Reapplication Preparation Response to Water Board Comments

No comments received from Water Board on this Program Element.

URBAN RUNOFF POLLUTION PREVENTION PROGRAM

FY 2007-08 ANNUAL REPORT

September 15, 2008

All-America City 2001

SANTA CLARA CALIFORNIA

September 15, 2008

Mr. Bruce H. Wolfe, Executive Officer
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay Street, Suite 1400
Oakland, CA 94612

Subject: City of Santa Clara Urban Runoff Management Program
FY 2007–2008 Annual Report

Dear Mr. Wolfe:

This report is submitted by City of Santa Clara in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal stormwater NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2007-2008 in accordance with the City of Santa Clara's Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 1997 and updated in January 2004, and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of our URMP and FY 07-08 Work Plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. The FY 2007-08 Annual Report contains the following sections:

- Certification Statement
- IC/ID Elimination Activities
- Industrial/Commercial Discharger Control Program
- Public Agency Activities
    - Public Streets, Roads and Highways O&M (including Corporation Yards)
    - Rural Public Works O&M
    - Storm Drain O&M
    - Water Utility O&M
- New Development Planning Procedures
- Construction Inspection
- Public Information and Participation
- Pesticide Management Activities
- Mercury Pollution Prevention Activities
- Copper Action Plan/Nickel Action Plan
- Trash Inventory and Management
- Staff Training Summary Table
- Performance Standard Certification Statement

Program Highlights and Accomplishments

The City of Santa Clara has been active in the Program elements and very active at the Co-permittee element level. IC/ID activity reported 76 incidents. IND/COM inspections totaled 225. Construction inspections totaled 485 (22 SWPPP inspections and 432 windshield inspections with 9 re-inspections). There were 18 construction element violations as compared to 53 violations from the previous fiscal year

Analyzing and detection of trends at the Co-permittee level continues to improve with each Annual Report. The City is alert to the various reporting information that is collected and has developed a history of adapting its resources to minimize stormwater pollution.

The City continues to retain EOA Inc. to assist with the planning and implementation of the C.3. Provisions. The assistance provided by EOA has been valuable in supporting staff on site specific C.3. Provision questions.

Continuous Improvement Activities

The City of Santa Clara takes pride in our Urban Runoff Management Program and the quality of stormwater. The IND/COM element continues to be dynamic in identifying industries with reoccurring violations. To this end, the City has identified, as in past years, automotive and food service facilities. The City's goal is to reduce stormwater pollution to the maximum extent practicable through education, targeted inspection on identified hot spots and if necessary, through vigorous enforcement of our Storm Drain Ordinances.

The City has assumed an aggressive stance with repeat violation facilities by issuing Pre-Citation/ Administrative Citations instead of repetitive Violation Notices. Violation Notices and Administrative Citations are issued to persons and businesses that are polluting or storm drain system. The City is maintaining a data base of repeat offenders.

Thank you for your review of this FY 07-08 Annual Report. If you have any questions regarding the materials submitted, please contact Rick Mauck at 408-615-2099.

Richard J. Mauck
Director of Streets and Automotive Services

FY 07-08 Annual Report

IC/ID Elimination Activities

CITY OF SANTA CLARA
FY 2007-08 ANNUAL REPORT
ICID ELIMINATION ACTIVITIES

1. **What type of incident causes the most problem?**

   The type of incident that causes the most compliance issues are cement related washouts from smaller concrete and masonry contractors. Cement related incidents totaled 18 out of 76 (refer to page 4 "breakdown of top six violators for level of enforcement action"). Enforcement actions and BMPs are continuously distributed to cement related contractors due to the high rate of violations. The potential reason for this problem is unlicensed contractors and the belief that these individuals do not stress to their employees stormwater protection.

2. **Is a particular location or source a large part of the problem?**

   The locations where most of these types of incidents occurred were in residential neighborhoods. Cement related incidents total 18 out of 76 total incidents (see attached chart titled "ICID Elimination Activities Violation Percentage").

3. **Might it be getting better or worse?**

   Cement related incidents totaled 18 in FY 07-08 compared to 84 in FY 06-07. It appears that the problem is improving somewhat. Increased contractor education is the main reason attributed for the improvement.

4. **What might be the causes?**

   Cement related incidents still continue to be the largest violation in terms of percentage, despite the improvement in FY 07-08. The cement related businesses, given their transient nature, are either not receiving the outreach or are not passing the information on to all their employees. Unlicensed contractors further compound the issue because the permit process is often not completed, circumventing the distribution of BMP material.

5. **What, if anything, will you do differently next year?**

   The City featured an article about construction waste in the Spring 2008 edition of Inside Santa Clara, a local paper mailed to all residents and businesses quarterly. The article was

designed to educate our residents who hire cement related contractors. It included information about how to hire a reputable contractor, specific best management practices to look for, and contact information for our Code Enforcement Technician in case a violation is noticed. It is unlikely that the additional effort, over what is already occurring, will better educate all cement related contractors. In spite of storm drain inlets having the "NO Dumping" stencils, and through word-of-mouth not to dump into storm drains, the best solution is to continue to educate our residents.

Industrial/Commercial Discharger Control Program

CITY OF SANTA CLARA
FY 2007-08 ANNUAL REPORT
INDUSTRIAL/COMMERCIAL DISCHARGE CONTROL PROGRAM

The City of Santa Clara's Industrial/Commercial Discharge element has become well-established and efficient in monitoring the businesses of concern within the City. The City's Code Enforcement Technician and Stormwater Inspector have several years experience working with the elements of the City's stormwater pollution prevention program. Continuity in this position has provided greater efficiency, better communication within other departments and the insight to identify trends over time.

During the FY 2007-08, the City's Code Enforcement Technician and Stormwater Inspector conducted a total of 1,491 IND/COM mandatory and non-mandatory inspections (see attached chart titled "FY 07/08 IND/COM Number of Inspections by Category") as compared to 225 inspections in FY 06-07. Eighty-three mandated inspections including re-inspections were conducted for FY 2007-08. Mandated inspection facilities are typically inspected bi-annually or sooner, as determined by SIC code or previous compliance issues. Non-mandated inspections required in the FY 07-08 Work Plan vary from year to year. In the FY 07-08 Work Plan there were 13 facility categories inspected with 1,491 inspections. The inspections conducted at these facilities resulted in a total number of violations detailed in the following graph. Note that the total number of inspections includes both initial inspections and re-inspections as necessary to confirm compliance.

FY 07-08 IND/COM
MANDATED AND NON-MANDATED OCCURING VIOLATIONS AS COMPARED TO NO VIOLATIONS

Note: A non-mandatory inspection is an inspection that occurs at a facility type designated in the current work plan. A mandatory inspection is the result of a pre-determined inspection frequency based upon SIC code.

A total of 254 violations were found in FY 07-08. Thirty-seven of those violations were found during mandatory inspections and 198 violations during non-mandatory inspections.

All IND/COM violations in the City of Santa Clara received follow up inspections and were corrected timely as dictated by conditions. All IND/COM inspections conducted in the City are documented on a Non-Point Source IND/COM inspection sheet and kept on file.

When violations are found during inspections, proper BMPs are distributed and a follow up inspection is conducted. When a violation is minor, a letter stating that corrective action has been completed from the facility contact person with supporting dated pictures is an acceptable means of compliance.

Refer to the table on the following page for detail of the type of violations found for each respective category.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM FY 2007-08 ANNUAL REPORT

FY 2007-08
STATUS OF INSPECTIONS AND VIOLATIONS BY FACILITY CATEGORY (Includes Re-Inspections)

Mandatory Inspections

Category	Description	Status/Common Violations Found	# of Inspections	# of Violations
7	**Machine Shop (NOI)**	Improper Hazmat storage	6	2
8	**Metal Manufacturing**	Improper waste oil storage / swppp violation	14	7
9	**Electric/Components:**	Swppp violation/ Oil storage	26	9
11	**Local Transit/Highway Transport (NOI)**	Waste oil and battery storage/ Poor Housekeeping	10	7
12	**Recycling Yards**	Swppp violations	5	1
13	**Auto Dismantlers:**	Battery storage	5	3
14	**Concrete Stone**	Housekeeping	6	5
17	Other (NOI)	Hazmat storage	8	2
Non Mandatory Inspections				
1	**Automotive Facilities**	Improper hazardous waste storage Housekeeping	556	80
2	**Food Facilities**	Roof equipment leaking	32	11
3	**Paint Facilities**	Improper Hazardous waste storage.	59	19
7	**Machine shops (Non NOI)**	Hazmat storage and spill kits	521	96
11	**Local Transit/Highway Transport (Non NOI)**	Hazmat storage	81	10
17	**Other (photo chem)**	N/A	129	0
17	**Other (auto wash)**	Chemical storage	33	2
		Total	**1,491**	**254**

For FY 2007-08 and prior years, the violation to inspection ratio of the automotive facilities (specifically dismantlers), and food service facility categories had the highest number of violations and repetitive violations. There are four automotive dismantlers in the City. Two facilities were inspected in 2007-08 and had 3 violations. The automotive facility category has been an ongoing enforcement problem. The City has ramped up its inspection frequency at automotive facilities to ensure that they maintain clean stormwater business practices. In FY 2007-08 at total of 556 inspections were conducted at automotive facilities and 80 violations were issued.

Facilities that have had recurring stormwater related violations are issued Pre-Citation Notices and Administrative Citations. The Administrative Citations carry a penalty ranging from $50.00 to $1000.00, depending on the nature of the violation. City Staff believes that the Administrative Citation process is its best tool to ensure clean stormwater practices. The City will continue to target facilities that have the highest rate of violations with increased inspection frequency.

FY 2007- 08 IND/COM
Percentage of Facility Categories With Violations Requiring Re-Inspections

* Reflects facilities needing re-inspections. All re-inspections may not have been conducted.

CITY OF SANTA CLARA
FY 2007-08 ANNUAL REPORT
PUBLIC AGENCY ACTIVITIES

Rural Public Works Operation and Maintenance

Rural roads within the City are the responsibility of the Parks Department. One exception is the creek trails that have been/are being constructed along San Tomas-Aquino Creek. Reach 1 (Hwy 237 to Agnew) was completed in early 2004 and Reach 2 (Agnew to Scott Blvd.) was completed in early 2006. Reach 3 (Scott Boulevard to Monroe Street) was completed in 2008. These improvements, are maintained by the Street Department.

As with other elements, City staff is knowledgeable of applicable BMP's and are educated on Storm Water Pollution Prevention BMP's as needed. For current and future contracted projects, BMP's are required and enforced by on-site inspectors and/or Storm Water Inspectors.

General Comment: The City has a total park area of 187.5 acres, 39,375 linear feet of 8-foot wide trails, 21,600 linear feet of 12-foot wide golf trails, nearly 3 miles of paved creek trails and 1.25 acres of concrete lined ponds/fountains.

City of Santa Clara

FY 07-08 Annual Report

Public Streets, Roads, and Highways Operation and Maintenance

CITY OF SANTA CLARA
FY 2007-08 ANNUAL REPORT
PUBLIC AGENCY ACTIVITIES

Public Streets, Roads & Highways Operation and Maintenance

The Street Department is responsible for the maintenance of approximately 240 miles of streets within the City of Santa Clara. It should be noted that the following streets are not within the jurisdiction of the City:

- Central Expressway (County)
- Lawrence Expressway (County)
- San Tomas Expressway (County)
- El Camino Real (State)

In addition, some boundary streets are shared with other jurisdictions – most notably Stevens Creek Boulevard (primarily with San Jose). BMP's observed include, but are not limited to, protection of storm drain inlets, collection of sawcut slurry and routine sweeping of City streets. Contractors completing work within the City streets are contractually required to follow BMP's. Street Department staff is trained to report poor contractor activity to the Code Enforcement Technician and/or the Stormwater Inspector.

BMP effectiveness has been good due to a constant City presence and contractual responsibilities. Staff and City contractors are well educated on BMP use. The City policy on residential street sweeping is bi-weekly guaranteed (typically done every week), industrial/commercial sweeping is done every 18-20 days.

Sweeping

The City of Santa Clara employs (3) full-time Street Sweeper Operators to sweep all of its streets, which consist of 401 residential route miles and 181 industrial route miles. The City utilizes three Schwarze A7000 regenerative air sweepers as its front-line sweepers. A Schwarze

A4000 regenerative air sweeper and a Johnston suction sweeper serve as back-ups. The regenerative sweepers are very effective at collecting fine sediments.

Residential streets are scheduled to be swept the day following the assigned garbage/recycling collection day. Residential streets are swept on a weekly basis about 72% of the time. The City guarantees bi-weekly residential street sweeping. Residential streets were swept on a bi-weekly basis 100% of the time in FY 2007-08. The City relies upon voluntary cooperation from residents to remove their vehicles from the street on their assigned street sweeping day. There are some areas in the City that are often parked in and cannot be swept. The Street Department posts temporary "No Parking" signs in these areas a few times a year to efficiently clean the gutterline.

The City has twenty-four (24) industrial routes that are swept on a continuous basis. Each Street Sweeper Operator is responsible for eight (8) routes. Each operator completes one industrial route, prior to sweeping the assigned residential route for the day. Industrial routes are typically swept 1.5 times per month. In total, 28,792 miles of sweeping occurred in fiscal year 2007-08 as compared to 26,354 miles in fiscal year 2006-07 and 5,409 yards of debris was collected. This included both residential and industrial sweeping. The industrial sweeping route map is attached for reference.

The City, beginning in fiscal year 2003-04, no longer hires contractors to perform street sweeping services during leaf season or to cover employee-scheduled absence due to budgetary constraints.

Leaf Collection

Typically, November marks the beginning of the Leaf Collection Program. For this program, the City utilizes two leaf vacuums (10 yard boxes) that are manned by a 2-man crew covering 10 routes. This program typically, depending on weather, operates for 2 months and is done in

conjunction to the normal street sweeping operation. For fiscal year 2007-08, this program collected 4,697 cubic yards as compared to 3,249 cubic yards in fiscal year 2006-07. Ground crews manually rake leaves around obstacles, allowing the leaf vacuums easier access to the leaves. Litter is generally removed prior to vacuuming. Leaves collected are treated as green waste at the landfill.

Residents also deposit leaves in their green waste container. It is not possible to distinguish between the types of green waste collected (branches, lawn clippings and leaves). For reference, 10,138 tons of green waste was picked up in fiscal year 2007-08.

City of Santa Clara

FY 07-08 Annual Report

Storm Drain Operation and Maintenance

CITY OF SANTA CLARA
FY 2007-08 ANNUAL REPORT
PUBLIC AGENCY ACTIVITIES

Storm Drain System Operation and Maintenance:

1. Which BMP's were evaluated formally or informally this year?

   - BMP's for Storm Drain System Operation and Maintenance have become well established and are routinely used by the Storm Drain Division. Most efforts of the Storm Drain Division are focused on line/inlet cleaning and support of any clean-up efforts required of IC/ID and construction events. Placing of "No Dumping – Flows To Bay" identification markers are part of the Storm Drain Division responsibilities. For greater effectiveness, placards are enameled metal. This Division also is first response support for hazardous materials spills. For these efforts, BMP's to isolate the event may be unique for each situation. All Storm Drain Divison personnel are trained in confined space to implement BMP's as required.

2. Does your process for tracking hot spots appear to be working?

   - Yes, Storm Drain personnel carry plat books that map out the entire City of Santa Clara's storm drainage system. Hot spots are indicated on these maps, periodically monitored and coordinated with the Fire Department (Hazardous Materials Unit) as events occur.

3. What were your major hot spots during the fiscal year, and how has that changed from previous years?

   - The City's major hot spots were locations that received significant localized flooding during major storm events. Maintenance crews are well trained to respond and maintain those locations. There were a few areas of localized flooding for FY 2007-08, mainly due to a large volume of rainfall during a short period of time that caused surcharge.

4. What evidence do you have that contractors are/aren't fully implementing BMP's?

- Storm drain inlets and catch basins are cleaned twice yearly. Debris collected from those structures indicates the type of activity causing the build-up. As indicated in the IC/ID element, cement contractors continue to be the major contractor causing violation. Overall, contractor violation events are recognized and cleaned up before entering the Storm Drain System. In instances where this is not the case, all efforts are made to track the debris back to the violator for enforcement action.

5. Which agencies and/or staff are receiving training and which are not?

- The City's Street Maintenance and Storm Drain Maintenance Divisions are trained on maintenance of the storm drain system and any illegal dumping into the storm drain. Please refer to the staff training summary table at the back of this report. City Utility Departments (Water, Sewer & Electric) have also been trained that only rainwater is to go down the drain. In addition, the Parks and Public Works Departments have also received stormwater related training. When a substance other than rainwater is observed, these departments are outstanding in reporting the event to the Storm Water Division.

6. What feedback has staff given about the effectiveness of BMP's?

- The implementation of BMP's has become standard operating procedure. Current efforts have been to increase effectiveness/ease of use for the BMP's. It has been noted that the most effective BMP's start at the source. Inspectors focus on these BMP's first and look at downstream BMP's as secondary protection – not as a substitution of a BMP upstream.

City of Santa Clara

FY 07-08 Annual Report

Water Utility Operation and Maintenance

CITY OF SANTA CLARA
FY 2007-08 ANNUAL REPORT
PUBLIC AGENCY ACTIVITIES

Water Utility Operation and Maintenance

The Water/Sewer Department is responsible for maintenance of City's water distribution system. Key O&M activities, potentially affecting stormwater quality, include line flushing, hydrant exercising and water meter testing. These scheduled activities have all discharges tested and treated (if needed) prior to release. Contractors working for the Water Department are contractually required to follow BMP's. Water Department staff report poor contractor activity to the Code Enforcement Technician and/or the Street/Storm Drain Maintenance Foreperson.

The effectiveness of the Water Department in minimizing stormwater pollution is good. Required staff has been trained in testing/treating of planned discharges. Only emergency/unscheduled discharges go without treatment. For these events, the storm drains are protected as quickly as possible and the discharge stopped.

City of Santa Clara

FY 07-08 Annual Report

New Development Planning Procedures

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM FY 2006-07 ANNUAL REPORT

NEW DEVELOPMENT PLANNING PROCEDURES

1. Self-Evaluation Matrix (based on C.3. FY 07-08 Work Plan) -- enclosed

2. NDC Summary Table – Mandatory C.3. Projects -- Significant Projects Reviewed and/or Approved During July 1, 2007 through June 30, 2008 -- enclosed

3. Response to Water Board Comments on the New Development Section of the FY 06-07 Annual Report: No comments received as of 9/15/08.

4. Evaluation of This Element

The focus of effort in this element of the City's urban runoff program during FY 07-08 included continued implementation of the C.3. provisions for Group 1 and 2 projects and the program for tracking and inspecting BMP operation and maintenance (O&M).

There were 4 Group 1 projects and 2 Group 2 projects approved this year. Description of the site design, source control and treatment control requirements for these projects are provided in the enclosed NDC Summary Tables. The City also encouraged site design measures (e.g., parking lot, driveway, and roof drainage routed to landscaping) at other sites that were below the Group 2 size threshold.

The City of Santa Clara is well prepared to implement C.3. site design, source control, and treatment requirements for Group 1 and 2 projects. Staff have implemented changes to the development application review process, and have incorporated these changes into the Standard Operating Procedures of the Planning Procedures Performance Standard in the City's URMP. A number of tools and forms have been developed to assist City staff with C.3. implementation.

In 2005, the City participated in an MS4 Program Evaluation conducted by Tetra Tech and Water Board staff that focused on implementation of the C.3. provisions and other program elements. For the New Development Program Element, there were no potential permit violations or major program deficiencies noted. The City was commended for:

1) Developing detailed guidance for developers and plan reviewers to implement the C.3. provisions;

2) Encouraging developers to consider alternatives to traditional stormwater management, such as low-impact development practices and reduction in impervious surfaces.

Recommendations included:

3) The City should develop a protocol to ensure that landscaped BMPs are being built and maintained as designed (**This was incorporated into the BMP O&M verification inspection program in FY 06-07. The Planning/Building Department requires permit applicants to enter into a Stormwater Treatment Measures Inspection and Maintenance Agreement. Fully executed agreements are forwarded to the Street Department. These properties will be inspected on an annual basis by the Code**

Enforcement Technician or Stormwater Inspector to ensure that landscaped BMP's are properly maintained.);

4) To ensure that the C.3 requirements are being applied consistently, the City should ensure that the C.3. guidance materials, especially the checklist designed for use by city planners when reviewing submissions, are used for each project **(This is currently being done.)**

More detailed information about the City's accomplishments on C.3.-related tasks during FY 07-08 are provided in the Self-Evaluation Matrix.

NEW DEVELOPMENT PLANNING PROCEDURES						
P.S. I.D.	**Activity**	**C.3. Work Plan Task**	**FY 2007-08 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
PPPS 5.	Requirements for Group 1 and Group 2 Projects	c.9.	Continue to require proponents of Group 2 projects to design and implement stormwater treatment BMPs to reduce stormwater pollution to the maximum extent practicable.	**Completed/Ongoing –** The City has been implementing C.3. requirements for Group 2A projects since October 20, 2005 and for Group 2B projects since August 15, 2006, per the permit revisions dated July 20, 2005. There were 4 Group 1 and 2 Group 2 projects approved in FY 07-08.	Ongoing	Planning Dept.
	New Requirements for Group 1 and Group 2 Projects in the Municipal Regional Permit (MRP)	New	In cooperation with other SCVURPPP Co-permittees, review the MRP, determine any changes that need to be made to the City's URMP, development policies and procedures, and begin to make and implement the changes.	**On Hold –** This task is on hold, pending adoption of the MRP.	TBD	Planning, Street Dept., and Engineering
PPPS 8.b.	BMP Inspection Program	e.5	Continue local programs for inspection of a subset of prioritized treatment BMPs to verify that proper O&M is being performed by the responsible party.	**Completed/Ongoing –** City staff have integrated information about BMPs into the City's electronic permit system (Tidemark). Group 1 and Group 2 projects are tracked, as well as projects where incorporation of BMPs is voluntary. BMP information is extracted from Tidemark and provided to the Street Dept. for the inspection program.	Program develop-ment completed 6/05 Program ongoing	Planning and Street Dept.

NEW DEVELOPMENT PLANNING PROCEDURES						
P.S. I.D.	**Activity**	**C.3. Work Plan Task**	**FY 2007-08 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
PPPS 8.	BMP O&M Reporting	e.6.	Continue to report on the City's treatment BMPs O&M verification program in each annual report, including organizational structure, evaluation of effectiveness, and planned improvements to the program. Include a list or summary of treatment BMPs inspected during the year, inspection results, and any required follow-up and correction .	**Completed/Ongoing** – A description of the City's BMP O&M verification program is provided below: 1) Planning Dept. enters BMP information into City's Tidemark permit system. 2) Building Dept. conducts construction site inspections and verifies data in Tidemark. 3) Building Dept. generates a list from Tidemark of installed BMPs and addresses, and provides list to Street Dept. 4) Permit applicants are required to enter into a Stormwater Treatment Measures Inspection and Maintenance Agreement. Fully executed agreements are forwarded to the Street Dept. 5) Street Dept. (Code Enforcement Technician or Stormwater Inspector) conducts BMP O&M inspections on an annual basis. (Street Dept. also conducts construction site inspections and has enforcement authority.)	Annually	Street Dept.

NEW DEVELOPMENT PLANNING PROCEDURES						
P.S. I.D.	**Activity**	**C.3. Work Plan Task**	**FY 2007-08 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
				No BMP inspections were conducted in FY 07-08 due to the lack of installed BMPs required by C.3. It is too early to summarize inspection results, evaluate effectiveness, or plan improvements.		
PPPS 5.d.	HMP	f.3.	Continue to implement HMP requirements for Group 1 projects that may cause increased erosion or other related impacts.	**Completed/Ongoing As Needed –** Key provisions of the SCVURPPP HMP Report were adopted on July 20, 2005 (Order R2-2005-0035). The Order requires implementation of HMP requirements by October 20, 2005. HMP requirements for Group 1 projects will be applied, as appropriate, for City of Santa Clara situations (there were no projects subject to HMP requirements in FY 07-08). City is also encouraging site design and treatment measures that provide flow control.	Ongoing	Planning and Street Dept.

NEW DEVELOPMENT PLANNING PROCEDURES						
P.S. I.D.	**Activity**	**C.3. Work Plan Task**	**FY 2007-08 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
PPPS 5	Local Waiver Program	g.2	Develop a model under which a project proponent may request a waiver from treatment BMP requirements for a given project due to impracticability, with a provision to provide other equivalent water quality benefit or credits or treatment of an equivalent pollutant loading or quantity of stormwater (allowing participation in regional solutions).	**No Action Required** – This program is optional and has not been adopted in the City of Santa Clara.	N.A.	Planning and Street Dept.
PPPS 5	Local Waiver Program	g.3.	Begin tracking information for reporting on waivers granted, including project name, location, type, percent impervious surface, reasons for and terms of waiver, and the alternative benefit project and completion date.	**No Action Required –** Will track information if City decides to implement a local waiver program (see Task g.2.).	N.A.	Planning and Street Dept.
PPPS 4	Alternative Certification	h.1.	Develop a list of qualified consultants that can provide certification that a project meets C.3. requirements (optional).	**Completed** – SCVURPPP is updating its list of qualified consultants, and the City will use that list if needed. City staff are currently conducting the reviews with consultant assistance.	Ongoing	Planning

NEW DEVELOPMENT PLANNING PROCEDURES						
P.S. I.D.	**Activity**	**C.3. Work Plan Task**	**FY 2007-08 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
PPPS 4	Alternative Certification	h.1.	Develop internal procedure for alternative certification using list of qualified consultants and implement procedure if needed (optional).	**In Progress** – Procedure is under development.	As needed	Planning
PPPS 4, 5.a.	Site Design Standards Analysis	j.4.	Continue to incorporate any revised design standards and guidance from the 9/15/03 submittal into local project approval process and "fully implement" the revised standards and guidance.	**In Progress** – The City is the process of implementing any revisions to its design standards and evaluating site design measures at specific projects during project reviews.	Ongoing	Planning
PPPS 4, 5.a.	Site Design Standards	j.5.	Educate staff regarding the availability of references such as SCVURPPP's "Manual of Better Site Design Examples" to help project proponents understand and see examples of better site design techniques from a water quality perspective.	**Completed/Ongoing** – Site design measures is a topic that is covered in staff training.	Ongoing	Planning
PPPS 4, 5.a.	Site Design Standards	j.6.	Summarize any revisions made to site design standards and guidance that has been incorporated into the local approval process in the Annual Report.	**In Progress** – The City has made sufficient changes to implement C.3. No revisions to site design standards were made in FY 07-08. City staff will review additional revisions that may be necessary during FY 08-09.	Annually	Planning

PPPS 4, 5..b.	Source Control Measures	k.2.	Implement activities to meet the revised Planning Procedures Performance Standard in the City's URMP.	**Completed/Ongoing –** The list of source controls is checked at Project Clearance Committee review and then checked again during Planning Department review of engineering drawings.	Ongoing	Planning
PPPS 4, 5..b.	Source Control Measures	k.3	Continue implementation of source control measures requirements by considering appropriate source controls for all projects and including appropriate conditions of approval in Group 1 and Group 2 projects.	**Completed/Ongoing** – The City has been requiring source control measures since 10/15/03. Source control measures required for projects approved in FY 07-08 are listed in the attached project tracking table.	Began 10/03; Ongoing	Planning
PPPS 1, 3	General Plan Review	l.1	Incorporate General Plan policies related to water quality and watershed protection as needed to implement C.3. requirements.	**In Progress** – The City reviewed its General Plan policies and concluded that the General Plan policies cover the basic goals of Provision C.3. and the Plan does not need modification to effectively implement C.3. However, City staff plan to add more specific language to several elements of the Plan at the next scheduled revision (due 2009). Work on the General Plan update began in FY 07-08.	[Next scheduled revision after 10/04]	Planning

FY 2006-07 ANNUAL REPORT

City of Santa Clara - NDC Summary Tables / Additional Information– Mandatory C.3 Projects
Significant Development Projects Reviewed and/or Approved During July 1, 2007 – June 30, 2008

Project File Number	Project Description	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Complete/ Approval)
PLN2008-06861	2735-2745 Scott Boulevard (APN 224-57-008) - Group 2 Use Permit to allow a new 7,113 square foot retail building in a ML zone (Light Industrial) property.	Commercial	0.72 acres	Created and Replaced 0.60 acre	PCC: 05/28/08 CC: N/A

Site Design:	Source Control:	Treatment BMPs:	Numeric Criteria:	O&M Responsibility:	Pesticide Reduction Meas:
Replacement of existing building, driveway and parking and landscaped areas with new 7,113 square foot retail/commercial building and landscaping. Site design elements: Disconnected downspouts directed to landscape areas; Detention of runoff in landscaping; Clustered structures.	Construction BMP's for runoff and dust control. Litter control. Stenciled stormwater catch basins. Covered dumpster area, drain to sanitary sewer. Pesticide reduction plan.	Vegetated Swale Bioretention Area. Detention in landscaped area. Media Filter. Storm drain inlet filter. Sweeping of surface parking area. Flow attenuation by use of open vegetated swales and natural depressions. Bubble-up roof drain emitters in landscape areas	Vegetated Swale Volume Based 1376 CF	Owner is responsible to maintain landscape drainage areas and records for inspection by City. Swales and biofilters to be monitored for debris and litter, as well as sedimentation accumulation.	Use of landscape species that minimize irrigation, pesticide and fertilizer application.

Project File Number	Project Description	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Complete/ Approval)
PLN2007-06379/CEQ2 007-01041	2200,2211 and 2231 Lawson Lane (APN 224-44-015, 016 and 018) – Group 1 Rezone to PD for the construction of an integrated industrial office campus. Existing structures are to be demolished.	Industrial/Office	8.81 acres	6.26 acres	PC: 03/12/08 CC: 04/15/08

Site Design:	Source Control:	Treatment BMPs:	Numeric Criteria:	O&M Responsibility:	Pesticide Reduction Meas:
Remove existing buildings and open paved parking area; including landscaping and trees and construct an integrated industrial office campus.	Construction BMPs for runoff and dust control. Littler control. Stenciled stormwater catch basins. Detention of runoff in landscaping. Covered dumpster area, drain to sanitary sewer.	Vegetated swales Bioretention area Media Filter Hydrodynamic device	Flow-based Vegetated Swale #1 (0.03 cfs) Vegetated Swale #2 (0.05 cfs)	Property owner is responsible for maintaining landscape drainage areas, filters and hydrodynamic device.	Use of landscape species that minimize irrigation, pesticide and fertilizer application.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2007-08 ANNUAL REPORT

Project File Number	Project Description	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Complete/ Approval)
PLN2005-05466/CEQ2 007-01049	1331-1333 Lawrence Expressway – Group 1 Rezone for the construction of 277 rental apartment units and 63 residential units, and subdivision of 57 single family, 6-multifamily residential lots and one common lot.	Residential (SF)	4.2 acres	2.8 acres 5.4 total acres	PC: 04/23/08 CC: 05/13/08

Site Design:	Source Control:	Treatment BMPs:	Numeric Criteria:	O&M Responsibility:	Pesticide Reduction Meas:
Replacement of existing office buildings, driveways, parking and landscaped areas with a total of 340 residential units with new driveways, parking and landscaped areas. Single Family has disconnected downspouts directed to landscape areas.	Construction BMP's for runoff and dust control. Litter control. Stenciled stormwater catch basins.	Self treating area includes all on-site landscaping; landscape runoff may discharge to media filter unit. Treatment of streets: pervious paving and media filter unit. Project is exempt from hydromodification plan (HMP) as it drains into a continuously hardened channel and is not applicable to the HMP requirements in the NPDES Permit. Media filter units are for both single family units and apartments.	Residential lots designed to be self-treating.Self-treating Area is 70%. This area includes backyard and sideway landscaping and all roof areas which are to discharge directly onto landscaping. Flow based criteria for media filter: #1 design flow = 1.04 cfs #2 design flow = 0.06 Multi-family 3.2 acres Residential 2.6 acres	HOA is responsible to maintain landscape drainage areas and records for inspection per City O&M agreement to be completed prior to occupancy.	Use of landscape species that minimize irrigation, pesticide and fertilizer application.

PLN2006-05946	502 Mansion Park Drive (APN 097-08-097, 098, 099, 100) – Group 1 Rezone from PD to PD for the construction of an additional 124 apartments (existing 876 units).	Residential	28.79 acres	0.38 acres	PC: 12/12/07 CC: 01/08/08

Site Design:	Source Control:	Treatment BMPs:	Numeric Criteria:	O&M Responsibility:	Pesticide Reduction Meas:
Remove existing surface parking lots and replace with tuck under parking and an additional 124 apartment units (existing 876 apartment units), landscaping and common open space. Seven new buildings are proposed on the existing surface parking lots, as well as three new parking areas within the apartment complex. Site design elements: Minimize surface parking areas; Gutters to spill into landscape areas; Clustered structures/minimum impact parking lot design.	Trash areas covered. Construction BMP's for runoff and dust control. Littler Control. Stenciled stormwater catch basins.	Hydrodynamic device.	Flow based 0.2 in/hr.	The new 124 apartment units are to be used as rental units. The property owner/management will be responsible to maintain the landscape drainage areas and CDS unit per agreement to be completed prior to occupancy.	Use of landscape species that minimize irrigation, pesticide and fertilizer application.

CITY OF S. TA CLARA URBAN RUNOFF POLLUTION PREVEN N PROGRAM
FY 2007-08 ANNUAL REPORT

Project File Number	Project Description	Project Type	Site Size (Ac)	New Impervious Surface (Ac)	Project Status (Complete/ Approval)
PLN2007-06347	1828-1878 Main Street (APNs 224-24-051, 052 and 053) – Group 2 Rezone from R1-6L (Single Family Residential), R3-36D (Medium Density Multiple Dwelling), and CN (Neighborhood Commercial) to PD (R3-36D) to allow construction of a 28-unit senior affordable rental apartment complex and integrated parking garage.	Residential	0.57 acres	0.49 acres	PC: 06/27/07 CC: 07/09/07

Site Design:	Source Control:	Treatment BMPs:	Numeric Criteria:	O&M Responsibility:	Pesticide Reduction Meas:
Remove existing Martin's Bar, Grocery Store/Butcher, 10 apartments, 2 detached rental units and surface parking lot. Site is void of any landscaping. New construction consists of the construction of a 28-unit senior affordable rental apartment complex and integrated parking garages, as well as driveways and community/public landscaping. Site design elements: Minimize surface parking areas; Roof drains to landscape areas.	Trash areas are to be covered. Construction BMP's for runoff and dust control. Littler Control. Stenciled stormwater catch basins. Sweeping of surface parking areas.	Detention in landscaped areas. Six vegetative swales are proposed along the perimeter of the site .	Flow based criteria – 0.2 in/hr, 0.1 cfs for each swale.	The new 28 affordable senior apartment units are to be used as rental units. The site manager is to keep track of an maintenance and inspection schedule for swales/treatment features on the site. A monthly inspection is recommended. Detailed inspections shall be conducted at least twice annually with inspections occurring: 1) at the end of the wet seasons to schedule summer maintenance, 2) before major fall runoff in preparation for winter; and 3) after periods of heavy runoff. A thorough stormwater maintenance plan will be developed prior to site completion and will be made available to City inspectors prior to occupancy.	Use of landscape species that minimize irrigation, pesticide and fertilizer application.

City of Santa Clara

FY 07-08 Annual Report

Construction Inspection

CITY OF SANTA CLARA
FY 2007-08 ANNUAL REPORT
CONSTRUCTION INSPECTION

1. **Do pre-rainy season inspections appear effective in getting all construction sites to install proper BMP's before October 15?**

Pre-rainy season inspections have been effective in enforcing construction site SWPPP's prior to October 15 by insuring compliance before the first rain. The City inspected 14 sites both prior and after to October 15th. These 14 sites were the total number of sites under construction prior and after October 15 that were considered to have the greatest potential to pollute. Each site for these inspections was given a copy of the construction inspection form and proper/adequate BMP usage (see attached form) was confirmed. If a site had a violation, depending on prior enforcement, the most applicable notice was issued with a re-inspection for compliance occurring timely.

2. **Do you think your inspection coverage of construction sites is adequate: why or why not?**

The City has very adequate coverage of construction sites. All construction sites are inspected before, during and after the rainy season. In addition, due to the limited number of construction sites, each are inspected during and after major rain events. For FY 2007-08 there was a total of 454 inspections conducted at 14 sites. On average 30 inspections were completed per construction site.

Inspections include pre-rainy season SWPPP review, pre-rain event, rain event, and post rain event. All inspections are documented on an inspection form. Pre-rain SWPPP inspections include the review of site-specific SWPPP requirements. These inspections ensure that BMP's required of the SWPPP are implemented on site. Pre-rain event, rain event, and post rain event inspections are supplemented by windshield inspections. For windshield inspections the inspector drives through and around the site, already being knowledgeable of the SWPPP requirements and confirms BMP compliance. Typically, windshield survey inspections for proper BMP implementation are not documented on an inspection form unless a violation is found. Individual windshield surveys and inspections are recorded on a construction site spreadsheet. When no violations are discovered, only the date of the inspection is entered.

City employees not normally responsible for inspections, such as building inspectors, are knowledgeable of our stormwater program and report any violations they may see directly to the Code Enforcement Technician. City Building Department inspectors are trained regarding proper stormwater practices and contact the NPS Inspector as violations occur or most appropriately, prior to discharge. NPS inspectors also attend preconstruction meetings for City projects to inform the contractor that the City will be inspecting the site for proper stormwater BMP management.

3. **Did your City take an unusually large or small number of enforcement actions this year, and what are the possible reasons?**

In FY 2006-07 the City conducted 24 SWPPP inspections and 837 windshield inspections, for a total of 861 inspections. A SWPPP inspection is where the SWPPP site is reviewed and a walk-through inspection takes place. There were 68 violations in FY 06-07. In FY 2007-08 the City conducted 22 SWPPP inspections and 432 windshield inspections, for a total of 445 inspections. There were 17 violations in FY 07-08. The number of violations was down slightly mainly due to a smaller number of inspections.

4. **How are verbal warnings followed up to determine whether compliance is achieved?**

Verbal and written warnings are given for all violations and are followed up by a re-inspection of the site. Any time a warning is given, a follow up inspection was always conducted. If the violation was not corrected, a written violation or pre-citation notice was issued. Weekly windshield inspections are conducted during the rainy season and include inspections of all areas of concern. If a violation was found, the site construction superintendent was notified immediately and a full SWPPP inspection was conducted. A total of 22 SWPPP inspections of 14 construction sites were conducted. For these 22 sites, a total of 9 re-inspections were required and completed.

5. Are there specific contractors who need repeated warnings?

Yes, there have been some contractors that have required repeated warnings. If a verbal warning was given to a contractor and the potential violation was not corrected, a violation notice was issued. If the violation was corrected and a different violation is found during a later inspection, a pre-citation notice was issued. If the contractor continues to be out of compliance, administrative citations are issued. Escalating enforcement occurred several times at the 75 Cabot Avenue project. For this site, 2 administrative citations were issued within a short period of time. Both of the 2 administrative citations and one pre-citation were found during windshield inspections.

6. Are the contractors on Public Works projects doing a good job in erosion/sediment control?

Contractors engaged in public works projects are contractually required to follow all appropriate BMP's. Engineering Department-Field Services Division personnel are fully aware of our URMP program and do not hesitate to notify a Code Enforcement Technician as violations are seen. For most projects, inspectors are able to identify potential discharges prior to there being an event. The Code Enforcement Technician also attends pre-construction meetings with contractors to educate them on stormwater issues.

7. Are BMP's being used in your City adequately, or do you see a lot of substandard controls like sand bags and hay bails?

BMP's are being used adequately within the City. All 14 sites had the required BMP's in place either before or immediately after inspection per their approved Storm Water Pollution Prevention Plans. The prompt issuance of violations and reinspections for compliance has insured that all BMP's are in place. No hay bales or sand bags were used as a primary source of stormwater protection. The City is no longer using the "Earth-Moving Activities" brochures that advocate the use of hay bales (2002

Performance Review Comment). The type of BMP's the City encourages include those that stress controlling erosion at the source - for example, stabilizing dirt slopes, covering stockpiles of materials, proper storage of materials and education. Protection of inlets alone is not considered adequate.

8. Does outreach to contractors or City staff need to be improved?

The City continuously educates and monitors City staff and contractors regarding stormwater pollution prevention protection. This in part is completed by frequent inspections and distribution of BMP pamphlets specifying construction stormwater protection. Improvement can always be made and additional emphasis has been given to make sure contractors, when applying for permits, are given all applicable BMP information.

CITY OF SANTA CLARA
FY 2007-08 ANNUAL REPORT
CONSTRUCTION INSPECTION

FY 06-07 and 07-08 Construction Inspection Comparison

Initial inspections of construction sites are done with the site superintendent and the SWPPP is reviewed. If a violation is found, the appropriate enforcement action is given to the superintendent and frequent re-inspections as are necessary are conducted to eliminate further violations. The City's Code Enforcement Technician or Stormwater Inspector performs at a minimum a windshield inspection before, during, and after a rain event. Any violations found are documented on an inspection form or the date is logged on an Excel spreadsheet if no violation is found.

FY 2007-08 ANNUAL REPORT

CONSTRUCTION INSPECTION – NEW DEVELOPMENT

Performance Standard Identification	Activity	Continuous Improvement Source Item	FY 2007-08 Tasks	Status / Comments	Due Date	Responsible Party
CSI 1	Construction Inspections	2004 URMP	Develop and implement a Field Inspector checklist for inspection of stormwater pollution prevention requirements.	To date, Building Inspectors refer stormwater issues to the Code Enforcement Technician. The referral system is working well. Building Inspectors typically do not check for a SWPPP but will forward problems they see to the Street Dept. Prior/during construction the Street Dept. is inspecting the site for stormwater/SWPPP compliance.	Ongoing	Street Dept. Planning Dept. Building
CSI 1	Construction Inspections	2004 URMP 2005-06 Workplan	Improve coordination with Building Department to require efficient updating of active construction sites.	Some minor projects are ongoing without the knowledge of the Code Enforcement Technician and are found by chance. This is not acceptable to this element. A list of all sites is sent to Non-Point Source inspectors quarterly from Planning.	Ongoing	Street Dept. Planning Dept. Building
CSI 2	Wet Weather Inspection	2004 URMP	Inspect construction sites during weather events.	In FY 07-08 there were 22 SWPPP inspections made on 14 sites prior to the wet weather events, and 485 windshield inspections were conducted during wet weather events.	Ongoing	Street Dept.

Complete Ongoing	Street Dept.

City of Santa Clara

FY 07-08 Annual Report

Public Information and Participation

CITY OF SANTA CLARA
FY 2007-08 ANNUAL REPORT
PUBLIC INFORMATION AND PARTICIPATION

The City of Santa Clara provides information to the public during mandatory and non-mandatory inspections, IC/ID events, public events and providing BMP literature for distribution at City facilities. Measuring the effectiveness of how this information is used by the public is difficult.

In past Annual Reports our IND/COM and IC/ID elements have analyzed the number of repeat violations. The City has seen repeat violations as an indicator of poor education (not utilizing BMP information). This is open to interpretation. Some industries/businesses are volatile by nature, have high employee turnover and/or are improperly managed. These are all considerations that affect BMP education effectiveness.

Public events are a great opportunity to distribute BMP literature and interact directly with citizens in an informal way. Although a large number of BMP pamphlets are distributed, they are received by a public that may or may not be a target audience. As a result, BMP effectiveness can only be inferred.

The City of Santa Clara is committed to educating its businesses and residents in stormwater pollution prevention. Our participation in program activities will continue, as will our commitment to identify problem businesses for specialized inspection/distribution of specific BMP's.

CITY OF SANTA CLARA
SCHEDULED PIP EVENTS*

EVENT	DATE
All City Picnic	July 4, 2007
Camellia Show	February 23 & 24, 2008
Citywide Clean Up Campaign	March 31 thru April 25, 2008
Art and Wine Festival	September 15 & 16, 2007
Free Disposal Days	September 22, 2007 & January 13, 2008
Arbor Day/Earth Day	April 25, 2008
Fish Derby	April 26, 2008
Household Hazardous Waste Events	Continuous (56 events held in FY 2007-08; 2,502 participants)

***Each event has a purpose separate than PIP, however many of the events produce an outstanding opportunity for Staff to set up interactive games for children, a visual computer display for adults and to distribute BMPs.**

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2007-08 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Libraries: Central & Mission Branch, Community Centers & various locations throughout the City.	General / Educational	BMP's: Bay Begins at Your Front Door, Pest Bugging You?, Clean It!, Grow It!, Home Maintenance Tips, Home Repair & Maintenance, Pool/Spa, Painting, and Concrete and Mortar Application. Distribution continuously.	Works well in terms of numbers distributed; difficult to measure effectiveness. Provides good exposure to Storm Water Pollution Prevention, but does not provide the opportunity for interaction.
New Resident Information	General	City calendar and annual report distributed – contains information on City meetings and events for the year. Provided yearly.	Mailed to approx. 49,400 residents and businesses. 4,000 more were distributed in other ways. Well received for general information. Informs residents of upcoming events (Disposal Days, Household Hazardous Waste Drop Offs, etc.). Includes suggestion/comment card that allows for feedback, but very few returned last year.
Public Events	General	City staff helped staff booths at the NVIDIA Earth Day event held on Monday, April 21, 2008 and the Spring in Guadalupe Gardens event held on Saturday, April 26, 2008.	Event provided an excellent opportunity to educate the public about the County-wide HHW program. Good match between message and event.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2007-08 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Household Battery Disposal Information on TV/computer monitor disposal Fluorescent bulbs and batteries	General	Fall 2007 issue articles in City newspaper, Inside Santa Clara, about the County HHW program, curbside battery pickup provided by Mission Trail Waste Systems and battery drop off locations at all City Fire Stations. Fall 2007 article in City newspaper listed County phone number for information on HHW disposal including computer or television monitors. County based public education groups sponsored bus advertisements and a Comcast Cable television commercial that educated residents to use retail recycling partners to recycle their bulbs and batteries.	Well-received program. Residents comment on convenience factor Increased requests for "battery bucket" pickup at Fire Stations. Many requests for referrals to companies who will take monitors at televisions at no charge. SB20 monies have made the "covered electronic device" market lucrative, so there are plenty of recyclers in the area taking these items at no charge from residents. The retail recycling partner program is still expanding.
Storm Drain Maintenance update & URPPP tips, hints, offer for info.	General / Educational	Fall 2007 issue of Inside Santa Clara gave clear instructions on how to dispose of fall leaves. All raked leaves are to be placed in Clean Green containers provided by Mission Trail Waste Systems- leaving gutters/storm drains free of debris. Spring 2008 article in City newspaper, Inside Santa Clara, "Keep Construction Debris Out of Storm Drain"	Mission City Scenes sent to approx. 49,400 residents in their utility bill. Timed for wet weather. Does help reduce number of blocked storm drains due to clogged leaves, debris, etc. Phone number for the Street Department is listed to provide additional information. Many calls are received. Inside Santa Clara sent to approx 49,400 residents and businesses.

FY 2007-08 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Camellia Show	General / Educational	Advertised in January 2008 utility bill insert, Mission City Scenes and Winter 2007, Inside Santa Clara. February 23rd & 24th, 2008	Approx. 375 attended. Article in Utility insert. Brochures "Grow It, Pests, Pool, Home Maintenance" distributed at show. Audience shows interest in the above BMPs –good match of PIP activity and information provided.
City Clean-Up Campaign	General / Educational	March 31 thru April 25, 2008 Spring 2008 article in City newspaper, Inside Santa Clara Distributed info regarding proper disposal & alternative uses to pesticides & household cleaners.	About 7,000 tons gross weight collected with a significant amount of hazardous materials also collected. Very effective in terms of removing potential stormwater pollution from the City and increasing awareness.
Free Disposal Days	General	September 22, 2007 and January 13, 2008	Total of 250 residents participated in the September event, and 236 in January. Effective in terms of removing potential stormwater pollution from the City. Very well received by residents.

FY 2007-08 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Arbor Day	General / Educational	Article in March 2008 utility bill insert, Mission City Scenes and Spring 2008, Inside Santa Clara. April 25, 2008 Public presentation. Magician with environmentally based program along with school participation. School age related educational materials.	Approximately 1,400 students, teachers & volunteers attended. URPPP display booth appropriate for this age group. "Make Your Own" visor project new to URPPP program this year. Very well received. Great opportunity to reach large number of school-age children. Assembly and teacher packets are very well received. Good response from the children at the water pollution booth demonstration.
Household Hazardous Waste Drop-off Events	General / Educational	Advertised in August 2007 and March 2008 utility bill insert, Mission City Scenes Spring 2008 article in City newspaper, Inside Santa Clara The City participates in the Santa Clara County Program which had 56 operating days in FY 2007-08 Distributed info regarding alternative uses to pesticides & household cleaners.	Over 2,502 residents used this program last year. Very effective at removing potential stormwater pollution from City.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2007-08 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Automotive Facilities Photo Facilities Local Transit Construction Sites Machine Shop Mandatory Industrial Inspections	Targeted	As needed – specific BMPs & literature Mandatory Industrial Inspections schedule defined by SIC code	Currently inspecting for compliance. Works well. Accelerated rate of administrative action has increased compliance.
Distribute existing Program Outreach materials & BMPs – construction specific.	General / Targeted	Planning/Permit Center, Utility billing, Licensing Continuing	Distributed at counter and available from two self-serve racks. Effectiveness is difficult to measure, but opportunity is available for resident interaction.
URPPP info City Web Page	General / Educational	Article advertising web page and new web address (www.santaclaraca.gov) in June 2008 utility bill insert, Mission City Scenes Information on the Fire Department's Hazardous Materials Division, Household Hazardous Waste Drop Off Days, Free Disposal Days, and Urban Runoff Pollution Prevention. Internet - Continuous	"Hits" continue but difficult to measure effectiveness.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2007-08 ANNUAL REPORT

PIP ACTIVITY TABLE			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Distributed via educational letters prompted by complaint	Targeted / Educational	Home Maintenance Tips; Home Repair & Remodeling; Pool/Spa Water; Landscape, Gardening, and Pool Maintenance; Painting & Application of Solvents & Adhesives; Roadwork & Paving; Earth Moving Activities; Heavy Equipment Operation; Fresh Concrete & Mortar Application; General Construction & Site Supervision; The Bay Begins at Your Front Door!; Blueprint for a Clean Bay; San Francisco Bay Area Recyclers & Disposal Services for Construction Sites Continuous	Distributed 208 + BMP's. Effectiveness is good – repeat offenders are greatly reduced. Information is directed to individual residents/contractors. This may have more of an impact. Accelerated rate of administrative action has increased compliance.

City of Santa Clara

FY 07-08 Annual Report

Pesticide Management Activities

PESTICIDE MANAGEMENT ACTIVITIES

The Parkways & Boulevards Division and the Parks Department staff have been using tighter matting mulches to prevent weeds in FY 07-08. In addition, better timing of pre-emergence application has occurred to achieve the goal of post-emergence herbicide reduction. Drip systems have been installed at various locations throughout the City. This improvement has improved water management and reduced the potential for weed growth.

The Parkways & Boulevards Division and the Parks Department staff have been trained to recognize plants that have become infested with pests and to trim off infected areas before a condition worsens to a point that requires chemical treatment. Pesticide application methods include soil drenching, soil injection, and fertilizing with fertilizers that contain systemic pesticides. These practices reduce the need for overhead spraying and keep the pesticide on site without the possibility of drift or run-off. We are always looking for safer, less toxic materials that are effective to replace more harmful chemicals. The City has encouraged all landscape personnel to participate in pesticide management activities by observing and contributing their thoughts with the goal to have a continuously improved pesticide management plan.

PESTICIDE MANAGEMENT ACTIVITIES

FY 07-08 PESTICIDE USE REPORTING

The Parkways & Boulevards/Tree Division is currently made up of 19 full time employees. Of these employees we have 2 that hold PCA certificates (Pest Control Advisor) and 17 that hold QAC cards (Qualified Applicator Certificates). All full time employees are required to have a QAC before the expiration of their probationary period (12 months). Personnel attend annual pesticide/IPM training and continuing education classes. The use of the least toxic solutions for treatment is standard operating procedure. All pesticide cardholders are required by the California Department of Pesticide Regulation to attend seminars at which they accumulate their continuing education units. PCA card holders are required to attend 40 hours of continuing education every 2 years, and our QAC card holders, 20 hours of continuing education. Both full time employees and seasonal employees receive our yearly pesticide/IPM training. The training includes all product labeling, MSDS, safety information leaflets, health safety issues, and City adopted procedures for their Integrated Pest Management Program.

Currently the Parkways & Boulevards Division has 23 chemicals in its' inventory. This year four were completely not used, while ten showed a decrease in usage, and nine showing a slight increase. The increase in usage from the previous year is a direct effect of the FY06-07 downsized tree injection program.

The Tree Division is continuing to test the effects of releasing beneficial insects (parasitic wasps – Aphytis Melinis). No releases were conducted during the period of July 2007 through June 2008. A plan to release beneficial insects during the upcoming year is being devised.

The Tree Division is continuing to use tree clippings produced by Tree Division staff and outside contractors to mulch large open space areas. This has allowed us to decrease pre-emergent applications, conserve water and provide nutrients for the soil.

City of Santa Clara

FY 07-08 Annual Report

Mercury/Copper/Nickel Pollution Prevention Activities

CITY OF SANTA CLARA
FY 2007-08 ANNUAL REPORT
MERCURY/COPPER/NICKEL POLLUTION PREVENTION ACTIVITIES

Copper

The City of Santa Clara has in previous workplans aggressively inspected automotive facilities and metal plating facilities. This occurred in FY 2001-02, FY 2002-03 and FY 2006-07 for automotive and FY 2002-03, FY 2004-05, and FY 2005-06 for metal plating. These facilities are inspected at least once every two years due to their SIC code but inspection frequencies are accelerated if repetitive violations are found. The targeted facility type for FY 08-09 is restaurants. Our street sweeping program mandates bi-weekly sweeping of all residential streets. Industrial routes are swept on a continuous basis. Use of architectural copper is discouraged and is being eliminated from design in new public buildings.

Nickel

The City of Santa Clara, through our construction inspection element, has documented construction best management practices activity within the City for many years. In FY 2007-08, 424 construction inspections occurred on 14 sites. Inspectors also conducted 837 windshield inspections of all construction sites. Emphasis has been on increasing enforcement actions to gain compliance.

Mercury

The collection of thermostats, household batteries and fluorescent bulbs has skyrocketed since DTSC banned universal waste from landfills. The Countywide HHW Program has partnered

with several retail businesses to accept fluorescent bulbs and batteries from the public. The Countywide HHW Program then collects the bulbs and batteries from the retail establishments and recycles them along with waste collected at drop-off events. The City is pursuing Extended Producer Responsibility (EPR) initiatives to remove mercury from the waste stream and to encourage producers to make a less toxic product.

CITY OF SANTA CLARA URBAN RUNOFF POLLUTION PREVENTION PROGRAM
FY 2007-08 ANNUAL REPORT

MERCURY / COPPER / NICKEL POLLUTION PREVENTION ACTIVITIES (MCNP)						
Performance Standard Identification	**Activity**	**Continuous Improvement Source Item**	**FY 2007-08 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
MCNP P.S. #2	Municipal Use of Mercury Containing Products AKA- Prioritization of Mercury / Copper / Nickel Products	Order No. 01-024 2004 URMP 2007-08 Workplan	Develop a process to survey the types of mercury-containing products used by City departments. Identify appropriate municipal personnel to conduct survey. For those products with a potential to enter stormwater runoff, identify possible alternatives or proper disposal procedures.	Building Maintenance Department requires all mercury containing products to be properly disposed. Mercury containing products are stored in the Street Corporation Yard hazmat shed. A certified hazardous waste contractor cleans the shed on a quarterly basis. Fluorescent bulbs and tubes are taken to AERC in Hayward for recycling.	Ongoing	Street Dept. Building Maintenance
MCNP P.S. #3	Municipal Use of Mercury Containing Products AKA- Identify Management Options	Order No. 01-024 2004 URMP 2007-08 Workplan	Follow Performance Standards in identifying management option for mercury-containing products reduction. These standards include a schedule for the timely phase-out of mercury-containing products identified for virtual elimination as well as reporting requirements, replacement, and reduction in use of mercury-containing products.		Ongoing	Street Dept.

Performance Standard Identification	**Activity**	**Continuous Improvement Source Item**	**FY 2007-08 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
MCNP P.S. #3 (CB-3)	Household Hazardous Waste Collection	Order No. 01-024 2004 URMP	Provide mercury-containing products disposal services for residents and small businesses. The City began collecting household batteries from single-family residences curbside on July 1, 2006 and has drop-off locations located at its 10 Fire Stations for multi-family residents.	There were 56 Household Hazardous Waste collection events in FY 2007-08. 2,502 Santa Clara residents attended HHW drop-off events in FY 07-08.	Ongoing	Street Dept. Fire Dept.
			The Countywide HHW Program has partnered with retailers to accept fluorescent bulbs and batteries from the public.	The Countywide HHW Program is continually working to bring more retail establishments into the program.	Ongoing	Street Dept.
			City will take compact fluorescent bulbs through its single family curbside recycling program starting in December 2009.	New recycling collection agreement to be implemented in 2009.	December 2009	Street Dept.

MCNP P.S. #3	Vehicle Washing Operations	2004 URMP 2007-08 Workplan	Distribute outreach materials on proper vehicle/equipment washing at City department counters and public events, and post on City website. Inspect auto businesses regarding car wash requirements, and prohibited storm drain discharge. Inspect vehicle washing facilities as part of stormwater inspections for industrial and commercial businesses. Continue to maintain car wash systems for City vehicles at the corporation yard and fire stations.	Outreach materials are distributed by our Code Enforcement Technician and Stormwater Inspector during IC/ID inspections. Automobile businesses have been a target industrial of our IND/ICD program. All City Corporation Yards are equipped with car wash systems that are closed looped. Visual inspections are done every other day, cleanings done once a week and repairs are done as needed. BMP's are being implemented in the construction of two new City Fire Stations. Permanent BMP's are being developed for our existing Fire Stations.	Complete and Ongoing	Street Dept.

Performance Standard Identification	**Activity**	**Continuous Improvement Source Item**	**FY 2007-08 Tasks**	**Status / Comments**	**Due Date**	**Responsible Party**
MCNP P.S. #6	Training	2004 URMP 2007-08 Workplan	Attend training events specific to Mercury, Copper and Nickel reduction.		Ongoing	Street Dept. Program
MCNP	Watershed assessment and protection	2004 URMP	Revise City's General Plan, as needed, at next scheduled update, based on recommendations from the *Development Policies Comparison Project* and Provision C.3.l. Review and implement guidance from SCVURPPP and San Jose on addressing water quality in the CEQA review process, as part of C.3.m. implementation.	Current general plan determined effective with current language.	Complete	Planning Dept. Street Dept.
MCNP Overall Commitment	Monitoring and Science	Order No. 01-024 2004 URMP 2007-08 Workplan	Provide financial and staff support for a coordinated regional plan to collect data for the mercury TMDL, as defined in the RWQCB / BACWA / BASMAA.	Work with Program	Ongoing	Street Dept.

City of Santa Clara

FY 07-08 Annual Report

Trash Inventory and Management

CITY OF SANTA CLARA
FY 2007-08 ANNUAL REPORT
TRASH INVENTORY AND MANAGEMENT

In the City of Santa Clara the Code Enforcement Technician and Solid Waste Foreperson respond to trash complaints. Other City personnel may respond to initial response, depending on the nature of the event.

A trash "hot spot" list was generated based on the data received from complaints and catch basin cleaning crew findings. A survey was conducted using the KAB litter index and documented on a spreadsheet two times in FY 07-08. This information is updated every year. Locations that appear on our "hot spot" list on more than one occasion receive further investigation to find a source of the litter. Facilities and/or persons that can be found responsible for the trash receive a violation notice for a first violation, pre-citation notice for the second, and administrative citation for the third. If no source is found and the trash is on private property the property owner may be held responsible for clean up and the City will pick it up if its in the public right of way. Regardless of the source, trash is typically picked up within one week or sooner depending on the potential to enter the storm drain.

Attached is the table of the City's trash "hot spots" relative to the watershed affected if the trash entered the storm drain system.

Santa Clara Valley
Urban Runoff
Pollution Prevention Program

Trash Problem Area Activity Report
FY 07-08

ID	Date	Location	Assessment Score		Recent Cleanup[1]	Adjacent Land Use[2]		Trash Source[3]			Three Most Prevalent Trash Types[4]			Estimated Volume of Trash Removed (if any)	Existing Management Actions	Recommended Management Actions and/or Future Evaluations
			KAB	RTA		1	2	1	2	3	1	2	3			
SC01	2/4/2008	French Street and Agate Drive	2	N/A	Yes	Residential – home	Residential – apartments	Litter – vehicular	Illegal dumping		Plastic/styrofoam	Biodegradable/paper		Approx 1/2 C.Y. every month	Routine inspections are conducted on a regular basis.	Continue evaluating for trash.

Staff Training Summary Table

Staff Training Summary

Fifty-three City employees attended stormwater pollution training in FY 07-08. The list of actual training events is contained in the legend of workshops in the notes section beneath the Staff Training Table.

Most employees felt that the trainings offered were relevant to their day-to-day jobs and were helpful. The City of Santa Clara will continue to provide stormwater pollution prevention training to its employees via seminars conducted by outside consultants and in-house training provided by Street Department personnel.

WEST VALLEY CLEAN WATER PROGRAM

September 15, 2008

Mr. Bruce Wolfe
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: FY2007-2008 Annual Report for
West Valley Communities Urban Runoff Management Program

Dear Mr. Wolfe:

This report is submitted by the West Valley Cities of Campbell, Monte Sereno, Saratoga, and the Town of Los Gatos, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal storm water NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY2007-2008 in accordance with the West Valley Communities' Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 2004 and the performance standards contained therein.

Contents of Report

The goals of this Annual Report are to: 1) concisely document implementation of URMP and FY07-08 Workplan; 2) evaluate program results for continuous improvement; 3) comply with permit requirements; and 4) share this information with other Co-permittees, municipal decision-makers, and the public. This report includes the following sections:

I. Preface
- Table of Contents
- Transmittal Letter with Program Highlights
- Certification Statement
- List of Acronyms

II. Program Elements
1. IC/ID Elimination Activities
2. Industrial / Commercial Discharger Control Program
3. Public Agency Activities
   - Storm Drain O & M
   - Street Sweeping
   - Corporation Yard
   - Rural Public Works
4. New Development: Planning Procedures
5. Construction Inspection
6. Public Information & Participation
7. Pesticide Management Activities
8. Mercury Pollution Prevention Activities
9. Copper Action Plan / Nickel Action Plan
10. Trash Inventory and Management
11. Water Quality Monitoring and Watershed Management

Training Summaries are provided at the end of each element

18041 Saratoga-Los Gatos Road • Monte Sereno, California 95030 • Tel: 408-354-4734 • Fax: 408-354-6284

PROGRAM HIGHLIGHTS AND ACCOMPLISHMENTS

During FY07-08, the West Valley Communities of Campbell, Los Gatos, Monte Sereno, and Saratoga continued efforts to implement their URMP to the maximum extent practicable.

- Established municipal programs, such as Storm Drain Maintenance and Cleaning, are working at mature, efficient levels and continue to indicate that overall pollution prevention efforts seem to be working, because less pollution is residing in or even reaching the storm drain system.
- The West Valley Communities also continue to benefit from its joint and robust public information program through the WV Clean Water Program (WV CWP). The WV CWP has built relationships with local schools and provides in-class stormwater pollution prevention presentations with a 3-D interactive 'Enviroscape' model. The hands-on presentation is very well received and after working with the model, the students are keenly aware of the connection between themselves and pollution making its way into creeks and the Bay. Very encouraging is an observed increase in student's willingness to participate in protecting the local creeks through their own clean-up efforts. One 'success' that can be attributed to a connection with the schools, is when water quality issues became of such interest to a student that it becomes integrated into a school project - a science fair entry. This student, who utilized the WV CWP as a resource for information, was recognized for his storm water pollution project all the way up to the State level of competition!
- The West Valley Communities remain committed to the watershed approach for preventing urban runoff pollution. Through the WV CWP, the WV Communities actively participate in SCVURPPP's many task groups, WEO and Trash Task Groups, as well as other related programs like the Silicon Valley Anti-Litter Campaign (SVALC).
- The proposed MRP was the focus of Managers and Staff discussions throughout FY07-08. Staff participated in many discussions through both SCVURPPP and professional associations in anticipation of the RWQCB's release of a Tentative Order in December 2007. Additional Staff effort was invested in meetings with SCVURPPP and peer groups for collaborative and coordinated topical submittal of comments on the draft Tentative Order, and in preparation for participation in the March 2008 RWQCB Hearing.
- Planning Staff continued participation with the SCVWD Water Collaborative through FY0708, and subsequently passed the Collaborative's work product 'Standards and Guidelines' for development along creeks early in 2008.
- Through WV CWP, the WV Communities continued to provide significant support for implementation of the "Green Gardener" program. In FY0708 the program was successful in completing its inaugural session at full capacity – in both English and Spanish!

Thank you in advance for your review of this Annual Report. Should there be any questions regarding the materials submitted, please contact me at 408.354.4734.

Respectfully,

Kelly Carroll

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

ILLICIT CONNECTION & ILLEGAL DUMPING ELIMINATION ACTIVITIES

FY 2007-2008 Work Plan Self Evaluation Matrix

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
	Program	a. ICID Standard Operating Procedure Updates Update SOPs and BMPs as changes occur per the Municipal Regional Permit and effectiveness evaluation. Provide staff training on revisions.	During the next FY the Illegal Discharge Enforcement Response Plan will be reviewed and updated if necessary.	WVCWP Manager
	URMP 2004	b. Response Program Continue to implement IC/ID Stormwater Discharge Inspector response program and evaluate for continuous improvement.	The WVCWP Inspector continues to conduct a centralized incident response and proactive restaurant and vehicle shop inspection program for the four West Valley communities. The Inspector follows up on all reports of potential stormwater violations and stormwater incident reports, including interagency referrals from Fire Dept. staff, DEH Inspectors, SCVWD, WVSD, and municipal staff.	WV Inspector
			SARATOGA: During FY 07-08 the WVCWP Inspector responded to 20 incident reports and 15 follow up visits (3 restaurant/food, 6 residential, 8 construction related, 4 commercial, and 14 public facility).	WVCWP Inspector
	IC/ID Perf Std	c. Standardized Reporting Report on incidents using categories consistent with SCVURPPP Program. Document follow-through to point of resolution or referral for enforcement action (penalty or fine).	All incidents are entered into the SCVURPPP Standard Database. Each incident is given a tracking number for documentation purposes. Multiple entries are made under the same tracking number to document all follow-up visits and actions.	WV Inspector
	WVCWP Inspector Training	d. Inspector Training IC/ID Inspector will attend workshops on various measures and methods to improve water quality and protect creeks from negative urban effects.	The IC/ID Inspector participated in the two hour US EPA Stormwater Program's Webcast Series on July 11, 2007. Topics covered included detecting and eliminating illicit discharges and to correct all illicit connections. On December 11, 2007, inspector attended the Public Agencies IPM Exchange seminar/field trip, in regard to ants	WV Inspector

			and squirrels at the Palo Alto STP and Golf Course. Attended Site Training on May 1, 2008 for the National River Cleanup Day (May 17, 2008). Topics covered included Site Coordinator Tip Sheet, Volunteer Orientation Script, Waiver of Liability Form, and Data Reporting Guidelines. Participated in Urban Runoff Inspection Training with Fire Department personnel on June 10, 2008. The training, conducted by the Senior Hazardous Materials Specialist, covered the County Permit with SF Bay RWQCB, and the cooperative efforts with County Fire, City of Campbell, Town of Los Gatos, and City of Saratoga. Other topics covered "Storm Drain, not Sewer Drain", Haz Mat permit, types of URP Facilities, how to perform the inspection, and how to contact WVCWP Inspector (business cards were distributed).	
	Municipal Staff Training	Municipal staff Training Conduct training & evaluation meeting between Storm Water Discharge Inspector and City staff, to improve interdepartmental procedures.	Assisted in WVCWP Street Maintenance and Storm Drain Supervisor Training on June 20, 2008. Topics covered included Current Municipal NPDES Permit Requirements, contacting and working with the WV Inspector on ICID calls and municipal responsibility for following up with clean up of pollution in the SD system, and Future MRP Requirements. The IC/ID Inspector conducted the annual Urban Runoff Food Facility Inspection Program training meeting with SC Co. DEH inspectors and City of Cupertino representatives; a total of twenty (20) people attended on April 22, 2008. The power point presentation covered topics including restaurant inspections, dumpster problems, WVSD's FOG (Fats, Oil and Grease), the inspector's referral process including IC/ID, IND, and NTC (Notice to Comply), and Fluorescent Light Bulb/Battery-safe disposal information. The cooperation and sharing of information involving all three	WV Inspector

IC/ID Program Evaluation: Saratoga

IC/ID Training

The multiple trainings that the WVCWP staff, and the municipal staff, attended have been quite effective in building relationships with the Fire Dept., DEH, and the Municipalities. Inspectors from the Fire Dept., DEH, and the Municipalities, continue to look for possible stormwater violations while they are on their field inspections. If the Inspectors from the Fire Dept., DEH, and the Municipalities, observe any potential stormwater violations they immediately contact the WVCWP Inspector. All interagency referrals are documented in the IC/ID reporting section.

Trend Analysis

In FY04-05 eleven (11) reported incidents were investigated. Residential and construction sites were the only two incident sources for all reported violations. Five (5) pool and spa discharges accounted for the number one IC/ID incident type reported in Saratoga in FY04-05. This was followed by two (2) tracking soil incidents and two (2) cement related discharges (concrete residue and unhardened cement). Pool and Spa incidents were clearly the most prevalent type of IC/ID problem being reported in the City. The remaining incident types (1 saw cut slurry and 1 vehicle/equipment leaking) were related to residential construction or remodeling projects. No other meaningful conclusions were noted.

Sa ga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

In FY05-06 the West Valley IC/ID inspector responded to twenty-one (21) reports of potential violations in Saratoga. Out of the 21 reports, ten (10) were the result of interdepartmental referrals and six (6) were the result of citizen complaints. In FY05-06, Six (6) pool and spa discharges were the most commonly reported incident types. Three (3) incidents were not found and one (1) was an allowable discharge. Three (3) inspections were related to illegal dumping. Two (2) equipment cleaning discharges were reported, one from a food facility and the other from a construction site. One incident was related to an oil and grease discharge which overflowed from a cleanout near three restaurants. This confirms the importance of educating restaurant owners on the need for regular grease trap maintenance. Additionally, two (2) accidental spills and one (1) hydraulic line break were reported. Other incident types were: one (1) grey water discharge, and one (1) miscellaneous construction incident. A notable trend was that Saratoga has a substantial number of pool discharges and construction related incidents.

In FY06-07 the West Valley IC/ID inspector responded to sixteen (16) reports of potential violations in Saratoga. Out of the 16 reports, eight (8) were the result of interdepartmental referrals and three (3) were the result of citizen complaints. The trend in 06-07 did not indicate any commonly reported incident types. Two (2) incidents were not found and two (2) were allowable discharge. In FY 05-06, a notable trend in Saratoga was the substantial number of pool discharges (6) and construction related incidents (6). In 06-07, there was significant reduction in these types of incidents; only one (1) pool and spa discharge, and three (3) construction site related incidents.

In FY07-08 the West Valley IC/ID inspector responded to twenty (20) reports of potential violations in Saratoga and fifteen (15) follow up calls. Four (4) of these were in a Commercial area, three (3) Food Facility, eight (8) Construction Site, six (6) Residential, and fourteen (14) Public Facility. This is a slight increase in incident related violation calls, from sixteen (16) in FY06-07. The West Valley inspector provided outreach and educational materials as appropriate during each incident response.

Enforcement action shows six (6) Referral for Enforcement. One incident was a mud slide on Hwy 9 which was referred to the SF Bay RWQCB. The other incident, raw sewage backing up into a parking garage behind a restaurant, has been referred to the City Attorney.

Under the heading Incident Status, the remaining thirty four (33) are Resolved/Closed.

IC/ID Inspections

ICID Date	Contact Name (Resp Party)	Facility Address	ICID Incident Report Source (Origin)	ICID Incident Source	ICID Incident Type	ICID Enforcement Action	Findings (Comments)	Status	Compliance Date
Accidental spills									
1/22/2008	Residence	18311 Baylor Av., Saratoga	Other agency	Commercial	Accidental spills	No Action	Capt. Jess, Fire Haz Mat called. Lawn fertilizer from Tru Green truck in gutter. Nothing got to SD. Fire put down pads to absorb and cleaned it up.	Incident - Resolved	1/22/2008
11/22/2007	Saratoga Avenue	Saratoga Av. @ Hwy 85, Saratoga	Interdepartmental	Commercial	Accidental spills	No Action	S.C.Co.Fire Haz Mat responded to a "chemical odor" call. Several small containers (1/2 gal.) of herbicides and fungicides had fallen from a landscape vehicle. All cleaned up with assistance of City Maint. Nothing got to SD.	Incident - Resolved	11/22/2007
6/20/2008	West Valley College	14000 Fruitvale Av., Saratoga	Other agency	Public facilities and Utilities	Accidental spills	No Action	Diesel fuel spill, approx. 40-60 gals. Spill contained w/sand and straw booms, and absorbents. Truck struck a piece of pipe protruding from ground, tore a 3"x6" hole in bottom of fuel tank.	Incident - Resolved	6/20/2008
Allowable discharge									
5/14/2008	Condo	14650 6th Street, Saratoga	Interdepartmental	Public facilities and Utilities	Allowable discharge	No Action	Rick got a call that they were draining their pool. False alarm. Rick called back. Dtwn. Assoc. waters flowers; forgot to turn water off. Not a pool, water only. Rick turned it off. See notes.	Incident - Resolved	5/14/2008
Complaint not found									
10/24/2007	Abandon House under construction	21045 Comer Dr., Saratoga	Interdepartmental	Construction Sites	Complaint not found	No Action	Water discharge coming down driveway. House under construction appears to have been abandon. Has been vacant about a year. No sprinklers in use. Vandals may have turned on water spicket located at top of driveway near locked gate. OK now.	Incident - Resolved	10/24/2007
5/16/2008	Kathryn Kennedy Winery	13180 Pierce Road, Saratoga 95070	Other	Commercial	Complaint not found	No Action	Compliance Review Request from Green Business, SC Co. No problems. Farm. No runoff. Grow grapes for winery. Nice people. Environ. concerned. AOK.	Non-Incident	5/16/2008
9/11/2007	Doug Boards	14910 Pierce Rd., Saratoga	Interdepartmental	Commercial	Complaint not found	No Action	Mr. Boards called Rick. Reported a tour bus dumping sewage. Rick investigated. Could find no evidence of any sewage spill.	Non-Incident	9/11/2007
Landscape material dumping									
7/26/2007	Storm Drain	Kane Ct., Saratoga	Other agency	Construction Sites	Landscape material dumping	Warning Notice	Storm drain had been recently cleaned by contractor. Took pictures of storm drain at site.	Incident - Resolved	7/26/2007
7/9/2007	Residence	20850 Michaels Dr. (across the street)	Interdepartmental	Construction Sites	Landscape material dumping	Verbal Notice	Landscaping. Some dirt got to creek.	Incident - Resolved	7/9/2007
Misc. incidents									
1/11/2008	Mud slide on Hwy 9	Just past Pierce Rd., Hwy 9, Saratoga	Illicit discharge inspectors	Other/unknown	Misc. incidents	Referral for Enforcement	Inspected area. CALTRANS is cleaning up dirt, rocks, mud from roadway and shoulder area. No tarps, said they would complete clean up today. Took pictures to document. Slide came from Mt. Winery property.	2nd Inspection Required	1/31/2008
1/14/2008	Mud slide on Hwy 9	Hwy 9, past Pierce Rd., Saratoga	Illicit discharge inspectors	Other/unknown	Misc. incidents	Referral for Enforcement	CALTRANS still working on clean up. Also, drove the access road (on Mt. Winery property) above slide area. Talked with two people who live further up road. Think Mt. Winery people have been working to clean out culvert which goes under road, after storm.	2nd Inspection Required	1/31/2008

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

Industrial/Commercial Program Evaluation

Fire Dept Inspections of Industrial / Commercial Facilities:

Of the 4 facilities inspected by the Fire Dept., no potential or actual violations were found and reported to the WVCWP for follow up. The list of violations is provided to WVCWP at the end of each fiscal year. The West Valley Inspector will schedule a training meeting with the Fire Dept Haz Mat Specialist in FY 08-09 to discuss further inspections of sites with reported violations during FY 07-08. The sites with previous violations will be prioritized for inspections at the beginning of FY 08-09.

After a steady stream of improvements and more communication between Fire Dept and WVCWP staff, the inspection program is prepared for maximum efficiency for the West Valley Cities in FY 08-09. When Saratoga was added to the Fire Dept Inspection Agreement for Campbell and Los Gatos (7/1/02), all West Valley facility inspections were coordinated under one umbrella. Monte Sereno does not conduct IND inspections because it has NO industrial or commercial facilities. Since 2001, WVCWP staff has met with Fire Dept staff at least twice a year to discuss standardized reporting, documentation and follow-up.

The West Valley Inspector's pro-active vehicle shop inspection program is designed to supplement Fire Dept facility inspections. Shop owners are made to realize the City's responsibility for making sure that the sites are in compliance with water quality requirements. The Inspector has made a positive impact with his visits and the distribution of educational materials depicting the right way to keep equipment, vehicle parts, and service areas covered, and all vehicle wash water managed properly. In a few cases the Inspector's meetings with vehicle shop owners have led to the facility's purchase of a wastewater capture system (noted in previous annual reports).

Annual Food Facility Inspection Training Meeting

Of the 93 facilities inspected by the DEH, no potential or actual violations were found and reported to the WVCWP for follow up. The Supervising Environmental Health Specialist at DEH had left and DEH was not always able to make the referrals to WVCWP due to staff shortage. However DEH has hired new staff and this will improve the coordination between DEH and WVCWP in FY 08-09.

On April 22,2008, DEH representatives met with the WVCWP Manager and Inspector. The importance of reporting all potential West Valley stormwater violations to the West Valley inspector was re-emphasized. Other topics covered at this meeting were (1) Updated contact information (2) How to report urban runoff violations to municipal inspectors to ensure accurate tracking and follow up (3) Feedback on the effectiveness of outreach and educational handouts (4) Reminder to distribute pesticide reduction fact sheets called "Don't Set a Table for Pests" to restaurants.

During FY 07-08 the West Valley Inspector continued a more aggressive effort to alert restaurants to the need for regular grease interceptor maintenance and record keeping. The WVCWP Inspector and the West Valley Sanitation District's Director of Operations continue to have discussions regarding grease interceptor maintenance records and related issues. The Sanitation District is notified if the records are not available. At the April 22, 2008 meeting, the West Valley Inspector again suggested that Environmental Health Specialists look for grease trap maintenance records during their restaurant inspections.

Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

			Topics Covered Included: Review of SWPPP, Proper Spill Handling/Cleanup, Secondary Containment, Vehicle Washing, Training, Record Keeping, and Storage of Pesticides, Street Sweeping Data, E-waste Drop-off Sites, Requirements concerning Disposal and Record Keeping for Products Containing Mercury.	

Public Agency Activities: Operations and Maintenance Evaluation

Storm Drain Maintenance: In FY 07-08, West Valley Sanitation District (WVSD) provided its third enhanced annual report to the cities on storm drain cleaning. Since June 2007 the reports have listed the structures that were inspected and cleaned with the maintenance crew's findings. A total of 1,112 structures were inspected.

- Of those inspected, 937 were found without any debris and were noted as "clean."
- Of those inspected, 175 had some visible debris upon inspection.
- Of those 175 that had visible debris, 27 had 10 pounds or more of debris and required cleaning
- Of the 27 storm drains that required cleaning, 21 required excessive/additional (50Lbs+) cleaning

Storm Drain Stencils: Saratoga's storm drain signage is replaced if it becomes worn, or bent (if it is metal). The City primarily uses painted stencils because they are easy to apply, they can be installed on horizontal surfaces (unlike the thermoplastic stencils) and the savings in staff time and cost of stencils is substantial. The metal plates, previously installed by the WV communities, are no longer applied because they were problematic. The Streets Supervisor considers new methods and materials for storm drain signage as they are introduced to the market. He is willing to pilot new plaques or signage materials if they are deemed practicable based on his experience and the results of previous West Valley pilots. Santa Clara County staff asked the WVCs for a recommendation on where to purchase metal plaques similar to those previously installed by the West Valley Cities. West Valley reported that municipal staff have discontinued application of the metal plaques because the sharp edges have a potential to get caught in street sweepers and bend, creating a potential to injure pedestrians or bicyclists. Replacing the plaques was also a problem. When plaques came loose or were removed, concrete chunks crumbled from the curb with the screws (used for attaching the plaques) making replacement in the same spot impossible.

Street Sweeping: The City collected 769.25 cubic yards of debris in FY07-08. In FY05-06 one month's worth of data was not tracked because the City changed contractors. FY06-07 miles swept are the same as the number of curb miles swept in FY04-05.

Yard Waste - Curbside Collection and Recycling: The West Valley yard waste recycling program reduces the amount of debris that gets into the storm drain, since leaves are collected in oversized bins rather than being stored in the street. In FY 07-08, the total yard waste collected rose sharply from the previous two years for all West Valley cities. The reason for the increase is due to the garbage collection service's reporting methods. The totals were given for all diverted waste. Totals for yard waste recycled were not provided. The WVCWP asked the garbage collection company to provide separate yard waste totals for FY 08-09. In FY06-07, the total yard waste collected was down sharply from the previous two years for all West Valley cities. The reason for the decrease is not apparent without reviewing the data collected for the previous years and the garbage collection companies' tracking methods. There are a few factors that would contribute to the drop. 1) The data for February 2007 was not reported for West Valley cities due to a change in service contractors; 2) There might be a significant difference in methods used by the two different contractors to collect data; 3) City crews provide some additional, unscheduled leaf and tree limb removal, which is not tracked. 4) The annual weather might be a consideration because yard waste collection is determined by the amount of debris residents generate from yard maintenance and tree trimming. Some years have stormier weather producing more fallout from trees and a greater need to dispose of branch material. The new garbage & recycling company will be asked about their methods of

Training Evaluation: The WVCWP Storm Drain Maintenance Workshop (6/20/08) drew more staff participation this year. Municipal staff evaluated the

workshop as having "All useful and pertinent information." Another response noted, "Today a new topic was covered about full capture. I would like to learn new BMP's in the future". It was evident that BMPs are being used by municipal staff but there was some frustration among street and park maintenance workers because they don't have enough authority to convince residents and private contractors to keep pollutants from reaching the storm drain system. The WVCWP Inspector offered his card to all attendees and requested that they report any incidents to him for immediate follow-up. One challenge is to catch the violator in the act of allowing pollutants into the storm drain system. By the time the incident, or the result of the incident, is seen it is often too late to stop it. The maintenance crews are generally called to clean up spills. Attendees requested continued updates on the MRP requirements for storm drain maintenance and street sweeping practices. Several of the attendees stayed after the workshop for additional discussion among the cities.

Training	FY07-08 Work Plan	Appropriate municipal staff or contracted staff will receive annual training on the use of current BMPs and SOPs, as noted in the performance standard. BMPs and SOPs may be reviewed as part of the annual WVCWP Street Maintenance Supervisors meeting.	**SARATOGA:** City of Saratoga Staff attended the Streets and Storm Drains Maintenance Workshop on June 20th, 2008. Erosion control along roads was one of the topics covered. Staff are knowledgeable about BMP's and erosion control procedures for RPW; therefore, specific training on this topic was not conducted in FY 07-08.	PW Admin Analyst/ City Engineer / Streets Maint Spvsr

Rural Public Works Activities Program Evaluation

Stormwater BMPs are currently discussed in pre-construction meetings with contractors; the City inspects all contracted rural public works in its jurisdiction and ensures the use of stormwater quality and erosion control BMPs. No capital improvement projects involving Rural Public Works were conducted this year. When future construction of Rural Public Works takes place, measures will be implemented for erosion prevention.

153 cubic yards
Annual Combined Total
769.25 cubic yards

Yard Waste Recycled

FY05-06: An annual total of **10,771.5 tons** of yard waste was picked up by garbage collection service during FY 05-06.

FY06-07 Residents and businesses recycled 5,957.66 tons of yard waste using Waste Management garbage collection service from July '06 to the end of January '07. In March the West Valley Cities changed contractors; the total amount of yard waste recycled using West Valley Collection and Recycling from 3/1 to 6/30 2007 was reported as 3,924 tons for a combined **total of 9,881.66 tons.** City crews also picked up 200 cubic yards of leaves and tree debris.

FY07-08: An annual total of **24,898 tons** of diverted waste was picked up by garbage collection service. *

* Diverted waste totals are not representative of yard waste collected. Diverted waste totals include all waste that is diverted from landfills. The WVCWP asked the garbage collection company to submit separate totals for yard waste collected for FY 08-09.

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
Devlopmt Project Implement-ation	C.3.c.	As appropriate, revise guidance, website, procedures, and/or conditions of approval to facilitate implementation of development project requirements per the MRP.	C.3 guidance for all WV cities was revised and posted prior to 8/15/06 to include Group 2b projects, based upon current requirements. Updates to guidance documents, conditions of approval or other procedures will occur as needed, when MRP is adopted.	
			SARATOGA: In FY06-07 Saratoga created forms for the project applicant to complete and municipal planners or the City Engineer to verify. The City of Saratoga continued to use these forms in FY 07-08. The forms were update in May 2008. Green Building Techniques Materials and Strategies, Green Points Checklist, and the Storm Water Checklist were all added to the form. The Stormwater Treatment Measure Details form includes a check box to indicate that the applicant has prepared, signed and recorded the necessary covenant for ongoing maintenance and operation of stormwater treatment measures. The check box also conveys that the applicant has ensured that responsible public agency staff will have access to inspect the structured stormwater measures in perpetuity.	City Eng, PW Analyst, & WVCWP Mgr

FY 2007-2008 ANNUAL REPORT

C.3.f Hydromodification Management Plan				
Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
HMP – Hydrograph Modification Mngmt Plan	C.3.f	City staff will continue to track HMP progress and implement its requirements as applicable for qualified Group 1 projects that may cause increased erosion or other related impacts.	SARATOGA: Saratoga implemented the HMP for Group 1 projects on Oct 20, 2005. In FY06-07 Saratoga's PW Analyst and the City Attorney's NPDES Specialist produced development worksheets for Planning, Engineering staff to review with private developers. The worksheets include the criteria for HMP requirements and the specifics for HMP implementation. The worksheets were updated in May, 2008. There were no HMP-regulated projects in Saratoga in FY 07-08.	City Engineer
Training		Continue to provide incremental training on HMP requirements to City staff after adoption of the MRP via SCVURPPP workshops and/or WVCWP in-house staff training.	To stay informed of the most recent HMP developments, the WVCWP Mgr participates in the C3PO AHTG meetings. Proposed revisions to the HMP were reviewed during the West Valley Communities' round table discussions regarding the draft MRP in December 06 and June 07. To stay informed of the most recent HMP developments, the WVCWP Mgr attended HMP Briefing Meeting September 18th, 2007.	SCVURPPP/ City Engineer; WVCWP to coordinate
HMP Reporting	C.3.f.viii	Summarize development and implementation status for projects incorporating HMP measures and provide details to WVCWP staff for Annual Report.	SARATOGA: City of Saratoga did not have any projects which meet the criteria for required HMP implementation during FY 07-08.	City Engineer

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

C.3.g Waiver and Compensatory Mitigation Program				
Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
Waiver Program or Alternate Compliance	Permit C.3.g.	Currently Municipality does not offer an alternate compliance option to developers of Group 1 or Group 2 projects. No changes are expected to this approach in FY 07-08 unless regional watershed projects become available to support.	SARATOGA: All Group 1 and Group 2 projects are required to implement C3 requirements. Currently, the City does not offer an alternate compliance option to developers.	City Engineer
C.3.h Alternate Certification				
Alternate Certification reporting	Permit C.3.h	Report on all projects that are certified by someone other than municipal staff and the mechanism for ensuring outside certifiers are qualified.	SARATOGA: The project applicant is responsible for having all stormwater measures certified for adequacy, according to the C.3 requirements. The City uses lists approved by the City of Sunnyvale and BASMAA to determine which civil engineers are qualified and allowed to certify C.3 compliance for private development projects. Saratoga did not approve any Group 1 or Group 2 projects for construction or grading in FY07-08.	City Engineer
C.3.I General Plan Update				
General Plan	Permit C.3.I	At next planned update, revise General Plan to reflect principles and policies to address requirements for development projects.	SARATOGA: During FY06-07 the City completed approximately 18 months of research to prepare for updates to the City's General Plan. The City dedicated significant staff resources to include language in the General Plan that will clarify goals and guidance to attain water quality benefits as part of the development project approval process. Saratoga's General Plan was approved on June 6, 2007.	Comm. Dev. Dept.

Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

C.3.n Reporting Requirements

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
C3 Project Reporting	Permit C.3.n.i.	Report details required by the Permit for all Group 1 and Group 2 projects that received final approval for construction during FY07-08. E.g. list project name, location, type, deemed complete date, final approval date prior to grading, project size, amt impervious surface, watershed, developer name and S/W measures and treatments used.	SARATOGA: No projects in the Group 1 or 2 categories were approved or submitted this year.	City Eng & PW Analyst to provide data
C3 Project Reporting	Permit C.3.n.ii.	For Group 1 and Group 2 projects, provide details in the annual report on the S/W treatments used, the sizing criteria, O&M verification status, any follow-up action, site design measures used, source control measures used and pesticide reduction measures required.	SARATOGA: No projects in the Group 1 or 2 categories were approved or submitted this year.	City Eng & PW Analyst provide data to WVCWP staff
Report Pesticide Reduction Measures	NPDES Permit Provision C.3.n.iii	For Group 1 and Group 2 projects, report on the percentage of projects for which pesticide reduction measures were required.	SARATOGA: As part of the Group 1 and Group 2 project approval process, a Planner informs applicants that the City is implementing a "Pesticide Management Plan." Applicants must review and comply with BMPs contained in the informational document 'Landscape Maintenance Techniques for Pest Reduction,' provided to them and reviewed as part of a check-off list within the City's new Development Worksheet. As a condition of approval, applicants must not allow fertilizers or pesticides to be washed to the storm drains or to be buried in soil during construction. Applicants must reuse, recycle or properly dispose of these products as hazardous waste. Saratoga's General Plan, approved 6-6-07, states that the use of native draught-tolerant vegetation will be a condition of approval for projects that include prospective landscaping, whenever feasible.	City Eng & PW Analyst provide data to WVCWP staff

Sa. ga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

Planning Procedures Evaluation

Public Works staff continue to coordinate very closely with the Community Development Department to ensure that all development projects are conditioned properly for storm water quality requirements. In addition, Public Works staff assists developers and their design team members with C.3 technical and legal issues (specifically bio-swale design and the BMP O&M agreement). For projects requiring bio-swales, the Associate Engineer provides the developer with design drawings. The City has received positive feedback from developers, who appreciate knowing exactly what the City wants and seeing detailed examples. Public Works and Building staff made the decision to use City Engineering staff, instead of an outside consultant, to perform BMP O&M Verification inspections (to date, none have been needed).

Group 1 and Group 2 Projects - The City of Saratoga requires developers to design and implement the following measures to reduce stormwater pollution to the maximum extent practicable.

Site design shall include measures to minimize impervious land coverage, maximize infiltration (where appropriate and designed to protect

a. groundwater quality), and provide detention or retention as part of landscaping where feasible;
b. Source controls shall be required to limit pollution generation, discharge, and runoff as appropriate, including measures to discourage pesticide use;
c. Stormwater treatment measures shall be designed in accordance with the numeric design criteria in Provision C.3.d;
d. Continued operation and maintenance of BMP treatments shall be ensured by the developer and future property owners by legal covenant and continued O&M of BMP treatments shall be inspected by Saratoga Engineering staff.
e. Increases in peak runoff flow and volume shall be managed for appropriate projects by implementing the guidance in the Program's Hydromodification Management Plan (HMP) for the specific stream receiving the discharge.

Pesticide Reduction

1. Where feasible, landscaping shall be designed and operated to treat storm water runoff by incorporating elements that collect, detain and infiltrate runoff. In areas that provide detention of water, plants that are tolerant of saturated soil conditions and prolong exposure to water shall be specified.
2. Pest resistant landscaping plants shall be considered for use throughout the landscaped area, especially along any "hardscaped" area.
3. Plant materials selected shall be appropriate to site specific characteristics such as soil type, topography, climate, amount and timing of sunlight, prevailing winds, rainfall, air movement, patterns of land use, ecological consistency and plant interactions to ensure successful establishment.
4. Existing native trees, shrubs, and ground cover shall be retained and incorporated into the landscape plan to the maximum extent possible.
5. Proper maintenance of landscaping, with minimal pesticide use, shall be the responsibility of the property owner.

In FY07-08 the City of Saratoga participated in the Water Resources Protection Collaborative. The Collaborative was enacted in an effort to clarify and streamline local permitting for streamside activities, representatives from the water district, cities, the county and business, agriculture, streamside property owner and environmental interests created a partnership known as the Water Resources Protection Collaborative. The approach makes a clear distinction regarding governance. Municipal organizations will continue to exercise their land use authority. The Collaborative developed model Guidelines and Standards which will serve as a basis for the District and municipal organizations to implement as appropriate. Each municipal organization will develop and apply these standards as needed for their jurisdiction. The City of Saratoga adopted these guidelines in May of 2008.

FY 2007-2008 Work Plan Self Evaluation Matrix

Source	WP Task	Work Plan Tasks	Accomplishments	Responsible Party
	URMP	Staff Training Participate in and support RWQCB and Program- sponsored workshops on erosion control and construction BMPs; support distribution of related materials. Construction inspectors must attend Erosion Control and Site Inspection Meeting every two years.	**SARATOGA:** On June 27, 2007, a construction inspection training meeting was held for Saratoga inspectors. Saratoga's Construction Inspector must attend a workshop/training in FY 08-09 since the inspectors are required to attend every two years.	WVCWP to coord w/ SCVURPPP; Const & Bldg Insp attend
	URMP	Construction Inspections Continue construction site inspections and follow-up for stormwater issues (i.e., mud tracking, mat'l storage, housekeeping, etc.). Document sites inspected and note any violations through final resolution. Report violations to WVCWP for Annual Report.	**SARATOGA:** During FY 07-08, Saratoga's Building Department issued 1542 permits for various construction activities. City Building Inspectors attempt to ensure that all construction projects are compliant with the BMPs and guidelines specified in the City's Construction Inspection Performance Standard. Of those 1542 construction permits, roughly 340 required close monitoring by City Inspectors. These included 10 stand alone grading projects, 23 new single family dwellings and 110 significant additions to single family dwellings, as well as swimming pools demolitions, basement additions and other significant remodeling/renovation projects. It should be noted that Saratoga Inspectors also pay close attention to projects that don't require City approved permits such as landscaping projects and driveway installations. Projects that were problematic received daily drive-by spot checks by City inspectors. Projects that were clearly well controlled were inspected at least every 2 weeks during the rainy season.	Const and Bldg Inspectors WV Inspector by referral

Saratoga

FY 2007-2008 ANNUAL REPORT

FY0708 Construction Inspection Evaluation Saratoga

Construction Site evaluation:

FY 07-08		FY 06-07	
Landscape	2	Accident	1
Slurry/Cement Discharge	5	Allowable Discharge	1
Complaint Not Found	1	Grey Water Discharge	1
Pools & Spas Discharge		Pools & Spas Discharge	1
	8	Slurry Discharge	1
			5

The Construction Inspection Program is working well due to the continued, coordinated efforts between the City's building inspectors and the WVCWP Inspector and Manager. Potential incidents reported by other agency staff or citizens, are inspected and re-inspected until resolution is achieved. In FY0708, WVCWP Inspector responded to eight (8) construction-related incident calls for Saratoga. Saratoga's inspectors are always on the lookout for stormwater concerns and continue to education contractors and visit sites often. Public Outreach to residents and educational visits from the WVCWP Inspector appears to be helping to maintain a limited number of contractor violations. Generally the most common incident in Saratoga is not related to construction, but to pool drainage. However, the City made a concentrated effort in the past 2 years to distribute pool brochures to all new owners, including a mail-out to all pool owners in FY04-05. The pool brochure is also on display at the City's planning counter.

Construction Site & Erosion Control Training – Building Inspectors are already committed to attending SCVURPPP's annual Construction Inspector Training, which is scheduled for Fall/Winter 2008. This is in line with Saratoga's commitment to train inspectors every 2 years. Last year, in June 2007, a construction inspection training meeting was held for Saratoga inspectors such that the newly hired a new building inspector would be included. The Construction Inspection Training Table is attached to this section. Several WV meetings and municipal training sessions were held to discuss BMPs, URMP and upcoming MRP requirements and documentation of inspection activities. Continued public outreach efforts and further training and communication among municipal inspection staff and WVCWP staff have served to develop a coordinated and effective construction inspection program in Saratoga.

Training Summary: Construction Inspection

Training Description	Date	Attendees
Construction Site Management Workshop Monday, December 3 (targeted for municipal staff) or Tueday December 4, 2007 (targeted for contractors) Quinlan Community Center, 10185 N. Stelling Road, Cupertino, CA, 95014 or October 31, 2007 at the Green Building Exchange, 305 Main Street, Redwood City, 8:00 am – 3:00 pm **By**: SCVURPP, SFEP, SF RWQCB and Friends of the Estuary **Speakers:** Jill Bicknell, Santa Clara Valley Urban Runoff, Cecil Felix, San Francisco Regional Water Quality Control Board, Scott Taylor, RBF Consulting, **Topics included:** Construction site regulations & responsibilities; effective erosion and sediment control BMPs, inspection, monitoring and sampling; site plan update procedures; post construction requirements; vendor exposition; and a demonstration site visit; Proper Erosion Control Techniques, Grading, Proper use of Waddles, and Storage of Hazardous Materials	Monday, December 3 (targeted for municipal staff) or Tueday December 4, 2007 (targeted for contractors) or October 31, 2007	**WVCWP (2)** WVCWP Manager WVCWP Assistant **Campbell (3)** Sr Engineer 2 PW/Engineer Staff **Saratoga (2)** 2 PW/ Building Staff
Construction General Permit Workshop **Speakers:** SCVURPPP Staff **Topics:** workshop to inform municipal staff about the requirements in the draft Construction General Permit.	April 30, 2008	**Campbell (1)** Sr. Engineer
SCVURPPP Annual C. 3. Workshop: "Sharing Experience with Implementation of Stormwater Requirements at Development Projects" Tuesday, June 3, 2008 Sunnyvale Community Center Ballroom 550 E Remington Drive, Sunnyvale 8:30 am – 3:30 pm **By:** SCVURPPP **Speakers:** J. Bicknell, EOA/ SCVURPPP; S. MA, SF RWQCB; E. Anderson, City of Mt. View; T. Berger, City of Fremont; others **Topics covered:** Low Impact Development; comparison between Green Building and C.3. Requirements; and a panel presentation on implementing stormwater requirements at local new and redevelopment projects; inspection of stormwater treatment measures during and after construction; inspection and maintenance of landscaping in stormwater treatment measures; and local agency experience with BMP O&M inspections of treatment BMP's.	Tuesday June 3, 2008	**WVCWP (2)** WVCWP Manager WVCWP assistant **Campbell (2)** PW Inspector Sr. Engineer **Los Gatos (3)** Building Inspector Asst. Planner **Saratoga (2)** Senior Engineer Asst. Planner

FY 2007-2008 ANNUAL REPORT

PUBLIC INFORMATION/PARTICIPATION

Work Plan Self Evaluation Matrix

Source	WP Task	FY07-08 Work Plan Tasks	FY 07-08 Accomplishments	Responsible Party
A. SCV PROGRAM - PROJECTS/SUPPORT				
	NPDES Permit, Provision C.4, C.9 & Pest Mgt Plan (PMP)	a. Watershed Education and Outreach Campaign Help to develop/implement ongoing watershed education and outreach campaign. WVCWP Mgr assists via WEO Ad hoc Task Group. Participate in campaign development and special projects, e.g. community events. Campaign will include funding for educational programs at the Alviso Ed Center and funding for ZunZun performances in local schools. See SCVURPPP FY07-08 Watershed Watch Work Plan for details.	WVCWP Pgm Mgr assists via participation in the Watershed Education and Outreach Ad Hoc Task Group. WVCWCP helped plan and implement the Watershed Watch campaign, aimed at IPM and Mercury Pollution Prevention, in the fall of 2007. *Watershed Watch Media Campaign* The FY07-08 campaign featured ongoing IPM and Mercury ads in community newspapers. The WV communities, (along with 3 other cities and the County Integrated Waste Mgmt Division) contributed additional funds towards local media buys. WVCWP regularly provided staff support for Program outreach events. *Haunt the Hollow Halloween Event on Sunday 10/28/07* 1 WVCWP staff member & 1 WVCWP volunteer assisted at this event wearing costumes, they handed out educational materials and gave visitors an opportunity to complete a watershed survey. The survey had two questions one regarding fluorescent light disposal and the other pertaining to the treatment or lack of treatment of water that flows down the storm drain. The completed surveys were collected and tallied. Surveys with contact information were entered in a drawing. Two winners each received two tickets to Gilroy Gardens. The theme park is a Watershed Watch partner.	WVCWP Staff

Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

	NPDES Permit, Provision C.4, C.9 & Pest Mgt Plan (PMP)	b. Pesticide User Outreach Project Continue to provide funding and to participate in Our Water Our World IPM Store Partnership. Project scope will include items in Program's Pesticide Management Plan based on provision c.9.d of the Permit for outreach to residents, commercial businesses, and pest control operators.	Campbell Clean up Event Saturday April 12, 2008 In conjunction with Great American Pick-up and Keep California Beautiful For more information visit http://www.ci.campbell.ca.us/General/CommunityCleanup/CommunityCleanup.htm	WVCWP Staff
	NPDES Permit, Provision C.9.c.	c. Mercury Pollution Prevention Outreach Participate in the Program's Mercury Pollution Prevention Outreach Work Group and conduct local implementation of the Program's Mercury Pollution Prevention Plan including public education on: 1) negative health and environmental impacts of mercury, and 2) proper disposal of products containing mercury.	1-9-08: Three (3) HHW Mercury brochures were given to St Mary's 5th grade teacher, in Los Gatos to show students and parents some convenient drop-off locations for mercury bulbs and batteries. 1.25 hour long Watershed presentation was provided to 35 students by WVCWP staff with specific focus on the dangers of mercury waste in our watershed and the proper disposal of mercury containing items such as fluorescent bulbs. ********** Campbell Clean up Event Saturday April 12, 2008 In conjunction with Great American Pick-up and Keep California Beautiful For more information visit http://www.ci.campbell.ca.us/General/CommunityCleanup/CommunityCleanup.htm ********** St. Mary's School, Los Gatos –Presentations for kindergarten classes on 5-6 -08 ********** Urban Runoff Food Facility Inspection Program Annual Meeting April 22, 2008 9:00AM- 10:00AM Refer to IND Training for full summary.	WVCWP Staff

Public Information/Participation Program EVALUATION - *SCV Program Projects/Support*

Pesticide User Outreach - STORE PARTNERSHIP:
Managers of Summerwinds Garden Center in Campbell have shown their interest in less toxic products. Summerwinds' store management chose to participate in the IPM store partnership. A consultant representing SCVURPPP's Watershed Watch and OWOW campaigns worked with the Campbell store to increase shelf space and display exposure for the promotion of less-toxic products.
SCVURPPP's Watershed Watch procured a partnership with: local nursery (Yamagami's), 2 car wash companies (w/ total of at least 6 locations), paint store (Kelly Moore) and local park/zoo (Happy Hollow) to participate in annual Discount Card Program. The Watershed Watch Discount Cards were distributed by SCVURPPP to patrons of Classic Car washes over 2hrs on four consecutive Wednesdays in May/June. WV CWP distributed Cards at the April 26 National River Clean-up Day (75 cards), Los Gatos Public Works Open House (30 cards) and to PW Staff who attended the annual SD & Street Maintenance Supervisors Training Meeting (20 cards).

B. WVCWP PROJECTS

GENERAL OUTREACH

General	NPDES Permit, Provision C.4 and C.9	a. Distribute Materials. Distribute public information materials at civic centers, libraries, building and planning department counters and similar venues. Maintain a website (and phone request line) for public requests and distribution of materials.	July 9, 07 contacted Nancy Higgins, instructor for Community Education course on organic gardening for residents. Delivered materials for 2 classes, one in Campbell and one in Los Gatos. Provided 2 Site Design Guidelines books featuring pervious surfaces for driveways and patios and rain gutter downspouts directed to landscaping. Provided Grow It Guides, OWOW pocket guides for natural pest control and other about 40 – 50 copies of smaller ed material. Nancy requested an Enviroscape Presentation for her adult ed classes. Will arrange is time is permitted away from AR ********** Haunt the Hollow EVENT 10-28-07 1 Master Gardener; 150 HHW English; 11 Mercury; 300 Environmental News Quiz; 30 Gutter Getters; 2 Diazinon; 20 Our Water Our Word Magnets; 50 Watershed Watch Discount Car Wash Coupons	WVCWP Staff

			annual clean-up event. ********** Advertisements for the "National River Cleanup Day" appeared in the Saratoga News, LG Weekly & Campbell Reporter during May 2008, funded via Creek Connections Action Group ********** Advertisement for E-waste collection at Rolling Hills Middle School appeared in the October 9th, 2007 edition of the Los Gatos Weekly Time. ********** News article entitled "Got e-waste? Dump it for free." appeared in the February 19, 2008 edition of the Los Gatos Weekly Times. The article described the electronic waste event that was scheduled to take place on February 23rd in the Whole Foods parking lot in Los Gatos. ********** Newspaper article entitled "Get Your Green On" appeared in the April 15th, 2008 edition of the Saratoga News. The article gave information on the upcoming Los Gatos Environmental Festival to be held on April 19th, 2008. ********** A news article entitled "Garage Sale to feature 220-plus sites" appeared in the May 13th, 2008 edition of the Los Gatos Weekly Times and advertisement in May 6, 2008 Saratoga News. The article/ ad highlighted the upcoming, Community-wide, garage sale that will have an impact on trash reduction efforts. ********** News article entitled " Local Mayors Think Globally, Act Locally With Green Leaf Effort" appeared in the July 10th, 2008 edition of the Saratoga News	
General	CI Item	d. WVCWP Web-Site Maintain and promote cleancreeks.org website; continue to expand and update the site with new educational material and up-to-date topics for the public on HHW,	Promote WVCWP website (www.cleancreeks.org) via distribution of the popular recycled (blue-jean and money) pencils with imprintedwebsite address and a watershed protection message, at community events and classroom presentations.	WVCWP Staff

		pest management, and other pollutant reduction activities, e.g. for mercury, trash, & copper /nickel	WWW.cleancreeks.org was included on all outreach materials i.e., flyers, the community event banner, and written or email responses to public inquiries and calls. WVCWP posts information about Trash Cleanups for National River Clean Up Day and Coastal Clean Up Day on the website Home Page to announce these events. Mercury and Copper issues were featured prior to the April E-waste event. The "Take Action" page was revised to include links to the UC Davis IPM site for residents interested in less toxic pest control. In addition, the page now highlights the question of home and garden chemicals' safety, with links to sites on toxicity information.	
			The City of Campbell posted "Top Ten Development Tips to Protect Creeks" in February of 2008 to its municipal information page for developers; Campbell also updated posts for stormwater checklist and construction trifolds.	
			Los Gatos posted several pages and links related to 'Los Gatos Beautiful' Events (in conjunction with Earth and Arbor Days) – posted on home page late winter/early spring 2008; Updated links to Electronic Recycling events and new link to 'grow greener' tips.

CITIZEN PARTICIPATION				
Public Partici-pation	Trash Monitoring Work Plan	e. Creek Clean-ups Continue implementation of trash monitoring activity during Creek Clean-ups. Conduct a minimum of two clean-up events per yr (i.e. on Coastal Clean-up Day and National Rivers Day).	San Tomas Aquino Creek Clean up @ Westmont High Saturday September 15, 2007 International Coastal Cleanup Day ********** Saratoga Creek Cleanup Event Saturday September 29th , 2007 ********** Great American Pick-up and Keep California Beautiful Campbell Clean up Event Saturday April 12, 2008 ********** National Rivers Day Lexington Reservoir Cleanup @ Lexington Reservoir Launch Ramp Lot Saturday May 17th , 2008 ********** Add'l Citizen Participation: Cleanup of Saratoga-Sunnyvale Rd from Big Basin Way to Herriman (Sar High School) by resident who has collected 8 bags of trash on 3 Saturdays; WVCWP agreed to make presentation for student's class at Argonaut School and a preview of the Watershed presentation at a school assembly in 07-08 school year	WVCWP Staff
Public Partici-pation	Creek Keepers Campaign started FY00-01	f. "Creek Keepers" Program training Provide training on trash tallying and highlight current trash pollution issues for students and volunteers when they participate in a cleanup event.	Volunteers at the following events were trained on Trash Monitoring. Volunteers proceeded in groups, with some participants filling out the monitoring forms, while their partners picked up the litter: San Tomas Aquino Creek Clean up @ Westmont High Saturday September 15, 2007 International Coastal Cleanup Day Saratoga Creek Cleanup Event Saturday September 29th , 2007 Lexington Reservoir Cleanup @ Lexington Reservoir Launch Ramp Lot Saturday May 17th , 2008	WVCWP Staff

			In conjunction with National Rivers Day	
TARGETED OUTREACH & SCHOOLS				
Target Schools	Expand Outreach to Teachers and Students	g. Schools Outreach: Watershed Ed. Curriculum Continue to build on 5th grade curriculum for WVCWP classroom watershed presentations, consistent with state required education standards. Expand outreach efforts by developing scripts based on state standards, or text books, for other grade levels in response to teacher interest. Evaluate effectiveness and appeal by soliciting teachers' & students' evaluations.	Development of an appropriate script for Kindergarten students was a focus of the 07-08 outreach efforts. The interactive presentations developed for the Kindergarten classes were well-received by teachers and students. Cumberland Elementary, Sunnyvale 10-30-07 30 5th grade students participated in demonstrations and activities. ********** Casa Di Mir Montessori School, Campbell – Presentations for 6-12 year-olds on 2-13-08 ********** Queen of Apostles Private Elementary School – Presentations for 4th and 5th grade science classes on 4-4-08; 70 students, approximately 35 4th graders and 35 5th graders, from the science classes, participated in Enviroscape presentations ********** St. Mary's School, Los Gatos –Presentations for kindergarten classes on 5-6-08; 40 students, approximately 20 in each section.	WVCWP Staff
Target Schools	Based on feedback from Teachers and Students	h. Provide Watershed Education in classrooms Conduct water quality protection education or presentations in local schools, using *Enviroscape* and/or other methods to engage students in Watershed campaign messages. Improve presentation format based on teacher/student feedback.	Cumberland Elementary, Sunnnyvale 10-30-07 30 5th grade students participated in demonstrations and activities. Using 2 simple models, Two WVCWP staff, working with Environmental Volunteers docents, demonstrated the role of the Water Cycle and a participated in an experiment showing how water evaporates and how condensation occurs by using a hot plate, salt water and ice cubes. Second demonstration was a water density kit with a experiment using an egg to show the difference in density between fresh and salt water. ********** Casa Di Mir Montessori School, Campbell – Presentations for 6-12 year-olds on 2-13-08; Approximately 50 students	WVCWP Staff by arrangement w/ Teachers

Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

			between ages 6-12 participated in Water Conservation Day at Casa Di Mir Montessori School. The Director of the Federation of Fly Fishers gave a presentation on water resources and conservation. Montessori School invited the WVCWP to present on watersheds. The WVCWP gave two presentations about urban run-off, pollutants and trash in the Southern San Francisco Bay watershed. The Enviroscape was used to demonstrate urban run-off. ********** Queen of Apostles Private Elementary School – Presentations for 4th and 5th grade science classes on 4-4-08; 70 students, approximately 35 4th graders and 35 5th graders, from the science classes, participated in Enviroscape presentations to learn about reduction of pesticides, proper car washing techniques, erosion control, litter prevention and trash cleanup, safe disposal of HHW. Two separate presentations were given with approximately 35 students in each. School staff videotaped the presentations. The WVCWP distributed 20 T-shirts, 70 pencils, 4 hats, 5 visors, 2 water bottles, 10 "No Dumping" placards, and 4 gutter getters. ********** St. Mary's School, Los Gatos –Presentations for kindergarten classes on 5-6-08; 40 students, approximately 20 in each section. Two Enviroscape presentations were given to educate the students about reduction of pesticides, proper car washing techniques, erosion control, litter prevention and trash cleanup, safe disposal of HHW. The WVCWP distributed 3 T-shirts, 40 pencils, 10 magnets, 4 puzzles, and 20 paint sticks. Approximately 5 mercury brochures were also given to the teachers.	
			<u>Additional School Outreach:</u> Los Gatos Public Works Open House Thursday 22nd, May 2008 Los Gatos Corporation Yard Approximately 20 students from Village School's kindergarten class and 34 students from St. Mary's Elementary School attended the Open House. WVCWP	Municipal Staff WVCWU Staff Support

			gave a presentation on watersheds and pollution prevention. Topics covered included mercury, copper, car washing and littering. Approximately 15 T-shirts, 25 water bottles, 20 gutter getters, and 5 activity books were distributed. ********** SCVURPPP/ Watershed Watch sponsored ZunZun Assemblies 9/26/07 Village Sch, Cmbl, 223 Students 12/6/07 Capri Sch, Cmbl, 640 Students 4/16/08 Casa di Mir Montessori, Cmbl, 115 Students 4/28/08 Campbell Christian, Cmbl, 220 Students 5/29/08 Prospect High Sch SpEd, Stga, 125 Students	
TARGETED OUTREACH				
Targeted Business	Permit Provision C.4	i. Education – Businesses Distribute BMP materials during WVCWP inspections of food facilities and automotive businesses. Discuss relevant educational material with businesses cited for potential stormwater violations.	WV Inspector distributed 40 pool & Spa BMP brochures to Leslie's pool & spa retail outlets during Sept 2007, as a follow-up to newsletter article published by MS. The WVCWP Inspector distributed BMP materials to all restaurants and food facilities that were visited in FY 07-08. Material distributed included: Posters that depict proper mat washing techniques (Good Cleaning Practices' Poster & packet), informational pamphlets on grease and food scraps (WVSD/ SJ POTW FOG program poster), and information on pest control (Don't Set Table for Pests). The WVCWP inspector also distributed educational material to local businesses that may partake in activities that could affect stormwater quality (i.e. 'Vacu-boom' Brochure). This past year there was a focused effort to raise awareness of Mercury pollution and so 'What you don't know about Mercury' packets were handed out at every facility visited.	WVCWP Inspector
Reporting	NPDES Permit, Provision C.4	j. Evaluation/ Reporting Document or estimate (as feasible) numbers of residents, students, municipal staff etc. reached by outreach efforts. Public Information/Participation Program EVALUATION – WVCWP PROJECTS

San Tomas Aquino Creek Clean up @ Westmont High Event Summary

Saturday September 15, 2007; In conjunction with International Coastal Cleanup Day

Summary of Survey completed by Volunteers:

(Based on 30 volunteer response sheets)

Most common pieces of trash collected: Cigarette butts, paper bags, food wrappers, and glass.

Least common pieces of trash collected: Plastic bottles, rubber.

Most Unusual pieces of trash collected: Spray paint cans, bicycle seat, insulation, soccer ball, credit card,

Comments by volunteers

"It was a great experience."

WVCWP Contributions:

Approximately 50 pencils; 25 pairs of gloves; Snacks and drinks for all volunteers.

Results:

30 volunteers worked at the cleanup for 4 hours each. At a minimum wage of $8.00 an hour this would have cost $960 in temporary labor.

19 bags of recyclables = 77 lbs (estimated)

27 bags of trash = 115 lbs (estimated)

Total collected = 192 lbs (estimated)

****

Saratoga Creek Cleanup Event Summary

Saturday September 29th, 2007

Hosting Agency(s): WVCWP; City of Saratoga

Summary of Survey completed by Volunteers:

(Based on 8 volunteer response sheets)

Est. Number of recyclables collected: 6 Bags
Est. Number of trash collected: 43 Bags
Most common pieces of trash collected: Beverage containers, Liquor bottles, and food wrappers.
Least common pieces of trash collected: Metal, cloth, wood, rubber.
Most Unusual pieces of trash collected: Filing cabinet, Oven, and a 30' pipe.
Comments by volunteers
"This Location was so dirty we should do it every 2-3 months."
Items for participating volunteers
10 T-shirts – for all participants; Pencils; 10 pairs of gloves.
Results:
16 volunteers worked at the cleanup for 4 hours each. At a minimum wage of $8.00 an hour this would have cost $512 in temporary labor.
Results were not weighed.

****

Campbell Clean up Event Summary:
Saturday April 12, 2008; In conjunction with Great American Pick-up and Keep California Beautiful

Participating Agencies & Dignitaries
Campbell City Manager, Dan Rich; Campbell Council Member, Dan Furtado; VTA; CalTrans; Volunteer Center of Silicon Valley; Campbell Maintenance Crew Workers; WV Clean Water Program
Summary of Survey completed by Volunteers:
(Based on 29 volunteer response sheets)
Most common pieces of trash collected: Cigarette butts, plastics, paper, glass.
Least common pieces of trash collected: Metal, cloth, wood, rubber.
Most Unusual pieces of trash collected: Luggage, dead birds, dollar bill, shower drain, credit cards, hubcap, rug, unopened/ full juice bottle, hanger, T-shirt, tires, car bumper, and a bicycle.
Comments by volunteers
"It was great exercise!" ; "The water seems twice as dirty as the trails."; "There is too much litter on the ground. People should be responsible for their own trash!"; "I had a great time, see you at the next event!"
Comments by Director of "Volunteer Center of Silicon Valley"
Stephen Quigley (Executive Director) said that he had been visiting various "clean-up" events; noticing an average of 30-40 volunteers per site, he was, however, pleased to find that the Campbell site had approximately 100 volunteers.
Comments by CalTrans
Some areas were *just* cleaned (the week prior) by their Adopt-a-highway/ or other work crew.
Give Away Bags for volunteers
Approximately 70 Bags were handed out; each with a content of:
A pencil, Recycle bag, Volunteer stickers, Flower packet (plant a butterfly garden), Solar/Mercury-Free Thermometer + Mercury brochure, "Stop Junk Mail" brochure, HHW brochure, Oil Rag, Adopt a Creek brochure, Certified Recycle Centers flyer/list, Bio-Hazard Disposal list, E-Waste Recycle list
Other items for participating volunteers
100 T-shirts – for all participants; 8 water bottles for those who shared what they found after the event; 25 Temporary tattoos to the students who participated (from a Campbell school, St. Mary's School of Los Gatos, & other younger children)
WVCWP Contributions:
50 mercury brochures; 50 mercury free thermometers; 50 pencils
* Many Thanks to Group Event Coordinator; Diana Johnson (Who mentioned; it is possible that there may be an article, on the event, by The Campbell Reporter.)

Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

* And a Special Thanks to California's Bottle/Can and Phone Recycling Centers, who provided grants from CRV funds to support this event.

Results:

100 volunteers worked at the cleanup for 4 hours each. At a minimum wage of $8.00 an hour this would have cost $3,200 in temporary labor.

Assuming 20 lbs per bag: 27 bags of recyclables = 540 lbs; 60 bags of trash = 1,200 lbs; Total collected = 1,740 lbs

For more information on the event visit http://www.ci.campbell.ca.us/General/CommunityCleanup/CommunityCleanup.htm

****

Sam Tomas Aquino Creek Cleanup @ Westmont High: Saturday May 17th , 2008

In conjunction with International Coastal Clean-up Day

Rapid Trash Assessment of Location:

Trash assessment conducted on 4/16/08.

Scores are as follows: Level of Trash (17), Actual Number of Trash Items Found (18), Threat to Aquatic Life (16), Threat to Human Health (18), Illegal Dumping (8), Accumulation of Trash (18), Total Score=95.

Cleanup Cancelled due to the outstanding condition of the cleanup site.

****

Lexington Reservoir Cleanup @ Lexington Reservoir Launch Ramp Lot: Saturday May 17th , 2008

In conjunction with International Coastal Clean-up Day

Participating Agencies

Santa Clara County Parks, WV Clean Water Program

Summary of Survey completed by Volunteers: (Based on 29 volunteer response sheets)

Most common pieces of trash collected: Paper, plastics, and glass.

Least common pieces of trash collected: Metal, cloth, wood, rubber.

Most Unusual pieces of trash collected: Car seat, tire, street cone.

Give Away Bags for volunteers: Approximately 70 Bags were handed out;

WVCWP Contributions:25 mercury brochures; 25 T-shirts

Results: 35 volunteers worked at the cleanup for 4 hours each. At a minimum wage of $8.00 an hour this would have cost $1,120 in temporary labor. Assuming 20 lbs per bag: 5 bags of recyclables = 100 lbs; 45 bags of trash = 900 lbs; Total collected = 1,000 lbs

Comments by volunteers

"I never knew there was so much trash down here!"

"The water seems twice as dirty as the trails."

"The Police should put the people who litter in jail."

CITY of SARATOGA 1956 CALIFORNIA

The Saratogan

Winter 2008

Council Priorities for 2008

The City Council is preparing to make this a successful year for Saratoga. During the annual Council Retreat held in early February, the Mayor and Council had the opportunity to reflect upon the past year and identify new goals for 2008 to make Saratoga a better place for residents, business, and visitors.

At the top of the list is increasing civic participation. Community involvement benefits the City by keeping elected representatives in touch with the community, providing the City Council with a better understanding of resident interests, and strengthening the sense of community that makes Saratoga an attractive place to live. At the direction of the Council, staff will [illegible] reaching out to neighborhood [illegible]ups and exploring opportunities [illegible] maintain a two-way exchange between residents and the Council. A joint meeting between the Council and Saratoga homeowners associations is being planned for later this year. Additionally, the Parks and Recreation Commission is active once again. This newly restored Commission will determine the best way to serve as a conduit between the council and the public, while using parks and recreation to bring the Saratoga community together. The Council expects a regular exchange will encourage residents to become more involved in the public process by attending public meetings, serving as a commissioner, volunteering for one the City's many community organizations, and a variety of other activities that keep the community connected.

In addition to civic participation, this year provides an opportunity to make Saratoga more environmentally sustainable. In 2007, the City of Saratoga signed the U.S. Mayors Climate Protection Agreement. As the City works towards [illegible]hieving the goals laid out in this [illegible]eement and strives to become [illegible]nvironmentally responsible, the City will have to identify and adopt sound environmental practices. Staff is investigating options such as implementing green building standards for City facilities, replacing street lights with light-emitting diodes (LED), creating a guide to help homeowners renovate or build their homes using environmentally sustainable practices and materials, and making it easier for residents to dispose of household hazardous waste.

While examining the City's environmental impact, the Council also aims to reduce expenses and increase financial security. Although there has been a steady decline in property values throughout Santa Clara County, Saratoga enjoys a relatively stable housing market that has generated sufficient property taxes to support basic City services. The City, however, receives less than 7% of the property taxes collected in Saratoga. As a result, any reductions in funding will impact the delivery of fundamental City services. Staff has been instructed to identify opportunities for cost savings and revenue generation. One effort to supplement the City's budget will include improvements to the Village, such as lighting, landscaping, news racks, sidewalk repairs, and the Village Façade Improvement Program. These enhancements are intended to attract businesses and shoppers to the Village and in turn produce additional sales tax revenues.

As the City Council moves forward with its plan for the next year, engaging the community in a collaborative effort to achieve these goals will be critical. The Council is confident that the commitment to Saratoga's wellbeing shared by its dedicated professional staff, interested citizenry, and involved Council will come together to improve the civic participation, environmental sustainability, and financial security of the City.

McWilliams House: Reviving Saratoga's Past

The newly renovated McWilliams House opened in October 2007 thanks to the hard work of community volunteers and members of the Saratoga Historical Foundation with a shared love of Saratoga's history. Plans to renovate the McWilliams

Students doing laundry at McWilliams House

House began after the Saratoga Chamber of Commerce moved out of the building in 2003. Since then, the building has been restored to its original appearance.

The restoration of the McWilliams House has included both the outside and inside of the building. The four small rooms of the building, which was home to the family of James and Martha McWilliams from 1865 to 1880, has been decorated with period appropriate Victorian furnishings. All of the furnishings have been donated by Saratoga residents.

Since the re-opening of the McWilliams House, it has been operated entirely by volunteers and is open to the public Friday through Sunday from 1:00 p.m. to 4:00 p.m. Special tours, including programs focused on third and fourth grade classes studying California history, can be scheduled by contacting Linda Hagelin at (408) 867-3763 or lhagelin@saratogahistory.com. For more information about the McWilliams House or to volunteer, visit www.saratogahistory.com.

Attention Homeowners Associations!

Help improve your connection with the City Council! Presidents are encouraged to contact Crystal Morrow at (408) 868-1275 or cmorrow@saratoga.ca.us to learn more about opportunities to interact with the Council and future joint meetings.

Preserving Saratoga's Natural Beauty

One of the most attractive features of Saratoga is a mature tree canopy that contributes to the rural character of the City, which has developed after years of hard work and care. Regular maintenance is required to keep Saratoga's trees looking good and the winter months are the best time to maintain trees. The months between November and February are ideal for pruning a variety of trees that can be found in Saratoga, particularly deciduous trees and Monterey Pines.

Before picking up the pruning shears, it is important to know that there is a science to tree care. While all trees should be inspected on a yearly basis, not all trees need to be pruned annually. Deciduous trees, which lose their leaves seasonally, typically need a trimming every 3 to 5 years. Saratoga is home to a variety of deciduous trees, such as some types of oak, big leaf maple, and the California buckeye. Conifer trees, including the redwoods growing throughout Saratoga, usually only need to be pruned once every 5 to 7 years. During annual inspections it is important to identify dead limbs, crossing branches, or unusual branches that are heavy at their ends. Removing these hazards will help encourage proper structure and good health.

If it is time to prune, take the time to find a responsible tree company. Too often trees are recklessly trimmed by contractors who disregard safe tree pruning practices or City rules. Reputable tree care companies in the area can be found by visiting www.treesaregood.org.

Contractors should be familiar with the City's Tree Ordinance. Many residents do not realize that a permit is required to prune a tree if more than 25% of the tree will be removed. Furthermore, permits are required for removal of all trees that measure 10 inches or more in diameter at 4.5 feet above the ground—including dead or fallen trees. Native species need a permit for removal if they measure 6 or more inches in diameter.

Preserving Saratoga's natural ecosystem not only keeps the City beautiful, it also makes it a healthier place to live. The urban canopy significantly contributes to the sustainability of the environment in a variety of ways. Trees are natural filters and improve the quality of air and water, by removing pollutants from the air and reducing the amount of runoff that flows to streams and storm drains. Furthermore, trees reduce the urban heat island effect—in which dark materials in urbanized areas, such as asphalt, cause the ground to absorb heat and in turn raise temperatures. Shade created by trees counteracts urban heat island effect and keeps city streets cooler.

Residents can review removal permits on the City's website at www.saratoga.ca.us, which lists permits by address, name, and date. For further information about tree permits or if you suspect a tree is being illegally trimmed or removed, please call the City Arborist at (408) 868-1276. Be sure to provide an address if you are reporting an illegal pruning or removal.

Investing in the Economic Vitality of Saratoga Village

Maintaining the rustic feel of Saratoga Village is the result of an investment of time, money, and care on behalf of residents, property and business owners, and the City. Working together, these different groups have been committed to ensuring that the Village is vibrant in the years to come.

The City has recently renewed its commitment to this collaborative effort to preserve the Village. In late 2007, the City Council set aside $50,000 for investment in the Village. This money will be used to fund the Village Façade Improvement Program and to install more attractive news racks. The funds are expected to increase private investment in the Village and make the heart of Saratoga more attractive to customers and businesses.

The Village Façade Improvement Program offers rebates to Village property or business owners for making storefront improvements that are visible from Big Basin Way. Up to 50% of the project cost can be refunded. The maximum reimbursement for a single project is $5,000. Additional information on the Village Façade Improvement Program can be found at www.saratoga.ca.us.

The ambiance of the Village

Façade Improvement to International Coffee Exchange on Big Basin Way

will be further enhanced by the installation of more appealing news racks. Council has already identified two news rack designs that better reflect the appearance of the Village. Residents will have the opportunity to weigh in on the final decision. Before the final news rack design is selected, samples of the two different news racks will be installed on Big Basin Way with an opinion poll to follow. Residents can expect to see the two designs in early 2008.

Household Hazardous Waste Disposal Service for Saratoga Residents

The improper disposal of household hazardous and electronic waste has wide ranging impacts that affect the entire region. In recent years, an alarming amount of pollutants have entered California waterways from improperly disposed household products containing dangerous chemicals. Oil, pesticides, batteries, and thermometers containing mercury are just a few of the household products that are being released to streams and the Bay through storm or ground water. Unless household hazardous waste is controlled, the negative impacts of these pollutants will have a devastating impact on the Bay.

To make it easier to keep California's waterways safe, West Valley Collection & Recycling now offers Saratoga residents disposal service for universal and electronic waste. Get rid of used oil, paints, batteries, fluorescent lights, mercury thermometers, old televisions or other electronic devices, and more for free! To make an appointment to drop off universal or electronic waste, call West Valley Collection & Recycling at (408) 283-9250.

In Memory of Joan Pisani

Joan Pisani

On September 24, 2007, Joan Marie Pisani, 57, passed away peacefully, surrounded by her loving family after a courageous 14-month battle against pancreatic cancer.

Joan graduated from San Jose State University in 1972 with a B.S. in Recreation and she began working as a teen coordinator for the City of Saratoga in 1974. She soon became Director of Recreation and led the Department through 33 years of growth.

Joan dedicated herself to expanding community programs in the City where she lived and worked. Joan's generous spirit and love will always be remembered by the City staff and Saratoga residents who will continue her legacy of building community in Saratoga.

Joan is survived by her husband Ron Pisani, her two daughters Kelly and Kate, and her many family members.

Saratoga Area Senior Coordinating Council (SASCC)

The Saratoga Area Senior Coordinating Council (SASCC) is a local, non-profit, 501 (c)(3) organization dedicated to providing quality services and programs to seniors of all ages and abilities. SASCC recently entered into a five year use agreement with the City to continue serving older adults in Saratoga at the Senior Center located at 19655 Allendale Avenue. Services include Adult Day Care, a nutritious lunch program on Wednesdays, social groups, art classes, bridge lessons, computer classes, fitness classes, movies, and more. Services are provided to approximately 1,475 people each month.

In early January 2008, SASCC appointed Susan Huff as Managing Director. As the new leader of this non-profit, Susan intends to use her experience in hospitality, gerontology, and health care to make SASCC a place where older adults can go to attend "programs that are fun, current, appealing, educational, and financially viable," said Huff. The City of Saratoga and SASCC are grateful to have found someone like Susan, with the essential skills and experience to lead the SASCC team. For more information about SASCC, please call (408) 868-1257 or visit at www.sascc.org.

Highway 9 Safety Enhancements

An increasing number of accidents along Highway 9 in recent years have prompted Saratoga to partner with Los Gatos and Monte Sereno to make much needed improvements. This multi-jurisdiction safety project is aimed at improving bicycle and pedestrian safety along this busy corridor. The project area is approximately 4.4 miles and runs between Big Basin Way in Saratoga through Monte Sereno to Los Gatos Boulevard in Los Gatos.

The Highway 9 Safety Master Plan was developed by staff from the three municipalities and engineering consultants from BKF Engineers. To ensure the Master Plan met the needs and interests of the residents from Saratoga, Monte Sereno, and Los Gatos, the plan was reviewed by an ad hoc committee comprised of two councilmembers from each jurisdiction and input was gathered at three public meetings.

In conjunction with the creation of the Highway 9 Safety Master Plan, efforts have been made by all three cities to secure funding to be used to carry out the multimillion dollar improvements contained in the Master Plan. Much of the necessary funding has been identified and the project has been divided into phases to allow work to move forward more quickly.

The first phase began in early 2008 and will establish a continuous bicycle lane or shoulder along the entire 4.4 mile stretch of Highway 9 between Saratoga and Los Gatos. Improvements also include pedestrian-activated crosswalks with embedded lights in two locations—Vickery Avenue in Saratoga and Massol Avenue in Los Gatos.

The second phase of the safety improvements will close substantial gaps in the existing pedestrian walkway along one side of Highway 9 to provide a continuous path from Saratoga Village to Monte Sereno. Planning for this phase is in initial stages and construction is anticipated to begin in spring 2009.

Staff members from Saratoga, Monte Sereno, and Los Gatos are still searching for additional funding resources that are needed to complete the remaining improvements, including extending uninterrupted pedestrian pathways from Monte Sereno to Los Gatos Boulevard. One of the most substantial expenses in the remaining phases will be a bicycle-pedestrian bridge over Los Gatos Creek that will provide a direct connection from Highway 9 to the Los Gatos Creek Trail. The three cities are working hard to ensure that the pedestrian and bicycle safety improvements along Highway 9 are completed in a timely manner.

Carbon Monoxide Alarms

With colder temperatures comes an increased risk of carbon monoxide (CO) poisoning. Produced by common household appliances, such as natural gas water heaters and stoves, this colorless and odorless gas is the leading cause of accidental poisoning deaths. During the winter months, improperly heating a home is a common cause of carbon monoxide poisoning.

Fortunately, carbon monoxide can be easily avoided by properly installing and maintaining carbon monoxide alarms. Carbon monoxide alarms can detect the gas before the initial symptoms of poisoning, which are similar to the flu and include dizziness, fatigue, headache, nausea, and irregular breathing. Be sure to install alarms near sleeping areas and purchase alarms certified to the requirements of the latest safety standards for CO alarms (UL 2034, IAS 6-96, or CSA 6.19.01).

Commission Openings

Library Commission

Application Deadline May 8, 2008 Openings: 1

Youth Commission

Application Deadline: May 8, 2008

For more information, please visit www.saratoga.ca.us or contact the City Clerk at (408) 868-1269 or ctclerk@saratoga.ca.us.

Think Summer!

Saratoga Summer Camper

While many of us are still bundled up in scarves and mittens, the Saratoga Recreation Department is busy preparing for the 2008 Summer Camps! Summer will soon be here and now is the best time for parents to start planning for summer camps. Last year, the City offered over 140 camps that filled up quickly. Specialty camps that focus on activities such as golf, theatre, art, soccer, tennis, basketball, dance, and much more will be available all summer. These camps, along with a number of other recreational programs, will be featured in the Spring Recreation Activity Guide available after March 4, 2008. Don't miss out on summer fun; sign-up early!

Saratogan is Back!

Staying on top of Saratoga's current news is now a little easier! After the publication was discontinued in 2004 due to budget cuts, residents can once again expect to find this helpful resource in the mail on a quarterly basis.

Mills Act: Historic Buildings with a Bright Future

The City of Saratoga enjoys a vibrant history that anyone can see—literally. The City is full of reminders of its past—from the McWilliams House to Blaney Plaza to the Heritage Orchard. Throughout the City there are historical markers that reflect the significant periods of Saratoga's past, including traces of the Ohlone Indians that settled here thousands of years ago, the lumber industry that sparked the development of Campbell's Gap, the pioneers that made their home along Big Basin Way once the town officially became McCartysville, and the transition into a resort town surrounded by blossoming orchards.

Markers of Saratoga's past are abundant. There are over 100 buildings on the City's Heritage Resources Inventory. These have been identified as buildings that are historically or architecturally significant by the Historic Preservation Commission, in hopes that recognition on the Heritage Resources Inventory would prompt property owners to preserve their buildings. A spot on the inventory is the first step to landmark designation and taking advantage of the Mills Act.

The Mills Act is a state law that was created to make it easier to restore and preserve historic properties. It allows property owners and local jurisdictions to enter into a contract that requires owners to preserve a historic property in exchange for reduced property taxes. Savings vary from property to property and are determined by Santa Clara County. Many property owners have used tax savings to improve their property or restore a building's frontage according to its original architectural features.

While there is a long list of buildings in Saratoga that would qualify for historic designation and a Mills Act contract, only a few owners have seized the opportunity to benefit from property tax reductions. Historic landmarks play a special role in the character of Saratoga, providing the City with a rich culture that has made it one of the best places to live. Working together, the City and its residents can ensure that the history of Saratoga is preserved for generations to come. For more information, please call the Community Development Department at (408) 868-1222.

Get Involved! Help Celebrate July 4th!

For the past five years, Saratoga residents have celebrated the 4th of July with one of the largest community events in the City. This event has been organized by resident Jack Mallory, who is now looking to pass along leadership of the event to a new person or organization. If you are interested, please contact Jack Mallory at (408) 252-7447 or mallory58@aol.com.

WEST VALLEY CLEAN WATER PROGRAM

October 12, 2007

Attn: Tom Babb
Department of Pesticide Regulation (DPR)
Pest Management and Licensing
1001 I Street, 3rd Floor, MS-3A
Sacramento, CA 95812-4015

Dear Mr. Babb:

A Proposal for the Santa Clara Valley Green Gardener Training program is being submitted to the DPR Alliance Grant Program by the County of Santa Clara in cooperation with the Santa Clara Valley Urban Runoff Pollution Prevention Program (SCVURPPP). As a member of SCVURPPP, The West Valley Clean Water Program, on behalf of the cities of Campbell, Monte Sereno, Saratoga and the Town of Los Gatos, will provide in-kind staff time as a management team member. This staff time is allotted for the grant period from January 2008 through June 2010 to assist with implementation of this proposal, should it be approved by DPR.

The West Valley Communities support a number of public outreach and education programs which help to prevent storm water pollution and fulfill the requirements of their NPDES Storm Water Discharge Permit. Clean Water Program staff use every opportunity to communicate with the public about Integrated Pest Management (IPM) strategies and benefits. The goal of the proposed program is to provide training to landscape maintenance workers and landscape professionals who may not be aware of the less-toxic methods they can use through IPM techniques. This proposal will provide an opportunity to reach currently underserved businesses and provide outreach to residents regarding the importance of employing landscape maintenance workers who understand and use IPM to promote local storm water pollution prevention efforts.

If you have questions regarding the support of the West Valley Clean Water Program staff for this project, please contact me at (408) 316-1233.

Sincerely,

Cheri C. Donnelly

West Valley Recycles! Spring 2008

BILL PAY THE EASY WAY

West Valley Collection & Recycling has made it easier than ever to pay your bill. Choose the method that works best for you:

Mail it. Make your check payable to West Valley Collection & Recycling. Be sure to include the payment stub to get credit for your payment right away. Use the pre-addressed envelope included with your bill.

Drop it. We accept payments at our office Monday through Friday from 8 AM – 4:30 PM.

Deliver checks to:
West Valley
Collection & Recycling
1333 Old Oakland Road,
San Jose, CA 95112

Pay/View Your Bill Online. Visit our new online payment system at www.wastecollections.com, click on "Online Bill Pay" and follow a few simple instructions. You must have your current invoice and credit card or debit card information available.

Home banking customers could use the remit address:
West Valley
Collection & Recycling
Dept. 1493
Los Angeles, CA 90084-1493
You will have your current invoice available.

Have questions about your recycling service?

Ask Randy

Q: I recycle regularly, but does it really make a difference?

A: Recycling has a huge impact on our environment! Consider the aluminum can-what most people recycle most. More aluminum goes into beverage cans than any other product and if it is thrown away it will still be a can 500 years from now. Yet a recycled aluminum can will be back on the shelf as a new can in as little as 60 days. Now consider this: Recycling one aluminum can saves enough energy to run a TV for three hours—or the equivalent of a half a gallon of gasoline. Keep on recycling!

Spring Cleaning: A Place for Everything.

It's spring. Birds are singing, flowers are blooming and houses are filled to the brim with clutter—the aftermath of a long, cold, winter. From basements to bedrooms to backyards, everything could use a good spring-cleaning. Here are some ideas to make the job easy and environmentally friendly. First, organize what is not trash into labeled piles: sell, donate, recycle. Next, get to work:

- Have a garage sale or even better, organize a neighborhood garage sale.
- Donate your gently used clothing, books, furniture and working appliances to a local thrift store benefiting charity. Some organizations provide pick-up service, and all of them should provide you with a donation receipt to use as a write off on your income taxes.
- Recycle items that can't be reused.
- Request a bulky item pick-up. WVC&R will remove items placed at your curb for a small fee. Just call customer service at **(408) 283-9250** and we will pick up these items on your next collection day.
- Drop off your e-waste. The televisions, computer stuff, and vintage VCRs that didn't get picked up at the big garage sale can be dropped off at our facility. Check out **westvalleyrecycles.com** or call **(408) 283-9250** for a list of acceptable items, hours of operation and directions.
- Batteries, fluorescent light bulbs, non-empty aerosol cans and paints do not belong in our landfill. Check out **westvalleyrecycles.com** ewaste and universal drop off for more information.

IMPORTANT TO NOTE:

WEST VALLEY COLLECTION & RECYCLING, LLC

E-Waste Drop Off Event

E-Waste Drop Off Events will be taking place in West Valley cities soon. Please go to www.westvalleyrecycles.com to find the event in your community. Drop off E-waste such as computers, computer monitors, hard drives, TV's and VCR's absolutely FREE.

Clean Green Waste

Keep your yard trimmings "Green" and your recyclables clean by keeping all garbage out of your green waste and recycling cart. Garbage contaminates recyclable materials.

00060853

RESIDENTIAL

West Valley Recycles! Spring 2008

10 Simple Ways to Celebrate Earth Day – Every Day.

In honor of Earth Day: Ten simple things anyone can easily do to pay tribute to the Earth and care for the earth's environment.

1. REDUCE

Skip the bottled water. It's expensive, and it produces large amounts of waste. Use a reusable water bottle when possible and filter your tap water for drinking, save money and make a big difference.

2. REUSE

Most products we buy cause greenhouse gas emissions during production and distribution. Take your lunch in a reusable lunch box instead of a disposable one. Reuse grocery bags and just say no to disposable utensils.

3. RECYCLE, RECYCLE, RECYCLE

Of course, you already know that recycling saves energy and reduces greenhouse gas emissions. But did you know this? If the recycling rate for aluminum and steel cans, plastic #1, glass, newspaper and corrugated cardboard increased just 10%, 3.9 million more tons of materials would be recycled, saving enough energy to power 1.5 million homes for one year. Check out the recycling how-to page at **www.westvalleyrecycles.com**

Okay, those were pretty easy; why not try some of these?

4. BUY RECYCLED

Purchasing recycled products completes the recycling loop. By buying recycled, you play an important role in making the whole process a success. As consumers demand more environmentally sound products, manufacturers will have to meet that demand by producing high quality recycled products.

5. WALK OR RIDE YOUR BIKE TO WORK OR SCHOOL

Save money on gas and parking while improving your health and dropping pounds. Stop and smell the roses. If you live too far from your office, explore telecommuting, public transportation or carpooling.

6. SWITCH TO CFLs

Switch to the "twisty bulbs," called compact fluorescents or CFLs. These replace incandescent, halogen and other lights around your house to use up to 80% less energy. But remember: All fluorescent lamps and tubes are hazardous waste and must be taken to an authorized recycling facility. Call West Valley Collection and Recycling customer service at **(408) 283-9250** for information.

7. SWITCH IT OFF

Almost 40% of the electricity used to power your home electronics is consumed while they are in standby mode.

Hook up your home computer system and accessories to a power strip that can be switched off each night.

8. PLANT A TREE

A single tree will absorb one ton of carbon dioxide over its lifetime. Shade provided by trees can reduce your air conditioning bill by 10 to 15%. Pretty cool.

9. START A COMPOST PILE

Yard trimmings and food residuals account for 23% of the U.S. waste stream. Natural composting began with the first plants on earth and has been going on ever since. As vegetation falls to the ground, it decays, providing nutrients needed for plants, animals, and microorganisms. It's that simple.

Go to **www.reducewaste.org** to find the 2008 Home Composting Workshop Schedule.

10. MAKE EVERY DAY EARTH DAY

Check out the links page at **www.westvalleyrecycles.com** for events, drop-off sites, how-to workshops and environmental happenings all year round.

Clean Green

Spring. Let in the fresh air. Quick! Because the levels of pollutants indoors can be up to 100 times higher than outdoors, according to the U.S. EPA. Indoor air pollution is due in large part to volatile organic compounds (VOCs) that evaporate from cleaning products that can trigger health problems like allergies and asthma.

Try these simple ingredients you might already have around the house for earth friendly cleaning—like baking soda, vinegar, lemon juice, hydrogen peroxide and borax. They're powerful, safe, and less expensive than chemical alternatives.

- For glass, use a mixture of half white vinegar and half water.
- Baking soda and cornstarch make good carpet deodorizers.
- Clean mildew and mold with a mixture of lemon juice or white vinegar and salt.
- A paste of baking soda, salt, and hot water makes a great oven cleaner.
- Instead of using a store-bought drain cleaner, which likely contains lye, hydrochloric acid and sulfuric acid, try pouring a quarter cup of baking soda down the clogged drain, followed by a half cup of vinegar. Close the drain tightly until fizzing stops, then flush with boiling water.

Why You Want These Bugs in Custody

Most insects found in your garden don't harm plants. In fact, 97% of the insects you see fall into this category! Such insects are called "beneficials" because they benefit the garden by pollinating plants, improving soil, and eating the pests that really harm plants. These hard-working "beneficials" can be a gardener's best friend by keeping problem pests under control naturally, without the use of harmful chemicals.

Making a Positive Identification

Before you stomp on or spray any unfamiliar bugs in your garden, make sure you know the good guys from the bad guys. Remember that most insects go through several changes during their life cycle, so the young (larva or nymph) may look totally different from the adult. And, keep in mind, it is often the "young" of the insect that eats the most pests. This brochure will help you to identify some of the most common beneficials (both adults and their young) found in local gardens. Here are some tips for attracting and keeping beneficials in your garden:

- **Go Undercover:** Provide beneficials with shelter and over-wintering sites by covering bare dirt with an organic mulch like leaves or bark. Remember to leave a small area of exposed soil to encourage solitary native bees that are "ground-nesters."
- **Lure Them Out of Hiding:** Include a variety of different pollen and nectar-rich plants to provide beneficials with a food source – in addition to pests.
- **Crack Down on Crime:** Pesticides (particularly broad-spectrum pesticides that don't target single pests) kill the beneficials as well as true garden pests. Protect beneficial insects by not using pesticides! These chemicals can also run off gardens and lawns with rain and over-watering, entering storm drains – a direct route to local creeks and other bodies of water – where they can harm water quality and wildlife. For information on pesticide alternatives, go to www.OurWaterOurWorld.org.

Bringing in the FBI: Flowers for Beneficial Insects

Most beneficial insects need to supplement their diets with pollen and nectar. You can attract them to your garden, and encourage them to stay and hunt for pests, by offering them a variety of nectar and pollen-rich flowers. Plants with daisy-like flowers or plants with clusters of multiple small flowers are especially attractive to beneficials. Choose a diversity of plants that bloom at different times so that the beneficials can feed throughout the year. Many common garden plants suited to our Mediterranean climate will attract beneficials, including oregano, alyssum, borage, dill, angelica, cosmo, tansy, calendula and rosemary.

Here are some California native plants guaranteed to draw in many of the 10 most wanted

Having a Good Defense

Many native plants have developed **natural defenses** to ward off insect pests and diseases. These defenses can eliminate the need for pesticides and reduce maintenance costs. Because native plants have adapted to grow in our specific climate, they often require very little care once established and are generally more tolerant of drought. The diversity of natives available offers gardeners great choices for both fragrant flowers and beautiful foliage – and provides food and habitat for our native birds, wildlife, butterflies, and beneficial insects.

Early Fall is an ideal time to plant natives. The cool weather and rainfall will help young plants establish a healthy root system before colorful Spring blooms emerge.

The 10 'Most Wanted' Bugs in Your Garden

Guilty of: Controlling garden pests without the need for toxic chemicals

Reward: A healthy, sustainable garden that saves money and resources and protects the health of families, pets and the environment

ASSESSING THE LINE-UP

Here are rap sheets and mug shots on ten beneficial bugs that consume large numbers of pests or pollinate plants. Do not attempt to apprehend them. . . just let them serve time in your garden!

Lacewing larva and aphid

Green Lacewing

Aliases: Aphid wolf, aphid lion.
Wanted For: Aggressively devouring aphids, thrips, mealybugs, scale, spider mites, leafhoppers and insect eggs.
Family History: Adult green lacewings feed on nectar, pollen, and honeydew – at dawn and dusk. Juveniles are voracious predators known to eat up to 20 or 30 aphids a day.
Sightings: Last seen around nectar-producing plants like sunflowers, tansy and buckwheat.

Soldier beetle larva

Soldier Beetle

Aliases: Leatherwings.
Wanted For: Attacking and feeding on aphids and other soft-bodied insects.
Family History: Adults feed on pollen and insect pests on plants. The larva (or "young") hunt for pests in leaf litter and soil.
Sightings: Known to feed on the pollen of flowers like goldenrod and milkweed while waiting for its prey. Reports of sightings appear in early spring, shortly after aphids begin hatching.

Dragonfly nymph

Dragonfly

Aliases: Mosquito hawk, darner.
Wanted for: Preying on unsuspecting flying insects like mosquitoes, flies and midges.
Family History: The dragonfly's excellent eyesight, strong jaws and agile flight make it a deadly predator able to catch prey in mid-air. Dragonfly larvae (nymphs) live in water and are also efficient hunters eating mosquito larvae and other insects, snails and even small fish.
Known Accomplices: Often seen in the company of its relative, the damselfly, another insect predator. Don't be fooled: when at rest, dragonflies hold their wings outstretched while damselflies fold their wings closed over their bodies.
Sightings: Last seen near garden ponds, streams and other bodies of water.

Bumblebee nest cells cut open to show developmental stages

Bee

Aliases: European honeybee, bumblebee. (Also includes hundreds of native bee species including leafcutter and orchard bees.)
Wanted For: Pollinating the flowers of many of our ornamental, fruit and vegetable plants.
Family History: Specially equipped for moving large quantities of nectar and pollen, honeybees are usually found in colonies in hives. Most native bees are masters at eluding notice and often live alone in ground nests. Bee populations are diminishing due to pesticide use, and loss of habitat.
Sightings: Usually seen in gangs in the vicinity of flowers high in nectar and pollen including asters, sunflowers, mints, lavender, rosemary and sages.

Syrphus larva eating broccoli aphids

Syrphid Fly

Aliases: Hoverfly, flower fly.
Wanted For: Hunting down aphids, mealybugs and other pests, and for pollinating plants.
Family History: Adults are known to be important pollinators. The larvae suck the juices out of their victims. A single larva can consume hundreds of victims a month.
Sightings: Larvae are usually found under leaves in the company of aphids. Adults have been seen lurking around ceanothus, sunflowers, feverfew and other nectar-rich flowers.
Master of Disguise: With their yellow and black stripes the adults appear to be bees. They have only one set of wings and can't sting. The larva look like fat, legless caterpillars.

Ground beetle larva

Ground Beetle

Aliases: Predacious ground beetle, and carabids, among others.
Wanted For: Conspiring to eat many soil-dwelling pests like slugs, snails, cutworms and root maggots.
Family History: Fast-moving predator, armed with strong jaws. Generally dark brown or black with long legs, and shiny, hard front wing covers that sometimes have a metallic sheen. Usually hunts at night. Reported to be able to consume its body weight in food each day. Larva also feed on soil insects.
Sightings: Usually sighted hiding in soil or under rocks, dried leaves and mulch.

Parasitoid wasp cocoons on caterpillar

Parasitic Wasp

Aliases: Trichogramma, Braconid, Hyposoter and Ichneumon, among others.
Wanted For: Parasitizing the eggs of cutworms, cabbage loopers, codling moths, tomato hornworms, aphids, whiteflies, scales and other pests.
Family History: These tiny, notorious wasps lay their eggs on or inside of pests or insect eggs and the larva eat the pest. Can be tracked by the tell-tale signs they leave behind, like tiny, white cocoons on caterpillars, or "aphid mummies," – the tan, dried up husks of aphids stuck to a leaf.
Sightings: Suspected of foraging for nectar on tiny flowers like alyssum, yarrow, tansy, and clover.

Orb weaver spider

Juveniles closely resemble adults

Spider

Aliases: Funnel weavers, crab spiders, and golden orb spiders, among others.
Wanted For: Trapping and bugnapping a wide variety of insect pests.
Family History: The most deadly natural enemy of pests, spiders are skilled predators. They may hunt with webs or track their victims on the ground and on plants. Can be identified as arachnids, with eight legs and two body parts.
Sightings: All over your garden, and on front porches near lights.
Warning: Spiders are thought of as fearsome creepy crawlers but very few have a bite that is harmful. Always wear gloves when cleaning garages, debris, woodpiles, storage areas or piles of clutter.

Ladybug larva and pupa

Ladybeetle

Aliases: Ladybug, ladybird beetle, seven-spotted ladybeetle.
Wanted For: Gorging on soft-bodied insects like aphids, scale, thrips, mealybugs and spider mites.
Family History: Both adults and larva eat large numbers of pests. It is believed that one ladybug can devour 5,000 aphids in its lifetime. Most common suspect is red with black spots – but watch for many other species in a variety of colors, with or without spots.
Warning: Be on the lookout for a ladybug look-alike: the spotted cucumber beetle! This green beetle with black spots feeds on crops and foliage.
Sightings: Known to loiter on nectar-rich flowers like yarrow, clover and tansy.

Tachinid fly eggs on a caterpillar

Tachinid Fly

Aliases: Diptera.
Wanted For: Attacking unsuspecting caterpillars and beetles.
Family History: Disguised as a hairy housefly, this parasitic insect lays its eggs on caterpillars, grubs and other insects. When the eggs hatch, the young (larva) tunnel into their victims and eat them.
Sightings: Often seen stealing the nectar and pollen of tansy, milkweed and Queen Anne's Lace.

PESTICIDE MANAGEMENT ACTIVITES

FY 2007-2008 Work Plan Self Evaluation Matrix

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
	SCVURPPP PMP (I.A.1.)	Summary of Use Track and report use of pesticides on municipally owned property.	Pesticides applied by municipal staff are reported monthly to the State of CA Dept. of Pesticide Regulation with copies of monthly reports forwarded to WVCWP for tracking purposes. Pesticide use by the municipal Pest Control contractor (PCO) are also forwarded to WVCWP. IPM practices are listed in the Evaluation section at the end of this Matrix.	Parks & Street Maint Manager
	SCVURPPP PMP (I.A.3.) PS #3	Implement BMPS Continue to Implement IPM practices as Best Management Practices (BMPs) for any pesticide used by staff or contractors. Report on use of IPM practices on municipal property.	During 07-08, the WVC continued to implement the Pest Management Performance Standard (PMPS). "Standard Operating Procedures for Pesticide Management" are being followed by staff and contractors. BMPs in general continue to be effective. WVC work with contractors to find the least-toxic method to treat resistant pest problems. The WVC use less-toxic pest management methods in municipal facilities (parks & buildings) whenever practicable, based upon budget and effectiveness. *See "Evaluation" section below for details on IPM implementation.*	PW Analyst & WVCWP coord w/ Parks & Street Maint Manager
	SCVURPPP PMP (I.A.6.)	Banned Pesticides Inventory If any pesticides have been banned w/in the past FY (per EPA, State &/or local requirements), conduct an agency-wide search of chemical for these pesticides. Properly dispose of these banned substances pursuant to appropriate waste disposal regulations.	All storage areas are cleaned annually, and any pesticides that are no longer legal or no longer used are disposed of according to State regulations.	Parks, Street Manager, Facilities Supervisor

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
	SCVURPPP PMP (I.B.1.) PS#5.a	Training for Applicators Ensure that employees who apply pesticides for the agency obtain the appropriate training as required by the County Agricultural Commissioner and the State Department of Pesticide Regulation (DPR)	The Annual Pesticide Safety Training was held on July 25, 2007. It was held at Saratoga Corp yard and all of the Parks and Streets Maintenance staff attended. The training was given by Pete Howes, Horticulturist, and covered Long & Short-term effects of pesticides and Environmental concerns.	Parks Manager
	SCVURPPP PMP (I.B.2.) PS#5.b	Staff Training for Applicators Attend and/or conduct annual training which reviews appropriate portions of the IPM Policy, BMPs, and relevant IPM techniques for employees within departments responsible for pesticide application.	All 9 Parks Dept employees have Qualified Applicator Certificates, and have been attending seminars for their Continuing Education hours.	Parks Manager
	SCVURPPP PMP (I.B.3.) PS#5.c	Municipal Staff Education Inform employees who are not authorized and trained to apply pesticides that they cannot use over-the-counter pesticides in or around the workplace.	All City employees received this information via e-mail on July 26, 2007. The e-mail included information on the City's Stormwater Permit and IPM Plan.	PW Analyst; WVCWP to provide notice
	SCVURPPP PMP (II.A.1.)	Watershed Ed. & Outreach Campaign (WE&O)[1] Attend WEO and IPM work groups. Continue to assist with development of strategy for a campaign and training program (in Spanish & English) designed for staff of very small landscape businesses (typically 1-8 employees) mainly serving homeowners.	WVCWP Program Manager participates in the IPM Ad Hoc Task Group on behalf of the WVC. Project implementation and projects for consideration, which are discussed in the AHTG, are presented to City staff for appropriate follow-through. WVCWP contributed additional funds to the SCVURPPP's IPM ad campaign. This allowed the IPM ad to appear in the three (3) weekly community newspapers for six (6) weeks in the spring. (Campbell Reporter, Los Gatos Weekly, Saratoga News).	WVCWP Staff

[1] Funded by all Co-permittees each year.

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
			WVCWP was very involved with the development of the new training program for small landscape businesses – from concept, to grant proposal, to implementation of a successful class series. The first set of classes were held from Feb- April 2007 – one in English and one in Spanish; Both classes were attended at capacity (40 students) and had waiting lists. Positive media coverage about the class was received in local ethnic and San Jose community newspapers. The classes are being listed in the Fall session and projected to be full. Since many WV residents employ small landscape contracting firms, it is hoped that these classes will have an impact on reducing residential pesticide use in the WVC. See "Evaluation" below, for details	
	SCVURPPP PMP (II.A.4.)	Community & School Opportunities Identify opportunities and attend community events/school classrooms to demonstrate reasons for, and methods of, less toxic pest control.	Information on the importance of reducing pesticide use, and the toxic effects of pesticide runoff, is included in all WVCWP educational presentations at schools. IPM information, and HHW brochures detailing proper pesticide disposal, are distributed at a variety of venues. In FY 07-08, WVCWP participated in helping to develop a new brochure on reducing pesticide use and employing beneficial bugs. WVCWP the directed funds toward an order of the Beneficial Bugs brochure for use as a handout. See PI/P Section for further details on outreach for less toxic pest control.	WVCWP Staff
	SCVURPPP PMP (II.A.5.)	Community Material Distribution Participate in public sale events at local hardware store(s). Provide watershed	WVCWP staff distributed material via different delivery methods at a variety of community events, including: Haunt the Hollow EVENT 10-28-07	WVCWP Staff

Saratoga

FY 2007-2008 ANNUAL REPORT

Source	Task Source	Work Plan Tasks	Accomplishments	Responsible Party
			Due to numerous trainings/meeting for municipal staff concerning the Municipal Regional Permit, WVCWP was not able to sponsor an IPM training this year.	
	SCVURPPP PMP (II.A.14.)	Conduct internal IPM outreach Provide all City/ Town staff with information on environmentally safer, integrated pest management to encourage employees to use IPM methods away from work. Email announcements as appropriate & display IPM materials at City/ Town Hall.	A new e-mail notice covering this subject was created by WVCWP staff The notice contains links to *Our Water, Our World*; *UC Davis IPM site*; *Universities' Pesticide Info Network*; and *Pesticide Action Network database*. It is being e-mailed to all municipal employees in Summer 2008. In addition, IPM material is available for pick-up by employees at Municipal Offices.	PW Analyst to send email & WVCWP Staff to provide message
	SCVURPPP PMP (III.A.1)	Pest Control Operators Maintain database of licensed structural and landscape maintenance PCOs within WVC for outreach purposes.	The database of West Valley PCOs has been compiled; over 75% of them are based in the City of Campbell.	WVCWP staff
	SCVURPPP PMP (III.A.4)	Track and Report PCO Use of Pesticides Require PCOs contracted by municipality to implement BMPs through contract specifications and track and report PCO use of pesticides on municipal property.	PCOs have received copies of municipal IPM Policies and Standard Operating Procedures. PCOs are required to operate according to the municipal Pesticide Management SOPs. In FY 07-08, the WVCWP Program Manager corresponded with Saratoga's Pest Control Contractor in order to clarify the City's IPM Policy and BMPs, and to answer any relevant questions. Invoices for all pesticides applied by PCOs have been provided to WVCWP for tracking purposes.	Public Works Dir/ Parks, Street, Facilities Maint Supervisors
	SCVURPPP PMP (IV.A.2.)	Commercial Business Education Continue ICID Inspector's education program targeting retail food facilities through distribution of "Don't Set a Table for Pests".	The WVCWP Inspector distributes outreach material on less toxic measures to use for pest control in food service businesses - *"Don't Set a Table for Pests"* - during his Restaurant Inspection activities. In FY 07-08, at total of restaurant staff in the City of Saratoga received a total of **3** of these.	WVCWP Inspector

Pesticide Management Activities Evaluation

PESTICIDE USAGE REDUCTION MEASURES – Pest Specific

New weather-station irrigation controllers have been installed in Saratoga's Heritage Orchard Park (a working orchard) and are anticipated to significantly reduce water usage. These devices detect weather conditions and the transfer rate of evaporating water to ensure plants are watered appropriately. Consequently, sprinklers are off on rainy days, plants receive less water on cool cloudy days, and get a little more water when it is hot or dry. Also, the Allendale side of Saratoga's Civic Center was landscaped with drought-resistant plants.

These projects should virtually eliminate any runoff problems in these locations, thus avoiding any problems of fertilizers and pesticides running off into adjacent creeks. Saratoga has previously made investments in similar water reduction techniques and drought-resistant plantings on additional municipal acreage and street medians.

A press release on these new developments was issued to local papers, to help raise public awareness concerning the issue of runoff pollution from over-watering.

Saratoga is implementing IPM in the following situations:

YELLOWJACKETS:

Saratoga uses traps as the main means of control.

Parks staff tries to clean off picnic tables every Monday to prevent attracting wasps & ants. The Parks Dept. purchased and installed 18 plastic tables (to replace existing wooden tables); the new tables are easier to keep clean and therefore attract fewer wasps.

WEEDS:

Mulch is spread wherever possible for weed control, including medians. A landscape contractor also cuts roadside weeds, which helps to avoid applications of herbicides.

Hand hoeing/pulling of weeds is used where possible. Weekly walk-throughs with lots of hand weeding are done. Weeds are spot-sprayed, as opposed to blanket spraying of large areas; – the emphasis is on catching the problem early in an attempt to avoid having to spray larger areas later.

RODENTS:

A contractor is engaged to trap rodents in order to avoid poisonous baits; this is done when there is an outbreak of a number of rodents at once.

MEDIAN LANDSCAPING:

Saratoga's policy is to install pest resistant shrubs and landscaping and avoid high-maintenance, low-pest resistance turf and greenery.

RESULTS OF PESTICIDE USE REVIEW

The City is making an effort to stress prevention (prevent weed growth, prevent pest infestations) where possible. Saratoga is using IPM and engineered, rather than chemical, controls as much as possible given budget and staff limitations.

Over the past several years, the Public Works Dept. has worked on landscape design and improved irrigation systems which will reduce need for pesticide/ herbicide use, and reduce any potential runoff which could carry pesticides. Natural insect controls include use of traps for wasp control, and soapy water for ant control. Through these types of efforts, Saratoga is progressively reducing chemical pesticide use.

Cc: Cheri Donnelly
Subject: Annual Reminder about Pesticide Use on City Grounds

To: City Staff

From: Public Works Dept.

Subject: **STAFF USE OF PESTICIDES - Reminder**

Hello,

This is the Annual Reminder concerning **pesticide use on City grounds and facilities**.

Pesticide use by our city is tracked by the California Water Board as part of our Stormwater Permit requirements.

Therefore, it is important that **all city staff** follow City policy concerning pesticide use.

"Pesticide use" INCLUDES over-the-counter pesticides in spray bottles and cans, etc., such as might be used for ants in the lunchroom.

Please read below for details:

Our City has adopted an Integrated Pest Management Policy and IPM Plans for various pests. The Plans include strategies for controlling pests (such as ants and wasps) using the least toxic methods possible.

By adhering to these plans, the City helps to provide a healthier environment for staff and the public. In addition, the California Water Board's Stormwater Discharge Permit requires municipalities to reduce pesticide use.

One of the goals of the policy is to ensure that pesticides that are purchased are applied only by staff who have received training in pesticide use, and in Less Toxic Pest Control measures.
<u>To help meet this goal, Staff Members should please:</u>

- Contact the Facilities Maintenance Supervisor Thomas Scott or the Parks Maintenance Supervisor Kevin Meek if anyone needs structural or landscape pests removed.
- Discontinue the use of any pesticides they may currently have stored in the facilities - such as ant or wasp spray in a staff kitchen - (this applies to staff not trained in pesticide application).

- Dispose of existing containers of pesticides through the City's Hazardous Waste program (contact Cathleen Boyer).
- Remember that only staff licensed as "Pest Control Advisors" may order pesticides or purchase pesticides over-the-counter for use on City Property.

Thank you for your help in our efforts to protect employee health and local water quality.

If there are any questions on these procedures, please contact: Kristin Borel at 868-1258.

MERCURY POLLUTION PREVENTION ACTIVITES

FY 2007-2008 Work Plan Self Evaluation Matrix

Source	WP Task	Work Plan Tasks	Accomplishments	Responsible Party
	Mercury Plan (I.E.)	Reduction of Hg Containing Products Continue implementing phase-out of mercury-containing products (MCPs). Phase-out will coincide with replacement of MCPs on an as-needed basis.	Reduction of mercury containing products is being implemented. Research on alternative products has been conducted through the WVCWP. Non-mercury or low-mercury replacements are being used wherever feasible e.g., thermostats and fluorescent bulbs. At the WVCWP-sponsored meeting with DEH in April 2008, each member in the audience was given the booklet, "What You Don't Know About Mercury". Discussion followed as to how and where to dispose of Mercury Containing Products, including fluorescent bulbs, thermometers, and batteries. In the back of the booklet there is a list of approved drop-off locations in our area. Record keeping for MCPs was also discussed.	Facilities & Street Maint. Supervisors
			SARATOGA: The WVCWP Stormwater Inspector conducted a training on disposal & discontinuation of Mercury Containing Products during the Annual Corp Yard Walk-Thru Training on May 28th, 2008. The Training was attended by **14** City of Saratoga staff members. Topics covered included: What are Mercury Containing Products (MCPs)? Requirements for MCPs Proper Disposal of MCPs E-waste Drop-off Sites Record-keeping for MCP Disposal	Facilities & Street Maint. Supervisors

	Mercury Plan (II.F)	Fluorescent Light Recycling Campaign Continue participation in the Mercury Ad Hoc Task Group and support ongoing implementation of an outreach program to about recycling fluorescent bulbs.	The WVCWP Manager helped develop local campaigns and outreach messages through SCVURPPP's Mercury Ad Hoc Task Group. WVCWP provided funding for SCVURPPP's Mercury ad to appear in the 3 weekly local newspapers for 6 weeks in Fall 2007 (Campbell Reporter, Los Gatos Weekly, Saratoga News).	SCVURPPP & WVCWP to coordinate w/ HHW staff

Mercury Pollution Prevention Activities Evaluation

Efforts to Enact "Extended Producer Responsibility" Requirements:

At its November meeting for the 4 West Valley Communities, WVCWP hosted a presentation by Rob D'Arcy of Santa Clara County HHW on "Extended Producer Responsibility" – targeting producers of products with HHW, including mercury containing products such as E-Waste. HHW was seeking to have co-permittees pass resolutions supporting EPR. The goal of EPR is to shift California's product waste management system from one that is government-funded and taxpayer-financed to one that relies on producer responsibility. This will also help in removing more of these products from the waste stream.

All WV Cities passed resolutions supporting Extended Producer Responsibility in FY 07-08.

Community Involvement in E-Waste Recycling

Over the past several years, there have been a number of E-waste events held by various entities (schools, scout groups, etc.), thereby reducing the need for WVCWP to sponsor E-waste events. This is a certain measure of success for previous public outreach efforts related to Mercury and E-waste – residents are now taking on the task of organizing these events, and handling safe disposal of mercury containing products. This is a demonstration of the effective partnerships that can develop between municipal efforts and their residents, and which can be especially effective in smaller communities.

WEO AHTG Advertising

Through its Watershed Education Outreach ad hoc task group, SCVURPPP published mercury ads in newspapers serving the Santa Clara Valley. In an effort to ensure reaching a maximum number of WV residents, WVCWP funded and arranged for printing of the ads in 3 local weekly papers, for a 6 week run. This meant an extra 18 ads aimed at West Valley residents. The ads ran in the *Campbell Reporter*, the *Los Gatos Weekly*, and the *Saratoga News*.

COPPER ACTION PLAN/NICKEL ACTION PLAN

FY 2006-2007 Work Plan Self Evaluation Matrix

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
Vehicle Washing Operations	CB-1	As part of the West Valley Industrial Commercial Inspection Program, promote improved car washing methods at auto businesses. Provide info on alternative arrangements for businesses with possible compliance problems. (Section 2.i of this work plan - Industrial Inspection Program)	The Stormwater Discharge Inspector distributes vehicle washing outreach materials during pro-active inspections and in relation to any actual or suspected vehicle washing incident. The Inspector is able to answer questions and offer suggestions with the help of visuals. A WVCWP-created fact sheet provides information on wastewater capture systems for automotive facilities. The fact sheet was designed to provide small-scale automotive facilities (those that find installing a full-fledged wash rack cost-prohibitive) with examples of inexpensive treatment technologies and distributor information. This method of outreach has been very effective.	WVCWP Inspector
Vehicle Washing Operations	CB-1	Place outreach material on proper vehicle/equipment washing at municipal counters, post offices, libraries and public events. Update WVCWP website to include copper information.	The Car Wash Kit flyer is posted in WVC Municipal Offices. For FY07-08, WVCWP home page featured a graphic highlighting car washing, and a link to a printable PDF with information on proper car washing, and water quality degradation from improper washing. The link also gives information on obtaining the free Car Wash Kit for Car Wash Events (this graphic is sometimes temporarily swapped out for publicizing events, such as a WV E-waste event). www.cleancreeks.org http://www.cleancreeks.org/imagesnew/carwashweb.pdf Currently, the WVC do not have any comprehensive outreach material on copper so in FY 07-08 WVCWP staff worked on a draft copper outreach piece (tri-fold), including car washing info. The piece will be distributed for WVC feedback in FY 08-09. Once finalized, it can be distributed to the public and posted on the website.	WVCWP staff

Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
Vehicle Washing Operations & Pool/ Spa Maint.	CB-1 & CB-12	In classroom presentations, introduce impacts of copper on aquatic life; teach proper methods of car washing and pool & spa drainage using the Enviroscape watershed model.	WVCWP's classroom presentations are scripted to include hands-on activities so that students can watch pollutants, such as copper from car-washing activities & pool draining, flow directly to waterways. In addition to recommending the use of commercial car-wash facilities, WVCWP encourages washing on a gravel or lawn area where wash water is captured and infiltrated. Students also learn about runoff from car wash fundraisers and the need to borrow the WVCWP Car-Wash Kit for any such event. Proper Pool Draining instruction includes photos of a Sanitary Sewer Cleanout, and other graphics about pool & spa drainage. School presentations in FY 07-08 included: *Casa Di Mir Montessori School, Campbell – Presentations for 6-12 year-olds on 2-13-08* *Queen of Apostles Private Elementary School – Presentations for 4th and 5th grade science classes on 4-4-08* *St. Mary's School, Los Gatos –Presentations for kindergarten classes on 5-6-08*	WVWCP staff
Vehicle Washing Operations	CB-1	Promote use of Car Wash Kit. Provide kit; provide training to charity car wash organizers. Document use in A/R. Solicit feedback from participants.	In FY 07-08, a 220 word "Car Washing" article for municipal newsletters was created. The article will run in "The Saratogan" Summer 2008 issue (FY 08-09), and hopefully in additional municipal newsletters in Spring 09. **October 13 & 14, 2007** The WVCWP Carwash Kit was used at a very large fundraiser at Fisher Middle School, LG. Two WVCWP staff attended in order to educate event organizers on Car Wash Kit set up, and spoke to other interested residents The fundraiser was very well-attended (may have raised $10,000) and many attendees were educated about the	WVWCP staff

			Car Wash Kit. 100 Car Wash brochures were distributed. The entire event received extensive media coverage. **September 30, 2007** The Car Wash Kit was also used at the Silicon Valley Roller Girls Carwash Fundraiser in Campbell. The Stormwater Inspector gave instruction about set-up and use of the Kit, and education about carwash runoff. The WVCWP Stormwater Discharge Inspector is available to provide instruction on use of the WVCWP car-wash kit for local fundraising events. He usually attends the events to offer guidance and to help publicize the *West Valley Clean Water Program*. The kit uses about 400 ft. of hose and 300 ft. of extension cord. The car wash kit works extremely well, but can be difficult to set up. Photos of the kit in action are used for classroom presentations.	
Vehicle Washing Operations	CB-1	Within the development project permit process for Group 2 projects, require source control measures at facilities that will conduct vehicle/ equipment washing and maintenance activities (consistent with Permit requirements).	Saratoga did not have any regulated projects in FY07-08 that would conduct vehicle/equipment washing and maintenance activities.	City Engineer; Community Dev Dir & Assoc. Planner / Building Insp
Vehicle Washing Operations	CB-1	Include recommended source controls for vehicle washing in the City's corporation yard SWPPP and continue to train staff to use BMPs.	Source control BMPs are included in the SWPPP. Corp Yard BMP training is covered annually in the Corp Yard Walk Through (see Public Agency Activities section). Municipal staff follow best management practices and continue to ensure that vehicle wash systems in the Corp Yard prevent wash water runoff. Municipal staff viewed the BASMAA training video in 2006.	Streets Maintenance Spvsr & staff

Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
Industrial Copper Control	CB-3	Continue joint Inspections with Fire Dept., targeting industrial sources for copper, e.g. metal plating and metal finishing facilities.	Saratoga does not have any industrial facilities subject to inspection for this pollutant.	SCVC Fire Dept.
Reducing Traffic Congestion	CB-6/7	Within the development permit process, encourage pedestrian oriented design practices (trails) and planning that will accommodate bicyclists (paths).	The West Valley communities encourage best design practices wherever practicable. These small communities tend not to have large developments conducive to requiring alternative transportation within the permitting process. However, the cities and the Town encourage alternatives transportation through other means: For several years, the cities of Monte Sereno and Saratoga, and Town of Los Gatos, have been working with CalTrans on improving bicycle and walking features along the stretch of Hwy 9 that links these 3 municipalities. The stretch is heavily used by bikers and walkers, and improvements would overcome current safety problems, thereby encouraging greater pedestrian/bicycle use of this transportation corridor. In June of 2008, several agencies gathered on Highway 9 in Saratoga to announce nearly $500,000 of unused bond money that can be used to improve safety along this corridor. Improvements will include a T-intersection that will make cars more visible to bicyclists and a street light at Austin Way & Hwy 9. Caltrans estimates the project will be completed in approximately 2 years. The Silicon Valley Leadership Group CEO discovered the unused bicycle improvement money while reading through documents from the California Transportation Commission. Agencies involved in these improvements include Town of Los Gatos, Cities of Monte Sereno and Saratoga, CalTrans, Valley Transportation Authority, Calif. Transportation Commission.	

Sa ga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
			In addition, other improvements will be funded by State Bicycle and Pedesterian Improvement grant funding. Bicycle and pedestrian facilities along Hwy 9 from Los Gatos to Saratoga will be improved through a multi-year project. The first phase will improve the bicycle route system to reduce hazards and improve safety for bicyclists along this route. Phase I work was carried out during FY 07-08.	
			SARATOGA: In FY 07-08 Saratoga completed improvements to bike lanes on Herriman Ave. and created a pedestrian walkway for the length of this road. Herriman Ave. is a heavily travelled road running through a residential area, but links 2 main arterials, and links the City's High School and 1 elementary school with the City's Municipal Offices, Library, Middle School, 2 parochial schools and Community College. These institutions all generate large amounts of traffic, but these bicycle and pedestrian improvements should lead to a decrease in vehicular traffic since many students and interested residents will be able to walk or bike from their homes or schools to other venues. Planners and Engineers work with project owners during the permitting process to encourage them to designate a portion of their site, if feasible and appropriate, for open space and walking trails. The City website encourages biking through its *Trail and Bike* maps, showing where striped bike lanes exist, and classifying bike routes according to safety. Pedestrian/equestrian trail maps are posted to encourage walking as an alternative means of transportation.	City Eng, Community Dev Dir/ Planners

Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
Water-shed assessm't and protection	CB-8	Consider watershed protection in all CEQA actions.	All WVC have adopted the CEQA review guidance from SCVURPPP, as documented in the June 2004, *C.3 Stormwater Handbook*, to address water quality as part of the C.3.m implementation.	Planning staff
Water-shed assessm't and protection	CB-8	Continue to receive training and develop understanding of the Hydromodification Management Plan (HMP) and implement HMP Permit requirements on qualifying projects.	In September 2007, municipal engineers from the WVC attended trainings presented by SCVURPPP/ EOA staff on the HMP, including proposed applicability maps. Some additional HMP training was received at the June 3, 2008 SCVURPPP workshop. See Planning Procedures Training Summary for details.	City Eng
Water-shed assessm't and protection	CB-8	Continue to Implement Guidelines & Standards developed by the Water Resources Protection Collaborative for watershed protection. Support new Collaborative issues for watershed protection as they arise.	Campbell, Los Gatos and Saratoga have participated in, and invested significant staff time in, the Water Resources Protection Collaborative. Saratoga adopted the "Guidelines and Standards" in FY06-07	Cmmty Dev Dir/ Planning staff / City Eng.
Street sweeping	CB-11	Conduct regular street sweeping, evaluate efforts and collect data for Annual Report. Saratoga contracts with a Street Sweeping Service – Ensure the contractor uses and maintains effective street sweeping equipment.	The West Valley communities conduct street sweeping in residential areas and more frequent sweeping in commercial areas. Sweeping data is collected and noted in Public Agency Activities (Section # 3) of this report. The West Valley cities do not hesitate to change sweeping contractors if the equipment being used does not measure up to municipal standards. The City's contractor uses an "Air Bear", vacuum type sweeper for areas that are conducive to picking up fine particulates. A broom-type sweeper is used in other areas.	Streets Spvsr and Sweeping Contractor
Outreach on Pool, Spa maint'nce	CB-12	Continue to distribute Pool & Spa maintenance brochure via agency counters, website and during IC/ID inspections.	WV Inspector distributed 40 Pool & Spa brochures to Leslie's pool & spa retail outlets during Sept 2007. Pool & Spa brochures are available at all WVC municipal offices.	WVCWP with Municipal Staff

Sa ga

FY 2007-2008 ANNUAL REPORT

Activity	Source	Work Plan Tasks	Accomplishments	Responsible Party
Use of copper architecture	CB-21	Within the development permit process, continue to limit and discourage use of copper architecture. Inform applicants about the negative water quality impacts related to the use of copper roofing, rain gutters and other copper architecture.	All WV cities discourage copper architecture with the exception of Saratoga and Los Gatos. The Town of Los Gatos is drafting a Residential Design Guideline that will seek to discourage architects and homeowners from using copper by informing them of its environmental implications.	Community Dev Dir, Planners and City Eng
Green Building	CB-21	Provide information about negative impacts of copper architecture and alternative materials via link on West Valley Clean Water website.	Currently, WVCWP and WVC do not have any good outreach material on architectural copper, so in FY 07-08 WVCWP staff worked on creating a draft of a comprehensive copper outreach piece (tri-fold), including architectural copper info. The piece will be distributed for WVC feedback in FY 08-09. Once finalized, it can be distributed to the public and posted as a downloadable PDF on the website.	WVCWP staff
Nickel Action Plan Tasks				
Control Measures for Constr Sites	NB-1	Continue to implement Construction Inspection Performance Standards (Section 5, Construction Inspection section of this work plan).	See Construction Inspection (Section #5) of this report.	
Training on Control Measures for Constr sites & New Dev	NB-1	Attend Construction site management workshops sponsored by Water Board and SCVURPPP for latest erosion/sediment control techniques and continue to attend workshops on post development Stormwater treatment BMPs.	See Construction Inspection Training (Section #5T) of this report.	

Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

Copper/Nickel Action Plan Evaluation

Car Wash Outreach - Evaluation:

Additional WVCWP staff have been trained in use of the Car Wash Kit. This will enable increased outreach efforts, as it ensures that staff will be available to set up the Kit at Car Wash fundraising events, and to instruct event organizers in use of the kit. The kit was used successfully at several events in FY 07-08. A *"Clean" Car Washing* article was created, and will run in the Summer issue of the Saratoga municipal newsletter. Depending upon space available, it will run in other WVC newsletters in 2009. In addition, WVCWP staff worked on developing new Car Wash outreach strategies for FY 08-09.

Pool and Spa Maintenance - Evaluation:

In Fall FY 07-08, WVCWP initiated a new outreach effort involving placing Pool & Spa brochures at the major swimming pool retail chain in the area. This fall, staff will return to the stores and check on the status of the brochures, and whether this was an effective form of outreach.

Promotion of Pedestrian Trails And Bike Paths - Evaluation:

The WVC of Los Gatos, Monte Sereno and Saratoga have invested extensive efforts into improving the stretch of State Highway 9 which runs from Saratoga, through Monte Sereno, and into Los Gatos (appx. 4 miles). This stretch is heavily traveled by local residents, and many have expressed an interest in using it for walking and biking, if it were a safer route. In fact, it currently receives a high degree of bike traffic, and some pedestrian traffic. The Cities and Town have worked closely with CalTrans on developing strategies for improving safety on this stretch. Funding has been obtained from various sources and Phase 1 of the improvements was started in FY 07-08.

Street Sweeping - Evaluation:

The West Valley cities continued their street sweeping programs. Campbell and Saratoga are using both vacuum sweepers and broom sweepers, based upon conditions. Los Gatos and Monte Sereno are both swept using regenerative air sweepers. By using vacuum and regenerative air sweepers, all WVC are making concerted efforts to remove fine particulates, including copper, from their roadways.

TRASH INVENTORY & MANAGEMENT

FY 2007-2008 Work Plan Self Evaluation Matrix

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party
	Program's Trash Work Plan	Long-Term Management Strategy Participate in Trash Ad Hoc Task Group and assist Program staff in developing (and revising per the MRP) long-term trash management strategy for reducing trash in urban streams and waterways and other potential sources that may contribute trash to those areas.	The West Valley Clean Water Program Mgr attended the Trash AHTG meetings and provided feedback from West Valley cities on implementation strategy and tools. Topics this year included issues related to Structural Treatment Control, 303(d) listings and Trash Problem Areas at various creek sites. Reviewed drafts of 'Trash Evaluation & Management Fact Sheet, 2nd Edition'.	WVCWP Mgr to participate in AHTG and coordinate WVC efforts
	Program's Trash Work Plan	Additional Task – not in 07-08 Workplan Participate in Creek Connection Action Group (CCAG) developing long-term trash management strategy for reducing trash in waterways. Address other potential sources which may contribute trash to waterways.	WVCWP Program Manager participated in policy planning meetings held by Heidi McFarland, Santa Clara County Parks Dept, to discuss various proposed projects and overall trash issues. CCAG coordinates the 2 annual county-wide cleanup events. These strategy meetings were aimed at addressing the bigger picture of trash generation.	WVCWP staff attends meetings
	Program's Trash Mgmt Strategy	Implement Trash Management Strategy Begin implementation of long-term trash management strategy for each high priority watershed defined within the technical memorandum entitled *Prioritization of Trash Problem Areas*. This strategy will be provided within the technical memorandum entitled *Long-Term Trash Management Strategy*, which will be developed during FY07-08.	The *Long-Term Trash Management Strategy*, as developed in FY 2007-2008, consists of 3 main points: • Identify Trash Problem Area & Sources • Evaluate & Implement Enhanced Trash BMPs • Assess Effectiveness of BMPs Over Time WVCWP and West Valley Communities staff continued to use assessment tools to identify where Trash Problem Areas, and Trash Sources, existed. Over the past several years, using these tools, it was determined that some sites had at first appeared to be problem areas, but after initial cleanup, the Trash problem did not recur. These sites were then removed from the Trash Problem area list so that resources could be devoted to other sites and other	WVCWP coord w/ Public Works Analyst and Streets Maintenance Spvsr

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

			BMPs. For WVCWP, part of the Trash Management Strategy is to address vehicular generation of litter, and illegal dumping. By participating in the Silicon Valley Anti-Litter Campaign, WVCWP was involved in the initiation of a hotline allowing drivers to report license numbers of vehicles which they see littering. For illegal dumping, a strategy of directly contacting property owners near any sites where dumping occurs has been was initiated several years ago, and has continued. In FY 07-08, 25 homeowners near Smith Creek in Los Gatos were contacted. Current BMP methods are in the process of being evaluated. BMPs include ongoing methods such as streetsweeping, increased use of trash cans for the public, increased scheduling of trash pickup by Municipal staff, institutional regulations such as requiring clean up after events by event permittees, increased communication with Cal Trans, etc. (see Management Practices row, below) Staff will continue to observe the results of BMP implementation in order to assess their effectiveness.	
	Program's Trash Work Plan	Pilot Demonstration Assist Program in implementing Pilot Demonstration Projects which focus on assessing control measure effectiveness.	The West Valley Clean Water Program Mgr attended the Trash AHTG meetings and provided input on behalf of West Valley cities regarding potential pilot demonstrations. The Pilot Demonstration program has been well-publicized. Regular updates to SCV URPPP Management Committee have been given on installation and first wet season results. The Pilot Demonstration was included in the SCVURPPP 'Trash Management and Evaluation, 2nd Ed' document, circulated in May 2008. At the annual WVCWP Streets Maintenance Supervisors' meeting, WV Communities staff and WV Sanitation District staff viewed a presentation by City of Sunnyvale on Sunnyvale's current experience with the Pilot program. Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

Source	WPActivity	Work Plan Tasks	Accomplishments	Responsible Party
	Trash Work Plan	Evaluations Continue to conduct trash evaluations in a subset of local trash problem areas using the Programs Urban Rapid Trash Assessment (RTA) protocol and/or the KAB Litter index.	WVCWP staff used SCVURPPP's standardized reporting forms to assess trash problems. WVCWP staff conducted **21** assessments at the identified sites and listed problem areas in West Valley communities. The number of assessments included: Campbell **5** Los Gatos **3** Monte Sereno **5** and Saratoga **4.** Although such monitoring usually is limited to drive-by evaluations of a site, several assessments were conducted simultaneously with removal of trash and debris by WVCWP staff.	WVCWP Staff
	Trash Work Plan	Identify and Prioritize Problem Areas Continue to identify and prioritize trash problem areas based on criteria provided by Program staff during FY 06-07.	Identification & prioritization are determined by: • monitoring previously identified problem areas, • using volunteer monitoring during cleanup events at problem sites, • keeping records of areas where Trash has been noted, or illegal dumping has been noted. If the site is noted repeatedly, then identifying it as a Problem Area will be considered. As noted in FY06-07, a few sites were taken off the Priority List, since several years of monitoring demonstrated that trash there was less of an issue than was originally believed. It was decided that staff resources should be concentrated on problem sites in order to be effective. Clean site conditions at the site for the WVCWP biannual Creek Cleanup (San Tomas Aquino Creek at Westmont High School) resulted in removing that site from this year's National River Clean-up Day site list.	WVCWP staff; Parks & Streets Maintenance Supervisors
	Technical Memo: *Trash Mgmt Effective-ness Strategy (FY06-*	Evaluate Trash Management Measures Track existing trash management practices to evaluate effectiveness. Selected effectiveness methods may include using	WVCWP staff used SCVURPPP's standardized reporting forms to identify trash problems. When completed by staff, these forms provide data on trash monitoring and management activities at the listed problem sites.	WVCWP Mgr to participate in AHTG and coordinate WVC efforts

	07)	the Program's Urban Rapid Trash Assessment protocol (Version 1.0) and/or the KAB Litter Index in a subset of high priority trash problem areas.	Completed forms are used for review to determine effectiveness of trash management practices. Discussion was initiated on determining a better means of training on use of trash evaluation tools, in order to ensure standardization among staff and among co-permittees. One Trash Management Measure/ Evaluation Method involves Creek Cleanups and Monitoring. Over several years of Creek Cleanups and monitoring, WVCWP has been able to cut back on cleanups at 2 sites, due to lack of trash at the sites. La Rinconada Park, along Smith Creek in Los Gatos, is a creekside park with a tennis court, lawn area, picnic/ bbq area, playground and a ½ mile long creekside trail. After several cleanups, 1 final cleanup was held, at which there was basically nothing for the volunteers to pick-up, nor monitor. Monitoring showed that construction & remodeling activities for several homes nearby may have been contributing to the trash. Trash included wrappers from construction materials, and food wrappers, etc. probably from construction workers. Once the construction was completed, trash was generally not being generated. San Tomas Aquino Creek, at Westmont High School in Los Gatos, has been the site of biannual Creek Cleanups for some years. The last cleanup was held here in Sept 2007. In Spring 2008 an assessment of the site was conducted. This determined that there was minimal trash, and the regularly-scheduled May Cleanup was cancelled, since there would be virtually nothing for the volunteers to pick up or monitor. The site will be evaluated again in fall and at that time if there doesn't appear to be a regular generation of trash, a recommendation on whether to continue clean-ups at the site will be made. In these instances, it appears that the Creek Cleanups have been an effective Trash Management Measure, and may provide an opportunity to focus efforts in another area (bmp implementation) or other approaches to reducing	

			trash generation.	
	Program's Trash Work Plan	Management Practices Continue to identify and implement trash control measures, where practical and feasible, to reduce trash and debris.	Control measures in addition to scheduled/systematic control measures • notify Caltrans when exceptional litter or debris problems are noticed along highways/freeways and around on-ramps • conduct removal of trash and litter as needed at sites within municipal jurisdiction • remove trash (where feasible) at some sites in Caltrans' jurisdiction • monitor identified problem areas • hold volunteer cleanup events at problem sites, when feasible • highlight litter problems during classroom presentations • WVC IND inspectors and construction site inspectors watch for litter and illegal dumping. Inspectors will consider an accumulation of debris at a site to be a stormwater violation and refer such sites to the WVCWP Stormwater Discharge Inspector. Systematic Control Measures • Trash collection is mandatory for WV residents - via WV Collection & Recycling (WVC&R) • WVC&R holds annual free, curbside Waste Collection days for items weighing up to 70 lbs, wood scraps and other items not usually allowed under weekly collection guidelines • All WVC conduct streetsweeping, with extra sweeping for areas of high trash generation (downtowns) and high leaf drop.	Parks & Streets Spvsrs WVCWP staff to assist
			SARATOGA: Staff, with a few residents, conducted the Sept. 29, 2008 Cleanup along Saratoga Creek at Big Basin Way (see row below: Monitoring/ Citizen Participation). The City is making efforts to reduce the overall level of	Parks & Streets Spvsrs WVCWP staff to assist

Saratoga

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 2007-2008 ANNUAL REPORT

			trash generated by residents. In conjunction with Santa Clara County Recycling and Waste Reduction Program is promoting 'garage sales' prior to the annual city-wide 'extra collections' day (unlimited curbside pick-up for residents). At the same time, the City has been developing, and is pre-promoting, a new "Community Garage Sale" program which will be implemented in FY 08-09. This is aimed at reducing trash by promoting the theme of reuse.	
	Trash Problem Area Activity Report	Provide City/ Town Specific Information Provide Program staff with specific information on trash management practices implemented within the City's jurisdiction using program-wide standardized reporting forms.	WVCWP staff used SCVURPPP's standardized reporting forms to provide data on trash monitoring and management activities at the listed problem sites. ***Trash Problem Area Evaluation Results*** for each West Valley city, as provided by the Program, are included at the end of this report section.	WVCWP staff coord with PW Analyst
	Program's Trash Work Plan	Submit Annual Report Data Submit Urban Rapid Trash Assessment Surveys, Trash Item Tally Sheets and any other data collection tool to Program staff.	Trash Assessment forms for WV cities were submitted to SCVURPPP in July 2008 for Program-wide analysis and reporting.	WVCWP staff
	SCC Trash Advisory Committee – Education sub-group	Support (TAC) Trash Advisory Committee Continue to attend Santa Clara County TAC meetings with SC County, City of San Jose and the Office of Education. Assist in development and implementation of a five-year outreach plan targeting 16 – 24 yr-olds. *Note: This committee has been renamed as the* "Silicon Valley Anti-Litter Campaign"	WVCWP Program Manager attends General meetings and Education sub-committee meetings. City of Campbell Public Works Director is Co-Chair of the finance sub-committee and a Campbell City Council Member is Co-Chair of the cleanup event subcommittee. The group and sub-committees are going forward with parallel objectives: • Host clean-up events in support of 'Keep America Beautiful' campaign • Design, purchase & distribute window clings reminding drivers to report 'litterbug' sightings (SC County) • Host telephone hotline & website to accept litterbug sightings and generate a letter to vehicle owner stating their vehicle was reported as creating litter on the streets (roads & highways, parking lots, etc)	WVCWP Staff

			• Fund/ solicit support for purchase & distribution of tarps to vehicles w/ uncovered solid waste; distribution is mainly at landfills w/ their cooperation • Begin work on 5-year plan/ strategies, including a request for needed & desired funding	
Citizen Participatio n	See PI/P – Citizen Participation	Monitoring/Citizen Participation Continue to promote citizen participation program to monitor trash near local creeks. Transfer data to trash tally sheets (element of Creek Keeper's Program). See PI/P (Section 6 of this Work Plan)	WVCWP staff conducted 3 trash monitoring / Cleanup events with student and citizen volunteers. The volunteers at all clean-up events were taught to participate in groups and learned how to use the WVCWP trash tally forms to collect the data which helps identify trash sources. **9-15-07 SanTomas Aquino Creek** WVCWP held a cleanup event at Westmont High School in Campbell. Fifty volunteers spent several hours cleaning up the creek. They removed 46 bags of garbage. **9-29-07 Saratoga Creek at Big Basin Way** Joint WVCWP/ Saratoga staff cleanup. Some volunteers helped at this cleanup in Saratoga on Big Basin Way at Hwy 9 along the parking lot and down the creek bank, where possible. This was mainly staff with a small number of volunteer residents. A total of 49 bags of garbage and recyclables were collected. Monitoring showed that the trash source was a combination of littering and illegal dumping. Litter was mainly food wrappers and alcohol & beverage containers. A file cabinet, oven, and 30 ft pipe were removed from creek side. **9-29-07 Saratoga Creek at Wildwood Park** In addition to Big Basin Way, Wildwood Park in Saratoga was cleaned by a West Valley staff member and volunteers. Trash was collected and tallied. One bag of trash was removed. **5-17-08 National River Cleanup Day – Cleanup not needed at regular site - San Tomas Aquino Creek** at Westmont High School – site was very clean WVCWP's annual site for this event was determined to be a very clean site prior to May 17, and not appropriate for	WVCWP Staff

			bringing in a large number of volunteers – i.e. there would hardly be anything to pick up. WVCWP conveyed this information to the County-wide group (Creek Connections Action Group) who concurred with the assessment. WVCWP staff instead supported the cleanup event at Lexington Reservoir Launch Ramp Lot in Los Gatos. This site was hosted by Santa Clara County Parks Dept. WVCWP staff participated as a Training opportunity in order to learn how SC County Parks host a site and handle the volunteer monitoring activities. SEE PI/P ELEMENT for additional info	
			SARATOGA: See 9-29-07 Joint WVCWP/ Saratoga staff cleanup, above: Big Basin Way along Saratoga Creek. City of Saratoga Public Works staff & WVCWP organized and promoted a Creekside Clean-up, and provided City staff.	WVCWP staff coord with PW Analyst

Trash Inventory & Management Evaluation

General Evaluation of Trash Problems

After several years of monitoring trash sites, WVCWP staff is familiar with the sites and the problems that need to be addressed. Two leading trash sources in West Valley communities are "Illegal dumping" and "vehicular litter" (found along highways, freeway-on-and-off-ramps, and smaller arterial roads). The type of litter that is retrieved is predominantly snack, food, beverage and other product packaging and cigarette butts. School lunch yards are another source of trash, and WVCWP regularly holds outreach activities at schools, including cleanups, to address this issue.

Limitations to improving litter control

Since a major source of trash in the WVC is 'vehicular litter', much of it is in CalTrans' jurisdiction, which means that the WVC often do not have direct control of addressing the litter problem. Cities would like to address litter on Highway medians and freeway on and off ramps, but those areas are under Caltrans jurisdiction. Increased communication and partnering with Caltrans are goals of the WV Communities. When a noticeable littering incident is brought to the attention of WVC/WVCWP, CalTrans is contacted and they have been responsive to removing the litter. It is hoped that WVCWP's participation in the Silicon Valley Anti-Litter Campaign *(formerly the SC County Trash Advisory Committee)* will be another means of helping to address, and conduct outreach to, vehicular littering. The first step in this process has been the initiation of a hotline allowing drivers to report vehicles which are observed in the act of littering.

In general, an impediment to more effective litter control is the common problem of lack of funding. Areas which could be helped by increased funding include:

- Cost of staff time for Stormwater Inspector, PW staff and Sheriff's Dept to patrol areas where illegal dumping occurs. Increased funding for patrols could have a big impact on trash in creeks in the WV Communities, where a number of roads border creeks in less-developed areas. Many of these roads are winding with little traffic, and appear to facilitate illegal dumping via their lack of passersby, who might otherwise deter a perpetrator.
- Cost of publicity for anti-littering campaigns and advertising creek clean-ups, community clean-ups, and e-waste recycling.

- Staff time to organize volunteer clean-ups and handle publicity.

Another major issue is homeless encampments. Placement of trash cans near homeless encampments has been discussed, but it has been determined that this can be seen as "encouragement" and then becomes a liability issue.

Dumpster Area Inspections & Education for Local Businesses

The WVCWP Inspector checks the dumpster areas of the downtown restaurants in each of the West Valley communities for signs of illegal dumping or debris around open dumpsters. He provides urban runoff education as needed, including the importance of keeping dumpster lids closed, and locked if necessary. This method of informal visits and issuing *Notices To Comply* has helped to reduce the amount of trash-related dumpster violations over the past years.

Outreach: Illegal Dumping

In a strategy to raise awareness of illegal dumping in neighborhoods, WVCWP responded aggressively to an illegal dumping incident in a Los Gatos residential area. Town of LG maintenance crews had discovered illegally dumped yard waste and trash behind houses on Montclair Rd. The site was examined by the WVCWP Inspector. The materials had been dumped near the stormwater drainage culvert, which ultimately feeds to Smith Creek.

WVCWP and Town of LG chose to raise awareness via a letter to residents, and doorhangers placed on doors in the neighborhood. Appx. 25 homes were directly contacted in this manner. These efforts were aimed at both educating residents that such dumping is illegal, and encouraging residents to call and report any such dumping they may see. This technique will continue to be used by WVC, if/when similar situations arise.

Educational Outreach to Students and Teachers in Local Schools

WVCWP staff responded to every opportunity to talk about trash and littering with students. The trash topic is always included in classroom Enviroscape presentations. Local students have been responsive to outreach efforts requesting volunteers at Clean-up events.

In FY 08-09, WVCWP will direct staff time to a new task of developing a structured Schoolyard Trash Cleanup Program with interested pilot schools.

Creek Keeper Events – Volunteer Participation - Trash Identification, Tallying & Pick-up

The WVC are all small, but have been successful in promoting volunteer participation from residents. Volunteer involvement in various clean-ups has been a measure of the success of outreach programs. A number of residents have become actively involved in clean-ups, which is also perhaps an indication of the mindset of small town residents, who may be eager to make a difference in their community. WVCWP will make efforts to continue efforts to partner with residents in combating local Trash problems.

WVCWP has been particularly successful in recruiting student volunteers for creek cleanups and the task of trash tallying. Each event is opened with a brief talk on the trash problem affecting our creeks and Bay. The WVCWP's trash tally form was designed to be easy for students to use. Categories on the form reflect the trash types that are most often found in West Valley locations. In May 2008, 2 WVCWP staff members supported a Los Gatos cleanup site hosted by SC County Parks Dept; this allowed staff to gain a perspective on methods used by the Parks Dept. to train volunteers in Trash Monitoring activities.

Volunteers have been very enthusiastic about local clean-up events.

Saratoga Creek at Big Basin Way and Sunnyvale-Saratoga Road is a heavily vegetated area with a steep bank that tends to be used for illegal dumping. Saratoga Creek lies adjacent to the parking lot of businesses along Big Basin Way; the buildings shield the parking lot from view, making it easy for perpetrators to dump into the creek without being seen. The Sheriff has been notified of the problem, and deputies patrol the area when possible.

This area of Saratoga Creek has received attention from the City of Saratoga and WVCWP, along with volunteers, for the past several years. Cleanups have been conducted along the parking lot and down the bank, where possible. Labor in 07-08 was mainly staff with the a few volunteers. A total of 49 bags of garbage

and recyclables were collected. The trash bags showed mainly alcohol, beverage containers, and food wrappers. Saratoga's maintenance staff removed several illegally-dumped items including a file cabinet, oven, and 30 ft pipe from creek side. The banks of the creek are very steep with litter lodged between trees and vegetation about 25 feet from the high-water line. WVCWP staff will continue to monitor and remove trash from the accessible areas at the edge of the downtown parking area.

Overall Trash Management Evaluation

In general, WVC residents appear to be conscientious about litter and aware of how their actions have a direct impact on 'clean/green areas'. Many residents are also avid supporters of maintaining the environment because they utilize the amenities they gain from such surroundings – biking, hiking, natural scenery, etc. Some West Valley schools have student volunteer groups that conduct schoolyard clean ups, and some have even adopted stretches of their neighboring creeks. While WVCWP conducts anti-litter outreach activities for residents, the WVC still need to address litter from vehicular traffic and illegal dumping, which may not be originating with local residents, so it is hard to address via outreach efforts in the WVC.

In this light, the WVC's best chance for success in dealing with the trash problem is to partner with other agencies and work with a well-organized regional group. WVCWP staff have become actively involved in the Silicon Valley Anti-Litter Campaign *(formerly the SC County Trash Advisory Committee)*, especially the Educational Outreach sub-group. WVCWP has also worked on developing a working partnership with CalTrans.

In its efforts to address litter problems by moving 'up' the trash stream, WVCWP will direct staff time in FY 08-09 towards developing a structured Schoolyard Cleanup Program with interested local schools. Staff will be contacting schools bordering creeks to determine interest, and developing a program which schools can institutionalize and implement on an on-going basis. It is hoped that initial efforts will prove successful, and the program can be expanded to include a number of schools. This would result in cleaner areas directly adjacent to creeks, less trash generated from school yards, and families with increased awareness of trash problems in their watershed. The goal is to move up from the creeksides, where public accessibility is limited - up the trash source line, and reduce the amount of trash that hits the ground through education and habit-forming guidance.

New data management methods within the WV Sanitation District are allowing generation of more detailed reports on stormdrain inspection findings. The WVC are working with WVSD on stormdrain report analysis related to Trash, in order to improve identification of possible Trash sources and problem areas.

Urban Rapid Trash Assessment Worksheet

Santa Clara Valley Urban Runoff Pollution Prevention Program

	CONDITION CATEGORY			
Trash Assessment Parameter	**Least Disturbed (Optimal Urban)**	**Sub optimal Urban**	**Marginal Urban**	**Poor**
5. Illegal Dumping	D: No evidence of illegal dumping. No bags of trash, no yard waste, no household items placed at site to avoid proper disposal, no shopping carts.	D: Some evidence of illegal dumping. Limited vehicular access limits the amount of potential dumping, or material dumped is diffuse paper-based debris.	D: Presence of **one** of the following: furniture, appliances, shopping carts, bags of garbage or yard waste, coupled with vehicular access that facilitates in-and-out dumping of materials to avoid landfill costs.	D: Evidence of chronic dumping, with **more than one** of the following items: furniture, appliances, shopping carts, bags of garbage, or yard waste. Easy vehicular access for in-and-out dumping of materials to avoid landfill costs.
Illegal Littering	L: Any trash is incidental litter or carried downstream from another location.	L: Some evidence of litter within creek and banks originating from adjacent land uses	L: Prevalent in-stream or shoreline littering that appears to originate from adjacent land uses.	L: Large amountof litter within creek and on banks that appears to originate from adjacent land uses.
D-SCORE	10 9	8 7 6	5 4 3	1 0
L-SCORE	10 9	8 7 6	5 4 3	2 1
6. Accum-ulation of Trash	There does not appear to be a problem with trash accumulation from downstream transport. Trash, if any, appears to have been directly deposited at the stream location.	Some evidence that litter and debris have been transported from upstream areas to the location, based on evidence such as silt marks, faded colors or location near high water line.	Evidence that trash is carried to the location from upstream, as evidenced by its location near high water line, siltation marks on the debris, or faded colors.	Trash appears to have accumulated in substantial quantities at the location based on delivery from upstream areas, and is in various states of degradation based on its persistence in the waterbody. A large percentage of trash items have been carried to the location from upstream.

Aluminum	37	rugs	
CIGARETTE BUTTS	97		
		OTHER	11

End of Day Totals

Estimate Length of creek section in miles, i.e. 1/10 mile, 1/8 mile	½ mile	Weight of recyclable trash	6 Bags
Number of bags of trash collected	49	Weight of non-recyclable trash	43 Bags

Questionnaire

1. Describe the stretch of creek monitored using descriptors of boundaries such as landmarks or cross streets. Only monitored 100 ft., cleaned approx. 400 ft of creek bank from Hwy 9 and Big Basin Way to Wildwood Park.

2. What types of trash were most commonly found? Beverage containers , liquor bottles, and food wrappers.

3. List the most unusual items found. Filing Cabinet, oven, and a 30ft pipe.

4. Rate from one to five how dirty or clean the creek was, with one being pristine clean.

STATION NAME /LOCATION: Westmont Ave. Campbell 1st Hundred feet

	CONDITION CATEGORY			
Trash Assessment Parameter	**Least Disturbed (Optimal Urban)**	**Sub optimal Urban**	**Marginal Urban**	**Poor**
1. Level of Trash	On first glance, little or no trash visible. Little or no trash evident when streambed and stream banks are closely examined for litter and debris, for instance by looking under leaves.	On first glance, trash is evident in low levels. After close inspection small levels of trash evident in stream bank and streambed.	Trash is evident in medium on first glance. Stream, bank surfaces, and riparian zone contain litter and debris. Evidence of site being used by people: scattered cans, bottles, food wrappers, blankets, clothing.	Trash distracts the eye on first glance. Stream, bank surfaces, and immediate riparian zone contain substantial levels of litter and debris Evidence of site being used frequently by people: many cans, bottles, and food wrappers, blankets, clothing.
SCORE	20 [redacted] 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
2. Actual Number of Trash Items Found	0 to 100 trash items found based on a trash assessment of a 100-foot stream reach.	101 to 250 trash items found based on a trash assessment of a 100-foot stream reach.	251 to 500 trash items found based on a trash assessment of a 100-foot stream reach.	Over 500 trash items found based on a trash assessment of a 100-foot stream reach.
SCORE	20 19 [redacted] 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
3. Transportable, Persistent, Buoyant Litter	Little or no (< 25 pieces) transportable, persistent, buoyant litter such as: hard or soft plastics, styrofoam, balloons, cigarette butts.	Low to medium presence (26-75 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, styrofoam, balloons, cigarette butts.	Medium prevalence (76-200 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, styrofoam, balloons, cigarette butts.	Large amount (>200 pieces) of transportable, persistent, buoyant litter such as: hard or soft plastics, balloons, styrofoam, cigarette butts;
SCORE	[redacted] 19 18 17 16	15 14 13 12 11	10 9 8 7 6	5 4 3 2 1 0
4. Biohazard, Toxic and Sharp Objects	B: Trash contains no medical waste, diapers, pet or human waste. No evidence of toxic substances such as chemical containers or batteries. Only 1 piece of broken glass or metal debris, if any, is present.	B: No toxic substances, but small presence (2-10 pieces) of sharp objects such as broken glass and metal debris.	Presence of **any one** of the following: hypodermic needles or other medical waste; used diaper, pet waste, or human feces; any toxic substance such as chemical containers, batteries, or fluorescent light bulbs. Medium to high prevalence (11-50 pieces) sharp objects.	Presence of **more than one** of the items described in the marginal condition category, and/or high prevalence of (> 50) sharp objects.
Site Accessibility	A: Access is difficult, restricted by locked gate or some other physical barrier like steep banks or thick riparian veg. Site reach does not appear to be used by people. Might be private property or protected watershed.	A: Access is limited and site reach does not appear to be used by people. No trails down to creek.	A: Public access to reach is fair to good but site does not appear to be used frequently, **or** private access is good without any public access.	A: Excellent reach access including trails down to and adjacent creek and creekside space for sitting down. Some evidence that reach is used frequently by the public (e.g. rope swings, many beer/soda cans and food wrappers left on the banks, etc.).

5. Illegal Dumping	D: No evidence of illegal dumping. No bags of trash, no yard waste, no household items placed at site to avoid proper disposal, no shopping carts.	D: Some evidence of illegal dumping. Limited vehicular access limits the amount of potential dumping, or material dumped is diffuse paper-based debris.	D: Presence of **one** of the following: furniture, appliances, shopping carts, bags of garbage or yard waste, coupled with vehicular access that facilitates in-and-out dumping of materials to avoid landfill costs.	D: Evidence of chronic dumping, with **more than one** of the following items: furniture, appliances, shopping carts, bags of garbage, or yard waste. Easy vehicular access for in-and-out dumping of materials to avoid landfill costs.
Illegal Littering	L: Any trash is incidental litter or carried downstream from another location.	L: Some evidence of litter within creek and banks originating from adjacent land uses	L: Prevalent in-stream or shoreline littering that appears to originate from adjacent land uses.	L: Large amountof litter within creek and on banks that appears to originate from adjacent land uses.
D-SCORE	10 9	8 7 6	5 4 3	2 1 0
L-SCORE	10 9	8 7 6	5 4 3	2 1 0
6. Accum-ulation of Trash	There does not appear to be a problem with trash accumulation from downstream transport. Trash, if any, appears to have been directly deposited at the stream location.	Some evidence that litter and debris have been transported from upstream areas to the location, based on evidence such as silt marks, faded colors or location near high water line.	Evidence that trash is carried to the location from upstream, as evidenced by its location near high water line, siltation marks on the debris, or faded colors.	Trash appears to have accumulated in substantial quantities at the location based on delivery from upstream areas, and is in various states of degradation based on its persistence in the waterbody. A large percentage of trash items have been carried to the location from upstream.

Annual Cleanup Program

West Valley Collection & Recycling (WVC&R) will collect an unlimited number of items from your curb at no additional cost for one day only.

Please have your items, containers and bundles curbside by

6 AM on Monday, February 18, 2008

WVC&R will collect:

- Items weighing up to 70 pounds (except as described below)
- Garbage in 32 gallon plastic bags, 32 gallon cans, and sturdy cardboard boxes (all small items must be contained)
- Tree prunings, branches and scrap wood up to 3" in diameter and 3' long in tied bundles weighing up to 70 pounds

WVC&R will not collect:

- 35, 65 or 95 gallon wheeled carts (they are awkward to lift manually)
- Concrete or Dirt (call Guadalupe Landfill 408.286.1670)
- Tires (call Guadalupe Landfill 408.286.1670)
- Items containing CFC's such as refrigerators (call WVC&R 408.283.9250)
- Hazardous Waste (call 408.299.7300 or visit www.hhw.org)
- E-Waste, Universal Waste, Motor Oil and Water Based Paints:
  - You can drop off TV's, Computers, household batteries, motor oil and water based paints at WVC&R's processing facility by appointment. For more information call customer service at 408.283.9250 or visit www.westvalleyrecycles.com
- Large items or containers over 70 pounds:
  - WVC&R will collect large items such as sofas and refrigerators for a fee. To schedule an appointment please call customer service at 408.283.9250

WVC&R makes it easy for you to donate your reusable items. For assistance locating local charitable organizations, visit www.westvalleyrecycles.com or call 408.283.9250.

Please remember to place recyclables in your recycling cart for your regular weekly collection.

To learn more about any of these programs visit www.westvalleyrecycles.com or call customer service at 408.283.9250.

Mr. Bruce H. Wolfe
Executive Officer
San Francisco Bay Region
Regional Water Quality Control Board
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: Sunnyvale Urban Runoff Management Program FY 2007-2008 Annual Report

Dear Mr. Wolfe:

This report is submitted by the City of Sunnyvale, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's municipal storm water NPDES Permit. The report summarizes activities performed during FY 2006-2007 in accordance with the City of Sunnyvale's Urban Runoff Management Plan (URMP) submitted on September 1, 2005, which contains modifications to the performance standards from the original URMP first submitted in 1997.

The goals of this Annual Report are to: 1) concisely document implementation of the URMP during the past fiscal year; 2) evaluate program results for continuous improvement; and 3) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following Attachments:

A. Certification statement
B. ICID Elimination Activities
C. Industrial/Commercial Discharger Control Program
D. Public Agency Activities
   1. Public Streets, Roads, and Highways O&M
   2. Rural Public Works O&M
   3. Storm Drain O&M
   4. Water Utility O&M
   5. Corp Yard O&M
E. New Development Planning Procedures
F. Construction Inspection
G. Public Information and Participation
   - General Outreach
   - Targeted Outreach
   - Educational Programs
   - Citizen Participation
H. Pesticide Management Activities
I. Mercury Pollution Prevention Activities
J. Copper Action Plan/Nickel Action Plan

ADDRESS ALL MAIL TO: P.O. BOX 3707 SUNNYVALE, CALIFORNIA 94088-3707

K. Trash Inventory and Management
L. Water Quality Monitoring
M. Staff Training Summary Table
N. Watershed Management Activities
O. PCB Plan Development
P. Watershed Measures: Sediment Impairment Studies
Q. Storm Water Permit Renewal Activities

No comments were received from Regional Water Quality Control Board Staff on the FY 06-07 annual report submitted by the City, consequently, the report is substantially the same format as past years.

A summary of the City of Sunnyvale's Urban Runoff Program highlights and accomplishments are described below:

1) A significant amount of staff time and effort continues on work to implement the C.3 provisions of the permit for applicable projects (i.e., those that add or replace 10,000 square feet or more of impervious area), construction inspection, and implementation of post-construction inspections as C.3 applicable projects are completed. Several of the initial projects approved under the C.3 requirements are complete and have undergone post-construction inspections this year. Reports on the post-construction inspections of those projects are included in this report in Attachment E, Appendix 1 Table 2.

2) For the past three years, Sunnyvale has completed a number of trash assessments using both the Keep America Beautiful and the Urban Rapid Trash Assessment (URTA) methodology. Rather than continue devoting resources to assessing trash problem areas in Sunnyvale using the URTA methods, new actions were initiated to help remove and prevent litter from entering waterways. Only two locations were assessed on the Sunnyvale East and West Channels in FY 07-08 using the URTA, which are storm drain conveyances for a significant portion of the city.

The new efforts that were initiated in FY 07-08 to address the trash/litter accumulation in storm drains and waterways issue were:

- Sunnyvale participated in the Great American Litter Pick Up event held in April 2008, that focused on removing litter from two Sunnyvale neighborhoods (approximately 2 square miles)
- Sunnyvale participated in the National River Clean Up Day in May 2008 and with volunteers, picked up litter and debris from 1.9 miles of the Sunnyvale East Channel, from its connection to the Guadalupe Slough to the Hetch-Hetchy Greenbelt Park.
- In cooperation with SCVURPPP and the City of San Jose, Sunnyvale is participating in the pilot storm drain retrofit project. A total of twelve storm drain inlet inserts that have been certified to meet the "full capture" criteria established by the Los Angeles area Regional Board were installed in areas around the city. One more insert is scheduled for installation this summer. The sites selected were based data collected from inlet cleaning and on observations of adjacent land uses that may contribute to accumulations of litter. Preliminary data regarding the types and quantities of materials captured by these devices

are included in this report in Attachment K, Appendix 1. Operations and maintenance requirements for the units as well as costs associated with them will be a major focus of this pilot project, with the information to be reported at the end of the pilot.

3) The PI/P Program continued with its effective outreach to local residents at the Sunnyvale Farmer's Market, school presentations, neighborhood and corporate fairs, pancake breakfasts, and many other community events, providing a good venue for distribution of literature and 1:1 discussions with residents on the importance of and ways to prevent storm water pollution. Descriptions of these activities and their effectiveness are included in Attachment G.

4) City staff played a significant role in developing and implementing the first Santa Clara Valley Green Gardener Training/Certification program, in cooperation with other co-permittees, the Metropolitan Adult Education Program in San Jose, and the Santa Clara County Master Gardeners. This training program for landscape maintenance workers, landscape contractors, and professional gardeners was held from February – April 2008, with 27 individuals successfully completing the attendance and final exam requirements for the class.

The Green Gardener program originated in Santa Barbara and has been successfully implemented there, as well as in Monterey and Santa Cruz counties. The main focus of the training is to reduce urban stormwater pollution resulting from landscape management practices, to use resources wisely, and to practice the key principles of ecological landscaping. Students received 20 hours of training in the following topics: promoting healthy soils, Integrated Pest Management (IPM), fertilizer use and application, irrigation techniques, scheduling, and troubleshooting, selecting the right plants for the right place, proper pruning, the beneficial uses of mulch and compost, and issues related to air quality from maintenance equipment.

The successful students and their businesses are being promoted to the public through outreach efforts, and encouraging residents and businesses to choose Green Gardeners for their landscape maintenance needs. Response to the class has been very good, and two more classes will be offered in the fall semester of 2008, one in English and the other in Spanish. See Attachment K for more details on the program.

Thank you for your review of this Annual Report. We look forward to receiving any comments you may have. If you have any questions regarding the materials submitted, please contact Kristy McCumby Hyland at (408) 730-7274.

Sincerely,

Lorrie B. Gervin, P.E.
Environmental Division Manager

Performance Standard Completion Certification Statement

"I certify, under penalty of law, that the City of Sunnyvale has implemented all elements of the following performance standards, except as described in the Self-Evaluation Matrix in Attachments B - Q of this FY 07-08 Annual Report, according to the policies and procedures described in the City of Sunnyvale's Urban Runoff Management Plan dated September 1, 2004:

- Illicit Connection and Illegal Discharge Elimination Activities
- Industrial/Commercial Discharger Control Program
- Public Streets and Roads Operations and Maintenance
- Storm Drain Operation and Maintenance
- Water Utility Operation and Maintenance
- Corporation Yard Operation and Maintenance
- Rural Public Works Operation and Maintenance
- New and Redevelopment Planning Procedures
- New and Redevelopment Construction Inspection Procedures
- Public Information and Participation
- Integrated Pest Management

Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, this information is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

Attachment B

IC/ID Elimination Activities

P.S. Id.	Activity	CI Item Source[1]	FY 07-08 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Illicit Connection & Illegal Dumping Elimination Activities						
	Effectiveness Evaluation of Enhanced Illicit Connection/Illegal Discharge (ICID) Reporting	Permit Prov. c.6.a.ii	Compile results recorded on the IC/ID standard reporting form for Type of Incident and Source of Incident. Identify new public outreach efforts and improve on existing materials. Continue to collect data for enhanced IC/ID reporting.	• The Pretreatment Program continues to compile results on the IC/ID standard reporting form for the Type of Incident and Source of Incident. • Efforts to identify new public outreach materials and venues continue. Residential sources continue to be the most prevalent sources of incidents, and among those, pools / spas / and fountain discharges are the most common type of incident.	Annually Report 09/08	Dave Grabiec, Laboratory/Pretreatment Mgr.
ICID-3a	Annual Training	URMP	Continue annual training for staff regarding IC/ID storm water inspection procedures, enhanced reporting requirements for ICID incidents, effectiveness evaluation and public outreach.	• Three staff members attended the CWEA Annual P3S Conference in Long Beach, February 2008. • ICID storm water inspection procedures and inspection / enforcement results are discussed during weekly tailgate meetings. • Topics of discussion include proper categorization of source and types of incidents in accordance with enhanced reporting requirements.	Annually Report 09/08	Dave Grabiec, Laboratory/Pretreatment Mgr & Kristy McCumby.

[1] Place where continuous improvement item is identified: e.g. Urban Runoff Management Plan (URMP); **WP 07-08** (last year's Sunnyvale work plan); **Permit Provision** from Order No. 01-024 and Revised Order No. 01-119; Program Work Plan (**PWP**) task number submitted to the Regional Board and identified for inclusion into co-permitees in work plans; or **Program** (task approved by the Management Committee for all co-permittees). The **P.S. Id.** column refers to the specific performance standard in the Sunnyvale URMP.

ICID-3.b	Restaurant IC/ID Reporting	URMP	Continue to review the effectiveness of Restaurant BMP materials. Note problem practices observed. Follow up with appropriate changes to educational materials and/or enforcement actions, as needed.	• The Pretreatment Program continues to evaluate the effectiveness of Restaurant BMP materials in use. Participation in regional groups such as BAPPG has given additional insight to new educational materials that may benefit the City's program and be implemented within restaurants. • Problem practices within restaurants are recorded on inspection forms, and will be used to evaluate educational materials provided in the future; and are used to implement enforcement actions.	Annually Report 09/08	Dave Grabiec, Laboratory/Pretreatment Mgr.
ICID-5a	Effectiveness Evaluation	URMP	Evaluate responses to reported incidents and complaints. Determine effectiveness of program through review of ICID incident responses and resolution efforts. Identify areas for improvement.	All responses to reported incidents and complaints occur within the time allotted in our performance standard (5 business days), and in a majority of cases are responded to within one day of the complaint. The program follows through with each incident until it is resolved, usually through education and communication, and rarely resulting in increased enforcement actions.	Annually Report 09/08	Dave Grabiec, Laboratory/Pretreatment Mgr.
ICID-5b	Performance Standard revision	URMP	Review the IC/ID Performance Standards with staff. Draft new performance standards, as necessary, to meet the needs identified in the effectiveness evaluation of the enhanced IC/ID program. Implement changes, as needed.	In anticipation of the new Municipal Regional Permit, no new Performance Standards have been drafted.	Annually Report 09/08	Dave Grabiec, Laboratory/Pretreatment Mgr.

Response to Regional Board Comments on ICID Activities section of FY 06-07 Annual Report:

No comments were received from the Regional Board on this section.

City of Sunnyvale

FY 07 - 08 Annual Report

Attachment C

Industrial/Commercial Discharger Control Program

P.S. Id.	Activity	CI Item Source	FY 07-08 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Industrial/Commercial Discharger Control Programs						
ICD-3(a-d)	General Industrial Permit Facilities	URMP	Complete annual inspection of all industries regulated under Industrial Permit (NOI Filers).	Inspection report reviews and/or inspections were conducted on the NOI filers. SSO prevention occurred by inspecting of food service establishments with grease interceptors by measuring the FOG contents.	Annually Report 09/08	Dave Grabiec, Laboratory/Pretreatment Mgr.
ICD-4	Field Investigation	URMP and Program Task	Review SWID location lists from SCVWD and facility inspections by Sunnyvale staff. Evaluate known SWIDs for potential pollutant sources that could impact groundwater.	There were no SWIDs identified during FY 07-08.	Annually Report 09/08	Dave Grabiec, Laboratory/Pretreatment Mgr.
ICD-7.a	Record Keeping	URMP	Continue efforts to improve record keeping activities. Discuss progress at staff meetings.	• The Pretreatment Program addresses all threatened and actual discharge events to ensure that enforcement and related documentation is maintained. • The internally developed database provides extensive capabilities for reports, report revisions and database development. These features increase our capability to document effectiveness, trends and to fulfill the program standards.	Annually Report 09/08	Dave Grabiec, Laboratory/Pretreatment Mgr.
ICD-7.a	Performance Standard revision	URMP	Review existing performance standards and draft new performance standards, as necessary as a part of continuous improvement.	The Pretreatment Program did not make any changes to the Performance Standards in FY 07-08. The issuance of the new Municipal Regional Storm Water Permit will direct changes in future performance standards.	Annually Report 09/08	Dave Grabiec, Laboratory/Pretreatment Mgr.

ICD-7.a	Annual Training	URMP	Continue annual training for staff regarding industrial/commercial storm water inspection procedures, enhanced reporting requirements for ICD inspections, effectiveness evaluation and public outreach.	• Pretreatment staff attended several storm water sessions provided by SCVURPPP, and one session was hosted by the City of Sunnyvale. • In addition three personnel attended the CWEA Annual P3S conference in Long Beach. • See Attachment M for specific training completed by City personnel.	Annually Report 09/08	Dave Grabiec, Laboratory/Pretreatment Mgr.
	Enhanced Industrial/Commercial Discharger (ICD) Reporting	Permit Prov. C.6.a.i	Continue to collect data for enhanced ICD reporting. Coordinate with Program staff and share ICD information on a regular basis.	• Enhanced reporting data continues to be submitted to the SCVURPPP on a quarterly basis. See Appendix 1 of this attachment for IND report information. IND report information is discussed at staff meetings to assess outreach or enforcement needed and program effectiveness. • Communications with Public Works Sewer and Water Division includes sewer line blockage reporting for data input and related follow up.	Annually Report 09/08	Dave Grabiec, Laboratory/Pretreatment Mgr.

FY 07 - 08 Annual Report

Attachment D-1

Public Streets, Roads, and Highways Operation and Maintenance

P.S. Id.	Activity	CI Item Source	FY 07-08 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Public Streets, Roads, and Highways Operation and Maintenance						
ST-1	Use of O&M Pollution Control Measures	URMP	Continue full implementation of O&M measures. Report on implementation in Annual Report.	O&M Measures were implemented on a daily basis throughout the year, with all Field Services staff receiving training on the measures.	Annually Report 09/08	Tony Pineda, Street Mnt. Sup.
ST-2	Record Keeping	URMP	Continue to track incidents that Street Maintenance staff responds to. Notify Pre-treatment Program of ICID incidents that may impact storm drains or water quality. Include staff training on enhanced ICID reporting requirements.	No incidents were reported by Field Services staff during FY 07/08. Annual training on incident reporting process to notify Pretreatment Program was conducted on September 11 and 12, 2007.	Annually Report 09/08	Tony Pineda, Street Mnt. Sup. & Dave Grabiec, Lab./Pretreat. Mgr.
ST- 2	Streets and Roads O&M	URMP	Continue to track and report on the quantities of debris removed through street sweeping activities.	Streets and Roads O&M measures/BMPs for storm water pollution prevention were discussed at tailgate meetings for staff training. SOP review was not deemed necessary this year since they were recently revised and are still current.	Annually Report 09/08	Tony Pineda, Street Mnt. Sup & Kristy McCumby PW Env. Spec.
ST – 4	Staff Training	URMP	Continue to train staff on requirements of Storm Water Permit and on BMPs for street sweeping effectiveness.	Ongoing training, improving techniques and improved equipment will help our operation effectiveness. See Attachment M for staff training dates.	Annually Report 09/08	Tony Pineda, Street Mnt. Sup & Kristy McCumby/ PW Env. Spec.
ST-6	Streets and Roads O&M	URMP	Annually review and evaluate effectiveness of O&M pollution control measures and BMPs.	Ongoing training, improving techniques and improved equipment will help our operation effectiveness.	Annually Report 09/08	Tony Pineda, Street Mnt. Sup.

Response to Regional Board Comments on Public Streets, Roads, and Highways O&M Activities section of FY 06-07 Annual Report:

City of Sunnyvale

FY 07 - 08 Annual Report

Attachment D-1 – Appendix 1

Street Sweeping Data Collected for FY 07- 08

Santa Clara Valley
Urban Runoff
Pollution Prevention Program

FY 2007-2008 Annual Record Keeping Form

Year: FY 07-08

Agency: City of Sunnyvale

Completed by: Brendan McCarthy, Administrative Aide **Date:** 7/15/08

STREET SWEEPING	Volume of material collected (cubic yards)	Miles swept* (curb miles)
1. Sweeping		
Residential Areas:		
Broom		
Regenerative Air	5398.5	10,478
Vacuum		
Commercial Areas:		
Broom		
Regenerative Air	1618	4290(1)
Vacuum		
Industrial Areas:		
Broom		
Regenerative Air		(1)
Vacuum		
Other Areas Swept: (e.g., parking lots, major arterials)		
Broom		
Regenerative Air		
Vacuum		(1)
TOTAL	7016.5	14,768

2. Have there been any changes in your street sweeping program?
(efforts to have parked cars removed, changed sweeping frequency, new equipment, significant downtime, etc.)
Sweeping is scheduled once per month in residential areas, more frequently in commercial areas. When requested, staff will post "No Parking" signs to remove parked cars in problem areas. Frequency is increased during heavy leaf drop season, and returned to reduced schedule during other seasons.

LEAF REMOVAL

Volume of leaves removed by City/Town crews: 2250 cubic yards

Leaves bagged by residents and picked up by your City/Town: N/A bags

Check box if you have a yard waste collection program: X Volume of yard waste collected: 1,158 tons (2) ~~cubic yards~~

Check box if you do not have a leaf removal program other than routine street sweeping or yard waste collection: ☐

- Report total miles covered by sweepers including areas operated in tandem or repeated.

(1) These areas are all swept together (commercial, industrial, parking lots, arterials, no individual numbers are available.

(2) This is the total of yard waste trimmings from single family homes in FY 06-07 – numbers not yet available for FY 07 -08, but this is a typical annual number

Attachment D-2

Rural Public Works Operation and Maintenance

P.S. Id.	Activity	CI Item Source	FY 07-08 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Rural Public Works					
	Rural Public Works Activities	Permit Prov. C.5	Implement applicable Rural Public Works Performance standards and BMPs. Continue education of Parks and Rec. and Field Services staff regarding rural PW BMPs and performance standards.	Staff training on Rural PW performance standards occurred on September 12 and 13, 2006. It also included training on BMPs in other streets and roads annual training. No maintenance by PW staff was required this year within the area identified in the URMP for Rural Public Works activities in FY 07-08. Field services and Parks and Rec. supervisors in charge of performing any road/trail maintenance activities in the areas identified where these performance standards apply were provided refresher training on the URMP requirements for BMPs needed for these projects when they occur.	Ongoing Report 09/08	Kristy McCumby, Environmental Specialist, Parks / Rec. (Scott Russell) & Public Works (Tony Pineda)

Response to Regional Board Comments on Rural Public Works Activities section of FY 06-07 Annual Report:

No comments were received from the Regional Board on this section.

FY 07 - 08 Annual Report

Attachment D-3

Storm Drain Operation and Maintenance

P.S. Id.	Activity	CI Item Source	FY 07-08 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Storm Drain System Operation and Maintenance						
SD-1	Storm Drain O&M Pollution Control Measures	URMP	Continue program to re-label storm drain inlets with identification tags or stenciling with "No Dumping, Flows to Bay" messages.	No new "Flows to Bay" markers were installed on storm drain inlets during FY 07/08 as there were no monies or hours allocated to perform this work approved in this past budget process.	Report in 09-08	Jim Craig/ Tony Pineda, PW/ Field Services
SD-2	Reporting of Observed ICID Evidence	URMP and Permit Prov. C.6.a.ii	Continue to train maintenance staff on procedures to notify Pretreatment Inspectors about observed ICID incidents and assist with the collection of data needed for enhanced reporting.	Annual staff training was provided to Corp Yard staff in September and April on how to notify Pretreatment Inspectors on ICID incidents observed. The ICID response "business card" is provided to all staff and placed in vehicles with contact information for PT inspectors. Examples of the types of incidents to report are included to assist PT Inspectors with enhanced reporting data collection	Annually Report in 09/08	Dave Grabiec, Laboratory/ Pretreatment Mgr. & Jim Craig, Superintendent of Field Services
SD-3	Effectiveness Evaluation	URMP	Include O&M Performance Standard Implementation discussion in staff training; summarizing feedback in written form.	Evaluations made during tailgate discussions with staff concluded that no improvement of the current standards was needed at this time. Pending the adoption of the Regional Municipal Stormwater Permit, O&M performance standards will be reviewed and revised, as needed.	Annually Report 09/08	Jim Craig, Superintendent of Field Services
SD-4	Structural Retrofit Evaluation	URMP	Participate with SCVURPPP in pilot project to identify effective methods of reducing litter from entering storm drain system through the use of catch basin screens or other mechanisms. Evaluate costs associated with operations and maintenance needed to maintain effectiveness of mechanisms.	Field Services crews working with the environmental specialist and a vendor recently retrofitted 12 Storm Drain Inlets with full-capture trash control devices and will be evaluating their effectiveness and operational costs in the upcoming FY. • See Attachment K, Appendix 1 for details on the pilot project.	Report in 09-08	Kristy McCumby/ PW/Env. Spec. & Jim Craig/ Tony Pineda, PW/ Field Services

Storm Drain System Operation and Maintenance (cont.)						
SD-5	Storm Drain O&M	URMP	Annually review and evaluate effectiveness of O&M pollution control measures	O&M measures were discussed by staff during Tailgate meetings throughout the year and no O&M changes were deemed necessary at this time. No changes were made to the Corp Yard Storm Water Pollution Prevention Plan, which was updated in FY 05-06.	Annually Report 09/08	Jim Craig, Superintendent of Field Services

Response to Regional Board Comments on Storm Drain O&M Activities section of FY 06-07 Annual Report:

No comments were received from the Regional Board on this section.

FY 07 - 08 Annual Report

Attachment D-4

Water Utility Operation and Maintenance

P.S. Id.	Activity	CI Item Source	FY 07-08 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Water Utility Operation and Maintenance						
WU-1	Inventory of Key O&M Activities	URMP	Inventory all key water utility O&M activities to identify routine and unplanned non-storm water discharges every three years. Modify as needed, in alternate years.	Activities were reviewed and no modifications were needed this year. Re-evaluate key activities in FY 08-09.	Ongoing Report O9/08	Jim Craig, Sup. of Field Services & Val Conzet, Water PW Supervisor
WU-2	Pollution Control Measures Implementation	URMP	Review and update SOPs	A review and update of SOPs was conducted in FY 06-07. It was determined that no changes need to be made at this time. This will be revisited in the coming year, pending adoption of the MRP.	Report 09/08	Val Conzet, Water PW Supervisor Support: Kristy McCumby, Env. Specialist.
WU-3	Staff Training	URMP	Provide staff training on the regulatory requirements of the URMP and the use of the WUPPP.	Staff training was included in the September 2007 staff training. See Attachment M for staff training details.	Ongoing Report 09/08	Jim Craig, Sup. of Field Services & Val Conzet, Water PW Supervisor
WU-5	WUPPP	URMP	• Annually review and evaluate effectiveness of Water Utility Pollution Prevention Plan. • Update contact lists in the plan. • Use both staff and contractor (if appropriate) feedback.	• FY 06-07 review determined that plan was effective as is. No updates were needed this year. • Review will continue over the coming year and modifications made pending adoption of the MRP.	Annually Report 09/08	Jim Craig, Superintendent of Field Services & Val Conzet, Water PW Supervisor
	Performance Standard Review and Revision	URMP	Participate in SCVURPPP Work Group that will be formed to update the Water Utility Operation and Maintenance Performance Standards	SCVURPPP Work Group for Water Utility O&M performance standards did not meet in FY 07-08, pending adoption of language in the MRP. The City will participate in the work group when it convenes.	TBD Report 09/08	Val Conzet, Water PW Supervisor Support: Kristy McCumby, Env. Specialist.

Response to Regional Board Comments on Water Utility O & M Activities section of FY 06-07 Annual Report:

FY 07 - 08 Annual Report

Attachment D-5

Public Agency Activities: Corp Yard

P.S. Id.	Activity	CI Item Source	FY 07-08 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Corporation Yards Operation and Maintenance (Including Parks Division)						
Corp Yard SWPP	Staff Training	URMP	Hold annual Public Works staff training regarding the SWPPP for Corporation Yard.	One hour training conducted by Meredith Durant of Kennedy/Jenks consultants on 4/10/08. Training covered SWPPP, and general hazardous materials handling based on her facility inspections. Training was required for all Field Services Staff.	Annually Report 09-08	Jim Craig, Superintendent of Field Services
Corp Yard SWPP	Staff Training	URMP	Hold annual Parks and Recreation staff training regarding the SWPPP for the Corporation Yard	Annual training event for Parks and Recreation staff included the City of Sunnyvale Corp Yard Stormwater Pollution Prevention Plan. See attachment M for details.	Annually Report 09/08	Curtis Black, Parks Superintendent With assistance from the Environmental Division of Public Works
Corp Yard SWPP	Annual Meetings with O&M Supervisor	URMP	Meet annually with URMP Coordinator /staff and CY supervisors on progress and problems in implementing BMPs at the Corporation Yard.	Ongoing meetings with CY staff and leadership re: implementation. Progress deemed sufficient at this time. This will be re-evaluated throughout the coming year.	Annually Report 09/08	Jim Craig, Superintendent of Field Services

Response to Regional Board Comments on Corporation Yards O & M Activities section of FY 06-07 Annual Report:

No comments were received from the Regional Board on this section.

City of Sunnyvale

FY 07 - 08 Annual Report

Attachment E

New Development Planning Procedures

Sant ra Valley Urban Runoff Pollution Prevention Program
FY 2007-2008 Annual Work Report
Municipality: Sunnyvale
Attachment E

P.S. Id.	Activity	CI Item Source	FY 07-08 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
New Development and Construction Controls -- Planning Procedures						
PL-2	Site Design Guidance to Developers	URMP	Provide information and guidance material to developers early in the project development process regarding site design requirements for stormwater pollution prevention and treatment.	Information on the requirements for site designs to meet storm water permit C.3 provision requirements are provided either on CD or as hard copies to project proponents. The City's Stormwater BMP Guidance Manual was revised in January 2007 and continues to be provided upon request. Access to the manual (two volumes) is also available from the city's website in the Planning Department section at http://sunnyvale.ca.gov/Departments/Community+Development/Planning+Division/Commercial-Industrial+Planning/Stormwater.htm	Ongoing Report 09/08	Mariya Hodge, Assoc. Planner Support: Kristy McCumby, Env. Spec.
PL-10	Staff Training	URMP	Provide staff training (PW and CDD) on policies, design guidelines, and pre- and post construction BMPs and control measures.	• Staff is updated on a quarterly basis on any changes in the program and staff received annual refresher training in May 2008. • New staff members are provided with a one-on-one SWMP training as part of their orientation. • Staff training received this year included a refresher on the City's BMP Guidance Manual, as well as information on potential future changes to the amount of impervious surface triggering the requirement for a SWMP. • Public Works staff attended the SCVURPPP C.3 workshop in June 2008 for post-construction inspection training. • See Attachment M for details on staff training.	Annually Report 09-08	Mariya Hodge, Assoc. Planner Support: Kristy McCumby, Env. Spec.

New Development and Construction Controls -- Planning Procedures (cont.)						
PL-11	Planning Procedure Performance Measures	URMP	Review performance measures in order to evaluate effectiveness and identify any changes that are needed.	Performance measures are reviewed on an annual basis to determine program effectiveness and opportunities from improvement. No changes were identified for this year.	Annually Report 09-08	Mariya Hodge, Assoc. Planner
PL-8b	Effectiveness Evaluation	URMP	Include Planning Procedures Performance Standard Implementation discussion in staff training; summarize feedback in written form.	Annual staff training includes information on any program changes related to enhancing program implementation. Feedback was received verbally and no changes were needed.	Annually Report 09-08	Mariya Hodge, Assoc. Planner
C.3 b Development Project Approval Process						
	Revise URMP Planning Procedures Perf. Standards	Order 01-119 PWP C.3 b.1	Review Program Guidance as it becomes available. Identify new Planning Procedures Performance Standards and/or revise existing standards as needed, based on Program guidance.	• New program guidance is reviewed when received, and the program procedures and materials are revised as appropriate. • SMWP manual was updated last year to reflect changes in program and program improvements. No new guidance on the revision of existing performance standards was received in FY 07-08. • Current performance standards are being implemented.	Ongoing Report 09/08	Mariya Hodge, Assoc. Planner and Kristy McCumby, Env. Spec.
	Project Review Process Training	Order 01-119 PWP C.3 b.3	Annually train Planning and Public Project staff on C.3 provisions, goals, and changes in the approval process and use of appropriate tools.	Planning and Building staff, Public Works CIP staff, and Pretreatment inspectors who do post-construction BMP inspections received refresher training on the Sunnyvale Storm Water BMP Guidance manual. This included the C.3 provision requirements, the City's project approval process, HMP applicability areas, coordination between departments and divisions, and ways improve communication. Training occurred in May, 2008. (See Attachment M for details.) No changes to the approval process or the BMP Guidance Manual were identified for this fiscal year.	Annually Report 09/08	Lead: Mariya Hodge, Assoc. Planner & Gordon Blancher Build. Inspector Support: Nasser Fakih & Kristy McCumby

C.3.c Requirements for Group 1 and Group 2 Projects						
	Collect information for "Enhanced Reporting"	Order 01-119 PWP C.3 c.1	Collect information on each project (both public and private projects) covered by the enhanced performance standard for enhanced annual reporting requirements. Projects that add or replace over 10,000 sq ft of impervious area are now reported.	Data is collected on projects covered by the enhanced performance standard for annual reporting requirements. All relevant projects (adding or replacing over 10,000 sq ft of impervious area) are reported. (See Table 1, Parts 1 and 2, of this Attachment for data collected in FY 07-08)	Ongoing Report 09/08	Mariya Hodge, Assoc. Planner (Private Projects) & Nasser Fakih PW (Public Projects)
C.3.e Operation and Maintenance of Treatment BMPs						
	Operation and Maintenance of Treatment BMPs	Order 01-119 PWP C.3 e.1	Continue to track information about treatment BMPs installed at approved projects that add or replace 10,000 sq. ft. of impervious area. Lists of properties, type of treatment BMP, and operators responsible for BMP maintenance will be tracked.	• The required information is tracked for treatment BMPs installed on approved projects/applicable projects. The FY 07-08 data is included in Attachment E, Appendix Table 1 of this report. Information is provided to Pretreatment staff to assist with post-construction inspections. • The Pretreatment Program finds this information most useful when determining when and where to perform O&M verification inspections. Continuing to have up to date and accurate information is beneficial.	Ongoing Report 09/08	Lead: Mariya Hodge, Assoc. Planner & Gordon Blancher Building Insp. Support: Public Works, Env. Div. Staff
	Long-term Maintenance of Treatment BMPs	Order 01-119 PWP C.3 e.3	Implement model agreement language for O&M of treatment BMPs to meet Sunnyvale needs. Incorporate requirements for long-term maintenance for all applicable projects (those that add or replace more than 10,000 sq. ft of impervious area).	• SMC 12.60 was amended to include all projects that add or replace 10,000 square feet of impervious area for C.3 compliance in October 2005. • Long-term maintenance requirements are included as Conditions of Approval and will continue to be incorporated as part of the project approval process. • Future program improvements may include developing a method of ensuring the O&M responsibilities are clearly communicated during the transition from the developer to the responsible owner operator.	Ongoing Report 09/08	Lead: Dave Grabiec, Support: Mariya Hodge, Assoc. Planner & Gordon Blancher, Bldg Insp. Coord.

C.3.e Operation and Maintenance of Treatment BMPs (cont)						
	Effectiveness Evaluation of Inspection of Treatment BMPs	Order 01-119 PWP C.3 e.4	Incorporate long term Operations and Maintenance requirements into project approval process per SMC12.60.200.	Community Development and the Environmental Division continue to require applicable projects to incorporate long term BMP Operations and Maintenance agreements per SMC 12.60.200. The long-term O&M requirements are incorporated through the Storm Water Management Plan review process.	Ongoing Report 09/08	Dave Grabiec, Laboratory/ Pretreatment Mgr.
	Annual report of treatment BMPs and ongoing verification program	Order 01-119 PWP C.3 e.6	Review and evaluate the effectiveness of the Operations and Maintenance Verification Program. This includes evaluating O/M Verification procedures, BMP inspection procedures, and evaluating and summarizing any improvements to the Program.	• The O&M post-construction inspections are completed within one year after the occupancy of the project occurs. • An evaluation of the post-construction inspection program is included with Attachment E, Appendix Table 2 • The Environmental Division continues to coordinate with CDD to ensure the most effective methods of incorporating long term maintenance agreement requirements into applicable projects. • We continue to work with the Program to revise information collected from post-construction inspections as needed. • We identify revisions to post-construction inspection program and implement them as necessary, to improve effectiveness of post-construction storm water treatment BMPs.	Ongoing Report 09/08	Dave Grabiec, Laboratory/ Pretreatment Mgr.
C.3.f Hydromodification Management Plan						
	Implementation of HMP as required for projects that add or replace one-acre or more of impervious surface.	Order 01-119 PWP C.3 f.3	Implement HMP requirements for projects located in the HMP applicability areas identified in Sunnyvale. Projects must meet the impervious surface size threshold of the HMP and have the potential to cause increased erosion or other related impacts to non-exempt waterways.	• The parcels that meet HMP implementation criteria within Sunnyvale's jurisdiction have been identified. • HMP actions for these parcels will be applied, if the sites are redeveloped. • No HMP –applicable projects were identified in FY 07-08	Ongoing Report 09/08	Lead: Planning and PW/ PW Env. Division staff

C.3.g Waiver and Compensatory Mitigation Program						
	Local waiver program	Order 01-119 PWP C.3 g.2	Continue tracking information on any projects with a Compensatory Mitigation Program approved by the City. Include project name, location, type, percent impervious surface, reasons for and terms of the waiver, and the alternative benefit project and completion date	No waiver requests have been received to date. CDD Planning and PW Engineering will continue to track any approvals granted under this program and provide them to PW Environmental staff for inclusion in the Annual report.	Ongoing Report 09/08	Lead: Planning, and PW Staff (TBD) Support: Lorrie Gervin/PW Env. Div. staff
C.3.j Site Design Measures Guidance and Standards Development						
	Modify local project approval process	Order 01-119 PWP C.3 j.4	Report on the status of review, revision and implementation of site design guidance and standards changed as a part of the City's project approval process to address the Development Policy - Compare and Contrast document. The proposed changes submitted with September 2004 annual report are used as a guide.	Site design guidance from the Development Policy Review project document has been implemented and staff have incorporated issues of environmental concern (e.g., avoiding the use of ornamental copper) into the information provided to developers and into the recommended Conditions of Approval attached to conditionally approved permits. Most of the guidance is already formally included in the Zoning Code, General Plan Elements, and/or other City documents. However, the ornamental use of copper has not yet been formally incorporated. Staff will formally incorporate this when the relevant documents are next updated. In the meantime, Planning staff practice is to prohibit ornamental use of copper in exterior applications.	Ongoing Report 09/08	Lead: Mariya Hodge, Assoc. Planner Support: PW engineering, PW Env. Div.

	C.3.h Alternate Certification					
	Identify projects that have been certified by other parties	Order 01-119 PWP C.3.h	Summarize those stormwater management plans certified by a firm listed on the Qualified Consultants List the City developed in the Annual Report.	• Qualified Consultant list was updated in FY 06-07 and is used for projects. The next scheduled update of the list will occur in FY 08-09, pending the adoption of the MRP • All projects where C.3 requirements are applicable (as listed in Attachment E, Appendix Table 1) must prepare a Storm Water Management Plan (SWMP). All SWMPs must be certified as meeting the requirements of SMC 12.60 by a Qualified Consultant from the City's list.	Ongoing Report 09/08	Lead: Mariya Hodge, Assoc. Planner Support: Kristy McCumby, PW/Env.
	C.3.k Source Control Measures					
	Implement conditions of approval for source control measures for applicable projects.	Order 01-119 PWP C.3 k.3	Continue Implementation of source control measure requirements by including appropriate conditions for approval for projects that add or replace 10,000 sq ft. of impervious area. Report status and provide examples of the application of these conditions in annual reports.	The City adopted source control requirements for all projects that add or replace 10,000 sq .ft. of impervious area in October 2005. Conditions of approval are reported in Attachment E, Appendix Table 1, Parts 1 & 2.	Ongoing Report 09/08	Lead: Mariya Hodge, Assoc. Planner Support: Hira Raina/Nasser Fakih
	C.3.l Update General Plans					
	Update General Plans	Order 01-119 PWP C.3 l.3	Review current General Plan policies regarding watershed protection and water quality. Identify changes or additional policies that need to be developed in order to implement the C.3 provisions of the permit.	• Current Surface Runoff Sub Element of the City's General Plan does not need any change in order to implement current C.3 provisions. • Revision of the Water Resources Sub - element is scheduled for FY 08-09. • An update of the Surface Runoff Sub Element will occur after the MRP is adopted and new requirements are identified. It is tentatively scheduled for FY 09-10	Revise after 10/15/04 at next scheduled time	General Plan Workgroup: Lead: Lorrie Gervin, Env. Div. Mgr. with assistance from Community Development, Public Works , and Office of the City Attorney staff to be determined as needed.

C.3.m Environmental Review Process						
	Environmental Review Process	Order 01-119 PWP C.3. m	Summarize revisions to the Environmental Review process, if any are made.	Legal review has not identified any changes needed to the existing process. No changes were made in FY 07-08	Annually Report 09/08	Lead: Mariya Hodge, Assoc. Planner Support: Hira Raina/Nasser Fakih
C.3.n Reporting Requirements						
	Reporting Requirements	Order 01-119 PWP C.3 n.1	Provide information described in Table 1 in annual reports (Annual and One-time Reporting Requirements) of provision C.3) based on guidance received from the Program.	This is an ongoing effort and will be continued annually, as required. This information is provided in Attachment E, Appendix Table 1.	Annually Report 09/08	Lead: Mariya Hodge, Assoc. Planner (PW) Hira Raina/ Nasser Fakih
	Reporting Requirements	Order 01-119 PWP C.3 n.4	Collect and report the following for all projects that must implement treatment measures: -BMPs -Site design -Source control measures used -sizing criteria -O&M responsibility mechanism -O&M responsible party	This is an ongoing effort. Information is collected by CDD and PW staff for projects implementing treatment BMPs. Information collected is reported in the Annual Report. This information is provided in Attachment E, Appendix Table 1	Ongoing Report 09/08	Lead Mariya Hodge, Assoc. Planner Hira Raina/ Nasser Fakih Support: Public Works Env. Div. Staff (report writing)
	Reporting Requirements	Order 01-024 C.9.d.1 & Order 01-119 PWP C.3. n.5	- Ensure consideration of the use of pest-resistant landscaping and design features in the design, landscaping, and environmental review of development projects -Train staff on pest-resistant landscaping techniques and importance of minimizing pesticides in potential runoff from development sites -Collect and report a summary of pesticide reduction measures that are required for development projects and the percentage of projects that required pesticide reduction measures as conditions for their approval.	The IPM handout provided to all developers is used as an educational tool and summarizes the types of pesticide reduction measures required for new development and significant redevelopment projects. This is included in the Storm Water Management Plan development for the project. City staff receives training on the City's IPM policy and the importance of employing techniques that minimize impacts to storm water. All projects that must prepare a SWMP include pesticide reduction measures as COAs and are reported in Attachment E, Appendix Table 1.	Ongoing Report 09/08	Lead: Mariya Hodge, Assoc. Planner Support: Kristy McCumby, Env. Spec.

Response to Regional Board Comments on New Development and Construction Controls – Planning Procedures Activities section of FY 06-07 Annual Report:

No comments were received from the Regional Board on this section.

FY 07 - 08 Annual Report

Attachment E –

Appendix 1 Table 1, Parts 1 & 2

Applicable Projects
Adding or replacing 10,000 sq ft of impervious area

New Development Planning Procedures

Attachment E- Table 1. *Report Form for Planning Procedures Performance Standard and Provision C.3.n*
FY 2007-2008 Annual Report
Municipality: Sunnyvale

Applicable Projects (Part 1)
Significant Development Projects[1]
Reviewed and/or Approved July 1, 2007 – June 30, 2008

Project Name	Project Type[1]	Site Size (sq. ft.)	New Impervious Surface (sq. ft.)[3]	Area of Land[2] Disturbed (sq. ft.)	Project Status (incl. Date Deemed Complete)	Project Storm Water Control Measures
Private Projects – Applicable Projects						
1. Mixed Use Project at 615 Tasman Drive Project No.: 2007-0462 **Description:** Construction of condominiums and retail development.	Significant Redevelopment (Total rebuild)	281,188 sq. ft. (6.45 acres)	Increased by 5,662 sq. ft.	281,188 sq. ft	Deemed complete 1/7/08, approved by Planning Commission on 2/11/08	- Storm Water Treatment Measures - Site Design Measures
2. Residential Project at 408 Flora Vista Ave. Project No.: 2007-0463 **Description:** Construction of 6 Single-family homes.	Significant Redevelopment (Total rebuild)	46,213 sq.ft.	10,060 sq. ft. added.	46,213 sq.ft.	Deemed complete 3/24/08, approved by City Council 6/10/08	- Storm Water Treatment Measures - Source Control Measures - Site Design Measures

[1] For projects approved as of October 15, 2005, applicable projects are those that add or replace 10,000 square feet of impervious area.
[2] As defined in C.3.c If the site is a "significant redevelopment", list the area of land disturbance.
[3] "New" is defined as impervious surface added, created, or replaced.

Applicable Projects (Part 2)
Significant Development Projects[2]
Reviewed and/or Approved July 1, 2006 – June 30, 2007

Project Name	Treat-ment BMPs	Numeric Sizing Criteria Used	O&M Responsibility Mechanism and Responsible Party	Site Design Measures	Source Control Measures	Pesticide Reduction Measures
Private Projects – Applicable projects						
1. Mixed Use Project at 615 Tasman Drive Project No.: 2007-0462 **Description:** Construction of condominiums and retail development.	Hydro-dynamic devices (CDS Units), Bio-retention areas, Pervious paving.	Volume Hydraulic Design Basis (for retention areas) and Flow Hydraulic Design Basis (for CDS units) using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimum impact parking lot design, disconnect downspouts, runoff flows through site conveyance systems to a retention area, minimize impervious surfaces, provide landscaping.	Minimize impervious surface (subsurface parking), covered trash area drains to sanitary sewer, pervious paving, maintenance (street sweeping, catch-basin cleaning).	Education, COAs
2. Residential Project at 408 Flora Vista Ave. Project No.: 2007-0463 **Description:** Construction of 6 Single-family homes.	Hydro-dynamic devices (CDS Units), media filter/bio-retention	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owners responsible for O&M.	Disconnect downspouts, minimize impervious surfaces, shared driveway design, provide landscaping.	Minimize impervious surface, covered individual trash areas, beneficial landscaping, maintenance.	Education, COAs

[1] For Projects approved as of October 15, 2005, reporting applicable projects – those that add or replace 10,000 square feet of impervious area.
[2] As defined in C.3.c If the site is a "significant redevelopment", list the area of land disturbance.
[3] "New" is defined as impervious surface added, created, or replaced.

Attachment E- Table 1. *Report Form for Planning Procedures Performance Standard and Provision C.3.n*

Private Projects – Applicable projects						
3. Residential Project at 805 W Fremont Ave. Project No.: 2007-0620 **Description:** Construction of 36 Townhouse units.	Hydro-dynamic devices (CDS Unit), Bio-filter (swale), pervious paving.	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Minimize impervious surface, use pervious paving, all runoff flows through site conveyance systems to CDS unit or swale.	Beneficial landscaping, enclosed individual trash bins, maintenance (street sweeping, catch-basin cleaning).	Education, COAs
4. Residential Project at 637 E Taylor Ave. Project No.: 2007-0621 **Description:** Construction of 36 Townhouse units.	Hydro-dynamic devices (CDS Unit)	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	All runoff flows through site conveyance system to CDS unit.	Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
5. Residential Project at 394 E Evelyn Ave. Project No.: 2007-0828 **Description:** Construction of 47 condominium units in DSP.	Bio-retention and bio-filter (swales)	Volume Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	Disconnect downspouts, all runoff flows through site conveyance system to retention/ filter areas, minimize impervious surfaces, provide landscaping.	Minimize impervious surface (subsurface parking), covered trash area, maintenance (street sweeping, catch-basin cleaning).	Education, COAs

FY 07 - 08 Annual Report

Attachment F

Construction Inspection

P.S. Id.	Activity	CI Item Source	FY 07-08 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
New Development and Construction Controls – Construction Site Inspection						
CI-1-4	Construction Inspection Performance Standards	URMP	Conduct annual staff review of performance measures in order to evaluate their effectiveness.	CDD- Building Division: All performance standards are being implemented and are effective. • Staff provides outreach materials to contractors and developers by attaching copies of construction tri-folds "Preventing Pollution, It's up to Us" or the "Sunnyvale Blueprint for a Clean Bay" to plans and/or job card before permits are issued. • 27 written Erosion/sediment Control Correction Notices and Re-inspection Notices were issued this year for private projects. Public Works – CIP: Current performance standards are being implemented and are effective.	09/08	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector
CI-2 - CI-5	Inspection of sites with significant erosion potential and construction planned for the wet season	URMP	Conduct inspections of sites (public and private) with significant erosion potential and/or construction planned during the wet season. Ensure that erosion and sediment control measures are implemented in accordance with SMC, the SWPPP, and any conditions of approval for the project.	CDD- Building Division: Inspections of project were done to ensure that the projects erosion and sediment control measures are maintained, as needed during construction. Enforcement for compliance with SMC requirements was done, as needed. Public Works – CIP: The inspection staff inspected capital projects and encroachment permit projects as required. See Attachment F Appendix Table 1 for Project Inspection enforcement actions.	Ongoing Report 09/08	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector

New Development and Construction Controls – Construction Site Inspection (cont.)						
CI-4	Effectiveness Evaluation: Private Development and Public Works Inspection Program	URMP	Annually review and evaluate effectiveness of inspection programs using staff and/or contractor feedback	CDD- Building Division: Staff and contractor feedback indicate that the inspection programs are effective and meeting goals. Using the "FIELD INSPECTION – BMP'S" notices helps with documenting violations and corrective actions. Public Works – CIP: Inspection programs are being implemented without any problems based on staff feedback.	Annually Report 09/08	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector
	Construction Inspection Performance Standards	Permit Prov. C.3.a. (vi)	• Annually train Construction Inspection staff (both Community Development and Public Works) on current Construction Inspection Performance Standards and any changes to BMPs and SOP's. Also include training on construction inspection procedures, documentation, and enforcement. • Every two years, all inspectors will receive training on the latest construction BMPs and techniques. Implementation of BMPs and SOP's will be discussed, as needed, at regular staff meetings.	Information on training activities for all CDD-Building Division staff and Public Works Engineering Services Division are presented in Attachment M of this report Public Works Inspection staff continues to have BMP inspection training at least once every 2 years. See Attachment M for Staff Training received.	Annually, before October 1 Report 09/08	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector

New Development and Construction Controls – Construction Site Inspection (cont.)						
	Erosion and Sediment Control Plans by Contractors for Private Development and Public Projects	Permit Prov. C.3.a. (iv)	CDD Building Inspection staff and PW Construction staff to ensure that developers/contractors of projects with significant erosion potential and planned construction during the wet season have prepared an effective erosion and/or sediment control plan prior to the start of the wet season.	CDD- Building Division: Compliance with erosion and or sediment control plans was required for projects prior to the start of the wet season. Inspectors checked to made sure the plans were done and the BMPs in place. There was good cooperation from the developers and contractors to meet these requirements Public Works – CIP: Construction inspection staff has complied with these requirements.	Ongoing Report 09/08	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector
	Municipal capital improvement project stormwater quality control measures	Permit Prov. C.3.a. (v)	Perform and document inspections of contractors on capital improvement projects to ensure their compliance with stormwater quality control requirements during construction and maintenance activities. Initiate enforcement actions, as needed. Report annually on results of inspection program.	• Inspections are performed daily and reported in the inspector's daily reports. Violations are tabulated in a spreadsheet. • See Attachment F, Appendix 1, Table 1 for the facilities that had compliance issues and their resolution.	Ongoing Report 09/08	Hira Raina, Nasser Fakih

Response to Regional Board Comments on Construction Inspection Activities section of FY 06-07 Annual Report:

No comments were received from the Regional Board on this section.

TR-00/08-03, Borregas Ave POC project at 101 and 237	2/6/ 2008.	RGW Construction Inc	Remove construction generated waste. Remove generated sawdust. Maintain concrete washout. Provide secondary containment. Follow BMP WM-10. Repair or remove leaking equipment. Follow NS-9 and WM-4 requirements. Maintain inlet protection	Yes	Yes	Contractor complied in reinspection that was performed on 3/3/2008.
TR-00/08-03, Borregas Ave POC project at 101 and 237	3/19/ 2008	RGW Construction Inc	Remove construction generated waste. Remove generated sawdust. Improve concrete waste management. Maintain clean pavement within the construction zone. Repair leaking equipment or remove them per requirements of NS-9 and NS-10.	Yes	Yes	Contractor complied in reinspection that was performed on 4/2/2008.
TR-00/08-03, Borregas Ave POC project at 101 and 237	5/14/ 2008	RGW Construction Inc	Remove construction generated waste. Remove generated sawdust. Improve concrete waste management. Remove spilled cement powder. Clean leaked oil and repair leaking equipment.	Yes	Yes	Contractor complied in reinspection that was performed on 5/28//2008.

City of Sunnyvale

FY 07 - 08 Annual Report

Attachment G

Public Information and Participation

P.S. Id.	Activity	CI Item Source	FY 07-08 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Public Information / Participation						
PIP-1	Identification of pollution issues/problems	URMP	Continue to discuss water pollution prevention, conservation, and watershed education with regional co-permittees, pretreatment staff, and urban runoff staff to determine current issues and pollutants of concern.	Regional, local and internal discussions are centered on water pollution prevention, conservation, and watershed education. Projects implemented by Sunnyvale in FY07-08 were consistent with the issues and pollutants of concern discussed. • See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 07-08.	Ongoing Report 09/08	Sally Personett, Environmental Outreach Coordinator
PIP-2	Implementation of strategy to address issues	URMP	In order to insure efficient and effective use of resources, we will continue to select projects that automatically send behavior change messages to the greatest number of people without requiring staff to be present. In addition, we will lend support to regional projects and events that endeavor to increase behavioral change thorough public education.	When large audience reach must be achieved, mass media can play a key role. Sunnyvale successfully utilizes mass media to send public education and behavior change messages regarding water pollution prevention to our target audiences. Media projects implemented in FY07-08 include on-screen theater ads, newspaper articles and ads, website postings, flyers, community cable TV, poster distributions and literature kiosks. • See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 07-08.	Ongoing Report 09/08	Sally Personett, Environmental Outreach Coordinator
PIP-3	Dissemination of outreach/education materials	URMP	Continue to update and develop new materials and information, and disseminate material to targeted audiences through participation in school and youth programs, industry-related events, presentations, community requests, plant tours, Farmers' Markets, and regional events.	Outreach material is monitored for restock and edited for content as necessary. New materials are developed as needed, and literature is disseminated as described in Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 07-08.	Ongoing Report 09/08	Sally Personett, Environmental Outreach Coordinator
PIP-4	Municipal Employee Training	URMP and Permit Prov. C.9	Provide annual training to Community Development, Parks and Recreation, and Public Works Department staff related to URMP Performance Standards, BMPs, and Watershed Outreach and Education campaign. (See IPM Policy and Hg Policy outreach sections for similar tasks)	Annual training on elements of the performance standards established for each department/division outlined in the City's URMP is performed each year. • See Attachment M for the dates/topics and approximate number of staff attending. Additional training is provided through staff newsletters and articles.	Ongoing Report 09/08	Kristy McCumby, Environmental Specialist & Dave Grabiec, Laboratory/ Pretreatment Mgr.

Public Information / Participation (cont.)						
PIP-5	Evaluation of effort and strategy	URMP	Use various feedback methods to determine public evaluation of materials, events and workshops, and when possible, evaluate level of increased awareness of pollution prevention issues. In an ongoing effort, staff will use public feedback to evaluate strategies used in selected projects.	Evaluation forms are distributed and reviewed. The evaluation forms are not used to measure differences in usage patterns or behavior change, but to determine satisfaction with the presentation or activity. Feedback is used to modify and fine tune projects, presentations, and workshops. Currently, the level of increased awareness is chiefly established through the number of individuals reached.	Ongoing Report 09/08	Sally Personett, Environmental Outreach Coordinator
PIP-5	Work Plan Revision	URMP	As a result of ongoing evaluation and discussions as listed in PIP-1, determine projects to be continued, deleted or added.	Outreach provides a wide-range of education to targeted and general audiences through participation in various events and activities in Sunnyvale, through use of media, and in project collaborations with other agencies and partners both regional and local. Projects Added: Great American Litter Pick-up event, Tarp Giveaway at the Landfill, National River Day Creek Clean-up event Projects Deleted: Sunnyvale Visioning Festival, Library Presentations, Thermometer Exchange, Hands on the Arts Projects Continued: for a listing of activities and events, see Attachment G Table 1-Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 07-08	Ongoing Report 09/08	Sally Personett, Environmental Outreach Coordinator

Public Information / Participation (cont.)						
	Mercury Outreach	Permit Prov. C.9.c	In coordination with the Program and County-wide efforts, develop and continue to implement an educational outreach program to residential audiences regarding recycling of fluorescent lights, the proper disposal of other mercury-containing products, and the availability of non-mercury containing alternatives. Monitor and document results in the Annual Report. (Also see Control Program for Mercury for additional Outreach tasks.)	Through ongoing collaboration and effort, Sunnyvale continues to develop and implement educational outreach to residential audiences regarding non-mercury alternative devices, recycling and proper disposal of mercury containing products, retail stores program for fluorescent disposal options, and water pollution prevention. • See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 07-08.	Ongoing Report 09/08	Sally Personett, Environmental Outreach Coordinator and HHW/SMaRT station staff
	Integrated Pest Management Outreach	Permit Prov. C.9.d	Provide local public outreach on proper use and disposal of pesticide products and use of less toxic pest control methods. Support the Program on local IPM Store Partnership activities. Participate in Regional outreach events. (Also see Control Program for Pesticides for additional Outreach tasks.)	Sunnyvale supports the IPM store partnership program, participates in Regional outreach events, and consistently provides local public outreach on proper use and disposal of pesticides, and use of less toxic pest control methods. • See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 07-08.	Ongoing Report 09/08	Sally Personett, Environmental Outreach Coordinator
	Trash Management	Program Task RWQCB Letter	Continue to promote litter reduction as a key pollution prevention element. Provide local education on what the public can do to reduce and eliminate litter. This includes outreach through articles and ads in newsletters, and presentations at local schools events. (Also see Control Program for Trash for additional outreach tasks.)	Sunnyvale's litter reduction and public awareness outreach promotes litter as a key source of water pollution. The focus of the program is to raise litter awareness through education and community events. Resources for our public education campaign include community newsletters, employee newsletters, theater billboard advertising, as well as presentations and demonstrations in school classrooms and at community events. The message promotes litter as a key pollution element, and provides education on what the public can do to reduce and eliminate litter. • See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 07-08	Ongoing Report 09/08	Sally Personett, Environmental Outreach Coordinator

Response to Regional Board Comments on PI/P Activities section of FY 06-07 Annual Report:

No comments were received from the Regional Board on this section.

PI/P Activity[1]	Type of Outreach [2]	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community			
Leadership Sunnyvale	Event – General	Leadership Sunnyvale is a community education program that provides it members with training on the fundamentals of leadership and classes in community awareness. The intention is to broaden participant awareness of complex community issues, strengthen leadership skills, and increase effectiveness in the community. During this annual event Public Works hosts an Environmental Awareness Day. April 08	This event presents a key opportunity to provide awareness to potential community leaders about watershed issues. Topics included wastewater treatment overview, and public outreach and education efforts regarding water pollution and prevention. 27 individuals participated in the event this reporting year.
Columbia Health and Safety Fair	Event – General	Although the main emphasis is on fun, the city teams up once a year with local organizations to inform and educate area residents about health, safety, and community services. The event is held at the Columbia Neighborhood Center and provides opportunities for residents to educate and inform themselves about issues affecting their daily lives. May 08	The event was not as well attended as in previous years due to a change in location. The outreach exhibit highlighted the difference between sanitary sewers and storm drains. Literature about water pollution prevention was distributed. Approximately 10-15 adults visited the exhibit for information and literature. Section for *Schools and Youth* provides additional outreach information.
Sunnyvale Pancake Breakfast	Event – Targeted	This event features a community breakfast, activities for kids, and exhibit booths providing public service information to the community. October 07	This event provides an excellent opportunity to reach the community about water pollution prevention. Because of the children's craft activity, the Outreach display featured IPM and promoted the use of less-toxic pesticides. Literature about water pollution prevention was distributed. Approximately 20 adults visited the booth for information. Section for *Schools and Youth* provides additional outreach information.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
Sunnyvale Farmers Market	Event - Targeted	The Sunnyvale Farmers Market is held every Saturday all year round. The Environmental Outreach exhibit promotes pesticide reduction through IPM practices. Literature and fact sheets on less-toxic pest control are distributed. Other water pollution prevention literature is available, including the HHW mercury brochure and surplus utility bill inserts that target water pollution concerns. Ongoing monthly – except for December and January	The market draws 2-3000 people each Saturday and provides an effective way to interface with shoppers in a venue that promotes healthy food and pesticide free gardening. Everyone visiting the booth is in search of information about less-toxic pest control. The number of individuals reached doesn't change much from year to year; we talk with approximately 40 to 70 people at each event depending on the season. Section for *Schools and Youth* provides additional outreach information.
Earth Day event	Event – Targeted	This was a community event held outdoors at the Farmers Market in Sunnyvale. The event celebrated Earth Day, and exhibits and presenters focused on providing information about protecting the earth and its natural resources. April 08	IPM was the outreach theme for this event. Staff conducted Enviroscape demonstrations during the event to promote water pollution prevention messages. Relatively few adults (15) approached the booth for information. The children's craft project was more successful. See the *Schools and Youth* section for additional outreach information.
Tarp Giveaway at the Landfill	Event - Targeted	This event was held in cooperation with the Silicon Valley Anti-Litter campaign, a collaborative effort for litter control in Santa Clara County. The event was conducted at the SMaRT Station in Sunnyvale during free dump weekend. April 08	A fact sheet, a free tarp and a brief reminder about litter prevention was given to drivers of vehicles arriving at the SMaRT Station with uncovered loads on free dump day. 250 free tarps were given away at this event.

Attachment G- Public Information and Participation (PI/P) Table 1
FY 2007-2008 Annual Report
Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
Compost workshops	Event - Targeted	Registrants learn that at-home composting turns organic material into valuable product for gardens and landscaping. Applying compost to gardens and landscaping reduces the need to apply fertilizer. Ongoing	Workshops are held once per month, 10 times during the year. Attendance is sporadic, depending on the season. Generally, anywhere between 12 and 40 individuals attend each new workshop session.
State of the City Event	Event – General	This annual, one-day event is sponsored by the City as a Fourth of July celebration. The event features activities and exhibits that provide community information for residents and youth. July 07	This event offers a venue to discuss with residents that indoor/outdoor daily activities and chores impact the watershed The Outreach booth distributed water pollution prevention information and literature featuring mercury, pesticides, IPM datasheets, automobile fluids, and proper draining of pools and spas. Outreach discussed pollution prevention techniques with approximately 100 adults at this event. Section for *Schools and Youth* lists additional outreach information.
Plant Tours	Event – Educational	Plant Tours are conducted year round. Treatment stages and processes are discussed, and attendees learn the function and importance of the wastewater treatment plant and its role of preventing water pollution from wastewater discharge. Both stormwater and wastewater pollution issues are discussed.	The Plant conducted 5 adult tours in FY 07-08, reaching 95 individuals. Discussions about water pollution and its issues impacting the watershed and the environment help tour attendees gain a better understanding of the problem. At the completion of the tour, attendees are given educational materials that promote environmentally responsible behaviors. Section for *Schools and Youth* lists additional outreach information.
Theater Billboards	Media – Targeted	Sunnyvale produces water pollution prevention advertising for on-screen viewing at the Mercado Theaters. Pollution prevention messages are selected according to priority and season. Advertisements included messages for mercury, car wash and litter. July 07 – June 08	These 14-second animated/audio ads are viewed by movie audiences two times during a 15-minute timeframe prior to every movie shown in the 20 theater complex. This is a beneficial method, albeit extremely expensive way to reach large groups of people with targeted pollution prevention messages. It is possible this program may be suspended in favor of other advertising or program opportunities.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
Utility Bill Inserts	Media - General	A pollution prevention advertisement targeting correct procedures for draining pools and spas was utilized as a bill insert this reporting year. *Drain Smart - Draining Pools and Spas* July/Aug 07	Stuffing utility bills with advertising inserts reaches approximately 30,000 account customers for each two-month mailing. This is an ongoing outreach effort, and we will continue to use this venue as a cost effective way to reach a large number of people.
Quarterly Report Articles	Media - General	Pollution prevention articles targeting priority pollutants of concern and other messages were published in the city's quarterly community newsletter. *Car Wash Kits* *Summertime Recycling* *Water Conservation - Every Drop Counts* *Saving Water Starts at Home* *Pollution Prevention Week* *Dispose of Mercury Containing Products Safety* *Using the HHW Program* *California Water – A Growing Crisis* *Purple Equals Green in Sunnyvale* *Earth Day 2008* *Great American Litter Pick-up* *Reporting Storm Drain Pollution* July 07 – June 08	The Quarterly Report is mailed to approx. 60,000 residents and businesses in Sunnyvale each quarter. In addition, 2000 copies of the report are distributed to reception and outreach areas around Sunnyvale. Ongoing. We will continue to publish articles in the Quarterly Report as it has proven to be a cost effective way to reach people who live, work and/or go to school in Sunnyvale with information on water pollution
National Pollution Prevention Week	Media – General	Messages promoting National Pollution Prevention Week are developed and advertised on KSUN community cable TV. Water pollution prevention messages included automotive fluids, IPM, car wash, fluorescents, and draining pools and spas. National Pollution Prevention Week posters were placed at various key locations throughout the city. September 07	Any person living, working, going to school in Sunnyvale who used the library, community center, senior center or city hall could view the posters. KSUN reaches approximately 20,000 Sunnyvale residents with cable TV of whom 20% watch KSUN at least once a month.

Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Community (cont.)			
Sunnyvale ReNews	Media – General	The Sunnyvale ReNews Newsletter is focused on reduce, reuse, recycle messages with a heavy focus on HHW. Articles and informational pieces relating to pollution prevention through proper disposal were published in the newsletter. *Hazardous Waste Drop-off* *Proper Disposal of Hazardous Waste Items* *Where to Deposit Mercury Containing Items* *Keep Yard Trimmings out of Storm Drains* *Reduce the Use of Toxic Chemicals* *Get Rid of Hazardous Products* *Use the SMaRT Recycling Center Drop-off* *Compost in your Backyard* *Beyond the Split Cart* summer 07 fall 07 spring 08	This newsletter is mailed twice a year to approximately 29,000 single family residents and 24,000 residents living in multi-family units. Copies are also available in key locations throughout the city. Considering the reach, we will continue to use this newsletter for outreach as it serves a productive method to continually remind the community about proper disposal of HHW products.
Website	Media - General	Sunnyvale provides pollution prevention messaging on three different web sites in the City. - The Solid Waste and Recycling website provides HHW information regarding proper disposal of pesticides, fertilizers, and mercury containing products. - The Water Pollution Control Plant Pretreatment section includes specific business related BMPs for painting, concrete, facility, equipment, cleaning, and vehicle maintenance. - The Water Pollution Control Plant web site has been revised and includes extensive water pollution prevention information.	The City's website does not have the ability to count number of hits.

Employees			
Poop Scoop	Media - General	Several articles targeting both general pollutants and specific pollutants of concern were published in this employee newsletter. *Water Pollution Around the World* *Green Gardener Program* *Groundhog Job Shadow Day* *Great American Litter Pick-up*	Approximately 65 employees at the Water Pollution Control Plant read the Poop Scoop, the employee newsletter for staff at the WPCP. This is an ongoing effort and we will continue using this newsletter venue for employee outreach.
The Harbinger	Media - General	The Harbinger is the newsletter for employees of the city of Sunnyvale. The following water pollution prevention articles were published in reporting year 07/08: *Sudsafe Car Wash Kit* *Take the Next Step-Pollution Prevention Week* *Fighting Ants in the Office* *Great American Litter Pick-up* *Celebrate Earth Day at the Farmers Market*	Articles and information contained in the Harbinger reach approx. 900 municipal employees. This effort will be ongoing, as publishing in this newsletter provides a cost effective way to reach all employees with specific water pollution information and suggestions for behavioral change that could be useful both on the job and at home.
National Pollution Prevention Week	Media - General	National Pollution Prevention Week was September 18-24-07 and the theme was "The Future Is Now - Prevention Begins with You!" Messages were conveyed that pollution prevention measures can protect natural resources and the environment.	Posters provided by the Department of Toxic Substances Control were distributed to city offices and displayed for employee viewing in the lunchrooms at city hall, library, corporation yard and community center. Reach not determined.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Business and Industry			
Life and Wellness Fairs Health and Safety Fairs	Event – General	Exhibitor booths offered free information to company employees that focused on helping them live a safer and healthier lifestyle. Business events attended this reporting year include: *Interwoven* *Network Appliance* *Lockheed Environmental Fair* *SST* *AMCC* *NetApp Earth Day 08* *Aruba Health and Safety Fair* *Cephoid Health and Safety Fair* *JSR Micro* July 07 – June 08	Staff attended Health and Safety Fairs at nine Sunnyvale businesses this reporting year. The exhibit portrays the difference between sanitary sewer and storm drains and general water pollution prevention literature about mercury, pesticides, car wash, FOG, automotive fluids, etc is available. Employees from the companies play the HHW /proper disposal bean bag game for prizes. Over 900 company employees received water pollution prevention information at the events.
Brown Bag Workshop	Event - Targeted	Going Green – Information was shared about the activities that certified green businesses in Sunnyvale are doing to reduce their environmental impact and save money through waste reduction, pollution prevention, energy efficiency and water conservation. April 08	Approximately 30 individuals attended this event sponsored by Palm, Inc.
Business Recycling and Solutions	Media - General	This newsletter provides information about how businesses can address health and environmental concerns in their daily operations. *Local Focus – Certified Green Businesses* *Going Green – Brown Bag Workshop* *Recycle It! Answers Column* Spring 08	This business oriented newsletter focuses on reduce, reuse, recycle messages and is mailed to approx. 1600 businesses located in Sunnyvale and is available online for public viewing.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Schools and Youth			
Creek Education Program	Event – Targeted and Educational	Water and Structures of Life. After studying the course in class, students take a creek education trip to McClellan Ranch Park as a supplement to their water studies course. This program is produced in partnership with the Cupertino School District. School year 07-08	This reporting year, Sunnyvale provided funding to cover the transportation cost of (6) buses, reaching approximately 355 students.
Classroom Presentations	Event – Targeted and Educational	In this water pollution education program, staff provides and presentation and demonstration on water pollution and prevention. Students learn the forms of water, the water cycle, what a watershed is, how water pollution happens, how to prevent water pollution, and how to conserve water. Ongoing	Outreach conducted 16 classroom presentations in the 07-08 school year, reaching approx. 385 children. Feedback from teachers indicated the information greatly improved student understanding of storm drains and water pollution caused by human activities, and teachers felt the program reinforced and supplemented their own curriculum. This activity is ongoing. We will continue to utilize classroom presentations as an effective method to reach youth with messages and water pollution and prevention.
Earth Day Event Laurelwood School	Event – Targeted and Educational	This family event was held in the school cafeteria in the early evening. The event celebrated Earth Day, and exhibits and presenters focused on outreach centered on protecting the Earth and its natural resources. April 08	At this event the children played the bean bag game. The player decides how to properly dispose of an item (pollution) printed on the bean bag by "disposing" of it into the correct receptacle. The activity helps children learn about proper disposal of hazardous products. Total number of students reached at this event is 75.
Sunnyvale Farmers Market	Event - Targeted	At the market, staff from Environmental Outreach passed out water conservation stickers to children accompanied with a verbal reminder about how they should be careful not to waste water.	Outreach conducts 10 events at the Farmers Market, and approx. 400 kids received the stickers with a brief, verbal water conservation message.

Municipality: Sunnyvale

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Schools and Youth			
Global Sunnyvale	Event – Targeted and Educational	This City event was designed to highlight the diverse cultures represented in the community. City exhibit booths provided information and demonstrations offering general and educational information June 08	IPM was the theme and craft chosen for this event. The craft provided a crayon rubbing of a flower or plant with stickers of beneficial insects available to add to the picture. The art project was extremely popular. The message for the children was the importance of beneficial insects and how we should all work to protect them. Approximately 110 students came to the booth to make the craft project and learn about beneficial insects.
Sunnyvale Earth Day event	Event – Targeted and Educational	This was a community event held outdoors at the Farmers Market in Sunnyvale. The event celebrated Earth Day, and exhibits and presenters focused on providing information about protecting the earth and its natural resources. April 08	IPM was the theme and craft chosen for this event. The craft provided a crayon rubbing of a flower or plant with stickers of beneficial insects available to add to the picture. The art project was extremely popular. The message for the children was the importance of beneficial insects and how we should all work to protect them. Approximately 180 students came to the booth to make the craft project and learn about beneficial insects.
Plant Tours School Groups	Event – Educational	Students learn the stages of treatment by viewing the various processes, equipment, and tanks. Taking a tour of the plant helps students gain a better understanding of how human actions impact water in the sanitary sewer. Ongoing	Outreach conducts student tours of the Water Pollution Control Plant to educate students about how the treatment plant functions and the importance of providing wastewater treatment. The plant hosted 21 student tours this reporting year, reaching over 454 students.
Sunnyvale State of the City	Event – General	This is an annual one-day event sponsored by the City as a Fourth of July celebration. Among other activities, the event features exhibits that provide community information to residents and youth July 07	Children at this event played the bean bag game. The player decides how to properly dispose of hazardous waste (the bean bag) by tossing it into the correct receptacle. By playing this game children learn about recycling and proper disposal of hazardous products. About 45 children played the bean bag toss game.

PI/P Activity	Type of Outreach	Level of Implementation (Description/Dates)	Evaluation of Effectiveness
Schools and Youth			
Columbia Health and Safety Fair	Event – General	This annual community event targets families and youth with health, safety, and community services related activities and exhibits. May 08	The Outreach exhibit highlighted the difference between sanitary sewers and storm drains, with an emphasis on water pollution prevention. Children at this event played the bean bag game. The player decides how to properly dispose of an item (pollution) printed on the bean bag by "disposing" of it into the correct receptacle. The activity helps children that some products are hazardous to the environment and must be properly disposed of to prevent pollution. Approximately 35 kids played the bean bag game.
Sunnyvale Pancake Breakfast	Event – Targeted	This event is sponsored by Public Safety and features a community breakfast, activities for kids, and exhibit booths that provide community services information. October 07	The Outreach display at this event featured IPM and promoted the use of less-toxic pesticides. For the children attending this event, a craft promoting beneficial insects was provided. The craft consisted of a crayon rubbing of a flower or plant with stickers of beneficial insects available to add to the picture. The art project was extremely popular. The message for the children was the importance of beneficial insects and how we should all work to protect them. Approximately 150 children learned about the importance of beneficial insects at this event
Regional			
Classic Car Wash	Event - Targeted	This is a SCVURPPP sponsored event. Classic Car Wash offered 50 percent off all car wash services during a 2-hour live remote. May 07	The exhibit featured the "Where Does the Water Go" display and the focus of the outreach was on automotive pollutants and litter. Staff talked with and handed out literature to car wash patrons.
Pumpkins in the Park	Event - General	Watershed Watch had a booth for the event and sponsored Zun Zun performances; Watershed Watch was credited as a sponsor for the event.	Sunnyvale participated by helping to staff the Watershed Watch booth at this event. GRPG estimates attendance at 12,000 for the 2007 event.

Regional (cont.)			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Spring in Guadalupe Gardens	Event - Targeted	Each year San Jose celebrates Spring in Guadalupe Gardens by showcasing gardening and sponsoring exhibits that educate the public on how to protect the environment. Over 40 vendors participate, selling plants and offering gardening tips. April 08	Sunnyvale supported Program efforts by helping to staff the exhibit at this event. The goal of the outreach was to inform the public through interaction and providing literature and "fly swatter" give-aways to promote IPM practices. Outreach on the availability of Santa Clara Valley Green Gardeners for landscape maintenance needs for the public.
Christmas in the Park	Event – Targeted	The City of San Jose hosted a holiday themed display in the park. This year, the Watershed Watch Campaign sponsored a Christmas tree and decorated it with watershed educational messages. November/December 07	Sunnyvale was heavily involved creating water pollution prevention messages and sponsoring coordinating ornaments for the Christmas tree this year. It is estimated that 400,000 people visit the park to see the Christmas tree displays each year during the holiday season (Thanksgiving to New Year's Eve).
Ad Hoc Task Group Mercury	Targeted	SCVURPPP work plan activities include developing a mercury virtual elimination policy for the City, educating employees, public outreach to residents and commercial businesses on fluorescent light recycling and other mercury containing products, and working with the County Household Hazardous Waste Program. Ongoing	Ongoing. Sunnyvale is a participating and contributing member of the Ad Hoc Task Group for Mercury, and will continue to work with co-permittees, SCVURPPP staff, and the consultant to approve campaign action plans, implement strategies and activities, and to develop promotional materials.
Ad Hoc Task Group Pesticides	Targeted	SCVURPPP workplan and Program activities include public outreach to residents and businesses regarding IPM, pesticide reduction, and proper disposal information. Ongoing	Ongoing. Sunnyvale is a participating partner and remains active in all aspects of the campaign. In an ongoing effort, Sunnyvale will continue to work with co-permittees, SCVURPPP staff, and the consultant to approve campaign action plans, implement strategies and activities, and to develop promotional materials.

Regional (cont.)			
PI/P Activity	**Type of Outreach**	**Level of Implementation (Description/Dates)**	**Evaluation of Effectiveness**
Watershed Education and Outreach Workgroup Participation	Targeted	The goal of regional workgroup participation is to share information and discuss watershed education with co-permittees. Ongoing	Several times a year, Sunnyvale attends meetings with regional co-permittees to discuss watershed issues and determine current workgroup issues. In an ongoing effort, Sunnyvale is a participating member of the following workgroups sponsored by SCVURPPP - Alviso Ed Center - Schools Group - Scripts Review Workgroup
Our Water Our World	Targeted	The OWOW outreach campaign promotes IPM, less toxic alternatives to common pesticides and proper disposal. Ongoing	Sunnyvale Outreach has been active in the OWOW campaign both locally and regionally by writing and publishing articles in local community and employees newsletters, editing and producing PSAs, reviewing website development, organizing local events and staffing regional events, presenting classroom programs and designing promotional material used as collateral and for airing on community TV and theater. Outreach activities at local community and regional events promoted less-toxic alternatives to common pesticides.
Retail Stores Program	Targeted	Mercury – the Program partners with retail hardware stores in various locations throughout the County in a drop-off program for fluorescents and batteries that contain mercury. Pesticides – the Program partners with retail hardware and nursery stores in an effort to educate customers about pesticides and water pollution prevention, to offer and promote less toxic pesticides, and an agreement to display shelf-talkers and IPM literature. Ongoing	Staff continues to work with the Program and co-permittees to ensure that retail hardware stores and nurseries in Sunnyvale continue their participation in both the mercury and IPM campaign.

QUARTERLY REPORT
Spring 2008

WATER POLLUTION

NO DUMPING!! FLOWS TO BAY

The recent oil spill in the San Francisco Bay received a lot of media attention. But you may be surprised to learn that the number one source of water pollution in California isn't large industrial accidents, but common urban runoff. It flows from streets and highways, lawns, gardens and driveways - just about anywhere there is human activity - into California waters. Both actions have produced the same result. The pollution in San Francisco Bay will threaten aquatic, bird and wildlife for years to come.

When it rains, the water picks up and carries pesticides, herbicides, fertilizers, automotive fluids and other contaminants into storm drains where it flows without treatment directly to creeks and San Francisco Bay. The polluted runoff produces a ripple effect of damage that ultimately can hurt fish, wildlife, and humans.

Water pollution can also come from dumping illegal materials such as chemicals, motor oil or antifreeze, paints, paint products and trash into the storm drain system. Even common activities such as rinsing driveways, draining pools and spas, or allowing construction waste to run down the gutter to the storm drain system can pollute our water.

The following questions and answers provide additional information about preventing water pollution.

Q. What can be put down the storm drain?

A. Never pour anything into a gutter, street or storm drain. Local ordinances prohibit anything other than uncontaminated rain water from entering the storm drain system.

Q. Yard clippings and leaves are natural, so they don't cause any problems, right?

A. Grass, leaves and yard clippings left on the street or swept into storm drains can clog the system and cause flooding, and may potentially provide a breeding ground for rodents and insects. Additionally, when grass and leaves decompose they encourage excessive growth of algae which can deprive fish of adequate oxygen.

Q. What should I do if I see a neighbor, or someone else who is discharging polluted water into the storm drain system?

A. If a neighbor is allowing dirty water from driveway or sidewalk cleaning, or sudsy water from car washing into the gutter and storm drain, they may not understand that drain inlets connect directly to our creeks and Bay. If you have an amicable relationship with your neighbor, it may be just a matter of informing and making them aware. If the action persists, call (408) 730-7270 during normal business hours. An inspector will be dispatched to speak to the person and educate the individual about water pollution prevention.

Q. I see people dumping their used automotive fluids into storm drains all the time. What can I do?

A. Dumping fluids, oils or chemicals to the storm drain from a residential, business or construction area is illegal. Just one gallon of motor oil can pollute 250,000 gallons of water. To stop violations as quickly as possible, call (408) 730-7270 during normal business hours. After hours, call Public Safety Dispatch at (408) 736-6244. In an emergency, dial 911. Be prepared to report the address, the nearest cross street, and any other information you believe help to locate the problem.

Q. Is there a fine or penalty for illegal dumping?

A. Dumping trash, contaminants and other pollutants down storm drain inlets is illegal and is a violation of the Federal Clean Water Act of 1972, as well as the City of Sunnyvale's Stormwater Ordinance. Fines and penalties are based on type and amount of illegally discharged material. Each violation can be based on, but not limited to, a cost recovery fine and/or enforcement fine.

Q. I have some toxic and corrosive products at home that need to be disposed of. Where can I take these?

A. Pesticides, flammable or combustible liquids, paints, household cleaning and pool products are accepted at the Household Hazardous Waste Drop-off events held monthly (except December) on the third Saturd the Sunnyvale event site. For mo... information about the Household Hazardous Waste Program call (408) 730-7262.

QUARTERLY REPORT
Spring 2008

Join Sunnyvale's Great American Litter Pick-up – Saturday, April 12

Everyone wants to live in a clean and healthy environment, but fast food wrappers, bottles and cans, cigarette butts and other auto debris litter the streets of neighborhoods in our community.

Besides being unsightly, litter and trash affect California waterways. Litter can find its way into storm drains and pollute waterways and the environment. Untreated storm drain water laden with litter can flow into creeks and streams, and eventually into recreational areas such as the Bay and the ocean, impacting human activities and the well-being of organisms that live in the water as well.

Help Clean Up Litter in Sunnyvale

Do your part to improve the environment by volunteering in the Great American Litter Pick-up, Saturday, April 12, to help clean up litter and debris from certain areas of Sunnyvale. Cleanup activities begin at 8:30 a.m. (beverages and snacks are provided) and end at 11 a.m. Approximately 40 volunteers are needed for the event. All youth 18 and under need supervision and transportation to get to cleanup sites. Gloves, pick-up sticks, safety vests, trash and recycling bags will be distributed, but volunteers are encouraged to bring their own gloves and pick-up sticks if they have them. Following a morning of litter pick-up, volunteers will be provided a light lunch. Registered participants will be assigned a check-in location at either Murphy Park or Columbia Neighborhood Center and will receive instruction on the morning of the event.

To volunteer for the Great American Litter Pick-up, call Environmental Outreach at (408) 730-7717, TDD (408) 730-7501 or e-mail *wpcp@ci.sunnyvale.ca.us*.

Sunnyvale's Great American Litter Pick-up is being held in cooperation with the Silicon Valley Anti Litter campaign, a collaborative effort for litter control in Santa Clara County.

QUARTERLY REPORT

CITY OF SUNNYVALE WINTER 2008

DISPOSE OF MERCURY-CONTAINING PRODUCTS SAFELY

Does the post-holiday season find you with a stock of new gadgets and a cache of old batteries or other household extras that ı need to dispose of or recycle? The City of Sunnyvale provides 'eral options for safe disposal of wanted household products that ıtain hazardous materials.

This winter's post-holiday season ın especially good time of year to ·k for and dispose of unwanted ısehold items containing mercury. ınmon household items that may ıtain mercury include:

- Fluorescent light bulbs and tubes
- Household batteries
- Thermometers (containing mercury)
- Thermostats

Disposal and Recycling Options for Sunnyvale Residents

Curbside: Household batteries can be recycled at curbside. Put items in a heavy-duty, sealed plastic bag and place on top of recycling cart.

SMaRT Station®: Fluorescent bulbs or tubes may be taken to the SMaRT Station, 301 Carl Road, daily, 8 a.m. – 5 p.m., no charge.

Local Retail Shops (for fluorescent bulbs and tubes): Numerous retail stores in Santa Clara County are now accepting fluorescent bulbs and tubes at their stores during regular business hours. For a complete list, visit the *Mercury Education* link under *Household Hazardous Waste* at *www.hhw.org*.

USING THE CITY OF SUNNYVALE'S HOUSEHOLD HAZARDOUS WASTE PROGRAM

Bring your mercury-containing products (thermostats, thermometers) and other hazardous household waste to a Household Hazardous Waste Drop-off event in Sunnyvale, held monthly (except [illegible]r) on the third Saturday.

NEXT EVENT DATES

January 19
February 16,
March 15

Hours: 8 a.m. – 1 p.m.
No appointments required for Sunnyvale residents.
Location:
164 Carl Road, Sunnyvale

Other items accepted at a Household Hazardous Waste event includes, pesticides, insecticides, herbicides, flammable or combustible liquids, fire extinguishers, paints, household cleaning and pool products. For more information about the Household Hazardous Waste Program call (408) 730-7262.

Businesses with small quantities of hazardous waste may be available to participate in a county drop-off program by appointment only. A fee will apply. Call (408) 299-7300 for details.

Planning Your HHW Drop-off Trip

- Make sure that all materials are in the original container or carefully contained in a non-leaking sealed container.
- Do not mix materials
- Follow the 5/50 per trip practice — make the trip to a drop-off event when you have the maximum allowable quantities of five gallons or 50 pounds per trip.
- "Shop" after the drop — Some dropped-off materials are available at no charge for reuse. To "shop" for dropped-off products, stop by the event site between 1:30 p.m. – 2 p.m. at a scheduled drop-off event.

Reduce the Use

Other practices that you can follow to help both create a safe environment in your home and the larger community include:

- Carefully planning your project and buying only what you need.
- Reading labels and choosing the least toxic product.
- See more about less toxic products by visiting *www.sunnyvalerecycles.org*.

QUARTERLY REPORT
Fall 2007

Pollution Prevention Week

Take The Next Step

This year, state and federal agencies, businesses and communities nationwide have teamed up to promote the benefits of pollution prevention during National Pollution Prevention Week, starting September 17. Their slogan, Take the Next Step, was developed to encourage people to make a new start by incorporating pollution prevention activities into their everyday lives. Practicing pollution prevention in the garden or during indoor and outdoor chores can be easy by simply adopting some alternative practices.

Gardening Tips

Many people depend on commercial chemical products as the first and only means of controlling weeds and unwanted pests in their garden. Various alternatives and techniques exist that will contribute to a cleaner, safer and pollution-free environment.

To rid your garden of uninvited pests, introduce predatory insects such as ground beetles, praying mantises or ladybugs by planting foliage that will attract these beneficial insects into your garden. Do not fertilize or spray pesticides when rain is forecast within 24 hours. Runoff from rain or over watering can carry fertilizer and pesticide residues to the storm drain system, degrading water quality in local creeks and the Bay. Control weeds by hand picking them and then applying mulch from wood chips or grass clippings. Mulch acts as a natural fertilizer, reducing the need for chemical fertilizers which can get into our water.

Around the House

Chores and activities around the house can cause water pollution.

Wash your car on a grassy area, gravel driveway or unpaved surface, or take your car to a commercial car wash. Washing the car in the driveway causes dirty, soapy water to flow to the storm drain which pollutes our creeks and Bay. Repair leaking vehicles promptly to help keep auto fluids off the street. Soak up spills with an absorbent such as kitty litter or sand. If you change your own oil or antifreeze, recycle it. Never dump oil or any auto fluid on the dirt or in the storm drain. Avoid using toxic chemicals to clear a drain. Instead, clear your drains by pouring 1/4 cup baking soda into the drain, followed by 1/4 cup vinegar. Later, flush the drain with boiling water.

Encourage family and friends to Take the Next Step. Working together, we can protect our shared environment through pollution prevention.

042304

Fighting Ants in the Office

Every season, those bothersome ants seem to invite themselves into your office for a snack. Pesticide companies would like you to believe that their products provide the right solution to any ant problem. For most uses though, ant sprays are doomed to fail because they only take care of the scouts and feeders. It's essential to get the poison back to the nest to eradicate the queen. But when you use these sprays, you are putting toxic poisons in the place you work and breathe. Plus, common household pesticides have turned up in wastewater and stormwater runoff that flows to our local creeks and San Francisco Bay. Consider using the following less-toxic options:

Take Initial Steps

Make your office less inviting by keeping desktops wiped clean. Also clean behind monitors, files and books. Wipe down sticky spots and clean up crumbs. Try to avoid eating in your office.

Quick Fixes for Ant Emergencies

Start the ant clean-up process before removing their source of food or water to avoid scattering the ants.

Use a vacuum to clean up lines of ants, or spray ants with soapy water and wipe them up with a sponge. The soapy water will wash away the chemical trail that other ants follow.

Find out where the ants are entering and temporarily block their entry way using a piece of tape or a smear of petroleum jelly.

If you continue to have ant or other insect problems, contact Facilities Management to check if your work area is provided services by professional pest control.

For more information about less toxic options for controlling pests contact Environmental Outreach at (408) 730-7738.

Help Clean Up Sunnyvale

Everyone wants to live in a clean and healthy community, and you can play a role in achieving this goal. Join with fellow employees and other volunteers during the Great American Litter Pick-up event, Saturday, April 12, in an effort to clean up litter and debris in Sunnyvale. Clean-up activities begin at 8:30 a.m. (juice and snacks are provided) and end at 11 a.m. Gloves, pick-up sticks, safety vests, trash and recycling bags will be distributed. Following a morning of litter pick-up, volunteers will be provided a light lunch at the close of activities.

To participate in the Great American Litter Pick-up event, call Environmental Outreach at (408) 730-7717.

042306

Keeping Our Creeks and Bay Clean

Automotive repairs and other projects in residential areas are not only unsightly but can affect the water quality of our local creeks and South San Francisco Bay. When waste from these activities is not properly handled and make their way to the City's storm drain system, automotive oils, copper from brake pad linings and fluids from radiator flushing can enter our creeks and Bay. These pollutants can harm fish and other aquatic life.

The City of Sunnyvale has developed a handy wallet card for easy reference by staff who notice incidents of storm water pollution as we travel around Sunnyvale performing work duties. The Illegal Discharge Response Card lists specific phone numbers for employees to call to report potential problems or illegal discharges. During normal work hours call (408) 730-7270. Other phone numbers are listed for non-work hours and emergency. Be ready to report your name, the address, nearest cross street, and any other information you believe will help to locate the problem.

To obtain an Illegal Discharge Response Card, email **Kristy McCumby**, Environmental Specialist, at *kmccumby@ci.sunnyvale.ca.us*.

It's Time for Spring Cleaning!

Litter in our creeks is not only unsightly, it also impacts water quality and harms local wildlife. So come along with friends and neighbors to help clean a creek during National River Cleanup Day 2008. This is a great opportunity to help keep our creeks and Bay beautiful for everyone to enjoy.

National River Cleanup Day is sponsored by The Creek Connections Action Group, a consortium of public agencies and nonprofit organizations that share a goal of protecting Santa Clara County's waterways. On Saturday, May 17, volunteers are needed to help clean the Sunnyvale East Channel waterway near Baylands Park.

The event is open to everyone, though youth under the age of 18 need parental approval and transportation to cleanup sites. Youth 16 and under must be accompanied by an adult. Gloves, pickup sticks, safety vests, and trash and recycling bags will be provided. Volunteers are encouraged to wear long pants, sturdy shoes and lots of sunscreen.

To register, call the City of Sunnyvale's Environmental Outreach division at (408) 730-7717, or send an e-mail to *wpcp@ci.sunnyvale.ca.us*. Registered participants will receive instruction on the morning of the event.

ENVIRONMENTAL OUTREACH

Green Gardener Certification Program

The perfect landscape is functional. It provides beauty and offers a place for relaxation and play. Most importantly, it is also resource efficient. It requires very little water, fertilizer and pesticides. Maybe best of all, it requires little maintenance. Creating and maintaining a landscape such as this requires knowledge and training.

What is the Santa Clara Valley *Green Gardener* Certification Program?

This new program, intended for landscape maintenance workers, landscape contractors, and professional gardeners in the Santa Clara Valley area, provides training on the key principles of green gardening. Key principles include soil management, planting and pruning, irrigation and water conservation, use of less toxic options for pest management and reducing needs for fertilizers. The curriculum promotes reduction of urban runoff and the pollutants that may be carried with it, reduction of solid waste, and improved sustainability of urban landscapes.

The City and County of Santa Barbara developed this program and it has been very successful there, training over 1000 landscape workers in the past seven years. Our local program is sponsored by the Santa Clara Valley Urban Runoff Pollution Prevention Program, the Metropolitan Adult Education Program and the city of Sunnyvale Environmental Division. Course written materials are available in both English and Spanish, the first class being offered in February 2008. The trainings in Santa Barbara have proven to enhance a landscape professional's marketability, and the certification also helps businesses who employ trained individuals to attract and retain clients. Each individual who successfully completes the 20 hours of training over a ten-week period and passes the final exam will receive certification as a *Green Gardener*. Their name and business information will be included in media outreach materials and websites to promote the hiring of Green Gardeners to residential and commercial customers.

If you employ a landscape maintenance company at home, you can encourage them to become certified. Or, if you have friends or family who work in landscape maintenance, let them know about the program. See Kristy or Sally for copies of the flyer introducing the program and details on registration for the first class.

Water Pollution Facts and Figures

"Water and air, the two essential fluids on which all life depends, have become global garbage cans."
—Jacques Cousteau

Admittedly, the following data was taken from the Grinning Planet (www.grinningplanet.com), a Web site with a slant toward tongue-in-cheek commentary on the environment. But they **DO** take it seriously, and we all know there is nothing funny about water pollution. Check out these alarming facts and figures:

- 40% of America's rivers and 46% of lakes are too polluted for fishing, swimming or aquatic life.
- Two-thirds of US estuaries and bays are degraded from eutrophication, a process where water bodies receive so much nitrogen and phosphorus pollution that excessive plant growth occurs and depletes the oxygen supply in the water.
- 1.2 trillion gallons of untreated sewage, stormwater, and industrial wastes are inadvertently discharged into US waters annually. The US EPA warns that rivers could reach super-polluted levels by the year 2016.
- Annually, about 25% of beaches in the US are under advisories or are closed at least one time because of water pollution.
- The Mississippi River—which drains nearly 40% of the continental United States including the Corn Belt states, carries an estimated 1.5 million metric tons of nitrogen pollution into the Gulf of Mexico each year. This creates a coastal dead zone in the Gulf each summer, considered to be the second largest dead zone in the world.

Water Pollution Around the World

- Asian rivers are the most polluted in the world. Bacteria from human waste is found to be three times the global average and their rivers carry 20 times more lead than rivers in industrialized countries.
- In 2004, water from half of the tested sections of China's seven major rivers was found to be undrinkable because of pollution.
- Slovakia has the lowest compliance with EU guidelines for freshwater areas. Only 22.4% of swimming sites meet the standards.
- Thirty percent of Ireland's rivers are polluted with sewage or fertilizer.
- The Sarno River in Italy is the most polluted river in Europe, featuring a nasty mix of sewage, untreated agricultural waste, industrial waste, and chemicals.
- In developing countries, an estimated 90% of wastewater is discharged directly into rivers and streams without treatment.
- Lithuania and Estonia have the dirtiest coastal waters. Greece has the cleanest coastal waters, followed by Spain and Germany.

Each of us should do our part and practice water pollution prevention. Watch for future columns offering suggestions on what you can do to help protect our water.

ENVIRONMENTAL OUTREACH

Litter Pickup in Sunnyvale

On Saturday, April 12, volunteers gathered to clean up litter from two areas around Murphy Park and the Columbia Neighborhood Center in Sunnyvale. They were participating in response to a call for volunteers for the Great American Litter Pickup campaign, celebrating its seventh year as a national event. Sunnyvale's event was planned and coordinated by our very own Kristy McCumby-Hyland.

It was the hottest day of the year to date, and volunteers managed to gather almost 40 cubic feet of trash and litter from sidewalks and gutters. Not surprisingly, cigarette butts, cigarette packages, plastic food wrappers, cups, plastic lids and straws were among the most common items collected. About 6 cubic feet of recyclable bottles, cans, and beverage containers were collected as well.

In a coordinating event that day, I distributed tarps to the first 250 pickup trucks arriving with uncovered loads at the SMaRT Station. Litter and debris flying out of the back of uncovered pickup trucks cause so much trash along freeways in the South Bay that it is now known as the second most littered region in California.

The event was held in cooperation with the Silicon Valley Anti Litter campaign, a collaborative effort for litter control in Santa Clara County.

Sally

Pollution Prevention Tip:

Fluorescent bulbs and batteries contain mercury. These products cannot be discarded in the trash or recycling bin.

City of Sunnyvale

FY 07 - 08 Annual Report

Attachment H

Pesticide Management Activities

P.S. Id.	Activity	CI Item Source	FY 07-08 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Control Program for Pesticides						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to track OP pesticide usage and other pesticides identified as creating potential water quality problems on City-owned property. Report types and quantities used in Annual Report for the previous calendar year. Track quantities of the top five pesticides by the City. Report quantities of active ingredients and locations used.	• OP and all pesticides applied to City-owned property is tracked through the Monthly Summary Pesticide Use Report (Form PR-ENF -060) that are submitted to the County Agricultural Commissioner. • Quantities of pesticides applied on City-owned property by both staff and contractors are tracked in an Excel table. • Reports on the top-five (greatest quantities of active ingredient) applied for both liquid and solid forms, as well as types of active ingredients and locations applied by department within the city are included in Appendix 1 of this Attachment.	Annually Report 09/08	Kristy McCumby Env. Spec.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Hold an annual meeting for Department /Division staff involved in implementing the City's IPM Policy to identify issues and suggestions for enhancements to the current IPM practices.	Met with Parks staff and Public works staff supervisors separately to discuss City's IPM policy and issues. No changes or issues with current policy were identified.	Report 09/08	Kristy McCumby Env. Spec., Mike Eccles, PW & Scott Morton, Parks Supervisor.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Hold annual training for Parks Division to educate staff regarding pesticide and turf product applications, Integrated Pest Management Policy, and irrigation water run off	Annual Training was held in November 2007 with 41 Parks staff attending. (See Attachment M)	Annually Report 09-08	Scott Morton, Parks Supervisor
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Train other staff (e.g., Public Works) who apply pesticides as a regular part of their job duties as to the requirements of the Plan and Policy. Provide information and training on the contents of the plan to all City employees	Annual Training was held in May 2008. (See Attachment M)	Annually Report 09/08	Kristy McCumby Env. Spec.

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Modify Pest Control Vendor's contracts as they come up for renewal, to include requirements that they 1) Follow the City's IPM Plan/Policy, BMPs and SOPs. 2) Provide evidence of current IPM training for contractor employees working on City property. 3) Contractors to annually provide copies of State of California Monthly Summary Pesticide Use Report (Form PR-ENF-060 Rev. 4/92) or the equivalent to Environmental Division staff	• Standard language in contracts for firms providing pest control services to the City includes requirements that the City's IPM policy is followed and that they provide information on the quantities, types, and locations of pesticide applications or control measures. • This information is tabulated and included in Appendix 1 of this attachment for Contractor Pesticide Applications to City property. This information is currently tracked from Invoice/Service slips provided by the Contractors • The City's structural pest control contractor provided copies of certification for hours of training received, including IPM practices and these are kept on file.	Annually Report 09/08	Kristy McCumby Env. Spec. and TBD -Finance Manager
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Inform new leaseholders of the City's IPM policy	City's contractor for property management annually include a flyer on the City's IPM policy that is mailed to leaseholders.	Annually Report 09/08	Kristy McCumby, & Mike Chan, City Pro. Mgr.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Document training city staff that applies pesticides to ensure compliance with training requirements established by the County Agriculture Commissioner and the State Dept. of Pesticide Regulation. Provide annual training to staff who apply pesticides on the City's Pest Management Plan, IPM Policy, SOPs, BMPs, and IPM techniques appropriate to the pests	• All city staff who apply pesticides as a regular part of their job duties hold all appropriate certifications from DPR. • Records of training are kept by the Departments that staff work in. • Staff is provided with annual training on the City's IPM policy as a part of their Pesticide Safety and use annual training.(See Attachment M)	Annually Report 09/08	Lead: Kristy McCumby Env. Spec. Support: Mike Eccles, Sr. PW Supervisor and Scott Morton, Parks Supervisor

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Work with SCVURPPP IPM Pesticide Outreach Work Group to coordinate with regional efforts to provide training to small businesses that perform landscape maintenance to residences and commercial entities.	Staff continues to work with IPM Pesticide Outreach work group of SCVURPPP. Staff was significantly involved in the development and implementation of the Santa Clara Valley Green Gardener Training Program, as well as publicity about the program this FY. See the Program's section of the Annual Report for details on the Green Gardener training program.	Annually Report 09/08	McCumby Env. Spec. and Sally Personett, Environmental Outreach Coord.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Document education provided on the City's IPM Plan/Policy for staff who do not apply pesticides and on the prohibition for use of over-the-counter pesticides by untrained staff in and around the workplace (consistent with the City's IPM Plan/Policy). Report on activities/ numbers reached in Annual Report.	• Information on the City's IPM policy is available on the City's Intranet Website as well as in the Administrative Policy Manual. • Annual staff training has become less essential over the 5 years since the policy was first enacted, as employees have learned, as part of their job that they are to utilize the services of the City's Pest Control Contractor, who uses IPM practices, if pest issues arise in their work areas, rather than take on pest control actions themselves. • An article was published In the Jan /Feb 08 issue of the employee newsletter, the Harbinger. The article, entitled *Fighting Ants in the Office* reminded employees about the prohibition for use of over the counter pesticides and instead focused employees on using IPM and less toxic options for pest control in the office. See Attachment G, Table 1 for numbers reached through the Harbinger	Annually Report 09/08	Kristy McCumby Env. Spec. Support: Sally Personett, Environmental Outreach Coord.

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Evaluate effectiveness of training. Report on progress in Annual Report.	• All staff who apply pesticides as a regular part of their job duties received information about the City's IPM program as well as current IPM practices for specific pests of concern. • The effectiveness of this training/ information sharing program can be determined by the positive changes in the continuing increase in the use of less toxic options for dealing with pest problems, significant reductions in the use of OP pesticides (rarely any in the past 3 years), and the overall approaches to using good management practices (e.g., proper irrigation, mulching) that help reduce the need for both herbicide and pesticide use on City property.	Annually Report 09/08	Kristy McCumby Env. Spec.
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Conduct annual citywide search of chemical storage areas for pesticides that are no longer legal for application per EPA, State, and/or local requirements. Properly dispose of any such pesticides pursuant to appropriate waste disposal regulations.	• No "older" illegal pesticides have been found in City storage areas in the past 6 years. Any that were found in the past were disposed of appropriately as hazardous wastes. • No outdated pesticides were found in FY 07-08 in the Parks Division or in Public Works storage areas. • Some outdated pesticides have been found in Golf Division inventories and will be disposed of as hazardous waste in FY 08-09.	Annually Report 09/08	(Report) Kristy McCumby, Env. Spec. (Support) Mike Eccles, PW, Scott Morton, Parks Supervisor

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to assist with local implementation of the Watershed Education and Outreach (WE&O) Campaign. Distribute literature and other outreach materials at sponsored events; disperse articles and ads about less-toxic pest control and proper disposal techniques to media venues such as newsletters, utility bills, and movie ads. Support Program events in coordination with Watershed Watch.	Sunnyvale has been active both in the local implementation of the WE&O Campaign and is a participating member of the Pesticides Ad Hoc task group. Outreach activities include distribution of literature at sponsored events, and classroom Enviroscape demonstrations explaining water pollution from pesticide and fertilizer runoff. Media sources for outreach include newsletter articles, community cable TV ads, and information provided to the public via the website. Subjects covered include prevention of water pollution from pesticides and fertilizers, integrated pest management, proper disposal of pesticide products, and sources of additional information. See Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 07-08.	Annually Report 09/08	Sally Personett, Environmental Outreach Coordinator
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to help business and community members to say current with the City's IPM Policy by editing the document posted on the web page as updates become available. Include updates to IPM techniques for pests.	Information regarding the City's IPM Plan and Policy, general IPM techniques, and links to IPM fact sheets is posted for public review on the Water Pollution Control Plant web page and is reviewed and updated on an as needed basis.	Annually Report 09/08	Sally Personett, Environmental Outreach Coordinator
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue to provide at least one story on IPM practices/ successes and/or the City's Pest Management Plan and IPM Policy to local newspapers and/or citywide newsletters.	Several articles regarding IPM, pesticide reduction and proper disposal of pesticides were published in a variety of Sunnyvale newsletters. See Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 07-08.	Ongoing Report 09/08	Sally Personett, Environmental Outreach Coordinator

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	1) Continue to assist with the local components of a "Pesticide User Outreach" as proposed by the program. Target residential and commercial users. 2) Based on recommendations from the Program's research reports and surveys of business pesticide usage, develop and implement education that will target specific businesses.	The City of Sunnyvale continues to assist the Program by implementing pesticide user outreach components targeting residential and commercial users, by participating in business events, by providing literature to retail stores and nurseries, and through advertisement in the Chamber of Commerce Business Directory. • Sunnyvale's Pretreatment Program has pesticide BMP brochures which are regularly distributed during inspections to landscaping facilities, nurseries and home retail stores. • See Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 07-08. • To target commercial pesticide use, Sunnyvale participated in the implementation of the Santa Clara Valley Green Gardener Training program to provide landscape maintenance workers and professionals with training to learn practices that conserve water, protect the soil, and reduce the need to use pesticides. • See Appendix 2 of this section and the Program's section of the annual report for a description of the class activities and Sunnyvale's participation.	Annually Report 09/08	Sally Personett, Environmental Outreach Coordinator

Control Program for Pesticides (cont.)						
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Continue work with the Program to provide information on less toxic pest control (e.g., IPM techniques, municipal IPM policies, model contract language, and training opportunities) to neighboring special districts (e.g., open space districts, vector control districts, and school districts) as appropriate.	Promotion to special districts in Sunnyvale (school districts) was conducted by the Program in FY04-05 and has not been repeated to date. The City Parks Division has maintenance agreements for outside grounds with some schools within the City's jurisdiction. All pertinent laws are followed regarding posting and public notification.	Annually Report 09/08	Sally Personett, Env. Outreach Coordinator
	Pest Management Plan/Policy Implementation	Permit Prov. C.9.d	Track and/or estimate the numbers of Sunnyvale residents and staff reached through outreach efforts (including advertising) regarding the City's IPM policy, pesticide use reduction, and related topics.	Estimated numbers of Sunnyvale residents and staff reached through outreach efforts are recorded on Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 07-08.	Annually Report 09/08	John Pilger, Com Officer & Sally Personett, Env. Outreach Coordinator

Response to Regional Board Comments on Pesticide Management Activities section of FY 06-07 Annual Report:

No comments were received from the Regional Board on this section.

City of Sunnyvale

Pesticide Use and Integrated Pest Management Policy Implementation in the City of Sunnyvale

Quantities of Diazinon and Chlopyrifos-Containing Compounds Applied:

- No pesticides containing Diazinon were applied on City of Sunnyvale Properties from 2001 through 2007

- In 2001 and 2002, two products that contained Chlorpyrifos were used by City staff in very small amounts. In 2003, no chlopyrifos-containing pesticides were used.

- In July of 2004, 1.5 gallons (45.1 oz of active ingredient chlorpyrifos) of Dursban Pro/Dow Chemicals were applied to putting greens at Sunnyvale Golf Course to treat for cutworms. While every effort was made to avoid using chemical treatments, there was really no alternative means to eliminate the cutworm problem. The cutworm levels were beyond a threshold to the point where the birds were destroying turf on the putting greens in their efforts to feed on the cutworms. While this is acceptable in other turf areas of the golf course it is unacceptable on greens. All pesticides were applied per label instructions. None of the greens are in locations where the product could runoff to other water sources.

- In 2005, 3.5 gallons total of Dursban Pro/Dow Chemicals (0.80 gallons of active ingredient, chlorpyrifos) were applied in May and August to the Sunnyvale Golf Course and in June to the Sunken Gardens Golf Course to treat for cutworm infestations on some putting greens. While every effort was made to avoid using chemical treatments, there was no alternative means to eliminate the cutworm problem. The cutworm levels were beyond an acceptable threshold and were to the point where the birds were destroying turf on the putting greens in their efforts to feed on the cutworms. While this is acceptable in other turf areas of the golf course it is unacceptable on putting greens because it creates an uneven surface for play. The product was used at the recommended rates, sprayed it at night and watered in per label instructions. None of the greens are in locations where the product could runoff to other water sources.

- In 2006 and 2007, no Chlorpyrifos-containing pesticides were applied to City-owned property.

The use of chlorpyrifos-containing pesticides is very low and infrequent. The choice to use this pesticide is made only after the City's IPM policy is followed and there is specific written justification for its use by a Pest Control Advisor. The quantity and location of its use depends on the specific need to control an insect problem.

Pesticide Removals:

- Annual searches of pesticide storage areas in Public Works, Parks and Recreation, and the Golf Course did not turn up any pesticides that were prohibited for current use. In FY 04-05, some pesticides containing Diazinon, Dursban, and chlorpyrifos were found by Public Works staff during their storage area inventory. These were disposed of in FY 05-06 as hazardous wastes, following all appropriate state and federal regulations. Storage area searches in FY 06-07 did not find any pesticides that were prohibited for current use and only a few that were identified as no longer being used by staff. These will be disposed of in accordance with appropriate State and Federal law in FY 07-08.

Sunnyvale's IPM Policy:

- A copy of the IPM Policy that was placed in the City's Administrative Policy Manual (APM) – Chapter 6, Article 12. The public also has access to the policy through the Water Pollution Control Plant website at http://wpcp.sunnyvale.ca.gov The IPM Policy information is also available on the City's Intranet website for access by all City staff.

- Outreach to the City's trained/licensed pesticide application staff about the IPM policy continued in FY 07-08 (See Attachment M for staff training information.)

Contractors and the City's IPM Policy:

- Pest Control Companies who had contracts with the City to apply agricultural pesticides/herbicides to City properties in FY 01-02 and FY 02-03 did not apply any Diazinon or Chlorpyrifos-containing compounds. Due to budget constraints, contracts for Parks and Recreation agricultural pesticide/herbicide application contractors were not renewed beginning in FY 03-04. Parks and Recreation certified pesticide applicators performed all applications to City-owned property from FY 03-04 through FY 06-07. Contractors were engaged in FY 06-07 and FY 07-08 for ground squirrel and gopher control. One contractor was also used for broadleaf weed control by the Parks and Recreation Department In FY 07-08. These contractors are made aware of the City's IPM Policy and required to follow it.

- The City employs one structural pest control contractor, who is required to abide by the IPM policy in their contract that became effective July 1, 2003 and was renewed in 2005. Data on types and quantities of pesticides used in structural pest control activities from July 2003 – December 2003, and calendar years 2004 through 2007 are included in Table 1 above. The current structural pest control contractor uses a very limited number of "caution" labeled products and follows IPM practices such as monitoring and pest identification prior to application of a pesticide. Traps (e.g., glue boards) and bait stations are often used prior to any application of pest control sprays or granular materials to try to control a pest problem through less-toxic means.

- Copies of their IPM training received are kept on file and provided to the City upon request. Five of their staff received one hour of IPM training on fly control from Bayer Environmental Sciences. Additional 5 hours training for respiratory protection was received by their staff from Univar USA.

IPM and City Property Leaseholders:

- Lease holders were notified of the City's IPM policy in June 2003 by the City's property manager. Periodic updated have been provided through a flyer that was prepared for distribution by the contract property manager in 2003. This brochure was sent out again to leaseholders in June 2007. It is provided to new tenants, as needed.

Attachment H – Appendix 1 – Table 2
PI/P Pesticide Management Activities – Estimated Numbers Reached
FY 2007-2008 Annual Report
Municipality: Sunnyvale

Sunnyvale Targeted Outreach for the Pest Management Plan			
Pest Management Plan/Policy Implementation	Track and/or estimate the numbers of Sunnyvale residents and staff reached through outreach efforts (including advertising) regarding the City's IPM policy, pesticides use reduction, and related topics.	Sunnyvale Quarterly Report	The Quarterly Report contains a page devoted to information concerning the environment, and is mailed to approximately 60,000 Sunnyvale residents and businesses each quarter. Additionally, 2000 copies of the report are distributed to the Library, City Hall, Community Center, Senior Center, Public Safety and Columbia Neighborhood Center. The Quarterly Report is also posted on the City's web page.
		Outreach to City staff through employee newsletters	The *Harbinger* is Sunnyvale's internal newsletter for employees. Articles and information contained in the *Harbinger* reach approximately 900 municipal employees. The *Poop Scoop* is the staff newsletter for the Water Pollution Control Plant and is read by approximately 65 employees.
		KSUN Community Cable TV Ads	KSUN advertising reaches about 13% of all cable subscribers in Sunnyvale, who say they tune in once or twice a month.
		IPM via Sunnyvale Website	Information regarding proper disposal of mercury containing products is listed on both the Solid Waste and Water Pollution Control Plant websites. Reach is unknown. The City of Sunnyvale does not have the ability to count number of hits to the website
		Sunnyvale ReNews Newsletter	This newsletter addresses pollution prevention concerns with a focus on reduce, reuse, and recycle and is mailed to approximately 29,000 single family residents and 24,000 multi-family residents twice per year. An additional 500 copies are printed and distributed from various locations.
		Neighborhood Association Newsletters	Sunnyvale has 17 neighborhoods associations registered with online electronic newsletters. Information regarding the Green Gardener program was posted to the newsletters. Reach not determined.

		El Observador	The Green Gardener program was featured in El Observador, a weekly newspaper in San Jose covering race & ethnic news and serving Latinos in the San Francisco Bay Area. Reach not determined.
		Sunnyvale Farmers Market	Outreach distributes IPM and less toxic pesticide information at the Sunnyvale Farmers Market each month. Approximately 30-40 individuals visit the booth each month for general water pollution prevention information.
		Global Sunnyvale	City exhibit booths provided general and educational information. A craft promoting the importance of beneficial insects and how we should all work to protect them was provided for children attending the event. The art project was extremely popular. Approximately 110 children came to the booth for the craft project.
		Earth Day	City exhibit booths provided general and educational information. A craft promoting the importance of beneficial insects and how we should all work to protect them was provided for children attending the event. The art project was extremely popular. Approximately 180 students came to the booth to make the craft project and learn about beneficial insects.
		Sunnyvale Schools Outreach	Sunnyvale uses the Enviroscape as a teaching tool for classroom presentations. The presentation focuses on watershed education and water pollution from urban runoff. Pesticides, beneficial insects, IPM and less-toxic lawn and garden care is introduced and discussed. Sunnyvale conducted 16 classroom presentations this school year, reaching a total of 385 students.
		Compost Workshops	Workshops are held once per month 10 times during the year. Number attending depends on the season. Generally, approximately 12 – 40 individuals attend each new workshop session.

		Corporate Health and Safety Fairs	Outreach exhibited at (9) corporate health and safety fairs this reporting year, reaching over 900 company employees.
		Columbia Health and Safety Fair	At this event the children played the bean bag game. The player decides how to properly dispose of an item (pollution) printed on the bean bag by "disposing" of it into the correct receptacle. The activity helped children learn that pesticides and fertilizers should be disposed of as hazardous waste. Approximately 35 kids played the bean bag game.
		Creek Education Program	This program is targeted to 3rd graders who attend Sunnyvale Schools located in the Cupertino School District. 355 Sunnyvale students participated in the program this reporting year.
		State of the City	At this event the children played the bean bag game. The player decides how to properly dispose of an item (pollution) printed on the bean bag by "disposing" of it into the correct receptacle. The activity helped children learn that pesticides and fertilizers should be disposed of as hazardous waste. Approximately 40 kids played the bean bag game.
		State of the City	At this event the children played the bean bag game. The player decides how to properly dispose of an item (pollution) printed on the bean bag by "disposing" of it into the correct receptacle. The activity helped children learn that pesticides and fertilizers should be disposed of as hazardous waste. Approximately 40 kids played the bean bag game.
		Sunnyvale Pancake Breakfast	City exhibit booths provided general and educational information. A craft promoting the importance of beneficial insects and how we should all work to protect them was provided for children attending the event. The art project was extremely popular. Approximately 150 students came to the booth to make the craft project and learn about beneficial insects.

Santa Clara Valley Green Gardener Program Implementation

Introduction:

Beginning in FY 07-08, Sunnyvale staff, in cooperation with members of the PI/P Pesticide Outreach Ad Hoc Task Group and with funding from SCVURPPP contacted the Metropolitan Adult Education Program in San Jose to work together in offering the first Green Gardener Training Program in the Santa Clara Valley. This program had been successfully implemented in Santa Barbara, Monterey, and Santa Cruz cities and counties, and was based on a 20-hour (10 classes, 2 hours each) curriculum that was provided though Water Board grant funding.

The training and certification program covered topics related to promoting the principles of ecological landscaping that reduce stormwater pollution resulting from landscape maintenance practices. Training was included on promoting healthy soils, integrated pest management approaches, appropriate fertilizer usage, irrigation system scheduling, maintenance, and troubleshooting, selecting the right plant for the right place, pruning techniques, the use of mulches and compost to reduce weeds and support good soil development, and the use of appropriate types of garden equipment to reduce impacts to air quality. Providing information and training on good management practices that promote and support the use of IPM techniques are an integral part of this training program.

Sunnyvale's Participation:

Sunnyvale provided in-kind staff time to assist with the development, preparation and implementation of the class. Sections of the curriculum were modified to reflect issues for the local climate and soils. Staff provided assistance with class operations, technical assistance, and promotion. We were also successful in building partnerships with the Santa Clara County Master Gardeners and the California Landscape Contractors Association (CLCA) to promote and provide technical assistance for the class presentations as well as outreach to their memberships.

Staff time was also provided to assist with the preparation and grading of the final class exam and the preparation certificates of completion for those successful students who attended 80% of the classes and passed the final exam. Two Sunnyvale staff members taught 2-hour sessions of the class in there particular areas of expertise.

Success of the Program:

A total of 35 students signed up to take the class. Of those, 27 completed the class requirements and received their certificate of completion. These individuals are currently

being promoted as "Santa Clara Valley Green Gardeners" though outreach efforts on the part of the Program, at events, and via the www.mywatershedwatch.org website.

The demand for the class was significant. More than 15 individuals are on the waiting list for the next class. Preparations are underway to offer two classes through Metro Ed in the fall of 2008, one in English and one in Spanish. Pending funding availability, another class is planned for the spring of 2009.

Given that each individual trained in the Green Gardener program may provide services to between 40 – 100 clients, outreach to this group of landscape maintenance professionals can have a significant impact on reducing the impacts to water quality from current landscaping practices. This includes reduction of pesticides and fertilizers in urban runoff and the wise use of existing resources to improve the health, appearance, and value of landscapes for their customers.

Outreach to the public, promoting the hiring of trained Green Gardeners will be an important part of the FY 08-09 plan. Once a core group of individuals is trained, promotion of the selection of individuals and firms trained through this program will continue.

042343

Santa Clara Valley Green Gardener Training Program

Announcing a New Local Training Opportunity!

- *Everyone is going "Green." Meet the demand for Green Gardening practices and expand your business prospects!*
- This **ten-week series** of classes will provide you with the key principles of Ecological Landscaping or Green Gardening, which includes practices that conserve water, protect the soil and reduce the use of pesticides.
- *Green Gardening creates a healthier garden for your client, a healthier work environment for you and your employees, and a better environment for our shared land and water resources.*
- *Those who successfully complete the classroom and hands-on training program will be identified as Santa Clara Valley Green Gardeners and will receive free advertising and promotional referrals to clients seeking "Green" landscaping services.*

Starting Dates: September 23 and 24, 2008

Tuesdays (Spanish) 4:00 PM–6:00 PM
Wednesdays (English) 4:00 PM–6:00 PM

Each weekly, two-hour class will be held by the Community Interest Program of the Metropolitan Adult Education District located at the Erickson Adult Education Center,
4849 Pearl Avenue
San Jose, CA 95136

- Class registration fee is $120 *(Scholarships available upon request)*
- Class written materials will be available in Spanish or English.

For more information or to sign up for the class, contact the MAEP Administrative Center: (408) 723-6450

Sponsored by:

What is the Santa Clara Valley Green Gardener Training Program?

This is a new training program for landscape maintenance workers, landscape contractors, and professional gardeners the Santa Clara Valley area, based on the successful programs established in Santa Barbara and Monterey counties. The *Santa Clara Valley Green Gardener Training Program* is designed to offer education, training, and promotion of services for participating individuals in order to:

- *Reduce urban storm water pollution resulting from landscape maintenance activities*
- *Use resources wisely*
- *Improve the health, appearance, and value of landscapes for customers and site managers*
- *Promote economic incentives to program participants for both gardeners and their clients*

Classes will cover these topics:

- *Soils*
- *Integrated Pest Management (IPM)*
- *Fertilizers*
- *Irrigation (scheduling, maintenance, and troubleshooting)*
- *Right Plant, Right Place*
- *Pruning*
- *Mulches and Compost*
- *Air Quality Issues*

Professional gardeners who attend 80% of the classes and successfully complete a final test will receive a *Santa Clara Valley Green Gardener* card and certificate of completion. The *Green Gardener Card* is for an individual, not a company. However the listing of trained *Green Gardeners* in public outreach materials and web pages sponsored by the Santa Clara Valley Urban Runoff Pollution Prevention Program will include the student's company name and contact information.

Call the Metropolitan Adult Education Program Administrative Center: (408) 723-6450
for more information and to register.

Is Your Gardener A *Green Gardener*?

Ask your gardener or yard maintenance professionals if they have been trained as a *Santa Clara Valley Green Gardener*.

Santa Clara Valley Green Gardeners have received training to:

- Use resources wisely, conserve water, protect the soil, and reduce waste
- Improve the health, appearance and value of landscapes
- Reduce urban runoff and stormwater pollution from landscape maintenance activities

Contact the Santa Clara Valley Urban Runoff Pollution Prevention Program at 1-800-794-2482, Ext. 3 for more information about the Green Gardener Program
OR
Call the Metropolitan Education District, Metropolitan Adult Education Program at (408) 723-6450 for class registration information.

The Santa Clara Valley Green Gardener Program sponsors make no representations, warranties, or guarantees concerning the work performed by any of the trained Green Gardeners. It is your responsibility to check that all required licenses and insurance are in place for specified work.

Questions for Your Gardener or Landscape Maintenance Professional?

To find the right person to create or maintain your garden or landscape, ask if they....

- Water according to the needs of the season, the plant, and site soil conditions
- Prune selectively and properly to compliment the natural form and needs of the plant
- Use alternative approaches such as Integrated Pest Management (IPM) techniques, before turning to pesticides and herbicides
- Help protect air quality by using hand-powered equipment or fuel-efficient, low-emission equipment
- Amend the soil with compost and use mulch to feed the soils naturally
- Check soil for fertility, texture, and moisture
- Install and regularly maintain efficient irrigation systems
- Compost plant debris and grass-cycle
- Use local plant varieties that are California natives or adapted to our Mediterranean climate and that are not invasive species

FY 07 - 08 Annual Report

Attachment I

Mercury Pollution Prevention Activities

	Activity	CI Item Source	FY 07-08 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Control Program for Mercury						
Hg Work Plan I.A	Mercury Plan Development	Permit Prov. C.9c	Sunnyvale staff to continue to work with SCVURPPP Mercury Pollution Prevention Plan work group	Staff continued to participate in the SCVURPPP Mercury outreach group. Sunnyvale participated in program-wide mercury product recycling and reduction outreach efforts.	Ongoing Report 09/08	K. McCumby Env. Specialist
I.D &, I.F	Mercury Plan Implementation	Permit' Prov. C.9c	Sunnyvale Mercury Work Group to continue to meet and determine how Program-provided guidelines for the "virtual" elimination of mercury in urban runoff will be implemented to address controllable City sources.	The Sunnyvale Mercury Work Group did not meet this year, as there were no changes in current city policy and actions to collect and recycle mercury-containing products such as fluorescent lamps, switches, thermostats, etc, as they become wastes. The existing city policy for hazardous materials handling and the environmentally preferable purchasing policy are still effective.	Ongoing Report 09/08	K. McCumby & Sunnyvale Mercury Work Group (PW, Parks and Rec. Facilities. Mgt, reps.)
I.F & MM 1	Mercury Plan Implementation	Permit Prov. C.9.c	Continue improving current recycling programs for fluorescent lamps and Hg-containing products, as needed. Other products (e.g., thermometers/thermostats) may be included as appropriate to a particular City Department.	Recycling program for fluorescent, HID, and mercury vapor lamps generated by Public Works, Parks & Rec., and Facilities management continue to be collected and shipped off-site for recycling. As thermostats, switches, or other mercury-containing products become wastes, they are collected and shipped off for recycling, as well. See Appendix 1, Table 1 showing quantities of mercury-containing wastes that were shipped off for recycling in FY 07-08 and Table 2 for total quantities of Hg-containing wastes sent for disposal/recycling over the past 5 years.	Ongoing Report 09/08	K. McCumby, Environmental Specialist & Sunnyvale Mercury Work Group

Control Program for Mercury (Cont.)						
II.B	Mercury Plan Implementation	Permit Prov. C,9.c	Continue with existing Hg-containing product disposal services offered through the City's Household Hazardous Waste collection program, through support of the Santa Clara County HHW program.	Funding for collection of Hg- containing wastes continues for the City's HHW collection program, in addition to the wastes collected during County HHW activities.	Ongoing Report 09/ 08	K. McCumby, Env. Spec. and Mark Bowers, Solid Waste Program
II.C	Mercury Plan Implementation	Permit Prov. C.9.c	Annually document quantities disposed or recycled by the City divisions/ departments.	See Appendix 1, Table 1 of this Attachment for information on quantities of Hg-containing wastes that were collected and shipped for recycling/disposal by the various City departments in FY 07-08.	Ongoing, Report 09/08	K. McCumby Env. Spec. with support from Tony Perez, Jim Craig, & Scott Morton
II.C	Mercury Plan Implementation	Permit Prov. C.9.c	Collect and report information on quantities of fluorescent lamps collected by City HHW collection program at the SMaRT Station from residential customers. Provide this information to the Program, as needed, to add to County data for HHW collected from residents and CESQG business collection programs.	Quantities collected at the SMaRT Station are included in Appendix 1, Table 1. All other data collected on quantities of Hg-containing wastes collected at HHW events is tabulated by the County and the information is not available for the individual cities.	Ongoing Report 09/08	K. McCumby Env. Spec. and Debi Sargent, SMaRT Station Solid Waste Analyst
II.F	Mercury Plan Implementation	Permit Prov. C.9.c		• Sunnyvale continues to support HHW programs that encourage proper disposal of fluorescent lamps and other mercury-containing devices through public education, outreach and participation programs designed to reach residential, commercial and industrial users. • Sunnyvale is a contributing member of the Mercury Ad Hoc Task Group. Activities include a media campaign through print, radio and transit ads that encourages residents to dispose of	Ongoing Report 09/08	Sally Personett, Env. Outreach Coordinator & Mark Bowers, SW Program Manager

				fluorescents at participating store locations. Task group members assist in developing mercury work plans, budget review and activity planning and implementation. • Sunnyvale developed outreach material such as articles and theater ads on mercury pollution prevention, and attended community and business events to educate individuals, distribute literature, and promote safe disposal of mercury containing devices. • For detailed information on mercury outreach see Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 07-08.		
Control Program for Mercury (Cont.)						
III.A	Mercury Plan Implementation	Permit Prov. C.9.c	Continue financial support of Regional Monitoring Program through SCVURPPP funding.	Financial support of the Regional Monitoring Program continued through SCVURPPP via the city's assessment fees to the Program.	Ongoing Report 09/08	Lorrie Gervin, Env. Div. Mgr.
IV.C	Mercury Plan Implementation	Permit Prov. C.9.c	Support and participate in the implementation of the WMI Watershed Action Plan.	Staff continued participation in the WMI Action Plan Implementation. City Council approval was received to support a resolution and join the California Product Stewardship Council. This supports the WMI watershed action plan implementation to reduce/prevent potential pollutants from entering the watershed.	Ongoing Report 09/08	Lorrie Gervin, Env. Div. Manager

Control Program for Mercury (Cont.)						
V.A.3	Mercury Plan Implementation	Permit Prov. C.9.c	Pretreatment inspectors will continue to integrate distribution of Mercury Outreach materials and provide outreach to industries and businesses during routine inspections of facilities for source control measures.	• The Pretreatment Program distributed Mercury Outreach materials during inspections of facilities using mercury. • The Pretreatment Program inspected and distributed Mercury Outreach materials and ADA Guidelines for Dental practices to 76 dental facilities during the timeframe of this workplan. • The Pretreatment Program will continue inspections of facilities with sources of mercury on site, to integrate the distribution of Mercury Outreach materials and brochures during inspections, and to update outreach materials when appropriate.	Ongoing Activities Report 09/08	Sarah Scheidt, Senior Insp. Pretreatment Program
V.A.3	Mercury Plan Implementation	Permit Prov. C.9.c	Continue distribution of brochure "Is Mercury Hiding in Your Construction/ Demolition Project" by Building Division staff as requests for Building Demolition Permit are received.	Brochure is made available to those coming in for permits for demolition projects.	Ongoing Activities Report 09/08	Gordon Blancher, CDD/Building & Kristy McCumby, Env. Spec.
V.B	Mercury Plan Implementation	Permit Prov. C.9.c	Document and evaluate each outreach activity, including the target audience and number of businesses and/or residents reached.	• For documentation of outreach activities, target audience and number of individuals reached please see Attachment H-Appendix 1-Table 2 for PI/P Mercury Management Activities • The Pretreatment Program inspected and distributed Mercury Outreach materials and ADA Guidelines for Dental practices to 76 dental facilities during FY 07-08	Annually Report 09/08	Sally Personett, Env. Outreach Coord. & Sarah Scheidt. Sr. Ind. Waste Insp.

Control Program for Mercury (Cont.)						
V.C	Mercury Plan Implementation	Permit Prov. C.9.c	Assist with the project to determine local attitudes and behaviors to evaluate the success of the outreach efforts and saturation of outreach messages in coordination with the Watershed Watch Campaign Survey	Under direction from the Program, Sunnyvale is an active participant in all activities related to the Watershed Watch campaign survey. See the Program's section of the annual report for Watershed Watch information.	To be deter-mined Report 09/08	Sally Personett, Env. Outreach Coord.

Response to Regional Board Comments on the Control Program for Mercury Activities section of FY 06-07 Annual Report:
No comments were received from the Regional Board on this section.

City of Sunnyvale

FY 07 - 08 Annual Report

Attachment I

Mercury Pollution Prevention Activities

Appendix 1

Table 1 – Quantities of Mercury Recycled

Table 2 – Mercury Management Activities – Estimates of Numbers Reached

Table 1:
Quantities of Hg-containing wastes recycled from City Facilities in FY 07-08.

CITY DEPARTMENT/ LOCATION	TYPE OF WASTE	QUANTITY OF WASTE
SMaRT Station (Wastes from residences and small businesses)	Fluorescent Lamps (4 ft or less length) (> 4 ft length)	**6,983** 4ft tubes **739** >4ft tubes **338--** Circular **901**-compact fluorescents **138** --U-tube
Water Pollution Control Plant (City-owned property)	Fluorescent Lamps (4 ft length) Misc. shaped lamps and HID, Metal Halide Hg-containing wastes (e.g., thermometers and switches)	**303** - 4 ft length **21**- Misc. shaped lamps. **23**-HID/Metal halide/ Sodium **5**–Compact Fluorescent **2** -Thermostat/Switches **3**-lbs Hg-containing waste materials
Corp Yard - Public Works (City-owned Property	HID, metal halide, & Mercury vapor lamps (shipped)	**1,501** - HID, Mercury vapor and metal halide lamps
Parks and Recreation Dept.	HID, metal halide, & Mercury vapor lamps (shipped)	**121** - HID, Mercury vapor and metal halide lamps
Facilities Management	Fluorescent Lamps HID, Metal Halide, or mercury vapor lamps, Ballasts	**1,745**-4 ft fluorescent lamps **429**-U-bend fluorescent lamps **46**-compact fluorescents lamps.

Total Fluorescent Recycled/collected (all sized tubes):
Approximately 11,648 fluorescent and compact fluorescent lamps were recycled from residents and city operations in FY 07-08
Total HID, Mercury Vapor, & Metal Halide:
Approximately 1645 HID, Metal Halide and mercury vapor lamps were recycled from city operations in FY 07-08
Other Hg-containing wastes:
3 lbs of laboratory waste and 2 mercury switches from city operations were recycled or properly disposed of in FY 07-08

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment I – Appendix 1 – Table 2
PI/P Mercury Management Activities – Estimated Numbers Reached
FY 2007-2008 Annual Report
Municipality: Sunnyvale

Sunnyvale Targeted Outreach for Mercury Pollution Prevention Activities			
Mercury Management Plan/Policy Implementation	Track and/or estimate the numbers of Sunnyvale residents, staff, and businesses reached through outreach efforts (including advertising) regarding mercury pollution prevention, proper disposal and other related topics.	Media Sunnyvale Quarterly Report	The Quarterly Report is mailed to approximately 60,000 Sunnyvale residents and businesses each quarter, and among other features it contains a page devoted to information concerning the environment. Approximately 2000 additional copies of the report are distributed to various public distribution points around the city. The newsletter is also posted on the City's web page.
		Media Outreach to City staff	The Harbinger is Sunnyvale's internal newsletter for employees. Articles and information contained in the *Harbinger* reach approximately 900 municipal employees.
		Media Theater Ads	An ad for proper disposal of fluorescents was developed for the Mercado Theater complex in Sunnyvale. The 14-second animated/audio ad was viewed by movie audiences (3) times during a 13-minute timeframe prior to every movie shown in the 20-theater complex. The ad ran everyday before each movie during a 3-month period in 2008.
		Media Sunnyvale ReNews	This newsletter addresses pollution prevention concerns with a focus on reduce, reuse, and recycle and is mailed to approximately 29,000 single family residents and 24,000 multi-family residents twice per year. An additional 500 copies are printed and distributed from various locations.
		Media KSUN Community Cable TV Ads	KSUN advertising reaches about 13% of all cable subscribers in Sunnyvale, who say they tune in once or twice a month.
		Media Websites	Information regarding proper disposal of mercury containing products is listed on both the Solid Waste and Water Pollution Control Plant websites. Reach is unknown. The City of Sunnyvale does not have the ability to count number of hits to the website
		Media Business Recycling Solutions	This business-oriented newsletter focuses on reduce, reuse, recycle messages and is mailed to approx. 1600 businesses located in Sunnyvale and is available online for public viewing.

		Event – Community Farmers Market	Outreach distributed the mercury brochure produced by HHW titled *What You Didn't Know….* at the Sunnyvale Farmers Market each month during FY07-08. This popular brochure contains information regarding the location of retail stores where individuals can properly dispose of fluorescents. Approximately 30-40 individuals visit the booth each month for general water pollution prevention information.
		Event – Community State of the City	At this community event the Outreach exhibit distributed water pollution prevention information that also featured proper disposal of mercury containing devices as household hazardous waste. Approximately 80 adults and 40 kids visited the booth for information.
		Event – Business Corporate Health and Safety Fairs	Outreach exhibited at (9) corporate health and safety fairs this reporting year, reaching over 900 company employees.
		Event - Community Sunnyvale Pancake Breakfast	This annual event features a community breakfast, activities for kids, and exhibits that provide community information. The most popular literature is the mercury brochure. Approximately 20 adults stopped by the booth for information
		Event - Community Columbia Health and Safety Fair	Approximately 25 kids played the bean bag game at the event, learning that mercury containing items must be disposed of as household hazardous waste. General water pollution prevention literature was distributed to approximately 10 community members attending the event.

City of Sunnyvale

FY 07 - 08 Annual Report

Attachment J

Copper Action Plan/Nickel Action Plan

P.S. Id.	Activity	CI Item Source	FY 07-08 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Copper/Nickel Baseline Activities					
CB-1 (1 &4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	• Continue to inform the public by distributing materials, brochures, and other information at city offices, public places, and events. • Promote methods to reduce copper discharges from vehicle washing by placing articles or ads in various media (e.g., the Quarterly, KSUN, websites, theater ads and utility bill inserts).	Sunnyvale continues to educate the public about water pollution caused by residential car wash activities. At the following annual events, car wash literature is always distributed, and at some events the Enviroscape is used to demonstrate the effects of residential car wash on water pollution. EVENTS *Sunnyvale* • Earth Day Event • Columbia Health and Safety Fair • Farmers Markets • State of the City • Sunnyvale Pancake Breakfast *Business Environmental Fairs* • Interwoven, Network Appliance, Lockheed, SST, AMCC, Aruba, Cephoid, JSR Micro *Regional* • Classic Car Wash outreach MEDIA Outreach *Sunnyvale Quarterly Report articles* • Car Wash Kits • Pollution Prevention Week • Reporting storm drain pollution *KSUN Community Cable TV* • An advertisement advising residents about water pollution from residential car washing ran on KSUN during National Pollution Prevention Week *Theater Billboard Advertising* • A car wash pollution prevention ad	Ongoing Report 09/08	Sally Personett PW Env. Outreach Coord.

				ran at the Mercado Theater complex 7/08-10/08. YOUTH Outreach *Schools* • Outreach presented the Enviroscape demonstration to 16 classes in Sunnyvale Elementary Schools. A large portion of the demonstration is storm drain pollution from washing vehicles in driveways. *Creek Education Program* • This creek and storm drain education program teaches 3rd graders about pollution in creeks from urban runoff See Attachment G Table 1 PIP Activity details for more information.		
CB-1 (1 &4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	Continue implementation of Charity Car Wash Kit program. • Expand on initial outreach on kit availability • Assess implementation of program – any issues with kit use and pollution prevention • Evaluate the success of the program by tracking frequency of use	• The kit was promoted to as outlined in the section above • The educational aspect of the kit has been effective in helping residents understand that actions such as car washing can lead to the release of water containing pollutants into the city's storm drain system that is connected to the Bay. Pretreatment staff works with the kit users to set up and operate it properly. However, on the day of the event, staff is not there to ensure that all the best management practices are followed. • The success of the program has been limited. Only a few reservations for the kits have been received this past FY. However, over time, it is anticipated that more groups will use it, if car washes continue as fund raising activities and publicity about the kit's availability continues.	Ongoing Report 09/08	Kristy McCumby, PW, Env. Spec.

Copper/Nickel Baseline Activities cont.						
CB-1 (1 &4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	Require source control measures for new and redevelopment projects (those adding or replacing 10,000 sq ft of impervious area) that conduct vehicle/equipment washing and maintenance activities (Consistent with Provision C.3.k)	As new and redevelopment projects are reviewed, vehicle washing facilities are identified on the project plans. If they are present, BMPs must be instituted that address the wash water. Depending on the circumstances, connection of a vehicle wash area to the sanitary sewer with appropriate pretreatment may be required. Otherwise, vehicle washing areas are not approved on the project plans. Equipment washing facilities, especially for restaurants, that are connected to the sanitary sewer are required. There were no new or redevelopment C.3 applicable projects approved during the reporting period that planned to conduct vehicle equipment washing or maintenance activities. However, one project has been submitted for a permit for a facility (which did not fall under the C.3 requirements) that will perform vehicle washing onsite. • The facility will install stormwater protection devices to their new wash rack with a canopy and divert wash water to an oil/sand/water separator to prevent discharge to the storm sewer system. • The Environmental Division continues to review applicable projects and require source control measures for projects that conduct vehicle / equipment washing and maintenance activities.	Ongoing Report 09/08	Mariya Hodge, Assoc. Planner & Sarah Scheidt, Sr. Ind. Waste Insp.

	Copper/Nickel Baseline Activities cont.					
CB-1 (2 & 4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	• Continue to inspect commercial/ industrial facilities that have vehicle washing activities occurring on site (this includes auto-related businesses). • Ensure BMPs for vehicle washing are employed. • Distribute new vehicle washing BMP information that is available in three languages during inspections. • Provide an effectiveness evaluation of inspection/compliance with BMPs. • Continue to inspect vehicle-washing areas for City vehicles at the Corp Yard.	• 26 automotive related facilities were inspected for BMP compliance during FY 07-08 including sales, repair, fleet, car washes, and gas stations. • Automotive BMPs, including washing BMP information, were distributed to all facilities that were inspected. • No enforcement actions were issued during FY 07-08, which indicates compliance with BMP materials distributed in the past. • Facilities will continue to be inspected bi-annually.	Ongoing Report 09/08	Sarah Scheidt Sr. Ind. Waste Insp.
CB-1 (3 & 4)	Measures to reduce copper discharges from vehicle washing operations	Permit Prov. C.9.a (CAP)	• Encourage new mobile cleaners and those who are renewing their certification to use the BASMAA website for on-line mobile cleaner training and be recognized on the area wide certification list. • Continue to provide training (as requested) to new mobile cleaners and those seeking recertification in Sunnyvale. • Evaluate effectiveness of the training program and BASMAA on-line training. • Encourage municipal staff to use certified mobile cleaners when contracting for cleaning services Maintain records on who has been trained by City staff and report on numbers trained in the annual report.	• The Pretreatment Program continues to promote the use of the BASMAA on-line training program for Surface Cleaners. Additionally, we continue to utilize the Surface Cleaners Training Kit developed by the Program to provide training to new mobile cleaners, as needed. • One mobile cleaner in Sunnyvale was certified by the Santa Clara County Green Business Program. • The City did not certify or recertify any mobile cleaners during this reporting period. • A total of 58 firms in Santa Clara County are listed on the BASMAA website as being current in their training.	Ongoing Report 09/08	Sarah Scheidt Sr. Ind. Waste Insp.

Copper/Nickel Baseline Activities cont.						
CB-3	Measures to control copper discharges to storm water from targeted industrial sources	Permit Prov. C.9.a (CAP)	• Industrial Waste Inspection staff will continue specific outreach to all printed circuit board manufacturers and metal plating facilities using copper and having the potential to discharge copper into storm water. • Distribute and discuss BMPs/information to minimize copper discharges. • Continue inspections of all commercial/industrial facilities, including NOI sites using copper.	• Industrial Waste Inspection staff continues to inspect and permit all metal plating facilities yearly based upon their regulatory category. • During inspections BMP's are provided and a storm water inspection is conducted to identify any potential discharges. • Staff inspects NOI filers on a yearly basis and is typically incorporated with the wastewater discharge permitting and inspection process.	Ongoing Report 09/08	Sarah Scheldt, Sr. Ind. Waste Insp.
CB-6/7	Reducing Traffic Congestion/ Promoting Alternative Transportation	Permit Prov. C.9.a (CAP)	• Continue implementation of site design standards related to transportation to meet the requirement of C.3.j of the permit. • Report on significant projects where traffic congestion reductions were included in design plans.	• A project is under review for the widening and access change to the Mathilda Avenue overpass, in cooperation with CalTrans. This includes the use of a bioswale for parking lot runoff treatment, the use of pervious pavers to reduce impervious areas, and the treatment of overpass runoff with a vortex separator unit. The following projects were completed in FY 07-08 that help reduce traffic congestion through the promotion of alternative transportation: • Evelyn Avenue Bike lanes from Bernardo to Reed Avenue • Frances Street Transit Center • Bernardo/Blair lighted cross-walk • Hollenbeck Ave at Loehmans Plaza lighted cross-walk • Sunnyvale CalTrain Station north side pedestrian access • Sunnyvale Multimodal Station bicycle parking.	Ongoing Report 09//08	Lead: Jack Witthaus, Transportation/ Traffic Mgr Support: Mariya Hodge, Assoc. Planner

Copper/Nickel Baseline Activities cont.						
CB-8	Measures to classify and assess watersheds and to improve institutional arrangements for watershed protection	Permit Prov. C.9.a (CAP)	• Continue to implement HMP requirements for projects that meet the size threshold criteria in HMP applicability areas as identified by maps included in the City's BMP Guidance Manual. • Continue to review EIRs and complete CEQA reviews to ensure watershed protection is considered in CEQA actions. • Continue participation in SCBWMI activities as it implements the Watershed Action Plan. • Revise Sunnyvale's General Plan (Surface Runoff Sub Element), as needed, at the next scheduled update. Include recommendations based on the review of the Development Policies Comparison Project and Provision C.3.I of Order 01-119 as determined to be appropriate. • Continue participation in the Water Resources Protection Collaborative (WRPC). Council approved a study issue to review the guidelines and standards, then develop a plan to implement those that apply to City circumstances.	• No projects that met the HMP thresholds in the HMP applicability areas identified by the City were submitted in FY 07-08 • As EIRs are submitted, they are reviewed to consider watershed protection, where needed. • Staff continues to participate in the SCBWMI as elements of the Watershed Action Plan are implemented. • The Surface Runoff Sub Element of the City's General Plan was not updated this year. Depending on the requirements that evolve from the Municipal Regional Permit when it is approved, the City will review this Sub-Element and determine changes that may need to be incorporated. • The WRPC has not been active in FY 07-08. However, the City did review the Guidelines and Standards for developments near creeks and waterways and adopted the sections that were applicable to Sunnyvale situations in May 2007. The Guidelines and Standards continue to be implemented as required.	Ongoing Report 09/08	Lead: Lorrie Gervin, Env. Div. Manager and Kristy McCumby, Env. Spec. Support for WRPC activities: Mariya Hodge, Assoc. Planner

Copper/Nickel Baseline Activities cont.						
CB-11	Measures to improve street sweeping controls and storm water system operation and maintenance	Permit Prov. C.9.a, (CAP)	• Implement (as appropriate) improvements identified for current sweeping program and storm drain system O&M (within available City Budgets). • Evaluate the effectiveness of street sweeping and storm drain O&M in the annual report (See Streets and Roads and Storm Drain sections of this work plan).	• The street sweeping program continued this year as in past years, with no significant changes. There was no change in the funding available for street sweeping in FY 07/08. The regular schedule was maintained throughout the year. • Annual storm drain catch basin cleaning occurred and additional clean outs are done on an as-needed basis to prevent flooding. Collected debris is taken to the SMaRT Station for disposal. • Better tracking of inlet cleaning activities through the use of an inlet cleaning form continues. The information collected on these forms was used to assist in the selection of inlets for the installation of 13 full-capture storm drain inlet retrofits, as part of the Pilot SDI Retrofit Pilot project currently under way with the City of San Jose and SCVURPPP. See Attachment K, Appendix 1 for details on the pilot project. • Street sweeping data on curb miles swept and quantities of debris are reported in Attachment D-1, Appendix 1.	Ongoing Report 09/08	Tony Pineda Maint. Supv. & Jim Craig, Field Services Superint.

Copper/Nickel Baseline Activities cont.						
CB-11	Measure to Track Street Sweeping Data	Permit Prov. C.9.a (CAP)	• Continue to follow Program guidance regarding the collection and reporting of street sweeping data. • Provide information periodically to the program. Information for reporting includes: quantity of waste collected (cubic yards), number of miles swept, and frequency of sweeping as required.	Data were tabulated from PW Streets maintenance daily logs and this information was reported to the Program, as requested. • Street Sweeping data collected for this year are included in Attachment D-1, Appendix 1 of this report.	Ongoing Report 09/08	Tony Pineda, Maint. Supv. & Kristy McCumby, Env. Spec.
CB-12	Measures to Control Copper Discharges from Pools and Spas	Permit Prov. C.9.a, (CAP)	• Continue to inform the public by distributing materials, brochures, and other information at city offices, public places, and through on-site distribution at presentations and events. • Continue to provide proper pool and spa water discharge information to the public by placing ads in various media (e.g., The Quarterly, KSUN, City website, theater ads, and utility bill inserts.	Public outreach activities related to water pollution from pool and spa discharge is described below: Events *Community* At the following events, the *Draining Pools and Spas* brochure was distributed • Earth Day Event • Columbia Health and Safety Fair • Farmers Markets • State of the City • Sunnyvale Pancake Breakfast *Business* At the following environmental events sponsored by Sunnyvale businesses, the *Draining Pools and Spas* brochure was distributed to employees: • Interwoven, Network Appliance, Lockheed, SST, AMCC, Aruba, Cephoid, JSR Micro MEDIA OUTREACH *Sunnyvale Quarterly Report articles* • Reporting storm drain pollution *Utility bill insert* • **Drain Smart**, a water pollution prevention insert regarding proper draining of pools and spas was inserted in utility bills.	Ongoing Report 09/08	Sally Personett, PW Env. Outreach Coord.

				KSUN Community Cable TV • An advertisement advising residents to properly drain pools and spas to a sanitary sewer cleanout ran on KSUN during National Pollution Prevention Week *WPCP Website* • The **Draining Pools and Spas** brochure is posted for viewing and downloading on the website at the Water Pollution Control Plant. See Attachment G Table 1 PIP Activity details for more information.		
Copper/Nickel Baseline Activities cont.						
CB-21	Measures to Discourage the Architectural Use of Copper	Permit Prov. C.9.a (CAP)	• The ornamental/architectural use of copper in building designs is discouraged in practice, but not prohibited by Sunnyvale ordinance. • The City is in the process of changing its Design Guidelines to not allow the ornamental use of copper for roofs, cutters, or other architectural/ ornamental exterior uses.	• The use of copper is strongly discouraged in all architecture for new and redevelopment projects. • The use of copper for outdoor architectural features was included in the WRPC Guidelines and Standards as a design guideline which was adopted into the Sunnyvale Municipal Code (by reference) in 2007. The guidelines continue to be used for all new construction and redevelopment projects.	Ongoing Report 09/08	Mariya Hodge, Assoc. Planner & Kristy McCumby Env. Spec.
NB-1	Measures to Implement Metals Controls Measures: Erosion 1) Implement perf. Stds for Const. Inspect. Erosion 2) Participate in region-wide training and certification of site inspectors	Permit Prov. C.9.b (NAP)	• Continue to implement Construction Inspection Performance Standards • Continue to have Inspectors attend Regional Board/Program workshops on Construction Site Management and erosion controls to learn the latest in erosion and sediment control techniques. • Continue to attend Program-sponsored workshops on post-development storm water control BMPs	Both Building Inspection staff and Capital Projects Administration staff implement the Construction Inspection Performance Standards in the City's URMP. Staff attends training as it becomes available. See Attachment M for staff training details by division.	Ongoing Report 09/08	Gordon Blancher, Building Insp./ Coord. Hira Raina/ Nasser Fakih

Trash Investigations and Plan Development						
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Assist Program in implementing Pilot Demonstration Projects to focus on assessing trash control measures effectiveness.	Sunnyvale staff participated in the development and implementation of a pilot storm drain inlet retrofit project with SCVURPPP staff. 11 inlets were retrofitted with "full-capture" devices in January 2008 and two more were installed in June 2008. Preliminary observations and results are included in Appendix 1 of this attachment.	Report 09/08	Kristy McCumby/ Env. Specialist
	Trash Investigations and Plan Development	Program Task RWQCB Letter	• Continue to identify and prioritize actions for trash problem areas in urban streams and waterways. • Identify other potential sources of trash. • Use criteria provided by Program staff in FY 07-08 to identify and prioritize the areas.	• Staff participated in the SCVURPPP Ad Hoc trash management committee and the development of the Trash Tool Box that identified approaches for dealing with trash issues. • Based on the Rapid Trash Assessments in Sunnyvale East and West Channels, and Stevens Creek as well as data collected using the Keep America Beautiful assessments, the City targeted some neighborhood and Channel clean up events for both the countywide Great American Litter Pick up, National River Clean Up day, and Coastal Clean Up day events. See Appendix 1 for details on the events.	Ongoing Report 09/08	Kristy McCumby/ Env. Specialist
	Trash Investigations and Plan Development	Program Task RWQCB Letter	• Continue to identify and implement trash control measures, as appropriate, to address high priority trash problem areas within Sunnyvale's jurisdiction, • Provide specific information on trash management practices implemented.	See Appendix 1 of this section for a detailed description of the City's trash control efforts and practices implemented.	Ongoing Report 09/08	Kristy McCumby/Env. Spec & community volunteers (TBD)

Trash Investigations and Plan Development (cont.)						
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Track existing trash management practices used by the City and evaluate their effectiveness, based on guidance provided by SCVURPPP that will be developed in late FY 06-07. The Effectiveness Evaluation may include the use of the Urban Rapid Trash Assessment protocol and/or the KAB litter index in a subset of the high priority trash problem areas.	• The City continued with its trash management efforts, including street sweeping, litter collection by staff in City parks and along boulevards by crews doing landscape maintenance work. • The City coordinated volunteers for both the Great American Litter Pick Up event for two neighborhoods (approx. 2 square miles) and one event for National River Clean Up day to pick up litter on banks and access roads of the Sunnyvale East Channel from Baylands to Fair Oaks for a distance of almost 2 miles. Sunnyvale East Channel serves as the storm water conveyance for approximately 25% of the City of Sunnyvale and parts of Cupertino and connects to the Guadalupe Slough. • URTA assessments were done prior to clean up events in March 2008. URTA assessments will be done again in the spring of 2009 to determine if any of the upstream clean up efforts had any impact on the URTA scores. • See Appendix 1 of this attachment for more details on the City's trash management efforts and effectiveness evaluations of the specific actions/activities.	Report 09/08	Kristy McCumby, Env. Specialist

Trash Investigations and Plan Development (cont.)						
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Provide Program staff with trash management practices information from within Sunnyvale's jurisdiction, using a standardized reporting format.	• Data collected in FY 07-08 was transmitted to the program. • With the efforts on the Pilot Retrofit study, only two sites were evaluated using the Urban RTA methodology: Sunnyvale East and Sunnyvale West Channels. • The KAB methodology was not used in FY 07-08 as the approach is not as effective a tool for the trash control issues currently	Ongoing Report 09/08	Kristy McCumby/ Env. Specialist
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Submit Urban Rapid Trash Assessment Survey Forms, Trash Item Tally Sheets, and any other data collected to the Program staff, as appropriate.	• URTA forms, data and photos were submitted to the Program. • In addition, data collected during the first five months of the pilot SDI retrofit project were submitted.	Ongoing Report 09/08	Kristy McCumby/ Env. Specialist
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Continue to assist Program to develop Trash Fact Sheets, as appropriate.	• Staff assisted the program in the review and provided comments on the draft Trash fact sheets, as provided by the program. • See Program's annual report section on Trash for the updated Trash Fact Sheet.	Ongoing Report 09/08	Kristy McCumby/ Env. Spec.
	Trash Investigations and Plan Development	Program Task RWQCB Letter	Assist program staff in developing a long-term strategy for reducing trash in urban streams and waterways, and identify other sources that may contribute trash to those areas	• Staff continues to participate in the Trash Ad Hoc task group and provide information and analyses of trash management efforts on behalf of the City. • The City is supporting the Pilot Retrofit pilot project through in-kind staff participation, data collection, and analysis. Trash Inventory and Management

Appendix 1

Trash Assessment Results, Pilot Project, and Management Actions Initiated

City of Sunnyvale
Attachment K, Appendix 1
Trash Assessment Results and Management Actions Initiated
FY 07-08

Introduction:

In FY 07-08 the City was not able to obtain a community volunteer to assist with Urban Rapid Trash Assessments (URTA) so only one assessment effort was done in March 2008 in the Sunnyvale East and Sunnyvale West Channel sites. The URTAs were done in areas that had been previously assessed and where upstream trash management actions had been or would be implemented. Due to the lack of volunteer staff and the screening level nature of the Keep America Beautiful (KAB) assessment methodology, in addition to all the data collected in previous years, it was decided to place these resources that would have been needed to perform the assessments into other efforts at trash management this year.

Ongoing trash/litter pick up activities continue by both the Public Works and the Parks and Recreation Departments. Street-sweeping, litter pick up at parks and after city-sponsored events, and during landscape maintenance operations all help to reduce the accumulation of litter in storm drain inlets and that could be wind-blown into adjacent waterways.

Public outreach and education about litter and its impact to creeks and the Bay are included in classroom presentations about watersheds using the Enviroscape model. Litter prevention messages are included in local advertising efforts. The City also helped distribute tarps to cover loads and informational flyers to residents coming in to the SMaRT Station for waste disposal during the April "Extra Dump-Day" event.

Two new initiatives were started, rather than conducting multiple URTAs and any KAB assessments. The first was the coordination of two litter clean-up events in FY 07-08 and initiating planning for another event in FY 08-09. The second was the implementation of the Pilot Storm Drain Inlet (SDI) Retrofit project, in cooperation with San Jose and with the assistance of SCVURPPP. Results from these trash management initiatives are reported below, as well as an evaluation of their effectiveness.

Assessments:

URTA – Sunnyvale East and Sunnyvale West Channels

URTA assessments were performed on the Sunnyvale East and West Channels in March 2008. The SCVURPPP assessment reporting table, assessment forms, and photographs are included at the end of this Appendix.

URTA scores for the Sunnyvale East Channel assessments have ranged from a low of 59 to a high of 98. Scores for the Sunnyvale West Channel ranged from a low of 81 to a high of 100. (See Table 1 below.)

Table 1: URTA scores for Sunnyvale East and West Channels FY 04-05 to FY 07-08

	FY 04-05 Fall	FY 05-06 Winter	FY 05-06 Spring	FY 06-07 Winter	FY 06-07 Spring	FY 07-08 Winter
Sunnyvale East Channel	59	67	83	85	98	73
Sunnyvale West Channel	81	100	100	93	100	90

In general, scores are lower for assessments completed in the winter months after rain events during the wet season. Scores were higher in the spring, since the area had been cleaned up one time previously that year.

The scores for the Sunnyvale East Channel, in general, are lower than those observed for the West Channel. This may partly be due to differences in the drainage area size for each channel. Sunnyvale West Channel drains 4.1 square miles and is 3.2 miles in length. Sunnyvale East Channel drains 6.35 square miles of Sunnyvale and part of Cupertino and is 6.4 miles in length. Trash that is conveyed to the Sunnyvale East Channel via the storm drain outfalls is coming from approximately a 35% larger drainage area than that of the Sunnyvale West Channel.

Also, there may be more litter entering the Sunnyvale East Channel from highway sources, as it is crossed by bridges for Highway 237. Litter pick up during the National River Clean-Up Event collected several bags of debris from the area adjacent to the bridge crossings over the East Channel in May 2008. The Sunnyvale West Channel is underground where Highway 237 crosses.

The majority of the trash observed at both channels appears to have been accumulated at the assessment location from upstream water transport sources. There is some wind blown accumulation from vehicles using Caribbean Drive and Highway 237 where bridges or the roadways are adjacent to the channels and next to the URTA assessment area.

Both Sunnyvale East and West channels drain highly urbanized portions of the City with a mixture of residential, commercial, and industrial land uses. The impacts from land use activities directly adjoining the channels appear to be small. Walking surveys along the banks of the channels from Baylands to Mathilda Avenue for the Sunnyvale West Channel(where the channel undergrounds in a box culvert) and from Baylands to Fair Oaks/ Hetch-Hetchy Green Belt for the Sunnyvale East channel(where the channel undergrounds for a long distance) did not identify significant impacts from properties bordering the channels. The land use in these portions of the channel is predominantly industrial for technology-related businesses. Some minor "homeless" and "Graffiti" impacts on the Sunnyvale East Channel near the Hetch-Hetchy Green Belt crossing area were observed.

City Department Litter Control/Clean Up Activities in FY 07/08:

Public Works Department

The Street Maintenance Division continues to perform street sweeping on a monthly basis in residential areas (See street sweeping route map with dates for 2008 on Sunnyvale's website at http://sunnyvale.ca.gov/NR/rdonlyres/451C3CB8-5370-46B9-AAD5-A8EB5DA5F5C2/0/2008sweepingmap.pdf). Weekly sweeping occurs for the downtown core area (Murphy Street) and the surrounding city-owned parking lots. Additional sweeping for leaf pick-up is done in the late fall, as well as extra sweeping for storm debris, as needed. (See Attachment D-1, Appendix 1 of this report for details on the quantity of materials collected during street sweeping activities and the number of curb miles swept.)

Public Works, Street Maintenance Division staff also assisted the Public Safety Department in clean up actions for six homeless encampments in FY 07-08. Approximately, 36 cubic yards of debris were collected in these efforts and disposed of at the City's solid waste facility. Although these encampments were not located on nearby waterways, the collection and removal of this debris helped prevent resulting litter or small debris from entering any storm drain inlets near the encampment areas.

The Boulevard Landscaping Division is responsible for maintaining landscape along City-owned rights-of-way. In their landscape maintenance activities, they also collect litter that accumulates on street medians and roadsides that are maintained by these crews. The litter from these areas is removed 13 times per year (roughly on a monthly basis). Approximately 66 cubic yards of litter were removed city-wide in FY 07-08.

Solid Waste Division and Contractor: SMaRT Station litter control efforts along Caribbean Drive

Garbage transfer trucks hauling wastes to the SMaRT station in Sunnyvale use Caribbean Drive as their access to the City's materials recovery facility. As a result, windblown litter from the vehicles after they have off-loaded has been identified a chronic problem along the site access route.

City staff sent a memorandum to the facility contractor, reminding them to check their trucks for loose litter prior to leaving the facility. The contractor operating the SMaRT Station is also required to pick up litter along the roadways leading to the SMaRT Station (Caribbean Drive, Borregas Ave, and Carl Road, two-times per week. Approximately 11 cubic yards of litter were picked up in FY 07-08 in these areas (Per Debi Sargent, Administrative Analyst, SMaRT Station/Solid Waste Program).

Two of the pilot SDI full capture devices identified in the SDI retrofit pilot project description below were installed along Caribbean Drive and will be monitored as one

method determine the effectiveness of efforts to reduce the litter coming from solid waste transport vehicles utilizing the SMaRT Station.

Parks and Recreation Department

Parks and Recreation Department, Parks and Open Space Division staff perform weekly clean-ups of public parks and trails, as well as some school athletic facilities to prevent litter accumulations. A total of 17,060 hours of staff time was used for litter control efforts at parks, school sports fields, and open spaces maintained by the City. Data on quantities of litter collected are not available; however, some $895,732 was spent last year for labor and disposal of litter for Sunnyvale Parks and school sports fields.

Litter Clean-up Events in FY 07-08:
The City coordinated sites for two litter clean up events in FY 07-08 and is currently the planning process for another event in FY 08-09.

Great American Litter Pick-Up Event (GALP):
On April 12, 2008, the City coordinated two neighborhood locations for the county-wide Great American Litter Pick-up event sponsored by the Silicon Valley Anti-Litter Campaign. Neighborhoods were selected that drained into the Sunnyvale East and Sunnyvale West Channels with an area of approximately two square miles. Land use was mostly residential, with some commercial and public schools/parks. The City had 37 volunteers donate almost 59 hours and picked up approximately 260 lbs or 1.4 cubic yards of trash and recyclables before they entered the storm drain collection system.

National River Clean Up Day Event:
On May 17, 2008, the City coordinated (in cooperation with the Creek Connections Action Group) a clean up of the Sunnyvale East Channel from the point where it enters the Guadalupe Slough near Baylands Park to the Hetch-Hetchy Greenbelt area near Fair Oaks Park, for a total of 1.9 miles. Land use in the area cleaned is a mixture of residential (mobile home parks) and industrial, with some public parks, trails, and rights-of-way near the channel. Twenty-one volunteers donated 49 hours and picked up approximately 300 pounds or about 2 cubic yards of trash and recyclables from the channel banks.

Planning for California Coastal Clean Up Day:
Planning is currently underway for another volunteer effort, in cooperation with the Creek Connections Action Group for California Coastal Clean Up event on September 20, 2008. The City will be sponsoring a clean up along the Sunnyvale West Channel from Mathilda Ave to Carl Road and a section of the Guadalupe Slough in the Baylands area that is adjacent to the Sunnyvale Water Pollution Control Plant Oxidation Pond access road. Adjacent land use in the Sunnyvale West Channel is predominantly industrial. Land use along the Guadalupe Slough is predominantly trail/recreation. However this portion of the Guadalupe Slough receives flow from Sunnyvale East, Sunnyvale West, Calabazas Creek, and San Tomas Aquino Creek as well as being tidally influenced by the South Bay. Accumulations of waterborne litter on the bank areas near

the high tide mark, as well as some coming from trail and baylands users have been observed there by city staff, making it a good candidate for clean up efforts.

Litter Prevention Efforts

Tarp Give-Away on Extra Dump-Day
At the April 12, 2008 "Extra Dump Day" event held at the Sunnyvale "SMaRT" station, 250 tarps were distributed to residents who brought in vehicle loads of waste for disposal and did not have their loads covered. Flyers were also distributed to participants that reminded them of city ordinances and state laws regarding the transport of wastes or materials on public roads requiring that loads be covered and littering be prevented.

Public Education and Outreach Articles/Advertising
Sunnyvale continues to provide public outreach by publishing articles and theater ads, by promoting litter pollution prevention at events, and by conducting demonstrations for residents and students in order to build trash and litter pollution prevention awareness. For detailed information on trash outreach see Attachment G Table 1 – Detailed Descriptions PI/P Activities and Self-Evaluation Matrix for FY 07-08.

Pilot Studies Initiated in FY 07-08

Pilot Trash Structural Treatment Control Study – With SCVURPPP and City of San Jose

To prepare and select the potential locations for the storm drain retrofits with full-capture devices, City staff reviewed catch basin cleaning data from the previous year, looked at KAB survey data from previous years, and made a list of approximately 25 potential sites that could be suitable for the pilot program. In August and September 2008, SCVURPPP and City staff visited the potential Storm Drain Inlets (SDIs), noting the nearby land uses and then took internal measurements of the inlets themselves to determine if they would be suitable for retrofits. Some inlets were deemed too small, as there needs to be adequate room to accommodate the screen of the device (which takes up about 25-30% of available inlet space). Use of a screen device in the smaller catch basins would present a more significant potential for flooding during storm events. Other inlets, when inspected, did not have much litter in them or nearby land uses did not appear to be potential sources for litter.

Based on the amount of funding available for the pilot, thirteen sites were then selected for the construction of the individually manufactured units. Since each inlet is unique, with its size, outflow, and inflow piping configuration, it is not possible to have a "one-size-fits-all" design and each unit is constructed to fit a specific SDI, based on the measurements taken during the site selection process.

In January 2008, the City and SCVURPPP installed 11 "full-capture" StormTek® stainless steel catch basin inserts manufactured by Advance Solutions. Two of the units

did not fit in to the SDIs, despite careful measurements and photos being provided to the manufacturer. One of these two units was remanufactured and installed in June 2008 and the other is still under construction in July 2008. It will be installed before the wet season starts in 2008. The data collected from all units in the wet season of the upcoming fiscal year will be included in the annual report for FY 08-09. A final report on the pilot project will be produced in cooperation with SCVURPPP at that time. More detailed information regarding the site selection and installation, including photographs of the installations is provided in the Program's section of the annual report regarding trash management actions.

On February 8, 2008, Sunnyvale staff inspected the 11 installed inlets to determine the units' performance and if there was any need for clean out after recent storm events. All units appeared to be functioning well. Some were beginning to fill with debris (mostly leaf litter), but were not filled to the point where bypass would occur.

The 11 retrofitted inlets were cleaned on May 19, 2008. All debris was removed with a clamshell shovel, bagged, labeled, and taken to a processing area where litter was sorted from the leaf debris, weighed (wet weight), and approximate volumes for both leaf debris and litter were measured. Table 2 below shows the weights and volumes of litter and leaf debris collected from each of the 11 retrofitted SDIs.

Table 2. Quantities of leaf debris and trash found in Retrofitted SDIs five months after installation in 2008

Block Page # Inlet #	452 307	75 314	193 320	193 321	432 302	432 301	489 311	470 303b	629 313	652 304	398 301
Total Debris Wt. (lbs)	85	123	6	14.5	120	192	29	72	58	8	123
Total Trash Wt. (lbs)	12	5	0.5	0.25	2.5	4	2	0.5	3	0.1	2
Total Debris Vol. (cu/ft)	3.1	4.2	0.7	1.4	4.8	7.5	1.4	2.5	1.7	0.9	3.8
Total Trash Vol. (cu/ft)	1.3	0.8	0.1	0.7	0.25	0.2	0.5	0.1	0.1	0.01	0.4

Of the 11 inlets cleaned, a total of 830 pounds of leafy debris and 32 pounds of trash were removed. This was approximately 1.2 cubic yards of leafy debris and 0.2 cubic yards of litter.

The leafy debris (deciduous leaves, conifer needles, and twigs) appeared to be from the local street trees and was not from material being dumped or discarded by residents or businesses. Sunnyvale requires the use of green-waste carts by residents for yard debris pick-up.

The most common types of litter categories observed in the retrofitted inlets were the plastics. Plastic food wrappers* (e.g., candy bar wrappers, chip bags, snack food wrappers) cellophane, plastic cups, lids and straws, and Styrofoam packing materials were frequently observed. Paper was also very common, in some areas. Cigarette butts were frequently found, especially on inlets that were close to stop lights and on roadways with higher traffic flows. Very few glass or metal items were observed in the litter. A more detailed description of the materials and quantities observed will be included in the Pilot Project report that will be available at the end of FY 08-09.

Additional analyses of the data collected in May 2009 and during the wet season of 2008-2009 will be included in the report for the pilot project. This will include information such as the trash loading rates from specific land uses to the stormwater conveyance system, more detailed information on the types of debris removed, the maintenance frequency needed for proper operations, and the overall costs for removal per quantity of trash removed.

*Polyethylene tetraphthalate (PET) that is biaxially oriented or boPET film used for food packaging.

Effectiveness Evaluations:

<u>City Department Litter Clean Up and Prevention Efforts:</u>
Both Public Works and Parks and Recreation Departments within the city continue with their efforts to control litter in public areas and rights-of-way. Litter/trash pick up is a normal part of the job for staff in both of these departments as they maintain public facilities. In areas that are known to be problematic (e.g., along routes to the SMaRT Station) the City requires contractors to pick up wind-blown debris from the truck routes. City crews collected approximately 66 cubic yards of debris in FY 07-08 on city property and rights of way.

The City continues with street sweeping efforts to collect debris. Over 7,000 cubic yards of litter, leaves, and street debris were collected in FY 07-08, which is a slight decrease from previous years, based on the same number of curb miles swept in residential, commercial, and industrial areas of the city.

Litter pick up after public events on city property is an integral part of the event planning effort. Litter remaining on-site after events has not been an issue in Sunnyvale.

Great American Litter Clean-up and National River Clean – up Day Events
Both of these volunteer events were very successful. The number of volunteers needed for the event was met and the quantity of litter picked up, although not huge, was still proactive in keeping the wastes from entering the storm drain system (for the GALP) or into the Bay from the National Rivers Clean-up Day events. The events are popular for volunteers as they feel that they are doing something to help reduce visible pollution problems. It also provided an opportunity for outreach to the people in the neighborhoods who saw the volunteers picking up litter, helping make them more aware of litter issues.

Tarp Give-Away on Extra Dump-Day
This event was very effective at both providing the facility users with the appropriate covers for their loads coming in to the SMaRT Station for disposal, as well as providing them with education about the litter problems coming from uncovered loads and the legal requirements for covering loads. A total of 250 tarps were distributed at the event and the same number of people received the outreach material.

Public Education and Outreach Articles/Advertising
A combination of articles, theater advertisements, and promotion through demonstrations such as the Enviroscape continue to build trash and litter pollution prevention awareness levels with the public. See Attachment G, Table 1 for a detailed analysis of the effectiveness of the various outreach tools used for trash and litter outreach.

Pilot Trash Structural Treatment Control Study
The effectiveness of the pilot program is still being determined. Preliminary results indicate that the units work well as "full-capture" devices and collected significant amounts of leafy debris with smaller quantities of litter.

There was not evidence of bypass of the units that were installed in January. However, they missed the first two storms of the season that occurred in December 2007, so we are not able to determine if additional maintenance would have been needed in FY 07-08, had they been installed at the beginning of the rainy season. This information will be gathered during the upcoming wet season for FY 08-09.

Based on the preliminary results observed in the unit clean-out that occurred in May 2008, only certain catch basins may require more frequent cleaning, due to the smaller sizes of the inlets and local land use. The maintenance and determination of the trash loading rates and costs per quantity of trash removed will not be available until the final report is prepared for the FY 08-09 annual report.

Potential Next Steps:

Caribbean Drive-

- Continue contractor efforts to collect windblown debris from trucks leaving the facility.
- Continue to work with contractor to minimize the amount of debris falling off the transport vehicles.
- Monitor full-capture, retrofitted SDIs to see if litter control efforts are helping reduce the amount of litter entering the inlets.

Sunnyvale East Channel-

- Plan for a clean-up event on National River Clean-Up day, spring 2009.

Sunnyvale West Channel-

- Plan for a clean-up event on Coastal Clean-Up Day, fall 2008

City Department Actions-

- Work with department staff to collect data on current level of litter control efforts, such as quantities of debris collected, to assist with effectiveness assessments of litter control efforts.

Date:3/25/2008

I. Site Information

1. **Site ID# SU16 B Watershed: Sunnyvale East Channel Location: SV East at Caribbean Drive**

II. Assessment Information

1. Which assessment tool was used? (Check one)
   ☒**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
   ☐**Non-Creek**-KAB Litter Index ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 73
3. Windshield Survey Results-Trash Priority: ☐ **NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? 25%
5. This assessment is ☐ **Initial** ☒**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site? 5

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☒Plastic bags	☐Cigarette butts	☐Fabric and cloth
☒Styrofoam products	☐Plastic/Synthetic items	☐Toxic substances
☐Aluminum cans	☐Tires	☐Appliances
☒Bottles (plastic and glass)	☐Woody debris	☐Furniture
☒Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☒Other spray paint can

2. Potential trash source (Check all that apply):
   ☒Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☒Trash accumulation (wind-borne) ☐Illegal dumping ☐Other _____
   ☒Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☐Litter-Commercial business (name)_____
   ☐Litter-School/Institution (name)_____
   ☒Litter-Other (describe) Litter from Storm Drain inlets upstream
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☒**Storm drain outfalls** ☐**Creek N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible): Commercial/Industrial

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☒ **No** ☐
1b. If trash was removed, provide total weight or volume (if known): ~5 lbs
1c. Photographic documentation: **Yes**☒ **No**☐
2a. Other Trash Management Actions Taken (describe): Put on list for annual creek clean up volunteer activity for May 2008
3a. Follow-up action needed: **Yes** ☒ **No**☐
3b. Future trash management actions needed (Please describe): Continue public outreach on litter issues, check for upstream sources from land use, include on annual volunteer creek clean up efforts listing
3c. Is trash routinely removed from this site? **Yes** ☒ **No** ☐ If yes, at what frequency Annually during assessment
3d. Is a future assessment needed? **Yes** ☒**No** ☐
3e. If Yes, which tool? ☒**Creek**-RWQCB Version7.0 ☐**Non-Creek**-Windshield Survey
☐**Non-Creek**-KAB Litter Index ☐Other_____

Notes: One empty spray paint can found that appeared to have washed down from upstream area. Found an area south of Tasman drive crossing where graffiti is problematic on adjacent land use. Lower score this year partly due to the presence of the spray paint can.

II. Assessment Information

1. Which assessment tool was used? (Check one)
   ☒**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey
   ☐**Non-Creek**-KAB Litter Index ☐Other _____
2. **Total Score** (RWQCB Version 7.0 or KAB Litter Index) 90
3. Windshield Survey Results-Trash Priority: ☐ **NA** ☐**High** ☐**Medium** ☐**Low**
4. What percentage or length of the area is impacted with trash (e.g. 5%, five feet, etc.)? <5%
5. This assessment is ☐ **Initial** ☒**Follow-up** (Check one)
6. If applicable, how many follow-up assessments have been conducted at this site?5

III. Trash Information

1. Describe trash type (Check five most prevalent types):

☐Rubber products	☐Metal products	☐Construction debris
☐Plastic bags	☐Cigarette butts	☐Fabric and cloth
☒Styrofoam products	☒Plastic/Synthetic items	☐Toxic substances
☐Aluminum cans	☐Tires	☐Appliances
☒Bottles (plastic and glass)	☐Woody debris	☐Furniture
☒Convenience/Fast Food wrappers	☐Yard waste	☐Biohazards
☐Man-made wood products	☐Batteries	☒Other cardboard

2. Potential trash source (Check all that apply):
   ☒Trash accumulation (water-borne) ☐Homeless encampments ☐Outfall _____
   ☒Trash accumulation (wind-borne) ☐Illegal dumping ☐Other _____
   ☒Litter-Vehicular ☐Litter-Dumpster/Receptacle (describe) _____
   ☐Litter-Commercial business (name)_____
   ☐Litter-School/Institution (name)_____
   ☒Litter-Other (describe) from upstream SDIs and land uses
3. Was trash observed near (Check one): ☐**Storm drain inlets** ☐**Storm drain outfalls** ☐**Creek** ☒**N/A**
4. Identify adjacent land uses to the trash areas assessed (if possible):Industrial, Public access trails

IV. Trash Management Actions

1a. Are trash management actions planned for the site? **Yes** ☒ **No** ☐
1b. If trash was removed, provide total weight or volume (if known): <1 lb
1c. Photographic documentation: ☒**Yes No**☐
2a. Other Trash Management Actions Taken (describe): Channel walk, looked for nearby properties with dumpster issues, none observed this year.
3a. Follow-up action needed: **Yes** ☒ **No**☐
3b. Future trash management actions needed (Please describe): Put on list for local creek clean up activities for at least an annual cleaning of accessible areas
3c. Is trash routinely removed from this site? **Yes**☒ **No** ☐ If yes, at what frequency unknown- annual?
3d. Is a future assessment needed? **Yes**☒ **No** ☐
3e. If Yes, which tool? ☒**Creek**-RWQCB Version 7.0 ☐**Non-Creek**-Windshield Survey ☐Other_____ ☐**Non-Creek**-KAB Litter Index

Notes: Vegetation growth on side banks makes debris pick up difficult. Most waste found appears to come from upstream sources. Plan to put on list for clean up for local annual creek and beach clean up events.

Staff Training Summary Table

STAFF TRAINING BY DEPARTMENT/DIVISION FOR FY 07-08

1) Staff Training Table

TRAINING DATE	SUBJECT	APPROXIMATE NUMBER OF STAFF ATTENDING
Public Works Field Services: Street Maintenance, Water, Sewer, Stormwater, and Boulevard Landscaping		
9/11/07 – 9/13/07 (30 minutes each session)	Daily logs, records, SOPs, BMPs for street sweeping, Roads Operation and Maintenance, Rural Roads SOPs	42
4/10/08	Corp Yard SWPPP, Hazardous Wastes, URMP and storm drains	42
3/25/08	URMP, wash rack refresher	42
6/18/08	General Storm Water Permit	42
Public Works - Street Trees and Boulevard Landscaping		
5/6/08	Boulevard landscaping – Annual IPM policy and implementation training	12
Public Works - Environmental Division		
Env. Division Manager, Outreach Coordinator and Env. Specialist		
11/6/07	IPM Contracting Workshop	1
11/13/07	SCVURPPP "train the trainer" on PW stormwater maintenance activities	1
11/17.07	Creeks Coalition Watershed Conference	3
4/30/08	SCVURPPP Draft Construction GP Training	1
5/20/08	CASQA Storm Water Program Effectiveness Training	1
6/3/08	SCVURPPPP C.3 Workshop	1
Pretreatment Program		
11/13/07	SCVURPPP "train the trainer" on PW stormwater maintenance activities	2
2/ 25-27/08	CWEA P3S Conference	3
4/ 23/08	SCVURPPP's "Reining In the Rain" Low Impact Development Workshop	1
6/ 3/ 2008	SCVURPPP – Implementation of Stormwater Requirements at Development Projects	5
Public Works - Engineering Division and Project Administration		
7/17/07	BAHM Bay Area Hydraulic Modeling for stormwater management	2 (Engineers)
11/29/07	Advanced BAHM Bay Area Hydraulic Modeling for stormwater management	1 (Engineer)
6/3/08	Annual C3 Workshop – Sharing Experience with Implementation of Stormwater Requirements at Development Projects	3 (Engineers) 1 (Inspector)
4/30/08	SCVURPPP Draft Construction GP Training	1

Parks and Rec. - Parks Division, Baylands Park, and Golf Services		
11/8/07	City IPM Policy and IPM for City Property	55
11/08/07	Stormwater Pollution Prevention training (including Corp Yard SWPP)	55
5/15/08	IPM and pest control alternatives for parks and golf courses	41
Community Development Department (CDD) - Planning		
9/21/2007	Climate All-Stars Conference	1
9/19/2007	Quarterly update for planning staff	12
11/13/07	HMP Applicability Areas in Sunnyvale – staff training	1
12/12/2007	Quarterly update for planning staff	12
3/14/2008	Quarterly update for planning staff	12
5/12/08	Sunnyvale C.3 BMP Guidance Manual refresher training	9
6/11/2008	Quarterly update for planning staff	12
CDD - Building Inspection		
9/26/07	Yearly Storm Water Training (City Staff Training)	9
12/3/07	Construction Site BMP Mgt Workshop	1
4/30/08	SCVURPPP Draft Construction GP Training	1
5/2/08	Storm Con	1

Watershed Management Activities						
	Watershed Management-Watershed Assessment	Permit Prov. C.10	City staff will continue to work with the Santa Clara Basin Watershed Management Initiative (SCBWMI) and participate in the assessment of watersheds in the Santa Clara Basin as they occur.	City staff continues to participate in the SCBWMI and the active subgroups and work groups. This year, staff participated in the following subgroups/work groups: • Communications • Land Use • Watershed Assessment and Monitoring • Watershed Education and Outreach • Product Stewardship • Emerging Contaminants/ Pharmaceuticals No new watershed assessments were initiated by the WMI, as the focus for the Initiative has been to work with other agencies to implement the elements of the Watershed Action Plan. Staff cooperate and assist other agencies (e.g., Santa Clara Valley Water District and SCVURPPP) in watershed assessment activities that occur within Sunnyvale's jurisdiction, when requested.	Ongoing Report 09/08	Lorrie Gervin, Environmental Division Manager

September 15, 2008

Mr. Bruce H. Wolfe
Executive Officer
Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: COUNTY OF SANTA CLARA CLEAN WATER PROGRAM FY 08 ANNUAL REPORT

Dear Mr. Wolfe:

This report is submitted by the County of Santa Clara, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.(a) of its reissued municipal storm water discharge National Pollutant Discharge Elimination System Permit (Orders No. 01-024, 01-119, and R2-2005-0035).

This report summarizes activities performed during FY 08 in accordance with the County's Urban Runoff Management Plan (URMP), which was submitted to the Regional Board in September 1997 and updated subsequently, the performance standards contained therein, and the 2001 NPDES Storm Water Discharge Permit, as amended.

The County unincorporated area has a population of about 100,000 persons, with about 80,000 living within the Phase I NPDES Storm Water Discharge Permit jurisdiction. Community physical characteristics include mountains, forests, grasslands, chaparral, farms, suburbs, foothills, valley floor areas, watersheds, reservoirs, and bay frontage. There is no urban downtown core area; rather there is a large acreage of low-density land area surrounding existing suburbs and municipalities.

The County has a few urban pockets, few commercial sites, and few industrial sites. The County is pursuing a program of annexation, so that these urban pockets will become a part of the cities that surround them. The restrictive zoning and general plan policies for the unincorporated areas do not promote urban growth or subdivisions. In addition, the Parks and Recreation Department has obtained large land holdings that will never be developed, but rather will be used for primarily for open space and for low impact recreation. The largest "commercial" site in the unincorporated area is Stanford University.

Board of Supervisors: Donald F. Gage, Blanca Alvarado, Pete McHugh, Ken Yeager, Liz Kniss
County Executive: Peter Kutras, Jr.

Goals and Contents of the Report:

The goals of this Annual Report are to: 1) document implementation of the URMP and the FY 08 work plan during the past fiscal year; 2) evaluate program results for continuous improvement; 3) comply with NPDES Storm Water Discharge Permit requirements; and 4) share this information with other Co-permittees, jurisdiction decision-makers, and the public. A table of contents is included with the report.

Program Highlights:

1). The County's Clean Water Program continues to be funded directly from the County General Fund. As was stated in previous annual reports, the storm water fee that supported Clean Water Program activities was eliminated by the effects of Proposition 218 in 1997. Additional tax funding can only be obtained by a 2/3 vote of the people. The County Clean Water program was previously staffed by one Senior Management Analyst position. The person holding this position retired. There was some time delay between the retirement and hiring of a new full-time person for this position. As a result of this delay and the training of the new staff some of the planned goals for this fiscal year were not achieved. These goals were incorporated into the Work Plan for fiscal year 2009. The Clean Water Program is now staffed by one full time Junior Civil (Environmental) Engineer with additional guidance from a Senior Civil Engineer, when needed. Staff members of the involved departments coordinate compliance and reporting activities as they relate to each involved department, with guidance from the Clean Water Program Coordinator as well as the Santa Clara Valley Urban Runoff Pollution Prevention (SCVURPPP) program staff.

2). The County continues to move forward with implementation of the 2001 NPDES Permit, as amended. The County is interested in how the provisions of the proposed Municipal Regional Permit will affect the existing Clean Water Program functions.

3). The involved departments include Capital Programs (now a part of the Fleet and Facilities Department), Roads and Airports, Parks and Recreation, Planning and Development (Planning Office, Development Services Office, Clean Water Program, Surveyor), Agriculture and Environmental Management (Integrated Waste Management, Pollution Prevention, Graffiti and Litter Abatement, Green Business Program, Master Composter Education Project, Environmental Health [Consumer Protection, Hazardous Materials, Solid Waste, Household Hazardous Waste, Vector Control], the County Executive's Office (Special Construction Projects, and Integrated Pest Management).

4). County staff members from the various involved departments have continued to be active this fiscal year in attending informational presentations regarding implementing the requirements of the NPDES Permit and preventing nonpoint source pollution.

Continuous Improvement Activities:

1). The County Department of Environmental Health continues to provide enhanced reporting for IC/ID and IND/COMM activities within the unincorporated area.

2). The involved County departments continue to take direct responsibility for implementation of performance standards and reporting on NPDES Permit compliance activities.

3). Training events have been well received by the involved departments.

4). The County's full time IPM Program Manager is continuing to work with the Department of Parks and Recreation pursuant to its new Pesticide Use Reduction Plan, and with Department of Roads and Airports to reduce and eliminate pesticides where practicable, including the new landscaping and roadside vegetation management plan. The County was the first jurisdiction in SCVURPPP to adopt an IPM ordinance. Also, the County IPM Program Manager now has the benefits of an online pesticide use requesting and reporting database on the County's intranet.

5). The Household Hazardous Waste, Green Business, Integrated Waste Management, Graffiti and Litter Abatement, and Master Composting Education Programs have all been active in spreading the pollution prevention message, including prevention of storm water pollution.

6). The Household Hazardous Waste (HHW) Program has been very active in the recycling of mercury containing materials, in the Mercury Education Project, and in promoting E-Waste recycling. The HHW Program supports legislation to require sellers of mercury containing products to provide for collection and recycling.

7) The Office of Planning has been putting together a BMP O&M Verification Program that will be completed and begin implementation in FY 09.

Thank you in advance for your review of this Annual Report for FY 08. If you or your staff members have any questions regarding the materials submitted, please contact me at (408) 299-5737.

Sincerely,

Clara Spaulding, E.I.T.
Clean Water Program Coordinator

• **Solid Waste Local Enforcement Agency (SW-LEA)**

The Solid Waste Program supports and implements the storm water pollution prevention efforts to minimize waterway in all of our countywide programs. Every complaint received and investigated is approached considering what is needed to remove the threat of pollution. This sometimes leads to a referral to another agency having jurisdiction over the actions of the polluting responsible person. And sometimes our actions directly reduce of eliminate threatened or actual pollution. Our staff continually looks for and reports potential polluting situations to the stormwater protection enforcement agencies for follow-up.

In many cases, the solid waste program confirms the threat and issues an order to abate the violation. Usually the threat of legal action leads to abatement of the violation, but occasionally cases are referred to the District Attorney's Environmental Crimes Unit for legal action.

The complaint investigations are widely varied in scope, but are nonetheless related to preventing pollution of the environment and are backed by the County Ordinances relating to yard waste refuse accumulations, illegal dumping, refuse collection vehicles, and the septage or grease pumper vehicles. Last year we lobbied to change refuse collection contracts in the County to collect yardwaste from the toters instead of yardwaste on the streets. We are seeing a large impact on the volume of organic debris and litter from entering the storm drain systems.

Abatement of pollution threats at facilities that are routinely inspected, include solid waste collection and septage pumper vehicle storage yards. We also inspect and regulate solid waste facilities, operations such as landfills, transfer stations, composting facilities, and closed landfills. These facilities are under the jurisdiction of state laws and the state-designated local enforcement program. We work closely with the RWQCB and forward our monthly inspection reports directly to them. This program staff inspect all large or small facilities that generate medical or bio-hazardous wastes and ensure that their waste stream handling does not result in biohazardous or regular waste contamination of the storm water systems. Program staff also conduct inspections of waste tire handling facilities and ensure proper handling, storage and manifesting of waste and used tires.

It is stressed at SW-LEA staff meetings and in training that one of the principal goals of our inspections is to identify and investigate any and all critical control points of the programs promoting clean water. The SW-LEA program is effective in reducing or eliminating storm water pollution because it keeps illegally dumped materials out of the storm water system and watersheds.

Training: All staff are State Registered Environmental Health Specialists (REHS). Solid waste staff attended a CIWMB/LEA conference promoting coordination between various

state oversight boards, such as air, water and solid waste. The topics centered on solid waste facilities and how the public and the environment can be better protected from the impacts of these facilities and the improper or illegal disposal of solid waste. There were presentations relating to illegal dumping abatement as well as coordinating efforts with the Water Boards or Fish and Game, since local inspectors are their eyes and ears out in the field. The solid waste staff gained valuable information from several topics covered relating to storm water pollution prevention. Program staff also attend monthly the Technical Advisory Committee meeting addressing a wide range of issues regarding solid waste and recycling including storm water run-off and public education.

Memorandum

July 21, 2008

To: Stormwater/Urban Runoff P2 Staff

From: Wendy Fong
Household Hazardous Waste Program
County of Santa Clara

Re: Fiscal Year 2007/2008 HHW Program Update

Participation
The HHW Program served 26,958 residents from July 1, 2007 through June 30, 2008. Nearly 3 million (2,998,826 lbs) pounds of hazardous waste was managed safely and legally. There were a total of 56 collection events: 41 at two permanent facilities and 15 at temporary sites strategically located throughout the County. In addition, the Program served 568 small business drop-offs including local governments, Goodwill Industries, and the Salvation Army.

Paint
Latex paint accounted for 871,440 pounds and other paint related materials (including oil paint) accounted for approximately 980,400 pounds. Together, paint represents 62% of the hazardous waste collected.

Pesticides
The HHW Program collected 163,750 pounds of poison liquids, and 117,000 pounds of poison solids, and 1,000 pounds of Diazinon/Durasban.

UNIVERSAL WASTE

The County of Santa Clara Department of Environmental Health Household Hazardous Waste Program provides residents with opportunities to recycle mercury-containing products (fluorescent lights, batteries, and thermometers) at retail locations, community centers and special outreach events. These products contain varying amounts of mercury, a heavy metal, which is a U.S. Environmental Protection Agency waste minimization priority chemical. A community-based collection system is convenient, cost-effective and combined with an aggressive educational outreach program, will increase awareness and participation. Outreach includes the use of consistent educational messages through the media and the development and distribution of brochures, flyers and posters as well as literature and event attendance.

Mercury containing products collected in FY 2007/2008

Recycling partners were established at retail and community drop-off locations. These partners agreed to allow customers to drop-off household batteries and fluorescent lamps. To date 32 retail stores serve

as fluorescent lamp drop-offs and 54 locations serve as battery drop-offs. The HHW Program picks up and recycles the waste.

Elemental Mercury—1,295 pounds (includes thermostats, thermometers and other products)
Fluorescent Lamps – 124,121 pounds
Household batteries – 100,100 pounds

Public Outreach

A total of 370 thermometers were collected from five thermometer exchange events where residents exchanged their mercury-containing thermometer for a free mercury-free one and one drop-off location (San Jose City College).

Participated in 27 community events (including the five thermometer exchange events).

MISSION STATEMENT

To protect the environment and public health from the effects of improper disposal of hazardous waste from Santa Clara County homes and small businesses. This service provides the community with practical pollution prevention options for the use, recycling, and disposal of products containing hazardous substances.

The Online Appointment System is for residential household hazardous waste only. For more information on business waste drop-off please call (408) 299-7300

PROGRAM HISTORY

Since 1991, the Santa Clara Countywide HHW Program has provided residents with a safe, convenient disposal service with year-round access. The County and 14 cities participate in the countywide program and share costs based on the number of households served from each jurisdiction. Participating jurisdictions include: Campbell, Cupertino, Gilroy, Los Altos, Los Altos Hills, Los Gatos, Milpitas, Morgan Hill, Monte Sereno, Mountain View, San Jose, Santa Clara, Saratoga and Sunnyvale. The City of Palo Alto (650) 496-6980 operates a separate HHW Program for their residents only.

The Santa Clara Countywide HHW Program provides the general public and small businesses with a safe, immediate solution to HHW recycling and disposal. Residents are encouraged to use safer and less toxic alternatives and purchase smaller quantities of hazardous products. On-going public education continues to increase public awareness and participation.

Improper storage and disposal of household hazardous waste (HHW) is associated with accidental poisonings, worker health and safety, equipment damage, and environmental contamination of surface and groundwater. Heavy metals such as lead, zinc, copper, nickel, mercury and cadmium enter the waste stream via residential sewage and urban run-off.

State and local regulations prohibit the disposal of HHW at solid waste landfills. Before collection programs were available, options for managing HHW were limited to disposal in the trash, pouring down the drain, or storing the waste indefinitely. Products stored for more than a year, are seldom used and the risk of accidental poisoning of children and pets significantly outweighs any potential benefit of saving the product for future use.

For additional information please call the HHW program at (408)299-7300.. We can be contacted at hhwstaff@deh.sccgov.org or by fax at (408) 280-6479.

SUBJECT: Lexington Quarry
County File # 3690-30-48-04PAM

DATE: November 29, 2007

The following observations and recommendations for the Lexington Quarry South of Los Gatos, CA. are based on a site visit and inspection dated November 16, 2007.

BACKGROUND

For the background information of the quarry please see the Cotton, Shires & Associates report for Lexington Quarry.

INSPECTION NOTES

There are 2 sides of the quarry, the West side and the East side. Inspections this year focused on the East side. Last year we were unable to get access to the East face for inspections.

A. The sedimentation basins have been completely re-graded from last year. The earth berms around the basins have been scarified and re-compacted (Figure 1). Additionally the berms have also been seeded for protection in the winter season.

B. Visual inspections of the reclaimed area on the East side revealed that there is some undercutting of the toe of slopes varying in 3 to 4 feet high (Figure 2). The undercutting of the slopes is not present on the current reclamation plan. Additionally some slope failures have occurred on the reclaimed slopes (Figure 3). The failures have been contained on the benches. It is possible that the undercutting could have occurred while cleaning up the slide debris.

C. The 2 uppermost benches on the East side have been reclaimed. The benches have been planted and irrigation devices are in place to aid in growth.

D. The reclaimed slopes on the East side have been covered with process fines/loose fill and hydroseeded in the attempt to cover the exposed rock (Figure 4). There is evidence of the loose fill sliding down the slopes. The slopes were not intended to have fill material placed on them per the current reclamation plan.

RECOMMENDATIONS

1. Continued monitoring of the undercut toe of slopes along the East side by the Geotechnical Engineer of record.

2. For future reclaimed slopes, do not place process fines/loose fill on the slopes.

Figure 1. Re-graded and Hydroseeded Sedimentation Basins

Figure 2. Undercut slopes

SUBJECT: Curtner Quarry
County File # 1988-39-87-04PAM

DATE: January 2, 2008

The following observations and recommendations for the Curtner Quarry in Milpitas, CA. are based on a site visit and inspection dated November 20, 2007.

BACKGROUND

For the background of the quarry please see the Cotton, Shires & Associates report for Curtner Quarry dated February 5, 2007.

INSPECTION NOTES

A. Last years inspections revealed large amounts of construction debris and k-rail stockpiled in the mine pit area. This years inspection showed a reduced amount construction debris and k-rail stockpiles (Figure 1).

B. The West side of the quarry has been regarded and benched. The slopes have been hydro seeded as well (Figure 2).

C. The sedimentation ponds look clean of vegetation and slopes have been hydro seeded (Figure 3).

D. Planting test plots were also noticed on site to gauge, which re-vegetation methods will work best. (Figure 4).

RECOMMENDATIONS

1. Operations at the quarry have slowed down. If the quarry continues to not produce an Interim Management Plan may be necessary.

2. Continue to remove the construction debris and k-rail.

Figure 1. Remaining k-rail stockpile onsite

SUBJECT: Calaveras Quarry
County File # 2066-42-83-04PAM

DATE: January 2, 2008

The following observations and recommendations for the Calaveras Quarry in Milpitas CA. are based on a site visit and inspection dated November 27, 2007.

BACKGROUND

For the background of the quarry, please see the Cotton, Shires & Associates report for Calaveras Quarry.

INSPECTION NOTES

A. The Quarry is currently closed and is no longer producing. The recent fire has revealed some concerns with respect to slope stability. These exist near the entrance of the quarry where slopes were left in excess of a 2:1 angle, horizontal to vertical. Some construction debris and loose material is present throughout the quarry (Figure 1).

B. There is some additional asphalt debris that was left behind when the existing quarry road was demolished (Figure 2).

C. The Quarry slopes in the main pit where the fire has occurred have been hydro-seeded and laid-back (Figure 3).

D. Below the slopes in the main pit there was a stockpile area of large rocks (Figure 3).

RECOMMENDATIONS

1. The Quarry operator has submitted a Geologic Reconnaissance to address the quarry slopes with a revised reclamation plan to address some of the steep slopes.

2. Remove the remaining asphalt debris from the site.

3. Crush and re-grade the stockpiled material consistent with the original topography

Figure 1. Oversteepened slopes along the access road

SUBJECT: Freeman Quarry
County File # 6538-76-11-04PAM

DATE: January 2, 2008

The following observations and recommendations for the Freeman Quarry in Gilroy, CA. are based on a site visit and inspection dated December 5, 2007.

BACKGROUND

For the background information and history of the quarry please see the Cotton, Shires & Associates report for Freeman Quarry dated February 5, 2007.

INSPECTION NOTES

A. There was order to comply given to fix a stockpile of overburden that had encroached off the East quarry boundary. In November the quarry operators removed the fill in violation and re-contoured the slopes back to the previous grade. Additionally hydro seed was placed on the exposed slopes (Figure 1).

B. Reclamation has started in the South East area of the quarry. Benches have been placed and the slopes have been hydro seeded (Figure 2).

C. The sedimentation basin on the Southerly portion of the quarry appeared to have a bit of vegetation growing in the pond (Figure 3).

RECOMMENDATIONS

1. Maintenance on the sedimentation basin to control vegetation growth within the pond.

Figure 1. Regraded and hydroseeded slopes on the East boundary

Figure 2. Reclamation along the South East area

Figure 3. Vegetation growth in the sedimentation pond

DATE: January 2, 2008

The following observations and recommendations for the Azevedo Quarry in San Jose, CA. are based on a site visit and inspection dated December 28, 2007.

BACKGROUND

For the background of the quarry please see the Cotton, Shires & Associates report for Azevedo Quarry dated February 5, 2007.

INSPECTION NOTES

A. Inspection of the tiger salamander habitat fence showed that the fence was re-established and in good condition. The habitat is located south east of the sedimentation pond.

B. The earth berm between the sedimentation pond and the railroad tracks had the top scarified and re-compacted. There were still some additional tension cracks found on the berm that went past the repaired area (Figure 1).

C. Some of the over steepened areas that were noted in the last years inspections have since been laid back and seeded (Figure 2).

RECOMMENDATIONS

1. Continued monitoring of the earth berm at the sedimentation pond.

Figure 1. Tension crack in the sedimentation pond

Figure 2. Laid back slopes covered with hydroseed

SUBJECT: Stevens Creek Quarry
County File # 1253-16-62-04PAM

DATE: January 2, 2008

The following observations and recommendations for the Stevens Creek Quarry West of Cupertino, CA. are based on a site visit and inspection dated December 31, 2007.

BACKGROUND

For the background of the quarry please see the Cotton, Shires & Associates report for Stevens Creek Quarry.

INSPECTION NOTES

A. Along the East side of the mining pit there was a large cut slope along the boundary. The offset from the property line is not being observed. The quarry operator has a revised reclamation plan in for approval to address the issue (Figure 1).

B. Along the Northerly boundary we found property line stakes. However we found encroaching disturbed material crossing over the quarry boundary (Figure 2).

C. During our inspection last year we found that the access road was draining away from the quarry. During our inspection this year we found that the drainage has been fixed to keep the drainage inside the quarry boundary.

D. Along the Westerly boundary additional disturbed area was found encroaching over the quarry boundary (Figure 3). Additionally there was a large stockpile of overburden fill material stockpiled (Figure 4). The operator has mentioned the revised reclamation plan that is in for approval addresses this issue.

F. As we approached the Northern part of the main pit, there was a very large failure of overburden soil that appeared to be unstable (Figure 5).

RECOMMENDATIONS

1. Getting the amended reclamation plan approved.

2. Have the Geotechnical Engineer of record verify the stability of slopes along the Northern Slope.

Figure 1. Cut slope along the quarry boundary

Figure 2. Point on line stakes with encroaching material.

Figure 3. Disturbed area on the West boundary

Figure 4. Large overburden embankment along the West boundary

Figure 5. Vertical failure at the Northerly area of the main pit

COOUNTY OF SANTA CLARA
DEH-HMCD REPORT
FOR CLEAN WATER PROGRAM
ANNUAL REPORT FY 08

MEMORANDUM

TO: **Clara Spaulding**
FROM: **Jim Blamey**
DATE: **June 6, 2008**

SUBJECT: **Clean Water Program Annual Report (Non-Point Source Program)**

Training:

The Hazardous Materials Compliance Division did not receive any training directly related to the protection of surface water or storm water quality from the Clean Water Program during FY 08.

Hazardous Materials Specialists (HMS) receives on-going training in a variety of hazardous materials program areas that indirectly are related to the Clean Water Program. The first Tuesday of every month the Santa Clara County Fire Chief's Hazardous Materials Subcommittee provides a training forum for inspectors from different programs and geographic areas. In addition, HMS staff receives training from other sources (State, Local Agencies, private companies, etc.) as the training becomes available. Some of the training staff has received this year includes:

Hazwoper Refresher:	Required safety training	8 hours
UST Line Leak Detectors	Industry training of how systems operate	2 hours
Ammonia Safety	Code, and safety issues related to ammonia	4 hours
NanoTechnology	New emerging technology and safety	4 hours
Safety Seminar:	Variety of different safety subjects	4 hours
Hazardous Waste Laws	Review of new laws and regulations	4 hours
Inspector Roundtables:	Issues related to HazMat use & disposal	8 hours

Annually, the Hazardous Materials Specialist's attend the Certified Unified Program Agency (CUPA) conference. This conference is attended by jurisdiction from all over the State and is used to promote consistency, coordination and consolidation of regulatory matters related to hazardous materials and hazardous waste. This week long training typically has tracks/topics related to enforcement, underground storage tanks, hazardous materials/waste, and other relevant subjects. Staff also participated in roundtable discussions where state, federal and local regulators scrutinize current practices and propose improvement on how the laws and regulations can be implemented.

Program Evaluation:

The Department of Environmental Health, along with other County government agencies and the District Attorneys office have worked together in a task force to correct illegal activities (zoning, building, illegal disposal, etc.) that have occurred at particular sites throughout the county. This task force has been successful in correct many violations and protecting the environment from contamination. This task force meets monthly to discuss individual sites and methods for obtaining compliance. Although in the past

many of the task force efforts were delegated to south county area, the task force focus has modified and we have worked on many cases in the northern part of the county, with great success (zoning issues, old build violations and other typical code violations)

Businesses that failed to comply with applicable environmental laws or regulations were prosecuted either through the Hazardous Materials Program - Administrative Enforcement program or the cases were referred to the District Attorneys Hazardous Materials Unit. Over the past year, the Department has successfully prosecuted several individuals or corporations for repeated violations of applicable laws or regulations.

The single biggest issue for the Hazardous Materials Program inspection staff continues to be adequate training in the issues, laws, regulations, etc. related to the Clean Water Program. The lack of training in this program continues to hamper the ability of the inspectors to provide the program with detailed inspection data and to assist the businesses in complying with program requirements.

Santa Clara Valley Urban Runoff Pollution Prevention Program

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 08 Annual Report

Attachment D1A – NPDES Permit section C.3 Reporting Forms for Involved County Departments and C.3 Maintenance Forms

FY 08 Summary

Private C.3 Group 1, 2A, and 2B Projects approved are reported on by the Department of Planning and Development in this section

Public C.3 Projects commenced construction for Parks

No private/public C.3 projects were constructed for Capital Programs/Fleets and Facilities

No public or private Hydromodification Plan Projects were approved or constructed by any County department

Note:

1) The BMP O&M Verification Program is currently being developed. Formal inspection will be conducted in FY 09.

Part 1

Group 1 and 2A New Development and Significant Redevelopment Projects[1]
Reviewed and Approved During FY 08

Project Name	Project Type[2]	Site Size (ac. or s.f.)	New Impervious Surface (s.f.)[3]	Area of Land Disturbed (Ac.)[4]	Project Status	Storm Water Control Measures Included in Project
Private Projects						
Mora Drive Subdivision improvements, File 8979	Group 2b	4.58 ac	14,500 sq ft	14,364 sq. ft	Approved	Energy dissipater, vegetated buffer strip
Stanford Childcare Center, File 9658	Group 2b	40,360 sf	15,962sq.ft	34,134 sq ft	Approved	Hydrodynamic device
LKC Bld, file 9626	Group 1	162,737 sq ft	71,874 sq ft	116,305	Approved	Hydrodynamic device
Science and Engineering Quad II, File 9757	Group 1	252,255 sq ft	182,012 sq ft	247,847 sq ft	Approved	Hydrodynamic device
SIM 1, File 9817	Group 1	108,545 sq ft	70,606 sq ft	N/A	Approved	Hydrodynamic device

[1] List all projects with new impervious surface area greater than 1 acre (43,560 s.f.).
[2] Describe project type, as defined in Provision C.3.c.
[3] "New" is defined as impervious surface created, added or replaced.
[4] If the site is a "significant redevelopment", list the area of land disturbance, if information is readily available.

COUNTY OF SANTA CLARA
Department of Roads and Airports

Self-Evaluation Document for the FY08 NPS Program Annual Report

The County Department of Roads and Airports participates in the Nonpoint Source Pollution Control Program in a number of ways:

1) The Department follows Maintenance Yard and field work BMPs, and has adopted SOPs.

2) Storm Water Pollution Prevention Plans (SWPPPs) have been written and are referenced in the departmental maintenance yards. (The East and West Yards are within the NPDES Permit zone.)

3) The Department is using NPDES Permit C3 requirements to design storm water treatment for C3-eligible new and replacement impervious areas included in Department projects, such as expressway widening within the NPDES Permit area. Effective 8/15/06, the C3 requirements were reduced to 10,000 square feet of new or replacement impervious area for Group 2B projects. Projects vary, but each project is carefully evaluated as to whether or not C3 requirements apply.

4) The Department coordinates between design, construction, and maintenance staffs to ensure C3 mitigations are properly monitored and maintained. The first required C3 mitigation improvements for a Department project were accepted for completion and passed from the contractor to department maintenance in September 2007. The mitigations installed consist of bioswales along Montague Expressway. In addition, two vortex separators were installed upstream of pump stations along Central Expressway. The separators were not required for C3 compliance, but will provide additional water quality benefit. While maintenance of the bioswales and separators is ongoing as needed, formal O&M verification inspections per C3 will be conducted in FY09.

5) The Department is utilizing additional water quality questions in CEQA review, as required by the NPDES Permit.

6) The Department is working with the County IPM Coordinator to reduce and eliminate pesticides where practicable, including in new landscaping and roadside vegetation management. No pesticides or herbicides are applied

without the prescription of a Licensed Pest Control Operator. None are purchased without approval of the County IPM Program Coordinator.

7) NOIs and SWPPPs are prepared and filed when the disturbed area of a proposed project will be 1 acre or more. Further, for those Group 1 projects in sensitive watersheds, hydrograph modification plan mitigations to control flow and prevent creek scour are included.

8) The Department is observing the Rural Public Works Performance Standards and with the assistance of the NPS Coordinator did develop specific SOPs.

9) Litter and trash are removed from public rights of way to a permitted sanitary landfill. Observed illegal dumping problems when not in the public right of way are referred to the DEH.

10) Street sweeping and storm drain maintenance records have been maintained for many years. These records are now made available annually in the form of a spread sheet.

11) The Department provides water quality related training for its employees.

Summary and Evaluation:

The Department of Roads and Airports believes that its staff members and their actions are effective in preventing storm water pollution in both the maintenance yard and construction site environments.

During FY08, the Department conducted an internal review of its procedures for addressing C3 requirements in Department projects and implemented improvements. The Department revised and clarified its design review process, updated its C3 data collection and certification forms, developed a customized version of the SCVURPPP Standard Storm Water Treatment BMP Inspection Data Collection Form, and improved coordination with its maintenance staff for implementing ongoing inspection and maintenance of installed C3 mitigations.

Managers, engineers, and maintenance staff have an increasing awareness of the need to prevent storm water pollution, the BMPs necessary to support that goal, and also of the C3 requirements for storm water treatment for certain impervious areas. Procedures are in place to ensure permit compliance and to give full consideration to storm water elements in each individual project. Department staff will receive training in summer 2008 on the recent improvements in the C.3. certification process.

The department is pleased to work cooperatively toward these goals with the County NPS Coordinator and the County IPM Coordinator. It is understood that continuous improvement in these areas is expected, to the maximum extent practicable.

The department has benefited from a variety of training resources, but especially appreciates the SCVURPPP-sponsored workshops.

In FY09, the department looks forward to the challenges that may be encountered, and the satisfaction of achieving full compliance with stormwater regulations.

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 08 Annual Report

Attachment D2A- Rural Public Works O&M

Note: A Sr. Civil Engineer from the Department of Roads and Airports and a Sr. Project Manager from the Department of Parks and Recreation both actively participated in the committee that wrote the SCVURPPP Rural Public Works Performance Standard.

The two involved departments, Roads and Parks, have since adopted and incorporated the Performance Standards into their maintenance routines.

The Standard Operating Procedures (SOPs) for this performance standard have been written by both of the involved departments, and submitted to SFB-RWQCB staff previously. The involved departments have reported no difficulties with implementing and observing the standards.

Subject: County Nonpoint Source Pollution Control Annual Report FY08
Parks and Recreation Department Self Evaluation

The County of Santa Clara Parks and Recreation Department (Department) is pleased to offer this brief summary of our process toward the goal of stormwater pollution prevention as it has been implemented thus far into our operations.

In addition to extensive staff training some of which detailed below, the Department has initiated and reinforced several program elements to assure that potential sources of stormwater pollution are reduced to the maximum extent possible.

Daily Maintenance Operations

All large-scale maintenance activities involving heavy equipment, parts cleaning and repairs are consolidated in the Department's Central Yard facility. There, most major activities take place indoors and every effort is made to eliminate any discharges to the environment that could reach or affect storm water. The equipment wash pad utilizes covered zero discharge wastewater recycling technology. Storm drain filters are inspected annually and changed if necessary and oil is skimmed and collected for recycling. The Department purchased a sweeping machine in FY07 which is used to sweep the Central Yard parking lot bi-weekly to prevent sediment runoff and also used on paved trails throughout the parks system. The rock pad, installed to prevent mud from being tracked onto the hard surface was refreshed.

The parts washer is a closed loop, hot water and detergent based system, and solvents are eliminated from the parts cleaning process on a department wide basis. In addition, a large capacity spill cleanup station is located adjacent to the fuel dispensing inlands with a filter fabric on the storm drain that serves the central parking lot area of the facility. The most recent improvements include, but are not limited to, the completion of the fueling station canopy at Central Yard in January 2008 as directed by SCVURPPP.

The Rural Public Works Performance Standards have been shared and embraced by the Department's field staff, which now brings stormwater pollution prevention strategies to assigned tasks as one of the "tools of the trade" necessary for being a Parks professional.

Project Planning and Construction

Careful consideration is given to all environmental impacts that could be created or impacted by project related activities. As stewards of the land, the Department is serious about and proud of its roles related to resource conservation and preservation. In particular, efforts are made to minimize grading, integrate tree planting and seeding, preserving heritage trees, utilizing drip irrigation systems, and ensuring that remediation and new trail construction methodologies

conform to modern standards. Some of the trails standards practiced by the Department include out sloping, rolling dips and use of bio-technical methods for erosion control.

During project construction, the Department complies with RWQCB guidelines for soil erosion and stability and continuously monitors all construction activities. The Department will complete a project identified in the 2004 Harvey Bear Ranch Coyote Lake Natural resource Management and Master Plan. The project will be completed in August 12, 2008 under a Notice of Intent, issued by CRWQCB, Waste Discharger Identification # 3 43C347428, dated 06/07/2007, (and a renewal has been submitted).

Community Involvement

The Department has a very active Volunteer Program which facilitates creek clean-up, watershed education and trail maintenance programs.

Working with the San Jose Conservation Corps and our Volunteer Program, the department is involved in creek clean up activities, including garbage removal from parklands and streams, to enhance the natural experience and promote cleaner waterways. This past year, the Parks volunteer program participated in the National River Cleanup Day on May 17, 2008, drawing 700 volunteers, removing 17,500 lbs of trash and 11,543 lbs of recyclables along 36 miles of creek banks and shorelines. The Department also participated in Coastal Cleanup Day on September 15, 2007, drawing 900 volunteers, removing 31,692 lbs of trash and 11,977 lbs of recyclables along 50 miles of creek banks and shoreline. This included the removal of hazardous materials, shopping carts and appliances from the waterways of Santa Clara County.

The Parks Volunteer and Interpretive Programs also work with the California Department of Fish and Game in facilitating the Fishing in the City Program. The event includes a ten minute clinic station focusing on Watershed Education with a watershed diorama covering storm drainage, urban run-off, agriculture and man-made pollution. This past year, the program served approximately 1,200 children between the ages of 5 and 15.

As part of our Volunteer Program, the Department has instituted an "Adopt a Trail" program, which employs the aforementioned trail management techniques. For every trail adopted under this program there is a "volunteer crew lead" assigned and as head volunteer must go through a rigorous training program to learn the proper techniques for trail building and maintenance. Careful attention is given in these training programs to learning about protection our waterways. These volunteer crew leads impart this information to the "Adopt-a-Trail" volunteers.

Staff Training

IPM: The Department held four training sessions on Integrated Pest Management (IPM): One was on 10/2/07 attended by 7 park maintenance workers and supervisors, another one on 10/16/07 attended by 17 park maintenance workers and supervisors, another one on 10/23/07, attended by 15 park maintenance workers and supervisors, and another on 10/30/08 attended by 20 park maintenance workers and supervisors. Each training session involved 7 contact hours.

Natural Resource Management (NRM): The NRM Supervisor attended the Resource Management in the Wildland Urban Interface seminar hosted by the Bay Area Open Space Council on February 28, 2008.

Stormwater: Three Park Maintenance Supervisors attended the Surface Water Treatment

Compliance seminar on July 11, 2007. The Park Development Manager, two Construction Project Managers, the NRM Supervisor and Senior Construction Inspector attended the annual C.3 Workshop, Sharing Experience with Implementation of Stormwater Requirements at Development Projects on June 3, 2008. The Department continues to monitor storm water from Almaden Quicksilver County Park in accordance with our storm water permit requirements. In addition, all park locations visually monitor storm water flows for any signs of unusual conditions.

Closing

The Santa Clara County Parks and Recreation Department is an active partner in protecting streams, creeks and waterways. We are proud of the efforts we undertake on a daily basis to minimize impacts to the environment, while we protect and preserve the lands that the public entrusts us to maintain, on their behalf, for current and future enjoyment.

Should you have any additional comments or questions on this report, please feel free to contact me at (408) 355-2210 or Bill Grimes, Environmental Health & Safety Compliance Specialist, at (408) 355-2273.

Respectfully Submitted,

Mark Frederick.

SUBJECT: **NPS Annual Report**

This report is submitted to meet the annual reporting requirements of the County's Phase I NPDES Storm Water Discharge Permit.

In FY 2008 we initiated no new projects subject to NPDES permit.

Capital Programs Division continues to emphasize compliance with NPDES requirements, and the need to control storm water discharge from construction activity. Capital Programs currently has one project under construction which requires a SWPPP plan, the Valley Health Center at Milpitas. We have received and are monitoring the implementation of this plan.

With regards to BMP operations and maintenance, four projects that will implement BMP's will be completed in the next three months: The New Crime Lab at Guadalupe Parkway; Valley Health Center at Gilroy; Valley Health Center at Sunnyvale; and Valley Specialty Center at Bascom Avenue in San Jose.

Activity	Permit Item Source	FY 08 Tasks	Comments	Status	Responsible Party
C.3.f Hydromodification Management Plan					
Staff training	C.3.f.3	Upon adoption by the Regional Board, begin implementation of HMP as part of requirements for Group 1 projects that may cause increased erosion or other related impacts.	Where applicable, HMP to be integrated into existing programs for development, review, construction inspection and BMP operations and maintenance. County staff to receive incremental training in HMP requirements.	Ongoing	LDE, Building, Planning, FAF, Roads, Parks, CWP Prgm. Coord.
C.3.g (Waiver) Compensatory Mitigation Program					
Model Waiver Program	C.3.g.1	Develop a model waiver program.	Assist SCVURPPP by reviewing documents.	Ongoing No County Waiver Program is pro-posed	CWP Coord., Planning Dir., Building Official, County Counsel, FAF, Parks Dir., Roads, Dir.,
Local Waiver Program (Compensatory Mitigation)	C.3.g.2	Consider developing local waiver program, perform legal review, and incorporate waiver provisions in project review process. (If model program has not been adopted by Regional Board, consider developing interim waiver program per C.3.g.vi.). Provide info on waivers granted, if any.	No County waiver program is proposed.	N/A	CWP Coord., Planning Dir., Building Official, County Counsel, FAF, Parks Dir., Roads, Dir.
Staff training and reporting	C.3.g.3	Begin tracking information for reporting on waivers granted, including project name, location,	Not applicable	N/A	CWP Coord., Planning Dir., Building

COUNTY OF SANTA CLARA

Activity	Permit Item Source	FY 08 Tasks	Comments	Status	Responsible Party
		type, percent impervious surface, reasons for and terms of waiver, and the alternative benefit project and completion date.			Official, County Counsel, FAF, Parks Dir., Roads, Dir.,
C.3.j Site Design Measures Guidance and Standards Development					
Policy and standards review	C.3.j.2	Review existing local design standards and guidance, and compare them to the list of areas to address in provision C.3.j. and other references such as "Start at the Source" and the "Development Policies Comparison" work sheet. Prepare and submit an analysis of local standards, identified opportunities for revision, and proposed revisions. (Program to prepare guidance for Co-permittees on this work product.)	County will focus on making sure BMP list is updated to be consistent with revised General Plan, any new ordinance requirements, C3. Numeric Sizing Criteria and the latest technical guidance documents such as the upcoming HMP, SCVURPPP "Guidance Manual," the "Using Start at the Source" manual. and the revised California BMP Handbooks.	Ongoing	CWP Prgm. Coord., LDE, Planning, Roads, Fire Marshall, Parks, FAF
Standards Revisions	C.3.j.4	Incorporate any revised standards and guidance into local project approval process and "fully implement" the revised standards and guidance.	Any modification to required design standards will be done with input from Planning, Fire Marshall's Office, and other affected local agencies. (Reduced road width and other design standards (pervious paving, etc) are not the highest priority on large parcel single site SFD development with ample existing infiltration area and BMP installation areas available.	Ongoing	LDE, Fire Marshall, FAF, Roads, Parks

COUNTY OF SANTA CLARA

COUNTY OF SANTA CLARA
CLEAN WATER PROGRAM
ANNUAL REPORT FY 08

CONSTRUCTION INSPECTION

The following report is based on the County Performance Standard for Construction Inspections:

1) The County ensures through a construction inspection program that construction contractors properly store, use, and dispose of construction materials, chemicals, and wastes at construction sites and prevent illicit discharges to storm drains and watercourses.

Building and Grading inspectors include these items in their inspection routine. If Building or Grading inspectors observed a violation outside of their jurisdiction the proper department is notified. Hazardous materials violation referrals are made to DEH--HMCD as appropriate.

2) For development projects with significant erosion potential and planned construction activity during the wet season the County ensures, through a construction inspection program, that erosion and/or sediment control measures are implemented in accordance with local ordinances and project conditions of approval and maintained as needed during construction.

The County Grading ordinance and Construction Inspectors require winterization and implementation of erosion control BMPs of projects that will continue into or start in the rainy season (after 10/15 through 4/15 each year). Ongoing inspections evaluate the effectiveness of control measures, and require changes and/or additions to BMPs where needed. Throughout the rainy season, inspectors continue to monitor construction sites, and shut down any projects where erosion control measures are inadequate. Grading Ordinance violators are also required to "winterize" their illegally graded sites.

3) The County inspects construction sites for adequacy of storm water quality control measures on a regular basis, with the frequency of inspections based on the size of the project and its potential impact on storm water quality.

Grading Inspectors continue to inspect all projects on a continuing basis, and endeavor to inspect sites with a high potential for erosion more frequently.

4) Prior to the beginning of the wet season each year, the County inspects all sites requiring erosion and/or sediment control plans, to ensure that measures have been taken to minimize discharges of sediment from disturbed areas.

This is the normal procedure for grading inspectors, and they have continued to require this throughout the past rainy season. Typically, in the beginning of September, verbal warnings are given to contractors informing them that all their erosion control measures should be in place. In October, if the contractor is not in

compliance a warning letter is sent. If the contactor continues to be out of compliance a stop-work order is issued.

5) During the wet season of each year, the County inspects all construction sites requiring erosion and/or sediment control plans following each major storm event or series of events.

Grading inspectors inspect each active approved grading site with high erosion potential frequently, which includes the days following any major storm. In cases where they cannot get to every site, they prioritize and inspect those sites with the greatest erosion potential as soon after the rain as possible. On sites that do not require a grading permit, Building inspectors inform grading inspectors if there is an erosion violation.

6) The County provides training annually to its construction inspection staff on inspection procedures, documentation, and enforcement related to storm water pollution prevention.

The County's Clean Water Program staff has worked closely with the grading inspectors and their supervisor, and problems are discussed as they arise. The inspectors are familiar with the goals of the NPS Program and refer problems to the NPS inspector when appropriate, and carry out enforcement action where necessary. The Construction Inspectors meet informally several times per week with the CWP Program Coordinator regarding enforcement needs and problems. Construction Inspectors have attended several erosion prevention and law enforcement classes.

7) The County provides outreach materials to contractors, developers, and County staff on construction BMPs and compliance with the State General Construction Activity Storm Water Permit.

Blueprint for a Clean Bay is available to applicants for building permits, and a county prepared handbook on erosion control measures is available from the CWP office. Trifolds for individuals and the construction trades are available near the building counter. NOI filing information and forms, as well as C3. and HMP handouts, are available at the Planning and Building Lobby.

8) The County investigates and follows up thoroughly on grading violations, especially the ones with a high potential for erosion and sediment transport.

In FY 06, twenty properties were cited with grading ordinance violations. Official notices were sent to the property owners as orders to abate the violation, and notices of grading ordinance violation were recorded with the County Recorder.

9) Official Notice Forms

Inspectors report no problems with the newly developed official notice forms for grading violations, grading warnings, and erosion violations. Typically these forms are laminated before being posted onsite.

County Integrated Waste Management Division Activities Related to Reduction of Nonpoint Source Pollution FY 2008

Type of Activity	Description
Residential Garbage Collection Services	Weekly garbage collection services were provided to 18,000 unincorporated area households and all unincorporated area businesses.
Residential Recycling Collection Services	Provided weekly (13,854 households) or bi-weekly (4,902 households) recycling collection services. Beginning July 2007, all recycling except South County will be weekly. Recycling services provided to unincorporated area businesses vary per customer request.
Residential Yard Waste Services	Provided weekly yard wastes collection services to 13,854 households and bi-weekly services to 1,691 households. In South County unincorporated area, 3,211 residences received yard waste vouchers to provide for monthly drop off of yard wastes at San Martin Transfer Station. Beginning in July 2007, all yardwaste except South County has been weekly and will be containerized rather than on the street.
Residential used oil & used oil filter and household battery collection	Collected used oil & used oil filters and household batteries at curbside on a weekly basis from all unincorporated area neighborhoods (18,000 households served).
Vouchers	3,211 households received a voucher for one no cost drop-off at San Martin Transfer Station.
Special Cleanup Services and Events	4,110 households were served by special community cleanup events in their neighborhoods (different neighborhoods are served by this program each year). A total of 299 tons of waste and recyclable metals were collected. South County residents are now provided with vouchers for free drop-off at the San Martin Transfer Station annually.

Public Outreach Campaigns	A number of countywide public outreach campaigns were conducted through IWM including fluorescent bulb disposal education, "bring your own bag", reusable bag campaign and a source reduction, "Give the Experience" campaign encouraging people to reduce waste by giving tickets, gift cards, and experience type gifts for special occasions to reduce wrapping and other waste.
Public Outreach Events	Information on waste prevention, recycling, household hazardous waste management, home composting, and other environmental topics was provided at many local public outreach events, fairs and home and garden shows.
Public Outreach Information	The Countywide Recycling Hotline (1-800-533-8414) and Recycling Website (ReduceWaste.org) provided a wide range of waste reduction and recycling information to the public. This Hotline and the website were upgraded in Fiscal Year 2008 to be more user friendly.
Newsletters	Unincorporated area residents received quarterly newsletters providing information on a variety of waste and recycling-related topics as well as bill inserts from haulers with pertinent information. The documents are produced collaboratively with hauler and IWM input.
Litter	Litter reduction and management information and tips are provided through various outreach materials. Additionally, IWM has an agreement with the Juvenile Probation department to pick up litter on a weekly basis. More detailed information is provided in the attached report.

COUNTY OF SANTA CLARA
NONPOINT SOURCE POLLUTION CONTROL PROGRAM
ANNUAL REPORT FY 08

This report summarizes Graffiti and Litter Abatement (GALA) Program activities from July 1, 2006 through June 30, 2008.

Eradication

The Sunday Route Program, a collaborative effort between Integrated Waste Management and the Juvenile Probation Department, has been successful this past year in both graffiti and litter removal. GALA Program staff administers the program. The Juvenile Probation Department provides a group counselor to supervise a team of probationers in the removal of graffiti and litter most Sundays. In FY 2008, the Sunday Route crew painted out a total of 418 graffiti tags, accounting for 3,191 square feet of graffiti removal. Additionally, the crew collected 1000 bags of litter and 315 bags of recyclable materials from County roads. As a result of this program, 434 probationers were able to perform their community service hours. The Sunday Route Program, coupled with the swift response from the Roads and Airports Department, continues to provide the appropriate level of service needed to address current graffiti trends.

Great American Litter Pick-Up

This year's Great American Litter Pick-Up took place April 12, 2008, and focused exclusively in the Berryessa area. Three hundred and fifty participants collected 77 bags of litter and 16 bags of recyclable items. The clean-up was followed by a celebratory pizza luncheon at the Berryessa Community Center and was hosted by Supervisor McHugh. This successful event came together through the collaborative efforts of Integrated Waste Management staff, the Office of the District Attorney, the Office of Supervisor Pete McHugh, and the City of San Jose.

Clean-Up Events

There were ten hauler-sponsored clean-ups that took place in FY 2008. Following is a table showing the results of these clean-up events. All collected materials were taken back to the Materials Recovery Facility (MRF) and sorted, removing all recyclable materials before being landfilled.

Date	Garbage District/ Supervisorial District	Households Served	Tons Collected
8/25/07	3/1, 4, 5	450	27.04
9/8/07	4/4	500	35.66
10/6/07	1/2	500	29.27
10/20/07	3A/1	1080	24.48
10/27/07	4/4	600	40.21
4/19/08	3/4, 5	450	28.45
5/10/08	1/2	500	16.77
5/17/08	1/1	900	41.49
6/7/08	3/4, 5	450	30.58
6/21/08	4/4	900	30.5
	TOTAL	**6,330**	**304.45**

In FY 2009, there are additional clean-up events scheduled for all Garbage Districts beginning in August and running through the spring. Staff continues to coordinate with Board offices to confirm clean-up dates, and will distribute information to residents at the bin sites.

Per the franchise agreement, South County residents are provided with twelve yard waste vouchers and one disposal voucher per year. There is also an annual "recycling days" event in which residents may bring unlimited quantities of wood and metal items to be recycled.

Santa Clara County Litter Technical Advisory Committee (Litter TAC)

Staff attends quarterly meetings of the Santa Clara County Litter TAC and is a member of the Litter Control and Removal subcommittee. The members of the Litter TAC include multiple stakeholders and include representatives from local government and law enforcement, VTA, CalTrans, the District Attorney's Office, local media, school districts, Santa Clara Valley Water District, and more. The goals of the Litter TAC are:

- Establish Countywide goals to decrease the amount of litter
- Establish a communication framework amongst the cities within the County to address litter hot spots
- Establish uniform enforcement standards among law enforcement agencies
- Establish a Countywide education/media program
- Establish a communication framework with private companies (solid waste companies, Union Pacific, etc.)
- Establish a Countywide volunteer network

Enforcement

Staff continues to maintain a database of graffiti tags and shares information with the Sheriff's Office and the District Attorney's Office when requested.

Interagency Partnerships

IWM staff continues to work with the District Attorney's Office, the Probation Department and the Roads and Airports Department to address any litter and graffiti issues as they arise.

Staff serves on the Burbank Weed and Seed Steering Committee and attends monthly meetings. Weed and Seed is a federal grant for the Burbank community to weed out criminal activity and seed the area with resources and services that benefit the community.

The partnerships with the Probation Department and the Roads and Airports Department continue to be the most efficient way of abating graffiti and litter in unincorporated pocket areas. The Roads and Airports Department is responsive to calls for service, and the Sunday Route Program provides abatement services on a weekly basis when their schedule permits.

Outcome of FY 2008 Performance Goals

Goal 1: Coordinate a minimum of five graffiti and litter abatement events.
Outcome: Coordinated eight events (including the Great American Litter Pick-Up).

Goal 2: Coordinate 450 participants for graffiti and litter abatement.
Outcome: Coordinated 784 participants (350 from the Great American Litter Pick Up)

Goal 3: Abate 5,000 square feet of graffiti
Outcome: Abated 3,191 square feet

Goal 4: Abate 375 graffiti tags
Outcome: Abated 418 graffiti tags

Goal 5: Collect 1,500 bags of litter and recycled materials
Outcome: Collected 1,408 bags of litter and recycled materials

rformance Goals for FY 2009

Goal 1: Coordinate a minimum of five graffiti and litter abatement events.
This goal remains the same as last year.

Goal 2: Coordinate 500 participants for graffiti and litter abatement.
This goal has been increased due to the success of the Great American Litter Pick Up in which 350 people showed up to pick up litter.

Goal 3: Abate 5,000 square feet of graffiti.
This goal has increased as the occurrence of graffiti is once again on the rise.

Goal 4: Abate 500 graffiti tags.
This goal remains the same as last year.

Goal 5: Collect 1,500 bags of litter and recycled materials.
This goal remains the same as last year.

COUNTY OF SANTA CLARA
NONPOINT SOURCE POLLUTION CONTROL PROGRAM
ANNUAL REPORT FY 08

This report summarizes the Santa Clara County Green Business Program activities from July 2007 through June 30, 2008.

Partners
All fifteen cities within Santa Clara County, the Santa Clara Valley Water District (SCVWD), Pacific Gas & Electric (PG&E), Association of Bay Area Governments (ABAG), Department of Toxic Substance Control (DTSC) and the Bay Area Air Quality Management District (BAAQMD)

Accomplishments
- 134 businesses certified/recertified in FY 08 bringing total certified to 264 in Santa Clara County
- 251 newly enrolled businesses in FY 08
- Participants have undertaken numerous actions to reduce energy and water use and prevent waste and pollution

Local Accomplishments:
- Participating businesses are influencing employees, vendors and clients by demonstrating that businesses and consumers can make smart environmental choices in their everyday operations
- Public agencies certified: City of Cupertino Senior Center and Quinlan Center; City of Sunnyvale Corporation Yard and Columbia Neighborhood Center; City of Mountain View Senior Center and City Hall, City of Campbell
- Businesses certified in previous fiscal year were recognized by Board of Supervisors at recognition event held at Vasona Park on September 24, 2007

Regional Accomplishments:
- All nine counties in the Bay Area are now participating in the Bay Area Green Business Program
- More than 1,400 businesses have been certified in the Bay Area Green Business Program
- The Association of Bay Area Governments (ABAG) recognized all certified Public Agencies in the Bay Area in March 2008
- The California Green Business Program Network received a grant from the Department of Toxics and Substance Control to develop a measurement tool to better quantify impact of program and collect more data. First phase is expected to be completed by end of 2008.
- Continue to update checklists as new rules and regulations arise and develop new industry-specific checklists

Pollution Prevention:
Assessments identified potential pollution sources and ways to reduce use of toxic materials. Businesses stenciled no dumping flows to bay on storm drain inlets on their property.
Next Steps
- Develop Steering Committee for Santa Clara County Green Business Program

- Leverage regional resources to enhance local efforts
- Conduct research on factors motivating business participation to support development of outreach and recruitment strategies
- Enhance website resources
- Simplify/streamline Green Business certification process
- Continue to nurture partnerships with cities, regulatory agencies, etc. to assist in implementation and business certifications
- Develop a measurement tool to quantify the impacts of implementing Green Business measures

Implementation Priorities

1. Increase the number of certified businesses countywide
2. Continue to conduct local outreach to educate the public on the GBP and the importance of patronizing certified green businesses
3. Host a recognition event September 11, 2008

COUNTY OF SANTA CLARA

Home Composting Education Program (HCEP)

ANNUAL REPORT FY 08

This report summarizes the Home Composting Education Program activities from July 2007 through June 30, 2008.

Experts estimate that the average household that composts both yard and food waste will divert 579 pounds of waste per year. Home composting is a cost-effective way to recycle organic debris. We encourage participation in home composting with a flexible and diverse education program. The Master Composter volunteers share their knowledge to help residents be successful in making compost in their own yards.

Activities that have helped to prevent storm water pollution include:

- Distribution of *Bay Friendly Homeowner Guide, Soil Matters, Grasscycling, Grow It! The Less-Toxic Garden Control Pests & Plant Disease Using Less-Toxic Methods*. These publications encourage sustainable landscapes which reduce the amount of water, pesticides and herbicides use. Grasscycling also keeps grass clippings from washing into storm drains.
- Distribution at compost workshops and table displays *basic composting* and *worm composting* brochures encourage healthy soils which reduce water runoff.
- Compost use (commercially made and homemade) in the garden is encouraged to improve soil and less water and pesticide run-off.
- Worm composting classes encourage using redworms to recycle kitchen wastes instead of using the kitchen sink disposal or landfilling organics.
- School outreach program to encourage food waste recycling.
- Promotion of compost use, the IWMP department did a survey in FY06 of the unincorporated residents on their awareness of composting and the HCEP program. Some of these findings can be used as a baseline to sample again in the future.

PROGRAM HIGHLIGHTS

- **Volunteers**
  To date, 329 Master Composter (MC) volunteers have been certified to teach home composting. About 65 volunteers are currently active contributing through workshops and monthly meetings. (The ten-week training consists of 50 hours of classroom time and field trips). MCs are asked to perform at least 50 hours of outreach and education within Santa Clara County within one year of graduation.Total reported volunteer hours since program inception to date are 28,322 hours.

- **Workshops and Other Outreach**
  Workshops, worm composting classes, and events such as fairs, garden shows, special lectures, table displays and City Compost Bin Sales. Presentations on worm composting have been given at schools. Each participating classroom received a pound of redworms, a worm bin, and educational materials.

  In FY08 there were participants at our events as follows:
  - 29 special lectures with attendance of 1,754
  - 77 school presentations with attendance of 1,575
  - 54 compost workshops with attendance of 1,586
  - 5 teacher training with attendance of 111
  - 49 table displays with attendance of 9,431
  - 1,145 volunteer hours were donated during FY08

- **Compost Bin Sales**
  Earth Machine compost bins, kitchen containers, compost thermometers, worm bins, worms and wing-digger compost turning tools are for sale by appointment at the HCEP office at the County Service Center at 1553 Berger Drive and at most compost workshops. In FY08 246 *Earth Machine* compost bins were sold, 157 wing diggers, 80 thermometers, 109 compost buckets and 396 worm bins.

042529

MCs assist cities with their bin sales. The Cities of Sunnyvale and Palo Alto offer residents the *Bio Stack* compost bin at a reduced price. The City of San Jose sells the *Bio Stack* and *Home Composter* compost bins, and the *Wriggly Wranch* worm bin at a reduced price.

- **Continuing Education for Master Composters**
  Education by expert guest speakers at Monthly Meetings
  Monthly Email/Print Newsletter
  Research / Resource Library
  Network with other counties programs
  Skills Survey

- **Demonstration Site**
  The MCs maintain a composting demonstration site at Prusch Park in San Jose with about a dozen different working compost bins that have been donated by manufacturers. MC volunteers also maintain a *Bio Stack* compost bin at the Sunnyvale Community Center.

- **Advertising / Public Relations**
  The ReduceWaste.org website lists upcoming workshops. City Contacts help to promote HCEP workshops by purchasing advertising space in local papers. The program buys some advertising.

Santa Clara Valley Urban Runoff Pollution Prevention Program

FY 08 Annual Report

Attachment H- Pesticide Management Activities (Integrated Pest Management Program)

Notes:

1) The County of Santa Clara was the first local jurisdiction to hire a full time IPM Program Manager, and the first local jurisdiction to adopt an IPM Ordinance

2) The IPM Program submits quarterly reports to the Housing Land use and Transportation (HLUET) subcommittee of the Board of Supervisors

3) The IPM Ordinance is available on the internet at

http://www.sccgov.org/SCC/docs/scc_ordinance/TOC074.HTM

4) Twenty-two pesticides have been phased out of use on County properties and dependency on non-chemical alternatives has increased significantly since 2002. In effect this has also decreased the total applicacation, volume and toxicity of pesticides used.

Background

As we enter the 21st century, we find ourselves at a critical point and with very little time – years, not generations – in which to undo environmental damage.

We must now think in terms of ***"sustained development"*** using and managing resources and the environment to maintain a strong economy and preserve a healthy environment today and in the years to come.

The most important challenge we face today is lack of significant integrated eco-system management solutions to the overall sustainability & quality of the environment. The scientific community does not fully understand the risks that synthetic pesticides pose to our environment and our health. Many problems await potential solutions, which will be evaluated and demonstrated. It may take years of research to uncover the answers. The economics of potential solutions are also under scrutiny. Lack of training is also often cited as an obstacle to the wider adoption of sustained development practices. This includes development and adoption of ***"Integrated Pest Management"*** (IPM) strategies.

Frequently the knowledge or technology supporting new pest management solutions is in its infancy, and the economics appear unacceptable.

Economic judgments at this early stage can be premature, and may prevent IPM practitioners from implementing the programs that may turn out to be economical in the long run. Both long and short-term perspectives are in the best interests of the public, toward reducing

> "Often, when I have the opportunity to discuss the Santa Clara County's IPM Program effort, I am asked if the current mission of the IPM program that of reducing pesticide use, is a good one. In response I offer the following: ***We must approach pest control***

environmental impacts and increasing adoption of IPM practices.

This is a topic with important applications to local government practices, and to public agency personnel whose job it is to make the experience of public places safe, enjoyable and pest free. In the long-term, everyone benefits from a healthier environment.

approach pest control as an integral component of our environment, our health, and our food safety. We must strive to assure our work meet defined standards, pursue quality improvement, and challenge excellence through continuous training & awareness in all aspects of integrated pest management." - Naresh Duggal.

Santa Clara County's IPM Program website provides a technical platform for the diverse group of Eco-System managers (such as county department's user groups as well as other public agencies, communities and industry) with access to information, tools and networks that maximize opportunities for pesticide reduction in Non-Crop Production Agriculture & Structural IPM Programs. It promotes pest prevention, minimize pesticide use and address issues that go beyond city or county boundaries.

All of us must do our part - government, industry, public interest groups, and individuals - at home, at school, at the workplace, while working, while playing, while traveling. It is time to re-examine our values, make thoughtful choices, and adjust our lifestyles to give more consideration to the environment. It is important for each one of us to act - not only for our children and ourselves, but also for future generations and for the other living things sharing the **EARTH** with us. We need to continue to work together.

The following sub-channels provide more details:

- Purpose
- Benefits of Integrated Pest Management
- Strategy

SANTA CLARA COUNTY
INTEGRATED PEST MANAGEMENT PROGRAM
REDUCED RISK INITIATIVES (2002-2007)

Organization: Santa Clara County Integrated Pest Management Program[1]

Type of Organization: Santa Clara County, a government organization, with its administrative site at City of San Jose, includes 15 cities; provide essential services to a population of 1.7 million. The County of Santa Clara Board of Supervisors govern & appointed County Executive manages 16,000 employee workforce, the largest county in the San Francisco Bay Area, functions as an extension to the California State government to manage California's social, health and safety programs.

IPM History of Organization: Santa Clara County passed IPM & pesticide use reduction ordinance in May 2002 and hired IPM Manager to start the process of promoting reduced risk pest management practices. The IPM Program is a countywide program providing IPM guidance and coordination to all county owned or managed facilities and grounds. The IPM Program is administered through the County IPM Manager, Office of the County Executive and IPM-Technical Advisory Group providing coordination to several user departments in various pest management & pesticide related projects. From operational and logistical perspective, all county departments are divided into six(6) user groups that is Facilities and Fleet (FAF), Health and Hospital (HHS), Roads and Airports (R&A), Parks and Recreation (P&R), Social Services Agency (SSA) and Libraries (LIB). Each user group is represented by a designated Department IPM Coordinator who provides coordination in consultation the County IPM Manager on various IPM related projects based on the need of their user group.

List and description of IPM & reduced-risk practices Santa Clara County uses or promotes: The uniqueness & innovation of the Santa Clara County IPM program is developing Public agency (Countywide) IPM program from administration, management, budgeting, system evaluation, demonstrations, technical guidance, training, education & outreach: a unique task of bringing a "Team Approach" among several user & interest groups in the complex world of pest management, ensuring sustainability and providing solutions through "Real World Examples". All IPM practices as mentioned below are innovative, creative & unique and are widely practiced by SCC IPM practitioners, some suited to one microenvironment versus some to others.

SCC Innovations in Technology development, Products & Services Applications:

- Innovation in progress: Setting up collaborative research with the Department of Entomology, UC Riverside to develop bait matrices that are environmentally friendly, investigate effective lures & traps and monitoring & abatement protocol for the good control or suppression of Yellow jackets in sensitive areas such as parks, other landscapes, schools and recreational areas. The research is in third year, covering 3 Regional Parks (approx. 5000 acres) in year 2005-2007.
- Innovation in progress: California Department of Pesticide Regulation Pest Management Alliance (PMA) - Urban Pest Ant Management Project: The Santa Clara County IPM program is participating as a team partner in Urban Pest Ant Management Project, coordinated by the Entomology Department at the University of California Riverside, and made possible through $183,488 grant from the California Department of Pesticide

[1] Contact: Naresh Duggal, County IPM Manager; Telephone: 408-299-5159 Fax: 408-295-1613;
E Mail: Naresh.Duggal@ceo.sccgov.org IPM Website: http://IPM.sccgov.org ; Address: Office of the County Executive, East Wing, 11th Floor, 70, W. Hedding Street, San Jose, CA 95110

Regulation. The project's goal is to reduce the use of synthetic insecticides used to control ants in urban areas. Specifically targeted are pyrethroid pesticides that are currently under DPR investigation for urban stream contamination. The project will work with pest professionals and the public to develop low-risk strategies for ant control. Seminars, workshops, and a Web link are planned. The PMA team members disseminate and train pest management professionals at selected industry conferences, classes or workshops. The project will seek to reduce pyrethroid use among its participants by 50 percent by 2010.

- Innovation in progress: A collaborative trial (reduced risk strategy to control Argentine ants) was implemented on April 29, 2007 at the South County Court facilities, with the help of KM AntPro system manufacturer and Orkin Extermination. A successful outcome could help alleviate this problem in and around the County owned or managed facilities.
- Innovation in progress-Drywood Termite Control:
  - Successfully completed first drywood termite eradication using heat at the ranger office at Ed Levin Park. This is an alternative form of pest control that involves safely raising the temperature of an affected area to a level no pest can survive. Aside from being an effective non-toxic pest control method, heat is unique in that it can be used to treat specific areas as well as entire structures.
  - Successfully completed drywood termite control using reduced risk borate treatment at the historic barn (now storage shed) at Ed Levin park
- Innovation in progress: Promoting inclusion of mulch on right of ways in regional parks: The Department of Parks & Recreation has received grant funding from California Integrated Waste Management Board to buy rubber mulch ($100,000). The department plans to use mulch, sheet mulch and ground covers to control weeds in several new park renovation projects. The use of mulch will reduce the maintenance cost as well as the herbicide use.
- Innovation in progress: Promoting inclusion of mulch on roadsides and intersections: The Department of Roads & Airports has completed first year of application of mulch in the median of county expressways. The ongoing annual program will consist of excavating existing dirt and weeds and mulching approximately 170,000 square feet of expressway median; this process will reduce herbicide spraying by approximately 50% more
- Innovation in progress: Reducing overall herbicide use through precision application technology; investments in pesticide volume reduction technologies e.g. Weedseeker; The department of Roads has upgraded one spray rig, boom with a Weedseeker – this will allow 70-85% herbicide use reduction on Roads & Airports right of way weed control.
- Innovation in wide scale adoption phase: Successfully completed the efficacy trials on "Clove oil as alternative approach to post emergent vegetation control on rights-of-way". In 2005-06, the pilot was expanded on to twenty five 25 linear acreage of Parks Right-of-Ways, however, wide scale adoption discontinued because the manufacturer stopped production due to lack of demand in the urban marketplace.
- Innovation in progress: Other creativity in progress is setting up **"Green Service Routes"**, in collaboration with Structural, Landscape and Wildlife IPM contractors. The focus of these services is to provide pest control & related maintenance through ongoing inspections, planning, design, preventive and proactive maintenance, and if there is need for chemical intervention, and then choose only minimum risk pesticides from US EPA 25(b) list or precision baiting/application techniques thus minimizing use of conventional pesticides to maximum extent possible.

The second round of Request for Proposals (RFP) for each IPM subject matter reflects the underlying objectives of establishing "IPM Green Products and Services" and "Bay Friendly Landscape Maintenance and related IPM", which are comparable to USGBC-LEED Certification (US Green Building Council Certification: Leadership in Energy and Environmental Design) in respective category. These RFP's are undergoing release to the market in late 2008 to procure the best available IPM Green product and service providers.

SCC Innovations & Creativity in IPM Related Management Tools:

- Developed a comprehensive IPM website as educational and information resource platform for policy makers, management, staff and community. Website Address: http://IPM.sccgov.org
- Developed Department specific IPM Plans and Budgets, Administrative Guidelines & Procedures
- Promoted a strategic site review process for vegetation managers to define priority zones, a critical component to minimize pesticide use on rights-of-way.
- Negotiated inclusion of IPM ordinance in all County contracts and provisions related to leases, capital projects planning, designs and renovations. Gradually changing the contracts at the base; encouraging planners & construction contractors to bring long-term sustainable design improvements in building roads, airport taxiways, park & landscapes, structures etc. to minimize pesticide use. This will strengthen the precautionary principles/concepts to mitigate pest problems before it happens.
- Providing opportunities and platform for innovative product & service providers to conduct collaborative pilots, demonstrations & research at County facilities/sites for wide scale adoption
- Developed IPM Logbook for effective data & document maintenance at each facility (180 plus facilities).
- Developed a web based IPM & Pesticide Use Reporting System (IPM-PURS). It will allow the IPM practitioners to capture real time data, its analysis, which will assist them to formulate IPM strategies, budgeting, giving sustainable directions for the future.
- Developed Regional IPM Resource Manual, Brochures to help public agencies management in disseminating IPM & related information to wider community.
- Developed Training video/manual titled 'Sanitation, Housekeeping & Maintenance – Role of Facility Managers and Building Occupant in preventing pest problems", accompanied by "Facility Manager's IPM Guidance Manual".
- Developed Guidelines and launched a proactive approach to contract or in house services in IPM for Structures, Urban Turf & Landscape, Wildlife pest management, Aquatic Pest Management, Rights-of-Way Vegetation Management, and Indoor Plant Maintenance.
- Conducted demonstration, research & trials on physical, cultural & biological vegetation management, right of way priority zones, and precision baiting for ants, yellow jacket trapping & abatement etc.
- Established a Regional Park land (1500 acres), the first park to practice reduced risk pest management practices. Currently conducting demonstrations through "Real World Examples", such as mechanical trapping of wild life, rubberized mulch, wood mulch, clove oil as post emergent herbicide for right of way vegetation management, mechanical harvesting of aquatic weeds, Biological control of algae in ponds & lakes, Reducing algae growth through pond aeration, Hydro-mulch, Salt slurry application around airport taxiways, Poly pavement & Weed barriers to manage rights-of-way vegetation, Solarization, Biological, physical & mechanical control of invasive & aquatic weeds. Promoting use of mechanical equipments such as Flail, Slope & Riding mowers, Weed Wipers, trimmers & Hand hoe Weed torches, Radiant heat, and Controlled burn.
- Assisting other public agencies and concerned groups to set their IPM projects, programs, policies and procedures. This will assist in bringing larger community under IPM umbrella.

SCC Innovations & Creativity in Education, Training, Awareness & Outreach

- An original sponsor of this creative approach, SCC formed the first ever Northern California Regional IPM Alliance and created Regional IPM Trust Fund, a unique collaborative to economize scarce resources; to address issues that go beyond city or county boundaries, to promote pest prevention & minimize pesticide use and to outreach a greater community.
- Taken a leadership role in developing a Regional IPM Conference and training event. As the original sponsor of this innovative idea, Santa Clara County hosted the First Regional

IPM Conference, held on June 7, 2004 and assisted neighboring county (Alameda) to organize the second annual conference in 2005; and City of San Jose/Santa Clara Valley Water District to organize the third annual conference in 2006. Planning for fourth annual regional conference (2009) is underway.

- Taken a leadership & fiscal management role in setting up an IPM Trust fund of likeminded public agencies to promote establishment of collaborative education & outreach platform - Annual Regional IPM Conference rotating throughout the Northern California. As the program grows, the desired outcome is to bring all Northern California Public agencies & industry under one Regional IPM platform. Read more about benefits of this approach at http://IPM.sccgov.org (Go to Resources>Outreach Tools>Training>>)
- Taken a leadership role in promoting IPM Pesticide Applicator Safety Education. Established Annual "IPM & Pesticide Applicator Safety Education" (IPM-PASE) training program.
- Green Gardener Training Program (Landscape Maintenance Worker and Professionals Training and Certification Programs): Pesticides used in landscape maintenance are a known source of pollution in local waterways. A large number of homes and businesses in Santa Clara County use landscape maintenance companies to meet their landscaping and gardening needs. Many landscaping practitioners are not aware of less toxic methods that can be used to control pests and minimize pesticide runoff.

  The County's IPM program has formed a pest management alliance, a diverse group that can collectively address all aspects of landscape maintenance worker and professionals IPM training and certification. Members of the group include the County IPM Manager, as well as representatives from Santa Clara Valley Urban Runoff Pollution Prevention Program (SCVURPPP) agencies, EOA Inc. (the SCVURPPP program management firm), curriculum advisors – Ecology Action of Santa Cruz and the Metropolitan Adult Education Program of San Jose.

  Beneficiaries of this training include Santa Clara County landscape maintenance workers and landscape professionals who will obtain marketable skills, and residents, businesses and government agencies that will be able to hire qualified workers and obtain more IPM-sensitive landscape maintenance services. Thirty plus Green Gardeners were trained and certified in early 2008.Addtional trainings are planned subject to availability of grant funding.
- Regional Alliance for Bay Friendly Landscaping and Gardening (Landscape Maintenance Worker and Professionals Training and Certification Programs): The County IPM Manager participates in the Bay-Friendly regional coalition to promote Bay-Friendly landscaping practices – a precautionary/preventive approach to IPM. The coalition is comprised of public agencies and other organizations and individuals who are interested in promoting sustainable, environmentally-friendly practices in Bay Area landscapes and gardens. They are working together to provide a regional, consistent, and unified message with recognizable materials that works across county and agency boundaries.
- Taken a leadership role in promoting proactive and preventive precautionary principles in mitigating pest problems in structures. Established a training program titled "Sanitation, Housekeeping & Maintenance – Role of Facility Manager and Building Occupants in preventing pest problems". See details at http://IPM.sccgov.org (Go to Resources>Best Practices>IPM Guidance Manual>>)
- Conducted an educational outreach workshop on "Pesticide Environmental Risk Analysis, Risk Indicators & Pesticide Selection Criteria". Promoted this project for users throughout the bay area counties. See more details at http://IPM.sccgov.org (Go to Resources>Best Practices>SCC Administrative Guidelines>Are you deciding to use pesticide>click on relevant attachment)
- Conducted several customized training programs for IPM Coordinators, Project Control specialists, Facility managers, and Safety Coordinators, building occupants to let them understand their role in administrative/operational management of pest control projects.
- Promoted IPM at Regional IPM Conference Exhibits, National IPM Symposium,

International Conference on Urban Pest (ICUP), Indian Pest Control Association (IPCA), National Recreation and Park Association (NRPA) Academy, Parents for Safer Environment (Town of Moraga), Northern California Turf & Landscape show, Annual Employees Wellness Fair, Annual Santa Clara Safety Seminar, Urban Pesticide Committee (Regional Water Quality Control Board), Marin County IPM Workshop, EOA (Urban Runoff Pollution Prevention Program), Professional Association of Pesticide Applicators (PAPA), California Association of Pest Control Advisors (CAPCA), COAST Agriculture Commissioners meeting and several other local workshops.

- Conducted several field demonstrations on reduced risk strategies for example Waipuna Steam system for weed control, IPM Field day (Earth day event); Weed Seeker low volume Spray Technology demonstration at Reed-hill view airport; Rubberized/Wood mulch demonstration at Ed Levin, Mechanical harvesting of aquatic weeds at Vasona Lake, Ant baiting strategies at South County Court facility.
- **Publications:** IPM **Website** http://IPM.sccgov.org, **Manuals**: Regional IPM Resource Manual, Facility Manager's IPM Guidance Manual, Public Agency's IPM Administrative Guidelines & Procedures Manual, Providing Decision Making Analytical Tools to IPM Managers through Electronic Web Based: IPM & Pesticide Use Reporting, Reduced risk pesticide publications, RFQ/RFP publication to procure qualified IPM vendors; **Newsletter:** Quarterly IPM Newsletter for County Employees (discontinued after launch of IPM website; **Brochures:** Stinging Arthropods Emergencies in Regional Parks, Composting & Pest Management, Building Occupant – We need your help to resolve chronic ant problems, Understanding and Managing Structural Ant Problems – The Lease Hazardous Way, Healthy Lawn Care, Putting IPM into Practice, Pesticide & Environment, Pesticide & Water etc.

A few success stories of the last five years are as follows:

- Developed a comprehensive 'IPM Administrative Guidelines and Procedures Manual' to assist public agencies in managing various IPM projects and programs. For more info http://IPM.sccgov.org (Go to Resources>Best Practices>SCC IPM Administrative...)
- Established reduced risk pesticide selection criteria and conducted a comprehensive environmental risk analysis/review of 300+ pesticides; developed an 'Approved list of Reduced Risk Pesticides'. For more info
  - http://environmentalrisk.cornell.edu/PRI/Publications/ApprPesticides040409.xls
- Achieved significant Pesticide Use Reduction (50 to 100%) over five year period (2002-2007), throughout the user groups (departments). See attached report: SCC IPM Pesticide Use Analysis (2002-2007)
- Launch of a successful reduced risk pest management park adopted in 2002 – a pilot project at approx. 1500 acres Ed Levin park, a model that will gradually plan to be adopted at all 27 regional parks throughout the county covering 50,000+ acres of recreational, open space and rangelands. – At the end of 2007, eight parks are pesticide free.
- Successful sixth year of ongoing monitoring & IPM services in Structural IPM/Urban Turf & Landscape/Wild Life IPM programs throughout the county owned facilities & land, including approx. 180+ county office buildings, entire medical complex/hospitals system, all correctional facilities, libraries, airports, animal shelters etc. Pesticide use (using only reduced risk pesticides) has been reduced to miniscule amounts.
- Increased employee & stakeholder awareness and participation at each level and a completion of working IPM plan for each department and IPM projects. All projects are based on the budgetary guidelines thus making its implementation and continuation sustainable & key to success.
- A successful launch of Regional IPM Alliance and IPM Trust Fund and three successful Regional IPM Conferences with approx. 500 plus attendees each year representing approx. 250+ public agencies and industry.
- A successful launch of Annual IPM Training for Facility Managers and Department IPM Coordinators, Annual IPM & Pesticide Applicators Safety Education, Building Occupant Training.

- A successful launch of IPM Website (http://IPM.sccgov.org) & web based Pesticide Use Reporting (PUR) database allowing real time data entry, information and analytical tools to IPM project managers.
- The SCC IPM program has gained a wide publicity in its uniqueness and innovations. The County IPM Coordinator has been invited by several organizations to share the program information for adoption by their management groups:
  - **Recognition by US EPA auditing team:** During a cross program audit of SCC Storm Water Pollution Prevention Program, the auditing team reported: "The County IPM Program was well implemented and organized....The IPM program has implemented innovative techniques for regular field activities....model for implementing & organizing other programs."
  - **Recognition by County Board of Supervisor & Environment Watch Group-Pesticide Alternatives of Santa Clara County:** The County IPM Manager was recognized for his outstanding contribution to the advancement of Integrated Pest Management in Santa Clara County and the Bay Area.
  - **Recognition by Department of Pesticide Regulations of California Environmental Protection Agency:** The Department of Pesticide Regulations of California Environmental Protection Agency has recently recognized Santa Clara County's IPM Program as **'California IPM Innovator for Year 2005'**, for it's leadership & creativity in advancing the use of reduced-risk programs for pest management in urban settings.

Future Projects

- Subterranean and Drywood termite control research – investigating efficacy and feasibility of adopting alternatives (e.g. heat treatment, localized borate treatment, termite baits) to conventional pesticide applications in large commercial structures; initiating dialogue with CA Structural Pest Control Board to explore avenues to determine which structures are already treated for termites with conventional pesticides in the last 5-10 years; so that when a structure undergoes real estate transaction within a guarantee period, overall number of repeat treatment overload can be analyzed and reduced
- Ant control using baiting strategies; building occupant education and awareness outreach projects
- Promoting plant health care (PHC), physical and cultural controls in urban turf and landscapes; irrigation system audits and repairs
- Promoting demonstration study of Xerioscape (dry landscape) and its inclusion in the road's right of way, regional park's recreational areas, and urban turf & landscapes.
- Participating in Bay-Friendly regional coalition to promote Bay-Friendly landscaping practices – a precautionary/preventive approach to IPM.
- Promoting Green Gardener's educational outreach project to prepare certified green gardeners to serve local communities.

SANTA CLARA COUNTY IPM PROGRAM
PEST MANAGEMENT AND PESTICIDE USE ANALYSIS 2002-2007

Pest Problems Encountered

A variety of pest problems were encountered on County properties since the implementation of IPM Ordinance as reviewed in tables below.

Pest Problems Encountered by FAF, HHS, SSA, ROADS & AIRPORTS AND LIBRARIES							
Pest Category	**Pest**	**FAF**	**HHS**	**SSA**	**ROADS**	**AIRPORTS**	**LIB**
Weeds in urban landscapes	**Annual Broadleaf** (Low amaranth, California Burclover, Common Chickweed, Common knotweed, Field Madder, Little mallow, Black medic, Common purslane, Persian speedwell)	X	X	X	X	X	N/A
	Biennial Broadleaf (Bristly Oxtongue)	X	X	X	X	X	N/A
	Perennial Broadleaf (Mouseear chickweed, White clover, English daisy, Dandelions, Dichondra, Birdseye pearlwort, Pennywort, Broadleaf plantain, Buckhorn plantain, Common Yarrow)	X	X	X	X	X	N/A
	Annual grasses (Annual bluegrass, Large Crabgrass, Smooth Crabgrass, Italian ryegrass, Goosegrass)	X	X	X	X	X	N/A
	Perennial grasses (Bermuda grass, Kikuyugrass)	X	X	X	X	X	N/A
Weeds in Right of Way	Marestail, Punture vine, Russian thistle, Stinkwort, Scotch broom, Bull thistle				X		
Insects	**Ants**						
	Argentine ants	X	X	X	X	X	
	Carpenter ants						
	Pavement ants	X	X	X	X	X	
	Cockroaches						
	German cockroaches	X	X	X			
	American cockroaches	X	X	X			

	Oriental cockroaches	X	X	X			
	Flies						
	Houseflies	X	X	X			
	Fruit flies	X	X	X			
	Phorid flies	X	X	X

Pesticide Use Analysis[1]

Accomplishments Highlights:

- ✓ Since May 2002, **Twenty two (22) pesticides are phased out from use on County properties** as follows: Prosecutor, Pre M, Direx, RoundUP Pro, Merit 75WP, Knox Out 2 FM, Diaphacinon 0.005%, Wilco Squirrel Bait, Pendulum, Pendulum 2G, Surflan, Rodeo, Pathfinder, Oust, Pointer, Telar, Telstar, Endurance, Hydrothal, Dursban and Diazinon. The pesticide use analysis plots below provide a summary of the pesticides applied on County properties since the implementation of IPM Ordinance.
- ✓ **The total applications, volume, and toxicity pesticides were significantly reduced**.
- ✓ **Dependence upon and use of non-chemical alternatives increased significantly** – e.g. chips, disk, flail, hand hoe, rough mow, slope mow, turf mow, weed barrier (weed fabric, mulch), landscape maintenance, manual weeding, vermin proofing, bird exclusion netting, facility sanitation, housekeeping, maintenance, drain maintenance, building occupant behavior & cooperation in sanitation & housekeeping
- ✓ **Pesticide free parks:** Eight (8) pesticide free parks as follows: Chitactac-Adams park, Uvas Canyon park, Upper Stevens Creek park, Lexington park, Loas Gatos Creek park, Alviso park, Calero park. Acreage under chemical management is also on decline throughout the 27 Regional parks.
- ✓ **Pesticide use in invasive pest management (approx. 45,000+ acres) program of the Department of Parks and Recreation- Natural Resoruce Management division can be be stated as "miniscual use of reduced risk pesticides".** Most invasive pest management projects are managed using non-chemical alternative approaches e.g. hand removal, torching, mowing, prescribed fire, goat grazing, solarization, seed head cutting, revegetation etc.
- ✓ **Pesticide use in Urban Landscapes has been significantly reduced and can be stated as "miniscual use of reduced risk pesticides".**
- ✓ **Pesticide use in structures has been significantly reduced and can be stated as "miniscual use of reduced risk pesticides".** Regular site inspections followed by building occupant education, sanitation, housekeeping and maintenance improvements, has helped to alter many pest situations which would have otherwise resulted in pesticide applications.

[1] The above mentioned IPM and Pesticide Use analysis is based on the pest management and/or pesticide use summary reports, exemption requests submitted by User Groups (Department IPM Coordinators, In-house pest management/maintenance staff and Pest Management Contractors). All quantities are reported or converted into largest unit that is lbs (16 oz) and gallons (128 oz) of product used based on the product formulations reported.

On Going Challenges in Pest Management:

Right of Way Vegetation Management

- Right of Way Vegetation Management at Airports (Slurry application? around P-1 areas; limited use of pre/post-emergent herbicides? In P-1 & P-2 areas)
- Right of Way Vegetation Management at Roads (P-1 & P-2 areas: limited use of pre/post-emergent herbicides?)
- Right of Way Vegetation Management at Regional Park Trails (P-1 & P-2 areas: limited use of pre/post-emergent herbicides?)
- Vegetation Removal from County properties in compliance with Fire Code
- Need to further investigate low-impact/reduced risk pre-post emergent herbicide options

Field Rodent Management

- Integrated Field Rodent Management (Ground Squirrels, Pocket Gophers etc.) at airports, regional parks and other open space aeras e.g. correctional facilities: landscape improvements, seasonal population monitoring and reduction by use of traps, installation of shadow fabric around perimeter, burrow treatment (chemical? Or non-chemical?); burrow destruction etc.

Urban Landscape Maintenance

- Turf improvements (aeration, dethatching, re-seeding, organic fertilization etc.)
- Mulch in landscapes (Rubber, Sterlie wood mulch, Sheet mulch, Weed barrier fabrics etc.)
- Improvements in irrigation equipments
- Landscape inventory – shrubbery, trees etc.; scheduled mainteance of landscape vegetation, removal or pruning of unwanted shrubbery, trees etc.
- Gardener training in Green Gardener and Bay-Friendly landscaping & gardening
- Need to further investigate low-impact pre-post emergennt herbicide options for landscape use

Structural Pest Control

- Subterranean Termite Control – Reduced Risk Strategy (Termite Baits and regular monitoring/service of bait stations; localized treatments and low-impact chemical alternatives)
- Dry Wood Termite Control – Reduced Risk Strategy (Localized or full structure heat treatment, borate treatment etc.)
- Rat Control (intensive trapping and limited use of rodenticide in temper resistant bait stations; building occupant education for removal of food sources, vermin proofing, rodent feces/urine removal etc.))
- Mice Control (intensive trapping, building occupant education for removal of food sources, vermin proofing, rodent feces/urine removal etc.)
- Integrated pest ant management: Landscape improvements (removal of soil to building contact, vegetation, moisture control, Ongoing building occupant education for removal of food source and seaonal ant control baiting strategies
- Cockroach control in basements around sewer holes, steam pipes, boiler rooms – on going baiting and vaccuming; moisture control (fixing leaky pipes, condensation issues)
- Stinging Arthropods emergencies – Bees, Wasps etc.
- Bird proofing, trapping, bird site cleaning, sanitizing

- Structural Inspections and monitoring:
  - pest monitoring – Data collection, analysis, interpertation and building occupant education;
  - regular inspections for structural sanitation, housekeeping and maintenance issues and preventive follow up

Pesticide Use Analysis by Pest Control Activity:

Pesticide Use Analysis: Right of Way Integrated Vegetation Management (IVM) by Department of Roads & Airports

The Department of Roads and Airports has traditionally used herbicides, along with mechanical means such as mowing, trimming, disking, hand removal, landscape maintenance and grading, to manage vegetation along highways and airport taxiways. This practice is known as Right of Way Integrated Vegetation Management (IVM).

Historically, the majority of Department's herbicide use has been focused on the road/taxiways shoulder directly adjacent to pavement edge. They typically maintain a 2-to 4 foot strip* (defined as Zone 1* further divided into Priority zones P-1, P-2 or P-3) next to the pavement as a vegetation-free zone through annual herbicide applications or alternative non-chemical maintenance practices. This is done for a variety of reasons, including but not limited to pavement preservation, storm water drainage, cost-effective maintenance, safety as related to maintenance and traffic operations, and reduction of the potential for roadside fire starts.

The decision framework in IVM is oriented, first, toward determining whether there is a need to maintain a Zone-1 in a given situation or location and, if not, toward determining appropriate measures for controlling vegetation in the pavement edge zone. If one or more decision factors require maintenance of Zone-1, the framework emphasizes identifying the most cost-effective, safe, and appropriate alternative for maintaining a vegetation-free strip. Conventional maintenance of Zone-1 with non-selective residual herbicide is practiced if no feasible alternative exists and the location is not identified as relatively environmentally sensitive. In the latter situation the conventional mode of application must be adjusted. And the types and amounts of herbicide used must be limited to the least amount required to accomplish the needed vegetation elimination or control. In addition the department is committed to continuing assessment of emerging alternatives and actively engaging in development of new alternatives. Conventional herbicide practices should be replaced when and where practical safe and cost-effective alternatives become available.

---

*Zone-1 definition for Department of Roads varies across the country and evolved over a period of time from 8 to 12 feet to currently 2 to 4 feet. However it varies through various geographic regions (Santa Clara County Roadway system can be classified into five different regions – urban and suburban expressways, rural roads, mountain roads, landscaped roads, roads with high water table). Please note that not all the liner length within 2-4 feet is defined under P-1 zone. The maintenance of P-1 zone is typically achieved with a combination of mechanical mowing followed by herbicide applied directly to the soil (Pre emergent herbicide) in a solid band along the edge of pavement each year in late fall (after first rainfall). The herbicides used for this purpose usually includes one or more pre-emergent, soil residual products that were intended to lock up in the top of the soil profile and prevent any seed germination or vegetative growth.

These pre-emergent herbicides are typically mixed with a non-selective, post emergent herbicide to remove any vegetation top growth at the time of application.

In 2002 with the development of "Approved List of Pesticides" under the criteria laid out in IPM ordinance, the department decided to discontinue the use of high risk pre-emergent herbicides (as listed below). In the interim (while we investigate short term and long term alternatives), the only herbicide made available to the department was post emergent herbicide (RoundUp ProDry) and that also through limited use exemptions on P-1 areas on case by case basis. In October 2006, with the Red Legged Frog injunction, even RoundUp ProDry (Ammonium salt of Glyphosate) is also curtailed to P-1 zone on expressways only. Alternative herbicides – Dimension (pre-emergent) and Milestone (post-emergent) - both US EPA caution label herbicides are introduced to fill in the interim need of right of way vegetation management, while we continue to explore alternative approaches.

Although alternatives exist to the maintenance of Priority zones with herbicides, there are also questions regarding the relative safety, cost effectiveness, and environmental impacts of some of these alternatives. While we have begun experimenting with alternatives (e.g. post emergent herbicides such as Matran (clove oil) and Scythe (Pelargonic acid), mulch application) and have conducted some field trials and cost analysis of Zone-1 maintenance versus no-maintenance approaches, a more comprehensive analysis needs to be completed that examines a wider spectrum of costs and benefits to guide future of Department's decision making.

The strategy/focus of last five years of herbicide use reduction efforts was to achieve the following:

- Eliminate use of herbicide listed as high risk – already accomplished
- Minimize herbicide use on urban landscapes and if needed only allow reduced risk herbicides (US EPA Tier 3 listed or Exempt herbicide or reduced risk/low impact herbicides) – already accomplished – ongoing work
- Reduce volume usage of herbicides (US EPA Tier 3 or Exempt herbicides or reduced risk/low impact herbicides) by adopting following protocols:
    - annual scouting of Zone-1 priority zones, classifying into P-1, P-2 and P-3; only issuing herbicide use exemptions for P-1 areas – ongoing work
    - use of precision application equipment such as weedseeker in P-1 areas to reduce overall volume of herbicide applied (this technology assists in reducing overall volume up to 85%) – one unit bought by the department
    - If possible or applicable, adopting spot treatment method in hardy weed scenarios thus minimizing broad spectrum application - ongoing work
    - Continue to add more acreage (based on budget, manpower availability) into non-chemical methods such as mowing, disking, mulch application, salt application, controlled burn, and manual weeding and landscape maintenance. – improvements noted, ongoing work
- Identify economically and environmentally sound alternatives – analyze and organize potential alternative practices in relation to maintenance objectives (or decision factors) as they occur along varying sections of right of ways - ongoing work

- If the location is relatively environmentally sensitive, proactively identify, develop, and test new alternatives and reassess the alternative management strategy – improvement noted in through reduction in acreage under herbicide as listed below
- If the location is not relatively sensitive, specify the most limited and controlled and least toxic conventional non-selective herbicide application while continuing to assess emerging alternatives and proactively identify, develop, and test new alternatives. – Only Tier 3 (Caution label) herbicide are now available for application.
- Reassess decisions periodically over the long term and adapt management strategies according to the outcome through IVM planning each year. – ongoing work
- Develop Long term Road renovation/construction plan with design improvement including use of Polypavement, Weedender in Zone-1

There is approx. 73 % reduction in acreage (Plot A1: 2164 acres in 2005 to 574 acers in 2007) under pesticide management as department increased acreage under non-chemical weed management practices by 78% such as mowing, disk, landscape maintenance, manual weeding as shown in the Plot A3 and A4 below:

	Herbicide Mechanical	Mowing Roadside	Discing	Landscape Maintenance	Manual Weeding
2005	2164	613	45	129	15.5
2006	1544	449	38	408	4.5
2007	574	846	159	423	11

	2002	2003	2004	2005	2006	2007	2008
Roundup Pro (Gals)	55						
Roundup ProDry (Lbs)		95	147.63	163.72	230.53	0	0
Direx 4L (Gals)	12.5						

In year 2005 and 2006, the department noted an increase in use of Roundup Pro Dry a US EPA Tier 3 (caution label) post emergent herbicide due to unseasonal rainfall patters; failure of first herbicide application due to late season rains; limitations in mechannical control during rainy season and compliance to fire code in summer season. Most agencies throughout this geographic region (San Francisco Bay Area) reported surge in use of this herbicide in year 2005 and 2006 due to unseasonal weather patterns that caused failure of first seasonal applications and prolonged the season of active vegetation growth by almost 3 months (in normal weather year it is November-March where as in 2005 and 2006 delayed rains prolonged active weed growth season in rain-fed areas to June).

It is recognized that some time will be needed to implement and evaluate workable alternatives after their identification. How long that period will be is a function of number of variables, such as scope of the vegetation elimination or control task, the nature of the alternative and its installation/implementation and maintenance costs, and the availability of funds and equipment to implement it. Questions of timing and interim solution (including use of Roundup ProDry a US EPA Tier 3 caution label herbicide is subject to continuing dialogue with the department's maintenance group and IPM-TAG, with the goal of achieving the fastest alternative implementation with right of way operational necessities.

The Supervisor of Department of Airports has reporeted that they are facing resource constraints (man-power shortage, and budget), existing maintenance staff is stretched very thin

among various ground maintenance activities; They may not be able to provide adequate covergage for mechanical vegetation control and ground squirrel trapping in all three airports. It is likely they may require use of herbicides/rodenticide in 2008-2009 to maintain required vegetation/ground squirrel control in critical areas – runway, shoulders and cracks, taxiway shoulders and cracks, airfield lighting and signage, aircraft landding equipment – PAPI's, VASI's, REIL's, segmented circles, wind socks, weather stations, security & perimeter fencing, and aircraft parking areas. The County IPM Coordinator is currently assisting Airports division to prepare a comprehensive IPM plan to address their short and long term pest management and pesticide use reduction goals.

The County IPM Coordinator is a member of Weed Science Society of America and actively seeks guidance from the scientific community (those who are actively engaged in roadside or right of way vegetation management), reviews the research, reports, databases, summarized findings of the literature, citations as made available through various agencies and institutions.

Pesticide Use Analysis: Department of Parks and Recreation

The Department of Parks and Recreation IPM activities are diverse dealing with variety of pest species and can be classified into two broad divisional activities within the department:

1) **IPM in Recreational maintenance areas:** includes turf weeds (annual, biennial, perennial broadleaf and grasses etc.), plant insects (ants, aphids, mites, moths, thrips etc.), plant diseases (Sudden oak death, Leafy spot, Blight, Sooty mold, Armillaria, Phytopthora, Anthracnose etc.), invasive weeds (Russian thistle, Bull thistle, Canadian thistle, Mustard, Puncture vine etc.), Poisonous plants (Poison oak etc.), aquatic weeds (Algae, Sago pond weed, Water milfoil, Coontail etc.), insects other than plant insects (Argentine ants, Carpenter ants, Feral Honeybees, Yellow jackets, Paper wasps, Houseflies, Phorid flies, Fungus gnats, Fleas, Subterranean termites, Drywood termites etc.), Vertebrate pests (rats, mice, California ground squirrel, pocket gophers, moles, feral pigeon, English sparrows, Starlings, Swallows, Gulls etc.) and other wild life (Wild Boars etc.).

2) **Invasive pest management in Natural Resource Management areas:** primarily includes invasive weed species (Arundo donax, Foxtail, Sow thistle, Poa annua, Russian thistle, Bull thistle, Canadian thistle, Mustard, French broom, Barbed goat grass, Purple star thistle, Milk thistle, Black mustard, Italian thistle, Yellow star thistle, Cap ivy, Medusahead, Tree of heaven, Pepperweed, Dittrichia etc.), Insects of trees (Wooly aphids, Tulip aphids, Sycamore tree scale, carpenter ants, beetles, longhorn borers, eucalyptus longhorn borer, Psyllid, Argentine ants, Tussock moth) and disease of trees (Twig and branch blight, Pitch canker, Sudden oak death, Ganoderma sp., Anthracnose, Arbtus canker, Powdery mildew, Dutch Elm disease, Wetwood or Slime flux, Armillaria root rot, Phytopthoras etc.) and abiotic factors (water excess or deficiency, mineral deficiency, frost, snow load weight, sunscald, sunburn, air pollution, lightening, soil compaction etc.) and poor cultural practices (mowing wounds, irrigation piping, construction, poor pruning, not cleaning tools, park visitors wounding plants or causing soil compaction).

The Department uses the decision framework (similar to the Department of Roads and Airports) in defining priority zones (P-1, P-2 and P-3) for integrated vegetation management (IVM) in recreational area trails.

In recreatinal areas, there is steady decline in acreage (Plot C1: 144.38 acres in 2002 to 45.28 acres in 2007) under pesticide management as department continue to increase non-chemical weed management practices such as chips, disk, flail, hand hoe, rough mow, slope mow, turf mow, weed barrier as shown in the Plot C3 below:

	Chips	Disk	Flail	Hand Hoe	Pesticide	Rough Mow	Slope Mow	Turf Mow	Weed Barrier
Historical	0.06	32.51	199.02	0.21	144.38	62.33	43.64	76.94	0
Current	4.06	33.96	220.82	8.03	45.28	88.62	47.54	77.61	0.33
Improvement	4.00	1.45	21.80	7.82	-99.10	26.29	3.90	0.67	0.33

Pesticide Free Parks: In year 2002, the department decided to manage Ed Levin park using reduced risk pest management strategies thus eliminating use of all conventional pestcides. Since then, seven additional parks are now managed using non-chemical methods. These parks are Chitactac-Adams park, Uvas Canyon park, Upper Stevens Creek park, Lexington park, Loas Gatos Creek park, Alviso park, Calero park. Acreage under chemical management is also on decline throughout the 27 Regional parks.

	Coyote Creek	Anderson	Coyote Lake	Motorcycle	Chitactac-Adams	Chesbro-Reservoir	Uvas Reservoir	Uvas Canyon	Mt. Madonna	Stevens Creek	Upper Stevens Creek	Sanborn	Vasona	Lexington	Los Gatos Creek	Alviso	Ed Levin	Penitencia Creek	Santa Teresa	Almaden Quicksilver	Calero	Coyote Hellyer	Field Sports	Grant	Coyote Creek Trail
Historical Pesticide Acreage	6.7	1.3	7.9	0.2	0.0	0.2	0.0	0.7	23.	4.6	0	4.1	15.	0.2	2.7	0.7	4.2	1.2	2.4	1.9	4.3	20	6.0	5.2	30
Current Acrage (2007)	0.3	1.3	1.3	0.2	0.0	0.2	0	0.4	13.	0.3	0	1.1	7	0	0	0	0	0.2	0.4	0.7	0	0.2	5.3	2	10

Since May 2002, no herbicide is used in lakes and ponds to control aquatic vegetation. Use of organic enzymes and aerator to control algae in Sandy Wool pond at Ed Levin has demonstrated that this technique can be used in other ponds and lakes to control algal blooms. Mechancial harvesters were also used to control algae and aquatic weeds in ponds at Hellyer and Vasona Park.

Pesticide Use Analysis: California Ground Squirrel Management around South County Animal Shelter

The California ground squirrel, Spermophilus beecheyi, is one of the most troublesome pests. Ground squirrels can harbor diseases harmful to humans, particularly when squirrel populations are dense. A major concern is bubonic plague transmitted to humans by fleas carried on the squirrels. The selection of control procedures is heavily influenced by the unique life cycle and behavior of the ground squirrel. Trapping continues to be the primary method of control by all departments. This method is effective at controlling populations if practiced regularly over period of time. As protection of shelter's animals is critical to prevent them from any disease outbreak, to achive quick population reduction, the Department of Agriculture decided to use rodenticide to manage squirrel population surrounding the shelter. The Department of Agriculture used 250 lbs of Chlorophacinon 0.005% rodenticuide in 2006, 50 lbs in 2007 and 50 lbs in 2008 and 50 Gas Cartriges (Sodium Nitrate 53%) under pesticide use exemption to control ground squirrels around Animal Shelter near South County Airport. The Department will require additional exemptions for use of rodenticide and Gas Cartriges fumigation of burrows.

Pesticide Use Analysis: Arundo donax (Invasive Weed) Control on County parcels by Santa Clara Valley Water District

The Vegetation Management department of Santa Clara Valley Water District used AquaMaster (Glyphosate) a systemic herbicide (applied after flowering as a cut-stump treatment or foliar spray to kill the root mass) under pesticide use exemption to control Arundo donax** (invasive weed) in creeks (parcel of some lands are owned by the County). Glyphosate is used in EPA-approved formulations for use in wetlands. Under the State Law, the agency reports pesticide use directly to the Agriculture Commissioner office. The agency is requested to submit data (for records) on pesticide use on County properties under this exemption.

**Arundo donax L. (Giant Reed) is a tall perennial reed, growing in fresh and moderately saline waters. it damages California's riparian ecosystems by outcompeting native species, such as willows, for water. A. donax stems and leaves contain a variety of harmful chemicals, including silica and various alkaloids, which protect it from most insect herbivores and deter wildlife from feeding on it (Bell 1997; Miles et al. 1993; Mackenzie 2004). Grazing animals such as cattle, sheep, and goats may have some effect on it, but are unlikely to be useful in keeping it under control (Dudley 2000).A. donax appears to be highly adapted to fires, which are unusual in native Californian riparian habitat. It is highly flammable throughout the year, and during the drier months of the year (July to October), it can increase the probability, intensity, and spread of wildfires through the riparian environment, changing the communities from flood-defined to fire-defined communities. After fires, A. donax rhizomes can resprout quickly, outgrowing native plants, which can result in large stands of A. donax along riparian corridors (Bell 1997; Scott 1994). A waterside plant community dominated by A.donax may also have reduced canopy shading of the in-stream habitat, which may result in increased water temperatures. This may lead to decreased oxygen concentrations and lower diversity of aquatic animals (Bell 1997).

Biological control by specialist insect herbivores from the native range of Arundo donax is a feasible option. Although a variety of noxious chemicals are in its stems and leaves, which protect it from most insect generalist herbivores and deter wildlife from feeding on it, specialized insects are adapted to feed on Arundo and cause considerable damage (Bell, 1997; Miles et al. 1993; Mackenzie 2004, Goolsby 2007). Three of these specialist herbivore insects have been imported from Mediterranean Europe and are being evaluated as biological control agents. The three insects are the Arundo wasp, Tetramesa romana; the Arundo scale, Rhizaspidiotus donacis; and the Arundo fly, Cryptonevra spp. Other organisms that have a negative effect on Arundo donax are "Armillaria mellea (root rot), Leptostroma donacis, Papularia sphaerosperma, Puccinia coronata (crown rust), and Selenophoma donacis (stem speckle)."

Mechanical Control: Minor infestations can be removed manually, as long as the entire root mass and all rhizome parts are removed. Its dense growth and thick root masses make manual or mechanical removal of above-ground mass of large clonal monocultures a slow, inefficient, and difficult process. Rhizome pieces buried under 1-3 m of soil may resprout, and the disturbance caused by physical removal to the soil and surrounding communities may be severe.

Pull or dig plants, from seedlings to 2 m tall, ideally after heavy rains loosen the soil. Cut the stems of larger plants with a chainsaw or brushcutter, and dig up the roots with a shovel, pickax, or brush ax. Alternatively, use heavy equipment, such as an excavator.

Another method is to smother the plant with tarpaulin. The stems are cut as close to the ground as possible in May, and the clump covered with a very thick tarpaulin or with several tarpaulins for an entire growing season. This prevents light from reaching the plant, reducing its ability to photosynthesize, and keeps resprouts from tearing the tarpaulin. The lack of light will eventually deplete the plants energy reserves and it will die back (Mackenzie 2004).

Pesticide Use Analysis: Urban Landscape Maintenance and Related IPM

Pesticide use in urban landscapes has been significantly reduced and can be stated as "miniscual use of reduced risk pesticides". Reduced risk pesticide in use are as follows:

- Matran and Eco Exempt (clove oil)
- Scythe (pelargpnic acid)

The following pesticide use reductions were achieved through field scouting and need based analysis on year by year basis. The County's landscape maintenance and related IPM specifications will further strengthen the IPM programs goals of pesticide use reduction and healthy landscape development through a whole system approach to the design, construction and maintenance of the landscape.

	2002	2003	2004	2005	2006	2007	2008
Clove Oil (Matran or Eco-Exempt) gls		0.79	7.94	11.05	0.33		0
Scythe (gls)						0.36	
Turflon Ester (gls)	1						
RoundUp Pro (gls)		0.05	0.38				
Prosecutor (gls)			0.09				
Pre-M (lbs)			50				

Exceptions to the above:

Landscape Contractor-1 inadvertently used Pre-M, Prosecutor and RoundUp Pro herbicide in 2004. The Department IPM Coordinator did not seek any Pesticide Use Exemption from the County IPM Manager. The Department IPM Coordinator was notified to seek pesticide use exemptions as needed. Since then (2005-2008 current), the contractor did not use any pesticide execept the use of reduced risk herbicide (Clove oil) as spot spray.

Landscape Contractor-2 used RoundUp Pro herbicide in 2005 under an old contract for one location. When it was brought to the attention of the County IPM Manager, the contract was ammended (in consultation with Procurement Department) to include IPM ordinance requirements. Since then (2005-2008 (current), the contractor did not use any pesticide

Building Contractor at Crime Lab inadvertentntly or not knowingly used Trifluralin herbicide at part fo the foundation (October 2007). When it was brought to the attention of the County IPM Manager, he notified FAF Capital Project Manager to stop the building contractor from any further use of unapproved pesticide. No further pesticide application reported.

Pesticide Use Analysis: Structural Pest Management

Pesticide use in structures has been significantly reduced and can be stated as "miniscual use of reduced risk pesticides". Regular site inspections followed by building occupant education, sanitation, housekeeping and maintenance improvements, has helped to alter many pest situations which would have otherwise resulted in pesticide applications. Work (field, research and educational) is in progress to combat key pests e.g. ants, cockroaches, flies, fleas, stinging arthropods, rodents (rat, mice) on case by case basis.

General Pest Control (other than termite control):

	2005	2006	2007	2008
Eco Exempt 1-C	0.00	28.50	126.52	0.00
Gentrol IGR	0.06	0.02	0.00	0.00
OE-50 FOAM	0.22		1.33	8.99
OE-50 CONCENTRATE			8.00	
Sterifab			0.02	
Gourmet Ant Bait			2.02	
Precor Concentrate			0.16	

	2005	2006	2007	2008
AVERT DRY BAIT	0.07	0.00	0.88	0.25
BORID	0.41	0.00	1.76	15.33
CONTRAC BLOX	38.31	43.88	51.21	8.75
DRAX LIQUID BAIT	3.39	0.03	2.04	8.31
Eco Exempt-D	4.44	5.94	0.66	0.00
Maxforce Ant Bait Stations	0.86	0.47	0.87	6.62
Maxforce Ant Bait Gel	0.79	1.08	3.73	2.00
Maxforce Roach Bait Gel	1.80	0.52	0.43	0.22
Maxforce Roach Bait Stations	0.27	0.34	1.28	1.11
Niban F-G Orthoboric Acid	17.45	48.88	64.64	23.88
Perma-Dust Boric Acid	4.54	0.08	1.67	33.66
Victor Wasp-Hornet Killer	0.42	6.75	5.75	0.00
EcoPco Acu	0.00	0.25	0.00	0.00
Advance Ant Bait			6.94	
PJ		2.25		
PT 565	0.16			
Talstar Granular	0.50			

Reduced Risk Pesticide[2] in use are as follows:

- Advance ant bait (Abamectin 0.011%)
- Avert Dry Bait (Abamectin 0.050%)
- Borid (Orthoboric acid 99%)
- Contrac Blox (Bromodialone 0.005%) – Allowed in Temper resistant bait stations on need basis. County IPM Coordinator needs to be consulted for specific use on case by case basis.
- Drax Liquid Bait (Orthoboric Acid 1.0%)
- Eco Exempt D (2Phenethyl Propionate 4.5% Clove Oil 1.75%)
- Gentrol (IGR) (Hydroprene 9%) -
- KM Pro Ant Gourmet Liquid Ant Bait (Disodium Octaborate Tetrahydrate 1%)
- Maxforce Ant Bait Stations (Fipronil 0.001%)
- Maxforce Roach Bait Stations (Hydramethylnon 2.15%)
- Niban F-G (Orthoboric acid 5.0%)
- Perma Dust (Boric Acid 35.5%)

[2] Please note that Product names (for active ingredients) may vary over time, any change in product name requires County IPM Coordinator review and approval. All other products require County IPM Coordinator review and approval through pesticide use exemption – specific use or emergency use exemption.

- Victor Wasp-Hornet Killer (Mint Oil 8.0%)
- EcoPCO Acu (2-phenethly propionate 0.10%)
- EcoExempt Jet – Wasp & Hornet (2-phenethly propionate 2%, Rosemary Oil 3%)
- EcoEXEMPT KO (2-phenethly propionate 5%, Eugenol Oil 0.5%)
- EcoEXEMPT D (2-phenethly propionate 4.5%, Eugenol Oil 1.75%)
- EcoEXEMPT IC – (Rosemary Oil 10%, Peppermint Oil 2.0%)
- EcoEXEMPT G – (Eugenol 2.90% Thyme Oil 0.6%)

Execptions to the above:

Structural IPM Conctrator technician used Sterifab used as sanitizer to clean bird site (exterior ledge) at Court house window.

Structural IPM Contractor technician inadvertently used Talstar granular (0.5 lbs) in 2005; technician was educated about this by Structural IPM Contractor's management; Use discontinued. Structural IPM Contractor (servicing the County accounts) ceased using this chemical completely in the latter part of the 2005.

Termite Control:

Termites are small, white, tan, or black insects. Because of their wood-eating habits, termites sometimes do great damage to buildings and other wooden structures. Their habit of remaining concealed often results in their presence being undetected until the timbers are severely damaged and exhibit surface changes. Once termites have entered a building, they do not limit themselves to wood; they also damage paper, cloth, carpets, and other cellulosic materials. Often, other soft materials are damaged and may be used for construction. Particles taken from soft plastics, plaster, rubber, and sealants such as silicon rubber and acrylics are often employed in construction.

In California drywood, dampwood, and subterranean species cause serious damage to wooden structures and posts and may also attack stored food, books, and household furniture. Drywood termites infest dry, undecayed wood, including structural lumber as well as dead limbs of native trees and shade and orchard trees, utility poles, posts, and lumber in storage.

From these areas, winged reproductives seasonally migrate to nearby buildings and other structures usually on sunny days during fall months. Subterranean termites require moist environments. To satisfy this need, they usually nest in or near the soil and maintain some connection with the soil through tunnels in wood or through shelter tubes they construct. These shelter tubes are made of soil with bits of wood or even plasterboard (drywall). Much of the damage they cause occurs in foundation and structural support wood.

Successful termite management requires many special skills, including a working knowledge of building construction and an understanding of termite biology and identification. Management techniques vary depending on the species causing an infestation. Multiple colonies of the same species of termite or more than one species of termite can infest a building. Any of these variables will influence control approach. Subterranean, and less frequently, dampwood termites can have nests at or near ground level, so control methods for these can be similar. However, drywood termites nest above ground, therefore the approach for eliminating them is unique.

The successful managemnt of termites requires the use of various approaches, both chemical and non-chemical. In most cases, these measures are most effective when used preventatively. However, in case of established structures, preventive measures[3] are very hard to achieve.

---

[3] Preventive Measures such as physical barriers are particularly appropriate during the preconstruction phase to provide protection of the structure from subterranean termites. One such physical barrier is stainless-steel wire mesh (TermiMesh) that is fitted around pipes, posts, or foundations. The newest physical barrier, Impasse Termite System, contains a liquid termiticide (lambda-cyhalothrin) locked in between two layers of heavy plastic that is installed before the concrete slab is poured. It is supplemented with Impasse Termite Blocker, which uses special fittings around plumbing and electrical pipes and conduits.

Another preventive approach is treating construction lumber with Borates (disodium octaborate tetrahydrate [Tim-bor, Bora-Care, Jecta, Impel) to protect wood against termites and wood-decay fungi. However, even treated wood, over time, can be subject to termite attack. Termites can build mud tubes over treated surfaces. Furthermore, they can gain entry through cut and cracked ends or areas where the chemical has not sufficiently penetrated.

Even in new structures, when the best precautionary steps are taken, termites are often able to find a way to bypass many preventive measures. Because termites live and feed within hidden areas, once they have invaded a strucuture they are not always easy to detect and by the time it is noted, it warrants chemical intervention to achieve control.

For many years, the standard treatment for control of drywood termites has been fumigation with Vikane (Active Ingredient - Sulfuryl fluoride) and for control of subterranean termites is soil and barrier treatment (e.g. Premise: Active Ingredient - Imidacloprid) using conventional insecticides.

Application of reduced risk pesticides (e.g. borates, termite baits) and heat treatment have been considered in few cases. Termite baiting is a very complex subject. Baits have become an important tool for controlling subterranean termites, which are the most common type of termites found in the United States. Baits for subterranean termites are commercially available in California. While this method of controlling termites is very appealing because it does not require extensive site preparation such as drilling or trenching and extensive application of insecticide to the soil or structure, research is still ongoing to develop the most effective baits and delivery systems. Typically, in-ground stations are inserted in the soil next to the structure and in the vicinity of known or suspected sites of termite activity. In-ground stations often initially contain untreated wood that serves as a monitoring device. The monitoring wood is replaced with the toxicant once termites have been detected feeding on it. In addition, aboveground stations may be installed inside or on the structure in the vicinity of damaged wood and shelter tubes. Above ground stations initially contain bait. Baits work much more slowly than soil termiticides, and require a lengthy baiting process. Several months or more may elapse before the termites locate stations, then termites must feed on sufficient amounts of the toxicant.

Because subterranean termites in California vary in their foraging and in the times that they will take baits, the placement of bait stations and the time of installation is a crucial component in a successful baiting program. Once a termite infestation is controlled, it is essential that the bait stations continue to be monitored monthly.

There is no established countywide structural termite monitoring system is place. Therefore, termite Control (Subterranean and Drywood) at present is need based. Application of these alternative technologies are limited in approach and can only be used on case-by-case basis within the larger framework of warranted conventional pesticide applications as currently available in the market place. The County IPM Coordinator is a member of Entomological Society of America and actively seeks guidance from the scientific community (those who are actively engaged in termite control and management), reviews the research, reports, databases, summarized findings of the literature, citations as made available through various agencies and institutions.

Since 2002, thirteen (13) termite control treatments were carried out, eleven (11) using conventional pesticide application approach, one (1) of each trial using borate in a historic barn and other using heat treatment in Ranger's office at Ed Levin park (Plot D1). Tranistion from conventional approach to adopting reduced risk alternatives will require support from institutional/market research and availble options offered by the market in the future.

	2003		2005					2006						2007	
Vikane (lb)	165	18					30.9					285		18	
Premise (GL)				0.02		0.66		0.12	0.32	0.1	0.08			0.11	
Termicon Monitors (#)						52									
Termidor (GL)				0.07											

Exception to the above:

Structural IPM Contractor's Termite Division technician used Termidor (0.07 gls) in 2004; The Department IPM Coordinator and Branch manager were notified to discontinue any further use. All termite control inspections and pesticide use now require consultation/review with the County IPM Manager.

County of Santa Clara Household Hazardous Waste Program

MISSION STATEMENT
To protect the environment and public health from the effects of improper disposal of hazardous waste from Santa Clara County homes and small businesses. This service provides the community with practical pollution prevention options for the use, recycling, and disposal of products containing hazardous substances.

The Online Appointment System is for residential household hazardous waste only. For more information on business waste drop-off please call (408) 299-7300

PROGRAM HISTORY

Since 1991, the Santa Clara Countywide HHW Program has provided residents with a safe, convenient disposal service with year-round access. The County and 14 cities participate in the countywide program and share costs based on the number of households served from each jurisdiction. Participating jurisdictions include: Campbell, Cupertino, Gilroy, Los Altos, Los Altos Hills, Los Gatos, Milpitas, Morgan Hill, Monte Sereno, Mountain View, San Jose, Santa Clara, Saratoga and Sunnyvale. The City of Palo Alto (650) 496-6980 operates a separate HHW Program for their residents only.

The Santa Clara Countywide HHW Program provides the general public and small businesses with a safe, immediate solution to HHW recycling and disposal. Residents are encouraged to use safer and less toxic alternatives and purchase smaller quantities of hazardous products. On-going public education continues to increase public awareness and participation.

Improper storage and disposal of household hazardous waste (HHW) is associated with accidental poisonings, worker health and safety, equipment damage, and environmental contamination of surface and groundwater. Heavy metals such as lead, zinc, copper, nickel, mercury and cadmium enter the waste stream via residential sewage and urban run-off.

State and local regulations prohibit the disposal of HHW at solid waste landfills. Before collection programs were available, options for managing HHW were limited to disposal in the trash, pouring down the drain, or storing the waste indefinitely. Products stored for more than a year, are seldom used and the risk of accidental poisoning of children and pets significantly outweighs any potential benefit of saving the product for future use.

For additional information please call the HHW program at (408)299-7300.. We can be contacted at hhwstaff@deh.sccgov.org or by fax at (408) 280-6479.

INFORMATION ON RECYCLERS OUTSIDE OF SANTA CLARA COUNTY IS NOT FREQUENTLY UPDATED

MEMO

FROM: Dave Jones
Senior E. H. & S. Compliance Specialist
Occupational Safety and Environmental Compliance (OSEC)

TO: Clara Spaulding, Coordinator,
Clean Water Program

DATE: 8/5/2008

SUBJECT: Universal Waste Recycling

Listed below are the Universal Waste recycling totals from County facilities for the past fiscal year (July 1, 2007 to June 30, 2008) :

Fluorescent Bulbs	**17,751** individual bulbs or **41,052** linear feet of lamps.
Lighting Ballasts	**1829** Pounds. All were non-PBC.
Batteries	**8381** Pounds

The Universal Waste Program at Facilities and Fleet (FAF) is accomplished by having all Universal Waste lamps and ballasts returned from facilities maintained by FAF to the Berger Drive complex. All lamps and ballasts are taken to AERC in Hayward for recycle.

Batteries collected from all County Buildings excluding those in Parks and Recreation, Roads and Airports and Health and Hospitals are picked up from 20 consolidation locations Countywide and brought to the Berger Complex for sorting and recycling in the following methods. All NiCad batteries are boxed and shipped for no cost to RBRC recycling. All lead acid batteries are inventoried and either taken to Bobcat Battery Recycling, or returned to the selling vendor. All non-NiCad non-lead acid batteries are sorted and brought to Household Hazardous Waste events and paid for by Occupational Safety and Environmental Compliance Department. (OSEC)

All Universal Waste activities are accomplished as ancillary duties by the OSEC Environmental Compliance Specialist stationed at FAF.

DATE: 7/31/2008

SUBJECT: Universal Waste Recycling

Attached please find the data sheet for the fiscal year 2008 with totals for Roads and Airport's (RDA) Universal and E-waste recycling.

The Universal Waste Program at RDA is accomplished by having all Universal Waste lamps and ballasts returned from road-side dumping and facilities maintained by RDA to the Schallenberger Rd. (East Yard) complex. All lamps and ballasts are taken to AERC in Hayward for recycle except when a grant from Household Hazardous Waste (HHW) is available they are taken to a Generator event.

Batteries collected from all RDA Buildings are picked up from three airports and three service yards and brought to the Schallenberger Yard for sorting and recycling in the following methods. All NiCad batteries are boxed and shipped for no cost to RBRC recycling. All lead acid batteries are inventoried and either taken to Bobcat Battery Recycling, or returned to the selling vendor. All non-NiCad non-lead acid batteries are sorted and brought to Household Hazardous Waste events. All monitors and other CRT's as well as all E-waste scrap is consolidated at Schallenberger and either picked up by Earth Care Recycling, or delivered to Western Recycling in Morgan Hill. All recyclers are certified with the State.

All Universal Waste activities are accomplished as regular duties by the RDA Environmental Compliance staff.

MEMORANDUM

DATE: June 30, 2008

TO: Clara Spaulding
Clean Water Program

FROM: Trinh Pham, Environmental Health and Safety Compliance Specialist
SCVHHS Environmental Health and Safety Services

SUBJECT: Universal Waste Recycling

Please find the following list of Universal Waste recycling totals from Santa Clara Valley Health and Hospital System (SCVHHS) facilities for the last fiscal year (July 1, 2007 to June 30, 2008):

Fluorescent Bulbs	7,009 individual bulbs/lamps.
Batteries	4,326 Pounds

The Universal Waste Program at SCVHHS is accomplished by having all Universal Waste lamps returned from Facilities and Environmental Services (Housekeeping) Departments, to be maintained at Santa Clara Valley Medical Center (SCVMC) at 751 South Bascom Ave. in San Jose. The lamp waste is picked up at SCVMC by AERC in Hayward for recycling.

Batteries collected from SCVHHS buildings are stored in a centralized location at SCVMC and picked up from AERC for recycling.

Universal Waste activities are accomplished by SCVHHS Environmental Health and Safety Services Department in conjunction with SCVMC Environmental Services, and other HHS departments.

Please contact me at 885-4160 if you have any questions.

Santa ra Valley Urban Runoff Pollution Prevention Program
FY 08 ANNUAL REPORT: COPPER/NICKEL ACTION PLAN

COUNTY OF SANTA CLARA

Id.	Activity	CI Item Source	FY 08 Tasks	Comments	Status	Responsible Party
Copper Action Plan Tasks						
CB-1	Vehicle Washing Operations	CAP	• Continue to distribute outreach materials on proper vehicle/equipment washing at building department counters and public events.		Ongoing	CWP Coord.
			• Submit data regarding vehicle washing outreach activities as requested.		Ongoing	CWP Coord., R&A
			• Require source control measures for Group 1 & 2 new development and redevelopment projects that will conduct vehicle/equipment washing and maintenance activities (consistent with Permit Provision C.3.k).		Ongoing	PLN & DEV.
			• Continue to inspect industrial/ commercial facilities that conduct vehicle/equipment washing activities on-site (this includes auto-related businesses). Ensure that BMPs for vehicle/equipment washing are implemented. Provide an effectiveness evaluation of inspection/compliance with BMPs (consistent with enhanced reporting requirements).		Ongoing	DEH
			• Continue to maintain and inspect car wash systems for County vehicles at the corporation yards.		Ongoing	Roads & Airports
			• Encourage municipal staff to use certified mobile cleaners when			CWP Coord.

COUNTY OF SANTA CLARA

Id.	Activity	CI Item Source	FY 08 Tasks	Comments	Status	Responsible Party
			contracting cleaning services. • Refer mobile surface cleaners who desire BASMAA surface cleaning certification and recertification to the BASMAA website (www.basmaa.org).		Ongoing Ongoing	CWP Coord.
CB-3	Industrial Copper Control	CAP	• Continue Industrial Inspection program, including NOI sites and other identified industrial facilities. These may include plating and metal finishing facilities, vehicle service facilities and other permitted sites (consistent with enhanced reporting requirements).		Ongoing	DEH
CB-6/7	Reducing Traffic Congestion/ Promoting Alternative Transportation	CAP	• Collaborate with the agencies and organizations (e.g., VTA) that are better poised to take the lead on transportation-related tasks.	CB-6&7 issues appear to have been adequately addressed for SCVURPPP CAP purposes. This issue is now in the hands of municipal transportation planners and congestion management and transportation agencies (i.e., VTA) and is not a high priority. The unincorporated area is primarily low density suburban and rural with minimal public transit available.		VTA--not County jurisdiction
CB-8	Watershed assessment and protection	CAP	• Continue to implement guidance from SCVURPPP on addressing water quality in the CEQA review process, as part of C.3.m. implementation. • Participate in the Water Resources Protection Collaborative and		Ongoing Ongoing	PLN & DEV, Roads, Parks, FAF PLN

COUNTY OF SANTA CLARA

Id.	Activity	CI Item Source	FY 08 Tasks	Comments	Status	Responsible Party
			implement any agreed upon guidelines and standards for watershed protection.			
CB-11	Street sweeping and storm drain O&M		• Continue following Program guidance regarding the collection and reporting of street sweeping data. Provide data for Annual Report. • Implement (as appropriate) identified improvements to current street sweeping and storm drain system O&M programs (within available budgets). Provide effectiveness evaluation in FY 08 Annual Report.		Ongoing As scheduled	Roads Roads
CB-12	Outreach on pool, spa maintenance	CAP	• Continue to distribute outreach materials at local public events; brochures at building department counters and public places.	Rotating distribution	Ongoing	CWP Coord.
CB-21	Use of architectural copper	CAP	• Continue to discourage use of copper on roofs, in roof shingles, and for gutters.	Low priority: Very few copper roofs and gutters have been proposed.	Ongoing	PLN & DEV CWP Coord.
Nickel Action Plan Tasks						
NB-1	Measures to control nickel discharges from construction sites		• Continue to implement Construction Inspection Performance Standards (see Construction Inspection work plan section). • Continue to have inspectors attend Regional Board/Program workshops on construction site		Ongoing As scheduled	PLN & DEV CWP Coord.

COUNTY OF SANTA CLARA

Id.	Activity	CI Item Source	FY 08 Tasks	Comments	Status	Responsible Party
			management and learn latest erosion/sediment control techniques • Continue to attend Program-sponsored or other workshops on post-development stormwater BMPs (C.3.)		As Scheduled	CWP, PLN & DEV, Roads, Parks, FAF

Reining in the Rain:

Watershed-Friendly "Low Impact Development" Site Design & Permeable Pavements for Stormwater Management

Monterey Bay Area Workshop

Veterans Memorial Building, Santa Cruz

Friday, April 25, 2008

9:00 am – 4:00 pm

Sponsored by the California Coastal Commission; Center for Water & Land Use at UC Davis Extension; USC Sea Grant; and Resource Conservation District of Santa Cruz County; in association with the City of Santa Cruz.

AGENDA

8:00 - 9:00 am — ***Check-in (coffee and pastries provided)*** **- Main Ballroom**

9:00 - 9:10 — **Welcome**
- Ezra Neale, Resource Conservation District of Santa Cruz County

9:10 - 9:30 — **Resource-Based Land Use Planning**
The big picture: Linking land use to water quality, and how LID can help improve the health of our watersheds.
- Alfred Wanger, California Coastal Commission

9:30 - 10:00 — **Low Impact Development – the How's and the Why's**
Implementation of soil-based LID systems in stormwater management, and effect on flooding, in-stream erosion, maintaining the water balance, and pollutant removal.
- Timothy Lawrence, Center for Water and Land Use, UC Davis Extension

10:00 - 10:45 — **LID Design Issues: hydrology, soils, sizing, modeling, with Q&A**
Major design issues associated with LID implementation, with real-world examples.
- Eric Berntsen, State Water Board, Storm Water Section

10:45 - 11:00 — ***Break (15 min)***

11:00 - 11:30 — **Stormwater Management and LID in Santa Cruz County**
County of Santa Cruz's policies and requirements for land development as they relate to LID/BMPs.
- Rachel Fatoohi, Santa Cruz County

11:30 - 12:00 — **Incorporation of LID into State Water Board Programs**
How LID is being incorporated into state resolutions, policies, and state and regional stormwater permits.
- Eric Berntsen, State Water Board, Storm Water Section

12:00 - 12:45 — ***Lunch (provided)***

Two Afternoon Tracks

Track A – Permeable Pavements (Studio B – upstairs):

Technical information on permeable pavement design, installation, applications, performance, pollutant removal, and maintenance.

12:45 - 1:30 **How to Use Permeable Pavements in All Soil Types**
The fundamentals of using permeable pavements to implement LID cost-effectively, with details on performing hydrological design for any type of soil situation – even clay soils.
- Andy Youngs, California Nevada Cement Association

1:30 - 2:15 **Pervious Concrete**
- Andy Youngs, California Nevada Cement Association

2:15 - 2:30 ***Break (15 min)***

2:30 - 3:15 **Permeable Interlocking Concrete Pavements**
- Andy Youngs, California Nevada Cement Association (presenting for David R. Smith, Interlocking Concrete Pavement Institute)

3:15 - 4:00 **Permeable Asphalt**
- Tom Carter, Teichert Aggregates

4:00 **Wrap-Up and Evaluations**

Track B – Implementing LID Locally (Main Ballroom):

A first-hand look at Low Impact Development solutions for stormwater management in the Monterey Bay Ar including project examples, design criteria, permitting, successes and failures, and lessons learned.

12:45 - 1:30 **LID and Stormwater in Watsonville**
Hindsight is 20/20: An honest review of bioretention, detention and other BMPs installed throughout Watsonville.
- Robert Ketley, City of Watsonville

1:30 - 2:15 **Rain Water Catchment and Efficient Irrigation**
- Bobby Markowitz, EarthCraft Design

2:15 - 2:30 ***Break (15 min)***

2:30 - 3:15 **Rain Gardens and Bioretention**
- Sarah Peterson and Joni Janecki, Joni L. Janecki & Associates, Inc.

3:15 - 4:00 **Selection, Design and Maintenance of BMPs for LID**
Selection of the BMP most appropriate to the site, design process, meeting county design standards, implementation, and maintenance of the selected BMP.
- Robyn Cooper, Fall Creek Engineering Inc.

4:00 **Wrap-Up and Evaluations**

Funding for this project has been provided in part by the U.S. Environmental Protection Agency (USEPA) pursuant to Assistance Agreement No. C9-98998901 and any amendments thereto which have been awarded to the State Water Board for the implementation of California's NPS Pollution Control Program. The contents of this document do not necessarily reflect the views and policies of t USEPA or the State Water Board, nor does mention of trade names or commercial products constitute endorsement or recommendation for use.

Hand-outs and presentations will be available at http://www.coastal.ca.gov/nps/lid_workshops.html.

ANNUAL C.3. WORKSHOP:

"SHARING EXPERIENCE WITH IMPLEMENTATION OF STORMWATER REQUIREMENTS AT DEVELOPMENT PROJECTS"

Tuesday, June 3, 2008
Sunnyvale Community Center Ballroom
550 E Remington Drive, Sunnyvale

WORKSHOP AGENDA

8:30	Registration and Refreshments	
9:00	Welcome and Introduction • Announcement of 2008 SCVURPPP Site Design Award Winners	Jill Bicknell *Santa Clara Valley Urban Runoff Pollution Prevention Program*
9:20	Standards for Green Building – How Do They Relate to C.3. Compliance?	Laura Prickett *Santa Clara Valley Urban Runoff Pollution Prevention Program*
9:50	Low Impact Development – Latest Trends and Approaches	Jill Bicknell *Santa Clara Valley Urban Runoff Pollution Prevention Program*
10:15	Break	
10:30	Panel Discussion –Implementation of C.3. in Local Projects	
	• Modern Ice - A Case Study in Urban Stormwater Management	Mike Campbell *HMH Engineers*
	• Stormwater Management for Synthetic Turf Fields, San Jose	Mark Slichter *Callander Associates*

(Continued on Back)

	• Innovative Detention and Conveyance at Happy Hollow Park and Zoo, San Jose	George Otte *Nolte Engineers*
	• The Green Roof on Stanford Parking Structure 6, Stanford, CA	Karla Tompkins *Stanford*
	• Bioretention Areas and Swales at VMware Headquarters, Palo Alto	Ed Boscacci *BKF Engineers*
11:40	What's New in Stormwater Regulations?	
	• Municipal Regional Permit	Sue Ma *Regional Water Quality Control Board*
	• Construction General Permit	Jill Bicknell *SCVURPPP*
12:00	**Lunch and Vendor Exhibits**	
12:45	Inspection of Stormwater Treatment Measures During and After Construction	Ed Boscacci *BKF Engineers*
1:30	Inspection and Maintenance of Landscaping in Stormwater Treatment Measures	Sarah Sutton *Design, Community and Environment*
2:00	Break and Vendor Exhibits	
2:15	Inspections of Stormwater Treatment Measures – Local Experiences	
	• City of Mountain View's Stormwater Treatment BMP Inspection and Maintenance Tracking Program	Eric Anderson *City of Mountain View*
	• Inspecting the Installation of Permanent Stormwater Treatment Measures, City of Fremont	Tim Berger *City of Fremont*
3:00	Adjourn

Dear Mr. Freitas,

The City of Palo Alto Regional Water Quality Control Plant hereby submits the 2007-2008 Annual Storm Water Review for Stanford University. The water oversight plan for Stanford University has been managed by the City of Palo Alto since February 13, 1996. The City of Palo Alto continues to monitor the areas of Stanford campus which are identified in the water oversight plan letter (Attachment 1) including the areas covered under the Industrial Waste program.

Stanford has been cooperative and responsive to all water related issues. The RWQCP and Stanford continue to meet every two months to discuss water issues.

Enclosed you will find a table of all inspections including dates, areas visited, findings, and the actions taken by Stanford (Attachment 2). The annual report covers the time period from July 2007 to June 2008. Please refer to attachment 1 which identifies the areas of the Stanford University campus specified for oversight.

No significant issues were observed during the 2007-2008 period.

If you would like to discuss this report further please call me at (650)329-2285 or Nina McNitzky at (650) 329-2518.

Sincerely,

Phil Bobel, Manager
Environmental Compliance Division

Attachment 1

Storm Water Pollution Prevention Inspection Plan
Stanford University, Stanford, California

Stanford University
Storm Water Pollution Prevention Inspection Plan

1. General Program Description

    a. Applicable Stanford University Storm Water Pollution Prevention Program (SWPPP) elements and relevant SWPPP BMPs will be reviewed annually. The focus of the review will shift from one year to the next as different problem areas are addressed.

    b. A separate binder will be maintained by the RWQCP in addition to the current industrial water permit binder. The binder will contain all storm water related information and correspondence.

    c. Bi-Monthly meetings will be held with Stanford to discuss inspection results and progress on any corrective actions needed. Action oriented minutes or agendas will be kept in the binder mentioned in (a) above.

    d. A running list of areas inspected, dates, problems identified, and status of resolution will be kept and submitted to the County on an annual basis just ahead of the County's Annual Report required by the Regional Water Quality Control Board.

    e. For Stanford lands within the City Limits of Palo Alto, appropriate enforcement action will be taken by the City of Palo Alto. For lands in the unincorporated areas (most of the campus), the City will advise Stanford of any problems both verbally and in writing. The County will be notified of all inspections and resolutions status via the annual report outlined in (d) above.

2. List of Key Facilities (to be inspected at least annually)

    a. Industrial Areas or Research Facilities (with loading docks and /or chemical deliveries) inspected as part of the semi-annual industrial waste inspections.
        i. Chemistry Buildings (e.g., Mudd)
        ii. Biology Buildings (e.g., Gilbert)
        iii. Engineering Buildings (e.g., CIS/X)
        iv. School of Medicine
        v. Central Energy Facility
        vi. Environmental Health and Safety

    b. Vehicle Service Facilities
        i. Fleet Services Garage
        ii. Golf Course Maintenance Facility

    c. Peninsula Sanitary Service Inc. (Household Recycling Facility)

d. Food Service Facilities (Inspected by County Program)

e. Equestrian Facilities (Red Barn)

f. Stanford University Maintenance Facilities
   i. Bonair Siding
   ii. Athletics
   iii. Housing and Dining
   iv. Water Department (Stock Farm Road)

3. Construction Sites

   a. Construction sites greater than one acre will be inspected by October 15 of each year and additionally on an as needed basis throughout the rainy season (October 1 – April 1).

   b. Construction site auxiliary yards will be inspected annually, including lay down yards used for equipment and material storage and temporary vehicle parking yards.

4. General Campus Grounds

   a. The campus will be divided into thirds (please see attached map).

   b. One third will be toured each year prior to the rainy season. This will include a visual inspection of catch basins, building perimeters, loading docks, storage areas, and other areas of storm water pollution potential.

Oakland, CA 94612

Subject: Santa Clara Valley Water District Urban Runoff Management Program
FY 2007--2008 Annual Report of Pollution Prevention Activities

Dear Mr. Wolfe:

This report is submitted by the Santa Clara Valley Water District, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's reissued municipal stormwater NPDES Permit (Order No. 01-024). The report summarizes activities performed during FY 2007-2008 (July 1, 2007 to June 30, 2008) in accordance with the Santa Clara Valley Water District's Urban Runoff Management Plan (URMP) submitted to the Regional Board on September 1, 1997, updated in October 2000, and again on September 1, 2004 and the performance standards contained therein.

Program Highlights and Accomplishments–Permit Required Activities

- The Emergency Response (ER) Program's performance was evaluated by four mechanisms during FY07-08. The results of these evaluations were as follows: (1) the Clean, Safe Creeks key performance indicator was met; (2) received a "Superior" rating (the highest rating possible) on the CEO scorecard; (3) the ER Program passed the quality and environmental recertification audit according to ISO 9000 and 14000 standards; and (4) ER Program achieved excellent awareness and use by District field staff.
- The District's School Outreach Program visited 122 public and private schools, reaching 17,967 students and 770 educators and conducted 6 teacher workshops during FY 07-08.
- Removed 8,311 cubic yards of trash and debris from local creeks through the various District trash removal programs.
- Responded to 115 incidents reported to the District's 24 hour per day, 7 day per week pollution hotline.
- District continues to collaborate with the City of San Jose to identify in-stream and regional solutions for smaller land development sites as an alternative means to comply with C3 provisions.

Enhancements-Non Permit Required Activities

- Implemented and expanded pilot treatment systems to improve water quality and reduce methyl mercury in one lake and two reservoirs (Almaden and Guadalupe) in the Guadalupe River Watershed.

- The District participated in two creek cleanup events: Coastal Cleanup Day on September 15, 2007 and the National River Cleanup Day on May 17, 2008. During Coastal Cleanup Day, 865 volunteers collected 31,694 pounds of trash and 12,052 pounds of recyclables at 24 sites. On National River Cleanup Day, 669 volunteers collected 17,500 pounds of trash and 11,518 pounds of recyclables at 27 sites.

Annual Report

The attached Annual Report provides an accurate representation of the implementation efforts of the District's Urban Runoff Management Plan and FY 07-08 work plan during the past fiscal year; an evaluation of the program results for continuous improvement activities; and information that can be shared with other Co-permittees, municipal decision-makers, and the public.

The table of contents of this report provides the outline of the Annual Report.

We appreciate the opportunity to provide you with this information on the work we have accomplished and we look forward to your comments. If you have any questions regarding the materials submitted or need additional information, please feel free to contact us.

Sincerely,

Shree Dharasker
Senior Project Manager
Environmental Management Unit

INTRODUCTION

This is the Santa Clara Valley Water District (District) Urban Runoff Program's Fiscal Year (FY) 07-08 Annual Report (Annual Report). This Annual Report is prepared to comply with section *C.6* of Regional Board Order 01-024 and section *n* of Regional Board Order 01-119[1]. In their entirety these two Regional Board Orders comprise the Municipal Stormwater Permit (Permit). This Annual Report is to demonstrate and describe District compliance with the Permit.

The 2007-2008 Annual Report describes the actions taken to comply with the requirements of the Municipal Stormwater Permit. The Annual Report is formatted per instructions and template received from Regional Board staff.

Annual Report (AR)

The Regional Board has established a cycle of regulatory submittals that includes the District's annual Urban Runoff Work Plan (Work Plan) that is to be submitted by March 1 of each year. The Work Plan describes planned urban runoff activities for the upcoming fiscal year. The Annual Report provides a description of completed Work Plan elements and must be submitted by September 15 each year.

The Santa Clara Valley Water District's (District) Urban Runoff Program (DURP) completed several vital tasks during the 2007-2008 fiscal year (FY 07-08). The Environmental Management Unit this year focused on four main objectives; 1) Updating the Work Plan 2008-2009 format to be compatible with the MRP format 2) Sampling of Lake Almaden, Coyote, Calero, Chesbro, Uvas, Guadalupe, Stevens Creek, Lexington, and Almaden Reservoirs for ammonia, sulfate, nitrate, phosphorous, mercury, and methyl mercury; the continued study of mercury and methyl mercury processes in the Guadalupe watershed; 3) Continue to participate in numerous outreach activities 4) Development of a District Trash Work Group to coordinate various District trash removal and source abatement activities.

The DURP includes both an area-wide component and an agency specific component. The area wide component is achieved through participation in the Santa Clara Valley Urban Runoff Pollution Prevention Program (Program) which is a collaborative effort by 15 agencies, including the District. The agency specific component of the Urban Runoff Program targets District activities and facilities that are potential sources, or potential receptors, of non-point source pollution. These activities include construction of capital improvements for flood control and water supply, channel maintenance, facility maintenance, and water utility operation and maintenance. Other sources of stormwater pollution, which are not associated with District activities, include illicit connections to storm drains, and illegal or accidental dumping or discharges on District facilities and waterways.

Santa Clara Valley Water District Organization

The mission of the District is a healthy, safe and enhanced quality of living in Santa Clara County through watershed stewardship and comprehensive management of water resources in a practical, cost-effective and environmentally sensitive manner.

Readers are encouraged to read the FY03-04 AR for further information about the District.

Structure of Report

The Annual Report follows the format and instructions received from the Regional Board. The report includes three sections that describe 1) Program Highlights and Accomplishments 2) a

---

[1] Regional Board Order 01-119 revises section *C.3* (regarding runoff from new and redevelopment projects) of Regional Board Order 01-024.

Summary of Continuous Improvement Activities and 3) a series of attachments. Each attachment is consistent with the Work Plan submitted in March 2007.

PROGRAM HIGHLIGHTS AND ACCOMPLISHMENTS

The District's Urban Runoff Pollution Prevention Program (Program) completed numerous tasks during the 2007-2008 Fiscal Year. The details of these accomplishments are included in the attachments to this Annual Report. Some of the Program highlights are summarized below. The full description of the activity can be found by referencing the section number with the attachment.

1.1 Illicit Connection/Illegal Dumping (IC/ID) Elimination Activities (Attachment 1.1)

Emergency Response

The District addresses IC/ID incidents effectively through its watersheds' hazmat "Emergency Response" (ER) Program. This aggressive 24-7 program responds reactively to IC/ID incidents by providing referral and inter-agency cooperation and/or conducting field investigation and clean-up activities as appropriate. The ER Program may be contacted via the Pollution Hotline (1-888-510-5151) which is advertised on the District's internal and external websites as well as in occasional fliers and memos. The Hotline is also advertised on the Santa Clara Valley Pollution Prevention Program's website. The ER Team routinely responds to over 100 reported incidents per year as reported by District field workers, staff from other agencies, and members of the general public.

The District received and responded to a total of 115 emergency response reports throughout Santa Clara County during fiscal year 2007-2008. This total is up 7.5% from 107 reported in FY06-07. Of the 115 total incidents reported during the last fiscal year, 106 were within the jurisdiction of the San Francisco Bay Regional Board and the associated Santa Clara Municipal Stormwater Permit. 65 of the 106 required a field response by the one of the team members for source identification, clean up or evidence collection. The 115 total incidents were distributed among the District's 5 major watersheds as follows: Coyote (35), Guadalupe (34), West Valley (25), Uvas/Llagas (9), and Lower Peninsula (7), with 5 other incidents occurring on non-watershed facilities. The data from the emergency response reports indicates that the Guadalupe River was once again the waterway with the greatest number of incidents with a total of 18 reports. Coyote Creek also a relatively high number (10) of incidents reported. Sunnyvale East Channel, with 6, was the only other waterway that posted more than 5 incidents. Fuel/Oil related incidents was again among the predominant contaminants encountered, registering 26 individual incidents. Trash (15) and sewage (13) joined "chemical" (12) incidents as other common pollutants encountered.

The majority of reports (52) this year again occurred within the limits of the City of San Jose. 11 incidents occurred in unincorporated areas (9 of those within SFB-RWQCB jurisdiction, 2 within CC-RWQCB jurisdiction). No other city had more than 9. The District records every response it receives. It is important for the District to be able to accurately track the number of reports. If the incident is outside of District jurisdiction (limited to its own lands and facilities – that being properties "owned, controlled, operated, or maintained by the District") the District may forward the report information to the appropriate public agency yet still logs the report for our records -

so it is important for the Regional Board to be aware that the total number of reports from all co-permittees as reported by the Program Manager may be artificially elevated due to double reporting of such cases (District + municipal). The District responded within the two hour target field response time, 98% of the time in 2007-2008 for all in-County incidents.

Water Resource Protection Ordinance Enforcement

As previously reported there were no compliance orders, administrative penalties, administrative costs, civil actions, or misdemeanor prosecutions brought against Ordinance 06-01 violators during FY 07-08. Additionally, District emergency responders continue to work cooperatively to assist investigations by law enforcement agents at the Department of Fish and Game and the District Attorney's Office, as well as municipal and Regional Board code enforcement staff.

1.2 Trash Program Evaluation (Attachment 1.2)

It continues to be very challenging for the District to identify individual responsible parties for many of the illegal dumping activities that occur in the creeks of the county. Since the District has no police powers and no land use authority our ability to penalize polluters and protect the environment proactively rather than retroactively is virtually non-existent outside of our extensive public and educational outreach activities. Homeless encampments are one of the primary sources of trash being directly deposited to the riparian corridor. With these limitations in mind the District dispatches maintenance crews to provide frequent and routine creek cleanup for trash, and debris, in District waterways. Some of this material is deposited in creek channels and constitutes illegal dumping but is not reported to District hazmat or code enforcement staff due to the inability to establish an individual source or responsible party. In the spring of 2006 the District formed an internal focus group made up of water quality and field maintenance staff and various managers to better strategize how to identify root causes and sources of trash and how to reduce the load of trash to the creeks. This group has since evolved into the District Trash Work Group which includes a broader scope of District employees from watershed managers to field maintenance staff planners, and intermediate managers. This group was formed to coordinate the District's internal and external trash related activities such as work with SCVURPPP, the San José/District Trash MOU, and non-governmental organizations. The group meets several times a year to discuss potential options and structure devices to capture trash and also protect the various natural resources in our creeks. This group is also an outcome of the District's ISO process.

District maintains three trash cleanup programs which are:

1) The Clean Safe Creek Outcome 1.4 (aka the Good Neighbor Program) which states "Neighborhood creeks will be frequently inspected and cleaned of litter and graffiti;"
2) The Adopt-A-Creek program which allows individuals, service organizations or companies to adopt a section of creek and have their name posted along that section of creek;
3) Unscheduled litter and debris removal associated with internal and external maintenance requests generated from the District's Internet website.

The District's previously described three programs collected and disposed of approximately 8,311 cubic yards of trash and debris from county waterways in 07-08. This year's breakdown

by watershed is as follows; Guadalupe watershed 1,036 cubic yards (13%), Coyote watershed 1915 cubic yards (23%), West Valley watershed 1,428 cubic yards (17%), Lower Peninsula watershed 926 cubic yards (11%), and Uvas Llagas watershed had 3006 cubic yards (36%). The Guadalupe watershed Good Neighbor Program continues to conduct monthly homeless encampment cleanup activities along both the Guadalupe River and Coyote Creek. The Good Neighbor Program coordinates with the Santa Clara County Department of Corrections to utilize inmate labor for some of the creek cleanup activities. Additionally, the San José Conservation Corp labor is also utilized extensively during many of the trash removal operations. The Adopt-A-Creek program also supports trash removal from adopted sections of various creeks and this program is highlighted in the PIP activities section of the Annual Report.

Blood Borne Pathogen Training

The District suspended trash assessments for 2007-2008 due to safety issues associated with working in proximity to homeless encampments and other potential blood born pathogen exposures. The Districts Urban Runoff Program has been working with the District's Industrial Hygienist to develop a suite of Best Management Practices to be implemented by staff conducting Rapid Trash Assessments in areas that could potentially expose employees to significant health hazards. These BMP's include the mandatory use of puncture resistant boots, puncture resistant, a suite of vaccinations as well as focused training how to prevent exposure to blood borne pathogens and how to respond should an individual be exposed to blood borne pathogens.

The District's Industrial Hygienist has indicated that vaccinations are available to District employees and temps who perform field work that potentially exposes them to any of the following: used hypodermic needles, human excrement and/or bodily fluids, sharp objects contaminated with soil, and employees who could come into contact with wild animals or vicious dogs. The District Environmental Health and Safety Unit will consider these work activities in order to determine which of the following preventative vaccinations are recommended for each employee:

1) Hepatitis A
2) Hepatitis B
3) Tetanus
4) Rabies

Once District staff is safely prepared to continue conducting Rapid Trash Assessments they will likely resume.

1.3 Rural Public Works Program Evaluation (Attachment 1.3)

The District's River Morphology staff continues to emphasize to field and engineering staff the importance of woody debris in the creeks for wildlife habitat and to facilitate the reduction of potential erosion at various facilities by encouraging the creeks to remain in dynamic equilibrium.

1.4 Storm Drain O&M Program Evaluation (Attachment 1.4)

Storm drain inspections and cleaning work orders continue to be distributed via the District's Comcate (field maintenance work order software) Preventative Maintenance Program for the three Water Treatment Plants. Each month facility maintenance staff receive a computer generated work order to inspect all storm drains at their facility and have them cleaned as needed. The Environmental Management Unit has been performing storm drain inspections since FY 2005 at the Vasona Meter Shop, Corporation Yard, Headquarters and Administration Campus and the Blossom Hill Annex to ensure compliance with Urban Runoff Management Plan.

1.5 Corp Yard Operations Evaluation (Attachment 1.5)

The Corp Yard sampling has continued. Pollution Prevention and pollutant reduction has continued to be a focus of Corp Yard staff.

1.6 Water Utility Discharge Program Evaluation (Attachment 1.6)

Last year the Environmental Management Unit and the District's Operations Planning and Analysis Unit undertook a study to evaluate the turbidity effects in a stream during the cleaning and reconditioning of stream hydrography gauges. The goal of the this study was to determine 1) what kind of effect does stream gauge maintenance have on stream turbidity 2) to develop potential BMPs to reduce the monitoring costs associated with turbidity monitoring during this maintenance activity and 3) to see if it would be reasonable to recommend that "Stream Gauge Maintenance" be added to the categorical exemption category of the new Municipal Regional Permit. The study was conducted in three creeks two in jurisdictional area of the Central Coast Regional Water Quality Control Board, Bodfish Creek and Upper Llagas creek and one stream from the San Francisco Bay Regional Water Quality Control Boards jurisdiction, Los Gatos creek below Lexington Reservoir. After background readings were taken the study consisted of several Environmental Management Unit staff being stationed downstream of the stream gauge at either 50, 100, and 200 feet or 100, 200, and 300 feet. The results indicate that the turbidity in the stream at time did reach approximately 90 NTU's the streams recovered to background levels within an about an hour. The significance of this is that the impacts to the stream are limited in scope and likely much less detrimental to the health of the stream compared to having several staff walking in the stream setting up some form of filtration/detention system and then later sending staff back into the stream to remove the filtration/detention system.

Last year the Environmental Management Unit had planned to conduct one more experiment using a "Dirt Bag" on a more sensitive stream. This experiment will take place this year and once this experiment is completed a short report will be forwarded to the San Francisco Regional Water Quality Control Board of our findings.

1.7 Construction Inspection Program Evaluation (Attachment 1.7)

The District continued to use the monthly inspection sheet developed in FY 02-03 to facilitate compliance and follow up inspections. The Environmental Management Unit continued to

coordinate with the Construction Inspectors in the field to go over SWPPP implementation at construction sites. This coordination proved very successful and will continue in FY 08-09.

Construction Administration Unit continues to use the Incident Response/Pollution Prevention Hotline to contact Stream Water Quality/Regulatory Compliance Unit staff to report construction sites that are creating sediment discharges.

In FY 07-08, the District had 8 Capital Improvement Projects (CIP) under construction that included 6 flood protection/channel improvement projects, 1 water treatment plant project and the new water quality lab. SWQ/RCU assisted with review of CIP SWPPPs as requested. A table showing the inspections completed is included with this section.

1.8 Other Water Quality Evaluations (Attachment 1.8)

BMPs were formally inspected quarterly during non-stormwater observations at most District facilities except Coyote and Pacheco Pump Stations. The pump stations do not warrant non-stormwater observations due to the low potential for these types of discharges to occur. The Corporation Yard culvert inlet protection device (constructed of cinderblocks filter fabric and washed gravels) was inspected in October of 2007 and determined to be functioning well. The Corporation Yard culvert inlet protection device was again inspected in June 2008 and will be serviced in September of 2008 as it has collected sediment preventing this material from entering the Guadalupe River. Other BMPs are working effectively, as noted on the non-storm water observation forms submitted. The three Water Treatment Plants conducted the required storm drain inspections required under this program.

1.9 Watershed Management Program Evaluation (Attachment 1.9)

During FY 07-08, the District removed approximately 33,523 cubic yards of sediment and completed bank protection projects totaling approximately 4841 linear feet (0.92 miles).
Annual SMP archeology awareness and BMP training was conducted on June 5, 2008, and June 11, 2008 and 95 % of District employees from the Watershed Field Operations Units, Watershed Program Support Units, Vegetation Management Unit, and Regulatory Compliance Unit received the training (100 employees). BMP training evaluation forms were distributed during the training session and attendees were asked to complete them before leaving. All training sessions were rated excellent (38%) or good (55%) by the respondents. Suggestions for improving the training will be incorporated into next year's training. On-site training has also been conducted for District contractors and day laborers.

1.10 C3 Program Evaluations (Attachment 1.10)

The following stream function improvement activities are not part of the permit requirements. However, in the interest of natural channel/creek design the District has been collecting geomorphic data and designing flood control projects in the upper watershed that incorporate

various geomorphic features some of this work is overseen by the Office of Stewardship Planning's Watershed Planning and Asset Management Unit.

Thompson Creek

1. The consultant is preparing a final report which should be published in late 2008.

Upper Penitencia Creek

1. Collected data on Upper Penitencia Creek for continuous flow measurement for hydrologic and sediment transport modeling.
   a. Collection of continuous flow measurement data at Piedmont Road and at Berryessa Industrial Park continued.
   b. The data will be used to calibrate a continuous flow runoff model (HEC-HMS) for Penitencia Creek in 08-09.

2. Geomorphic Survey and Channel Stability Assessment.
   a. Collected a third year of suspended solids and bed load transport data for the winter to develop suspended sediment and bed load rating curves.

Berryessa Creek

1. This effort is similar to the Upper Penitencia Creek exercise. District staff has installed gages on Berryessa Creek for continuous flow measurement.
   a. The District continued to collect flow data measurements. Data is being collected upstream of Piedmont Road (which is the downstream end of the rural portion of the watershed) and at Hillview Road (which represents the combination of rural + urban watersheds).
   b. The data will be used to calibrate the continuous flow HEC-HMS model for Berryessa Creek.

2. Geomorphic Survey and Channel Stability.
   a. Continued the collection of suspended solids and bed load transport data during winter to develop a transport model.
   b. Extended the cross-sectional data collection to Hillview Road Bridge downstream of 237/Calaveras Road. This captured the eroding reach where Berryessa Creek runs parallel to the railway tracks.

3. Provided a stable channel design for flood protection to the US Army Corp of Engineers. This has now become the preferred alternative. We were requested to provide this design after the previous alternative developed by the District and the US Army Corp of Engineers developed for flood protection was not well received by the residents.

Adobe Creek

Construction began in early summer of 2008. The design incorporated some fluvial geomorphic in the deciding as could be accommodated considering the residential encroachment.

Stevens Creek

Designed some of the Blackberry farm project and observing construction activities

Alamitos Creek
District completed a design for erosion repair at Alamitos Creek and the construction was completed in the fall of 2007. This alternative generated 18,000 sf of mitigation credit which offsets the additional costs of the geomorphic stream stabilization features.

1.11 PIP Program Evaluation (Attachment 1.11)

The District serves a community of 1.7 million countywide and has excellent outreach programs to many sectors of the community. Key elements of the District's PIP Program include creek clean-up events supporting citizen participation, attendance at community events targeting the general public, numerous workshops presented by the Water Conservation Unit, and the School Outreach Program.

GENERAL OUTREACH
The District attended 52 community events during FY 07-08. A listing of all events is included in this section.

The District's website continues to provide regular updates to the community. During the winter season, the District's home page featured a link to flood-related information, the District's efforts to protect the waterways in the event of a flood, and sandbag distribution sites. Our on-line maintenance request form empowers citizens to report dumping or waterway-related problems, and allows them to send messages to the appropriate watershed staff. The site also includes a link to the Santa Clara Valley Urban Runoff Pollution Prevention Program.

TARGETED OUTREACH
Workshops
In March 2008, the Water Use Efficiency Unit conducted a four-part Water Efficient Landscaping Workshop Series. A total of 203 people attended the four sessions: Designing a Water-Wise Garden, Gardening with Natives, Water Efficient Irrigation Design, and Selecting Plants for Your Water-Wise Garden. Several Units came together to present two sessions of CreekWise Workshop for creekside owners on March 1 and March 15. The workshops included watershed education, water conservation, urban runoff and pollution prevention, invasive species, pest management and erosion control and being a good creek neighbor. A total of 59 people attended the two sessions.

Media Campaign
The District carried active media outreach during the winter of 2007-08. The District took advantage of the winter storms to inform and educate the public about the importance of keeping our creeks clean.

In addition to the District's own campaign, for the second year, we are participating in a regional water conservation campaign, funded by a state grant and led by San Francisco Public Utilities Commission and Bay Area Water Supply and Conservation Agency. The primary message of this regional campaign is that California is in a drought and everyone can take easy steps to save water now. The campaign includes a regional website that directs users to services and programs in their own service area.

Other Targeted Outreach
Flood Safety Notice 2007 was mailed in October 2007 to 100,000 flood plain residents. Although the mailer's main focus is flood preparedness and safety, it also contained articles on healthy creek ecosystems, keeping debris out of creeks and illegal dumping. A copy is included in this section.

In January 2008, the District mailed out more than 700,000 copies of Valley Water News, a Countywide newsletter, to residents and businesses in Santa Clara County. The newsletter included information emphasizing the need to keep our streams free of trash and chemicals. It also provided the 24-hour pollution prevention number to report illegal dumping.

AquaFacts, the District's employee newsletter, continued this year as an online publication. AquaFacts contained 4 articles relating to stormwater pollution prevention and watershed education during FY 07-08. Topics included alternative commute methods, grass gobbling goats, and two creek cleanup events. The employee newsletter is an excellent and cost-effective method for delivering urban runoff, pollution prevention, and watershed messages to District employees. In addition to AquaFacts, several articles were included in the District's daily "New You Can Use" emails.

An all employee Pollution Prevention Week email campaign was conducted September 17 through 23, 2007. Five emails were sent providing pollution prevention tips. Topics included: general pollution prevention week information, proper disposal of fluorescent bulbs, batteries and cell phones, proper pesticide use and disposal, fighting pollution on the road and protecting your Watershed. Numerous requests for brochures were received from the employees, as well as many comments on the campaign. This continues to be a good method to present pollution prevention ideas to District employees.

Neighborhood work notices are posted on the District's web site for all stream maintenance and capital projects. Most notices include information on watershed.

EDUCATIONAL OUTREACH
The District's educational outreach program serves a diverse population and responds to the needs of the schools throughout the County. Programming is consistent with State standards and regularly integrates messages and issues of other District communication programs. The District's School Outreach Program visited 122 public and private schools reaching 17,967 students and 770 educators and conducted 6 teacher workshops during FY 07-08. The District offers a comprehensive education outreach program for early childhood, elementary, middle school, high school, and college-aged students to establish a foundation for understanding and appreciation of water resources. The program provides age-appropriate classroom presentations, teacher in-service training in water education, and tours in order to help children understand and appreciate their local water resources. Classroom presentations include hands-on experiments, information on watersheds, urban run-off, pollution prevention, flood plains, conservation tips, water awareness activities, flood management, and careers in the water industry. Scheduling is conducted on a first-come, first-served basis and provided free to schools in Santa Clara County. Number of students by watershed, city, grade, focus of presentation, and school district are included with this section. AquaDrops eNews, an electronic

teacher's newsletter was sent out in November 2007, January 2008, March 2008 and May 2008.

The Coyote Creek Outdoor classroom encompasses land alongside Coyote Creek and includes a covered gazebo classroom for students and teachers, as well as a platform overlooking the creek where students can study the stream's natural habitat. Groundwater monitoring wells on the site enable students to observe and evaluate the underground water table and understand how surface and groundwater interact. The site features two planting areas – one site close to the creek planted with native trees and shrubs to improve the stream's wildlife habitat, and a "high terrace" or upland area landscaped with oaks, grasses and other native plants to demonstrate drought-tolerant gardens. During the 2007-08 school year, the program provided 4 class tours for 112 students and 4 teachers.

Morley Park Outdoor Classroom in the City of Campbell provides the opportunity to teach students about the purpose of wetlands, urban runoff and the value of percolation ponds. During the 2007-08 school year, the program provided 1 tour for 32 students and 1 teacher.

Christmas Hill Park, located at the southwest end of Gilroy, encompasses 51 acres including natural wilderness with trails, picnic/barbecue areas, horseshoe pits, jogging and hiking paths, children's play areas, open play field, softball/baseball fields and open grass play area. The school tour includes watershed, groundwater, urban runoff, weather station and water quality testing activities. During the 2007-08 school year, the program provided 6 tours for 120 students and 6 teachers.

School Outreach Program staff developed and implemented a new activity this year. Mapping History of the Santa Clara Valley demonstrates growth and change in our valley over the past 5,000 years and into the future. Participants listen to period music, share scripts that describe six time periods, and then place appropriate symbols of change on a 12' x 12' map of Santa Clara County. The activity begins with the Native American period, 3200 BC to 1750 AD, adding wildlife, vegetation and one figure to represent the 10,000 Native Americans in the entire Bay Area. By 2050, participants have added farm animals, orchards, railroads, cities, reservoirs, water and wastewater treatment plants, hi-tech businesses and 260 figures to represent a projected population of 2,624,670.

CITIZEN PARTICIPATION

The District established the Adopt-A-Creek Program in 1994 to encourage residents of Santa Clara County to take an active role in helping to preserve the health and beauty of our local creeks. Due to continued staffing changes and shortages, Adopt-A-Creek permit information was not tracked this past year. In FY 07-08, lack of staff resources hindered the tracking of activities.

The District participated in two creek cleanup events: Coastal Cleanup Day on September 15, 2007 and the National River Cleanup Day on May 17, 2008. During Coastal Cleanup Day, 865 volunteers collected 31,694 pounds of trash and 12,052 pounds of recyclables at 24 sites. On National River Cleanup Day, 669 volunteers collected 17,500 pounds of trash and 11,518 pounds of recyclables at 27 sites.

1.12 Urban Runoff Program Administrative Activities (Attachment 1.12)

All Administrative Tasks were completed on time.

1.13 Monitoring Program Evaluation (Attachment 1.13)

The District has continued its monitoring program to evaluate water quality in Lake Almaden, Almaden Reservoir, Calero Reservoir, Guadalupe Reservoir and Stevens Creek Reservoir. Depth profile measurements of temperature, pH, conductivity, and dissolved oxygen were conducted monthly. In addition, water samples were collected from the epilimnion and hypolimnion for analyses of total and dissolved mercury, total and dissolved methyl mercury, ammonia, nitrate/nitrite, sulfate and phosphorus at Lake Almaden, Almaden Reservoir, and Guadalupe Reservoir. Samples were also collected from the epilimnion for analyses for chlorophyll- a. The purpose of this monitoring is to establish existing water quality conditions and seasonal variability to evaluate the implementation of management changes to improve water quality.

1.14 Copper Action Plan Evaluation (Attachment 1.14)

The District enacted a policy several years ago to have District vehicles washed and vacuumed at the existing covered wash rack that discharges through a clarifier to the sanitary sewer system. The District is very proactive in attempting to reduce traffic and pollutants caused by traffic. The district provides, free to employees, bicycle lockers, and reimburses staff for use of public transit for business purposes.

1.15 Nickel Action Plan Evaluation (Attachment 1.15)

The District, as an environmental steward, has several practices and activities in place that support copper and nickel pollution prevention. The District continues to distribute outreach materials at public events. The District's website provides a carpool connection interactive map so an individual is able to search for carpoolers in the vicinity of one's home or even along the route an individual uses to get to work.

1.16 Mercury Action Plan Evaluation (Attachment 1.16)

Mercury Removal Projects and Programs Completed and Underway

Stream Maintenance Program
In 2007, routine sediment removal maintenance resulted in the disposal of 36,870 cubic yards of material, with 3,348 of this total from the creeks in the upper portion of the Guadalupe River Watershed. The total mercury removed from the system was 100 kg, with 98 kg from the Guadalupe River Watershed.

Monitoring

The District has undertaken a monitoring program to evaluate water quality in Lake Almaden, Almaden Reservoir, Calero Reservoir, Guadalupe Reservoir and Stevens Creek Reservoir. Depth profile measurements of temperature, pH, conductivity, and dissolved oxygen were conducted monthly. In addition, water samples were collected from the epilimnion and hypolimnion for analyses of total and dissolved mercury, total and dissolved methyl mercury, ammonia, nitrate/nitrite, sulfate and phosphorus at Lake Almaden, Almaden Reservoir, and Guadalupe Reservoir. Samples were also collected from the epilimnion for analyses for chlorophyll a. The purpose of this monitoring is to establish existing water quality conditions and seasonal variability to evaluate the implementation of management changes to improve water quality.

Mercury Control Program

In 2007, the District continued to implement three projects to control mercury in the Guadalupe River Watershed: Jacques Gulch Restoration, Lake Almaden Circulation, and Reservoir Circulation.

Jacques Gulch Restoration

Jacques Gulch is a tributary to Almaden Reservoir that drains approximately one-third of the reservoir watershed. A portion of this drainage includes a small tributary that drains a portion of the former New Almaden Mining District, which is now Almaden-Quicksilver County Park. The project will remove, cap, or control erosion of extensive mercury deposits in the tributary above its confluence with Jacques Gulch, and in Jacques Gulch above its confluence with Almaden Reservoir. This project will require planning, permitting and construction, and is scheduled for completion in 2011. During the reporting period, the District revised a draft Engineer's Report for the project, prepared a Draft Mitigated Negative Declaration, and circulated the documents for public comment.

Lake Almaden Circulation

Lake Almaden is a former gravel quarry that lies at the confluence of Guadalupe Creek and Los Alamitos Creek that drain Guadalupe and Almaden Reservoirs, respectively. Below this confluence is the Guadalupe River. This lake provides recreational amenities to the community, including swimming, boating, and fishing. The Guadalupe River Watershed Mercury Study identified the lake as a significant source of methyl mercury that bioaccumulates in fish within the lake and in fish downstream. In 2006, the District continued a monitoring and sampling program to evaluate the performance of a pilot treatment system using a solar-powered circulator (Solar Bee). Data collected during the summer of 2006 showed a 96% reduction in the methyl mercury concentrations measured in the treated portion of the lake as compared to 2005 data. Data from 2007 were similar to the 2006 data. Building on this success, a second circulator was installed in the lake in March 2007. This second circulator achieved similar reductions of methyl mercury in the water column during 2007.

Reservoir Circulation

The Guadalupe River Watershed Mercury Study identified reservoirs as a significant source of methyl mercury that bioaccumulates in fish within the reservoirs and in downstream creeks.

The study also demonstrated a correlation between the seasonal development of anoxia in the hypolimnion and increased methyl mercury concentrations. Building on the success of the Lake Almaden pilot project, the District installed three solar-powered circulators in Almaden Reservoir in April 2007, and three solar-powered circulators were installed in Guadalupe Reservoir in July 2007. Data from 2007 showed lower concentrations of methyl mercury in the water column in Almaden Reservoir as compared to previous years, but no significant changes were observed in Guadalupe Reservoir in 2007.

1.17 Pest Management Program Evaluation (Attachment 1.17)

The District uses pesticides as one of the tools for pest management on its properties and facilities. The primary category of pesticides used is herbicides. Insecticides and rodenticides are used in small quantities. In all cases, pesticide products are used only after an assessment has been made regarding environmental, economical, and public health aspects of each of the alternatives. The District has always been proactive and conservative in the use of pesticides.

The District continues to implement a pesticide policy and an "Approved Pesticide List." Except for three products, the District's Approved Pesticide List met the criteria established in the District's Pesticide Policy for water quality, environmental and public health hazards. The District's policy states "Category I and II pesticides may only be used if required to meet health and safety concerns or if mandated to maintain regulatory compliance such as dam safety." The three "Toxicity Category I" products, one herbicide and two rodenticides were exempted from meeting the toxicity restriction due to the following factors:

1) They are integral in meeting the structural engineering requirements of the District's levee systems and dam safety program.
2) There are no practical alternatives at this time.
3) The toxicity and hazard exposure of these products applies only to the applicator at the time of application. These hazards are mitigated with protective clothing and eye protection which minimize the exposure hazard to the maximum extent.

The District believes that use of the less toxic products is beneficial to the environment and the health and safety of employees. The District's annual pesticide use summary report for calendar year 2007 is included in this section as Table 17.1.

The District began implementation of the *arundo* mitigation program in 2002. The eradication program has increased the District's use of some pesticides. The cut stump method of application minimizes the potential for environmental impacts. The District currently has a program for monitoring the water quality impacts of this work type.

ALTERNATIVE PEST MANAGEMENT PRACTICES

With more than 25 acres of unwanted vegetation rising up and around the Santa Teresa Water Treatment Plant, the District used nearly 700 goats to chew and munch away dry brush that could have posed a fire hazard if left unchecked. Using the goats was a welcome alternative to chemicals or mowing, which proved difficult in the past because of uneven slopes around the plant. This innovative approach reflects that the District is doing things differently and certainly keeping the environment in mind.

The District continued to integrate mechanical harvesting and non-toxic dye colorants with the use of algaecides and herbicides to manage algae at percolation ponds.

TRAINING/CERTIFICATION
Continuing education (CE) is required to maintain certification. Employees can obtain CEs through seminars sponsored by Pesticide Applicators Professional Association (PAPA), California Association of Pest Control Advisors (CAPCA), manufacturers and universities. CEs are tracked by PAPA/CAPCA and records can be obtained from their websites. All District employees prepare an Employee Performance Plan and County Agricultural Commissioner and the State Department of Pesticide Regulations certification and training requirements are included in individual Performance Plans. Performance Plan evaluations are conducted every January for all employees. Employees not meeting certification and training requirements contained in their Performance Plan may face disciplinary action or termination of employment.

Bi-weekly safety meetings are held that include IPM Policy, SOP and BMP training. Label training, hazardous spill response, symptoms of pesticide poisoning were some of the topics covered this past year.

BMP inspection checklists continue to be completed for both chemical and non-chemical vegetation management activities.

1.18 Sediment Control Program Evaluation (Attachment 1.18)

Upper Penitencia Creek Sediment Study
The District assisted with the Upper Penitencia Sediment Source and Management Practices Assessments by providing information on the operations of the diversion structures for the percolation ponds as well as by providing information on other water utility operations pertinent to Upper Penitencia creek. The District also provided significant information on the fisheries condition in the watershed. The District completed a review of the document and also convened a multi division meeting of managers and operations staff to respond to the Regional Boards questions on the first draft of the document in the fall of 2006. District also reviewed and commented on the various other Upper Penitencia Creek studies.

Saratoga Creek Watershed Assessment
The District has provided funding and coordination for a fish scale analysis of the fish scales that were collected for the Saratoga Creek Watershed Assessment. The District has also been working with the Program to ensure that Program staff collected samples from only public owned sites.

1.19 Watershed Monitoring Program Evaluation (Attachment 1.19)

Water Quality Index Project
In the fall of 2004 the Environmental Management Unit implemented a study of general water quality monitoring in the Guadalupe Watershed to compare the watershed to other studies taking place in the country. This study was both time consuming and initially costly to conduct

in both labor hours and laboratory fees. This study has just completed the collection of the seventh round (3.5 years) of sample collection in the Guadalupe River watershed. The study has completed its fourth round of sampling in the Stevens Creek and Coyote Creek watersheds. At the tidal sites both a high tide and a low tide sample was collected.

Coyote Creek results indicate that the water quality does generally fall into the excellent to good range in the upper watershed and tends to degrade slightly as one approaches the lower watershed area and the bay. This lower water quality is what one would expect as the water from the urban environment contributes a higher concentration of pollutants than would be expected from the more rural reaches.

Stevens Creek results indicate a narrower range of variability between seasons and downstream locations as well. All the results are in the good range. The Permanente results are slightly lower than the Stevens results for approximately the same water shed elevation and this could possibly be due to industrial operations in the Permanente sub watershed.

Guadalupe River results indicate that the water quality does generally fall slightly above and below the good range in the upper watershed and tends to degrade slightly as one approaches the lower watershed area and the bay. In general the tidal bay water tends to be of similar if not slightly lower quality than the stream water.

The study has been concluded for financial reasons as well for reasons associated with the contract laboratories performance. Should the study resume correlating WQI data with watershed rainfall and stream flow data would be interesting. Additionally the sites should be containing elevation information in the tables

Attachment 1.1
ILLICIT CONNECTION/ILLEGAL DUMPING (ICID) ELIMINATION ACTIVITIES

042648

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
ILLICIT CONNECTION/ILLEGAL DUMPING ELIMINATION ACTIVITIES

SELF EVALUATION MATRIX

Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Permit Reference	Responsible Party
1. Illicit Connection & Illegal Dumping Elimination Activities ***Goal 1.A.*** *Respond to reports of illegal dumping or hazardous material releases on District property or along District right of way and coordinate containment, clean up and investigations as necessary.*					
1.A.1	Conduct an annual effectiveness evaluation. District Staff who regularly interact with the Hazmat Incident Response Program will be asked to complete a questionnaire in the Spring of 2008. The questionnaire will ask for ideas for any improvements or changes that need to be made to the District's Incident Response Program. Results of the questionnaires will be evaluated and may be incorporated into subsequent revisions.	Complete. The ICID program is executed through the District's Hazmat Emergency Response Program which undergoes multiple performance evaluations annually. During FY 07-08 this program was formally evaluated by ISO audit (1x), Total Operational Performance (4x), and Clean, Safe Creeks Independent Monitoring Committee (2x).	May 08	C.2.a. PS ICID-7	SWQU ICID Team
1.A.2	Identify the number of field responses to complaints of potential water quality related impacts such as spills, illegal dumping, clandestine drug labs or other threats to District property. Create an attachment to the annual report and include a summary in the Highlights and Accomplishments section of the annual report.	Complete. Information is transmitted to Program management staff annually. District specific charts are included in the Annual Report.	On-going	C.6.a.ii. PS ICID-6	SWQU ICID Team

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
ILLICIT CONNECTION/ILLEGAL DUMPING ELIMINATION ACTIVITIES

Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Permit Reference	Responsible Party
1.A.3	Characterize as to report source, nature of report, location of the event, reported source of pollutants and follow-up investigation if needed.	Complete. The District's ICID raw data table contains this information which is submitted to SCVURPPP for inclusion within the Program's Annual Report which establishes program-wide data consistency. Additionally the District characterizes incidents by watershed, city, and pollutant. These charts are included herein.	On-going	C.6.a.ii PS ICID-6	SWQU ICID Team
1.A.4	For any actual non-compliance or threatened non-compliance noted during the investigation of a reported release; the nature of follow up will be reported, through resolution on the noted issue, up to and including enforcement action.	Complete. The nature of follow-up including enforcement is submitted to SCVURPPP to be reported in the Program-wide portion of the Annual Report.	Sept 07	C.6.a.ii. PS ICID-6	SWQU ICID Team

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

REPORTING DATA

- The ICID incident response/pollution prevention program received 115 reported incidents in Santa Clara County, 106 of which occurred in that portion of Santa Clara that lies within SF Bay Regional Board jurisdiction. Of those 106 incidents, 65 required a field response.
- Types of pollutants and pollutant sources encountered this year (see associated graphics)

SANTA CLARA VALLEY WATER DISTRICT

ILLICIT CONNECTION/ILLEGAL DUMPING ELIMINATION ACTIVITIES

- Locations: both by municipality and by watershed (see associated graphics)

PROGRAM EVALUATION

Emergency Response

The District continues to focus significant resources in support of the ICID program. Key elements of the District's ICID program include a 24-hour, 7-day per week Pollution Prevention Hotline (1-888-510-5151); Hazardous material removal; and staff training. On-call response duties are rotated weekly among a 4-person response team. All of the responses are due to some form of illegal dumping activity on District property.

Ordinance Enforcement

On 2-28-07 a new Water Resource Protection Ordinance (Ordinance 06-01) went into effect and simultaneously repealed Ordinance 83-2. The new Water Resource Protection Ordinance establishes District permitting authority only over lands and facilities "owned, controlled, operated, or maintained by the District" and requires outside parties to obtain an encroachment permit for any modification to District facilities including but not limited to development activities. The District may issue an encroachment permit if it finds, based on substantial evidence, that the proposed modification conforms to requirements of the District Water Resources Protection Manual such that, among other things, it will not pollute or erode waterways. Violators may be served a written "compliance order" delivered in person or by US Mail to the person responsible for the violation. Following prescribed hearings the District Chief Executive Officer (CEO) may impose administrative penalties up to $1000 per day (not to exceed $100,000 in total) for continuing violations. In addition to financial penalties the District may recoup administrative costs - potentially including any abatement costs - incurred by the District with regard to the violation. Additionally, violations of the Water Resource Protection Ordinance are punishable as a misdemeanor and may also be enjoined by civil action.

Utilization of enforcement components within the Water Resource Protection Ordinance is often either impractical or unnecessary when dealing with illegal dumpers. This is because the parties responsible for illegal dumping can only rarely be identified and sometimes the cost of enforcement may exceed the cost of simply absorbing the clean-up expense. In the case of significant spills the responsible party, if they can be identified, is usually eager to implement clean-up activities in order to avoid prosecution under more serious municipal, county, state, and federal codes. In instances where an uncooperative responsible party can be identified, the District will implement ordinance provisions such as compliance orders and administrative penalties and costs as appropriate. Additionally, District ordinance violation may be added to the list of violations prosecuted by the Santa Clara County District Attorney. During FY 07-08 no

compliance orders, administrative penalties, administrative costs, civil actions, or misdemeanor prosecutions were brought against Ordinance 06-01 violators.

HIGHLIGHTS AND ACCOMPLISHMENTS

Emergency Response

The District addresses IC/ID incidents effectively through its watersheds' hazmat "Emergency Response" (ER) Program. This aggressive 24-7 program responds reactively to IC/ID incidents by providing referral and inter-agency cooperation and/or conducting field investigation and clean-up activities as appropriate. The ER Program may be contacted via the Pollution Hotline (1-888-510-5151) which is advertised on the District's internal and external websites as well as in occasional fliers and memos. The Hotline is also advertised on the Santa Clara Valley Pollution Prevention Program's website. The ER Team routinely responds to over 100 reported incidents per year as reported by District field workers, staff from other agencies, and members of the general public.

The ER Program is recognized as an effective and timely means of addressing acute contaminants that are illegally dumped or discharged to District lands and facilities. The Emergency Response Program's performance was evaluated by four mechanisms during FY07: (1) within the context of the District's Clean, Safe Creeks program (semi-annually); (2) by the District CEO's scorecard (quarterly); and (3) by an external ISO 9000/14000 recertification audit (December 2007). The results of these evaluations were as follows: (1) the Clean, Safe Creeks key performance indicator was met; (2) the program received a "Superior" rating (the highest rating possible) on the CEO scorecard based on phone and field response times; and (3) the ER Program passed the quality and environmental recertification audit according to ISO 9000 and 14000 standards.

The District received and responded to a total of 115 emergency response reports throughout Santa Clara County during fiscal year 2007-2008. This total is up 7.5% from 107 reported in FY 06-07. Of the 115 total incidents reported during the last fiscal year, 106 were within the jurisdiction of the San Francisco Bay Regional Board and the associated Santa Clara Municipal Stormwater Permit. 65 of the 106 required a field response by the one of the team members for source identification, clean up or evidence collection. The 115 total incidents were distributed among the District's 5 major watersheds as follows: Coyote (35), Guadalupe (34), West Valley (25), Uvas/Llagas (9), and Lower Peninsula (7), with 5 other incidents occurring on non-watershed facilities. The data from the emergency response reports indicates that the Guadalupe River was once again the waterway with the greatest number of incidents with a total of 18 reports. Coyote Creek also a relatively high number (10) of incidents reported. Sunnyvale East Channel, with 6, was the only other waterway that posted more than 5 incidents. Fuel/Oil related incidents was again among the predominant contaminants encountered,

registering 26 individual incidents. Trash (15) and sewage (13) joined "chemical" (12) incidents as other common pollutants encountered.

The majority of reports (52) this year again occurred within the limits of the City of San Jose. 11 incidents occurred in unincorporated areas (9 of those within SFB-RWQCB jurisdiction, 2 within CC-RWQCB jurisdiction). No other city had more than 9. The District records every response it receives. It is important for the District to be able to accurately track the number of reports. If the incident is outside of District jurisdiction (limited to its own lands and facilities – that being properties "owned, controlled, operated, or maintained by the District") the District may forward the report information to the appropriate public agency yet still logs the report for our records - so it is important for the Regional Board to be aware that the total number of reports from all co-permittees as reported by the Program Manager may be artificially elevated due to double reporting of such cases (District + municipal). The District responded within the two hour target field response time, 98% of the time in 2007-2008 for all in-County incidents.

Water Resource Protection Ordinance Enforcement

As previously reported there were no compliance orders, administrative penalties, administrative costs, civil actions, or misdemeanor prosecutions brought against Ordinance 06-01 violators during FY 07-08. Additionally, District emergency responders continue to work cooperatively to assist investigations by law enforcement agents at the Department of Fish and Game and the District Attorney's Office, as well as municipal and Regional Board code enforcement staff.

4. RESPONSE CATEGORY: PRIMARY RESPONDERS & URGENCY

RESPONSE CATEGORY: Select Response Code and District Field Arrival Urgency based on the incident conditions listed in the table below. The table below will assist the responder to realize when additional resources are needed and when to make appropriate notifications to the communication center[ii].

Pre-field Assessment:	Code: **Red**	District Field Arrival: **Urgent**
Field Recon Re-assessment:	Code: **Red**	District Field Arrival: **Urgent**

Note 1: *Initiate Emergency Response Sequence* by notifying County Communications (call: 299-2501, or 911) immediately upon notification or discovery of any incident posing and an immediate danger to PEP (People, Environment, Property)

Note 2: For all code Red, Orange, and Yellow Incidents within District jurisdiction complete Sections 2 (Hazards), 3, 4, and 5 of this form prior to site response activities. This will then serve as an *Incident-specific Emergency Response Plan*.

Category Code	Incident Conditions & Associated District Field Arrival		Primary Responder
	URGENT	**PRIORITY**	
Emergency Response to an Uncontrolled Release of Hazardous Substances			
Red	PEP Danger or Threat: Immediate	N/A	Fire Department
Orange	• PEP Threat: Confined • Team Resources: Insufficient	• PEP Threat: Secure - lidded containment in secure area • Team Resources: Insufficient	Contractor
Yellow	• PEP Threat: Known and Confined • Team Resources: Sufficient	• PEP Threat: Known and Secure - lidded containment in secure area. • Team Resources: Sufficient	ER Team + Contractor for post-ER site clean-up and/or transport & disposal.
Maintenance Response to an Incidental Release of Hazardous Substances			
Green	• PEP Threat: Known - Covered PPE	• PEP Threat: None • Confined incidental spill	ER Team
Maintenance Response to a Release of Nuisance Pollutants			
Blue	• PEP Threat: None	• Confined spill	ER Team + Contractor as needed

ER Team: Incident Response Record

5. RESPONSE PLAN

RESPONSE TYPE: ☐ EMERGENCY ☐ MAINTENANCE

5.A SITE PLANNING (only applicable for Emergency Response activities – Codes Red, Orange, and Yellow)[iii]

SAFE DISTANCE[iv] Per notification information: feet
Per site reconnaissance: feet

PLACE OF REFUGE Per Incident Command:

SITE SECURITY & CONTROL Describe perimeter barriers, warning signs, and human resources used to prevent intentional and accidental trespass into hazardous areas.

EVACUATION ROUTES Per Incident Command:

5.B ACTIVITY PLANNING

OBJECTIVES, METHODOLOGY, AND RESPONSIBILITY: For all responses complete the following table as necessary to plan and record incident response activities for both emergency and maintenance level response activities.

Action/ Objective	Method	Responsibility
Visual Recon		
Field Survey/Tests		
Sampling		
Migration Control		
Spill Control		
Chemical Stabilization		
Waste Clean-up		
Waste Containment		
Waste Removal		
Temporary Storage		
Transport		
Disposal		
Other		

PERSONAL PROTECTIVE (PPE) AND EMERGENCY EQUIPMENT (only applicable for Emergency Response activities – Codes Red, Orange, and Yellow)[v]. Do not exceed capabilities of PPE. Do not approach inhalation hazards without prior clearance from Public Emergency Response personnel who have determined the area safe through the use of air monitoring.

PPE SELECTION Describe PPE item and material selection. Use PPE according to manufacturer specifications.

DECONTAMINATION Describe decontamination technique/s, materials, rinsate capture (if any), and PPE item and decontamination material disposal.

6. NOTIFCATIONS[vi]

For all responses complete the following table as necessary to plan and record initiation of an emergency response sequence, emergency alerting, coordination with outside parties (applicable only to emergency responses) as well as lines of communication for all incident response (both emergency and maintenance level).

Department	Contact	Phone/Email	Notified by	Notified when

7. EMERGENCY MEDICAL TREATMENT[vii]

FOR A SERIOUS OR LIFE-THREATENING EMERGENCY:

- Dial 911
- Report the type of emergency (Medical, Fire, Police)
- Give the street address
- Building name and letter
- Floor number
- Stay on the line
- Provide information updates until released by 911 operator
- Send a coworker to meet and direct emergency responders to the scene.

WARNING!

Do not automatically transport an injured coworker (or allow them to self-transport) if there is any indication their condition might worsen or become life-threatening enroute. If in doubt, Dial 911. Contact Employee Services during working hours to notify the employee's emergency contact, or notify a member of the Incident Management Team (24-hour hotline: 265-2607, extension 2050) posted on District Bulletin Boards.

In an emergency, you or any employee may go to any suitable medical facility with an Emergency Room for treatment. Identify yourself as a District employee and have the hospital contact Worker's Compensation, Employee Services, or the Incident Management Team for treatment authorization.

FOR OTHER WORK-RELATED INJURIES:

Utilize "Kaiser-On-The-Job" by calling 972-6800 and/or drive to Kaiser – Santa Teresa at 275 Hospital Parkway, Suite 565, San Jose, CA.

8. URBAN RUNOFF ILLICIT CONNECTION ILLEGAL DISCHARGE (IC/ID) REPORTING

The following reporting elements have been established by the Santa Clara Valley Urban Runoff Pollution Prevention Program.

10. RESPONDER NOTES & PHOTOS

---

[i] This section documents compliance with elements of the EMERGENCY RESPONSE PLAN as specified by 29CFR1910.120(q)(2)(iii); and demonstrates responder ability compliant with 29CFR1910.120(q)(6) which requires that Awareness Level responders (1) understand what hazardous substances are, (2) be able to recognize their presence, (3) identify them if possible, and (4) understand the associated risks and potential outcomes.

[ii] This section demonstrates responder ability compliant with 29CFR1910.120(q)(6)(i)(F)

[iii] Sections comply with Emergency Response Plan contents as specified by 29CFR1910.120(q)(2)(iv), (v), and (vi)

[iv] For known hazardous substances, utilize the most current DOT Emergency Response Guidebook initial isolation distances. For unknown materials that are believed to be dangerous do not approach within 100 meters (330 feet) until observation allows elimination of fire and inhalation hazard concerns. Then approach no closer than 30 meters (100 feet) to make additional visual observations.

[v] This section documents compliance with elements of the EMERGENCY RESPONSE PLAN as specified by 29CFR1910.120(q)(2)(vii) and (xi)

[vi] This section documents compliance with elements of the EMERGENCY RESPONSE PLAN as specified by 29CFR1910.120(q)(2)(i), (ii), and (ix)

[vii] This section documents compliance with elements of the EMERGENCY RESPONSE PLAN as specified by 29CFR1910.120(q)(2)(viii)

HAZMAT Incident Preparedness & Response

WATERSHEDS Santa Clara Valley Water District	DOCUMENT NUMBER WQ83001	REVISION R3 EFFECTIVE DATE: November 13, 2006

Printed copies are for reference only. See the Watershed Operations Internal Website for the released version.

1. PURPOSE AND SCOPE:

The purpose of this procedure is to define incident response (IR) activities that are applicable to Watershed Operations, activities and services. It describes the basic organization needed and action plans to prevent and mitigate the environmental impacts or other issues that may be related to accidents and potential emergency situations detected within Watershed Operations.

This procedure includes identification of incidents and information sources, responder training requirements, conducting emergency drills, and reviewing and revising incident response procedures following the occurrence of incidents or emergency situations. This procedure applies to all operational and functional levels within the Watershed Operations.

2. REFERENCE DOCUMENTS:

WQ42301	Document Control
WQ55301	Internal Communications
WQ62201	Training, Awareness and Competence
WF83001	ER Team: Incident Response Record

3. DEFINITIONS:

Incident:	Moderate to Serious disruptive impact (or threat of) on affected unit's ability to contribute to District mission.
Situation:	Moderate interruption of normal business operations requiring a response from a single department or unit response
Event:	Minor interruption of normal business operations requiring a response from a single department or unit response.
Hazmat	Hazardous material
Hazmat Incident:	An accidental spill or release caused by intentional or illegal dumping, an unexpected or an unplanned event having the potential to, or adversely affecting water quality and the environment
Flooding:	An overflow of water onto dry land caused by heavy rains or other emergencies, which may impact public safety and health

ICID: Illicit Connection/Illegal Dumping

4. REQUIREMENTS:

ISO 9001

None

ISO 14001

4.4.2. Training, awareness and competence
4.4.6 Operational control
4.4.7 Emergency preparedness and response

Other Requirements

NPDES Permit Order No. 01-024
NPDES Permit Order No. 01-119

5. MONITORING AND MEASUREMENT:

Measures and targets of performance monitored as a basis for continual improvement include:

- Call-back response times (15 minutes)
- On-site Response times (2 hours)
- Frequency of emergency drills (once per year)

6. PROCEDURE:

Overview	Details	Records

(1)
 	
Assess situation and notify Pollution Prevention Hot Line
 	
(Any employee)
	• Hazards or emergency situations may include:
	  • Any materials, fuels, oils, gases, or chemical spills or emissions
	  • Operational incidents involving a release or emission to the environment
	• Specific incidence and response actions and responsibilities are described by the Incident Response Record (WF83001)
	• Example of potential HAZMAT incidents include, but are not limited to:
	  • Leaking drums
	  • Spills into flowing watercourses
	  • Spills into still water bodies
	• Field staff to assess situation:
	  • Is there an actual or potential release or emission?
	  • If yes: Notify Pollution Prevention Hot Line (1-888-510-5151)
	  • If no: No further action needed.	

↓		
(2) Incident	• Document call • Call back to reporting party	

Printed copies are for reference only. See the Watershed Operations Internal Website for the released version.

Response
 	
(District Incident Response Staff)
	• Determine need for onsite response:
	  • If yes, respond to incident and/or contact other agencies if appropriate
	  • If no, determine response action.
	
	• Fill out Incidence Response Record (WF83001)
	• Other Emergencies at the District are handled by the Office of Emergency Services (OES) using a Standardized Emergency Management System (SEMS). An Incident Command System (ICS) activation criteria threshold is used for progressive mobilization and application of emergency response responses.
		Incidence Response Form

↓		
(3) Follow Up (District Incident Response Staff)	• Use the Incident Response Record (WF83001) to notify external agencies and internal staff	
↓		

(4)
 	
Training
 	
(Unit Managers)
	• Incident response staff receive basic training on:
	  • Hazardous Waste Operations (29 CFR 1910.120)
	  • Environmental Crime & Investigation Training
	  • Erosion control & Best Management Practices (BMPs)
	  • Respirator Training (GISO 5144)
	  • Annual 8-hour refresher training
		Staff Training Record

↓		

(5)
Conduct Simulated Response Event
 	
(Emergency Drill)
(Incident Response Team)
	• The purpose of the Simulated Response event is to:
	  • assess the efficiency of District Response
	  • assess the readiness of District Contractors
	  • assess the response of local cities
	  • periodically test the effectiveness of the IR manual.
	• Simulated Response Events are conducted periodically, at a minimum of once per year by the Incident Response Team.
	• Oil and chemical spill drills are conducted in accordance with the requirements of the IR manual.	

↓		
(6) Review and Revise IR Manual (SWQU)	• Where necessary, IR procedures are reviewed after drills and incidents. • Identified changes and improvements in the IR Manual is documented, reviewed and approved by the Stream Water Quality unit (SWQU) manager. • After approval any changes to the IR are communicated to appropriate staff in accordance with WQ55301Internal Communications.	

Printed copies are for reference only. See the Watershed Operations Internal Website for the released version.

7. RECORDS:

QUALITY RECORD	Location Kept	Filing Order	Duration Kept	Disposition	Comments
Incidence Response Form	Countywide Watershed Programs Unit	Date	3 years	Archived in Central Files	
Staff Training Records	Unit Manager	Employee and Date	3 years	Archived in Central Files	

8. CHANGE HISTORY:

Date	Revision	Comments
12/04/04	R2	The title was revised and references to flood emergencies were removed to reflect the actual scope and purpose of the procedure.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

The District continues to focus a significant amount of resources on trash removal from the watersheds and property within the District's limited jurisdiction. Through the Districts Good Neighbor Program 5305 cubic yards of trash and debris was removed from the watersheds that discharge to the San Francisco Bay. Though this number is less than years past the District remove an additional 3000 cubic yards of trash from watersheds that discharge to Monterey Bay bringing the District total cubic yards of trash removed in alignment with years past.

The District funded and supplied 1200 tarps for the Great American pick up this past spring. This effort funded through District Urban Runoff finances supported the Silicon Valley Anti Litter Campaign. Additionally District staff operated a tarp distribution site and participated in the cleanup efforts.

The District continues to include litter prevention training in its school outreach programs as well as other outreach efforts associated with youth group field trips, etc.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
TRASH ACTIVITIES

Blood Borne Pathogen Training

The District suspended trash assessments for 2007-2008 due to safety issues associated with working in proximity to homeless encampments and other potential blood borne pathogen exposures. The Districts Urban Runoff Program has been working with the District's Industrial Hygienist to develop a suite of Best Management Practices to be implemented by staff conducting Rapid Trash Assessments in areas that could potentially expose employees to significant health hazards. These BMP's include the mandatory use of puncture resistant boots, puncture resistant, a suite of vaccinations as well as focused training how to prevent exposure to blood borne pathogens and how to respond should an individual be exposed to blood born pathogens.

The District's Industrial Hygienist has indicated that vaccinations are available to District employees and temps who perform field work that potentially exposes them to any of the following: used hypodermic needles, human excrement and/or bodily fluids, sharp objects contaminated with soil, and employees who could come into contact with wild animals or vicious dogs. The District Environmental Health and Safety Unit will consider these work activities in order to determine which of the following preventative vaccinations are recommended for each employee:

1) Hepatitis A
2) Hepatitis B
3) Tetanus
4) Rabies

Once District staff is safely prepared to continue conducting Rapid Trash Assessments they will likely resume.

HIGHLIGHTS AND ACCOMPLISHMENTS

It continues to be very challenging for the District to identify individual responsible parties for many of the illegal dumping activities that occur in the creeks of the county. Since the District has no police powers and no land use authority our ability to penalize polluters and protect the environment proactively rather than retroactively is virtually non-existent outside of our extensive public and educational outreach activities. Homeless encampments are one of the primary sources of trash being directly deposited to the riparian corridor. With these limitations in mind the District dispatches maintenance crews to provide frequent and routine creek cleanup for trash, and debris, in District waterways. Some of this material is deposited in creek channels and constitutes illegal dumping but is not reported to District hazmat or code enforcement staff due to the inability to establish an individual source or responsible party. In the spring of 2006 the District formed an internal focus group made up of water quality and field maintenance staff and various managers to better strategize how to identify root causes and sources of trash and how to reduce the load of trash to the creeks. This group has since evolved into the District Trash Work Group which includes a broader scope of District employees from watershed managers to field maintenance staff planners, and intermediate

managers. This group was formed to coordinate the District's internal and external trash related activities such as work with SCVURPPP, the San José/District Trash MOU, and non-governmental organizations. The group meets several times a year to discuss potential options and structure devices to capture trash and also protect the various natural resources in our creeks. This group is also an outcome of the District's ISO process.

District maintains three trash cleanup programs which are:

1) The Clean Safe Creek Outcome 1.4 (aka the Good Neighbor Program) which states "Neighborhood creeks will be frequently inspected and cleaned of litter and graffiti;"
2) The Adopt-A-Creek program which allows individuals, service organizations or companies to adopt a section of creek and have their name posted along that section of creek;
3) Unscheduled litter and debris removal associated with internal and external maintenance requests generated from the District's Internet website.

The District's previously described three programs collected and disposed of approximately 8,311 cubic yards of trash and debris from county waterways in 07-08. This year's breakdown by watershed is as follows; Guadalupe watershed 1,036 cubic yards (13%), Coyote watershed 1915 cubic yards (23%), West Valley watershed 1,428 cubic yards (17%), Lower Peninsula watershed 926 cubic yards (11%), and Uvas Llagas watershed had 3006 cubic yards (36%). The Guadalupe watershed Good Neighbor Program continues to conduct monthly homeless encampment cleanup activities along both the Guadalupe River and Coyote Creek. The Good Neighbor Program coordinates with the Santa Clara County Department of Corrections to utilize inmate labor for some of the creek cleanup activities. Additionally, the San José Conservation Corp labor is also utilized extensively during many of the trash removal operations. The Adopt-A-Creek program also supports trash removal from adopted sections of various creeks and this program is highlighted in the PIP activities section of the Annual Report.

The watersheds most affected by homelessness and illegal dumping are the Guadalupe and Coyote Watershed. The District constantly is utilizing its limited staff and financial resources to clean up these areas. The District works closely with the City of San José on trash and homelessness issues that challenge both agencies. Annually the District and the City of San José clean up three large trash accumulation sections of the Coyote Creek or the Guadalupe River as part of a Trash Memorandum of Understanding between the City of San Jose and the District. These activities benefit the local habitat by removing the trash before the next round of winter storms and preventing the material from being redistributed throughout the lower watershed and south bay. Additionally the District has a significant number of regular trash clean up locations within each watershed where streets, roads, expressways and highways cross waterways where trash tends to accumulate. The District also is a co-chair of the SCVURPPP Trash Ad Hoc Task group that works on assessment of trash issues as well as initiating installation of trash reduction best management practices.

Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Permit Reference	Responsible Party
3. Rural Public Works					
Goal 3.A. *To identify potential sources of sediment from Rural Activities along trails and streams and to repair or reduce the erosion potential at these locations. To provide erosion awareness outreach to the appropriate District field operations staff.*					
3.A.1	Continue to incorporate Rural Public Works guidelines as part of the Channel Maintenance Training to field staff and via tailgate meetings w/Field Operations Units.	Complete-Included as part of	May 08	C.2.a.	SWQU Rural Public Works Task Lead

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

Levee grading and large woody debris removal from creeks have been identified as activities subject to this performance standard. No rural roads or trail erosion problems have been identified or came to the attention of the District Environmental Management Unit staff during this fiscal year. No rural public works were constructed by the District this year. However several stream flood control or erosion repair projects have been worked on to continue to improve the quality of access roads and reduce the likelihood of the levee, access roads and stream banks being sources of sediment. The District did identify an area of our Camden storage yard that has the potential to allow sediment to migrate to the Guadalupe Creek and plans have been developed and submitted to have this upland area stabilized with cobbles to prevent sediment migration and provide water energy dissipation to allow sediment to settle on the site long before it reaches a creek.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
PUBLIC AGENCY ACTIVITIES

The District continues to enlighten staff of the importance of large woody debris for habitat during the Stream Maintenance Program training which supports the Channel Maintenance Pollution Prevention Program. The employees who receive this pollution prevention training are the same staff working on the stream maintenance/restoration programs at the District.

HIGHLIGHTS AND ACCOMPLISHMENTS

The District's River Morphology staff continues to emphasize to field and engineering staff the importance of woody debris in the creeks for wildlife habitat and to facilitate the reduction of potential erosion at various facilities by encouraging the creeks to remain in dynamic equilibrium.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

The District owns and operates the stormwater drainage systems at its facilities, which includes storm drains, catch basins, vegetated swales, open drainage ditches, utility trenches, and storm drain lines. Storm drains from District facilities discharge to creeks, the Guadalupe River, and recharge ponds. Storm drains outside District facilities are owned and operated by the local (city or county) jurisdiction.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
STORM DRAIN SYSTEM O & M

The District completed the following tasks:

1) Revised drafts of Stormwater Pollution Prevention Plans for the Corporation Yard, Headquarters Campus, Santa Teresa Water Treatment Plant.

2) Continued implementation of the storm drain inspection and cleaning program.

3) Continued weekly street sweeping functions at facility parking areas.

BMPs were formally inspected quarterly during non-stormwater observations at most District facilities except Coyote and Pacheco Pump Stations. The pump stations do not warrant non-stormwater observations due to the low potential for these types of discharges to occur. The Corporation Yard culvert inlet protection device (constructed of cinderblocks filter fabric and washed gravels) was inspected in October of 2007 and determined to be functioning well. The Corporation Yard culvert inlet protection device was again inspected in June 2008 and will be serviced in September of 2008 as it has collected sediment preventing this material from entering the Guadalupe River. Other BMPs are working effectively, as noted on the non-stormwater observation forms submitted. The three Water Treatment Plants conducted the required storm drain inspections required under this program.

HIGHLIGHTS AND ACCOMPLISHMENTS

Storm drain inspections and cleaning work orders continue to be distributed via the District's Comcate (field maintenance work order software) Preventative Maintenance Program for the three Water Treatment Plants. Each month facility maintenance staff receive a computer generated work order to inspect all storm drains at their facility and have them cleaned as needed. The Environmental Management Unit has been performing storm drain inspections since FY 2005 at the Vasona Meter Shop, Corporation Yard, Headquarters and Administration Campus and the Blossom Hill Annex to ensure compliance with Urban Runoff Management Plan.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

At one time the Corporation Yard was considered a significant potential source of contamination and the Corp Yard operations were not considered to be responsive to pollution prevention. However, over the last several years District Urban Runoff Program staff has been

instrumental in developing a significantly improved appreciation by Corp Yard staff of the need for pollution prevention. In addition, the staff of the Corp Yard have dramatically reduced the volume of potential pollutants stored on site and have implemented a very affective good housekeeping strategy. A District wide Green Business Certification has also brought a heightened environmental awareness to all District staff regarding pollution prevention.

Corp Yard stormwater samples were collected in the fall both upstream and downstream of the Sediment BMP.

HIGHLIGHTS AND ACCOMPLISHMENTS

The Corp Yard sampling has continued. Pollution Prevention and pollutant reduction has continued to be a focus of Corp Yard staff.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
WATER UTILITY DISCHARGE POLLUTION PREVENTION

PROGRAM EVALUATION

The District owns, operates, and/or maintains 3 water treatment plants, 2 pumping and metering stations, 1 pump station, 11 reservoirs, percolation facilities, water wells, a recycled water facility (South County Regional Wastewater Authority Treatment Plant), and distribution pipelines. All of these water facilities have a potential for discharging non-stormwater to surface water bodies.

The District continued reporting on all water utility O&M discharges. Please see attached inventory table (Table 6.1). Typical District discharges include raw water from water quality testing devices at District plants, San Tomas Injection Well, and Vasona Meter Shop testing.

The District's water utility maintenance staff perform all discharges. District staff implemented BMPs after consultation with the Environmental Management Unit.

HIGHLIGHTS AND ACCOMPLISHMENTS

This program's planned and unplanned notification policies and practices with the Regional Board have been so successful that the Regional Board has recommended that San Francisco Public Utilities Commission follow the same notification policy and practice that is used by the District.

Last year the Environmental Management Unit and the District's Operations Planning and Analysis Unit undertook a study to evaluate the turbidity effects in a stream during the cleaning and reconditioning of stream hydrography gauges. The goal of the this study was to determine 1) what kind of effect does stream gauge maintenance have on stream turbidity 2) to develop potential BMPs to reduce the monitoring costs associated with turbidity monitoring during this maintenance activity and 3) to see if it would be reasonable to recommend that "Stream Gauge Maintenance" be added to the categorical exemption category of the new Municipal Regional Permit. The study was conducted in three creeks two in jurisdictional area of the Central Coast Regional Water Quality Control Board, Bodfish Creek and Upper Llagas creek and one stream from the San Francisco Bay Regional Water Quality Control Boards jurisdiction, Los Gatos creek below Lexington Reservoir. After background readings were taken the study consisted of several Environmental Management Unit staff being stationed downstream of the stream gauge at either 50, 100, and 200 feet or 100, 200, and 300 feet. The results indicate that the turbidity in the stream at time did reach approximately 90 NTU's the streams recovered to background levels within an about an hour. The significance of this is that the impacts to the stream are limited in scope and likely much less detrimental

to the health of the stream compared to having several staff walking in the stream setting up some form of filtration/detention system and then later sending staff back into the stream to remove the filtration/detention system.

Last year the Environmental Management Unit had planning to conduct one more experiment using a "Dirt Bag" on a more sensitive stream. This experiment will take place this year and once this experiment is completed a short report will be forwarded to the San Francisco Regional Water Quality Control Board of our findings.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
CONSTRUCTION INSPECTION

SELF EVALUATION MATRIX

Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Permit Reference	Responsible Party
7. New Development and Construction Controls – Inspection Procedures ***Goal 7.A.*** *Continue to train District construction inspectors to inspect SWPPP implementation at construction sites.*					
7.A.1	Conduct annual Training workshop for CIP/CPRU inspection staff.	Incomplete. Training workshop postponed commensurate with anticipated finalization of the new NPDES Construction General Permit.	March 08	C.2.a URMP PS-6	SWQU
7.A.2	Conduct annual effectiveness evaluation.	Complete. 9-28-07 transfer of duties included process effectiveness evaluation and effectiveness of controls at District construction sites was assessed and documented Monthly Construction Site BMP Inspection Reports.	Jan 08	C.2.a URMP PS-6	SWQU
7.A.3	Continue to promote high frequency of construction site inspections. Maintain Training and Tracking tables.	Complete. District construction sites were inspected monthly and documented by inspection reports and a tracking table.	Monthly	C.2.a APRP	SWQU

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
CONSTRUCTION INSPECTION

PROGRAM EVALUATION

The Stream Water Quality/Regulatory Compliance Unit continued to conduct pre-rainy season inspections to facilitate site compliance whenever it was requested by Construction Inspection Unit staff. The frequency of construction site inspection coverage continued to remain high this past year. This was facilitated by Stream Water Quality/Regulatory Compliance Unit coordinating with the construction inspectors in the field and through the use of email reminders to Construction Inspectors to conduct SWPPP evaluations. Email reminder also included a copy of the tracking table.

HIGHLIGHTS AND ACCOMPLISHMENTS

The District continued to use the monthly inspection sheet developed in FY 02-03 to facilitate compliance and follow up inspections. The Stream Water Quality/Regulatory Compliance Unit continued to coordinate with the Construction Inspectors in the field to go over SWPPP implementation at construction sites. This coordination proved very successful and will continue in FY 08-09.

Construction Administration Unit continues to use the Incident Response/Pollution Prevention Hotline to contact Stream Water Quality/Regulatory Compliance Unit staff to report construction sites that are creating sediment discharges.

In FY 07-08, the District had 8 Capital Improvement Projects (CIP) under construction that included 6 flood protection/channel improvement projects, 1 water treatment plant projects and the new water quality lab. SWQ/RCU assisted with review of CIP SWPPPs as requested. A table showing the inspections completed is included with this section.

SANTA CLARA VALLEY WATER DISTRICT
2007-2008 CONSTRUCTION INSPECTIONS

8.A.2	Effectiveness Evaluation	Complete Feedback was solicited from District staff regarding the effectiveness of SWPPP inspections.	Feb 08	URMP	SWQU

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

The District operates 3 office buildings, 3 water treatment plants, 2 pumping and metering stations, 1 pump station, 1 corporation yard, 1 warehouse storage and supply facility, and 2 storage yards. Although the District operates one Corporation Yard, the District has Storm Water Pollution Prevention Plans (SWPPPs) for all 5 facilities. In FY05-06 several SWPPP's (Vasona, Corp Yard and Headquarters) were re-written and are currently under final peer review. In FY 06-07 the SWPPP revision for the Santa Teresa Water Treatment Plant was started.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
OTHER WATER QUALITY REQUIREMENTS

HIGHLIGHTS AND ACCOMPLISHMENTS

BMPs were formally inspected quarterly during non-stormwater observations at most District facilities except Coyote and Pacheco Pump Stations. The pump stations do not warrant non-stormwater observations due to the low potential for these types of discharges to occur. The Corporation Yard culvert inlet protection device (constructed of cinderblocks filter fabric and washed gravels) was inspected in October of 2007 and determined to be functioning well. The Corporation Yard culvert inlet protection device was again inspected in June 2008 and will be serviced in September of 2008 as it has collected sediment preventing this material from entering the Guadalupe River. Other BMPs are working effectively, as noted on the non-stormwater observation forms submitted. The three Water Treatment Plants conducted the required storm drain inspections required under this program.

9. Flood Control/Channel Maintenance					
Goal 9.A. *Implement Best Management Practices (BMP's) to protect water quality during maintenance activities.*					
9.A.1	Annual Channel Maintenance Training for O&M Staff	Complete-Conduct annual comprehensive training based on District Channel Maintenance Guidance Manual (CMGM).	June 08	URMP	EMU
9.A.2	Annual Lessons Learned Meetings	Complete-Solicited feedback from District staff and regulatory agency staff regarding the effectiveness of BMP's and any improvements or changes that need to be made.	Internal Nov 07 External Feb 08	URMP	EMU

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

HIGHLIGHTS AND ACCOMPLISHMENTS

The District maintains over 700 miles of stream channels to provide flood protection for the Santa Clara County communities. Under the Multi-Year Stream Maintenance Program (SMP) the District removes sediment, provides for erosion protection, and conducts vegetation management activities. Minor maintenance activities include trash removal, fence and access repair, maintenance of revegetation sites, and removal of downed trees or other blockages from the streams.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
WATERSHED MANAGEMENT REQUIREMENTS

During Fall 2007, the District removed approximately 97,000 cubic yards of sediment and completed bank protection projects totaling approximately 3960 linear feet (0.75 miles).

Annual SMP archeology awareness and BMP training was conducted on June 11, 2007 and 87% of District employees from the Watershed Field Operations Units, Watershed Program Support Units, Vegetation Management Unit, and Regulatory Compliance Unit received the training (79 employees).

BMP training evaluation forms were distributed during the training session and attendees were asked to complete them before leaving. All training sessions were rated excellent (32%) or good (68%) by the respondents. Suggestions for improving the training will be incorporated into next year's training.

The annual Internal Lessons Learned meeting was held on November 29, 2006 to discuss what went well and what was learned from the 2006 Stream Maintenance Program projects. The meeting reviewed the effectiveness of Best Management Practices (BMPs) and recommendations for their improvement. Those attending the meeting included individuals responsible for implementing various SMP components during the 2006 construction season. These included: Watershed Maintenance Managers, Engineering Unit Managers, Watershed Engineers, Regulatory Compliance Specialists, Environmental Planners, Water Quality Specialists, Biologists, Vegetation Specialists, Field Supervisors, and heavy Equipment Operators. Approximately 50 District staff attended the meeting.

BMP inspection checklists continued to be used for sediment removal and bank protection projects and for chemical and non-chemical vegetation management activities. The checklists provide documentation of BMP implementation at the SMP projects, inspection of the BMPs, and track any adjustments made to BMP implementation.

During FY 06-07, the District removed 91,815 cubic yards of sediment and completed bank protection projects totaling 3,192 linear feet.

Annual SMP archeology awareness and BMP training was conducted on June 11, 2007 and 87% of District employees from the Watershed Field Operations Units, Watershed Program Support Units, Vegetation Management Unit, and Regulatory Compliance Unit received the training (79 employees).

BMP training evaluation forms were distributed during the training session and attendees were asked to complete them before leaving. All training sessions were rated excellent (32%) or good (68%) by the respondents. Suggestions for improving the training will be incorporated into next year's training.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
NEW DEVELOPMENT PLANNING PROCEDURES

HIGHLIGHTS AND ACCOMPLISHMENTS

The following stream function improvement activities are not part of the permit requirements. However, in the interest of natural channel/creek design the District has been collecting geomorphic data and designing flood control projects in the upper watershed that incorporate various geomorphic features some of this work is overseen by the Office of Stewardship Planning's Watershed Planning and Asset Management Unit.

Thompson Creek

1. The consultant is preparing a final report which should be published in late 2008.

Upper Penitencia Creek

1. Collected data on Upper Penitencia Creek for continuous flow measurement for hydrologic and sediment transport modeling.
   a. Collection of continuous flow measurement data at Piedmont Road and at Berryessa Industrial Park continued.
   b. The data will be used to calibrate a continuous flow runoff model (HEC-HMS) for Penitencia Creek in 08-09.

2. Geomorphic Survey and Channel Stability Assessment.
   a. Collected a third year of suspended solids and bed load transport data for the winter to develop suspended sediment and bed load rating curves.

Berryessa Creek

1. This effort is similar to the Upper Penitencia Creek exercise. District staff has installed gages on Berryessa Creek for continuous flow measurement.
   a. The District continued to collect flow data measurements. Data is being collected upstream of Piedmont Road (which is the downstream end of the rural portion of the watershed) and at Hillview Road (which represents the combination of rural + urban watersheds).
   b. The data will be used to calibrate the continuous flow HEC-HMS model for Berryessa Creek.

2. Geomorphic Survey and Channel Stability.
   a. Continued the collection of suspended solids and bed load transport data during winter to develop a transport model.
   b. Extended the cross-sectional data collection to Hillview Road Bridge downstream of 237/Calaveras Road. This captured the eroding reach where Berryessa Creek runs parallel to the railway tracks.

3. Provided a stable channel design for flood protection to the US Army Corp of Engineers. This has now become the preferred alternative. We were requested to provide this design after the previous alternative developed by the District and the US Army Corp of Engineers developed for flood protection was not well received by the residents.

Adobe Creek
Construction began in early summer of 2008. The design incorporated some fluvial geomorphic in the deciding as could be accommodated considering the residential encroachment.

Stevens Creek
Designed some of the Blackberry farm project and observing construction activities

Alamitos Creek
District completed a design for erosion repair at Alamitos Creek and the construction was completed in the fall of 2007. This alternative generated 18,000 sf of mitigation credit which offsets the additional costs of the geomorphic stream stabilization features.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
PUBLIC INFORMATION/PARTICIPATION

HIGHLIGHTS AND ACCOMPLISHMENTS

The District serves a community of 1.7 million countywide and has excellent outreach programs to many sectors of the community. Key elements of the District's PIP Program include creek clean up events supporting citizen participation, attendance at community events targeting the general public, numerous workshops presented by the Water Conservation Unit, and the School Outreach Program.

GENERAL OUTREACH

The District attended 52 community events during FY 07-08. A listing of all events is included in this section.

The District's website continues to provide regular updates to the community. During the winter season, the District's home page featured a link to flood-related information, the District's efforts to protect the waterways in the event of a flood, and sandbag distribution sites. Our on-line maintenance request form empowers citizens to report dumping or waterway-related problems, and allows them to send messages to the appropriate watershed staff. The site also includes a link to the Santa Clara Valley Urban Runoff Pollution Prevention Program.

TARGETED OUTREACH

Workshops

In May 2008, the District's Water Quality, Groundwater Management, Vegetation Management and Water Use Efficiency Units worked together with the Loma Prieta Resource Conservation District, the University of California Cooperative Extension and the United States Department of Agriculture Natural Resource Conservation Service to conduct the sixth annual Stewardship for Small Acreages – A Series of Workshops on Land Management for Clean Water. The goal was to provide rural landowners with the resources needed to protect both surface and ground water quality on and off their property. The series took rural landowners through the steps of assessing their properties and developing action plans to address the highest priority items. The workshops were held at various small acreage homes. The four sessions included: general topics such as watersheds and conservation plans, groundwater quality, wells, septic systems and hazardous household products; Manure/Waste Management and Composting; Small Vineyards; and Fire Safety, Landscaping and Erosion Control. A total of 134 people attended the 4 sessions.

In March 2008, the Water Use Efficiency Unit conducted a four-part Water Efficient Landscaping Workshop Series. A total of 203 people attended the four sessions: Designing a Water-Wise Garden, Gardening with Natives, Water Efficient Irrigation Design, and Selecting Plants for Your Water-Wise Garden. Several Units came together to present two sessions of CreekWise Workshop for creekside owners on March

1 and March 15. The workshops included watershed education, water conservation, urban runoff and pollution prevention, invasive species, pest management and erosion control and being a good creek neighbor. A total of 59 people attended the two sessions.

Media Campaign

The District carried active media outreach during the winter of 2007-08. The District took advantage of the winter storms to inform and educate the public about the importance of keeping our creeks clean.

In addition to the District's own campaign, for the second year, we are participating in a regional water conservation campaign, funded by a state grant and led by San Francisco Public Utilities Commission and Bay Area Water Supply and Conservation Agency. The primary message of this regional campaign is that California is in a drought and everyone can take easy steps to save water now. The campaign includes a regional website that directs users to services and programs in their own service area.

Other Targeted Outreach

Flood Safety Notice 2007 was mailed in October 2007 to 100,000 flood plain residents. Although the mailer's main focus is flood preparedness and safety, it also contained articles on healthy creek ecosystems, keeping debris out of creeks and illegal dumping. A copy is included in this section.

In January 2008, the District mailed out more than 700,000 copies of Valley Water News, a Countywide newsletter, to residents and businesses in Santa Clara County. The newsletter included information emphasizing the need to keep our streams free of trash and chemicals. It also provided the 24-hour pollution prevention number to report illegal dumping.

AquaFacts, the District's employee newsletter, continued this year as an online publication. AquaFacts contained 4 articles relating to stormwater pollution prevention and watershed education during FY 07-08. Topics included alternative commute methods, grass gobbling goats, and two creek cleanup events. The employee newsletter is an excellent and cost-effective method for delivering urban runoff, pollution prevention, and watershed messages to District employees. In addition to AquaFacts, several articles were included in the District's daily "New You Can Use" emails.

An all employee Pollution Prevention Week email campaign was conducted September 17 through 23, 2007. Five emails were sent providing pollution prevention tips. Topics included: general pollution prevention week information, proper disposal of fluorescent bulbs, batteries and cell phones, proper pesticide use and disposal, fighting pollution on the road and protecting your Watershed. Numerous

requests for brochures were received from the employees, as well as many comments on the campaign. This continues to be a good method to present pollution prevention ideas to District employees.

Neighborhood work notices are posted on the District's web site for all stream maintenance and capital projects. Most notices include information on watershed.

EDUCATIONAL OUTREACH

The District's educational outreach program serves a diverse population and responds to the needs of the schools throughout the County. Programming is consistent with State standards and regularly integrates messages and issues of other District communication programs. The District's School Outreach Program visited 122 public and private schools reaching 17,967 students and 770 educators and conducted 6 teacher workshops during FY 07-08. The District offers a comprehensive education outreach program for early childhood, elementary, middle school, high school, and college-aged students to establish a foundation for understanding and appreciation of water resources. The program provides age-appropriate classroom presentations, teacher in-service training in water education, and tours in order to help children understand and appreciate their local water resources. Classroom presentations include hands-on experiments, information on watersheds, urban run-off, pollution prevention, flood plains, conservation tips, water awareness activities, flood management, and careers in the water industry. Scheduling is conducted on a first-come, first-served basis and provided free to schools in Santa Clara County. Number of students by watershed, city, grade, focus of presentation, and school district are included with this section. AquaDrops eNews, an electronic teacher's newsletter was sent out in November 2007, January 2008, March 2008 and May 2008.

The Coyote Creek Outdoor classroom encompasses land alongside Coyote Creek and includes a covered gazebo classroom for students and teachers, as well as a platform overlooking the creek where students can study the stream's natural habitat. Groundwater monitoring wells on site enable students to observe and evaluate the underground water table and understand how surface and groundwater interact. The site features two planting areas – one site close to the creek planted with native trees and shrubs to improve the stream's wildlife habitat, and a "high terrace" or upland area landscaped with oaks, grasses and other native plants to demonstrate drought-tolerant gardens. During the 2007-08 school year, the program provided 4 class tours for 112 students and 4 teachers.

Morley Park Outdoor Classroom in the City of Campbell provides the opportunity to teach students about the purpose of wetlands, urban runoff and the value of percolation ponds. During the 2007-08 school year, the program provided 1 tour for 32 students and 1 teacher.

Christmas Hill Park, located at the southwest end of Gilroy, encompasses 51 acres including natural wilderness with trails, picnic/barbecue areas, horseshoe pits, jogging and hiking paths, children's play areas, open play field, softball/baseball fields and open grass play area. The

school tour includes watershed, groundwater, urban runoff, weather station and water quality testing activities. During the 2007-08 school year, the program provided 6 tours for 120 students and 6 teachers.

School Outreach Program staff developed and implemented a new activity this year. Mapping History of the Santa Clara Valley demonstrates growth and change in our valley over the past 5,000 years and into the future. Participants listen to period music, share scripts that describe six time periods, and then place appropriate symbols of change on a 12' x 12' map of Santa Clara County. The activity begins with the Native American period, 3200 BC to 1750 AD, adding wildlife, vegetation and one figure to represent the 10,000 Native Americans in the entire Bay Area. By 2050, participants have added farm animals, orchards, railroads, cities, reservoirs, water and wastewater treatment plants, hi-tech businesses and 260 figures to represent a projected population of 2,624,670.

CITIZEN PARTICIPATION

The District established the Adopt-A-Creek Program in 1994 to encourage residents of Santa Clara County to take an active role in helping to preserve the health and beauty of our local creeks. Due to continued staffing changes and shortages, Adopt-A-Creek permit information was not tracked this past year. In FY 07-08, lack of staff resources hindered the tracking of activities.

The District participated in two creek cleanup events: Coastal Cleanup Day on September 15, 2007 and the National River Cleanup Day on May 17, 2008. During Coastal Cleanup Day, 865 volunteers collected 31,694 pounds of trash and 12,052 pounds of recyclables at 24 sites. On National River Cleanup Day, 669 volunteers collected 17,500 pounds of trash and 11,518 pounds of recyclables at 27 sites.

PROGRAM EVALUATION

The District uses numerous methods to conduct outreach, including written brochures, radio, newspaper, website, theater slides, bus back ads, community events and workshops. The wide variety of methods increases the probability that the messages are being received and understood. Combining all these different methods is very effective at meeting our public education goals. The variety of methods also ensures that many segments of the Santa Clara Valley population are being reached, including residents, businesses, students, as well as people from other locations. The District evaluates the different outreach methods and continuously seeks to improve messages and outreach methods. We work collaboratively with many other agencies and organizations to conduct outreach and will continue these partnerships in the future.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
PUBLIC INFORMATION/PARTICIPATION

GENERAL OUTREACH

The District feels that attendance at community events is an effective public outreach method. The individual contact made at the events allows staff to answer specific questions and deliver more extensive messages. A wide variety of information can be distributed and the games and displays are a good way to attract event participants.

TARGETED OUTREACH

The District's targeted outreach efforts provide in-depth training and information to a small, targeted audience with the opportunity to answer specific questions from individuals in the group. This method allows the District to assist targeted groups to meet regulatory requirements, change behaviors that impact water quality, and provide the knowledge needed for the group to solve any water quality problems they may be experiencing. The District plans to continue this outreach method as we feel it is a valuable service to these targeted audiences and can positively impact water resources.

EDUCATIONAL OUTREACH

Teacher surveys were distributed again this year. Survey results were not available when the Annual Report was prepared. The District feels that the educational outreach program is a cost-effective method for educating children, teachers, and indirectly, parents. Based on the teacher's surveys, minor adjustments will be made to the program.

CITIZEN PARTICIPATION

The Adopt-A-Creek program and the creek cleanup events are very effective at creating and increasing stewardship and individual responsibility for the county's water resources.

Santa Clara Valley Water District

16th Annual

Water Efficient Landscaping Workshop Series

Learn how to beautify your garden and use water more efficiently in these four Saturday workshops. With landscape and irrigation experts as our guides, we'll discuss water-wise landscape design, gardening with California natives, water-efficient irrigation design, and selecting plants for a water-wise garden.

All workshops are
FREE!
Call (408) 265-2607, ext. 2554, to reserve your space. These classes are very popular so call today!

www.valleywater.org

Workshops will be held at:
Santa Clara Valley Water District
Headquarters boardroom
5700 Almaden Expressway
San Jose, CA 95118

Saturday, March 1, 2008 **9 a.m. to noon**
Designing a Water-Wise Garden
San Jose-based native garden designer, artist, and sustainable landscaper, Alrie Middlebrook will focus on sustainable gardening methods to reduce water consumption in the garden. How a garden is designed and laid out originally can make a garden efficient or inefficient. We will focus on hardscape, topography, and what the homeowner can do to take advantage of existing settings.

Saturday, March 8, 2008 **9 a.m. to noon**
Gardening with Natives
Landscape Architect, Stephanie Morris, will discuss the exciting topic of how to garden with native plants. Learn how to select native plants that do well in a garden setting. Planting techniques and irrigation strategies for the native plant garden will also be covered.

Saturday, March 15, 2008 **9 a.m. to noon**
Water Efficient Irrigation Design
Irrigation Consultant, Miguel Aspeitia, will demonstrate how to efficiently design/retrofit your landscape irrigation system using drip, micro and spray heads.

Saturday, March 22, 2008 **9 a.m. to noon**
Selecting Plants for a Water-Wise Garden
Alrie Middlebrook will focus on Mediterranean, drought-tolerant and native plants that can bring out sustainable beauty in the garden. Ms. Middlebrook is an expert with California native plants, but in this workshop she will share her full library of knowledge about water-wise plants for California.

042733

NEW!

CreekWise Workshop for creekside owners

Learn how to protect your watershed, conserve water on your property, minimize urban runoff pollution and be a good neighbor to the creek adjacent to your property in just one three-hour session on either date below.

Date: Saturday, March 1, 2008 or Saturday, March 15, 2008

Time: 1 p.m. to 4 p.m.

Location: Santa Clara Valley Water District
Headquarters boardroom
5750 Almaden Expressway
San Jose, CA 95118

Cost: Workshops are **free!** To reserve a space, call (408) 265-2607, ext. 2554.
Call today as class size is limited!

Topics will include:

Watersheds: Kathy Machado, Education Outreach Coordinator, will define watershed and show how your landscape fits into the larger scheme of things.

Conservation: Karen Morvay, Water Conservation Specialist, will share best practices to conserve water in your home and garden.

Urban Runoff: Kate Slama, Water Quality Specialist, will define urban runoff and show what happens at home affects the creek. Her presentation will include home and auto runoff, pet waste and proper disposal of trash and household hazardous waste.

Gardening: Judy Ingols, Revegetation Supervisor, will discuss invasive species, pest management, drought-tolerant gardening, erosion control and

Being a good creek neighbor: Denise Uriarte, Program Administrator, will conclude the workshop with ways to be a good neighbor to your local creek. Her content will include an overview of the creek ordinance for Santa Clara County, home improvements, what is and isn't allowed, permits, decks and fences, private access to public easement and how to protect the health and safety of the banks in your creek.

042734

typically occurs after several days of heavy rain. After the ground is saturated flooding can occur very quickly with little or no warning if a particularly powerful storm burst occurs. While the water district's many reservoirs provide some buffer between rainfall and creekflow on some streams, most creeks do not have a reservoir upstream and levels rise quickly during intense rainstorms.

When creeks overbank, the floodwater typically flows swiftly through neighborhoods and away from streams. Dangerously fast-moving floodwaters can flow thousands of feet away from the flooded creek within minutes.

Stay safe before, during and after a flood!

www.valleywater.org • 408.265.2600

Photo: Residential flooding in Palo Alto from San Francisquito Creek in 1998.

The local hazard

In Santa Clara County, flooding is caused by overbanking from local creeks, or potentially from extremely high tides in San Francisco Bay. "Localized flooding" also occurs when storm drains cannot convey rainfall from stream to the creek fast enough. More than 50 creeks in Santa Clara County are known to cause significant flooding. [illegible] the flood [illegible] creeks as determined by the Federal Emergency Management Agency (FEMA) and the Santa Clara Valley Water District.

Look inside for more information on how you can [illegible]

Santa Clara Valley Water District

Stay safe before, during and after a flood

What you can do to protect your property from flooding

- Have a licensed plumber install "check valves" in sewer traps to prevent floodwater from backing up into the drains of your home.
- Periodically examine your property for flood risks. Seal any cracks in the foundation and exterior walls of your home and seal small openings around pipes with grout or concrete, crack filler or caulk.
- Gather emergency building materials, such as plywood, plastic sheeting and sandbags. For sandbag locations and to find out how to use them, visit www.valleywater.org or call 1.888.439.6624.
- Construct barriers to stop floodwater from entering the building.
- Inspect rain gutters and drainage; consider tarping or seeding any unvegetated slopes on your property.

Before a flood

- Prepare a family disaster plan for floods, earthquakes and fires. Make an emergency kit for your home and for your car with emergency supplies such as a flashlight, batteries, water and non-perishable food. Move insurance policies, documents and other valuables to a safe deposit box.
- Be aware of the locations of streams and drainage channels in your neighborhood (see the list of local "Creeks that flood" on the back).
- Learn how to turn off utilities to your home and keep your car's gas tank full so you won't be stranded.
- The smartest thing you can do to prepare for floods is purchase flood insurance.

During a flood

- Be aware that flash flooding can occur and move immediately to higher ground.
- Tune to your local radio and television stations for emergency information, traffic updates and instructions.
- If you must evacuate, turn off utilities at the main switches or valves. Disconnect electrical appliances. Do not touch electrical equipment if you are wet or standing in water.
- If advised to evacuate, do so immediately. Evacuation is easier and safer before floodwaters become too deep.
- Do not walk through moving water. Six inches of moving water can make you fall. If you have to walk in water, walk where the water is not moving. Use a stick to check the firmness of the ground in front of you and to aid in balance.
- Do not drive into flooded areas. If floodwaters rise around your car, abandon the car and move to higher ground. You and the vehicle can be quickly swept away. A foot of water will float many vehicles. Two feet of rushing water can carry away most vehicles including SUVs and pick-ups.

After a flood

- Listen for news reports on whether the community's water supply is safe to drink.
- [illegible] floodwaters may be contaminated by oil, gasoline, [illegible] may be electrically charged from [illegible]

Santa Clara Valley Water District

Do you need flood insurance?

Your homeowners insurance does not cover losses from flooding. Assistance from the federal government in the form of reconstruction loans would be offered only if a federal emergency is declared. Unlike disaster loans, flood insurance payments won't need to be repaid.

Federal law requires flood insurance if you have a federally regulated mortgage and your building is in an area shown on maps prepared by the Federal Emergency Management Agency (FEMA) as subject to flooding during a 100-year event. Lenders are legally responsible for determining if a flood insurance policy is required for a loan, but your city will provide you assistance in reading and interpreting the FEMA Flood Insurance Rate Map and provide FEMA elevation certificates for review. In some cases, FEMA will lift the flood insurance requirement if flood protection projects have been completed. There can be as much as a 12- to 24-month delay between a project's completion and the update of the maps that generate this mailing list.

[illegible] There is a 30-day waiting period before flood insurance takes effect. Contents coverage is separate, so renters can insure their belongings. Most insurance agents sell it; call 1.888.724.6978, or go online at [illegible] to find a local agent.

Special permits required in floodplains

All construction within a FEMA-designated floodplain requires a permit from your local municipality. Contact your community's building department for more information before you build, grade or fill. Use the contact phone list provided on the back.

Healthy creek ecosystems

A healthy stream is an irreplaceable natural resource and a wonderful amenity that can bolster a property's value. Make the most of your local creeks by helping to keep them healthy. Through proper care of stream banks and riparian vegetation, you can enhance your property, prevent erosion problems, avoid flood losses, preserve water quality, and contribute to the survival of fish and wildlife. The water district plans to restore an estimated 100 acres of tidal and/or riparian habitat by 2016. This will help with ecological and natural flood protection functions throughout the county.

Working together as members of the Water Resources Protection Collaborative, representatives from the water district, cities, the county and business, agriculture, streamside property owners and environmental interests created a manual of model guidelines and standards for land-use near streams. This manual can help creekside property owners large and small to make the right decisions in caring for their property. Find a copy at www.valleywater.org and type in "guidelines and standards" in the search box.

Keeping debris out of creeks helps water flow

Creeks are a valuable natural resource that not only support sensitive [illegible]dlife and ecosystems, but also serve as natural drainage systems, carrying stor[illegible]ter away from homes, roads and businesses, and safely to the bay. For our waterways to carry more water during heavy rainfall, it is important that creeks are kept free of trash and debris, which can impede the flow of water and cause flooding. While most people realize that trash and man-made chemicals should not go into a creek, many don't know that yard waste, leaves and soil also pollute a creek and can obstruct water flow, resulting in flooding and erosion.
Where we own the creek or have easement, the water district repairs creek banks and levees, removes sediment from creek channels, inspects waterways and cleans up illegally dumped items such as shopping carts, cans and general litter.

Do not dump

It is illegal to dump anything into a creek or storm drain. You can help keep the storm drain and flood management systems operating at capacity by reporting incidents of illegal dumping. Drains in your street flow directly to local creeks. Storm drain systems, the gutters and drains in the street are all maintained by cities. To report localized flooding caused by blocked storm drains, call your city's public works department. Their phone numbers are listed on the back.
To report illegal dumping, call the Santa Clara Valley Water District Illegal Dumping Hotline (24 hours) 1.888.510.5151.

Delta solution key to our economy and environment

It has been said that as long as clean water flows when people turn on their taps, they don't care where it comes from. That may have been true in the past, but the time has come for all of us to pay attention to water supply issues because at stake is the Bay Area's future — its economy, its vitality and its environment.

In 2007, a court ruled that up to one-third of the water normally delivered through the Sacramento-San Joaquin Delta to families and farms be curtailed to protect an endangered fish.

As the court ruling confirmed, the Delta is in peril and consequently so is the water supply of some 25 million Californians. Water conveyed through the Delta constitutes almost half of Santa Clara County's water supply.

Delta collapse would cost billions

While the ruling resulted in many cities and utilities scrambling for water supplies and considering water-use restrictions, it has also provided impetus to developing long-term solutions.

A network of aging and eroding levees, subsiding islands, climate change, wastewater discharge, toxics, mounting regulatory uncertainties, and a struggling ecosystem plague the Delta. Studies predict a 60 percent chance that an earthquake in the Delta region over the next few decades could cause a possible Katrina-like collapse of miles of levees. This could halt water supply deliveries through the Delta for a year or more, resulting in an estimated $40 billion loss to the state's economy.

The water district uses imported water to supply our treatment plants as well as replenish and stabilize our groundwater basins, which were over-drafted in the early 1900s and caused land subsidence.

The governor-initiated "Delta Vision" process is currently under way and major Delta decisions are expected to be made in 2008. A cabinet-level committee will make a recommendation to the governor in October 2008. The legislature will also weigh in on the policy. Finally, there could be a bond measure on the ballot in 2008 to provide funding to advance a comprehensive Delta solution and infrastructure investment program.

The water district will continue to participate in these efforts to ensure the residents of Santa Clara County continue to have a reliable, high-quality water supply today and in the future.

Sacramento-San Joaquin Delta

EPA
WATER EFFICIENCY
LEADER AWARD

Water savings deliver EPA award

Santa Clara Valley Water District, which helped county residents and businesses save more than 18 billion gallons of water a year, has received a U.S. Environmental Protection Agency 2007 Water Efficiency Leader Award.

These water savings, made possible by the water district's many water-use efficiency programs, amount to about 12 percent of Santa Clara County's annual water use and are enough to serve 110,480 families a year.

The award is designed to recognize companies, utilities, government organizations, and individuals that display leadership, innovation and water saving. The other five national winners are Intel Corporation, Frito-Lay, Lackland Air Force Base in Texas, the Kentucky Pollution Prevention Center, and Allan Dietemann of Seattle Public Utilities.

Due to economic growth, improved quality of life, increased stewardship of natural resources, demographic shifts, increased demand, aging water infrastructure and climate change there is a national need for more efficient use of our water resources.

"We applaud these winners for saving water, energy and money for America's families and communities," said Benjamin H. Grumbles, EPA's assistant administrator for water. "They're proving innovative technology and environmental stewardship can help conserve our country's greatest liquid asset."

Appreciating the recognition, General Manager Stan Williams said, "Water-use efficiency is a central part of the water district's long-term strategy to meet growing water needs. By 2030, we hope to meet nearly 30 percent of the county's total annual water use through water conservation and water recycling."

Flooding from Coyote Creek in San Jose in 1997

Thinking flood safety

Federal law requires flood insurance if you have a federally backed mortgage and your building is in an area shown on maps prepared by the Federal Emergency Management Agency (FEMA) as subject to flooding during a 100-year flood event (an event that has a 1 percent chance of occurring in any given year).

While lenders are legally responsible for determining if a flood insurance policy is required for a loan, your city provides assistance in reading and interpreting the FEMA Flood Insurance Rate Maps. This assistance includes information on whether a property is in the 100-year floodplain, which FEMA flood zone, and elevation certificates, if available. Your city can also provide information about flood insurance purchase requirements. If you need a city contact number, call the water district at 408.265.2607, ext. 2650.

Independence brings greater accountability

The water district became independent in January 2007, making the district more directly accountable to Santa Clara County voters. The new law ended the duplicative county oversight of the water district's budget and other procedural holdovers from a 1968 merger of the former Santa Clara County Flood Control and Water District and the Santa Clara Valley Water Conservation District to create the present-day Santa Clara Valley Water District.

Updating the District Act

The water district was created by an act of the California Legislature. In the upcoming legislative session, the district will work with the state legislature to update and modernize our District Act. Proposed changes to the District's Act include:

- Strengthening the district's ability to better manage its water supply
- Extending the special tax exemption to permanently disabled low-income individuals
- Clarifying provisions of the Act that were originally drafted prior to the enactment of CEQA
- Maintaining a seven-member elected board of directors
- Adding language to include climate change and climate protection as a district responsibility

In February of 2008, the district will conduct three public meetings to gather input on the proposed changes. For more information on the meetings, visit www.valleywater.org

Keeping water flowing

Creeks are natural drainage systems, carrying stormwater away from homes and businesses, and they are valuable natural resources that support wildlife and ecosystems. It is important that creeks are kept free of trash. While most people know that trash and chemicals should not go into a creek, many don't know that leaves and soil also pollute and obstruct flow, and may result in flooding.

It is illegal to dump anything into a creek or storm drain. Storm drains in your street flow directly to local creeks. To report illegal dumping, call the district Pollution Prevention Hotline (24 hours) at 1.888.510.5151.

VALLEY WATER NEWS

ANNUAL ISSUE 2007

Santa Clara Valley Water District

2007 Highlights:

PG 3 Water testing lab construction under way
PG 4 Pajaro Freshwater Wetlands construction begins
PG 5 Construction begins to improve Lexington Reservoir's Lenihan Dam
PG 5 Willow Glen Way Bridge replaced
PG 6 Penitencia upgrades completed
PG 7 Water district receives national EPA award
PG 7 Water district becomes independent

042738

Coyote Parkway Wetland

Bringing nature back with wetlands

With the breaching of the Island Pond levees in 2006, the water district helped the U. S. Fish and Wildlife Service (USFWS) advance the ambitious South Bay Salt Pond Restoration Project to restore 15,100 acres of former salt ponds in South San Francisco Bay.

The water district, which had plans to create tidal wetlands elsewhere to compensate for impacts from its flood protection activities, decided to instead join with the USFWS and the Don Edwards San Francisco Bay National Wildlife Refuge to restore tidal action to the 475-acre Island Pond Complex adjacent to Coyote Creek.

With portions of the levee opened, sediment in bay waters is naturally filling the ponds, resulting in revegetation of the ponds and creation of habitat for waterfowl, shorebirds, fish and other wildlife. The water district and USFWS are currently monitoring the success of the project.

Restoring the Bay

Restoration of the Island Ponds is just one component of the long-term plans to restore the South Bay. Lessons learned from this restoration effort will inform future phases and help make the larger restoration project successful.

In addition to tidal wetlands, the water district is also making efforts to create freshwater wetlands.

In 2007, the water district completed construction of the Coyote Parkway Freshwater Wetland, located next to Coyote Creek in south San Jose. Wetland vegetation, including 30,000 native plants planted in the fall and winter of 2006-07, is taking root and flourishing.

Later in 2008, the district will complete the construction of a nine-acre seasonal freshwater wetland along the Pajaro River, two miles south of Gilroy.

Major dam improvement project begins

A two-year construction project to fix a recurring problem at Lexington Reservoir's James J. Lenihan Dam began in November 2007, with crews drilling a U-shaped tunnel through the rock-solid hillside east of the reservoir. The project will replace the existing outlet pipe at the base of the large earthen dam.

Although the current structure is safe, the outlet pipe has buckled several times in past and has required repeated repairs. Because of the unreliable nature of the old pipe, dam regulators do not allow full releases from the reservoir to recharge groundwater basin and to sustain wildlife in Los Gatos Creek during dry months. Groundwater basins provide water to meet approximately half of the county's water needs.

A new 54-inch-diameter pipe will be placed inside the 2,000-foot-long and 12-foot-high tunnel which is being dug around the dam in Saint Joseph's Hill.

The reservoir water level will be lowered significantly during the spring of 2008 to accommodate the construction work in the summer.

New tunnel in Saint Joseph's Hill

Willow Glen Way Bridge

Joining hands to bring better return on investment

After a year of construction, the water district and the City of San José opened the beautiful new Willow Glen Way Bridge, which helps serve both flood protection and transportation needs of the community.

The bridge, which replaced a 90-year-old bridge, is wider and has a longer span. It accommodates channel widening planned for a future flood protection project, enhances stream habitat as well as improves traffic and pedestrian safety.

To better leverage collective resources and maximize the return on investment, the district is always looking for opportunities to partner with other agencies on multi-purpose projects.

Another such joint effort is the replacement of the Bollinger Road Bridge over Calabazas Creek. The project is in partnership with the City of Cupertino and will benefit neighborhoods in San Jose and Cupertino. When completed in October 2008, it will reduce potential flooding and improve safety for bicyclists, pedestrians and automobiles.

Tax break for seniors

The water district offers qualifying low-income seniors an exemption from the Clean, Safe Creeks and Natural Flood Protection Plan Parcel Tax approved by county voters in 2000.

The exemption is available to Santa Clara County residents who meet these requirements:

- Own and occupy their single-family home, condominium or townhome, (mobile homes on rented spaces in parks are not eligible)
- 65 years of age or older as of June 30, 2007
- Total household income of $38,873 or less for 2006

Seniors must apply for the exemption by filling out an application. The application is retroactive and seniors can claim exemptions back to 2001.

To obtain an application or get more information, call 408.265.2607, ext. 2810, or send an e-mail to juliewilson@valleywater.org.

Penitencia upgrades completed

In 2006, the water district completed the water treatment upgrades at the Penitencia Water Treatment Plant, which now uses ozone to purify water. The completion of this project paved the way for landscape improvement, an effort carried out in close cooperation with the neighboring community.

After nearly two years, landscape plantings, vine screens and wall facades have been completed. New low-water use plantings are maturing and will offer seasonal color and a more professional appearance to the facility.

The improvements also include a new gateway entrance, concrete block retaining walls, new pavement and the removal of high maintenance lawns.

Saving water, money and the environment

Did you know that conserving water will not only cut your water bill, but also save energy and protect the environment? In California, the biggest use of electricity is for pumping and treating water. The water district offers various FREE water conservation programs and rebates for individuals and businesses.

For Residents:

As part of the Water-Wise House Call program, a trained technician visits your home or apartment complex and surveys sprinklers, toilets etc. to show where water savings can be made.

Rebates of $100 to $1,000 are offered for a variety of water-efficient equipment including: high-efficiency toilets (up to $125); and clothes washers ($100 - $150); water softeners ($150); water-efficient landscape materials (up to $1,000); and efficient irrigation equipment (up to $1,000). Some restrictions apply.

For Businesses:

High Efficiency Toilet Installation Program — Includes new toilets and installation for apartments and businesses throughout the county.

Water-Use Survey — Involves a survey of all aspects of onsite water use and provides recommendations on projects to increase your facility's water efficiency.

Irrigation Technical Assistance Program — Provides site evaluations to assist property owners to better manage their landscape water use.

From $400 up to $50,000 in rebates are offered for a variety of water-efficient equipment including: high-efficiency clothes washers ($400); cooling tower conductivity controllers ($900); various process and equipment upgrades (up to $50,000); water-efficient landscape materials (up to $10,000); efficient irrigation equipment (up to $4,000); and weather-based irrigation controllers (up to $1,100). Some restrictions apply.

For more information visit our website at www.valleywater.org or call our conservation hotline 408.265.2607, ext. 2554.

New water quality lab enhances capabilities

The water district is constructing a $17.5 million water quality laboratory to ensure that county residents continue to receive some of the most pure and healthy water in the country.

The new lab, situated in San Jose and expected to be open in March 2008, will help meet an ever growing need for water sampling and testing because of more stringent water quality standards.

Meeting rising demand

The new lab will replace the existing lab at the Rinconada Water Treatment Plant in Los Gatos. Since the first lab opened in 1968, the county has seen two more water-purification plants come online and almost half of the county's water supply is now imported through the Delta. Both the treated water and "raw" imported water require constant monitoring to ensure their safety.

In addition, the county's water supply contained in the local groundwater basins also undergoes extensive sampling and testing.

As a result, the demand for testing water has increased from 1,000 samples annually to the current 140,000 samples a year. Today, water is tested to look for a wide range of potential contaminants including bacteria, organic substances, pesticides, fertilizers and toxic chemicals.

The new building design is "green" and it takes advantage of natural light and has sophisticated climate controls to reduce energy consumption. In addition, rainwater runoff from the site will be channeled to a filtration and detention basin alongside the lab before it enters the nearby Guadalupe River.

New lab in San Jose

Tap water: the clear choice

In September 2007, the water district board of directors banned the purchase of bottled water with district funds as well as the sale of the products in its cafeteria. The decision signaled the water district's determination to inform the community about the environmental problems, financial waste and safety misconceptions surrounding bottled water.

Tap water is subject to more rigorous testing and purity standards than bottled water. In fact, a four-year study by the Natural Resources Defense Council found that a third of the bottled water tested contained levels of contaminants violating state limits or guidelines.

To ensure that the water supplied is clean, safe and better tasting, the water district has implemented an advanced technology for water purification known as ozonation. At the Santa Teresa and Penitencia water treatment plants, ozone is used in place of chlorine as the primary disinfection method.

Bottled water also has serious environmental impacts. According to the Pacific Institute, producing the water bottles for American consumption in 2006 required the equivalent of more than 17 million barrels of oil. Bottling the water produced more than 2.5 million tons of carbon dioxide, a greenhouse gas contributing to climate change.

To protect the environment and your quality of life, choose tap.

Think before you spray

Pesticide use at district facilities is defined in the district's approved "Pesticide Policy." The purpose of the policy is to control pests while protecting employee health and the environment from chemicals. We need to remind not only the official district employees who apply pesticides at district facilities, but those of us who wish to apply "lethal doses of life-ending bug stuff" on those pests we might encounter, that we are all required to adhere to the following as stated in the Pesticide Policy:

- Aerosol pesticides shall only be purchased or used by district staff licensed by the State in the appropriate categories for product application.
- A State-certified Qualified Applicator with the appropriate endorsements shall provide immediate oversight for application of all pesticides. (Certified staff must be on site at all times herbicides are applied.)

Keeping food, beverages, plants, and flowers out of buildings, cubicles, and conference rooms will greatly lower your chances of having a pest problem. If you do have a problem, please contact the Facilities Help Desk at extension 3020, for tips in helping control the problem. Facilities uses Orange Spray to control ants. Orange Spray can be used with no ill effects to the employees, except for the strong orange smell.

Contact Kate Slama, Stream Water Quality Unit, extension 2739, for more information on minimizing pesticide use in your garden and at home or to request a copy of "Pests Buggin You? A Pocket Guide for Choosing Products Less Toxic to People and Pets." Additional information can also be found at MyWatershedWatch.net; check out the Got Bugs? section. For FREE disposal of unwanted pesticides, contact the Santa Clara County Household Hazardous Waste Program at 408/299-7300.

Join the statewide effort to keep creeks clean!

Volunteers needed Sept. 15 to pick up litter from 22 sites in Santa Clara County

by Ed Morales, Public Information Representative II

Slip on your gloves, wear some sturdy shoes, come with lots of energy and get ready to join thousands of other Californians in one of the biggest environmental events of the year: Coastal Cleanup Day on Saturday, Sept. 15.

From San Francisquito Creek in Palo Alto to Uvas Creek in Gilroy, the event kicks off at 9 a.m. and ends at noon. There are 22 locations around Santa Clara County and one of them is sure to be close to you!

Cleanups benefit our local waterways with the removal of trash and pollutants, and by raising awareness of creeks and creek-health issues. Every day should be cleanup day.
The annual effort not only helps keep streams clean, but improves the health of local watersheds, preserves habitat for fish and wildlife, and enhances the beauty of trails, parks and open space areas.

In 2005, more than 1,000 volunteers pulled nearly 22,500 pounds of trash — including a washing machine, a Pentax camera, a purple plastic frog and a pair of "mint-condition" high heel shoes.
Sponsored by the California Coastal Commission, Coastal Cleanup Day is coordinated locally by Creek Connections Action Group, a coalition of local public agencies including the district.

Since the group's inception in 1995, thousands of volunteers have taken part in hundreds of cleanups to remove tons of trash from local watersheds.

To volunteer or for more information on how to sign up, please call me at ext. 2880. You can also go to www.valleywater.org , and click on the "Cig-Egret."

Gettin' out of the cars

Commute survey shows while most people drive, alternative methods are making gains

by Tony Mercado

The gas still guzzles.

Even with fuel prices going higher, the gas powered vehicle rules the road as the main way to get employees from home to the office, results of the district's recent commute survey show.
Still, the staff from the Environmental Regulatory Compliance Unit who initiated the survey said they were pleased by the number of people actually doing something to reduce the carbon footprint of their communities.

"People are actively thinking about this topic and it is motivating them to action," Associate Engineer Dale Jacques said.

Twenty-five percent of the 385 survey responders said they get to work once a week by means other than their gas powered cars. One in 10 purchased and drive either hybrids, diesel-powered vehicles or ride a scooter or motorcycle. One in 20 use public transportation. And still another one in 10 either car pool, walk, bike or telecommute.

"I think it shows that employees, as a whole, are conscientious and doing what they can to make their commute a little easier on the environment," said Water Quality Specialist Kate Slama, promoter of the Pollution Prevention Week (P2) program at the district.

The group hopes to tie in the data with the district's strategic initiative dealing with global climate change that will result in some tangible support.

"Providing more showers and bike lockers, perhaps even some incentives such as free passes on public transportation, discounts at cycle shops or even highlighting a commuter of the month on the web page would be great," said Jacques. "The district as an organization could think of its employees' commutes as part of its own carbon footprint."

In the meantime, Slama said she plans to continue promoting alternate forms of commuting beyond P2 Week. After all, when you're talking about cleaning up the environment, everyone's a winner.

How far are we driving?

Responses: 385

Length of round-trip commute in miles:

- Less than 10 (33%)
- 10 to 25 (26%)
- 25 to 40 (14%)
- 60 + (15%)
- 40-60 (12%)

STORIES

Goats on the hillside. (All photos by Gerry Uenaka)

Grass gobbling goats

Their appetites help keep district safe from wildfires

by Tony Mercado

As far as Going Green ideas go, this one isn't "baaad".

With more than 25 acres of unwanted vegetation rising up and around the Santa Teresa Water Treatment Plant, the district used nearly 700 goats – yes, goats – to chew and munch away dry brush that could have posed a fire hazard if left unchecked.

"They devoured pretty much everything," said Field Operations Administrator Suzanne Remien. "This is just a different way of getting rid of the weedy grass and big thistles."

For those who think planners have taken one too many butts to the head for turning to such an idea, consider this: Using the goats is a welcome alternative to chemicals or mowing, which proved difficult in the past because of uneven slopes around the plant. They're so effective that East Bay MUD, Chevron and even the Department of Defense have used the ruminants to successfully clear areas.

Last summer, Valley Water did a test run with the goats at Maple and Murphy avenues and on the Coyote Flood Plain with great results.

"They take on the vegetation so we can get in there and do the work that reduces that fire danger," said Senior Field Operations Administrator Judy Ingols. "I think it really reflects that we're doing things differently and certainly keeping the environment in mind." For about two weeks, the goats grazed around the plant and its sludge basins, herded by a shepherd and Border collie that stayed with the animals on-site in a travel trailer. A portable fence moved the goats from one location to the other.

It's not the first time the district has relied on the animal kingdom for help.

In 2006, it used herding dogs to chase Canada geese from percolation ponds. The goose feces in the area posed water quality problems and the large birds' nests had blocked access roads, making it difficult for the district to maintain the ponds.

News You Can Use – December 26, 2007

COUNTDOWN FOR A HEALTHIER BAY IN 2008

Five things you can do for the Bay and feel great

Make New Year's resolutions you can actually accomplish and feel good about in 2008!

Instead of focusing on depriving yourself of your favorite guilty indulgences or setting lofty fitness or weight loss goals, turn your attention to a different body: the body of water that literally defines the region—the Bay.

While 2007 will undoubtedly go down in local history as the year in which a cargo ship. spilled 58,000 gallons of oil into San Francisco Bay, it's important to remember that individuals still have a key role to play in helping the environment. "When faced with a tragedy like the oil spill or looming concerns about climate change, it is tempting to feel that we can't have a positive impact on the environment, but we can," says Phil Bobel of the Bay Area Clean Water Agencies. "This is a great time to make small positive changes to help the Bay and ourselves."

The Bay Area Clean Water Agencies and the Bay Area Stormwater Management Agencies Association have put together a list of helpful actions for the Bay in 2008. "If we can get Bay Area residents to do any of these regularly in the new year, it will make a difference," says Bobel.

Top 5 Things You Can Do For the Bay in 2008

1. ***Pick up at least one piece of litter*** every day—there's plenty out there. Litter left on streets can flow to storm drains and straight into the Bay.

2. ***Get back to basics!*** Instead of buying water in plastic bottles, run your own tap and fill a reusable bottle. Use regular—not antibacterial—soap for handwashing. Avoid soap products with the active ingredient triclosan, a registered pesticide that accumulates in the bodies of humans and ultimately fish and can be toxic to aquatic organisms.

3. ***Go all the way with compact fluorescent lightbulbs*** (CFLs). Reduce your energy consumption by using only compact fluorescent lightbulbs (CFLs) or Light-Emitting Diodes (LED). Remember that CFLs contain some mercury. When these CFLs finally do give out, dispose of them properly so that mercury doesn't find its way to the Bay. Remember to also properly dispose of drycell batteries. Find a disposal location near you by going to www.hhw.org.

4. ***Get rid of your fat the right way***—cooking fat, that is. Don't pour cooking byproducts like fats, oils and grease down indoor drains where they can clog pipes. Throw small quantities in the trash and take larger quantities (such as turkey fryer oil) to a collection facility; go to www.baywise.info for locations near you.

5. ***Oil and water don't mix.*** Our Bay has been through a lot this year—please do your part by keeping your car maintained. Each year in the U.S. an estimated 180 million gallons of used oil are disposed of improperly - dripped, spilled, or poured onto the ground, directly into waterways, or down storm drains. Oil from leaky vehicles can have a real impact on the Bay and local creeks: one quart of motor oil can pollute up to 250,000 gallons of surface water. If you change your own oil, recycle the used oil when you're done. For helpful information to help you keep this resolution, go to www.hhw.org.

The San Francisco and Monterey Bays will appreciate these resolutions!

"Take the Next Step!"

For more than a decade now, EPA has joined governments, communities and citizens in taking part in National Pollution Prevention Week. Pollution prevention measures can protect the environment and natural resources before pollution even begins, and leave our homes, school and workplaces cleaner and safer.

This year, National Pollution Prevention Week (NP2W) is September 18-24 and this year's theme is "The Future Is Now – Prevention Begins with You!"

Across the nation, local governments, businesses and state and federal agencies are teaming up to hold events that celebrate and promote the benefits of pollution prevention. Pollution Prevention (or P2 for short) is recognized as an effective tool for protecting the environment and the economy since it serves to eliminate pollution at the source before it is generated. For industry, utilizing P2 techniques can result in more efficient, less-polluting industrial processes that improve competitiveness and the environment. For the public, practicing P2 in the home, in the garden, and on the road through activities such as using alternative cleaning methods, purchasing an electric mower, and carpooling or bicycling to work can help improve the quality of the local and global environment.

The goal of NP2W is to increase pollution prevention awareness among both the public and business people. It aims to highlight P2's potential for protecting the environment while also improving economic competitiveness. NP2W has also had the secondary effect of increasing the level of P2 awareness and support among local government managers and elected officials such as mayors and city council and county board members. This has led to the continuance, expansion, and further development of local pollution prevention programs.

Learn how you and your family can prevent pollution and conserve resources with helpful tips on a variety of topics such as how to use less gasoline or how to garden in an environmentally friendly way. If each person made even a small change, the impact would be tremendous.

For more information, visit http://www.epa.gov/region09/waste/p2/p2weekfeature.html or contact Kate Slama with the Stream Water Quality Unit at extension 2739.

Practice Pollution Prevention

Properly Dispose of Your Used Fluorescent Bulbs! Recycle Your Dead Batteries and Cell Phones!

Did you know it is bad for the environment and also illegal to throw used fluorescent bulbs and dead batteries in your garbage can?

Fluorescent bulbs contain mercury a toxic pollutant. These bulbs are great energy savers but if not properly disposed of, the mercury can pollute our local creeks and San Francisco and Monterey Bays. Mercury can also cause serious health problems in humans and some wildlife, particularly sensitive species like the Clapper Rail and Least Tern.

The Santa Clara County Household Hazardous Waste Program has partnered with several hardware stores in Santa Clara County to make recycling of fluorescent bulbs convenient for residents. When you need to replace a bulb, take the old one with you: this guarantees you get the correct bulb and also allows you to drop it off at a participating hardware store, free of charge. Recycle all fluorescent bulbs, including low-mercury bulbs, compact bulbs, and straight, circular, spiral and U-bent tubes.

Batteries contain many different metals such as nickel, cadmium, lithium, and lead. The Household Hazardous Waste Program has also partnered with many retail outlets to recycle household batteries.

For a complete list of participating locations, call the Santa Clara County Household Hazardous Waste Program at 408/299-7300, or visit www.hhw.org

Rechargeable batteries are commonly found in cordless power tools, cellular and cordless phones, laptop computers, camcorders, digital cameras, and remote control toys. Through a national program, *Call2Recylce* ™, the Rechargeable Battery Recycling Corporation (RBRC) can help you recycle your used portable rechargeable batteries and old cell phones. RBRC recycles the following battery chemistries: Nickel Cadmium (Ni-Cd), Nickel Metal Hydride (Ni-MH), Lithium Ion (Li-ion) and Small Sealed Lead (Pb). RBRC is dedicated to keeping rechargeable batteries and cell phones out of our nation's solid waste stream and preserving natural resources. Answer the Call to Recycle!

For more information and to find a drop off site near you visit www.rbrc.org/call2recycle

This information was brought to you by Kate Slama and the Stream Water Quality Unit.

Celebrate National Pollution Prevention Week "Take the Next Step!"

Properly dispose of your dead batteries and burnt out bulbs!

"Attention Gardeners!"

You select every plant with care; you make well-thought-out choices about the look of your garden. It's time to take the same care when choosing products such as herbicides, fertilizers and pesticides. Don't be an accidental polluter. Read the labels on packages to avoid products that are unsafe for the Bay and our local creeks.

Some pesticides pose a serious threat to waterways and wildlife when they wash off lawns and gardens and are carried through the storm drain system when it rains or from over-watering. Storm drains carry water directly to local creeks and the Bay - without any treatment. Pesticides are also carried through the sanitary sewer system from the improper disposal of unused pesticides and the rinsing of equipment and containers into household sinks. Even wastewater that is treated allows some pesticides to pass through without being removed.

The grass is always greener in front of the house that uses less-toxic products. Avoid polluting chemicals and follow these sensible tips for a good looking lawn: irrigate properly, leave grass clippings (they provide nutrients) and please don't over-water.

To find out more about less-toxic products and other helpful gardening tips visit www.ourwaterourworld.org or contact Kate Slama, Stream Water Quality Unit, at extension 2739. Fact Sheets are available for managing many specific pests.

Disposal of left over or unwanted household and garden chemicals is FREE through the County's Household Hazardous Waste Program. Call 408-299-7300 to make an appointment.

"Take the Next Step on a Bug!"

"Step Out of Your Car!"

Drive less. Carpool or bike to work, take public transit to the mall, bike to a friend's house or walk to the grocery store. Combine your errands into one trip. If you need to buy something and do not know where to go, "let your fingers do the driving" by calling stores ahead of time instead of driving from store to store or shop the Internet and use mail order catalogs.

Driving your car not only affects local air quality, but can also impact water quality. Many of your car's fluids can contribute significantly to local water pollution if they leak out or are improperly disposed. One quart of spilled used oil can pollute 250,000 gallons of water! Keeping cars in tune helps prevent air and water pollution. With today's rising price of gasoline, it is important to keep our cars in top notch condition.

Here are a few ways to reduce your car's impact on the environment:

- Keeping your tires properly inflated puts gas money back in your pocket and helps maintain your car's optimum fuel efficiency.

- An improperly tuned car produces 10-15 times more air pollution than a well-running vehicle. Have your car inspected regularly and repair all leaks promptly.

- Use a commercial car wash to avoid sending contaminated wash water (containing grease and heavy metals) into local waterways. Commercial car washes recycle their water and then discharge it to the wastewater treatment plant where the wash water is treated. If you choose to wash your car at home, wash it on an unpaved, flat plot of land or on the lawn so that the dirty wash water, which contains copper, zinc, sediment and oils, does not flow directly into nearby storm drains and our creeks.

- Take advantage of curbside recycling of used motor oil. Use of this service ensures that oil is properly disposed and will not impact the environment. If your city does not offer this service, FREE disposal of used motor oil and other automotive fluids is available through the County's Household Hazardous Waste Program. Call 408-299-7300 for more information.

For more information on preventing pollution, contact Kate Slama with the Stream Water Quality Unit and request a copy of "Keeping it All in Tune."

"Take the Next Step to Protect Your Watershed!"

As you step into your watershed, learn ways to protect the wonderful resource you live, work and play in. Everyone is part of the watershed, because the watershed is everywhere!

From the top of the mountains to the rivers, creeks and bays, the watershed is all around us. Watersheds are more than just drainage areas in and around our communities. They are necessary to support habitat for plants and animals, and they provide drinking water for people and wildlife.

The first rains of the season will soon hit, bringing more than just gloomy skies and traffic problems. **Heavy rains generate an increase in water pollution as trash and other pollutants that accumulate during the dry season flow through Bay Area watersheds and into storm drains and water bodies.**

Just like raincoats and umbrellas, water pollution goes hand-in-hand with rain. As houses and parking lots replace vegetation and open space, these water-resistant surfaces rapidly send polluted runoff into storm drains and streams, creeks and rivers. During storm events, trash, organic matter, and automotive pollutants are primary sources of pollution that threaten water quality and wildlife in our local watersheds.

There is a major rise in water pollution when the first rains of the season hit. Storms flush large amounts of pollutants down Bay Area creeks and rivers causing erosion, destroying habitat, depleting oxygen levels, and poisoning wildlife. Most people don't realize that even leaves and grass clippings carried into creeks by rainwater can disrupt the ecological health of our waterways. Everyone lives in a watershed and the actions of people affect the health of the waters that drain into it.

Unlike some environmental problems, pollution can be reduced during the rainy season. Here are seven easy things you can do to help prevent pollution and make a difference in your watershed:

1. **Set an example for others by not littering. If you do see litter, pick it up and put it in a trash can.**
2. Carry a litterbag in your car or on your bicycle.
3. Keep trash containers covered securely to prevent wind or animals from spreading litter.
4. Regularly maintain your vehicle to avoid auto fluid leaks.
5. Keep leaves and yard clippings picked up around your home and recycle as green waste.
6. Direct downspouts around your house to a vegetated area rather than letting them flow directly to the street.
7. Organize or join in the cleanup of a neighborhood, roadway, creek, estuary, or wetland.

Take a Step and Pick Up Trash

Take the Next Step – Help Calculate the Savings!

Do you use commute alternatives such as walking, biking, carpooling, or taking the bus to work? Do you telecommute? If you don't, I'm sure you know District employees that do. Are you curious how these individual actions of District employees impact our environment?

We would like to hear from you so we can calculate how many gallons of gasoline District employees save, how much CO2 is prevented and how many employees are taking individual actions to personalize the District's "greener" mission.

Please look for our email next week explaining how to complete a short survey that may answer some of your questions. Results of the survey will be posted on the Stream Water Quality Unit's web page and will include:

1. Number of participants/users of alternate transportation
2. Number of trips
3. Number of miles
4. Gasoline saved
5. CO2 saved

If you have any questions, please contact Kate Slama, Stream Water Quality Unit, extension 2739.

Santa Clara Valley Water District

Neighborhood work

Guadalupe River Vegetation Removal Project

About the project

The Santa Clara Valley Water District will be in your neighborhood removing vegetation from various locations along the Guadalupe River between Tasman Drive and Gold Street to allow flood flows to pass during winter months.

Work is expected to start in early August and take approximately two months to complete.* Project work hours are 7:30 a.m. to 4 p.m., Monday through Friday. In the unlikely event of delays, it may be necessary to extend work hours or schedule some work on Saturdays.

A three- to four-person crew will be working at the project site. Equipment used will include a low-ground mower and sprayers. Noise from mowers can be expected during work hours.

Trucks and crews will access the river at Tasman Drive and Gold Street. No road closures are expected, but traffic control may be needed at times. If needed, flaggers will be onsite during the project for safety.

The vegetation will be removed in two phases. Application of an EPA-registered aquatic herbicide is followed by mechanical mowing of the treated vegetation. A 20-foot-wide riparian buffer is left intact down the center of the river to provide year-long habitat for fish and wildlife species in the area.

Part of the voter-approved Clean, Safe Creeks and Natural Flood Protection Plan this project is part of the water district's continuous monitoring of the health of the river ecosystem.

Example of invasive vegetation build-up along river.

Highlight indicates project area.

The right plant in the right place

It might seem illogical to remove seemingly thriving vegetation from a creek channel. Indeed, native riparian plants create healthy creek ecosystems for fish and wildlife. The water district balances removal of invasive species for flood protection by restoring native plant species to the ecosystem.

continued on back...

* *Project start dates and duration may vary due to site conditions and equipment availability.*

Clean, Safe Creeks

Santa Clara Valley Water District

What we do

The Santa Clara Valley Water District manages water resources and provides stewardship for the county's five watersheds, including 10 reservoirs, hundreds of miles of streams and groundwater basins. The water district also provides flood protection throughout Santa Clara County.

Your Clean, Safe Creeks vote at work

This project is funded by the voter-approved Clean, Safe Creeks and Natural Flood Protection parcel tax passed in November 2000. The 15-year plan makes it possible to protect homes, schools and businesses from flooding, while improving the health of creek and bay ecosystems, and creating trails and parks for recreational enjoyment.

You're in a watershed

No matter where you are, you're in a watershed. A watershed is the area of land that drains to a common waterway. In Santa Clara County, our creeks and rivers catch rain and runoff from storm drains and carry the water north to San Francisco Bay or south to Monterey Bay. Along the way, some of the water is used to fill reservoirs for drinking water, replenish the underground aquifer and create better habitat for fish and wildlife.

This project is in the Guadalupe Watershed.

Santa Clara Valley Water District

Neighborhood work

Alamitos Creek Sediment Removal and Bank Repair Projects

About the projects

The Santa Clara Valley Water District will be in your neighborhood performing annual stream maintenance work along Alamitos Creek, between Graystone Meadow Drive/Circle and Bret Harte Drive.

Work is expected to start in mid-August and continue through September.* Project work hours are 8 a.m. to 4 p.m., Monday through Friday. In the unlikely event of delays, it may be necessary to extend work hours or schedule some work on Saturdays.

Five- to seven-person crews will be working at the project sites. Equipment used will include excavators, cranes, loaders, compactors, water trucks, street sweepers and 10-wheel dump trucks. Typical construction noise can be expected during work hours. Generators, designed to operate more quietly, will be used continuously to pump water around the project site and back into the creek farther downstream.

Trucks and crews will access the creek from Camden Avenue and Pfeiffer Ranch Road, across the east bank of Alamitos Creek Trail. No road closures are expected, but the access streets may be affected during the transporting of equipment and materials.

Part of the voter-approved Clean, Safe Creeks and Natural Flood Protection Plan, these projects will remove an estimated 350 cubic yards of sediment to improve stream quality, as well as repair 600 feet of creek bank to minimize erosion. Some of the sediment contains mercury-laden soil deposits that are commonly found in the area as a result of Gold Rush-era mining activities. The mercury removal is part of an on-going effort to protect and restore ecosystems in the Guadalupe Watershed and San Francisco Bay.

Sediment removal is important to maintain the creek's capacity to carry floodwaters away from nearby homes and property. Securing banks protects homes and property along the creek, while maintaining a stable creek ecosystem. It also minimizes sediment build-up, improving the creek's capacity to carry floodwaters.

Highlight indicates project areas.

Inset: Bank erosion on Alamitos Creek.

Use caution on the trail

Steel plates will be placed across a portion of the east bank of the Alamitos Creek Trail for crews to transport equipment and materials to the creek site. Please observe the posted caution signs. If needed, flaggers will be onsite during the project for safety.

continued on back...

* *Project start dates and duration may vary due to site conditions and equipment availability.*

Clean, Safe Creeks

Santa Clara Valley Water District

What we do

The Santa Clara Valley Water District manages water resources and provides stewardship for the county's five watersheds, including 10 reservoirs, hundreds of miles of streams and groundwater basins. The water district also provides flood protection throughout Santa Clara County.

Your Clean, Safe Creeks vote at work

This project is funded by the voter-approved Clean, Safe Creeks and Natural Flood Protection parcel tax passed in November 2000. The 15-year plan makes it possible to protect homes, schools and businesses from flooding, while improving the health of creek and bay ecosystems, and creating trails and parks for recreational enjoyment.

You're in a watershed

No matter where you are, you're in a watershed. A watershed is the area of land that drains to a common waterway. In Santa Clara County, our creeks and rivers catch rain and runoff from storm drains and carry the water north to San Francisco Bay or south to Monterey Bay. Along the way, some of the water is used to fill reservoirs for drinking water, replenish the underground aquifer and create better habitat for fish and wildlife.

This project is in the Guadalupe Watershed.

Why remove sediment?

Water flowing in a creek or river picks up and carries fine grains of soil, rock or mineral called sediment. When the flowing water slows down or reaches a wide or flat area, the sediment "drops out" and is deposited into the stream bed. This can clog the creek, reducing the amount of water it can transport. Sediment fills the underwater spaces around rocks, fallen tree trunks and branches, eliminating places where fish and other species seek food and shelter.

What causes bank erosion?

When water flows over or against creek banks, its energy and movement can dislodge and carry away soil, rocks, trees or vegetation, causing erosion. Because erosion can also strip away natural elements like trees and vegetation, there can be a negative impact to fish and other species that use these natural elements for shelter and food.

Target the source. Dump standing water. For more information, visit Santa Clara County Vector Control District's website at **www.sccvector.org**, or call the West Nile Virus Hotline at **1-800-314-2427**.

Contact us

Aquadrops... For Teachers

November 2007

FREE Parent/ Teacher Workshops in Child Development

Presented by Organization of Special Needs Families

Offering resources for parents and teachers these workshops will look at the development of early childhood.

• Helping Babies and Young Children Develop Positive Relationships
November 10, 2007

• Including Young Children with Disabilities and Special Needs in Early Learning Programs
November 13, 2007

Join us at NASA Ames for:
Return to the Moon Family Night

Please tell your students to bring their families to this free event. Spread the word!

Saturday, November 17 from 4-9P.M.

Location:
NASA Ames Research Center
Moffett Field, CA 94035

Featuring: Hourly presentations with mission experts and scientists
Kids activities
Moon rocks on display
Animated videos
Robotic rover demonstrationsTelescope viewing of the Lunar surface (weather permitting)

Learn how NASA will impact the south pole of the Moon in search of water ice. Hear all about this exciting Lunar Crater Observation and Sensing Satellite (LCROSS) Mission. For immediate LCROSS information go to: http://lcross.arc.nasa.gov/

LCROSS and NASA apparel available for purchase. NASA Ames Gift Shop will be open for early holiday shopping.

Bay Area Earth Science Institute (BAESI) Fall Seminar Schedule

November 17: Volcanoes with Richard Sedlock, Paula Messina and Ellen Metzger. Will meet from 8:30 am - 4:30 pm at San Jose State University in Duncan Hall Room 306.

San José Green Mini-Grants

A Funding Program of San José Go Green Schools Program

The Mini-grants Program is to promote environmental stewardship in the current student generation.
Mini-grants are intended to foster school-wide and in-classroom recycling and other environmental actions and environmental education.
Grant applications due by email Only December 8, 2007, at 5PM to: sjgreenschools@sanjoseca.gov

For more information go to:
http://www.sanjoseca.gov/esd/gogreen/mini-grants.asp

Enter the California Coastal Art & Poetry Contest!

The California Coastal Commission invites California students in kindergarten through 12th grade to submit artwork or poetry with a California coastal or marine theme to the annual Coastal Art & Poetry Contest. Up to eight winners will be selected to win $100 gift certificates to an art supply or book store, and each winner's sponsoring teacher will receive a $40 gift certificate for educational supplies. Students may have their work featured on Commission webpages and materials. Entries must be postmarked by January 31, 2008 to be eligible for this year's contest. For rules and entry form, visit www.coastforyou.org, email coast4u@coastal.ca.gov, or

call (800) Coast-4U.

Join the Fall HiRISE Image Targeting Challenge Live Web Chat!

The Fall HiRISE Image Targeting Challenge has begun! The High Resolution Imaging Science Experiment camera, now orbiting Mars, is helping NASA search for signs of water on Mars. Students are again invited to help choose regions of Mars for HiRISE to image. Background information, teacher guides, student activity books and tutorials are available online to help students choose a region. Interested teachers and students are encouraged to log on to: http://quest.nasa.gov/challenges/hirise/
and register to receive more information.

Aquadrops... For Teachers

January 2008

Project WET Workshop

Project WET is designed to help students, parents, educators, and communities of the world with water education. It contains wesites of interest that may be useful, as well as information about Project WET teacher training in Santa Clara County through the Santa CLara Valley Water District. This day long training will introduce you to the Project WET curriculum and activities which you will receive. Kathy Machado will show you how the activities work, how they can be adapted to different grade levels, and provide supplementary material, all water related! The next project WET is scheduled for Friday, March 7 2008 and is an all day event.

For more information about other upcoming Project WET trainings or to get some water based activities visit the Santa Clara Valley Water District website or contact Kathy Machado at kmachado@valleywater.org or (408) 265-2607, ext. 2331.

Bay Area Enviromental Education Resource Fair

Discover the latest in classroom materials, environmental education programs, and field trip sites. Join in the fun and attend workshops introducing conservation and wildlife education, school gardens, and strategies for fostering environmental awareness!
The event is specially designed for teachers, community educators, students, families, and all concerned about the environment we share.

Saturday, January 26th, 2008
Marin Civic Center located in San Rafael
10:00 a.m. to 4:30 p.m.
For more information visit BAEERFair.org

Check out "The Story of Stuff"

It's a 20 minute film by a Berkeley filmmaker on "stuff" and the "materials economy." The movie can be viewed on-line at http://www.storyofstuff.com/. It is a very worthwhile twenty minutes, simple, enlightening and thought provoking.

Sea Levels and Climate Change

Watch what is happening to sea levels as a result of climate at the Climate Change and Sea Level site from the University of Arizona. To map the level changes select the link for Coterminous U.S.A., then choose one of the options (from a 1-meter to 6-meter rise), then click on Refresh map.

Enter the California Coastal Art & Poetry Contest!

The California Coastal Commission invites California students in kindergarten through 12th grade to submit artwork or poetry with a California coastal or marine theme to the annual Coastal Art & Poetry Contest. Up to eight winners will be selected to win $100 gift certificates to an art supply or book store, and each winner's sponsoring teacher will receive a $40 gift certificate for educational supplies. Students may have their work featured on Commission web pages and materials. Entries must be postmarked by January 31, 2008 to be eligible for this year's contest. For rules and entry

form, visit www.coastforyou.org, email coast4u@coastal.ca.gov, or call (800) Coast-4U. Contest flyers are also available upon request

CSTA Members! CSTA wants to hear from you about how they can best meet your needs.

Please help by completing their online survey at this link: www.surveymonkey.com/s.aspx
The survey will take about five minutes of your time, and the rewards will be great: The knowledge that you've helped your professional organization better meet your needs!

Learn More about Global Climate Change and its influence on Evolution

University of California Museum of Paleontology is offering a short course discussing Global climate change and its influence on evolution. For more information click on the link: short course

Take Pride in America's schools program

Take Pride in America's schools program encourages schools and students to become active stewards of America's public lands by engaging in at least two volunteer events each year. Becoming a Take Pride School is a great way to participate in EE Week in April, either by cleaning up your favorite park, maintaining nearby nature trails, sprucing up your school or playground by planting trees and picking up trash, or monitoring water quality in local rivers. To sign up your school or find out more, visit Take Pride in America at www.TakePride.gov.

The Bay Area Earth Science Institute presents CALIFORNIA'S RESOURCES

Current and future 6th grade teachers this workshop is keyed to the California science standards focusing on: renewable and nonrenewable resources, water sources, supply, and quality, useful rocks

and minerals, fossil fuels and climate change, and alternative energy sources. On June 23-27, 2008 from 9:00 am - 3:30 pm each day, it will be held in room 306, Duncan Hall at San Jose State University. You can earn a generous stipend (pending final notification of funding in late March), 2 units of Geology 104 for $44/unit, and receive classroom materials and ready-to-use teaching activities for your classroom. Ellen Metzger and Richard Sedlock of San Jose State University, Department of Geology/Bay Area Earth Science Institute will be teaching the workshop. For more information and application materials, call Ellen Metzger at(408)924-5048 or send email to metzger@geosun.sjsu.edu.

Wacky Watersheds Training Workshop

Wacky Watersheds offers hands-on learning experiences to explore the concepts of water use, wastewater treatment, pollution prevention, and watershed protection. All hands-on activities are correlated with California Content Standards in English Language Arts, Mathematics, and Science for grades 6 - 8. This workshop is especially designed for 6th - 8th grade teachers at schools located in San José, Santa Clara, Milpitas, Cupertino, Campbell, Los Gatos, Saratoga or Monte Sereno.

Stipends: $150 available for teachers who complete an action project with their students.
Date: Saturday, March 1, 2008
Time: 8:30 am to 12:30 pm
Place: Resource Area for Teachers (RAFT) 1355 Ridder Park Drive, San José
Register: Go to www.raft.net for registration and CEU information. Just follow the links to RAFT Program

Workshops.
Cost: Free! $20 deposit is required to reserve a space, returned upon attendance.
Materials: Educators will receive South Bay Water Connections, which includes environmental education classroom activities, 3 videos and a poster plus lots of RAFT materials.
Information: Contact Vanessa Martinez with RAFT at (408) 451-1421.

Grants Available:

Captain Planet

The Captain Planet Foundation an environmental funding resource offering small grants for field trips, gardens, and more.
See captainplanetfoundation.org for full details and application process.

Field Experience Grant from the California Science Teachers Association (CSTA)

CSTA is offering a field experience grant to a lucky CSTA member. The trip we have lined up for this summer is a trip to a place called Savannah Africa, south of Johannesburg (airfare, room and board included, as well as the flexibility to choose what part of the summer a teacher would like to go) Visit CSTA for more information.

Must meet the following criteria:
-Is a member of CSTA for a minimum of three years
-Is a U.S. citizen
-Evidence a willingness to work and learn with a team of scientists
-Agree to share information about the science field experience by presenting a workshop at the CSTA Science Education Conference
-Complete the application and sign the liability release form

Global Action Awards to Honor Students for Global Poverty Efforts (US applicants)

Deadline: January 31, 2008

042781

NetAid, an initiative of Mercy Corps, is accepting applications for the Global Action Awards. The awards honor high school students in the United States who have shown great leadership in areas such as preventing disease, alleviating hunger, protecting the environment, promoting human rights, and improving access to clean drinking water, health care, or education. Projects may involve organizing advocacy campaigns, raising funds, volunteering, or using media and technology to involve others in the fight against global poverty. The honorees receive $5,000 each for college or a charitable cause of their choice, and are honored at a ceremony in New York City. Applicants must be a current U.S. high school student, or have graduated from high school in spring 2007. Guidelines and application materials available here.

Action For Nature's International Young Eco-Hero Awards (US & Overseas applicants)
Deadline: February 28, 2008
Action For Nature, a nonprofit organization that encourages young people around the world to carry out individual environmental action projects, presents the International Young Eco-Hero Awards to recognize the individual accomplishments of young people (ages 8-16) whose personal actions have significantly improved the environment. Action For Nature will award cash prizes of up to $500 each to young Eco-Heroes for their outstanding accomplishments in environmental advocacy, environmental health, research, or protection of the natural world. The applications will be judged according to several criteria, including but not limited to originality, difficulty, organization, length of time devoted to the project, influencing/educating others, use of outside resources (e.g., library, experts, media, community leaders), degree of success in reaching goals, and the impact on the environment. Complete program information and application guidelines available here.

The Volvo Adventure Award (US & Overseas applicants)
Deadline: January 31, 2008
Arranged in collaboration with the United Nations Environmental Programmed (UNEP) the Volvo Adventure Award rewards young people who run their own environmental projects. We are now accepting applicants for 2008. If you know of any groups of 13-16 year olds working on an environmental project they only have a few weeks to enter. All they have to do is register and enter their project by visiting www.volvoadventure.org.
By registering, they have the opportunity to win an all-expenses-paid trip to the final in Sweden and the chance of a financial

reward that could make it possible to run, improve or enhance your project. For young people it could be an adventure that offers a chance to make new friends all over the world, attract international attention and recognition for their project.

Congressional Research Awards (US Applicants)
Deadline: February 1, 2008
The Dirksen Congressional Center invites individuals with an interest in studying Congress, including political scientists, historians, and biographers, scholars of public administration or American studies to apply for a Congressional Research Award. To learn more, visit
http://www.dirksencenter.org/print_grants_CRAs.htm

Aquadrops... For Teachers

March 2008

Environmental Education Survey

The California Environmental Education Foundation (CEEF) Board of Directors determined one of its highest priorities is to disseminate premier EE resources and services to California's K-12 educators. To achieve this priority goal, the Board has compiled a survey to assess the professional needs and/or constraints experienced by educators/administrators/naturalists as they teach environmental education in the classroom and outdoors. Please complete the survey on "survey-monkey" at the web link entitled "CEEF 2008 California Educator Survey" . Please share the link with other educators you know. Thank you for your time.

Wonders of our Water Works-Tours of the San Jose/Santa Clara Water Pollution Control Plant

Take part in a tour of the water treatment plant that protects San Francisco Bay in north San José. Open to families and organizations interested in environmental management and endangered species or just curious about how water gets purified. For more information click here: Water Pollution Control Plant Tour

Water cycle lesson for primary grades

Check out this maze of the water cycle. You can use it in the classroom or at home to help children remember the water cycle.

Captain Planet Environmental grants

Deadline is March 31.

Grant projects should:
Promote understanding of environmental issues Focus on hands-on involvement Involve children and young adults 6-18 (elementary through high school) Promote interaction and cooperation within the group Help young people develop planning and problem solving skills Include adult supervision Commit to follow-up communication with the Foundation (specific requirements are explained once the grant has been awarded

For details and application, please go to the website below.
Captain Planet Foundation

Do you have a Whale Tail License Plate yet?

Support the preservation and restoration of two of California's natural treasures – the California Coast and Lake Tahoe. Put an Ecoplate, a Whale Tail or Lake Tahoe environmental license plate, on your car or truck. Visit www.ecoplates.com and order yours today!

Bay Area Earth Science Institute (BAESI)

Workshops address California science standards for 4th-12th grade and present a blend of Earth science concepts and ready-to-use classroom activities for teaching them. Combine any two to earn 1 unit of Geology 104.

March 15: Models for Teaching Earth Science. Come to a "Make and Take" session that will be devoted to models for Earth Science. Participants will see and use models, learning the concepts involved, then will make their own models to take home. Oceanography, weather, tectonics, volcanoes,

and
astronomy: make and take models to help teach them all!

April 5: Exploring for Oil and Gas. Learn about how petroleum is formed, where oil and gas occur, how geologists look for oil and gas, technologies used by oil companies, and the environmental impact of oil exploration. Will include an afternoon field trip to Mt. Diablo State Park.

May 31: Plate Tectonics with Paula Messina, Richard Sedlock, and Ellen Metzger, SJSU Geology. Topics include: continental drift, how earthquakes, volcanoes, magnetism, gravity, and bathymetry helped scientists frame the theory of plate tectonics, modern and ancient plate boundaries, including western North America, and why the plates move.

For information concerning time and place contact:
Ellen P. Metzger
Professor and Co-Director, Bay Area Earth Science Institute Department of Geology San Jose State University San Jose, CA 95192-0102 Phone 408-924-5048; Fax 408-924-5053

Waves, Wetlands, and Watersheds Educator Workshops

When you attend one of these workshops, you will receive a FREE copy of the California Coastal Commission's science activity guide, Waves, Wetlands, and Watersheds.
You'll try out some of the activities in the guide and get an overview of the other free educational resources and programs the Coastal Commission has available. You
will be eligible for professional growth credit from University of the Pacific upon completing additional work.
REGISTER for a workshop by contacting Annie Kohut Frankel at afrankel@coastal.ca.gov, (415) 597-5888, or (800) Coast4U.

MONDAY, MARCH 31, 4-6pm
Wetlands and Wildlife Care and Education Center, HUNTINGTON BEACH (Orange County)
Register by March 25.

TUESDAY, APRIL 1, 4-6pm
South Coast Watershed Resource Center, SANTA BARBARA
Register by March 25.

WEDNESDAY, APRIL 2, 4-6pm
San Luis Obispo Botanical Garden, SAN LUIS OBISPO

Register by March 25.

TUESDAY, APRIL 15, 4-6pm
Candlestick Point State Recreation Area, SAN FRANCISCO
Register by April 10.

May 2008

Project WET (Water Education for Teachers) Workshop for educators

A six-hour Project WET training will be held at the water district June 27, from 8:30 until 3:30 pm. It is not too late to sign up. Contact Kathy Machado at kmachado@valleywater.org or (408)265-2607 ext. 2331 to sign up. A 100 lesson resource guide will be given to each participant free! Come and learn all you need to know about water, one of our most valuable resources.

Beginning Birding *with Lisa Myers*

Thursdays June 5 , June 12, & June 19 7:30-9:00 PM (classes); Saturday Field Trip June 14 8:30AM -11:30AM

Location: McClellan Ranch Park, Cupertino (22221 McClellan Rd.)
Cost: $45 SCVAS members, $55 non-members

This beginning birding class is designed for people who have always wanted to learn about birdwatching. No experience necessary! We'll go over all the things you'll need to know to get started. Field guides, optics, clothing, ethics, habitats, how to find the bird and even a little taxonomy will be reviewed. Through lecture and handouts you'll learn the tricks on how you can tell one bird species from another. We have roughly 250 different species of birds right here in Santa Clara County. This class includes one weekend morning bird walk so we can put our new knowledge into action.

Take a Walk Series Offers Free Book

Take a Cloud Walk, a new addition to the award-winning Take a Walk book series by Jane Kirkland, is available as a free

PDF download. In this full-color, 30-page book, readers learn the basic names and shapes of clouds, why they move, why they are white, how they affect climate change, the difference between weather and climate, and weather terms and conditions such as hail, lightning, and fog. Meteorologists Jim Cantore (the Weather Channel®) and "Stormin" Bob Swanson, (USA Today) participated in this fun book giving kids a closer look at clouds. Get your copy at Jane's new Web site for educators, where you can find many other free resources for educators. http://eelink.net/cgi-bin/ee-link/newclick/6064192

What's your Carbon footprint?

Calculate your personal carbon dioxide emissions and learn how you can reduce your impact by visiting: http://www.morgan-hill.ca.gov/html/tools/

What's the air like today?
You can check the daily air quality in your area at AirNow.gov.

May is Water Awareness month in California!

Check out this website wateraware.org for free downloadable activities and six interactive tutorials for elementary school children.

Interested in school gardening?

· The California School Garden Network provides many free resources at www.csgn.org
· Interactive lessons, videos, and articles are available at www.exploratorium.edu/gardening/index.html

2008 California Science Education Conference

CSTA's 2008 Conference will be on October 30-November 2, 2008 at the San

Jose Convention Center. This is California's premier annual professional development for science educators. Conference events address all areas of science education. There will be speakers, hands-on workshops, field courses, exhibits and loads of resources to take back to the classroom. Early-bird registration deadline is June 30. Visit the CSTA website at www.cascience.org.

Have Your Students Help Name City Hall's 3 Baby Pergrine Falcons!The Mayor's Office is coordinating a naming contest for the three baby Peregrine falcons nesting atop City Hall. The contest is open to young San José residents between the ages of 5 and 17. Last year middle schools nominated a single name, this year the contest is open to individuals. Please pass along the information to anyone who might be interested in sharing with their students or program participants. Submissions must be postmarked by May 16th. Visit San Jose's website for more information.

Videos

Six° Degrees Could Change the World a National Geographic Special

Use this film to explore the topic of global warming with your students. Six° Degrees illustrates what is happening and what is to come as a result of global warming while visiting the reefs of Australia, the ice fields of Greenland, and the Amazon's rain forests. The film explains what is real, what is still controversial, and how existing technologies and remedies could help dial back the global thermometer. The video is available for borrowing through the Santa Clara Valley Water District's Education Outreach Program. The district requires a refundable deposit of $10 per video or CD. Contact Kathy Machado at (408) 265-2607 ext. 2331 to reserve this for your classrooms.

Don't Move a Mussel

The Video "Don't Move a Mussel" is completed and ready for distribution. This video provides the viewer with background information on quagga and zebra mussels, including origins, distribution, biology and transport vectors and a detailed assessment of the impacts they can have on the economy, ecology and culture. This 46 minute DVD includes a watercraft inspection and decontamination training section.

PSMFC contractor Bill Zook produced this video with Videoland Productions.
If you have questions on video content please contact Bill @ bjzook2@msn.com.

To order this free video, please fill out the form below and email Stephen_Phillips@psmfc.org, or Fax your information to 503-595-3232.
One video per person at this time please.
We will consider bulk orders once this initial distribution has been completed.

SELF EVALUATION MATRIX-MONITORING

Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Permit Reference	Responsible Party
13. Monitoring					
Goal 13.A. *Provide support to the Program's monitoring effort through coordination, collaboration, and integration of District monitoring activities.*					
13.A.1	Assist the Program to prepare Annual Monitoring Project Plan. Collaborate District compliance and project monitoring efforts with the Program.	Complete-The District will share data and information from various urban runoff, non-point source, stream function, stream maintenance fisheries studies and capitol project data, as appropriate with the Program.	Ongoing	C.7.c	EMU
13.A.2	Continue Water Quality Index pilot study in the Guadalupe, Coyote and Stevens Creek Watersheds.	Complete-The District has completed several seasonal monitoring events and will continue the study through the fall of 2007 at which time the studies usefulness will be evaluated.	June 08		EMU

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
MONITORING PLAN

PROGRAM EVALUATION

Water Quality Index pilot study ended in fall of 2007 due to inconclusive nature of the results due to poor QAQC practices at the laboratory and District funding challenges.

HIGHLIGHTS AND ACCOMPLISHMENTS

Monitoring

The District has continued its monitoring program to evaluate water quality in Lake Almaden, Almaden Reservoir, Calero Reservoir, Guadalupe Reservoir and Stevens Creek Reservoir. Depth profile measurements of temperature, pH, conductivity, and dissolved oxygen were conducted monthly. In addition, water samples were collected from the epilimnion and hypolimnion for analyses of total and dissolved mercury, total and dissolved methyl mercury, ammonia, nitrate/nitrite, sulfate and phosphorus at Lake Almaden, Almaden Reservoir, and Guadalupe Reservoir. Samples were also collected from the epilimnion for analyses for chlorophyll- a. The purpose of this monitoring is to establish existing water quality conditions and seasonal variability to evaluate the implementation of management changes to improve water quality.

14.A.4	Street sweeping and storm drain O&M • Follow Program guidance regarding the collection and reporting of street sweeping data at District facilities. Provide data for Annual Report. • Evaluate need for improvement of current street sweeping and storm drain system O&M programs (within available budgets).		Ongoing June 08	CAP CB-11	SWQU
14.A.5	Outreach on pool, spa maintenance • Distribute outreach materials at local public events; brochures at agency department counters and public places.		Ongoing	CAP CB-12	SWQU
14.A.6	Use of Architectural Copper • Assist Program Management Committee to develop guidance addressing the use of wood containing copper-derivative preservatives.		July 07	CAP-21	SWQU/CPRU

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
COPPER ACTION PLAN

PROGRAM EVALUATION

The District, as an environmental steward, has several practices and activities in place that support copper and nickel pollution prevention. The District continues to distribute outreach materials at public events. The District's website provides a carpool connection interactive map so an individual is able to search for carpoolers in the vicinity of one's home or even along the route an individual uses to get to work.

HIGHLIGHTS AND ACCOMPLISHMENTS

The District enacted a policy several years ago to have District vehicles washed and vacuumed at the existing covered wash rack that discharges through a clarifier to the sanitary sewer system. The District is very proactive in attempting to reduce traffic and pollutants caused by traffic. The district provides, free to employees, bicycle lockers, and reimburses staff for use of public transit for business purposes.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

District staff continued to purchase alternative products, where available, and to dispose of mercury-containing materials in accordance with applicable regulations.

District staff co-chairs the Santa Clara Basin WMI Guadalupe River Mercury TMDL Technical Workgroup and Stakeholder Workgroup. The workgroups identify opportunities to collaborate on technical studies to support TMDL development and implementation. The District staff continues to support and participate in the development of the SCB-WMI Watershed Action Plan.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
CONTROL PROGRAM FOR MERCURY

HIGHLIGHTS AND ACCOMPLISHMENTS

Mercury Removal Projects and Programs Completed and Underway

Stream Maintenance Program

In 2007, routine sediment removal maintenance resulted in the disposal of 36,870 cubic yards of material, with 3,348 of this total from the creeks in the upper portion of the Guadalupe River Watershed. The total mercury removed from the system was 100 kg, with 98 kg from the Guadalupe River Watershed.

Monitoring

The District has undertaken a monitoring program to evaluate water quality in Lake Almaden, Almaden Reservoir, Calero Reservoir, Guadalupe Reservoir and Stevens Creek Reservoir. Depth profile measurements of temperature, pH, conductivity, and dissolved oxygen were conducted monthly. In addition, water samples were collected from the epilimnion and hypolimnion for analyses of total and dissolved mercury, total and dissolved methyl mercury, ammonia, nitrate/nitrite, sulfate and phosphorus at Lake Almaden, Almaden Reservoir, and Guadalupe Reservoir. Samples were also collected from the epilimnion for analyses for chlorophyll a. The purpose of this monitoring is to establish existing water quality conditions and seasonal variability to evaluate the implementation of management changes to improve water quality.

Mercury Control Program

In 2007, the District continued to implement three projects to control mercury in the Guadalupe River Watershed: Jacques Gulch Restoration, Lake Almaden Circulation, and Reservoir Circulation.

Jacques Gulch Restoration

Jacques Gulch is a tributary to Almaden Reservoir that drains approximately one-third of the reservoir watershed. A portion of this drainage includes a small tributary that drains a portion of the former New Almaden Mining District, which is now Almaden-Quicksilver County Park. The project will remove, cap, or control erosion of extensive mercury deposits in the tributary above its confluence with

Jacques Gulch, and in Jacques Gulch above its confluence with Almaden Reservoir. This project will require planning, permitting and construction, and is scheduled for completion in 2011. During the reporting period, the District revised a draft Engineer's Report for the project, prepared a Draft Mitigated Negative Declaration, and circulated the documents for public comment.

Lake Almaden Circulation

Lake Almaden is a former gravel quarry that lies at the confluence of Guadalupe Creek and Los Alamitos Creek that drain Guadalupe and Almaden Reservoirs, respectively. Below this confluence is the Guadalupe River. This lake provides recreational amenities to the community, including swimming, boating, and fishing. The Guadalupe River Watershed Mercury Study identified the lake as a significant source of methyl mercury that bioaccumulates in fish within the lake and in fish downstream. In 2006, the District continued a monitoring and sampling program to evaluate the performance of a pilot treatment system using a solar-powered circulator (Solar Bee). Data collected during the summer of 2006 showed a 96% reduction in the methyl mercury concentrations measured in the treated portion of the lake as compared to 2005 data. Data from 2007 were similar to the 2006 data. Building on this success, a second circulator was installed in the lake in March 2007. This second circulator achieved similar reductions of methyl mercury in the water column during 2007.

Reservoir Circulation

The Guadalupe River Watershed Mercury Study identified reservoirs as a significant source of methyl mercury that bioaccumulates in fish within the reservoirs and in downstream creeks. The study also demonstrated a correlation between the seasonal development of anoxia in the hypolimnion and increased methyl mercury concentrations. Building on the success of the Lake Almaden pilot project, the District installed three solar-powered circulators in Almaden Reservoir in April 2007, and three solar-powered circulators were installed in Guadalupe Reservoir in July 2007. Data from 2007 showed lower concentrations of methyl mercury in the water column in Almaden Reservoir as compared to previous years, but no significant changes were observed in Guadalupe Reservoir in 2007.

Attachment 1.17
PESTICIDE MANAGEMENT ACTIVITIES

SANTA ıRA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
PEST MANAGEMENT

SELF EVALUATION MATRIX

Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Permit Reference	Responsible Party
17. Control Program for Pesticides					
Goal 17.A. *Eliminate all unnecessary District pesticide use (particularly organophosphate (OP) pesticide use) and implement Integrated Pest Management (IPM) techniques.*					
17.A.1	Conduct a periodic District-wide search of chemical storage areas for pesticides no longer legal for application per EPA, State, and/or local requirements, and properly dispose of any such pesticides pursuant to appropriate waste disposal regulations. (PS 9)	Completed – Prior to quarterly hazardous waste collection events, storage areas are inventoried and chemicals no longer legal for application are sent for disposal.	Sept 07 Dec 07 March 08 June 08	C.9.d.i	Vegetation Management Unit (VMU)
Goal 17.B. *Raise awareness of all District employees and train employees who apply pesticides for the agency about the agency IPM Policy and/or IPM techniques as appropriate.*					
17.B.1	Ensure that employees who apply pesticides for the District obtain the appropriate training as required by the County Agricultural Commissioner and the State Department of Pesticide Regulation (DPR). (PS 4a)	Completed – Annual license renewals and in-house training is tracked.	Annually	C.9.d.i	VMU
17.B.2	Provide annual training on the appropriate portions of the IPM Policy, SOPs, and BMP's, and the latest IPM techniques to employees within departments responsible for pesticide application. (PS 4b)	Completed – Vegetation Management Unit staff were trained on the District's IPM Policy, SOPs and BMPs during Unit meetings and the Annual BMP Training session.	May 08	C.9.d.i	VMU
17.B.3	Inform employees who are not authorized and trained to apply pesticides that they cannot use over-the-counter pesticides in or around the workplace, consistent with the IPM Policy. (PS 4c)	Completed –Article published in the July 2007 AquaFacts.	May 08	C.9.d.i	VMU EMU

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
PEST MANAGEMENT

Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Permit Reference	Responsible Party
Goal 17.C. *Increase awareness of IPM so target audiences recall less toxic pest management messages and adopt IPM behaviors. Target audiences include residential and commercial users, pesticide retailers, municipal employees, and special districts. (PS #6).*					
17.C.1	Assist with local implementation of the Watershed Education & Outreach (WE&O) Campaign, which will target the general public and include messages about less-toxic pest control and proper disposal.	Completed – Staff attended ad hoc task group and work group meetings.	Annually	C.9.d.ii	EMU
17.C.2	Identify and attend community events and distribute outreach materials. (Program will attend events strategic to the WE&O campaign.) (PS 6)	Completed – Coordinated attendance at community events with other District Units. List of events is included in Attachment 1.11 Public Information and Participation.	Ongoing	C.9.d.ii	EMU
17.C.3	Conduct internal outreach on less toxic pest control to employees who do not necessarily purchase or apply pesticides during the course of their work (to encourage employees to use IPM techniques away from work). (PS 4c)	Completed – Conducted internal outreach during the District's Pollution Prevention Week e-mail Campaign. Copies of the email campaign are included in Attachment 1.5 Public Information and Participation.	Sept 07	C.9.d.i	EMU
Goal 17.D. *Educate pesticide retailers and consumers about less toxic pest control products and promote the sale of such products.*					
17.D.1	Continue to fund via the Program and participate in the BASMAA Regional IPM Partnership. (Program FY 01-02 Work Plan)	Completed – Program funds the "Our Water, Our World" (OWOW) Regional IPM Partnership. Assisted with implementation of the OWOW program through attendance of ad hoc task group and work group meetings.	Ongoing	C.9.d.ii	Program

SANTA ıRA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
PEST MANAGEMENT

Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Permit Reference	Responsible Party
17.D.2	Continue to implement cost-effective elements of the IPM Store Partnership Program. Create and provide fact sheets and other materials to pesticide retailers to facilitate point-of-purchase outreach. Visit stores as necessary to ensure ongoing participation.	Completed – Assisted Program to develop fact sheets and facilitate point-of-purchase outreach. Completed through attendance of ad hoc task group and work group meetings and review of documents.	Ongoing if effective	C.9.d.ii	Program
Goal 17.E. *Minimize pesticide use by Pest Control Operators (PCOs) contracted for structural pest control and landscape maintenance.*					
17.E.1	Continue to implement and improve the process that requires PCOs contracted for District applications to use pest control methods consistent with the District's IPM policy (through contract specifications). Specifically, require contractors to: a) follow the District's IPM policy, BMP's, and SOPs; b) provide evidence of current IPM training, when feasible; and c) provide documentation of pesticide use on District property to the District in a timely manner. (PS 5)	Completed – Continued to incorporate contract language developed in 2004 into all contracts. Continued to use tracking system for contractor's monthly reports.	Ongoing	C.9.d.i	VMU
Goal 17.F. *Require all PCOs to implement Best Management Practices (BMP's).*					
17.F.1	Continue to require PCOs contracted by the District to implement the industry standard BMP's, developed by the Program, through contract specifications. (PS 5)	Completed – Contract language was revised in FY 05-06 and is incorporated into contracts as they expire.	Ongoing	C.9.d.i	VMU
Goal 17.G. *Provide pesticide disposal services through household hazardous waste (HHW) collection programs for all residents and small businesses, and encourage use of these programs.*					
17.G.1	Work with HHW collection agencies to support, enhance, and help publicize programs for proper pesticide disposal. (PS 7)	Completed – Coordinated with Program through attendance of ad hoc task group and work group meetings.	Ongoing	C.9.d.ii	Program

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
PEST MANAGEMENT

Work Plan Task	Task Description	Status / Comments	Due Date (mo/yr)	Permit Reference	Responsible Party
17.G.2	Provide hazardous waste disposal information to residents, through distribution of materials (e.g., utility bill insert, city newsletter, community events, etc.) or advertising in local media. (PS 6)	Completed – Coordinated with District Units to ensure that information was available at community events and through other venues.	Periodically at least annually	C.9.d.ii	OC and WBMU
Goal 17.H. *Participate in coordinated monitoring efforts to support pesticide TMDL development and implementation.*					
17.H.1	Continue financial support of the Regional Monitoring Program (RMP) and Clean Estuary Partnership (CEP) via SCVURPPP contribution.	Completed – Supported through Program budget.	Annually	C.9.d.iii	Program
17.H.2	Conduct District aquatic herbicide water quality monitoring to fulfill requirements of Statewide General NPDES Permit for Discharges of Aquatic Pesticides to Waters of the United States.	Completed – Self-Monitoring Report was submitted December 15, 2007. Report cover page included in this section.	Feb 08	C.9.d.i	VMU
Goal 17.I. *Implement a work plan that includes appropriate goals, actions, and monitoring mechanisms to reduce pesticide-related toxicity in urban runoff.*					
17.I.1	Review and continuously improve the goals, actions, and monitoring mechanisms of the work plan considering results of self-evaluations, comments from Regional Board staff and other interested parties, and results of local performance review meetings if any. (PS 10)	Completed – Goals, actions and monitoring mechanisms of the work plan were reviewed; effectiveness evaluation was conducted and improvements were included in the FY 2008-09 work plan.	June 08	C.9.d.i	EMU and VMU

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
PEST MANAGEMENT

HIGHLIGHTS AND ACCOMPLISHMENTS

The District uses pesticides as one of the tools for pest management on its properties and facilities. The primary category of pesticides used is herbicides. Insecticides and rodenticides are used in small quantities. In all cases, pesticide products are used only after an assessment has been made regarding environmental, economical, and public health aspects of each of the alternatives. The District has always been proactive and conservative in the use of pesticides.

The District continues to implement a pesticide policy and an "Approved Pesticide List." Except for three products, the District's Approved Pesticide List met the criteria established in the District's Pesticide Policy for water quality, environmental and public health hazards. The District's policy states "Category I and II pesticides may only be used if required to meet health and safety concerns or if mandated to maintain regulatory compliance such as dam safety." The three "Toxicity Category I" products, one herbicide and two rodenticides, were exempted from meeting the toxicity restriction due to the following factors:

1. They are integral in meeting the structural engineering requirements of the District's levee systems and dam safety program.
2. There are no practical alternatives at this time.
3. The toxicity and hazard exposure of these products applies only to the applicator at the time of application. These hazards are mitigated with protective clothing and eye protection which minimize the exposure hazard to the maximum extent.

The District believes that use of the less toxic products is beneficial to the environment and the health and safety of employees. The District's annual pesticide use summary report for calendar year 2007 is included in this section as Table 17.1.

The District began implementation of the arundo mitigation program in 2002. The eradication program has increased the District's use of some pesticides. The cut stump method of application minimizes the potential for environmental impacts. The District currently has a program for monitoring the water quality impacts of this work type.

The District continued the program in South County to control vegetation on levee roads, in right-of-ways, and on the top of banks. The District designated 2002 as the baseline year for measuring pesticide reduction. Several herbicides were reformulated in 2005, so the products were grouped by active ingredient. The District's Spartina (invasive species) mitigation program began using a different herbicide, Imazapyr, in FY 05-06. Baseline total for Imazapyr was set at 2005 usage. A comparison of 2002 usage to 2007 usage shows the following decreases and increases by active ingredient (Table 17.2) and a comparison of 2005 usage to 2007 usages shows the following decreases and increases (Table 17.3):

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
PEST MANAGEMENT

Ingredient	Baseline Reduction	Decrease From 2005
Chlorsulfuron	100.00%	0.00%
Clopyralid	100.00%	100.00%
Oryzalin	19.35%	2.06%
Pendimethalin	24.08%	47.88%
Sulfometuron-Methyl	100.00%	0.00%
Triclopyr	99.26%	98.26%

Ingredient	Baseline Increase	Decrease From 2005
Glyphosate	18.63%	6.38%

	Baseline Increase	Increase From 2005
Imazapyr	27.17%	27.06%
Isoxaben	36.85%	35.47%
Non-Ionic Surfactant	17.28%	5.56%

R-11 was not used in FY 2006-07, but will remain on the list of approved pesticides for possible use in the future.

Specifications were developed for Pest Control Operators (PCOs) contracted for District applications to use pest control methods consistent with the District's IPM Policy. PCOs are required to follow the District's IPM Policy, Best Management Practices, and Standard Operating Procedures; provide evidence of current IPM training, when requested; and provide monthly pesticide use reports. Implementation of the new specifications and a pesticide use tracking system began July 1, 2004.

ALTERNATIVE PEST MANAGEMENT PRACTICES

With more than 25 acres of unwanted vegetation rising up and around the Santa Teresa Water Treatment Plant, the District used nearly 700 goats to chew and munch away dry brush that could have posed a fire hazard if left unchecked. Using the goats was a welcome alternative to chemicals or mowing, which proved difficult in the past because of uneven slopes around the plant. This innovative approach reflects that the District is doing things differently and certainly keeping the environment in mind.

The District continued to integrate mechanical harvesting and non-toxic dye colorants with the use of algaecides and herbicides to manage algae at percolation ponds.

TRAINING/CERTIFICATION

Continuing education (CE) is required to maintain certification. Employees can obtain CEs through seminars sponsored by Pesticide Applicators Professional Association (PAPA), California Association of Pest Control Advisors (CAPCA), manufacturers and universities. CEs are tracked by PAPA/CAPCA and records can be obtained from their websites. All District employees prepare an Employee Performance Plan and County Agricultural Commissioner and the State Department of Pesticide Regulations certification and training requirements are included in individual

SANTA ANA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FOR FY 2007-08
PEST MANAGEMENT

Performance Plans. Performance Plan evaluations are conducted every January for all employees. Employees not meeting certification and training requirements contained in their Performance Plan may face disciplinary action or termination of employment.

Bi-weekly safety meetings are held that include IPM Policy, SOP and BMP training. Label training, hazardous spill response, symptoms of pesticide poisoning were some of the topics covered this past year.

BMP inspection checklists continue to be completed for both chemical and non-chemical vegetation management activities.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

The District will share water quality monitoring data and information from capital improvement projects and stream maintenance projects with the Program.

HIGHLIGHTS AND ACCOMPLISHMENTS

Coordinate Regional Monitoring Efforts of BASMAA, SCVURPPP, WMI, and District

The District Environmental Management Unit staff attended program and regional monitoring work group meetings including SCVURPPP Monitoring Ad-Hoc Work Group, BASMAA Monitoring Committee, WMI Assessment Subgroup meetings, and TMDL work group meetings (PCB, mercury, sediment), to identify opportunities for coordination and collaboration of monitoring activities. District staff continued participation in the Monitoring Ad Hoc Workgroup meetings and worked with the SCVURPPP Program to

share monitoring data. District staff reviewed and commented on Program monitoring work plans, monitoring reports, and assessments.

Upper Penitencia Creek Sediment Study

The District assisted with the Upper Penitencia Sediment Source and Management Practices Assessments by providing information on the operations of the diversion structures for the percolation ponds as well as by providing information on other water utility operations pertinent to Upper Penitencia creek. The District also provided significant information on the fisheries condition in the watershed. The District completed a review of the document and also convened a multi division meeting of managers and operations staff to respond to the Regional Boards questions on the first draft of the document in the fall of 2006. District also reviewed and commented on the various other Upper Penitencia Creek studies.

Saratoga Creek Watershed Assessment

The District has provided funding and coordination for a fish scale analysis of the fish scales that were collected for the Saratoga Creek Watershed Assessment. The District has also been working with the Program to ensure that Program staff collected samples from only public owned sites.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

The District will share water quality monitoring data and information from capital improvement projects and stream maintenance projects with the Program.

HIGHLIGHTS AND ACCOMPLISHMENTS

Coordinate Regional Monitoring Efforts of BASMAA, SCVURPPP, WMI, and District

The District Environmental Management Unit staff attended program and regional monitoring work group meetings including SCVURPPP Monitoring Ad-Hoc Work Group, BASMAA Monitoring Committee, WMI Assessment Subgroup meetings, and TMDL work group meetings (PCB, mercury, sediment), to identify opportunities for coordination and collaboration of monitoring activities. District staff participated in the Monitoring Ad Hoc Workgroup meetings and worked with the SCVURPPP Program to share

monitoring data. District staff reviewed and commented on Program monitoring work plans, monitoring reports, and assessments. The District has dedicated significant resources to work on the Guadalupe Watershed Mercury study and proposed TMDL. The District has also dedicated staff time to comment on the San Francisco Bay Mercury TMDL.

Major accomplishments included:

1. Provided debriefing on Solar Bee Mercury Removal efforts to pave the road for future support letters for grant funding.
2. Provided debriefing to WMI Land Use Subgroup on Stewardship Planning efforts to advocate the visions for the watersheds and better use of the information contained in the District's stewardship plans.
3. Facilitated the removal of "silver wash" washing machines from the water conservation rebate program, prevented toxic chemicals from entering the wastewater stream right from the source.
4. Played an important role to encourage City of San Jose to conduct a more thorough review of the impacts on groundwater resources for its Household Hazardous Waste Collection Facility.
5. Contributed to the planning of the June retreat for strengthening WMI's focus in its Watershed Action Plan implementation phase.
6. Led or supported several policy-level dialogues with the District Board of Directors, Environmental Advisory Committee and interested parties on Stream Protection, Restoration,
7. Contributed to the collection of nearly 300 slides for the Developing in Watersheds presentation.
8. Staffed field trips showcasing District project for the workshops hosted by the Land Use Subgroup.
9. Wrote an article for the District's internal newsletter to promote effective uses of the WMI functions.

Water Quality Index Project.

In the fall of 2004 the Environmental Management Unit implemented a study of general water quality monitoring in the Guadalupe Watershed to compare the watershed to other studies taking place in the country. This study was both time consuming and initially costly to conduct in both labor hours and laboratory fees. This study has just completed the collection of the seventh round (3.5 years) of sample collection in the Guadalupe River watershed. The study has completed its fourth round of sampling in the Stevens Creek and Coyote Creek watersheds. At the tidal sites both a high tide and a low tide sample was collected.

Coyote Creek results indicate that the water quality does generally fall into the excellent to good range in the upper watershed and tends to degrade slightly as one approaches the lower watershed area and the bay. This lower water quality is what one would

expect as the water from the urban environment contributes a higher concentration of pollutants than would be expected from the more rural reaches.

Stevens Creek results indicate a narrower range of variability between seasons and downstream locations as well. All the results are in the good range. The Permanente results are slightly lower than the Stevens results for approximately the same water shed elevation and this could possibly be due to industrial operations in the Permanente sub watershed.

Guadalupe River results indicate that the water quality does generally fall slightly above and bell the good range in the upper watershed and tends to degrade slightly as one approaches the lower watershed area and the bay. In general the tidal bay water tends to be of similar if not slightly lower quality than the stream water.

The study has been concluded for financial reasons as well for reasons associated with the contract laboratories performance. Should the study resume correlating WQI data with watershed rainfall and stream flow data would be interesting. Additionally the sites should be containing elevation information in the tables.

A summary of the Water Quality Index is attached from the National Sewer Foundation website for review and a description of parameters assessed.

From the NSF International website:

In an effort to develop a system to compare water quality in various parts of the country, over 100 water quality experts were called upon to help create a standard Water Quality Index (WQI). The index is basically a mathematical means of calculating a single value from multiple test results. The index result represents the level of water quality in a given water basin, such as a lake, river, or stream.

To determine the WQI, the following nine water quality parameters are measured:

- **Biochemical Oxygen Demand**
  The Biochemical Oxygen Demand (or BOD) is a measure of the amount of food for bacteria that is found in water. Bacteria utilize organic matter in their respiration and remove oxygen from the water. The BOD test provides a rough idea of how much biodegradable waste is present in the water. (Biodegradable waste is usually composed of organic wastes, including leaves, grass clippings, and manure).

- **Dissolved Oxygen**
  The dissolved oxygen test measures the amount of life-sustaining oxygen dissolved in the water. This is the oxygen that is available to fish, invertebrates, and all other animals living in the water. Most aquatic plants and animals need oxygen to survive; in fact, fish will drown in water when the dissolved oxygen levels get too low. Low levels of dissolved oxygen in water are a sign of possible pollution.
- **Fecal Coliform**
  Fecal coliform is a form of bacteria found in human and animal waste.
- **Nitrates**
  Nitrates are a measure of the oxidized form of nitrogen and are an essential macronutrient in aquatic environments. Nitrates can be harmful to humans, because our intestines can break nitrates down into nitrites, which affects the ability of red blood cells to carry oxygen. Nitrites can also cause serious illnesses in fish.
- **pH**
  The pH level is a measure of the acid content of the water. Most forms of aquatic life tend to be very sensitive to pH. Water containing a great deal of organic pollution will normally tend to be somewhat acidic. Water with a pH of 7 is considered neutral. If the pH is below 7, it is classified as acidic, while water with a pH greater than 7 is said to be alkaline. The pH of tap water in the U.S. is usually between 6.5 and 8.5.
- **Temperature Change**
  The water temperature of a river is very important, as many of the physical, biological, and chemical characteristics of a river are directly affected by temperature. Most waterborne animal and plant life survives within a certain range of water temperatures, and few of them can tolerate extreme changes in this parameter. Using the same thermometer, the water temperature should be checked at the test site and at a similar site one mile upstream. Care should be taken when taking the temperature upstream to ensure that the amount of sunlight and the depth of the river are similar to the original test site.
- **Total Dissolved Solids**
  This is a measure of the solid materials dissolved in the river water. This includes salts, some organic materials, and a wide range of other things from nutrients to toxic materials. A constant level of minerals in the water is necessary for aquatic life. Concentrations of total dissolved solids that are too high or too low may limit growth and lead to the death of many aquatic life forms.
- **Total Phosphate**
  Phosphates are chemical compounds made from the elements phosphorous and oxygen; they are necessary for plant and animal growth. Phosphates can be present in water in many forms, so total phosphate gives an estimate of the total amount of phosphate potentially available in a given water supply.
- **Turbidity**
  Turbidity is a measure of the dispersion of light in a column of water due to suspended matter. The higher the turbidity, the

cloudier the water appears. If water becomes too turbid, it loses the ability to support a wide variety of plants and other aquatic organisms.

After the nine water quality tests are completed and the results recorded, a "Q" value is calculated for each parameter, and the overall WQI for the sampling site is then calculated.

It is important to monitor water quality over a period of time in order to detect changes in the water's ecosystem. The Water Quality Index can give an indication of the health of the watershed at various points and can be used to keep track of and analyze changes over time.

What Does the WQI Mean?

The Water Quality Index uses a scale from 0 to 100 to rate the quality of the water, with 100 being the highest possible score. Once the overall WQI score is known, it can be compared against the following scale to determine how healthy the water is on a given day.

Table I - WQI Quality Scale

91-100:	Excellent water quality
71-90:	Good water quality
51-70:	Medium or average water quality
26-50:	Fair water quality
0-25:	Poor water quality

Water supplies with ratings falling in the good or excellent range would able to support a high diversity of aquatic life. In addition, the water would also be suitable for all forms of recreation, including those involving direct contact with the water. Water supplies achieving only an average rating generally have less diversity of aquatic organisms and frequently have increased algae growth.

Water supplies falling into the fair range are only able to support a low diversity of aquatic life and are probably experiencing problems with pollution. Water supplies that fall into the poor category may only be able to support a limited number of aquatic life forms, and it is expected that these waters have abundant quality problems. A water supply with a poor quality rating would not normally be considered acceptable for activities involving direct contact with the water, such as swimming.

The results of the District WQI pilot project to date are summarized in the Figures 19-1, 19-2, and 19-3 in this section of the report.

RESPONSE TO REGIONAL BOARD COMMENTS FROM PREVIOUS YEAR'S ANNUAL REPORT

No comments from the Regional Board were received on this section of last year's annual report.

PROGRAM EVALUATION

The Environmental Management Unit continued to conduct pre-rainy season inspections to facilitate site compliance whenever it was necessary or requested by Construction Inspection Unit staff. The frequency of construction site inspection coverage continued to remain high this past year. This was facilitated by Environmental Management Unit coordinating in the field with the construction inspectors and through the use of monthly email reminders to Construction Inspectors to conduct SWPPP evaluations.

SANTA CLARA VALLEY WATER DISTRICT
URBAN RUNOFF ANNUAL REPORT FY 2007-08
CONTINOUS IMPROVEMENT

HIGHLIGHTS AND ACCOMPLISHMENTS

The District continued to use the monthly inspection sheet developed in FY 02-03 to facilitate compliance and follow up inspections. The Environmental Management Unit continued to meet with the Construction Inspectors in the field to go over SWPPP implementation at construction sites. These field meetings proved very successful for several projects and will continue in FY 07-08.

Construction Administration Unit continues to use the Incident Response/Pollution Prevention Hotline to contact Environmental Management Unit staff to report construction sites that are creating sediment discharges.

Mr. Bruce H. Wolfe
Executive Officer
San Francisco Bay Region
Regional Water Quality Control Board
1515 Clay St., Suite 1400
Oakland, CA 94612

Subject: Sunnyvale Urban Runoff Management Program FY 2008-2009 Annual Report

Dear Mr. Wolfe:

This report is submitted by the City of Sunnyvale, in conjunction with the Santa Clara Valley Urban Runoff Pollution Prevention Program's Annual Report, pursuant to provision C.6.a. of the Program's municipal storm water NPDES Permit. The report summarizes activities performed during FY 2008-2009 in accordance with the City of Sunnyvale's Urban Runoff Management Plan (URMP) submitted on September 1, 2005, which contains modifications to the performance standards from the original URMP first submitted in 1997.

The goals of this Annual Report are to: 1) concisely document implementation of the URMP during the past fiscal year; 2) evaluate program results for continuous improvement; and 3) share this information with other Co-permittees, municipal decision-makers, and the public. To accomplish these goals, the report contains the following Attachments:

A. Certification statement
B. ICID Elimination Activities
C. Industrial/Commercial Discharger Control Program
D. Public Agency Activities
   1. Public Streets, Roads, and Highways O&M
   2. Rural Public Works O&M
   3. Storm Drain O&M
   4. Water Utility O&M
   5. Corp Yard O&M
E. New Development Planning Procedures
F. Construction Inspection
G. Public Information and Participation
   - General Outreach
   - Targeted Outreach
   - Educational Programs
   - Citizen Participation
H. Pesticide Management Activities
I. Mercury Pollution Prevention Activities
J. Copper Action Plan/Nickel Action Plan

Q. Storm Water Permit Renewal Activities

No comments were received from Regional Water Quality Control Board Staff on the FY 07-08 annual report submitted by the City, consequently, the report is substantially the same format as past years.

A summary of the City of Sunnyvale's Urban Runoff Program highlights and accomplishments are described below:

1) A significant amount of staff time and effort is dedicated to implement the C.3 provisions of the permit for applicable projects (i.e., those that add or replace 10,000 square feet or more of impervious area), construction inspection, and implementation of post-construction inspections as C.3 applicable projects are completed. A number of initial projects approved under the C.3 requirements are now complete and have undergone post-construction inspections this year. Reports on the post-construction inspections of those projects are included in this report in Attachment E, Appendix 1 Table 2.

2) In previous years, Sunnyvale completed a number of trash assessments using both the Keep America Beautiful on a variety of land uses and the Urban Rapid Trash Assessment (URTA) methodology in several local waterways. Rather than continue devoting resources to assessing trash in areas around Sunnyvale using the URTA methods, more actions were initiated to help remove and prevent litter from entering waterways. Only two locations were assessed on the Sunnyvale East and West Channels in FY 08-09 using the URTA, which are storm water conveyances for a significant portion of the city.

The efforts that were initiated in FY 08-09 to address the trash/litter accumulation in storm drains and waterways issue were:

- Sunnyvale hosted a site for the Coastal Clean Up Day event in September 2009 along the Guadalupe Slough, where it surrounds the Sunnyvale Water Pollution Control Plant's oxidation ponds. The Slough receives flow from San Tomas Aquino Creek, Calabazas Creek, Sunnyvale East Channel and Sunnyvale West Channel, as well as being tidally influenced by South San Francisco Bay. The event was very successful and plans are underway to support the event at the same location again this September.
- Sunnyvale participated in the Great American Litter Pick Up event held in April 2009, that focused on removing litter from three Sunnyvale neighborhoods (approximately 3 square miles- an increase over last year's efforts)
- Sunnyvale participated in the National River Clean-Up Day in May 2009 coordinating volunteers who picked up litter and debris from banks of the Sunnyvale East Channel and one side of Calabazas Creek, where it surrounds Sunnyvale Baylands Park.

- In cooperation with SCVURPPP and the City of San Jose, Sunnyvale continued participating in the pilot storm drain retrofit project. A total of thirteen storm drain inlet inserts that have been certified to meet the "full capture" criteria established by the Los Angeles area Regional Board were installed in areas around the city. The sites selected were based on data collected from inlet cleaning and on observations of adjacent land uses that may contribute to accumulations of litter. Preliminary data regarding the types and quantities of materials captured by these devices are included in this report in Attachment K, Appendix 1. Operations and maintenance requirements for the units as well as costs associated with them will be a major focus of this pilot project, with the information to be reported at the end of the pilot which will be made available in the fall of 2009.

- Additional outreach efforts, including media litter pollution prevention messages and litter pollution prevention education in schools were accomplished in FY 08-09. See Attachment G for details.

3) The PI/P Program continued with its effective outreach to local residents at the Sunnyvale Farmer's Market, school presentations, neighborhood and corporate fairs, pancake breakfasts, and many other community events, providing a good venue for distribution of literature and 1:1 discussions with residents on the importance of and ways to prevent storm water pollution. A significant effort was made to successfully increase the number of presentations at schools, which has been very successful and well received by teachers. Descriptions of these activities and their effectiveness are included in Attachment G.

4) City staff continues to play a significant role in implementing the Santa Clara Valley Green Gardener Training/Certification program, in cooperation with other co-permittees, the Metropolitan Adult Education Program in San Jose, and the Santa Clara County Master Gardeners. Four classes of this training program for landscape maintenance workers, landscape contractors, and professional gardeners was held in FY 08-09, with over 50 individuals successfully completing the attendance and final exam requirements for the class.

The Green Gardener program originated in Santa Barbara and has been successfully implemented there, as well as in Monterey and Santa Cruz counties. The main focus of the training is to reduce urban stormwater pollution resulting from landscape management practices, to use resources wisely, and to practice the key principles of ecological landscaping. Students received 20 hours of training in the following topics: promoting healthy soils, Integrated Pest Management (IPM), fertilizer use and application, irrigation techniques, scheduling, and troubleshooting, selecting the right plants for the right place, proper pruning, the beneficial uses of mulch and compost, and issues related to air quality from maintenance equipment.

Two awards were received for Santa Clara Valley Green Gardener program's implementation in FY 08-09. One was received from the California Storm Water Quality Association for their 2008 Outstanding Regional Stormwater News, Information, Outreach and Media Project. The other award received was IPM Innovator Award for 2008 from the Department of Pesticide Regulation.

Thank you for your review of this Annual Report. We look forward to receiving any comments you may have. If you have any questions regarding the materials submitted, please contact Kristy McCumby Hyland at (408) 730-7274.

Sincerely,

Lorrie B. Gervin, P.E.
Environmental Division Manager

ATTACHMENT A

Performance Standard Completion Certification Statement

"I certify, under penalty of law, that the City of Sunnyvale has implemented all elements of the following performance standards, except as described in the Self-Evaluation Matrix in Attachments B - Q of this FY 08-09 Annual Report, according to the policies and procedures described in the City of Sunnyvale's Urban Runoff Management Plan dated September 1, 2004:

- Illicit Connection and Illegal Discharge Elimination Activities
- Industrial/Commercial Discharger Control Program
- Public Streets and Roads Operations and Maintenance
- Storm Drain Operation and Maintenance
- Water Utility Operation and Maintenance
- Corporation Yard Operation and Maintenance
- Rural Public Works Operation and Maintenance
- New and Redevelopment Planning Procedures
- New and Redevelopment Construction Inspection Procedures
- Public Information and Participation
- Integrated Pest Management

Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, this information is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

FY 08 - 09 Annual Report

Attachment B

IC/ID Elimination Activities

P.S. Id.	Activity	CI Item Source[1]	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Illicit Connection & Illegal Dumping Elimination Activities					
	Effectiveness Evaluation of Enhanced Illicit Connection/Illegal Discharge (ICID) Reporting	Permit Prov. c.6.a.ii	Compile results recorded on the IC/ID standard reporting form for Type of Incident and Source of Incident. Identify new public outreach efforts and improve on existing materials. Continue to collect data for enhanced IC/ID reporting.	• The Pretreatment Program continues to compile results on the IC/ID standard reporting form for the Type of Incident and Source of Incident. • Efforts to identify new public outreach materials and venues continue. Residential sources continue to be the most prevalent sources of incidents, and among those, pools / spas / and fountain discharges, along with leaky vehicles are the most common type of incident.. • These types of incidents are being reported at a higher frequency much in part due to outreach efforts including articles in the Sunnyvale Quarterly report, and utility bill inserts. The public is becoming increasingly aware of the potential threats from these types of discharges, and is reporting them more frequently.	Annually Report 09/09	Sarah Scheidt, Sr. Ind. Waste Insp. & Steve Schmidt, Laboratory/ Pretreatment Mgr.
ICID-3a	Annual Training	URMP	Continue annual training for staff regarding IC/ID storm water inspection procedures, enhanced reporting requirements for ICID incidents, effectiveness evaluation and public outreach.	• Five staff members attended the CWEA Annual P3S Conference in Monterey, March 2009. One session attended was how to measure effectiveness of a pollution prevention program. • ICID storm water inspection procedures and inspection / enforcement results are discussed during weekly tailgate meetings.	Annually Report 09/09	Steve Schmidt, Laboratory/ Pretreatment Mgr., Sarah Scheidt, Sr. Ind. Waste Insp. & Kristy McCumby.

[1] Place where continuous improvement item is identified: e.g. Urban Runoff Management Plan (URMP); **WP 08-09** (last year's Sunnyvale work plan); **Permit Provision** from Order No. 01-024 and Revised Order No. 01-119; Program Work Plan (**PWP**) task number submitted to the Regional Board and identified for inclusion into co-permitees in work plans; or **Program** (task approved by the Management Committee for all co-permittees). The **P.S. Id.** column refers to the specific performance standard in the Sunnyvale URMP.

P.S. Id.	Activity	CI Item Source[1]	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
				• Topics of discussion include proper categorization of source and types of incidents in accordance with enhanced reporting requirements, enforcement and consistency with our ERP, and potential outreach opportunities. • Annual staff training is provided to other city employees regarding the reporting of incidents observed as they perform their work in different locations within the city. The "Discharge Response Card" is provided to employees with instructions as to numbers to call the types of incidents that should be reported.		
Illicit Connection and Illegal Dumping Elimination Activities (cont.)						
ICID-3.b	Restaurant IC/ID Reporting	URMP	Continue to review the effectiveness of Restaurant BMP materials. Note problem practices observed. Follow up with appropriate changes to educational materials and/or enforcement actions, as needed.	• The Pretreatment Program continues to evaluate the effectiveness of Restaurant BMP materials in use. Participation in regional groups such as BAPPG has given additional insight to new educational materials that may benefit the City's program and be implemented within restaurants. • Problem practices within restaurants are recorded on inspection forms, and will be used to evaluate educational materials provided in the future; and are used to justify enforcement actions.	Annually Report 09/09	Sarah Scheidt, Sr. Ind. Waste Insp. & Steve Schmidt, Laboratory/ Pretreatment Mgr.

Illicit Connection and Illegal Dumping Elimination Activities (cont.)						
ICID-5a	Effectiveness Evaluation	URMP	Evaluate responses to reported incidents and complaints. Determine effectiveness of program through review of ICID incident responses and resolution efforts. Identify areas for improvement.	• All responses to reported incidents and complaints occur within the time allotted in our performance standard (5 business days), and in a majority of cases are responded to within one day of the complaint. • The program follows through with each incident until it is resolved, usually through education and communication, and rarely resulting in increased enforcement actions.	Annually Report 09/09	Sarah Scheidt, Sr. Ind. Waste Insp. & Steve Schmidt, Laboratory/ Pretreatment Mgr.
ICID-5b	Performance Standard revision	URMP	Review the IC/ID Performance Standards with staff. Draft new performance standards, as necessary, to meet the needs identified in the effectiveness evaluation of the enhanced IC/ID program. Implement changes, as needed.	In anticipation of the new Municipal Regional Permit, no new Performance Standards have been drafted. Sunnyvale staff is participating in a newly created ad-hoc committee to address specific local and regional approaches and program development for the IC / ID standards.	Annually Report 09/09	Sarah Scheidt, Sr. Ind. Waste Insp. & Steve Schmidt, Laboratory/ Pretreatment Mgr.

FY 08 - 09 Annual Report

Attachment C

Industrial/Commercial Discharger Control Program

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Industrial/Commercial Discharger Control Programs						
ICD-3(a-d)	General Industrial Permit Facilities	URMP	Complete annual inspection of all industries regulated under Industrial Permit (NOI Filers).	• 96% of the current NOI filer list for Sunnyvale was inspected during FY 08/09. One facility not inspected because they recently filed for NOTs and do not have any outdoor process or storage that are exposed to stormwater. • The NOI list was reviewed and revised at the beginning of FY 08/09 and will be reevaluated for FY 09/10.	Annually Report 09/09	Sarah Scheidt / Senior Industrial Waste Insp. & Steve Schmidt,, Lab./ Pretreatment Mgr.
ICD-4	Field Investigation	URMP and Program Task	Review SWID location lists from SCVWD and facility inspections by Sunnyvale staff. Evaluate known SWIDs for potential pollutant sources that could impact groundwater.	There were no SWIDS identified during FY 08/09.	Annually Report 09/09	Sarah Scheidt / Senior Industrial Waste Insp. & Steve Schmidt,, Lab./ Pretreatment Mgr.
ICD-7.a	Record Keeping	URMP	Continue efforts to improve record keeping activities. Discuss progress at staff meetings.	• During each bi-weekly tailgate meeting, the Pretreatment Program addresses all threatened and actual discharge events to ensure that enforcement and related documentation is maintained and consistent. • The internally developed commercial database provides extensive capabilities for generating customized reports per inspector, street, facility type, or by inspection date. These features increase our capability to document effectiveness, trends and to fulfill the program standards.	Annually Report 09/09	Sarah Scheidt / Senior Industrial Waste Insp. & Steve Schmidt,, Lab./ Pretreatment Mgr.

Industrial/Commercial Discharger Control Programs (cont.)						
ICD-7.a	Performance Standard revision	URMP	Review existing performance standards and draft new performance standards, as necessary as a part of continuous improvement.	The Pretreatment Program did not make any changes to the Performance Standards in FY 08-09. The issuance of the new Municipal Regional Storm Water Permit will direct changes in future performance standards. Sunnyvale Pretreatment staff will be participating in a regional ad-hoc committee to address future ICD / IND permit requirements and program implementation through a consistent regional approach, yet specific to Sunnyvale's regulatory customers.	Annually Report 09/09	Sarah Scheidt / Senior Industrial Waste Insp. & Steve Schmidt,, Lab./ Pretreatment Mgr.
ICD-7.a	Annual Training	URMP	Continue annual training for staff regarding industrial/commercial storm water inspection procedures, enhanced reporting requirements for ICD inspections, effectiveness evaluation and public outreach.	Personnel attended the CWEA Annual P3S conference in Monterey. See Attachment M for specific training completed by City personnel.	Annually Report 09/09	Sarah Scheidt / Senior Industrial Waste Insp. & Steve Schmidt,, Lab./ Pretreatment Mgr.
	Enhanced Industrial/Commercial Discharger (ICD) Reporting	Permit Prov. C.6.a.i	Continue to collect data for enhanced ICD reporting. Coordinate with Program staff and share ICD information on a regular basis.	• Enhanced reporting data continues to be submitted to the SCVURPPP on a quarterly basis. IND report information is discussed at staff meetings to assess outreach or enforcement needed and program effectiveness. Communications with Public Works Sewer and Water Division includes sewer line blockage reporting for data input and related follow up. • See Appendix 1 of this Attachment for the IND/ICID Reporting tables.	Annually Report 09/09	Sarah Scheidt / Senior Industrial Waste Insp. & Steve Schmidt,, Lab./ Pretreatment Mgr.

Public Streets, Roads, and Highways Operation and Maintenance

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Public Streets, Roads, and Highways Operation and Maintenance						
ST-1	Use of O&M Pollution Control Measures	URMP	Continue full implementation of O&M measures. Report on implementation in Annual Report.	Full implementation continues per the requirements in the City's URMP for SOPs and BMPs.	Annually Report 09/09	Tony Pineda, Street Mnt. Sup.
ST-2	Record Keeping	URMP	Continue to track incidents that Street Maintenance staff responds to. Notify Pre-treatment Program of ICID incidents that may impact storm drains or water quality. Include staff training on enhanced ICID reporting requirements.	Incident discussed at tailgate meetings as needed. Conducted annual training on incident reporting and ICID response card was distributed to staff with information needed for reporting incidents observed. See Attachment M for staff training information	Annually Report 09/09	Tony Pineda, Street Mnt. Sup. & Sarah Scheidt, Sr. Ind. Waste Inspec..
ST- 2	Streets and Roads O&M	URMP	Continue to track and report on the quantities of debris removed through street sweeping activities.	Data is collected from street sweeping activities and reported in Appendix 1 of this Attachment.	Annually Report 09/09	Tony Pineda, Street Mnt. Sup & Kristy McCumby PW Env. Spec.
ST – 4	Staff Training	URMP	Continue to train staff on requirements of Storm Water Permit and on BMPs for street sweeping effectiveness.	Annual staff training is provided on the requirements of the City's URMP and BMPs. Additional discussions on street sweeping effectiveness are included at staff tailgate meetings, as needed.	Annually Report 09/09	Tony Pineda, Street Mnt. Sup & Kristy McCumby/ PW Env. Spec.
ST-6	Streets and Roads O&M	URMP	Annually review and evaluate effectiveness of O&M pollution control measures and BMPs.	Streets and Roads O&M measures and BMP's for storm water pollution prevention are discussed at tailgate meetings. SOPs modified as needed. No modifications of SOPs were identified for this year.	Annually Report 09/09	Tony Pineda, Street Mnt. Sup.

FY 08 - 09 Annual Report

Attachment D-1 – Appendix 1

Street Sweeping Data Collected for FY 08 - 09

Santa Clara Valley
Urban Runoff
Pollution Prevention Program

FY 2008-2009 Annual Record Keeping Form

Year: FY 08-09

Agency: City of Sunnyvale

Completed by: Brendan McCarthy, Administrative Aide **Date:** June 30, 2009

STREET SWEEPING	Volume of material collected (cubic yards)	Miles swept* (curb miles)
1. Sweeping		
Residential Areas:		
Broom		
Regenerative Air	6946	10,478
Vacuum		
Commercial Areas:		
Broom		
Regenerative Air	1966	(1) 4290
Vacuum		
Industrial Areas:		
Broom		
Regenerative Air		(1)
Vacuum		
Other Areas Swept: (e.g., parking lots, major arterials)		
Broom		
Regenerative Air		
Vacuum		(1)
TOTAL	8912	14,768

2. Have there been any changes in your street sweeping program?
(efforts to have parked cars removed, changed sweeping frequency, new equipment, significant downtime, etc.)
Sweeping is scheduled once per month in residential areas, more frequently in commercial areas. When requested, staff will post "No Parking" signs to remove parked cars in problem areas. Frequency is increased during heavy leaf drop season, and returned to reduced schedule during other seasons.

LEAF REMOVAL

Volume of leaves removed by City/Town crews: 994 **cubic yards**

Leaves bagged by residents and picked up by your City/Town: N/A bags

Check box if you have a yard waste collection program: X Volume of yard waste collected: 14,280 tons (2) ~~cubic yards~~

Check box if you do not have a leaf removal program other than routine street sweeping or yard waste collection: ☐

- Report total miles covered by sweepers including areas operated in tandem or repeated.

(1) These areas are all swept together (commercial, industrial, parking lots, arterials, no individual numbers are available.
(2) This is the total of yard waste trimmings collected from single family homes in FY 08-09

Rural Public Works Operation and Maintenance

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Rural Public Works					
	Rural Public Works Activities	Permit Prov. C.5	Implement applicable Rural Public Works Performance standards and BMPs. Continue education of Parks and Rec. and Field Services staff regarding rural PW BMPs and performance standards.	• Rural PW Performance standards apply to limited areas within the Sunnyvale Baylands. No grading or maintenance work that required moving earth was performed this year. • Vegetation management was performed in this FY. Mechanical means were used for vegetation (weed) removal for trail maintenance needs and BMPs were followed. • Field Services staff maintains a log to have maintenance or corrective activities for rural areas separate from regular street or storm work. • A Parks staff representative attended the Rural Public Works training provided by SCVURPPP this year. Rural Public Works BMPs are covered as part of the training for Public Works Field Services staff annually. • Staff training on Rural PW Performance Standards and BMPs is included in Streets and Roads Division and Parks and Rec. Dept. annual training. See Attachment M for staff training information.	Ongoing Report 08/09	Kristy McCumby, Environmental Specialist, Parks / Rec. (Scott Russell) & Public Works (Tony Pineda)

Attachment D-3

Storm Drain Operation and Maintenance

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Storm Drain System Operation and Maintenance						
SD-1	Storm Drain O&M Pollution Control Measures	URMP	Continue program to re-label storm drain inlets with identification tags or stenciling with "No Dumping, Flows to Bay" messages.	A database was created in FY 06-07 and is the basis for ID tag replacement program. The tag replacement program continued in 08-09 with 100 SDI's labeled in the Moffett Park area of the City	Report in 09-09	Jim Craig/ Tony Pineda, PW/ Field Services
SD-2	Reporting of Observed ICID Evidence	URMP and Permit Prov. C.6.a.ii	Continue to train maintenance staff on procedures to notify Pretreatment Inspectors about observed ICID incidents and assist with the collection of data needed for enhanced reporting.	Training was provided to Field Services staff from October 6-8, 2008. Staff was provided with ICID response cards and contact information to report ICID incidents. Annual review of enhanced ICID reporting requirements was conducted involving Pretreatment Staff. ICID response card has instructions as to what problems to look for and who to call for a response.	Annually Report in 09/09	Steve Schmidt, Laboratory/ Pretreatment Mgr., Sarah Schiedt, Sr. Ind. Waste Insp. & Jim Craig, Superintendent of Field Services
SD-3	Effectiveness Evaluation	URMP	Include O&M Performance Standard Implementation discussion in staff training; summarizing feedback in written form.	Feedback is provided to URMP Coordinator, Lorrie Gervin. Staff discussed implementation of O&M during regular trainings.	Annually Report 09/09	Jim Craig, Superintendent of Field Services
SD-4	Structural Retrofit Evaluation	URMP	Participate with SCVURPPP in pilot project to identify effective methods of reducing litter from entering storm drain system through the use of catch basin screens or other mechanisms. Evaluate costs associated with operations and maintenance needed to maintain effectiveness of mechanisms.	Field Services staff provided support for retrofitted inlet clean out activities and O&M data related to the Pilot Trash Retrofit project with SCVURPPP. Costs and maintenance requirements are undergoing evaluation and will be provided in the Pilot project report being prepared by SCVURPPP with the assistance of Sunnyvale staff. See Attachment K for details on the pilot project.	Report in 09-09	Kristy McCumby/ PW/Env. Spec. & Jim Craig/ Tony Pineda, PW/ Field Services
SD-5	Storm Drain O&M	URMP	Annually review and evaluate effectiveness of O&M pollution control measures	Implementation of O&M measures: • Annual drain inlet and flap gate (outfall) inspections • Weekly storm pumping station inspections and maintenance	Annually Report 09/09	Jim Craig, Superintendent of Field Services

FY 08 - 09 Annual Report

Attachment D-4

Water Utility Operation and Maintenance

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	Water Utility Operation and Maintenance					
WU-1	Inventory of Key O&M Activities	URMP	Inventory all key water utility O&M activities to identify routine and unplanned non-storm water discharges every three years. Modify as needed, in alternate years.	Inventory is to be performed every three years. Inventory was performed in 08/09 and is scheduled to be performed again in 10/11. Any needed revisions made at that time. Staff documents/reports any planned or unplanned discharges in excess of 50,000 gallons	Ongoing Report O9/09	Jim Craig, Sup. of Field Services & Val Conzet, Water PW Supervisor
WU-2	Pollution Control Measures Implementation	URMP	Review and update SOPs	No SOPs were revised this year. SOPs will be updated to meet the requirements of the MRP, once issued.	Report 09/09	Val Conzet, Water PW Supervisor Support: Kristy McCumby, Env. Specialist.
WU-3	Staff Training	URMP	Provide staff training on the regulatory requirements of the URMP and the use of the WUPPP.	Annual staff training was conducted in October 2008. Additional training is provided as needed. See Attachment M for staff training details.	Ongoing Report 09/09	Jim Craig, Sup. of Field Services & Val Conzet, Water PW Supervisor
WU-5	WUPPP	URMP	• Annually review and evaluate effectiveness of Water Utility Pollution Prevention Plan. • Update contact lists in the plan. • Use both staff and contractor (if appropriate) feedback.	The WUPPP was reviewed and no changes were required. The contact list is still appropriate, with the addition of some minor staff title changes.	Annually Report 09/09	Jim Craig, Superintendent of Field Services & Val Conzet, Water PW Supervisor
	Performance Standard Review and Revision	URMP	Participate in SCVURPPP Work Group that will be formed to update the Water Utility Operation and Maintenance Performance Standards	No work group was formed in FY 08-09, due to the work on the MRP. It is anticipated that revisions to the Performance Standards will be needed to meet the requirements of theMRP, once issued.	TBD Report 09/09	Val Conzet, Water PW Supervisor Support: Kristy McCumby, Env. Specialist.

Attachment D-5

Public Agency Activities: Corp Yard

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Corporation Yards Operation and Maintenance (Including Parks Division)						
Corp Yard SWPP	Staff Training	URMP	Hold annual Public Works staff training regarding the SWPPP for Corporation Yard.	• Provided one-hour training sessions to all Corp. Yard employees (See Attachment M for details); • Reviewed operational improvements as needed based on facility inspections and updated Plan; • Implemented annual review session at tailgate meetings. • Staff will continue to have yearly training and SOPs will be reviewed and updated as needed going forward.	Annually Report 09-09	Jim Craig, Superintendent of Field Services
Corp Yard SWPP	Staff Training	URMP	Hold annual Parks and Recreation staff training regarding the SWPPP for the Corporation Yard	Annual staff training on the Corp Yard SWPPP requirements was held on 3/26/09. See Attachment M for details on numbers attending.	Annually Report 09/09	Scott Morton, Interim Parks Superintendent With assistance from the Environmental Division of Public Works
Corp Yard SWPP	Annual Meetings with O&M Supervisor	URMP	Meet annually with URMP Coordinator /staff and CY supervisors on progress and problems in implementing BMPs at the Corporation Yard.	Meeting was not held in FY 08-09 as no BMP issues were identified. Annual meeting will take place before FY 09-10 wet season starts (October) to discuss appropriate implementation measures and any potential changes as the MRP moves forward toward adoption.	Annually Report 09/09	Jim Craig, Superintendent of Field Services

FY 08 - 09 Annual Report

Attachment E

New Development Planning Procedures

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
New Development and Construction Controls -- Planning Procedures						
PL-2	Site Design Guidance to Developers	URMP	Provide information and guidance material to developers early in the project development process regarding site design requirements for stormwater pollution prevention and treatment.	Information on the requirements for site designs to meet storm water permit C.3 provision requirements are provided either on CD or as hard copies to project proponents. The City's Stormwater BMP Guidance Manual was revised in January 2007 and continues to be provided upon request. Access to the manual is also available from the city's website in the Planning Department section at http://sunnyvale.ca.gov/Departments/Community+Development/Planning+Division/Commercial-Industrial+Planning/Stormwater.htm	Ongoing Report 09/09	Shaunn Mendrin, Senior Planner Support: Kristy McCumby, Env. Spec.
PL-10	Staff Training	URMP	Provide staff training (PW and CDD) on policies, design guidelines, and pre- and post construction BMPs and control measures.	• Staff is updated on a quarterly basis on any changes in the program and staff received annual refresher training September 10, 2008. • New staff members are provided with a one-on-one SWMP training as part of their orientation. • Staff training year included a refresher on the City's BMP Guidance Manual, as well as information on potential changes to the amount of impervious surface triggering the requirement for a SWMP. • Public Works staff attended the SCVURPPP C.3 workshop in June 2009 for post-construction inspection training. See Attachment M for training details.	Annually Report 09-09	Shaunn Mendrin, Senior Planner Support: Kristy McCumby, Env. Spec.

New Development and Construction Controls -- Planning Procedures (cont.)						
PL-11	Planning Procedure Performance Measures	URMP	Review performance measures in order to evaluate effectiveness and identify any changes that are needed.	Performance measures are reviewed on an annual basis to determine program effectiveness and opportunities from improvement. No changes were identified for this year.	Annually Report 09-09	Shaunn Mendrin, Senior Planner
PL-8b	Effectiveness Evaluation	URMP	Include Planning Procedures Performance Standard Implementation discussion in staff training; summarize feedback in written form.	Annual staff training includes information on any program changes related to enhancing program implementation. Feedback was received verbally and no changes were needed.	Annually Report 09-09	Shaunn Mendrin, Senior Planner
	C.3 b Development Project Approval Process					
	Revise URMP Planning Procedures Perf. Standards	Order 01-119 PWP C.3 b.1	Review Program Guidance as it becomes available. Identify new Planning Procedures Performance Standards and/or revise existing standards as needed, based on Program guidance.	• New program guidance is reviewed when received, and the program procedures and materials are revised as appropriate. • SMWP manual was updated in 2007 to reflect changes in program and program improvements. No new guidance on the revision of existing performance standards was received in FY 08-09. • Current performance standards are being implemented.	Ongoing Report 09/09	Shaunn Mendrin, Senior Planner and Kristy McCumby, Env. Spec.
	Project Review Process Training	Order 01-119 PWP C.3 b.3	Annually train Planning and Public Project staff on C.3 provisions, goals, and changes in the approval process and use of appropriate tools.	Planning and Building staff, Public Works CIP staff, and Pretreatment inspectors who do post-construction BMP inspections received refresher training on the Sunnyvale Storm Water BMP Guidance manual. This included the C.3 provision requirements, the City's project approval process, HMP applicability areas, coordination between departments and divisions, and ways improve communication. Planning staff training occurred in September 2008. Pretreatment	Annually Report 09/09	Lead Shaunn Mendrin, Senior Planner & Gordon Blancher Bldg. Insp. Support: Nasser Fakih & Kristy McCumby

				staff received training through SCVURPPP in June 2009 (See Attachment M for details.) No changes to the approval process or the BMP Guidance Manual were identified for this fiscal year.		
C.3.c Requirements for Group 1 and Group 2 Projects						
	Collect information for "Enhanced Reporting"	Order 01-119 PWP C.3 c.1	Collect information on each project (both public and private projects) covered by the enhanced performance standard for enhanced annual reporting requirements. Projects that add or replace over 10,000 sq ft of impervious area are now reported.	Data is collected on projects covered by the enhanced performance standard for annual reporting requirements. All relevant projects (adding or replacing over 10,000 sq ft of impervious area) are reported. (See Table 1, Parts 1 and 2, of this Attachment for data collected in FY 08-09	Ongoing Report 09/09	Shaunn Mendrin, Senior Planner (Private Projects) & Nasser Fakih PW (Public Projects)
C.3.e Operation and Maintenance of Treatment BMPs						
	Operation and Maintenance of Treatment BMPs	Order 01-119 PWP C.3 e.1	Continue to track information about treatment BMPs installed at approved projects that add or replace 10,000 sq. ft. of impervious area. Lists of properties, type of treatment BMP, and operators responsible for BMP maintenance will be tracked.	• The required information is tracked for treatment BMPs installed on approved projects applicable projects. The FY 08-09 data is included in Attachment E, Appendix Table 1 of this report. Information is provided to Pretreatment staff to assist with post-construction inspections. • The Pretreatment Program finds this information most useful when determining when and where to perform O&M verification inspections. Continuing to have up to date and accurate information is beneficial.	Ongoing Report 09/09	Lead: Shaunn Mendrin, Senior Planner & Gordon Blancher Building Insp. Support: PW Env. Division

C.3.e Operation and Maintenance of Treatment BMPs (cont.)						
	Long-term Maintenance of Treatment BMPs	Order 01-119 PWP C.3 e.3	Implement model agreement language for O&M of treatment BMPs to meet Sunnyvale needs. Incorporate requirements for long-term maintenance for all applicable projects (those that add or replace more than 10,000 sq. ft of impervious area).	• SMC 12.60 was amended to include all projects that add or replace 10,000 square feet of impervious area for C.3 compliance in October 2005. • Long-term maintenance requirements are included as Conditions of Approval and will continue to be incorporated as part of the project approval process. • Continuing improvements may include revisions to current practices of ensuring the O&M responsibilities are clearly communicated during the transition from the developer to the responsible owner operator.	Ongoing Report 09/09	Lead: Steve Schmidt/Sarah Scheidt, Sr. Ind. Waste Insp., Support Shaunn Mendrin, Senior Planner & Gordon Blancher, Bldg Insp. Coord.
	Effectiveness Evaluation of Inspection of Treatment BMPs	Order 01-119 PWP C.3 e.4	Incorporate long term Operations and Maintenance requirements into project approval process per SMC12.60.200.	Community Development and the Environmental Division continue to require applicable projects to incorporate long term BMP Operations and Maintenance agreements per SMC 12.60.200. The long-term O&M requirements are incorporated through the Storm Water Management Plan review process.	Ongoing Report 09/09	Steve Schmidt, Laboratory/ Pretreatment Mgr./Sarah Scheidt/Sr. Ind. Waste Inspector
	Annual report of treatment BMPs and ongoing verification program	Order 01-119 PWP C.3 e.6	Review and evaluate the effectiveness of the Operations and Maintenance Verification Program. This includes evaluating O/M Verification procedures, BMP inspection procedures, and evaluating and summarizing any improvements to the Program.	• The Environmental Division continues to coordinate with CDD to ensure the most effective methods of incorporating long term maintenance agreement requirements into applicable projects. • We continue to work with the Program to revise information collected from post-construction inspections as needed. • A Development Process Improvement Committee Core Team has been developed that includes Planning, Building, Engineering, Environmental,	Ongoing Report 09/09	Sarah Scheidt, Sr. Ind. Waste Insp. & Steve Schmidt, Laboratory/ Pretreatment Mgr.

				and other departments. The Committee will focus on streamlining the development approval process within the City, and will include process improvements to enhance the C3 regulatory process.		
C.3.f Hydromodification Management Plan						
	Implementation of HMP as required for projects that add or replace one-acre or more of impervious surface.	Order 01-119 PWP C.3 f.3	Implement HMP requirements for projects located in the HMP applicability areas identified in Sunnyvale. Projects must meet the impervious surface size threshold of the HMP and have the potential to cause increased erosion or other related impacts to non-exempt waterways.	• The parcels that meet HMP implementation criteria within Sunnyvale's jurisdiction have been identified and are limited to two specific areas that drain into portions of Calabazas Creek or Stevens Creek. • HMP actions for these parcels will be applied, if the sites are redeveloped. • No HMP – applicable projects were identified in FY 08-09	Ongoing Report 09/09	Lead: Planning and PW/ PW Env. Division staff
C.3.g Waiver and Compensatory Mitigation Program						
	Local waiver program	Order 01-119 PWP C.3 g.2	Continue tracking information on any projects with a Compensatory Mitigation Program approved by the City. Include project name, location, type, percent impervious surface, reasons for and terms of the waiver, and the alternative benefit project and completion date	No waiver requests have been received to date. CDD Planning and PW Engineering will continue to track any approvals granted under this program and provide them to PW Environmental staff for inclusion in the Annual report.	Ongoing Report 09/09	Lead: Planning, and PW Staff (TBD) Support: Lorrie Gervin/PW Env. Div. staff
C.3.j Site Design Measures Guidance and Standards Development						
	Modify local project approval process	Order 01-119 PWP C.3 j.4	Report on the status of review, revision and implementation of site design guidance and standards changed as a part of the City's project approval process to address the Development Policy - Compare and Contrast document. The proposed changes submitted with September 2004 annual report are used as a guide.	Site design guidance from the Development Policy Review project document has been implemented and staff incorporated issues of environmental concern (e.g., avoiding the use of ornamental copper) into the information provided to developers and in the recommended Conditions of Approval attached to conditionally approved permits. Most of the guidance is already	Ongoing Report 09/09	Lead: Shaunn Mendrin, Senior Planner Support: PW engineering, PW Env. Div.

				formally included in the Zoning Code, General Plan Elements, and/or other City documents. However, the ornamental use of copper has not yet been formally incorporated. Staff will formally incorporate this when the relevant documents are next updated (expected early 2010). In the meantime, Planning staff practice is to prohibit ornamental use of copper in exterior applications.		
	C.3.h Alternate Certification					
	Identify projects that have been certified by other parties	Order 01-119 PWP C.3.h	Summarize those stormwater management plans certified by a firm listed on the Qualified Consultants List the City developed in the Annual Report.	• Qualified Consultant list was updated in FY 06-07 and is used for projects. The next scheduled update of the list will occur in FY 09-10, pending the adoption of the MRP. • Training was provided to new staff from Nolte & Assoc. who had not received the consultant training in FY 06-07. • All projects where C.3 requirements are applicable (as listed in Attachment E, Appendix Table 1) must prepare a Storm Water Management Plan (SWMP). All SWMPs must be certified as meeting the requirements of SMC 12.60 by a Qualified Consultant from the City's list.	Ongoing Report 09/09	Lead: Shaunn Mendrin, Senior Planner Support: Kristy McCumby, PW/Env.
	C.3.k Source Control Measures					
	Implement conditions of approval for source control measures for applicable projects.	Order 01-119 PWP C.3 k.3	Continue Implementation of source control measure requirements by including appropriate conditions for approval for projects that add or replace 10,000 sq ft. of impervious area. Report status and provide examples of the application of these conditions in annual reports.	The City adopted source control requirements for all projects that add or replace 10,000 sq .ft. of impervious area in October 2005. Conditions of approval are reported in Attachment E, Appendix Table 1; Parts 1 & 2.	Ongoing Report 09/09	Lead Shaunn Mendrin, Senior Planner Support: Hira Raina/Nasser Fakih

C.3.l Update General Plans						
	Update General Plans	Order 01-119 PWP C.3 l.3	Review current General Plan policies regarding watershed protection and water quality. Identify changes or additional policies that need to be developed in order to implement the C.3 provisions of the permit.	• Current Surface Runoff Sub Element of the City's General Plan does not need any change in order to implement current C.3 provisions. • Council annually reviews and prioritizes potential study issue items. The Surface Water Sub-element has not received a high enough priority to be considered on their calendar over the last few years. Adoption of the Municipal Regional Permit may provide impetus to increase the priority of this item.	Revise after 10/15/04 at next scheduled time	General Plan Workgroup: Lead: Lorrie Gervin, Env. Div. Mgr. with assistance from Community Development, Public Works , and Office of the City Attorney staff to be determined as needed.
C.3.m Environmental Review Process						
	Environmental Review Process	Order 01-119 PWP C.3. m	Summarize revisions to the Environmental Review process, if any are made.	Legal review has not identified any changes needed to the existing process. No changes were made in FY 08-09	Annually Report 09/09	Lead: Shaunn Mendrin, Senior Planner Support: Hira Raina/Nasser Fakih
C.3.n Reporting Requirements						
	Reporting Requirements	Order 01-119 PWP C.3n.1	Provide information described in Table 1 in annual reports (Annual and One-time Reporting Requirements) of provision C.3) based on guidance from the Program.	This is an ongoing effort and will be continued annually, as required. This information is provided in Attachment E, Appendix Table 1.	Annually Report 09/09	Lead: , Shaunn Mendrin, Senior Planner (PW) Hira Raina/ Nasser Fakih
	Reporting Requirements	Order 01-119 PWP C.3 n.4	Collect and report the following for all projects that must implement treatment measures: -BMPs and Site Design -Source control measures used -sizing criteria -O&M responsibility mechanism -O&M responsible party	This is an ongoing effort. Information is collected by CDD and PW staff for projects implementing treatment BMPs. Information collected is reported in the Annual Report. This information is provided in Attachment E, Appendix Table 1. The post-construction inspection information is included in Appendix Table 2	Ongoing Report 09/09	Lead Shaunn Mendrin, Senior Planner Hira Raina/ Nasser Fakih Support: Public Works Env. Div. Staff (report writing)

C.3.n Reporting Requirements (cont.)						
	Reporting Requirements	Order 01-024 C.9.d.1 & Order 01-119 PWP C.3. n.5	- Ensure consideration of the use of pest-resistant landscaping and design features in the design, landscaping, and environmental review of development projects -Train staff on pest-resistant landscaping techniques and importance of minimizing pesticides in potential runoff from development sites -Collect and report a summary of pesticide reduction measures that are required for development projects and the percentage of projects that required pesticide reduction measures as conditions for their approval.	The IPM handout provided to all developers is used as an educational tool and summarizes the types of pesticide reduction measures required for new development and significant redevelopment projects. This is included in the Storm Water Management Plan development for the project. City staff receives training on the City's IPM policy and the importance of employing techniques that minimize impacts to storm water. All projects that must prepare a SWMP include pesticide reduction measures as COAs and are reported in Attachment E.	Ongoing Report 09/09	Lead: Shaunn Mendrin, Senior Planner Support: Kristy McCumby, Env. Spec.

City of Sunnyvale

FY 08 - 09 Annual Report

Attachment E –

Appendix 1 Table 1, Parts 1 & 2

Applicable Projects
Adding or replacing 10,000 sq ft of impervious area

New Development Planning Procedures

Applicable Projects (Part 1)
Significant Development Projects[1]
Reviewed and/or Approved July 1, 2008 – June 30, 2009

Project Name	Project Type[1]	Site Size (sq. ft.)	New Impervious Surface (sq. ft.)[3]	Area of Land[2] Disturbed (sq. ft.)	Project Status (incl. Date Deemed Complete)	Project Storm Water Control Measures
Private Projects – Applicable Projects						
1. Industrial Project at 384 Santa Trinita Avenue. Project No.: 2008-0407 **Description:** Remove existing buildings and construct office building.	Significant Redevelopment (Total rebuild)	198,634	83,292 sq.ft. increased to 135,094 sq.ft.	198,634	Deemed complete 7/2/09, approved by City Council on 8/8/08.	SWMP in progress. Expected to include: - Storm Water Treatment Measures - Source Control Measures
2. Retail Project at 112 El Camino Real Project No.: 2008-0456 Description: Remove existing building and construct new retail building.	Significant Redevelopment (Total rebuild)	264,845 sq.ft. or 6.08 acres	751,670 sq.ft. increased to 758,730 sq.ft. (when combined with 2008-0457)	306,630 sq.ft. (when combined with 2008-0457)	Deemed complete 7/7/08, approved by Planning Commission on 8/25/08	SWMP in progress. Expected to include: - Storm Water Treatment Measures - Source Control Measures - Site Design Measures
3. Retail Project at 150 E El Camino Real Project No.: 2008-0457 Description: Remove existing building and construct new retail building.	Significant Redevelopment (Total rebuild)	446,925 sq.ft. or 10.2 acres	751,670 sq.ft. Increased to 758,730 sq.ft. (when combined with 2008-0456)	306,630 sq.ft. (when combined with 2008-0456)	Deemed complete 7/7/08, approved by Planning Commission on 8/25/08	SWMP in progress. Expected to include: - Storm Water Treatment Measures - Source Control Measures - Site Design Measures

[1] For projects approved as of October 15, 2005, applicable projects are those that add or replace 10,000 square feet of impervious area.
[2] As defined in C.3.c If the site is a "significant redevelopment", list the area of land disturbance.
[3] "New" is defined as impervious surface added, created, or replaced.

Project Name	Project Type[1]	Site Size (sq. ft.)	New Impervious Surface (sq. ft.)[3]	Area of Land[2] Disturbed (sq. ft.)	Project Status (incl. Date Deemed Complete)	Project Storm Water Control Measures
Private Projects – Applicable Projects						
4. Commercial Project at 399 W Java Drive. Project No.: 2008-0459 **Description:** Construction of new office building and parking structure.	Significant Redevelopment (Total rebuild)	143,269	108,134 sq.ft. increased to 217,004 sq.ft.	143,269	Deemed complete 5/5/08, approved by Planning Commission on 8/11/08	SWMP in progress. Expected to include: - Storm Water Treatment Measures - Source Control Measures
5. Commercial Project at 1010 Sunnyvale Saratoga Road. Project No.: 2007-0306 **Description:** Remove existing building and construct new retail building for Rite-Aid.	Significant Redevelopment (Total rebuild)	66,558	46,463 sq.ft. increased to 51,902 sq.ft.	66,558	Deemed complete 12/17/09, approved by City Council on 2/24/09.	SWMP in progress. Expected to include: - Storm Water Treatment Measures - Source Control Measures - Site Design Measures
6. Mixed Use Project at 401 Town and Country. Project No.: 2008-0399 **Description:** Remove existing buildings and construct new mixed use building.	Significant Redevelopment (Total rebuild)	360,223	333,556 sq.ft. increased to 345,113 sq.ft.	356,670	Deemed complete 5/27/09, denied by Planning Commission on 6/22/09. Appeal Filed 6/25/09, hearing will occur in FY 09-10.	SWMP in progress. Expected to include: - Storm Water Treatment Measures - Source Control Measures
7. Mixed Use Project at 1287 Lawrence Station Road. Project No.: 2006-0712 **Description:** Remove existing buildings and construct new mixed use buildings.	Significant Redevelopment (Total rebuild)	288,585	204,732 sq.ft. increased to 216,928 sq.ft.	288,585	Deemed complete 9/17/08, approved by City Council on 11/18/08.	SWMP in progress. Expected to include: - Storm Water Treatment Measures - Source Control Measures

Project Name	Project Type[1]	Site Size (sq. ft.)	New Impervious Surface (sq. ft.)[3]	Area of Land[2] Disturbed (sq. ft.)	Project Status (incl. Date Deemed Complete)	Project Storm Water Control Measures
Private Projects – Applicable Projects						
8. Mixed Use Project at 660 S. Fairoaks Avenue. Project No.: 2008-1245 **Description:** Remove existing buildings and construct new residential buildings.	Significant Redevelopment (Total rebuild)	120,079	102,209 sq.ft. increased to 84,795 sq.ft.	88,210	Deemed complete 2/11/09, approved by City Council on 6/6/09.	SWMP in progress. Expected to include: - Storm Water Treatment Measures
9. Residential Project at 585 Old San Francisco Road. Project No.: 2008-1259 **Description:** Remove existing buildings and construct new residential building.	Significant Redevelopment (Total rebuild)	12,086	1,600 sq.ft. increased to 4,200 sq.ft.	12,086	Deemed complete 3/12/09, approved by City Council on 6/6/09.	SWMP in progress. Expected to include: - Storm Water Treatment Measures
10. Residential Project at 127 W. California Avenue. Project No.: 2008-0238 **Description:** Remove existing buildings and construct residential building.	Significant Redevelopment (Total rebuild)	12,280	10,011 sq.ft. decreased to 8,393 sq.ft.	12,280	Deemed complete 5/14/08, approved by City Council on 1/27/09.	SWMP in progress. Expected to include: - Storm Water Treatment Measures - Source Controls -Site Design

Santa Clara Valley Urban Runoff Pollution Prevention Program
Attachment E- Table 1. *Report Form for Planning Procedures Performance Standard and Provision C.3.n*
FY 2008-2009 Annual Report
Municipality: Sunnyvale

Project Name	Project Type[1]	Site Size (sq. ft.)	New Impervious Surface (sq. ft.)[3]	Area of Land[2] Disturbed (sq. ft.)	Project Status (incl. Date Deemed Complete)	Project Storm Water Control Measures
Private Projects – Applicable Projects						
11. Commercial Project at 301 & 410 Old San Francisco Road. Project No.: 2007-1293 **Description:** Remove existing buildings and construct new medical facility.	Significant Redevelopment (Total rebuild)	213,444	181,457 sq.ft. decreased to 113,129 sq.ft.	213,444	Deemed complete 6/8/09, approved by City Council on 6/23/09.	SWMP in progress. Expected to include: - Storm Water Treatment Measures
12. Industrial Project at 1450 Kifer Road Project No.: 2008-0744 **Description:** Remove existing accessory buildings, add architectural elements and site modifications.	Significant Redevelopment (Total rebuild)	234,575	206,280 sq.ft. decreased to 202,950 sq.ft.	38,728	Deemed complete 8/13/08, approved by Community Development Director on 8/25/08.	SWMP in progress. Expected to include: - Storm Water Treatment Measures - Site Design Measures
Public Projects – Applicable projects						
1. Borregas Ave POCs at Routes 101 and 237 Bicycle/pedestrian overpass over Routes 101 and 237	New Construction	81,000	19,600	53,000	Project funding was approved by City Council in 1999, prior to current stormwater permit requirements.	Project is for non-motorized vehicles only (pedestrian and bicycle route) so provision C.3.(c) i. (2) did not apply to this project

Applicable Projects (Part 2)
Significant Development Projects[2]
Reviewed and/or Approved July 1, 2008 – June 30, 2009

Project Name	Treat-ment BMPs	Numeric Sizing Criteria Used	O&M Responsibility Mechanism and Responsible Party	Site Design Measures	Source Control Measures	Pesticide Reduction Measures
Private Projects – Applicable projects						
1. Industrial Project at 384 Santa Trinita Avenue. Project No.: 2008-0407 **Description:** Remove existing buildings and construct office building.	Hydro-dynamic devices (CDS Unit)	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	All runoff flows through site conveyance system to CDS unit.	Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
2. Retail Project at 112 El Camino Real Project No.: 2008-0456 Description: Remove existing building and construct new retail building.	Hydro-dynamic devices (CDS Unit) & Biofilter	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff either flows through Biofiltration or through site conveyance system to CDS unit.	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
3. Retail Project at 150 E El Camino Real Project No.: 2008-0457 Description: Remove existing building and construct new retail building.	Hydro-dynamic devices (CDS Unit) & Biofilter	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff either flows through Biofiltration or through site conveyance system to CDS unit.	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs

[1] For Projects approved as of October 15, 2005, reporting applicable projects – those that add or replace 10,000 square feet of impervious area.
[2] As defined in C.3.c If the site is a "significant redevelopment", list the area of land disturbance.
[3] "New" is defined as impervious surface added, created, or replaced.

Project Name	Treat-ment BMPs	Numeric Sizing Criteria Used	O&M Responsibility Mechanism and Responsible Party	Site Design Measures	Source Control Measures	Pesticide Reduction Measures
Private Projects – Applicable projects						
4. Commercial Project at 399 W Java Drive. Project No.: 2008-0459 **Description:** Construction of new office building and parking structure.	Hydro-dynamic devices (CDS Unit) & Biofilter	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff either flows through Biofiltration or through site conveyance system to CDS unit.	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
5. Commercial Project at 1010 Sunnyvale Saratoga Road. Project No.: 2007-0306 **Description:** Remove existing building and construct new retail building for Rite-Aid.	Biofilter	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff flows through Biofiltration, disconnected downspouts, limited impervious surface, use of beneficial landscaping and covered dumpster area.	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
6. Mixed Use Project at 401 Town and Country. Project No.: 2008-0399 **Description:** Remove existing buildings and construct new mixed use building. **Denied pending appeal FY 09-10	Hydro-dynamic devices (CDS Unit)	Volume Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff through site conveyance system to CDS unit.	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs

Project Name	Treat-ment BMPs	Numeric Sizing Criteria Used	O&M Responsibility Mechanism and Responsible Party	Site Design Measures	Source Control Measures	Pesticide Reduction Measures
Private Projects – Applicable projects						
7. Mixed Use Project at 1287 Lawrence Station Road. Project No.: 2006-0712 **Description:** Remove existing buildings and construct new mixed use buildings.	Hydro-dynamic devices (CDS Unit) & Biofilter	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff either flows through Biofiltration or through site conveyance system to CDS unit.	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
8. Mixed Use Project at 660 S. Fairoaks Avenue. Project No.: 2008-1245 **Description:** Remove existing buildings and construct new residential buildings.	Hydro-dynamic devices (CDS Unit) & Biofilter	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff either flows through Biofiltration or through site conveyance system to CDS unit.	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
9. Residential Project at 585 Old San Francisco Road. Project No.: 2008-1259 **Description:** Remove existing buildings and construct new residential building.	Biofilter & Hydro-dynamic devices (CDS Unit)	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff either flows through Biofiltration or beneficial landscaping	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
10. Residential Project at 127 W. California Avenue. Project No.: 2008-0238 **Description:** Remove existing buildings and construct residential building.	Biofilter & Hydro-dynamic devices (CDS Unit)	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff either flows through Biofiltration or beneficial landscaping	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs

Private Projects – Applicable projects						
11. Commercial Project at 301 & 410 Old San Francisco Road. Project No.: 2007-1293 **Description:** Remove existing buildings and construct new medical facility.	Hydro-dynamic devices (CDS Unit) & Biofilter	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff either flows through Biofiltration or through site conveyance system to CDS unit.	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
12. Industrial Project at 1450 Kifer Road Project No.: 2008-0744 **Description:** Remove existing accessory buildings; add architectural elements and site modifications.	Biofilter	Flow Hydraulic Design Basis using '03 CA Stormwater Quality BMP Handbook, and local rainfall data.	Formalized through Conditions of Approval, 3rd party certification, and recording SWMP with the Deed. Property owner responsible for O&M.	SWMP is still in progress. Tentatively: All runoff either flows through Biofiltration, planter boxes, minimize change in runoff and minimal land disturbance.	SWMP is still in progress. Tentatively: Maintenance (street sweeping, catch-basin cleaning).	Education, COAs
Public Projects – Applicable projects						
1. Borregas Ave POCs at Routes 101 and 237 **Description:** Bicycle/pedestrian overpass over CA Routes 101 and 237 connecting to North Borregas Ave bicycle lanes	Not ap-plicable to this project	Not applicable to this project	Not applicable to this project	Not applicable to this project	Litter control, street sweeping and catch-basin cleaning at access points to city streets.	Not applicable to this project.

FY 08 - 09 Annual Report

Attachment F

Construction Inspection

P.S. Id.	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
	New Development and Construction Controls – Construction Site Inspection					
CI-1-4	Construction Inspection Performance Standards	URMP	Conduct annual staff review of performance measures in order to evaluate their effectiveness.	CDD- Building Division: All performance standards are being implemented and are effective. Staff provides outreach materials to contractors and developers by attaching copies of construction tri-folds "Preventing Pollution, It's up to Us" or the "Sunnyvale Blueprint for a Clean Bay" to plans and/or job card before permits are issued. 48 written Erosion/sediment Control Correction Notices and Re-inspection Notices were issued this F Y for private projects.	08/09	Gordon Blancher, Building Inspector /Coordinator
CI-2 - CI-5	Inspection of sites with significant erosion potential and construction planned for the wet season	URMP	Conduct inspections of sites (public and private) with significant erosion potential and/or construction planned during the wet season. Ensure that erosion and sediment control measures are implemented in accordance with SMC, the SWPPP, and any conditions of approval for the project.	CDD- Building Division: Inspections of project were done to ensure that the projects erosion and sediment control measures are maintained, as needed during construction. Enforcement for compliance with SMC requirements was done, as needed. PW – Capital Projects: The inspection staff inspected capital projects and encroachment permit projects daily, before storms and after storms.	Ongoing Report 09/09	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector

	New Development and Construction Controls – Construction Site Inspection (cont.)					
CI-4	Effectiveness Evaluation: Private Development and Public Works Inspection Program	URMP	Annually review and evaluate effectiveness of inspection programs using staff and/or contractor feedback	CDD- Building Division: Staff and contractor feedback indicate that the inspection programs are effective and meeting goals. Using the "FIELD INSPECTION – BMP'S" notices helps with documenting violations and corrective actions. PW – Capital Projects: The evaluation and effectiveness of the inspections programs are being implemented without any problems.	Annually Report 09/09	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector
	Construction Inspection Performance Standards	Permit Prov. C.3.a. (vi)	• Annually train Construction Inspection staff (both Community Development and Public Works) on current Construction Inspection Performance Standards and any changes to BMPs and SOP's. Also include training on construction inspection procedures, documentation, and enforcement. • Every two years, all inspectors will receive training on the latest construction BMPs and techniques. Implementation of BMPs and SOP's will be discussed, as needed, at regular staff meetings.	CDD- Building Division: Information on training activities for all CDD-Building Division staff is presented in Attachment M of this report. Training DVD "Hold on to your Dirt" was used at one of the training sessions. PW – Capital Projects: The inspection staff has been undergoing inspection training at least once every 2 years. Staff viewed "Keep it Clean" training DVD at on of their sessions. See Attachment M for training details.	Annually, before October 1 Report 09/09	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector

	New Development and Construction Controls – Construction Site Inspection (cont.)					
	Erosion and Sediment Control Plans by Contractors for Public Projects	Permit Prov. C.3.a. (iv)	CDD Building Inspection staff and PW Construction staff to ensure that developers/contractors of projects with significant erosion potential and planned construction during the wet season have prepared an effective erosion and/or sediment control plan prior to the start of the wet season.	CDD- Building Division: Compliance with erosion and/or sediment control plans was required for projects prior to the start of the wet season. Inspectors checked to make sure the plans were done and BMPs in place. There was good cooperation from developers and contractors to meet these requirements. PW – Capital Projects: Construction inspection staff has complied with these requirements.	Ongoing Report 09/09	Gordon Blancher, Building Inspector /Coordinator Nasser Fakih, PW Inspector
	Municipal capital improvement project stormwater quality control measures	Permit Prov. C.3.a. (v)	Perform and document inspections of contractors on capital improvement projects to ensure their compliance with stormwater quality control requirements during construction and maintenance activities. Initiate enforcement actions, as needed. Report annually on results of inspection program.	Inspections are performed daily and reported in the inspector's daily reports. Enforcement actions and any violations observed are provided in Table 1 of this Attachment..	Ongoing Report 09/09	Hira Raina, Nasser Fakih

City of Sunnyvale

FY 08 - 09 Annual Report

Attachment G

Public Information and Participation

	Activity	CI Item Source	FY 08-09 Tasks	Status / Comments	Due Date (mo/yr)	Responsible Party
Public Information / Participation						
PIP-1	Identification of pollution issues/problems	URMP	Continue to discuss water pollution prevention, conservation, and watershed education with regional co-permittees, pretreatment staff, and urban runoff staff to determine current issues and pollutants of concern.	Regional, local and internal discussions are centered on water pollution prevention, conservation, and watershed education. Projects implemented by Sunnyvale in FY 08-09 were consistent with the issues and pollutants of concern discussed. • See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 08-09.	Ongoing Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator
PIP-2	Implementation of strategy to address issues	URMP	In order to insure efficient and effective use of resources, we will continue to select projects that automatically send behavior change messages to the greatest number of people without requiring staff to be present. In addition, we will lend support to regional projects and events that endeavor to increase behavioral change thorough public education.	When large audience reach must be achieved, mass media can play a key role in its effectiveness. Sunnyvale successfully utilizes mass media to send public education and behavior change messages regarding water pollution prevention to our target audiences. Media projects implemented in FY 08-09 included on-screen theater ads, bus back ads, utility bill inserts, newspaper articles and ads, website postings, flyers, community cable TV, poster distributions and literature kiosks. • See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 08-09.	Ongoing Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator

Public Information / Participation (cont.)						
PIP-3	Dissemination of outreach/education materials	URMP	Continue to update and develop new materials and information, and disseminate material to targeted audiences through participation in school and youth programs, industry-related events, presentations, community requests, plant tours, Farmers' Markets, and regional events.	Outreach material is monitored for restock and edited for content as necessary. New materials are developed as needed (a new Green Gardener piece was developed in FY 08/09), and literature is disseminated as described in Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 08-09.	Ongoing Report 09/09	Jackie Besoyan Environmental Outreach Coordinator
PIP-4	Municipal Employee Training	URMP and Permit Prov. C.9	Provide annual training to Community Development, Parks and Recreation, and Public Works Department staff related to URMP Performance Standards, BMPs, and Watershed Outreach and Education campaign. (See IPM Policy and Hg Policy outreach sections for similar tasks)	Annual training as identified in the City's URMP is performed annually. See Attachment M for a list of training provided and numbers attending for CDD, Parks & Rec., and Public Works Field Services staff in FY 08-09. Additional city-wide staff training on specific issues is provided through staff newsletters and articles.	Ongoing Report 09/09	Kristy McCumby, Environmental Specialist & Steve Schmidt, Laboratory/ Pretreatment Mgr.
PIP-5	Evaluation of effort and strategy	URMP	Use various feedback methods to determine public evaluation of materials, events and workshops, and when possible, evaluate level of increased awareness of pollution prevention issues. In an ongoing effort, staff will use public feedback to evaluate strategies used in selected projects.	Evaluation forms are distributed and reviewed. The evaluation forms are not used to measure differences in usage patterns or behavior change, but to determine satisfaction with the presentation or activity. Feedback is used to modify and fine tune projects, presentations, and workshops. Currently, the level of increased awareness is chiefly established through the number of individuals reached.	Ongoing Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator

	Public Information / Participation (cont.)					
PIP-5	Work Plan Revision	URMP	As a result of ongoing evaluation and discussions as listed in PIP-1, determine projects to be continued, deleted or added.	Outreach provides a wide-range of education to targeted and general audiences through participation in various events and activities in Sunnyvale, through use of media, and in project collaborations with other agencies and partners both regional and local. Projects Added: Thermometer Exchanges, Bus Back Ads, Library Presentations, Community Kids Workshops, Muslim Green Team event Projects Deleted: Earth Day Event at Laurelwood School and Global Sunnyvale Projects Continued: for a listing of activities and events. • See Attachment G Table 1- Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 08-09	Ongoing Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator
	Mercury Outreach	Permit Prov. C.9.c	In coordination with the Program and County-wide efforts, develop and continue to implement an educational outreach program to residential audiences regarding recycling of fluorescent lights, the proper disposal of other mercury-containing products, and the availability of non-mercury containing alternatives. Monitor and document results in the Annual Report. (Also see Control Program for Mercury for additional Outreach tasks.)	Through ongoing collaboration and effort, Sunnyvale continues to develop and implement educational outreach to residential audiences regarding non-mercury alternative devices, recycling and proper disposal of mercury containing products, retail stores program for fluorescent disposal options, and water pollution prevention. • See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 08-09.	Ongoing Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator and HHW/SMaRT station staff

Public Information / Participation (cont.)						
	Integrated Pest Management Outreach	Permit Prov. C.9.d	Provide local public outreach on proper use and disposal of pesticide products and use of less toxic pest control methods. Support the Program on local IPM Store Partnership activities. Participate in Regional outreach events. (Also see Control Program for Pesticides for additional Outreach tasks.)	Sunnyvale supports the IPM store partnership program, participates in Regional outreach events, and consistently provides local public outreach on proper use and disposal of pesticides, and use of less toxic pest control methods. • See Attachment G Table 1 - Detailed Descriptions PIP Activities and Self-Evaluation Matrix for FY 08-09. • See Attachment H, Apdx. 2 for a discussion on Sunnyvale's participation in the Santa Clara Valley Green Gardener program and its outreach to both the public and to potential students for the training program.	Ongoing Report 09/09	Jackie Besoyan, Environmental Outreach Coordinator
